Letter of Bondability
For
Samsula Waste, Inc.

To Whom It May Concern:

This letter confirms the bondability and serves as a letter of recommendation for Samsula Waste, Inc., a client we have the pleasure of providing bonding for since 2023.

Samsuala Waste, Inc. has demonstrated an excellent track record for satisfied customers, timely and complete projects and quality craftsmanship all with no losses or claims. It is our distinct pleasure to represent their company's bonding needs.

After a complete and careful review of their file we are pleased to confirm the following bonding range of Surety credit with us:

1) A single, per project limit up to the **$1,500,000.00** range.
2) An Aggregate (maximum work on hand) limit up to the **$3,000,000.00** range.

Developers Surety and Indemnity Company (DSIC) is an A.M. Best A-XV Treasury Listed California Insurance Carrier and California Admitted Surety. *DSIC is an underwriting company wholly owned by AmTrust Financial Services, Inc. (AFSI), a global insurance carrier. DSIC is listed with the U.S. Department of Treasury as a certified surety company capable of providing sizeable bonds on federal projects.*

All bond requests are subject to our underwriting guidelines, at the time of the request, which will include but not limited to the acceptability of the contract documents, terms and conditions, bond forms and project financing. We assume no liability to third parties or to you by issuance of this letter or if, for any reason, we do not approve/execute said bond(s).

It has been a pleasure dealing with Samsula Waste, Inc. thus far and we look forward to representing their bonding needs for the future.

Sincerely,

Bonnie Robbins
Attorney-In-Fact

**POWER OF ATTORNEY FOR**
**COREPOINTE INSURANCE COMPANY**
**DEVELOPERS SURETY AND INDEMNITY COMPANY**
59 Maiden Lane, 43rd Floor, New York, NY 10038
(212) 220-7120

KNOW ALL BY THESE PRESENTS that, except as expressly limited herein, COREPOINTE INSURANCE COMPANY and DEVELOPERS SURETY AND INDEMNITY COMPANY, do hereby make, constitute and appoint:

Rose Vittiglio, Barry Page, Bonnie Robbins, Marsha Wendt, Charles Bornazian, Jean E. Liu and Brenna Tuccelli, of Longwood, FL

as its true and lawful Attorney-in-Fact, to make, execute, deliver and acknowledge, for and on behalf of said companies, as sureties, bonds, undertakings and contracts of suretyship giving and granting unto said Attorney-in-Fact full power and authority to do and to perform every act necessary, requisite or proper to be done in connection therewith as each of said company could do, but reserving to each of said company full power of substitution and revocation, and all of the acts of said Attorney-in-Fact, pursuant to these presents, are hereby ratified and confirmed. This Power of Attorney is effective April 3, 2023 and shall expire on December 31, 2025.

This Power of Attorney is granted and is signed under and by authority of the following resolutions adopted by the Board of Directors of COREPOINTE INSURANCE COMPANY and DEVELOPERS SURETY AND INDEMNITY COMPANY (collectively, "Company") on February 10, 2023.

RESOLVED, that Sam Zaza, President, Surety Underwriting, James Bell, Vice President, Surety Underwriting, and Craig Dawson, Executive Underwriter, Surety, each an employee of AmTrust North America, Inc., an affiliate of the Company (the "Authorized Signors"), are hereby authorized to execute a Power of Attorney, qualifying attorney(s)-in-fact named in the Power of Attorney to execute, on behalf of the Company, bonds, undertakings and contracts of suretyship, or other suretyship obligations; and that the Secretary or any Assistant Secretary of the Company be, and each of them hereby is, authorized to attest the execution of any such Power of Attorney.

RESOLVED, that the signature of any one of the Authorized Signors and the Secretary or any Assistant Secretary of the Company, and the seal of the Company must be affixed to any such Power of Attorney, and any such signature or seal may be affixed by facsimile, and such Power of Attorney shall be valid and binding upon the Company when so affixed and in the future with respect to any bond, undertaking or contract of suretyship to which it is attached.

IN WITNESS WHEREOF, COREPOINTE INSURANCE COMPANY and DEVELOPERS SURETY AND INDEMNITY COMPANY have caused these presents to be signed by the Authorized Signor and attested by their Secretary or Assistant Secretary this March 27, 2023.

**BID BOND**

**BID BOND**

Bond No.:

KNOW ALL MEN BY THESE PRESENTS that Samsula Demolition, as Contractor, duly authorized to conduct business in the State of Florida, whose principal place of business is located at 363 S State Rd 415, NSB, Fl 32168, Tel.: 386-423-6769, (hereinafter called "PRINCIPAL"), and Developers Surety and Indemnity Company, as SURETY, duly authorized to conduct business in the State of Florida, whose principal place of business is located at 59 Maiden Lane, 43rd Fl, New York, NY, Tel: 212-220-7120 (hereinafter called "SURETY"), are held and firmly bound unto the City of Port Orange, Florida, as CITY, a Florida municipal corporation, whose address is City of Port Orange, 1000 City Center Circle, Port Orange, Florida 32129, Tel: (386) 506-5501, (hereinafter called "OBLIGEE" or CITY", in the penal sum of Five Percent of Bid Amount dollars and (5%)/100 ($_____), lawful money of the United States, for the payment of which sum shall and truly be made, whereof PRINCIPAL and SURETY bind themselves, their heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presents.

THE CONDITION OF THIS OBLIGATION IS SUCH that, whereas the Principal has submitted the accompanying bid, dated May 15th, 20 26, for:

**Project Name/Bid No.:** ITB #26-01

**Project Address:** Various property locations around the City.

**Legal Description:** See Attached

**Description of Work:** Demolish various properties undergoing mitigation due to flooding.

NOW, THEREFORE,

A. If the Principal shall not withdraw said bid withing one hundred twenty (120) days after date of opening of the same, and shall within ten (10) days after the prescribed forms are presented to it for signature, enter into a written contract with the City in accordance with the bid as accepted, and give bonds with good and sufficient surety or sureties, as may be required, for the faithful performance and proper fulfillment of such contract, then the above obligations shall be void and of no effect, otherwise to remain in full force and virtue.

B. In the event of the withdrawal of said bid within the period specified, or the failure to enter into such contract and give such bonds withing the time specified, if the principal shall pay the City the difference between the amount specified in said bid and the amount for which the City may procure the required work and supplies. If the latter amount be in excess of the former, then the above obligations then the above obligations shall be void and of no effect, otherwise to remain in full force and virtue.

IN WITNESS WHEREOF, the above parties have executed this instrument under their several seals, this 12th day of May, 20 26, the name and corporate seal of each corporate party being hereto affixed and these presents duly signed by its undersigned representative, pursuant to authority of its governing body.

*Note: If the firm is a sole ownership or partnership including limited liability company, two (2) witnesses are required to attest the signature. If the firm is a corporation, then the corporate secretary shall attest and affix the corporate seal (Attach power of attorney to the original bid bond and financial statement of Surety Company).*

**Building & Code Administration**

October 09, 2024

To Whom it May Concern:

Effective January 1, 2024, the ordinance requiring a Volusia County business tax receipt is repealed and a Volusia County business tax receipt is no longer required for any business located within Volusia County. This statement can also be found on our website at the following link: https://www.volusia.org/services/business-services/revenue-services/business-tax-receipt/ . Attached is a copy of the ordinance containing the changes where the language requiring a Business Tax Receipt has been stricken from the ordinance.

I hope this information proves to be useful.

# CITY COUNCIL AGENDA ITEM

**COUNCIL MEETING DATE 6/2/2026**

---

**SUBJECT:** (B7d) Intent to Award ITB #26-07 City Center Sports Complex Expansion to All State Civil Construction, Inc.

**DEPARTMENT:** Parks & Recreation

**GOAL:** 3 - Quality of Life

---

**RECOMMENDED MOTION:** Move to approve the contract award to All State Civil Construction, Inc. for construction of the City Center Sports complex for an amount not to exceed $3,636,028.16; and authorize an allowance for unforeseen conditions (contingency) in an amount not to exceed $290,883.00; and authorize the Mayor and City Clerk to execute the associated documents.

---

**SUMMARY:** The City received five bids for ITB #26-07 City Center Sports Complex Expansion: This is bond project #1 and is located on the former Silver Sands property adjacent to City Center that was part of the land swap with Volusia County Schools. This project will include multipurpose fields suitable for soccer, flag football, etc., a new restroom/concession facility, and additional parking.

Bid summary:

- All State Civil Construction, Inc.: $3,636,028.16
- Paul Culver Construction, Inc.: $3,660,000
- Persons Service Corp.: $3,675,278.07
- A.G. Pifer Construction: $3,996,000
- Legacy Sports Construction: $4,730,560

All State Civil Construction, Inc. is the lowest bidder and is deemed responsive. Staff recommends awarding ITB #26-07 City Center Sports Complex Expansion to All State Civil Construction, Inc., for the base cost of $3,636,028.16. In addition, Staff is requesting a contingency allowance of 8%, $290,883.00, bringing the total project budget to $3,926,911.16.

PRESENTER: Peter Ferreira

# AIA® Document A101® – 2017

## *Standard Form of Agreement Between Owner and Contractor* *where the basis of payment is a Stipulated Sum*

**AGREEMENT** made as of the Twenty-seventh day of May in the year Two Thousand Twenty-Six

**BETWEEN** the Owner:

City of Port Orange, a Florida Municipal Corporation
1000 City Center Circle
Port Orange, FL 32129
(386) 506-5575

and the Contractor:

All State Civil Construction, Inc.
1301 Beville Road, Suite 16
Daytona Beach, FL 32119
(386) 256-2721

for the following Project:

ITB 26-07 City Center Sports Complex Expansion
4651 City Center Circle
Port Orange, FL 32129
Expansion of City Center Sports Complex located adjacent to the REC at 4651 City Center Circle. The project will include two (2) multi-purpose fields with lights, install of owner furnished lights, a support building (restrooms, concession and storage) and parking.

The Architect:

Hall & Ogle Architects, Inc.
208 Magnolia Avenue
Daytona Beach, FL 32114

The Owner and Contractor agree as follows.

**ADDITIONS AND DELETIONS:**
The author of this document may have revised the text of the original AIA standard form. An *Additions and Deletions Report* that notes revisions to the standard form text is available from the author and should be reviewed. A vertical line in the left margin of this document indicates where the author has added to or deleted from the original AIA text.

This document has important legal consequences. Consultation with an attorney is encouraged with respect to its completion or modification.

The parties should complete A101®–2017, Exhibit A, Insurance and Bonds, contemporaneously with this Agreement. AIA Document A201®–2017, General Conditions of the Contract for Construction, is adopted in this document by reference. Do not use with other general conditions unless this document is modified.

**TABLE OF ARTICLES**

**1 THE CONTRACT DOCUMENTS**

**2 THE WORK OF THIS CONTRACT**

**3 DATE OF COMMENCEMENT AND SUBSTANTIAL COMPLETION**

**4 CONTRACT SUM**

**5 PAYMENTS**

**6 DISPUTE RESOLUTION**

**7 TERMINATION OR SUSPENSION**

**8 MISCELLANEOUS PROVISIONS**

**9 ENUMERATION OF CONTRACT DOCUMENTS**

**EXHIBIT A INSURANCE AND BONDS**

## ARTICLE 1 THE CONTRACT DOCUMENTS

The Contract Documents consist of this Agreement, Conditions of the Contract (General, Supplementary, and other Conditions), Drawings, Specifications, Addenda issued prior to execution of this Agreement, other documents listed in this Agreement, and Modifications issued after execution of this Agreement, all of which form the Contract, and are as fully a part of the Contract as if attached to this Agreement or repeated herein. The Contract represents the entire and integrated agreement between the parties hereto and supersedes prior negotiations, representations, or agreements, either written or oral. An enumeration of the Contract Documents, other than a Modification, appears in Article 9.

## ARTICLE 2 THE WORK OF THIS CONTRACT

The Contractor shall fully execute the Work described in the Contract Documents, except as specifically indicated in the Contract Documents to be the responsibility of others.

## ARTICLE 3 DATE OF COMMENCEMENT AND SUBSTANTIAL COMPLETION

**§ 3.1** The date of commencement of the Work shall be:

[ ] The date of this Agreement.

[ X ] A date set forth in a notice to proceed issued by the Owner.

[ ] Established as follows:
*(Insert a date or a means to determine the date of commencement of the Work.)*

If a date of commencement of the Work is not selected, then the date of commencement shall be the date of this Agreement.

**§ 3.2** The Contract Time shall be measured from the date of commencement of the Work.

### § 3.3 Substantial Completion

**§ 3.3.1** Subject to adjustments of the Contract Time as provided in the Contract Documents, the Contractor shall achieve Substantial Completion of the entire Work:

**User Notes:** (6a185cf5fe76961b0344ccab)

[ ] Not later than ( ) calendar days from the date of commencement of the Work.

[ X ] By the following date: Contractor shall achieve Substantial Completion of work not later than 270 days from the issuance of a written Notice to Proceed issued by the City.

**§ 3.3.2** Subject to adjustments of the Contract Time as provided in the Contract Documents, if portions of the Work are to be completed prior to Substantial Completion of the entire Work, the Contractor shall achieve Substantial Completion of such portions by the following dates:

| Portion of Work | Substantial Completion Date |
|---|---|
| N/A | N/A |

**§ 3.3.3** If the Contractor fails to achieve Substantial Completion as provided in this Section 3.3, liquidated damages, if any, shall be assessed as set forth in Section 4.5.

## ARTICLE 4 CONTRACT SUM

**§ 4.1** The Owner shall pay the Contractor the Contract Sum in current funds for the Contractor's performance of the Contract. The Contract Sum shall be Three Million Six Hundred Thirty Six Thousand Twenty Eight and 16/100 Dollars ($ $3,636,028.16 ), subject to additions and deductions as provided in the Contract Documents.

### § 4.2 Alternates

**§ 4.2.1** Alternates, if any, included in the Contract Sum:

| Item | Price |
|---|---|
| N/A | N/A |

**§ 4.2.2** Subject to the conditions noted below, the following alternates may be accepted by the Owner following execution of this Agreement. Upon acceptance, the Owner shall issue a Modification to this Agreement.

| Item | Price | Conditions for Acceptance |
|---|---|---|
| N/A | N/A | N/A |

**§ 4.3** Allowances, if any, included in the Contract Sum:

| Item | Price |
|---|---|
| N/A | N/A |

**§ 4.4** Unit prices, if any:

| Item | Units and Limitations | Price per Unit ($0.00) |
|---|---|---|
| N/A | N/A | N/A |

**§ 4.5** Liquidated damages, if any:

Contractor shall pay Owner Contractor shall pay Owner $0.00 for each day that expires after the time (.00 for each day that expires after the time (as duly adjusted pursuant to the Contract) specified for Substantial Completion (270 days), until the Work is substantially complete. After Substantial Completion, if Contractor shall neglect, refuse, or fail to complete the remaining Work within the Contract Times (as duly adjusted pursuant to the Contract), for completion and readiness for final payment, Contractor shall pay Owner $0.00 for each day that expires after such time until the Work is completed and ready for final payment.

**§ 4.6** Other:

## ARTICLE 5 PAYMENTS

### § 5.1 Progress Payments

**§ 5.1.1** Based upon Applications for Payment submitted to the Architect by the Contractor and Certificates for Payment issued by the Architect, the Owner shall make progress payments on account of the Contract Sum to the Contractor as provided below and elsewhere in the Contract Documents.

**§ 5.1.2** The period covered by each Application for Payment shall be one calendar month ending on the last day of the month, or as follows:

**§ 5.1.3** Provided that an Application for Payment is received by the Architect not later than the 1st day of a month, and the Contractor obtains Architect's certification of the application for payment within 10 days thereafter, then the Owner shall make payment of the amount certified to the Contractor not later than the 10th day of the following month. If an Application for Payment is received by the Architect after the application date fixed above, and the Contractor obtains Architect's certification of the application for payment within 10 days thereafter, then payment of the amount certified shall be made by the Owner not later than thirty ( 30 ) days after the Architect receives the Application for Payment.

**§ 5.1.4** Each Application for Payment shall be based on the most recent schedule of values submitted by the Contractor in accordance with the Contract Documents. The schedule of values shall allocate the entire Contract Sum among the various portions of the Work. The schedule of values shall be prepared in such form, and supported by such data to substantiate its accuracy, as the Architect may require. This schedule, unless objected to by the Architect, shall be used as a basis for reviewing the Contractor's Applications for Payment.

**§ 5.1.5** Applications for Payment shall show the percentage of completion of each portion of the Work as of the end of the period covered by the Application for Payment.

**§ 5.1.6** In accordance with AIA Document A201™–2017, General Conditions of the Contract for Construction, and subject to other provisions of the Contract Documents, the amount of each progress payment shall be computed as follows:

**§ 5.1.6.1** The amount of each progress payment shall first include:

- **.1** That portion of the Contract Sum properly allocable to completed Work;
- **.2** That portion of the Contract Sum properly allocable to materials and equipment delivered and suitably stored at the site for subsequent incorporation in the completed construction, or, if approved in advance by the Owner, suitably stored off the site at a location agreed upon in writing; and
- **.3** That portion of Construction Change Directives that the Architect determines, in the Architect's professional judgment, to be reasonably justified.

**§ 5.1.6.2** The amount of each progress payment shall then be reduced by:

- **.1** The aggregate of any amounts previously paid by the Owner;
- **.2** The amount, if any, for Work that remains uncorrected and for which the Architect has previously withheld a Certificate for Payment as provided in Article 9 of AIA Document A201–2017;
- **.3** Any amount for which the Contractor does not intend to pay a Subcontractor or material supplier, unless the Work has been performed by others the Contractor intends to pay;
- **.4** For Work performed or defects discovered since the last payment application, any amount for which the Architect may withhold payment, or nullify a Certificate of Payment in whole or in part, as provided in Article 9 of AIA Document A201–2017; and
- **.5** Retainage withheld pursuant to Section 5.1.7.

### § 5.1.7 Retainage

**§ 5.1.7.1** For each progress payment made prior to Substantial Completion of the Work, the Owner may withhold the following amount, as retainage, from the payment otherwise due:

AIA Document A101 – 2017. Copyright © 1915, 1918, 1925, 1937, 1951, 1958, 1961, 1963, 1967, 1974, 1977, 1987, 1991, 1997, 2007 and 2017. All rights reserved. This document was produced at 15:22:54 EDT on 05/28/2026 under Subscription No.20250149347 which expires on 08/02/2026, is not for resale, is licensed for one-time use only, and may only be used in accordance with the AIA Contract Documents® Terms of Service. To report copyright violations, e-mail docinfo@aiacontracts.com.
**User Notes:** (6a185cf5fe76961b0344ccab)

**§ 5.1.7.1.1** The following items are not subject to retainage:

**§ 5.1.7.2** Reduction or limitation of retainage, if any, shall be as follows:

No reduction of retainage below five percent (5%).

Deleted in its entirety.

**§ 5.1.8** If final completion of the Work is materially delayed through no fault of the Contractor, the Owner shall pay the Contractor any additional amounts in accordance with Article 9 of AIA Document A201–2017.

**§ 5.1.9** Except with the Owner's prior approval, the Contractor shall not make advance payments to suppliers for materials or equipment which have not been delivered and stored at the site.

**§ 5.2 Final Payment**

**§ 5.2.1** Final payment, constituting the entire unpaid balance of the Contract Sum, shall be made by the Owner to the Contractor when

**.1** the Contractor has fully performed the Contract except for the Contractor's responsibility to correct Work as provided in Article 12 of AIA Document A201–2017, and to satisfy other requirements, if any, which extend beyond final payment; and

**.2** a final Certificate for Payment has been issued by the Architect.

**§ 5.2.2** The Owner's final payment to the Contractor shall be made no later than 30 days after the issuance of the Architect's final Certificate for Payment, or as follows:

**§ 5.3 Interest**

Payments due and unpaid under the Contract shall bear interest from the date payment is due at the rate stated below, or in the absence thereof, at the legal rate prevailing from time to time at the place where the Project is located.

All payments shall be governed by the Local Government Prompt Payment Act as set forth in Sections 218.70 through 218.79, Florida Statutes, as amended.

**ARTICLE 6 DISPUTE RESOLUTION**

**§ 6.1 Initial Decision Maker**

The Architect will serve as the Initial Decision Maker pursuant to Article 15 of AIA Document A201–2017, unless the parties appoint below another individual, not a party to this Agreement, to serve as the Initial Decision Maker.

Architect's actions, subject to recommendation to Owner, and Owner approval prior to action.

**§ 6.2 Binding Dispute Resolution**

For any Claim subject to, but not resolved by, mediation pursuant to Article 15 of AIA Document A201–2017, the

AIA Document A101 – 2017. Copyright © 1915, 1918, 1925, 1937, 1951, 1958, 1961, 1963, 1967, 1974, 1977, 1987, 1991, 1997, 2007 and 2017. All rights reserved. **User Notes:** (6a185cf5fe76961b0344ccab)

method of binding dispute resolution shall be as follows:

[ ] Arbitration pursuant to Section 15.4 of AIA Document A201–2017

[ X ] Litigation in a court of competent jurisdiction. If the Owner and Contractor do not select a method of binding dispute resolution, or do not subsequently agree in writing to a binding dispute resolution method other than litigation, Claims shall be resolved by litigation, and shall have its venue located exclusively in the Circuit Court of Volusia County, Florida, and the Parties hereby expressly consent and submit themselves to the personal jurisdiction and venue of the Court.

[ ] Other

**ARTICLE 7 TERMINATION OR SUSPENSION**

**§ 7.1** The Contract may be terminated by the Owner or the Contractor as provided in Article 14 of AIA Document A201–2017.

**§ 7.1.1** If the Contract is terminated for the Owner's convenience in accordance with Article 14 of AIA Document A201–2017, then the Owner shall pay the Contractor a termination fee as follows:

**§ 7.2** The Work may be suspended by the Owner as provided in Article 14 of AIA Document A201–2017.

**ARTICLE 8 MISCELLANEOUS PROVISIONS**

**§ 8.1** Where reference is made in this Agreement to a provision of AIA Document A201–2017 or another Contract Document, the reference refers to that provision as amended or supplemented by other provisions of the Contract Documents.

**§ 8.2** The Owner's representative:

Susan Lovallo, Parks and Recreation Director
1000 City Center Circle
Port Orange, Florida 32129
slovallo@port-orange.org
(386) 506-5852

**§ 8.3** The Contractor's representative:

**§ 8.5 Insurance and Bonds**

**§ 8.5.1** The Owner and the Contractor shall purchase and maintain insurance as set forth in AIA Document A101™–2017, Standard Form of Agreement Between Owner and Contractor where the basis of payment is a Stipulated Sum, Exhibit A, Insurance and Bonds, and elsewhere in the Contract Documents.

**§ 8.5.2** The Contractor shall provide bonds as set forth in AIA Document A101™–2017 Exhibit A, and elsewhere in the Contract Documents.

**§ 8.6** Notice in electronic format, pursuant to Article 1 of AIA Document A201–2017, may be given in accordance with a building information modeling exhibit, if completed, or as otherwise set forth below:

**§ 8.7** Other provisions:

**§ 8.7.1 PUBLIC RECORDS COMPLIANCE**

**Contractor shall comply with public records laws as set forth in Section 119, Florida Statutes, and shall specifically: (a) keep and maintain public records that ordinarily and necessarily would be required by the City in order to perform the service; (b) provide the public with access to public records on the same terms and conditions that the City would provide the records at a cost that does not exceed the cost provided in Section 119, Florida Statutes, or as otherwise provided by law; (c) ensure that the public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law; and (d) meet all requirements for retaining public records and transfer to the City, at no cost, all public records in possession of the Contractor upon termination of the Contract and destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. All records stored electronically must be provided to the City in a format that is compatible with the Information Technology system of the City.**

**§ 8.7.2 RECORDS**

**The design, permits and all other records prepared by the Contractor, assembled for the City, subcontracted for the City, and any other records related to the scope of work in the possession of the Contractor shall be retained by the Contractor for the requisite time set forth in Florida Administrative Code Rule 1 b-24 http://dos.myflorida.com/library-archives/records-management/. Contractor may dispose of the records in accordance with Florida law, upon receipt of a signed written release signed by the City Attorney. Contractor agrees to indemnify the City for failure to comply with the requirements of this paragraph including costs of litigation and legal fees incurred through all appeals. City reserves the right to select and approve the defense attorney.**

**§ 8.7.3 FORCE MAJEURE**

**Neither party shall be liable for any delay in performance or failure to perform any obligation hereunder if, and to the extent that, such failure or delay is caused by an event of Force Majeure. Force Majeure shall mean any act, event or condition that is beyond the party's reasonable control, that materially and adversely affects the party's ability to perform its obligations hereunder, and that is not the result of the party's willful neglect, error, omission or failure to exercise reasonable due diligence.**

**§ 8.7.4 CONTRACT CONSTRUCTION**

**This Contract may be executed in one or more counterparts, each of which shall be deemed an original but all of which together constitute one and the same instrument. The delivery by facsimile or e-mail of an executed copy of this Contract shall be deemed valid as if an original signature was delivered. No contract shall be formed between the Contractor and the City unless both Parties have signed this Contract.**

**§ 8.7.5 FINANCIAL DISCLOSURES**

**During the term of this Contract, Contractor covenants and agrees that it will keep adequate books and records of accounts in accordance with Generally Accepted Accounting Principles (GAAP). Contractor further covenants and agrees that in the event the Contractor becomes insolvent and/or fails to pay its current obligations when they become due, Contractor shall so advise Owner of such situation and, upon request from Owner, Contractor shall provide to Owner financial statements of Contractor, including**

All payments shall be governed by the Local Government Prompt Payment Act as set forth in Sections 218.70 through 218.79, Florida Statutes, as amended.

Architect's actions, subject to recommendation to Owner, and Owner approval prior to action.

[ ~~]~~ ~~Litigation in a court of competent jurisdiction~~X ] Litigation in a court of competent jurisdiction. If the Owner and Contractor do not select a method of binding dispute resolution, or do not subsequently agree in writing to a binding dispute resolution method other than litigation, Claims shall be resolved by litigation, and shall have its venue located exclusively in the Circuit Court of Volusia County, Florida, and the Parties hereby expressly consent and submit themselves to the personal jurisdiction and venue of the Court.

## ARTICLE 1 GENERAL PROVISIONS

### § 1.1 Basic Definitions

#### § 1.1.1 The Contract Documents

The Contract Documents are enumerated in the Agreement between the Owner and Contractor (hereinafter the Agreement) and consist of the Agreement, Conditions of the Contract (General, Supplementary and other Conditions), Drawings, Specifications, Addenda issued prior to execution of the Contract, other documents listed in the Agreement, and Modifications issued after execution of the Contract. A Modification is (1) a written amendment to the Contract signed by both parties, (2) a Change Order, (3) a Construction Change Directive, or (4) a written order for a minor change in the Work issued by the Architect. Unless specifically enumerated in the Agreement, the Contract Documents do not include the advertisement or invitation to bid, Instructions to Bidders, sample forms, other information furnished by the Owner in anticipation of receiving bids or proposals, the Contractor's bid or proposal, or portions of Addenda relating to bidding or proposal requirements.

#### § 1.1.2 The Contract

The Contract Documents form the Contract for Construction. The Contract represents the entire and integrated agreement between the parties hereto and supersedes prior negotiations, representations, or agreements, either written or oral. The Contract may be amended or modified only by a Modification. The Contract Documents shall not be construed to create a contractual relationship of any kind (1) between the Contractor and the Architect or the Architect's consultants, (2) between the Owner and a Subcontractor or a Sub-subcontractor, (3) between the Owner and the Architect or the Architect's consultants, or (4) between any persons or entities other than the Owner and the Contractor. The Architect shall, however, be entitled to performance and enforcement of obligations under the Contract intended to facilitate performance of the Architect's duties.

#### § 1.1.3 The Work

The term "Work" means the construction and services required by the Contract Documents, whether completed or partially completed, and includes all other labor, materials, equipment, and services provided or to be provided by the Contractor to fulfill the Contractor's obligations. The Work may constitute the whole or a part of the Project.

#### § 1.1.4 The Project

The Project is the total construction of which the Work performed under the Contract Documents may be the whole or a part and which may include construction by the Owner and by Separate Contractors.

#### § 1.1.5 The Drawings

The Drawings are the graphic and pictorial portions of the Contract Documents showing the design, location and dimensions of the Work, generally including plans, elevations, sections, details, schedules, and diagrams.

#### § 1.1.6 The Specifications

The Specifications are that portion of the Contract Documents consisting of the written requirements for materials, equipment, systems, standards and workmanship for the Work, and performance of related services.

#### § 1.1.7 Instruments of Service

Instruments of Service are representations, in any medium of expression now known or later developed, of the tangible and intangible creative work performed by the Architect and the Architect's consultants under their respective professional services agreements. Instruments of Service may include, without limitation, studies, surveys, models, sketches, drawings, specifications, and other similar materials.

#### § 1.1.8 Initial Decision Maker

The Initial Decision Maker is the person identified in the Agreement to render initial decisions on Claims in accordance with Section 15.2. The Initial Decision Maker shall not show partiality to the Owner or Contractor and shall not be liable for results of interpretations or decisions rendered in good faith.

### § 1.2 Correlation and Intent of the Contract Documents

**§ 1.2.1** The intent of the Contract Documents is to include all items necessary for the proper execution and completion of the Work by the Contractor. The Contract Documents are complementary, and what is required by one shall be as binding as if required by all; performance by the Contractor shall be required only to the extent consistent with the Contract Documents and reasonably inferable from them as being necessary to produce the indicated results.

AIA Document A201 – 2017. Copyright © 1911, 1915, 1918, 1925, 1937, 1951, 1958, 1961, 1963, 1966, 1970, 1976, 1987, 1997, 2007 and 2017. All rights reserved. "The American Institute of Architects," "American Institute of Architects," "AIA," the AIA Logo, and "AIA Contract Documents" are trademarks of The American Institute of Architects. This document was produced at 15:32:10 EDT on 05/28/2026 under Subscription No.20250149347 which expires on 08/02/2026, is not for resale, is licensed for one-time use only, and may only be used in accordance with the AIA Contract Documents® Terms of Service. To report copyright violations, e-mail docinfo@aiacontracts.com.
**User Notes:** (6a185f1d6376d97ba92ef6ac)

**§ 1.2.1.1** The invalidity of any provision of the Contract Documents shall not invalidate the Contract or its remaining provisions. If it is determined that any provision of the Contract Documents violates any law, or is otherwise invalid or unenforceable, then that provision shall be revised to the extent necessary to make that provision legal and enforceable. In such case the Contract Documents shall be construed, to the fullest extent permitted by law, to give effect to the parties' intentions and purposes in executing the Contract.

**§ 1.2.2** Organization of the Specifications into divisions, sections and articles, and arrangement of Drawings shall not control the Contractor in dividing the Work among Subcontractors or in establishing the extent of Work to be performed by any trade.

**§ 1.2.3** Unless otherwise stated in the Contract Documents, words that have well-known technical or construction industry meanings are used in the Contract Documents in accordance with such recognized meanings.

### § 1.3 Capitalization

Terms capitalized in these General Conditions include those that are (1) specifically defined, (2) the titles of numbered articles, or (3) the titles of other documents published by the American Institute of Architects.

### § 1.4 Interpretation

In the interest of brevity the Contract Documents frequently omit modifying words such as "all" and "any" and articles such as "the" and "an," but the fact that a modifier or an article is absent from one statement and appears in another is not intended to affect the interpretation of either statement.

### § 1.5 Ownership and Use of Drawings, Specifications, and Other Instruments of Service

**§ 1.5.1** The Architect and the Architect's consultants shall be deemed the authors and owners of their respective Instruments of Service, including the Drawings and Specifications, and retain all common law, statutory, and other reserved rights in their Instruments of Service, including copyrights. The Contractor, Subcontractors, Sub-subcontractors, and suppliers shall not own or claim a copyright in the Instruments of Service. Submittal or distribution to meet official regulatory requirements or for other purposes in connection with the Project is not to be construed as publication in derogation of the Architect's or Architect's consultants' reserved rights.

**§ 1.5.2** The Contractor, Subcontractors, Sub-subcontractors, and suppliers are authorized to use and reproduce the Instruments of Service provided to them, subject to any protocols established pursuant to Sections 1.7 and 1.8, solely and exclusively for execution of the Work. All copies made under this authorization shall bear the copyright notice, if any, shown on the Instruments of Service. The Contractor, Subcontractors, Sub-subcontractors, and suppliers may not use the Instruments of Service on other projects or for additions to the Project outside the scope of the Work without the specific written consent of the Owner, Architect, and the Architect's consultants.

### § 1.6 Notice

**§ 1.6.1** Except as otherwise provided in Section 1.6.2, where the Contract Documents require one party to notify or give notice to the other party, such notice shall be provided in writing to the designated representative of the party to whom the notice is addressed and shall be deemed to have been duly served if delivered in person, by mail, by courier, or by electronic transmission if a method for electronic transmission is set forth in the Agreement.

**§ 1.6.2** Notice of Claims as provided in Section 15.1.3 shall be provided in writing and shall be deemed to have been duly served only if delivered to the designated representative of the party to whom the notice is addressed by certified or registered mail, or by courier providing proof of delivery.

### § 1.7 Digital Data Use and Transmission

The parties shall agree upon written protocols governing the transmission and use of, and reliance on, Instruments of Service or any other information or documentation in digital form.

### § 1.8 Building Information Models Use and Reliance

Any use of, or reliance on, all or a portion of a building information model without agreement to written protocols governing the use of, and reliance on, the information contained in the model shall be at the using or relying party's sole risk and without liability to the other party and its contractors or consultants, the authors of, or contributors to, the building information model, and each of their agents and employees.

**User Notes:** (6a185f1d6376d97ba92ef6ac)

## ARTICLE 2 OWNER

### § 2.1 General

**§ 2.1.1** The Owner is the person or entity identified as such in the Agreement and is referred to throughout the Contract Documents as if singular in number. The Owner shall designate in writing a representative who shall have express authority to bind the Owner with respect to all matters requiring the Owner's approval or authorization. Except as otherwise provided in Section 4.2.1, the Architect does not have such authority. The term "Owner" means the Owner or the Owner's authorized representative.

**§ 2.1.2** The Owner shall furnish to the Contractor, within fifteen days after receipt of a written request, information necessary and relevant for the Contractor to evaluate, give notice of, or enforce mechanic's lien rights. Such information shall include a correct statement of the record legal title to the property on which the Project is located, usually referred to as the site, and the Owner's interest therein.

### § 2.2 Evidence of the Owner's Financial Arrangements

**§ 2.2.1** Prior to commencement of the Work and upon written request by the Contractor, the Owner shall furnish to the Contractor reasonable evidence that the Owner has made financial arrangements to fulfill the Owner's obligations under the Contract. The Contractor shall have no obligation to commence the Work until the Owner provides such evidence. If commencement of the Work is delayed under this Section 2.2.1, the Contract Time shall be extended appropriately.

**§ 2.2.2** Following commencement of the Work and upon written request by the Contractor, the Owner shall furnish to the Contractor reasonable evidence that the Owner has made financial arrangements to fulfill the Owner's obligations under the Contract only if (1) the Owner fails to make payments to the Contractor as the Contract Documents require; (2) the Contractor identifies in writing a reasonable concern regarding the Owner's ability to make payment when due; or (3) a change in the Work materially changes the Contract Sum. If the Owner fails to provide such evidence, as required, within fourteen days of the Contractor's request, the Contractor may immediately stop the Work and, in that event, shall notify the Owner that the Work has stopped. However, if the request is made because a change in the Work materially changes the Contract Sum under (3) above, the Contractor may immediately stop only that portion of the Work affected by the change until reasonable evidence is provided. If the Work is stopped under this Section 2.2.2, the Contract Time shall be extended appropriately and the Contract Sum shall be increased by the amount of the Contractor's reasonable costs of shutdown, delay and start-up, plus interest as provided in the Contract Documents.

**§ 2.2.3** After the Owner furnishes evidence of financial arrangements under this Section 2.2, the Owner shall not materially vary such financial arrangements without prior notice to the Contractor.

**§ 2.2.4** Where the Owner has designated information furnished under this Section 2.2 as "confidential," the Contractor shall keep the information confidential and shall not disclose it to any other person. However, the Contractor may disclose "confidential" information, after seven (7) days' notice to the Owner, where disclosure is required by law, including a subpoena or other form of compulsory legal process issued by a court or governmental entity, or by court or arbitrator(s) order. The Contractor may also disclose "confidential" information to its employees, consultants, sureties, Subcontractors and their employees, Sub-subcontractors, and others who need to know the content of such information solely and exclusively for the Project and who agree to maintain the confidentiality of such information.

### § 2.3 Information and Services Required of the Owner

**§ 2.3.1** Except for permits and fees that are the responsibility of the Contractor under the Contract Documents, including those required under Section 3.7.1, the Owner shall secure and pay for necessary approvals, easements, assessments and charges required for construction, use or occupancy of permanent structures or for permanent changes in existing facilities.

**§ 2.3.2** The Owner shall retain an architect lawfully licensed to practice architecture, or an entity lawfully practicing architecture, in the jurisdiction where the Project is located. That person or entity is identified as the Architect in the Agreement and is referred to throughout the Contract Documents as if singular in number.

**§ 2.3.3** If the employment of the Architect terminates, the Owner shall employ a successor to whom the Contractor has no reasonable objection and whose status under the Contract Documents shall be that of the Architect.

AIA Document A201 – 2017. Copyright © 1911, 1915, 1918, 1925, 1937, 1951, 1958, 1961, 1963, 1966, 1970, 1976, 1987, 1997, 2007 and 2017. All rights reserved. **User Notes:** (6a185f1d6376d97ba92ef6ac)

**§ 2.3.4** The Owner shall furnish surveys describing physical characteristics, legal limitations and utility locations for the site of the Project, and a legal description of the site. The Contractor shall be entitled to rely on the accuracy of information furnished by the Owner but shall exercise proper precautions relating to the safe performance of the Work.

**§ 2.3.5** The Owner shall furnish information or services required of the Owner by the Contract Documents with reasonable promptness. The Owner shall also furnish any other information or services under the Owner's control and relevant to the Contractor's performance of the Work with reasonable promptness after receiving the Contractor's written request for such information or services.

**§ 2.3.6** Unless otherwise provided in the Contract Documents, the Owner shall furnish to the Contractor one copy of the Contract Documents for purposes of making reproductions pursuant to Section 1.5.2.

### § 2.4 Owner's Right to Stop the Work

If the Contractor fails to correct Work that is not in accordance with the requirements of the Contract Documents as required by Section 12.2 or repeatedly fails to carry out Work in accordance with the Contract Documents, the Owner may issue a written order to the Contractor to stop the Work, or any portion thereof, until the cause for such order has been eliminated; however, the right of the Owner to stop the Work shall not give rise to a duty on the part of the Owner to exercise this right for the benefit of the Contractor or any other person or entity, except to the extent required by Section 6.1.3.

### § 2.5 Owner's Right to Carry Out the Work

If the Contractor defaults or neglects to carry out the Work in accordance with the Contract Documents and fails within a ten-day period after receipt of notice from the Owner to commence and continue correction of such default or neglect with diligence and promptness, the Owner may, without prejudice to other remedies the Owner may have, correct such default or neglect. Such action by the Owner and amounts charged to the Contractor are both subject to prior approval of the Architect and the Architect may, pursuant to Section 9.5.1, withhold or nullify a Certificate for Payment in whole or in part, to the extent reasonably necessary to reimburse the Owner for the reasonable cost of correcting such deficiencies, including Owner's expenses and compensation for the Architect's additional services made necessary by such default, neglect, or failure. If current and future payments are not sufficient to cover such amounts, the Contractor shall pay the difference to the Owner. If the Contractor disagrees with the actions of the Owner or the Architect, or the amounts claimed as costs to the Owner, the Contractor may file a Claim pursuant to Article 15.

## ARTICLE 3 CONTRACTOR

### § 3.1 General

**§ 3.1.1** The Contractor is the person or entity identified as such in the Agreement and is referred to throughout the Contract Documents as if singular in number. The Contractor shall be lawfully licensed, if required in the jurisdiction where the Project is located. The Contractor shall designate in writing a representative who shall have express authority to bind the Contractor with respect to all matters under this Contract. The term "Contractor" means the Contractor or the Contractor's authorized representative.

**§ 3.1.2** The Contractor shall perform the Work in accordance with the Contract Documents.

**§ 3.1.3** The Contractor shall not be relieved of its obligations to perform the Work in accordance with the Contract Documents either by activities or duties of the Architect in the Architect's administration of the Contract, or by tests, inspections or approvals required or performed by persons or entities other than the Contractor.

### § 3.2 Review of Contract Documents and Field Conditions by Contractor

**§ 3.2.1** Execution of the Contract by the Contractor is a representation that the Contractor has visited the site, become generally familiar with local conditions under which the Work is to be performed, and correlated personal observations with requirements of the Contract Documents.

**§ 3.2.2** Because the Contract Documents are complementary, the Contractor shall, before starting each portion of the Work, carefully study and compare the various Contract Documents relative to that portion of the Work, as well as the information furnished by the Owner pursuant to Section 2.3.4, shall take field measurements of any existing conditions related to that portion of the Work, and shall observe any conditions at the site affecting it. These obligations are for the purpose of facilitating coordination and construction by the Contractor and are not for the

**User Notes:** (6a185f1d6376d97ba92ef6ac)

purpose of discovering errors, omissions, or inconsistencies in the Contract Documents; however, the Contractor shall promptly report to the Architect any errors, inconsistencies or omissions discovered by or made known to the Contractor as a request for information in such form as the Architect may require. It is recognized that the Contractor's review is made in the Contractor's capacity as a contractor and not as a licensed design professional, unless otherwise specifically provided in the Contract Documents.

**§ 3.2.3** The Contractor is not required to ascertain that the Contract Documents are in accordance with applicable laws, statutes, ordinances, codes, rules and regulations, or lawful orders of public authorities, but the Contractor shall promptly report to the Architect any nonconformity discovered by or made known to the Contractor as a request for information in such form as the Architect may require.

**§ 3.2.4** If the Contractor believes that additional cost or time is involved because of clarifications or instructions the Architect issues in response to the Contractor's notices or requests for information pursuant to Sections 3.2.2 or 3.2.3, the Contractor shall submit Claims as provided in Article 15. If the Contractor fails to perform the obligations of Sections 3.2.2 or 3.2.3, the Contractor shall pay such costs and damages to the Owner, subject to Section 15.1.7, as would have been avoided if the Contractor had performed such obligations. If the Contractor performs those obligations, the Contractor shall not be liable to the Owner or Architect for damages resulting from errors, inconsistencies or omissions in the Contract Documents, for differences between field measurements or conditions and the Contract Documents, or for nonconformities of the Contract Documents to applicable laws, statutes, ordinances, codes, rules and regulations, and lawful orders of public authorities.

### § 3.3 Supervision and Construction Procedures

**§ 3.3.1** The Contractor shall supervise and direct the Work, using the Contractor's best skill and attention. The Contractor shall be solely responsible for, and have control over, construction means, methods, techniques, sequences, and procedures, and for coordinating all portions of the Work under the Contract. If the Contract Documents give specific instructions concerning construction means, methods, techniques, sequences, or procedures, the Contractor shall evaluate the jobsite safety thereof and shall be solely responsible for the jobsite safety of such means, methods, techniques, sequences, or procedures. If the Contractor determines that such means, methods, techniques, sequences or procedures may not be safe, the Contractor shall give timely notice to the Owner and Architect, and shall propose alternative means, methods, techniques, sequences, or procedures. The Architect shall evaluate the proposed alternative solely for conformance with the design intent for the completed construction. Unless the Architect objects to the Contractor's proposed alternative, the Contractor shall perform the Work using its alternative means, methods, techniques, sequences, or procedures.

**§ 3.3.2** The Contractor shall be responsible to the Owner for acts and omissions of the Contractor's employees, Subcontractors and their agents and employees, and other persons or entities performing portions of the Work for, or on behalf of, the Contractor or any of its Subcontractors.

**§ 3.3.3** The Contractor shall be responsible for inspection of portions of Work already performed to determine that such portions are in proper condition to receive subsequent Work.

### § 3.4 Labor and Materials

**§ 3.4.1** Unless otherwise provided in the Contract Documents, the Contractor shall provide and pay for labor, materials, equipment, tools, construction equipment and machinery, water, heat, utilities, transportation, and other facilities and services necessary for proper execution and completion of the Work, whether temporary or permanent and whether or not incorporated or to be incorporated in the Work.

**§ 3.4.2** Except in the case of minor changes in the Work approved by the Architect in accordance with Section 3.12.8 or ordered by the Architect in accordance with Section 7.4, the Contractor may make substitutions only with the consent of the Owner, after evaluation by the Architect and in accordance with a Change Order or Construction Change Directive.

**§ 3.4.3** The Contractor shall enforce strict discipline and good order among the Contractor's employees and other persons carrying out the Work. The Contractor shall not permit employment of unfit persons or persons not properly skilled in tasks assigned to them.

### § 3.5 Warranty

**§ 3.5.1** The Contractor warrants to the Owner and Architect that materials and equipment furnished under the

AIA Document A201 – 2017. Copyright © 1911, 1915, 1918, 1925, 1937, 1951, 1958, 1961, 1963, 1966, 1970, 1976, 1987, 1997, 2007 and 2017. All rights reserved. To report copyright violations, e-mail docinfo@aiacontracts.com.
**User Notes:** (6a185f1d6376d97ba92ef6ac)

Contract will be of good quality and new unless the Contract Documents require or permit otherwise. The Contractor further warrants that the Work will conform to the requirements of the Contract Documents and will be free from defects, except for those inherent in the quality of the Work the Contract Documents require or permit. Work, materials, or equipment not conforming to these requirements may be considered defective. The Contractor's warranty excludes remedy for damage or defect caused by abuse, alterations to the Work not executed by the Contractor, improper or insufficient maintenance, improper operation, or normal wear and tear and normal usage. If required by the Architect, the Contractor shall furnish satisfactory evidence as to the kind and quality of materials and equipment.

**§ 3.5.2** All material, equipment, or other special warranties required by the Contract Documents shall be issued in the name of the Owner, or shall be transferable to the Owner, and shall commence in accordance with Section 9.8.4.

### § 3.6 Taxes

The Contractor shall pay sales, consumer, use and similar taxes for the Work provided by the Contractor that are legally enacted when bids are received or negotiations concluded, whether or not yet effective or merely scheduled to go into effect.

### § 3.7 Permits, Fees, Notices and Compliance with Laws

**§ 3.7.1** Unless otherwise provided in the Contract Documents, the Contractor shall secure and pay for the building permit as well as for other permits, fees, licenses, and inspections by government agencies necessary for proper execution and completion of the Work that are customarily secured after execution of the Contract and legally required at the time bids are received or negotiations concluded.

**§ 3.7.2** The Contractor shall comply with and give notices required by applicable laws, statutes, ordinances, codes, rules and regulations, and lawful orders of public authorities applicable to performance of the Work.

**§ 3.7.3** If the Contractor performs Work knowing it to be contrary to applicable laws, statutes, ordinances, codes, rules and regulations, or lawful orders of public authorities, the Contractor shall assume appropriate responsibility for such Work and shall bear the costs attributable to correction.

### § 3.7.4 Concealed or Unknown Conditions

If the Contractor encounters conditions at the site that are (1) subsurface or otherwise concealed physical conditions that differ materially from those indicated in the Contract Documents or (2) unknown physical conditions of an unusual nature that differ materially from those ordinarily found to exist and generally recognized as inherent in construction activities of the character provided for in the Contract Documents, the Contractor shall promptly provide notice to the Owner and the Architect before conditions are disturbed and in no event later than 14 days after first observance of the conditions. The Architect will promptly investigate such conditions and, if the Architect determines that they differ materially and cause an increase or decrease in the Contractor's cost of, or time required for, performance of any part of the Work, will recommend that an equitable adjustment be made in the Contract Sum or Contract Time, or both. If the Architect determines that the conditions at the site are not materially different from those indicated in the Contract Documents and that no change in the terms of the Contract is justified, the Architect shall promptly notify the Owner and Contractor, stating the reasons. If either party disputes the Architect's determination or recommendation, that party may submit a Claim as provided in Article 15.

**§ 3.7.5** If, in the course of the Work, the Contractor encounters human remains or recognizes the existence of burial markers, archaeological sites or wetlands not indicated in the Contract Documents, the Contractor shall immediately suspend any operations that would affect them and shall notify the Owner and Architect. Upon receipt of such notice, the Owner shall promptly take any action necessary to obtain governmental authorization required to resume the operations. The Contractor shall continue to suspend such operations until otherwise instructed by the Owner but shall continue with all other operations that do not affect those remains or features. Requests for adjustments in the Contract Sum and Contract Time arising from the existence of such remains or features may be made as provided in Article 15.

### § 3.8 Allowances

**§ 3.8.1** The Contractor shall include in the Contract Sum all allowances stated in the Contract Documents. Items covered by allowances shall be supplied for such amounts and by such persons or entities as the Owner may direct, but the Contractor shall not be required to employ persons or entities to whom the Contractor has reasonable objection.

**User Notes:** (6a185f1d6376d97ba92ef6ac)

**§ 3.8.2** Unless otherwise provided in the Contract Documents,

**.1** allowances shall cover the cost to the Contractor of materials and equipment delivered at the site and all required taxes, less applicable trade discounts;

**.2** Contractor's costs for unloading and handling at the site, labor, installation costs, overhead, profit, and other expenses contemplated for stated allowance amounts shall be included in the Contract Sum but not in the allowances; and

**.3** whenever costs are more than or less than allowances, the Contract Sum shall be adjusted accordingly by Change Order. The amount of the Change Order shall reflect (1) the difference between actual costs and the allowances under Section 3.8.2.1 and (2) changes in Contractor's costs under Section 3.8.2.2.

**§ 3.8.3** Materials and equipment under an allowance shall be selected by the Owner with reasonable promptness.

### § 3.9 Superintendent

**§ 3.9.1** The Contractor shall employ a competent superintendent and necessary assistants who shall be in attendance at the Project site during performance of the Work. The superintendent shall represent the Contractor, and communications given to the superintendent shall be as binding as if given to the Contractor.

**§ 3.9.2** The Contractor, as soon as practicable after award of the Contract, shall notify the Owner and Architect of the name and qualifications of a proposed superintendent. Within 14 days of receipt of the information, the Architect may notify the Contractor, stating whether the Owner or the Architect (1) has reasonable objection to the proposed superintendent or (2) requires additional time for review. Failure of the Architect to provide notice within the 14-day period shall constitute notice of no reasonable objection.

**§ 3.9.3** The Contractor shall not employ a proposed superintendent to whom the Owner or Architect has made reasonable and timely objection. The Contractor shall not change the superintendent without the Owner's consent, which shall not unreasonably be withheld or delayed.

### § 3.10 Contractor's Construction and Submittal Schedules

**§ 3.10.1** The Contractor, promptly after being awarded the Contract, shall submit for the Owner's and Architect's information a Contractor's construction schedule for the Work. The schedule shall contain detail appropriate for the Project, including (1) the date of commencement of the Work, interim schedule milestone dates, and the date of Substantial Completion; (2) an apportionment of the Work by construction activity; and (3) the time required for completion of each portion of the Work. The schedule shall provide for the orderly progression of the Work to completion and shall not exceed time limits current under the Contract Documents. The schedule shall be revised at appropriate intervals as required by the conditions of the Work and Project.

**§ 3.10.2** The Contractor, promptly after being awarded the Contract and thereafter as necessary to maintain a current submittal schedule, shall submit a submittal schedule for the Architect's approval. The Architect's approval shall not be unreasonably delayed or withheld. The submittal schedule shall (1) be coordinated with the Contractor's construction schedule, and (2) allow the Architect reasonable time to review submittals. If the Contractor fails to submit a submittal schedule, or fails to provide submittals in accordance with the approved submittal schedule, the Contractor shall not be entitled to any increase in Contract Sum or extension of Contract Time based on the time required for review of submittals.

**§ 3.10.3** The Contractor shall perform the Work in general accordance with the most recent schedules submitted to the Owner and Architect.

### § 3.11 Documents and Samples at the Site

The Contractor shall make available, at the Project site, the Contract Documents, including Change Orders, Construction Change Directives, and other Modifications, in good order and marked currently to indicate field changes and selections made during construction, and the approved Shop Drawings, Product Data, Samples, and similar required submittals. These shall be in electronic form or paper copy, available to the Architect and Owner, and delivered to the Architect for submittal to the Owner upon completion of the Work as a record of the Work as constructed.

### § 3.12 Shop Drawings, Product Data and Samples

**§ 3.12.1** Shop Drawings are drawings, diagrams, schedules, and other data specially prepared for the Work by the Contractor or a Subcontractor, Sub-subcontractor, manufacturer, supplier, or distributor to illustrate some portion of the Work.

**§ 3.12.2** Product Data are illustrations, standard schedules, performance charts, instructions, brochures, diagrams, and other information furnished by the Contractor to illustrate materials or equipment for some portion of the Work.

**§ 3.12.3** Samples are physical examples that illustrate materials, equipment, or workmanship, and establish standards by which the Work will be judged.

**§ 3.12.4** Shop Drawings, Product Data, Samples, and similar submittals are not Contract Documents. Their purpose is to demonstrate how the Contractor proposes to conform to the information given and the design concept expressed in the Contract Documents for those portions of the Work for which the Contract Documents require submittals. Review by the Architect is subject to the limitations of Section 4.2.7. Informational submittals upon which the Architect is not expected to take responsive action may be so identified in the Contract Documents. Submittals that are not required by the Contract Documents may be returned by the Architect without action.

**§ 3.12.5** The Contractor shall review for compliance with the Contract Documents, approve, and submit to the Architect, Shop Drawings, Product Data, Samples, and similar submittals required by the Contract Documents, in accordance with the submittal schedule approved by the Architect or, in the absence of an approved submittal schedule, with reasonable promptness and in such sequence as to cause no delay in the Work or in the activities of the Owner or of Separate Contractors.

**§ 3.12.6** By submitting Shop Drawings, Product Data, Samples, and similar submittals, the Contractor represents to the Owner and Architect that the Contractor has (1) reviewed and approved them, (2) determined and verified materials, field measurements and field construction criteria related thereto, or will do so, and (3) checked and coordinated the information contained within such submittals with the requirements of the Work and of the Contract Documents.

**§ 3.12.7** The Contractor shall perform no portion of the Work for which the Contract Documents require submittal and review of Shop Drawings, Product Data, Samples, or similar submittals, until the respective submittal has been approved by the Architect.

**§ 3.12.8** The Work shall be in accordance with approved submittals except that the Contractor shall not be relieved of responsibility for deviations from the requirements of the Contract Documents by the Architect's approval of Shop Drawings, Product Data, Samples, or similar submittals, unless the Contractor has specifically notified the Architect of such deviation at the time of submittal and (1) the Architect has given written approval to the specific deviation as a minor change in the Work, or (2) a Change Order or Construction Change Directive has been issued authorizing the deviation. The Contractor shall not be relieved of responsibility for errors or omissions in Shop Drawings, Product Data, Samples, or similar submittals, by the Architect's approval thereof.

**§ 3.12.9** The Contractor shall direct specific attention, in writing or on resubmitted Shop Drawings, Product Data, Samples, or similar submittals, to revisions other than those requested by the Architect on previous submittals. In the absence of such notice, the Architect's approval of a resubmission shall not apply to such revisions.

**§ 3.12.10** The Contractor shall not be required to provide professional services that constitute the practice of architecture or engineering unless such services are specifically required by the Contract Documents for a portion of the Work or unless the Contractor needs to provide such services in order to carry out the Contractor's responsibilities for construction means, methods, techniques, sequences, and procedures. The Contractor shall not be required to provide professional services in violation of applicable law.

**§ 3.12.10.1** If professional design services or certifications by a design professional related to systems, materials, or equipment are specifically required of the Contractor by the Contract Documents, the Owner and the Architect will specify all performance and design criteria that such services must satisfy. The Contractor shall be entitled to rely upon the adequacy and accuracy of the performance and design criteria provided in the Contract Documents. The Contractor shall cause such services or certifications to be provided by an appropriately licensed design professional, whose signature and seal shall appear on all drawings, calculations, specifications, certifications, Shop

AIA Document A201 – 2017. Copyright © 1911, 1915, 1918, 1925, 1937, 1951, 1958, 1961, 1963, 1966, 1970, 1976, 1987, 1997, 2007 and 2017. All rights reserved. To report copyright violations, e-mail docinfo@aiacontracts.com.
**User Notes:** (6a185f1d6376d97ba92ef6ac)

Drawings, and other submittals prepared by such professional. Shop Drawings, and other submittals related to the Work, designed or certified by such professional, if prepared by others, shall bear such professional's written approval when submitted to the Architect. The Owner and the Architect shall be entitled to rely upon the adequacy and accuracy of the services, certifications, and approvals performed or provided by such design professionals, provided the Owner and Architect have specified to the Contractor the performance and design criteria that such services must satisfy. Pursuant to this Section 3.12.10, the Architect will review and approve or take other appropriate action on submittals only for the limited purpose of checking for conformance with information given and the design concept expressed in the Contract Documents.

**§ 3.12.10.2** If the Contract Documents require the Contractor's design professional to certify that the Work has been performed in accordance with the design criteria, the Contractor shall furnish such certifications to the Architect at the time and in the form specified by the Architect.

### § 3.13 Use of Site

The Contractor shall confine operations at the site to areas permitted by applicable laws, statutes, ordinances, codes, rules and regulations, lawful orders of public authorities, and the Contract Documents and shall not unreasonably encumber the site with materials or equipment.

### § 3.14 Cutting and Patching

**§ 3.14.1** The Contractor shall be responsible for cutting, fitting, or patching required to complete the Work or to make its parts fit together properly. All areas requiring cutting, fitting, or patching shall be restored to the condition existing prior to the cutting, fitting, or patching, unless otherwise required by the Contract Documents.

**§ 3.14.2** The Contractor shall not damage or endanger a portion of the Work or fully or partially completed construction of the Owner or Separate Contractors by cutting, patching, or otherwise altering such construction, or by excavation. The Contractor shall not cut or otherwise alter construction by the Owner or a Separate Contractor except with written consent of the Owner and of the Separate Contractor. Consent shall not be unreasonably withheld. The Contractor shall not unreasonably withhold, from the Owner or a Separate Contractor, its consent to cutting or otherwise altering the Work.

### § 3.15 Cleaning Up

**§ 3.15.1** The Contractor shall keep the premises and surrounding area free from accumulation of waste materials and rubbish caused by operations under the Contract. At completion of the Work, the Contractor shall remove waste materials, rubbish, the Contractor's tools, construction equipment, machinery, and surplus materials from and about the Project.

**§ 3.15.2** If the Contractor fails to clean up as provided in the Contract Documents, the Owner may do so and the Owner shall be entitled to reimbursement from the Contractor.

### § 3.16 Access to Work

The Contractor shall provide the Owner and Architect with access to the Work in preparation and progress wherever located.

### § 3.17 Royalties, Patents and Copyrights

The Contractor shall pay all royalties and license fees. The Contractor shall defend suits or claims for infringement of copyrights and patent rights and shall hold the Owner and Architect harmless from loss on account thereof, but shall not be responsible for defense or loss when a particular design, process, or product of a particular manufacturer or manufacturers is required by the Contract Documents, or where the copyright violations are contained in Drawings, Specifications, or other documents prepared by the Owner or Architect. However, if an infringement of a copyright or patent is discovered by, or made known to, the Contractor, the Contractor shall be responsible for the loss unless the information is promptly furnished to the Architect.

### § 3.18 Indemnification

**§ 3.18.1** To the fullest extent permitted by law, the Contractor shall indemnify and hold harmless the Owner, Architect, Architect's consultants, and agents and employees of any of them from and against claims, damages, losses, and expenses, including but not limited to attorneys' fees, arising out of or resulting from performance of the Work, provided that such claim, damage, loss, or expense is attributable to bodily injury, sickness, disease or death, or to injury to or destruction of tangible property (other than the Work itself), but only to the extent caused by the

**User Notes:** (6a185f1d6376d97ba92ef6ac)

negligent acts or omissions of the Contractor, a Subcontractor, anyone directly or indirectly employed by them, or anyone for whose acts they may be liable, regardless of whether or not such claim, damage, loss, or expense is caused in part by a party indemnified hereunder. Such obligation shall not be construed to negate, abridge, or reduce other rights or obligations of indemnity that would otherwise exist as to a party or person described in this Section 3.18.

**§ 3.18.2** In claims against any person or entity indemnified under this Section 3.18 by an employee of the Contractor, a Subcontractor, anyone directly or indirectly employed by them, or anyone for whose acts they may be liable, the indemnification obligation under Section 3.18.1 shall not be limited by a limitation on amount or type of damages, compensation, or benefits payable by or for the Contractor or a Subcontractor under workers' compensation acts, disability benefit acts, or other employee benefit acts.

## ARTICLE 4 ARCHITECT

### § 4.1 General

**§ 4.1.1** The Architect is the person or entity retained by the Owner pursuant to Section 2.3.2 and identified as such in the Agreement.

**§ 4.1.2** Duties, responsibilities, and limitations of authority of the Architect as set forth in the Contract Documents shall not be restricted, modified, or extended without written consent of the Owner, Contractor, and Architect. Consent shall not be unreasonably withheld.

### § 4.2 Administration of the Contract

**§ 4.2.1** The Architect will provide administration of the Contract as described in the Contract Documents and will be an Owner's representative during construction until the date the Architect issues the final Certificate for Payment. The Architect will have authority to act on behalf of the Owner only to the extent provided in the Contract Documents.

**§ 4.2.2** The Architect will visit the site at intervals appropriate to the stage of construction, or as otherwise agreed with the Owner, to become generally familiar with the progress and quality of the portion of the Work completed, and to determine in general if the Work observed is being performed in a manner indicating that the Work, when fully completed, will be in accordance with the Contract Documents. However, the Architect will not be required to make exhaustive or continuous on-site inspections to check the quality or quantity of the Work. The Architect will not have control over, charge of, or responsibility for the construction means, methods, techniques, sequences or procedures, or for the safety precautions and programs in connection with the Work, since these are solely the Contractor's rights and responsibilities under the Contract Documents.

**§ 4.2.3** On the basis of the site visits, the Architect will keep the Owner reasonably informed about the progress and quality of the portion of the Work completed, and promptly report to the Owner (1) known deviations from the Contract Documents, (2) known deviations from the most recent construction schedule submitted by the Contractor, and (3) defects and deficiencies observed in the Work. The Architect will not be responsible for the Contractor's failure to perform the Work in accordance with the requirements of the Contract Documents. The Architect will not have control over or charge of, and will not be responsible for acts or omissions of, the Contractor, Subcontractors, or their agents or employees, or any other persons or entities performing portions of the Work.

### § 4.2.4 Communications

The Owner and Contractor shall include the Architect in all communications that relate to or affect the Architect's services or professional responsibilities. The Owner shall promptly notify the Architect of the substance of any direct communications between the Owner and the Contractor otherwise relating to the Project. Communications by and with the Architect's consultants shall be through the Architect. Communications by and with Subcontractors and suppliers shall be through the Contractor. Communications by and with Separate Contractors shall be through the Owner. The Contract Documents may specify other communication protocols.

**§ 4.2.5** Based on the Architect's evaluations of the Contractor's Applications for Payment, the Architect will review and certify the amounts due the Contractor and will issue Certificates for Payment in such amounts.

**§ 4.2.6** The Architect has authority to reject Work that does not conform to the Contract Documents. Whenever the Architect considers it necessary or advisable, the Architect will have authority to require inspection or testing of the Work in accordance with Sections 13.4.2 and 13.4.3, whether or not the Work is fabricated, installed or completed.

However, neither this authority of the Architect nor a decision made in good faith either to exercise or not to exercise such authority shall give rise to a duty or responsibility of the Architect to the Contractor, Subcontractors, suppliers, their agents or employees, or other persons or entities performing portions of the Work.

**§ 4.2.7** The Architect will review and approve, or take other appropriate action upon, the Contractor's submittals such as Shop Drawings, Product Data, and Samples, but only for the limited purpose of checking for conformance with information given and the design concept expressed in the Contract Documents. The Architect's action will be taken in accordance with the submittal schedule approved by the Architect or, in the absence of an approved submittal schedule, with reasonable promptness while allowing sufficient time in the Architect's professional judgment to permit adequate review. Review of such submittals is not conducted for the purpose of determining the accuracy and completeness of other details such as dimensions and quantities, or for substantiating instructions for installation or performance of equipment or systems, all of which remain the responsibility of the Contractor as required by the Contract Documents. The Architect's review of the Contractor's submittals shall not relieve the Contractor of the obligations under Sections 3.3, 3.5, and 3.12. The Architect's review shall not constitute approval of safety precautions or of any construction means, methods, techniques, sequences, or procedures. The Architect's approval of a specific item shall not indicate approval of an assembly of which the item is a component.

**§ 4.2.8** The Architect will prepare Change Orders and Construction Change Directives, and may order minor changes in the Work as provided in Section 7.4. The Architect will investigate and make determinations and recommendations regarding concealed and unknown conditions as provided in Section 3.7.4.

**§ 4.2.9** The Architect will conduct inspections to determine the date or dates of Substantial Completion and the date of final completion; issue Certificates of Substantial Completion pursuant to Section 9.8; receive and forward to the Owner, for the Owner's review and records, written warranties and related documents required by the Contract and assembled by the Contractor pursuant to Section 9.10; and issue a final Certificate for Payment pursuant to Section 9.10.

**§ 4.2.10** If the Owner and Architect agree, the Architect will provide one or more Project representatives to assist in carrying out the Architect's responsibilities at the site. The Owner shall notify the Contractor of any change in the duties, responsibilities and limitations of authority of the Project representatives.

**§ 4.2.11** The Architect will interpret and decide matters concerning performance under, and requirements of, the Contract Documents on written request of either the Owner or Contractor. The Architect's response to such requests will be made in writing within any time limits agreed upon or otherwise with reasonable promptness.

**§ 4.2.12** Interpretations and decisions of the Architect will be consistent with the intent of, and reasonably inferable from, the Contract Documents and will be in writing or in the form of drawings. When making such interpretations and decisions, the Architect will endeavor to secure faithful performance by both Owner and Contractor, will not show partiality to either, and will not be liable for results of interpretations or decisions rendered in good faith.

**§ 4.2.13** The Architect's decisions on matters relating to aesthetic effect will be final if consistent with the intent expressed in the Contract Documents.

**§ 4.2.14** The Architect will review and respond to requests for information about the Contract Documents. The Architect's response to such requests will be made in writing within any time limits agreed upon or otherwise with reasonable promptness. If appropriate, the Architect will prepare and issue supplemental Drawings and Specifications in response to the requests for information.

## ARTICLE 5 SUBCONTRACTORS

### § 5.1 Definitions

**§ 5.1.1** A Subcontractor is a person or entity who has a direct contract with the Contractor to perform a portion of the Work at the site. The term "Subcontractor" is referred to throughout the Contract Documents as if singular in number and means a Subcontractor or an authorized representative of the Subcontractor. The term "Subcontractor" does not include a Separate Contractor or the subcontractors of a Separate Contractor.

**§ 5.1.2** A Sub-subcontractor is a person or entity who has a direct or indirect contract with a Subcontractor to perform a portion of the Work at the site. The term "Sub-subcontractor" is referred to throughout the Contract Documents as if singular in number and means a Sub-subcontractor or an authorized representative of the Sub-

AIA Document A201 – 2017. Copyright © 1911, 1915, 1918, 1925, 1937, 1951, 1958, 1961, 1963, 1966, 1970, 1976, 1987, 1997, 2007 and 2017. All rights reserved. **User Notes:** (6a185f1d6376d97ba92ef6ac)

subcontractor.

**§ 5.2 Award of Subcontracts and Other Contracts for Portions of the Work**

**§ 5.2.1** Unless otherwise stated in the Contract Documents, the Contractor, as soon as practicable after award of the Contract, shall notify the Owner and Architect of the persons or entities proposed for each principal portion of the Work, including those who are to furnish materials or equipment fabricated to a special design. Within 14 days of receipt of the information, the Architect may notify the Contractor whether the Owner or the Architect (1) has reasonable objection to any such proposed person or entity or (2) requires additional time for review. Failure of the Architect to provide notice within the 14-day period shall constitute notice of no reasonable objection.

**§ 5.2.2** The Contractor shall not contract with a proposed person or entity to whom the Owner or Architect has made reasonable and timely objection. The Contractor shall not be required to contract with anyone to whom the Contractor has made reasonable objection.

**§ 5.2.3** If the Owner or Architect has reasonable objection to a person or entity proposed by the Contractor, the Contractor shall propose another to whom the Owner or Architect has no reasonable objection. If the proposed but rejected Subcontractor was reasonably capable of performing the Work, the Contract Sum and Contract Time shall be increased or decreased by the difference, if any, occasioned by such change, and an appropriate Change Order shall be issued before commencement of the substitute Subcontractor's Work. However, no increase in the Contract Sum or Contract Time shall be allowed for such change unless the Contractor has acted promptly and responsively in submitting names as required.

**§ 5.2.4** The Contractor shall not substitute a Subcontractor, person, or entity for one previously selected if the Owner or Architect makes reasonable objection to such substitution.

**§ 5.3 Subcontractual Relations**

By appropriate written agreement, the Contractor shall require each Subcontractor, to the extent of the Work to be performed by the Subcontractor, to be bound to the Contractor by terms of the Contract Documents, and to assume toward the Contractor all the obligations and responsibilities, including the responsibility for safety of the Subcontractor's Work that the Contractor, by these Contract Documents, assumes toward the Owner and Architect. Each subcontract agreement shall preserve and protect the rights of the Owner and Architect under the Contract Documents with respect to the Work to be performed by the Subcontractor so that subcontracting thereof will not prejudice such rights, and shall allow to the Subcontractor, unless specifically provided otherwise in the subcontract agreement, the benefit of all rights, remedies, and redress against the Contractor that the Contractor, by the Contract Documents, has against the Owner. Where appropriate, the Contractor shall require each Subcontractor to enter into similar agreements with Sub-subcontractors. The Contractor shall make available to each proposed Subcontractor, prior to the execution of the subcontract agreement, copies of the Contract Documents to which the Subcontractor will be bound, and, upon written request of the Subcontractor, identify to the Subcontractor terms and conditions of the proposed subcontract agreement that may be at variance with the Contract Documents. Subcontractors will similarly make copies of applicable portions of such documents available to their respective proposed Sub-subcontractors.

**§ 5.4 Contingent Assignment of Subcontracts**

**§ 5.4.1** Each subcontract agreement for a portion of the Work is assigned by the Contractor to the Owner, provided that

**.1** assignment is effective only after termination of the Contract by the Owner for cause pursuant to Section 14.2 and only for those subcontract agreements that the Owner accepts by notifying the Subcontractor and Contractor; and

**.2** assignment is subject to the prior rights of the surety, if any, obligated under bond relating to the Contract.

When the Owner accepts the assignment of a subcontract agreement, the Owner assumes the Contractor's rights and obligations under the subcontract.

**§ 5.4.2** Upon such assignment, if the Work has been suspended for more than 30 days, the Subcontractor's compensation shall be equitably adjusted for increases in cost resulting from the suspension.

**§ 5.4.3** Upon assignment to the Owner under this Section 5.4, the Owner may further assign the subcontract to a

AIA Document A201 – 2017. Copyright © 1911, 1915, 1918, 1925, 1937, 1951, 1958, 1961, 1963, 1966, 1970, 1976, 1987, 1997, 2007 and 2017. All rights reserved. successor contractor or other entity. If the Owner assigns the subcontract to a successor contractor or other entity, the Owner shall nevertheless remain legally responsible for all of the successor contractor's obligations under the subcontract.

## ARTICLE 6 CONSTRUCTION BY OWNER OR BY SEPARATE CONTRACTORS

### § 6.1 Owner's Right to Perform Construction and to Award Separate Contracts

**§ 6.1.1** The term "Separate Contractor(s)" shall mean other contractors retained by the Owner under separate agreements. The Owner reserves the right to perform construction or operations related to the Project with the Owner's own forces, and with Separate Contractors retained under Conditions of the Contract substantially similar to those of this Contract, including those provisions of the Conditions of the Contract related to insurance and waiver of subrogation.

**§ 6.1.2** When separate contracts are awarded for different portions of the Project or other construction or operations on the site, the term "Contractor" in the Contract Documents in each case shall mean the Contractor who executes each separate Owner-Contractor Agreement.

**§ 6.1.3** The Owner shall provide for coordination of the activities of the Owner's own forces and of each Separate Contractor with the Work of the Contractor, who shall cooperate with them. The Contractor shall participate with any Separate Contractors and the Owner in reviewing their construction schedules. The Contractor shall make any revisions to its construction schedule deemed necessary after a joint review and mutual agreement. The construction schedules shall then constitute the schedules to be used by the Contractor, Separate Contractors, and the Owner until subsequently revised.

**§ 6.1.4** Unless otherwise provided in the Contract Documents, when the Owner performs construction or operations related to the Project with the Owner's own forces or with Separate Contractors, the Owner or its Separate Contractors shall have the same obligations and rights that the Contractor has under the Conditions of the Contract, including, without excluding others, those stated in Article 3, this Article 6, and Articles 10, 11, and 12.

### § 6.2 Mutual Responsibility

**§ 6.2.1** The Contractor shall afford the Owner and Separate Contractors reasonable opportunity for introduction and storage of their materials and equipment and performance of their activities, and shall connect and coordinate the Contractor's construction and operations with theirs as required by the Contract Documents.

**§ 6.2.2** If part of the Contractor's Work depends for proper execution or results upon construction or operations by the Owner or a Separate Contractor, the Contractor shall, prior to proceeding with that portion of the Work, promptly notify the Architect of apparent discrepancies or defects in the construction or operations by the Owner or Separate Contractor that would render it unsuitable for proper execution and results of the Contractor's Work. Failure of the Contractor to notify the Architect of apparent discrepancies or defects prior to proceeding with the Work shall constitute an acknowledgment that the Owner's or Separate Contractor's completed or partially completed construction is fit and proper to receive the Contractor's Work. The Contractor shall not be responsible for discrepancies or defects in the construction or operations by the Owner or Separate Contractor that are not apparent.

**§ 6.2.3** The Contractor shall reimburse the Owner for costs the Owner incurs that are payable to a Separate Contractor because of the Contractor's delays, improperly timed activities or defective construction. The Owner shall be responsible to the Contractor for costs the Contractor incurs because of a Separate Contractor's delays, improperly timed activities, damage to the Work or defective construction.

**§ 6.2.4** The Contractor shall promptly remedy damage that the Contractor wrongfully causes to completed or partially completed construction or to property of the Owner or Separate Contractor as provided in Section 10.2.5.

**§ 6.2.5** The Owner and each Separate Contractor shall have the same responsibilities for cutting and patching as are described for the Contractor in Section 3.14.

### § 6.3 Owner's Right to Clean Up

If a dispute arises among the Contractor, Separate Contractors, and the Owner as to the responsibility under their respective contracts for maintaining the premises and surrounding area free from waste materials and rubbish, the Owner may clean up and the Architect will allocate the cost among those responsible.

## ARTICLE 7 CHANGES IN THE WORK

### § 7.1 General

**§ 7.1.1** Changes in the Work may be accomplished after execution of the Contract, and without invalidating the Contract, by Change Order, Construction Change Directive or order for a minor change in the Work, subject to the limitations stated in this Article 7 and elsewhere in the Contract Documents.

**§ 7.1.2** A Change Order shall be based upon agreement among the Owner, Contractor, and Architect. A Construction Change Directive requires agreement by the Owner and Architect and may or may not be agreed to by the Contractor. An order for a minor change in the Work may be issued by the Architect alone.

**§ 7.1.3** Changes in the Work shall be performed under applicable provisions of the Contract Documents. The Contractor shall proceed promptly with changes in the Work, unless otherwise provided in the Change Order, Construction Change Directive, or order for a minor change in the Work.

### § 7.2 Change Orders

**§ 7.2.1** A Change Order is a written instrument prepared by the Architect and signed by the Owner, Contractor, and Architect stating their agreement upon all of the following:

**.1** The change in the Work;

**.2** The amount of the adjustment, if any, in the Contract Sum; and

**.3** The extent of the adjustment, if any, in the Contract Time.

### § 7.3 Construction Change Directives

**§ 7.3.1** A Construction Change Directive is a written order prepared by the Architect and signed by the Owner and Architect, directing a change in the Work prior to agreement on adjustment, if any, in the Contract Sum or Contract Time, or both. The Owner may by Construction Change Directive, without invalidating the Contract, order changes in the Work within the general scope of the Contract consisting of additions, deletions, or other revisions, the Contract Sum and Contract Time being adjusted accordingly.

**§ 7.3.2** A Construction Change Directive shall be used in the absence of total agreement on the terms of a Change Order.

**§ 7.3.3** If the Construction Change Directive provides for an adjustment to the Contract Sum, the adjustment shall be based on one of the following methods:

**.1** Mutual acceptance of a lump sum properly itemized and supported by sufficient substantiating data to permit evaluation;

**.2** Unit prices stated in the Contract Documents or subsequently agreed upon;

**.3** Cost to be determined in a manner agreed upon by the parties and a mutually acceptable fixed or percentage fee; or

**.4** As provided in Section 7.3.4.

**§ 7.3.4** If the Contractor does not respond promptly or disagrees with the method for adjustment in the Contract Sum, the Architect shall determine the adjustment on the basis of reasonable expenditures and savings of those performing the Work attributable to the change, including, in case of an increase in the Contract Sum, an amount for overhead and profit as set forth in the Agreement, or if no such amount is set forth in the Agreement, a reasonable amount. In such case, and also under Section 7.3.3.3, the Contractor shall keep and present, in such form as the Architect may prescribe, an itemized accounting together with appropriate supporting data. Unless otherwise provided in the Contract Documents, costs for the purposes of this Section 7.3.4 shall be limited to the following:

**.1** Costs of labor, including applicable payroll taxes, fringe benefits required by agreement or custom, workers' compensation insurance, and other employee costs approved by the Architect;

**.2** Costs of materials, supplies, and equipment, including cost of transportation, whether incorporated or consumed;

**.3** Rental costs of machinery and equipment, exclusive of hand tools, whether rented from the Contractor or others;

**.4** Costs of premiums for all bonds and insurance, permit fees, and sales, use, or similar taxes, directly related to the change; and

AIA Document A201 – 2017. Copyright © 1911, 1915, 1918, 1925, 1937, 1951, 1958, 1961, 1963, 1966, 1970, 1976, 1987, 1997, 2007 and 2017. All rights reserved. To report copyright violations, e-mail docinfo@aiacontracts.com.
**User Notes:** (6a185f1d6376d97ba92ef6ac)

.5 Costs of supervision and field office personnel directly attributable to the change.

**§ 7.3.5** If the Contractor disagrees with the adjustment in the Contract Time, the Contractor may make a Claim in accordance with applicable provisions of Article 15.

**§ 7.3.6** Upon receipt of a Construction Change Directive, the Contractor shall promptly proceed with the change in the Work involved and advise the Architect of the Contractor's agreement or disagreement with the method, if any, provided in the Construction Change Directive for determining the proposed adjustment in the Contract Sum or Contract Time.

**§ 7.3.7** A Construction Change Directive signed by the Contractor indicates the Contractor's agreement therewith, including adjustment in Contract Sum and Contract Time or the method for determining them. Such agreement shall be effective immediately and shall be recorded as a Change Order.

**§ 7.3.8** The amount of credit to be allowed by the Contractor to the Owner for a deletion or change that results in a net decrease in the Contract Sum shall be actual net cost as confirmed by the Architect. When both additions and credits covering related Work or substitutions are involved in a change, the allowance for overhead and profit shall be figured on the basis of net increase, if any, with respect to that change.

**§ 7.3.9** Pending final determination of the total cost of a Construction Change Directive to the Owner, the Contractor may request payment for Work completed under the Construction Change Directive in Applications for Payment. The Architect will make an interim determination for purposes of monthly certification for payment for those costs and certify for payment the amount that the Architect determines, in the Architect's professional judgment, to be reasonably justified. The Architect's interim determination of cost shall adjust the Contract Sum on the same basis as a Change Order, subject to the right of either party to disagree and assert a Claim in accordance with Article 15.

**§ 7.3.10** When the Owner and Contractor agree with a determination made by the Architect concerning the adjustments in the Contract Sum and Contract Time, or otherwise reach agreement upon the adjustments, such agreement shall be effective immediately and the Architect will prepare a Change Order. Change Orders may be issued for all or any part of a Construction Change Directive.

### § 7.4 Minor Changes in the Work

The Architect may order minor changes in the Work that are consistent with the intent of the Contract Documents and do not involve an adjustment in the Contract Sum or an extension of the Contract Time. The Architect's order for minor changes shall be in writing. If the Contractor believes that the proposed minor change in the Work will affect the Contract Sum or Contract Time, the Contractor shall notify the Architect and shall not proceed to implement the change in the Work. If the Contractor performs the Work set forth in the Architect's order for a minor change without prior notice to the Architect that such change will affect the Contract Sum or Contract Time, the Contractor waives any adjustment to the Contract Sum or extension of the Contract Time.

## ARTICLE 8 TIME

### § 8.1 Definitions

**§ 8.1.1** Unless otherwise provided, Contract Time is the period of time, including authorized adjustments, allotted in the Contract Documents for Substantial Completion of the Work.

**§ 8.1.2** The date of commencement of the Work is the date established in the Agreement.

**§ 8.1.3** The date of Substantial Completion is the date certified by the Architect in accordance with Section 9.8.

**§ 8.1.4** The term "day" as used in the Contract Documents shall mean calendar day unless otherwise specifically defined.

### § 8.2 Progress and Completion

**§ 8.2.1** Time limits stated in the Contract Documents are of the essence of the Contract. By executing the Agreement, the Contractor confirms that the Contract Time is a reasonable period for performing the Work.

**§ 8.2.2** The Contractor shall not knowingly, except by agreement or instruction of the Owner in writing, commence

AIA Document A201 – 2017. Copyright © 1911, 1915, 1918, 1925, 1937, 1951, 1958, 1961, 1963, 1966, 1970, 1976, 1987, 1997, 2007 and 2017. All rights reserved. **User Notes:** (6a185f1d6376d97ba92ef6ac)

the Work prior to the effective date of insurance required to be furnished by the Contractor and Owner.

**§ 8.2.3** The Contractor shall proceed expeditiously with adequate forces and shall achieve Substantial Completion within the Contract Time.

### § 8.3 Delays and Extensions of Time

**§ 8.3.1** If the Contractor is delayed at any time in the commencement or progress of the Work by (1) an act or neglect of the Owner or Architect, of an employee of either, or of a Separate Contractor; (2) by changes ordered in the Work; (3) by labor disputes, fire, unusual delay in deliveries, unavoidable casualties, adverse weather conditions documented in accordance with Section 15.1.6.2, or other causes beyond the Contractor's control; (4) by delay authorized by the Owner pending mediation and binding dispute resolution; or (5) by other causes that the Contractor asserts, and the Architect determines, justify delay, then the Contract Time shall be extended for such reasonable time as the Architect may determine.

**§ 8.3.2** Claims relating to time shall be made in accordance with applicable provisions of Article 15.

**§ 8.3.3** This Section 8.3 does not preclude recovery of damages for delay by either party under other provisions of the Contract Documents.

## ARTICLE 9 PAYMENTS AND COMPLETION

### § 9.1 Contract Sum

**§ 9.1.1** The Contract Sum is stated in the Agreement and, including authorized adjustments, is the total amount payable by the Owner to the Contractor for performance of the Work under the Contract Documents.

**§ 9.1.2** If unit prices are stated in the Contract Documents or subsequently agreed upon, and if quantities originally contemplated are materially changed so that application of such unit prices to the actual quantities causes substantial inequity to the Owner or Contractor, the applicable unit prices shall be equitably adjusted.

### § 9.2 Schedule of Values

Where the Contract is based on a stipulated sum or Guaranteed Maximum Price, the Contractor shall submit a schedule of values to the Architect before the first Application for Payment, allocating the entire Contract Sum to the various portions of the Work. The schedule of values shall be prepared in the form, and supported by the data to substantiate its accuracy, required by the Architect. This schedule, unless objected to by the Architect, shall be used as a basis for reviewing the Contractor's Applications for Payment. Any changes to the schedule of values shall be submitted to the Architect and supported by such data to substantiate its accuracy as the Architect may require, and unless objected to by the Architect, shall be used as a basis for reviewing the Contractor's subsequent Applications for Payment.

### § 9.3 Applications for Payment

**§ 9.3.1** At least ten days before the date established for each progress payment, the Contractor shall submit to the Architect an itemized Application for Payment prepared in accordance with the schedule of values, if required under Section 9.2, for completed portions of the Work. The application shall be notarized, if required, and supported by all data substantiating the Contractor's right to payment that the Owner or Architect require, such as copies of requisitions, and releases and waivers of liens from Subcontractors and suppliers, and shall reflect retainage if provided for in the Contract Documents.

**§ 9.3.1.1** As provided in Section 7.3.9, such applications may include requests for payment on account of changes in the Work that have been properly authorized by Construction Change Directives, or by interim determinations of the Architect, but not yet included in Change Orders.

**§ 9.3.1.2** Applications for Payment shall not include requests for payment for portions of the Work for which the Contractor does not intend to pay a Subcontractor or supplier, unless such Work has been performed by others whom the Contractor intends to pay.

**§ 9.3.2** Unless otherwise provided in the Contract Documents, payments shall be made on account of materials and equipment delivered and suitably stored at the site for subsequent incorporation in the Work. If approved in advance by the Owner, payment may similarly be made for materials and equipment suitably stored off the site at a location agreed upon in writing. Payment for materials and equipment stored on or off the site shall be conditioned upon

**User Notes:** (6a185f1d6376d97ba92ef6ac)

compliance by the Contractor with procedures satisfactory to the Owner to establish the Owner's title to such materials and equipment or otherwise protect the Owner's interest, and shall include the costs of applicable insurance, storage, and transportation to the site, for such materials and equipment stored off the site.

**§ 9.3.3** The Contractor warrants that title to all Work covered by an Application for Payment will pass to the Owner no later than the time of payment. The Contractor further warrants that upon submittal of an Application for Payment all Work for which Certificates for Payment have been previously issued and payments received from the Owner shall, to the best of the Contractor's knowledge, information, and belief, be free and clear of liens, claims, security interests, or encumbrances, in favor of the Contractor, Subcontractors, suppliers, or other persons or entities that provided labor, materials, and equipment relating to the Work.

### § 9.4 Certificates for Payment

**§ 9.4.1** The Architect will, within seven days after receipt of the Contractor's Application for Payment, either (1) issue to the Owner a Certificate for Payment in the full amount of the Application for Payment, with a copy to the Contractor; or (2) issue to the Owner a Certificate for Payment for such amount as the Architect determines is properly due, and notify the Contractor and Owner of the Architect's reasons for withholding certification in part as provided in Section 9.5.1; or (3) withhold certification of the entire Application for Payment, and notify the Contractor and Owner of the Architect's reason for withholding certification in whole as provided in Section 9.5.1.

**§ 9.4.2** The issuance of a Certificate for Payment will constitute a representation by the Architect to the Owner, based on the Architect's evaluation of the Work and the data in the Application for Payment, that, to the best of the Architect's knowledge, information, and belief, the Work has progressed to the point indicated, the quality of the Work is in accordance with the Contract Documents, and that the Contractor is entitled to payment in the amount certified. The foregoing representations are subject to an evaluation of the Work for conformance with the Contract Documents upon Substantial Completion, to results of subsequent tests and inspections, to correction of minor deviations from the Contract Documents prior to completion, and to specific qualifications expressed by the Architect. However, the issuance of a Certificate for Payment will not be a representation that the Architect has (1) made exhaustive or continuous on-site inspections to check the quality or quantity of the Work; (2) reviewed construction means, methods, techniques, sequences, or procedures; (3) reviewed copies of requisitions received from Subcontractors and suppliers and other data requested by the Owner to substantiate the Contractor's right to payment; or (4) made examination to ascertain how or for what purpose the Contractor has used money previously paid on account of the Contract Sum.

### § 9.5 Decisions to Withhold Certification

**§ 9.5.1** The Architect may withhold a Certificate for Payment in whole or in part, to the extent reasonably necessary to protect the Owner, if in the Architect's opinion the representations to the Owner required by Section 9.4.2 cannot be made. If the Architect is unable to certify payment in the amount of the Application, the Architect will notify the Contractor and Owner as provided in Section 9.4.1. If the Contractor and Architect cannot agree on a revised amount, the Architect will promptly issue a Certificate for Payment for the amount for which the Architect is able to make such representations to the Owner. The Architect may also withhold a Certificate for Payment or, because of subsequently discovered evidence, may nullify the whole or a part of a Certificate for Payment previously issued, to such extent as may be necessary in the Architect's opinion to protect the Owner from loss for which the Contractor is responsible, including loss resulting from acts and omissions described in Section 3.3.2, because of

- **.1** defective Work not remedied;
- **.2** third party claims filed or reasonable evidence indicating probable filing of such claims, unless security acceptable to the Owner is provided by the Contractor;
- **.3** failure of the Contractor to make payments properly to Subcontractors or suppliers for labor, materials or equipment;
- **.4** reasonable evidence that the Work cannot be completed for the unpaid balance of the Contract Sum;
- **.5** damage to the Owner or a Separate Contractor;
- **.6** reasonable evidence that the Work will not be completed within the Contract Time, and that the unpaid balance would not be adequate to cover actual or liquidated damages for the anticipated delay; or
- **.7** repeated failure to carry out the Work in accordance with the Contract Documents.

**§ 9.5.2** When either party disputes the Architect's decision regarding a Certificate for Payment under Section 9.5.1, in whole or in part, that party may submit a Claim in accordance with Article 15.

**User Notes:** (6a185f1d6376d97ba92ef6ac)

**§ 9.5.3** When the reasons for withholding certification are removed, certification will be made for amounts previously withheld.

**§ 9.5.4** If the Architect withholds certification for payment under Section 9.5.1.3, the Owner may, at its sole option, issue joint checks to the Contractor and to any Subcontractor or supplier to whom the Contractor failed to make payment for Work properly performed or material or equipment suitably delivered. If the Owner makes payments by joint check, the Owner shall notify the Architect and the Contractor shall reflect such payment on its next Application for Payment.

### § 9.6 Progress Payments

**§ 9.6.1** After the Architect has issued a Certificate for Payment, the Owner shall make payment in the manner and within the time provided in the Contract Documents, and shall so notify the Architect.

**§ 9.6.2** The Contractor shall pay each Subcontractor, no later than seven days after receipt of payment from the Owner, the amount to which the Subcontractor is entitled, reflecting percentages actually retained from payments to the Contractor on account of the Subcontractor's portion of the Work. The Contractor shall, by appropriate agreement with each Subcontractor, require each Subcontractor to make payments to Sub-subcontractors in a similar manner.

**§ 9.6.3** The Architect will, on request, furnish to a Subcontractor, if practicable, information regarding percentages of completion or amounts applied for by the Contractor and action taken thereon by the Architect and Owner on account of portions of the Work done by such Subcontractor.

**§ 9.6.4** The Owner has the right to request written evidence from the Contractor that the Contractor has properly paid Subcontractors and suppliers amounts paid by the Owner to the Contractor for subcontracted Work. If the Contractor fails to furnish such evidence within seven days, the Owner shall have the right to contact Subcontractors and suppliers to ascertain whether they have been properly paid. Neither the Owner nor Architect shall have an obligation to pay, or to see to the payment of money to, a Subcontractor or supplier, except as may otherwise be required by law.

**§ 9.6.5** The Contractor's payments to suppliers shall be treated in a manner similar to that provided in Sections 9.6.2, 9.6.3 and 9.6.4.

**§ 9.6.6** A Certificate for Payment, a progress payment, or partial or entire use or occupancy of the Project by the Owner shall not constitute acceptance of Work not in accordance with the Contract Documents.

**§ 9.6.7** Unless the Contractor provides the Owner with a payment bond in the full penal sum of the Contract Sum, payments received by the Contractor for Work properly performed by Subcontractors or provided by suppliers shall be held by the Contractor for those Subcontractors or suppliers who performed Work or furnished materials, or both, under contract with the Contractor for which payment was made by the Owner. Nothing contained herein shall require money to be placed in a separate account and not commingled with money of the Contractor, create any fiduciary liability or tort liability on the part of the Contractor for breach of trust, or entitle any person or entity to an award of punitive damages against the Contractor for breach of the requirements of this provision.

**§ 9.6.8** Provided the Owner has fulfilled its payment obligations under the Contract Documents, the Contractor shall defend and indemnify the Owner from all loss, liability, damage or expense, including reasonable attorney's fees and litigation expenses, arising out of any lien claim or other claim for payment by any Subcontractor or supplier of any tier. Upon receipt of notice of a lien claim or other claim for payment, the Owner shall notify the Contractor. If approved by the applicable court, when required, the Contractor may substitute a surety bond for the property against which the lien or other claim for payment has been asserted.

### § 9.7 Failure of Payment

If the Architect does not issue a Certificate for Payment, through no fault of the Contractor, within seven days after receipt of the Contractor's Application for Payment, or if the Owner does not pay the Contractor within seven days after the date established in the Contract Documents, the amount certified by the Architect or awarded by binding dispute resolution, then the Contractor may, upon seven additional days' notice to the Owner and Architect, stop the Work until payment of the amount owing has been received. The Contract Time shall be extended appropriately and

**User Notes:** (6a185f1d6376d97ba92ef6ac)

the Contract Sum shall be increased by the amount of the Contractor's reasonable costs of shutdown, delay and start-up, plus interest as provided for in the Contract Documents.

### § 9.8 Substantial Completion

**§ 9.8.1** Substantial Completion is the stage in the progress of the Work when the Work or designated portion thereof is sufficiently complete in accordance with the Contract Documents so that the Owner can occupy or utilize the Work for its intended use.

**§ 9.8.2** When the Contractor considers that the Work, or a portion thereof which the Owner agrees to accept separately, is substantially complete, the Contractor shall prepare and submit to the Architect a comprehensive list of items to be completed or corrected prior to final payment. Failure to include an item on such list does not alter the responsibility of the Contractor to complete all Work in accordance with the Contract Documents.

**§ 9.8.3** Upon receipt of the Contractor's list, the Architect will make an inspection to determine whether the Work or designated portion thereof is substantially complete. If the Architect's inspection discloses any item, whether or not included on the Contractor's list, which is not sufficiently complete in accordance with the Contract Documents so that the Owner can occupy or utilize the Work or designated portion thereof for its intended use, the Contractor shall, before issuance of the Certificate of Substantial Completion, complete or correct such item upon notification by the Architect. In such case, the Contractor shall then submit a request for another inspection by the Architect to determine Substantial Completion.

**§ 9.8.4** When the Work or designated portion thereof is substantially complete, the Architect will prepare a Certificate of Substantial Completion that shall establish the date of Substantial Completion; establish responsibilities of the Owner and Contractor for security, maintenance, heat, utilities, damage to the Work and insurance; and fix the time within which the Contractor shall finish all items on the list accompanying the Certificate. Warranties required by the Contract Documents shall commence on the date of Substantial Completion of the Work or designated portion thereof unless otherwise provided in the Certificate of Substantial Completion.

**§ 9.8.5** The Certificate of Substantial Completion shall be submitted to the Owner and Contractor for their written acceptance of responsibilities assigned to them in the Certificate. Upon such acceptance, and consent of surety if any, the Owner shall make payment of retainage applying to the Work or designated portion thereof. Such payment shall be adjusted for Work that is incomplete or not in accordance with the requirements of the Contract Documents.

### § 9.9 Partial Occupancy or Use

**§ 9.9.1** The Owner may occupy or use any completed or partially completed portion of the Work at any stage when such portion is designated by separate agreement with the Contractor, provided such occupancy or use is consented to by the insurer and authorized by public authorities having jurisdiction over the Project. Such partial occupancy or use may commence whether or not the portion is substantially complete, provided the Owner and Contractor have accepted in writing the responsibilities assigned to each of them for payments, retainage, if any, security, maintenance, heat, utilities, damage to the Work and insurance, and have agreed in writing concerning the period for correction of the Work and commencement of warranties required by the Contract Documents. When the Contractor considers a portion substantially complete, the Contractor shall prepare and submit a list to the Architect as provided under Section 9.8.2. Consent of the Contractor to partial occupancy or use shall not be unreasonably withheld. The stage of the progress of the Work shall be determined by written agreement between the Owner and Contractor or, if no agreement is reached, by decision of the Architect.

**§ 9.9.2** Immediately prior to such partial occupancy or use, the Owner, Contractor, and Architect shall jointly inspect the area to be occupied or portion of the Work to be used in order to determine and record the condition of the Work.

**§ 9.9.3** Unless otherwise agreed upon, partial occupancy or use of a portion or portions of the Work shall not constitute acceptance of Work not complying with the requirements of the Contract Documents.

### § 9.10 Final Completion and Final Payment

**§ 9.10.1** Upon receipt of the Contractor's notice that the Work is ready for final inspection and acceptance and upon receipt of a final Application for Payment, the Architect will promptly make such inspection. When the Architect finds the Work acceptable under the Contract Documents and the Contract fully performed, the Architect will promptly issue a final Certificate for Payment stating that to the best of the Architect's knowledge, information and

To report copyright violations, e-mail docinfo@aiacontracts.com.
**User Notes:** (6a185f1d6376d97ba92ef6ac)

belief, and on the basis of the Architect's on-site visits and inspections, the Work has been completed in accordance with the Contract Documents and that the entire balance found to be due the Contractor and noted in the final Certificate is due and payable. The Architect's final Certificate for Payment will constitute a further representation that conditions listed in Section 9.10.2 as precedent to the Contractor's being entitled to final payment have been fulfilled.

**§ 9.10.2** Neither final payment nor any remaining retained percentage shall become due until the Contractor submits to the Architect (1) an affidavit that payrolls, bills for materials and equipment, and other indebtedness connected with the Work for which the Owner or the Owner's property might be responsible or encumbered (less amounts withheld by Owner) have been paid or otherwise satisfied, (2) a certificate evidencing that insurance required by the Contract Documents to remain in force after final payment is currently in effect, (3) a written statement that the Contractor knows of no reason that the insurance will not be renewable to cover the period required by the Contract Documents, (4) consent of surety, if any, to final payment, (5) documentation of any special warranties, such as manufacturers' warranties or specific Subcontractor warranties, and (6) if required by the Owner, other data establishing payment or satisfaction of obligations, such as receipts and releases and waivers of liens, claims, security interests, or encumbrances arising out of the Contract, to the extent and in such form as may be designated by the Owner. If a Subcontractor refuses to furnish a release or waiver required by the Owner, the Contractor may furnish a bond satisfactory to the Owner to indemnify the Owner against such lien, claim, security interest, or encumbrance. If a lien, claim, security interest, or encumbrance remains unsatisfied after payments are made, the Contractor shall refund to the Owner all money that the Owner may be compelled to pay in discharging the lien, claim, security interest, or encumbrance, including all costs and reasonable attorneys' fees.

**§ 9.10.3** If, after Substantial Completion of the Work, final completion thereof is materially delayed through no fault of the Contractor or by issuance of Change Orders affecting final completion, and the Architect so confirms, the Owner shall, upon application by the Contractor and certification by the Architect, and without terminating the Contract, make payment of the balance due for that portion of the Work fully completed, corrected, and accepted. If the remaining balance for Work not fully completed or corrected is less than retainage stipulated in the Contract Documents, and if bonds have been furnished, the written consent of the surety to payment of the balance due for that portion of the Work fully completed and accepted shall be submitted by the Contractor to the Architect prior to certification of such payment. Such payment shall be made under terms and conditions governing final payment, except that it shall not constitute a waiver of Claims.

**§ 9.10.4** The making of final payment shall constitute a waiver of Claims by the Owner except those arising from

- **.1** liens, Claims, security interests, or encumbrances arising out of the Contract and unsettled;
- **.2** failure of the Work to comply with the requirements of the Contract Documents;
- **.3** terms of special warranties required by the Contract Documents; or
- **.4** audits performed by the Owner, if permitted by the Contract Documents, after final payment.

**§ 9.10.5** Acceptance of final payment by the Contractor, a Subcontractor, or a supplier, shall constitute a waiver of claims by that payee except those previously made in writing and identified by that payee as unsettled at the time of final Application for Payment.

## ARTICLE 10 PROTECTION OF PERSONS AND PROPERTY

### § 10.1 Safety Precautions and Programs

The Contractor shall be responsible for initiating, maintaining, and supervising all safety precautions and programs in connection with the performance of the Contract.

### § 10.2 Safety of Persons and Property

**§ 10.2.1** The Contractor shall take reasonable precautions for safety of, and shall provide reasonable protection to prevent damage, injury, or loss to

- **.1** employees on the Work and other persons who may be affected thereby;
- **.2** the Work and materials and equipment to be incorporated therein, whether in storage on or off the site, under care, custody, or control of the Contractor, a Subcontractor, or a Sub-subcontractor; and
- **.3** other property at the site or adjacent thereto, such as trees, shrubs, lawns, walks, pavements, roadways, structures, and utilities not designated for removal, relocation, or replacement in the course of construction.

**User Notes:** (6a185f1d6376d97ba92ef6ac)

**§ 10.2.2** The Contractor shall comply with, and give notices required by applicable laws, statutes, ordinances, codes, rules and regulations, and lawful orders of public authorities, bearing on safety of persons or property or their protection from damage, injury, or loss.

**§ 10.2.3** The Contractor shall implement, erect, and maintain, as required by existing conditions and performance of the Contract, reasonable safeguards for safety and protection, including posting danger signs and other warnings against hazards; promulgating safety regulations; and notifying the owners and users of adjacent sites and utilities of the safeguards.

**§ 10.2.4** When use or storage of explosives or other hazardous materials or equipment, or unusual methods are necessary for execution of the Work, the Contractor shall exercise utmost care and carry on such activities under supervision of properly qualified personnel.

**§ 10.2.5** The Contractor shall promptly remedy damage and loss (other than damage or loss insured under property insurance required by the Contract Documents) to property referred to in Sections 10.2.1.2 and 10.2.1.3 caused in whole or in part by the Contractor, a Subcontractor, a Sub-subcontractor, or anyone directly or indirectly employed by any of them, or by anyone for whose acts they may be liable and for which the Contractor is responsible under Sections 10.2.1.2 and 10.2.1.3. The Contractor may make a Claim for the cost to remedy the damage or loss to the extent such damage or loss is attributable to acts or omissions of the Owner or Architect or anyone directly or indirectly employed by either of them, or by anyone for whose acts either of them may be liable, and not attributable to the fault or negligence of the Contractor. The foregoing obligations of the Contractor are in addition to the Contractor's obligations under Section 3.18.

**§ 10.2.6** The Contractor shall designate a responsible member of the Contractor's organization at the site whose duty shall be the prevention of accidents. This person shall be the Contractor's superintendent unless otherwise designated by the Contractor in writing to the Owner and Architect.

**§ 10.2.7** The Contractor shall not permit any part of the construction or site to be loaded so as to cause damage or create an unsafe condition.

**§ 10.2.8 Injury or Damage to Person or Property**

If either party suffers injury or damage to person or property because of an act or omission of the other party, or of others for whose acts such party is legally responsible, notice of the injury or damage, whether or not insured, shall be given to the other party within a reasonable time not exceeding 21 days after discovery. The notice shall provide sufficient detail to enable the other party to investigate the matter.

**§ 10.3 Hazardous Materials and Substances**

**§ 10.3.1** The Contractor is responsible for compliance with any requirements included in the Contract Documents regarding hazardous materials or substances. If the Contractor encounters a hazardous material or substance not addressed in the Contract Documents and if reasonable precautions will be inadequate to prevent foreseeable bodily injury or death to persons resulting from a material or substance, including but not limited to asbestos or polychlorinated biphenyl (PCB), encountered on the site by the Contractor, the Contractor shall, upon recognizing the condition, immediately stop Work in the affected area and notify the Owner and Architect of the condition.

**§ 10.3.2** Upon receipt of the Contractor's notice, the Owner shall obtain the services of a licensed laboratory to verify the presence or absence of the material or substance reported by the Contractor and, in the event such material or substance is found to be present, to cause it to be rendered harmless. Unless otherwise required by the Contract Documents, the Owner shall furnish in writing to the Contractor and Architect the names and qualifications of persons or entities who are to perform tests verifying the presence or absence of the material or substance or who are to perform the task of removal or safe containment of the material or substance. The Contractor and the Architect will promptly reply to the Owner in writing stating whether or not either has reasonable objection to the persons or entities proposed by the Owner. If either the Contractor or Architect has an objection to a person or entity proposed by the Owner, the Owner shall propose another to whom the Contractor and the Architect have no reasonable objection. When the material or substance has been rendered harmless, Work in the affected area shall resume upon written agreement of the Owner and Contractor. By Change Order, the Contract Time shall be extended appropriately and the Contract Sum shall be increased by the amount of the Contractor's reasonable additional costs of shutdown, delay, and start-up.

**User Notes:** (6a185f1d6376d97ba92ef6ac)

**§ 10.3.3** To the fullest extent permitted by law, the Owner shall indemnify and hold harmless the Contractor, Subcontractors, Architect, Architect's consultants, and agents and employees of any of them from and against claims, damages, losses, and expenses, including but not limited to attorneys' fees, arising out of or resulting from performance of the Work in the affected area if in fact the material or substance presents the risk of bodily injury or death as described in Section 10.3.1 and has not been rendered harmless, provided that such claim, damage, loss, or expense is attributable to bodily injury, sickness, disease or death, or to injury to or destruction of tangible property (other than the Work itself), except to the extent that such damage, loss, or expense is due to the fault or negligence of the party seeking indemnity.

**§ 10.3.4** The Owner shall not be responsible under this Section 10.3 for hazardous materials or substances the Contractor brings to the site unless such materials or substances are required by the Contract Documents. The Owner shall be responsible for hazardous materials or substances required by the Contract Documents, except to the extent of the Contractor's fault or negligence in the use and handling of such materials or substances.

**§ 10.3.5** The Contractor shall reimburse the Owner for the cost and expense the Owner incurs (1) for remediation of hazardous materials or substances the Contractor brings to the site and negligently handles, or (2) where the Contractor fails to perform its obligations under Section 10.3.1, except to the extent that the cost and expense are due to the Owner's fault or negligence.

**§ 10.3.6** If, without negligence on the part of the Contractor, the Contractor is held liable by a government agency for the cost of remediation of a hazardous material or substance solely by reason of performing Work as required by the Contract Documents, the Owner shall reimburse the Contractor for all cost and expense thereby incurred.

### § 10.4 Emergencies

In an emergency affecting safety of persons or property, the Contractor shall act, at the Contractor's discretion, to prevent threatened damage, injury, or loss. Additional compensation or extension of time claimed by the Contractor on account of an emergency shall be determined as provided in Article 15 and Article 7.

## ARTICLE 11 INSURANCE AND BONDS

### § 11.1 Contractor's Insurance and Bonds

**§ 11.1.1** The Contractor shall purchase and maintain insurance of the types and limits of liability, containing the endorsements, and subject to the terms and conditions, as described in the Agreement or elsewhere in the Contract Documents. The Contractor shall purchase and maintain the required insurance from an insurance company or insurance companies lawfully authorized to issue insurance in the jurisdiction where the Project is located. The Owner, Architect, and Architect's consultants shall be named as additional insureds under the Contractor's commercial general liability policy or as otherwise described in the Contract Documents.

**§ 11.1.2** The Contractor shall provide surety bonds of the types, for such penal sums, and subject to such terms and conditions as required by the Contract Documents. The Contractor shall purchase and maintain the required bonds from a company or companies lawfully authorized to issue surety bonds in the jurisdiction where the Project is located.

**§ 11.1.3** Upon the request of any person or entity appearing to be a potential beneficiary of bonds covering payment of obligations arising under the Contract, the Contractor shall promptly furnish a copy of the bonds or shall authorize a copy to be furnished.

**§ 11.1.4 Notice of Cancellation or Expiration of Contractor's Required Insurance.** Within three (3) business days of the date the Contractor becomes aware of an impending or actual cancellation or expiration of any insurance required by the Contract Documents, the Contractor shall provide notice to the Owner of such impending or actual cancellation or expiration. Upon receipt of notice from the Contractor, the Owner shall, unless the lapse in coverage arises from an act or omission of the Owner, have the right to stop the Work until the lapse in coverage has been cured by the procurement of replacement coverage by the Contractor. The furnishing of notice by the Contractor shall not relieve the Contractor of any contractual obligation to provide any required coverage.

### § 11.2 Owner's Insurance

**§ 11.2.1** The Owner shall purchase and maintain insurance of the types and limits of liability, containing the endorsements, and subject to the terms and conditions, as described in the Agreement or elsewhere in the Contract Documents. The Owner shall purchase and maintain the required insurance from an insurance company or insurance

AIA Document A201 – 2017. Copyright © 1911, 1915, 1918, 1925, 1937, 1951, 1958, 1961, 1963, 1966, 1970, 1976, 1987, 1997, 2007 and 2017. All rights reserved. **User Notes:** (6a185f1d6376d97ba92ef6ac)

companies lawfully authorized to issue insurance in the jurisdiction where the Project is located.

**§ 11.2.2 Failure to Purchase Required Property Insurance.** If the Owner fails to purchase and maintain the required property insurance, with all of the coverages and in the amounts described in the Agreement or elsewhere in the Contract Documents, the Owner shall inform the Contractor in writing prior to commencement of the Work. Upon receipt of notice from the Owner, the Contractor may delay commencement of the Work and may obtain insurance that will protect the interests of the Contractor, Subcontractors, and Sub-Subcontractors in the Work. When the failure to provide coverage has been cured or resolved, the Contract Sum and Contract Time shall be equitably adjusted. In the event the Owner fails to procure coverage, the Owner waives all rights against the Contractor, Subcontractors, and Sub-subcontractors to the extent the loss to the Owner would have been covered by the insurance to have been procured by the Owner. The cost of the insurance shall be charged to the Owner by a Change Order. If the Owner does not provide written notice, and the Contractor is damaged by the failure or neglect of the Owner to purchase or maintain the required insurance, the Owner shall reimburse the Contractor for all reasonable costs and damages attributable thereto.

**§ 11.2.3 Notice of Cancellation or Expiration of Owner's Required Property Insurance.** Within three (3) business days of the date the Owner becomes aware of an impending or actual cancellation or expiration of any property insurance required by the Contract Documents, the Owner shall provide notice to the Contractor of such impending or actual cancellation or expiration. Unless the lapse in coverage arises from an act or omission of the Contractor: (1) the Contractor, upon receipt of notice from the Owner, shall have the right to stop the Work until the lapse in coverage has been cured by the procurement of replacement coverage by either the Owner or the Contractor; (2) the Contract Time and Contract Sum shall be equitably adjusted; and (3) the Owner waives all rights against the Contractor, Subcontractors, and Sub-subcontractors to the extent any loss to the Owner would have been covered by the insurance had it not expired or been cancelled. If the Contractor purchases replacement coverage, the cost of the insurance shall be charged to the Owner by an appropriate Change Order. The furnishing of notice by the Owner shall not relieve the Owner of any contractual obligation to provide required insurance.

**§ 11.3 Waivers of Subrogation**

**§ 11.3.1** The Owner and Contractor waive all rights against (1) each other and any of their subcontractors, sub-subcontractors, agents, and employees, each of the other; (2) the Architect and Architect's consultants; and (3) Separate Contractors, if any, and any of their subcontractors, sub-subcontractors, agents, and employees, for damages caused by fire, or other causes of loss, to the extent those losses are covered by property insurance required by the Agreement or other property insurance applicable to the Project, except such rights as they have to proceeds of such insurance. The Owner or Contractor, as appropriate, shall require similar written waivers in favor of the individuals and entities identified above from the Architect, Architect's consultants, Separate Contractors, subcontractors, and sub-subcontractors. The policies of insurance purchased and maintained by each person or entity agreeing to waive claims pursuant to this section 11.3.1 shall not prohibit this waiver of subrogation. This waiver of subrogation shall be effective as to a person or entity (1) even though that person or entity would otherwise have a duty of indemnification, contractual or otherwise, (2) even though that person or entity did not pay the insurance premium directly or indirectly, or (3) whether or not the person or entity had an insurable interest in the damaged property.

**§ 11.3.2** If during the Project construction period the Owner insures properties, real or personal or both, at or adjacent to the site by property insurance under policies separate from those insuring the Project, or if after final payment property insurance is to be provided on the completed Project through a policy or policies other than those insuring the Project during the construction period, to the extent permissible by such policies, the Owner waives all rights in accordance with the terms of Section 11.3.1 for damages caused by fire or other causes of loss covered by this separate property insurance.

**§ 11.4 Loss of Use, Business Interruption, and Delay in Completion Insurance**

The Owner, at the Owner's option, may purchase and maintain insurance that will protect the Owner against loss of use of the Owner's property, or the inability to conduct normal operations, due to fire or other causes of loss. The Owner waives all rights of action against the Contractor and Architect for loss of use of the Owner's property, due to fire or other hazards however caused.

**§11.5 Adjustment and Settlement of Insured Loss**

**§ 11.5.1** A loss insured under the property insurance required by the Agreement shall be adjusted by the Owner as fiduciary and made payable to the Owner as fiduciary for the insureds, as their interests may appear, subject to requirements of any applicable mortgagee clause and of Section 11.5.2. The Owner shall pay the Architect and

Contractor their just shares of insurance proceeds received by the Owner, and by appropriate agreements the Architect and Contractor shall make payments to their consultants and Subcontractors in similar manner.

**§ 11.5.2** Prior to settlement of an insured loss, the Owner shall notify the Contractor of the terms of the proposed settlement as well as the proposed allocation of the insurance proceeds. The Contractor shall have 14 days from receipt of notice to object to the proposed settlement or allocation of the proceeds. If the Contractor does not object, the Owner shall settle the loss and the Contractor shall be bound by the settlement and allocation. Upon receipt, the Owner shall deposit the insurance proceeds in a separate account and make the appropriate distributions. Thereafter, if no other agreement is made or the Owner does not terminate the Contract for convenience, the Owner and Contractor shall execute a Change Order for reconstruction of the damaged or destroyed Work in the amount allocated for that purpose. If the Contractor timely objects to either the terms of the proposed settlement or the allocation of the proceeds, the Owner may proceed to settle the insured loss, and any dispute between the Owner and Contractor arising out of the settlement or allocation of the proceeds shall be resolved pursuant to Article 15. Pending resolution of any dispute, the Owner may issue a Construction Change Directive for the reconstruction of the damaged or destroyed Work.

## ARTICLE 12 UNCOVERING AND CORRECTION OF WORK

### § 12.1 Uncovering of Work

**§ 12.1.1** If a portion of the Work is covered contrary to the Architect's request or to requirements specifically expressed in the Contract Documents, it must, if requested in writing by the Architect, be uncovered for the Architect's examination and be replaced at the Contractor's expense without change in the Contract Time.

**§ 12.1.2** If a portion of the Work has been covered that the Architect has not specifically requested to examine prior to its being covered, the Architect may request to see such Work and it shall be uncovered by the Contractor. If such Work is in accordance with the Contract Documents, the Contractor shall be entitled to an equitable adjustment to the Contract Sum and Contract Time as may be appropriate. If such Work is not in accordance with the Contract Documents, the costs of uncovering the Work, and the cost of correction, shall be at the Contractor's expense.

### § 12.2 Correction of Work

#### § 12.2.1 Before Substantial Completion

The Contractor shall promptly correct Work rejected by the Architect or failing to conform to the requirements of the Contract Documents, discovered before Substantial Completion and whether or not fabricated, installed or completed. Costs of correcting such rejected Work, including additional testing and inspections, the cost of uncovering and replacement, and compensation for the Architect's services and expenses made necessary thereby, shall be at the Contractor's expense.

#### § 12.2.2 After Substantial Completion

**§ 12.2.2.1** In addition to the Contractor's obligations under Section 3.5, if, within one year after the date of Substantial Completion of the Work or designated portion thereof or after the date for commencement of warranties established under Section 9.9.1, or by terms of any applicable special warranty required by the Contract Documents, any of the Work is found to be not in accordance with the requirements of the Contract Documents, the Contractor shall correct it promptly after receipt of notice from the Owner to do so, unless the Owner has previously given the Contractor a written acceptance of such condition. The Owner shall give such notice promptly after discovery of the condition. During the one-year period for correction of Work, if the Owner fails to notify the Contractor and give the Contractor an opportunity to make the correction, the Owner waives the rights to require correction by the Contractor and to make a claim for breach of warranty. If the Contractor fails to correct nonconforming Work within a reasonable time during that period after receipt of notice from the Owner or Architect, the Owner may correct it in accordance with Section 2.5.

**§ 12.2.2.2** The one-year period for correction of Work shall be extended with respect to portions of Work first performed after Substantial Completion by the period of time between Substantial Completion and the actual completion of that portion of the Work.

**§ 12.2.2.3** The one-year period for correction of Work shall not be extended by corrective Work performed by the Contractor pursuant to this Section 12.2.

**§ 12.2.3** The Contractor shall remove from the site portions of the Work that are not in accordance with the requirements of the Contract Documents and are neither corrected by the Contractor nor accepted by the Owner.

**User Notes:** (6a185f1d6376d97ba92ef6ac)

**§ 12.2.4** The Contractor shall bear the cost of correcting destroyed or damaged construction of the Owner or Separate Contractors, whether completed or partially completed, caused by the Contractor's correction or removal of Work that is not in accordance with the requirements of the Contract Documents.

**§ 12.2.5** Nothing contained in this Section 12.2 shall be construed to establish a period of limitation with respect to other obligations the Contractor has under the Contract Documents. Establishment of the one-year period for correction of Work as described in Section 12.2.2 relates only to the specific obligation of the Contractor to correct the Work, and has no relationship to the time within which the obligation to comply with the Contract Documents may be sought to be enforced, nor to the time within which proceedings may be commenced to establish the Contractor's liability with respect to the Contractor's obligations other than specifically to correct the Work.

### § 12.3 Acceptance of Nonconforming Work

If the Owner prefers to accept Work that is not in accordance with the requirements of the Contract Documents, the Owner may do so instead of requiring its removal and correction, in which case the Contract Sum will be reduced as appropriate and equitable. Such adjustment shall be effected whether or not final payment has been made.

## ARTICLE 13 MISCELLANEOUS PROVISIONS

### § 13.1 Governing Law

The Contract shall be governed by the law of the place where the Project is located, excluding that jurisdiction's choice of law rules. If the parties have selected arbitration as the method of binding dispute resolution, the Federal Arbitration Act shall govern Section 15.4.

### § 13.2 Successors and Assigns

**§ 13.2.1** The Owner and Contractor respectively bind themselves, their partners, successors, assigns, and legal representatives to covenants, agreements, and obligations contained in the Contract Documents. Except as provided in Section 13.2.2, neither party to the Contract shall assign the Contract as a whole without written consent of the other. If either party attempts to make an assignment without such consent, that party shall nevertheless remain legally responsible for all obligations under the Contract.

**§ 13.2.2** The Owner may, without consent of the Contractor, assign the Contract to a lender providing construction financing for the Project, if the lender assumes the Owner's rights and obligations under the Contract Documents. The Contractor shall execute all consents reasonably required to facilitate the assignment.

### § 13.3 Rights and Remedies

**§ 13.3.1** Duties and obligations imposed by the Contract Documents and rights and remedies available thereunder shall be in addition to and not a limitation of duties, obligations, rights, and remedies otherwise imposed or available by law.

**§ 13.3.2** No action or failure to act by the Owner, Architect, or Contractor shall constitute a waiver of a right or duty afforded them under the Contract, nor shall such action or failure to act constitute approval of or acquiescence in a breach thereunder, except as may be specifically agreed upon in writing.

### § 13.4 Tests and Inspections

**§ 13.4.1** Tests, inspections, and approvals of portions of the Work shall be made as required by the Contract Documents and by applicable laws, statutes, ordinances, codes, rules, and regulations or lawful orders of public authorities. Unless otherwise provided, the Contractor shall make arrangements for such tests, inspections, and approvals with an independent testing laboratory or entity acceptable to the Owner, or with the appropriate public authority, and shall bear all related costs of tests, inspections, and approvals. The Contractor shall give the Architect timely notice of when and where tests and inspections are to be made so that the Architect may be present for such procedures. The Owner shall bear costs of tests, inspections, or approvals that do not become requirements until after bids are received or negotiations concluded. The Owner shall directly arrange and pay for tests, inspections, or approvals where building codes or applicable laws or regulations so require.

**§ 13.4.2** If the Architect, Owner, or public authorities having jurisdiction determine that portions of the Work require additional testing, inspection, or approval not included under Section 13.4.1, the Architect will, upon written authorization from the Owner, instruct the Contractor to make arrangements for such additional testing, inspection, or approval, by an entity acceptable to the Owner, and the Contractor shall give timely notice to the Architect of

**User Notes:** (6a185f1d6376d97ba92ef6ac)

when and where tests and inspections are to be made so that the Architect may be present for such procedures. Such costs, except as provided in Section 13.4.3, shall be at the Owner's expense.

**§ 13.4.3** If procedures for testing, inspection, or approval under Sections 13.4.1 and 13.4.2 reveal failure of the portions of the Work to comply with requirements established by the Contract Documents, all costs made necessary by such failure, including those of repeated procedures and compensation for the Architect's services and expenses, shall be at the Contractor's expense.

**§ 13.4.4** Required certificates of testing, inspection, or approval shall, unless otherwise required by the Contract Documents, be secured by the Contractor and promptly delivered to the Architect.

**§ 13.4.5** If the Architect is to observe tests, inspections, or approvals required by the Contract Documents, the Architect will do so promptly and, where practicable, at the normal place of testing.

**§ 13.4.6** Tests or inspections conducted pursuant to the Contract Documents shall be made promptly to avoid unreasonable delay in the Work.

### § 13.5 Interest

Payments due and unpaid under the Contract Documents shall bear interest from the date payment is due at the rate the parties agree upon in writing or, in the absence thereof, at the legal rate prevailing from time to time at the place where the Project is located.

## ARTICLE 14 TERMINATION OR SUSPENSION OF THE CONTRACT

### § 14.1 Termination by the Contractor

**§ 14.1.1** The Contractor may terminate the Contract if the Work is stopped for a period of 30 consecutive days through no act or fault of the Contractor, a Subcontractor, a Sub-subcontractor, their agents or employees, or any other persons or entities performing portions of the Work, for any of the following reasons:

- **.1** Issuance of an order of a court or other public authority having jurisdiction that requires all Work to be stopped;
- **.2** An act of government, such as a declaration of national emergency, that requires all Work to be stopped;
- **.3** Because the Architect has not issued a Certificate for Payment and has not notified the Contractor of the reason for withholding certification as provided in Section 9.4.1, or because the Owner has not made payment on a Certificate for Payment within the time stated in the Contract Documents; or
- **.4** The Owner has failed to furnish to the Contractor reasonable evidence as required by Section 2.2.

**§ 14.1.2** The Contractor may terminate the Contract if, through no act or fault of the Contractor, a Subcontractor, a Sub-subcontractor, their agents or employees, or any other persons or entities performing portions of the Work, repeated suspensions, delays, or interruptions of the entire Work by the Owner as described in Section 14.3, constitute in the aggregate more than 100 percent of the total number of days scheduled for completion, or 120 days in any 365-day period, whichever is less.

**§ 14.1.3** If one of the reasons described in Section 14.1.1 or 14.1.2 exists, the Contractor may, upon seven days' notice to the Owner and Architect, terminate the Contract and recover from the Owner payment for Work executed, as well as reasonable overhead and profit on Work not executed, and costs incurred by reason of such termination.

**§ 14.1.4** If the Work is stopped for a period of 60 consecutive days through no act or fault of the Contractor, a Subcontractor, a Sub-subcontractor, or their agents or employees or any other persons or entities performing portions of the Work because the Owner has repeatedly failed to fulfill the Owner's obligations under the Contract Documents with respect to matters important to the progress of the Work, the Contractor may, upon seven additional days' notice to the Owner and the Architect, terminate the Contract and recover from the Owner as provided in Section 14.1.3.

### § 14.2 Termination by the Owner for Cause

**§ 14.2.1** The Owner may terminate the Contract if the Contractor

- **.1** repeatedly refuses or fails to supply enough properly skilled workers or proper materials;
- **.2** fails to make payment to Subcontractors or suppliers in accordance with the respective agreements

AIA Document A201 – 2017. Copyright © 1911, 1915, 1918, 1925, 1937, 1951, 1958, 1961, 1963, 1966, 1970, 1976, 1987, 1997, 2007 and 2017. All rights reserved. To report copyright violations, e-mail docinfo@aiacontracts.com.
**User Notes:** (6a185f1d6376d97ba92ef6ac)

between the Contractor and the Subcontractors or suppliers;

**.3** repeatedly disregards applicable laws, statutes, ordinances, codes, rules and regulations, or lawful orders of a public authority; or

**.4** otherwise is guilty of substantial breach of a provision of the Contract Documents.

**§ 14.2.2** When any of the reasons described in Section 14.2.1 exist, and upon certification by the Architect that sufficient cause exists to justify such action, the Owner may, without prejudice to any other rights or remedies of the Owner and after giving the Contractor and the Contractor's surety, if any, seven days' notice, terminate employment of the Contractor and may, subject to any prior rights of the surety:

**.1** Exclude the Contractor from the site and take possession of all materials, equipment, tools, and construction equipment and machinery thereon owned by the Contractor;

**.2** Accept assignment of subcontracts pursuant to Section 5.4; and

**.3** Finish the Work by whatever reasonable method the Owner may deem expedient. Upon written request of the Contractor, the Owner shall furnish to the Contractor a detailed accounting of the costs incurred by the Owner in finishing the Work.

**§ 14.2.3** When the Owner terminates the Contract for one of the reasons stated in Section 14.2.1, the Contractor shall not be entitled to receive further payment until the Work is finished.

**§ 14.2.4** If the unpaid balance of the Contract Sum exceeds costs of finishing the Work, including compensation for the Architect's services and expenses made necessary thereby, and other damages incurred by the Owner and not expressly waived, such excess shall be paid to the Contractor. If such costs and damages exceed the unpaid balance, the Contractor shall pay the difference to the Owner. The amount to be paid to the Contractor or Owner, as the case may be, shall be certified by the Initial Decision Maker, upon application, and this obligation for payment shall survive termination of the Contract.

### § 14.3 Suspension by the Owner for Convenience

**§ 14.3.1** The Owner may, without cause, order the Contractor in writing to suspend, delay or interrupt the Work, in whole or in part for such period of time as the Owner may determine.

**§ 14.3.2** The Contract Sum and Contract Time shall be adjusted for increases in the cost and time caused by suspension, delay, or interruption under Section 14.3.1. Adjustment of the Contract Sum shall include profit. No adjustment shall be made to the extent

**.1** that performance is, was, or would have been, so suspended, delayed, or interrupted, by another cause for which the Contractor is responsible; or

**.2** that an equitable adjustment is made or denied under another provision of the Contract.

### § 14.4 Termination by the Owner for Convenience

**§ 14.4.1** The Owner may, at any time, terminate the Contract for the Owner's convenience and without cause.

**§ 14.4.2** Upon receipt of notice from the Owner of such termination for the Owner's convenience, the Contractor shall

**.1** cease operations as directed by the Owner in the notice;

**.2** take actions necessary, or that the Owner may direct, for the protection and preservation of the Work; and

**.3** except for Work directed to be performed prior to the effective date of termination stated in the notice, terminate all existing subcontracts and purchase orders and enter into no further subcontracts and purchase orders.

**§ 14.4.3** In case of such termination for the Owner's convenience, the Owner shall pay the Contractor for Work properly executed; costs incurred by reason of the termination, including costs attributable to termination of Subcontracts; and the termination fee, if any, set forth in the Agreement.

## ARTICLE 15 CLAIMS AND DISPUTES

### § 15.1 Claims

### § 15.1.1 Definition

AIA Document A201 – 2017. Copyright © 1911, 1915, 1918, 1925, 1937, 1951, 1958, 1961, 1963, 1966, 1970, 1976, 1987, 1997, 2007 and 2017. All rights reserved. "The American Institute of Architects," "American Institute of Architects," "AIA," the AIA Logo, and "AIA Contract Documents" are trademarks of The American Institute of Architects. This document was produced at 15:32:10 EDT on 05/28/2026 under Subscription No.20250149347 which expires on 08/02/2026, is not for resale, is licensed for one-time use only, and may only be used in accordance with the AIA Contract Documents® Terms of Service. To report copyright violations, e-mail docinfo@aiacontracts.com.
**User Notes:** (6a185f1d6376d97ba92ef6ac)

A Claim is a demand or assertion by one of the parties seeking, as a matter of right, payment of money, a change in the Contract Time, or other relief with respect to the terms of the Contract. The term "Claim" also includes other disputes and matters in question between the Owner and Contractor arising out of or relating to the Contract. The responsibility to substantiate Claims shall rest with the party making the Claim. This Section 15.1.1 does not require the Owner to file a Claim in order to impose liquidated damages in accordance with the Contract Documents.

**§ 15.1.2 Time Limits on Claims**

The Owner and Contractor shall commence all Claims and causes of action against the other and arising out of or related to the Contract, whether in contract, tort, breach of warranty or otherwise, in accordance with the requirements of the binding dispute resolution method selected in the Agreement and within the period specified by applicable law, but in any case not more than 10 years after the date of Substantial Completion of the Work. The Owner and Contractor waive all Claims and causes of action not commenced in accordance with this Section 15.1.2.

**§ 15.1.3 Notice of Claims**

**§ 15.1.3.1** Claims by either the Owner or Contractor, where the condition giving rise to the Claim is first discovered prior to expiration of the period for correction of the Work set forth in Section 12.2.2, shall be initiated by notice to the other party and to the Initial Decision Maker with a copy sent to the Architect, if the Architect is not serving as the Initial Decision Maker. Claims by either party under this Section 15.1.3.1 shall be initiated within 21 days after occurrence of the event giving rise to such Claim or within 21 days after the claimant first recognizes the condition giving rise to the Claim, whichever is later.

**§ 15.1.3.2** Claims by either the Owner or Contractor, where the condition giving rise to the Claim is first discovered after expiration of the period for correction of the Work set forth in Section 12.2.2, shall be initiated by notice to the other party. In such event, no decision by the Initial Decision Maker is required.

**§ 15.1.4 Continuing Contract Performance**

**§ 15.1.4.1** Pending final resolution of a Claim, except as otherwise agreed in writing or as provided in Section 9.7 and Article 14, the Contractor shall proceed diligently with performance of the Contract and the Owner shall continue to make payments in accordance with the Contract Documents.

**§ 15.1.4.2** The Contract Sum and Contract Time shall be adjusted in accordance with the Initial Decision Maker's decision, subject to the right of either party to proceed in accordance with this Article 15. The Architect will issue Certificates for Payment in accordance with the decision of the Initial Decision Maker.

**§ 15.1.5 Claims for Additional Cost**

If the Contractor wishes to make a Claim for an increase in the Contract Sum, notice as provided in Section 15.1.3 shall be given before proceeding to execute the portion of the Work that is the subject of the Claim. Prior notice is not required for Claims relating to an emergency endangering life or property arising under Section 10.4.

**§ 15.1.6 Claims for Additional Time**

**§ 15.1.6.1** If the Contractor wishes to make a Claim for an increase in the Contract Time, notice as provided in Section 15.1.3 shall be given. The Contractor's Claim shall include an estimate of cost and of probable effect of delay on progress of the Work. In the case of a continuing delay, only one Claim is necessary.

**§ 15.1.6.2** If adverse weather conditions are the basis for a Claim for additional time, such Claim shall be documented by data substantiating that weather conditions were abnormal for the period of time, could not have been reasonably anticipated, and had an adverse effect on the scheduled construction.

**§ 15.1.7 Waiver of Claims for Consequential Damages**

The Contractor and Owner waive Claims against each other for consequential damages arising out of or relating to this Contract. This mutual waiver includes

- **.1** damages incurred by the Owner for rental expenses, for losses of use, income, profit, financing, business and reputation, and for loss of management or employee productivity or of the services of such persons; and
- **.2** damages incurred by the Contractor for principal office expenses including the compensation of personnel stationed there, for losses of financing, business and reputation, and for loss of profit, except anticipated profit arising directly from the Work.

AIA Document A201 – 2017. Copyright © 1911, 1915, 1918, 1925, 1937, 1951, 1958, 1961, 1963, 1966, 1970, 1976, 1987, 1997, 2007 and 2017. All rights reserved. **User Notes:** (6a185f1d6376d97ba92ef6ac)

This mutual waiver is applicable, without limitation, to all consequential damages due to either party's termination in accordance with Article 14. Nothing contained in this Section 15.1.7 shall be deemed to preclude assessment of liquidated damages, when applicable, in accordance with the requirements of the Contract Documents.

### § 15.2 Initial Decision

**§ 15.2.1** Claims, excluding those where the condition giving rise to the Claim is first discovered after expiration of the period for correction of the Work set forth in Section 12.2.2 or arising under Sections 10.3, 10.4, and 11.5, shall be referred to the Initial Decision Maker for initial decision. The Architect will serve as the Initial Decision Maker, unless otherwise indicated in the Agreement. Except for those Claims excluded by this Section 15.2.1, an initial decision shall be required as a condition precedent to mediation of any Claim. If an initial decision has not been rendered within 30 days after the Claim has been referred to the Initial Decision Maker, the party asserting the Claim may demand mediation and binding dispute resolution without a decision having been rendered. Unless the Initial Decision Maker and all affected parties agree, the Initial Decision Maker will not decide disputes between the Contractor and persons or entities other than the Owner.

**§ 15.2.2** The Initial Decision Maker will review Claims and within ten days of the receipt of a Claim take one or more of the following actions: (1) request additional supporting data from the claimant or a response with supporting data from the other party, (2) reject the Claim in whole or in part, (3) approve the Claim, (4) suggest a compromise, or (5) advise the parties that the Initial Decision Maker is unable to resolve the Claim if the Initial Decision Maker lacks sufficient information to evaluate the merits of the Claim or if the Initial Decision Maker concludes that, in the Initial Decision Maker's sole discretion, it would be inappropriate for the Initial Decision Maker to resolve the Claim.

**§ 15.2.3** In evaluating Claims, the Initial Decision Maker may, but shall not be obligated to, consult with or seek information from either party or from persons with special knowledge or expertise who may assist the Initial Decision Maker in rendering a decision. The Initial Decision Maker may request the Owner to authorize retention of such persons at the Owner's expense.

**§ 15.2.4** If the Initial Decision Maker requests a party to provide a response to a Claim or to furnish additional supporting data, such party shall respond, within ten days after receipt of the request, and shall either (1) provide a response on the requested supporting data, (2) advise the Initial Decision Maker when the response or supporting data will be furnished, or (3) advise the Initial Decision Maker that no supporting data will be furnished. Upon receipt of the response or supporting data, if any, the Initial Decision Maker will either reject or approve the Claim in whole or in part.

**§ 15.2.5** The Initial Decision Maker will render an initial decision approving or rejecting the Claim, or indicating that the Initial Decision Maker is unable to resolve the Claim. This initial decision shall (1) be in writing; (2) state the reasons therefor; and (3) notify the parties and the Architect, if the Architect is not serving as the Initial Decision Maker, of any change in the Contract Sum or Contract Time or both. The initial decision shall be final and binding on the parties but subject to mediation and, if the parties fail to resolve their dispute through mediation, to binding dispute resolution.

**§ 15.2.6** Either party may file for mediation of an initial decision at any time, subject to the terms of Section 15.2.6.1.

**§ 15.2.6.1** Either party may, within 30 days from the date of receipt of an initial decision, demand in writing that the other party file for mediation. If such a demand is made and the party receiving the demand fails to file for mediation within 30 days after receipt thereof, then both parties waive their rights to mediate or pursue binding dispute resolution proceedings with respect to the initial decision.

**§ 15.2.7** In the event of a Claim against the Contractor, the Owner may, but is not obligated to, notify the surety, if any, of the nature and amount of the Claim. If the Claim relates to a possibility of a Contractor's default, the Owner may, but is not obligated to, notify the surety and request the surety's assistance in resolving the controversy.

**§ 15.2.8** If a Claim relates to or is the subject of a mechanic's lien, the party asserting such Claim may proceed in accordance with applicable law to comply with the lien notice or filing deadlines.

### § 15.3 Mediation

**§ 15.3.1** Claims, disputes, or other matters in controversy arising out of or related to the Contract, except those waived as provided for in Sections 9.10.4, 9.10.5, and 15.1.7, shall be subject to mediation as a condition precedent to binding dispute resolution.

**§ 15.3.2** The parties shall endeavor to resolve their Claims by mediation which, unless the parties mutually agree otherwise, shall be administered by the American Arbitration Association in accordance with its Construction Industry Mediation Procedures in effect on the date of the Agreement. A request for mediation shall be made in writing, delivered to the other party to the Contract, and filed with the person or entity administering the mediation. The request may be made concurrently with the filing of binding dispute resolution proceedings but, in such event, mediation shall proceed in advance of binding dispute resolution proceedings, which shall be stayed pending mediation for a period of 60 days from the date of filing, unless stayed for a longer period by agreement of the parties or court order. If an arbitration is stayed pursuant to this Section 15.3.2, the parties may nonetheless proceed to the selection of the arbitrator(s) and agree upon a schedule for later proceedings.

**§ 15.3.3** Either party may, within 30 days from the date that mediation has been concluded without resolution of the dispute or 60 days after mediation has been demanded without resolution of the dispute, demand in writing that the other party file for binding dispute resolution. If such a demand is made and the party receiving the demand fails to file for binding dispute resolution within 60 days after receipt thereof, then both parties waive their rights to binding dispute resolution proceedings with respect to the initial decision.

**§ 15.3.4** The parties shall share the mediator's fee and any filing fees equally. The mediation shall be held in the place where the Project is located, unless another location is mutually agreed upon. Agreements reached in mediation shall be enforceable as settlement agreements in any court having jurisdiction thereof.

### § 15.4 Arbitration

**§ 15.4.1** If the parties have selected arbitration as the method for binding dispute resolution in the Agreement, any Claim subject to, but not resolved by, mediation shall be subject to arbitration which, unless the parties mutually agree otherwise, shall be administered by the American Arbitration Association in accordance with its Construction Industry Arbitration Rules in effect on the date of the Agreement. The Arbitration shall be conducted in the place where the Project is located, unless another location is mutually agreed upon. A demand for arbitration shall be made in writing, delivered to the other party to the Contract, and filed with the person or entity administering the arbitration. The party filing a notice of demand for arbitration must assert in the demand all Claims then known to that party on which arbitration is permitted to be demanded.

**§ 15.4.1.1** A demand for arbitration shall be made no earlier than concurrently with the filing of a request for mediation, but in no event shall it be made after the date when the institution of legal or equitable proceedings based on the Claim would be barred by the applicable statute of limitations. For statute of limitations purposes, receipt of a written demand for arbitration by the person or entity administering the arbitration shall constitute the institution of legal or equitable proceedings based on the Claim.

**§ 15.4.2** The award rendered by the arbitrator or arbitrators shall be final, and judgment may be entered upon it in accordance with applicable law in any court having jurisdiction thereof.

**§ 15.4.3** The foregoing agreement to arbitrate and other agreements to arbitrate with an additional person or entity duly consented to by parties to the Agreement, shall be specifically enforceable under applicable law in any court having jurisdiction thereof.

### § 15.4.4 Consolidation or Joinder

**§ 15.4.4.1** Subject to the rules of the American Arbitration Association or other applicable arbitration rules, either party may consolidate an arbitration conducted under this Agreement with any other arbitration to which it is a party provided that (1) the arbitration agreement governing the other arbitration permits consolidation, (2) the arbitrations to be consolidated substantially involve common questions of law or fact, and (3) the arbitrations employ materially similar procedural rules and methods for selecting arbitrator(s).

**§ 15.4.4.2** Subject to the rules of the American Arbitration Association or other applicable arbitration rules, either party may include by joinder persons or entities substantially involved in a common question of law or fact whose presence is required if complete relief is to be accorded in arbitration, provided that the party sought to be joined

Bond No._____

# COMBINATION PAYMENT AND PERFORMANCE BOND
# FOR
# PUBLIC CONSTRUCTION

*per Section 255.05, Florida Statutes*
Guaranty for Construction of Public Improvements

BY THIS BOND, We, **ALL STATE CIVIL CONSTRUCTION, INC.** as Principal, and _____, a corporation, as Surety, are bound to **CITY OF PORT ORANGE, FLORIDA**, a Florida municipal corporation, herein called "Owner" or sometimes referred to as "City," in the sum of **THREE MILLION SIX HUNDRED THIRTY SIX THOUSAND TWENTY EIGHT AND 16/100 DOLLARS** (**$3,636,028.16**), for payment of which we bind ourselves, our heirs, personal representatives, successors, and assigns, jointly and severally.

THE CONDITION OF THIS BOND is that if Principal:

1. Performs the terms of that certain AIA Agreement having an effective date of _____, entered into by and between the Principal and the City, for City Center Sports Complex Project, hereinafter referred to as the "Contract," being made a part of this bond by reference, at the times and in the manner prescribed in the Contract; and

2. Promptly makes payments to all claimants, as defined in Section 255.05(1), Florida Statutes, supplying Principal with labor, materials, or supplies, used directly or indirectly by Principal in the prosecution of the work provided for in the Contract (the "Work"); and

3. Pays Owner all losses, damages, delay damages (including contractually authorized liquidated damages), expenses, costs, and attorney's fees, including appellate proceedings, that Owner sustains because of a breach or material breach by Principal under the Contract documents; and

4. Performs the guarantee of all work and materials furnished under the Contract for the time specified in the Contract, then this bond is void; otherwise it remains in full force.

**Notice of Nonpayment and Time Limitations**

Any action instituted by a claimant under this bond for payment must be in accordance with the notice and time limitation provisions in Sections 255.05(2), (8) and (10), Florida Statutes.

Any changes in or under the contract documents and compliance or noncompliance with any formalities connected with the contract or the changes does not affect Surety's obligation under this bond.

IN WITNESS WHEREOF, this performance and payment bond shall be deemed an original, this _____, day of _____, 2026.

| PAYMENT DUE THIS ESTIMATE: | $_____ | $_____ |

## AFFIDAVIT OF OUTSTANDING ACCOUNTS

We hereby certify that all outstanding claims for labor, insurance, unemployment benefits, taxes, union benefits, subcontract materials, expendable equipment, and any and all other obligations incurred in the performance of said agreement have been paid in full in accordance with the requirements of said agreement except such outstanding claims as are listed below, which statement contains all claims against Contractor which are not yet paid. (All amounts owed, even if under extended periods of credit, must be included in this statement.) We also certify that these due and payable accounts will be paid as shown below out of funds to be received from the Owner for this period and signed Releases of Lien will be presented to Owner for each of the below listed Suppliers/Subcontractors.

| Subcontractor/ Supplier Name | Type of Material or Labor Furnished | Contract Price (if applicable) | Amount Previously Paid | Amount to be Paid by Contractor to Subcontractor/ Supplier out of this Payment | Balance Owing Subcontractor/ Supplier After this Payment |

| | | | | | |
| | | | | | |
| | | | | | |

The undersigned Contractor, having heretofore entered into a Contract with Owner to perform work in connection with the above project, and having made Affidavit of Outstanding Accounts in connection with request for payment in order to induce Owner to make a payment at this time in the amount indicated above, agrees as follows:

- That said payment is in strict compliance with the terms and conditions of said contract.
- That said payment shall be received as a trust fund and applied by the undersigned for the discharge of his obligations for labor, subcontract work, materials, equipment, supplies, services, etc. in connection with this project.
- That said payment will not be deposited with any depository to whom the Contractor has given any evidence of an indebted which gives to the depository any legal rights to such funds or any part thereof.
- That the person executing this Certificate on behalf of the Contractor is an authorized officer of the Contractor, having knowledge of all the matters hereinabove set forth and is duly authorized to execute this Certificate and bind the Contractor.

# NOTICE OF INTENT TO AWARD

## ITB #26-07 City Center Sports Complex Expansion

**May 19, 2026**

---

On May 15, 2026, Purchasing received five (5) bid submittals for ITB #26-07 City Center Sports Complex Expansion.

After review of the responses, City Staff has made a recommendation to award to the following firm:

**Allstate Civil Construction, Inc.**

This recommendation of award will be presented to City Council for approval on or about June 2, 2026. Interested parties may review the City Council agenda at https://www.port-orange.org/776/Agendas-and-Minutes.

Respectfully Submitted,

Anthony McCall
Purchasing Agent

*"Failure to file a protest within the time prescribed in section 120.57(3), Florida Statutes or failure to post the bond or other security required by law within the time allowed, shall constitute a waiver of proceedings under Chapter 120, Florida Statutes."* The 72-hour posting requirement will elapse on May 22, 2026 at _5:00_ p.m. E.S.T.

# SECTION 7 – REQUIRED FORMS

## FORM 7.1 – BID SUBMITTAL CHECKLIST

- ✓ Form 7.2 – Bidder's Acknowledgement
- ✓ Form 7.3 – Addendum and Change Order Procedure Acknowledgement
- ✓ Form 7.4 – Drug Free Preference Statement

## FORM 7.2 – BIDDER'S ACKNOWLEDGEMENT

I have carefully examined the Invitation to Bid (ITB), Instructions to Bidders, General and/or Special Conditions, Specifications and any other documents accompanying or made a part of this invitation.

I hereby propose to furnish the goods or services specified in the ITB at the prices or rates as finally negotiated. I agree that my bid will remain firm for a period of up to one-hundred-twenty (120) days in order to allow the City of Port Orange adequate time to evaluate the proposed bid. Furthermore, I agree to abide by all conditions of the ITB.

I certify that all information contained in the bid is truthful to the best of my knowledge and belief. I further certify that I am duly authorized to submit this bid on behalf of the Bidder/Contractor as its act and deed and that the Bidder/Contractor is ready, willing and able to perform if awarded the contract.

I further certify that this bid is made without prior understanding, contract, connection, discussion or collusion with any person, firm or corporation submitting a bid for the same product or service; no officer, employee or agent of the City of Port orange City Council or of any other Bidder interested in said ITB; and that the undersigned executed this Bidder's Acknowledgement with full knowledge and understanding of the matters therein contained and was duly authorized to do so.

I further certify that having read and examined the specifications and documents for the designated services and understanding the general conditions for the contract under which services will be performed, does hereby propose to furnish all labor, equipment and material to provide the services set forth in the ITB.

I hereby declare that the following listing states any clarifications, any and all variations from and exceptions to the requirements of the specifications and documents. The undersigned further declares that the "work" will be performed in strict accordance with such requirements and understands that any exceptions to the requirements of the specifications and documents may render the bid non-responsive.

**NO EXCEPTIONS ALLOWED AFTER THE BID IS SUBMITTED:**

## FORM 7.4 – DRUG-FREE PREFERENCE STATEMENT

IDENTICAL TIE BIDS – Preference shall be given to businesses with drug-free workplace programs. Whenever two or more bids, proposals, statements or replies are equal with respect to price, quality and service are received by the City for procurement of commodities or contractual services, a bid received from a business that certifies that it has implemented a drug-free workplace program shall be given preference in the award process. Established procedures for processing tie bids will be followed if none of the tied Bidders have a drug-free workplace program.

In order to have a drug-free workplace program, a business shall:

1. Publish a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession or use of a controlled substance is prohibited in the workplace and specifying the actions that will be taken against employees for violations of such prohibition.

2. Inform employees about the dangers of drug abuse in the workplace, the business's policy of maintaining a drug-free workplace, any available drug counseling, rehabilitation and employee assistance programs and the penalties that may be imposed upon employees for drug abuse violations.

3. Give each employee engaged in providing the commodities or contractual services that are under a bid a copy of the statement specified in subsection (1).

4. In the statement specified in subsection (1), notify the employees that, as a condition of working on the commodities or contractual services that are under the bid, the employee will abide by the terms of the statement and will notify the employer of any conviction of, or plea of guilty or nolo contendere to, any violation of chapter 893 or of any controlled substance the law of the United States or any state, for a violation occurring in the workplace no later than five (5) days after such conviction.

5. Impose a sanction on or require the satisfactory participation in a drug abuse assistance or rehabilitation program if such is available in the employee's community, by an employee who is so convicted.

6. Make a good faith effort to continue to maintain a drug-free workplace through implementation of Section 287.087, Florida Statutes.

As an authorized representative of the firm, I certify that this firm complies fully with the above requirements.

## FORM 7.5 – SWORN STATEMENT ON PUBLIC ENTITY CRIMES

**UNDER SECTION 287.133(3)(A), FLORIDA STATUTES**

(To be signed in the presence of a notary public or other authorized to administer oaths.)

Before me, the undersigned Authority, personally appeared affiant Michael R. Anderson, who, being by me first duly sworn, made the following statement:

1. The business address of All State Civil Construction, Inc. (name of Offeror or business) is 1301 Beville Rd, #16, Daytona Beach, FL 32119.
2. My relationship to All State Civil Construction, Inc. (name of Offeror or business) is Treasurer (relationship such as sole proprietor, partner, president, vice president.)
3. I understand that a public entity crime as defined in Section 287.133 of the Florida Statutes includes a violation of any state or federal law by a person with respect to and directly related to the transaction of business with any public entity in Florida or with an agency or political subdivision of any other state or with the United States, including, but not limited to, any proposal or contract for goods or services to be provided to any public entity or such and agency or political subdivision and involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy or material misrepresentation.
4. I understand that "convicted" or "conviction" is defined by the Florida Statutes to mean a finding of guilt or a conviction of a public entity crime, with or without an adjudication of guilt, in any federal or state trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, non-jury trial, or entry of a plea of guilt or nolo contendere.
5. I understand that "affiliate" is defined by the Florida Statutes to mean (1) a predecessor or successor of a person or a corporation convicted of a public entity crime, or (2) an entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime, or (3) those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate, or (4) a person or corporation who knowingly entered into a joint venture with a person who has been convicted of a public entity crime in Florida during the preceding 36 months.
6. Neither the Offeror or contractor, nor any officer, director, executive, partner, shareholder, employee, member or agent who is active in the management of the Offeror or contractor, nor any affiliate of the Offeror or contractor has been convicted of a public entity crime subsequent to July 1, 1989. **(Draw a line through paragraph 6 if paragraph 7 below applies.)**
7. There has been a conviction of a public entity crime by the Offeror or contractor, or an officer, director, executive, partner, shareholder, employee, member or agent of the Offeror or contractor who is active in the management of the Offeror or contractor or an affiliate of the Offeror or contractor. A determination has been made pursuant to Section 287.133(3) by order of the Division of Administrative Hearings that it is not in the public interest for the name of the convicted person or affiliate to appear on the convicted Bidder list. The name of the convicted person or affiliate is: _____. A copy of the order of the Division Administrative Hearing is attached. **(Draw a line through paragraph 7 if paragraph 6 above applies)**

**FORM 7.10 SCRUTINIZED COMPANIES CERTIFICATION**

***(To be signed in the presence of a notary public or other officer authorized to administer oaths.)***

## SCRUTINIZED COMPANIES CERTIFICATION PURSUANT TO SECTION 287.135, FLORIDA STATUTES

I, Michael R. Anderson, Treasurer, on behalf
(Print Name and Title)

of All State Civil Construction, Inc. ("Company"), certify that All State Civil Construction, Inc.
(Company Name) (Company Name)

does not:
1. Participate in a boycott of Israel; and
2. Is not on the Scrutinized Companies with Boycott Israel List; and
3. Is not on the Scrutinized Companies with Activities in Sudan List; and
4. Is not on the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List; and
5. Has not engaged in business operations in Syria.

Submitting a false certification shall be deemed a material breach of contract. The City of Port Orange shall provide notice, in writing, to the Company of the City's determination concerning the false certification. The Company shall have ninety (90) days following receipt of the notice to respond in writing and demonstrate that the determination of false certification was made in error. If the Company does not demonstrate that the City's determination of false certification was made in error, then the City shall have the right to terminate the contract and seek civil remedies pursuant to Florida Statute § 287.135.

Section 287.135, Florida Statutes prohibits the City from: 1) Contracting with companies for goods or services in any amount if at the time of bidding on, submitting a proposal for, or entering into or renewing a contract if the company is on the Scrutinized Companies that Boycott Israel List, created pursuant to Section 215.4725, F.S. or is engaged in a boycott of Israel; and 2) Contracting with companies for goods or services over $1,000,000.00 that are on either the Scrutinized Companies with activities in the Iran Petroleum Energy Sector List, created pursuant to s. 215.473, or are engaged in business operations in Syria.

As the person authorized to sign on behalf of the Company, I hereby certify that the company identified above in the section entitled "Company Name" does not participate in any boycott of Israel, is not listed on the Scrutinized Companies that Boycott Israel List, is not listed on either the Scrutinized Companies with activities in the Iran Petroleum Energy Sector List and is not engaged in business operations in Syria. I understand that pursuant to Section 287.135, Florida Statutes, the submission of a false certification may subject the company to civil penalties, attorney's fees, and/or costs. I further understand that any contract with the City for goods or services may be terminated at the option of the City if the company is found to have submitted a false certification or has been placed on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List.

****PLEASE ATTACH A VALID BUSINESS TAX RECEIPT OR OTHER SUCH DOCUMENTATION****

ATTESTATION – I understand that:
A local supplier or contractor is interpreted as a respondent to a solicitation, which as of the date of the solicitation opening, has a valid Business Tax Receipt (BTR) issued by the City of Port Orange to do business in the City of Port Orange which authorizes the supplier or contractor to provide the goods, services, or construction to be purchased and has a physical address located within the limits of Port Orange from which the supplier or contractor operates or performs business. A Post Office Box cannot be used to establish physical address. This local preference is only used as part of a tie breaker during a formal solicitation. The City uses Sunbiz to verify a supplier or contractor's business address. Sunbiz is a database on the Florida Department of State, Division of Corporations website and can be accessed using this link:

*Exemptions from Local Preference*
Local preference is not permitted when (1) the purchase is funded, in whole or in part, by an entity prohibiting application of the preferences by grant agreement, contract or applicable federal, state or local law; or (2) emergency purchasing.

As an authorized representative of the Firm, I certify that this Firm complies fully with the above requirements.

## FORM 7.14 – AFFIDAVIT OF COMPLIANCE WITH SECTION 287.138, FLORIDA STATUTES

### AFFIDAVIT OF COMPLIANCE WITH SECTION 287.138, FLORIDA STATUTES CONTRACTING WITH FOREIGN ENTITIES OF CONCERN

The undersigned ("Affiant"), on behalf of the entity listed below ("Entity"), hereby attests under penalty of perjury as follows:

1. Affiant is the Treasurer (Title) of All State Civil Construction, Inc. (Business Name) which does business in the State of Florida, hereinafter called the "Entity".
2. Entity is not owned by the government of a foreign country of concern, as defined in Section 287.138 (1)(c), Florida Statutes.
3. The government of a foreign country of concern does not have a controlling interest in Entity, as defined in Section 287.138 (1)(a), Florida Statutes.
4. Entity is not organized under the laws of, and does not have a principal place of business in, a foreign country of concern.
5. Entity is not owned or controlled by the government of a foreign country of concern.
6. For purposes of this affidavit, a foreign country of concern means the People's Republic of China, the Russian Federation, the Islamic Republic of Iran, the Democratic People's Republic of Korea, the Republic of Cuba, the Venezuelan regime of Nicolas Maduro, or the Syrian Arab Republic, including any agency of or any other entity of significant control of such foreign country of concern, as defined in Section 287.138(1)(c), Florida Statutes.

The undersigned is authorized to execute this affidavit on behalf of the Entity.

If submitting this form, only this form needs to be returned. It is not necessary to return the entire solicitation package.

## APPENDIX A, 44 C.F.R. PART 18 – CERTIFICATION REGARDING LOBBYING Certification for Contracts, Grants, Loans, and Cooperative Agreements

*(Required for each bid or offer exceeding $100,000)*

The undersigned certifies, to the best of his or her knowledge and belief, that:

1. No federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of an agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any federal contract, the making of any federal grant, the making of any federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any federal contract, grant, loan, or cooperative agreement.

2. If any funds other than federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.

3. The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.

4. This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, Title 31, U.S.C. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

The Contractor, All State Civil Construction, Inc., certifies or affirms the truthfulness and accuracy of each statement of its certification and disclosure, if any. In addition, the Contractor understands and agrees that the provisions of 31 U.S.C. Chap. 38, Administrative Remedies for False Claims and Statements, apply to this certification and disclosure, if any.

*Signature of Contractor's Authorized Official*

THE GRAY SURETY

May 15, 2026

City of Port Orange
1000 City Center Circle
Port Orange, FL 32129

RE: All State Civil Construction, Inc. - 1301 Beville Road, Suite 16, Daytona Beach, FL 32119
Project: ITB #26-07 - City Center Sports Complex Expansion - Construction of Soccer Fields and Concession Stand

To Whom It May Concern:

All State Civil Construction, Inc. is a highly regarded and valued client of Surety Bond Professionals, Inc. and The Gray Casualty & Surety Company. Surety Bond Professionals, Inc. and The Gray Casualty & Surety Company are both very impressed with All State Civil Construction, Inc. experience and professionalism. Throughout their relationship, The Gray Casualty & Surety Company has provided all of the surety bonds that All State Civil Construction, Inc. clients have requested.

With respect to All State Civil Construction, Inc. bonding needs, please be advised that The Gray Casualty & Surety Company is willing to support individual projects with contract values of $4,000,000 and corresponding backlogs of approximately $6,000,000.

Naturally, as is customary within the surety industry, the approval of any bid or final bonds will be subject to a favorable underwriting review of project specifics, including contract terms, conditions, bond forms and verification of complete project financing by both All State Civil Construction, Inc. and The Gray Casualty & Surety Company at the time a bond request is made by All State Civil Construction, Inc. to its Surety.

Surety Bond Professionals, Inc. and The Gray Casualty & Surety Company strongly recommend All State Civil Construction, Inc. to you. Please feel free to contact this office at 781-559-0568 should you have any questions regarding the bonding capacity or technical ability of All State Civil Construction, Inc.

Sincerely,

Mark D. Leskanic

## GENERAL POWER OF ATTORNEY

**Bond Number:** N/A **Principal:** All State Civil Construction, Inc.

**Project:** ITB #26-07 - City Center Sports Complex Expansion - Construction of Soccer Fields and Concession Stand

KNOW ALL BY THESE PRESENTS, THAT The Gray Insurance Company and The Gray Casualty & Surety Company, corporations duly organized and existing under the laws of Louisiana, and having their principal offices in Metairie, Louisiana, do hereby make, constitute, and appoint: **Mark D. Leskanic, Lauren Leskanic, Bette A. Botticello, Colin Warner, Matthew Leskanic, and Greg Angel of Framingham, Massachusetts jointly and severally** on behalf of each of the Companies named above its true and lawful Attorney(s)-in-Fact, to make, execute, seal and deliver, for and on its behalf and as its deed, bonds, or other writings obligatory in the nature of a bond, as surety, contracts of suretyship as are or may be required or permitted by law, regulation, contract or otherwise, provided that no bond or undertaking or contract of suretyship executed under this authority shall exceed the amount of $25,000,000.00.

This Power of Attorney is granted and is signed by facsimile under and by the authority of the following Resolutions adopted by the Boards of Directors of both The Gray Insurance Company and The Gray Casualty & Surety Company at meetings duly called and held on the 26th day of June, 2003.

"RESOLVED, that the President, Executive Vice President, any Vice President, or the Secretary be and each or any of them hereby is authorized to execute a power of Attorney qualifying the attorney named in the given Power of Attorney to execute on behalf of the Company bonds, undertakings, and all contracts of surety, and that each or any of them is hereby authorized to attest to the execution of such Power of Attorney, and to attach the seal of the Company; and it is

FURTHER RESOLVED, that the signature of such officers and the seal of the Company may be affixed to any such Power of Attorney or to any certificate relating thereto by facsimile, and any such Power of Attorney or certificate bearing such facsimile signature or facsimile seal shall be binding upon the Company now and in the future when so affixed with regard to any bond, undertaking or contract of surety to which it is attached.

IN WITNESS WHEREOF, The Gray Insurance Company and The Gray Casualty & Surety Company have caused their official seals to be hereinto affixed, and these presents to be signed by their authorized officers this 4th day of November, 2022.

Form **W-9**
(Rev. March 2024)
Department of the Treasury
Internal Revenue Service

# Request for Taxpayer Identification Number and Certification

**Go to *www.irs.gov/FormW9* for instructions and the latest information.**

**Give form to the requester. Do not send to the IRS.**

**Before you begin.** For guidance related to the purpose of Form W-9, see *Purpose of Form*, below.

Print or type. See *Specific Instructions* on page 3.

1 Name of entity/individual. An entry is required. (For a sole proprietor or disregarded entity, enter the owner's name on line 1, and enter the business/disregarded entity's name on line 2.)

All State Civil Construction, Inc.

2 Business name/disregarded entity name, if different from above.

3a Check the appropriate box for federal tax classification of the entity/individual whose name is entered on line 1. Check only **one** of the following seven boxes.

☐ Individual/sole proprietor ☐ C corporation ☑ S corporation ☐ Partnership ☐ Trust/estate

☐ LLC. Enter the tax classification (C = C corporation, S = S corporation, P = Partnership) . . . . .

**Note:** Check the "LLC" box above and, in the entry space, enter the appropriate code (C, S, or P) for the tax classification of the LLC, unless it is a disregarded entity. A disregarded entity should instead check the appropriate box for the tax classification of its owner.

☐ Other (see instructions)

4 Exemptions (codes apply only to certain entities, not individuals; see instructions on page 3):

Exempt payee code (if any)

Exemption from Foreign Account Tax Compliance Act (FATCA) reporting code (if any)

*(Applies to accounts maintained outside the United States.)*

3b If on line 3a you checked "Partnership" or "Trust/estate," or checked "LLC" and entered "P" as its tax classification, and you are providing this form to a partnership, trust, or estate in which you have an ownership interest, check this box if you have any foreign partners, owners, or beneficiaries. See instructions . . . . . ☐

5 Address (number, street, and apt. or suite no.). See instructions.

1301 Beville Road, #16

Requester's name and address (optional)

6 City, state, and ZIP code

Daytona Beach, FL 32119

7 List account number(s) here (optional)

## Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on line 1 to avoid backup withholding. For individuals, this is generally your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the instructions for Part I, later. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN*, later.

**Note:** If the account is in more than one name, see the instructions for line 1. See also *What Name and Number To Give the Requester* for guidelines on whose number to enter.

**Social security number**

| | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| | | | – | | | – | | | | |

**or**

**Employer identification number**

| | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| 8 | 4 | – | 4 | 0 | 9 | 9 | 1 | 6 | 0 |

## Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
3. I am a U.S. citizen or other U.S. person (defined below); and
4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

**Certification instructions.** You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and, generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions for Part II, later.

**Sign Here** | **Signature of U.S. person** [signature] **Date** 01-01-2026

# General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

**Future developments.** For the latest information about developments related to Form W-9 and its instructions, such as legislation enacted after they were published, go to *www.irs.gov/FormW9*.

## What's New

Line 3a has been modified to clarify how a disregarded entity completes this line. An LLC that is a disregarded entity should check the appropriate box for the tax classification of its owner. Otherwise, it should check the "LLC" box and enter its appropriate tax classification.

New line 3b has been added to this form. A flow-through entity is required to complete this line to indicate that it has direct or indirect foreign partners, owners, or beneficiaries when it provides the Form W-9 to another flow-through entity in which it has an ownership interest. This change is intended to provide a flow-through entity with information regarding the status of its indirect foreign partners, owners, or beneficiaries, so that it can satisfy any applicable reporting requirements. For example, a partnership that has any indirect foreign partners may be required to complete Schedules K-2 and K-3. See the Partnership Instructions for Schedules K-2 and K-3 (Form 1065).

## Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS is giving you this form because they

DAYTONA BEACH, FLORIDA 32119

**RE: CERTIFICATE OF QUALIFICATION**

The Department of Transportation has qualified your company for the type of work indicated below.

**FDOT APPROVED WORK CLASSES:**
DRAINAGE, GRADING, GRASSING, SEEDING AND SODDING, SIDEWALK, Curb & Gutters, Driveways, Grout Injection, Lift Stations, Pressure Grout, Rehabilitation of Concrete Pavement, Pile Driving, Rip Rap, Rubble Rip Rap, Tree Removal, Underground Utilities (Water & Sewer)

Unless notified otherwise, this Certificate of Qualification will expire **6/30/2027.**

In accordance with Section 337.14(1), Florida Statutes, an application for qualification must be filed within (4) months of the ending date of the applicant's audited annual financial statements.

If the company's maximum capacity has been revised, it may be accessed by logging into the Contractor Prequalification Application System via the following link:
**HTTPS://fdotwp1.dot.state.fl.us/ContractorPreQualification**

Once logged in, select "View" for the most recently approved application, and then click the "Manage" and "Application Summary" tabs.

The company may apply for a Revised Certificate of Qualification at any time prior to the expiration date of this certificate according to Section 14-22.0041(3), Florida Administrative Code (F.A.C.), by accessing the most recently approved application as shown above and choosing "Update" instead of "View." If certification in additional classes of work is desired, documentation is needed to show that the company has performed such work.

All prequalified contractors are required by Section 14-22.006(3), F.A.C., to certify their work underway monthly in order to adjust maximum bidding capacity to available bidding capacity. You can find the link to this report at the website shown above.

Sincerely,

James E. Taylor II

James E. Taylor II, Prequalification Supervisor

## REPRESENTATIVE EXPERIENCE

Mr. Anderson's 24 years of experience in heavy civil construction and civil engineering land development design encompasses a wide variety of projects with depth, ranging from new construction on undisturbed land to re-development. He has an expansive career involved with underground utilities, FDOT roadways and trail projects to stormwater master plans, urban land development, site design and development, and various other miscellaneous civil engineered projects. His experience includes but is not limited to: general site and civil infrastructure design and construction; design build; maintenance of traffic and pedestrians; erosion and sedimentation countermeasures; stormwater infrastructure design, modeling, permitting, and construction; complete construction document preparation, permitting, and construction; heavy civil project management; management of sub-consultants (architectural, geotechnical, structural, environmental, and surveying), management of sub-contractors (underground utilities, grading, paving, signage and striping, signalization, specialty, etc.); plan review and quantity takeoffs; cost estimating; preparation of project specifications; bid cost proposal preparation; construction inspection and construction administration. His permitting experience includes: Water Management Environmental Resource and Construction Dewatering Permits; Florida Department of Environmental Protection permits (NPDES permits, Coastal Construction Control Line permits, and construction permits for water, sewer, and stormwater); the Florida Fish and Wildlife Conservation Commission marine and gopher tortoise permits; Florida Department of Transportation driveway and utility connection permits; local site plan permits; and building permits for construction.

**Relevant project experience:**

- **Fountain Beach Resort Parking Lot Improvements (Daytona Beach, FL):** This was a private project for the International Beach Club Condo Association that Mr. Anderson completed with Bone Dry Dewatering, LLC. This $68,000 project consisted of demolishing an existing mini-golf course and constructing a 4,500 square feet parking lot using grass filled turf-blocks for the drivable surface. The project also included the construction of a 40 feet long by five feet high solid-filled concrete masonry unit wall with footer, concrete sidewalks and curbing, landscaping and irrigation, and paver installation. Mr. Anderson was responsible for estimating and procurement of all materials, labor, and sub-contractors required to complete the project. He was also the onsite superintendent and heavy equipment operator that completed the project. This project was completed on-time and within budget.

## PROFESSIONAL HISTORY

- All State Civil Construction, Inc., Owner/Project Manager/Estimator, 2021 – Present
- Zahn Engineering, Project Engineer, 2020 - 2023
- Bone Dry Dewatering, LLC, Owner/Project Manager, 2016 - Present

- **CRA Utility Undergrounding Streetscape & Stormwater Improvements – Phase IIA (Flagler Beach, FL):** Mr. Anderson was the construction project manager for the general contractor (Westwind Contracting, Inc.) awarded this City of Flagler Beach Capital Improvement Project. The project was approximately $1.3 million, located in downtown Flagler Beach, and included downtown redevelopment of City streets with the installation of new stormwater drainage infrastructure and exfiltration pipes. This project also included the construction of an underground stormwater exfiltration retention area consisting of several rows of 36-inch diameter perforated, corrugated HDPE exfiltration pipe, potable water replacement, sanitary sewer replacement, sidewalk and driveway removal and replacement, turf-block parking installation, and complete roadway rebuild and paving. Mr. Anderson was responsible for all aspects of procurement of equipment, materials, and manpower. He was also responsible for scheduling, budgeting, budget tracking, billing, and collection for the project. In addition, Mr. Anderson was responsible for coordinating and contracting with sub-contractors that were required to complete the work. This project was completed on-time and within budget.

- **East 7th Avenue Drainage Improvements (Mount Dora, FL):** Mr. Anderson was the construction project manager at Masci General Contractor, Inc. who was responsible for constructing the project. This project was a City of Mount Dora Capital Improvement Project costing approximately $1.8 million located in downtown Mount Dora. It consisted of the installation of new stormwater drainage infrastructure, including an underground stormwater exfiltration retention area, constructed of several rows of 102" diameter perforated corrugated metal exfiltration pipes, located in Donnelly Park. The project also included potable water main relocations, sanitary sewer main and service relocations, sidewalk and driveway removal and replacement, concrete slabs, and complete roadway rebuild, including paving. Mr. Anderson was responsible for all aspects of procurement of equipment, materials, and manpower. He was also responsible for scheduling, budgeting, budget tracking, billing, and collection for the project. In addition, Mr. Anderson was responsible for coordinating and contracting with subcontractors that were required to complete the work. This project was completed on time and within budget.

- **Atlantic Avenue Sidewalk (Wilbur by the Sea, FL):** This was a Volusia County Capital Improvements project that Mr. Anderson

- Order of the Engineer, 2001 - Present
- American Society of Civil Engineers, 2002 -

was the construction project manager for Masci General Contractor, Inc., the awarded general contractor. The project was approximately one mile long for a cost of $2.8 million, which included the installation of new concrete sidewalks, new stormwater drainage infrastructure, including inlets and 24-inch diameter exfiltration pipes, and new road re-construction. The project also included the construction of a new 8-inch potable water main which was intended to replace an older active water main that conflicted with the proposed drainage infrastructure. New water service connections were required for all the existing utility customers that were located within the project area. Mr. Anderson was responsible for all aspects of procurement of equipment, materials, and manpower. He was also responsible for scheduling, budgeting, budget tracking, billing, and collection for the project. In addition, Mr. Anderson was responsible for coordinating and contracting with subcontractors that were required to complete the work. This project was completed on time and within budget.

- **SR-426 (Aloma Ave) and SR -436 (Semoran Blvd) Intersection Improvements (Winter Park, FL):** Mr. Anderson was the construction project manager for the general contractor, Masci General Contractor, Inc., responsible for constructing this FDOT heavy civil roadway reconstruction project. The project was over $2.8 million and included the complete demolition and rebuilding of one of the busiest intersections in Orange County. The project included demolition, new roadway construction, concrete curbs, medians, and sidewalks, large stormwater pipe and inlet construction, and the installation of a new signalization system with the demolition of the old. Due to traffic loads, this project was primarily constructed at night and often required the complete closure of the intersection, which Mr. Anderson was entirely responsible for completing safely. He was responsible for project material and sub-contractor buy-out, project scheduling, site supervision, and overall project management. He was also responsible for budgeting, budget tracking, billing, and collection for the project. In addition, Mr. Anderson was responsible for coordinating and contracting with subcontractors that were required to complete the work. This project was completed on time and within budget.

- **Graham Swamp Multi-Use Trail (City of Palm Coast):** Mr. Anderson was the construction manager for the general contractor, Westwind Contracting, Inc., responsible for building the project.

present

- Florida Engineering Society, 2002 - Present
- National Society of Professional Engineers, 2002 - Present

The project was an approximately $1.2 million Capital Improvement Project located in the City of Palm Coast and included a multi-use pathway with boardwalks and steel bridges crossing major drainage canals. Mr. Anderson was responsible for project estimating and bidding, project material and sub-contractor buy-out, project scheduling, site supervision, and overall project management. He was also responsible for budgeting, budget tracking, billing, and collection for the project. In addition, Mr. Anderson was responsible for coordinating and contracting with subcontractors that were required to complete the work. This project was completed on time and within budget.

- **Tensolite Expansion (St. Augustine):** Mr. Anderson was the construction project manager for Westwind Contracting, Inc. on this private project. The project consisted of civil site work related to an 18,750 square feet manufacturing building addition. The project was valued at approximately $1 million and included construction of underground stormwater drainage infrastructure, storm water ponds, new curbing, and roadway and parking lot construction. As an issue became apparent, Mr. Anderson became responsible for the project storm water design revisions during construction. He was also responsible for estimating and bidding, project material and sub-contractor buy-out and coordination, project scheduling, site supervision and labor, heavy equipment operation, 3-dimensional earthwork modeling, and overall project management. This project was completed on time and within budget.

- **East Central Regional Rail Trail Segment 1 & 2 (Volusia County):** Mr. Anderson was the construction project manager for Westwind Contracting, Inc., who was awarded the project. This $2.1 million project was a Volusia County Local Agency Program Capital Improvements Project located in Enterprise, Florida and was a critical link to the Florida East Central Regional Trail system. It included over 6-miles of an asphalt paved multi-use path and boardwalks located on an old railroad bed through undeveloped wooded areas. This project also included concrete driveways and curbing, grading, stormwater drainage installation, signage and striping, and fence construction Mr. Anderson was responsible for all aspects of the project including estimating and bidding, project material and sub-contractor buy-out, project scheduling, site supervision and labor, heavy equipment operation, and overall project management. This project was completed on time and within budget.

**Michael R. Anderson, P.E., C.G.C.**
*Professional Engineer, General Contractor*

*386-299-6641*
*mranderson@bonedryflorida.com*

- **Herbert Street Sidewalk Southside (Port Orange, FL):** City of Port Orange Project Manager for a new sidewalk Capital Improvements Project. This project was a City project and included the construction of approximately 0.6 miles of new eight-feet wide concrete sidewalk, concrete driveways, and concrete retaining walls. Mr. Anderson also performed as the Construction Engineering Inspection manager, inspector, and LAP administration during construction. This project was completed by the Contractor on-time and under budget.

- **Seminole Wekiva Multi-Use Trail:** This project was a Seminole County Capital Improvement, Local Agency Program project which Mr. Anderson was the construction project manager for the general contractor awarded the project, Masci General Contractor, Inc. This project was approximately $2.4 million and included the construction of an asphalt paved multi-use pathway along an old railroad bed. The project also included new retaining walls with handrails, signage, striping, and gopher tortoise relocation efforts prior to construction activities. Mr. Anderson was responsible for all aspects of the project including but not limited to estimating and bidding, project material and sub-contractor buy-out, project scheduling, site supervision and labor, equipment operation, and overall project management. This project was completed on-time and within the budgeted amount.

- **SR-600 John Young Parkway (Kissimmee, FL):** Mr. Anderson was the construction project manager for Masci General Contractor, Inc., the general contractor responsible for constructing this 1.4 mile FDOT heavy civil roadway reconstruction project. The project was over $14 million and included the complete demolition and rebuilding of SR-600 (John Young Parkway) from US 192 to Clay Street. It also included the construction of new stormwater ponds and infrastructure, removal and replacement of potable water and sanitary sewer mains. Mr. Anderson was responsible for all aspects of the project including procurement of equipment, materials, and manpower. He was also responsible for obtaining construction dewatering permits, scheduling, budgeting, budget tracking, billing, and collection for the project. In addition, Mr. Anderson was responsible for coordinating and contracting with sub-contractors that were required to complete the work. During this project, because of design issues, the FDOT requested Mr. Anderson to provide an engineering design for the projects main stormwater outfall for the project and the relocation of an active water main,

**Michael R. Anderson, P.E., C.G.C.**
*Professional Engineer, General Contractor*
*6172 Del Rio Drive, Port Orange, FL 32127*
*386-299-6641*
*mranderson@bonedryflorida.com*

which were both permitted and constructed. This project was completed on-time and within the budgeted amount.

- **Kissimmee Multi-Use Trail:** Mr. Anderson was the construction project manager for Westwind Contracting, Inc., which was a sub-contractor to the general contractor awarded this City of Kissimmee Capital Improvement Project. The sub-contracted scope of work was approximately $800,000 and consisted of constructing only the site work portion of the project. Mr. Anderson's scope included installation of stormwater drainage infrastructure, roadway construction, including an asphalt paved multi-use pathway, concrete sidewalk construction, and FDOT style retaining walls. Mr. Anderson was responsible for project estimating and bidding, project material and sub-contractor buy-out and coordination, project scheduling, site supervision and labor, and overall project management. This project was completed on-time and within budget.

- **Additional Construction Project Experience:** Mr. Anderson has worked as the construction project manager on many other heavy civil, utility, and site construction projects, all of which were similar in nature varying in value from $30,000 to $5.5 million. These projects generally consisted of demolition, the installation of stormwater drainage infrastructure, construction of new water and sewer mains, relocating utilities, concrete curb, medians, sidewalk and driveway construction, grading, road building and rebuilding, retaining walls, etc. Most of these projects included material and sub-contractor quote solicitation and buy-out, in addition to many other project management tasks required to complete a heavy civil project.

## REPRESENTATIVE SOFTWARE

Mr. Anderson's experience with respect to software includes Earthwork 3D, stormwater modeling using ICPR version 3, secondary drainage system design using Hydraflow, Autodesk Field Survey, and computer aided design using AutoCAD, AutoCAD Civil 3D, and MicroStation. In addition, he is proficient in the use of many other computer programs including MathCAD and many Microsoft Office tools such as Word, Excel, PowerPoint, and Project.

PROJECT COORDINATOR

## CONTACT

386-241-5383

Port Orange, FL

## PROFILE

Construction Consultant & Project Coordinator, utilizing my 30+ years of experience in creating and executing successful construction projects. My goal is to deliver exceptional results and exceeding goals for the company.

## SKILLS

Organizational Management
Project Coordination
Communication
Strategic Thinking

## EDUCATION

Oviedo High School
Diploma Class of 1996

## EXPERIENCE

Masci General Contractor, Inc.
**2010-2019; 2024-2025**
Estimating and Project Coordinator for projects ranging from $100,000 to $100M. Worked for several municipalities including FDOT. These projects included underground utilities and asphalt paving.

SEMA Construction, Inc.
**2008-2010**
Estimating and Project Coordinator for projects ranging from $100,000 to $100M. Started in the field on a FDOT project on I-4. My work consisted of road and bridge projects. Opened the Orlando office and continued as an Office Manager/Project Coordinator/Estimating Coordinator and EEO Officer.

Jon M Hall Company
**2007-2008**
Handled all areas of Project Coordination for Commercial & Residential Sitework.

The Middlesex Corporation
**2005-2007**
Assistant Project Manager in the field on US 192 in Kissimmee. Got transferred to the asphalt trucking dispatcher where I handled the day to day of all paving operations.

Hubbard Construction Company

**1998-2005**

Assistant Contracts Administrator for the entire company statewide. Handled all FDOT projects including all subcontracts and purchase orders. This includes being the administrator for the company's project management software.

Yovaish Engineering Sciences

**1997-1998**

Administrative Assistant. Created testing reports.

Hall & Fields Excavating

**1996-1997**

Administrative Assistant. Data entry, payroll, AP/AR, and dispatching

Port Orange, FL 386-453-5989

**BID BOND**

**BID BOND**

Bond No.: N/A

KNOW ALL MEN BY THESE PRESENTS that All State Civil Construction, Inc., as Contractor, duly authorized to conduct business in the State of Florida, whose principal place of business is located at 1301 Beville Rd., Suite 16, Daytona Beach, FL 32119 , Tel.: 386-256-2721, (hereinafter called "PRINCIPAL"), and The Gray Casualty and Surety Company, as SURETY, duly authorized to conduct business in the State of Florida, whose principal place of business is located at P.O. Box 6202, Metairie, LA 70009 - 6202, Tel: (504) 888-7790 (hereinafter called "SURETY"), are held and firmly bound unto the City of Port Orange, Florida, as CITY, a Florida municipal corporation, whose address is City of Port Orange, 1000 City Center Circle, Port Orange, Florida 32129, Tel: (386) 506-5501, (hereinafter called "OBLIGEE" or CITY", in the penal sum of Five Percent of Attached Bid dollars and (N/A)/100 ($5%), lawful money of the United States, for the payment of which sum shall and truly be made, whereof PRINCIPAL and SURETY bind themselves, their heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presents.

THE CONDITION OF THIS OBLIGATION IS SUCH that, whereas the Principal has submitted the accompanying bid, dated May 15, 2026, for:

**Project Name/Bid No.:** 26-07

**Project Address:** Port Orange, FL 32129

**Legal Description:** CITY CENTER SPORTS COMPLEX EXPANSION

**Description of Work:** TWO (2) MULTI-PURPOSE FIELDS WITH LIGHTS, A SUPPORT BUILDING (RESTROOM, CONCESSION AND STORAGE) AND PARKING.

NOW, THEREFORE,

A. If the Principal shall not withdraw said bid withing one hundred twenty (120) days after date of opening of the same, and shall within ten (10) days after the prescribed forms are presented to it for signature, enter into a written contract with the City in accordance with the bid as accepted, and give bonds with good and sufficient surety or sureties, as may be required, for the faithful performance and proper fulfillment of such contract, then the above obligations shall be void and of no effect, otherwise to remain in full force and virtue.

B. In the event of the withdrawal of said bid within the period specified, or the failure to enter into such contract and give such bonds withing the time specified, if the principal shall pay the City the difference between the amount specified in said bid and the amount for which the City may procure the required work and supplies. If the latter amount be in excess of the former, then the above obligations then the above obligations shall be void and of no effect, otherwise to remain in full force and virtue.

IN WITNESS WHEREOF, the above parties have executed this instrument under their several seals, this 15th day of May, 2026, the name and corporate seal of each corporate party being hereto affixed and these presents duly signed by its undersigned representative, pursuant to authority of its governing body.

*Note: If the firm is a sole ownership or partnership including limited liability company, two (2) witnesses are required to attest the signature. If the firm is a corporation, then the corporate secretary shall attest and affix the corporate seal (Attach power of attorney to the original bid bond and financial statement of Surety Company).*

# ADDENDUM # 1
## MAY 8, 2026

## ITB #26-07 CITY CENTER SPORTS COMPLEX EXPANSION

---

**To All Bidders:**

The following changes, clarifications and additions are hereby made part of the bidding and specifications for the above referenced project and prepared by the City of Port Orange Purchasing Division as fully and completely as if the same were fully set forth therein. It is the sole responsibility of bidder to confirm that all addenda have been received prior to submitting bid and acknowledge such in the bid documents.

**A. CHANGES TO ITB DOCUMENT:**

NONE

**B. REVISIONS:**

NONE

**C. CLARIFICATIONS:**

**Sports lighting will be a direct purchase from Musco Lighting. Musco's scope of work is "Pole in Air". It includes all the Musco equipment and the installation of the poles and foundations per the signed sealed structural plans which Musco provides. The poles will be aimed and made ready to receive the lighting conductor by others. The lighting conductor is to be terminated in the Musco driver cabinet on the poles approximately 10' above grade.**

**D.**

**The installation of the main distribution panel, Musco control cabinet, conduit and wire to poles is NOT included in the direct purchase and it the responsibility of the awarded contractor. The Musco subcontractor will turn over the control cabinet to the on-site electrical cabinet for installation.**

**E.**

**Parking lot lighting will be included in the bid and the responsibility of the contractor.**

**D. QUESTIONS AND ANSWERS:**

1. What is the estimated or set budget for this project? There is no engineers estimate.
2. Could you please clarify whether this bid requires a pre-bid submittal, or if attendance at the mandatory pre-bid meeting is sufficient to qualify to submit? You must have attended the mandatory pre-bid meeting & site visit.
3. According to page 31 of the ITB, "*Bidders shall be licensed to do business in the State of Florida and shall be certified General Contractors.*"
   Question: Will the City accept Certified Building Contractors as eligible bidders for this project? A General Contractors license is required.
4. Will a General Contractors license be required to bid on this project, or will a Building Contractors license and Underground Utility and Excavation license be acceptable? A General Contractors license is required.
5. We are unable to locate insulation of the plans. Please specify which areas are to receive insulation. Refer to sheet A2.0, Reflected Ceiling Plan, Batt Insulation is called for above the ceiling over the Concessions Area and the Elect./I.T. Room.
6. On the door hardware, is the contractor to provide the locksets or is the city providing the locksets? Contractor to provide all hardware per Specification Section 087100.
7. The plans state epoxy floor finish although the specs call for a fluid applied floor finish. Which one are we to price? Provide Fluid Applied Flooring per Specification Section 096750 in the Unisex Toilet Rooms and the Concessions Area. Soccer Storage and Elect./I.T. to receive Epoxy Paint. (Sherwin Williams Pro Industrial High Performance Epoxy with H&C Sealer with flakes). No floor finish required in the Plumbing Chase.
8. What is the required foot candle for this project? See above in Yellow.
   Does it require any spill lighting? See above in Yellow.
9. Are CAD files available for this project, and can they be shared? Cad files will only be provided to the successful bidder once the project has been awarded.
10. Are there energy calculations available? They will be provided to the successful bidder at the time of permitting.
11. What is the contract time for this project (substantial and final completion)?270 days from notice to proceed. Final.
12. Are there liquidated damages associated with this project? No
13. What is the contractor's warranty period? 1 year.
14. What are the flow rates at the existing lift station where the proposed force main connection is to occur? See Attachment.
15. Please provide the FPL consent agreement that is referenced on sheet C2 of the plans. See Attachment.
16. Are there energy calculations to be provided? They will be provided to the successful bidder at the time of permitting.
17. Who is required to install the light poles, GC or city? Parking lot light poles are by the G.C., sports lighting by Owner's Vendor.
18. Is there a detail for the field lighting? See above response in Yellow.

19. Is any over excavation of dry pond bottoms required? Over excavation of the pond bottoms is not required.
20. Geotech report is unclear what the minimum coefficient of permeability is required. Do the current subsurface profile coefficients shown meet the geotechnical engineer's requirements? The provided stormwater recovery analysis recommends any fill placed within the limits of the proposed stormwater areas contain 5% fines or less passing the No. 200 sieve and have a minimum vertical permeability of 7.0 ft/day.
21. Does this project follow under any BABA, AIS, or Davis Bacon requirements? No
22. Is a PVC liner an approved "other material" per detail ST-8 sheet C20? PVC liner is an allowable material. Product to be reviewed and approved by EOR and city prior to construction.
23. Is the 12' net atop proposed chain link fence to be included for the entirety of the proposed 6' fence? 12' netting is to be along fence areas not abutting the parking lot.
24. Can CAD files be provided to Contractors? Only to the successful bidder after award of contract.

**PLEASE SEE ADDITIONAL ATTACHMENTS 4-7 REFERENCING THE ABOVE QUESITONS FOR CLEARIFICATION ON DEMANDSTAR & THE CITY'S WEBSITE**

**In all other respects, except as specifically stated herein, the subject ITB #26-07 CITY CENTER SPORTS COMPLEX EXPANSION remains the same.**

## SHEET INDEX:

| | |
|---|---|
| C1 | COVER SHEET |
| C2-C6 | CONSTRUCTION NOTES |
| C7 | DEMOLITION & EROSION CONTROL PLAN |
| C8 | OVERALL DEVELOPMENT PLAN |
| C9-C11 | GEOMETRY, SIGNAGE & STRIPING PLAN(S) |
| C12-C14 | PAVING, GRADING & DRAINAGE PLAN(S) |
| C15-C16 | UTILITY PLAN(S) |
| C17-C22 | CONSTRUCTION DETAILS |
| TP1-TP5 | TREE PROTECTION PLAN & DETAILS |
| LA1 | LANDSCAPE PLAN & DETAILS |
| IR1-IR2 | IRRIGATION PLAN & DETAILS |
| AT1 | AUTOTURN EXHIBIT |

## LEGAL DESCRIPTION:

A PORTION OF THE SOUTH 25 CHAINS OF GOVERNMENT LOT 2 SECTION 8, TOWNSHIP 15 SOUTH, RANGE 33 EAST, VOLUSIA COUNT FLORIDA. DESCRIBED AS FOLLOWS:

BEGIN AT THE CENTER OF SAID SECTION 8, AS ESTABLISHED AND OCCUPIED; THENCE RUN N01°12'18"E, ALONG THE WEST LINE OF SAID GOVERNMENT LOT 2, A DISTANCE OF 337.90 FEET; THENCE DEPART SAID WEST LINE S89°54'08"E, A DISTANCE OF 887.00 FEET; THENCE S01°12'18"E, A DISTANCE OF 337.90 FEET TO THE SOUTH LINE OF SAID GOVERNMENT LOT 2; THENCE N89°55'08"W ALONG SAID SOUTH LINE, A DISTANCE OF 887.00 FEET TO THE POINT OF BEGINNING.

CONTAINING 299,275 SQ.FT. OR 6.881 ACRES MORE OR LESS.

NOTES:
1. APPROVAL OF THIS PLAN INCLUDES AN ADMINISTRATIVE VARIANCE PURSUANT CHAPTER 14, SECTION 5 OF THE LAND DEVELOPMENT CODE, TO ALLOW FOR THE USE OF CHAIN LINK FENCING BASED ON THE FUNCTION OF THE SITE AND VISIBILITY NEEDS.
2. CONTRACTOR TO COMPLY WITH ALL FLORIDA POWER AND LIGHT (FPL) CONSTRUCTION REQUIREMENTS FOR WORK WITHIN FPL EASEMENT. CONTRACTOR TO NOTIFY FPL PRIOR TO BEGINNING OF CONSTRUCTION.

## GENERAL NOTES

1. ALL CONSTRUCTION, DRAINAGE STRUCTURES AND OTHER SITE IMPROVEMENTS SHALL BE CONSTRUCTED IN ACCORDANCE WITH THE LATEST EDITIONS OF FLORIDA DEPARTMENT OF TRANSPORTATION STANDARD PLANS AND SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION OR THE CITY'S LAND DEVELOPMENT CODE REQUIREMENTS, STANDARD CONSTRUCTION DETAILS & STANDARD SPECIFICATIONS, WHICHEVER IS MORE STRINGENT.
2. SHOP DRAWINGS AND CERTIFICATIONS FOR ALL MATERIALS AND STRUCTURES ARE REQUIRED. THE CONTRACTOR SHALL REVIEW AND SIGN SHOP DRAWINGS. THE CONTRACTOR SHALL SUBMIT REVIEWED SHOP DRAWINGS TO THE ENGINEER FOR APPROVAL PRIOR TO ORDERING THE MATERIALS REQUIRED FOR CONSTRUCTION.
3. CONSTRUCTION SHALL BE IN ACCORDANCE WITH ALL REQUIRED PERMITS. THE CONTRACTOR SHALL MAINTAIN COPIES OF ALL RELEVANT PERMITS AND CONSTRUCTION DOCUMENTS AVAILABLE ON THE JOB SITE AT ALL TIMES.
4. CONTRACTOR TO MAINTAIN THE SITE IN A SAFE AND SECURE MANNER TO PROTECT PUBLIC SAFETY AND THE CONDITIONS OF THE IMPROVEMENTS.
5. THE CONTRACTOR SHALL MAINTAIN, AT THE JOB SITE, A RECORD COPY OF ALL CONSTRUCTION DRAWINGS AND SPECIFICATIONS ON WHICH ALL FIELD CHANGES ARE TO BE SHOWN. THESE CHANGES ARE TO BE INCORPORATED IN THE "AS-BUILT" SURVEY FURNISHED TO THE ENGINEER.
6. SHOULD CONDITIONS VARY FROM THOSE SHOWN ON THESE PLANS, THE CONTRACTOR SHALL IMMEDIATELY NOTIFY THE ENGINEER OF RECORD PRIOR TO CONTINUING CONSTRUCTION.
7. ANY FIELD MODIFICATIONS OR DEVIATIONS TO THESE CONSTRUCTION PLANS REQUIRES APPROVAL BY BOTH THE ENGINEER OF RECORD AND THE CITY PRIOR TO PERFORMING THE WORK.
8. IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO PROVIDE AN "AS-BUILT" SURVEY OF THE COMPLETED CONSTRUCTION. THE "AS-BUILT" SURVEY SHALL BE PREPARED IN ACCORDANCE WITH APPROPRIATE GOVERNMENTAL REGULATIONS AND ZCA REQUIREMENTS. THE "AS-BUILT" SURVEY SHALL BE PREPARED ON ZCA'S DESIGN/PERMITTED PLANS. ELECTRONIC AND PAPER COPIES OF THE AS-BUILT SURVEY SHALL BE PROVIDED TO THE ENGINEER OF RECORD. THE "AS-BUILT" SHALL BE SIGNED AND SEALED BY A FLORIDA REGISTERED PROFESSIONAL LAND SURVEYOR.
9. THE CONTRACTOR SHALL BE RESPONSIBLE FOR MAINTAINING VEHICULAR AND PEDESTRIAN TRAFFIC SAFELY THROUGH THE WORK ZONE AT ALL TIMES, IF APPLICABLE. ANY SIDEWALK, LANE OR ROAD CLOSURE REQUIRES REVIEW AND APPROVAL IN ADVANCE AND A SEVEN (7) DAY MINIMUM NOTICE TO THE JURISDICTIONAL AGENCY. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE REQUIRED COORDINATION.
10. MAINTENANCE OF TRAFFIC WILL BE IN ACCORDANCE WITH THE MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES FOR STREETS AND HIGHWAY CONSTRUCTION, MAINTENANCE AND UTILITY OPERATIONS AND THE FLORIDA DEPARTMENT OF TRANSPORTATION STANDARD PLANS, LATEST EDITIONS.
11. CONTRACTOR TO NOTIFY THE REGULATORY AGENCIES FORTY EIGHT (48) HOURS PRIOR TO THE START OF CONSTRUCTION. CONTRACTOR SHALL SEND COPIES OF ALL TESTING REPORTS TO THE REGULATORY AGENCIES AND THE ENGINEER OF RECORD.
12. SURVEY INFORMATION PROVIDED BY SLIGER & ASSOCIATES, INC. DATED 05/22/25. ALL ELEVATIONS BASED ON NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD 88) AND ARE SHOWN IN FEET. STATE PLANE COORDINATES ARE BASED UPON NAD 83.
13. ALL PUBLIC LAND CORNERS AND MONUMENTS WITHIN THE LIMITS OF CONSTRUCTION ARE TO BE PROTECTED. THE CONTRACTOR SHALL EMPLOY A SURVEYOR, REGISTERED IN THE STATE OF FLORIDA, TO REPLACE/RESTORE ANY PROPERTY OR LAND MARKERS DISTURBED BY CONSTRUCTION ACTIVITIES.
14. NO LAND SHALL BE CLEARED, EXCAVATED OR FILLED AND NO STRUCTURES SHALL BE ERECTED, REPAIRED OR DEMOLISHED WITHOUT PROPER PERMIT(S).
15. THE CONTRACTOR SHALL BE RESPONSIBLE FOR COMPLIANCE WITH ALL LOCAL, STATE AND FEDERAL REGULATIONS AS WELL AS THE REQUIREMENTS OF ST. JOHNS RIVER WATER MANAGEMENT DISTRICT AND E.P.A. (NPDES). CONTRACTOR SHALL ESTABLISH BEST MANAGEMENT PRACTICES AND EROSION CONTROL METHODS PRIOR TO COMMENCING ANY SITE CLEARING OR DEMOLITION AND SHALL MAINTAIN THOSE BARRIERS UNTIL FINAL ACCEPTANCE OF THE PROJECT.
16. THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE PROJECT'S NPDES PERMITTING, INSPECTION AND REPORTING, IF APPLICABLE.
17. THE EROSION, SEDIMENT AND TURBIDITY CONTROL MEASURES DELINEATED HEREON ARE THE MINIMUM REQUIRED. ADDITIONAL CONTROLS MAY BE NEEDED, DEPENDING UPON THE ACTUAL SITE CONDITIONS, JURISDICTIONAL AGENCY PERMIT REQUIREMENTS AND CONSTRUCTION OPERATIONS. STAKED SILT FENCE SHALL BE INSTALLED TO CONTROL EROSION AND RELEASE OF SUSPENDED SOLIDS. SEDIMENT TRACKING CONTROL DEVICES SHALL BE USED TO PREVENT THE OFFSITE TRANSPORT OF SEDIMENT BY MOTORIZED VEHICLES. IF CONTROL MEASURES DO NOT PROVE SATISFACTORY, WORK SHALL CEASE UNTIL NEW MEASURES ARE ADOPTED WITH SATISFACTORY RESULTS.
18. ALL EROSION AND SEDIMENT TRACKING CONTROL DEVICES SHALL BE INSPECTED DAILY AND IMMEDIATELY FOLLOWING A RAINFALL EVENT. REFER TO PROJECT'S STORMWATER POLLUTION PREVENT PLAN (SWPPP). ANY DEFICIENCIES FOUND IN THE EROSION CONTROL MEASURES SHALL BE REPAIRED IMMEDIATELY. THE CONTRACTOR SHALL KEEP A LOG BOOK DOCUMENTING THESE DAILY INSPECTIONS, DEFICIENCIES AND REMEDIAL ACTIONS.
19. ALL UNSUITABLE SOILS AND UNSUITABLE MATERIALS (SUCH AS CLAY, ORGANICS, ROCK, CEMENTED COQUINA, DEBRIS, ETC.) SHALL BE REMOVED, DISPOSED OF IN A LEGAL MANNER AND REPLACED WITH DRY COMPACTED GRANULAR MATERIAL SATISFACTORY TO THE CITY. THE COST OF ALL WORK AND MATERIALS IS TO BE INCLUDED IN THE UNIT PRICE OF THE ASSOCIATED CONSTRUCTION ITEMS UNLESS OTHERWISE SHOWN IN THE PLANS.
20. IN THE EVENT THAT WATER IS ENCOUNTERED DURING CONSTRUCTION, DEWATERING SHALL BE PERFORMED AS NEEDED. THE CONTRACTOR IS SOLELY RESPONSIBLE FOR THE DESIGN, PERMITTING, INSTALLATION, OPERATION AND SUBSEQUENT REMOVAL OF DEWATERING SYSTEMS AND THEIR SAFETY AND CONFORMITY WITH APPLICABLE CODES AND REGULATIONS.
21. PRIOR TO COMMENCEMENT OF CONSTRUCTION, THE CONTRACTOR SHALL NOTIFY THE APPROPRIATE ELECTRIC, TELEPHONE, GAS, CABLE TELEVISION, COMMUNICATIONS, ETC. COMPANIES TO DETERMINE THE TYPE AND LOCATION OF ALL UNDERGROUND FACILITIES IN THE AREA OF CONSTRUCTION.
22. ALL UNDERGROUND UTILITIES HAVE BEEN LOCATED HORIZONTALLY AND VERTICALLY BASED ON THE BEST INFORMATION AVAILABLE AND SHOULD BE CONSIDERED APPROXIMATE ONLY. THE CONTRACTOR SHALL BE RESPONSIBLE FOR LOCATING AND VERIFYING ALL ELEVATIONS OF EXISTING UTILITIES (PUBLIC AND PRIVATE) SHOWN OR NOT SHOWN PRIOR TO CONSTRUCTION. THE CONTRACTOR SHALL BE RESPONSIBLE FOR NOTIFYING THE VARIOUS UTILITY COMPANIES TO MAKE THE NECESSARY ARRANGEMENTS FOR ANY RELOCATION, DISRUPTION OF SERVICE OR CLARIFICATION OF ACTIVITY REGARDING SAID UTILITY. THE CONTRACTOR SHALL EXERCISE EXTREME CAUTION WHEN WORKING NEAR OR CROSSING A UTILITY, WHETHER SHOWN ON THESE PLANS OR FIELD LOCATED. THE CONTRACTOR SHALL BE RESPONSIBLE TO COORDINATE AND NOTIFY THE UTILITY COMPANIES FOR UTILITIES WHICH NEED TO BE RELOCATED FOR THE PROPOSED CONSTRUCTION. THE CONTRACTOR SHALL BE RESPONSIBLE TO PAY FOR ANY REPAIR, RELOCATION OR TEMPORARY MEASURES NEEDED FOR EXISTING OR PROPOSED UTILITIES.
23. IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO LOCATE AND AVOID ALL UTILITIES, OTHER STRUCTURES AND OBSTRUCTIONS BOTH ABOVE AND BELOW GROUND. ALL DAMAGE RESULTING FROM THE CONTRACTOR'S FAILURE TO COMPLY WITH THIS REQUIREMENT SHALL BE REPAIRED AT THE CONTRACTOR'S EXPENSE.
24. THE CONTRACTOR SHALL NOTIFY ALL UTILITY PROVIDERS AT LEAST TWO (2) BUSINESS DAYS PRIOR TO ANY CONSTRUCTION.
25. THE CONTRACTOR SHALL MAINTAIN UNINTERRUPTED SERVICE AT ALL SERVICE CONNECTIONS. THE MANNER IN WHICH THIS IS ACCOMPLISHED SHALL BE LEFT TO THE DISCRETION OF THE CONTRACTOR, SUBJECT TO THE REQUIREMENTS OF THE CONTRACT SPECIFICATIONS.
26. ALL EXISTING DRAINAGE STRUCTURES AND UTILITIES WITHIN THE CONSTRUCTION LIMITS SHALL REMAIN, UNLESS OTHERWISE NOTED IN PLANS.
27. THE LENGTH OF ALL DRAINAGE PIPES AND LOCATION OF ALL DRAINAGE STRUCTURES ARE APPROXIMATE. THE LOCATION OF THE DRAINAGE STRUCTURE SHALL DETERMINE THE LENGTH OF PIPE.
28. THE TOP OF CASTING ELEVATIONS (TC) OF ALL STRUCTURES ARE SHOWN. HOWEVER, THE CONTRACTOR SHALL INSTALL ALL FRAMES SO AS TO PROVIDE A SMOOTH SURFACE FOR VEHICULAR AND/OR PEDESTRIAN TRAFFIC.
29. CONTRACTOR SHALL CONFIRM PROPOSED TOP OF CASTING (TC) ELEVATIONS WILL ALLOW POSITIVE DRAINAGE TO PROPOSED INLETS. IF POSITIVE DRAINAGE DOES NOT EXIST, CONTRACTOR TO COORDINATE WITH ENGINEER OF RECORD FOR SOLUTION AND ADJUST PROPOSED INLETS AS NECESSARY AT NO COST.
30. CONTRACTOR SHALL CONFIRM ELEVATION OF EXISTING GRADE PRIOR TO PLACING DRAINAGE OUTFALL STRUCTURES. CONTRACTOR SHALL NOTIFY ENGINEER OF RECORD IF EXISTING GRADE DOES NOT MATCH PROPOSED OUTFALL INVERT. CONTRACTOR SHALL ADJUST OUTFALL STRUCTURE INVERT AND/OR STRUCTURE LOCATION AS DIRECTED BY ENGINEER OF RECORD AT NO COST.
31. ANY DRAINAGE PROBLEMS CREATED BY CONSTRUCTION, OR EXISTING BEFORE CONSTRUCTION AND NOT ALLEVIATED, SHOULD BE BROUGHT TO THE ATTENTION OF THE ENGINEER OF RECORD AT THE TIME OF DISCOVERY.
32. ALL STORMWATER PIPES AND INLETS SHALL BE CLEANED OF DEBRIS AND ERODED MATERIALS AT LAST STAGES OF AND PRIOR TO COMPLETION OF CONSTRUCTION.

## GENERAL NOTES

33. SPECIAL ATTENTION IS DIRECTED TO THE FACT THAT PORTIONS OF SOME DRAINAGE STRUCTURES MAY EXTEND INTO THE STABILIZED PORTION OF THE ROADBED. EXTREME CAUTION WILL BE NECESSARY DURING COMPACTION AND STABILIZATION OPERATIONS AT THESE LOCATIONS TO AVOID DAMAGE AND ACHIEVE THE REQUIRED COMPACTION.
34. DURING CONSTRUCTION, AN ALL-WEATHER ACCESSIBLE ROADWAY SHALL BE MAINTAINED AT ALL TIMES FOR FIRE ACCESS.
35. ALL REQUIRED FIRE LINES & HYDRANTS SHALL BE INSTALLED IN ACCORDANCE WITH LOCAL & STATE REQUIREMENTS AND OPERATIONAL PRIOR TO THE START OF VERTICAL CONSTRUCTION.
36. EXISTING DRIVEWAYS WITHIN THE LIMITS OF THIS PROJECT ARE TO BE REPLACED AT THE SAME LOCATION AND WIDTH WITH THE SAME TYPE OF MATERIAL, UNLESS OTHERWISE SHOWN IN THE PLANS.
37. ALL RAMPS, SIDEWALKS AND ACCESSIBLE ROUTES ARE TO BE IN COMPLIANCE WITH CURRENT A.D.A. REQUIREMENTS.
38. SIGNS THAT ARE REMOVED AND ARE TO BE RELOCATED SHALL BE STOCK PILED BY THE CONTRACTOR. ANY EXISTING SIGNS DAMAGED DURING CONSTRUCTION SHALL BE REPLACED BY THE CONTRACTOR AT HIS COST.
39. ROADWAY AND PARKING SIGNAGE AND MARKINGS SHALL BE IN CONFORMANCE WITH THE MANUAL OF UNIFORM TRAFFIC CONTROL DEVICES, CURRENT EDITION.
40. UNLESS OTHERWISE NOTED, PROPOSED GRADES SHOWN ARE FINISHED GRADES.
41. OPERATION AND MAINTENANCE OF THE STORMWATER SYSTEM WILL BE PROVIDED BY THE OWNER OF PROPERTY. MAINTENANCE IS TO INCLUDE BI-WEEKLY MOWING OF SIDE SLOPES FOR VEGETATION CONTROL AND MONTHLY INSPECTION/CLEANING OF CULVERTS & STORM SYSTEMS.
42. ALL DISTURBED AREAS SHALL BE SODDED, UNLESS OTHERWISE SHOWN, AND SHALL HAVE SOD/ VEGETATED COVER ESTABLISHED PRIOR TO THE INSPECTION FOR THE CERTIFICATE OF OCCUPANCY.
43. INSTALLATION OF THE REQUIRED STREET SIGNS, TRAFFIC SIGNS, PAVEMENT STRIPIING, STREET LIGHTS AND SIDEWALKS ALONG WITH THE PAINTING OF THE FIRE HYDRANTS MUST BE COMPLETED PRIOR TO THE ISSUANCE OF THE CERTIFICATE OF COMPLETION.
44. CONTRACTOR IS RESPONSIBLE FOR INSPECTING AND PRE-TESTING PRIOR TO SCHEDULING A TEST OR WALK-THROUGH WITH THE UTILITY REPRESENTATIVES, MUNICIPAL REPRESENTATIVES AND ENGINEER OF RECORD. ANY COST ASSOCIATED WITH RETESTING SHALL BE PAID FOR BY THE CONTRACTOR.
45. THE ENGINEER OF RECORD AND LOCAL UTILITY SHALL BE GIVEN SEVENTY-TWO (72) HOURS NOTICE OF ALL REQUESTED MEETINGS AND/OR TESTING MEASURES.
46. CONTRACTOR SHALL BE RESPONSIBLE TO COORDINATE WITH THE REGULATORY REPRESENTATIVES TO DETERMINE THE INSPECTIONS NEED FOR THE PROJECT. CONTRACTOR SHALL PROVIDE PROPER NOTIFICATION TO INSPECTING AUTHORITIES BEFORE AND DURING CONSTRUCTION.
47. ZEV COHEN AND ASSOCIATES, INC (ZCA) LIABILITY SHALL BE LIMITED TO THE COMPANY'S DESIGN OF SPECIFIC IMPROVEMENTS AS DEPICTED ON THE SITE INFRASTRUCTURE CONSTRUCTION DOCUMENTS.

## FPL EASEMENT CONSTRUCTION NOTES

1. ALL CONSTRUCTION WITHIN THE EXISTING FLORIDA POWER AND LIGHT (FPL) EASEMENT TO COMPLY WITH ALL FPL REQUIREMENTS. CONTRACTOR SHOULD CONSULT THE FPL CONSENT AGREEMENT FOR CONSTRUCTION REQUIREMENTS.
2. CONTRACTOR TO NOTIFY FPL PRIOR TO BEGINNING OF ANY CONSTRUCTION WITHIN THE EXISTING FPL EASEMENT IN ACCORDANCE WITH THE CONSENT AGREEMENT.

1. SUBMITTAL REQUIREMENTS FOR THE CITY OF PORT ORANGE ARE LISTED ON THE REPRESENTATIVE CHECKLIST DOCUMENT AVAILABLE AT WWW.PORT-ORANGE.ORG: HOME>GOVERNMENT>DEPARTMENTS>COMMUNITY DEVELOPMENT>PLANNING AND ZONING>DEVELOPMENT REVIEW & ZONING FORMS.
2. PLANS SUBMITTED TO THE COMMUNITY DEVELOPMENT DEPARTMENT FOR REVIEW INCLUDING SITE PLANS, SUBDIVISIONS, PLANNED UNIT DEVELOPMENTS, AND OTHER DEVELOPMENTS, SHALL CONSIST OF AT LEAST THE FOLLOWING ITEMS:
   A. COVER PAGE WITH PROJECT NAME, PROJECT ADDRESS, SUBMITTAL AND REVISION DATE, DEVELOPER INFORMATION (NAME, ADDRESS, CONTACT INFORMATION), ENGINEER, SURVEYOR, OR LANDSCAPE ARCHITECT INFORMATION (NAME, ADDRESS, CONTACT INFORMATION), AREA MAP SHOWING PROJECT LIMITS, FLOOD ZONE MAP, SOILS INFORMATION MAP, LEGAL DESCRIPTION, TAX PARCEL ID, EXISTING AND PROPOSED DEVELOPMENT AREA SUMMARY, SETBACKS, PARKING REQUIREMENTS, AREA COVERAGE REQUIREMENT, TREE PRESERVATION, AND ANY OTHER PROJECT RELATED INFORMATION.
   B. ADDITIONAL SHEETS (AS APPROPRIATE):
      SURVEY — CLEARING/TREE PROTECTION/DEMOLITION
      SWPPP — LAYOUT
      UTILITIES — GRADING
      STORMWATER — LANDSCAPE
      CITY STANDARD DETAILS — IRRIGATION
      PLAN AND PROFILE (1"=40' MAX. PLAN: HORIZ. 1"=40' MAX. AND VERT. 1"=4' MAX. PROFILE)
   C. CITY STANDARD DETAILS MAY BE REDUCED TO A MINIMUM 5" BY 7" COPY AREA. A MAXIMUM OF 12 DETAIL SHEETS MAY TO BE SHOWN ON ONE STANDARD 24" BY 36" PAGE.
3. PLANS SHALL BE DRAWN ON STANDARD 24" BY 36" SHEETS SHOWING A NORTH ARROW AND SCALE. EACH SHEET SHALL CONTAIN A TITLE BLOCK SHOWING AT LEAST THE FOLLOWING INFORMATION:
   PROJECT NAME
   NAME, ADDRESS, AND PHONE NUMBER OF THE COMPANY PREPARING THE DRAWINGS
   SHEET NUMBER
   SHEET NAME
   ORIGINAL SUBMITTAL DATE
   REVISION NUMBER AND DATE
   OTHER INFORMATION AS APPROPRIATE
4. COMPLETE PLAN SETS ARE TO BE SUBMITTED WITH THE APPLICATION, CHECK LIST, PAYMENT, REPORTS, CD AND ADDITIONAL INFORMATION AS LISTED IN THE CHECKLIST.
5. ELECTRONIC SUBMITTALS:
   A. DRAWINGS:
      1. ALL DRAWINGS SHALL BE PDF FILES CREATED OR SCANNED AT 24x36 INCH SIZE AND 300 DPI.
      2. THE DRAWINGS SHALL BE ARRANGED IN COMPLETE SETS WITH EACH SET NOT EXCEEDING 35 SHEETS PER SINGLE PDF FILE. DRAWING SETS LARGER THAN 35 SHEETS SHALL BE SPLIT INTO MULTIPLE PDF FILE SETS AND NAMED APPROPRIATELY (I.E. CIVIL PLANS, SET 1 OF 2, CIVIL PLANS, SET 2 OF 2...).
      3. PLAN SETS SHALL BE SEPARATED INTO CATEGORY FILES, AS FOLLOWS:
         CIVIL – SIGNED AND SEALED SITE PLAN, DETAILS
         LANDSCAPE – SIGNED AND SEALED LANDSCAPING AND IRRIGATION
         SURVEY – SIGNED AND SEALED BOUNDARY, TOPOGRAPHIC, TREE
         ARCHITECTURAL – SIGNED AND SEALED BUILDING ELEVATIONS, FLOOR PLAN, COLOR RENDERING PLAT (IF APPLICABLE)
         CONCEPTUAL (IF APPLICABLE)
   B. DOCUMENTS:
      1. ALL DOCUMENTS SHALL BE PDF FILES CREATED OR SCANNED AT 300 DPI.
      2. APPLICATION FILE SHALL CONTAIN THE FOLLOWING SCANNED DOCUMENTS:
         APPLICATION WITH ORIGINAL SIGNATURE
         COVER LETTER WITH ORIGINAL SIGNATURE
         AGENT AUTHORIZATION WITH ORIGINAL SIGNATURE (IF APPLICABLE)
         WARRANTY DEED (RECORDED ORIGINAL)

| STANDARD CONSTRUCTION DETAIL<br>SUBMITTAL REQUIREMENTS | FILE NAME: M1.DWG<br>DETAIL REF: M-1 |
|---|---|
| REV. 12/18 | |

**MATERIALS**

THE INSPECTION AND TESTING OF MATERIALS AND FINISHED ARTICLES TO BE INCORPORATED IN THE WORK SHALL BE MADE BY BUREAUS, LABORATORIES, OR AGENCIES APPROVED BY THE ENGINEER OF RECORD. THE CONTRACTOR SHALL SUBMIT SUCH SAMPLES, OR SUCH SPECIAL OR TEST PIECES OF MATERIALS AS THE ENGINEER OF RECORD MAY REQUIRE. THE CONTRACTOR SHALL NOT INCORPORATE ANY MATERIAL OR FINISHED ARTICLE INTO THE WORK UNTIL THE RESULTS OF THE INSPECTION OR TESTS ARE KNOWN AND THE CONTRACTOR HAS BEEN NOTIFIED BY THE ENGINEER OF RECORD THAT THE MATERIAL OR FINISHED ARTICLE IS ACCEPTED. ALL MATERIALS MUST BE OF THE SPECIFIED QUALITY AND BE EQUAL TO THE APPROVED SAMPLE IF A SAMPLE HAS BEEN SUBMITTED. CERTIFIED COPIES OF ALL TESTS MADE SHALL BE SUBMITTED TO THE ENGINEER OF RECORD AS WELL AS TO THE CITY'S DESIGNATED SITE INSPECTOR. THE CITY'S DESIGNATED SITE INSPECTOR MUST RECEIVE COPIES OF ALL TESTING REPORTS AND CERTIFICATES PRIOR TO THE ENGINEER OF RECORD REQUESTING A FINAL PROJECT INSPECTION FROM THE CITY.

**LABORATORY CONTROL AND CERTIFICATES**

1. SPECIFICATIONS: SAMPLING, TESTING, AND LABORATORY METHODS SHALL BE IN ACCORDANCE WITH THE STANDARD SPECIFICATIONS OF THE AASHTO OR ASTM. WHERE AASHTO OR ASTM SPECIFICATIONS ARE USED, THE REFERENCE SHALL BE CONSTRUED TO BE THE MOST RECENT STANDARD SPECIFICATIONS OF THE AASHTO OR ASTM IN FORCE ON THE DATE OF THE TEST.
2. TEST & CERTIFICATES: THE CONTRACTOR SHALL ENGAGE AN APPROVED TESTING LABORATORY TO PROVIDE THE FOLLOWING TESTS AND CERTIFICATIONS SIGNED BY A REGISTERED ENGINEER OF THE STATE OF FLORIDA. ALL TECHNICIANS PERFORMING THE TESTS SHALL BE STATE CERTIFIED FOR THE TESTING PERFORMED. ADDITIONAL TESTS THAT MAY BE REQUIRED BY EITHER THE ENGINEER OF RECORD OR THE CITY SHALL ALSO BE PROVIDED BY THE CONTRACTOR AND THE FOLLOWING SHALL NOT BE TAKEN AS A COMPLETE AND EXHAUSTIVE LIST OF THE CONTRACTOR'S TESTING RESPONSIBILITIES.
   A) SOIL ANALYSIS FOR STRUCTURAL FILL MATERIAL PRIOR TO INSTALLATION.
   B) PROCTOR DENSITIES, MOISTURE CONTENT, COMPACTED FIELD DENSITIES, AND ATTERBERG LIMITS.
   C) FLOWABLE FILL – MIX DESIGNS, CONSTRUCTION SUPERVISION AND COMPRESSIVE STRENGTH TESTS.
   D) ANALYSIS OF RECYCLED CONCRETE BASE MATERIAL PRIOR TO INSTALLATION.
   E) ASPHALT MIX DESIGN, BITUMEN CONTENT, SIEVE ANALYSIS, HUBBARD FIELD STABILITY TESTS, NUCLEAR DENSITY TESTS (BACKSCATTER METHOD), AND ANALYSIS OF CORE SAMPLES.
   F) CONCRETE MIX DESIGNS FOR ALL APPLICATIONS INCLUDING PAVEMENT, CAST-IN-PLACE STRUCTURES, CURBING, GUTTERS, SIDEWALKS, BIKE PATHS, APRONS AND DRIVEWAYS.
   G) COMPRESSIVE TEST CYLINDERS AND SLUMP TESTS FOR ALL APPLICATIONS OF CONCRETE, INCLUDING PAVEMENT, CAST-IN-PLACE STRUCTURES, CURBING, GUTTERS, SIDEWALKS, BIKE PATHS, APRONS, AND DRIVEWAYS.
   H) CHLORINE RESIDUAL AND BACTERIOLOGICAL TESTING OF WATER MAINS.
   I) PRESSURIZED LEAK TESTING OF WATER MAINS, FORCE MAINS, AND RECLAIMED WATER MAINS.

| STANDARD CONSTRUCTION DETAIL<br>TECHNICAL SPECIFICATIONS<br>FOR SITES AND SUBDIVISIONS<br>TESTING | FILE NAME: M2.DWG<br>DETAIL REF: M-2 |
|---|---|
| REV. 12/18 | |

THE FOLLOWING MEASURES REPRESENT MINIMUM STANDARDS TO BE ADHERED TO BY THE CONTRACTOR THROUGHOUT THE CONSTRUCTION OF A PROJECT. THE CITY RESERVES THE RIGHT TO REQUIRE ADDITIONAL MEASURES TO BE EMPLOYED WHEN WARRANTED BY CONDITIONS AND/OR THE FAILURE OF THE CONTRACTOR TO EMPLOY APPROPRIATE EROSION CONTROL BEST MANAGEMENT PRACTICES. FAILURE TO COMPLY WITH THESE PROVISIONS SHALL RESULT IN THE ISSUANCE OF A "STOP WORK ORDER".

1. NO DISTURBANCE OF PROPOSED CONSERVATION EASEMENTS, NATURAL BUFFERS, OR WATER BODIES IS PERMITTED. THE CONTRACTOR SHALL LOCATE THESE AREAS ON SITE AND BARRICADE THEM TO AVOID ANY UNAUTHORIZED CLEARING. BARRICADES AND OTHER PROTECTIVE FENCING ARE TO BE LOCATED AT THE DRIP LINE OF EXISTING NATIVE TREES OR AT THE EDGE OF THE NATIVE UNDER-STORY HABITAT, WHICHEVER IS FURTHEST.
2. SPECIMEN AND HISTORIC TREES, CONSERVATION EASEMENTS, NATURAL VEGETATION BUFFERS, AND SIMILAR AREAS MUST BE PROTECTED BY BARRICADES OR FENCING PRIOR TO CLEARING. BARRICADES ARE TO BE SET AT THE DRIP LINE OF THE TREES, AS SPECIFIED, AND MAINTAINED THROUGHOUT THE DURATION OF THE PROJECT. BARBED WIRE IS NOT PERMITTED AS A PROTECTIVE BARRIER.
3. WHERE A CHANGE OF GRADE OCCURS WITHIN THE DRIP LINE OF A SPECIMEN TREE, SILT FENCES WILL BE REQUIRED DURING CONSTRUCTION AND RETAINING WALLS MUST BE INSTALLED PRIOR TO FINAL ACCEPTANCE BY THE CITY.
4. IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO HAVE ALL PROTECTIVE VEGETATION BARRICADES AND EROSION CONTROL DEVICES AND MEASURES IN PLACE PRIOR TO THE COMMENCEMENT OF ANY EARTHWORK, INCLUDING PRELIMINARY GRUBBING. BEST MANAGEMENT PRACTICES (BMP'S) ARE TO BE IMPLEMENTED, SUCH AS TEMPORARY CONSTRUCTION FENCES, SILT FENCES AND FLOATING TURBIDITY BARRIERS. IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO MAINTAIN ALL EROSION CONTROL DEVICES AND MEASURES THROUGHOUT THE DURATION OF THE ENTIRE PROJECT. MAINTENANCE SHALL INCLUDE, BUT NOT LIMITED TO, PERIODIC INSPECTION AND REMOVAL OF DEBRIS ABUTTING EROSION CONTROL DEVICES AS SPECIFICALLY IDENTIFIED IN LDC, CH 10, ARTICLE I, SEC. 5.
5. PRIOR TO THE INSTALLATION OF ANY FILL MATERIALS ON SUBJECT SITE, SILT FENCES SHALL BE INSTALLED (1) ALONG SUBJECT SITE BOUNDARY AND/OR PROPERTY LINES, (2) AT THE EDGE OF CONSERVATION EASEMENTS AND WETLANDS, (3) ADJACENT TO NATURAL LANDSCAPE BUFFERS, (4) AROUND THE PERIMETER OF EXISTING STORM WATER TREATMENT FACILITIES, AND (5) AT ANY ADDITIONAL AREAS THAT THE CITY DEEMS NECESSARY TO BE PROTECTED FROM POTENTIAL EROSION IMPACTS DURING CONSTRUCTION. THESE CONDITIONS SHALL APPLY IN ALL INSTANCES WHERE FILL MATERIAL IS BEING INSTALLED WITHIN 25 FEET OF ANY OF THE AFOREMENTIONED LOCATIONS. WHILE THESE ITEMS REPRESENT THE MINIMUM REQUIREMENTS, THE CITY RESERVES THE RIGHT TO IMPOSE ADDITIONAL PROTECTIVE MEASURES, AS DETERMINED DURING ACTUAL SITE VISITS CONDUCTED AS PART OF THE STANDARD REVIEW OF THE SITE-SPECIFIC ABC CLEARING PERMIT APPLICATION AND THROUGHOUT PROJECT CONSTRUCTION.
6. WHERE FILL MATERIAL IS INTENDED TO BE INSTALLED ADJACENT TO EXISTING VEGETATION WHICH IS INTENDED TO REMAIN NATURAL, THE CONTRACTOR MAY INSTALL SILT FENCING AS A TREE PROTECTION MEASURE, IN LIEU OF INSTALLING WOOD BRACING WITH ORANGE MESH. THIS PRACTICE IS ENCOURAGED BY THE CITY. IF THE SILT FENCE FAILS TO PROVIDE ADEQUATE PROTECTION FROM IMPACT DUE TO CONSTRUCTION, THEN BARRICADES OR WOOD BRACING SHALL BE REQUIRED.
7. AT A MINIMUM, THE CONTRACTOR SHALL SEED AND MULCH ALL DISTURBED AREAS. SUFFICIENT GRASS COVERAGE IS TO BE ESTABLISHED WITHIN TWO WEEKS.
8. IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR THROUGH SCHEDULING, TO MINIMIZE THE DISTURBANCE OF SITE AREAS THAT HAVE BEEN BROUGHT TO THEIR PROPOSED FINAL GRADE. WITHIN SEVEN (7) DAYS OF BRINGING A SUBJECT AREA TO ITS FINAL GRADE OR INACTIVITY IN CONSTRUCTION, THE CONTRACTOR SHALL INSTALL SEED AND MULCH OR SOD, AS REQUIRED.

| STANDARD CONSTRUCTION DETAIL<br>CONTRACTOR REQUIREMENTS FOR<br>SITE CLEARING, GRADING, AND EROSION CONTROL<br>DESIGN AND CONSTRUCTION | FILE NAME: M3.DWG<br>DETAIL REF: M-3 |
|---|---|
| REV. 12/18 | |

9. FOR INDIVIDUAL CONSTRUCTION PROJECTS INVOLVING MULTIPLE PHASES, (PHASING IS REQUIRED FOR SITES 30 ACRES AND LARGER) UPON COMPLETION OF EACH PHASE OF THE PROJECT, SEEDING AND MULCHING AND / OR SODDING IS TO BE PERFORMED PRIOR TO COMMENCING THE NEXT PHASE OF CONSTRUCTION.
10. ONCE AN AREA IS SEEDED OR SODDED, IT MUST BE MAINTAINED BY THE CONTRACTOR TO ALLOW THE GRASS TO BECOME ESTABLISHED. IF THE GRASS IS NOT ESTABLISHED WITHIN TWO WEEKS THE CITY MAY REQUIRE THE CONTRACTOR TO RE-SEED OR A NON-VEGETATIVE OPTION MAY BE EMPLOYED.
11. ANY BURNING OF CLEARED MATERIALS MUST BE INSPECTED AND PERMITTED ON A DAILY BASIS. CONTACT THE FIRE MARSHAL AT 506-5905 PRIOR TO EACH DAY OF DESIRED BURNING.
12. ABSOLUTELY NO BURYING OF CLEARED MATERIALS IS PERMITTED.
13. THE REMOVAL OF ALL VEGETATION AND TOPSOIL ON THE FUTURE ROADWAY, PARKING AND BUILDING LOT AREAS IS REQUIRED TO BE COMPLETED PRIOR TO THE PLACEMENT OF FILL ON THOSE AREAS. THE TOPSOIL MAY BE TEMPORARILY STOCKPILED AND USED AS TOPSOIL OVER PROPOSED GREEN AREAS SUCH AS PLANT BEDS, SODDED AREAS, AND WHERE TREES ARE TO BE INSTALLED OR RELOCATED.
14. A SIGNED, DATED, AND SEALED LETTER FROM A SOILS ENGINEER OR THE ENGINEER OF RECORD CERTIFYING THAT THE AREAS TO BE FILLED HAVE BEEN STRIPPED OF ORGANIC MATERIALS, MUST BE SUBMITTED TO THE CITY PRIOR TO FILLING.
15. FILL MATERIAL IS TO BE PLACED IN ONE FOOT MAXIMUM LIFTS AND COMPACTED TO THE APPROPRIATE DENSITY (98% FOR PAVED AREAS AND 95% FOR BUILDING PADS AND ALL OTHER AREAS AS PER AASHTO T-180).
16. DURING SUBDIVISION DEVELOPMENT WHEN FUTURE BUILDING LOTS ARE FILLED AS PART OF THE OVERALL SUBDIVISION IMPROVEMENTS, COMPACTION TEST REPORTS MUST BE PERFORMED ON THE BUILDING LOTS AT 300 FOOT INTERVALS. THESE TESTS ARE TO BE PERFORMED IN ONE-FOOT VERTICAL INCREMENTS. THE RES

IN ORDER TO ENSURE THAT NEW SUBDIVISIONS AND SITE PLANS ARE CONSTRUCTED SUBSTANTIALLY IN ACCORDANCE WITH CITY REGULATIONS AND THE APPROVED DRAWINGS, THE FOLLOWING INFORMATION IS REQUIRED ON ALL AS-BUILT DRAWINGS:

1. INDIVIDUAL PLAN AND PROFILE SHEETS FOR ALL ROADS AND SANITARY SEWER LINES, SHOWING MANHOLES, INLETS, AND PIPE CROSSINGS. PLAN AND PROFILE SHEETS SHALL SHOW SANITARY LINES AND ALL OTHER BURIED UTILITIES THAT CROSS SEWER LINES, AND ANY THAT ARE PARALLEL AND WITHIN TEN FEET OF SANITARY SEWER LINES. PLAN VIEWS SHALL BE DRAWN AT A SCALE OF ONE (1) INCH EQUAL TO FORTY (40) FEET HORIZONTAL. PROFILES SHALL BE DRAWN AT ONE (1) INCH EQUAL TO FOUR (4) FEET VERTICAL AND ALIGNED VERTICALLY WITH IMPROVEMENTS SHOWN ON THE PLAN VIEW.
2. DESIGN ELEMENTS SHALL BE CROSSED OUT AND AS-BUILT INFORMATION WRITTEN NEXT TO IT.
3. PAVEMENT AND CURB WIDTHS SHALL BE VERIFIED AND DIMENSIONED FOR EACH STREET AT EACH BLOCK FOR SUBDIVISIONS AND AS APPROPRIATE TO CONFIRM PAVING LIMITS FOR SITE PLANS.
4. ALL RADII AT INTERSECTIONS SHALL BE VERIFIED, DIMENSIONED AND CLEARLY INDICATED ON THE AS-BUILT.
5. ROADWAY ELEVATIONS AT CENTERLINE AND CURB INVERT SHALL BE RECORDED AT ALL GRADE CHANGES, 100' INTERVALS FOR LONG ROADWAYS, AND OTHER INTERVALS AS NEEDED. FOR SUBDIVISIONS, THE AS-BUILT CENTERLINE GRADE LINES OF ALL STREETS SHALL BE SHOWN ON THE PLAN AND PROFILE ALONG WITH THE DESIGN PROFILE GRADE LINES. IN THE EVENT THAT THE AS-BUILT CENTERLINE LONGITUDINAL GRADE DOES NOT MEET THE CITY MINIMUM STANDARDS, ADDITIONAL LONGITUDINAL GRADES OF THE ADJACENT CURBING AND SIMILAR ROADWAY CROSS-SECTIONS SHALL BE REQUIRED TO VERIFY THAT THE SYSTEM WILL FUNCTION AS ORIGINALLY DESIGNED.
6. FOR SUBDIVISIONS, PROPOSED DESIGN FINISHED FLOOR ELEVATIONS SHALL APPEAR ON ALL SUBDIVISION LOTS ON THE APPROPRIATE PLAN AND PROFILE SHEET AS WELL AS ON THE MASTER DRAINAGE PLAN.
7. STORM DRAINAGE STRUCTURES SHALL BE LOCATED AND DIMENSIONED FROM STREET/ROADWAY CENTERLINES OR LOT LINES AS APPROPRIATE. STORM DRAINAGE PIPE SHALL BE LOCATED AND DIMENSIONED FROM THE BACK OF CURB, OR EDGE OF PAVEMENT IF NO CURB IS PRESENT.
8. STORM DRAINAGE STRUCTURE RIMS, PIPE INVERT AND INLET BOTTOM ELEVATIONS SHALL BE RECORDED AND CLEARLY INDICATED AS AS-BUILT INFORMATION. STORM DRAINAGE PIPE MATERIAL, LENGTH, AND SIZE SHALL BE RECORDED AND CLEARLY INDICATED AS BEING AS-BUILT INFORMATION.
9. ALL APPLICABLE TOPOGRAPHIC INFORMATION PERTINENT TO THE ON-SITE DRAINAGE SYSTEM, SUCH AS DITCHES, SWALES, LAKES, CANALS, ETC. THAT ARE DEEMED NECESSARY BY THE CITY TO VERIFY THE FUNCTIONAL PERFORMANCE OF THE STORMWATER SYSTEM, SHALL BE NOTED. NORMALLY, RECORDING ELEVATIONS EVERY 100' AT THE TOP OF BANK AND TOE OF SLOPE WILL BE REQUIRED. MEASUREMENTS SHALL BE TAKEN AND RECORDED IN ORDER TO ACCURATELY TIE DOWN THESE FEATURES TO THE ROADWAY CENTERLINES AND TO PLAT LINES WHENEVER POSSIBLE, CONTOUR LINES SHALL BE UTILIZED TO GRAPHICALLY DESCRIBE THESE TOPOGRAPHIC FEATURES.
10. RETENTION AREAS SHALL HAVE THEIR TOP AND BOTTOM OF BANK ELEVATIONS RECORDED. ACTUAL DIMENSIONS OF THE SIZE OF ALL RETENTION AREAS ARE TO BE RECORDED AS MEASURED FROM TOP-OF-BANK TO TOP-OF-BANK WITH SIDE SLOPES INDICATED.
11. ACTUAL MATERIALS USED AND ELEVATIONS AND DIMENSIONS OF OVERFLOW WEIR STRUCTURES AND SKIMMERS SHALL BE NOTED ON THE AS-BUILT.
12. STORM DRAINAGE SWALE CENTERLINES SHALL BE LOCATED AND ELEVATIONS OF FLOW LINE AND TOPS OF BANKS SHALL BE RECORDED EVERY 100 FEET. SIDE SLOPES SHALL ALSO BE INDICATED.

STANDARD CONSTRUCTION DETAIL
REQUIREMENTS FOR AS-BUILTS DRAWINGS

FILE NAME: MS.DOC
DETAIL REF: M-5
REV. 12/18

ALL MATERIALS AND INSTALLATION METHODS USED FOR LAND DEVELOPMENT CODE REQUIRED IMPROVEMENTS FOR SUBDIVISIONS AND SITE PLANS SHALL BE IN CONFORMANCE WITH THE CITY, FDOT STANDARD SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION (LATEST EDITION), AND THE FDOT ROADWAY AND TRAFFIC DESIGN STANDARDS (LATEST EDITION).

1. ALL RIGHT-OF-WAY OTHER THAN ROADWAY AREAS SHALL BE SEEDED AND MULCHED OR SODDED. ALL SLOPES STEEPER THAN 6:1 SHALL REQUIRE SODDING. THE CITY RESERVES THE RIGHT TO REQUIRE SODDING IN SPECIAL AREAS WHERE EROSION IS A CONCERN.
2. THE FOLLOWING WILL BE THE STANDARD PROTECTION FOR DITCHES UNLESS DRAINAGE CALCULATIONS INDICATE OTHERWISE:

| SWALE PROFILE GRADES | PROTECTION REQUIRED |
|---|---|
| 0.2% – 1.0% | SEEDING AND MULCHING |
| 1.0% – 4.0% | SODDING |
| 4.0% + | DITCH PAVING |

3. THE PAVEMENT, BASE, AND SUBGRADE THICKNESS PRESENTED ON DETAILS REPRESENTS THE MINIMUM REQUIREMENTS FOR LOCAL PUBLIC STREETS AND PRIVATE PARKING LOTS. AREAS SUBJECT TO HEAVY TRAFFIC, SUCH AS COLLECTOR ROADS AND COMMERCIAL PRIVATE PARKING LOTS, HAVE INCREASED REQUIREMENTS.
4. THE DEVELOPER SHALL PROVIDE, AT THEIR OWN EXPENSE, A CERTIFIED SOILS ENGINEERING LABORATORY TO PERFORM ALL FIELD AND LABORATORY TESTING REQUIRED TO VERIFY THAT THE CONSTRUCTION IS IN COMPLIANCE WITH THE FDOT MINIMUM STANDARDS. IT IS THE RESPONSIBILITY OF THE DEVELOPER TO ENSURE THAT COPIES OF ALL TEST REPORTS ARE PROVIDED TO THE CITY'S DESIGNATED SITE INSPECTOR PRIOR TO THE PROJECT FINAL INSPECTION IN ORDER TO ALLOW PROJECT ACCEPTANCE BY THE CITY.
5. THE LIMITS OF STABILIZED SUBGRADE SHALL EXTEND TO A DEPTH OF 12" BELOW THE BOTTOM OF THE BASE AND OUTWARD TO 12" BEYOND THE CURB.
6. THE STABILIZING MATERIAL, IF REQUIRED, SHOULD BE A HIGH BEARING VALUE SOIL, SAND–CLAY, LIMEROCK, RECYCLED CONCRETE, SHELL, OR OTHER MATERIAL AS APPROVED BY THE CITY DESIGNATED SITE INSPECTOR AND A LICENSED SOILS ENGINEER.
7. ROADWAY SUBGRADES SHALL BE STABILIZED TO NO LESS THAN LBR 40 TO A 12" DEPTH AND COMPACTED TO NO LESS THAN 98% DENSITY BASED ON MODIFIED PROCTOR MAXIMUM DRY TEST PER AASHTO T–180. TESTS FOR SUBGRADE BEARING CAPACITY AND COMPACTION SHALL BE DONE AT A MINIMUM OF EVERY 300 FEET AND STAGGERED TO THE LEFT, RIGHT, AND AT CENTER LINE OF THE ROADWAY.
8. SITE PLAN SUBGRADES SHALL BE STABILIZED TO NO LESS THAN LBR 40 TO A 12" DEPTH AND COMPACTED TO NO LESS THAN 98% DENSITY BASED ON MODIFIED PROCTOR MAXIMUM DRY TEST PER AASHTO T–180. TESTS FOR SUBGRADE BEARING CAPACITY AND COMPACTION SHALL BE DONE FOR EVERY 600 SQUARE FEET OF STABILIZED AREA, OR PORTIONS THEREOF.
9. BASES FOR ALL STREETS SHALL HAVE A MINIMUM 6" DEPTH. FLOWABLE FILL (FDOT SPECIFICATIONS SECTION 121) BASES SHALL HAVE A MINIMUM STRENGTH OF 350 POUNDS PER SQUARE INCH AT 7 DAYS COMPACTED TO 98% DENSITY PER AASHTO T–180 MODIFIED PROCTOR TEST IN CONFORMANCE WITH SECTION 270 OF STANDARD FDOT SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION (LATEST EDITION). RECYCLED CONCRETE OR LIMEROCK BASES SHALL BE COMPACTED TO 98% MAXIMUM DENSITY BASED ON AASHTO T–180 MODIFIED PROCTOR TEST.

STANDARD CONSTRUCTION DETAIL
ROADWAY AND PARKING AREA DESIGN AND CONSTRUCTION NOTES

FILE NAME: R1.DWG
DETAIL REF: R-1
REV. 12/18

10. FLOWABLE FILL AND RECYCLED CONCRETE MIX DESIGNS SHALL BE SUBMITTED BY A LICENSED SOILS ENGINEER TO THE CITY'S ENGINEERING DEPARTMENT PRIOR TO THE START OF SUBGRADE PREPARATION. ALL MIX DESIGNS SHALL BE SUBJECT TO THE APPROVAL OF THE CITY.
11. CONCRETE DELIVERY TICKETS SHALL BE PROVIDED TO THE CITY'S DESIGNATED SITE INSPECTOR AT THE TIME OF PLACEMENT. IF THE INSPECTOR IS NOT ON SITE THROUGHOUT THE ENTIRE INSTALLATION, ACCUMULATED DELIVERY TICKETS CAN BE PROVIDED TO THE INSPECTOR BY THE CONTRACTOR ON THE FOLLOWING DAY.
12. TESTING OF THE IN–PLACE BASE SHALL BE DONE AT INTERVALS EQUIVALENT TO SUBGRADE TESTING AND SHALL CONSIST OF, AT A MINIMUM, ONE MOISTURE CONTENT AND ONE COMPACTION TEST.
13. PORTLAND CEMENT CONCRETE, LIMEROCK, RECYCLED CONCRETE, OR FULL DEPTH ASPHALT PAVEMENT MAY USED IN PLACE OF FLOWABLE FILL BASE. ALL ROADWAY DESIGNS SHALL BE SUBJECT TO APPROVAL BY THE CITY.
14. BASE COURSES SHALL HAVE LIQUID ASPHALT PRIME COAT APPLIED AT THE APPROPRIATE RATE SPECIFIED IN FDOT STANDARD SPECIFICATION 300.7 (LATEST EDITION) IF ASPHALT WILL NOT BE INSTALLED WITHIN 24 HOURS OR IF BASE COURSE IS OPEN TO ANY TRAFFIC.
15. FLOWABLE FILL BASE MATERIAL CONSTRUCTION SHALL BE CONTINUOUSLY SUPERVISED BY A SOILS TESTING LABORATORY AT THE DEVELOPER'S EXPENSE. THE TESTING LABORATORY SHALL PROVIDE AN ON–SITE TECHNICIAN EXPERIENCED IN SOIL CEMENT BLENDING.
16. FLOWABLE FILL BASE COURSES SHALL BE ALLOWED TO CURE A MINIMUM OF SEVEN (7) DAYS UNDER NO TRAFFIC PRIOR TO PLACING ANY ASPHALT SURFACE. TEST REPORTS ARE REQUIRED TO BE DELIVERED TO THE CITY'S DESIGNATED SITE INSPECTOR PRIOR TO TRAFFIC USAGE.
17. RECYCLED CONCRETE CAN BE USED AS A BASE MATERIAL PROVIDED THE MATERIAL IS A MINIMUM OF 60% CARBONATE OF CALCIUM AND MAGNESIUM. THE MATERIAL SHALL BE LIMITED TO MAXIMUM 3% OF WATER SENSITIVE CLAY MATERIAL. LIQUID LIMIT SHALL NOT EXCEED 35 AND BE NON–PLASTIC AND THE PLASTICITY INDEX SHALL NOT EXCEED 10. THE MATERIAL SHALL NOT CONTAIN ORGANIC MATERIAL, CHERTY OR OTHER EXTREMELY HARD PIECES, LUMPS, BALLS OR POCKETS OF SAND SIZE MATERIAL OF A QUANTITY AS TO BE DETRIMENTAL TO THE PROPER BONDING, FINISHING OR STRENGTH OF THE RECYCLED CONCRETE BASE. FOR BASE APPLICATIONS, AT LEAST 97% (BY WEIGHT) OF THE MATERIAL SHALL PASS A 1" SIEVE AND FOR SUBBASE APPLICATIONS, AT LEAST 97% (BY WEIGHT) OF THE MATERIAL SHALL PASS A 1–1/2" SIEVE. FOR BOTH APPLICATIONS, THE MATERIAL SHALL BE WELL GRADED DOWN TO JUST ABOVE HAVE A MINIMUM 130 LBR VALUE. COARSE AGGREGATE USED IN THE RECYCLED CONCRETE SHALL HAVE A MAXIMUM LOSS OF 45% PER LOS ANGELES ABRASION TEST. ALL MATERIALS SHALL BE WELL GRADED IN ACCORDANCE WITH REQUIREMENTS SET FORTH IN SECTION 204, FDOT STANDARD SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION (LATEST EDITION).
18. RECYCLED CONCRETE OR LIMEROCK FOR BASE OR SUBGRADE APPLICATIONS SHALL BE ALLOWED ON CITY ROADWAYS ONLY WHERE THE LOWEST ELEVATION OF THE ROADWAY SUBGRADE IS A MINIMUM OF 6" ABOVE THE SEASONAL HIGH GROUNDWATER TABLE AS CERTIFIED BY A FLORIDA LICENSED PROFESSIONAL SOILS ENGINEER AND SUBSEQUENTLY APPROVED BY THE CITY. IN AREAS NOT MEETING THESE STANDARDS, A FLOWABLE FILL BASE OR FULL DEPTH ASPHALTIC BASE WILL BE REQUIRED. ALL CRUSHING OF RECYCLED CONCRETE SHALL BE DONE PRIOR TO THE MATERIAL BEING PLACED UPON THE SITE. TESTING OF SOIL CEMENT BASE SHALL HAVE THE SAME REQUIREMENTS AND BE PERFORMED AT THE SAME LOCATION AND INTERVALS AS REQUIRED FOR LIMEROCK.

STANDARD CONSTRUCTION DETAIL
ROADWAY AND PARKING AREA DESIGN AND CONSTRUCTION NOTES (CONTINUED)

FILE NAME: R1.DWG
DETAIL REF: R-1.1
REV. 12/18

19. DESIGN MIXES AND PRODUCT GRADATION INFORMATION FOR ALL MATERIALS TO BE INSTALLED AS PART OF THE LAND DEVELOPMENT CODE REQUIRED IMPROVEMENTS SHALL BE SUBMITTED TO THE CITY'S ENGINEER FOR ACCEPTANCE BY THE CITY. THE INFORMATION SHALL BE SUBMITTED NO LESS THAN THREE (3) WORKING DAYS PRIOR TO ANY CONSTRUCTION. SUBMITTALS SHALL INCLUDE, BUT NOT BE LIMITED TO, INFORMATION TO EVALUATE THE MATERIALS PROPOSED FOR INSTALLATION AS SUBGRADE, BASE, AND PAVEMENT FOR ALL ROADWAY AND PARKING AREA SURFACES.
20. ASPHALT BINDER FOR WEARING COURSE HOT MIX AGGREGATES MAY BE VIRGIN MATERIAL OR UP TO 20% RECLAIMED ASPHALT PAVEMENT (RAP) IN ACCORDANCE WITH FDOT SPECIFICATIONS 334 (LATEST EDITION).
21. PRIOR TO PLACEMENT, FDOT CERTIFIED ASPHALT PLANTS MUST CERTIFY TO THE CITY'S PROJECT INSPECTOR THAT THE ASPHALT DELIVERED TO THE SITE IS IN ACCORDANCE WITH THE APPROVED PLANS AND SPECIFICATIONS.
22. EXTRACTION AND GRADATION TESTS ON ASPHALT MIXES SHALL BE PROVIDED TO THE CITY'S DESIGNATED SITE INSPECTOR FOR EVERY 2500 SQUARE YARDS OF ASPHALT, OR PART THEREOF, TO ENSURE THAT DESIGN MIXES MEET THE CITY STANDARD SPECIFICATIONS.
23. FIELD TESTING OF THE ASPHALT PAVEMENT SHALL BE DONE AT INTERVALS EQUIVALENT TO SUBGRADE TESTING AND SHALL CONSIST OF, AS A MINIMUM, A COMPACTION TEST. ASPHALT PAVEMENT SHALL BE COMPACTED TO 98% DENSITY PER FM 1–T238 (METHOD B), NUCLEAR DENSITY TEST, "BACKSCATTER METHOD" AND/OR MINIMUM 90% MAXIMUM VOIDLESS SPECIFIC GRAVITY.
24. IN ADDITION TO THE FIELD DENSITY TESTS NOTED, THE CITY RESERVES THE RIGHT TO REQUIRE CORE SAMPLES OF PAVEMENT SECTIONS EXTRACTED AND TESTED BY A CERTIFIED SOILS ENGINEERING LABORATORY AT THE DEVELOPER'S EXPENSE. THE CITY'S DESIGNATED SITE INSPECTOR SHALL DESIGNATE THE LOCATIONS OF THE TEST CORE LOCATIONS.
25. THE ROADWAY CROWN SHALL HAVE A STANDARD ONE QUARTER INCH (1/4") PER FOOT SLOPE.
26. ALL ROADWAYS WITH CURB AND GUTTER SECTIONS SHALL HAVE AS A STANDARD A MINIMUM LONGITUDINAL SLOPE OF 0.30% THE ROADWAY CENTERLINE SHALL BE CLEARLY MARKED ON THE DESIGN PLANS. AT A MINIMUM, DESIGN ROADWAY CENTERLINE ELEVATIONS SHALL BE NOTED AT ALL GRADE CHANGES AND AT 100' INTERVALS ALONG THE ROADWAY PROFILE ON BOTH THE DESIGN PLANS AND AS–BUILT DRAWINGS.
27. THE FINISHED PAVEMENT EDGE SHALL BE ONE QUARTER INCH (1/4") ABOVE THE ADJACENT CONCRETE GUTTER FOR GUTTERS COLLECTING AND CONVEYING STORMWATER.
28. CONCRETE CURBS SHALL BE PROVIDED ON BOTH SIDES OF ALL STREETS AND ALL CONCRETE CURBS SHALL BE CONSTRUCTED WITH MINIMUM 3,000 PSI CONCRETE AT 28 DAYS.
29. CONCRETE CURBING, SIDEWALKS, PAVEMENT AND SIMILAR CONCRETE AREAS SHALL BE SAW CUT WITHIN 4 TO 18 HOURS OF PLACEMENT. SAW CUTS SHALL BE 1/4" IN WIDTH TO A DEPTH OF 1/4 OF THE TOTAL DEPTH OF CONCRETE OR 1–1/2", WHICHEVER IS LESS. SAW CUTS SHALL BE LOCATED AT INTERVALS OF TEN FEET (10') WITH EXPANSION JOINTS AT STREET INTERSECTIONS, RADIUS POINTS, STRUCTURES, AND ALONG CURVES AT SIXTY FEET (60') INTERVALS. ALL EXPANSION JOINT MATERIAL IS REQUIRED TO BE INSTALLED THROUGH THE ENTIRE DEPTH OF THE CONCRETE CURB. FOR LINEAL SECTIONS OF CURBS, EXPANSION JOINTS SHALL BE LOCATED AT A MAXIMUM SPACING OF FIVE–HUNDRED FEET (500') AND SHALL BE 1/2" IN WIDTH.

STANDARD CONSTRUCTION DETAIL
ROADWAY AND PARKING AREA DESIGN AND CONSTRUCTION NOTES (CONTINUED)

FILE NAME: R1.DWG
DETAIL REF: R-1.2
REV. 12/18

29. THE FOLLOWING SYMBOLS SHALL BE CUT IN THE CURB TO MARK LOCATION OF SERVICES:

| SYMBOL | SERVICE |
|---|---|
| "V" | SEWER |
| "R" | RECLAIMED WATER |
| "A" | POTABLE WATER |
| "X" | VALVE – POTABLE WATER |

30. THREE (3) CONCRETE CYLINDERS SHALL BE TAKEN FOR EVERY SEVENTY–FIVE (75) CUBIC YARDS OF CONCRETE OR LESS PLACED. 1 CYLINDER WILL BE TESTED IN 14 DAYS, 1 IN 28 DAYS AND 1 SHALL BE RETAINED FOR 1 YEAR. RESULTS SHALL BE PROVIDED TO THE CITY'S DESIGNATED SITE INSPECTOR AS THEY BECOME AVAILABLE.
31. A CONCRETE SLUMP TEST SHALL BE REQUIRED WITHIN THE FIRST THIRTY (30) CUBIC YARDS OF CONCRETE. THEREAFTER, SLUMP TESTS SHALL BE REQUIRED FOR EVERY THIRTY (30) CUBIC YARDS OF CONCRETE, OR FRACTION THEREOF, WITH COPIES OF THE RESULTS PROVIDED TO THE CITY'S DESIGNATED SITE INSPECTOR. THE SLUMP TEST SHALL MEET THE REQUIRED MIX DESIGN ON EACH LOAD DELIVERED.
32. THE DEVELOPER SHALL PROVIDE ALL REQUIRED PAVEMENT MARKINGS ON ALL ROADWAYS PER CITY, COUNTY, AND STATE REQUIREMENTS. 6" WIDE FOG LINE SHALL BE INSTALLED WHERE NO CURB IS PRESENT. CENTERLINE STRIPES SHALL BE PROVIDED ON EXTENSIONS OF CITY COLLECTOR OR ARTERIAL ROADS, COUNTY ROADS, STATE HIGHWAYS AND ALONG LOCAL STREETS IN THE VICINITY OF THEIR INTERSECTION WITH THE ABOVE MENTIONED ROADWAYS.
33. A FDOT APPROVED 30" STOP SIGN AND A 24" WIDE WHITE THERMOPLASTIC STOP BAR ARE REQUIRED AT ALL ROADWAY INTERSECTIONS.
34. ALL TRAFFIC CONTROL DEVICES PLACED AT INTERSECTIONS, PRIVATE STREETS, PUBLIC STREETS, COUNTY ROADS AND STATE HIGHWAYS WITHIN THE CITY LIMITS SHALL BE INSTALLED ACCORDING TO THE MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES, LATEST EDITION. THE MAINTENANCE OF TRAFFIC (MOT) INSTALLATION AND SUBSEQUENT OPERATION SHALL BE OVERSEEN BY A CONTRACTOR WHOSE JOBSITE PERSONNEL HOLD A CURRENT FDOT CERTIFICATION IN TEMPORARY TRAFFIC CONTROL COMMENSURATE WITH THEIR LEVEL OF RESPONSIBILITY (EX. FLAGGER, INTERMEDIATE, ADVANCED).
35. THE DEVELOPER IS RESPONSIBLE FOR PAYING FEES FOR TRAFFIC CONTROL DEVICES. STREET SIGNS AND STOP SIGNS SHALL BE PLACED AT ALL INTERSECTIONS, INCLUDING, BUT NOT LIMITED TO, TO PRIVATE STREETS, PUBLIC STREETS, COUNTY ROADS AND STATE HIGHWAYS WITHIN THE CITY LIMITS.
36. THE DEVELOPER IS RESPONSIBLE FOR PAYING FEES FOR ALL STREET LIGHTS TO FPL PRIOR TO ACCEPTANCE OF THE PROJECT BY THE CITY.
37. FOUR FOOT (4') WIDE SIDEWALKS SHALL BE PROVIDED ON BOTH SIDES OF ALL RESIDENTIAL STREETS.
38. BIKE PATHS SHALL BE CONSTRUCTED EIGHT FEET (8') IN WIDTH ALONG ARTERIAL AND OTHER SELECTED HIGHWAYS AS DIRECTED BY THE CITY.

STANDARD CONSTRUCTION DETAIL
ROADWAY AND PARKING AREA DESIGN AND CONSTRUCTION NOTES (CONTINUED)

FILE NAME: R1.DWG
DETAIL REF: R-1.3
REV. 12/18

39. STANDARD TURNING RADII FOR INTERSECTIONS:

| | |
|---|---|
| RESIDENTIAL STREETS INTERSECTING STATE OR COUNTY ROADWAYS OR MAJOR THOROUGHFARES WITHIN THE CITY | 35–50 FEET |
| CITY STREETS INTERSECTING ENTRANCES TO COMMERCIAL SITES | 35 FEET |
| INTERSECTIONS INTERIOR IN SUBDIVISIONS | 35 FEET |

NOTE: SHOULD VOLUSIA COUNTY OR THE FLORIDA DEPARTMENT OF TRANSPORTATION (FDOT) DETERMINE THAT LARGER RADII ARE WARRANTED WITHIN THEIR RIGHT–OF–WAY, THE LARGER RADII SHALL APPLY.

40. STANDARD TURNING RADII AND WIDTHS OF ACCESS DRIVES FOR SITE PLANS (NOT SUBDIVISONS) SHALL BE IN ACCORDANCE WITH LDC, CH. 12, SEC. 3(F).
41. CONSTRUCTION METHODS AND DESIGN FOR CONCRETE PAVEMENT SHALL CONFORM TO FDOT STANDARD SPECIFICATION FOR ROAD AND BRIDGE CONSTRUCTION, LATEST EDITION.
42. ALL CONTRACTORS THAT ARE PERFORMING THE CONSTRUCTION OF LAND DEVELOPMENT CODE REQUIRED IMPROVEMENTS (INCLUDING WATER MAINS, SANITARY SEWER MAINS, RECLAIMED WATER MAINS, STORM WATER PIPES AND INLETS, ROADWAYS, AND PARKING FACILITIES) SHALL BE CERTIFIED WITH THE STATE OF FLORIDA CONSTRUCTION INDUSTRY LICENSING BOARD FOR THE TYPE OF WORK THAT THEY PERFORM.
43. ALL CONTRACTORS THAT ARE PERFORMING THE CONSTRUCTION WORK OF LAND DEVELOPMENT CODE REQUIRED IMPROVEMENTS SHALL BE LICENSED BY THE STATE OF FLORIDA CONSTRUCTION INDUSTRY LICENSING BOARD AND REGISTERED WITH VOLUSIA COUNTY. THE LICENSE AND REGISTRATION SHALL PERTAIN TO THE TYPE OF WORK BEING PERFORMED.
44. EXCEPT AS PROVIDED IN THE LAND DEVELOPMENT CODE, ALL ELECTRIC, TELEPHONE, TELEVISION, LINES AND SIMILAR UTILITIES ARE REQUIRED TO BE INSTALLED UNDERGROUND AT THE EXPENSE OF THE OWNER, DEVELOPER, AND BUILDER.
45. MINIMUM UTILITY DEPTHS:

| | |
|---|---|
| POTABLE WATER, SANITARY SEWER AND RECLAIMED WATER MAINS | 36 INCHES |
| HIGH VOLTAGE SUCH AS POWER FEEDER, SERVICE, AND DROPS | 30 INCHES |
| LOW VOLTAGE SUCH AS PHONE AND CABLE TV FOR FEEDER AND SERVICE | 18 INCHES |
| LOW VOLTAGE UTILITIES SUCH AS PHONE AND CABLE TV FOR DROPS | 12 INCHES |

NOTE: IN NO INSTANCE SHALL THE DEPTH OF COVER BE LESS THAN 36" FROM FINISHED GRADE TO THE TOP OF PIPE FOR POTABLE WATER MAINS, SANITARY SEWER MAINS AND RECLAIMED WATER MAINS. HOWEVER, IN THE EVENT THAT THIS CONDITION CANNOT BE MET DUE TO UNANTICIPATED CONFLICTS DURING THE CONSTRUCTION PROCESS, DUCTILE IRON PRESSURE CLASS 350 OR CONCRETE ENCASEMENT MAY BE USED AS APPROVED BY THE CITY PUBLIC UTILITIES DEPARTMENT.

46. LANDSCAPE PLANS SHALL CLEARLY DEPICT THE DESIGN LOCATION OF PLANTINGS RELATIVE TO THE LOCATION OF UNDERGROUND AND OVERHEAD PUBLIC UTILITIES AND STORMWATER INFRASTRUCTURE IN ORDER TO EVALUATE POTENTIAL CONFLICTS.

STANDARD CONSTRUCTION DETAIL
ROADWAY AND PARKING AREA DESIGN AND CONSTRUCTION NOTES (CONTINUED)

FILE NAME: R1.DWG
DETAIL REF: R-1.4
REV. 12/18

NOTES:

1. FDOT CLEAR ZONE MAY BE REDUCED ON CAPITAL RECONSTRUCTION AND MAINTENANCE PROJECTS UPON APPROVAL BY THE CITY'S PROFESSIONAL ENGINEER.
2. TREES IN EXCESS OF 12" CALIPER AT MATURITY AND MULTI–TRUNKED PALMS SHALL BE SET BACK TO TWICE THE MINIMUM CLEAR ZONE (2 X *).
3. WHERE PAVEMENT WIDENING IN ACCORDANCE WITH FDOT STANDARDS IS NOT PROVIDED IN HORIZONTAL CURVES, ADDITIONAL CLEAR ZONE SHALL BE PROVIDED EQUAL TO THE REQUIRED PAVEMENT WIDENING.
4. CLEAR ZONES ON CURBED ROADS SHALL BE MEASURED FROM THE FACE OF CURB OR FROM THE EDGE OF THE THROUGH LANE ON RURAL ROADS. CURBED ROADS REFER TO HIGH BACK CURBS ONLY.
5. SHRUBS ADJACENT TO SIDEWALKS AND WITHIN INTERSECTION SIGHT TRIANGLES CANNOT EXCEED 24" ABOVE THE LOWEST ADJACENT ROADWAY GRADE. ALL OTHER SHRUBS MUST BE LESS THAN OR EQUAL TO 30" IN HEIGHT.
6. INSTALLATION OF LANDSCAPING IN PUBLIC RIGHTS–OF–WAY REQUIRES EXECUTION OF A "LICENSE AGREEMENT" BETWEEN THE DEVELOPER AND THE CITY. FOR INSTANCES WHERE THE STREETS AND PRIVATE AND PUBLIC UTILITY EASEMENTS ARE PROVIDED, THE DEVELOPER MAY BE REQUIRED TO OBTAIN OBTAIN A RELEASE FROM THE FRANCHISE UTILITIES IN ORDER TO INSTALL THE LANDSCAPE IMPROVEMENTS.
7. LANDSCAPING PLANS SHALL CLEARLY DEPICT THE DESIGN LOCATION OF PLANTINGS RELATIVE TO THE LOCATION OF UNDERGROUND AND OVERHEAD PUBLIC UTILITIES AND STORMWATER INFRASTRUCTURE IN IN ORDER TO EVALUATE POTENTIAL CONFLICTS.
8. SHRUBS, UNDERSTORY TREES AND PALMS SHALL BE ALLOWED IN THE RIGHT–OF–WAY WITH EXISTING AND PROPOSED UTILITIES. SHADE TREES, ESPECIALLY THOSE WITH AGGRESSIVE ROOT SYSTEMS, WILL REQUIRE SPECIFIC CITY APPROVAL.
9. SHADE TREES MUST NOT BE PLANTED UNDER OR DIRECTLY ADJACENT TO OVERHEAD UTILITIES THAT WOULD REQUIRE EXCESSIVE PRUNING TO AVOID THE UTILITY LINES.
10. TREES WITH AGGRESSIVE ROOT SYSTEMS SHALL REQUIRE SOME FORM OF ROOT GUIDING SYSTEM TO TO PREVENT THE UPHEAVAL OF ADJACENT ROADWAY PAVEMENT AND/OR SIDEWALKS.

STANDARD CONSTRUCTION DETAIL
ROADWAY LANDSCAPING LAYOUT AND NOTES (CONTINUED)

FILE NAME: R2.DWG
DETAIL REF: R-2.1
REV. 12/18

ALL MATERIALS AND INSTALLATION METHODS USED FOR LAND DEVELOPMENT CODE REQUIRED IMPROVEMENTS FOR SUBDIVISIONS AND SITE PLANS SHALL BE IN CONFORMANCE WITH THE CITY, FDOT STANDARD SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION (LATEST EDITION) AND THE FDOT ROADWAY AND TRAFFIC DESIGN STANDARDS (LATEST EDITION).

1. ALL STORM SEWERS AND CULVERTS LOCATED IN ROADWAY RIGHTS–OF–WAY AND ROADWAY EASEMENTS SHALL BE:
   A. CLASS III (MIN.) REINFORCED CONCRETE PIPE (RCP), IN ACCORDANCE WITH ASTM C76, C655, C506 AND C507. ALL RCP JOINTS SHALL BE ENTIRELY WRAPPED WITH FILTER FABRIC WITH A MINIMUM WIDTH OF 24" AND A MINIMUM OF 24" OVERLAP SECURED WITH PLASTIC OR STAINLESS BANDS. GASKETS ALONE ARE NOT PERMITTED AS AN EQUIVALENT SUBSTITUTE FOR MEETING THIS REQUIREMENT. ALL JOINTS SHALL BE RUBBER GASKETED FOR BOTH ROUND AND ELLIPTICAL PIPE.
   B. CORRUGATED, SMOOTH INTERIOR WALL, HIGH DENSITY POLYETHYLENE (HDPE), UP TO 60" DIAMETER, IN ACCORDANCE WITH ASTM F2306. ALL JOINTS WILL BE IN ACCORDANCE WITH MANUFACTURER'S SPECIFICATIONS.
   C. CORRUGATED, SMOOTH INTERIOR WALL, POLYPROPYLENE (PP), UP TO 60" DIAMETER, IN ACCORDANCE WITH ASTM F2881 ALL JOINTS WILL BE IN ACCORDANCE WITH MANUFACTURER'S SPECIFICATIONS.
   D. CORRUGATED, SMOOTH INTERIOR WALL, PVC, UP TO 36" DIAMETER, IN ACCORDANCE WITH ASTM F949 ALL JOINTS WILL BE IN ACCORDANCE WITH MANUFACTURER'S SPECIFICATIONS.
2. STORM SEWERS AND CULVERTS LOCATED OUTSIDE OF ROADWAY RIGHTS–OF–WAY AND ROADWAY EASEMENTS MAY BE MADE OF ALTERNATE MATERIALS, INCLUDING SDR26 TO SDR35 PVC IN ACCORDANCE WITH ASTM D–3034.
3. DEPTH OF COVER MEASURED TO THE TOP OF PIPE (NOT INCLUDING THE BELL JOINT) SHALL BE A MINIMUM OF 12". DEVIATION FROM THIS REQUIREMENT MAY BE ALLOWED BY INCREASING THE PIPE'S STRUCTURAL CAPACITY. THIS DEVIATION MUST BE SPECIFIED ON THE PLANS APPROVED FOR CONSTRUCTION AND SUBSEQUENTLY REFLECTED ON THE SHOP DRAWINGS AND AS–BUILT PLANS.
4. ALL STORM DRAINAGE PIPES LOCATED IN ROADWAY RIGHTS–OF–WAY AND ROADWAY EASEMENTS SHALL BE A MINIMUM OF 15" DIAMETER OR EQUIVALENT AND BE DESIGNED FOR A MINIMUM OF A 25 YEAR – 24 HOUR STORM. STORM DRAINAGE PIPES SMALLER THAN 15" ARE PERMITTED ON PRIVATE SITE PLANS PROVIDED MAINTENANCE IS PERFORMED BY THE OWNER.
5. STORM INLETS, MANHOLES, AND CATCH BASINS SHALL BE EITHER POURED IN PLACE OR PRECAST REINFORCED CONCRETE. STRUCTURES SHALL BE REQUIRED AT EACH CHANGE OF PIPE SIZE OR CHANGE IN PIPE DIRECTION. ALL STRUCTURES SHALL BE IN COMPLIANCE WITH FDOT DRAINAGE INDEX 200. CAST IN PLACE STRUCTURES SHALL HAVE 8" THICK WALLS AND PRECAST STRUCTURES SHALL HAVE 6" THICK WALLS. THESE DIMENSIONS MUST BE REFLECTED ON BOTH SHOP AND AS–BUILT DRAWINGS.
6. CULVERTS SHALL BE SLOPED TO MAINTAIN A MINIMUM SELF–CLEANING V

10. THE MAXIMUM PERMISSIBLE SLOPE OF ANY NEW POND BANKS IS 4:1 (HORIZONTAL:VERTICAL). THIS LIMIT SHALL BE APPLIED TO ALL AREAS EXCEPT BELOW THE WATER TABLE WHERE SHARPER SLOPES ARE PERMISSIBLE.
11. PIPED STORMWATER SYSTEMS SHALL HAVE A MINIMUM DRAINAGE MAINTENANCE EASEMENT WIDTH OF 20', CENTERED OVER PIPE/STRUCTURE, AND SHALL BE INCREASED DEPENDING UPON CONDITIONS, SUCH AS OSHA UNSHIELDED TRENCH COMPLIANCE.
12. NORMAL ROADSIDE SWALES ARE PERMITTED TO BE CONSTRUCTED TO A MAXIMUM DEPTH OF 18" BELOW THE OUTSIDE EDGE OF PAVEMENT OR CONCRETE CURB.
13. CONCRETE EROSION CONTROL MUST BE PROVIDED WHERE SWALES OR CULVERTS INTERCEPT DRAINAGE DITCHES.
14. IN GENERAL, ALL RETENTION / DETENTION SITES MUST BE CONSTRUCTED ON ALL PROJECTS PRIOR TO ANY ROAD, PARKING LOT, OR BUILDING CONSTRUCTION COMMENCING OR AS CURRENT PERMIT CONDITIONS DICTATE. SEWER AND WATER MAINS MAY BE INSTALLED PRIOR TO RETENTION/DETENTION SITE ONSTRUCTION IF DEWATERING IS NOT REQUIRED.
15. POND INFLOW AND OUTLET STRUCTURES SHALL GENERALLY BE CONSTRUCTED WITH REINFORCED CONCRETE.
16. SKIMMERS FOR WET PONDS SHALL BE CONSTRUCTED SUCH THAT THE BOTTOM EXTENDS 6" BELOW THE NORMAL WATER LEVEL AND 6" ABOVE THE OVERFLOW. FOR DRY PONDS, THE SKIMMER BOTTOM SHALL BE SET 6" BELOW THE LOWEST OVERFLOW ELEVATION AND 6" ABOVE THE HIGHEST POINT OF OVERFLOW. ALL SKIMMERS SHALL BE CONSTRUCTED OF MINIMUM 1/4" THICK ALUMINUM OR FIBERGLASS AND ADEQUATELY SUPPORTED TO PREVENT DEFLECTION.
17. DEVELOPMENT PLANS FOR ALL STORMWATER MANAGEMENT SYSTEMS SHALL CONTAIN POP-OFF DATA (OVERFLOW), BOTTOM ELEVATION, NORMAL WATER LEVELS, MEAN ANNUAL SEASONAL HIGH WATER TABLE ELEVATION, TREATMENT VOLUME AND CORRESPONDING ELEVATION, 100 YEAR HIGH WATER LEVELS, AND THE DESIGN TAILWATER ELEVATION (IF APPLICABLE).
18. WHEN CULVERTS ARE INSTALLED TO MAINTAIN THE FLOW OF EXISTING DRAINAGE WAYS WHERE NEWLY PROPOSED ROADS WOULD OTHERWISE SEVER THE DRAINAGE WAY THEN CULVERTS CROSSING RIGHTS-OF-WAY SHALL EXTEND FROM RIGHT-OF-WAY LINE TO RIGHT-OF-WAY LINE UNDER THE ROADWAY. CULVERTS SHALL BE DESIGNED TO ACCOMMODATE THE FLOW FROM THE 100 YEAR-24 HOUR STORM EVENT WITHOUT FLOODING ADJACENT PROPERTY OR SURCHARGING THE SAID ROADWAY.
19. THE CITY MAY REQUEST THAT THE DEVELOPER SUBMIT A REPORT BY A QUALIFIED HYDROLOGIST ON THE IMPACT THE POND WILL HAVE ON NEIGHBORING WATER TABLE ELEVATIONS BOTH DURING CONSTRUCTION AND AFTER POND COMPLETION. THE CITY MAY REQUIRE GROUNDWATER MONITORING DURING THE POND EXCAVATION.
20. SOIL EROSION CONTROL MEASURES, SATISFACTORY TO THE ST. JOHNS RIVER WATER MANAGEMENT DISTRICT AND THE CITY, SHALL BE EMPLOYED DURING CONSTRUCTION.
21. A 10' MAINTENANCE EASEMENTS/RIGHTS-OF-WAY SHALL BE PROVIDED AROUND THE ENTIRE PERIMETER OF ALL PONDS AND ASSOCIATED OUTFALLS DISCHARGING INTO AND OUT OF LAKES. APPLICABLE CROSS SECTIONS SHALL BE INCLUDED ON FINAL DEVELOPMENT PLANS.
22. THE CONTRACTOR SHALL BE RESPONSIBLE TO OBTAIN ANY AND ALL DEWATERING PERMITS THAT MAY BE REQUIRED.
23. IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO REVIEW AND MAINTAIN A COPY OF THE SJRWMD AND NPDES PERMITS AT THE CONSTRUCTION SITE AND ABIDE BY ALL CONDITIONS OF THE PERMIT.
24. LANDSCAPE PLANS SHALL CLEARLY DEPICT THE DESIGN LOCATION OF PLANTINGS RELATIVE TO THE LOCATION OF PUBLIC UTILITIES AND STORMWATER INFRASTRUCTURE IN ORDER TO EVALUATE POTENTIAL CONFLICTS.

**CANALS AND WATERWAYS**

1. CANALS AND WATERWAYS SHALL BE AVOIDED EXCEPT WHEN APPROVED AND DEEMED BY THE CITY TO BE UNAVOIDABLE OR NECESSARY.
2. IN THE EVENT OF SUCH APPROVAL, CANALS OR WATERWAYS SHALL BE A MINIMUM OF 40' IN WIDTH PLUS MAINTENANCE AREA. THE MAINTENANCE AREA WIDTH OR EASEMENT SHALL BE A MINIMUM OF 20' ON ONE BANK AND 10' ON THE OPPOSITE BANK MEASURED FROM THE TOP OF BANK AND LOCATED ALONG THE ENTIRE LENGTH OF THE CANAL. THE MAINTENANCE OR EASEMENT WIDTH SHALL BE ESTABLISHED BY THE CITY BASED ON EXISTING AND FUTURE CONDITIONS AS WELL AS THE TYPES OF MAINTENANCE EQUIPMENT AVAILABLE.
3. CANALS OR WATERWAYS SHALL BE A MINIMUM OF 40' IN WIDTH PLUS REQUIRED MAINTENANCE AREAS.
4. CANALS SHALL HAVE A MINIMUM BOTTOM WIDTH OF 3' AND MAXIMUM PERMISSIBLE SIDE SLOPE OF 4:1 (HORIZONTAL:VERTICAL). SHARPER SLOPES MAY BE CONSIDERED BELOW THE NORMAL WATER LEVEL PROVIDING THAT ADDITIONAL BANK STABILIZATION MEASURES ARE INSTALLED BASED UPON THE RECOMMENDATIONS OF A CERTIFIED GEOTECHNICAL ENGINEER. CANAL BANKS SHALL BE SODDED.
5. WATERWAYS AFFECTED BY TIDAL ACTION SHALL HAVE A MINIMUM DEPTH OF 9' BELOW SEA LEVEL REFERENCING THE NORTH AMERICAN VERTICAL DATUM 1988. THESE WATERWAYS SHALL BE SEPARATED FROM FRESH WATER BY SALINITY DAMS AND SPILLWAY CONTROL STRUCTURES AS APPROVED BY THE CITY.

**BRIDGES**

1. BRIDGES SHALL BE CONSTRUCTED WITH BRIDGE CURB ON BOTH SIDES RUNNING ITS COMPLETE LENGTH.
2. STANDARD 48" WIDE SIDEWALKS SHALL BE PROVIDED ON BOTH SIDES SEPARATED FROM THE ROADWAY IN ACCORDANCE WITH THE FLORIDA GREEN BOOK (LATEST EDITION).
3. APPROACH GUARDRAILS OR FENCES SHALL BE PROVIDED WHERE REQUIRED FOR SAFETY BY THE CITY.
4. BRIDGE GEOMETRY, BRIDGE DESIGN, AND LOADING SHALL CONFORM TO THE DESIGN CRITERIA OF THE AMERICAN ASSOCIATION OF STATE HIGHWAY AND TRANSPORTATION OFFICIALS STANDARD SPECIFICATIONS FOR HIGHWAY BRIDGES (LATEST EDITION).
5. PRIOR TO ACTUAL DESIGN OF THE BRIDGE, THE APPLICANT SHALL SUBMIT DESIGN LOAD CRITERIA TO THE CITY FOR APPROVAL.

**STANDARD CONSTRUCTION DETAIL**
**CANALS, WATERWAYS AND BRIDGES DESIGN AND CONSTRUCTION NOTES**

REV. 12/18

FILE NAME: ST2.DWG
DETAIL REF: ST-2

1. WATER DISTRIBUTION SYSTEM SHALL BE DESIGNED TO COMPLY WITH THE CITY'S LATEST FIRE/WATER FLOW CODE. ALL DEDICATED FIRE LINES SHALL BE INDEPENDENT OF ALL OTHER DOMESTIC WATER SERVICES.
2. ALL SINGLE AND DOUBLE RESIDENTIAL WATER SERVICES SHALL BE ENDOT ENDOPURE 1". COMMERCIAL SERVICES SHALL BE 1" OR 2" - NO 1-1/2" SERVICES ARE ALLOWED. POLYETHYLENE TUBING SHALL BE USED, IN ACCORDANCE WITH THE FOLLOWING SPECIFICATIONS:
   A. POLYETHYLENE TUBING SHALL BE CTS 3408 HIGH DENSITY TUBING, BLUE IN COLOR, AND RATED FOR A MINIMUM OF 200 PSI WITH SDR OF 9 (CTS)
   B. THE TUBING SHALL COME WITH A LIFETIME WARRANTY
   C. THE TUBING SHALL HAVE A VIRGIN HIGH DENSITY POLYETHYLENE CENTER FOR WHICH THE MANUFACTURER SHALL FURNISH A CERTIFICATE OF PURITY
   D. THE TUBING SHALL HAVE UV PROTECTION AND SHALL NOT BE AFFECTED BY DIRECT SUNLIGHT. THE TUBING SHALL COMPLY WITH OR EXCEED THE APPLICABLE STANDARDS OF ASTM D1248, D3350, D2239, D2737, NSF 14 AND AWWA C901
3. WATER SERVICES SHALL BE NORMALLY DOUBLE 1" SERVICES LOCATED AT SIDE LOT LINES. AT LOCATIONS WHERE SERVICES NEED TO BE OFFSET, SUCH AS AT FIRE HYDRANTS, FPL TRANSFORMERS, ETC., 1" SINGLE SERVICES SHALL BE SPECIFIED. THESE SERVICES MAY BE OFFSET A MAXIMUM OF 2' FROM SIDE LOT LINES.
4. APPROVED WATER VALVE TYPES ARE THE FOLLOWING:
   - RESILIENT SEATED GATE VALVES EQUAL TO OR LESS THAN 24" DIAMETER, PER AWWA C-515
   - BUTTERFLY VALVES GREATER THAN 24" DIAMETER, PER AWWA C-504
   - TAPPING VALVES WITH MECHANICAL TAPPING SLEEVE
5. WATER VALVES SHALL BE PLACED AT ALL STREET INTERSECTIONS AND AT MAXIMUM SPACINGS OF 1,000'.
6. AT ALL WATER MAIN TEES AND CROSSES, VALVES SHALL BE INSTALLED ON ALL LEGS EXCEPT ONE.
7. WATER MAINS SHALL BE C-900 PVC, BLUE IN COLOR, OR DIP PRESSURE CLASS 350 STANDARD CEMENT LINED UNLESS OTHERWISE APPROVED BY THE CITY. WATER MAINS 10" OR GREATER SHALL BE DIP.
8. PVC FITTINGS 4-INCH THROUGH 36-INCH SHALL BE PVC (OR DIP WITH PROTECTO 401) INJECTION-MOLDED OR FABRICATED AS SPECIFIED, MADE OF MATERIALS MEETING OR EXCEEDING THE REQUIREMENTS OF CELL CLASS 12454-B MATERIAL AS DEFINED IN ASTM D1784. FABRICATED FITTINGS SHALL BE MANUFACTURED WITH PIPE THAT MEETS OR EXCEEDS AWWA C-905 STANDARD, AND SHALL BE FIBERGLASS REINFORCED TO A PRESSURE RATING OF 165 PSI. ALL PVC OR MECHANICAL JOINT FITTINGS MUST COMPLY WITH OR EXCEED ANSI/AWWA C907, UNI-B-14 STANDARDS AS THEY APPLY TO THE APPROPRIATE SIZE RANGE AND METHOD OF MANUFACTURE.
9. ALL HDPE PIPE UTILIZED FOR WATER, FORCE MAIN AND/OR RECLAIMED WATER MAIN EXTENSIONS SHALL BE SDR 11 WITH #10 COPPERHEAD TRACER WIRE UNLESS SPECIFICALLY NOTED OTHERWISE. THE HDPE PIPE SHALL BE SIZED TO MATCH THE EXTERNAL DIAMETER OF THE PVC OR DIP PIPE TO WHICH IT IS ATTACHED.
10. ALL VALVES 2" AND LARGER SHALL BE S RESILIENT SEATED GATE VALVES (CORP STOPS ARE NOT ACCEPTABLE).
11. MEGALUGS, BOLTLESS RESTRAINED JOINTS OR GRIPPER GASKETS SHALL BE USED ON ALL RESTRAINED JOINT INSTALLATIONS. MINIMUM DEPTH OF BURY ON PIPES NOT MEETING REQUIRED COVER REQUIREMENTS SHALL FOLLOW THE MOST RECENT DIPRA THRUST RESTRAINT DESIGN GUIDELINES USING TORQUE WRENCHES PER MANUFACTURERS RECOMMENDATION.
12. WATER MAINS SHALL HAVE A MINIMUM COVER OF 36 INCHES AND A MAXIMUM DEPTH OF 48 INCHES FROM FINAL GRADE. CONFLICT LOCATIONS OR SPECIAL CIRCUMSTANCES NOT MEETING THESE REQUIREMENTS MAY BE APPROVED WHEN IT IS DETERMINED TO BE IN THE BEST INTEREST OF THE CITY.

STANDARD CONSTRUCTION DETAIL
POTABLE WATER DESIGN NOTES

REV. 12/18

FILE NAME: W1.DOC
DETAIL REF: W-1

13. WATER MAINS SHALL BE INSTALLED APPROXIMATELY 4' OFF THE BACK OF CURB OR AS APPROVED BY THE CITY. FOR CONSTRUCTION PURPOSES, THE PLANS SHALL DIMENSION THE PROPOSED LOCATIONS OF ALL WATER MAINS MEASURED FROM THE BACK OF CURB (OR EDGE OF PAVEMENT, IF NO CURB IS USED).
14. 3" METALLIZED PIPE LOCATION TAPE SHALL BE LOCATED BETWEEN 15" AND 24" BELOW FINISHED GRADE OR AS SPECIFIED BY MANUFACTURER FOR ALL PVC LINES. MARKER TAPE SHALL BE USED ON ALL DUCTILE IRON PIPE, AS WELL.
15. LANDSCAPE PLANS SHALL CLEARLY DEPICT THE DESIGN LOCATION OF PLANTINGS RELATIVE TO THE LOCATION OF PUBLIC UTILITIES AND STORMWATER INFRASTRUCTURE IN ORDER TO EVALUATE POTENTIAL CONFLICTS.
16. THE FIRE DEPARTMENT CONNECTION (FDC) FOR BUILDINGS WITH A FIRE PROTECTION SPRINKLER SYSTEM MUST BE WITHIN 50' OF UNOBSTRUCTED PATH TO A FIRE HYDRANT LOCATION APPROVED BY THE FIRE MARSHALL AND/OR PUBLIC UTILITIES ENGINEER.
17. A MINIMUM OF ONE FIRE HYDRANT SHALL BE LOCATED AT EVERY INTERSECTION. OTHER FIRE HYDRANTS SHALL BE LOCATED SO AS TO PRODUCE A MAXIMUM 250' FEET AND/OR MEETING THE LATEST NFPA CODE HOSE LAY REQUIREMENT ALONG THE STREET FOR ALL RESIDENTIAL BUILDINGS. FIRE HYDRANTS MAY NOT BE INSTALLED WITHIN 20' OF ANY ELECTRICAL TRANSFORMER.
18. NEW OR RELOCATED, UNDERGROUND MAINS SHALL BE LAID TO PROVIDE THE FOLLOWING MINIMUM HORIZONTAL SEPARATIONS (OUTSIDE TO OUTSIDE):

| | WATER | STORM GRAVITY | STORM FORCE | RECLAIM | SANITARY GRAVITY | SANITARY FORCE |
|---|---|---|---|---|---|---|
| WATER | | 3' | 3' | 3' | 6', PREFERRED 10' | 6', PREFERRED 10' |
| STORM GRAVITY | 3' | | 3' | 3' | 6', PREFERRED 10' | 6', PREFERRED 10' |
| STORM FORCE | 3' | 3' | | 3' | 6', PREFERRED 10' | 6', PREFERRED 10' |
| RECLAIM | 3' | 3' | 3' | | 6', PREFERRED 10' | 6', PREFERRED 10' |
| SANITARY GRAVITY | 6', PREFERRED 10' | 6', PREFERRED 10' | 6', PREFERRED 10' | 6', PREFERRED 10' | | 6', PREFERRED 10' |
| SANITARY FORCE | 6', PREFERRED 10' | 6', PREFERRED 10' | 6', PREFERRED 10' | 6', PREFERRED 10' | 6', PREFERRED 10' | |

19. A 3' MINIMUM HORIZONTAL SEPARATION BETWEEN THE WATER AND SANITARY GRAVITY MAINS SHALL BE ALLOWED WHEN THE WATER MAIN IS INSTALLED IN A SEPARATE TRENCH OR ON AN UNDISTURBED EARTH SHELF AT LEAST 6" ABOVE THE SANITARY GRAVITY MAIN.

REV. 12/18

FILE NAME: W1.DOC
DETAIL REF: W-1.2

1. THE CITY'S PUBLIC UTILITIES DEPARTMENT (386) 506-5750 SHALL BE GIVEN A MINIMUM OF 2 BUSINESS DAYS ADVANCE NOTICE (NOT INCLUDING HOLIDAYS OR WEEKENDS) PRIOR TO BEGINNING ANY POTABLE WATER SYSTEM CONSTRUCTION.
2. ALL WORK PERFORMED ON THE POTABLE WATER FACILITIES OWNED OR PROPOSED TO BE OWNED BY THE CITY SHALL BE CONSTRUCTED BY A STATE CERTIFIED UNDERGROUND UTILITY CONTRACTOR OR GENERAL CONTRACTOR LICENSED IN THE STATE OF FLORIDA AND REGISTERED WITH THE CITY.
3. NEWLY CONSTRUCTED POTABLE WATER SYSTEM EXTENSIONS MAY NOT BE USED PRIOR TO FINAL TESTING, CLEARANCE AND ACCEPTANCE BY THE CITY OF PORT ORANGE. THIS INCLUDES CONSTRUCTION WATER REQUIRED FOR SEWER LINE CLEANING OR RELATED USES.
4. ALL TAPPING OF MAINS SHALL BE PERFORMED BY THE CITY AND BILLED IN ACCORDANCE WITH THE ADOPTED FEE RESOLUTION. SCHEDULING OF THESE CONNECTIONS OR TAPPINGS SHALL REQUIRE A MINIMUM OF 2 BUSINESS DAYS, DIRECTED TO THE CITY'S DESIGNATED SITE INSPECTOR WHO SHALL COORDINATE THE WORK DIRECTLY WITH THE PUBLIC UTILITIES DEPARTMENT. SUBSEQUENTLY, THE CONNECTION SHALL BE SCHEDULED TO COMMENCE BETWEEN 8:00 A.M. AND NOON ON THE APPROPRIATE DAY.
5. CONTRACTOR SHALL PREPARE A SAFE, SECURE AND DRY EXCAVATION FOR THE TAPPING OF MAINS BY THE CITY. THE BOTTOM OF THE EXCAVATION SHALL HAVE A MINIMUM OF 6" THICK BEDDING OF #57 STONE. ALL EXCAVATIONS GREATER THAN 5 FEET IN DEPTH SHALL COMPLY WITH THE TRENCH SAFETY ACT.
6. THE CITY RESERVES THE RIGHT TO REQUIRE TIE-IN CONNECTIONS TO BE PERFORMED DURING PERIODS OF LOW FLOW (MIDNIGHT TO 6:00 A.M.) IN ORDER TO MINIMIZE SERVICE DISRUPTION TO EXISTING CUSTOMERS. THE INSTALLATION OF LINE STOPPING DEVICES ON PRESSURE MAIN (POTABLE WATER, RECLAIM WATER AND SANITARY FORCE MAINS) MAY BE REQUIRED ON ANY REQUESTED UTILITY OUTAGE AT THE DISCRETION OF PUBLIC UTILITIES DEPARTMENT TO MINIMIZE INTERRUPTION TO EXISTING UTILITY CUSTOMERS.
7. ALL METERS SHALL BE PROVIDED BY THE CITY IN ACCORDANCE WITH THE ADOPTED FEE RESOLUTION. METERS AND VAULTS FOR METERS 2" OR LESS WILL BE PROVIDED AND INSTALLED BY THE CITY. METERS 4" OR GREATER WILL BE PROVIDED BY THE CITY AND INSTALLED BY THE OWNER/DEVELOPER/CONTRACTOR. ALL UNDERGROUND VAULTS FOR METERS 4" OR GREATER WILL BE PROVIDED AND INSTALLED BY THE OWNER/DEVELOPER/CONTRACTOR. NOTE: LARGE COMMERCIAL RECLAIMED WATER METERS GREATER THAN 4" TAKE A MINIMUM OF 6 WEEKS FOR DELIVERY AFTER FEES ARE PAID TO THE CITY.
8. DEWATERING SHALL BE PROVIDED TO KEEP GROUNDWATER ELEVATION A MINIMUM OF 6 INCHES BELOW WATER MAIN BEING LAID.
9. ALL WATER MAINS SHALL BE LAID ON A FIRM FOUNDATION WITH ALL UNSUITABLE MATERIAL (MUCK, ROCK, COQUINA, ETC.) REMOVED AND REPLACED WITH CLEAN GRANULAR MATERIAL.
10. TRENCHES SHALL BE BACKFILLED WITH MATERIAL ACCEPTABLE TO THE CITY WITH A MINIMUM COMPACTION OF 98% IN PAVED AREAS AND 95% IN UNPAVED AREAS IN ACCORDANCE WITH AASHTO T-180.
11. IT SHALL BE THE CONTRACTORS RESPONSIBILITY TO ENSURE THAT TRENCH COMPACTION TESTS BE PROVIDED AT POINTS 1 FOOT ABOVE THE PIPE AND AT 1 FOOT VERTICAL INTERVALS TO FINISH GRADE, AT A MINIMUM SPACING OF EVERY 300 FEET.
12. ALL PVC PIPE SHALL BE STORED IN SUCH A WAY AS TO PREVENT WARPING, DEFLECTION, OR ANY DEFORMATION.
13. NO USED, RE-USED, RUSTED, SECOND HAND, OR ANY MATERIAL THAT IS NOT NEW SHALL BE USED IN ANY UTILITY IMPROVEMENT PROJECTS WITHIN THE CITY'S SERVICE AREA.
14. ALL POTABLE WATER MAINS SHALL USE A THRUST RESTRAINT JOINT METHOD IN COMPLIANCE WITH THE DUCTILE IRON PIPE RESEARCH ASSOCIATION (DIPRA) GUIDELINES. IN THE EVENT THAT PVC PIPE IS SPECIFIED, THE RESTRAINT JOINT SHALL BE MODIFIED IN ACCORDANCE WITH THE RECOMMENDED ADDITIONAL RESTRAINT LENGTH REQUIRED FOR PIPE WRAPPED WITH POLYETHYLENE.

# PORT ORANGE CITY CENTER SPORTS COMPLEX EXPANSION FINAL ENGINEERING PLANS CONSTRUCTION NOTES

VOLUSIA COUNTY, FLORIDA
CITY OF PORT ORANGE

PROJECT NO: ZC 25092
DESIGNED BY: SM
DRAFTED BY: GMC
CHECKED BY: SM
DRAWING FILE: 2-6_25092-NOT

Know what's below. Call before you dig.

ROBERT J. BALL, P.E., NO.60001
NOT VALID WITHOUT SEAL

SHEET: C4 OF 22

J:\25092 SILVER SANDS SOCCER FIELDS\FINAL ENGINEERING PLANS\CAD\MOS\2-6_25092-NOT.DWG - PRINTED 4/15/2026 1:43 PM

15. AT THE UTILITY CROSSINGS, ONE FULL LENGTH OF WATER MAIN PIPE SHALL BE CENTERED ABOVE OR BELOW THE OTHER PIPELINE SO THE WATER MAIN JOINTS WILL BE AS FAR AS POSSIBLE FROM THE OTHER PIPELINE. ALTERNATIVELY, AT SUCH CROSSINGS, THE PIPES SHALL BE ARRANGED SO THAT ALL WATER MAIN JOINTS ARE AT LEAST THREE FEET FROM ALL JOINTS IN VACUUM-TYPE SANITARY SEWERS, STORM SEWERS, STORMWATER FORCE MAINS OR PIPELINES CONVEYING RECLAIMED WATER REGULATED UNDER PART III OF CHAPTER 62-610 FAC AND AT LEAST SIX FEET FROM ALL JOINTS IN GRAVITY- OR PRESSURE-TYPE SANITARY SEWERS, WASTEWATER FORCE MAINS, OR PIPELINES CONVEYING RECLAIMED WATER NOT REGULATED UNDER PART III OF CHAPTER 62-610, FAC.
16. ALL WATER SERVICE ENDINGS SHALL BE MARKED WITH A 2"X 4" LUMBER (PRESSURE TREATED) EXTENDING 4 FEET ABOVE GRADE, WITH WATER SERVICES SECURED 12" MAXIMUM ABOVE THE GROUND. ALL SERVICES SHALL BE LOCKED AT THE TIME OF FINAL INSPECTION BY THE CONTRACTOR IN THE PRESENCE OF THE CITY INSPECTOR OR CITY PERSONNELL, AFTER THEY HAVE BEEN INSPECTED AND VERIFIED TO OPERATE PROPERLY.
17. ALL WATER VALVES SHALL BE ADJUSTED TO FINISHED GRADE AND THE CAPS PAINTED BLUE TO MAKE THEM PLAINLY VISIBLE.
18. WATER SYSTEMS SHALL BE PRESSURE TESTED AT 150 PSI STATIC PRESSURE FOR A PERIOD OF 2 HOURS PER AWWA STANDARDS.
19. IN AREAS WHERE RECLAIMED WATER IS NOT AVAILABLE THE CONTRACTOR SHALL BE REQUIRED TO (UPON SATISFACTORY COMPLETION OF THE PRESSURE TEST) TRANSFER THE WATER FROM THE POTABLE WATER LINES TO THE RECLAIMED WATER LINES FOR UTILIZATION IN THEIR PRESSURE TEST.
20. THE CONTRACTOR SHALL BE REQUIRED TO PIG ALL POTABLE MAINS 6" AND LARGER IN DIAMETER AND PRIMARY DISTRIBUTION MAINS LOCATED ON COLLECTOR AND ARTERIAL ROADWAYS. ALL PIGS SHALL BE NEW; NO FOAM PIGS ARE ALLOWED. LAUNCHING AND EXTRACTION POINTS SHALL BE DETERMINED BY THE CONTRACTOR. ALL PIGGING OPERATIONS SHALL BE WITNESSED BY A PUBLIC UTILITIES REPRESENTATIVE OR A CITY UTILITY INSPECTOR
21. ALL PROPOSED POTABLE WATER MAINS SHALL BE FLUSHED, DISINFECTED, PRESSURE TESTED AND BACTERIOLOGICALLY CLEARED FOR SERVICE WHEN APPROPRIATE IN ACCORDANCE WITH THE LATEST AWWA STANDARDS AND THE FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION REQUIREMENTS. THE CONTRACTOR SHALL NOTIFY THE CITY'S DESIGNATED SITE INSPECTOR WHO SHALL COORDINATE WITH CITY PERSONNEL AT THE WATER TREATMENT PLANT AT LEAST 2 BUSINESS DAYS PRIOR TO BEGINNING FLUSH OF THE MAINS AND PRIOR TO THE COMMENCEMENT OF PRESSURE TESTING.
22. THE PHYSICAL TAKING OF WATER SAMPLE FOR BACTERIOLOGICAL TESTING SHALL BE DONE BY THE CITY'S LABORATORY PERSONNEL. THE CONTRACTOR SHALL NOTIFY THE CITY'S DESIGNATED SITE INSPECTOR AT LEAST TWO BUSINESS DAY PRIOR TO NEEDING SAMPLES TAKEN TO COORDINATE WITH THE LABORATORY. ALL SAMPLING FORMS WILL BE COMPLETED BY THE CITY'S DESIGNATED LABORATORY PERSONNEL. THE CITY'S LABORATORY WILL CONDUCT THE TESTING IN ACCORDANCE WITH THE LATEST AWWA STANDARDS AND THE FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION REQUIREMENTS. THE RESULTS WILL BE FORWARDED TO THE CONTRACTOR AND ENGINEER OF RECORD. IF THE INITIAL DISINFECTION OR OTHER RESULTS INDICATE UNACCEPTABLE WATER QUALITY, THE MAIN SHALL BE RE-FLUSHED, RE-SAMPLED AND RE-TESTED. IF CHECK SAMPLES FAIL TO PRODUCE ACCEPTABLE RESULTS, THE CYCLE WILL BE REPEATED (FLUSH, CHLORINATE, SAMPLE, TEST, AND RE-FLUSH, RE-SAMPLE, RE-TEST, AS NEEDED) UNTIL SATISFACTORY RESULTS ARE OBTAINED.

STANDARD CONSTRUCTION DETAIL
POTABLE WATER CONSTRUCTION NOTES
(CONTINUED)
REV. 12/18

FILE NAME: W2.DOC
DETAIL REF: W-2.1

23. WHEN THE PUBLIC UTILITIES OFFICE RECEIVES POTABLE WATER CLEARANCE REQUEST REQUIRING SIGNATURE, THE CITY'S DISTRIBUTION SUPERVISOR AND/OR DESIGNATED SITE INSPECTOR WILL BE CONTACTED TO INDEPENDENTLY VERIFY THAT THE SYSTEM IS IN PROPERLY FUNCTIONING ORDER (i.e. ALL VALVES, HYDRANTS, AND WATER SERVICES ARE ACCESSIBLE AND OPERABLE). SIMULTANEOUSLY, THE CITY MAY ALSO TAKE A RANDOM BACTERIOLOGICAL SAMPLE WITHIN THE NEW SYSTEM TO VERIFY THAT WATER IS SAFE FOR CONSUMPTION. ONCE THE DISTRIBUTION SUPERVISOR AND/OR DESIGNATED SITE INSPECTOR HAVE VERIFIED THAT THE SYSTEM IS IN PROPER FUNCTIONING ORDER AND THAT THE BACTERIOLOGICAL SAMPLE(S) INDICATE THE WATER IS SAFE FOR CONSUMPTION, THE PUBLIC UTILITIES OFFICE WILL THEN SIGN OFF ON THE WATER CLEARANCE REQUEST.
24. UPON CONSTRUCTION COMPLETION AND ACCEPTANCE OF THE SYSTEM, IT SHALL BE THE DESIGN ENGINEER'S RESPONSIBILITY TO ENSURE THAT THE SYSTEM IS PROPERLY CERTIFIED AND ACCEPTED BY THE DEPARTMENT OF HEALTH AND AS-BUILTS ARE PROVIDED TO THE CITY PRIOR TO ANY PUBLIC USE OF THIS SYSTEM.
25. UPON FINAL ACCEPTANCE OF NEW WATER SYSTEMS, WATER VALVES SHALL BE COMPLETELY OPENED BY PUBLIC UTILITIES PERSONNEL. AT NO TIME SHALL CONTRACTOR OPERATE ANY EXISTING VALVES.
26. ALL FIRE HYDRANTS SHALL BE LOCATED TO MAKE THEM EASILY ACCESSIBLE TO FIRE PERSONNEL IN CASE OF A FIRE. THE PRIMARY HYDRANT PORT SHALL ALWAYS FACE THE STREET. 5 FEET MINIMUM RADIUS CLEAR AREA AROUND THE FIRE HYDRANT SHALL BE MAINTAINED.
27. ALL WATER SERVICES SHALL BE MARKED WITH AN "/\" SAW CUT INTO THE CURB OR BY METAL TABS SET INTO THE PAVEMENT.
28. ALL WATER VALVES SHALL BE MARKED WITH AN "X" SAW CUT INTO THE CURB OR BY METAL TABS SET INTO THE PAVEMENT. BLOW-OFFS SHALL BE MARKED SIMILARLY, AS WELL. REVERSE TAPPING VALVE SHALL BE MARKED WITH AN "X -P-" SAW CUT INTO THE CURB OR PAVEMENT WITH THE ARROW POINTING TO THE DIRECTION OF THE PRESSURE MAIN RUN.

STANDARD CONSTRUCTION DETAIL
POTABLE WATER CONSTRUCTION NOTES
(CONTINUED)
REV. 12/18

FILE NAME: W2.DOC
DETAIL REF: W-2.2

THE CITY'S PUBLIC UTILITIES DEPARTMENT (386) 506-5750 SHALL BE GIVEN A MINIMUM OF 48 HOURS ADVANCE NOTICE (NOT INCLUDING HOLIDAYS OR WEEKENDS) PRIOR TO BEGINNING ANY SANITARY SEWER CONSTRUCTION.

CONSTRUCTION:
1. ALL WORK PERFORMED ON SANITARY SEWER FACILITIES OWNED OR PROPOSED TO BE OWNED BY THE CITY SHALL BE CONSTRUCTED BY AN UNDERGROUND UTILITY CONTRACTOR, OR FLORIDA LICENSED GENERAL CONTRACTOR REGISTERED WITH THE CITY.
2. THE PLANS SHALL DIMENSION THE LOCATION, OF ALL MAINS MEASURED FROM THE BACK OF CURB (OR EDGE OF PAVEMENT, IF NO CURBING EXISTS. LANDSCAPE PLANS SHALL CLEARLY DEPICT THE DESIGN LOCATION OF PLANTINGS RELATIVE TO THE LOCATION OF PROPOSED AND EXISTING PUBLIC UTILITIES AND STORMWATER INFRASTRUCTURE.
3. PROFILE VIEWS SHALL BE PROVIDED FOR ALL SEWER MAINS. PROFILE VIEWS SHALL BE ON THE SAME SHEET AS THE ASSOCIATED PLAN VIEW AND SHALL INCLUDE THE FOLLOWING INFORMATION:
   A. SIZE, SLOPE, LENGTH AND CLASS OF PIPE
   B. MANHOLE RIM AND INVERT ELEVATIONS
   C. UTILITY CROSSINGS WITH VERTICAL SEPARATION
   D. SHOW PROPOSED SEWER AND EXISTING UTILITY
   E. EXISTING GROUND PROFILE
   F. MATCH LINE
   G. VICINITY MAP
   H. PROFILE VIEW STATIONS TO COINCIDE WITH PLAN VIEW STATIONS
4. GREASE INTERCEPTORS ARE REQUIRED FOR ALL COMMERCIAL BUILDINGS HAVING KITCHEN, FOOD PREPARATION OR SERVING FACILITIES AND / OR MISCELLANEOUS USES. GREASE INTERCEPTORS CONSTRUCTED EXTERNAL TO BUILDINGS SHALL BE SIZED IN ACCORDANCE WITH FAC 64-E-6. CALCULATIONS TO DETERMINE SIZING REQUIREMENTS SHALL BE SUBMITTED AS PART OF BUILDING PERMITTING. AN INSPECTION MANHOLE MAY BE REQUIRED IMMEDIATELY DOWN STREAM OF THE GREASE INTERCEPTOR FOR INSPECTION PURPOSES, AS DEEMED APPROPRIATE BY THE CITY.
5. ON ALL EXCAVATION AND BACKFILLING, THE CONTRACTOR SHALL PROVIDE ADEQUATE SHEETING AND BRACING IN ACCORDANCE TO OSHA GUIDELINE IN ORDER TO PROVIDE FOR THE SAFETY OF WORKMEN, AS WELL AS REPRESENTATIVES OF THE CITY, THE DESIGN ENGINEER, AND THE DEVELOPER.
6. ALL PVC. PIPE SHALL BE STORED IN SUCH A WAY AS TO PREVENT WARPING, DEFLECTION, OR DEFORMATION. ANY PIPE DEEMED TO BE MISSHAPED IN ANY WAY FOR ANY REASON SHALL BE REJECTED.
7. NO USED, RE-USED, RUSTED, SECOND HAND, OR ANY MATERIAL THAT IS NOT NEW SHALL BE USED IN ANY UTILITY IMPROVEMENT PROJECTS WITHIN THE CITY SERVICE AREA.
8. THE CONTRACTOR SHALL AT ALL TIMES, DURING PIPE LAYING OPERATIONS DEWATER THE GROUND SUFFICIENTLY TO KEEP THE GROUNDWATER ELEVATION A MINIMUM OF 6" BELOW THE PIPE BEING LAID WITHIN THE AREA OF THE TRENCH.
9. ALL PIPES SHALL BE LAID ON A FIRM FOUNDATION. SOFT OR SPONGY BEDDING FOR PIPES IS NOT ACCEPTABLE. ANY UNSUITABLE MATERIAL SHALL BE REMOVED AND REPLACED WITH A DRY, COMPACTED, GRANULAR MATERIAL SATISFACTORY TO THE CITY. MORTAR TO CONTAIN "HYDRATITE" OR APPROVED EQUAL, TO PREVENT SHRINKAGE. CEMENT USED IN CONCRETE MIX FOR PRECAST STRUCTURES SHALL BE TYPE II, ACID RESISTANT AND SULFIDE RESISTANT CONCRETE.
10. MORTAR TO CONTAIN "HYDRATITE" OR APPROVED EQUAL, TO PREVENT SHRINKAGE. CEMENT USED IN CONCRETE MIX FOR PRECAST STRUCTURES SHALL BE TYPE II, ACID RESISTANT AND SULFIDE RESISTANT CONCRETE.

STANDARD CONSTRUCTION DETAIL
SANITARY SEWER NOTES
REV. 12/18

FILE NAME: S1.DOC
DETAIL REF: S-1

11. THE CITY MAY REQUIRE ALL NEW SANITARY SEWER GRAVITY SYSTEMS TO BE SMOKE TESTED PRIOR TO FINAL ACCEPTANCE. ALL TESTING MUST BE DONE IN THE PRESENCE OF THE CITY'S DESIGNATED SITE INSPECTOR.
12. THE CITY OF PORT ORANGE RESERVES THE RIGHT TO REQUIRE THE DEVELOPER TO PERFORM VACUUM TESTING OF ALL SANITARY MANHOLES, AIR TEST SEWER MAINS, AND REQUIRES THAT ALL SANITARY SEWER MAIN LINES BE TELEVISED PRIOR TO FINAL ACCEPTANCE. LATERALS SHALL BE TELEVISED UPON DEMAND BY THE CITY PRIOR TO FINAL ACCEPTANCE WHEN IT IS SUSPECTED THAT A PROBLEM EXISTS.
13. ALL TAPPING OF PRESSURE MAINS AND CORING OF MANHOLES SHALL BE PERFORMED BY THE CITY AND BILLED IN ACCORDANCE WITH THE ADOPTED FEE RESOLUTION. SCHEDULING OF THESE CONNECTIONS SHALL REQUIRE A MINIMUM 48 HOURS NOTIFICATION DIRECTED TO THE CITY'S DESIGNATED SITE INSPECTOR WHO SHALL COORDINATE THE WORK DIRECTLY WITH THE PUBLIC UTILITIES DEPARTMENT. SUBSEQUENTLY, THE CONNECTION SHALL BE SCHEDULED TO COMMENCE BETWEEN 8:00 A.M. AND NOON ON THE APPROPRIATE DAY ESTABLISHED BY CITY. WITH RESPECT TO TIE-IN CONNECTIONS AND CORING OPERATIONS, THE CITY RESERVES THE RIGHT TO REQUIRE CONNECTIONS TO BE PERFORMED DURING PERIODS OF LOW FLOW (MIDNIGHT TO 6:00 A.M.) IN ORDER TO MINIMIZE SERVICE DISRUPTION TO EXISTING CUSTOMERS. CONTRACTORS HAVING EXPERIENCE AND PROPER EQUIPMENT MAY BE GRANTED PERMISSION TO CORE MANHOLE BY PUBLIC UTILITIES DEPARTMENT.
14. NEW OR RELOCATED, UNDERGROUND MAINS SHALL BE LAID TO PROVIDE THE FOLLOWING MINIMUM HORIZONTAL SEPARATIONS (OUTSIDE TO OUTSIDE):

| | WATER | STORM GRAVITY | STORM FORCE | RECLAIM | SANITARY GRAVITY | SANITARY FORCE |
|---|---|---|---|---|---|---|
| WATER | | 3' | 3' | 3' | 6', PREFERRED 10' | 6', PREFERRED 10' |
| STORM GRAVITY | 3' | | 3' | 3' | 6', PREFERRED 10' | 6', PREFERRED 10' |
| STORM FORCE | 3' | 3' | | 3' | 6', PREFERRED 10' | 6', PREFERRED 10' |
| RECLAIM | 3' | 3' | 3' | | 6', PREFERRED 10' | 6', PREFERRED 10' |
| SANITARY GRAVITY | 6', PREFERRED 10' | 6', PREFERRED 10' | 6', PREFERRED 10' | 6', PREFERRED 10' | | 6', PREFERRED 10' |
| SANITARY FORCE | 6', PREFERRED 10' | 6', PREFERRED 10' | 6', PREFERRED 10' | 6', PREFERRED 10' | 6', PREFERRED 10' | |

15. A 3' MINIMUM HORIZONTAL SEPARATION BETWEEN THE SANITARY GRAVITY AND WATER MAINS SHALL BE ALLOWED WHEN THE WATER MAIN IS INSTALLED IN A SEPARATE TRENCH OR ON AN UNDISTURBED EARTH SHELF AT LEAST 6" ABOVE THE SANITARY GRAVITY MAIN. ALTERNATIVELY, THE 3' MINIMUM HORIZONTAL SEPARATION SHALL BE ALLOWED WHEN THE SEWER MAIN IS ENCASED WITH CONCRETE OR ENCLOSED IN A WATER TIGHT CARRIER PIPE OR UPGRADED TO PRESSURE RATED PVC PIPE (MEETING AWWA C-900 OR C-905 SPECIFICATION AND PRESSURE TESTED AT 150 PSI TO ASSURE WATER TIGHTNESS PRIOR TO BACKFILLING).

STANDARD CONSTRUCTION DETAIL
SANITARY SEWER NOTES
(CONTINUED)
REV. 12/18

FILE NAME: S1.DOC
DETAIL REF: S-1.2

10. THE MAXIMUM PERMISSIBLE SLOPE OF ANY NEW POND BANKS IS 4:1 (HORIZONTAL:VERTICAL). THIS LIMIT SHALL BE APPLIED TO ALL AREAS EXCEPT BELOW THE WATER TABLE WHERE SHARPER SLOPES ARE PERMISSIBLE.
11. PIPED STORMWATER SYSTEMS SHALL HAVE A MINIMUM DRAINAGE MAINTENANCE EASEMENT WIDTH OF 20', CENTERED OVER PIPE/STRUCTURE, AND SHALL BE INCREASED DEPENDING UPON CONDITIONS, SUCH AS OSHA UNSHIELDED TRENCH COMPLIANCE.
12. NORMAL ROADSIDE SWALES ARE PERMITTED TO BE CONSTRUCTED TO A MAXIMUM DEPTH OF 18" BELOW THE OUTSIDE EDGE OF PAVEMENT OR CONCRETE CURB.
13. CONCRETE EROSION CONTROL MUST BE PROVIDED WHERE SWALES OR CULVERTS INTERCEPT DRAINAGE DITCHES.
14. IN GENERAL, ALL RETENTION / DETENTION SITES MUST BE CONSTRUCTED ON ALL PROJECTS PRIOR TO ANY ROAD, PARKING LOT, OR BUILDING CONSTRUCTION COMMENCING OR AS CURRENT PERMIT CONDITIONS DICTATE. SEWER AND WATER MAINS MAY BE INSTALLED PRIOR TO RETENTION/DETENTION SITE CONSTRUCTION IF DEWATERING IS NOT REQUIRED.
15. POND INFLOW AND OUTLET STRUCTURES SHALL GENERALLY BE CONSTRUCTED WITH REINFORCED CONCRETE.
16. SKIMMERS FOR WET PONDS SHALL BE CONSTRUCTED SUCH THAT THE BOTTOM EXTENDS 6" BELOW THE NORMAL WATER LEVEL AND 6" ABOVE THE OVERFLOW. FOR DRY PONDS, THE SKIMMER BOTTOM SHALL BE SET 6" BELOW THE LOWEST OVERFLOW ELEVATION AND 6" ABOVE THE HIGHEST POINT OF OVERFLOW. ALL SKIMMERS SHALL BE CONSTRUCTED OF MINIMUM 1/4" THICK ALUMINUM OR FIBERGLASS AND ADEQUATELY SUPPORTED TO PREVENT DEFLECTION.
17. DEVELOPMENT PLANS FOR ALL STORMWATER MANAGEMENT SYSTEMS SHALL CONTAIN POP-OFF DATA (OVERFLOW), BOTTOM ELEVATION, NORMAL WATER LEVELS, MEAN ANNUAL SEASONAL HIGH WATER TABLE ELEVATION, TREATMENT VOLUME AND CORRESPONDING ELEVATION, 100 YEAR HIGH WATER LEVELS, AND THE DESIGN TAILWATER ELEVATION (IF APPLICABLE).
18. WHEN CULVERTS ARE INSTALLED TO MAINTAIN THE FLOW OF EXISTING DRAINAGE WAYS WHERE NEWLY PROPOSED ROADS WOULD OTHERWISE SEVER THE DRAINAGE WAY THEN CULVERTS CROSSING RIGHTS-OF-WAY SHALL EXTEND FROM RIGHT-OF-WAY LINE TO RIGHT-OF-WAY LINE UNDER THE ROADWAY. CULVERTS SHALL BE DESIGNED TO ACCOMMODATE THE FLOW FROM THE 100 YEAR-24 HOUR STORM EVENT WITHOUT FLOODING ADJACENT PROPERTY OR SURCHARGING THE SAID ROADWAY.
19. THE CITY MAY REQUEST THAT THE DEVELOPER SUBMIT A REPORT BY A QUALIFIED HYDROLOGIST ON THE IMPACT THE POND WILL HAVE ON NEIGHBORING WATER TABLE ELEVATIONS BOTH DURING CONSTRUCTION AND AFTER POND COMPLETION. THE CITY MAY REQUIRE GROUNDWATER MONITORING DURING THE POND EXCAVATION.
20. SOIL EROSION CONTROL MEASURES, SATISFACTORY TO THE ST. JOHNS RIVER WATER MANAGEMENT DISTRICT AND THE CITY, SHALL BE EMPLOYED DURING CONSTRUCTION.
21. A 10' MAINTENANCE EASEMENTS/RIGHTS-OF-WAY SHALL BE PROVIDED AROUND THE ENTIRE PERIMETER OF ALL PONDS AND ASSOCIATED OUTFALLS DISCHARGING INTO AND OUT OF LAKES. APPLICABLE CROSS SECTIONS SHALL BE INCLUDED ON FINAL DEVELOPMENT PLANS.
22. THE CONTRACTOR SHALL BE RESPONSIBLE TO OBTAIN ANY AND ALL DEWATERING PERMITS THAT MAY BE REQUIRED.
23. IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO REVIEW AND MAINTAIN A COPY OF THE SJRWMD AND NPDES PERMITS AT THE CONSTRUCTION SITE AND ABIDE BY ALL CONDITIONS OF THE PERMIT.
24. LANDSCAPE PLANS SHALL CLEARLY DEPICT THE DESIGN LOCATION OF PLANTINGS RELATIVE TO THE LOCATION OF PUBLIC UTILITIES AND STORMWATER INFRASTRUCTURE IN ORDER TO EVALUATE POTENTIAL CONFLICTS.

STANDARD CONSTRUCTION DETAIL
STORM DRAINAGE DESIGN
AND CONSTRUCTION NOTES
(CONTINUED)
REV. 12/18

FILE NAME: ST1.DOC
DETAIL REF: ST-1.1

4. SINGLE FAMILY RESIDENTIAL SERVICE LATERALS SHALL BE CONSTRUCTED AT EACH LOT OR UNIT AND LOCATED ON THE DOWNSTREAM SIDE OF THE LOT CENTER LINE. THESE SERVICES SHALL BE EXTENDED 48" ABOVE GROUND AT THE PROPERTY LINE WITH A PVC RISER AND PLUG BEING EASILY VISIBLE FROM THE ROAD. RUBBER SEAL FITTINGS SHALL BE USED ON ALL LINES. NO GLUED JOINTS ARE PERMITTED ON LATERALS.
5. GRAVITY SANITARY SEWER LINE CONSTRUCTION SHALL BE ACCOMPLISHED BY THE USE OF A LASER INSTRUMENT UNLESS ANOTHER METHOD IS PREVIOUSLY APPROVED BY THE CITY.
6. MINIMUM GRAVITY SANITARY SEWER SLOPES ARE AS FOLLOWS:
   8" PIPE - 0.40 %
   10" PIPE - 0.30 %
   12" PIPE - 0.22 %
7. GRAVITY SANITARY SEWER LINES SHALL BE INSTALLED WHENEVER POSSIBLE UNDER PAVED AREAS WITHIN PUBLIC RIGHTS-OF-WAY. UTILITY EASEMENTS SHALL BE PROVIDED WHENEVER PUBLICLY-OWNED SEWER LINES ARE CONSTRUCTED OUTSIDE OF A PUBLIC RIGHT-OF-WAY.
8. AS A GENERAL RULE, THE NUMBER OF JOINTS SHALL BE LIMITED WHENEVER POSSIBLE. IN SPECIAL CASES WHERE A POINT REPAIR TO AN 8" TO 12" PVC SEWER MAIN IS REQUIRED, THE PROPER RIGID WRAP AROUND SLEEVE SUCH AS A JCM-210 OVERSIZED DUCTILE IRON COUPLING OR AN APPROVED EQUAL MAY BE ALLOWED BY SPECIAL APPROVAL BY THE CITY.
9. SEWER MAINS SHALL BE FLUSHED, PRESSURE TESTED, PIGGED AND CLEARED FOR SERVICE IN ACCORDANCE WITH THE LATEST AWWA STANDARDS AND THE FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION REQUIREMENTS. THE CONTRACTOR SHALL NOTIFY THE CITY'S DESIGNATED SITE INSPECTOR WHO SHALL COORDINATE WITH CITY PERSONNEL AT THE WATER OR WASTEWATER TREATMENT PLANT (AS APPROPRIATE) AT LEAST 48 HOURS PRIOR TO BEGINNING A FULL-DIAMETER FLUSH OF THE MAINS AND PRIOR TO THE COMMENCEMENT OF PRESSURE TESTING (SUBJECT TO AVAILABILITY).
10. THE CONTRACTOR SHALL BE REQUIRED TO PIG ALL MAINS AND PRIMARY TRANSMISSION MAINS LOCATED ON COLLECTOR AND ARTERIAL ROADWAYS. LAUNCHING AND EXTRACTION POINTS SHALL BE DETERMINED BY THE CONTRACTOR. ALL PIGGING OPERATIONS SHALL BE WITNESSED BY A PORT ORANGE REPRESENTATIVE.

SANITARY MANHOLES:
1. STANDARD MANHOLES SHALL BE LOCATED AT INTERVALS NOT EXCEEDING 350'. SHOP DRAWINGS FOR ALL STRUCTURES SHALL BE SUBMITTED TO AND APPROVED BY THE DESIGN ENGINEER PRIOR TO INSTALLATION WITH TWO COPIES FORWARDED BY THE DESIGN ENGINEER TO THE CITY.
2. MAXIMUM DEPTH OF SANITARY MANHOLES SHALL BE 15'.
3. LOCAL COLLECTION SANITARY SEWER MANHOLES SHALL BE PRECAST WITH A MINIMUM INSIDE DIAMETER OF 48".
4. THICKER MANHOLE WALLS AND BASES MAY BE REQUIRED TO PREVENT FLOATATION BASED ON HIGH GROUND WATER TABLE ELEVATIONS AS DETERMINED USING ACCEPTED ENGINEERING PRACTICES AND/OR PUBLIC UTILITIES DEPARTMENT.
5. ALL SANITARY SEWER MANHOLES SHALL HAVE ALL INTERIOR SURFACES COATED WITH THREE (3) COATS OF WHITE/GRAY OVER RED OVER BLACK EW-1 EPOXY PAINT WITH A TOTAL OF 12 MILS THICKNESS OR BLACK COAL-TAR EPOXY WITH A TOTAL OF 16 MILS THICKNESS. OUTSIDE SURFACE TO BE COATED WITH TWO (2) COATS OF BLACK OVER BLACK EW-1 EPOXY PAINT WITH A TOTAL OF 8 MILS AND ONE (1) COAT OF BLACK COAL-TAR EPOXY WITH A TOTAL OF 8 MILS. ALL COATS SHALL BE APPLIED AT THE FACTORY EXCEPT MINOR FIELD TOUCH UP AT JOINTS AND AT MANHOLE NECK.
6. ALL MANHOLES CONSTRUCTED IN SIDE YARDS, BACKYARDS, AND EASEMENTS OUTSIDE OF THE RIGHT-OF-WAY SHALL BE OUTFITTED WITH FIBERGLASS OR EPOXY LINERS IN COMPLIANCE WITH ASTM-3753 OR OTHER TYPES OF LINERS APPROVED BY THE CITY. IN ADDITION, THE CITY MAY REQUIRE LINERS TO BE INSTALLED IN OTHER AREAS WHERE THE PUBLIC UTILITIES DEPARTMENT BELIEVES THE NEED IS JUSTIFIED SUCH AS IMMEDIATELY UPSTREAM OF FORCE MAINS CONNECTING TO GRAVITY MAINS.

STANDARD CONSTRUCTION DETAIL
SANITARY SEWER NOTES
(CONTINUED)
REV. 12/18

FILE NAME: S1.DOC
DETAIL REF: S-1.4

7. MANHOLE RIMS SHALL MATCH FLUSH WITH THE FINISH GRADE ELEVATION IN PAVED AREAS AND A MINIMUM OF 0.2' AND MAXIMUM OF 0.5' ABOVE GRADE ELEVATION IN UNPAVED AREAS.
8. ALL SANITARY SEWER MANHOLE COVERS SHALL HAVE THE WORDS "PORT ORANGE FLORIDA SANITARY SEWER" CAST INTO THEM.
9. THE CONTRACTOR SHALL CONSTRUCT SANITARY SEWER MANHOLES IN SUCH A WAY THAT SEWER LINES DO NOT INTERSECT SEALED JOINTS BETWEEN SECTIONS OF THE MANHOLE.
10. NO BUG HOLES OR HONEYCOMB WILL BE ACCEPTED.
11. INDIVIDUAL SANITARY SERVICE ON NEW CONSTRUCTION SHALL NOT BE CONNECTED DIRECTLY INTO MANHOLES. THE SERVICE CONNECTION WILL BE BY USE OF WYE CONNECTIONS, UNLESS OTHERWISE APPROVED BY THE CITY.
12. RUBBER BOOTS WITH 316 STAINLESS STEEL BANDS SHALL BE UTILIZED IN THE CONNECTION OF THE SEWER MAIN TO THE MANHOLES. COMPLETELY COVER RUBBER BOOTS AT OUTSIDE CONNECTION AND SEAL INSIDE PROTRUSION WITH HYDRAULIC CEMENT.
13. EZ-WRAP PLASTIC, AS MANUFACTURED BY PRESS SEAL GASKET CORPORATION, SHALL BE USED ON THE OUTSIDE OF ALL MANHOLE AND WET WELL JOINTS. APPLY ONE LAYER OF 9" WRAP CENTERED ON EACH JOINT. A CITY INSPECTOR SHALL PERSONALLY INSPECT ALL JOINT SEALS PRIOR TO BACKFILLING OPERATIONS.

TESTING:
1. ALL TESTING REQUIRED BY THE CITY SHALL BE PAID FOR BY THE CONTRACTOR / DEVELOPER. THE CONTRACTOR SHALL EMPLOY AN INDEPENDENT TESTING LABORATORY AT HIS OWN EXPENSE.
2. TO ENSURE THAT COMPACTION OF ALL FILL MATERIAL IS COMPLETED PROPERLY, TESTS SHALL BE DONE 12" ABOVE THE PIPE AND THEN AT 12" VERTICAL INTERVALS UNTIL FINAL GRADE IS REACHED.
3. ALL TRENCHES SHALL BE BACKFILLED WITH ACCEPTABLE MATERIAL AND COMPACTED TO MINIMUM 95% IN UNPAVED AREAS AND 98% IN PAVED AREAS OF THE MAXIMUM DENSITY BASED ON AASHTO T-180 MODIFIED PROCTOR TEST.
4. TEST RESULTS SHALL BE SUBMITTED TO THE CITY AT A MINIMUM FREQUENCY OF ONE SET OF TESTS BETWEEN EACH MANHOLE AND ONE ADDITIONAL SET OF TESTS AT EVERY MANHOLE. IDENTIFICATION OF TEST LOCATIONS SHALL BE CLEARLY INDICATED ON TEST REPORTS. TEST RESULTS SHALL BE FORWARDED PROMPTLY TO THE CITY'S DESIGNATED SITE INSPECTOR.

CLOSE-OUT:
1. ALL SEWER MAINS, PRIOR TO FINAL ACCEPTANCE BY THE CITY AND PRIOR TO ANY FINAL PAVING OPERATIONS, SHALL BE TELEVISED AND SUBMITTED TO THE CITY USING A "PAN AND TILT CAMERA" WITH DEPTH GAUGE IN FRONT OF THE CAMERA BY A CITY APPROVED CONTRACTOR. THE CAMERA SHALL RUN FROM DOWN STREAM MANHOLE TO UP STREAM MANHOLE. CITY INSPECTOR SHALL BE NOTIFIED IN ADVANCE AND BE PRESENT DURING THE TELEVISING OF THE SEWER SYSTEM. THE VIDEO SHALL BE NON-STOP WITH AUDIO DESCRIBING WHAT IS BEING REVIEWED. WRITTEN VIDEO LOGS DESCRIBING THE CONDITION OF THE LINES SHALL ACCOMPANY THE VIDEO SUBMISSION TO THE CITY 48 HOURS PRIOR TO COMMENCING ANY INSTALLATION OF ASPHALT OR CONCRETE PAVEMENT. THE CITY MAY REQUIRE ADDITIONAL VIDEO TAPING, VIDEO TAPING OF LATERALS, AND/OR INFILTRATION/EXFILTRATION TESTS IF DEFECTS ARE APPARENT OR WORKMANSHIP IS QUESTIONABLE.
2. UPON CONSTRUCTION COMPLETION AND ACCEPTANCE OF THE SYSTEM, IT SHALL BE THE DESIGN ENGINEER'S RESPONSIBILITY TO ENSURE THAT THE SYSTEM IS PROPERLY CERTIFIED AND ACCEPTED BY THE FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION AND AS-BUILTS AR

1. LIFT STATION MINIMUM COMPONENTS: WET WELL, DUPLEX SUBMERSIBLE OR SURFACE MOUNTED OR RECESSED MOUNTED PUMPS, EMERGENCY PUMP OUT AND VALVE BOX, METER AND BOX, ISOLATION VALVE AND BOX, POWER AND CONTROL PANELS, WATER SERVICE, AND TELEMETRY.
2. WET WELL DIMENSIONS/REQUIREMENTS:
   DIAMETER, MINIMUM = 6'
   DEPTH, MAXIMUM = 16' FOR SURFACE MOUNTED PUMP SYSTEM, 26' FOR SUBMERSIBLE PUMP SYSTEM
   WALL THICKNESS MINIMUM = 8"
   LOWEST INVERT TO WET WELL BOTTOM SEPARATION MINIMUM = 60"
   TOP ELEVATION MINIMUM = 12" ABOVE FINISHED/SURROUNDING GRADE/NO LOWER THAN THE 100-YEAR BASE FLOOD ELEVATION
3. LIFT STATIONS PROPOSED TO BE GREATER THAN 16' DEEP OR THAT DO NOT MEET THE MINIMUM DISTANCE REQUIREMENT FROM LOWEST INVERT TO WET WELL BOTTOM SHALL BE SUBMERSIBLE PUMP SYSTEMS.
4. SUBMERSIBLE PUMP SYSTEMS SHALL BE FLYGT (XYLEM) AND SURFACE OR RECESSED PUMP SYSTEMS SHALL BE SMITH & LOVELESS, INC.
5. INSTRUMENTATION AND CONTROLS (ALL LIFT STATION TYPES):
   A. ALL INSTRUMENTATION, CONTROL, EQUIPMENT, PROGRAMMING, AND OPERATION, HEREINAFTER TERMED "THE SYSTEM", SHALL BE INTEGRATED BY THE CONTROL SYSTEM INTEGRATOR WHO, WITH THE CONTRACTOR, SHALL COORDINATE AND HAVE RESPONSIBILITY FOR INTERCONNECTION AND INTEGRATION OF ALL NEW, EXISTING AND ANY EQUIPMENT BEING INSTALLED AS SHOWN ON THE DRAWINGS. THE SYSTEM INTEGRATOR, WITH THE CONTRACTOR, SHALL PROVIDE ALL OF THE SERVICES, EQUIPMENT AND APPURTENANCES REQUIRED TO ACHIEVE A FULLY INTEGRATED AND OPERATIONAL SYSTEM. THE CONTROL SYSTEM INTEGRATOR, WITH THE CONTRACTOR, SHALL COORDINATE WITH ALL EQUIPMENT MANUFACTURERS AND WITH ALL MECHANICAL AND ELECTRICAL SYSTEM SUPPLIERS FOR INTERFACE REQUIREMENTS AND FURNISH ALL COMPATIBLE INTERFACE SIGNALING ANY SIGNAL ISOLATORS THAT ARE REQUIRED.
   B. PRODUCTS SHALL BE OF THE SAME MAJOR INSTRUMENTATION MANUFACTURER WITH PANEL MOUNTED DEVICES OF THE SAME TYPE AND MODEL, AS POSSIBLE. SUBSTITUTION ON FUNCTIONS OR EQUIPMENT SPECIFIED WILL NOT BE ACCEPTABLE.
   C. IN ORDER TO ENSURE THE INTERCHANGEABILITY OF PARTS, QUALITY CONTROL, EASE OF INTERFACING BETWEEN VARIOUS SUB-SYSTEMS AND ESTABLISHMENT OF MINIMUMS WITH REGARD TO RANGES AND ACCURACY, STRICT COMPLIANCE WITH THE ABOVE REQUIREMENTS SHALL BE MAINTAINED.
   D. THE SYSTEM INTEGRATOR SHALL BE SANDERS COMPANY, INC. STUART, FLORIDA, PHONE 800-247-0880.
   E. THE SYSTEM SHALL BE FABRICATED, ASSEMBLED, INSTALLED AND PLACED IN PROPER OPERATING CONDITION IN FULL CONFORMITY WITH DRAWINGS, SPECIFICATIONS, ENGINEERING DATA, INSTRUCTIONS AND RECOMMENDATIONS.
   F. ALL EQUIPMENT AND INSTALLATIONS SHALL SATISFY APPLICABLE NATIONAL, STATE AND LOCAL MECHANICAL AND ELECTRICAL CODES.
6. WET WELL SECTIONS SHALL BE JOINED USING "RAMNECK" JOINT MATERIAL AND SHALL BE FREE FROM SEEPAGE PRIOR TO ACCEPTANCE. PROVIDE "EZ-WRAP" BUTYL ADHESIVE TAPE PER MANUFACTURER'S RECOMMENDATIONS AT EACH WETWELL SECTION EXTERIOR JOINT CIRCUMFERENCE.

| | | |
|---|---|---|
| | STANDARD CONSTRUCTION DETAIL<br>SANITARY SEWER LIFT STATION NOTES<br>REV. 12/18 | FILE NAME<br>S2.DOC<br>DETAIL REF:<br>S-2 |

7. WET WELL CONSTRUCTION SHALL BE REINFORCED CONCRETE IN ACCORDANCE WITH A.S.T.M. C-76, 4,000 PSI AT 28 DAYS. ALTERNATE CONSTRUCTION SHALL BE PRECAST MONOLITHIC WITH BASE SLAB IN ACCORDANCE WITH ASTM C-478.
8. LIFT STATION AND THE LAST MANHOLE CONNECTING TO THE WET WELL SHALL BE FIBERGLASS LINED, AGRU SURE GRIP 13MM STUD HEIGHT, PE YELLOW, 3.0 MIN THICKNESS, OR OTHER MATERIAL AS APPROVED BY THE CITY OF PORT ORANGE.
9. PIPE AND FITTINGS IN WET WELLS TO BE ASSEMBLED USING 316 STAINLESS STEEL BOLTS AND NUTS ONLY.
10. ALL DISCHARGE FITTINGS TO BE PVC RESTRAINED JOINT.
11. ALL SEWER LINES ENTERING AND EXITING MANHOLES SHALL BE SEALED UTILIZING RUBBER BOOTS WITH 316 STAINLESS STEEL STRAPS AND COVERED WITH HYDRAULIC CEMENT OR OTHER CITY APPROVED INFILTRATION LIMITING METHODS.
12. NO SPLICES OR JUNCTION BOXES ARE ALLOWED FOR BALL FLOAT CORD INSTALLATION.
13. ELECTRICAL PERMIT TO BE OBTAINED FROM CITY OF PORT ORANGE (OR APPROPRIATE JURISDICTION) PRIOR TO BEGINNING WORK ON ANY ELECTRICAL WIRING, EQUIPMENT, ETC. ALL ELECTRICAL WIRING TO COMPLY WITH NATIONAL ELECTRICAL CODE.
14. EMERGENCY ELECTRICAL RECEPTACLE REQUIRED TO BE INSTALLED ON ELECTRICAL EQUIPMENT RACK.
15. EMERGENCY "HIGH LEVEL" WET WELL SOLID ALARM LIGHT REQUIRED. NO HORN OR AUDIBLE ALARM REQUIRED.
16. LINKABLE FUSED ELECTRICAL DISCONNECT REQUIRED.
17. ALL LIFT STATION WIRING SHALL BE STANDARD COPPER. THREE PHASE POWER AND MOTORS REQUIRED.
18. DEVELOPER/CONTRACTOR TO PAY ALL INITIAL ELECTRICAL CONNECTION CHARGES, ETC. ON THE DAY OF FINAL ACCEPTANCE BY THE CITY, ALL FUTURE MONTHLY ELECTRICAL BILLS TO BE TAKEN OVER BY THE CITY OF PORT ORANGE PUBLIC UTILITIES DEPT. PLEASE CONTACT THE PUBLIC UTILITIES DEPARTMENT AT (386) 506-5750 TO TRANSFER POWER BILL OVER TO THE CITY.
19. LIFT STATION ENCLOSURE SHALL BE 6' HIGH BLACK PLASTIC COATED CHAIN LINK FENCE, WOODEN SHADOW BOX FENCE, OR MASONRY WALL, AS APPROVED BY THE CITY OF PORT ORANGE COMMUNITY DEVELOPMENT DEPARTMENT. THE MASONRY WALL SHALL BE IN COMPLIANCE WITH THE ARCHITECTURAL AND LANDSCAPE REQUIREMENTS OF THE LDC. ANY SPECIAL FENCING APPROVED AND INSTALLED SHALL BE MAINTAINED BY THE PRIVATE ENTITY RESPONSIBLE. THE ENCLOSURE SHALL BE INSTALLED WITH A MINIMUM OF 24" CLEARANCE FROM ALL ELECTRICAL / MECHANICAL EQUIPMENT.
20. ALL GROUND SURROUNDING THE LIFT STATION MUST BE GRADED IN #57 STONE. FINAL ACCEPTANCE OF THE LIFT STATION WILL NOT BE GIVEN UNTIL EFFECTIVE EROSION AND POSITIVE DRAINAGE CONTROL HAVE BEEN PROVIDED
21. LIFT STATION INSPECTIONS SHALL BE SCHEDULED AND COORDINATED THROUGH THE CITY'S SITE INSPECTOR 48 HOURS IN ADVANCE. IF DETERMINED BY THE CITY'S INSPECTOR THAT ALL WORK IS COMPLETE AND READY, THE CONTRACTOR MAY SCHEDULE THE STATION START-UP.
22. THE CONTRACTOR WILL NOTIFY, AT A MINIMUM, THE CITY UTILITIES ENGINEER, ENGINEER OF RECORD, POWER COMPANY, DATA FLOW, AND PUMP SUPPLIER OF THE OFFICIAL START-UP DATE AND TIME.

| | | |
|---|---|---|
| | STANDARD CONSTRUCTION DETAIL<br>SANITARY SEWER LIFT STATION NOTES<br>(CONTINUED)<br>REV. 12/18 | FILE NAME<br>S2.DOC<br>DETAIL REF:<br>S-2.1 |

23. LIFT STATION START-UP AND ACCEPTANCE PROCEDURES:
   - BEFORE FINAL APPROVAL OR ACCEPTANCE OF ANY PUMP STATION BY THE CITY, THE CONTRACTOR SHALL PERFORM A STATION START-UP TEST IN THE PRESENCE OF CITY'S REPRESENTATIVE AND/OR INSPECTOR TO DEMONSTRATE SATISFACTORY PERFORMANCE OF ALL EQUIPMENT AND APPURTENANCES AND THAT THE STATION IS CONSTRUCTED IN ACCORDANCE WITH THE APPROVED PLANS AND STANDARD CONSTRUCTION DETAILS.
   - REPRESENTATIVES FROM THE PUMPING EQUIPMENT MANUFACTURER, DATA FLOW TELEMETRY, AND ELECTRICAL CONTRACTOR SHALL BE PRESENT AT THE PUMP STATION START-UP TEST.
   - CONTRACTOR OR ENGINEER OF RECORD SHALL PROVIDE A FORMAL TEST PROCEDURE AND FORMS FOR RECORDING DATA FOR THE START-UP TEST.
   - THE RECORDED FIELD DATA SHALL BE SUBMITTED TO THE PUBLIC UTILITIES DEPARTMENT BY THE ENGINEER OF RECORD ALONG WITH A LIST OF ALL PUNCH LIST ITEMS OUTSTANDING.
   - IN THE EVENT THAT THE STATION OR ANY OF IT'S ASSOCIATED COMPONENTS ARE DETERMINED TO BE DEFICIENT, THE CITY RESERVES THE RIGHT TO REQUIRE A COMPLETE NEW START-UP WITH ALL PARTIES NOTED ABOVE PRESENT.
   - THE ENGINEER OF RECORD SHALL PROVIDE THREE (3) PAPER COPIES, ONE (1) PDF FILE AND ONE (1) DWG FILE OF THE STATION AS-BUILTS AND OPERATION AND MAINTENANCE MANUAL TO THE PUBLIC UTILITIES DEPARTMENT PRIOR TO FINAL ACCEPTANCE OF THE LIFT STATION.
   - LIFT STATIONS SHALL ONLY BE CONSIDERED AS ACCEPTED BY THE CITY UPON WRITTEN CONFIRMATION BY THE PUBLIC UTILITIES DEPARTMENT TO THE ENGINEER OF RECORD.

| | | |
|---|---|---|
| | STANDARD CONSTRUCTION DETAIL<br>SANITARY SEWER LIFT STATION NOTES<br>REV. 12/18 | FILE NAME<br>S2.DOC<br>DETAIL REF:<br>S-2.2 |

ALL MATERIALS AND INSTALLATION METHODS USED FOR LAND DEVELOPMENT CODE REQUIRED IMPROVEMENTS FOR SUBDIVISIONS AND SITE PLANS SHALL BE IN CONFORMANCE WITH THE CITY, FDOT STANDARD SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION (LATEST EDITION) AND THE FDOT ROADWAY AND TRAFFIC DESIGN STANDARDS (LATEST EDITION).

1. ALL STORM SEWERS AND CULVERTS LOCATED IN ROADWAY RIGHTS-OF-WAY AND ROADWAY EASEMENTS SHALL BE:
   A. CLASS III (MIN.) REINFORCED CONCRETE PIPE (RCP), IN ACCORDANCE WITH ASTM C76, C655, C506 AND C507. ALL RCP JOINTS SHALL BE ENTIRELY WRAPPED WITH FILTER FABRIC WITH A MINIMUM WIDTH OF 24" AND A MINIMUM OF 24" OVERLAP SECURED WITH PLASTIC OR STAINLESS BANDS. GASKETS ALONE ARE NOT PERMITTED AS AN EQUIVALENT SUBSTITUTE FOR MEETING THIS REQUIREMENT. ALL JOINTS SHALL BE RUBBER GASKETED FOR BOTH ROUND AND ELLIPTICAL PIPE.
   B. CORRUGATED, SMOOTH INTERIOR WALL, HIGH DENSITY POLYETHYLENE (HDPE), UP TO 60" DIAMETER, IN ACCORDANCE WITH ASTM F2306. ALL JOINTS WILL BE IN ACCORDANCE WITH MANUFACTURER'S SPECIFICATIONS.
   C. CORRUGATED, SMOOTH INTERIOR WALL, POLYPROPYLENE (PP), UP TO 60" DIAMETER, IN ACCORDANCE WITH ASTM F2881 ALL JOINTS WILL BE IN ACCORDANCE WITH MANUFACTURER'S SPECIFICATIONS.
   D. CORRUGATED, SMOOTH INTERIOR WALL, PVC, UP TO 36" DIAMETER, IN ACCORDANCE WITH ASTM F949 ALL JOINTS WILL BE IN ACCORDANCE WITH MANUFACTURER'S SPECIFICATIONS.
2. STORM SEWERS AND CULVERTS LOCATED OUTSIDE OF ROADWAY RIGHTS-OF-WAY AND ROADWAY EASEMENTS MAY BE MADE OF ALTERNATE MATERIALS, INCLUDING SDR26 TO SDR35 PVC IN ACCORDANCE WITH ASTM D-3034.
3. DEPTH OF COVER MEASURED TO THE TOP OF PIPE (NOT INCLUDING THE BELL JOINT) SHALL BE A MINIMUM OF 12". DEVIATION FROM THIS REQUIREMENT MAY BE ALLOWED BY INCREASING THE PIPE'S STRUCTURAL CAPACITY. THIS DEVIATION MUST BE SPECIFIED ON THE PLANS APPROVED FOR CONSTRUCTION AND SUBSEQUENTLY REFLECTED ON THE SHOP DRAWINGS AND AS-BUILT PLANS.
4. ALL STORM DRAINAGE PIPES LOCATED IN ROADWAY RIGHTS-OF-WAY AND ROADWAY EASEMENTS SHALL BE A MINIMUM OF 15" DIAMETER OR EQUIVALENT AND BE DESIGNED FOR A MINIMUM OF A 25 YEAR - 24 HOUR STORM. STORM DRAINAGE PIPES SMALLER THAN 15" ARE PERMITTED ON PRIVATE SITE PLANS PROVIDED MAINTENANCE IS PERFORMED BY THE OWNER.
5. STORM INLETS, MANHOLES, AND CATCH BASINS SHALL BE EITHER POURED IN PLACE OR PRECAST REINFORCED CONCRETE. STRUCTURES SHALL BE REQUIRED AT EACH CHANGE OF PIPE SIZE OR CHANGE IN PIPE DIRECTION. ALL STRUCTURES SHALL BE IN COMPLIANCE WITH FDOT DRAINAGE INDEX 200. CAST IN PLACE STRUCTURES SHALL HAVE 8" THICK WALLS AND PRECAST STRUCTURES SHALL HAVE 6" THICK WALLS. THESE DIMENSIONS MUST BE REFLECTED ON BOTH SHOP AND AS-BUILT DRAWINGS.
6. CULVERTS SHALL BE SLOPED TO MAINTAIN A MINIMUM SELF-CLEANING VELOCITY OF 3' PER SECOND USING MANNING'S "n" CORRESPONDING TO THE PIPE MATERIAL.
7. FOR SITE PLANS, STORM INLET SPACING SHALL BE DESIGNED TO ACCEPT 100% OF THE RUNOFF FROM A RAINFALL INTENSITY OF 4" PER HOUR WITHOUT RESULTING IN PONDING OF WATER AROUND THE INLET.
8. FOR SUBDIVISION PLANS, STORM INLET SPACING, WITH PIPING 15" IN DIAMETER OR LARGER, SHALL BE DESIGNED WITH THE MAXIMUM DISTANCE OF 300' BETWEEN INLETS AND/OR CLEAN-OUT JUNCTION BOXES. FOR ROADWAY SECTIONS HAVING CURB AND GUTTER AND DESIGN SPEEDS OF 45 MPH AND LESS, SPREAD RESULTING FROM A RAINFALL INTENSITY OF 4" PER HOUR SHALL NOT EXCEED ONE-HALF OF THE TRAVEL LANE ADJACENT TO THE GUTTER.
9. RETENTION AREA WATER DEPTHS SHALL BE 4' MINIMUM TO 12' MAXIMUM, MEASURED FROM THE NORMAL WATER LEVEL.

| | | |
|---|---|---|
| | STANDARD CONSTRUCTION DETAIL<br>STORM DRAINAGE DESIGN<br>AND CONSTRUCTION NOTES<br>REV. 12/18 | FILE NAME<br>ST1.DOC<br>DETAIL REF:<br>ST-1 |

17. SEWER LATERAL LOCATIONS SHALL BE MARKED ALONG THE OUTSIDE OF THE CURB WITH A SAW CUT "V", OR BY A METAL TAB SET INTO THE PAVEMENT.
18. THE CONTRACTOR SHALL INSTALL A METALLIZED FOIL LOCATOR TAPE, OR SIMILAR DEVICE AS MAY BE APPROVED BY THE CITY FOR THE FULL LENGTH OF ALL PVC SEWAGE FORCE MAINS. THIS PIPE LOCATOR AID SHALL BE INSTALLED BETWEEN 15" AND 24" BELOW FINISHED GRADE OR AS DIRECTED BY THE MANUFACTURER. TAPE SHALL BE COLOR CODED GREEN FOR SANITARY SEWER AND FORCE MAIN. A CONTINUOUS NO. 10 COPPER HEAD WIRE SHALL BE INSTALLED WITH WIRE BROUGHT UP AT ALL VALVES.

FORCE MAIN SANITARY SEWER:

1. PVC SANITARY SEWER FORCE MAINS, INCLUDING FITTINGS, SHALL BE GREEN PVC AWWA C-900, OR C-905, UNLESS SPECIFICALLY NOTED OTHERWISE. PRESSURE FITTINGS SHALL BE PRESSURE CLASS 150 OR C-907.
2. HDPE SANITARY SEWER FORCE MAINS SHALL BE SDR11 (OR THICKER) UNLESS SPECIFICALLY NOTED OTHERWISE. THE HDPE PIPE SHALL BE SIZED TO MATCH THE EXTERNAL DIAMETER OF THE PVC TO WHICH IT IS ATTACHED. PRESSURE FITTINGS SHALL BE PRESSURE CLASS 150 OR C-907.
3. ALL SANITARY SEWER FORCE MAINS SHALL USE A THRUST RESTRAINT JOINT METHOD IN COMPLIANCE WITH THE DUCTILE IRON PIPE RESEARCH ASSOCIATION GUIDELINES MODIFIED TO ACCOMMODATE PVC PIPE BY FOLLOWING THE RECOMMENDED INCREASE IN RESTRAINT LENGTH CORRESPONDING TO THE INSTALLATION OF POLYETHYLENE WRAP. IN NO INSTANCE SHALL THRUST BLOCKS BE PERMITTED.
4. ALL IN-LINE SANITARY SEWER FORCE MAIN VALVES SHALL BE AWWA C-509 OR C-515 COMPLIANT RESILIENT SEAT VALVES FEATURING AN EPOXY LINED DUCTILE IRON BODY.
5. FORCE MAIN SYSTEMS SHALL BE PRESSURE TESTED AT 100 PSI STATIC PRESSURE FOR A PERIOD OF 2 HOURS PER AWWA STANDARDS.
6. FORCE MAINS SHALL BE FLUSHED, PRESSURE TESTED, PIGGED AND CLEARED FOR SERVICE IN ACCORDANCE WITH THE LATEST AWWA STANDARDS AND THE FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION REQUIREMENTS. THE CONTRACTOR SHALL NOTIFY THE CITY'S DESIGNATED SITE INSPECTOR WHO SHALL COORDINATE WITH CITY PERSONNEL AT THE WATER OR WASTEWATER TREATMENT PLANT (AS APPROPRIATE) AT LEAST 48 HOURS PRIOR TO BEGINNING A FULL-DIAMETER FLUSH OF THE MAINS AND PRIOR TO THE COMMENCEMENT OF PRESSURE TESTING (SUBJECT TO AVAILABILITY).
7. THE CONTRACTOR SHALL BE REQUIRED TO PIG ALL FORCE MAINS AND PRIMARY TRANSMISSION MAINS LOCATED ON COLLECTOR AND ARTERIAL ROADWAYS. LAUNCHING AND EXTRACTION POINTS SHALL BE DETERMINED BY THE CONTRACTOR. ALL PIGGING OPERATIONS SHALL BE WITNESSED BY A PORT ORANGE REPRESENTATIVE.

GRAVITY SANITARY SEWER:

1. ALL GRAVITY SANITARY SEWER LINES IN PUBLIC RIGHTS-OF-WAY SHALL BE GREEN PVC SDR26, ASTM D-3034. SEWER LINES CONSTRUCTED OUTSIDE OF PUBLIC RIGHTS-OF-WAY, WITHIN SIDE YARDS, BACKYARDS, AND OTHER POORLY ACCESSIBLE AREAS SHALL BE CONSTRUCTED OF GREEN AWWA C-900 PVC SDR25. USE OF PLASTIC STYRENE FITTINGS SHALL NOT BE ALLOWED.
2. IN PLACES WHERE A MINIMUM COVER OF 36" CANNOT BE MAINTAINED, AWWA C-900 GREEN PVC SDR25 OR CONCRETE ENCASEMENT SHALL BE USED. WATER LINES, RECLAIMED LINES, AND STORM DRAINAGE CROSSINGS SHALL ALSO FOLLOW THE CONCRETE ENCASEMENT REQUIREMENT PER THESE STANDARDS AND AS PER REGULATORY REQUIREMENTS.
3. GRAVITY SANITARY SEWER PIPE SIZES SHALL BE:
   MAINS - 8" DIAMETER MINIMUM
   COMMERCIAL SERVICE LATERALS WITH MULTIPLE CONNECTIONS - 6" DIAMETER MINIMUM
   SINGLE FAMILY RESIDENTIAL SERVICE LATERALS - 4" DIAMETER
   MULTI-FAMILY RESIDENTIAL SERVICE LATERALS - 6" DIAMETER MINIMUM

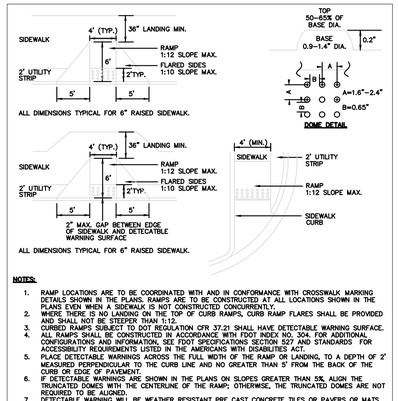
**STANDARD CONSTRUCTION DETAIL**
SIDEWALK CONSTRUCTION REQUIREMENTS
REV. 12/18



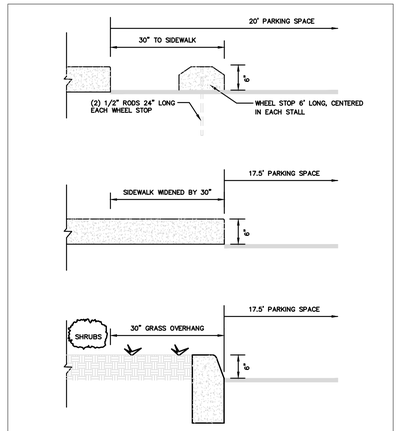
FILE NAME: M6.DWG
DETAIL REF: M-6

NOTES:

1. ALL CONCRETE SIDEWALKS AND BIKE PATHS IN PUBLIC RIGHT-OF-WAYS, PRIVATE RIGHT-OF-WAYS, COMMON AREAS IN RESIDENTIAL SITES, COMMERCIAL, INDUSTRIAL, INSTITUTIONAL, MULTI-FAMILY OR MIXED-USE SITES SHALL BE CONSTRUCTED IN ACCORDANCE WITH THE SPECIFICATIONS LISTED BELOW.
2. EXCEPTION TO THE SPECIFICATIONS BELOW WILL BE FOR PRIVATE RESIDENTIAL SIDEWALKS NOT LOCATED IN A COMMON AREA.
3. SIDEWALKS, BIKE PATHS, RAMPS, AND DRIVEWAY APRONS SHALL BE CONSTRUCTED OF PLAIN PORTLAND CEMENT CONCRETE HAVING A MAXIMUM SLUMP OF 3", A MINIMUM DEVELOPED COMPRESSIVE STRENGTH OF 2,500 PSI IN 28 DAYS, AND A MINIMUM UNIFORM THICKNESS OF 6".
4. 2--#4 METAL REINFORCEMENT BARS WITH MINIMUM 6" OVERLAPS SHALL BE INSTALLED LONGITUDINALLY AT FROM THE EDGE. THE BARS SHALL BE LOCATED AT MID DEPTH OF THE CONCRETE. THE BARS SHALL BE PLACED ON NON FERROUS SPACERS TO ENSURE REQUIRED SEPARATION FROM SUBGRADE.
5. THE EXISTING SUBGRADE SHALL HAVE ALL ORGANIC, LOOSE, AND DELETERIOUS MATTER REMOVED, AND THE REMAINING CLEAN SOIL AND FILL SHALL BE SMOOTH, SOUND, AND SOLID. THE SUBGRADE SHALL BE COMPACTED TO A MINIMUM 95% DENSITY BASED ON MODIFIED PROCTOR DRY TEST PER AASHTO T-180.
6. ALL CONCRETE WORK IN THE RIGHT-OF-WAY SHALL BE INSPECTED BY THE CITY AFTER THE SUBGRADE IS PREPARED AND THE FORMS ARE SET, BUT BEFORE THE CONCRETE PLACEMENT BEGINS.
7. SIDEWALKS SHALL BE PLACED PARALLEL TO AND 12" WITHIN THE RIGHT-OF-WAY LINE, EXCEPT THAT THE CITY MAY APPROVE DEVIATIONS TO SAVE SPECIMEN TREES PROVIDED THAT THE SIDEWALK REMAINS WITHIN THE RIGHT-OF-WAY OR AN APPROVED SIDEWALK EASEMENT ABUTTING THE RIGHT-OF-WAY IS RECORDED.
8. THE TOP OF THE SIDEWALK PARALLEL WITH CURB AND GUTTER SHALL BE AT AN ELEVATION NO LOWER THAN THE CROWN OF THE ADJACENT ROADWAY AND NO HIGHER THAN 6" ABOVE THE CROWN, UNLESS APPROVED BY THE CITY, TO MAKE A MORE NATURAL TRANSITION WITH THE ADJACENT LAND.
9. THE CONCRETE SURFACE SHALL BE BROOM FINISHED TO BE SLIP RESISTANT AND SHALL MATCH AS CLOSELY AS POSSIBLE THE FINISH OF EXISTING ADJACENT SLABS AND ALL EDGES SHALL BE TOOLED TO ELIMINATE SHARP CORNERS.
10. ISOLATION JOINTS (TYPE A JOINTS) SHALL BE PROVIDED BETWEEN EXISTING CONCRETE OR STRUCTURES AND FRESH CONCRETE, TO SEPARATE PEDESTRIAN SECTIONS FROM SECTIONS WHICH WILL ENCOUNTER VEHICLE TRAFFIC, TO SEPARATE FRESH PLACEMENT FROM CONCRETE WHICH HAS SET FOR MORE THAN 60 MINUTES, AND NO FARTHER APART THAN 100'. JOINT MATERIAL SHALL BE PREFORMED JOINT FILLER MEETING FDOT SPECIFICATIONS.
11. CONTROL JOINTS (TYPE B JOINTS) SHALL BE TOOLED INTO THE FRESH CONCRETE TO A DEPTH EQUAL TO 1/4 THE SLAB THICKNESS, 1/8" WIDTH, AND SPACED APART A DISTANCE EQUAL TO THE WIDTH OF THE SLAB OR 48", WHICHEVER IS GREATEST.
12. THE CONTRACTOR SHALL BE RESPONSIBLE FOR PROTECTING THE FINISHED SIDEWALK FROM ALL DAMAGE AND VANDALISM UNTIL THE CITY ACCEPTS OR APPROVES THE SIDEWALK. AFTER WHICH TIME THE OWNER OF THE ABUTTING LAND SHALL BE RESPONSIBLE FOR THE SIDEWALK IN ACCORDANCE WITH THE CITY CODE. ANY SIDEWALK SECTION DAMAGED OR VANDALIZED PRIOR TO ACCEPTANCE OR APPROVAL SHALL BE CUT OUT BETWEEN JOINTS AND REPLACED. REPAIRS ARE NOT ACCEPTABLE.
13. SIDEWALKS LOCATED WITHIN THE RIGHT-OF-WAY SHALL NOT BE TINTED, STAINED, COLORED, OR COATED.
14. ALL FORMS SHALL BE REMOVED PRIOR TO ACCEPTANCE OR APPROVAL AND THE DISTURBED GROUND SHALL BE BACKFILLED, RE-GRADED, AND SODDED SO THAT THE WEAR SURFACE OF THE CONCRETE IS REASONABLY FLUSH WITH THE ADJACENT SOIL GRADE.
15. AT INTERSECTIONS WITH SIDEWALK TO MIAMI CURB CONNECTIONS AT EACH CORNER, THE 3" RISE TO SIDEWALK FINAL GRADE WILL BE OMITTED BETWEEN CONNECTIONS.

**STANDARD CONSTRUCTION DETAIL**
SIDEWALK CONSTRUCTION REQUIREMENTS
REV. 12/18

FILE NAME: M6.DWG
DETAIL REF: M-6.1



NOTES:

1. RAMP LOCATIONS ARE TO BE COORDINATED WITH AND IN CONFORMANCE WITH CROSSWALK MARKING DETAILS SHOWN IN THE PLANS. RAMPS ARE TO BE CONSTRUCTED AT ALL LOCATIONS SHOWN IN THE PLANS EVEN WHEN A SIDEWALK IS NOT CONSTRUCTED CONCURRENTLY.
2. WHERE THERE IS NO LANDING ON THE TOP OF CURB RAMPS, CURB RAMP FLARES SHALL BE PROVIDED AND SHALL NOT BE STEEPER THAN 1:12.
3. CURBED RAMPS SUBJECT TO DOT REGULATION CFR 37.21 SHALL HAVE DETECTABLE WARNING SURFACE.
4. ALL RAMPS SHALL BE CONSTRUCTED IN ACCORDANCE WITH FDOT INDEX NO. 304. FOR ADDITIONAL CONFIGURATIONS AND INFORMATION, SEE FDOT SPECIFICATIONS SECTION 527 AND STANDARDS FOR ACCESSIBILITY REQUIREMENTS LISTED IN THE AMERICANS WITH DISABILITIES ACT.
5. PLACE DETECTABLE WARNINGS ACROSS THE FULL WIDTH OF THE RAMP OR LANDING, TO A DEPTH OF 2' MEASURED PERPENDICULAR TO THE CURB LINE AND NO GREATER THAN 5' FROM THE BACK OF THE CURB OR EDGE OF PAVEMENT.
6. IF DETECTABLE WARNINGS ARE SHOWN IN THE PLANS ON SLOPES GREATER THAN 5%, ALIGN THE TRUNCATED DOMES WITH THE CENTERLINE OF THE RAMP; OTHERWISE, THE TRUNCATED DOMES ARE NOT REQUIRED TO BE ALIGNED.
7. DETECTABLE WARNING WILL BE WEATHER RESISTANT PRE CAST CONCRETE TILES OR PAVERS OR MATS THAT ARE SURFACE APPLIED TO CONCRETE OR ASPHALT SURFACES WITH ADHESIVE AND MECHANICAL FASTENERS.
8. DETECTABLE WARNING COLOR WILL BE COLONIAL OR BRICK RED ON CONCRETE WALKING SURFACES AND SAFETY OR FEDERAL YELLOW ON ASPHALT WALKING SURFACES.

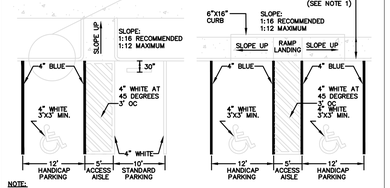
FILE NAME: M12.DWG
DETAIL REF: M-12

**ACCESSIBLE PARKING SPACES SHALL BE PROVIDED IN ACCORDANCE WITH CURRENT FLORIDA STATUTES, INCLUDING THE FOLLOWING DETAILS:**

1. ANY COMMERCIAL REAL ESTATE PROPERTY OR RESIDENTIAL MODEL CENTERS OWNER OFFERING PARKING FOR THE GENERAL PUBLIC SHALL PROVIDE SPECIALLY DESIGNED AND MARKED MOTOR VEHICLE PARKING SPACES FOR THE EXCLUSIVE USE OF PHYSICALLY DISABLED PERSONS WHO HAVE BEEN ISSUED PARKING PERMITS PURSUANT TO STATE LAW.
2. PARALLEL PARKING SPACES SHALL BE LOCATED AT THE BEGINNING OR END OF A BLOCK OR ADJACENT TO ALLEY ENTRANCES. CURBS ADJACENT TO SUCH SPACES SHALL BE OF A HEIGHT WHICH WILL NOT INTERFERE WITH THE OPENING AND CLOSING OF MOTOR VEHICLE DOORS.
3. ACCESSIBLE PARKING SPACES SHALL BE CONSPICUOUSLY OUTLINED IN BLUE PAINT AND SHALL BE POSTED AND MAINTAINED WITH A PERMANENT, ABOVE-GRADE SIGN BEARING THE INTERNATIONAL SYMBOL OF ACCESSIBILITY AND THE CAPTION PARKING BY DISABLED PERMIT ONLY, AND AN ADDITIONAL SIGN STATING THE PENALTY FOR ILLEGAL USE OF THE SPACE. SUCH SIGNS SHALL NOT BE OBSCURED BY A VEHICLE PARKED IN THE SPACE. ALL ACCESSIBLE PARKING MUST BE SIGNED AND MARKED IN ACCORDANCE WITH THE STANDARDS ADOPTED BY THE FLORIDA DEPARTMENT OF TRANSPORTATION.
4. PERPENDICULAR OR DIAGONAL PARKING SPACES SHALL BE A MINIMUM OF 12' WIDE. ALL ACCESSIBLE PARKING SPACES SHALL HAVE A 5' WIDE ADJACENT ACCESS AISLE. PARKING ACCESS AISLES SHALL BE PART OF THE ACCESSIBLE ROUTE TO THE BUILDING OR FACILITY ENTRANCE. TWO ACCESSIBLE PARKING SPACES MAY SHARE A COMMON ACCESS AISLE. PARKED VEHICLE OVERHANGS SHALL NOT REDUCE THE CLEAR WIDTH OF AN ACCESSIBLE CIRCULATION ROUTE.

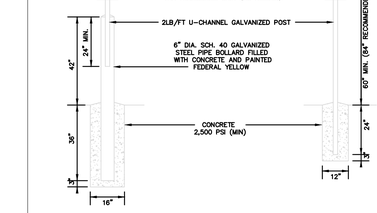


5. ALL SPACES SHALL HAVE AN ACCESSIBLE CURB-RAMP OR CURB-CUT TO ALLOW ACCESS TO THE BUILDING SERVED. IT SHALL BE LOCATED SO THAT USERS WILL NOT BE COMPELLED TO WHEEL BEHIND PARKED VEHICLES, EXCEPTIN ITS OWN VEHICLE.
6. THE MINIMUM NUMBER OF SUCH PARKING SPACES SHALL COMPLY WITH THE FOLLOWING TABLE:

| TOTAL PARKING IN LOT | REQUIRED NUMBER OF ACCESSIBLE SPACES |
|---|---|
| UP – 25 | 1 |
| 26 – 50 | 2 |
| 51 – 75 | 3 |
| 76 – 100 | 4 |
| 101 – 150 | 5 |
| 151 – 200 | 6 |
| 201 – 300 | 7 |
| 301 – 400 | 8 |
| 401 – 500 | 9 |
| 501 – 1000 | 2% OF TOTAL |
| OVER 1000 | 20+1 FOR EACH 100 (OR FRACTION THEREOF) OVER 1000 |

**STANDARD CONSTRUCTION DETAIL**
ACCESSIBLE PARKING SPACES
REV. 12/18

FILE NAME: M13.DWG
DETAIL REF: M-13



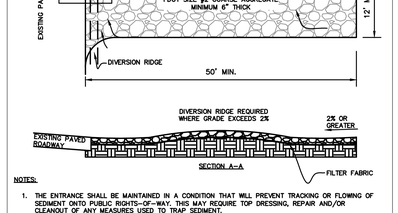
NOTE:

1. RAISED SIDEWALKS ADJACENT TO BUILDINGS MAY BE USED IN LIEU OF WHEEL STOPS, PROVIDING THE SIDEWALK IS NOT LESS THAN 7' WIDE (LDC, CHAPTER 12, SECTION 6(G)(2)).
2. A 44" WIDE MINIMUM CLEAR ACCESSIBLE ROUTE MUST BE PROVIDED AT ALL TIMES.
3. ACCESSIBLE PARKING SPACES AND ACCESS AISLES SHALL BE LEVEL WITH SURFACE SLOPES NOT EXCEEDING 1/4"/1' OR 2.08% IN ALL DIRECTIONS.
4. WHERE PARKING SPACES ARE MARKED WITH LINES, WIDTH MEASUREMENTS OF PARKING SPACES AND ACCESSIBLE AISLES SHALL BE MADE FROM CENTERLINE OF THE MARKINGS,
5. WHERE PARKING SPACES OR ACCESS AISLES ARE NOT ADJACENT TO ANOTHER PARKING SPACE OR ACCESS AISLE, MEASUREMENTS SHALL BE PERMITTED TO INCLUDE THE FULL WIDTH OF THE LINE DEFINING THE PARKING SPACE OR ACCESS AISLE.
6. LINE WIDTHS FOR ACCESSIBILITY SYMBOL AND STRIPING, AND ANGLE OF ACCESS AISLE STRIPING ARE RECOMMENDED MEASUREMENTS.

**STANDARD CONSTRUCTION DETAIL**
ACCESSIBLE PARKING LAYOUT
REV. 12/18

FILE NAME: M14.DWG
DETAIL REF: M-14

BOLLARD/SIGN COMBINATION



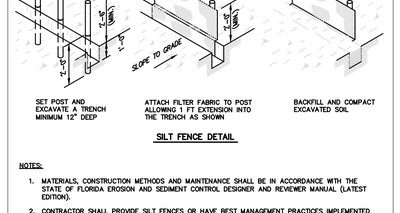
POST MOUNTED SIGN

NOTE:

1. PARKING SPACE SIGNS FOR INDIVIDUALS WITH DISABILITIES SHALL CONFORM TO CURRENT LOCAL, STATE AND FEDERAL CODES AND REGULATIONS.
2. ALL SIGNS SHALL BE DESIGNED TO WITHSTAND WIND SPEED LISTED IN FBC (LATEST EDITION).

**STANDARD CONSTRUCTION DETAIL**
ACCESSIBLE PARKING SIGN,
BOLLARD/SIGN COMBINATION AND
POST MOUNTED
REV. 12/18

FILE NAME: M15.DWG
DETAIL REF: M-15



NOTES:

1. THE ENTRANCE SHALL BE MAINTAINED IN A CONDITION THAT WILL PREVENT TRACKING OR FLOWING OF SEDIMENT ONTO PUBLIC RIGHTS-OF-WAY. THIS MAY REQUIRE TOP DRESSING, REPAIR AND/OR CLEANOUT OF ANY MEASURES USED TO TRAP SEDIMENT.
2. WHEN PASSIVE MEANS FAIL TO PREVENT TRACKING OF SEDIMENT ONTO PUBLIC RIGHTS-OF-WAY, WHEELS SHALL BE CLEANED PRIOR TO ENTERING ONTO PUBLIC RIGHTS-OR-WAY.
3. WHEN WASHING IS REQUIRED, IT SHALL BE DONE ON AN AREA STABILIZED WITH CRUSHED STONE THAT DRAINS INTO AN APPROVED SEDIMENT TRAP OR SEDIMENT BASIN.
4. ALL MATERIALS SPILLED, DROPPED, OR TRACKED ONTO PUBLIC RIGHTS-OF-WAY (INCLUDING T.G.C.E. AGGREGATE AND CONSTRUCTION MUD) SHALL BE REMOVED DAILY, OR MORE FREQUENTLY, IF SO DIRECTED.
5. A SOIL TRACKING PREVENTION DEVICE IS AN ACCEPTABLE ALTERNATIVE TO THIS DETAIL. REFERENCE FDOT INDEX 106 FOR DETAILS.

**STANDARD CONSTRUCTION DETAIL**
TEMPORARY GRAVEL
CONSTRUCTION ENTRANCE
REV. 12/18

FILE NAME: M21.DWG

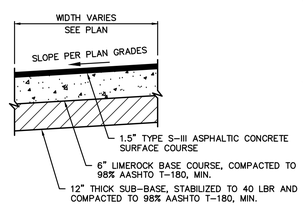
SILT FENCE DETAIL

NOTES:

1. MATERIALS, CONSTRUCTION METHODS AND MAINTENANCE SHALL BE IN ACCORDANCE WITH THE STATE OF FLORIDA EROSION AND SEDIMENT CONTROL DESIGNER AND REVIEWER MANUAL (LATEST EDITION).
2. CONTRACTOR SHALL PROVIDE SILT FENCES OR HAVE BEST MANAGEMENT PRACTICES IMPLEMENTED AS REQUIRED AT ALL STORMWATER DISCHARGE POINTS FOR EROSION CONTROL AND SEDIMENT CONTROL DURING CONSTRUCTION.
3. CONTRACTOR SHALL ROUGH GRADE STORMWATER SWALES AND RETENTION AREAS PRIOR TO CONSTRUCTION OF SITE IMPROVEMENTS.
4. CONTRACTOR SHALL MEET ALL PERMIT CONDITIONS AS ESTABLISHED BY THE CITY OF PORT ORANGE AND ALL OTHER APPLICABLE AGENCIES, INCLUDING BUT NOT LIMITED TO COUNTY, FDOT, AND THE SJRWMD.
5. CONTRACTOR WILL BE ALLOWED TO USE A SMALL PIECE OF EQUIPMENT UP 6' WIDTH AND 1.5 TON WEIGHT, TO CLEAR A NARROW PATH TO INSTALL THE SILT FENCE.



**STANDARD CONSTRUCTION DETAIL**
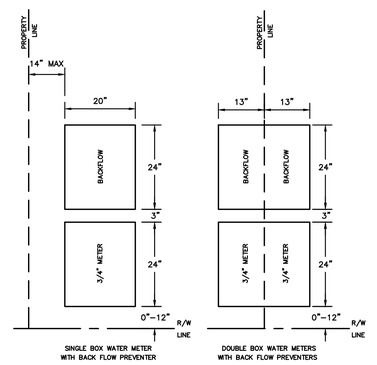
TREE PROTECTION BARRICADE

REV. 12/18

FILE NAME: M25.DWG
DETAIL REF: M-25



NOTES:
1. PIPE BEDDING: SELECT COMMON FILL COMPACTED TO 95% OF THE MAXIMUM DENSITY AS PER AASHTO T-180.
2. TRENCH BACKFILL: COMMON FILL COMPACTED TO 95% OF THE MAXIMUM DENSITY AS PER AASHTO T-180. 98% DENSITY REQUIRED UNDER DRIVEWAYS, PAVEMENT AND STRUCTURES.
3. PIPE BEDDING UTILIZING SELECT COMMON FILL OR BEDDING ROCK IN ACCORDANCE WITH TYPE "A" BEDDING AND TRENCHING DETAIL MAY BE REQUIRED AS DIRECTED BY THE CITY.
4. (+) 15" MAX. FOR PIPE DIAMETER LESS THAN 24", AND 24" MAX. FOR PIPE DIAMETER 24" AND LARGER.
5. WATER SHALL NOT BE PERMITTED IN THE TRENCH DURING CONSTRUCTION.
6. ALL PIPE TO BE INSTALLED WITH BELL FACING UPSTREAM TO THE DIRECTION OF FLOW.
7. REFER TO OSHA REQUIREMENTS FOR SLOPING, SHEETING AND BRACING IN EXCAVATIONS.
8. FINAL RESTORATION IN IMPROVED AREAS SHALL BE IN COMPLIANCE WITH ALL APPLICABLE REGULATIONS OF GOVERNING AGENCIES. SURFACE RESTORATION WITHIN RIGHT-OF-WAY SHALL COMPLY WITH REQUIREMENTS OF RIGHT-OF-WAY UTILIZATION REGULATIONS AND ROAD CONSTRUCTION SPECIFICATIONS.
9. GRAVITY SEWERS SHALL UTILIZE BEDDING ROCK WHERE UNSUITABLE MATERIAL EXISTS. BEDDING DEPTH SHALL BE 4" MINIMUM FOR PIPE DIAMETER LESS THAN 15", AND 6" MINIMUM FOR PIPE DIAMETER 18" AND LARGER.
10. DEPTH FOR REMOVAL OF UNSUITABLE MATERIAL SHALL GOVERN DEPTH OF BEDDING ROCK BELOW THE PIPE. CITY SHALL DETERMINE IN THE FIELD REQUIRED REMOVAL OF UNSUITABLE MATERIAL TO REACH SUITABLE FOUNDATION.

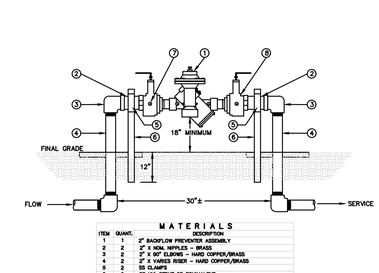
MATERIALS
2" - COPPER OR BRASS
4" TO 10" - DIP



| ITEM | QUANT. | DESCRIPTION |
|---|---|---|
| 1 | 2 | 90° BEND (FLG. & FLG) |
| 2 | 1 | 2"-10" BACKFLOW PREVENTER |
| 3 | 2 | 90° BEND (MJ & MJ) |

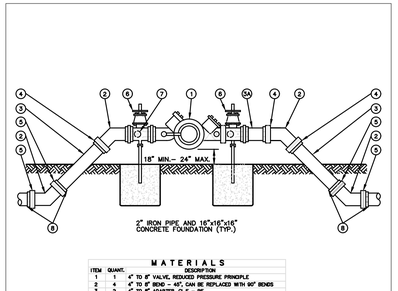
NOTES:
1. ALL DEVICES SHALL BE PAINTED TO COMPLY WITH FLORIDA ADMINISTRATIVE CODE CHAPTER 62-555 AND THE FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION CROSS-CONNECTION CONTROL PROGRAM, AS FOLLOWS:
   WATER MAIN - BLUE
   FIRE MAIN - RED
   RECLAIM WATER MAIN - PURPLE
2. LENGTH OF SPOOL PIECES BEFORE AND AFTER METER BASED ON METER MANUFACTURER'S RECOMMENDATION.

**STANDARD CONSTRUCTION DETAIL**
2"-10" METER WATER SERVICE W/ BACKFLOW PREVENTER

REV. 12/18

FILE NAME: W10.DWG
DETAIL REF: W-10

MATERIALS



| ITEM | QUANT. | DESCRIPTION |
|---|---|---|
| 1 | 1 | 2" BACKFLOW PREVENTER ASSEMBLY |
| 2 | 2 | 2" X NOM. NIPPLES - BRASS |
| 3 | 2 | 2" X 90° ELBOWS - HARD COPPER/BRASS |
| 4 | 2 | 2" X VARIES RISER - HARD COPPER/BRASS |
| 5 | 2 | SS CLAMPS |
| 6 | 2 | SS UNI-STRUT OR EQUIVALENT |
| 7 | 2 | TEST COCK |
| 8 | 2 | BALL VALVE |

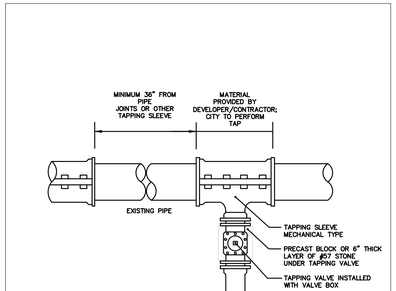
NOTES:
1. ALL 2" AND SMALLER BACKFLOW PREVENTER MUST BE STABILIZED WITH CHANNEL OR NON-CORROSIVE UNI-STRUT OR EQUIVALENT AND APPROPRIATE CLAMPS.
2. DOUBLE CHECK VALVES MAY BE INSTALLED IN UNDERGROUND VAULTS.
3. ALL COMMERCIAL PROPERTIES ARE REQUIRED BY ORDINANCE TO HAVE A BACKFLOW DEVICE INSTALLED AND ANNUALLY TESTED WITH PASSING RESULTS FORWARDED TO THE CITY PUBLIC UTILITIES DEPARTMENT.
4. FOR FURTHER INFORMATION CONCERNING BACKFLOW PREVENTERS SEE CITY OF PORT ORANGE "MANUAL OF CROSS-CONNECTION CONTROL."
5. ALL DEVICES SHALL BE PAINTED TO COMPLY WITH FLORIDA ADMINISTRATIVE CODE CHAPTER 62-555 AND THE FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION CROSS-CONNECTION CONTROL PROGRAM. BLUE FOR DOMESTIC WATER, PURPLE FOR RECLAIMED WATER AND RED FOR FIRE LINE.

**STANDARD CONSTRUCTION DETAIL**
2" BACKFLOW PREVENTER DOUBLE CHECK OR REDUCED PRESSURE

REV. 12/18

FILE NAME: W12.DWG
DETAIL REF: W-12

MATERIALS



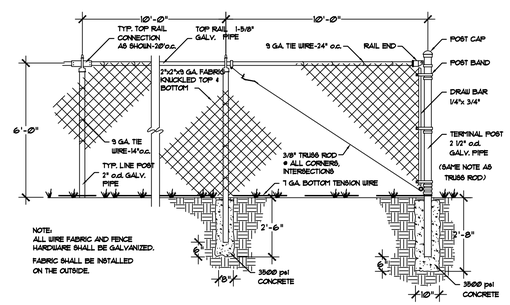
| ITEM | QUANT. | DESCRIPTION |
|---|---|---|
| 1 | 1 | 4" TO 6" VALVE, REDUCED PRESSURE PRINCIPLE |
| 2 | 4 | 4" TO 6" BEND - 45°, CAN BE REPLACED WITH 90° BENDS |
| 3 | 2 | 4" TO 6" ADAPTER, CI x - PE |
| 3A | 1 | 4" TO 6" ADAPTER, CI F - PE (DFT.) |
| 4 | 3 | 4" TO 6" ADAPTER FLANGE DIP |
| 5 | 2 | 4" TO 6" ADAPTER FLANGE PVC (DR18) |
| 6 | 2 | 4" TO 6" VALVE, GATE, CI, F-F |
| 7 | 1 OR 2 | TEST COCK |
| 8 | 2 | MJ 45° OR 90° MEGALUG OR RESTRAINED JOINT |

NOTES:
1. FIELD ADJUST AND CUT ITEM 3 TO THE PROPER LENGTH.
2. DO NOT INTERCHANGE ITEMS 4 AND 5.
3. ALL COMMERCIAL PROPERTIES ARE REQUIRED BY ORDINANCE TO HAVE A BACKFLOW DEVICE INSTALLED AND ANNUALLY TESTED WITH PASSING RESULTS FORWARDED TO THE CITY PUBLIC UTILITIES DEPARTMENT.
4. FOR FURTHER INFORMATION CONCERNING BACKFLOW PREVENTERS SEE CITY OF PORT ORANGE "MANUAL OF CROSS-CONNECTION CONTROL."
5. ALL DEVICES SHALL BE PAINTED TO COMPLY WITH FLORIDA ADMINISTRATIVE CODE CHAPTER 62-555 AND THE FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION CROSS-CONNECTION CONTROL PROGRAM. BLUE FOR DOMESTIC WATER, PURPLE FOR RECLAIMED WATER AND RED FOR FIRE LINE.

**STANDARD CONSTRUCTION DETAIL**
4"-8" BACKFLOW PREVENTER REDUCED PRESSURE

REV. 12/18

FILE NAME: W13.DWG
DETAIL REF: W-13



NOTES:
1. TAPPING OF MAINS SHALL BE PERFORMED BY THE CITY AND BILLED IN ACCORDANCE WITH THE ADOPTED FEE RESOLUTION. ALL MATERIALS TO BE PROVIDED BY DEVELOPER/CONTRACTOR.
2. EXCAVATIONS FOR TAPPING WORK TO BE SAFE, SECURE AND DRY, WITH 6" THICK (MIN.) LAYER OF #57 STONE AT BOTTOM.
3. CITY ALLOWS ONLY 1", 2", 4", 6", 8", 10" AND 12" TAPS.
4. REQUIRED RESTRAINED JOINTS TO BE INSTALLED - THRUST BLOCKS ARE NOT PERMITTED.
5. EPOXY COATED STEEL, STAINLESS STEEL SLEEVES WITH 316 STAINLESS STEEL BOLTS ARE PERMITTED FOR ALL TYPES OF PIPE MATERIALS.
6. ALL VALVES 2" OR GREATER SHALL BE GATE VALVES. CORPORATION STOPS ALLOWED ON BLOW-OFFS ONLY.

## *XYLEM, INC (H-20 GP)*
### *w/ BATTERY BACK-UP FOR AUDIO AND VISUAL ALARMS*

SCOPE: *Supply one complete H-20 LP Pre-Fab Lift Station, per design.*

*Pumps shall be capable of pumping domestic & commercial sewage.*

**Complete system shall be supplied by:**
**XYLEM, INC**

**NO SUBSTITUTIONS — NO ALTERNATES**

*The H-20 Load Rated Fiberglass Wetwell Must Be Manufactured By L.F. Manufacturing, Giddings, Texas, Which Includes A Written 20 Yr. Warranty*

*Certification of the wetwell H-20 load rating must be supplied with submittals. H-20 certification must be signed and sealed by an engineer registered in the State of Florida.*
*After the H-20 load rated wetwell has been installed, the ASTM Certification Number and Serial Tracking Number must be visible.*

PUMPS: *The submersible pumps shall be manufactured by Flygt Corporation.*
*"The pumps shall be installed in the H-20 GP FRP wetwell utilizing a dual slide rail system. The pumps shall be capable of handling solids, fibrous materials, heavy sludge, and other matter typically found in wastewater.*
*Major pump components shall be grey cast iron, ASTM A-48, Class 35B. The pump motor shall be NEMA B design and housed in an air-filled watertight chamber. The motor shall be capable of handling continuous duty and class H insulation by use of the trickle impregnation method. The motor shall be heat-shrink fit into the stator housing. The use of bolts, pins, or other fastening devices is not acceptable. The cable entry seal shall consist of a cylindrical elastomer grommet flanked by washers. Epoxies, silicones, or other sealing systems are not acceptable. Thermal switches set to open at 125 degrees C shall be embedded in the stator end coils to monitor the temperature of each phase winding. The motor horsepower shall be adequate so that the pump is non-overloading throughout the entire pump performance curve from shut-off through run-out.*

*The pump shall be provided with a dual mechanical seal. Both upper and lower seal assemblies shall consist of a stationary tungsten-carbide ring and a rotating tungsten-carbide ring. Other seal materials are not considered acceptable."*

DUPLEX CONTROL PANEL:
*Control panel shall be assembled and built by a TUV (UL508A CERTIFIED) manufacturing facility.*
*The Enclosure shall be NEMA 4X, minimum 30" high x 30" wide x 15" deep Fiberglass with padlockable draw latches.*
*The enclosure shall have external mounting feet to allow for wall mounting. All hardware shall be stainless steel.*

*The following components shall be mounted through the enclosure:*
*1- ea. Red Alarm Beacon (Light)*
*1- ea. Alarm Horn*
*1- ea. Generator Receptacle w/ weatherproof cover*
*1- ea. Alarm Silence Pushbutton*

*The backpanel shall be fabricated from .125, 5052-H32 marine alloy aluminum. All components shall be mounted by machined stainless steel screws.*

*The following components shall be mounted to backpanel:*
*2- ea. Motor Contactors*
*1- ea. Volt Monitor (Single Phase) Phase Monitor (Three Phase)*
*1- ea. Control Transformer (480 Volt Only)*
*1- ea. Silence Relay*
*1- ea. Duplex Alternator*
*1- ea. Flygt BOACSAH Battery Back-Up w/ Smart Charger (Per DEP)*
*2/- ea. Terminals For Field Connections*
*6- ea. Terminals For Motor Connections (Single Phase Only)*
*3- ea. Grounding Lugs*

*The innerdoor shall be fabricated from .080, 5052-H32 marine alloy aluminum. The innerdoor shall have a continuous aluminum piano hinge.*

*The following components shall be mounted through the innerdoor:*
*1- ea. Main Circuit Breaker*
*1- ea. Emergency Circuit Breaker*
*1- ea. Mechanical Interlock For Emergency And Main Breakers*
*2- ea. Short Circuit Protectors*
*1- ea. Control Circuit Breaker*
*1- ea. Hand-Off-Auto Selector Switches*
*1- ea. Pump Run Pilot Lights*
*1- ea. Power On Pilot Light*
*2- ea. Elapse Time Meters (Non-Resetable)*
*1- ea. GFI Duplex Convenience Outlet*

*COMPONENT SPECIFICATIONS:*
*All circuit breakers shall be molded thermal magnetic.*
*The mechanical interlock shall prevent the normal and emergency main breakers being energized at the same time.*
*An emergency generator receptacle shall be supplied in accordance with DEP standards. The generator receptacle shall be adequately sized to meet the equipment operating conditions.*

*NEUTRAL TO BE SUPPLIED FOR BOTH 230V 3PHASE OR 230V SINGLE PHASE POWER*

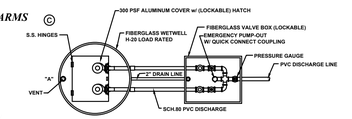
*All motor short circuit protection devices must provide for under-voltage release and class 10 overload protection on all three phases. Visable trip indication, test, and reset capability must be provided without opening inner door.*
*Open frame, across the line, contactors shall be rated per IEC standards and properly sized per the motor requirements.*
*Contactors shall provide for safe touch power and control terminals.*
*Lightning Arrestor shall meet or exceed the requirements of ANSI/IEEE Std. C62.21-1984 section 8.6.1, and 8.7.3 and shall be supplied by electrician and mounted on the bottom side of the backpanel adjacent to the main circuit breaker.*
*A voltage monitor shall be supplied for single phase service.*
*A phase monitor shall be supplied for (3) phase service.*
*A green pilot light shall be supplied for each motor. The pilot light shall illuminate each time the motor is called to run. Each pump shall have an Elapse Time Meter to record the accumulated run time. The ETM shall be 2" diameter, non-resettable, six digit, totally encapsulated unit.*
*A Red pilot light shall be supplied for control power. The pilot light shall illuminate when the control power is available inside the control panel.*
*Relays shall be ice-cube plug in type. Relay contacts shall be rated 10 amp minimum, DPDT.*
*Twenty (20) terminals shall be supplied for field connections.*
*The terminals shall be rated 25 amps minimum.*
*Each motors over-temperature contact shall be connected to the terminal strip and shall open a contact to de-energize the appropriate motor upon a high temperature within the motor.*
*A 15 Amp GFI duplex receptacle shall be supplied and mounted on the inner door.*
*Fuses shall be properly supplied and appropriately sized for each motor and for service entrance.*

*Nameplates for the innerdoor and back panel shall be of a graphic design, specifically depicting the intent for each device.*

*MISCELLANEOUS: All wiring on the backpanel shall be contained within the wiring duct. All wiring between the innerdoor and the backpanel shall be contained with in a plastic spiral wrap.*
*Each wire shall have a wire number at each end to correspond to the as built drawing for field troubleshooting.*
*The control panel shall be assembled by a TUV (UL508A Certified) manufacturing facility.*

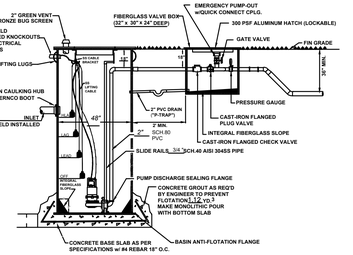
*FASTNERS & APPURTANCES: All fasternes, lifting cables, float cable bracket, hinges, and appurtances shall be made of AISI 304SS.*
*A 304SS slide/latch assembly shall be provided tor holding the doors open on the wetwell and valve box.*
*Slide rails shall be made of SCH.40 AISI 304SS pipe.*
*Pump lifting cables shall be made of AISI 304 SS.*

*H-20 LOAD RATED WETWELL WITH LIFTING LUGS:*
*The fiberglass wetwell must be H-20 load rated with integral lifting lugs, and shall have a bolt down cover, and valve box.*
*Certification of the H-20 load rating must be supplied at the time of submittals to Engineer.*
*The wetwell shall be manufactured of fiberglass reinforced polyester (FRP) of depth and diameter as shown on the lift station elevation detail. The wall thickness shall be adequate for the depth of the wetwell to maintain the H-20 LOAD RATING.*



*EXECUTION:*
*Installation shall be in strict accordance with the manufacturer's recommendations in the locations shown on the drawing.*

*INSPECTION & TESTING: A factory representative shall be provide for a one (1) time start-up and shall have complete knowledge of the proper operation and maintenance of complete system.*
*Megger the motors. The pump motors shall be megged out prior to the start-up to ensure that the insulation of the pump motor/cable is intact.*
*The pump controls and pumps shall be checked for mechanical reliability and proper operation.*



| PUMP DATA | | ELEVATIONS | |
|---|---|---|---|
| PRIMARY PUMP CAPACITY | 29.6 GPM | TOP OF WETWELL | 26.1 |
| PRIMARY TDH | 23.82 TDH | INLET INVERT | 22.16 |

**ELECTRICIAN NOTES:**
1. DRAWING NOT TO SCALE
2. ALL ELECTRICAL WORK SHALL BE IN ACCORDANCE WITH LOCAL CODES
3. ELECTRICIAN SHALL SEAL OFF CONDUIT RUNS
4. ELECTRICIAN TO MOUNT LIGHTNING ARRESTOR AT SWITCH DISCONNECT
5. CONTRACTOR SHALL VERIFY POWER SOURCE PRIOR TO ORDERING EQUIPMENT
6. NEUTRAL TO BE SUPPLIED FOR 230V-3 PHASE OR 230V-SINGLE PHASE POWER.

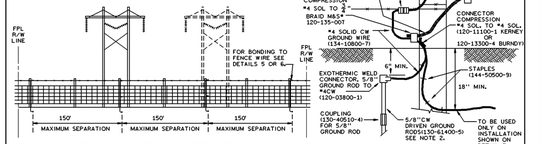
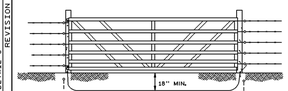
# GROUNDING OF FIELD WIRE & BARBED WIRE TYPE FENCES AND GATES



PRELIMINARY REVISION 4

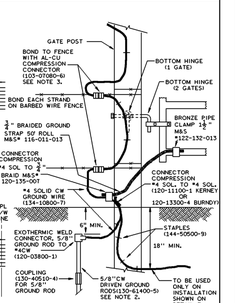
| NO | DATE | REVISION | BY | CH |
|---|---|---|---|---|
| 4 | 6-17-92 | 20010691: REVD NOTES; DELETED DETAIL 4. | JR | JH |
| 3 | 6-17-92 | 20004686: REVD DETAIL 5 | GMH | JH |
| 2 | 6-17-92 | SCE30893: ADDED NEW NOS. NUMBERS IN DETAIL 5 | JT | CH |
| 1 | 6-17-92 | | BT | CH |

DETAIL 1



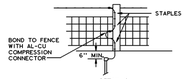
LOCATION OF GROUNDS ON FENCES PARALLEL TO AND WITHIN FPL RIGHT-OF-WAY

GROUND FENCE AT POST NEAREST TO THE CENTER LINE OF EACH TRANSMISSION LINE AND AT INTERVALS OF NOT MORE THAN 150 FEET ACROSS THE WIDTH OF FPL RIGHT-OF-WAY. GROUND FENCE AT FIRST POST INSIDE FPL RIGHT-OF-WAY ON EACH SIDE.



DETAIL 2

LOCATION OF GROUNDS ON FENCES THAT CROSS FPL RIGHT-OF-WAY



DETAIL 3

GROUNDING GATES IN FENCES THAT CROSS FPL RIGHT-OF-WAY

DETAIL 5

FENCE POST AND GATE POST GROUNDING

DETAIL 6

LOCATION OF BONDS ON "FIELD-WIRE" FENCES

NOTES:

1. FENCES AND GATES CROSSING OR PARALLEL AND WITHIN FPL TRANSMISSION RIGHT-OF-WAY SHALL BE GROUNDED AS SPECIFIED BELOW.
   (a) FENCES LONGER THAN 20 FEET PARALLEL AND WITHIN A FPL RIGHT-OF-WAY SHALL BE GROUNDED AT A MINIMUM OF 2 LOCATIONS WITH A MAXIMUM SEPARATION OF 500 FEET BETWEEN GROUNDS. SEE DETAIL 1.
   (b) FENCES THAT CROSS FPL RIGHT-OF-WAY SHALL BE GROUNDED AS SHOWN ON DETAIL 2.
   (c) GATES SHALL BE GROUNDED AS SHOWN IN DETAIL 3.
2. INSTALL ⅝ INCH DIAMETER COPPERCLAD ROD OR RODS TO OBTAIN A DRIVEN GROUND OF 25 OHMS OR LESS RESISTANCE. THE TOP OF THE DRIVEN GROUND SHALL BE 6 INCHES BELOW THE GROUND LINE.
3. USE AL-CU COMPRESSION CONNECTORS FOR ALUMINUM OR GALVANIZED FENCES.

**Instructions: Fill in all highlighted areas. The form will calculate the required quantities and values.**

## Chapter 9, Article II, Tree Preservation

### Section 15: Minimum tree coverage requirements

***Required:***

1 tree / 2500 s.f. of lot area

| | | | | |
|---|---|---|---|---|
| 12.23 | Acres = | 532739 | Square Feet | |
| 532738.8 | Square Feet | divided by | 2500 = | **213** required trees |

***Proposed:***

| | | | |
|---|---|---|---|
| Existing trees | 119 | = or > | **107** 50% of req. trees |
| Proposed trees | 0 | | |
| Total trees | **119** | | |

**DOES NOT MEET REQUIREMENT**

Deficient by **94** trees
**0** existing trees

### Section 16: Specimen trees

| | |
|---|---|
| No. of Specimen trees | 29 |
| No. of Historic trees | 1 |
| Total S/H trees | **30** |
| Lot area (in acres) | 12.23 |
| Specimen trees / acre = | 2.5 |

Based on this number fill in the total number of specimen trees from F25 in the appropriate GREEN box below, unless the value is 8.1 or higher, in which case the acreage of the lot is to be inserted into the ORANGE box below. ENTER "0" FOR THE REMAINING BOXES.

***Required:***

| Specimen trees / acre | | # of trees | | |
|---|---|---|---|---|
| less than 3/acre | 80 percent | 2 | x .8 = | 2 |
| 3.0-5.0 per acre | 65 percent | 2 | x .65 = | 2 |
| 5.1-8.0 per acre | 50 percent | 2 | x .5 = | 1 |
| | | lot area (acres) | | |
| 8.1 or more per acre | 4 per acre | 0.00 | x 4 = | 0 |
| | | | | **5** Specimen trees required |

***Proposed:***

| | |
|---|---|
| Specimen trees preserved | 7 |
| Historic trees preserved | 0 |
| Total S/H trees preserved | **7** Specimen trees being preserved |

**REQUIREMENT MET**

Deficient by **0** specimen tree(s) of which **1** are historic
*(proceed to fill out mitigation chart on sheet 2)*

### Section 17: Area tree protection requirements

***Required:***

15% of the s.f. of the development shall be designated for the protection of existing trees

| | | | |
|---|---|---|---|
| Lot area (in s.f.) | 532739 | x .15= | 79911 s.f. |

***Proposed:***

Proposed protected area ____ s.f.

**DOES NOT MEET REQUIREMENT**

Deficient by **79911** s.f.
*(proceed to fill out mitigation chart on sheet 2)*

**Project Name:** Silver Sands Soccer Fields **Permit No.:** 25092
**Address:** 4655 City Center Dr Port Orange, Fl 32129 **Date:** 1/5/2026
**Instructions: Fill in all highlighted areas. The form will calculate the required quantities and values.**

## Mitigation Tabulation Charts

Section A: Mitigation for All trees 6" or greater from Buffer

| Qty. for removal | Size | # Replacement Trees | Subtotal | | |
|---|---|---|---|---|---|
| | 6-8" | 1 | 0 | | $ - |
| | 9-16" | 2 | 0 | or | $ - |
| | 17-24" | 3 | 0 | or | $ - |
| | 25-32" | 4 | 0 | or | $ - |
| | 33-40" | 5 | 0 | or | $ - |
| | 41" + | 6 | 0 | or | $ - |
| | Total A replacement trees = | | **0** | | **$ -** Section A tree bank contribution amount |

Section B: Administrative replacement for diseased or dead Specimen trees

| Qty. for removal | Size | # Replacement Trees | Subtotal | | |
|---|---|---|---|---|---|
| | 12-16" | 2 | 0 | or | $ - |
| | 17-24" | 3 | 0 | or | $ - |
| | 25-32" | 4 | 0 | or | $ - |
| | 33-40" | 5 | 0 | or | $ - |
| | 41" + | 6 | 0 | or | $ - |
| | Total B replacement trees = | | **0** | | **$ -** Section B tree bank contribution amount |

Section C: Mitigation for healthy Specimen trees

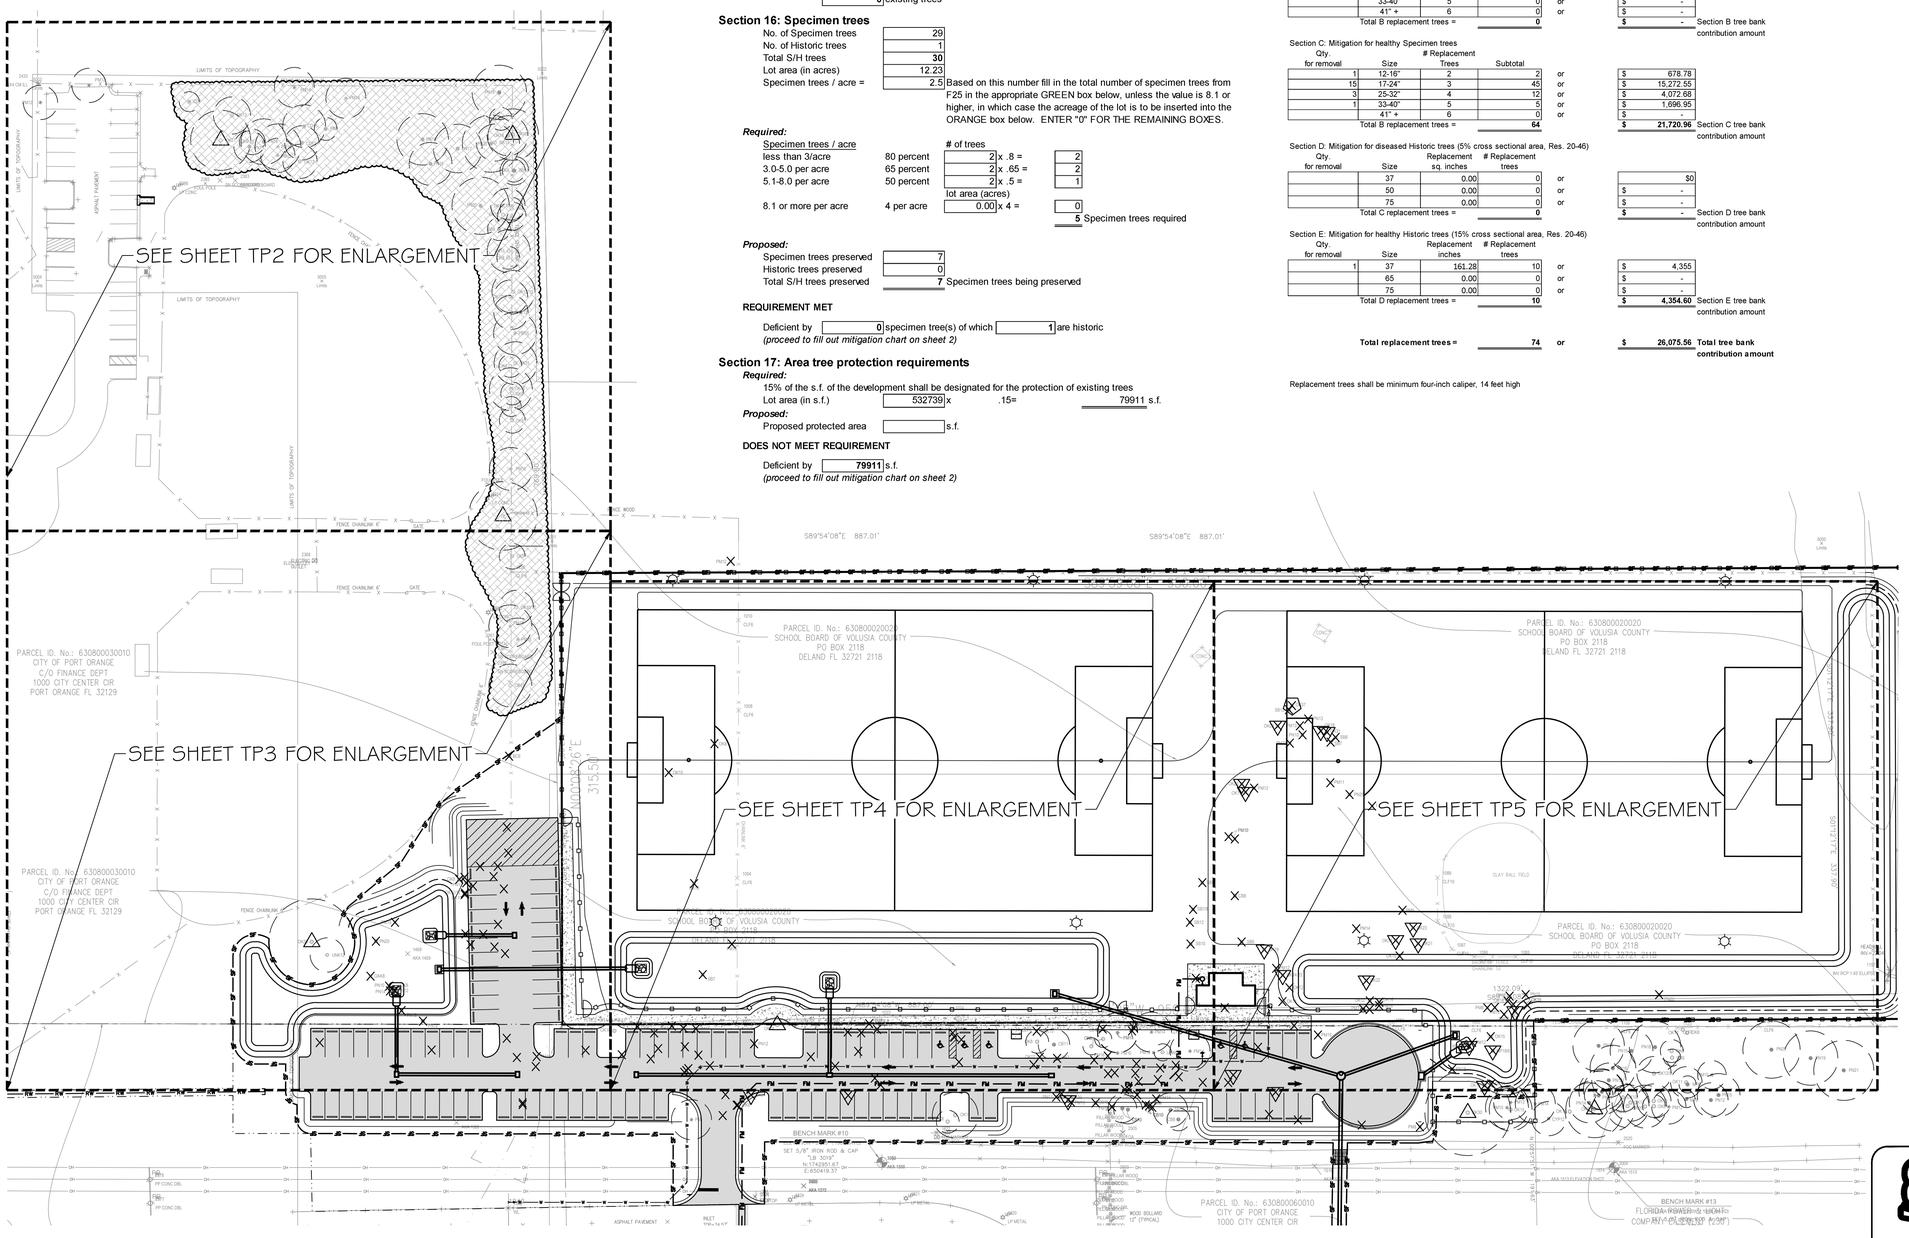
| Qty. for removal | Size | # Replacement Trees | Subtotal | | |
|---|---|---|---|---|---|
| 1 | 12-16" | 2 | 2 | or | $ 678.78 |
| 15 | 17-24" | 3 | 45 | or | $ 15,272.55 |
| 3 | 25-32" | 4 | 12 | or | $ 4,072.68 |
| 1 | 33-40" | 5 | 5 | or | $ 1,696.95 |
| | 41" + | 6 | 0 | or | $ - |
| | Total B replacement trees = | | **64** | | **$ 21,720.96** Section C tree bank contribution amount |

Section D: Mitigation for diseased Historic trees (5% cross sectional area, Res. 20-46)

| Qty. for removal | Size | Replacement sq. inches | # Replacement trees | | |
|---|---|---|---|---|---|
| | 37 | 0.00 | 0 | or | $0 |
| | 50 | 0.00 | 0 | or | $ - |
| | 75 | 0.00 | 0 | or | $ - |
| | Total C replacement trees = | | **0** | | **$ -** Section D tree bank contribution amount |

Section E: Mitigation for healthy Historic trees (15% cross sectional area, Res. 20-46)

| Qty. for removal | Size | Replacement inches | # Replacement trees | | |
|---|---|---|---|---|---|
| 1 | 37 | 161.28 | 10 | or | $ 4,355 |
| | 65 | 0.00 | 0 | or | $ - |
| | 75 | 0.00 | 0 | or | $ - |
| | Total D replacement trees = | | **10** | | **$ 4,354.60** Section E tree bank contribution amount |



**Total replacement trees = 74 or $ 26,075.56 Total tree bank contribution amount**

Replacement trees shall be minimum four-inch caliper, 14 feet high

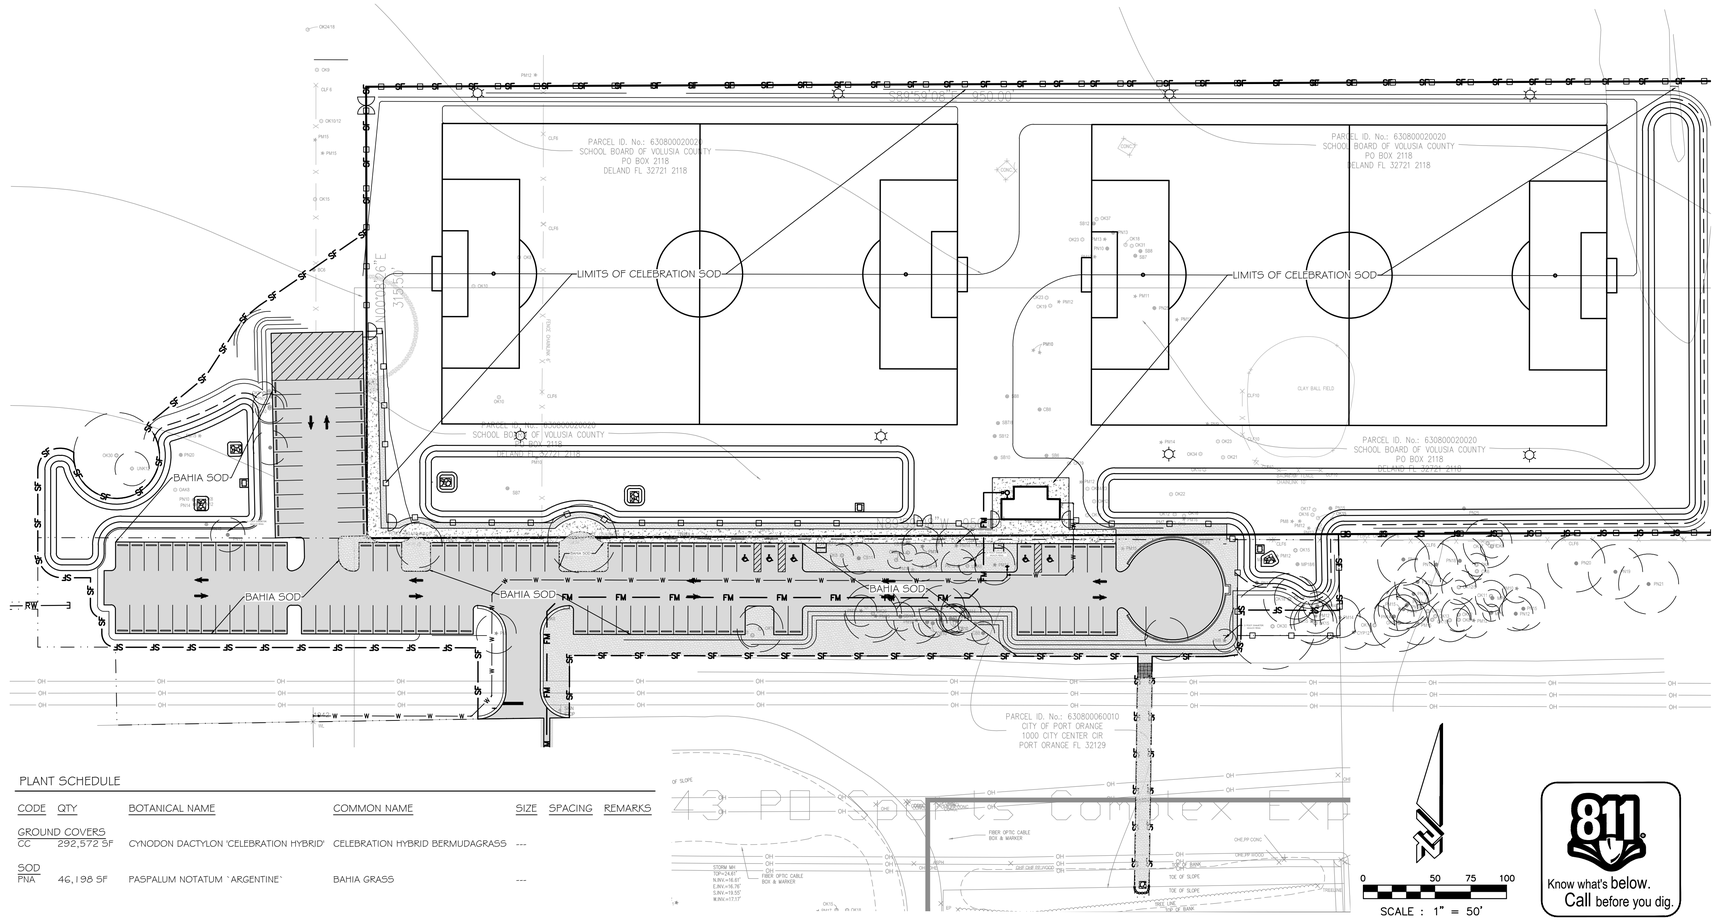
## 2 PALM MULCHING DETAIL IN SOD AREAS

N.T.S.

P-LA-MUL-PALM-01

## 3 TURF PLANTING DETAIL

N.T.S.



P-LA-SOD-01

## LANDSCAPE SPECIFICATIONS

1. FLORIDA #1: ALL PLANT MATERIAL SHALL BE FLORIDA GRADE NO. 1 OR BETTER IN QUALITY AS DESIGNATED IN THE MOST RECENT PUBLICATION OF 'GRADES AND STANDARDS FOR NURSERY PLANTS', PUBLISHED BY THE FLORIDA DEPARTMENT OF AGRICULTURE AND CONSUMER SERVICES.
2. EXISTING PLANTS: IF EXISTING LANDSCAPING INTERFERES WITH PROPOSED PLANTINGS SHOWN ON PLAN, THE EXISTING LANDSCAPING IS TO BE REMOVED IN FAVOR OF THE NEW PLANTINGS, UNLESS OTHERWISE INDICATED. IF THE EXISTING VEGETATION IS INTENDED TO REMAIN, THE PROPOSED LANDSCAPING SHALL BE LOCATED AS CLOSE AS POSSIBLE TO ITS INTENDED LOCATION.
3. MULCH: ALL PLANTING BEDS SHALL BE TOP DRESSED WITH A MINIMUM OF 3" PINE BARK MULCH, GRADE 'B' OR APPROVED EQUAL. ALL TREES NOT IN BEDS SHALL HAVE A 5' DIAMETER MULCH RING. ALL PALMS NOT IN BEDS SHALL HAVE A 3' DIAMETER MULCH RING UNLESS OTHERWISE NOTED ON PLANS.
4. SOD: SOD SHALL BE ARGENTINE BAHIA SOD UNLESS OTHERWISE SPECIFIED ON THE PLANS AS CELEBRATION HYBRID BERMUDA SOD. ALL SOD SHALL BE ROLLED UPON INSTALLATION. CONTRACTOR TO SOD ALL AREAS THAT ARE DISTURBED BY CONSTRUCTION RELATED ACTIVITIES. IT IS THE CONTRACTOR'S RESPONSIBILITY TO ENSURE THE SOD IS FREE OF WEEDS & INSECTS UPON INSTALLATION AND FOR THE DURATION OF THE 90 DAY MAINTENANCE PERIOD. IT IS THE CONTRACTOR'S RESPONSIBILITY TO ENSURE NO GAPS BETWEEN SOD. SOD QUANTITY TAKEOFFS ARE THE RESPONSIBILITY OF THE CONTRACTOR. ALL SOD LOCATED ALONG THE SLOPED BANKS OF THE STORMWATER PONDS SHALL BE PURCHASED FROM A SAND GROWN NURSERY.
5. QUANTITIES: IN THE EVENT OF A VARIATION BETWEEN THE QUANTITIES SHOWN ON THE PLANT LIST AND THE QUANTITIES OF PLANTS SHOWN ON THE PLAN, THE PLAN SHALL CONTROL.
6. UNFORESEEN CONFLICTS: CONTRACTOR SHALL NOT WILLFULLY INSTALL ANY PORTION OF THE LANDSCAPE PLAN AS SHOWN ON THE DRAWINGS WHEN IT IS OBVIOUS IN THE FIELD THAT UNFORESEEN OBSTRUCTIONS, GRADE DIFFERENCES, STANDING WATER, SOIL CONDITIONS OR OTHER CONFLICTS EXIST. SUCH UNFORESEEN CONFLICTS SHALL BE BROUGHT TO THE ATTENTION OF THE OWNER'S REPRESENTATIVE AND THE LANDSCAPE ARCHITECT PRIOR TO INSTALLATION.
7. SUBSTITUTIONS: NO SUBSTITUTIONS OR VARIATIONS OF ANY PLANT MATERIAL OR ITS INSTALLED LOCATION SHALL BE PERMITTED WITHOUT THE PRIOR CONSENT OF THE LANDSCAPE ARCHITECT.
8. CONTAINERS: IF GALLONAGE FOR PLANTS OR TREES IS SHOWN THEY SHALL BE CONTAINER GROWN AND THE SIZE SHOWN SHALL REPRESENT THE MINIMUM ALLOWABLE GALLONAGE. IN ALL CASES THE PLANT SPECIFIED SIZE SHALL GOVERN OVER THE GALLONAGE INDICATED.
9. PLANTING SOIL: CONTRACTOR SHALL VERIFY THAT SOIL CONDITIONS ARE SUITABLE TO THE PLANT SPECIES SPECIFIED. IF SOIL CONDITIONS ARE DEEMED UNSUITABLE FOR PROPER PLANT HEALTH, CONTRACTOR SHALL NOTIFY LANDSCAPE ARCHITECT AND PROPER SUBSTITUTIONS SHALL BE SPECIFIED BY THE LANDSCAPE ARCHITECT PRIOR TO INSTALLATION. THE CONTRACTOR SHALL REMOVE LIME ROCK, CONCRETE AND OTHER DELETERIOUS DEBRIS FROM PLANTING BEDS. IF DEBRIS IS INTEGRATED IN THE SOIL, THE SOIL MUST BE EXCAVATED AND REPLACED WITH ACCEPTABLE SOIL. ALL FILL TO BE PLACED IN LANDSCAPE AREAS MUST HAVE A pH RANGE BETWEEN 5.8 AND 7.5, BE ORGANIC IN NATURE, AND BE FREE OF ROCKS AND DEBRIS.
10. TOPSOIL: TOPSOIL MATERIAL SHALL BE FREE FROM ALL HARD CLODS, WEEDS, STONES OVER 1" IN DIAMETER, CLAY, HARD PAN, NOXIOUS OR OTHER UNDESIRABLE PLANTS, SOD, INSECTS, SEEDS, OR MATERIAL WHICH MAY BE HARMFUL FOR GROWTH.
11. WEEDS: IF PRESENT, THE CONTRACTOR SHALL BE RESPONSIBLE TO REMOVE ANY WEEDS FROM PLANTING AND SOD AREAS PRIOR TO THE INSTALLATION OF PROPOSED PLANT MATERIAL AND MULCH COVER. CONTRACTOR SHALL BE RESPONSIBLE TO KEEP BEDS AND SOD FREE OF WEEDS FOR THE DURATION OF THE 90 DAY MAINTENANCE PERIOD.
12. GRADING: UNLESS OTHERWISE STATED ON THESE PLANS, THE LANDSCAPE CONTRACTOR SHALL FINE GRADE ALL AREAS TO BE PLANTED AND SODDED IN ORDER TO ELIMINATE BUMPS AND DEPRESSIONS. FINE GRADING SHALL BE DEFINED AS THE FINAL 2" OF GRADE TO BE ACHIEVED. THE CONTRACTOR SHALL BE RESPONSIBLE FOR REPAIRING AND RE-GRADING WASHOUT AREAS CAUSED BY EROSION UNTIL FINAL ACCEPTANCE OF THE PROJECT.
13. STAKING: ALL TREES AND PALMS ARE TO BE STAKED ACCORDING TO THE DETAILS IN THESE PLANS. IF THE CONTRACTOR PREFERS TO USE OTHER STAKING METHODS THAN SHOWN IN THE DETAILS, HE OR SHE MUST SUBMIT PROPOSED STAKING DETAILS TO THE LANDSCAPE ARCHITECT FOR APPROVAL PRIOR TO INSTALLATION. THE LANDSCAPE CONTRACTOR SHALL STRAIGHTEN, REPAIR, AND/OR REPLACE ANY PLANTS DAMAGED BY FAILURE TO PROPERLY STAKE OR GUY ANY TREES & PALMS ON SITE, AT THEIR OWN EXPENSE.
14. BED LINES: CONTRACTOR TO ENSURE CURVILINEAR LANDSCAPE BEDS ARE TO BE EDGED WITH SMOOTH FLOWING CURVES. STRAIGHT-LINE LANDSCAPE BEDS ARE TO BE EDGED IN A STRAIGHT LINE PARALLEL TO ADJACENT STRUCTURES UNLESS DESIGNED OTHERWISE.
15. FERTILIZER: OSMOCOTE SLOW RELEASE FERTILIZER OR EQUIVALENT SHALL BE APPLIED TO ALL TREE, SHRUB, AND GROUNDCOVER PLANTING AREAS AT THE RATE OF THREE (3) TABLESPOONS PER 2 S.F. OF PLANTING AREA.
16. DRAINAGE: THE LANDSCAPE CONTRACTOR SHALL ENSURE THAT THIS WORK DOES NOT INTERRUPT EXISTING OR PROPOSED DRAINAGE PATTERNS AND SHALL NOTIFY THE OWNERS REPRESENTATIVE IMMEDIATELY SHALL A CONFLICT ARISE. CONTRACTOR IS RESPONSIBLE FOR ALL LANDSCAPE/SOD AREAS TO PROPERLY DRAIN AWAY FROM BUILDINGS/STRUCTURES.
17. SPECIFICATIONS: THE LANDSCAPE ARCHITECT SHALL BE PERMITTED THE RIGHT DURING INSTALLATION, TO REJECT ANY AND ALL PLANT MATERIAL AND WORKMANSHIP WHICH IN HIS OR HER OPINION DOES NOT MEET THE REQUIREMENTS OF THESE SPECIFICATIONS.
18. CLEARANCE PRUNING: ANY TREE PRUNING OF LOWER LIMBS AND CANOPY OF CONSERVED AND PROTECTED TREES THAT ARE GROWING OVER SIDEWALK, ROADWAY AND/OR ON-SITE CONSTRUCTION ACTIVITIES SHALL BE OVERSEEN AND/OR CONDUCTED BY AN I.S.A CERTIFIED ARBORIST TO ENSURE PROPER REDUCTION CUTS AND PRUNING IS CONDUCTED TO MAINTAIN THE STRUCTURAL INTEGRITY AND HEALTH OF THE TREE. TREES SHALL BE PRUNED TO ADHERE TO A MINIMUM OF EIGHT FEET (8') CLEARANCE OVER SIDEWALKS (PEDESTRIAN ACTIVITIES) AND SIXTEEN FEET (16') CLEARANCE OVER PARKING AREAS/ROADWAYS.
19. WILDLIFE NOTIFICATION: THE CONTRACTOR SHALL CONTACT THE LANDSCAPE ARCHITECT WHO SHALL PROPOSE PLANT SUBSTITUTIONS UPON WRITTEN NOTIFICATION OF NUISANCE ANIMAL EXISTENCE. IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO REPLACE ANY/ALL INSTALLED PLANT MATERIAL DESTROYED/DAMAGED BY WILDLIFE WITHIN THE MAINTENANCE PERIOD.
20. TURNOVER: CONTRACTOR SHALL CONTACT OWNERS REPRESENTATIVE FOR A TURNOVER DATE TO INCLUDE A WALK-THROUGH AND ACCEPTANCE OF WORK BY THE LANDSCAPE ARCHITECT OR OWNER. ANY WORK DEEMED UNACCEPTABLE SHALL BE CORRECTED IMMEDIATELY AND RE-INSPECTED AS SCHEDULED.
21. MAINTENANCE: CONTRACTOR SHALL BE RESPONSIBLE FOR MAINTENANCE TO BEGIN AFTER EACH PLANT HAS BEEN INSTALLED AND SHALL CONTINUE 90 DAYS AFTER FINAL WRITTEN ACCEPTANCE BY THE OWNER. MAINTENANCE SHALL INCLUDE WATERING, PRUNING, WEEDING, MULCHING, MOWING, REPLACEMENT OF SICK OR DEAD PLANTS, AND ANY OTHER CARE NECESSARY IN ORDER TO MAINTAIN PROPER PLANT HEALTH AND SOIL MOISTURE CONTENT.
22. GUARANTEE: CONTRACTOR SHALL GUARANTEE AND REPLACE ALL INSTALLED PLANT MATERIAL FOR ONE (1) CALENDAR YEAR STARTING FROM THE TURNOVER DATE FOR WORK FOUND ACCEPTABLE. ANY CORRECTED WORK SHALL HAVE A PROPORTIONAL EXTENSION OF WARRANTY ONCE APPROVED. ANY SICK OR DEAD MATERIAL SHALL BE REPLACED IMMEDIATELY. THE LANDSCAPE CONTRACTOR SHALL NOT BE RESPONSIBLE TO HONOR ANY WARRANTY FOR THE LOSS OF ANY PLANT MATERIAL CAUSED BY FLOODING, FIRE, ABNORMAL FREEZING TEMPERATURES, WINDS OVER 50 MPH, LIGHTNING, ANY OTHER NATURAL DISASTER, OR ANY LOSS/DAMAGE CAUSED BY VANDALISM OR NEGLIGENCE ON THE PART OF THE OWNER.
23. CALL BEFORE YOU DIG: CONTRACTOR SHALL NOTIFY SUNSHINE 811 AND HAVE UTILITIES LOCATED, PRIOR TO DIGGING, BY CALLING 811. CONTRACTOR SHALL NOT PLANT TREES WITHIN 3' OF AN UNDERGROUND UTILITY, EITHER AS LOCATED OR AS SHOWN ON THE PLAN, WITHOUT FIRST OBTAINING WRITTEN PERMISSION FROM OWNER'S REPRESENTATIVE.
24. RECORD DRAWINGS: THE CONTRACTOR SHALL BE RESPONSIBLE FOR PROVIDING AS-BUILT 'REDLINED' MARK-UPS OF THE LANDSCAPE AND IRRIGATION IMPROVEMENTS. THESE AS-BUILT 'REDLINES' SHALL BE REPRESENTED ON ZEV COHEN & ASSOCIATES, INC. PLAN SHEETS AND PROVIDED TO THE LANDSCAPE ARCHITECT.
25. NATURAL AREAS: NATURALLY PRESERVED VEGETATED AREAS SHALL BE CLEANED UP, INCLUDING BUT NOT LIMITED TO THE REMOVAL OF ANY DEBRIS OR WEEDS AND PRUNING OF DEAD OR YELLOW BRANCHES AND PALM FRONDS. MULCH EDGE OF NATURAL AREA 5' FEET.

## IRRIGATION NOTES

1. AN IRRIGATION PLAN WILL BE PROVIDED AFTER SUBSTANTIAL COMPLETION

# PORT ORANGE CITY CENTER SPORTS COMPLEX EXPANSION FINAL ENGINEERING PLANS IRRIGATION PLAN & DETAILS

VOLUSIA COUNTY, FLORIDA

CITY OF PORT ORANGE

PROJECT NO: ZC 25092

DESIGNED BY: AM

DRAFTED BY: AM

CHECKED BY: JES

DRAWING FILE: 25092-IR
XREF'S: XXXXX.DWG
XREF'S: XXXXX.DWG

JAKE STEHR, LA, NO. 6667462
NOT VALID WITHOUT SEAL

SHEET: IR1 OF ##

R:\25092 SILVER SANDS SOCCER FIELDS\FINAL ENGINEERING PLANS\CAD\DWGS\25092-IR.DWG - PRINTED: 7/15/2026 1:44 PM

## IRRIGATION NOTES:

1. THE PLANS AND DRAWINGS ARE DIAGRAMMATIC OF THE WORK TO BE PERFORMED. SOME COMPONENTS MAY BE SHOWN OUTSIDE THE WORK AREA FOR CLARITY. THE WORK SHALL BE EXECUTED IN A MANNER TO AVOID CONFLICTS WITH UTILITIES AND OTHER ELEMENTS OF CONSTRUCTION, INCLUDING LANDSCAPE MATERIALS. ALL DEVIATIONS FROM THE PLANS SHALL BE APPROVED BY THE OWNER'S REPRESENTATIVE BEFORE BEING INSTALLED. THE CONTRACTOR SHALL NOT WILLFULLY INSTALL ANY ASPECT OF THE IRRIGATION SYSTEM AS SHOWN ON THE PLANS AND DRAWINGS, WHEN IT IS OBVIOUS IN THE FIELD THAT OBSTRUCTIONS, GRADE DIFFERENCES, OR DISCREPANCIES EXIST THAT MIGHT NOT HAVE BEEN KNOWN DURING THE DESIGN OF THE IRRIGATION SYSTEM. IN THE EVENT THAT NOTIFICATION OF THE CONFLICT IS NOT APPROVED BY THE OWNER'S REPRESENTATIVE, THE CONTRACTOR WILL ASSUME FULL RESPONSIBILITY FOR ALL REVISIONS.

2. THE IRRIGATION SYSTEM SHALL BE INSTALLED IN ACCORDANCE WITH THE PLANS, IRRIGATION SYSTEM SPECIFICATIONS AND ALL CONTRACT DOCUMENTS. THE CONTRACTOR SHALL COMPLY WITH ALL PREVAILING LOCAL CODES, ORDINANCES, AND REGULATIONS.

3. CONTRACTOR SHALL VERIFY ALL SITE CONDITIONS, INCLUDING UTILITY LOCATIONS, BEFORE INSTALLATION OF THE IRRIGATION SYSTEM. ALL UTILITIES AND STRUCTURES MAY NOT BE SHOWN ON THE PLANS – CONTRACTOR TO VERIFY. COORDINATE ALL IRRIGATION SYSTEM CONSTRUCTION WITH EXISTING AND NEW PLANTINGS TO AVOID CONFLICT OR INTERFERENCE WITH LOCATION OF PIPING, SLEEVING, CABLES, AND SERVICE UTILITIES. THE CONTRACTOR IS RESPONSIBLE FOR COORDINATING INSTALLATION WITH ALL OTHER CONSTRUCTION ON SITE, ESPECIALLY LANDSCAPE INSTALLATION. IRRIGATION SYSTEM SHALL BE RELOCATED AT NO ADDITIONAL COST FOR ANY CONFLICT WITH LANDSCAPE INSTALLATION OR ANY OTHER SITE CONSTRUCTION OR EXISTING CONDITIONS. ALL COMPONENTS THAT ARE NOT CONTAINED WITHIN THE SPECIFIC AREAS SHOWN OR CALLED OUT ON THE DRAWINGS WILL NOT BE ACCEPTED. ALL PIPING AND OTHER COMPONENTS ARE TO REMAIN WITHIN THE PROPERTY OF THE OWNER.

4. WHERE EXISTING OR NEW TREES, LIGHT STANDARDS, SIGNS, ELECTRONIC CONTROLLERS AND/OR OTHER OBJECTS ARE AN OBSTRUCTION TO AN IRRIGATION SPRINKLER'S PATTERN, THE COMPONENT AND PIPING SHALL BE RELOCATED AS NECESSARY TO OBTAIN PROPER COVERAGE OF AN IRRIGATION SPRINKLER'S PATTERN, THE COMPONENT AND PIPING SHALL BE RELOCATED AS NECESSARY TO OBTAIN THE PROPER COVERAGE WITHOUT DAMAGING THE OBSTRUCTION. OWNER'S REPRESENTATIVE SHALL DETERMINE WHETHER AN OBSTRUCTION OCCURS OR NOT.

5. COMPONENT SPACINGS ARE MAXIMUM. DO NOT EXCEED SPACINGS SHOWN OR NOTED ON THE PLANS. COMPONENT SPACINGS MAY BE ADJUSTED TO ACCOMMODATE CHANGES IN TERRAIN AND PLANTING LAYOUT AS LONG AS THE MODIFIED SPACINGS DO NOT EXCEED THE SPACINGS SHOWN IN THE PLANS. UNLESS SHOWN OTHERWISE, CONTRACTOR SHALL PROVIDE 100% COVERAGE.

6. ALL MATERIALS AND EQUIPMENT SHOWN SHALL BE NEW AND INSTALLED AS DETAILED ON THE PLANS. IF THE DRAWINGS DO NOT THOROUGHLY DESCRIBE THE TECHNIQUES TO BE USED, THE INSTALLER SHALL FOLLOW THE INSTALLATION METHODS AND INSTRUCTIONS RECOMMENDED BY THEIR MANUFACTURER.

7. THE LOCATION OF THE IRRIGATION MAINLINE SHALL BE IDENTIFIED IN THE FIELD AND APPROVED BY THE OWNER'S REPRESENTATIVE BEFORE INSTALLATION.

8. IRRIGATION CONTRACTOR SHALL ADJUST ALL SPRINKLERS, CONTROLLER AND OTHER DEVICES TO OBTAIN SPECIFIED OPERATING PARAMETERS, INCLUDING COVERAGE, OPERATING PRESSURE, FLOW RATES AND OPERATION TIME, AS INDICATED ON THE DRAWINGS AND IN THE IRRIGATION SYSTEM SPECIFICATIONS.

9. CONTRACTOR TO PROVIDE INSTALLATION SHOP DRAWINGS AND MANUFACTURER PRODUCT INFORMATION FOR ALL IRRIGATION COMPONENTS. ALL INSTALLATIONS SHALL BE AS RECOMMENDED BY MANUFACTURERS. THE QUANTITIES SHOWN IN THE LEGENDS AND SYMBOL SHEETS SHALL NOT BE USED FOR BIDDING PURPOSES. THE CONTRACTOR WILL BE RESPONSIBLE FOR CONDUCTING A COMPREHENSIVE MATERIALS TAKEOFF TO DETERMINE THE ACTUAL QUANTITIES OF MATERIAL NECESSARY TO EXECUTE THE WORK DESCRIBED IN THE DOCUMENTS.

10. ALL TRENCHES SHALL BE BACKFILLED WITH CLEAN, DEBRIS–FREE MATERIALS. CLEAN SAND SHALL BE USED FOR BEDDING MATERIAL IF PARENT SOIL CANNOT BE ADEQUATELY RID OF ROCK AND OTHER EXTRANEOUS DEBRIS. PULLING PIPE SHALL BE PROHIBITED.

11. ALL SOLVENT WELDING SHALL BE PRECEDED BY PRIMING OF THE FITTINGS AND PIPE AS RECOMMENDED BY THE MANUFACTURER.

12. ALL MAINLINE CHANGE OF DIRECTION FITTINGS TO BE THRUST BLOCKED.

13. DURING INSTALLATION AND UPON COMPLETION OF THE IRRIGATION SYSTEM, DECODERS SHALL BE PROGRAMMED TO THE CONTROLLER STATION AS PER THE IRRIGATION ZONE NUMBER. CONTRACTOR TO LABEL ALL VALVE BOX COVERS WITH THE CORRESPONDING CONTROLLER ZONE NUMBER. NUMBERING SIZE 1". PROVIDE TAGS TO ALL VALVES AS SHOWN PER DETAILS.

14. THE CONTROL WIRE SHALL BE HUNTER ID1–PUR UL LISTED FOR DIRECT BURIAL. ALL WIRE SPLICES SHALL BE MADE WITH 3M–DBY.

15. LOCATE ALL VALVES WITH A MINIMUM OFFSET OF 3'–0" FROM BACK OF CURB OR EDGE OF PAVEMENT.

16. ALL VALVE BOXES TO HAVE A BOLT DOWN COVER.

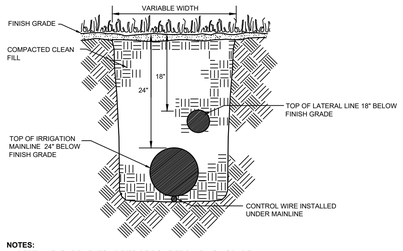
17. ALL IRRIGATION LINES UNDER PAVEMENT SHALL BE INSTALLED WITHIN SCH 40 PVC SLEEVES AS NOTED. IRRIGATION COMMUNICATION CABLE SHALL HAVE IT'S OWN SEPARATE SLEEVE UNLESS NOTED OTHERWISE.

18. ALL I25 BALL FIELD ROTORS TO BE INSTALLED WITH A 1" PREFABRICATED SWING JOINT. USE HEAD LEVEL TO SET THE HEADS.

19. IRRIGATION LATERAL LINES TO BE BURIED PER DETAIL.

20. IRRIGATION MAINLINES TO BE BURIED AT A MINIMUM DEPTH OF 24". ALL LATERALS TO BE BURIED AT A MINIMUM DEPTH OF 18".

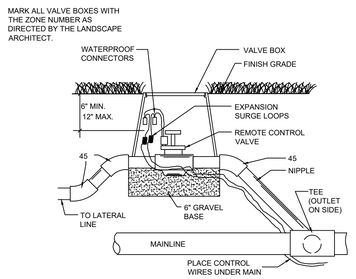
21. ALL COMPONENTS INSTALLED BY THE IRRIGATION CONTRACTOR, SHALL BE LOCATED ON THE "AS–BUILT" DRAWINGS. THE EXACT LOCATION AND DEPTH BELOW FINISH GRADE OF CONTROL VALVE, ISOLATION VALVES AND SLEEVES SHALL BE NOTED WITH TWO REFERENCE POINTS ON THE "AS–BUILT" DRAWINGS. THE "AS–BUILT" SHALL BE PROVIDED IN ELECTRONIC PDF FORMAT WITH TWO HARD COPIES.



22. IRRIGATION CONTRACTOR SHALL SECURE ANY AND ALL NECESSARY PERMITS FOR THE WORK PRIOR TO COMMENCEMENT OF HIS OPERATIONS ON–SITE. COPIES OF THE PERMITS SHALL BE SENT TO THE LANDSCAPE SUPERVISOR. WORK IN THE RIGHT OF WAY SHALL CONFORM TO THE STANDARDS AND SPECIFICATIONS OF LOCAL AND/OR STATE HIGHWAY JURISDICTION.

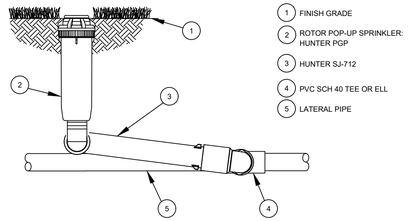
23. INSTALLATION OF WORK SHALL BE COORDINATED WITH OTHER CONTRACTORS IN SUCH A MANNER AS TO ALLOW FOR A SPEEDY AND ORDERLY FLOW OF VEHICULAR TRAFFIC AND COMPLETION OF ALL WORK ON THE SITE.

24. THE WELL SHALL BE A 5" WELL WITH A GOULDS 85GS 7.5HP SUBMERSIBLE PUMP WITH A GOULDS AQUAVAR SPD DRIVE. THE SYSTEM SHALL INCLUDE THE INSTALLATION OF A PRESSURE TANK AND ALL FITTINGS REQUIRED FOR A COMPLETE OPERATING WATER SYSTEM CAPABLE OF PROVIDING 80 GPM @ 65 PSI. THE WELL SHALL HAVE A TORO IT–ABF–7585–3X–N FILTER WITH A 120 MESH SCREEN. THE SYSTEM SHALL INCLUDE A ZURN DUAL CHECK BACKFLOW PREVENTER. ALL EQUIPMENT SHALL BE INSTALLED IN A ALLIED AE100 FIBERGLASS ENCLOSURE.

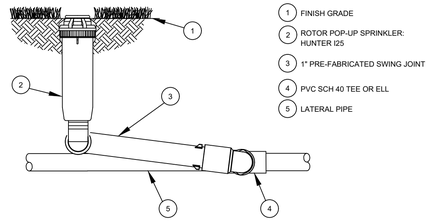


25. THE WELL SHALL BE CAPABLE OF PROVIDING REQUIRED WATER QUANTITY WITH THE FOLLOWING WATER QUALITY:
   a. AT THE REQUIRED FLOW WATER SHALL BE CLEAR AND FREE OF SAND AN OTHER DEBRIS LARGER THAN .030" IN DIAMETER.
   b. WATER SHALL BE CONSIDERED SAND FREE WHEN NO SAMPLE, TAKEN DURING TEST PUMPING, CONTAINS MORE THAN 2 PARTS PER MILLION.
   c. MAXIMUM IRON ALLOWED IN THE WATER SHALL BE LESS THAN 1.3 PARTS PER MILLION.
   d. MAXIMUM SALT CONTENT ALLOWED IN THE WATER SHALL BE LESS THAN 300 PARTS PER MILLION.

26. AT THE COMPLETION OF THE PROJECT THE CONTRACTOR SHALL PROVIDE TO THE OWNER THE FOLLOWING ITEMS AS THEY RELATE TO THE IRRIGATION SYSTEM:
   1 – SET OF DIGITAL AS–BUILT RECORD DRAWINGS AT A SCALE NO SMALLER THAN 1 INCH = 20 FEET.
   3 – SETS OF PRINTED AS–BUILT RECORD DRAWINGS AT A SCALE NO SMALLER THAN 1 INCH = 20 FEET.
   3 – COPIES OF OWNER'S OPERATIONS AND MAINTENANCE MANUALS.
   3 – COPIES OF RECOMMENDED IRRIGATION SCHEDULE WITH PROPOSED APPLICATION RATES.
   6 – EXTRA SPRAY / ROTOR HEADS FOR EACH TYPE USED ON THE PROJECT.



**NOTES:**
1. DEPTH MEASUREMENTS ARE TO BE DONE FROM FINISH GRADE TO TOP OF PIPE.
2. PROVIDE A 6" MINIMUM VERTICAL SEPARATION BETWEEN MAINLINES AND LATERAL LINES.
3. ALL TRENCHES SHALL BE BACKFILLED WITH CLEAN SOIL FREE OF DEBRIS & NOXIOUS WEEDS.



### TRENCHING DETAIL
SCALE: NTS

### ELECTRIC VALVE INSTALLATION DETAIL
SCALE: NTS

### PGP ROTOR DETAIL
SCALE: NTS

### I-25 ROTOR DETAIL
SCALE: NTS

## ELECTRICAL NOTES

1. ELECTRICAL INSTALLATIONS ARE TO CONFORM WITH ALL APPLICABLE CODES, LAWS, AND STATUES, ANSI C2 "NATIONAL ELECTRICAL SAFETY CODE', NFPA 70 "NATIONAL ELECTRICAL CODE", AND THE AUTHORITY HAVING JURISDICTION (AHJ).
2. ALL ELECTRICAL EQUIPMENT AND MATERIALS TO BE UL LISTED AND LABELED OR LISTED AND LABELED BY A NATIONALLY RECOGNIZED TESTING LABORATORY (NRTL).
3. THE IRRIGATION CONTRACTOR IS TO ARRANGE, COORDINATE, SCHEDULE AND PAY FOR THE INSTALLATION OF THE PUMP SYSTEM AND CONTROLLER ELECTRICAL SUPPLY FROM THE EXISTING DISCONNECT PANELS.

## PROGRAMMING NOTES

THE IRRIGATION CONTROLLER TO BE SET UP SO THE MASTER VALVE AT THE RECLAIM WATER METER IS MASTER VALVE 1. WHEN THE IRRIGATION IS BEING SUPPLIED BY THE WATER METER THE SYSTEM SHALL OPERATE TWO ZONES AT A TIME WITH A MAXIMUM FLOW OF 145 GPM.

THE IRRIGATION CONTROLLER TO BE SET UP SO THE MASTER VALVE AT THE WELL IS MASTER VALVE 2. WHEN THE SYSTEM IS OPERATED BY THE WELL THE MAXIMUM FLOW TO BE SET UP AS 80 GPM.

THE CONTROLLER TO HAVE ZONE FLOWS LEARNED BY THE CONTROLLER AND SHUT DOWN WHEN AN EXCESSIVE FLOW EVENT TAKE PLACE.

# SPECIAL CONDITIONS, REQUIREMENTS AND NOTES TO OWNER, DEVELOPER AND CONTRACTORS

CONTRACTOR, BUILDER AND SUBCONTRACTORS INVOLVED IN ANY FORM OF CONSTRUCTION USING THESE DOCUMENTS SHALL INFORM THE OWNER AND DEVELOPER IN WRITING PRIOR TO CONSTRUCTION OF THE FOLLOWING RESPONSIBILITIES, PERFORMANCE CRITERIA AND LIMITATIONS AND RISKS ASSOCIATED WITH CONSTRUCTION. IF THE OWNER, DEVELOPER OR CONTRACTOR IS NOT ABLE TO ACCEPT RESPONSIBILITIES OR PERFORMANCE CRITERIA AND LIMITATIONS, NOTIFY OUR OFFICE PRIOR TO START OF CONSTRUCTION. IT SHALL BE EXPRESSLY UNDERSTOOD THAT THE ENGINEER IS NOT RESPONSIBLE OR LIABLE FOR THE LACK OF PERFORMANCE OF MATERIALS, SYSTEMS OR DESIGNS NOT BEING LIMITED TO ITEMS OUTLINED BELOW. CONTRACTORS AND SUBCONTRACTORS SHALL THOROUGHLY REVIEW ALL CONDITIONS AND RESPONSIBILITIES STATED IN THESE NOTES, GENERAL STRUCTURAL NOTES, PLANS, SECTIONS AND DETAILS AND SHALL NOTIFY THE ENGINEER AND OWNER IN WRITING PRIOR TO CONSTRUCTION OF ANY CONDITIONS OR RESPONSIBILITIES WHICH ARE NOT ACCEPTABLE OR NOT UNDERSTOOD.

1. DUE TO MOISTURE VARIATIONS AS A RESULT OF AMBIENT CONDITIONS AND MATERIAL CONDITIONS AT TIME OF CONSTRUCTION, WOOD MEMBERS ARE SUSCEPTIBLE TO VOLUME AND SHAPE CHANGES AND DIMENSIONAL VARIATIONS. SPANNING MEMBERS MAY ALSO DEFLECT VERTICALLY OR LATERALLY. SHEATHING, DRYWALL OR ARCHITECTURAL SURFACES SUPPORTED BY WOOD MEMBERS MAY DISTORT, CRACK AND BULGE DUE TO THESE FACTORS.

2. PLAIN CONCRETE, REINFORCED CONCRETE OR CONCRETE MASONRY DEVELOP CRACKS. THE CRACKS ARE DUE TO INHERENT SHRINKAGE, CREEP AND RESTRAINING EFFECTS. CRACKS ARE NORMALLY COSMETIC AND THE SYSTEM MAINTAINS SERVICEABILITY AND STRENGTH REQUIREMENTS. JOINTS MAY BE INDICATED TO CONTROL CRACKING, BUT ARE NOT MEANT TO ELIMINATE ALL CRACKING, AS THIS IS NOT PRACTICAL. THE CONTRACTOR SHALL USE ALL STANDARD MEANS TO INSURE PROPER PROTECTION AND CURING OF CEMENTIOUS MATERIALS TO REDUCE CRACKING. SURFACE SPALLING OR EXTREME CRACKING MAY BE CAUSED BY POOR MATERIAL OR PLACEMENT. CONTACT OUR OFFICE FOR POSSIBLE REPAIR REQUIREMENTS.

3. FOUNDATIONS HAVE BEEN DESIGNED WITHOUT A SOIL INVESTIGATION OR RECOMMENDATIONS FROM A GEOTECHNICAL CONSULTANT. FOUNDATIONS ARE TO BEAR ON STABLE SOILS COMPETENT IN SUSTAINING LOADS STATED IN THE FOUNDATION NOTES BELOW WITHOUT EXCESSIVE SETTLEMENT OR HEAVE. BE ADVISED THAT FOUNDATION MOVEMENT MAY OCCUR AND THAT DESIGNS CONTAINED HEREIN DO NOT ATTEMPT TO MITIGATE SOIL CONDITIONS. STRUCTURES MAY BE AT RISK OF DAMAGE WHERE STABLE SOILS ARE NOT PRESENT. ATTENTION TO PROPER SOIL PREPARATION, GRADING AS WELL AS PROPER DRAINAGE AWAY FROM STRUCTURE, IS ESSENTIAL IN REDUCING SOIL MOVEMENT.

4. PLYWOOD OR APA RATED SHEATHING (OSB) AS NOTED ON DRAWINGS OR NOTES MAY BE A MINIMUM AS REQUIRED FOR STRUCTURAL LOADS. CONTRACTOR, DEVELOPER AND/OR OWNER SHALL BE RESPONSIBLE FOR SPECIFYING ALTERNATE THICKNESS OR SPAN RATING REQUIREMENTS TO SATISFY ROOFING WARRANTIES, NOISE RESTRICTIONS OR SUPPLEMENTAL DEFLECTION CRITIA. CONTACT ENGINEER FOR INCREASED NAILING REQUIREMENTS FOR ALTERNATE SHEATHING.

5. VARIATION IN DIMENSIONS MAY OCCUR AS A RESULT OF THERMAL INFLUENCES, NATURAL DEFLECTIONS AND/OR CAMBERS OF MEMBERS. AS A RESULT, QUANTITIES MAY VARY AND ARCHITECTURAL FINISHES MAY BE AT RISK OF COSMETIC VARIATION OR DAMAGE. MAXIMUM FLOOR AND ROOF DEFLECTIONS FOR THIS PROJECT ARE ESTIMATED AT 0.375 INCHES.

**6. THE ENGINEER SHALL NOT BE RESPONSIBLE FOR VARIATIONS TO PLANS BETWEEN BID PROCESS AND FINALIZED APPROVED DOCUMENTS RELEASED FOR CONSTRUCTION. ADDITIONS AND ALTERATIONS MAY BE MADE BETWEEN RELEASE OF BID DOCUMENTS AND FINALIZED CONSTRUCTION DOCUMENTS.**

7. DESIGNS HAVE BEEN COMPLETED USING THE CODE STATED IN THE BASIS FOR DESIGN. OTHER SPECIALIZED CODES OR DIRECTIVES (HUD, OSHA, ASSHTO, ETC.) ARE NOT USED IN THE PREPARATION OF THESE DOCUMENTS AND ARE NOT REFERENCED.

8. THESE DRAWINGS HAVE BEEN PREPARED USING STANDARDS OF PROFESSIONAL CARE AND COMPLETENESS NORMALLY EXERCISED UNDER SIMILAR CIRCUMSTANCES BY REPUTABLE STRUCTURAL ENGINEERS IN THIS OR SIMILAR LOCALITIES. THEY NECESSARILY ASSUME THAT THE WORK DEPICTED WILL BE PERFORMED BY AN EXPERIENCED CONTRACTOR, SUBCONTRACTOR AND/OR WORKPERSONS WHO HAVE A WORKING KNOWLEDGE OF THE APPLICABLE CODE STANDARDS AND REQUIREMENTS AND OF INDUSTRY ACCEPTED STANDARD GOOD PRACTICE. AS NOT EVERY CONDITION OR ELEMENT IS (OR CAN BE) EXPLICITLY SHOWN ON THESE DRAWINGS, IT IS UNDERSTOOD THAT THE CONTRACTOR WILL USE INDUSTRY ACCEPTED STANDARD GOOD PRACTICE FOR ALL WORK NOT EXPLICITLY SHOWN.

9. CALCULATION AND DESIGN OF MISCELLANEOUS NON-STRUCTURAL ITEMS, SUCH AS STAIRS, RAILINGS, NON-STRUCTURAL WALLS AND PREFABRICATED STRUCTURAL ITEMS, SUCH AS FLOOR AND ROOF TRUSSES, ARE NOT INCLUDED AND IS TO BE PROVIDED BY OTHERS UNLESS SPECIFICALLY NOTED ON THESE DRAWINGS.

10. THESE DRAWINGS REPRESENT THE FINISHED STRUCTURE. THEY DO NOT INDICATE THE METHOD OF CONSTRUCTION. THE CONTRACTOR SHALL BE SOLELY RESPONSIBLE FOR CONSTRUCTION MEANS, METHODS, TECHNIQUES, SEQUENCES AND PROCEDURES. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO DESIGN AND PROVIDE ADEQUATE SHORING, BRACING, FORMWORK, ETC. AS REQUIRED FOR THE PROTECTION OF LIFE AND PROPERTY DURING CONSTRUCTION. CONSTRUCTION MATERIALS SHALL BE UNIFORMLY SPREAD OUT SUCH THAT DESIGN LIVE LOAD PER SQUARE FOOT AS STATED HEREIN IS NOT EXCEEDED. VISITS TO THE SITE BY THE STRUCTURAL ENGINEER SHALL NOT INCLUDE INSPECTION OF THE ABOVE ITEMS.

11. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL EXCAVATION PROCEDURES INCLUDING SHORING AND PROTECTION OF ADJACENT PROPERTY, STRUCTURES, STREETS AND UTILITIES IN ACCORDANCE WITH THE LOCAL BUILDING DEPARTMENT. ALL WORK OR CONSTRUCTION SHALL COMPLY WITH ALL APPLICABLE BUILDING CODES, REGULATIONS AND SAFETY REQUIREMENTS.

12. THE CONTRACTOR SHALL BE RESPONSIBLE FOR VERIFICATION OF ALL DIMENSIONS, CONDITIONS AND ELEVATIONS WITH ARCHITECTURAL DRAWINGS PRIOR TO START OF CONSTRUCTION. THE CONTRACTOR SHALL INFORM THE ARCHITECT IN WRITING OF ANY DISCREPANCIES OR OMISSIONS NOTED ON THE DRAWINGS. ANY SUCH DISCREPANCY, OMISSION, OR VARIATION NOT REPORTED BEFORE START OF CONSTRUCTION SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR.

13. WHERE REFERENCE IS MADE TO VARIOUS TEST STANDARDS FOR MATERIALS, SUCH STANDARDS SHALL BE THE LATEST EDITION AND/OR ADDENDA.

14. OPTIONS ARE FOR CONTRACTOR'S CONVENIENCE. IF AN OPTION IS USED, THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL NECESSARY CHANGES AND SHALL COORDINATE ALL DETAILS.

15. TYPICAL DETAILS AND NOTES SHALL APPLY, THOUGH NOT NECESSARILY INDICATED AT A SPECIFIC LOCATION ON PLANS. WHERE NO DETAILS ARE SHOWN, CONSTRUCTION SHALL CONFORM TO SIMILAR WORK ON THE PROJECT. DETAILS MAY SHOW ONLY ONE SIDE OF CONNECTION OR MAY OMIT INFORMATION FOR CLARITY. WHERE DISCREPANCIES OCCUR IN THESE DRAWINGS, NOTES AND DETAILS ON DRAWINGS SHALL TAKE PRECEDENCE OVER GENERAL STRUCTURAL NOTES AND TYPICAL DETAILS. SOME DETAILS NOTED ON THE TYPICAL DETAIL SHEETS MAY NOT BE APPLICABLE TO THIS SPECIFIC PROJECT AND ARE ONLY FOR INFORMATION. CONTACT STRUCTURAL ENGINEER FOR FURTHER INFORMATION REGARDING THESE DETAILS

16. ALL OPENINGS ARE NOT SHOWN ON THESE DRAWINGS. ESTABLISH AND VERIFY ALL OPENINGS AND INSERTS FOR ARCHITECTURAL, MECHANICAL, PLUMBING AND ELECTRICAL WITH APPROPRIATE TRADES, DRAWINGS AND SUBCONTRACTORS PRIOR TO CONSTRUCTION. OPENINGS MAY REQUIRE ADDITIONAL REINFORCING OR SUPPORTS AS SHOWN ON TYPICAL DETAILS. IF TYPICAL DETAILS FOR ALL CONDITIONS ARE NOT INCLUDED HEREIN, IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO REQUEST IN WRITING ADDITIONAL INFORMATION.

17. ALL INSPECTIONS REQUIRED BY THE BUILDING CODES, LOCAL BUILDING OFFICIALS, OR BY THESE PLANS SHALL BE PROVIDED BY AN INDEPENDENT INSPECTION COMPANY OR, THE BUILDING DEPARTMENT. INSPECTION REQUIREMENTS STATED HEREIN ARE PARTIAL. COMPLETE INSPECTION REQUIREMENTS SHALL BE AS DIRECTED BY THE LOCAL BUILDING DEPARTMENT. SITE VISITS BY THE ENGINEER DO NOT CONSTITUTE AN INSPECTION, UNLESS SPECIFICALLY CONTRACTED FOR.

**18. SHOP DRAWINGS (3 COPIES ONLY) SHALL BE SUBMITTED FOR ALL STRUCTURAL ITEMS. SHOP DRAWINGS ARE REVIEWED ONLY FOR GENERAL COMPLIANCE WITH THE STRUCTURAL DRAWINGS. REVIEW DOES NOT INDICATE THAT THE SHOP DRAWINGS ARE CORRECT OR COMPLETE. RESPONSIBILITY FOR CORRECTNESS SHALL REST WITH THE CONTRACTOR. ANY CHANGES, SUBSTITUTIONS, OR DEVIATIONS FROM CONTRACT DRAWINGS SHALL BE CLOUDED. ANY OF THE AFOREMENTIONED SHALL NOT BE CONSIDERED APPROVED AFTER ENGINEER'S REVIEW UNLESS SPECIFICALLY NOTED ACCORDINGLY. THE SHOP DRAWINGS DO NOT SUPERSEDE OR REPLACE THE ORIGINAL CONTRACT DRAWINGS. ANY ENGINEERING PROVIDED BY OTHERS AND SUBMITTED FOR REVIEW SHALL BEAR THE SEAL OF AN APPROPRIATELY REGISTERED ENGINEER. THE ENGINEER SHALL NOT BE RESPONSIBLE FOR THE ADEQUACY OF ENGINEERING DESIGNS PERFORMED BY OTHERS. ALLOW 5 WORKING DAYS FOR THE ENGINEER'S REVIEW. ONE COPY OF EACH SUBMITTAL WILL BE RETAINED FOR THE ENGINEER'S RECORDS.**

**19. IF A CONTRACTOR OR OWNER FAILS TO OBTAIN ENGINEERING APPROVAL OF THE SHOP DRAWINGS,
THE ENGINEER WILL NOT BE RESPONSIBLE FOR THE STRUCTURAL CERTIFICATION AND DESIGN OF
THE PROJECT. THE GENERAL CONTRACTOR SHALL REVIEW ALL SHOP DRAWINGS BEFORE SUBMISSION TO THE ENGINEER AND MAKE ALL CORRECTIONS AS HE/SHE DEEMS NECESSARY AND
SHALL CERTIFY ON EACH DRAWING AS FOLLOWS:**

**"I CERTIFY THAT THE CONTRACT DOCUMENT REQUIREMENTS HAVE BEEN MET AND ALL DIMENSIONS,
CONDITIONS AND QUANTITIES ARE VERIFIED AS SHOWN AND/OR AS CORRECTED ON THIS DRAWING"**

**SIGNED . . . . . .**

**DATE: . . . . . (FOR G.C.)**

# BASIS FOR DESIGN

1. BUILDING CODE: 2023 EDITION OF THE FLORIDA BUILDING CODE (FBC)

2. ROOF LOADS: LIVE LOAD (PSF): 20
DEAD LOAD (PSF): 20 TOTAL; 18 SUPERIMPOSED ON PREFAB TRUSS

3. WIND LOAD: 137 MPH BASIC WIND SPEED (ULT); 106 MPH (ASD)
EXPOSURE C (ENCLOSED) ±0.18

4. SEISMIC DATA: SEISMIC DESIGN DATA:
SEISMIC USE GROUP: IV
MAPPED SPECTRAL RESPONSE ACCELERATION: Ss=0.071 S1=0.039
SITE CLASS: D
SEISMIC DESIGN CAT. A
BASIC SEISMIC-FORCE-RESISTING SYSTEM: ORDINARY MASONRY SHEAR WALLS R=2
DESIGN BASE SHEAR = 0.038W
ANALYSIS PROCEDURE: SIMPLIFIED ANALYSIS PROCEDURE
SEISMIC RESPONSE COEFFICIENT: C =0.038

# FOUNDATION NOTES

1. FOOTINGS DESIGNED PER THE REQUIREMENTS OF THE 2023 FLORIDA BUILDING CODE. ASSUMED BEARING PRESSURE OF 2000 PSF. CONTRACTOR TO VERIFY IN FIELD PRIOR TO CONSTRUCTION.

2. FOOTING DEPTH: BASE OF CONVENTIONAL FOOTINGS SHOULD BE EMBEDDED A MINIMUM OF 12 INCHES BELOW LOWEST ADJACENT EXTERIOR GRADE AND 12 INCHES BELOW FINISH FLOOR AT INTERIOR FOOTINGS. BASE OF THICKENED, LOAD BEARING MONOLITHIC FOOTINGS SHOULD BE EMBEDDED A MINIMUM OF 16 INCHES BELOW LOWEST ADJACENT EXTERIOR GRADE. (SEE BELOW FOR DEFINITION OF GRADE)

3. ALLOWABLE FOOTING BEARING: 2000 PSF. INCREASE AN ADDITIONAL 500 PSF FOR EACH ADDITIONAL 12 INCHES OF EMBEDMENT UP TO MAX OF 4000 PSF. ONE-THIRD INCREASE FOR SEISMIC OR WIND LOAD COMBINATIONS. ALL FOOTINGS TO BE PLACED ON 24" MINIMUM COMPACTED FILL.

4. LATERAL DESIGN SOIL PRESSURE: AT CANTILEVER RETAINING WALLS 35 PSF/FT ACTIVE PRESSURE (EQUIVALENT FLUID).
AT BRACED WALLS 55 PSF/FT AT REST PRESSURE (EQUIVALENT FLUID).
FRICTION COEFFICIENT 0.3 (WITH 1.5 FACTOR SAFETY)

5. SLAB-ON-GRADE SUPPORT: 6 INCH LAYER OF SELECT GRANULAR FILL MATERIAL (PER SOIL REPORT) PLACED OVER 10 MIL MINIMUM VISQUEEN MEMBRANE.

6. ALL FOOTINGS SHALL EXTEND TO DEPTH NOTED ABOVE UNO ON PLANS OR DETAIL. GRADE IS DEFINED AS TOP OF SLAB FOR INTERIOR FOOTINGS, AND LOWEST ADJACENT COMPACTED SUBGRADE (PAD GRADE BEFORE LANDSCAPING) OR NATURAL GRADE WITHIN 5 FEET OF BUILDING FOR PERIMETER FOOTINGS. GRADE IS DEFINED AS TOP OF EXTERIOR PAVING OR CONCRETE WHERE EXTERIOR PAVING OR CONCRETE IS PERMANENTLY LOCATED DIRECTLY ADJACENT TO BUILDING AND EXTENDS AT LEAST 5 FEET FROM BUILDING. LOCATION OF FOUNDATIONS NEAR SLOPES SHALL COMPLY WITH FBC. FOOTING EXCAVATIONS SHALL BE CLEAN AND FREE FROM LOOSE DEBRIS, STANDING WATER, OR UNCOMPACTED MATERIAL AT TIME OF CONCRETE PLACEMENT.

7. UNLESS NOTED OTHERWISE IN THE GEOTECHNICAL REPORT, CONCRETE SLABS ON GRADE SHALL BE SUPPORTED ON SELECT FILL MATERIAL AS NOTED ABOVE. FILL MATERIAL SHOULD BE MOISTENED, BUT NOT SATURATED JUST PRIOR TO PLACING CONCRETE. CARE SHALL BE TAKEN IN PLACING SLABS ON GRADE SO AS NOT TO DISTURB FILL MATERIAL OR REINFORCING. VISQUEEN MAY BE OMITTED IF IT IS NOT A REQUIREMENT OF THE GEOTECHNICAL REPORT.

8. SITE PREPARATION AND GRADING REQUIREMENTS OF THE GEOTECHNICAL REPORT AND ANY ADDENDA SHALL BE COMPLETED PRIOR TO CONSTRUCTION OF FOUNDATIONS. ANY TESTS, INSPECTIONS, FIELD OBSERVATIONS, OR APPROVAL FROM THE GEOTECHNICAL ENGINEER SHALL BE PERFORMED PRIOR TO PLACEMENT OF FOUNDATION REINFORCING STEEL OR CONCRETE. ALTERATIONS TO SITE PREPARATION OR GRADING SHALL BE REPORTED TO THE ENGINEER PRIOR TO FOUNDATION CONSTRUCTION.

9. BACKFILL AGAINST FOUNDATION WALLS OR EXTERIOR WALLS BELOW GRADE SHALL NOT BE PLACED UNTIL AFTER THE TOP OF THE WALLS ARE RESTRAINED BY THE COMPLETED INTERIOR FLOOR SYSTEMS.

# CONCRETE

1. MINIMUM 28 DAY STRENGTH (f'c) SHALL BE 4000, W/C = .45
CONCRETE BEAMS TO BE 4500, W/C = .40

ALL CONCRETE EXPOSED TO ATMOSPHERE AND SUBJECT TO EXPOSURE FROM SALT SPRAY WILL MEET THE COMPRESSIVE STRENGTH REQUIREMENTS IN TABLE 1904.2.2(1) OF THE FBC

2. CONCRETE MIXES SHALL BE DESIGNED BY A CERTIFIED LABORATORY AND APPROVED BY THE ENGINEER.

3. ALL CONCRETE SHALL BE REGULAR WEIGHT OF 140 POUNDS PER CUBIC FOOT USING LIMESTONE AGGREGATES. AGGREGATE USED IN CONCRETE SHALL CONFORM TO ASTM C33, CONCRETE AGGREGATES.

4. MAXIMUM SLUMP FOR EXTERIOR SLABS SHALL BE 6 INCHES. MAXIMUM SLUMP FOR ALL OTHER CONCRETE SHALL BE 5 INCHES. WATER SHALL BE CLEAN AND POTABLE.

5. PORTLAND CEMENT SHALL CONFORM TO ASTM C150. TYPE II CEMENT SHALL BE USED FOR CONCRETE IN CONTACT WITH EARTH. TYPE II CEMENT MAY BE USED ELSEWHERE. MAXIMUM CHLORIDE ION, PERCENT BY WEIGHT OF CEMENT, SHALL NOT EXCEED 0.06.

6. NO MORE THAN 90 MINUTES SHALL ELAPSE BETWEEN CONCRETE BATCHING AND CONCRETE PLACEMENT, UNLESS APPROVED BY THE ENGINEER OR AUTHORIZED TESTING AGENCY.

7. CONCRETE MIXING, PLACEMENT AND QUALITY SHALL BE PER FBC, ASTM C94, ASTM C685, AND ACI 302. MECHANICALLY VIBRATE ALL CONCRETE WHEN PLACED, EXCEPT SLABS ON GRADE NEED ONLY BE VIBRATED OR THOROUGHLY RODDED AROUND EMBEDDED STRAPS OR HARDWARE, BOLTS FOR HOLDOWNS, PT ANCHORAGES (AS OCCUR), CURBS AND EDGES OF SLAB STEPS AND UNDER FLOOR DUCTS OR SIMILAR ELEMENTS. REMOVE ALL DEBRIS FROM FORMS BEFORE PLACING CONCRETE. CONCRETE SHALL NOT BE DROPPED THROUGH REINFORCING STEEL (AS IN WALLS AND COLUMNS) SO AS TO CAUSE SEGREGATION OF AGGREGATES. UNCONFINED FALL OF CONCRETE SHALL NOT EXCEED 5 FEET. CARE SHALL BE TAKEN IN PLACING SLABS ON GRADE SO AS NOT TO DISTURB FILL MATERIAL.

8. ALL ITEMS TO BE CAST IN CONCRETE SUCH AS REINFORCING, DOWELS, BOLTS, ANCHORS, PIPES, SLEEVES, ETC. SHALL BE SECURELY POSITIONED IN THE FORMS BEFORE PLACING THE CONCRETE.

9. CONCRETE SLAB ON GRADE WHERE NOTED CONTROL JOINTS SHALL BE AS SHOWN ON THE FOUNDATION PLAN OR TYPICAL DETAILS. WHERE CONTROL JOINTS ARE NOT SHOWN ON PLANS, ALL CONCRETE SLABS ON GRADE SHALL BE BOUNDED BY KEYED, DOWELED OR SAW-CUT CONTROL JOINTS SUCH THAT THE ENCLOSED AREA DOES NOT EXCEED 260 SQUARE FEET. RATIO OF BOUNDARY DIMENSIONS SHALL NOT EXCEED 1.5:1. KEYED OR DOWELED CONTROL JOINTS NEED ONLY OCCUR AT EXPOSED EDGES DURING POURING. ALL OTHER JOINTS MAY BE SAW CUT.

10. CONSTRUCTION JOINTS OR POUR JOINTS IN STRUCTURAL ELEMENTS (BEAMS, COLUMNS, ELEVATED SLABS, ETC.) NOT SPECIFICALLY SHOWN OR NOTED ON THE DRAWINGS REQUIRE PRIOR APPROVAL OF THE ENGINEER. CONTRACTOR SHALL SUBMIT SHOP DRAWINGS SHOWING PROPOSED JOINTS TO ENGINEER FOR APPROVAL.

11. PIPES OTHER THAN ELECTRICAL CONDUITS SHALL NOT BE EMBEDDED IN STRUCTURAL CONCRETE EXCEPT WHERE SPECIFICALLY APPROVED BY THE ENGINEER. MAXIMUM PIPE SIZE SHALL BE 1/3 OF THE SLAB THICKNESS AND LOCATED AT THE MID-DEPTH. MINIMUM SPACING SHALL BE 3 TIMES THE PIPE DIAMETER. PIPES SHALL NOT IMPAIR THE STRENGTH OF THE MEMBER.

12. PROTECT CONCRETE FROM DAMAGE OR REDUCED STRENGTH DUE TO COLD OR HOT WEATHER IN ACCORDANCE WITH ACI 305 AND 306 AND FBC.

13. ALL CONCRETE WORK SHALL CONFORM TO THE LATEST APPROVED (BY LOCAL GOVERNMENT) EDITION OF THE FOLLOWING A.C.I. AND A.S.T.M. DOCUMENTS:

| | |
|---|---|
| ACI - 318 | CODE |
| ACI - 214 | COMPRESSION TESTS |
| ACI - 306 | COLD WEATHER |
| ACI - 315 | DETAILING |
| ACI - 347 | FORMWORK |
| ACI - 605 | HOT WEATHER |
| ACI - 613 | PROPORTIONS OF CONCRETE |
| ACI - 614 | PLACING CONCRETE |
| ASTM - C94 | READY-MIX CONCRETE |

14. ALL FIELD AND JOB TESTING OF CONCRETE SHALL CONFORM TO THE LATEST APPROVED (BY LOCAL GOVERNMENT) EDITIONS OF ASTM:

| | |
|---|---|
| ASTM C - 31 | FIELD CYLINDER SPECIMENS |
| ASTM C - 143 | SLUMP TEST |
| ASTM C - 173 OR C-231 | AIR CONTENT (WHEN REQUIRED) |
| ASTM C - 39 | LAB TESTING CYLINDERS |
| ASTM C - 172 | SAMPLING FRESH CONCRETE |
| ASTM C - 42 | HARDENED CORES (WHEN REQUIRED) |

A MINIMUM OF 5 CYLINDERS SHALL BE TAKEN FOR EACH 100 YDS OF CONCRETE. BREAK ONE CYLINDER AT 3 DAYS, 1 AT 7 DAYS, 2 AT 28 DAYS AND HOLD ONE FOR 56 DAYS.
UPON COMPLETION OF CONCRETE TESTING, THE AGENCY SHALL CERTIFY THEIR RESULTS AS FOLLOWS:

"I CERTIFY THAT THE FIELD AND JOB TESTING CONFORM TO THE ASTM DOCUMENTS AND GOOD PRACTICE.

SIGNED.....,P.E."
(FOR AGENCY)

TESTS WILL NOT REVIEWED BY EOR UNLESS SIGNED AS NOTED.

15. CONCRETE FORMWORK SHALL NOT BE DISTURBED UNTIL THE CONCRETE HAS HARDENED TO BE ABLE TO SUPPORT ITS OWN WEIGHT PLUS A MINIMUM OF 20 PSF CONSTRUCTION LOAD. FORMS MUST REMAIN IN PLACE A MINIMUM OF SEVEN DAYS BEFORE REMOVAL AND THAT THE AIR IN CONTACT WITH THE CONCRETE HAS BEEN KEPT AT LEAST 50 DEGREES.

**NOTE:**
ALL EXPOSED CONCRETE SHALL BE PROTECTED WITH A WATER-PROOF PROTECTIVE COATING. STRUCTURAL DESIGN IS BASED ON THE STRENGTH DESIGN METHOD PERMITTED BY ACI-318. LIMITED CRACKING IS TO BE EXPECTED IN ANY CONCRETE STRUCTURE BUT THE CRACKING CAN BE MINIMIZED BY LIMITING THE WATER/CEMENT RATIO AS NOTED IN NOTE #1 ABOVE AND BY PROPER PLACEMENT OF REINFORCEMENT AND PROPER CURING PROCEDURES AS SPECIFIED BY ACI.

**NOTE:**
MAINTENANCE OF ALL EXPOSED STRUCTURAL ELEMENTS IS RECOMMENDED EVERY 4 TO 5 YEARS.

# MASONRY (CONCRETE BLOCK)

1. COMPRESSIVE STRENGTH OF CONCRETE MASONRY CONSTRUCTION (CMU) SHALL BE AS FOLLOWS (PSI). MASONRY STRENGTH NOT SPECIFICALLY NOTED ON PLAN SHALL BE (F'm) 1500 PSI.

| MASONRY STRENGTH(F'm DESIGN) | BLOCK STRENGTH | MORTAR STRENGTH | GROUT STRENGTH |
|---|---|---|---|
| 1500 | 1900 | 1800 | 2000 |

2. CONCRETE BLOCK SHALL BE HOLLOW LOAD-BEARING CONCRETE MASONRY UNITS CONFORMING TO FBC STANDARD 21-4 AND ASTM C90, GRADE N-II. ALL BLOCKS SHALL BE PLACED IN RUNNING BOND CONSTRUCTION (UNLESS OTHERWISE NOTED) WITH ALL VERTICAL CELLS IN ALIGNMENT.

2a. ALL MASONRY SHALL BE CONSTRUCTED USING LOW-LIFT GROUTING. MAX HEIGHT TO BE 4'-8".

3. MORTAR MIX SHALL CONFORM TO REQUIREMENTS OF FBC STANDARD 21-15, TYPE M OR S. TYPE M MORTAR SHALL BE USED WHERE MASONRY IS IN CONTACT WITH SOIL.

4. GROUT SHALL CONFORM TO REQUIREMENTS OF FBC STANDARD 21-19. USE SUFFICIENT WATER FOR GROUT TO FLOW INTO ALL JOINTS OF THE MASONRY WITHOUT SEGREGATION. ALL CELLS IN CONCRETE BLOCKS CONTAINING REINFORCING SHALL BE FILLED SOLID WITH GROUT. ALL MASONRY BELOW FINISHED FLOOR OR GRADE SHALL BE GROUTED SOLID. HOLD GROUT DOWN 1-1/2" BELOW TOP OF BLOCK AT GROUT LIFT JOINTS AND AT CONCRETE PLACED OVER MASONRY.

5. MINIMUM WALL VERTICAL REINFORCING, UNLESS NOTED OTHERWISE ON PLANS OR DETAILS, SHALL BE #5 BAR VERTICAL FULL HEIGHT IN CENTER OF GROUTED CELL AT ALL WALL INTERSECTIONS, CORNERS, WALL ENDS, JAMBS AT WALL OPENINGS, EACH SIDE OF CONTROL JOINTS, AND AT INTERVALS NOT TO EXCEED INTERVALS PER SCHEDULE. TIE AT 4'-0" VERTICALLY, WITH SINGLE WIRE LOOP TIE OR EQUIVALENT. DOWEL ALL VERTICAL REINFORCING TO FOUNDATION WITH DOWELS TO MATCH AND LAP VERTICAL REINFORCING.

6. MINIMUM WALL HORIZONTAL REINFORCING, UNLESS NOTED OTHERWISE ON PLANS OR DETAILS, SHALL BE (2) #5 BARS IN 16 INCH DEEP (MINIMUM) CONTINUOUS GROUTED BOND BEAM AT ELEVATED FLOOR AND ROOF LINES AND SINGLE #5 BAR IN CENTER OF 8 INCH DEEP CONTINUOUS GROUTED BOND BEAM AT TOP OF PARAPET OR FREE STANDING WALL AND AT INTERVALS NOT TO EXCEED 10'-0" OC. PLACE BARS AT ELEVATED FLOOR AND ROOFLINES CONTINUOUS THROUGH CONTROL JOINTS. PROVIDE BENT BARS PER TYPICAL DETAILS TO MATCH AND LAP HORIZONTAL BOND BEAM REINFORCING AT CORNERS AND WALL INTERSECTIONS TO MAINTAIN BOND BEAM CONTINUITY. USE BOND BEAM UNITS AT HORIZONTAL REINFORCING. HORIZONTAL REINFORCING SHALL BE 1-#4 BAR AT INTERVALS PER SCHEDULE IN CENTER OF 8"x8" CONTINUOUS GROUTED BOND BEAM FOR ALL EXTERIOR WALLS.

7. MINIMUM LINTEL, WHERE NOT NOTED ON PLANS, SHALL HAVE A MINIMUM OF (2) #5 CONTINUOUS HORIZONTAL BARS IN BOTTOM OF BOND BEAM OR LINTEL BLOCK AND SHALL BE GROUTED SOLID TO A MINIMUM DEPTH OF 24 INCHES. ALL LINTEL REINFORCING AND GROUT SHALL EXTEND 2 FEET MINIMUM PAST JAMBS UNLESS NOTED OTHERWISE ON PLANS OR DETAILS.

8. FOR BAR LAPS SEE SCHEDULE 12 SHEET SD1.0. STAGGER LAP SPLICES A MINIMUM OF ONE LAP LENGTH.

9. RETAINING WALLS, BASEMENT WALLS, ETC., SHALL BE ADEQUATELY WATERPROOFED AND DRAINED AS SPECIFIED BY OTHERS. IF NOT SPECIFIED BY OTHERS UNLESS NOTED OTHERWISE, DRAINAGE THROUGH RETAINING WALLS SHALL BE PROVIDED BY MEANS OF 1-1/2" DIAMETER HOLE AT 4 FEET OC AT LOW GRADE LEVEL. PROVIDE 2' GRAVEL COVER WITH FABRIC COVER AT DRAIN HOLES.

10. ALLOWABE SLUMP FOR GROUT INSTALLED IN CONCRETE MASONRY UNIT CELLS TO HAVE AN ALLOWABLE SLUMP OF 10" MAXIMUM.

12. IF CONTRACTOR PROVIDES PRECAST LINTELS FOR FORMWORK, PRODUCT APPROVALS TO BE PROVIDED TO BUILDING DEPARTMENT.

# INSPECTION NOTES

1. IN ADDITION TO THE STANDARD INSPECTIONS BY THE BUILDING OFFICIAL REQUIRED PER FBC, THE OWNER SHALL EMPLOY ONE OR MORE SPECIAL INSPECTORS WHO SHALL PROVIDE INSPECTIONS DURING CONSTRUCTION FOR THE TYPES OF WORK LISTED IN THIS SECTION.

2. THE SPECIAL INSPECTOR SHALL BE A QUALIFIED PERSON WHO SHALL DEMONSTRATE COMPETENCE, TO THE SATISFACTION OF THE BUILDING OFFICIAL, FOR INSPECTION OF THE PARTICULAR TYPE OF CONSTRUCTION OR OPERATION REQUIRING SPECIAL INSPECTION.

3. TYPES OF WORK TO BE INSPECTED BY THE SPECIAL INSPECTOR ARE AS FOLLOWS:

a) DURING ALL EPOXY ANCHORING OPERATIONS FOR BOLTS, REBAR, THREADED ROD, ETC., INCLUDING VERIFICATION OF BOLT OR BAR MATERIALS, HOLE DEPTH AND DIAMETER, HOLE CLEANOUT, EPOXY MIXING AND PLACEMENT PROCEDURES, AND EMBEDMENT DEPTH IN ACCORDANCE THE CONTRACT DRAWINGS AND THE MANUFACTURER'S SPECIFICATIONS AND RECOMMENDATIONS.

b) DURING THE TAKING OF TEST SPECIMENS AND PLACING OF REINFORCED CONCRETE.

c) PRIOR TO, AND DURING THE INSTALLATION OF CONCRETE AROUND BOLTS.

d) DURING THE PREPARATION AND TAKING OF ANY REQUIRED PRISMS OR TEST SPECIMENS, PLACING OF ALL MASONRY UNITS, PLACEMENT OF REINFORCEMENT, INSPECTION OF GROUT SPACE IMMEDIATELY PRIOR TO CLOSING OF CLEANOUTS, AND DURING ALL GROUTING OPERATIONS.

e) DURING CMU PLACEMENT AND WALL REINFORCEMENT PLACEMENT.

4. CERTIFICATE OF APPROVAL REGARDING MATERIALS AND INSPECTION OF PREFABRICATED ITEMS SHALL BE PROVIDED IN ACCORDANCE WITH FBC.

# REINFORCING STEEL

1. REINFORCING STEEL SHALL CONFORM TO THE REQUIREMENTS OF ASTM A615. REINFORCING SHALL BE GRADE 60 (FY = 60 KSI) DEFORMED BARS FOR ALL BARS USED FOR CONCRETE WALLS, BEAMS, ELEVATED SLABS AND COLUMN PRIMARY REINFORCING. ALL REINFORCING TO BE WELDED SHALL BE ASTM A706, GRADE 60 LOW ALLOY WELDABLE STEEL.

2. WELDED WIRE FABRIC SHALL CONFORM TO THE REQUIREMENTS OF ASTM A185. LAPS IN WELDED WIRE FABRIC SHALL BE MADE SUCH THAT THE OVERLAP, MEASURED BETWEEN OUTERMOST CROSS WIRE OF EACH FABRIC SHEET, IS NOT LESS THAN THE SPACING OF CROSS WIRES PLUS 2 INCHES.

3. ALL DIMENSIONS SHOWING THE LOCATION OF REINFORCING STEEL NOT NOTED AS "CLEAR" OR "CLR" ARE TO CENTER OF STEEL. MINIMUM COVER FOR NON-PRESTRESSED CONCRETE REINFORCING SHALL BE AS FOLLOWS, UNLESS NOTED OTHERWISE ON PLANS OR DETAILS:

| EXPOSURE CONDITION: | MINIMUM COVER: | TOLERANCES (+ / -): |
|---|---|---|
| CAST AGAINST AND PERMANENTLY EXPOSED TO EARTH: | 3" | 3/8" |
| EXPOSED TO EARTH OR WEATHER: | | |
| # 5 AND SMALLER: | 2" | 3/8" |
| # 6 AND LARGER: | 2 1/4" | 3/8" |
| NOT EXPOSED TO WEATHER OR IN CONTACT WITH THE GROUND: | | |
| ROOF SLAB: | 1" | 1/8" |
| STRUCTURAL SLABS AND WALLS: | 3/4" | 1/8" |
| BEAMS AND COLUMNS (PRIMARY REINFORCEMENT, TIES, STIRRUPS AND SPIRALS): | 1-1/2" | 3/8" |
| SLABS ON GRADE: | 1-1/2" | 1/4" |

4. LAP SPLICES OF REINFORCING STEEL IN CONCRETE BEAMS, SLABS AND FOOTINGS SHALL BE ACCORDING TO LAP SCHEDULE 7 SHEET SD3.0, UNLESS NOTED OTHERWISE. STAGGER SPLICES A MINIMUM OF ONE LAP LENGTH. NO TACK WELDING OF REINFORCING BARS ALLOWED. LATEST ACI CODE AND DETAILING MANUAL APPLY. PROVIDE BENT CORNER BARS TO MATCH AND LAP WITH HORIZONTAL BARS AT ALL CORNERS AND INTERSECTIONS PER TYPICAL DETAILS. VERTICAL WALL BARS SHALL BE SPLICED AT OR NEAR FLOOR LINES. SPLICE BARS TOP BARS AT CENTER LINE OF SPAN AND BOTTOM BARS AT THE SUPPORT IN SPANDRELS, BEAMS, GRADE BEAMS, ETC. UNLESS NOTED OTHERWISE.

5. MECHANICAL SPLICE COUPLERS, FLANGE COUPLERS, THREADED COUPLERS, ETC. SHALL HAVE CURRENT ICC APPROVAL AND SHALL BE CAPABLE OF DEVELOPING 125% OF THE STRENGTH OF THE BAR.

6. ALL REINFORCING SHALL BE BENT COLD. BARS SHALL NOT BE STRAIGHTENED AND RE-BENT. FIELD BENDING OF REBAR SHALL NOT BE ALLOWED UNLESS SPECIFICALLY NOTED.

7. WELDING OF REINFORCING BARS, METAL INSERTS, AND CONNECTIONS SHALL CONFORM WITH FBC AND SHALL BE MADE ONLY AT LOCATIONS SHOWN ON PLANS OR DETAILS.

8. REINFORCING BAR SPACING SHOWN ON PLANS ARE AT MAXIMUM ON CENTERS. ALL BARS SHALL BE DETAILED AND PLACED PER CONCRETE REINFORCING STEEL INSTITUTE (CRSI) SPECIFICATIONS AND HANDBOOK. DOWEL ALL VERTICAL REINFORCING TO FOUNDATION. SECURELY TIE ALL BARS IN LOCATION BEFORE PLACING CONCRETE.

# WOOD

1. SAWN FRAMING LUMBER SHALL COMPLY WITH THE LATEST EDITION OF THE GRADING RULES OF THE WESTERN WOOD PRODUCTS ASSOCIATION OR THE WEST COAST LUMBER INSPECTION BUREAU, NDS AND THE LATEST EDITION OF THE FBC. ALL SAWN LUMBER SHALL BE STAMPED WITH THE GRADE MARK OF AN APPROVED LUMBER GRADING AGENCY. SAWN LUMBER SHALL HAVE THE FOLLOWING MINIMUM GRADE (UNLESS NOTED OTHERWISE):

| | |
|---|---|
| 2X4 STUDS UP TO 10'-0" | SYP NO. 2 GRADE |
| 2X4 STUDS OVER 10'-0" | SYP NO. 2 GRADE |
| 2X4 TOP OR BOTTOM PLATES | SYP NO. 2 GRADE |
| 2X6 STUDS UP TO 10'-0" | SYP NO. 2 GRADE |
| 2X6 STUDS OVER 10'-0" | SYP NO. 2 GRADE |
| 2X6 TOP OR BOTTOM PLATES | SYP NO. 2 GRADE |
| 2X4 OR 2X6 BLOCKING | SYP STANDARD, STUD, NO.2 |
| 2X8, 2X10, 2X12 (ALL APPLICATIONS) | SYP NO 2 GRADE |
| 4X4 (ALL APPLICATIONS) | SYP NO. STANDARD GRADE |
| 4X6, 4X8, 4X10, 4X12 (ALL APPLICATIONS) | SYP NO. 2 GRADE |
| 6X6, 6X8, 6X10, 6X12 (ALL APPLICATIONS) | SYP NO. 1 GRADE |

2. GLUE-LAMINATED BEAMS (GLULAM) SHALL BE SYP COMBINATION 24F-V4 AT SIMPLE SPANS AND 24F-V8 AT CANTILEVER SPANS HAVING THE FOLLOWING MINIMUM PROPERTIES: Fb = 2,400 PSI, Fv = 190 PSI, Fc (PERPENDICULAR) = 650 PSI, E = 1,800,000 PSI. FABRICATION AND HANDLING SHALL CONFORM TO THE LATEST AMERICAN INSTITUTE FOR TIMBER CONSTRUCTION (AITC) AND ASTM STANDARDS. BEAMS SHALL BEAR AN APPROPRIATE GRADE STAMP CLEARLY NOTING ITS DESIGN PROPERTIES. UNLESS CAMBER AND TOLERANCE IS SPECIFICALLY NOTED ON THE DRAWINGS, BEAMS SHALL BE MANUFACTURED WITH INDUSTRY STANDARD MINIMUM CAMBER OR UPWARD TO SPAN/200. ERECT WITH CROWN OR CAMBER UP. IN HEADER CONDITIONS (BEAM BUILT INTO WALL) CRIPPLE FRAMING ABOVE HEADER SHALL MAINTAIN CAMBER. HEADER BEAMS MAY HAVE ZERO CAMBER, PROVIDED CRIPPLE FRAMING ABOVE HEADER IS BUILT WITH MINIMUM CAMBER STATED ABOVE.

3. LAMINATED VENEER LUMBER (MICROLAM) SHALL BE WESTERN SPECIES MANUFACTURED IN ACCORDANCE WITH WEYERHAUSER CORPORATION MANUFACTURING STANDARDS AS REFERENCED IN ICC REPORT NO. EGR-1387, OR APPROVED EQUAL, AND SHALL HAVE THE FOLLOWING MINIMUM PROPERTIES: E = 1,900,000 PSI, Fb = 2600 PSI, Fc (PERPENDICULAR) = 750 PSI, Fc (PARALLEL) = 2310 PSI, Fv = 285 PSI. WHEN MULTIPLE MICROLAMS ARE GROUPED TOGETHER, FASTEN WITH 2 ROWS OF 16d COMMON NAILS AT 12" OC. USE 3 ROWS OF 16d COMMON NAILS AT 12" OC FOR DEPTHS 14" OR GREATER. 16" AND 18" DEEP BEAMS ARE TO BE USED IN MULTIPLE MEMBER UNITS ONLY. SEE MANUFACTURER'S RECOMMENDATIION WHEN GROUPING 4 MEMBERS TOGETHER OR GROUPING MEMBERS WIDER THAN 1-3/4".

4. ALL PLYWOOD SHALL BE C-D OR C-C SHEATHING CONFORMING TO FBC. LAY UP PLYWOOD WITH FACE GRAIN PERPENDICULAR TO SUPPORTS. PROVIDE BLOCKING AT PANEL EDGES WHERE INDICATED ON PLANS. ALL PLYWOOD SHALL CONFORM TO THE FOLLOWING NOMINAL THICKNESS, SPAN RATING AND NAILING PATTERN UNLESS NOTED OTHERWISE (SEE DETAILS SHEET SD30 AND SD40):

| THICKNESS: | SPAN RATING: | EDGE NAILING: | FIELD NAILING: |
|---|---|---|---|
| 15/32" (1/2") | 48/24 | SEE SCHEDULE | SEE SCHEDULE |
| 19/32" (5/8") | 32/16 | SEE SCHEDULE | SEE SCHEDULE |
| 3/4" | 48/24 | SEE SCHEDULE | SEE SCHEDULE |

5. AMERICAN PLYWOOD ASSOCIATION PERFORMANCE RATED SHEATHING (OSB) MAY BE USED AS AN ALTERNATE TO PLYWOOD WITH PRIOR APPROVAL OF OWNER AND ARCHITECT. RATED SHEATHING SHALL COMPLY WITH ICC AND SHALL HAVE A SPAN RATING EQUIVALENT TO OR BETTER THAN THE PLYWOOD IT REPLACES. ATTACHMENT AND THICKNESS (WITHIN 1/32") SHALL BE THE SAME AS THE PLYWOOD IT REPLACES. INSTALL PER MANUFACTURER'S RECOMMENDATIONS.

6. DIMENSIONS OF NAILS SHALL CONFORM WITH THE FOLLOWING TABLE:

| NAIL SIZE: | SHANK DIA: | LENGTH: |
|---|---|---|
| 16d COMMON | .162" | 3-1/2" |
| 16d SINKER | .148" | 3-1/4" |
| 16d BOX | .135" | 3-1/2" |
| P-NAIL | .131" | 3-1/4" |
| 10d COMMON | .148" | 3" |
| 8d COMMON | .131" | 2-1/2" |
| 8d RINGSHANK | .131" | 2-1/2" |

NAILS ONLY NOTED AS 16d MAY BE COMMON, SINKER OR P-NAIL UNLESS NOTED SPECIFICALLY AS COMMON, SINKER OR P-NAIL. NAILS NOTED ON PLANS OR NOTES AS 10d OR 8d SHALL BE COMMON ONLY. ALL NAILING NOT NOTED SHALL BE ACCORDING TO FBC.

7. DO NOT NOTCH, SLOPE CUT, OR DRILL JOISTS, BEAMS OR LOAD-BEARING STUDS WITHOUT PRIOR APPROVAL OF THE STRUCTURAL ENGINEER THROUGH THE ARCHITECT UNLESS SPECIFIC DETAILS ARE PROVIDED. DOUBLE UP FLOOR JOISTS AND BLOCKING UNDER WALLS THAT RUN PARALLEL TO THE JOISTS. PROVIDE 2" (NOMINAL) SOLID BLOCKING BETWEEN JOISTS AT SUPPORTS.

8. JOIST HANGERS AND OTHER MISCELLANEOUS FRAMING ANCHORS SHALL BE AS MANUFACTURED BY SIMPSON STRONG-TIE COMPANY WITH CURRENT ICC APPROVAL. ATTACH FRAMING ANCHORS TO WOOD PER MANUFACTURER'S RECOMMENDATIONS. USE MAXIMUM NUMBER AND SIZE OF FASTENER WHERE NOT SPECIFICALLY NOTED. USE OF ALTERNATE HARDWARE MANUFACTURER REQUIRES WRITTEN APPROVAL OF THE ENGINEER. VERIFY LOCATION OF HOLDOWNS, POST BASES, ETC. WITH FRAMING TO ENSURE PROPER AND ACCURATE INSTALLATION.

9. ALL BOLTS SHALL BE INSTALLED IN HOLES BORED WITH A BIT 1/16 INCH LARGER THAN THE DIAMETER OF THE BOLT. BOLTS AND NUTS SEATING ON WOOD SHALL HAVE 3" DIA OR 3X3X0.229" CUT STEEL WASHERS UNDER HEADS AND NUTS. DING THREADS TO PREVENT LOOSENING. LAG SCREWS SHALL BE INSTALLED IN PRE-DRILLED HOLES BY TURNING WITH A WRENCH.

10. PREFABRICATED WOOD TRUSSES, JOISTS AND GIRDER TRUSSES CODES AND FABRICATION: MANUFACTURER'S APPROVED (ICC) PRODUCT EVALUATION REPORTS.

GRADE STAMPED (SOUTHERN YELLOW PINE NO. 2 OR BETTER).

DESIGN REQUIREMENTS:

A. ROOF: FLAT (LESS THAN 4:12)

| | |
|---|---|
| DEAD LOAD TOP CHORD | 20 PSF |
| DEAD LOAD BOTTOM CHORD | 5 PSF |
| LIVE LOAD TOP CHORD | 20 PSF |
| LIVE LOAD BOTTOM CHORD | 10 PSF UNO ON PLAN |

B. ROOF LOADS: SLOPED (4:12 OR GREATER)

| | |
|---|---|
| DEAD LOAD TOP CHORD | 20 PSF |
| DEAD LOAD BOTTOM CHORD | 5 PSF |
| LIVE LOAD TOP CHORD | 16 PSF |
| LIVE LOAD BOTTOM CHORD | 10 PSF UNO ON PLAN NON-CURRENT LL |

C. DEFLECTION: ROOF TOTAL LOAD DEFLECTION SHALL NOT EXCEED L/240.

CALCULATIONS AND SHOP DRAWINGS: SUBMIT FOR REVIEW, SHOP DRAWINGS AND CALCULATIONS BY A FLORIDA REGISTERED ENGINEER, FOR THE DESIGN LOADS, INCLUDING MAXIMUM REACTION, SHEAR, MOMENT, AND DEFLECTION IN COMPARISON TO THE ALLOWABLES. SIZE THE TOP CHORD FOR THE DIAPHRAGM NAILING AND A (2x) MINIMUM NOMINAL WIDTH. (THE TRUSSES SHOWN ON THE DRAWINGS ARE PRELIMINARY AND MAY REQUIRE SIZE OR SPACING MODIFICATIONS. **TRUSS MANUFACTURER SHALL PROVIDE FOR DRAG TRUSS LOADS INDICATED ON THE STRUCTURAL DRAWINGS.**

BLOCKING, BRACING AND BRIDGING: AS REQUIRED BY THE MANUFACTURER'S APPROVED PRODUCT EVALUATION REPORTS, THE ICC APPROVALS, THE CALCULATIONS AND THE DRAWINGS. PROVIDE PANEL BLOCKING AS NOTED ON STRUCTURAL DRAWINGS. **TRUSS MANUFACTURER TO PROVIDE ALL BLOCKING SHOWN ON PLANS AND DETAILS.**

TRUSS CHANGES: OBTAIN WRITTEN CONSENT FROM THE ENGINEER TO CHANGE THE TRUSS TYPE, WIDTH, CHORD DEPTH, TRUSS SHAPE OR SPACING.

11. WHERE BRIDGING INTERFERES WITH MECHANICAL OR OTHER INSTALLATIONS, REMOVE BRIDGING AFTER DECK IS IN PLACE AND REPLACE WITH ADDITIONAL MANUFACTURER SUPPLIED HORIZONTAL STRUT BRACING AT TOP AND BOTTOM CHORDS.

12. DRAWINGS AND DETAILS DO NOT NECESSARILY INDICATE NONSTRUCTURAL BLOCKING, BRACING, DRYWALL BACKING, ETC. ALL SUCH ITEMS SHALL BE ADEQUATELY SECURED TO FRAMING.

13. DUCTS, PIPING, ELECTRICAL CONDUIT, ETC. SHALL NOT BE SUSPENDED FROM 2X_ SUBPURLINS AT PANELIZED ROOFS UNLESS SPECIFICALLY APPROVED IN WRITING BY THE ENGINEER.

NOTES:
1. LOADINGS PER ASCE 7-22; FBC 2023 REDUCED FOR SERVICE LEVEL USING 0.6 FACTOR.

## MASONRY JAMB SCHEDULE

| MARK | MIN WIDTH | REINFORCING | SCHEMATIC | REMARKS |
|---|---|---|---|---|
| MJ1 | 16" | (2) #5 VERTICAL |  | REINFORCING CLEARANCE PER DETAIL. HOOK HORIZONTAL STEEL AT VERTICAL STEEL. SEE MASONRY WALL SCHEDULE FOR HORIZONTAL STEEL |
| MJ2 | 24" | (4) #5 VERTICAL WITH #3 S-HOOK HORIZONTAL @ 8" OC ALTERNATE BENDS |  | REINFORCING CLEARANCE PER DETAIL. HOOK HORIZONTAL STEEL AT VERTICAL STEEL. SEE MASONRY WALL SCHEDULE FOR HORIZONTAL STEEL |

GENERAL NOTES

1. ALL JAMBS TO BE MJ1 UNLESS NOTED OTHERWISE.
2. ALL JAMB REINFORCING EXTENDS FROM FOUNDATION TO TOP OF WALL
3. USE (1) #5 BAR EACH FACE IN CELLS ADJACENT TO WALL OPENINGS AND AT MASONRY CONTROL JOINTS UNLESS NOTED OTHERWISE.
4. HORIZONTAL BARS TO HAVE STAGGERED HOOKS.

## CONCRETE PAD FOOTING SCHEDULE

| MARK | DEPTH | WIDTH | LENGTH | REINFORCING |
|---|---|---|---|---|
| F-1 | 16" | 3'-0" | 3'-0" | 3-#5 EACH WAY BOTTOM |

NOTE:
ALL ADDITIONAL TO EXISTING FOOTINGS TO BE TO THE OUTSIDE OF THE STRUCTURE

## WALL FOOTING SCHEDULE

| MARK | WIDTH | DEPTH | LENGTH | REINFORCING |
|---|---|---|---|---|
| WF-1 | 2'-0" | 1'-0" | CONT | 3-#5 LONG BOTTOM AND #5 AT 24" OC TRANS BOTTOM |
| WF-2 | 3'-4" | 1'-0" | CONT | 3-#5 LONG BOTTOM AND #5 AT 24" OC TRANS BOTTOM |

## MASONRY WALL SCHEDULE

| MARK | THICKNESS | VERTICAL REINFORCING | HORIZONTAL REINFORCING | REMARKS |
|---|---|---|---|---|
| MW1 | 8" | #5 AT 48" OC | #4 AT 48" OC | GROUT AT REINF ONLY |

NOTES:
1. ALL WALLS NOT OTHERWISE NOTED SHALL BE MW1.
2. PROVIDE (2) #5 BOUNDARY STEEL AT END OF ALL 8" MASONRY WALLS.

## MASONRY LINTEL SCHEDULE

| MARK | DEPTH | WIDTH | REINFORCING | | | |
|---|---|---|---|---|---|---|
| | | | BOTTOM | INTER | TOP | VERTICAL |
| ML1 | 16" | 8" | 2-#5 | NA | 2-#5 | #5 AT 48" OC |

**NOTES:**
1. VERTICAL REINFORCING TO MATCH AND LAP WALL REINFORCING PER GENERAL STRUCTURAL NOTES UNLESS NOTED OTHERWISE.
2. EXTEND GROUT, OPEN END MASONRY UNITS AND REINFORCING 2'-0" PAST JAMB.
3. PRODUCT APPROVALS PER STATE OF FLORIDA TO BE PROVIDED FOR ALL PRECAST LINTELS EMPLOYED AS FORMWORK FOR LINTELS SHOWN.
4. SEE DETAIL 14 SHEET SD1.0 FOR TYPICAL MASONRY LINTEL DETAIL.
5. HOOK ENDS OF VERTICAL BARS AND STAGGER PER DETAIL.

## ROOF NAILING SCHEDULE

| MARK | BOUNDARIES | PANEL EDGES | REMARKS |
|---|---|---|---|
| RN1 | 10d RINGSHANK AT 4" OC | 10d RINGSHANK AT 4" OC | BLOCKED DIAPHRAGM |
| RN2 | 10d RINGSHANK AT 6" OC | 10d RINGSHANK AT 6" OC | UNBLOCKED DIAPHRAGM |

NOTES:
1. TYP NAILING PATTERN SHALL BE TYPE "RN-1" UNLESS NOTED OTHERWISE.
2. FIELD NAILING SHALL BE AT 12" OC TYP. MATCH OTHER NAIL SIZE.
3. SEE TYPICAL SHEATHING LAYOUT DETAIL 5 SHEET SD4.0.

## TRUSS CONNECTOR SCHEDULE

NOTES:
1. MINIMUM CONNECTOR FOR ALL TRUSSES TO BE SIMPSON H10A
2. CONNECTORS TO BE VERIFIED WITH SHOP DRAWING CHECK OF TRUSS DESIGN

SHEET TITLE
SCHEDULES

DRAWING NO.
S1.2

## 2 ROOF FRAMING PLAN

Scale: 1/4"=1'-0"

## 1 FOUNDATION PLAN

Scale: 1/4"=1'-0"

## FRAMING PLAN NOTES:

1. ROOF SHEATHING SHALL BE 19/32" C-D PLYWOOD PER GSN UNO. NAIL PER SCHEDULE ON SHEET S1.2.
2. ROOF SLOPE AND CRICKET AREAS PER ARCHITECTURAL.
3. TRUSS MFR SHALL BE RESPONSIBLE FOR FOLLOWING APPROVED STRUCTURAL DRAWINGS WITHOUT ALTERATION TO LOAD PATH. MFR SHALL DESIGN FOR ALL CONDITIONS INCLUDING, MECHANICAL UNITS, SPECIAL OPENINGS, ETC. SEE PLAN FOR ADDITIONAL LOADS TO TRUSS. SEE GSN FOR ADDITIONAL NOTES TO TRUSS MFR.
4. "D=XXXX#" INDICATES DRAG LOAD (TENSION OR COMPRESSION) DUE TO WIND LOAD.
5. TOTAL LOAD DEFLECTION LESS THAN SPAN/240 LIVE LOAD DEFLECTION LESS THAN SPAN/360.
6. ROOF TRUSSES AT MECHANICAL UNITS SHALL BE DESIGNED TO SUPPORT THE UNIT WEIGHT SHOWN ON THE DRAWINGS. VERIFY UNIT WEIGHT WITH FINAL MECHANICAL PRIOR TO TRUSS DESIGN AND FABRICATION.
7. "RN1" OR "RN2" INDICATES ROOF NAILING PER SCHEDULE ON SHEET S1.2.
8. WL-1, WL-2 INDICATES WOOD LEDGER PER SCHEDULE ON SHEET S1.2.
9. SEE SHEET S1.2 FOR TRUSS CONNECTORS.

## FOUNDATION PLAN NOTES:

1. 5" THICK CONCRETE SLAB ON GRADE WITH #4 AT 16" OC EW CENTERED IN SLAB OVER SUBGRADE PER GSN AND SOIL REPORT. SEE GSN AND TYPICAL DETAILS FOR CONCRETE PLACEMENT AND CONTROL JOINTS.
2. MINIMUM TOP OF FOOTING (TOF) EMBEDMENT AT MASONRY AND CONCRETE WALLS SHALL BE A MINIMUM OF 1'-4" BELOW FINISH FLOOR UNO. TOP OF FOOTING AT STEEL COLUMNS SHALL BE A MINIMUM OF 1'-0" BELOW LOWEST ADJACENT COMPACTED SUBGRADE AS DEFINED IN THE GSN. MINIMUM FOOTING EMBEDMENT DEPTH SHALL BE PER GSN.
3. SEE ARCHITECTURAL FOR SLAB DEPRESSIONS, STEPS, SLOPES, DRAINS, EXTERIOR SLABS, ETC.
4. VERIFY ALL DIMENSIONS AND CONDITIONS WITH ARCHITECTURAL DRAWINGS. DIMENSIONS NOT NOTED SHALL BE PER APPROVED ARCHITECTURAL DRAWINGS. RESOLVE ANY DISCREPANCIES WITH THE ARCHITECT PRIOR TO CONSTRUCTION.
5. ESTABLISH AND VERIFY SIZE AND LOCATION OF OPENINGS AND INSERTS IN SLAB WITH OTHER DRAWINGS, TRADES AND SUBCONTRACTORS PRIOR TO CONSTRUCTION.
6. MJ1, MJ2 . . . INDICATES MASONRY JAMB PER SCHEDULE ON SHEET S1.1.
7. F-1 INDICATES CONCRETE PAD FOOTING PER SCHEDULE ON SHEET S1.1.
8. WF1, WF2 . . . INDICATES CONTINUOUS WALL FOOTING PER SCHEDULE ON SHEET S1.1.
9. ALL MASONRY WALLS SHALL BE TYPE MW1 PER SCHEDULE ON SHEET S1.1.
10. FOOTINGS ARE ON COMPACTED FILL. FILL EXTENDS 5'-0" MINIMUM BEYOND BUILDING LINE VERIFY WITH GEOTECHNICAL ENGINEER.
11. SEE DETAIL 02/SD3.0 FOR EMBEDDED PIPE AT FOUNDATIONS.
12. ALL UNBRACED WALLS SHALL BE BRACED PER NOTE 13 UNDER MASONRY (CONCRETE BLOCK) SECTION ON S1.0.
13. WHERE FOOTINGS ARE PIERCED BY PLUMBING AND HEATING PIPES, PROVIDE PIPE SLEEVES. MECHANICAL CONTRACTOR TO COORDINATE LOCATIONS. STEP FOOTING AS NEEDED TO CLEAR FOOTING, SEE DETAIL 2/SD3.0.
14. ALL CONSTRUCTION JOINTS IN FOOTINGS SHALL OCCUR AT MID-SPANS AND BE FORMED VERTICALLY.
15. REMOVE ALL WATER SOFTENED SOILS FROM FOOTING EXCAVATIONS PRIOR TO PLACING CONCRETE. FILL REMAINING VOIDS WITH ADDITIONAL CONCRETE.
16. SUPPORT ALL BOTTOM REINFORCING IN FOOTINGS WITH CONCRETE BRICKS SPACED AT 36" OC MAX AS PER ACI-SP-11.
17. FORM ALL FOOTINGS IF SOIL ITSELF IS UNSTABLE FOR SUPPORT.
18. WHERE GRAVITY PLUMBING LINES OCCUR BELOW TOP OF FOOTINGS, STEP FOOTINGS DOWN TO PROVIDE CLEARANCE OVER TOP OF FOOTINGS. DO NOT PLACE PIPES BELOW FOOTINGS.
19. IN NO CASE SHALL TRUCKS, BULLDOZERS OR HEAVY EQUIPMENT BE PERMITTED WITHIN 8'-0" OF ANY FRESHLY POURED CONCRETE FOUNDATIONS.

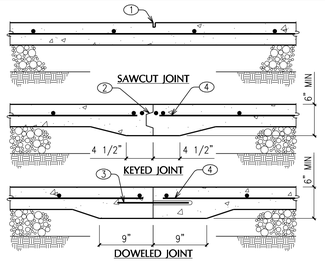
SHEET TITLE
FOUNDATION AND ROOF FRAMING PLANS

DRAWING NO.
S2.0

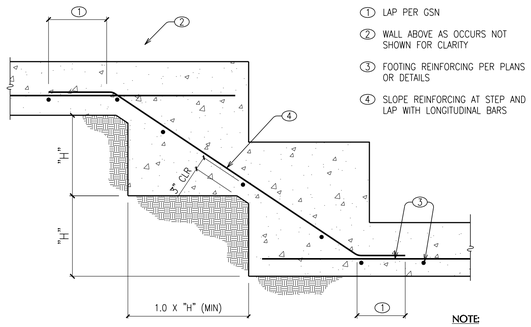


1. TOP OF WALL
2. HORIZ BOND BEAM REINFORCING PER GSN UNO ON PLAN OR DETAIL
3. CONT GROUT STOP FOR HORIZ GROUT

**NOTE:**
1. VERT REINFORCING NOT SHOWN FOR CLARITY. SEE TYP DETAIL WHERE DOUBLE VERT BARS REQUIRED
2. SEE DETAILS FOR ADDITIONAL GROUT DEPTH REQUIRED AROUND EMBEDED ITEMS
3. BOLTS, DOWELS OR EMBEDED STRAP SHALL HAVE 4" MIN GROUT COVER
4. VERIFY WALL WIDTHS WITH PLAN AND MASONRY WALL SCHEDULE.

## 11 TYPICAL HORIZONTAL BOND BEAM

Scale: NONE

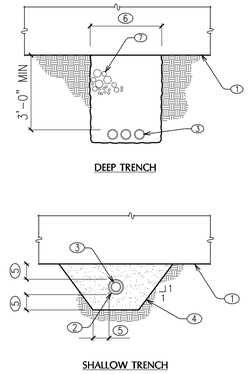


**NOTES:**
1. USE DOWELED OR KEYED JOINT AT SLOPE TRANSITIONS IN RAMPS AT SLAB ON GRADE
2. KEYED OR DOWELED JOINT NEED ONLY OCCUR AT EXPOSED EDGES DURING PLACEMENT
3. CONCRETE CONTROL JOINTS SHALL BE LOCATED ACCORDING TO GEN STRUCTURAL NOTES OR AS SHOWN ON PLANS. ADD CONTROL JOINTS SUCH THAT AREA ENCLOSED BY JOINTS DOES NOT EXCEED 260 SQ FEET WITH ASPECT RATIO LESS THAN 1.5 TO 1.0

1. SAWCUT JOINT. 1/8" WIDE x 1/4 SLAB THICKNESS. CUT SHOULD BE MADE AS SOON AS POSSIBLE TO PREVENT UNCONTROLLED SHRINKAGE CRACKING BUT NOT SO SOON AS TO CAUSE RAVELING, ERODING OR SPALLING OF JOINT. CUT SHOULD BE MADE WITHIN 12 HOURS OF CONCRETE PLACEMENT
2. 1 1/2"x3 1/2" CONT TAPERED KEY
3. 3/4" DIAx16" LONG SMOOTH DOWEL AT 18" OC. POLYETHYLENE WRAP ONE END TO PREVENT BOND TO CONCRETE. CENTER IN SLAB THICKNESS AT POUR JOINT. MISLOCATED DOWELS WILL CAUSE CRACKING
4. INTERRUPT EVERY OTHER BAR AT KEYED JOINT. INTERRUPT ALL BARS AT DOWELED JOINT. CENTER REINF BARS IN SLAB THICKNESS UNLESS NOTED OTHERWISE

## 7 TYPICAL CONTROL JOINT IN SLAB ON GRADE

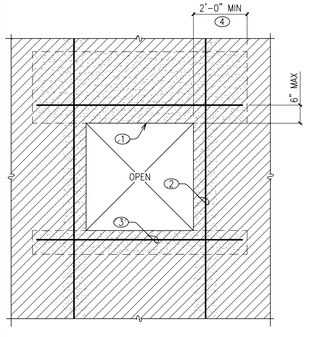
Scale: NONE



1. LAP PER GSN
2. WALL ABOVE AS OCCURS NOT SHOWN FOR CLARITY
3. FOOTING REINFORCING PER PLANS OR DETAILS
4. SLOPE REINFORCING AT STEP AND LAP WITH LONGITUDINAL BARS

**NOTE:**
"H" = 1'-6" (MAX)

## 3 TYPICAL STEPPED FOOTING

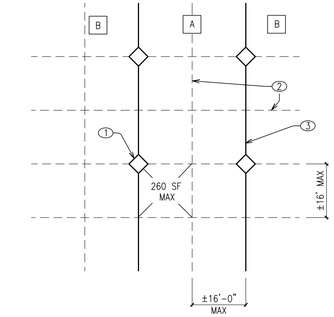


Scale: NONE

1. BOTTOM OF CONCRETE FOOTING OR FOUNDATION
2. SLEEVE. SIZE TO PROVIDE 1 1/2" MIN. CLEARANCE AROUND UTILITY PIPE
3. UTILITY PIPE
4. LEAN CONCRETE FILL. PLACE PRIOR TO FOOTING PLACEMENT. EXTEND CONCRETE AND SLEEVE 3'-0" PAST EACH SIDE FOOTING
5. CLEARANCE EQUAL TO SLEEVE DIA (6" MIN)
6. 4'-0" MAX. WIDTH, WHERE TRENCH WIDTH EXCEEDS 3'-0", NOTIFY STRUCTURAL ENGINEER PRIOR TO PLACEMENT OF FOOTING
7. BACKFILL AND RECOMPACT TRENCH PER SOIL REPORT AND SPECIFICATIONS
8. BOTTOM OF TRENCH PARALLEL TO FOUNDATION SHALL NOT BE CLOSER THAN 1 TO 1 SLOPE FROM BOTTOM EDGE OF FOOTING

## 1 TYPICAL UTILTIY TRENCH AT CONTINUOUS FOOTING

Scale: NONE

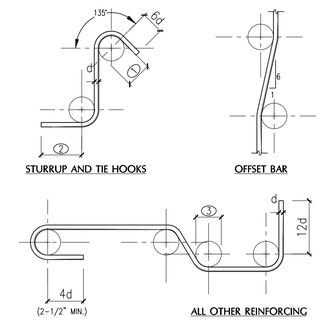


1. VERTICAL WALL REINFORCING IN SOLID GROUTED CELL EACH SIDE OF JOINT
2. CONTINUOUS VERTICAL CONTROL JOINT MATERIAL PER ARCHITECTURAL. AT FIREWALL OR AREA SEPARATIONS, CERE BLANKET IS REQUIRED. REQUEST INFORMATION FROM ARCHITECT
3. CONTINUE HORIZONTAL BOND BEAM REINFORCING THRU JOINT. WRAP BARS WITH MASTIC FOR BOND BREAK WITHIN 1'-6" OF JOINT. DO NOT LAP HORIZONTAL REINFORCING WITHIN 4'-0" OF CONTROL JOINT

**NOTE:**
1. CONTROL JOINTS TO BE LOCATED AS SHOWN ON PLAN OR AS SPECIFIED IN THE GENERAL STRUCTURAL NOTES WITH MAX SPACING OF 30'-0". COORDINATE WITH ARCHITECTURAL ELEVATIONS, PLANS AND SPECIFICATIONS
2. DO NOT LAP BOND BEAM WITHIN 4'-0" OF CONTROL JOINT COORDINATE WITH ARCHITECTURAL

## 12 TYPICAL MASONRY WALL CONTROL JOINT

Scale: NONE



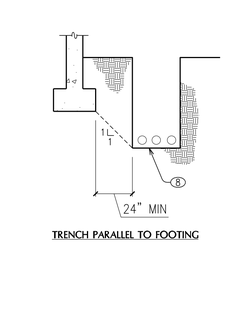
1. CLOSURE POUR AROUND COLUMN
2. SAW CUT CONTROL JOINT SEE TYP DETAIL
3. DOWLED OR KEYED JOINT BETWEEN POURS

**NOTES:**
1. SPACE JOINTS AT 16' MAX EW WITH RATIO NOT TO EXCEED 1.5:1 FOR ANY PANEL. ADD (2)#4x48" DIAGONAL AT INSET CORNER OR PERPENDICULAR TO DISCONTINUOUS JOINT.
2. PLACE POUR STRIP AT COLUMNS OR SUBDIVIDE BETWEEN COLUMNS OR WALLS. LOCATE JOINT FROM INSET CORNERS WHERE APPROPRIATE
3. SLAB SHALL BE WITH BREAKAWAY SECTIONS OF 5'-0"x5'-0" MAX

A FIRST SLAB POUR STRIP
B SECOND SLAB POUR STRIP

## 8 PLAN-CONCRETE SLAB ON GRADE PLACEMENT

Scale: NONE



1. MINIMUM FINISHED BEND DIAMETER 4d FOR #5 BAR AND SMALLER, 6d FOR #6 THRU #8. TYPICAL FOR STIRRUPS AND TIES ONLY
2. 6d FOR #5 AND SMALLER 12d FOR #6 THRU #8
3. MINIMUM FINISHED BEND DIAMETER 6d UP TO #8 BAR, 8d FOR #9 THRU #11, 12d FOR #14 AND #18. TYPICAL FOR ALL REINFORCING EXCEPT STIRRUPS AND TIES

**NOTE:**
1. d = BAR DIAMETER
2. ALL REINFORCEMENT SHALL BE BENT COLD UNLESS NOTED OTHERWISE ON PLANS OR DETAILS
3. REINFORCING PARTIALLY EMBEDDED IN CONCRETE SHALL NOT BE FIELD BENT UNLESS SPECIFICALLY NOTED ON PLANS OR DETAILS

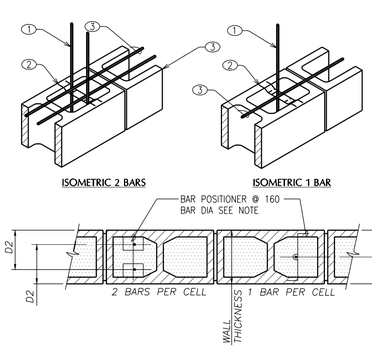
## 4 STANDARD REBAR BENDING DETAIL

Scale: NONE

**NOTE:**
1. PIPES SHALL NOT PASS THRU FOOTING OR WALL WITHOUT SPECIFIC APPROVAL AND INSTRUCTIONS FROM THE ENGINEER.
2. FOOTING SETTLEMENT OR DIFFERENTIAL MOVEMENT MAY DAMAGE UTILITY PIPES. DETAILS ARE SUGGESTED MEANS OF PROTECTING PIPES. ENGINEER SHALL NOT BE RESPONSIBLE FOR ANY DAMAGE TO PIPES OR FOUNDATIONS

TRENCH PARALLEL TO FOOTING

## 1 TYPICAL UTILTIY TRENCH AT CONTINUOUS FOOTING

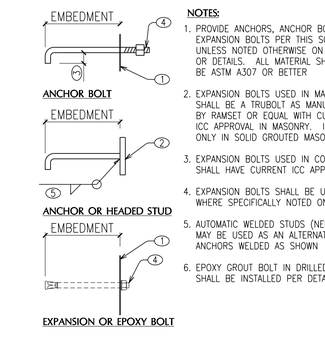


Scale: NONE

1. LINTEL PER PLAN OR GSN
2. VERT JAMB REINFORCING IN GROUTED CELL TO MATCH VERT WALL REINFORCING OR SPECIAL REINFORCING WHERE NOTED. EXTEND VERT REINFORCING FULL HEIGHT OF WALL
3. #5 IN SOLID GROUTED BOND BEAM AT BOTTOM OF OPENING
4. BEND BARS VERTICALLY AT CORNERS OR OTHER INTERFERENCE

## 13 TYPICAL SMALL OPENING IN MASONRY WALL

Scale: NONE



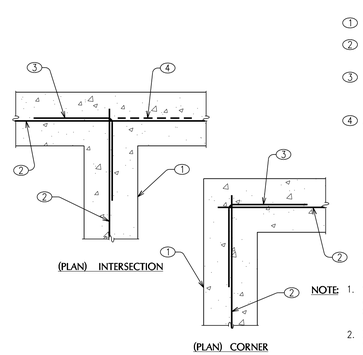
1. VERTICAL REINFORCING EACH FACE OF WALL UNO ON PLAN. HOLD BAR AT 2" CLR TO OUTSIDE FACE OF BLOCK
2. WIRE POSITIONER (SPIDER CLIP) OR TIE AT 8'-0" VERTICALLY
3. HORIZONTAL REINFORCING TO INSIDE OF VERTICAL BARS

| WALL THK | D1 | D2 |
|---|---|---|
| 8" | 3.8" | 5.3" |
| 12" | 5.8" | 9.3" |

**NOTES:**
1. WIRE POSITIONERS AS SHOWN SHALL BE USED IN ALL WALLS REQUIRING 2 BARS IN A CELL (DOUBLE VERT REINFORCING)
2. A MINIMUM OF 1 BAR POSITIONER SHALL BE LOCATED WITHIN 12" OF TOP OF INDIVIDUAL BARS.

## 9 TYPICAL REINFORCING IN MASONRY WALL

Scale: NONE



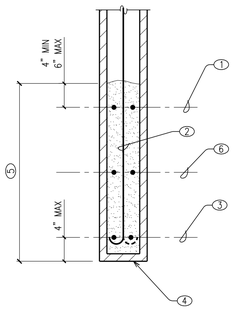
**NOTES:**
1. PROVIDE ANCHORS, ANCHOR BOLTS AND EXPANSION BOLTS PER THIS SCHEDULE UNLESS NOTED OTHERWISE ON PLANS OR DETAILS. ALL MATERIAL SHALL BE ASTM A307 OR BETTER
2. EXPANSION BOLTS USED IN MASONRY SHALL BE A TRUBOLT AS MANUFACTURED BY RAMSET OR EQUAL WITH CURRENT ICC APPROVAL IN MASONRY. INSTALL ONLY IN SOLID GROUTED MASONRY
3. EXPANSION BOLTS USED IN CONCRETE SHALL HAVE CURRENT ICC APPROVAL
4. EXPANSION BOLTS SHALL BE USED ONLY WHERE SPECIFICALLY NOTED ON DRAWINGS
5. AUTOMATIC WELDED STUDS (NELSON STUDS) MAY BE USED AS AN ALTERNATE TO BENT ANCHORS WELDED AS SHOWN
6. EPOXY GROUT BOLT IN DRILLED HOLE SHALL BE INSTALLED PER DETAIL AND GSN

1. FACE OF WALL, TOP OF WALL, COLUMN ETC.
2. PLATE, ANGLE, CHANNEL ETC
3. 1 1/2" (MIN.) STANDARD HOOK TYP.
4. THREADS MAY BE INCLUDED IN SHEAR PLANE AT FACE OF PLATE AS APPLIES.
5. FILLET WELD SIZE: 1/2" DIA BOLT: 1/4" 5/8" TO 7/8" DIA BOLT: 5/16" 1" DIA BOLT: 1"

| BOLT DIAMETER | VERT BOLT EMBEDMENT LENGTH | HORIZ BOLT EMBEDMENT LENGTH |
|---|---|---|
| 1/2" | 6" | 4" |
| 5/8" | 6" | 4" |
| 3/4" | 7" | 6" |
| 7/8" | 8" | 6" |
| 1" | 9" | 7" |
| 1 1/4" | 11" | 9" |

## 5 TYPICAL EMBEDDED BOLT OR HEADED STUD

Scale: NONE



1. STEM WALL OR FOOTING
2. HORIZ REINFORCING PER PLAN OR DETAILS
3. BENT CORNER BARS TO MATCH AND LAP WITH EACH HORIZ BAR PER REBAR LAP SCHEDULE
4. ALTERNATE BEND

**NOTE:**
1. VERT OR TRANSVERSE REINFORCING AS OCCURS NOT SHOWN FOR CLARITY
2. BEND DETAILS SIMILAR FOR DOUBLE MAT OF WALL REINFORCING

## 2 TYPICAL CORNER REINF IN FOOTING OR WALL

Scale: NONE

1. TOP REINFORCING WHERE INDICATED
2. VERTICAL WALL REINFORCING TO MATCH ADJACENT – ALTERNATE BENDS
3. BOTTOM REINFORCING PER SCHEDULE OR GSN
4. OPEN END LINTEL BLOCK OR BLOCK GROUT. SEE ARCH'L
5. GROUT HEIGHT PER PLAN OR GSN. GROUT SOLID AT SOLE PLATE BOLTS
6. INTERMEDIATE REINFORCING WHERE INDICATED IN SCHEDULE

## 14 TYPICAL MASONRY LINTEL DETAIL

Scale: NONE

### MASONRY LAP SCHEDULE (1)

| BAR SIZE | MIN BAR SPACING (IN) (2) | SEE NOTE (3) | ALL OTHER BARS |
|---|---|---|---|
| 3 | 1 7/8 | 15 | 15 |
| 4 | 2 | 26 | 26 |
| 5 | 2 | 40 | 40 |
| 6 | 2 | 72 | 54 |
| 7 | 2 | 84 | 63 |
| 8 | 2 | 96 | 72 |
| 9 | 2 | 108 | 81 |

1. LAP LENGTHS BASED ON LAP SPLICE PER FBC 2023 AND IBC 2018 SECTION 2107 AND 2108 FOR UNCOATED BARS IN MASONRY. F'm=1500 PSI. ALL LAP LENGTHS ARE IN INCHES.
2. MINIMUM BAR SPACING IS MEASURED AS CLEAR DISTANCE BETWEEN BARS OR CLEAR DISTANCE TO EDGE OF MASONRY.
3. HORIZONTAL REINFORCING IN LINTELS, BOND BEAMS AT FLOORS AND ROOFS. ALL WALL VERTICAL REINFORCING, ALL BARS DESIGNATED AS "COLLECTOR", "CHORD", OR "DRAG".

## 10 TYPICAL REBAR LAP SPLICE SCHEDULE FOR MASONRY

Scale: NONE

### CONCRETE LAP SCHEDULE (1)(3)

| BAR SIZE | MIN BAR SPACING (IN) (2) | 6000 PSI | | 5000 PSI | | 3000 PSI | | 4000 PSI | |
|---|---|---|---|---|---|---|---|---|---|
| | | TOP (4) BARS | OTHER BARS | TOP (4) BARS | OTHER BARS | TOP (4) BARS | OTHER BARS | TOP (4) BARS | OTHER BARS |
| 2 | 1 | 15 | 15 | 20 | 16 | 19 | 14 | 16 | 12 |
| 3 | 1 | 20 | 15 | 22 | 17 | 28 | 22 | 24 | 19 |
| 4 | 1 | 26 | 20 | 29 | 22 | 37 | 29 | 32 | 25 |
| 5 | 1 1/4 | 33 | 25 | 36 | 28 | 47 | 36 | 40 | 31 |
| 6 | 1 1/2 | 40 | 31 | 43 | 33 | 56 | 43 | 48 | 37 |
| 7 | 1 3/4 | 58 | 44 | 63 | 49 | 81 | 63 | 70 | 54 |
| 8 | 2 | 66 | 51 | 72 | 55 | 93 | 72 | 80 | 62 |
| 9 | 2 1/4 | 74 | 57 | 81 | 63 | 105 | 81 | 91 | 70 |
| 10 | 2 1/2 | 83 | 64 | 91 | 70 | 118 | 91 | 102 | 79 |
| 11 | 2 3/4 | 93 | 71 | 101 | 78 | 131 | 101 | 113 | 87 |

1. LAP LENGTHS BASED ON CLASS B LAP SPLICE PER ACI 318-19 FOR NORMAL WT CONCRETE AND UNCOATED BARS. ALL LAP LENGTHS ARE IN INCHES
2. BAR SPACING IS MEASURED AS CLEAR DISTANCE BETWEEN BARS. NOTIFY ENGINEER WHERE BAR SPACING IS LESS THAN MIN SPACING NOTED IN SCHEDULE
3. SEE PLAN OR GSN FOR CONCRETE STRENGTH
4. TOP BARS ARE BARS SO PLACED THAT 12 INCHES OR MORE OF FRESH CONCRETE IS CAST IN MEMBER BELOW SPLICE

## 6 TYPICAL REBAR LAP SPLICE SCHEDULE FOR CONCRETE

Scale: NONE

SHEET TITLE
TYPICAL DETAILS

DRAWING NO.
SD1.0

PLYWOOD SHEAR PANEL

PREFAB TRUSS BLOCKING

1. SOLID 2X BLOCKING AT EACH EDGE OF PLYWOOD PANEL VERTICAL BLOCKING MAY BE OMITTED WHERE WALLS ABOVE BLOCK ARE NOT AND PANEL HEIGHT IS 16" OR LESS
2. 3/8" SOLID PLYWOOD PANEL WITH 8d AT 6" O.C. AT EDGES.
3. NAIL TOP AND BOTTOM CHORD TO FRAMING PER DETAILS OR SCHEDULE.
4. SOLID 2X DIAGONAL TO PROVIDE ADEQUATE LATERAL STRENGTH.
5. SOLID 2X FRAMING AT EDGES OF BLOCK – TRUSS PLATE AT CORNERS PER MFR.

**NOTES:**

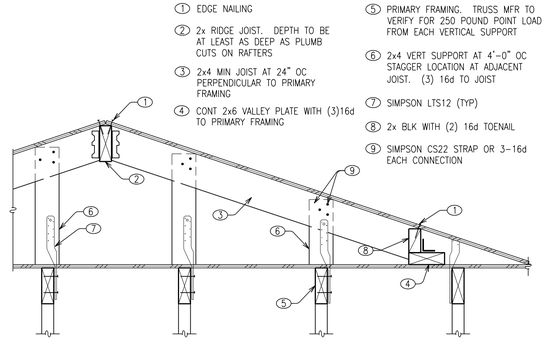
1. SHEAR PANEL USING EITHER PLYWOOD PANEL OR PREFAB TRUSS BLOCKING TO BE INSTALLED PER DETAILS U.N.O.
2. BLOCKING AT TOP EDGE TO BE VERTICAL [V] WHERE INSTALLED

   UNDER LOAD BEARING WALLS. OTHERWISE BLOCKING MAY LAY VERTICAL [V] OR HORIZONTAL [▭]
3. TRUSS MANUFACTURER TO DESIGN PREFAB BLOCKING FOR LATERAL FORCE
4. BLOCKING SHALL EXTEND TO UNDERSIDE OF SHEATHING

## 7 TYPICAL SHEAR PANEL BLOCKING

Scale: NONE

| CONNECTION | NAILING |
|---|---|
| JOIST OR TRUSS BEARING ON SILL OR GIRDER, TOENAIL | (3) 8d |
| BRIDGING TO JOIST, TOENAIL EACH END | (2) 8d |
| SOLE PLATE TO JOIST OR BLOCKING, FACE NAIL | 16d AT 16" OC |
| TOP PLATE TO STUD, END NAIL TO EACH STUD | (2) 16d |
| STUD TO SOLE PLATE | (4) 8d TOENAIL OR (2) 16d END NAIL |
| DOUBLE STUDS, FACE NAIL | 16d AT 24" OC |
| DOUBLE TOP PLATES, FACE NAIL | 16d AT 16" OC |
| TOP PLATES, INTERSECTIONS, FACE NAIL | 2 – 16d |
| CONTINUOUS HEADER, TWO PIECES | 16d AT 16" OC ALONG EACH EDGE |
| CEILING JOISTS TO PLATE, TOENAIL | (3) 8d |
| CONTINUOUS HEADER TO STUD, TOENAIL | (4) 8d |
| CEILING JOISTS, LAPS OVER PARTITIONS, FACE NAIL | (3) 16d |
| CEILING JOISTS TO PARALLEL RAFTERS, FACE NAIL | (3) 16d |
| RAFTER OR TRUSS TO PLATE, TOE NAIL | (3) 8d |
| BUILT-UP CORNER STUDS | 16d AT 24" OC |
| PLYWOOD SHEATHING | SEE DETAIL 11 SHEET SD1.0 |

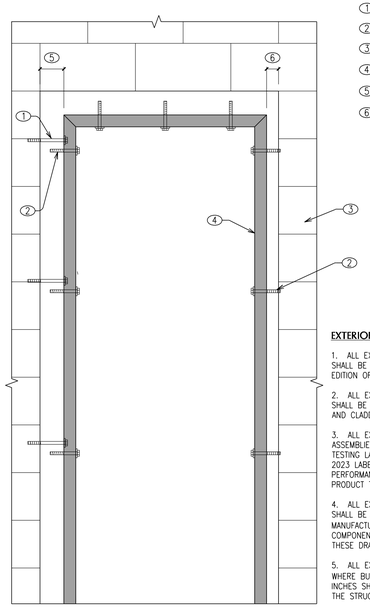


**NOTE:** 1. MIN NAILING SPECIFIED HEREIN SHALL BE PROVIDED UNO ON PLANS, DETAILS OR GSN.

2. MINIMUM NAIL SIZE PER GENERAL STRUCTURAL NOTES

3. NAILING NOT NOTED SHALL BE PER IBC TABLE 2304.9.1

## 8 TYPICAL MINIMUM NAILING SCHEDULE



Scale: NONE

1. EDGE NAILING
2. 2x RIDGE JOIST. DEPTH TO BE AT LEAST AS DEEP AS PLUMB CUTS ON RAFTERS
3. 2x4 MIN JOIST AT 24" OC PERPENDICULAR TO PRIMARY FRAMING
4. CONT 2x6 VALLEY PLATE WITH (3)16d TO PRIMARY FRAMING
5. PRIMARY FRAMING. TRUSS MFR TO VERIFY FOR 250 POUND POINT LOAD FROM EACH VERTICAL SUPPORT
6. 2x4 VERT SUPPORT AT 4'–0" OC STAGGER LOCATION AT ADJACENT JOIST. (3) 16d TO JOIST
7. SIMPSON LTS12 (TYP)
8. 2x BLK WITH (2) 16d TOENAIL
9. SIMPSON CS22 STRAP OR 3–16d EACH CONNECTION

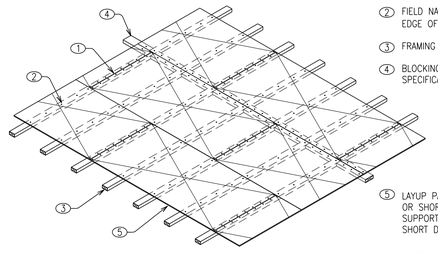
## 9 TYPICAL OVERBUILD FRAMING DETAIL

Scale: NONE

1. BUCK ANCHOR
2. WINDOW/DOOR JAMB ANCHOR
3. MASONRY WALL PER PLAN
4. WINDOW OR DOOR SYSTEM SEE ARCH'L
5. BUCK THICKNESS 1 1/2" OR GREATER
6. BUCK THICKNESS LESS THAN 1 1/2"

**NOTE:**

SEE GENERAL NOTES ON ANCHORING ALL EXTERIOR WINDOW AND DOOR ASSEMBLIES.



BUCK ANCHORS TO JAMBS SHALL BE 1/4" DIA STAINLESS STEEL TAPCON SCREWS WITH A MINIMUM OF 1 1/4" EMBEDMENT INTO JAMB. PROVIDE (1) ANCHOR WITHIN 4" OF ALL CORNERS FOR BOTH VERTICAL AND HORIZONTAL BUCKS AND AT 8" OC MAX FOR THE LENGTH OF EACH BUCK.

**EXTERIOR WINDOW AND DOOR ASSEMBLIES**

1. ALL EXTERIOR WINDOW AND DOOR ASSEMBLIES SHALL BE DESIGNED AND INSTALLED PER THE 2023 EDITION OF THE FLORIDA BUILDING CODE.
2. ALL EXTERIOR WINDOW AND DOOR ASSEMBLIES SHALL BE DESIGNED TO RESIST THE COMPONENT AND CLADDING LOADS SHOWN ON SHEET S1.1.
3. ALL EXTERIOR WINDOW AND GLASS DOOR ASSEMBLIES SHALL BE TESTED BY AN INDEPENDENT TESTING LABORATORY IN ACCORDANCE WITH FBC 2023 LABEL IDENTIFYING THE MANUFACTURER PERFORMANCE CHARACTERISTICS AND APPROVED PRODUCT TESTING ENTITY.
4. ALL EXTERIOR WINDOW AND DOOR ASSEMBLIES SHALL BE ANCHORED TO STRUCTURE PER THE MANUFACTURER'S RECOMMENDATIONS TO RESIST THE COMPONENT AND CLADDING LOADS SHOWN ON THESE DRAWINGS.
5. ALL EXTERIOR WINDOW AND DOOR ASSEMBLIES WHERE BUCK THICKNESS IN LESS THAN 1 1/2 INCHES SHALL BE ANCHORED THRU THE JAMB INTO THE STRUCTURAL SUBSTRATE.
6. ALL EXTERIOR WINDOW AND DOOR ASSEMBLIES WHERE BUCK THICKNESS IS 1 1/2 INCHES OR GREATER, THE BUCK SHALL BE ANCHORED DIRECTLY TO THE STRUCTURAL SUBSTRATE AND THE WINDOWS AND DOORS SHALL BE ANCHORED THRU THE JAMB AND INTO THE BUCK.
7. ALL EXTERIOR WINDOW AND DOOR ASSEMBLY DETAILS SHALL BE SUBMITTED ALONG WITH THE CONTRACT DRAWINGS TO THE BUILDING DEPARTMENT FOR APPROVAL.

## 4 ELEVATION AT TYPICAL MASONRY FRAMED OPENING

Scale: NONE

1. EDGE NAILING (NAILING AT EDGE OF PANEL, BLOCKING AND DIAPHRAGM BOUNDARIES)
2. FIELD NAILING (NAILING AWAY FROM EDGE OF PANEL)
3. FRAMING MEMBER PER PLAN
4. BLOCKING AT EDGES WHERE SPECIFICALLY NOTED ON PLANS
5. LAYUP PANEL W/ LONG DIMENSION OR SHORT DIMENSION ACROSS SUPPORTS. STAGGER JOINTS IN SHORT DIRECTION

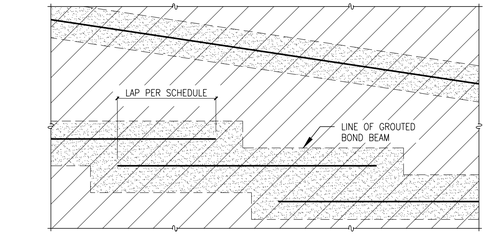
**NOTE:**

SEE PLAN, PLAN NOTES, AND GSN FOR SHEATHING AND NAILING REQUIREMENTS

## 5 TYPICAL SHEATHING LAYOUT

Scale: NONE

| SIMPLE ROOF FRAMING OR ROOF OVERBUILD FRAMING | | |
|---|---|---|
| MAXIMUM HORIZONTAL SPAN | JOIST | RIDGE/VALLEY/HIP FRAMING |
| 4'–0" | 2X4 | 2X4 |
| 10'–0" | 2X6 | 2X8 |
| 13'–0" | 2X8 | 2X10 |
| 17'–0" | 2X10 | 2X12 |
| 20'–0" | 2X12 | 2 – 2X12 |



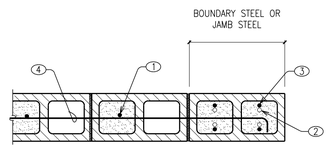
| SIMPLE CEILING FRAMING | |
|---|---|
| MAXIMUM HORIZONTAL SPAN | CEILING JOIST |
| 6'–0" | 2X4 |
| 14'–0" | 2X6 |
| 20'–0" | 2X8 |

**NOTE:** 1. CONNECT FRAMING AT OVERBUILD AREAS PER TYPICAL DETAILS

2. FRAMING NOT BEARING ON SUPPORT SHALL BE HUNG USING SIMPSON LU, U, HU TYPE HANGERS DESIGNATED FOR THE JOIST SIZE. AT SPANS LESS THAN 10'–0" SIMPSON A34 OR 4–16d NAILS MAY BE USED AT SPANS LESS THAN 5'–6", 3 – 16d NAILS MAY BE USED.

## 6 TYPICAL JOIST SCHEDULE FOR SIMPLE FRAMING

Scale: NONE

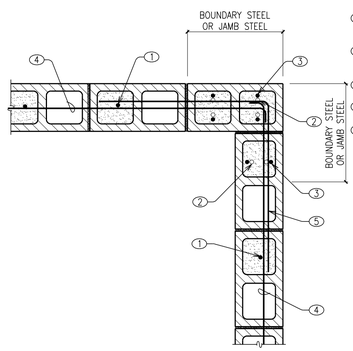


**NOTE:**

1. BOND BEAM REINFORCING MAY BE HORIZONTAL (WITH STEPS) OR MAY SLOPE AS SHOWN.
2. AT STEP BOND BEAM, LAP BAR #8 BAR DIAMETERS WITH A MAX SPACE OF 8" BETWEEN BARS. GROUT SHALL EXTEND 8" MIN PAST END OF BAR.
3. MIN DEPTH OF GROUT AROUND REINFORCING PER TYPICAL HORIZONTAL BOND BEAM DETAIL AND GSN.
4. VERTICAL REINFORCING NOT SHOWN.

## 1 TYPICAL MASONRY WALL BOND BEAM

Scale: NONE



1. TYPICAL VERTICAL STEEL PER SCHEDULE
2. FOUNDATION STEEL OR LOWER LEVEL BAR
3. UPPER LEVEL BARS
4. HORIZONTAL STEEL PER SCHEDULE

**NOTE:**

THIS DETAIL IS A DEPICTION OF REINFORCING AND TIES. SEE SCHEDULE SHEET S1.2 FOR REINFORCING REQUIRED

## 2 TYPICAL 8" MASONRY SHEAR WALL PLAN

Scale: NONE

1. TYPICAL VERTICAL STEEL PER SCHEDULE
2. FOUNDATION STEEL OR LOWER LEVEL BAR
3. UPPER LEVEL BARS
4. HORIZONTAL STEEL PER SCHEDULE
5. CORNER BARS SAME SIZE AND SPACING AS HORIZ REINFORCING. LAP PER GSN OR SCHEDULE. PROVIDE STANDARD HOOK AND ALTERNATE BEND DIRECTION AT INTERSECTION

**NOTE:**

THIS DETAIL IS A DEPICTION OF REINFORCING AND TIES. SEE SCHEDULE SHEET S1.2 FOR REINFORCING REQUIRED

## TESTING AND BALANCING NOTES

1. CONTRACTOR WILL BE RESPONSIBLE TO PROVIDE TESTING, ADJUSTING AND BALANCING FOR THIS PROJECT. TESTING, ADJUSTING AND BALANCING SHALL BE DONE IN ACCORDANCE WITH THESE NOTES.
2. THE FOLLOWING MECHANICAL (HVAC) SYSTEMS SHALL BE TESTED, ADJUSTED AND BALANCED:
   A. AIR HANDLING UNITS AND RELATED SUPPLY AND RETURN DUCTWORK, INCLUDING ALL AIR INLETS AND OUTLETS AND AIR HANDLING UNIT OUTSIDE AIR.
   B. EXHAUST FANS.
3. PRIOR TO COMMENCING ANY WORK; REVIEW CONTRACT DOCUMENTS, TESTING,ADJUSTING AND BALANCING STRATEGIES AND STEP-BY-STEP PROCEDURES.
4. CONTRACTOR PROVIDING TESTING, ADJUSTING AND BALANCING SHALL BE CERTIFIED BY EITHER AABC OR NEBB.
5. TESTING, ADJUSTING AND BALANCING REPORT FORMS SHALL BE STANDARD FORMS FROM EITHER AABC OR NEBB.
6. CONTRACTOR SHALL COORDINATE THE EFFORTS OF FACTORY-AUTHORIZED SERVICE REPRESENTATIVES FOR SYSTEMS AND EQUIPMENT. HVAC CONTROLS INSTALLERS, AND OTHER MECHANICS TO OPERATE HVAC SYSTEMS AND EQUIPMENT TO SUPPORT AND ASSIST THE TESTING , ADJUSTING AND BALANCING ACTIVITIES.
7. CONTRACTOR SHALL VERIFY QUANTITIES AND LOCATIONS OF BALANCING DEVICES. CONTRACTOR SHALL VERIFY THAT THESE BALANCING DEVICES ARE ACCESSIBLE AND APPROPRIATE FOR BALANCING AND FOR EFFICIENT SYSTEM EQUIPMENT OPERATION PRIOR TO COMMENCEMENT OF WORK..
8. CONTRACTOR SHALL PERFORM TESTING AND BALANCING PROCEDURES IN EACH AIR AND WATER SYSTEM.
9. HVAC SYSTEM AIR AND WATER FLOW RATES SHALL BE WITHIN THE FOLLOWING TOLERANCES:
   A. SUPPLY: PLUS 5 TO PLUS 10 PERCENT
   B. RETURN: PLUS 5 TO PLUS 10 PERCENT
   C. EXHAUST FANS: PLUS 5 TO PLUS 10 PERCENT
   D. EQUIPMENT WITH FANS: PLUS 5 TO PLUS 10 PERCENT
   E. AIR OUTLETS AND INLETS: 0 TO MINUS 10 PERCENT
   F. DOMESTIC HOT WATER RECIRCULATING FLOW RATE: 0 TO MINUS 10 PERCENT.
10. FINAL BALANCING REPORT SHALL INCLUDE THE FOLLOWING:
    A. TEST CONDITIONS FOR FANS AND PUMPS
    B. SYSTEMS DIAGRAMS
    C. AIR CONDITIONING UNIT TEST REPORTS
    D. APPARATUS COIL TEST REPORTS
    E. ELECTRICAL-COIL TEST REPORTS
    F. FAN TEST REPORTS
    G. DUCT TRANSVERSE REPORTS
    H. AIR-TERMINAL DEVICE REPORTS
    I. SYSTEM COIL REPORTS
    J. PUMP TEST REPORTS
11. ADDITIONAL TESTING AND BALANCING SHALL BE MADE AS DIRECTED BY THE DESIGN ENGINEER TO CORRECT UNUSUAL CONDITIONS. ADDITIONAL TESTING WILL NOT EXCEED THREE DAYS DURING THE FIRST SIX MONTHS OF OPERATION.
12. IF INITIAL TESTING AND BALANCING PROCEDURES WERE NOT PERFORMED DURING THE NEAR-PEAK SUMMER AND WINTER CONDITIONS, PERFORM ADDITIONAL TESTING, ADJUSTING DURING NEAR-PEAK SUMMER AND WINTER CONDITIONS.
13. CONTRACTOR TO PROVIDE THREE (3) COPIES OF THE TESTING, ADJUSTING AND BALANCING REPORT FOR REVIEW.

## MECHANICAL GENERAL NOTES

1. ALL MECHANICAL WORK SHALL MEET ALL THE REQUIREMENTS OF THE FLORIDA BUILDING CODE EIGHTH EDITION 2023, FLORIDA BUILDING CODE EIGHTH EDITION 2023- MECHANICAL, FBC EIGHTH EDITION 2023- ENERGY CONSERVATION, FFPC EIGHTH EDITION- 2023.
2. CONTRACTOR TO VISIT SITE AND VERIFY ALL CLEARANCES BEFORE FABRICATION OF DUCTWORK AND PROVIDE ADDITIONAL OFFSET AND/OR CHANGES IN DUCT SIZES TO MEET FIELD CONDITIONS AND COORDINATE WITH ELECTRICAL, PLUMBING AND FIRE PROTECTION SUBCONTRACTOR BEFORE ANY CONSTRUCTION WORK.
3. PROVIDE EQUIPMENT GUARDS AT ALL EQUIPMENT WITHIN 10 FEET OF A ROOF EDGE OR OPEN SIDE OF WALKING SURFACE THAT IS OVER 30" ABOVE FLOOR GRADE.
4. OUTSIDE AIR INTAKES (ROOFTOP UNITS, GRAVITY ROOF VENTS, LOUVERS) SHALL MAINTAIN A MINIMUM OF 10'-0" FROM ANY EXHAUST OUTLET OR SANITARY VENT.
5. PROVIDE ALL MECHANICAL EQUIPMENT WITH MANUFACTURER'S RECOMMENDED SERVICE AREA CLEARANCES.
6. ALL ROOF TOP UNITS SHALL BE CONSTRUCTED AND INSTALLED TO WITHSTAND LOCAL WIND LOAD DESIGN.
7. DUCT SMOKE DETECTORS SHALL BE FURNISHED BY THE FIRE ALARM CONTRACTOR, INSTALLED IN DUCT BY THE MECHANICAL CONTRACTOR AND WIRED BY THE FIRE ALARM CONTRACTOR. SMOKE DETECTORS SHALL BE INSTALLED IN ACCORDANCE WITH NFPA 72, NATIONAL FIRE ALARM CODE; NFPA 90A, STANDARD FOR INSTALLATION OF AIR-CONDITIONING AND VENTILATING SYSTEMS, FLORIDA BUILDING CODE EIGHTH EDITION 2023 - MECHANICAL AND THE MANUFACTURER'S INSTALLATION INSTRUCTIONS. COORDINATE LOCATION OF SMOKE DETECTORS WITH FIRE ALARM CONTRACTOR. PROVIDE A VISIBLE/AUDIBLE NOTIFICATION PANEL. MAKE: SYSTEM SENSOR RTS2 OR EQUAL, COMPATIBLE WITH BUILDING FIRE ALARM SYSTEM.
8. PLANS AND DIAGRAMS ARE SCHEMATIC ONLY AND SHOULD NOT BE SCALED.
9. PROVIDE EXTERNAL DUCT INSULATION FOR SUPPLY, RETURN AND OUTSIDE AIR DUCTWORK. DUCTWORK INSULATION SHALL BE FOIL FACED FIBERGLASS DUCT WRAP WITH A MINIMUM THERMAL RESISTANCE (R) OF 6.0. INSULATION SHALL HAVE VAPOR BARRIER. INSTALL PER MFR. REQUIREMENTS.
10. COORDINATE CEILING MOUNTED DIFFUSERS, REGISTERS, AND GRILLES AND OTHER CEILING MOUNTED EQUIPMENT WITH OTHER CEILING MOUNTED EQUIPMENT. SEE REFLECTED CEILING PLAN.
11. DUCTWORK, DIFFUSERS, REGISTERS, GRILLES, AND OTHER ITEMS OF THE AIR HANDLING SYSTEM SHALL NOT BE SUPPORTED BY THE CEILING OR CEILING SUSPENSION SYSTEM.
12. CONTRACTOR TO PROVIDE ALL SUPPLEMENTARY STEEL REQUIRED TO SUSPEND MECHANICAL EQUIPMENT & MATERIALS. INSTALLATION OF EQUIPMENT SHALL COMPLY WITH MANUFACTURER'S SPECIFICATIONS AND CLEARANCE REQUIREMENTS FOR SERVICING OF EQUIPMENT
13. VERIFY VOLTAGE REQUIREMENTS WITH ELECTRICAL CONTRACTOR BEFORE ORDERING EQUIPMENT.
14. PROVIDE A TRAP IN ALL CONDENSATE PIPING SERVING AIR HANDLING UNITS AND ROOFTOP UNITS. SLOPE CONDENSATE LINE 1/8" PER FOOT. ALL CONDENSATE DRAIN PIPING SHALL BE PROPERLY SUPPORTED.
15. GUARANTEE; FOR ONE YEAR AFTER DATE OF ACCEPTANCE BY THE OWNER, ALL EQUIPMENT, MATERIALS AND WORKMANSHIP TO BE FREE FROM DEFECT.
16. DO NOT CUT STRUCTURAL MEMBERS WITHOUT PRIOR WRITTEN APPROVAL OF THE STRUCTURAL ENGINEER.
17. FLEXIBLE AND RIGID ROUND DUCT TAKE-OFFS FOR DIFFUSERS SHALL BE THE SAME SIZE AS DIFFUSER NECK. MAXIMUM FLEXIBLE DUCT LENGTH SHALL BE 8'-0". FLEXIBLE DUCT SHALL BE THERMAFLEX TYPE M-KC OR EQUAL. FLEXIBLE DUCT SHALL BE INSULATED FIBERGLASS, R-6, CLASS 1, UL181 LISTED AND COMPLY WITH NFPA 90A AND NFPA 90B.
18. ALL WALL MOUNTED THERMOSTATS AND HUMIDISTATS SHALL BE INSTALLED AT AN ELEVATION OF 48" ABOVE FINISHED FLOOR TO THE TOP UNLESS OTHERWISE NOTED ON DRAWINGS. LOCATION OF THE WALL MOUNTED THERMOSTAT SHALL BE COORDINATED WITH OTHER TRADES FOR A NEAT APPEARANCE. FINAL LOCATION OF THERMOSTAT SHALL BE SUBJECT TO THE APPROVAL OF THE ENGINEER OR HIS REPRESENTATIVE IN THE FIELD.
19. PROVIDE FLEXIBLE NEOPRENE DUCT CONNECTORS ON THE DISCHARGE AND ENTERING SIDES OF ROOFTOP UNITS, AIR HANDLING UNITS, FANS AND OTHER VIBRATING EQUIPMENT TO WHICH DUCTWORK IS ATTACHED.
20. PROVIDE ACCESS DOORS IN HARD CEILINGS OR WALLS REQUIRING ACCESS TO VALVES, FIRE DAMPERS, BALANCING DAMPERS, VOLUME DAMPERS OR OTHER PARTS OF THE SYSTEM WHICH REQUIRE OPERATION OR MAINTANENCE AND ARE LOCATED AT INACCESSIBLE AREAS. MAKE: MILCOR MODEL C FOR CEILING LOCATION. MILCOR MODEL M FOR WALL LOCATION. INSTALL FOR DOWNWARD OPENING IN CEILING LOCATIONS.
21. COORDINATION: CONTRACTOR SHALL COORDINATE ITS CONSTRUCTION OPERATIONS WITH THOSE OF OTHER CONTRACTORS AND ENTITIES TO ENSURE EFFICIENT AND ORDERLY INSTALLATION OF EACH PART OF THE WORK. CONTRACTOR SHALL COORDINATE ITS OPERATIONS WITH OTHER CONTRACTORS OPERATIONS, THAT DEPEND ON EACH OTHER FOR PROPER INSTALLATION, CONNECTION AND OPERATION.
22. REFER TO ARCHITECTURAL DRAWINGS FOR ALL RELATED CONSTRUCTION DETAILS AS APPLICABLE TO THE HVAC SYSTEM. CHASE AND WALL PENETRATIONS INTENDED FOR DUCTWORK AND PIPING SHALL BE VERIFIED WITH ARCHITECTURAL DRAWINGS PRIOR TO INSTALLATION.
23. MECHANICAL EQUIPMENT, DUCTWORK AND PIPING IS SHOWN AT APPROXIMATE LOCATIONS. FIELD MEASURE FINAL DUCTWORK AND PIPING LOCATIONS PRIOR TO FABRICATION AND MAKE ADJUSTMENT AS REQUIRED TO FIT THE DUCTWORK AND PIPING WITHIN THE AVAILABLE SPACE. FIELD VERIFY FINAL LOCATIONS TO INSTALL EQUIPMENT IN ACCORDANCE WITH THE MANUFACTURER'S RECOMMENDATIONS REGARDING SERVICE CLEARANCE AND PROPER AIRFLOW CLEARANCE AROUND EQUIPMENT.
24. WHEN THE INTENT OF THE DRAWINGS AND SPECIFICATIONS IS NOT CLEAR, OR IS CAPABLE OF MORE THAN ONE INTERPRETATION, SUCH MATTERS WILL BE BROUGHT TO THE ATTENTION OF THE ARCHITECT/ENGINEER IN WRITING BEFORE THE SUBMISSION OF BIDS. THE ARCHITECT/ENGINEER SHALL MAKE CORRECTION OR EXPLANATION IN WRITING.
25. PLANS AND SPECIFICATIONS ARE INTENDED AS A GENERAL DESCRIPTION OF THE WORK TO BE PERFORMED. ALL ITEMS NOT SPECIFICALLY MENTIONED OR SHOWN, BUT NECESSARY FOR THE COMPLETION OF THE INSTALLATION, SHALL BE FURNISHED AND INSTALLED BY THIS CONTRACTOR. THIS CONTRACTOR SHALL THOROUGHLY ACQUAINT HIMSELF WITH THE MECHANICAL, ARCHITECTURAL, STRUCTURAL AND ELECTRICAL PLANS BEFORE SUBMITTING HIS FINAL BID. NO ADDITIONAL COMPENSATION WILL BE ALLOWED DUE TO THE CONTRACTOR'S FAILURE TO FAMILIARIZE HIMSELF/ HERSELF WITH THE PLANS.
26. CONTRACTOR SHALL ENGAGE A FACTORY-AUTHORIZED SERVICE REPRESENTATIVE FOR START-UP TO INSPECT, TEST AND ADJUST FIELD-ASSEMBLED COMPONENTS AND EQUIPMENT INSTALLATION, INCLUDING CONNECTIONS AND PERFORM THE FOLLOWING FIELD TESTS AND INSPECTIONS:
    1. LEAK TEST: AFTER INSTALLATION, CHARGE SYSTEM AND TEST FOR LEAKS. REPAIR LEAKS AND RETEST UNTIL NO LEAKS EXIST.
    2. OPERATIONAL TEST: AFTER ELECTRICAL CIRCUITRY HAS BEEN ENERGIZED, START UNITS TO CONFIRM PROPER MOTOR ROTATION AND UNIT OPERATION.
    3. TEST AND ADJUST CONTROLS AND SAFETIES. REPLACE DAMAGED AND MALFUNCTIONING CONTROLS AND EQUIPMENT.
    4. REPORT TESTING RESULTS IN WRITTEN REPORT.
27. MECHANICAL, PLUMBING AND ELECTRICAL CONTRACTOR SHALL COORDINATED ELECTRICAL VOLTAGE, AMPERAGE, OVER CURRENT PROTECTION AND ALL OTHER ELECTRICAL COMPONENTS AND ACCESSORIES OF THE HVAC AND PLUMBING EQUIPMENT BEFORE ORDERING.

## PIPING MATERIAL SCHEDULE

| SERVICE | SIZE | MATERIAL | SCHEDULE / TYPE | INSULATION | | REMARKS |
|---|---|---|---|---|---|---|
| | | | | TYPE | THICK | |
| A/C CONDENSATE | ALL | PVC | SCH. 40 | NONE | - | -- |
| REFRIGERANT PIPING | ALL | COPPER | TYPE L | FG | 1" | -- |

NOTES:

1. FIBERGLASS PIPE INSULATION: MINERAL OR GLASS FIBERS BONDED WITH A THERMOSETTING RESIN. SEMIRIGID BOARD MATERIAL WITH FACTORY-APPLIED ASJ COMPLYING WITH ASTM C 1393, OR WITH PROPERTIES SIMILAR TO ASTM C 612. NOMINAL DENSITY IS 2.5 LB/CU. FT. OR MORE. THERMAL CONDUCTIVITY (K VALUE) AT 100 DEG. F (55 DEG. C) IS 0.29 BTU X IN./H X SQ.FT. X DEG. F (0.042 W/M X K) OR LESS. ALL SERVICE JACKET (ASJ): WHITE, KRAFT-PAPER, FIBERGLASS-REINFORCED SCRIM WITH ALUMINUM-FOIL BACKING; COMPLYING WITH ASTM C 1136, TYPE MANUFACTURERS; A. CERTAINTEED CORP., B. JOHNS MANVILLE, C. KNAUF INSULATION, D. OWENS CORNING.
2. FLEXIBLE ELASTOMERIC PIPE INSULATION: CLOSED CELL SPONGE OR EXPANDED - RUBBER MATERIALS. COMPLY WITH ASTM C-534, TYPE I FOR TUBULAR MATERIALS. PROVIDE SEALANT COMPATIBLE WITH MATERIAL. MANUFACTURERS: ARMAFLEX BY ARMACELL OR EQUAL.

## FLORIDA BUILDING CODE EIGHTH EDITION (2023) ENERGY CONSERVATION COMPLIANCE

THE DESIGN COMPLIES WITH SECTION C401.2 APPLICATION ITEM 3:

THE REQUIREMENTS OF SECTION C402.5, C403.2, C404, C405.2, C405.4, C405.5, C407 AND C408. THE BUILDING ENERGY COST SHALL BE EQUAL TO OR LESS THAN 85 PERCENT OF THE STANDARD REFERENCE DESIGN BUILDING.

## DRAWING INDEX

| SHEET NUMBER | TITLE |
|---|---|
| M0.1 | Mechanical General Information |
| M1.1 | Mechanical Floor Plan |
| M5.1 | Mechanical Schedules & Details |
| | |

## SUBMITTALS AND SUBSTITUTIONS

1. CONTRACTOR SHALL SUBMIT THE FOLLOWING EQUIPMENT FOR REVIEW PRIOR TO ORDERING AND INSTALLING
   A. AIR HANDLING UNITS AND AIR COOLED CONDENSERS
   B. DIFFUSERS AND REGISTERS
   C. EXHAUST FANS
   D. DUCT WORK
   E. DUCT CONSTRUCTION STANDARDS
2. PROCESSING TIME: ALLOW 10 WORKING DAYS FOR REVIEW OF EACH SUBMITTAL. ALLOW ADDITIONAL TIME IF COORDINATION WITH SUBSEQUENT SUBMITTALS IS REQUIRED. ENGINEER WILL ADVISE CONTRACTOR WHEN A SUBMITTAL BEING PROCESSED MUST BE DELAYED FOR COORDINATION.
3. SUBMITTALS: PLACE A PERMANENT LABEL OR TITLE BLOCK ON EACH SUBMITTAL ITEM FOR IDENTIFICATION. INDICATE NAME OF FIRM OR ENTITY THAT PREPARED EACH SUBMITTAL ON LABEL OR TITLE BLOCK. PROVIDE A SPACE BESIDE TITLE BLOCK TO RECORD CONTRACTOR'S REVIEW AND APPROVAL MARKINGS AND ACTION TAKEN BY ENGINEER. INCLUDE THE FOLLOWING INFORMATION FOR PROCESSING AND RECORDING ACTION TAKEN:
   A. PROJECT NAME.
   B. DATE.
   C. NAME OF ENGINEER.
   D. NAME OF CONTRACTOR.
   E. NAME OF SUBCONTRACTOR.
   F. NAME OF SUPPLIER.
   G. NAME OF MANUFACTURER.
   H. DRAWING NUMBER AND DETAIL REFERENCES, AS APPROPRIATE.
   I. LOCATION WHERE PRODUCT IS TO BE INSTALLED, AS APPROPRIATE.
4. SUBMIT ELECTRONIC SUBMITTALS VIA EMAIL AS PDF ELECTRONIC FILES.
5. PAPER SUBMITTALS: SUBMIT THREE PAPER COPIES OF EACH SUBMITTAL UNLESS OTHER WISE INDICATED. ENGINEER WILL RETURN TWO COPIES.
6. COLLECT SUBMITTAL DATE INFORMATION INTO A SINGLE SUBMITTAL FOR EACH ELEMENT OF CONSTRUCTION AND TYPE OF PRODUCT OR EQUIPMENT. MARK EACH COPY OF EACH SUBMITTAL TO SHOW WHICH PRODUCTS AND OPTIONS ARE APPLICABLE. INCLUDE THE FOLLOWING INFORMATION, AS APPLICABLE:
   A. MANUFACTURER'S CATALOG CUTS.
   B. MANUFACTURER'S PRODUCT SPECIFICATIONS.
   C. STATEMENT OF COMPLIANCE WITH SPECIFIED REFERENCED STANDARDS.
   D. NOTATION OF COORDINATION REQUIREMENTS.
   E. WIRING DIAGRAMS SHOWING FACTORY-INSTALLED WIRING.
   F. PRINTED PERFORMANCE CURVES.
   G. OPERATIONAL RANGE DIAGRAMS.
   H. CLEARANCES REQUIRED TO OTHER CONSTRUCTION, IF NOT INDICATED ON ACCOMPANYING SHOP DRAWINGS.
7. CONTRACTOR SHALL REVIEW EACH SUBMITTAL AND CHECK FOR COORDINATION WITH OTHER WORK OF THE CONTRACT AND FOR COMPLIANCE WITH THE CONTRACT DOCUMENTS. NOTE CORRECTIONS AND FIELD DIMENSIONS. MARK WITH APPROVAL STAMP BEFORE SUBMITTING TO ENGINEER. APPROVAL STAMP: STAMP SHALL STATE THAT SUBMITTAL HAS BEEN REVIEWED, CHECKED, AND APPROVED FOR COMPLIANCE WITH THE CONTRACT DOCUMENTS AND INITIALLED AND DATED BY CONTRACTOR.
8. ENGINEER WILL REVIEW EACH SUBMITTAL, MAKE MARKS TO INDICATE CORRECTIONS OR REVISIONS REQUIRED, AND RETURN IT. ENGINEER WILL STAMP EACH SUBMITTAL WITH AN ACTION STAMP AND WILL MARK STAMP APPROPRIATELY TO INDICATE ACTION.
9. ENGINEER WILL NOT REVIEW SUBMITTALS THAT DO NOT BEAR CONTRACTOR'S APPROVAL STAMP AND INITIALS AND WILL RETURN THEM WITHOUT ACTION. INCOMPLETE SUBMITTALS ARE UNACCEPTABLE, WILL BE CONSIDERED NONRESPONSIVE, AND WILL BE RETURNED FOR RESUBMITTAL WITHOUT REVIEW. SUBMITTALS NOT REQUIRED BY THE CONTRACT DOCUMENTS MAY NOT BE REVIEWED AND MAY BE DISCARDED
10. SUBSTITUTIONS:
    A. SUBSTITUTION OFFERS OWNER A SUBSTANTIAL ADVANTAGE IN COST, TIME, ENERGY CONSERVATION, OR OTHER CONSIDERATIONS.
    B. SUBSTITUTION DOES NOT REQUIRE EXTENSIVE REVISIONS TO THE CONTRACT DOCUMENTS. CONTRACTOR SHALL COMPENSATE ENGINEER FOR ANY REDESIGN AND EVALUATION SERVICES INCLUDING CHANGES REQUIRED BY AUTHORITY HAVING JURISDICTION.
    C. SUBSTITUTION WILL NOT ADVERSELY AFFECT CONSTRUCTION SCHEDULE.
    D. SUBSTITUTION HAS RECEIVED NECESSARY APPROVALS OF AUTHORITIES HAVING JURISDICTION.
    E. SUBSTITUTION HAS BEEN COORDINATED WITH OTHER PORTIONS OF THE WORK.
    F. SUBSTITUTION PROVIDES SPECIFIED WARRANTY.
    G. SUBSTITUTION HAS BEEN COORDINATED WITH OTHER PORTIONS OF THE WORK, AND IS ACCEPTABLE TO ALL CONTRACTORS INVOLVED.
    H. CONTRACTOR SHALL ASSUME ANY ADDITIONAL CONSTRUCTION COSTS AS A RESULT OF THE SUBSTITUTION.

## DUCT CONSTRUCTION NOTES

1. SUPPLY AIR, RETURN AIR, OUTSIDE AIR, AND EXHAUST AIR DUCTWORK SHALL BE GALVANIZED SHEET METAL, EXCEPT WHERE INDICATED. METALLIC DUCTS SHALL BE CONSTRUCTED AND INSTALLED PER THE FLORIDA BUILDING CODE EIGHTH EDITION 2023 - MECHANICAL AND THE 2020 EDITION OF THE SMACNA HVAC DUCT CONSTRUCTION STANDARDS - METAL AND FLEXIBLE MANUAL.
2. METAL DUCT STATIC PRESSURE CLASSIFICATION:
   SUPPLY AIR DUCT: 2" W.G.
   RETURN AIR DUCT: 2" W.G. (NEGATIVE)
   EXHAUST AIR DUCT: 2" W.G. (NEGATIVE)
3. SEAL ALL TRANSVERSE JOINTS AND LONGITUDINAL SEAMS PER THE FLORIDA BUILDING CODE EIGHTH EDITION 2023 - ENERGY CONSERVATION TABLE C403.2.9.2 AND THE 2020 EDITION OF SMACNA HVAC DUCT CONSTRUCTION STANDARDS - METAL AND FLEXIBLE.
4. CROSS-BREAK DUCT SURFACES 19" THROUGH 60" USE ANGLE REINFORCING FOR DUCT SIZES OVER 60".
5. ALL METAL LONGITUDINAL SEAMS SHALL BE PITTSBURGH OR OTHER SMACNA LISTED SEAMS. DO NOT USE BUTTON PUNCH SNAPBACK SEAMS.
6. SUSPEND METAL DUCTWORK NOT EXCEEDING 30" LONGEST SIDE. AT EVERY JOINT (NOT TO EXCEED 10'-0") USING 1"x 18 GAUGE GALVANIZED STRAPS ATTACHED TO BOTTOM AND SIDE OF DUCT.
7. SUSPEND METAL DUCTWORK, EXCEEDING 30" LONGEST SIDE, AT MAXIMUM 8'-0" INTERVALS USING ANGLES AND RODS.
8. SUPPORT DUCTWORK AND EQUIPMENT FROM STRUCTURAL MEMBER. ATTACHMENT TO ROOF DECK IS NOT ACCEPTABLE.
9. DUCT SIZES MUST BE VERIFIED FOR CLEARANCES AT THE JOB SITE PRIOR TO FABRICATION. DIMENSIONS MAY BE CHANGED TO ACCOMMODATE CONSTRUCTION. SUBMIT ALL MODIFICATION TO DESIGN ENGINEER FOR APPROVAL.
10. DUCT TRANSITIONS SHALL BE CONSTRUCTED WITH SLOPE OF 1/4.
11. TURNING VANES SHALL BE PROVIDED IN ALL SUPPLY DUCT RECTANGULAR ELBOWS WITH ANGLES BETWEEN 15 DEGREES AND LESS THAN 90 DEGREES PER THE SMACNA HVAC DUCT CONSTRUCTION STANDARDS MANUAL.
12. DUCT DIMENSIONS SHOWN ON DRAWING ARE CLEAR INSIDE DIMENSIONS. WHERE DUCT LINER IS SHOWN INCREASE METAL DUCT SIZE TO ALLOW FOR DUCT LINER.
13. UNLESS OTHERWISE NOTED, INSTALL DUCTWORK AS HIGH AS POSSIBLE, TIGHT TO BOTTOM OF STRUCTURE. COORDINATE DUCT ELEVATION WITH STORM LEADERS, WATER PIPING, SANITARY DRAINS ,MAJOR ELECTRICAL CONDUIT, LIGHTING FIXTURES, ETC..

SUBMITTED FOR 100% CD SET - NOT FOR CONSTRUCTION

## GENERAL PLAN NOTES:

1. COORDINATE EXACT LOCATIONS OF MECHANICAL EQUIPMENT WITH ALL DISCIPLINES AND MAINTAIN REQUIRED CLEARANCES.
2. DUCTWORK CONNECTIONS TO EQUIPMENT TO BE SIZE OF UNIT OPENING.
3. ALL WORK TO COMPLY WITH THE 2023 FLORIDA BUILDING CODE - MECHANICAL, EIGHTH EDITION AND REGULATIONS OF LOCAL AUTHORITY HAVING JURISDICTION.
4. THE MECHANICAL LAYOUT INDICATED ON THE PLANS IS SCHEMATIC AND LAYOUT IS TO PROVIDE ACCESS TO ALL SPACES. CONTRACTOR MUST PROVIDE AN ENGINEERED SYSTEM THAT MEETS ALL REQUIRED CRITERIA.
5. MECHANICAL CONTRACTOR SHALL BE LICENSED IN THE STATE WHERE THE WORK IS TO BE PERFORMED.
6. PRIOR TO FINAL ACCEPTANCE, CONTRACTOR SHALL PREPARE AND FURNISH OPERATION AND MAINTENANCE INSTRUCTIONS TO OWNER.
7. ALL MECHANICAL WORK SHALL COMPLY WITH MANUFACTURER'S RECOMMENDED INSTALLATION.
8. INSTALL FLEXIBLE CONNECTIONS BETWEEN ALL DUCTWORK AND MECHANICAL UNITS.
9. DUCTWORK CONNECTIONS TO ROOF EQUIPMENT TO BE SIZE OF UNIT OPENING.

## MECHANICAL PLAN KEY NOTES:

1. 6"Ø EXHAUST VENT TO TERMINATE AT ROOF WITH MANUFACTURER'S RECOMMENDED ROOF JACK AND GRAVITY DAMPER.
2. ROUTE CONDENSATE DRAIN PIPING TO EXTERIOR DRYWELL.
3. ROUTE REFRIGERANT PIPING TO ASSOCIATED CONDENSING UNIT AT THE BUILDING EXTERIOR. REFER TO REFRIGERANT PIPING SCHEMATIC DETAIL ON MECHANICAL DETAIL SHEET. COORDINATE EXACT LOCATION WITH ARCHITECTURAL PLANS.
4. PROVIDE NEW CONCRETE HOUSEKEEPING PAD. CONTRACTOR TO VERIFY EXACT LOCATION AND COORDINATE WITH ALL DISCIPLINES.

NOTES:
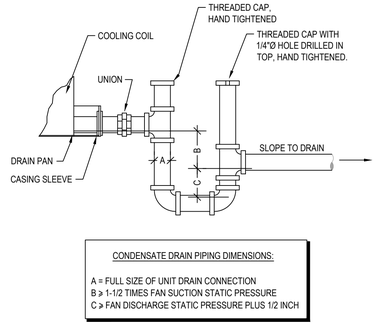
1. PROVIDE UNITS WITH FACTORY THERMOSTAT, SINGLE POINT ELECTRICAL CONNECTION.
2. PROVIDE 5 MINUTE ANTI CYCLE TIMER.
3. PROVIDE WITH FACTORY INSTALLED DISCONNECT.
4. PROVIDE UNIT WITH HAIL GUARD.
5. PROVIDE UNIT WITH CONDENSATE PUMP.
6. CFM BASED ON MEDIUM FAN SPEED.

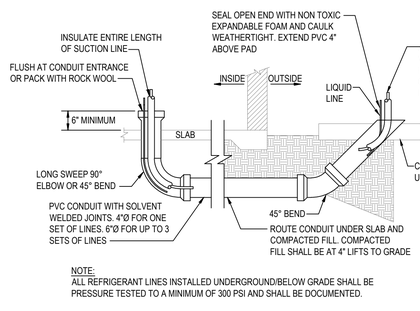
NOTES:
1. PROVIDE REFRIGERANT PIPE SIZES RECOMMENDED BY MFG.
2. COORDINATE INSTALLATION OF LONG STRAIGHT PIPE LENGTHS WITH MANUFACTURER FOR SUPPORT, EXPANSION COMPENSATION, ANCHOR GUIDES AS REQURED.



NOTE:
PIPING LAYOUT IS DIAGRAMMATIC. CONTRACTOR SHALL PROVIDE PIPING, ACCESSORIES, VALVES, ETC. TO ACCOMMODATE LAYOUT IN FIELD.

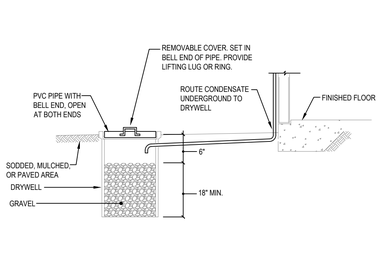
### 1 Refrigerant Piping Schematic Detail
SCALE: NOT TO SCALE

NOTE:
CONDENSING UNIT SUPPORT TO BE PROVIDED BY G.C. CONTRACTOR HAS OPTION TO USE APPROVED MANUFACTURER RECOMMENDE TIE-DOWN CLIPS.



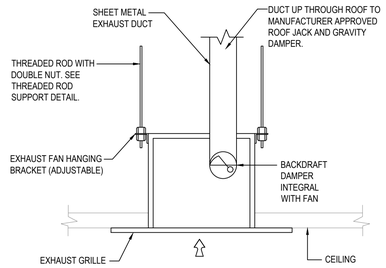
### 2 Condensing Unit Tie Down Detail
SCALE: NOT TO SCALE

CONDENSATE DRAIN PIPING DIMENSIONS:



A = FULL SIZE OF UNIT DRAIN CONNECTION
B ≥ 1-1/2 TIMES FAN SUCTION STATIC PRESSURE
C ≥ FAN DISCHARGE STATIC PRESSURE PLUS 1/2 INCH

### 3 Condensate Drain Trap Detail
SCALE: NOT TO SCALE



NOTE:
ALL REFRIGERANT LINES INSTALLED UNDERGROUND/BELOW GRADE SHALL BE PRESSURE TESTED TO A MINIMUM OF 300 PSI AND SHALL BE DOCUMENTED.

### 4 Underground Refrigerant Lines Detail
SCALE: NOT TO SCALE

### 5 Dryewll Condensate Disposal Detail

## PLUMBING GENERAL NOTES

1. CONTRACTOR SHALL COMPLY WITH ALL APPLICABLE CODES AND GOVERNING AUTHORITIES. I.E.: FLORIDA BUILDING CODE EIGHTH EDITION 2023 - PLUMBING, THE FLORIDA BUILDING CODE EIGHTH EDITION 2023, FBC EIGHTH EDITION 2023- ENERGY CONSERVATION, FFPC EIGHTH EDITION- 2023
2. ALL SANITARY PIPING 2-1/2" OR LESS SHALL HAVE A 1/4" PER FOOT SLOPE. ALL SANITARY PIPING 3" OR LARGER SHALL HAVE A 1/8" PER FOOT SLOPE UNLESS OTHERWISE NOTED. ALL STORM WATER PIPING 2-1/2" OR LESS SHALL HAVE A 1/4" PER FOOT MINIMUM HORIZONTAL SLOPE. ALL STORM WATER PIPING 3" OR LARGER SHALL HAVE A 1/8" PER FOOT MINIMUM HORIZONTAL SLOPE UNLESS OTHERWISE INDICATED.
3. VALVES AND FITTINGS SHALL BE OF SAME SIZE OF PIPE ON WHICH THEY ARE LOCATED, UNLESS OTHERWISE INDICATED ON DRAWINGS.
4. INSTALL WATER HAMMER SHOCK ARRESTORS AT EACH FIXTURE OR BATTERY OF FIXTURES WHERE REQUIRED. ARRESTORS SHALL BE FACTORY FABRICATED. INSTALL ARRESTORS AND SIZE PER PLUMBING AND DRAINAGE INSTITUTE STANDARD P.D.I. WH-201. ACCEPTABLE MANUFACTURERS: JOSAM, WATTS AND SIOUX CHIEF. AIR CHAMBERS SHALL NOT BE CONSIDERED AN EQUAL TO WATER ARRESTORS AS SPECIFIED.
5. CONTRACTOR IS RESPONSIBLE FOR MAINTAINING FIRE RATING AND WEATHERPROOFING INTEGRITY OF ALL PIPE PENETRATIONS.
6. ALL WATER SUPPLY AND SANITARY LINES SHALL RUN AS CLOSE TO PLANS AS POSSIBLE WITH NO CHANGES IN SIZING.
7. CONTRACTOR SHALL BE RESPONSIBLE FOR PROVIDING ALL NECESSARY SUPPORTING DEVICES FOR FIXTURES.
8. CHANGES IN THE DIRECTION OF SANITARY AND STORM DRAINAGE PIPING SHALL NOT BE MADE WITH FITTINGS WHICH WILL CAUSE EXCESSIVE REDUCTION IN THE VELOCITY OF FLOW OR CREATE ANY OTHER ADVERSE EFFECT. I.E.: USE OF SANITARY TEE IN A HORIZONTAL CONNECTION, USE OF A DOUBLE SANITARY TEE IN A VERTICAL STACK, USE OF SHORT RADIUS FITTINGS FOR BRANCH TO HOUSE DRAIN OR STACK CONNECTION.
9. CONTRACTOR SHALL GIVE 24 HOURS NOTICE TO APPLICABLE UTILITY COMPANY PRIOR TO PERFORMING WORK INVOLVING UTILITIES.
10. WHERE SANITARY SEWER LINES CROSS UNDERGROUND WATER SUPPLY LINES THE INSTALLATION SHALL COMPLY WITH THE FLORIDA BUILDING CODE EIGHTH EDITION 2023 - PLUMBING.
11. ALL FLOOR DRAINS SHALL BE PROVIDED WITH A TRAP PRIMER VALVE AND FITTINGS UNLESS NOTED OTHERWISE.
12. THE PLUMBING CONTRACTOR MAY BE REQUIRED TO DROP PIPE OUTSIDE OF BUILDING TO REQUIRED DEPTH TO PROVIDE CONNECTION TO AREA DEVELOPMENT UTILITY STUB. ALL DROPS IN DEPTH SHALL BE MADE WITH THE USE OF 45° FITTINGS.
13. ROUTE ALL PIPING CONCEALED ABOVE CEILINGS, WITHIN WALLS, OR IN CHASES. EXPOSED PIPING SHALL BE SLOPED AND PAINTED TO MATCH ARCHITECTURAL FINISHES. PIPING IN MECHANICAL ROOMS MAY BE EXPOSED.
14. SLEEVE AND FIRE STOP PENETRATIONS OF RATED WALLS, FLOORS, CEILINGS, MUST BE IN ACCORDANCE WITH SECTION 714 OF THE FBC 8TH EDITION 2023 AND LOCAL CODES TO MAINTAIN RATINGS. REFER TO ARCHITECTURAL DRAWINGS FOR APPLICABLE UL STANDARDS AND LOCATIONS OF RATED WALLS, CEILINGS, FLOORS, ETC.
15. ALL WATER PIPING INSTALLED IN EXTERIOR WALLS SHALL BE PLACED ON THE INTERIOR SIDE OF THE WALL.THE WALL INSULATION SHALL BE PLACED ON THE EXTERIOR SIDE OF THE PIPE.
16. SEE RISER DIAGRAMS FOR BRANCH PIPING DETAILS AND SIZES NOT SHOWN ON PLANS.
17. COLD AND HOT WATER PIPING SHALL BE CHLORINATED POLYVINYL CHLORIDE (CPVC) SCHEDULE 40 PLASTIC PIPE AND TUBING (ASTM F441) WITH CPVC SCHEDULE 40 FITTINGS (ASTM F438) SOCKET TYPE. DISINFECT WATER PIPING AFTER PRESSURE TEST. DISINFECTION PROCEDURE SHALL COMPLY WITH THE LOCAL HEALTH AUTHORITY, LOCAL WATER PURVEYOR, FLORIDA BUILDING CODE EIGHTH EDITION 2023 - PLUMBING, SECTION 610 DISINFECTION OF POTABLE WATER SYSTEMS.
18. SOIL, WASTE, VENT PIPING AND FITTINGS SHALL BE PVC; ASTM D2665 SCHEDULE 40. JOINTS SHALL BE SOLVENT CEMENT. PROVIDE CAST IRON PIPE AND FITTINGS FOR SOIL, WASTE AND VENT PIPING LOCATED IN CEILING PLENUMS OR IN LOCATIONS OF HIGH TEMPERATURE WATER DISCHARGE IN THE KITCHEN AND LAUNDRY.
19. PROVIDE CLEANOUTS FOR SANITARY AND STORM PIPING AT BASE OF EACH VERTICAL STACK, AT EACH CHANGE OF DIRECTION OF HORIZONTAL PIPE RUNS AND AT 100 FOOT INTERVALS OF HORIZONTAL RUNS FOR SANITARY AND STORM PIPING.
20. PROVIDE ACCESS PANELS TO VALVES WITHIN CHASES, WALLS, OR ABOVE NON-ACCESSIBLE CEILINGS. REFER TO ARCHITECTURAL DRAWINGS FOR CEILING TYPES.
21. SITE UTILITY CONNECTIONS SHOWN ON CIVIL DRAWINGS. ALL SERVICES SHOWN ON THIS SET OF PLANS TERMINATE 5'-0" FROM BUILDING, UNLESS SHOWN OTHERWISE ON DRAWINGS.
22. FURNISH AND INSTALL HOSE BIBBS AND/OR WALL HYDRANTS 24" ABOVE FINISHED GRADE/FLOOR (UNLESS OTHERWISE NOTED) AND PROVIDE VACUUM BREAKERS.
23. SEE ARCHITECTURAL DRAWINGS FOR EXACT LOCATIONS OF ROOF DRAINS, PLUMBING FIXTURE MOUNTING HEIGHTS AND DIMENSIONS.
24. CONTRACTOR SHALL VERIFY INVERT ELEVATIONS OF EXISTING SEWERS IN WHICH NEW SEWER LINES ARE TO BE CONNECTED PRIOR TO STARTING WORK.
25. CONTRACTOR SHALL INSTALL DIELECTRIC UNIONS AT CONNECTIONS OF DISSIMILAR METALS.
26. CONTRACTOR SHALL ROUGH-IN ALL WASTE AND SUPPLIES TO SPECIAL EQUIPMENT ACCORDING TO MANUFACTURER'S SHOP DRAWINGS AND MAKE FINAL CONNECTIONS AS NOTED. ALL SUPPLIES SHALL BE VALVED. INSTALL VACUUM BREAKERS WHERE REQUIRED BY CODE.
27. CONTRACTOR SHALL SUBMIT SHOP DRAWINGS (INCLUDING PIPE ROUTING AND EQUIPMENT LOCATIONS) TO ARCHITECT/ENGINEER FOR REVIEW PRIOR TO THE INSTALLATION OR PURCHASING OF ANY PIPING AND/OR EQUIPMENT.
28. PROVIDE REDUCED PRESSURE BACKFLOW PREVENTERS FOR DOMESTIC WATER SUPPLY CONNECTIONS AS REQUIRED BY CODE.
29. ALL BELOW GRADE/SLAB COPPER PIPE SHALL BE PLACED WITHIN COPPER PIPE SLEEVE (10 MIL) POLYETHYLENE PLASTIC SLEEVING. EXTEND SLEEVING ABOVE GRADE/SLAB.
30. CONTRACTOR SHALL REFER TO ARCHITECTURAL DRAWINGS FOR EXACT LOCATIONS OF FLOOR DRAINS LOCATED IN TOILET ROOMS. PLUMBING CONTRACTOR SHALL COORDINATE EXACT LOCATION OF FLOOR DRAINS SERVING MECHANICAL EQUIPMENT WITH MECHANICAL CONTRACTOR PRIOR TO INSTALLATION.
31. PRESSURE REDUCING VALVES SHALL BE INSTALLED ON BRANCH LINES SERVING FIXTURES AND/OR EQUIPMENT WHEN THE PRESSURE IN THE LINE EXCEEDS 80 P.S.I.
32. COORDINATE ROUTING OF ALL PLUMBING SYSTEMS TO AVOID CONFLICTS WITH OTHER DISCIPLINES WITHIN INTERSTITIAL SPACE AND ROUTE TIGHT TO STRUCTURE WHERE POSSIBLE. PIPING SHALL NOT ENTER OR PASS THROUGH ELECTRICAL AND COMMUNICATION ROOMS.
33. IF THE INTENT OF THE DRAWINGS AND/OR SPECIFICATIONS IS UNCLEAR OR HAS MORE THAN ONE INTERPRETATION, IT SHALL BE BROUGHT TO THE ATTENTION OF THE ARCHITECT/ENGINEER IN WRITING BEFORE THE SUBMISSION OF BIDS. THE ARCHITECT/ENGINEER SHALL MAKE CORRECTIONS AND/OR PROVIDE EXPLANATION IN WRITING.
34. PLANS AND SPECIFICATIONS ARE INTENDED AS A GENERAL DESCRIPTION OF THE WORK TO BE PERFORMED. ALL ITEMS NOT SPECIFICALLY MENTIONED OR SHOWN, BUT NECESSARY FOR THE COMPLETION OF THE INSTALLATION, SHALL BE FURNISHED AND INSTALLED BY THIS CONTRACTOR. THE CONTRACTOR SHALL ACQUAINT HIMSELF WITH THE MECHANICAL, ARCHITECTURAL, STRUCTURAL AND ELECTRICAL PLANS PRIOR TO SUBMITTING HIS FINAL BID. NO ADDITIONAL COMPENSATION WILL BE ALLOWED DUE TO CONTRACTORS FAILURE TO FAMILIARIZE HIMSELF WITH THE PLANS.
35. THE CONTRACTOR SHALL BASE HIS PROPOSAL UPON THE EQUIPMENT AS SCHEDULED OR SPECIFIED, USING THE MANUFACTURERS AND EQUIPMENT SPECIFIED ON THE DRAWINGS. IF MORE THAN ONE MANUFACTURER IS SPECIFIED FOR ONE ITEM, ANY ONE OF THE MANUFACTURERS LISTED MAY BE USED IN THIS CONTRACTOR'S PROPOSAL. IF THIS CONTRACTOR WISHES TO USE EQUIPMENT NOT SPECIFIED, HE MUST AT THE TIME OF BIDDING SUBMIT SEPARATELY ON LETTERHEAD STATIONARY OF THE BIDDER, THE EQUIPMENT HE WOULD SUBSTITUTE AND THE COST TO BE ADDED OR TO BE DEDUCTED FROM HIS PROPOSAL. CONTRACTOR'S PROPOSED SUBSTITUTES SHALL BE SUBMITTED TO ARCHITECT AND APPROVED BY OWNER.
36. THE CONTRACTOR IS EXPECTED TO ORDER ALL MATERIALS IN SUFFICIENT TIME TO AVOID DELAYING THE COMPLETION OF THE PROJECT. DELAY IN DELIVERY WILL NOT BE CONSIDERED A JUSTIFIABLE REASON FOR SUBMISSION OF SUBSTITUTE MATERIALS.
37. DO NOT PENETRATE WALL FOOTINGS WITH PIPING. COORDINATE PENETRATION LOCATION WITH GENERAL CONTRACTOR. PIPE PENETRATING A BEARING WALL OR FOOTING MUST BE SLEEVED AND LOCATION APPROVED BY STRUCTURAL ENGINEER.
38. REFER TO PLANS FOR VENT THRU ROOF (VTR) PIPE SIZES AND LOCATIONS. LOCATE VTR A MINIMUM OF 10' OF HORIZONTAL DISTANCE FROM ANY BUILDING OPENING OR FRESH AIR INTAKE. EXTEND VTR 12" ABOVE ROOF SURFACE. PROVIDE 1" FIBERGLASS INSULATION WITH ALL-SERVICE JACKET ON VENT PIPE INSIDE BUILDING WITHIN 6' OF VTR LOCATION. VERIFY FLASHING AND COUNTERFLASHING AND COORDINATE INSTALLATION WITH ROOFING CONTRACTOR.
39. COORDINATION: CONTRACTOR SHALL COORDINATE ITS CONSTRUCTION OPERATIONS WITH THOSE OF OTHER CONTRACTORS AND ENTITIES TO ENSURE EFFICIENT AND ORDERLY INSTALLATION OF EACH PART OF THE WORK. CONTRACTOR SHALL COORDINATE ITS OPERATIONS WITH OTHER CONTRACTORS OPERATIONS, THAT DEPEND ON EACH OTHER FOR PROPER INSTALLATION, CONNECTION AND OPERATION.
40. HEAT-TRACED PIPING SHALL MEET INSULATION THICKNESS REQUIREMENTS PER FLORIDA BUILDING CODE EIGHTH EDITION 2023 - ENERGY CONSERVATION.
41. MECHANICAL, PLUMBING AND ELECTRICAL CONTRACTOR SHALL COORDINATE ELECTRICAL VOLTAGE, AMPERAGE, OVER CURRENT PROTECTION AND ALL OTHER ELECTRICAL COMPONENTS AND ACCESSORIES OF THE HVAC AND PLUMBING EQUIPMENT BEFORE ORDERING.
42. PIPING SUPPORTS SHALL BE IN ACCORDANCE WITH THE FLORIDA BUILDING CODE EIGHTH EDITION 2023 - MECHANICAL, SECTION 305 AND THE FLORIDA BUILDING CODE EIGHTH EDITION 2023 - PLUMBING, SECTION 308.

## SUBMITTALS AND SUBSTITUTIONS

1. CONTRACTOR SHALL SUBMIT THE FOLLOWING EQUIPMENT FOR REVIEW PRIOR TO ORDERING AND INSTALLING
   - A. PLUMBING FIXTURES
   - B. WATER HEATERS
   - C. PIPING
2. PROCESSING TIME: ALLOW 10 WORKING DAYS FOR REVIEW OF EACH SUBMITTAL. ALLOW ADDITIONAL TIME IF COORDINATION WITH SUBSEQUENT SUBMITTALS IS REQUIRED. ENGINEER WILL ADVISE CONTRACTOR WHEN A SUBMITTAL BEING PROCESSED MUST BE DELAYED FOR COORDINATION.
3. SUBMITTALS: PLACE A PERMANENT LABEL OR TITLE BLOCK ON EACH SUBMITTAL ITEM FOR IDENTIFICATION. INDICATE NAME OF FIRM OR ENTITY THAT PREPARED EACH SUBMITTAL ON LABEL OR TITLE BLOCK. PROVIDE A SPACE BESIDE TITLE BLOCK TO RECORD CONTRACTOR'S REVIEW AND APPROVAL MARKINGS AND ACTION TAKEN BY ENGINEER. INCLUDE THE FOLLOWING INFORMATION FOR PROCESSING AND RECORDING ACTION TAKEN:
   - A. PROJECT NAME.
   - B. DATE.
   - C. NAME OF ENGINEER.
   - D. NAME OF CONTRACTOR.
   - E. NAME OF SUBCONTRACTOR.
   - F. NAME OF SUPPLIER.
   - G. NAME OF MANUFACTURER.
   - H. DRAWING NUMBER AND DETAIL REFERENCES, AS APPROPRIATE.
   - I. LOCATION WHERE PRODUCT IS TO BE INSTALLED, AS APPROPRIATE.
4. SUBMIT ELECTRONIC SUBMITTALS VIA EMAIL AS PDF ELECTRONIC FILES.
5. PAPER SUBMITTALS: SUBMIT THREE PAPER COPIES OF EACH SUBMITTAL UNLESS OTHER WISE INDICATED. ENGINEER WILL RETURN TWO COPIES.
6. COLLECT SUBMITTAL DATE INFORMATION INTO A SINGLE SUBMITTAL FOR EACH ELEMENT OF CONSTRUCTION AND TYPE OF PRODUCT OR EQUIPMENT. MARK EACH COPY OF EACH SUBMITTAL TO SHOW WHICH PRODUCTS AND OPTIONS ARE APPLICABLE. INCLUDE THE FOLLOWING INFORMATION, AS APPLICABLE:
   - A. MANUFACTURER'S CATALOG CUTS.
   - B. MANUFACTURER'S PRODUCT SPECIFICATIONS.
   - C. STATEMENT OF COMPLIANCE WITH SPECIFIED REFERENCED STANDARDS.
   - D. NOTATION OF COORDINATION REQUIREMENTS.
   - E. WIRING DIAGRAMS SHOWING FACTORY-INSTALLED WIRING.
   - F. PRINTED PERFORMANCE CURVES.
   - G. OPERATIONAL RANGE DIAGRAMS.
   - H. CLEARANCES REQUIRED TO OTHER CONSTRUCTION, IF NOT INDICATED ON ACCOMPANYING SHOP DRAWINGS.
7. CONTRACTOR SHALL REVIEW EACH SUBMITTAL AND CHECK FOR COORDINATION WITH OTHER WORK OF THE CONTRACT AND FOR COMPLIANCE WITH THE CONTRACT DOCUMENTS. NOTE CORRECTIONS AND FIELD DIMENSIONS. MARK WITH APPROVAL STAMP BEFORE SUBMITTING TO ENGINEER. APPROVAL STAMP: STAMP SHALL STATE THAT SUBMITTAL HAS BEEN REVIEWED, CHECKED, AND APPROVED FOR COMPLIANCE WITH THE CONTRACT DOCUMENTS AND INITIALED AND DATED BY CONTRACTOR.
8. ENGINEER WILL REVIEW EACH SUBMITTAL, MAKE MARKS TO INDICATE CORRECTIONS OR REVISIONS REQUIRED, AND RETURN IT. ENGINEER WILL STAMP EACH SUBMITTAL WITH AN ACTION STAMP AND WILL MARK STAMP APPROPRIATELY TO INDICATE ACTION.
9. ENGINEER WILL NOT REVIEW SUBMITTALS THAT DO NOT BEAR CONTRACTOR'S APPROVAL STAMP AND INITIALS AND WILL RETURN THEM WITHOUT ACTION. INCOMPLETE SUBMITTALS ARE UNACCEPTABLE, WILL BE CONSIDERED NONRESPONSIVE, AND WILL BE RETURNED FOR RESUBMITTAL WITHOUT REVIEW. SUBMITTALS NOT REQUIRED BY THE CONTRACT DOCUMENTS MAY NOT BE REVIEWED AND MAY BE DISCARDED
10. SUBSTITUTIONS
    - A. SUBSTITUTION OFFERS OWNER A SUBSTANTIAL ADVANTAGE IN COST, TIME, ENERGY CONSERVATION, OR OTHER CONSIDERATIONS.
    - B. SUBSTITUTION DOES NOT REQUIRE EXTENSIVE REVISIONS TO THE CONTRACT DOCUMENTS. CONTRACTOR SHALL COMPENSATE ENGINEER FOR ANY REDESIGN AND EVALUATION SERVICES INCLUDING CHANGES REQUIRED BY AUTHORITY HAVING JURISDICTION.
    - C. SUBSTITUTION WILL NOT ADVERSELY AFFECT CONSTRUCTION SCHEDULE.
    - D. SUBSTITUTION HAS RECEIVED NECESSARY APPROVALS OF AUTHORITIES HAVING JURISDICTION.
    - E. SUBSTITUTION HAS BEEN COORDINATED WITH OTHER PORTIONS OF THE WORK.
    - F. SUBSTITUTION PROVIDES SPECIFIED WARRANTY.
    - G. SUBSTITUTION HAS BEEN COORDINATED WITH OTHER PORTIONS OF THE WORK, AND IS ACCEPTABLE TO ALL CONTRACTORS INVOLVED.
    - H. CONTRACTOR SHALL ASSUME ANY ADDITIONAL CONSTRUCTION COSTS AS A RESULT OF THE SUBSTITUTION.

## DRAWING INDEX

| SHEET NUMBER | TITLE |
|---|---|
| P0.1 | Plumbing General Information |
| P0.2 | Plumbing Schedules and Riser Diagrams |
| P1.1 | Sanitary Floor Plan |
| P1.2 | Domestic Water Floor Plan |
| P5.1 | Plumbing Details |

## FLORIDA BUILDING CODE EIGHTH EDITION (2023) ENERGY CONSERVATION COMPLIANCE

THE DESIGN COMPLIES WITH SECTION C401.2 APPLICATION ITEM 3:

THE REQUIREMENTS OF SECTION C402.5, C403.2, C404, C405.2, C405.4, C405.5, C407 AND C408. THE BUILDING ENERGY COST SHALL BE EQUAL TO OR LESS THAN 85 PERCENT OF THE STANDARD REFERENCE DESIGN BUILDING.

## WATER HAMMER ARRESTOR SCHEDULE

9 = INSTALLED ARRESTOR SHALL BE APPROVED DEVICE BY FLORIDA BUILDING CODE EIGHTH EDITION 2023 - PLUMBING. ALL SUPPLY PIPING SHALL HAVE ARRESTOR THE SAME SIZE AS CONNECTION SIZE UP TO 1" I.E. PROVIDE P.D.I. SIZE "C" FOR 1" OR LARGER WATER SUPPLY TO FIXTURES, P.D.I. SIZE "B" FOR 3/4" SUPPLY AND P.D.I. SIZE "A" FOR 1/2" SUPPLY.

| * P.D.I. SIZE | CONNECTION SIZE |
|---|---|
| A (1-11 F.U.) | 1/2" |
| B (12-32 F.U.) | 3/4" |
| C (33-60 F.U.) | 1" |

P.D.I. = PLUMBING AND DRAINAGE INSTITUTE STANDARD WH-201

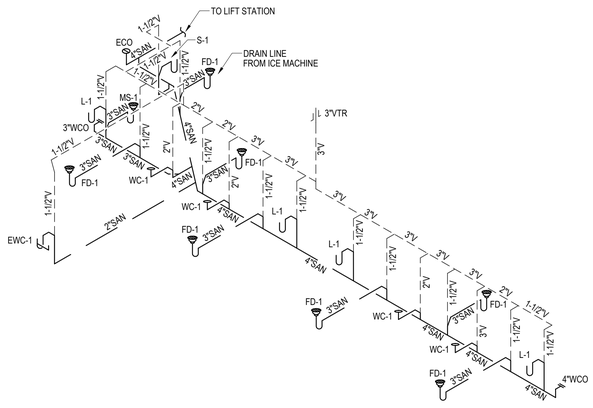
## FIXTURE SPECIFICATIONS

| TAG | FIXTURE | MANUFACTURER | MODEL # | PIPE SIZE | | | | DESCRIPTION |
|---|---|---|---|---|---|---|---|---|
| | | | | CW | HW | SAN | VENT | |
| WC-1 | WATER CLOSET FLUSH VALVE | AMERICAN STANDARD | 3461.528 | 1" | - | 4" | 2" | ADA COMPLIANT, VITREOUS CHINA, FLOOR MOUNTED, 1.28 GPF, TOP SPUD, ELONGATED BOWL HIGH EFFICIENCY FLUSHOMETER VALVE TOILET, COLOR WHITE. PROVIDE WITH ULTIMA SELECTRONIC TOUCHLESS BATTERY-POWERED FLUSH VALVE WITH MANUAL OVERRIDE BUTTON, MANUFACTURER'S RECOMMENDED ANGLE SUPPLY STOPS, SUPPLY TUBING AND INSTALLATION MATERIALS. PROVIDE ANTIMICROBIAL OPEN FRONT COVERLESS SEAT. |
| L-1 | LAVATORY WALL HUNG | AMERICAN STANDARD | 0355.012 | 1/2" | 1/2" | 2" | 1-1/2" | ADA COMPLIANT WALL HUNG VITREOUS LAVATORY, FAUCET HOLES ON 4" CENTERS, COLOR WHITE. PROVIDE ANGLE SUPPLIES, P-TRAP, PIPING INSULATION WRAP, DRAIN GRID AND INSTALLATION MATERIALS. INSTALL AS REQUIRED TO MEET ADA GUIDELINES. PROVIDE INNSBROOK SELECTRONIC TOUCHLESS BATTERY-POWERED AMERICAN STANDARD FAUCET 6055.204. PROVIDE WITH 605XTMV1070 ASSE 1070 CERTIFIED THERMOSTATIC MIXING VALVE. INSTALL USING MANUFACTURER'S RECOMMENDATIONS. |
| S-1 | HAND SINK | ELKAY | CHSB1716C | 1/2" | 1/2" | 2" | 1-1/2" | SINGLE BOWL, WALL HUNG, HANDWASH SINK KIT, 20 GAUGE, TYPE 304 S/S, 16-3/4" X 15-1/2" X 13" DEEP, 7" HIGH BACKSPLASH, 2" DRAIN OPENING. INCLUDES WALL HANGER AND INTEGRAL STAINLESS STEEL SUPPORT BRACKETS, CHS1716 SINK, LK940GN04L2H FAUCET, LK8 DRAIN FITTING AND LK500 P-TRAP. PROVIDE WITH ANGLE SUPPLIES AND INSTALLATION MATERIALS. INSTALL PER MANUFACTURERS INSTRUCTIONS. |
| EWC-1 | HI-LO ELECTRIC WATER COOLER | ELKAY | LZSTL8WSLK | 1/2" | - | 2" | 1-1/2" | BI-LEVEL BARRIER FREE ADA COMPLIANT ELECTRIC WATER COOLER WITH BOTTLE FILLING STATION. COORDINATE POWER OUTLET LOCATION WITH ELECTRICAL CONTRACTOR FOR ELECTRICAL CORD WITH 3-PRONG PLUG.INSTALL PER MANUFACTURER'S RECOMMENDATIONS. REFER TO ARCHITECTURAL ELEVATIONS FOR MOUNTING HEIGHTS. |
| WHY-1 | WALL HYDRANT (EXTERIOR) | WOODFORD | B65 | 3/4" | - | - | - | AUTOMATIC DRAINING, FREEZELESS WALL HYDRANT WITH HOSE CONNECTION ANTI-SIPHON VACUUM BREAKER. ASSE 1011 APPROVED, BRASS VALVE BODY, LOOSE KEY. WALL BOX DOOR SHALL BE CHROME FINISH. |
| ET-1 | EXPANSION TANK | AMTROL | ST-5-C | 3/4" | - | - | - | THERMAL EXPANSION TANK, APPROVED FOR POTABLE WATER. INSTALL PER MANUFACTURERS RECOMMENDATIONS. |
| FD-1 | FLOOR DRAIN | ZURN | ZN415-B | - | - | 3" | 1-1/2" | CAST IRON BODY WITH BOTTOM OUTLET, INVERTIBLE MEMBRANE CLAMP AND ADJUSTABLE COLLAR WITH 6" DIAMETER TYPE "B" NICKEL BRONZE ROUND STRAINER. PROVIDE WITH DEEP SEAL TRAP AND 1/2" TRAP PRIMER CONNECTION OUTLET. |
| MS-1 | MOP SINK | FIAT | MSB-2424 | 3/4" | 3/4" | 3" | 1-1/2" | FLOOR MOUNTED MOLDED PLASTIC BASIN WITH HOSE BRACKET 832-AA, WALL MOUNTED FAUCET 830-AA AND CORNER GUARD ON THE FRONT LIP. |
| WCO | WALL CLEANOUT | ZURN | Z1446 | - | - | - | - | WALL CLEANOUT WITH STAINLESS STEEL ROUND ACCESS COVER. SEE PLANS FOR PIPE SIZE CONNECTION. |
| ECO | EXTERIOR CLEANOUT | ZURN | Z-1400-HD | - | - | - | - | HEAVY TRAFFIC AREA EXTERIOR CLEANOUT WITH ACCESS COVER AND TWO-WAY FITTING. SEE PLANS FOR PIPE SIZE CONNECTION. |
| WHA | WATER HAMMER ARRESTOR | ZURN / WILKINS | 1250 | - | - | - | - | WATER HAMMER ARRESTOR SHALL MEET ASSE 1010. THE DEVICE SHALL CONSIST OF A COPPER BODY WITH AN ACETAL PISTON, BUNA NITRILE O-RINGS AND LEAD FREE SOLDER. THE DEVICE SHALL BE PRE-CHARGED AND SEALED AT THE FACTORY. |
| BFP-1 | BACKFLOW PREVENTER | WATTS | LF7C | - | - | - | - | DUAL CHECK VALVE BACKFLOW PREVENTER, ASSE 1024 APPROVED, WITH CAST BODY. CAN BE INSTALLED VERTICALLY OR HORIZONTALLY . |
| TPV-1 | TRAP PRIMER VALVE | PRECISION PLUMBING | PRO1-ULP500 | 1/2" | - | - | - | UNDER-LAV TRAP PRIMER, MINIMUM 12" ABOVE FINISHED FLOOR. INSTALL PER MANUFACTURERS INSTRUCTIONS. |

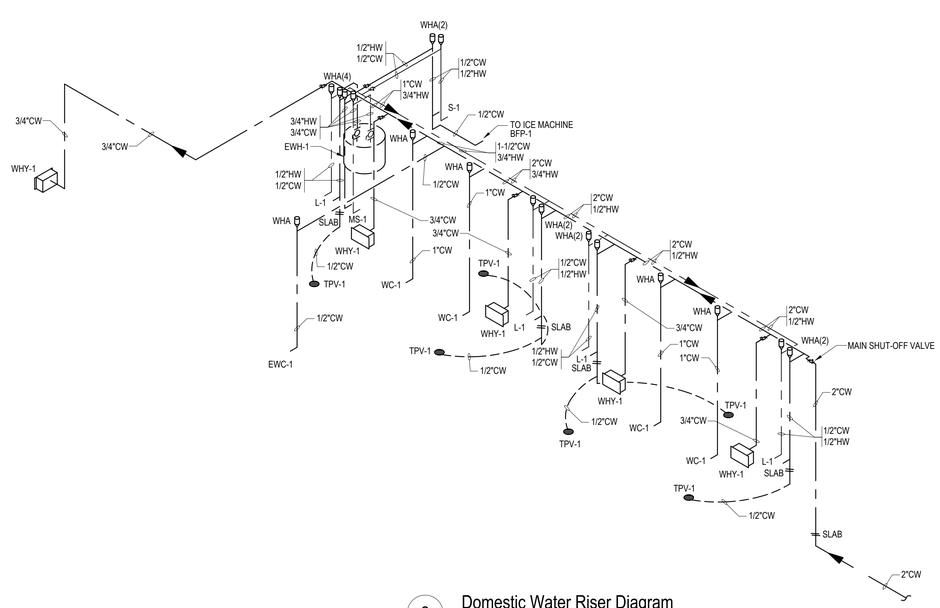
NOTE:
1. VERIFY WITH OWNER ALL SPECIFIED EQUIPMENT SELECTIONS PRIOR TO PURCHASE AND INSTALLATION.
2. REFER TO ARCHITECTURAL DRAWINGS FOR ALL FINAL LOCATIONS AND MOUNTING DIMENSIONS OF ALL PLUMBING FIXTURES. PROVIDE ADA CONFORMING FACTORY INSULATION KIT ON HOT, COLD AND P-TRAP WASTE PIPING AT ADA DESIGNATED LAVATORIES.

## ELECTRIC WATER HEATER SCHEDULE



| MARK | STORAGE CAPACITY (GALLONS) | RECOVERY (GPH @60° RISE) | TOTAL WEIGHT (LBS) | TOTAL KW | VOLTS | PH | MANUFACTURER | MODEL | LOCATION | NOTES |
|---|---|---|---|---|---|---|---|---|---|---|
| EWH-1 | 20 | 20 | 240 | 3 | 208 | 1 | A.O. SMITH | DEL-20 | 105 PLUMBING CHASE | 1-2 |

NOTES:
1. SINGLE ELEMENT OPERATION.
2. PROVIDE WALL MOUNT WATER HEATER SHELF.



## PIPING MATERIAL SCHEDULE

| SERVICE | SIZE | MATERIAL | SCHEDULE/TYPE | INSULATION | | REMARKS |
|---|---|---|---|---|---|---|
| | | | | TYPE | THICKNESS | |
| COLD WATER | ALL | CPVC | SCH. 40 | FG | 1" | SEE NOTE 2 |
| HOT WATER | ALL | CPVC | SCH. 40 | FG | 1" | SEE NOTE 2 |
| SANITARY | ALL | C.I. OR PVC | NOTE 3 | NONE | - | NO HUB |
| VENT | ALL | PVC | SCH. 40 | NONE | - | SEE NOTE 1 |

NOTES:
1. WASTE AND VENT PIPING IN PLENUM SPACE SHALL BE SERVICE WEIGHT CAST IRON, NO HUB.
2. FIBERGLASS PIPE INSULATION: MINERAL OR GLASS FIBERS BONDED WITH A THERMOSETTING RESIN. SEMIRIGID BOARD MATERIAL WITH FACTORY-APPLIED ASJ COMPLYING WITH ASTM C 1393, OR WITH PROPERTIES SIMILAR TO ASTM C 612. NOMINAL DENSITY IS 2.5 LB/CU. FT. OR MORE. THERMAL CONDUCTIVITY (K VALUE) AT 100 DEG. F (55 DEG. C) IS 0.29 BTU X IN./H X SQ.FT. X DEG. F (0.042 W/M X K) OR LESS. ALL SERVICE JACKET (ASJ): WHITE, KRAFT-PAPER, FIBERGLASS-REINFORCED SCRIM WITH ALUMINUM-FOIL BACKING; COMPLYING WITH ASTM C 1136, TYPE MANUFACTURER: A. CERTAINTEED CORP., B. JOHNS MANVILLE, C. KNAUF INSULATION, D. OWENS CORNING
3. FOR PVC ONLY SCHEDULE 40 DWV. FOAM CORE PVC NOT ALLOWED.

## GENERAL PLAN NOTES:

1. COMPLETE AND WORKING PLUMBING SYSTEMS SHALL BE IN ACCORDANCE WITH THE 2023 FLORIDA BUILDING CODE - PLUMBING, 8TH EDITION AND AUTHORITY HAVING JURISDICTION.
2. VERIFY UTILITY CONNECTION TIE-INS PRIOR TO THE COMMENCEMENT OF WORK. COORDINATE ALL WORK WITH ALL TRADES.
3. MAINTAIN MINIMUM CLEARANCES AROUND ELECTRICAL PANELS. PIPING SHALL NOT BE ROUTED ABOVE ELECTRICAL PANELS.
4. PLUMBING CONTRACTOR SHALL BE LICENSED IN THE STATE WHERE THE WORK IS TO BE PERFORMED.
5. ALL PLUMBING WORK SHALL COMPLY WITH MANUFACTURER'S RECOMMENDED INSTALLATION.
6. BELOW SLAB PIPING SHALL BE COORDINATED TO AVOID STRUCTURAL FOOTINGS.
7. REFER TO RISER DIAGRAMS FOR BRANCH PIPING DETAILS AND SIZES NOT SHOWN ON PLANS.

## PLUMBING PLAN KEY NOTES:

(1) 6" SANITARY BELOW GRADE TO LIFT STATION. MINIMUM INVERT ELEVATION = 3.00' BELOW FINISHED FLOOR. EXACT LOCATION AND UTILITY CONTINUATION BY CONTRACTOR.

(2) 3"V UP TO 3"VTR.

(3) PROVIDE INDIRECT DRAIN WITH AIR GAP FROM ICE MACHINE TO FLOOR DRAIN.

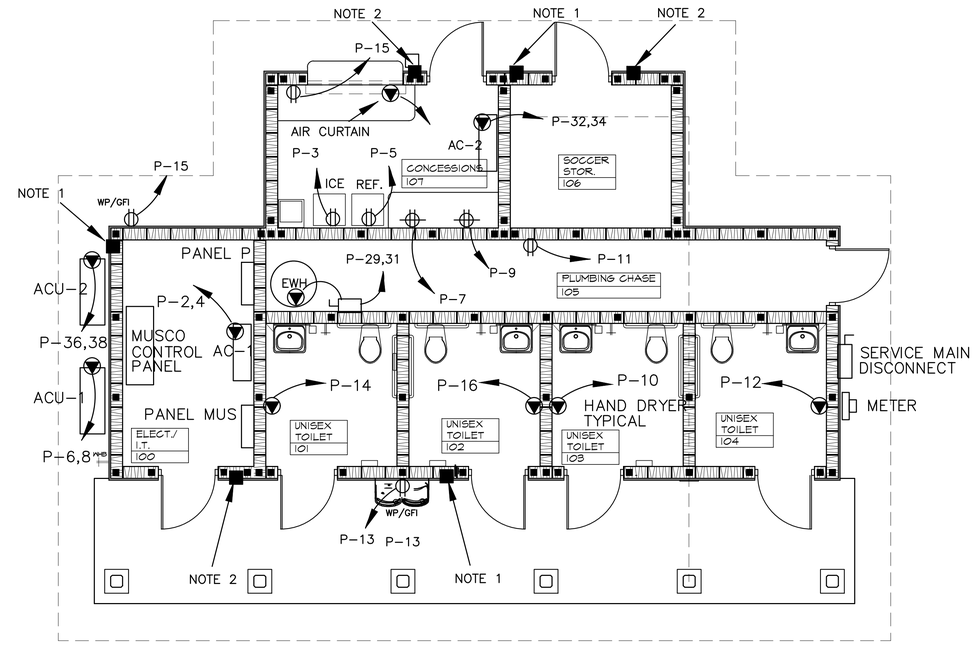
## LIGHTING PLAN

SCALE: 1/4" = 1'-0"

LIGHTING PLAN NOTES

1. CEILING–MOUNTED EXHAUST FANS TO BE CONTROLLED BY LIGHTING CIRCUIT, INCLUDING TURN ON AND OFF BY VACANCY SENSORS. FANS ARE TO BE SUPPLIED WITH INTEGRAL DISCONNECT.

SERVICE RISER DIAGRAM



SERVICE RISER NOTES

1. PROVIDE FPL–APPROVED IN–LINE METER CAN SUITABLE FOR 400 AMP SERVICE AT 120/208 VOLT THREE PHASE, 4–WIRE. COORDINATE PROVISION OF SERVICE LATERAL WITH FP&L.
2. SURGE PROTECTOR TO BE SQUARE D, MODEL SDSA3650.
3. SERVICE GROUND TO BE #1/0 AWG BARE COPPER WIRE CONNECTED TO GROUND AND NEUTRAL LUGS OF NOTE 4 SAFETY WITCH, TO BUILDING FOOTER REINFORCING STEEL BAR, TO TWO EACH 20–FOOT DRIVEN COPPER ELECTRODES, 20 FEET ON CENTERS, MINIMUM, AND TO METAL WATER PIPE, IF PRESENT.
4. PROVIDE 400 AMP FUSED DISCONNECT (FUSED AT 200 AMPS) IN NEMA 3R ENCLOSURE WITH NEUTRAL AND GROUND LUGS. ENCLOSURE TO BE LOCKABLE. IDENTIFY SWITCH AS "SERVICE MAIN DISCONNECT".
5. PANEL MUS TO BE A 120/208 VOLT, 400 AMP, THREE–PHASE, 4–WIRE MLO PANEL IN NEMA 1, SURFACE–MOUNT ENCLOSURE. CIRCUIT AS SHOWN, AND PROVIDE PANEL DIRECTORY UPON COMPLETION OF WORK.
6. OUTSIDE FIXTURES TO BE SWITCHED BY LIGHTING RELAYS ON AT DUSK AND OFF AT DAWN (CONTROLLED BY PHOTOCELL).

LIGHTING FIXTURE SCHEDULE

**SECTION 012000**
**APPLICATIONS FOR PAYMENT**

## PART 1 - GENERAL

### 1.01 RELATED DOCUMENTS

A. Drawings and general provisions of Contract, including General and Supplementary Conditions and other Division-1 Specification Sections, apply to this Section.

### 1.02 SUMMARY

A. This Section specifies administrative and procedural requirements governing the Contractor's Applications for Payment.
   1. Coordinate the Schedule of Values and Applications for Payment with the Contractor's Construction Schedule, List of Subcontracts, and Submittal Schedule.

B. The Contractor's Construction Schedule and Submittal Schedule are included in Section "Submittals".

### 1.03 SCHEDULE OF VALUES

A. Coordinate preparation of the Schedule of Values with preparation of the Contractor's Construction Schedule. Correlate line items with other administrative schedules and the forms required for the work, including the following:
   1. Contractor's construction schedule.
   2. Application for Payment form.
   3. List of subcontractors.
   4. Schedule of alternates.
   5. List of products.
   6. List of principal suppliers and fabricators.
   7. Schedule of submittals.

B. Submit the Schedule of Values to the Architect at the earliest feasible date, but in no case later than 10 days before the date scheduled for submittal of the initial Application for Payment.

C. Format and Content: Use the Project Manual Table of Contents as a guide to establish the format for the Schedule of Values.

D. Identification: Include the following Project identification on the Schedule of Values:
   1. Project name and location.
   2. Name of the Architect.
   3. Project number.
   4. Contractor's name and address.
   5. Date of submittal.

E. Arrange the Schedule of Values in a tabular form with separate columns to indicate the following for each item listed:
   1. Generic name.
      a. Related Specification Section.
   2. Change Orders (numbers) that have affected value.
   3. Dollar value.

F. Provide a breakdown of the Contract Sum in sufficient detail to facilitate continued evaluation of Applications for Payment and progress reports.

G. Round amounts off to the nearest whole dollar; the total shall equal the Contract Sum.

H. For each part of the Work where an Application for Payment may include materials or equipment, purchased or fabricated and stored, but not yet installed, provide separate line items on the Schedule of Values for initial cost of the materials, for each subsequent stage of completion, and for total installed value of that part of the Work.

I. Margins of Cost: Show line items for indirect costs, and margins on actual costs, only to the extent that such items will be listed individually in Applications for Payment. Each item in the Schedule of Values and Applications for Payment shall be complete including its total cost and proportionate share of general overhead and profit margin.
   1. At the Contractor's option, temporary facilities and other major cost items that are not direct cost of actual work-in-place may be shown as separate line items in the Schedule of Values or distributed as general overhead expense.

J. Schedule Updating: Update and resubmit the Schedule of Values when Change Orders or Construction Change Directives result in a change in the Contract Sum.

**1.04 APPLICATIONS FOR PAYMENT:**

A. Each Application for Payment shall be consistent with previous applications and payments as certified by the Architect and paid for by the Owner.
   1. The initial Application for Payment, the Application for Payment at time of Substantial Completion, and the final Application for Payment involve additional requirements.

B. Payment Application Times: Each progress payment date is as indicated in the Agreement. The period of construction Work covered by each Application or Payment is the period indicated in the Agreement.

C. Payment Application Forms: Use AIA Document G 702 and Continuation Sheets G 703 as the form for Application for Payment.

D. Application Preparation: Complete every entry on the form, including notarization and execution by person authorized to sign legal documents on behalf of the Owner. Incomplete applications will be returned without action.
   1. Entries shall match data on the Schedule of Values and Contractor's Construction Schedule. Use updated schedules if revisions have been made.
   2. Include amounts of Change Orders and Construction Change Directives issued prior to the last day of the construction period covered by the application.

E. Transmittal: Submit 8 executed copies of each Application for Payment to the Architect by means ensuring receipt within 24 hours; three copies shall be complete, including waivers of lien and similar attachments, when required.
   1. Transmit each copy with a transmittal form listing attachments, and recording appropriate information related to the application in a manner acceptable to the Architect.

F. Payment Approval: At each Monthly Progress Meeting a 'Preliminary' Partial Payment Request will be submitted to Architect and Engineers for reviewal, at which time it will be reviewed, modified if required, and approved by the A/E based on 'on-site' inspection and proper documentation for materials and items properly stored. Payment will be withheld if 'as-built' drawings are not current and acceptable to A/E. Payment request will then be finalized and submitted to Architect for further action.

G. Initial Application for Payment: Administrative actions and submittals that must precede or coincide with submittal of the first Application for Payment include the following:
   1. List of subcontractors.
   2. Schedule of Values.
   3. Contractor's Construction Schedule (preliminary if not final).
   4. Submittal Schedule (preliminary if not final).
   5. List of Contractor's staff assignments.
   6. List of Contractor's principal consultants.
   7. Copies of building permits
   8. Copies of authorizations and licenses from governing authorities for performance of the Work.
   9. Initial progress report.
   10. Report of pre-construction meeting.

H. Application for Payment at Substantial Completion: Following issuance of the Certificate of Substantial Completion, submit an Application for Payment; this application shall reflect any Certificates of Partial Substantial Completion issued previously for Owner occupancy of designated portions of the Work.

I. Administrative actions and submittals that shall proceed or coincide with this application include:
   1. Occupancy permits and similar approvals.
   2. Warranties (guarantees) and maintenance agreements.
   3. Test/adjust/balance records.
   4. Maintenance instructions.
   5. Meter readings.
   6. Start-up performance reports.
   7. Change-over information related to Owner's occupancy, use, operation and maintenance.
   8. Final cleaning.
   9. Advice on shifting insurance coverages.
   10. List of incomplete Work, recognized as exceptions to Architect's Certificate of Substantial Completion.

J. Final Payment Application: Administrative actions and submittals which must precede or coincide with submittal of the final payment Application for Payment include the following:
   1. Completion of Project closeout requirements.
   2. Completion of items specified for completion after Substantial Completion.
   3. Assurance that unsettled claims will be settled.
   4. Transmittal of required Project construction records to Owner.
   5. Certified property survey.
   6. Proof that taxes, fees and similar obligations have been paid.
   7. Removal of temporary facilities and services.
   8. Removal of surplus materials, rubbish and similar elements.
   9. Change of door locks to Owner's access.

**PART 2 - PRODUCTS (NOT APPLICABLE)**

**PART 3 - EXECUTION (NOT APPLICABLE)**

**END OF SECTION 01027**

**SECTION 013100**
**PROJECT COORDINATION**

## PART 1 - GENERAL

### 1.01 RELATED DOCUMENTS

A. Drawings and general provisions of Contract, including General and Supplementary Conditions and other Division-1 Specification Sections, apply to this Section.

### 1.02 SUMMARY

A. This Section specifies administrative and supervisory requirements necessary for Project coordination including, but not necessarily limited to:
   1. Coordination.
   2. Administrative and supervisory personnel.
   3. General installation provisions.
   4. Cleaning and protection.

B. Field engineering is included in Section "Field Engineering".

C. Progress meetings, coordination meetings and pre-installation conferences are included in Section "Project Meetings".

D. Requirements for the Contractor's Construction Schedule are included in Section "Submittals".

### 1.03 COORDINATION

A. Coordination: Coordinate construction activities included under various Sections of these Specifications to assure efficient and orderly installation of each part of the Work. Coordinate construction operations included under different Sections of the Specifications that are dependent upon each other for proper installation, connection, and operation.
   1. Where installation of one part of the Work is dependent on installation of other components, either before or after its own installation, schedule construction activities in the sequence required to obtain the best results.
   2. Where availability of space is limited, coordinate installation of different components to assure maximum accessibility for required maintenance, service and repair.
   3. Make adequate provisions to accommodate items scheduled for later installation.

B. Where necessary, prepare memoranda for distribution to each party involved outlining special procedures required for coordination. Include such items as required notices, reports, and attendance at meetings.
   1. Prepare similar memoranda for the Owner and separate Contractors where coordination of their Work is required.

C. Administrative Procedures: Coordinate scheduling and timing of required administrative procedures with other construction activities to avoid conflicts and ensure orderly progress of the Work. Such administrative activities include, but are not limited to, the following:
   1. Preparation of schedules.
   2. Installation and removal of temporary facilities.
   3. Delivery and processing of submittals.
   4. Progress meetings.
   5. Project Close-out activities.

### 1.04 SUBMITTALS

A. Coordination Drawings: Prepare and submit coordination drawings where close and careful coordination is required for installation of products and materials fabricated off-site by separate entities, and where limited space availability necessitates maximum utilization of space for efficient installation of different components.
   1. Show the interrelationship of components shown on separate Shop Drawings.
   2. Indicate required installation sequences.
   3. Comply with requirements contained in Section "Submittals".

4. Refer to Division-15 Section "Basic Mechanical Requirements" and Division-16 Section "Basic Electrical Requirements" for specific coordination drawing requirements for mechanical and electrical installations.

B. Staff Names: Within 15 days of Notice to Proceed, submit a list of the Contractor's principal staff assignments, including the Superintendent and other personnel in attendance at the site; identify individuals, their duties and responsibilities; list their addresses and telephone numbers.
   1. Post copies of the list in the Project meeting room, the temporary field office, and each temporary telephone.

**PART 2 - PRODUCTS (NOT APPLICABLE).**

**PART 3 - EXECUTION**

**3.01 GENERAL INSTALLATION PROVISIONS**

A. Inspection of Conditions: Require the Installer of each major component to inspect both the substrate and conditions under which Work is to be performed. Do not proceed until unsatisfactory conditions have been corrected in an acceptable manner.

B. Manufacturer's Instructions: Comply with manufacturer's installation instructions and recommendations, to the extent that those instructions and recommendations are more explicit or stringent than requirements contained in Contract Documents.

C. Inspect materials or equipment immediately upon delivery and again prior to installation. Reject damaged and defective items.

D. Provide attachment and connection devices and methods necessary for securing Work. Secure Work true to line and level. Allow for expansion and building movement.

E. Visual Effects: Provide uniform joint widths in exposed Work. Arrange joints in exposed Work to obtain the best visual effect. Refer questionable choices to the Architect for final decision.

F. Recheck measurements and dimensions, before starting each installation.

G. Install each component during weather conditions and Project status that will ensure the best possible results. Isolate each part of the completed construction from incompatible material as necessary to prevent deterioration.

H. Coordinate temporary enclosures with required inspections and tests, to minimize the necessity of uncovering completed construction for that purpose.

I. Mounting Heights: Where mounting heights are not indicated, install individual components at standard mounting heights recognized within the industry for the particular application indicated. Refer questionable mounting height decisions to the Architect for final decision.

**3.02 CLEANING AND PROTECTION**

A. During handling and installation, clean and protect construction in progress and adjoining materials in place. Apply protective covering where required to ensure protection from damage or deterioration at Substantial Completion.

B. Clean and maintain completed construction as frequently as necessary through the remainder of the construction period. Adjust and lubricate operable components to ensure operability without damaging effects.

C. Limiting Exposures: Supervise construction activities to ensure that no part of the construction, completed or in progress, is subject to harmful, dangerous, damaging, or otherwise deleterious exposure during the construction period. Where applicable, such exposures include, but are not limited to, the following:
   1. Excessive static or dynamic loading.
   2. Excessive internal or external pressures.
   3. Excessively high or low temperatures.
   4. Thermal shock.
   5. Excessively high or low humidity.

6. Air contamination or pollution.
7. Water or ice.
8. Solvents.
9. Chemicals.
10. Light.
11. Radiation.
12. Puncture.
13. Abrasion.
14. Heavy traffic.
15. Soiling, staining and corrosion.
16. Bacteria.
17. Rodent and insect infestation.
18. Combustion.
19. Electrical current.
20. High speed operation,
21. Improper lubrication,
22. Unusual wear or other misuse.
23. Contact between incompatible materials.
24. Destructive testing.
25. Misalignment.
26. Excessive weathering.
27. Unprotected storage.
28. Improper shipping or handling.
29. Theft.
30. Vandalism.

**END OF SECTION 01040**

**SECTION 013200**
**PROJECT MEETINGS**

## PART 1 - GENERAL

### 1.01 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division-1 Specification Sections, apply to this Section.

### 1.02 SUMMARY

A. This Section specifies administrative and procedural requirements for project meetings including but not limited to:
   1. Pre-Construction Conference.
   2. Pre-Installation Conferences.
   3. Progress Meetings.

B. Construction schedules are specified in another Division-1 Section.

### 1.03 PRE-CONSTRUCTION CONFERENCE

A. Schedule a pre-construction conference and organizational meeting at the Project site or other convenient location no later than 15 days after execution of the Agreement and prior to commencement of construction activities. Conduct the meeting to review responsibilities and personnel assignments.

B. Attendees: The Owner, Architect and their consultants, the Contractor and its superintendent, major subcontractors, manufacturers, suppliers and other concerned parties shall each be represented at the conference by persons familiar with and authorized to conclude matters relating to the Work.

C. Agenda: Discuss items of significance that could affect progress including such topics as:
   1. Tentative construction schedule
   2. Critical Work sequencing
   3. Designation of responsible personnel
   4. Procedures for processing field decisions and Change Orders
   5. Procedures for processing Applications for Payment
   6. Distribution of Contract Documents
   7. Submittal of Shop Drawings, Product Data and Samples
   8. Preparation and maintenance of record drawings ('as-builts')
   9. Use of the premises
   10. Office, Work and storage areas
   11. Equipment deliveries and priorities
   12. Safety Procedures
   13. First Aid
   14. Security
   15. Housekeeping
   16. Working hours

### 1.04 PRE-INSTALLATION CONFERENCES

A. Conduct a pre-installation conference at the site before each major construction activity that requires coordination with other construction. The Installer and representatives of manufacturers and fabricators involved in or affected by the installation, and its coordination or integration with other materials and installations that have preceded or will follow, shall attend the meeting. Advise the Architect of scheduled meeting dates.

B. Review the progress of other construction activities and preparations for particular activity under consideration at each pre-installation conference, including requirements for:
   1. Contract Documents
   2. Options

3. Related Change Orders and applicable Field Orders
4. Purchases
5. Deliveries
6. Shop Drawings, Product Data and quality control Samples
7. Possible conflicts
8. Compatibility problems
9. Time schedules
10. Weather limitations
11. Manufacturer's recommendations
12. Compatibility of materials
13. Acceptability of substrates
14. Temporary facilities
15. Space and access limitations
16. Governing regulations
17. Safety
18. Inspection and testing requirements
19. Required performance results
20. Recording requirements
21. Protection

C. Record significant discussions and agreements and disagreements of each conference, along with the approved schedule. Distribute the record of the meeting to everyone concerned, promptly, including the Owner and Architect.

D. Do not proceed if the conference cannot be successfully concluded. Initiate whatever actions are necessary to resolve impediments to performance of Work and reconvene the conference at the earliest feasible date.

**1.05 PROGRESS MEETINGS**

A. Progress meetings are held bi-weekly at regularly scheduled times in the owner's conference room.

B. Attendees: In addition to representatives of the Owner and Architect, each subcontractor, supplier or other entity concerned with current progress or involved in planning, coordination or performance of future activities shall be represented at these meetings by persons familiar with the Project and authorized to conclude matters relating to progress.

C. Agenda: Review and correct or approve minutes of the previous progress meeting. Review other items of significance that could affect progress. Include topics for discussion as appropriate to the current status of the Project.

D. Contractor's Construction Schedule: Review progress since the last meeting. Determine where each activity is in relation to the Contractor's Construction Schedule, whether on time or ahead or behind schedule. Determine how construction behind schedule will be expedited; secure commitments from parties involved to do so. Discuss whether schedule revisions are required to ensure that current and subsequent activities will be completed within the Contract Time.

E. Review the present and future needs of each entity present, including such items as:
1. Record drawings.
2. Interface requirements.
3. Time.
4. Sequences.
5. Deliveries.
6. Off-site fabrication problems.
7. Access.
8. Site utilization.
9. Temporary facilities and services.

10. Hours of Work.
11. Hazards and risks.
12. Housekeeping.
13. Quality and Work standards.
14. Change Orders.
15. Documentation of information for payment requests.

F. Reporting: No later than 3 days after each progress meeting date, distribute copies of minutes of the meeting to each party present and to other parties who should have been present. Include a brief summary, in narrative form, of progress since the previous meeting and report.

G. Schedule Updating: Revise the construction schedule after each progress meeting where revisions to the schedule have been made or recognized. Issue the revised schedule concurrently with the report of each meeting.

**PART 2 - PRODUCTS (NOT APPLICABLE)**

**PART 3 - EXECUTION (NOT APPLICABLE)**

**END OF SECTION 01200**

**SECTION 014000**
**QUALITY CONTROL SERVICES**

## PART 1 - GENERAL

### 1.01 RELATED DOCUMENTS

A. Drawings and general provisions of Contract, including General and Supplementary Conditions and other Division-1 Specification Sections, apply to this Section.

### 1.02 SUMMARY

A. This Section specifies administrative and procedural requirements for quality control services.

B. Quality control services include inspections and tests and related actions including reports, performed by independent agencies, governing authorities, and the Contractor. They do not include Contract enforcement activities performed by the Architect.

C. Inspection and testing services are required to verify compliance with requirements specified or indicated. These services do not relieve the Contractor of responsibility for compliance with Contract Document requirements.

D. Requirements of this Section relate to customized fabrication and installation procedures, not production of standard products.
   1. Specific quality control requirements for individual construction activities are specified in the Sections that specify those activities. Those requirements, including inspections and tests, cover production of standard products as well as customized fabrication and installation procedures.
   2. Inspections, testing and related actions specified are not intended to limit the Contractor's quality control procedures that facilitate compliance with Contract Document requirements.
   3. Requirements for the Contractor to provide quality control services required by the Architect, Owner, or authorities having jurisdiction are not limited by provisions of this Section.

### 1.03 RESPONSIBILITIES

A. Testing: The Owner will engage and pay a testing agency for all quality control testing. The Contractor will be responsible for coordination and scheduling of the required inspections. Costs of retesting, where initial test results prove unsatisfactory and do not indicate compliance with Contract Document requirements, will be paid by the Contractor.

B. Retesting: The Contractor is responsible for retesting where results of required inspections, tests or similar services prove unsatisfactory and do not indicate compliance with Contract Document requirements, regardless of whether the original test was the Contractor's responsibility.
   1. Cost of retesting construction revised or replaced by the Contractor is the Contractor's responsibility, where required tests were performed on original construction.

C. Associated Services: The Contractor shall cooperate with all authorized agencies performing inspections, tests and similar services and provide reasonable auxiliary services as requested. Notify the agency sufficiently in advance of operations to permit assignment of personnel. Auxiliary services required include but are not limited to:
   1. Providing access to the Work and furnishing incidental labor and facilities necessary to facilitate inspections and tests.
   2. Taking adequate quantities of representative samples of materials that require testing or assisting the agency in taking samples.
   3. Providing facilities for storage and curing of test samples, and delivery of samples to testing laboratories.
   4. Providing the agency with a preliminary design mix proposed for use for materials mixes that require control by the testing agency.
   5. Security and protection of samples and test equipment at the Project site.

D. Duties of the Testing Agency: The independent testing agency engaged to perform inspections, sampling and testing of materials and construction specified in individual Specification Sections shall cooperate with the Architect and Contractor in performance of its duties, and shall provide qualified personnel to perform required inspections and tests.
   1. The agency shall notify the Architect and Contractor promptly of irregularities or deficiencies observed in the Work during performance of its services.
   2. The agency is not authorized to release, revoke, alter or enlarge requirements of the Contract Documents, or approve or accept any portion of the Work.
   3. The agency shall not perform any duties of the Contractor.

E. Coordination: The Contractor and each agency engaged to perform inspections, tests and similar services shall coordinate the sequence of activities to accommodate required services with a minimum of delay. In addition the Contractor and each agency shall coordinate activities to avoid the necessity of removing and replacing construction to accommodate inspections and tests.
   1. The Contractor is responsible for scheduling times for all inspections, tests, taking samples and similar activities.

**1.04 SUBMITTALS**

A. The independent testing agency shall submit a certified written report of each inspection, test or similar service, to the Architect, in duplicate, unless the Contractor is responsible for the service. If the Contractor is responsible for the service, submit a certified written report of each inspection, test or similar service through the Contractor, in duplicate.
   1. Submit additional copies of each written report directly to the governing authority, when the authority so directs.
   2. Report Data: Written reports of each inspection, test or similar service shall include, but not be limited to:
      a. Date of issue.
      b. Project title and number.
      c. Name, address and telephone number of testing agency.
      d. Dates and locations of samples and tests or inspections.
      e. Names of individuals making the inspection or test.
      f. Designation of the Work and test method.
      g. Identification of product and Specification Section.
      h. Complete inspection or test data.
      i. Test results and an interpretations of test results.
      j. Ambient conditions at the time of sample-taking and testing.
      k. Comments or professional opinion as to whether inspected or tested Work complies with Contract Document requirements.
      l. Name and signature of laboratory inspector.
      m. Indicate that the test passed or failed.
      n. If appropriate, indicate that test is a retest.
      o. Names of contractor and architect advised of failing tests.
      p. Recommendations on retesting.

**1.05 QUALITY ASSURANCE**

A. Qualification for Service Agencies: Engage inspection and testing service agencies, including independent testing laboratories, which are prequalified as complying with "Recommended Requirements for Independent Laboratory Qualification" by the American Council of Independent Laboratories, and which specialize in the types of inspections and tests to be performed.
   1. Each independent inspection and testing agency engaged on the Project shall be authorized by authorities having jurisdiction to operate in the State in which the Project is located.

**PART 2 - PRODUCTS (NOT APPLICABLE).**

**PART 3 - EXECUTION**

**3.01 REPAIR AND PROTECTION**

A. General: Upon completion of inspection, testing, sample-taking and similar services, repair damaged construction and restore substrates and finishes to eliminate deficiencies, including deficiencies in visual qualities of exposed finishes. Comply with Contract Document requirements for "Cutting and Patching."

B. Protect construction exposed by or for quality control service activities, and protect repaired construction.

C. Repair and protection is the Contractor's responsibility, regardless of the assignment of responsibility for inspection, testing or similar services.

**END OF SECTION 01400**

**SECTION 015000**
**TEMPORARY FACILITIES**

## PART 1 - GENERAL

### 1.01 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division-1 Specification Sections, apply to this Section.

### 1.02 SUMMARY

A. This Section specifies requirements for temporary services and facilities, including utilities, construction and support facilities, security and protection.

B. Temporary utilities required include but are not limited to:
   1. Water service and distribution.
   2. Temporary electric power and light.
   3. Telephone service.

C. Temporary construction and support facilities required include but are not limited to:
   1. Temporary heat.
   2. Field offices and storage sheds.
   3. Temporary roads and paving.
   4. Sanitary facilities, including drinking water.
   5. Temporary enclosures.
   6. Temporary signs and bulletin boards.
   7. Waste disposal services.
   8. Construction aids and miscellaneous services and facilities.

D. Security and protection facilities required include but are not limited to:
   1. Temporary fire protection.
   2. Barricades, warning signs, lights.
   3. Environmental protection.

### 1.03 QUALITY ASSURANCE

A. Regulations: Comply with industry standards and applicable laws and regulations if authorities having jurisdiction, including but not limited to:
   1. Building Code requirements.
   2. Health and safety regulations.
   3. Utility company regulations.
   4. Police, Fire Department and Rescue Squad rules.
   5. Environmental protection regulations.

B. Standards: Comply with NFPA Code 241, "Building Construction and Demolition Operations", ANSI-A10 Series standards for "Safety Requirements for Construction and Demolition", and NECA Electrical Design Library "Temporary Electrical Facilities."
   1. Refer to "Guidelines for Bid Conditions for Temporary Job Utilities and Services", prepared jointly by AGC and ASC, for industry recommendations.
   2. Electrical Service: Comply with NEMA, NECA and UL standards and regulations for temporary electric service. Install service in compliance with National Electric Code (NFPA 70).

C. Inspections: Arrange for authorities having jurisdiction to inspect and test each temporary utility before use. Obtain required certifications and permits.

### 1.04 PROJECT CONDITIONS

A. Temporary Utilities: Prepare a schedule indicating dates for implementation and termination of each temporary utility. At the earliest feasible time, when acceptable to the Owner, change over from use of temporary service to use of the permanent service.

B. Conditions of Use: Keep temporary services and facilities clean and neat in appearance. Operate in a safe and efficient manner. Take necessary fire prevention measures. Do not overload facilities, or permit them to interfere with progress. Do not allow hazardous dangerous or unsanitary conditions, or public nuisances to develop or persist on the site.

## PART 2 - PRODUCTS

### 2.01 EQUIPMENT

A. General: Provide new equipment; if acceptable to the Architect, undamaged, previously used equipment in serviceable condition may be used. Provide equipment suitable for use intended.

B. Water Hoses: Provide 3/4" heavy-duty, abrasion-resistant, flexible rubber hoses 100 ft. long, with pressure rating greater than the maximum pressure of the water distribution system; provide adjustable shut-off nozzles at hose discharge.

C. Electrical Outlets: Provide properly configured NEMA polarized outlets to prevent insertion of 110-120 volt plugs into higher voltage outlets. Provide receptacle outlets equipped with groundfault circuit interrupters, reset button and pilot light, for connection of power tools and equipment.

D. Electrical Power Cords: Provide grounded extension cords; use "hard-service" cords where exposed to abrasion and traffic. Provide waterproof connectors to connect separate lengths of electric cords, if single lengths will not reach areas where construction activities are in progress.

E. Lamps and Light Fixtures: Provide general service incandescent lamps of wattage required for adequate illumination. Provide guard cages or tempered glass enclosures, where exposed to breakage. Provide exterior fixtures where exposed to moisture.

F. Heating Units: Provide temporary heating units that have been tested and labeled by UL, FM or another recognized trade association related to the type of fuel being consumed.

G. Temporary Offices: Provide prefabricated or mobile units or similar job-built construction with lockable entrances, operable windows and serviceable finishes. Provide heated and air-conditioned units on foundations adequate for normal loading.

H. Temporary Toilet Units: Provide self-contained single-occupant toilet units of the chemical, aerated recirculation, or combustion type, properly vented and fully enclosed with a glass fiber reinforced polyester shell or similar nonabsorbent material.

I. First Aid Supplies: Comply with governing regulations.

J. Fire Extinguishers: Provide hand-carried, portable UL-rated, class "A" fire extinguishers for temporary offices and similar spaces. In other locations provide hand-carried, portable, UL-rated, class "ABC" dry chemical extinguishers, or a combination of extinguishers of NFPA recommended classes for the exposures.

1. Comply with NFPA 10 and 241 for classification, extinguishing agent and size required by location and class of fire exposure.

## PART 3 - EXECUTION

### 3.01 INSTALLATION

A. Use qualified personnel for installation of temporary facilities. Locate facilities where they will serve the Project adequately and result in minimum interference with performance of the Work. Relocate and modify facilities as required.

B. Provide each facility ready for use when needed to avoid delay. Maintain and modify as required. Do not remove until facilities are no longer needed, or are replaced by authorized use of completed permanent facilities.

### 3.02 TEMPORARY UTILITY INSTALLATION

A. General: Engage the appropriate local utility company to install temporary service or connect to existing service. Where the company provides only part of the service, provide the remainder with matching, compatible materials and equipment; comply with the company's recommendations.

1. Arrange with the company and existing users for a time when service can be interrupted, where necessary, to make connections for temporary services.
2. Provide adequate capacity at each stage of construction. Prior to temporary utility availability, provide trucked-in services.
3. Obtain easements to bring temporary utilities to the site, where the Owner's easements cannot be used for that purpose.
4. Use Charges: Cost or use charges for temporary facilities are not chargeable to the Owner or Architect, and will not be accepted as a basis of claims for a Change Order.

B. Water Service: Install water service and distribution piping of sizes and pressures adequate for construction until permanent water service is in use.
   1. Sterilization: Sterilize temporary water piping prior to use.

C. Temporary Electric Power Service: Provide weatherproof, grounded electric power service and distribution system of sufficient size, capacity, and power characteristics during construction period. Include meters, transformers, overload protected disconnects, automatic ground-fault interrupters and main distribution switch gear.
   1. Power Distribution System: Install wiring overhead, and rise vertically where least exposed to damage. Where permitted, wiring circuits not exceeding 125 Volts, AC 20 ampere rating, and lighting circuits may be nonmetallic sheathed cable where overhead and exposed for surveillance.

D. Temporary Lighting: Whenever overhead floor or roof deck has been installed, provide temporary lighting with local switching.
   1. Install and operate temporary lighting that will fulfill security and protection requirements, without operating the entire system, and will provide adequate illumination for construction operations and traffic conditions.

E. Temporary Telephones: Provide temporary telephone service for all personnel engaged in construction activities, throughout the construction period. Install telephone on a separate line for each temporary office and first aid station.
   1. At each telephone, post a list of important telephone numbers.

F. Sewers and Drainage: If sewers are available, provide temporary connections to remove effluent that can be discharged lawfully. If sewers are not available or cannot be used, provide drainage ditches, dry wells, stabilization ponds and similar facilities. If neither sewers nor drainage facilities can be lawfully used for discharge of effluent, provide containers to remove and dispose of effluent off the site in a lawful manner.
   1. Maintain temporary sewers and drainage facilities in a clean, sanitary condition. Following heavy use, restore normal conditions promptly.

G. Provide earthen embankments and similar barriers in and around excavations and subgrade construction, sufficient to prevent flooding by runoff of storm water from heavy rains.

**3.03 TEMPORARY CONSTRUCTION AND SUPPORT FACILITIES INSTALLATION**

A. Locate field offices, storage sheds, sanitary facilities and other temporary construction and support facilities for easy access.
   1. Maintain temporary construction and support facilities until near Substantial Completion. Remove prior to Substantial Completion. Personnel remaining after Substantial Completion will be permitted to use permanent facilities, under conditions acceptable to the Owner.

B. Temporary Heat: Provide temporary heat required by construction activities, for curing or drying of completed installations or protection of installed construction from adverse effects of low temperatures or high humidity. Select safe equipment that will not have a harmful effect on completed installations or elements being installed. Coordinate ventilation requirements to produce the ambient condition required and minimize consumption of energy.
   1. Use of gasoline-burning space heaters, open flame, or salamander type heating units is prohibited.

C. Field Offices: Provide insulated, weathertight temporary offices of sufficient size to accommodate contractor's office personnel at the Project site, and similar separate office for architect and owner's representative. Keep the office clean and orderly for use for small progress meetings. Furnish and equip offices as follows:
   1. Contractor's offices: Furnish suitably with not less than a desk and chairs, a 4-drawer file cabinet, plan table and plan rack and a 6-shelf bookcase.

D. Storage and Fabrication Sheds: Install storage and fabrication sheds, sized, furnished and equipped to accommodate materials and equipment involved, including temporary utility service. Sheds may be open shelters or fully enclosed spaces within the building or elsewhere on the site.

E. Temporary Paving: Construct and maintain temporary roads and paving to adequately support the indicated loading and to withstand exposure to traffic during the construction period. Locate temporary paving for roads, storage areas and parking where the same permanent facilities will be located.

F. Sanitary facilities include temporary toilets, wash facilities and drinking water fixtures. Comply with regulations and health codes for the type, number, location, operation and maintenance of fixtures and facilities. Install where facilities will best serve the Project's needs.
   1. Provide toilet tissue, paper towels, paper cups and similar disposable materials for each facility. Provide covered waste containers for used material.

G. Toilets: Install self-contained toilet units. Shield toilets to ensure privacy. Use of pit-type privies will not be permitted.

H. Drinking Water Facilities: Provide containerized tap-dispenser bottled-water type drinking water units, including paper supply.

I. Temporary Enclosures: Provide temporary enclosure for protection of construction in progress and completed, from exposure, foul weather, other construction operations and similar activities.
   1. Where heat is needed and the permanent building enclosure is not complete, provide temporary enclosures where there is no other provision for containment of heat. Coordinate enclosure with ventilating and material drying or curing requirements to avoid dangerous conditions and effects.
   2. Install tarpaulins securely, with incombustible wood framing and other materials. Close openings of 25 square feet or less with plywood or similar materials.
   3. Close openings through floor or roof decks and horizontal surfaces with load-bearing wood-framed construction.

J. Project Identification Sign: Furnished by Owner--NIC.

K. Temporary Signs: Prepare signs to provide directional information to construction personnel and visitors.

L. Collection and Disposal of Waste: Collect waste from construction areas and elsewhere daily. Comply with requirements of NFPA 241 for removal of combustible waste material and debris. Enforce requirements strictly. Do not hold materials more than 7 days during normal weather or 3 days when the temperature is expected to rise above 80 deg F (27 deg C). Handle hazardous, dangerous, or unsanitary waste materials separately from other waste by containerizing properly. Dispose of material in a lawful manner.

**3.04 SECURITY AND PROTECTION FACILITIES INSTALLATION**

A. Temporary Fire Protection: Until fire protection needs are supplied by permanent facilities, install and maintain temporary fire protection facilities of the types needed to protect against reasonably predictable and controllable fire losses. Comply with NFPA 10 "Standard for Portable Fire Extinguishers," and NFPA 241 "Standard for Safeguarding Construction, Alterations and Demolition Operations."
   1. Locate fire extinguishers where convenient and effective for their intended purpose, but not less than one extinguisher on each floor at or near each usable stairwell.

2. Store combustible materials in containers in fire-safe locations.
3. Maintain unobstructed access to fire extinguishers, fire hydrants, temporary fire protection facilities, stairways and other access routes for fighting fires. Prohibit smoking in hazardous fire exposure areas.
4. Provide supervision of welding operations, combustion type temporary heating units, and similar sources of fire ignition.

B. Barricades, Warning Signs and Lights: Comply with standards and code requirements for erection of structurally adequate barricades. Paint with appropriate colors, graphics and warning signs to inform personnel and the public of the hazard being protected against. Where appropriate and needed provide lighting, including flashing red or amber lights.

C. Security Enclosure and Lockup: Install substantial temporary enclosure of partially completed areas of construction. Provide locking entrances to prevent unauthorized entrance, vandalism, theft and similar violations of security.
1. Storage: Where materials and equipment must be stored, and are of value or attractive for theft, provide a secure lockup. Enforce discipline in connection with the installation and release of material to minimize the opportunity for theft and vandalism.

D. Security Fencing: As soon as possible after commencement of the Work, install chain link fencing (specified in Section 02830) around the entire perimeter of the site to serve as security fencing during the construction period. Provide temporary gates at entrances to the site to be replaced by permanent gates as specified at completion of the work.

E. Environmental Protection: Provide protection, operate temporary facilities and conduct construction in ways and by methods that comply with environmental regulations, and minimize the possibility that air, waterways and subsoil might be contaminated or polluted, or that other undesirable effects might result.

F. Restrict use of noise making tools and equipment to hours that will minimize complaints from persons or firms near the site.

**3.05 OPERATION, TERMINATION AND REMOVAL**

A. Supervision: Enforce strict discipline in use of temporary facilities. Limit availability of temporary facilities to essential and intended uses to minimize waste and abuse.

B. Maintenance: Maintain facilities in good operating condition until removal. Protect from damage by freezing temperatures and similar elements.
1. Maintain operation of temporary enclosures, heating, cooling, humidity control, ventilation and similar facilities on a 24-hour day basis where required to achieve indicated results and to avoid possibility of damage.

C. Protection: Prevent water filled piping from freezing. Maintain markers for underground lines. Protect from damage during excavation operations.

D. Termination and Removal: Unless the Architect requests that it be maintained longer, remove each temporary facility when the need has ended, or when replaced by authorized use of a permanent facility, or no later than Substantial Completion. Complete or, if necessary, restore permanent construction that may have been delayed because of interference with the temporary facility. Repair damaged Work, clean exposed surfaces and replace construction that cannot be satisfactorily repaired.

E. Remove temporary paving that is not intended for or acceptable for integration into permanent paving. Where the area is intended for landscape development, remove soil and aggregate fill that does not comply with requirements for fill or subsoil in the area. Remove materials contaminated with road oil, asphalt and other petrochemical compounds, and other substances which might impair growth of plant materials or lawns.

F. Repair or replace street paving, curbs and sidewalks at the temporary entrances, as required by the governing authority.

G. At Substantial Completion, clean and renovate permanent facilities that have been used during the construction period, including but not limited to:

1. Replace air filters and clean inside of ductwork and housings.
2. Replace significantly worn parts and parts that have been subject to unusual operating conditions.
3. Replace lamps that are burned out or noticeably dimmed by substantial hours of use.

**END OF SECTION 01500**

**SECTION 015100**
**FIELD ENGINEERING**

## PART 1 - GENERAL

### 1.01 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division-1 Specification Sections, apply to this Section.

### 1.02 SUMMARY

A. General: This Section specifies administrative and procedural requirements for field engineering services, including, but not necessarily limited to, the following:
   1. Land survey work.
   2. Underground systems certification.

### 1.03 SUBMITTALS

A. Certificates: Submit a certificate signed by the Land Surveyor or Professional Engineer certifying that the location and elevation of improvements comply with the Contract Documents.

B. Final Property Survey: Submit three (4) copies and one (1) CAD disk of both the final property survey and the certification of underground systems, signed and sealed by Land Surveyor.

C. Project Record Documents: Submit a record of Work performed and record survey data as required under provisions of Sections "Submittals" and "Project Closeout".

### 1.04 QUALITY ASSURANCE

A. Surveyor: Engage a Land Surveyor or Professional Engineer experienced and specializing in land survey work, who is registered in the State of Florida, to perform land surveying services specified in this section.

## PART 2 - PRODUCTS (NOT APPLICABLE)

## PART 3 - EXECUTION

### 3.01 EXAMINATION

A. Verify layout information shown on the Drawings, in relation to the property survey and existing benchmarks before proceeding to layout the Work. Locate and protect existing benchmarks and control points. Preserve permanent reference points during construction.
   1. Do not change or relocate benchmarks or control points without prior written approval. Promptly report lost or destroyed reference points, or requirements to relocate reference points because of necessary changes in grades or locations.
   2. Promptly replace lost or destroyed project control points. Base replacements on the original survey control points.

B. Establish and maintain a minimum of two permanent benchmarks on the site, referenced to data established by survey control points.
   1. Record benchmark locations, with horizontal and vertical data, on Project Record Documents.

C. Existing utilities and equipment: The existence and location of underground and other utilities and construction indicated as existing are not guaranteed. Before beginning sitework, investigate and verify the existence and location of underground utilities and other construction.
   1. Prior to construction, verify the location and invert elevation at points of connection of sanitary sewer, storm sewer and water service piping.

### 3.02 PERFORMANCE

A. Working from lines and levels established by the property survey, establish benchmarks and markers to set lines and levels at each story of construction and elsewhere as needed to properly locate each element of the Project. Calculate and measure required dimensions within indicated or recognized tolerances. Do not scale Drawings to determine dimensions.

1. Advise entities engaged in construction activities, of marked lines and levels provided for their use.
2. As construction proceeds, check every major element for line, level and plumb.

B. Surveyor's Log: Maintain a surveyor's log of control and other survey Work. Make this log available for reference.
1. Record deviations from required lines and levels, and advise the Architect when deviations that exceed indicated or recognized tolerances are detected. On Project Record Drawings, record deviations that are accepted and not corrected.
2. On completion of foundation walls, major site improvements, and other Work requiring field engineering services, prepare a certified survey showing dimensions, locations, angles and elevations of construction and sitework.

C. Site Improvements: Locate and lay out site improvements, including pavements, stakes for grading, fill and topsoil placement, utility slopes and invert elevations by instrumentation and similar appropriate means.

D. Building Lines and Levels: Locate and lay out batter boards for structures, building foundations, column grids and locations, floor levels and control lines and levels required for mechanical and electrical Work.

E. Final Property Survey: Before Substantial Completion, prepare a final property survey showing significant features (real property) for the Project. Include on the survey a certification, signed by the Surveyor, to the effect that principal metes, bounds, lines and levels of the Project are accurately positioned as shown on the survey.

F. Certification of Underground Systems: In addition to the Final Property Survey, the surveyor must certify to the as-built locations and elevations of all underground systems as specified in individual sections of Divisions 2 through 16.

**END OF SECTION 01050**

**SECTION 016000**
**PRODUCT REQUIREMENTS**

## PART 1 GENERAL

### 1.01 SECTION INCLUDES

A. Transportation, handling, storage and protection.

B. Product option requirements.

C. Substitution limitations and procedures.

### 1.02 RELATED SECTIONS

A. Document 00 2113 - Instructions to Bidders: Product options and substitution procedures prior to bid date.

B. Section 01 4000 - Quality Requirements: Product quality monitoring.

### 1.03 REFERENCES

A. NFPA 70 - National Electrical Code; National Fire Protection Association; 2005.

### 1.04 SUBMITTALS

A. Product Data Submittals: Submit manufacturer's standard published data. Mark each copy to identify applicable products, models, options, and other data. Supplement manufacturers' standard data to provide information specific to this Project.

B. Shop Drawing Submittals: Prepared specifically for this Project; indicate utility and electrical characteristics, utility connection requirements, and location of utility outlets for service for functional equipment and appliances.

C. Sample Submittals: Illustrate functional and aesthetic characteristics of the product, with integral parts and attachment devices. Coordinate sample submittals for interfacing work.
   1. For selection from standard finishes, submit samples of the full range of the manufacturer's standard colors, textures, and patterns.

## PART 2 PRODUCTS

### 2.01 NEW PRODUCTS

A. Provide new products unless specifically required or permitted by the Contract Documents.

B. Do not use products having any of the following characteristics:
   1. Made, using or containing CFC's or using HCFC's in the manufacturing process.
   2. Made of wood from newly cut old growth timber.

C. Where all other criteria are met, General Contractor shall give preference to products that:
   1. Are extracted, harvested, and/or manufactured closer to the location of the project.
   2. Have longer documented life span under normal use.
   3. Result in less construction waste.
   4. Are made of vegetable materials that are rapidly renewable.

D. Provide interchangeable components of the same manufacture for components being replaced.

E. Wiring Terminations: Provide terminal lugs to match branch circuit conductor quantities, sizes, and materials indicated. Size terminal lugs to NFPA 70, include lugs for terminal box.

F. Cord and Plug: Provide minimum 6 foot cord and plug including grounding connector for connection to electric wiring system. Cord of longer length is specified in individual specification sections.

### 2.02 PRODUCT OPTIONS

A. Products Specified by Reference Standards or by Description Only: Use any product meeting those standards or description.

B. Products Specified by Naming One or More Manufacturers: Use a product of one of the manufacturers named and meeting specifications, no options or substitutions allowed.

C. Products Specified by Naming One or More Manufacturers with a Provision for Substitutions: Submit a request for substitution for any manufacturer not named.

## PART 3 EXECUTION

### 3.01 SUBSTITUTION PROCEDURES

A. Instructions to Bidders specify time restrictions for submitting requests for substitutions during the bidding period. Comply with requirements specified in this section.

B. Hall & Ogle Architects, Inc. will consider requests for substitutions only within 30 days after date of Agreement.

C. Substitutions may be considered when a product becomes unavailable through no fault of the contractor.

D. Document each request with complete data substantiating compliance of proposed substitution with Contract Documents.

E. A request for substitution constitutes a representation that the submitter:
   1. Has investigated proposed product and determined that it meets or exceeds the quality level of the specified product.
   2. Will provide the same warranty, at minimum, for the substitution as for the specified product.
   3. Will coordinate installation and make changes to other Work which may be required for the Work to be complete with no additional cost to City of Port Orange.
   4. Waives claims for additional costs or time extension which may subsequently become apparent.
   5. Will reimburse City of Port Orange and Hall & Ogle Architects, Inc. for review or redesign services associated with re-approval by authorities.
   6. Will allow cost savings associated with substitution to reduce Contract Sum.

F. Substitutions will not be considered when they are indicated or implied on shop drawing or product data submittals, without separate written request, or when acceptance will require revision to the Contract Documents.

G. Substitution Submittal Procedure:
   1. Submit four copies of request for substitution for consideration. Limit each request to one proposed substitution.
   2. Submit shop drawings, product data, and certified test results attesting to the proposed product equivalence. Burden of proof is on proposer.
   3. Hall & Ogle Architects, Inc. will notify General Contractor in writing of decision to accept or reject request.

### 3.02 TRANSPORTATION AND HANDLING

A. Coordinate schedule of product delivery to designated prepared areas in order to minimize site storage time and potential damage to stored materials.

B. Transport and handle products in accordance with manufacturer's instructions.

C. Transport materials in covered trucks to prevent contamination of product and littering of surrounding areas.

D. Promptly inspect shipments to ensure that products comply with requirements, quantities are correct, and products are undamaged.

E. Provide equipment and personnel to handle products by methods to prevent soiling, disfigurement, or damage.

F. Arrange for the return of packing materials, such as wood pallets, where economically feasible.

### 3.03 STORAGE AND PROTECTION

A. Designate receiving/storage areas for incoming products so that they are delivered according to installation schedule and placed convenient to work area in order to minimize waste due to excessive materials handling and misapplication.

B. Store and protect products in accordance with manufacturers' instructions.

C. Store sensitive products in weather tight, climate controlled, enclosures in an environment favorable to product.

D. For exterior storage of fabricated products, place on sloped supports above ground.

E. Provide bonded off-site storage and protection when site does not permit on-site storage or protection.

F. Cover products subject to deterioration with impervious sheet covering. Provide ventilation to prevent condensation and degradation of products.

G. Store loose granular materials on solid flat surfaces in a well-drained area. Prevent mixing with foreign matter.

H. Provide equipment and personnel to store products by methods to prevent soiling, disfigurement, or damage.

I. Arrange storage of products to permit access for inspection. Periodically inspect to verify products are undamaged and are maintained in acceptable condition.

**END OF SECTION**

**SECTION 016100**
**SUBMITTALS**

## PART 1 - GENERAL

### 1.01 RELATED DOCUMENTS

A. Drawings and general provisions of Contract, including General and Supplementary Conditions and other Division-1 Specification Sections, apply to this Section.

### 1.02 SUMMARY

A. This Section specifies administrative and procedural requirements for submittals required for performance of the Work including;
   1. Contractor's construction schedule
   2. Submittal schedule
   3. Product Data
   4. Daily construction reports
   5. Shop Drawings
   6. Samples

B. Administrative Submittals: Refer to other Division-1 Sections and other Contract Documents for requirements for administrative submittals. Such submittals include, but are not limited to:
   1. Permits
   2. Performance and payment bonds
   3. List of Subcontractors
   4. The Schedule of Values submittal is included in Section "Applications for Payment"
   5. Inspection and test reports are included in Section "Quality Control Services"
   6. Applications for Payment
   7. Insurance certificates

### 1.03 SUBMITTAL PROCEDURES

A. Coordination: Coordinate preparation and processing of submittals with performance of construction activities. Transmit each submittal sufficiently in advance of performance of related construction activities to avoid delay.
   1. Coordinate each submittal with fabrication, purchasing, testing, delivery, other submittals and related activities that require sequential activity.
   2. Coordinate transmittal of different types of submittals for related elements of the Work so processing will not be delayed by the need to review submittals concurrently for coordination.
      a. The Architect reserves the right to withhold action on a submittal requiring coordination with other submittals until related submittals are received.
   3. Processing: Allow sufficient review time so that installation will not be delayed as a result of the time required to process submittals, including time for resubmittals.
      a. Allow two weeks for initial review. Allow additional time if processing must be delayed to permit coordination with subsequent submittals. The Architect will promptly advise the Contractor when a submittal being processed must be delayed for coordination.
      b. If an intermediate submittal is necessary, process the same as the initial submittal.
      c. Allow two weeks for reprocessing each submittal.
      d. No extension of Contract Time will be authorized because of failure to transmit submittals to the Architect sufficiently in advance of the Work to permit processing.

B. Submittal Preparation: Place a permanent label or title block on each submittal for identification. Indicate the name of the entity that prepared each submittal on the label or title block.
   1. Provide a space approximately 4" x 5" on the label or beside the title block on Shop Drawings to record the Contractor's review and approval markings and the action taken.

2. Include the following information on the label for processing and recording action taken.
    a. Project name.
    b. Date.
    c. Name and address of Architect.
    d. Name and address of Contractor.
    e. Name and address of subcontractor.
    f. Name and address of supplier.
    g. Name of manufacturer.
    h. Number and title of appropriate Specification Section.
    i. Drawing number and detail references, as appropriate.

C. Submittal Transmittal: Package each submittal appropriately for transmittal and handling. Transmit each submittal from Contractor to Architect using a transmittal form. Submittals received from sources other than the Contractor will be returned without action.
    1. On the transmittal, record relevant information and requests for data. On the form, or separate sheet, record deviations from Contract Document requirements, including minor variations and limitations. Include Contractor's certification that information complies with Contract Document requirements. Submittals without Contractor Certification of compliance will be returned without review.
    2. Transmittal Form: Use AIA Document G 810.

**1.04 CONTRACTOR'S CONSTRUCTION SCHEDULE**

A. Bar-Chart Schedule: Prepare a fully developed, horizontal bar-chart type Contractor's construction schedule. Submit within 7 days of the date established for "Commencement of the Work".
    1. Provide a separate time bar for each significant construction activity. Provide a continuous vertical line to identify the first working day of each week. Use the same breakdown of units of the Work as indicated in the "Schedule of Values".
    2. Within each time bar indicate estimated completion percentage in 10 percent increments. As Work progresses, place a contrasting mark in each bar to indicate Actual Completion.
    3. Prepare the schedule on a sheet, or series of sheets, of stable transparency, or other reproducible media, of sufficient width to show data for the entire construction period.
    4. Secure time commitments for performing critical elements of the Work from parties involved. Coordinate each element on the schedule with other construction activities; include minor elements involved in the sequence of the Work. Show each activity in proper sequence. Indicate graphically sequences necessary for completion of related portions of the Work.
    5. Coordinate the Contractor's construction schedule with the schedule of values, list of subcontracts, submittal schedule, progress reports, payment requests and other schedules.
    6. Indicate completion in advance of the date established for Substantial Completion. Indicate Substantial Completion on the schedule to allow time for the Architect's procedures necessary for certification of Substantial Completion.

B. Distribution: Following response to the initial submittal, print and distribute copies to the Architect, Owner, subcontractors, and other parties required to comply with scheduled dates. Post copies in the Project meeting room and temporary field office.
    1. When revisions are made, distribute to the same parties and post in the same locations. Delete parties from distribution when they have completed their assigned portion of the Work and are no longer involved in construction activities.

C. Schedule Updating: Revise the schedule after each meeting or activity, where revisions have been recognized or made. Issue the updated schedule concurrently with report of each meeting.

## 1.05 SUBMITTAL SCHEDULE

A. After development and acceptance of the Contractor's construction schedule, prepare a complete schedule of submittals. Submit the schedule within 10 days of the date required for establishment of the Contractor's construction schedule.
   1. Coordinate submittal schedule with the list of subcontracts, schedule of values and the list of products as well as the Contractor's construction schedule.
   2. Prepare the schedule in chronological order; include submittals required during the first 90 days of construction. Provide the following information:
      a. Scheduled date for the first submittal.
      b. Related Section number.
      c. Submittal category.
      d. Name of subcontractor.
      e. Description of the part of the Work covered.
      f. Scheduled date for resubmittal.
      g. Scheduled date the Architect's final release or approval.

B. Distribution: Following response to initial submittal, print and distribute copies to the Architect, Owner, subcontractors, and other parties required to comply with submittal dates indicated. Post copies in the Project meeting room and field office.
   1. When revisions are made, distribute to the same parties and post in the same locations. Delete parties from distribution when they have completed their assigned portion of the Work and are no longer involved in construction activities.

C. Schedule Updating: Revise the schedule after each meeting or activity, where revisions have been recognized or made. Issue the updated schedule concurrently with report of each meeting.

## 1.06 DAILY CONSTRUCTION REPORTS

A. Prepare a daily construction report, recording the following information concerning events at the site:
   1. List of subcontractors at the site.
   2. Approximate count of personnel at the site.
   3. High and low temperatures, general weather conditions.
   4. Accidents and unusual events.
   5. Meetings and significant decisions.
   6. Stoppages, delays, shortages, losses.
   7. Meter readings and similar recordings.
   8. Emergency procedures.
   9. Orders and requests of governing authorities.
   10. Change Orders received, implemented.
   11. Services connected, disconnected.
   12. Equipment or system tests and start-ups.
   13. Partial Completions, occupancies.
   14. Substantial Completions authorized.

## 1.07 SHOP DRAWINGS

A. Submit newly prepared information, drawn to accurate scale. Highlight, encircle, or otherwise indicate deviations from the Contract Documents. Do not reproduce Contract Documents or copy standard information as the basis of Shop Drawings. Standard information prepared without specific reference to the Project is not considered Shop Drawings.
   1. Sheet Size: Except for templates, patterns and similar full-size Drawings, submit Shop Drawings on sheets at least 8-1/2" x 11" but no larger than 24" x 36".

B. Shop Drawings include fabrication and installation drawings, setting diagrams, schedules, patterns, templates and similar drawings. Include the following information:
   1. Dimensions.

2. Identification of products and materials included.
3. Compliance with specified standards.
4. Notation of coordination requirements.
5. Notation of dimensions established by field measurement.

C. Submittal: Submit a minimum of 6 sets of blue- or black-line prints. Three prints will be retained; the remainder will be returned. Submit additional copies as required for contractor's use.
1. Maintain one of the marked-up prints returned, as a "Record Document".
2. Do not use Shop Drawings without an appropriate final stamp indicating action taken in connection with construction.
3. Only Final reviewed shop drawings which have been reviewed by the Architect and the design Structural Engineer shall be used for fabrication and the field installation of products or assemblies of products. Modification of reviewed shop drawings by the manufacturer or fabricator for “Field Use” is prohibited unless proposed modifications have been reviewed by the Architect.

D. Coordination drawings are a special type of Shop Drawing that show the relationship and integration of different construction elements that require careful coordination during fabrication or installation to fit in the space provided or function as intended.
1. Preparation of coordination Drawings is specified in section "Project Coordination" and may include components previously shown in detail on Shop Drawings or Product Data.
2. Submit coordination Drawings for integration of different construction elements. Show sequences and relationships of separate components to avoid conflicts in use of space.

**1.08 PRODUCT DATA**

A. Collect Product Data into a single submittal for each element of construction or system. Product Data includes printed information such as manufacturer's installation instructions, catalog cuts, standard color charts, roughing-in diagrams and templates, standard wiring diagrams and performance curves. Where Product Data must be specially prepared because standard printed data is not suitable for use, submit as "Shop Drawings."
1. Mark each copy to show applicable choices and options. Where printed Product Data includes information on several products, some of which are not required, mark copies to indicate the applicable information. Include the following information:
a. Manufacturer's printed recommendations.
b. Compliance with recognized trade association standards.
c. Compliance with recognized testing agency standards.
d. Application of testing agency labels and seals.
e. Notation of dimensions verified by field measurement.
f. Notation of coordination requirements.

B. Do not submit Product Data until compliance with requirements of the Contract Documents has been confirmed.

C. Submittals: Submit 3 copies of each required submittal; submit 4 copies where required for maintenance manuals. The Architect will retain two, and will return the other marked with action taken and corrections or modifications required.
1. Unless noncompliance with Contract Document provisions is observed, the submittal may serve as the final submittal.

D. Distribution: Furnish copies of final submittal to installers, subcontractors, suppliers, manufacturers, fabricators, and others required for performance of construction activities. Show distribution on transmittal forms.
1. Do not proceed with installation until an applicable copy of Product Data applicable is in the installer's possession.
2. Do not permit use of unmarked copies of Product Data in connection with construction.

## 1.09 SAMPLES

A. Submit full-size, fully fabricated Samples cured and finished as specified and physically identical with the material or product proposed. Samples include partial sections of manufactured or fabricated components, cuts or containers of materials, color range sets, and swatches showing color, texture and pattern.
   1. Mount, display, or package Samples in the manner specified to facilitate review of qualities indicated. Prepare Samples to match the Architect's Sample. Include the following:
      a. Generic description of the Sample.
      b. Sample source.
      c. Product name or name of manufacturer.
      d. Compliance with recognized standards.
      e. Availability and delivery time.

B. Submit Samples for review of kind, color, pattern, and texture, for a final check of these characteristics with other elements, and for a comparison of these characteristics between the final submittal and the actual component as delivered and installed.
   1. Where variation in color, pattern, texture or other characteristics are inherent in the material or product represented, submit multiple units (not less than 3), that show approximate limits of the variations.
   2. Refer to other Specification Sections for requirements for Samples that illustrate workmanship, fabrication techniques, details of assembly, connections, operation and similar construction characteristics.

C. Preliminary submittals: Where Samples are for selection of color, pattern, texture or similar characteristics from a range of standard choices, submit a full set of choices for the material or product.
   1. Preliminary submittals will be reviewed and returned with the Architect's mark indicating selection and other action.

D. Submittals: Except for Samples illustrating assembly details, workmanship, fabrication techniques, connections, operation and similar characteristics, submit 2 sets; one will be returned marked with the action taken.

E. Maintain sets of Samples, as returned, at the Project site, for quality comparisons throughout the course of construction.
   1. Unless noncompliance with Contract Document provisions is observed, the submittal may serve as the final submittal.
   2. Sample sets may be used to obtain final acceptance of the construction associated with each set.

F. Distribution of Samples: Prepare and distribute additional sets to subcontractors, manufacturers, fabricators, suppliers, installers, and others as required for performance of the Work. Show distribution on transmittal forms.

G. Field Samples specified in individual Sections are special types of Samples. Field Samples are full-size examples erected on site to illustrate finishes, coatings, or finish materials and to establish the standard by which the Work will be judged.
   1. Comply with submittal requirements to the fullest extent possible. Process transmittal forms to provide a record of activity.

## 1.10 ARCHITECT'S ACTION

A. Except for submittals for record, information or similar purposes, where action and return is required or requested, the Architect will review each submittal, mark to indicate action taken, and return promptly.
   1. Compliance with specified characteristics is the Contractor's responsibility.

B. Action Stamp: The Architect will stamp each submittal with a uniform, self-explanatory action stamp. The stamp will be appropriately marked, as follows, to indicate the action taken:

1. Final Unrestricted Release: Where submittals are marked "Reviewed," that part of the Work covered by the submittal may proceed provided it complies with requirements of the Contract Documents; final acceptance will depend upon that compliance.
2. Final-But-Restricted Release: When submittals are marked "Furnish as Corrected," that part of the Work covered by the submittal may proceed provided it complies with notations or corrections on the submittal and requirements of the Contract Documents; final acceptance will depend on that compliance.
3. Returned for Resubmittal: When submittal is marked "Rejected or Revise and Resubmit," do not proceed with that part of the Work covered by the submittal, including purchasing, fabrication, delivery, or other activity. Revise or prepare a new submittal in accordance with the notations; resubmit without delay. Repeat if necessary to obtain a different action mark.
    a. Do not permit submittals marked "Rejected or Revise and Resubmit" to be used at the Project site, or elsewhere where Work is in progress.
4. Other Action: Where a submittal is primarily for information or record purposes, special processing or other activity, the submittal will be returned, marked "Review Not Required". Where a submittal is marked also "Submit Specified Item", further submittal information is required.

**PART 2 - PRODUCTS (NOT APPLICABLE).**

**PART 3 - EXECUTION (NOT APPLICABLE).**

**END OF SECTION 01300**

**SECTION 017000**
**PROJECT CLOSEOUT**

## PART 1 - GENERAL

### 1.01 RELATED DOCUMENTS

A. Drawings and general provisions of Contract, including General and Supplementary Conditions and other Division-1 Specification Sections, apply to this Section.

### 1.02 SUMMARY

A. This Section specifies administrative and procedural requirements for project closeout, including but not limited to:
   1. Inspection procedures.
   2. Project record document submittal.
   3. Operating and maintenance manual submittal.
   4. Submittal of warranties.
   5. Final cleaning.
   6. Closeout requirements for specific construction activities are included in the appropriate Sections in Divisions-2 through -16.

### 1.03 SUBSTANTIAL COMPLETION

A. Preliminary Procedures: Before requesting inspection for certification of Substantial Completion, complete the following. List exceptions in the request.
   1. In the Application for Payment that coincides with, or first follows, the date Substantial Completion is claimed, show 100 percent completion for the portion of the Work claimed as substantially complete. Include supporting documentation for completion as indicated in these Contract Documents and a statement showing an accounting of changes to the Contract Sum.
      a. If 100 percent completion cannot be shown, include a list of incomplete items, the value of incomplete construction, and reasons the Work is not complete.
   2. Advise Owner of pending insurance change-over requirements.
   3. Submit specific warranties, workmanship bonds, maintenance agreements, final certifications and similar documents.
   4. Obtain and submit releases enabling the Owner unrestricted use of the Work and access to services and utilities; include occupancy permits, operating certificates and similar releases.
   5. Submit record drawings, maintenance manuals, final project photographs, damage or settlement survey, property survey, and similar final record information.
   6. Deliver tools, spare parts, extra stock, and similar items.
   7. Make final change-over of permanent locks and transmit keys to the Owner. Advise the Owner's personnel of change-over in security provisions.
   8. Complete start-up testing of systems, and instruction of the Owner's operating and maintenance personnel. Discontinue or change over and remove temporary facilities from the site, along with construction tools, mock-ups, and similar elements.
   9. Complete final clean up requirements, including touch-up painting. Touch-up and otherwise repair and restore marred exposed finishes.

B. Inspection Procedures: On receipt of a request for inspection, the Architect will either proceed with inspection or advise the Contractor of unfilled requirements. The Architect will prepare the Certificate of Substantial Completion following inspection, or advise the Contractor of construction that must be completed or corrected before the certificate will be issued.
   1. The Architect will repeat inspection when requested and assured that the Work has been substantially completed.
   2. Results of the completed inspection will form the basis of requirements for final acceptance.

C. Occupancy Inspection:

1. The Architect, contractor and owner's representative, will conduct an inspection of the work to be occupied. Upon approval, the owner may occupy that portion of the work. The contractor shall cooperate, and participate in this inspection.

**1.04 FINAL ACCEPTANCE**

A. Preliminary Procedures: Before requesting final inspection for certification of final acceptance and final payment, complete the following. List exceptions in the request.
   1. Submit the final payment request with releases and supporting documentation not previously submitted and accepted. Include certificates of insurance for products and completed operations where required.
   2. Submit an updated final statement, accounting for final additional changes to the Contract Sum.
   3. Submit a certified copy of the Architect's final inspection list of items to be completed or corrected, stating that each item has been completed or otherwise resolved for acceptance, and the list has been endorsed and dated by the Architect.
   4. Submit consent of surety to final payment.
   5. Submit a final liquidated damages settlement statement.
   6. Submit evidence of final, continuing insurance coverage complying with insurance requirements.

B. Reinspection Procedure: The Architect will reinspect the Work upon receipt of notice that the Work, including inspection list items from earlier inspections, has been completed, except items whose completion has been delayed because of circumstances acceptable to the Architect.
   1. Upon completion of reinspection, the Architect will prepare a certificate of final acceptance, or advise the Contractor of Work that is incomplete or of obligations that have not been fulfilled but are required for final acceptance.
   2. If necessary, reinspection will be repeated.

**1.05 RECORD DOCUMENT SUBMITTALS**

A. General: Do not use record documents for construction purposes; protect from deterioration and loss in a secure, fire-resistive location; provide access to record documents for the Architect's reference during normal working hours.

B. Record Drawings (As-built Plans): Maintain a clean, undamaged set of blue or black line white-prints of Contract Drawings and Shop Drawings. Mark the set to show the actual installation where the installation varies substantially from the Work as originally shown. Mark whichever drawing is most capable of showing conditions fully and accurately; where Shop Drawings are used, record a cross-reference at the corresponding location on the Contract Drawings. Give particular attention to concealed elements that would be difficult to measure and record at a later date.
   1. Mark record sets with red erasable pencil; use other colors to distinguish between variations in separate categories of the Work.
   2. Mark new information that is important to the Owner, but was not shown on Contract Drawings or Shop Drawings.
   3. Note related Addenda, Field Order and Change Order numbers where applicable.
   4. The Contractor shall employ a Drafting Service at or near completion of the project for conversion of the marked-up As-built plans to CAD drawings compatible with Architect’s/Owner's CAD capabilities. Coordinate with Architect to verify compatibility and obtain electronic copy of drawing documents.
   5. The document changes shall be kept up-to-date and will be reviewed by the Architect/Engineer at the monthly progress meetings. Monthly progress payments will not be approved until changes to "as-built" drawings are current.

C. The Contractor shall record all changes made in the field as a “hard copy” set, and shall forward both the completed electronic and “hard-copy” versions of "as-built" Construction Record documents to the Architect's office for the Owner's records. Also reference and include

the final property survey and certification of underground systems as required by Section 01050.

D. Record Specifications: Maintain one complete copy of the Project Manual, including addenda, and one copy of other written construction documents such as Change Orders and modifications issued in printed form during construction. Mark these documents to show substantial variations in actual Work performed in comparison with the text of the Specifications and modifications. Give particular attention to substitutions, selection of options and similar information on elements that are concealed or cannot otherwise be readily discerned later by direct observation. Note related record drawing information and Product Data.
   1. Upon completion of the Work, submit record Specifications to the Architect for the Owner's records.

E. Maintenance Manuals: Organize operating and maintenance data into suitable sets of manageable size. Bind properly indexed data in individual heavy-duty 2-inch, 3-ring vinyl-covered binders, with pocket folders for folded sheet information. Mark appropriate identification on front and spine of each binder. Include the following types of information:
   1. Emergency instructions.
   2. Spare parts list.
   3. Copies of warranties.
   4. Wiring diagrams.
   5. Recommended "turn around" cycles.
   6. Inspection procedures.
   7. Shop Drawings and Product Data.
   8. Fixture lamping schedule.
   9. Submit three (3) sets of all maintenance manuals.

**PART 2 - PRODUCTS (NOT APPLICABLE)**

**PART 3 - EXECUTION**

**3.01 CLOSEOUT PROCEDURES**

A. Operating and Maintenance Instructions: Arrange for each installer of equipment that requires regular maintenance to meet with the Owner's personnel to provide instruction in proper operation and maintenance. If installers are not experienced in procedures, provide instruction by manufacturer's representatives. Include a detailed review of the following items:
   1. Maintenance manuals.
   2. Record documents.
   3. Spare parts and materials.
   4. Tools.
   5. Lubricants.
   6. Fuels.
   7. Identification systems.
   8. Control sequences.
   9. Hazards.
   10. Cleaning.
   11. Warranties and bonds.
   12. Maintenance agreements and similar continuing commitments.

B. As part of instruction for operating equipment, demonstrate the following procedures:
   1. Start-up.
   2. Shutdown.
   3. Emergency operations.
   4. Noise and vibration adjustments.
   5. Safety procedures.
   6. Economy and efficiency adjustments.
   7. Effective energy utilization.

C. Submit three (3) sets of all closeout documents (Maintenance Manuals, Warranties, and other similar documents).

**3.02 FINAL CLEANING**

A. General: General cleaning during construction is required by the General Conditions and included in Section "Temporary Facilities".

B. Cleaning: Employ experienced workers or professional cleaners for final cleaning. Clean each surface or unit to the condition expected in a normal, commercial building cleaning and maintenance program. Comply with manufacturer's instructions.

1. Complete the following cleaning operations before requesting inspection for Certification of Substantial Completion.
    a. Remove labels that are not permanent labels.
    b. Clean transparent materials, including mirrors and glass in doors and windows. Remove glazing compound and other substances that are noticeable vision-obscuring materials. Replace chipped or broken glass and other damaged transparent materials.
    c. Clean exposed exterior and interior hard-surfaced finishes to a dust-free condition, free of stains, films and similar foreign substances. Restore reflective surfaces to their original reflective condition. Leave concrete floors broom clean. Vacuum carpeted surfaces.
    d. Wipe surfaces of mechanical and electrical equipment. Remove excess lubrication and other substances. Clean plumbing fixtures to a sanitary condition. Clean light fixtures and lamps.
    e. Clean the site, including landscape development areas, of rubbish, litter and other foreign substances. Sweep paved areas broom clean; remove stains, spills and other foreign deposits. Rake grounds that are neither paved nor planted, to a smooth even-textured surface.
2. Removal of Protection: Remove temporary protection and facilities installed for protection of the Work during construction.
3. Compliance: Comply with regulations of authorities having jurisdiction and safety standards for cleaning. Do not burn waste materials. Do not bury debris or excess materials on the Owner's property. Do not discharge volatile, harmful or dangerous materials into drainage systems. Remove waste materials from the site and dispose of in a lawful manner.
    a. Where extra materials of value remaining after completion of associated Work have become the Owner's property, arrange for disposition of these materials as directed.

**END OF SECTION 01700**

**SECTION 072100**
**BUILDING INSULATION**

## PART 1 GENERAL

### 1.01 SECTION INCLUDES

A. Batt insulation for above ceiling where indicated.

### 1.02 REFERENCE STANDARDS

A. ASTM C1289 - Standard Specification for Faced Rigid Cellular Polyisocyanurate Thermal Insulation Board; 2014.

B. ASTM E136 - Standard Test Method for Behavior of Materials in a Vertical Tube Furnace At 750 Degrees C; 2012.

### 1.03 SUBMITTALS

A. See Section 013000 - Administrative Requirements, for submittal procedures.

B. Product Data: Provide data on product characteristics, performance criteria, and product limitations.

C. Manufacturer's Installation Instructions: Include information on special environmental conditions required for installation and installation techniques.

D. Manufacturer's Certificate: Certify that products meet or exceed specified requirements.

### 1.04 FIELD CONDITIONS

A. Do not install insulation adhesives when temperature or weather conditions are detrimental to successful installation.

## PART 2 PRODUCTS

### 2.01 BATT INSULATION MATERIALS

A. Batt Insulation: ASTM C 665; preformed batt; friction fit, conforming to the following:
   1. Material: Glass or mineral fiber.
   2. Flame Spread Index: 25 or less, when tested in accordance with ASTM E84.
   3. Smoke Developed Index: 450 or less, when tested in accordance with ASTM E84.
   4. Combustibility: Non-combustible, when tested in accordance with ASTM E136, except for facing, if any.
   5. Formaldehyde Content: Zero.
   6. Thermal Resistance: R of 19.
   7. Thickness: 4 inch. (See Plan)
   8. Facing: Unfaced.
   9. Manufacturers:
      a. CertainTeed Corporation: www.certainteed.com/#sle.
      b. Johns Manville Corporation: www.jm.com/#sle.
      c. Owens Corning Corp: www.owenscorning.com.

## PART 3 EXECUTION

### 3.01 EXAMINATION

A. Verify that substrate, adjacent materials, and insulation materials are dry and that substrates are ready to receive insulation and adhesive.

B. Verify substrate surfaces are flat, free of honeycomb, fins, irregularities, or materials or substances that may impede adhesive bond.

### 3.02 BATT INSTALLATION

A. Install insulation in accordance with manufacturer's instructions.

B. Install in exterior wall and roof spaces without gaps or voids. Do not compress insulation.

C. Trim insulation neatly to fit spaces. Insulate miscellaneous gaps and voids.

D. Fit insulation tightly in cavities and tightly to exterior side of mechanical and electrical services within the plane of the insulation.

**3.03 PROTECTION**

A. Do not permit installed insulation to be damaged prior to its concealment.

**END OF SECTION**

**SECTION 072510**
**FLUID-APPLIED WEATHER BARRIER**

## PART 1 - GENERAL

### 1.01 RELATED DOCUMENTS

A. All of the Contract Documents, including General and Supplementary Conditions and Division 01 General Requirements, apply to the work of this section.

### 1.02 SUMMARY

A. The work of this section includes, but is not limited to, the following:
   1. Materials and installation methods for fluid applied air and vapor barrier membrane system located in the non-accessible part of the wall.
   2. Materials and installation methods to bridge and seal air leakage pathways in roof and foundation junctions, window and door openings, control and expansion joints, masonry ties, piping and other penetrations through the wall assembly.

B. Related Sections: Other specification sections that directly relate to the works of this section include, but are not limited to, the following:
   1. Section 076200 - Flashing and Sheet Metal
   2. Section 079010 - Joint Sealants

### 1.03 PERFORMANCE REQUIREMENTS

A. Provide an air and vapor barrier system to perform as a continuous barrier to air infiltration/exfiltration and water vapor transmission and to act as a liquid water drainage plane flashed to discharge any incidental condensation or water penetration.

### 1.04 REFERENCES

A. The following standards and publications are applicable to the extent referenced in the text. The most recent version of these standards is implied unless otherwise stated.
   1. American Society for Testing and Materials (ASTM)
      a. C 836Standard Specification for High Solids, Cold Liquid-Applied Elastomeric Waterproofing Membrane for Use with Separate Wearing Course
      b. D 412Standard Test Methods for Rubber Properties in Tension
      c. D 903Standard Test Method for Peel or Stripping Strength of Adhesive Bonds
      d. D 1644Test Methods for Non-volatile Content of Varnishes
      e. D 1970Standard Specification for Self-Adhering Polymer Modified Bituminous Sheet Materials Used as Steep Roofing Underlayment for Ice Dam Protection
      f. D 4541Standard Test Method for Pull-Off Strength of Coatings Using Portable Adhesion Testers
      g. D 3767Standard Practice for Rubber - Measurements of Dimensions
      h. E 96Test Methods for Water Vapor Transmission of Materials
      i. E 283Standard Test Method for Determining the Rate of Air Leakage Through Exterior Windows, Curtain Walls, and Doors Under Specified Pressure Differences Across the Specimen
      j. E 2178Standard Test Method for Air Permeance of Building Materials
      k. E2357Standard Test Method for Determining Air Leakage of Air Barrier Assemblies

### 1.05 SUBMITTALS

A. Product Data: Submit manufacturer's product data, installation instructions, use limitations and substrate preparation recommendations.

B. Shop drawings showing locations and extent of air and vapor barrier system including details for terminations flashings, penetrations, window and door openings and treatment of substrate joints and cracks.

C. Written documentation demonstrating installers qualifications under the "Quality Assurance" article including reference projects of a similar scope.

D. Samples: Submit representative samples of the following for approval:
   1. Fluid applied air barrier membrane
   2. Transition Membrane
   3. Through Wall Flashing

E. Warranty: Submit a sample warranty identifying the terms and conditions stated in Section 1.09.

**1.06 QUALITY ASSURANCE**

A. Manufacturer: Air and vapor barrier systems shall be manufactured and marketed by a firm with a minimum of 20 years experience in the production and sales of waterproofing and air barrier products. Manufacturers proposed for use, but not named in these specifications shall submit evidence of ability to meet all requirements specified, and include a list of projects of similar design and complexity completed within the past five years.

B. Installer: The installer shall demonstrate qualifications to perform the work of this Section by submitting the following:
   1. List of at least three (3) projects contracted within the past five (5) years of similar scope and complexity to this project carried out by the firm and site supervisor.
   2. Installer must show evidence of adequate equipment and trained field personnel to successfully complete the project in a timely manner.

C. Materials: Fluid applied air and vapor barrier material shall be two part synthetic rubber based systems free of solvents, isocyanates and bitumen. For each type of material required for the work of this section, provide primary materials that are the products of one manufacturer.

D. Pre-Installation Conference: A pre-installation conference shall be held prior to commencement of field operations to establish procedures to maintain optimum working conditions and to coordinate this work with related and adjacent work. Agenda for meeting shall include but not be limited to the following:
   1. Review of submittals.
   2. Review of surface preparation, minimum curing period and installation procedures.
   3. Review of special details and flashings.
   4. Sequence of construction, responsibilities and schedule for subsequent operations.
   5. Review of mock-up requirements.
   6. Review of inspection, testing, protection and repair procedures.

E. Mock-up:
   1. Prior to installation of the air and vapor barrier system a field-constructed mock-up shall be provided under the provisions of Section [01340 - Shop Drawings, Product Data, Samples and Mock-ups] to verify details and tie-ins and to demonstrate the required quality of materials and installation.
   2. Construct a typical exterior wall section, 8 feet long and 8 feet wide, incorporating back-up wall, cladding, window and doorframe and sill, insulation, flashing and any other critical junction (roof, foundation, etc).
   3. Allow 24 hours for inspection and testing of mock-up before proceeding with air and vapor barrier work.
   4. Mock-up may remain as part of the work.

F. Inspection and Testing: Cooperate and coordinate with the Owner's inspection and testing agency. Do not cover any installed air and vapor barrier membrane until it has been inspected, tested and approved.

**1.07 DELIVERY, STORAGE AND HANDLING**

A. Deliver materials and products in labeled packages. Store and handle in strict compliance with manufacturer's instructions, recommendations and material safety data sheets. Protect from damage from sunlight, weather, excessive temperatures and construction operations. Remove damaged material from the site and dispose of in accordance with applicable regulations.

B. Do not double-stack pallets of fluid applied membrane components on the job site. Provide cover on top and all sides, allowing for adequate ventilation.

C. Protect fluid-applied membrane components from freezing and extreme heat.

D. Sequence deliveries to avoid delays, but minimize on-site storage.

**1.08 PROJECT CONDITIONS**

A. Perform work only when existing and forecasted weather conditions are within the limits established by the manufacturer of the materials used. Proceed with installation only when the substrate construction and preparation work is complete and in condition to receive the air and vapor barrier membrane.

**1.09 WARRANTY**

A. Submit manufacturer's warranty that air and vapor barrier and accessories are free of defects at time of delivery and are manufactured to meet manufacturer's published physical properties and material specifications.

**PART 2 PRODUCTS**

**2.01 GENERAL**

A. For each type of material required for the work of this section, provide primary materials that are the products of one manufacturer.

**2.02 FLUID APPLIED MEMBRANES**

A. Description: a two part, self-curing, synthetic rubber based material free of solvents, isocyanates and bitumen

B. Performance Requirements:

| Property | Test Method | Typical Value |
|---|---|---|
| Color | | Green |
| Cured Film Thickness | ASTM D 3767 Method A | 1.5 mm (0.060 in.) nominal |
| Solids Content | ASTM D 1644 | 100% |
| Air Permeance at 75Pa (0.3 in. water) Differential Pressure | ASTM E 2178 | <0.001 L/(s.m2) (,0.0002 cfm/ft2) |
| Assembly Air Permeance at 75Pa (0.3 in. water) Differential Pressure | ASTM E 2357 | <0.004 L/s.m2 (,0.0008 cfm/ft2) |
| Water Vapor Permeance | ASTM E 96, Method BW | Less than 4.6 ng/Pa.s.m2 (0.08 Perms) |
| Pull Adhesion to Concrete Block (CMU) | ASTM D 4541-02 | 0.24 N/mm2 (35 psi) |
| Pull Adhesion to Glass Faced Wall Board | ASTM D 4541-02 | 0.12 N/mm2 (18 psi) |
| Pull Adhesion to Concrete | ASTM D 903 | 880 N/m (5 lb./in.) |
| Elongation | ASTM D 412 | 500% minimum |
| Pliability, 180 Bend over 25 mm (1 in.) Mandrel at -30 C (-23 F) | ASTM D 1970 | Unaffected |
| Low Temperature Flexibility and Crack Bridging 3.2mm (1/8in.) crack cycling at 26 C (-15 | ASTM C 836 | Pass |

| | | |
|---|---|---|
| F) | | |
| Extensibility over 6.4mm (1/4in.) crack after heat aging | ASTM C 836 | Pass |

**2.03 ACCEPTABLE MATERIALS:**

A. Perm-A-Barrier ® Liquid from Grace Construction Products, 62 Whittemore Avenue, Cambridge, MA.
   1. Tremco ExoAir 120
   2. Poly Wall AirLok Flex
   3. StoGuard Vapor Seal
   4. BASF Enershield-I

**2.04 TRANSITION MEMBRANE**

A. Description: 0.9 mm (36 mils) of self-adhesive rubberized asphalt integrally bonded to 0.1 mm (4 mil) of cross-laminated, high-density polyethylene film to provide a min. 0.1 mm (40 mil) thick membrane. Membrane shall be interleaved with disposable silicone-coated release paper until installed.

B. Performance Requirements:
   1. Water Vapor Transmission: ASTM E 96, Method B: 2.9 ng/m2sPa (0.05 perms) max.
   2. Air Permeance at 75Pa (0.3 in. water) pressure difference: 0.0006 L/(s.m2) (0.00012 cfm/ft2) max.
   3. Puncture Resistance: ASTM E 154: 178 N (40 lbs.) min.
   4. Lap Adhesion at -4°C (25°F), ASTM D 1876: 880 N/m (5.0 lbs./in.) of width min.
   5. Low Temperature Flexibility, ASTM D 1970: Unaffected to -43°C (-45°F).
   6. Tensile Strength, ASTM D 412, Die C Modified: min. 2.7 MPa (400 psi)
   7. Elongation, Ultimate Failure of Rubberized Asphalt, ASTM D 412 Die C: min. 200%

**2.05 FLEXIBLE MEMBRANE WALL FLASHING**

A. Description: 0.8 mm (32 mils) of self-adhesive rubberized asphalt integrally bonded to 0.2 mm (8 mil) of cross-laminated, high-density polyethylene film to provide a min. 1.0 mm (40 mil) thick membrane. Membrane shall be interleaved with disposable silicone-coated release paper until installed.

B. Performance Requirements:
   1. Water Vapor Transmission, ASTM E 96, Method B: 2.9 ng/m2sPa (0.05 perms) max.
   2. Water Absorption, ASTM D 570: max. 0.1% by weight
   3. Puncture Resistance, ASTM E 154: 356 N (80 lbs.) min.
   4. Tear Resistance
   5. a. Initiation ASTM D 1004: min. 58 N (13.0 lbs.) M.D.
   6. b. Propagation ASTM D 1938: min. 40 N (9.0 lbs.) M.D.
   7. Lap Adhesion at -4ºC (25ºF), ASTM D 1876: 880 N/m (5.0 lbs./in.) of width
   8. Low Temperature Flexibility, ASTM D 1970: Unaffected to -43ºC (-45ºF)
   9. Tensile Strength, ASTM D 412, Die C Modified: min. 5.5 MPa (800 psi)
   10. Elongation, Ultimate Failure of Rubberized Asphalt, ASTM D412, Die C: min. 200%
   11. Acceptable Materials:
      a. Perm-A-Barrier Wall Flashing manufactured by Grace Construction Products.
      b. Tremco ExoAir TWF

**2.06 AIR & VAPOR BARRIER ACCESSORIES**

A. Description: Water-based primer which imparts an aggressive, high tack finish on the treated substrate
   1. Flash Point: No flash to boiling point
   2. Solvent Type: Water
   3. VOC Content: Not to exceed 10 g/l

4. Product: Perm-A-Barrier WB Primer manufactured by Grace Construction Products or Tremco ExoAir Primers
5. Description: Two part, elastomeric, trowel grade material designed for use with self-adhered membranes and tapes. 10 g/l max. VOC Content.
6. Product: Bituthene® Liquid Membrane manufactured by Grace Construction Products.
7. Optional Primers:
    a. Description: High tack water based primer. 10 g/l max. VOC content.
        1) Product: Perm-A-Barrier Liquid Part B manufactured by Grace Construction Products.
    b. Description: High tack low VOC solvent based primer. <200 g/l max. VOC content.
        1) Product: Bituthene Primer B2 LVC manufactured by Grace Construction Products.
    c. Description: High tack solvent based primer. 440 g/l max. VOC content.
        1) Product: Bituthene Primer B2 manufactured by Grace Construction Products.

## PART 3 EXECUTION

### 3.01 EXAMINATION

A. The installer shall examine conditions of substrates and other conditions under which this work is to be performed and notify the contractor, in writing, of circumstances detrimental to the proper completion of the work. Do not proceed with work until unsatisfactory conditions are corrected.

### 3.02 PREPARATION

A. Refer to manufacturer's literature for requirements for preparation of substrates. Surfaces shall be sound and free of voids, spalled areas, loose aggregate and sharp protrusions. Remove contaminants such as grease, oil and wax from exposed surfaces. Remove dust, dirt, loose stone and debris. Use repair materials and methods that are acceptable to manufacturer of the fluid-applied waterproofing.

B. Exterior sheathing panels: Ensure that the boards are sufficiently stabilized with corners and edges fastened with appropriate screws. Pre-treat all board joints with 50 - 75mm (2-3 in.) wide, reinforced self-adhesive tape or fiberglass mesh style wallboard tape. Gaps greater than 6mm (1/4 in.) should be filled with mastic or caulk, allowing sufficient time to fully cure before application of the tape and fluid applied membrane.

C. Masonry Substrates: Apply air and vapor barrier over concrete block and brick with smooth flush mortar joints. Fill all voids and holes, particularly in the mortar joints, with a lean mortar mix, non-shrinking grout or parge coat.

D. Related Materials: Treat construction joints and install flashing as recommended by manufacturer.

### 3.03 INSTALLATION

A. Refer to manufacturer's literature for recommendations on installation

B. Application of Fluid Applied Membrane
    1. Spray or trowel apply a continuous uniform film at min. 60 mils (1.5 mm or .060 in.) dry film thickness using multiple, overlapping passes.
    2. When spraying use a cross-hatching technique (alternating horizontal and vertical passes) to ensure even thickness and coverage.
    3. When spraying use high pressure, multi-component, airless spray equipment approved by material manufacturer.
    4. Carry membrane into any openings a minimum of 50mm (2 in.).
    5. Seal all brick-ties and other penetrations as work progresses.

C. Application of Transition Membrane

1. After allowing the Fluid Applied Membrane to cure to tack-free, apply transition membrane with a minimum overlap of 75mm (3 in.) onto each surface at all beams, columns and joints as indicated in detail drawings.
2. Tie in to window and door frames, spandrel panels, roof and floor intersections and changes in substrate.
3. Use pre-cut, easily handled lengths for each location.
4. Remove silicone-coated release paper and position membrane flashing carefully before placing it against the surface.
5. When properly positioned, place against surface by pressing firmly into place by hand roller.
6. Overlap adjacent pieces 50 mm ( 2 in.) and roll all seams with a hand roller.
7. Seal top edge of flashing with termination mastic.
8. When transition flashing is pre-installed prior to application of Fluid Applied Membrane, apply transition flashing as above. Spray or trowel a continuous uniform film of Fluid Membrane at min. 60 mils (1.5 mm or .060 in.) dry film thickness using multiple, overlapping passes, with a minimum overlap of 75 mm (3 in.) onto transition flashing. For sill condition, spray or trowel Fluid Membrane onto pre-installed sill flashing and onto horizontal section of sill.

D. Application of Flexible Membrane Wall Flashing
1. Precut pieces of flashing to easily handled lengths for each location.
2. Remove silicone-coated release paper and position flashing carefully before placing it against the surface.
3. When properly positioned, place against surface by pressing firmly into place by hand roller. Fully adhere flashing to substrate to prevent water from migrating under flashing.
4. Overlap adjacent pieces 50 mm (2 in.) and roll all seams with a hand roller.
5. Trim bottom edge 13 mm (1/2 in.) back from exposed face of the wall. Flashing shall not be permanently exposed to sunlight.
6. At heads, sills and all flashing terminations, turn up ends a minimum of 50 mm (2 in.) and make careful folds to form an end dam, with the seams sealed.
7. Seal top edge of flashing with termination mastic.
8. Do not allow the rubberized asphalt surface of the flashing membrane to come in contact with poly-sulfide sealants, creosote, uncured coal tar products or EPDM.

**3.04 PROTECTION AND CLEANING**

A. Remove any masking materials after installation. Clean any stains on materials that would be exposed in the completed work using procedures as recommended by manufacturer.

B. Perm-A-Barrier Liquid is not suitable for permanent exposure and should be protected from the effects of sunlight.

C. Schedule work to ensure that the Perm-A-Barrier Liquid system is covered as soon as possible after installation. Protect Perm-A-Barrier Liquid system from damage during subsequent operations. If the Perm-A-Barrier Liquid system cannot be covered within 60 days after installation, apply temporary UV protection such as dark plastic sheet or tarpaulins.

**END OF SECTION**

**SECTION 074100**
**PREFORMED METAL STANDING SEAM ROOFING**

## PART 1 - GENERAL

### 1.01 DESCRIPTION OF WORK

A. This section covers the pre-finished, pre-fabricated Architectural standing seam roof system. All metal trim, accessories, fasteners, insulation and sealants indicated on the drawings as part of this section.

B. Drawings and general provisions of the Contract, including general and Supplementary Conditions and Division 01 Specifications, apply to this section.

### 1.02 SUMMARY

A. Section Includes
   1. Factory formed Standing Seam metal roof panels

B. Related work specified elsewhere.
   1. Section 076000 - Flashing and Sheet Metal

### 1.03 DEFINITIONS

A. Metal Roof Panel Assembly: Metal roof panels, attachment system components, miscellaneous metal framing, thermal, and accessories necessary for a complete weathertight roofing system.

B. References:
   1. American Society for Testing and Materials (ASTM)
      a. ASTM A 653: Steel Sheet, Zinc Coated by the Hot Dip Process
      b. ASTM A 792: Steel Sheet, Aluminum-Zinc Alloy Coated by the Hot Dip Process
      c. ASTM B 209: Aluminum and Aluminum Alloy Sheet and Plate
      d. ASTM B370 Standard Specification for Copper Sheet and Strip for Building Construction
   2. Sheet Metal and Air Conditioning Contractors National Association (SMACNA)
      a. SMACNA Architectural Sheet Metal Manual, 1993 edition
   3. American Iron and Steel Institute (AISI)
      a. AISI Cold Formed Steel Design Manual
   4. Aluminum Association
      a. Aluminum Design Manual
   5. Metal Construction Association
      a. Preformed metal Wall Guidelines
   6. Code References
      a. ASCE, Minimum Loads for Buildings and Other Structures
      b. BOCA National Building Codes
      c. UBC Uniform Building Code
      d. SBC Standard Building Code

### 1.04 QUALITY ASSURANCE

A. Petersen Aluminum Corp, Acworth, GA, 800-272-4482 products establish a minimum of quality required.

B. Manufacturer and erector shall demonstrate experience of a minimum of five (5) years in this type of project.

### 1.05 SUBSTITUTIONS

A. The material, products and equipment specified in this section establish a standard for required function, dimension, appearance and quality to be met by any proposed substitution.

## 1.06 SYSTEM DESCRIPTION

A. Material to comply with:
   1. ASTM B209 Standard Specification for Aluminum and Aluminum-Alloy Sheet and Plate

## 1.07 ROOF SYSTEM PERFORMANCE TESTING

A. General Performance: Metal roof panels shall comply with performance requirements without failure due to defective manufacture, fabrication, installation or other defects in construction.

B. Roof System shall be designed to meet Wind Load requirements as specified on the structural documents.

C. Provide current Florida Product Approval Number or local product approval as required by building department.

D. Panels to meet:
   1. Water Penetration: When tested per ASTM E-283/1680 and ASTM E-331/1646 there shall be no uncontrolled water penetration or air infiltration through the panel joints.
   2. Roof System shall be designed to meet a UL Class 90 wind uplift in accordance with UL standard 580 and panel system shall be ASTM 1592 Tested and approved
   3. UL 2218 - Impact Resistance rated

## 1.08 WARRANTIES

A. Weathertight warranty: Manufacturer's standard form in which manufacturer agrees to repair or replace standing seam metal roof panel assemblies that fail to remain weathertight, including leaks, within specified warranty period.
   1. Warranty Period: 20 Years from date of Substantial Completion

B. Finish warranty: Manufacturer's standard form in which manufacturer agrees to repair finish or replace standing seam metal roof panels that show evidence of deterioration of factory-applied finish within specified warranty period.
   1. Exposed Panels Finish - deterioration includes the following:
      a. Color fading more than 5 hunter units when tested according to ASTM D 2244
      b. Chalking in excess of a No. 8 rating when tested according to ASTM D 4214
      c. Cracking, checking, peeling or failure of a paint to adhere to a bare metal.
   2. Warranty Period: 20 Years from the date of substantial completion

C. Applicator shall furnish written warranty for a two (2) year period from date of substantial completion of building covering repairs required to maintain roof and flashings in watertight condition.

## 1.09 SUBMITTALS

A. Furnish detailed drawings showing profile and gauge of exterior sheets, location and type of fasteners, location, gauges, shape and method of attachment of all trim locations and types of sealants, and any other details as may be required for a weather-tight installation.

B. Provide finish samples of all colors specified.

C. Shop drawings: Show fabrication and installation layouts of metal roof panels, metal wall panels or metal soffit panels, details of edge conditions, side-seam joints, panel profiles, corners, anchorages, trim, flashings, closures and accessories, and special details. Distinguish between factory and field-assembled work

D. Coordination Drawings: Roof plans, drawn to scale, on which the following are shown and coordinated with each other, base don input from installer of the items involved:
   1. Roof panels and attachments
   2. Metal trusses, bracings and supports
   3. Roof-mounted items including snow guards and items mounted on roof curbs.

## 1.10 DELIVERY, STORAGE AND HANDLING

A. Ordering: Comply with manufacturer's ordering instruction and lead time requirements to avoid construction delays.

B. Deliver components, sheets, metal roof panels and other manufactured items so as not to be damaged or deformed. Package metal roof panels for protection during transportation and handling.

C. Unload, store and erect metal roof panels in a manner to prevent bending, warping, twisting and surface damage.

D. Stack metal roof panels on platforms or pallets, covered with suitable weathertight and ventilated covering. Store metal roof panels to ensure dryness. Do not store metal roof panels in contact with other materials that might cause staining, denting or other surface damage.

E. Protect strippable protective coating on any metal coated product from exposure to sunlight and high humidity, except to the extent necessary for material installation.

## 1.11 PROJECT CONDITIONS

A. Weather Limitations: proceed with installation only when existing and forecasted weather conditions permit metal roof panel work to be performed.

B. Field Measurements: Verify actual dimensions of construction contiguous with metal roof panels by field measurements before fabrication.

## 1.12 COORDINATION

A. Coordinate sizes and locations of roof curbs, equipment supports and roof penetrations with actual equipment provided.

B. Coordinate metal roof panels with rain drainage work, flashing, trim and construction of decks, parapet walls and other adjoining work to provide a leakproof, secure and noncorrosive installation.

# PART 2 - PRODUCTS

## 2.01 PANEL DESIGN

A. General: Provide factory-formed metal roof panels designed to be installed by lapping and interconnecting raised side edges of adjacent panels with joint type indicated and mechanically attaching panels to supports using concealed clips in side laps. Include clips, cleats, pressure plates and accessories required for a weathertight installation.

B. Roof panels shall be standing seam Tite-Loc Plus in 18" widths with 2" high seams that are mechanically seamed together @ 180 degrees.

C. Panels to be produced with Factory supplied hot melt mastic in the seams.

D. Panels to be produced Smooth - Factory Standard.

E. Panels to be designed for attachment with concealed fastener clips, spaced as required by the manufacturer to provide for both positive and negative design loads, while allowing for the expansion and contraction of the entire roof system resulting from variations in temperature.

F. Forming: Use continuous end rolling method. No end laps on panels.

## 2.02 ACCEPTABLE MANUFACTURERS

A. This project is detailed around the roofing product of Petersen Aluminum Corporation Petersen Aluminum Corp, Acworth, GA, 800-272-4482, Tite-Loc Plus.

B. Alternate Manufacturers:
   1. Merchant and Evans
   2. Bemo Usa
   3. Imetco

## 2.03 MATERIALS AND FINISHES

A. Preformed roofing panels shall be fabricated of .040 Aluminum

B. Color shall be as selected by Architect.

C. Finish shall be Kynar 500 or Hylar 5000 Fluorocarbon coating with a top side film thickness of 0.70 to 0.90 mil over a 0.25 to 0.3 mil prime coat to provide a total dry film thickness of 0.95 to 1.25 mil, to meet AAMA 621. Bottom side shall be coated with a primer with a dry film thickness of 0.25 mil. Finish shall conform to all tests for adhesions, flexibility and longevity as specified by Kynar 500 or Hylar 5000 finish supplier.

D. If Strippable coating to be applied on the pre-finished panels to the top side to protect the finish during fabrication, shipping and handling, film shall be removed before installation.

E. Trim: Trim shall be fabricated of the same material and finish to match the profile, and will be press broken in lengths of 10 to 12 feet. Trim shall be formed only by the manufacturer of their approved dealer. Trim to be erected in overlapped condition. Use lap strips only as indicated on drawings. Miter conditions shall be factory welded material to match the sheeting.

F. Closures: use composition or metal profiled closures at the top of each elevation to close ends of the panels. Metal closures to be made in the same material and finish as face sheet.

G. Fasteners: Fasteners shall be of type, material, size, corrosion resistance, holding power and other properties required to fasten miscellaneous framing members to substrates.

H. Substrate shall be Plywood

I. Roofing Underlayment
   1. On all surfaces to be covered with roofing material, furnish and install a 40 mil "Peel & Stick membrane", required as outlined by metal panel manufacturer. Membrane to be a minimum of 40 mil thickness, smooth, non-granular, by one of the following manufacturers:
      a. W.R Grace "Ice & water Shield"
      b. Cetco Strongseal
      c. Carlisle CCW WIP 300HT
      d. Interwrap Titanium PSU
      e. MFM Corp "Wind & Water Shield"
      f. Polyguard Deck Guard HT of Polyglas HT
      g. Tamko TW Tile and Metal Underlayment
   2. Underlayment shall be laid in horizontal layers with joints lapped toward the eaves a minimum of 6", and well secured along laps and at ends as necessary to properly hold the felt in place. All underlayment shall be preserved unbroken and whole.
   3. Ice and Water Shield shall lap all hips and ridges at least 12" to form double thickness and shall be lapped 6" over the metal of any valley or built-in gutters and shall be installed as required by the Standing Seam Panel Manufacturer to attain the desired 20 Year Weathertightness Warranty.

J. Sealants
   1. Provide two-part polysulfide class B non-sag type for vertical and horizontal joints or
   2. one part polysulfide not containing pitch or phenolic extenders or
   3. Exterior grade silicone sealant recommended by roofing manufacturer or
   4. One part non-sag, gun grade exterior type polyurethane recommended by the roofing manufacturer.

## 2.04 FABRICATION

A. Comply with dimensions, profile limitations, gauges and fabrication details shown and if not shown, provide manufacturer's standard product fabrication.

B. Fabricate components of the system in factory, ready for field assembly.

C. Fabricate components and assemble units to comply with fire performance requirements specified.

D. Apply specified finishes in conformance with manufacturer's standard, and according to manufacturer's instructions.

## PART 3 - EXECUTION

### 3.01 INSPECTION

A. Examine alignment of structural steel and related supports, primary and secondary roof framing, solid roof sheathing, prior to installation.

B. For the record, prepare written report, endorsed by installer, listing conditions detrimental to performance of the Work.

C. Proceed with installation only after unsatisfactory conditions have been corrected.

### 3.02 FASTENERS

A. Secure units to supports per FPA testing.

B. Place fasteners as indicated in manufacturer's standards and as required by testing.

### 3.03 INSTALLATION

A. Panels shall be installed plumb and true in a proper alignment and in relation to the structural framing. The erector must have at least five years successful experience with similar applications.

B. Install metal panels, fasteners, trim and related sealants in accordance with approved shop drawings and as may be required for a weather-tight installation.

C. Remove all strippable coating and provide a dry-wipe down cleaning of the panels as they are erected.

### 3.04 DAMAGED MATERIAL

A. Upon determination of responsibility, repair or replace damaged metal panels and trim to the satisfaction of the Architect and Owner.

**END OF SECTION**

**SECTION 074646**
**FIBER-CEMENT SIDING**

## PART 1 GENERAL

### 1.01 SECTION INCLUDES

A. Wood-fiber cement siding.

### 1.02 RELATED REQUIREMENTS

A. Section 072510 - Fluid Applied Weather Barrier: Weather resistant barrier on CMU wall.

B. Section 79000 - Joint Sealers.

C. Section 099000 - PAINTING: Field painting.

### 1.03 REFERENCE STANDARDS

A. ASTM C1186 - Standard Specification for Flat Fiber-Cement Sheets; 2022, with Editorial Revision (2023).

### 1.04 SUBMITTALS

A. See Section 013000 - Administrative Requirements, for submittal procedures.

B. Product Data: Manufacturer's data sheets on each product to be used, including:
   1. Manufacturer's requirements for related materials to be installed by others.
   2. Preparation instructions and recommendations.
   3. Storage and handling requirements and recommendations.
   4. Installation methods, including nail patterns.

C. Test Report: Applicable model code authority evaluation report (e.g. ICC-ES).

D. Maintenance Instructions: Periodic inspection recommendations and maintenance procedures.

E. Warranty: Submit copy of manufacturer’s warranty, made out in City of Port Orange’s name, showing that it has been registered with manufacturer.

### 1.05 QUALITY ASSURANCE

### 1.06 DELIVERY, STORAGE, AND HANDLING

## PART 2 PRODUCTS

### 2.01 SIDING

A. Lap Siding: Individual horizontal boards made of cement and cellulose fiber formed under high pressure with integral surface texture, complying with ASTM C1186 Type A Grade II; with machined edges, for nail attachment.
   1. Width (Height): 6-1/4 inches., 5" exposure.
   2. Finish: Unfinished.
   3. Warranty: 50 year limited; transferable.
   4. Lap Siding Manufacturers:
      a. CertainTeed Corporation : www.certainteed.com.
      b. James Hardie Building Products, Inc : www.jameshardie.com/#sle.
      c. Substitutions: See Section 016000 - Product Requirements.

### 2.02 ACCESSORIES

A. Trim: Same material and texture as siding.

B. Fasteners: Stainless Steel; length as required to penetrate minimum 1-1/4 inch.

C. Joint Sealer: As specified in Section 079005.

## PART 3 EXECUTION

### 3.01 PREPARATION

A. Examine substrate and clean and repair as required to eliminate conditions that would be detrimental to proper installation.

B. Verify that weather barrier has been installed over substrate completely and correctly.

C. Do not begin until unacceptable conditions have been corrected.

D. If substrate preparation is the responsibility of another installer, notify Hall & Ogle Architects, Inc. of unsatisfactory preparation before proceeding.

### 3.02 PREPARATION

A. Install sheet metal flashing:
   1. Above door and window trim and casings.

### 3.03 INSTALLATION

A. Install in accordance with manufacturer's instructions and recommendations.
   1. Read warranty and comply with all terms necessary to maintain warranty coverage.
   2. Install in accordance with conditions stated in model code evaluation report applicable to location of project.
   3. Use trim details indicated on drawings.
   4. Touch up all field cut edges before installing.
   5. Pre-drill nail holes if necessary to prevent breakage.

B. Over Wood and Wood-Composite Sheathing: Fasten siding through sheathing into studs.

C. Allow space between both ends of siding panels that butt against trim for thermal movement; seal joint between panel and trim with exterior grade sealant.

D. Joints in Horizontal Siding: Avoid joints in lap siding except at corners; where joints are inevitable stagger joints between successive courses.

E. Do not install siding less than 6 inches from surface of ground nor closer than 1 inch to roofs, patios, porches, and other surfaces where water may collect.

F. After installation, seal all joints except lap joints of lap siding. Seal around all penetrations. Paint all exposed cut edges.

G. Finish Painting: Specified in Section 099000.

### 3.04 PROTECTION

A. Protect installed products until completion of project.

B. Touch-up, repair or replace damaged products before Substantial Completion.

**END OF SECTION**

**SECTION 076000**
**FLASHING AND SHEET METAL**

**GENERAL:**

**1.01 RELATED DOCUMENTS**

A. Drawings and general provisions of Contract, including General and Supplementary Conditions and Division-1 Specification Sections, apply to this Section.

**1.02 CONFORM TO PROFILES AND SIZES SHOWN ON DRAWINGS, AND COMPLY WITH "ARCHITECTURAL SHEET METAL MANUAL" BY SMACNA, FOR EACH GENERAL CATEGORY OF WORK REQUIRED.**

A. Metal flashing and counter flashing.

B. Miscellaneous sheet metal accessories.

**1.03 PRODUCTS:**

A. All flashing and sheet metal shall be stainless steel; 0.050 inch.

B. Fabricate stainless steel with flat-lock seams; seal seams with epoxy metal seam cement and, where required for strength, rivet seams and joints.

C. Provide for thermal expansion of running stainless steel work by overlaps of expansion joints in fabricated work. Where required for water-tight construction, provide hooked flanges filled with polyisobutylene mastic for 1-inch embedment of flanges. Space joints at intervals of not more than 30 feet for stainless steel. Conceal expansion provisions where possible.

1. Separate stainless steel from contact with cementitious and absorptive surfaces, and from dissimilar metals, by a 15-mil coating of bituminous mastic (SSPC - Paint 12) or other permanent separation.

D. Stainless Steel Accessories: Provide stainless steel clips, straps, anchoring devices and similar accessory units as required for installation of work, matching or compatible with material being installed, noncorrosive, size and gage required for performance.

**1.04 EXECUTION:**

A. Anchor work in place with noncorrosive fasteners, adhesives, setting compounds, tapes and other materials and devices as recommended by manufacturer of each material or system. Provide for thermal expansion and building movements. Comply with recommendations of "Architectural Sheet Metal Manual" by SMACNA.

B. Seal moving joints in metal work with elastomeric joint sealants, complying with requirements specified in Division 7 Section "Joint Sealants."

C. Clean metal surfaces of soldering flux and other substances which could cause corrosion.

D. Performance: Water-tight and weatherproof performance of flashing and sheet metal work is required.

**END OF SECTION 07600**

**SECTION 079000**
**JOINT SEALERS**

## PART 1 - GENERAL

### 1.01 RELATED DOCUMENTS:

A. Drawings and general provisions of Contract, including General and Supplementary Conditions and Division 1 Specification Sections, apply to this Section.

### 1.02 SUMMARY:

A. Extent of each form and type of joint sealer is indicated on drawings and schedules.

### 1.03 THIS SECTION INCLUDES JOINT SEALERS FOR THE FOLLOWING LOCATIONS:

A. Exterior joints in vertical surfaces and nontraffic horizontal surfaces as indicated below.
   1. Control and expansion joints in unit masonry.
   2. Perimeter joints between unit masonry and frames of doors and windows.
   3. Other joints as indicated.

B. Exterior joints in horizontal traffic surfaces as indicated below.
   1. Control, expansion, and isolation joints in cast-in-place concrete sidewalks.
   2. Other joints as indicated.

C. Interior joints in vertical surfaces and horizontal nontraffic surfaces as indicated below:
   1. Control and expansion joints on exposed interior surfaces of exterior walls.
   2. Perimeter joints between unit masonry/concrete and roof system.
   3. Perimeter joints of exterior openings where indicated.
   4. Vertical control joints on exposed surfaces of interior unit masonry and concrete walls and partitions.
   5. Perimeter joints between interior wall surfaces and frames of interior doors, and windows.
   6. Perimeter joints of toilet fixtures.
   7. Other joints as indicated.

D. Interior joints in horizontal traffic surfaces as indicated below:
   1. Control and expansion joints in cast-in-place concrete slabs.
   2. Other joints as indicated.
   3. Sealing joints related to flashing and sheet metal for roofing is specified in another Division-7 Section.
   4. Sealants for glazing purposes are specified in Division-8 Section "Glass and Glazing."
   5. Sealing concealed perimeter joints of gypsum drywall partitions to reduce sound transmission characteristics is specified in Division-9 Section "Gypsum Drywall."
   6. Sealing tile joints is specified in Division-9 Section "Tile."

### 1.04 SYSTEM PERFORMANCES:

A. Provide joint sealers that have been produced and installed to establish and maintain watertight and airtight continuous seals.

### 1.05 SUBMITTALS:

A. Product Data from manufacturers for each joint sealer product required, including instructions for joint preparation and joint sealer application.

B. Samples for Initial Selection Purposes: Manufacturer's standard samples consisting of strips of actual products showing full range of colors available, for each product exposed to view.

C. Certificates from manufacturers of joint sealers attesting that their products comply with specification requirements and are suitable for the use indicated.

D. Qualification data complying with requirements specified in "Quality Assurance" article. Include list of completed projects with project name, addresses, names of Architects and Owners, plus other information specified.

E. Compatibility and adhesion test reports from manufacturer indicating materials forming joint substrates and joint sealant backings have been tested for compatibility and adhesion with sealants. Include manufacturer's interpretation of test results relative to sealant performance and recommendations for primers and substrate preparation needed to obtain adhesion.

F. Product test reports for each type of joint sealers indicated, evidencing compliance with requirements specified.

G. Preconstruction field test reports indicating which products and joint preparation methods demonstrated acceptable adhesion to joint substrates.

**1.06 QUALITY ASSURANCE:**

A. Installer Qualifications: Engage an Installer who has successfully completed within the last 5 years at least 5 joint sealer applications similar in type and size to that of this Project and who will assign mechanics from these earlier applications to this project, of which one will serve as lead mechanic.

B. Single Source Responsibility for Joint Sealer Materials: Obtain joint sealer materials from a single manufacturer for each different product required.

C. Preconstruction Compatibility and Adhesion Testing: Submit samples of all materials that will contact or affect joint sealers to joint sealer manufacturers for compatibility and adhesion testing, as indicated below:

D. Use test methods standard with manufacturer to determine if priming and other specific joint preparation techniques are required to obtain rapid, optimum adhesion of joint sealers to joint substrates.

E. Perform tests under normal environmental conditions expected during actual installation

F. Testing will not be required when joint sealer manufacturer is able to submit joint preparation data required above which is acceptable to Architect and is based on previous testing of current sealant products for adhesion to, and compatibility with, joint substrates and other materials matching those submitted.

G. Arrange for tests to take place with both Architect and joint sealer manufacturer's technical representative present.

**1.07 DELIVERY, STORAGE, AND HANDLING:**

A. Deliver materials to Project site in original unopened containers or bundles with labels informing about manufacturer, product name and designation, color, expiration period for use, pot life, curing time, and mixing instructions for multicomponent materials.

B. Store and handle materials in compliance with manufacturers' recommendations to prevent their deterioration or damage due to moisture, high or low temperatures, contaminants, or other causes.

**1.08 PROJECT CONDITIONS:**

A. Environmental Conditions: Do not proceed with installation of joint sealers under the following conditions:
   1. When ambient and substrate temperature conditions are outside the limits permitted by joint sealer manufacturers.
   2. When joint substrates are wet due to rain, frost, condensation, or other causes.
   3. Joint Width Conditions: Do not proceed with installation of joint sealers where joint widths are less than allowed by joint sealer manufacturer for application indicated.
   4. Joint Substrate Conditions: Do not proceed with installation of joint sealers until contaminants capable of interfering with their adhesion are removed from joint substrates.

**PART 2 - PRODUCTS**

**2.01 MATERIALS, GENERAL:**

A. Compatibility: Provide joint sealers, joint fillers and other related materials that are compatible with one another and with joint substrates under conditions of service and application, as demonstrated by sealant manufacturer based on testing and field experience.

B. Colors: Provide color of exposed joint sealers indicated or, if not otherwise indicated, as selected by Architect from manufacturer's standard and custom colors.

**2.02 ELASTOMERIC JOINT SEALANTS:**

A. Elastomeric Sealant Standard: Provide elastomeric sealant of base polymer indicated, complying with ASTM C 920 requirements including reference to Type, Grade, Class, and Uses.

B. Urethane Sealants for use in vertical joints within or between masonry and concrete:
   1. Type M: Grade NS, Class 25, Use NT, M, A, and O

C. Products: Subject to compliance with requirements, provide one of the following:
   1. Tremco “Dymeric 511”
   2. Pecora Corp. "Dynatrol II"

**2.03 URETHANE SEALANTS FOR USE IN HORIZONTAL TRAFFIC JOINTS IN CONCRETE SLABS:**

A. Type M or Type S: Grade P, Class 25, Use T, M, and O

B. Products: Subject to compliance with requirements, provide one of the following:
   1. Type M: Pecora Corp. "Urexpan" NR-201
   2. Type S:Tremco “THC-900” / “901” (>5% slope)

**2.04 SILICONE SEALANTS FOR USE IN VERTICAL JOINTS OTHER THAN WITHIN OR BETWEEN MASONRY AND CONCRETE):**

A. Type S: Grade NS, Class 25, Use NT, M, A, and O

B. Products: Subject to compliance with requirements, provide one of the following:
   1. Tremco “Spectrem 1”
   2. Dow-Corning “795 Silicone Building Sealant”

**2.05 LATEX JOINT SEALANTS:**

A. Acrylic-Emulsion Sealant: Manufacturer's standard, one part, nonsag, mildew-resistant, acrylic-emulsion sealant complying with ASTM C 834, formulated to be paintable and recommended for exposed applications on interior and on protected exterior locations involving joint movement of not more than plus or minus 7.5 percent.

B. Products: Subject to compliance with requirements, provide one of the following:
   1. "AC-20"; Pecora Corp.
   2. "Tremco Acrylic Latex Caulk"; Tremco Inc.

**2.06 FIRE-RESISTANT JOINT SEALERS:**

A. General: Provide manufacturer's standard fire-stopping sealant, with accessory materials, having fire-resistance ratings indicated as established by testing identical assemblies per ASTM E 814 by Underwriters Laboratory, Inc. or other testing and inspecting agency acceptable to authorities having jurisdiction.

B. Foamed-In-Place-Fire-Stopping Sealant: Two-part, foamed-in-place, silicone sealant formulated for use in a through-penetration fire-stop system for filling openings around cables, conduit, pipes and similar penetrations through rated wall assemblies.

C. Products: Subject to compliance with requirements, provide one of the following:
   1. Two-Part Fire-Stopping Sealant:
      a. Dow Corning Fire Stop Sealant"; Dow Corning Corp.
   2. "Insta-FireSeal Silicone RTV Foam"; Insta-Foam Products, Inc.

**2.07 JOINT SEALANT BACKING:**

A. General: Provide sealant backings of material and type which are nonstaining; are compatible with joint substrates, sealants, primers and other joint fillers; and are approved for applications indicated by sealant manufacturer based on field experience and laboratory testing.

B. Plastic Foam Joint Fillers: Preformed, compressible, resilient, nonwaxing, nonextruding strips of flexible, nongassing plastic foam of material indicated below; nonabsorbent to water and gas; and of size, shape and density to control sealant depth and otherwise contribute to producing optimum sealant performance.

C. Either open-cell polyurethane foam or closed-cell polyethylene foam, unless otherwise indicated, subject to approval of sealant manufacturer, for cold-applied sealants only.

D. Bond-Breaker Tape: Polyethylene tape or other plastic tape as recommended by sealant manufacturer for preventing sealant from adhering to rigid, inflexible joint filler materials or joint surfaces at back of joint where such adhesion would result in sealant failure. Provide self-adhesive tape where applicable.

**2.08 MISCELLANEOUS MATERIALS:**

A. Primer: Provide type recommended by joint sealer manufacturer where required for adhesion of sealant to joint substrates indicated, as determined from preconstruction joint sealer-substrate tests and field tests.

B. Cleaners for Nonporous Surfaces: Provide nonstaining, chemical cleaners of type which are acceptable to manufacturers of sealants and sealant backing materials, which are not harmful to substrates and adjacent nonporous materials, and which do not leave oily residues or otherwise have a detrimental effect on sealant adhesion or in-service performance.

C. Masking Tape: Provide nonstaining, nonabsorbent type compatible with joint sealants and to surfaces adjacent to joints.

D. Accessory Materials for Fire-Stopping Sealants: Provide forming, joint fillers, packing and other accessory materials required for installation of fire-stopping sealants as applicable to installation conditions indicated.

**PART 3 - EXECUTION**

**3.01 EXAMINATION:**

A. Examine joints indicated to receive joint sealers, with Installer present, for compliance with requirements for joint configuration, installation tolerances and other conditions affecting joint sealer performance. Do not proceed with installation of joint sealers until unsatisfactory conditions have been corrected.

**3.02 PREPARATION:**

A. Surface Cleaning of Joints: Clean out joints immediately before installing joint sealers to comply with recommendations of joint sealer manufacturers and the following requirements:

B. Remove all foreign material from joint substrates which could interfere with adhesion of joint sealer, including dust; paints, except for permanent, protective coatings tested and approved for sealant adhesion and compatibility by sealant manufacturer; old joint sealers; oil; grease; waterproofing; water repellents; water; surface dirt; and frost.

C. Clean concrete, masonry, unglazed surfaces of ceramic tile and similar porous joint substrate surfaces, by brushing, grinding, blast cleaning, mechanical abrading, or a combination of these methods to produce a clean, sound substrate capable of developing optimum bond with joint sealers. Remove loose particles remaining from above cleaning operations by vacuuming or blowing out joints with oil-free compressed air.

D. Remove laitance and form release agents from concrete.

E. Clean metal, glass, porcelain enamel, glazed surfaces of ceramic tile; and other nonporous surfaces by chemical cleaners or other means which are not harmful to substrates or leave residues capable of interfering with adhesion of joint sealers.

F. Joint Priming: Prime joint substrates where indicated or where recommended by joint sealer manufacturer based on preconstruction joint sealer-substrate tests or prior experience. Apply primer to comply with joint sealer manufacturer's recommendations. Confine primers to areas of joint sealer bond, do not allow spillage or migration onto adjoining surfaces.

G. Masking Tape: Use masking tape where required to prevent contact of sealant with adjoining surfaces which otherwise would be permanently stained or damaged by such contact or by cleaning methods required to remove sealant smears. Remove tape immediately after tooling without disturbing joint seal.

**3.03 INSTALLATION OF JOINT SEALERS:**

A. General: Comply with joint sealer manufacturers' printed installation instructions applicable to products and applications indicated, except where more stringent requirements apply.

B. Elastomeric Sealant Installation Standard: Comply with recommendations of ASTM C 962 for use of joint sealants as applicable to materials, applications and conditions indicated.

C. Latex Sealant Installation Standard: Comply with requirements of ASTM C 790 for use of latex sealants.

D. Installation of Foamed-In-Place Sealant: Install sealant, including forming, packing and other accessory materials to fill openings between unit masonry walls and steel roof deck assemblies. Comply with manufacturer's installation requirements and any requirements established by testing and inspecting agency.

E. Installation of Sealant Backings: Install sealant backings to comply with the following requirements:

F. Install joint fillers of type indicated to provide support of sealants during application and at position required to produce the cross-sectional shapes and depths of installed sealants relative to joint widths which allow optimum sealant movement capability.
   1. Do not leave gaps between ends of joint fillers.
   2. Do not stretch, twist, puncture, or tear joint fillers.
   3. Remove absorbent joint fillers which have become wet prior to sealant application and replace with dry material.

G. Install bond breaker tape between sealants and joint fillers, compression seals, or back of joints where adhesion of sealant to surfaces at back of joints would result in sealant failure.

H. Install compressible seals serving as sealant backings to comply with requirements indicated above for joint fillers.

I. Installation of Sealants: Install sealants by proven techniques that result in sealants directly contacting and fully wetting joint substrates, completely filling recesses provided for each joint configuration, and providing uniform, cross-sectional shapes and depths relative to joint widths which allow optimum sealant movement capability.

J. Tooling of Nonsag Sealants: Immediately after sealant application and prior to time skinning or curing begins, tool sealants to form smooth, uniform beads of configuration indicated, to eliminate air pockets, and to ensure contact and adhesion of sealant with sides of joint. Remove excess sealants from surfaces adjacent to joint. Do not use tooling agents which discolor sealants or adjacent surfaces or are not approved by sealant manufacturer.

K. Provide concave joint configuration per Figure 6A in ASTM C 962, unless otherwise indicated.

**3.04 CLEANING:**

A. Clean off excess sealants or sealant smears adjacent to joints as work progresses by methods and with cleaning materials approved by manufacturers of joint sealers and of products in which joints occur.

**3.05 PROTECTION:**

A. Protect joint sealers during and after curing period from contact with contaminating substances or from damage resulting from construction operations or other causes so that they are without

deterioration or damage at time of Substantial Completion. If, despite such protection, damage or deterioration occurs, cut out and remove damaged or deteriorated joint sealers immediately and reseal joints with new materials to produce joint sealer installations with repaired areas indistinguishable from original work.

**END OF SECTION 07900**

## SECTION 081113
## HOLLOW METAL DOORS AND FRAMES

### PART 1 GENERAL

### 1.01 SECTION INCLUDES

A. Non-fire-rated hollow metal doors and frames.

### 1.02 RELATED REQUIREMENTS

A. Section 087100 - Finish Hardware.

B. Section 099000 - Painting

### 1.03 REFERENCE STANDARDS

A. ANSI/SDI A250.8 - Specifications for Standard Steel Doors and Frames (SDI-100); 2014.

B. ANSI/SDI A250.10 - Test Procedure and Acceptance Criteria for Prime Painted Steel Surfaces for Steel Doors and Frames; 2011.

C. ASTM A653/A653M - Standard Specification for Steel Sheet, Zinc-Coated (Galvanized) or Zinc-Iron Alloy-Coated (Galvannealed) by the Hot-Dip Process; 2025a.

D. ASTM A1008/A1008M - Standard Specification for Steel, Sheet, Cold-Rolled, Carbon, Structural, High-Strength Low-Alloy, High-Strength Low-Alloy with Improved Formability, Solution Hardened, and Bake Hardenable; 2015.

E. ASTM A1011/A1011M - Standard Specification for Steel, Sheet and Strip, Hot-Rolled, Carbon, Structural, High-Strength Low-Alloy, High-Strength Low-Alloy with Improved Formability, and Ultra-High Strength; 2014.

F. BHMA A156.115 - American National Standard for Hardware Preparation in Steel Doors and Steel Frames; 2014.

G. NAAMM HMMA 840 - Guide Specifications for Installation and Storage of Hollow Metal Doors and Frames; 2007.

### 1.04 SUBMITTALS

A. See Section 013000 - Submittals for submittal procedures.

B. Product Data: Materials and details of design and construction, hardware locations, reinforcement type and locations, anchorage and fastening methods, and finishes.

C. Shop Drawings: Details of each opening, showing elevations, glazing, frame profiles, and identifying location of different finishes, if any.

D. Manufacturer's Certificate: Certification that products meet or exceed specified requirements.

E. Provide Florida Product Approval Number for door and frame assembly.

### 1.05 QUALITY ASSURANCE

A. Manufacturer Qualifications: Company specializing in manufacturing the products specified in this section with minimum three years documented experience.

B. Maintain at the project site a copy of all reference standards dealing with installation.

### 1.06 DELIVERY, STORAGE, AND HANDLING

A. Store in accordance with NAAMM HMMA 840.

B. Protect with resilient packaging; avoid humidity build-up under coverings; prevent corrosion.

### PART 2 PRODUCTS

### 2.01 MANUFACTURERS

A. Steel Frames and Doors:
   1. Assa Abloy Ceco, Curries, or Fleming: www.assaabloydss.com/#sle.
   2. Ceco Door Products: www.cecodoor.com.

3. Windsor Republic Doors: www.republicdoor.com.
4. Steelcraft: www.steelcraft.com.
5. Substitutions: See Section 016000 - Product Requirements.

**2.02 FRAMES**

A. Requirements for All Doors and Frames:
1. Steel used for fabrication of doors and frames shall comply with one or more of the following requirements; Galvannealed steel conforming to ASTM A653/A653M, cold-rolled steel conforming to ASTM A1008/A1008M, or hot-rolled pickled and oiled (HRPO) steel conforming to ASTM A1011/A1011M, Commercial Steel (CS) Type B for each.
2. Accessibility: Comply with ANSI/ICC A117.1.
3. Door Top Closures: Flush with top of faces and edges.
4. Door Edge Profile: Beveled on both edges.
5. Door Texture: Smooth faces.
6. Glazed Lights: Non-removable stops on non-secure side; sizes and configurations as indicated on drawings.
7. Hardware Preparation: In accordance with DHI A115 Series, with reinforcement welded in place, in addition to other requirements specified in door grade standard. Refer to door hardware schedule for exact hardware to be installed at each door.
8. Galvanizing for all doors and frames: All components hot-dipped zinc-iron alloy-coated (galvannealed), manufacturer's standard coating thickness.
9. Finish: Factory primed, for field finishing.

B. Combined Requirements: If a particular door and frame unit is indicated to comply with more than one type of requirement, comply with the specified requirements for each type; for instance, an exterior door that is also indicated as being sound-rated must comply with the requirements specified for exterior doors and for sound-rated doors; where two requirements conflict, comply with the most stringent.

**2.03 STEEL DOORS**

A. Exterior Doors :
1. Grade: ANSI A250.8 Level 3, physical performance Level A, Model 2, seamless.
2. Core: Polystyrene foam.
3. Weatherstripping: Separate, see Section 087100.

**2.04 STEEL FRAMES**

A. General:
1. Comply with the requirements of grade specified for corresponding door, except:
a. ANSI A250.8 Level 2 Doors: 16 gage frames.
b. ANSI A250.8 Level 3 Doors: 14 gage frames.

B. All Door Frames: Fully welded.
1. Galvanizing: All components hot-dipped zinc-iron alloy-coated (galvannealed) in accordance with ASTM A653/A653M, with manufacturer's standard coating thickness.
2. Weatherstripping: Separate, see Section 087100.

**2.05 FINISH MATERIALS**

A. Primer: Rust-inhibiting, complying with ANSI A250.10 , door manufacturer's standard.

B. Bituminous Coating: Asphalt emulsion or other high-build, water-resistant, resilient coating.

**PART 3 EXECUTION**

**3.01 EXAMINATION**

A. Verify existing conditions before starting work.

B. Verify that opening sizes and tolerances are acceptable.

C. Verify that finished walls are in plane to ensure proper door alignment.

### 3.02 PREPARATION

A. Coat inside of frames to be installed in masonry or to be grouted, with bituminous coating, prior to installation.

### 3.03 INSTALLATION

A. Install in accordance with the requirements of the specified door grade standard and NAAMM HMMA 840.

B. Coordinate frame anchor placement with wall construction.

C. Coordinate installation of hardware.

D. Touch up damaged factory finishes.

### 3.04 TOLERANCES

A. Clearances Between Door and Frame: As specified in ANSI A250.8.

B. Maximum Diagonal Distortion: 1/16 in measured with straight edge, corner to corner.

### 3.05 ADJUSTING

A. Adjust for smooth and balanced door movement.

**END OF SECTION**

**SECTION 083323**
**OVERHEAD COILING DOORS**

## PART 1 GENERAL

### 1.01 SECTION INCLUDES

A. Overhead coiling doors , operating hardware, non-fire-rated and exterior, manual operation.

### 1.02 REFERENCE STANDARDS

A. ASTM A36/A36M - Standard Specification for Carbon Structural Steel; 2014.

B. ASTM A123/A123M - Standard Specification for Zinc (Hot-Dip Galvanized) Coatings on Iron and Steel Products; 2015.

C. ASTM A653/A653M - Standard Specification for Steel Sheet, Zinc-Coated (Galvanized) or Zinc-Iron Alloy-Coated (Galvannealed) by the Hot-Dip Process; 2025a.

D. ASTM A666/A666M - Standard Specification for Annealed or Cold-Worked Austenitic Stainless Steel Sheet, Strip, Plate, and Flat Bar; 2024.

E. ASTM B221 - Standard Specification for Aluminum and Aluminum-Alloy Extruded Bars, Rods, Wire, Profiles, and Tubes; 2014.

F. ASTM B221M - Standard Specification for Aluminum and Aluminum-Alloy Extruded Bars, Rods, Wire, Profiles, and Tubes [Metric]; 2013.

G. NEMA EN 10250 - Enclosures for Electrical Equipment (1000 Volts Maximum); 2024.

H. NEMA ICS 2 - Industrial Control and Systems Controllers, Contactors and Overload Relays Rated 600 Volts; 2000 (R2005), with errata, 2008.

I. NEMA MG 00001 - Motors and Generators; 2024.

### 1.03 SUBMITTALS

A. See Section 013000 - Submittals, for submittal procedures.

B. Product Data: Provide general construction, component connections and details, electrical equipment , manual control stations.

C. Shop Drawings: Indicate pertinent dimensioning, anchorage methods, hardware locations, and installation details.

D. Provide Florida Product Approval.

E. Warranty: Submit manufacturer warranty and ensure that forms have been completed in Owner's name and registered with manufacturer.

F. Manufacturer's Instructions: Indicate installation sequence and procedures, adjustment and alignment procedures.

G. Maintenance Data: Indicate lubrication requirements and frequency and periodic adjustments required.

### 1.04 PERFORMANCE REQUIREMENTS

A. Provide doors certified to withstand a wind-load pressure determined in accordance with ASCE for a wind velocity of 137 MPH Basic Wind Speed (ULT); 106 MPH (ASD).

### 1.05 WARRANTY

A. Refer to applicable Division 1 specifications sections for any additional warranty requirements and for required warranty submittals at project closeout.

B. Correct defective Work within a five year period after Date of Substantial Completion.

## PART 2 PRODUCTS

### 2.01 MANUFACTURERS

### 2.02 COILING DOORS

A. Basis of Design: Cornell Iron Defender Series PSD361
   1. Alternate Manufacturers:
      a. Cookson
      b. Clopay
      c. Overhead Door

B. Exterior Coiling Doors: Stainless steel slat curtain.
   1. Single thickness slats.
   2. Finish: Factory painted, color as selected.
   3. Guides: Angles; galvanized steel.
   4. Hood Enclosure: Manufacturer's standard; primed steel.
   5. Electric operation. With manual hand chain lift override operation.
   6. Mounting: Surface mounted.

### 2.03 MATERIALS

A. Curtain Construction: Interlocking slats, insulated.
   1. Slat Ends: Alternate slats fitted with end locks to act as wearing surface in guides and to prevent lateral movement.
   2. Curtain Bottom: Fitted with angles to provide reinforcement and positive contact in closed position.
   3. Weatherstripping: Moisture and rot proof, resilient type, located at jamb edges, bottom of curtain, and where curtain enters hood enclosure of exterior doors.

B. Stainless Steel Slats: Minimum ____ gage steel conforming to ASTM A 666, Type 304, rollable temper.

C. Steel Guides: ASTM A 36/A 36M steel angles, size as required for wind loading, hot-dip galvanized per ASTM A 123/A 123M. Prime paint.

D. Hood Enclosure: Internally reinforced to maintain rigidity and shape.
   1. Prime paint.

E. Hardware:
   1. Latching: Inside mounted, adjustable keeper, spring activated latch bar with feature to keep in locked or retracted position.
   2. Latch Handle: Interior handle.

## PART 3 EXECUTION

### 3.01 EXAMINATION

A. Verify that opening sizes, tolerances and conditions are acceptable.

### 3.02 COORDINATION

A. Examine drawings to ensure adquate support will be present for product installation.

B. Notify Contractor of requirements for interior wall framing that will support coiling shutters and doors.

C. Contract Sum shall include costs associated with support for products covered by this specification section.

D. Contractor to coordinate with the Owner's access control vendor for future connection of the access control system to overhead door controllers and operators.

### 3.03 INSTALLATION

A. Install units in accordance with manufacturer's instructions.

B. Use anchorage devices to securely fasten assembly to wall construction and building framing without distortion or stress.

C. Securely and rigidly brace components suspended from structure. Secure guides to structural members only.

D. Fit and align assembly including hardware; level and plumb, to provide smooth operation.

E. Coordinate installation of sealants and backing materials at frame perimeter as specified in Section 079005.

F. Install weatherstripping, weatherstripping, and weatherstripping.

**3.04 TOLERANCES**

A. Maintain dimensional tolerances and alignment with adjacent work.

B. Maximum Variation From Plumb: 1/16 inch.

C. Maximum Variation From Level: 1/16 inch.

D. Longitudinal or Diagonal Warp: Plus or minus 1/8 inch per 10 ft straight edge.

**3.05 ADJUSTING**

A. Adjust operating assemblies for smooth and noiseless operation.

**3.06 CLEANING**

A. Clean installed components.

B. Remove labels and visible markings.

C. Touch-up damaged painted surfaces upon substantial completion.

**END OF SECTION**

**SECTION 087100**
**FINISH HARDWARE**

## PART I - GENERAL

### 1.01 WORK INCLUDED:

A. The work in this section shall include furnishing of all items of finish hardware as hereinafter specified or obviously necessary to complete the building, except those items that are specifically excluded from this section of the specification.

### 1.02 RELATED WORK SPECIFIED ELSEWHERE:

A. Hollow Metal Doors and Frames

### 1.03 DESCRIPTION OF WORK:

A. Furnish labor and material to complete hardware work indicated, as specified herein, or as may be required by actual conditions at building.

B. Include all necessary screws, bolts, expansion shields, other devices, if necessary, as required for proper hardware application. The hardware supplier shall assume all responsibility for correct quantities.

C. All hardware shall meet the requirements of Federal, State and Local codes having jurisdiction over this project, notwithstanding any real or apparent conflict herewith in these specifications.

D. Fire-Rated Openings:
   1. Provide hardware for fire-rated openings in compliance with ANSI/NFPA Pamphlet No. 80 and NFPA Standards No. 101. This requirement takes precedence over other requirements for such hardware. Provide only hardware that has been tested and listed by UL for the type and sizes of doors required, and complies with the requirements of the door and door frame labels.

E. Wind Resistance/Missile Impact-Florida Building Code
   1. Furnish finish hardware for all exterior doors that has been tested and certified by an engineer registered in the State of Florida in an approved testing lab as defined by the Test Protocols for High Velocity Hurricane Zones. Hollow metal doors and frames shall also share the same testing and approval criteria. On projects in 100 to 110 MPH zones hardware and door products are not required to be passed for the missile impact criteria of the test, yet must still be tested and approved for the static and cyclic loading as defined by positive and negative PSF factors shown in the drawings. Projects in zones rated in excess of 120 MPH or coastal areas designated as Wind Born Debris regions must also be furnished with products tested and certified for the missile impact criteria.

F. Fasteners:
   1. Hardware as furnished shall conform to published templates generally prepared for machine screw installation.
   2. Furnish each item complete with all screws required for installation. Insofar as practical, furnish concealed type fasteners for hardware units. Screws that are exposed shall be furnished with Phillips flat heads, finished to match adjacent hardware.
   3. Door closers and exit devices to be installed on mineral core wood fire doors shall be attached with closed head through bolts (sex bolts).

### 1.04 QUALITY ASSURANCE:

A. Material herein specified shall establish the standard for the material used and shall be considered the minimum quality acceptable.

### 1.05 SUBMITTALS:

A. The finish hardware supplier shall prepare and submit to the architect five (5) copies of a complete schedule identifying each door and each set number, following the numbering system and not creating any separate system himself. He shall submit the schedule for review, make corrections as directed and resubmit the corrected schedule for final approval. Approval of

schedule will not relieve Contractor of the responsibility for furnishing all necessary hardware, including the responsibility for furnishing correct quantities.

B. No manufacturing orders shall be placed until detailed schedule has been submitted to the architect and written approval received.

C. After hardware schedule has been approved, furnish templates required by manufacturing contractors for making proper provisions in their work for accurate fitting and finish hardware setting. Furnish templates in ample time to facilitate progress of work.

**1.06 DELIVERY, STORAGE, AND HANDLING:**

A. Wrap and protect finish hardware items for shipment. Deliver to manufacturing contractors hardware items required by them for their application; deliver balance of hardware to job; store in designated location. Each item shall be clearly marked with its intended location.

**1.07 WARRANTY:**

A. The materials furnished shall be warranted for one year after installation or longer as the individual manufacturer's warranty permits.

**PART 2 - PRODUCTS:**

**2.01 ACCEPTABLE MANUFACTURERS:**

A. To the greatest extent possible, obtain each kind of hardware from one manufacturer only.

B. If material manufactured by other than that specified or listed herewith as an equal, is to be bid upon, permission must be requested from the architect seven (7) days prior to bidding. If a substitution is allowed, it will be so noted by addendum.

C. All numbers and symbols used herein have been taken from the current catalogues of the following manufacturers.

| PRODUCTS | SPECIFIED MFR. | ACCEPTABLE SUBSTITUTE |
|---|---|---|
| Continuous Hinges | Ives | Hager |
| Electric Locks | Trilogy | None |
| Locksets, Latchsets, Privacy Sets, Cylinders, Keys, and Keying | Schlage Primus Everest | None |
| Exit Devices | Von Duprin | None |
| Door Closers | LCN | None |
| Kick Plates, Push/Pull | Ives | Rockwood |
| Wall/Floor Stops | Ives | Rockwood, Glynn-Johnson |
| Overhead Stops and Holders | Glynn-Johnson | Rixson |
| Thresholds, Drip Caps, Weatherstrip, Door Seals | National Guard | Pemko, Hager |
| Silencers | Ives | Rockwood, Glynn-Johnson |

**2.02 FINISH OF HARDWARE:**

A. The basic finish of hardware shall be satin chromium plated. Protection plates, door pulls, pull plates, wall bumpers, and other hardware as listed in the hardware schedule shall be US32D satin stainless steel. Door closers shall be sprayed aluminum lacquer or enamel to match.

**2.03 HINGES AND PIVOTS:**

A. Exterior continuous hinges shall be solid stainless steel.

**2.04 KEYING:**

A. All locks and cylinders shall be 6-pin Schlage Lock Company. All new bittings shall be issued by Schlage in order to maintain the integrity of the existing grand master key system.

B. All locks and cylinders to be construction master keyed in a manner that doesn not require the cylinders to be removed.

C. Provide three (3) each change keys per lock and six (6) each construciton master and master keys. Stamp "DO NOT DUPLICATE".

**2.05 LOCKSETS:**

A. Locksets shall be heavy-duty cylindrical type, unless specified otherwise, in ND series X RHO design as manufactured by Schlage Lock Company.

**2.06 DOOR CLOSERS:**

A. All closers shall be LCN 4040XP 4-1 series.

**2.07 TRIM AND PLATES:**

A. Kickplates, mop plates, and armor plates, shall be .050 gauge with US32D satin stainless steel finish. Kickplates to be eight (8) inches high, mop plates to be four (4) inches high, armor plates to be thirty-eight (38) inches high. Kick and armor plates shall be two (2) inches less full width of door. Mop plates shall be one (1) inch less full width of door.

B. Push plates, pull plates, door pulls, and miscellaneous door trim shall be shown in the hardware schedule.

**2.08 DOOR STOPS:**

A. Door stops shall be furnished for all doors to prevent damage to doors or hardware from striking adjacent walls or fixtures. Wall bumpers equal to Rockwood 409 or 411 series are preferred, but where not practical furnish floor stops equal to Rockwood 440/442 series. Where conditions prohibit the use of either wall or floor type door stops, furnish surface mounted overhead stops equal to Glynn Johnson 450 series.

**2.09 THRESHOLDS AND WEATHERSTRIP:**

A. Thresholds and weatherstrip shall be as listed in the hardware schedule.

**2.10 DOOR SILENCERS:**

A. Furnish rubber door silencers equal to Ives 20 for all new interior hollow metal frames, (2) per pair and (3) per single door frame.

**PART 3 - EXECUTION**

**3.01 INSTALLATION:**

A. All hardware shall be applied and installed in accordance with best trade practice. Care shall be exercised not to mar or damage adjacent work.

B. Provide secure lock-up for hardware delivered to the project but not yet installed. Control the handling and installation of hardware items, which are not immediately replaceable, so that the completion of the work will not be delayed by hardware losses both before and after installation.

**3.02 ADJUSTING AND CLEANING:**

A. Contractor shall adjust all hardware in strict compliance with manufacturer's instructions. Prior to turning project to owner, contractor shall clean and make any final adjustments to the finish hardware.

**3.03 PROTECTION:**

A. Contractor shall protect hardware as it is stored on construction site in a covered and dry place.

B. The contractor shall protect exposed hardware installed on doors during the construction phase.

**3.04 HARDWARE SCHEDULE BEGINS ON THE FOLLOWING PAGE.**

## Hardware Set 1

## SECTION 092116
## GYPSUM BOARD ASSEMBLIES

### PART 1 GENERAL

### 1.01 SECTION INCLUDES

A. Glass mat faced gypsum board for all ceilings.

### 1.02 REFERENCE STANDARDS

A. ASTM C1047 - Standard Specification for Accessories For Gypsum Wallboard and Gypsum Veneer Base; 2014a.

### 1.03 SUBMITTALS

A. See Section 01 0100 for submittal procedures.

B. Product Data: Provide data on glass mat faced gypsum board, accessories, and joint finishing system.

C. Product Data: Provide manufacturer's data on partition head to structure connectors, showing compliance with requirements.

### 1.04 QUALITY ASSURANCE

A. Applicator Qualifications: Company specializing in performing gypsum board application and finishing, with minimum 5 years of documented experience.

### PART 2 PRODUCTS

### 2.01 FIBERGLASS REINFORCED BOARD MATERIALS

A. Glass Mat Gypsum Board: Gypsum panels with moisture-resistant core and coated inorganic fiberglass mat back surface designed to resist growth of mold and mildew, per ASTM D 3273.
   1. Fiberglass Mat Surface Board: Comply with performance requirements of ASTM C 1396/C 1396M for water-resistant gypsum backing board; tapered long edges.
      a. Product: DensArmor Plus manufactured by Georgia Pacific.
      b. Standard Type: Thickness 5/8 inch.
      c. Locations: Install at interior side of all exterior walls, refer to drawings.

### PART 3 EXECUTION

### 3.01 EXAMINATION

A. Verify that project conditions are appropriate for work of this section to commence.

### 3.02 ACOUSTIC ACCESSORIES INSTALLATION

### 3.03 INSTALLATION OF TRIM AND ACCESSORIES

A. Control Joints: Place control joints consistent with lines of building spaces and as indicated.
   1. Not more than 30 feet apart on walls and ceilings over 50 feet long.

B. Corner Beads: Install at external corners, using longest practical lengths.

### 3.04 JOINT TREATMENT

A. Glass Mat Faced Gypsum Board: Use fiberglass joint tape, bedded and finished with chemical hardening type joint compound.

B. Finish gypsum board in scheduled areas in accordance with levels defined in ASTM C 840 and as scheduled below.

C. Tape, fill, and sand exposed joints, edges, and corners to produce smooth surface ready to receive finishes.
   1. Feather coats of joint compound so that camber is maximum 1/32 inch.
   2. Taping, filling and sanding is not required at base layer of double layer applications.

D. Where Level 5 finish is indicated, spray apply high build drywall surfacer over entire surface after joints have been properly treated; achieve a flat and tool mark-free finish.

E. Fill and finish joints and corners of cementitious backing board as recommended by manufacturer.

**3.05 TOLERANCES**

A. Maximum Variation of Finished Gypsum Board Surface from True Flatness: 1/8 inch in 10 feet in any direction.

**3.06 FINISH LEVEL SCHEDULE**

A. Level 5: Walls and ceilings scheduled to receive paint finish.

**END OF SECTION**

**SECTION 092400**
**CEMENT PLASTER**

## PART 1 GENERAL

### 1.01 WORK INCLUDED

A. Lath and plastering.

### 1.02 REFERENCES

A. American Concrete Institute ACI 524R: Guide to Portland Cement Plastering

B. Portland Cement Association: Portland Cement Plaster (Stucco) Manual

C. ASTM C 150: Standard Specification for Portland Cement

D. ASTM C 847: Standard Specification for Metal Lath

E. Standard Specification for Aggregate for Job Mixed Portland Cement Based Plasters

F. ASTM C 926: Standard Specification for Application of Portland Cement-Based Plaster

G. ASTM C 933: Standard Specification for Welded Wire Lath

H. ASTM C 1063: Standard Specification for Installation of Lathing and Furring to Receive Interior and Exterior Portland Cement-Based Plaster

I. ASTM C 1328: Standard Specification for Plastic (Stucco) Cement

J. ASTM D 226: Standard Specification for Asphalt Saturated Organic Felt Used in Roofing and Waterproofing

K. ASTM D 4261: Standard Practice for Surface Cleaning Concrete Masonry Units for Coating

L. ASTM D 1784: Standard Specification for Rigid Poly (Vinyl Chloride) (PVC) Compounds and Chlorinated Poly (Vinyl Chloride) (CPVC) Compounds

M. ICC-ES AC11: Cementitious Exterior Wall Coatings

### 1.03 SUBMITTALS

A. Product Data: Submit manufacturer's product data for cementitious materials, lath, metal support components, and accessories.

B. Material Certificates: Submit producer's certificate for each kind of plaster aggregate indicated evidencing that materials comply with requirements.

C. Finish sample indicating color and texture for approval by architect/owner.

### 1.04 QUALITY ASSURANCE

A. Qualifications:
   1. Manufacturer: Shall be Dryvit Systems, Inc. or approved suppliers. All materials shall be obtained from Dryvit Systems, Inc. or its authorized distributors.
   2. Plastering Contractor:
      a. Shall be knowledgeable in the proper installation of exterior lathing and cement plaster products.
      b. Shall have qualified and properly trained people to perform work.
      c. Shall have experience in application of cement plaster products on projects of comparable scope.

### 1.05 DELIVERY, STORAGE AND HANDLING

A. All Commercial Cement Plaster 1 materials shall be delivered to the job site in the original, unopened packages with labels intact. Questionable materials shall not be used.

B. Materials shall be stored at the job site, and at all times, in a cool, dry location, out of direct sunlight, protected from weather and other sources of damage. Minimum storage temperature shall be as follows:

1. DPR, PMR™, HDP™, Weatherlastic® and E™ Finishes, Color Prime™, Primus®, Genesis® and NCB™: 40 °F (4 °C).

C. For other products, refer to specific product data sheets.

D. Protect all products from weather and direct sunlight.

E. Maximum storage temperature shall not exceed 100 °F (38 °C). NOTE: Minimize exposure of materials to temperatures over 90 °F (32 °C). Finishes exposed to temperatures over 110 °F (43 °C) for even short periods may exhibit skinning, increased viscosity and should be inspected prior to use.

**1.06 PROJECT CONDITIONS**

A. Application of wet materials shall not take place during inclement weather unless appropriate protection is provided. Protect materials from inclement weather until they are dry.

B. Dryvit CCP Base shall not be applied when wall or ambient temperatures are below 40 °F (4 °C).

C. At the time of Dryvit product application, the air and wall surface temperatures shall be from 40 °F (4 °C) minimum to 100 °F (38 °C) maximum for the following products:
1. DPR, PMR, HDP, Weatherlastic and E Finishes™, Color Prime, Primus, Genesis and NCB.
2. For other products, refer to specific product data sheets.

D. These temperatures shall be maintained with adequate air ventilation and circulation for a minimum of 24 hours (48 hours for Weatherlastic Finishes, Ameristone, TerraNeo and Lymestone) thereafter, or until the products are completely dry. Refer to published product data sheets for more specific information.

E. CCP Base shall be completely dry and properly cured for a minimum of 7 days prior to primer application.

F. If necessary, tenting, heating and ventilation may be utilized to maintain required conditions. Heaters shall be vented to the outside.

G. Protect the Commercial Cement Plaster 1 materials from uneven and excessive evaporation in dry, warm, or windy weather. Always work the shady side of the wall. Refer to section 3.03.B and 3.03C for CCP Base curing requirements.

**1.07 SEQUENCING AND SCHEDULING**

A. Installation of the Commercial Cement Plaster 1 shall be coordinated with other construction trades.

**1.08 WARRANTY**

A. A. Dryvit Systems, Inc. shall provide a limited warranty against defective material upon written request. Dryvit shall make no other warranties, expressed or implied. Dryvit does not warrant workmanship. Full details are available from Dryvit Systems, Inc.

**1.09 MAINTENANCE**

A. All Dryvit products are designed to require minimal maintenance. However, as with all building products, depending on location, some cleaning and minimal maintenance may be required. See Dryvit publication DS152 on Cleaning and Recoating.

B. Sealants and flashings shall be inspected by the owner or their agent on a regular basis and repairs made as necessary to maintain a watertight building enclosure.

**PART II - PRODUCTS**

**2.01 MANUFACTURER:**

A. Basis of Design:
1. Dryvit Commercial Cement Plaster 1 (Tamoseal Option)
2. Other equivalent products may be considered subject to Architect's approval prior to bid.

## 2.02 MATERIALS

A. Air/Water Resistive Barrier:
   1. Euclid Tamoseal.

B. Accessories (by others).
   1. All accessories to be PVC as manufactured by AMICO or equal.
   2. Depth of accessories (grounds) shall be sized for the plaster thickness.
   3. PVC accessories shall meet ASTM D 1784 and ASTM C 1063.

C. Plaster Base Coat:
   1. Dryvit CCP Base - Concentrate: A fiberglass reinforced, cement plaster mix utilizing alkali resistant fibers and proprietary cementitious admixtures which is field mixed with clean, graded plaster sand meeting ASTM C 897, water and Dryvit AC-100 activator (when specified). CCP Base - Concentrate is packaged in 80 lb (36.3 kg) bags.

D. Primer:
   1. Dryvit Color Prime™, Color Prime-W or Primer with Sand™: A water-based, pigmented acrylic primer applied over the cured CCP base coat to improve adhesion and provide a more uniform appearance of the finish.

E. Dryvit Finish: 100% acrylic finishes with integral color and texture. Shall be the type, color and texture as selected by the architect/owner and shall be of the following types:
   1. Standard DPR (Dirt Pickup Resistance): Water-based, acrylic coating with integral color and texture and formulated with DPR chemistry (Provide samples of the following):
      a. Quarzputz® DPR: Open-texture
      b. Sandblast® DPR: Medium texture
      c. Freestyle® DPR: Fine texture
      d. Sandpebble® DPR: Pebble texture
      e. Sandpebble® Fine DPR: Fine pebble texture

# PART III – EXECUTION

## 3.01 EXAMINATION

A. Prior to installation of Commercial Cement Plaster1, it is the contractor's responsibility to ensure that:
   1. The surfaces to receive plaster are free of dust, loose particles, oil and other conditions that would affect the adhesion, installation or performance of Commercial Cement Plaster 1 materials.
   2. All accessories including corner aids, control and expansion joints, casing beads, etc. are properly fastened and positioned according to contract drawings and local building code requirements.
   3. Doors, windows, decks, and other openings and penetrations have been properly flashed in accordance with building code and contract documents.
   4. The substrate is flat within 1/4 in (6.4 mm) in 10 ft (3.0 m).
   5. The contractor shall notify the general contractor and/or owner and/or architect of all discrepancies. Do not proceed until unsatisfactory conditions are resolved.

## 3.02 PREPARATION

A. Protection
   1. The Commercial Cement Plaster 1 materials shall be protected by permanent or temporary means from weather and other damage prior to, during, and following application, until dry.
   2. Solid surfaces such as precast or cast-in-place concrete or masonry, shall have adequate suction and surface roughness to provide bond. Smooth or non-absorptive surfaces shall be prepared by the following methods:
   3. Sandblasting, wire brushing, acid etching, chipping or any combination thereof. Refer to ASTM D 4258, ASTM D 4259 ASTM D 4260, or ASTM D 4261 as applicable.
   4. Application of an approved bonding agent.

5. Where effective bond cannot be achieved, the entire surface shall be covered with furred metal lath in accordance with ASTM C 1063 and building code requirements.

**3.03 INSTALLATION**

A. Mixing and Application Instructions – refer to the product literature for specific mixing and application instructions of each product.

B. CCP Base shall be moist cured for a minimum of 48 hours following application.

C. CCP Base shall be completely dry and cured for a minimum of 7 days prior to application of primer and finish.

**3.04 FIELD QUALITY CONTROL**

A. The contractor shall be responsible for the proper application of the Commercial Cement Plaster 1 materials.

B. Dryvit assumes no responsibility for on-site inspections or application of its products

**3.05 PROTECTION**

A. The Commercial Cement Plaster 1 materials shall be protected from weather and other damage until permanent protection in the form of flashings, sealants, etc. are installed.

**END OF SECTION**

**SECTION 096750**
**FLUID APPLIED FLOORING**

## PART 1 - GENERAL

### 1.01 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 1 Specification Sections, apply to this Section.

### 1.02 SUMMARY

A. This Section includes fluid-applied flooring systems in areas scheduled, including required and / or necessary surface preparation, and application of primer, aggregate, and intermediate and finish system coats. Types of fluid-applied flooring systems include the following:
   1. Seamless epoxy broadcast flooring system 1/8” thick direct applied to concrete substrate.

### 1.03 SUBMITTALS

A. General: Submit the following according to Conditions of the Contract and Division 1 Specification Sections.
   1. Product data:
   2. Provide the manufacturer's technical information, including label analysis and instructions for handling, storing, and applying each material proposed for use.
   3. List each material and the specific finish system and application. Identify each material by the manufacturer's catalog number and general classification.
   4. Material Safety Data Sheets (MSDS) for each separate system component for which health and safety informational material is required by law or regulation to be published.
   5. Samples for initial finished surface color selection in the form of manufacturer's color charts.
   6. Samples for Verification Purposes: Provide samples of each color and material to be applied with texture to simulate actual conditions on representative samples of the actual substrate.
   7. Prepare a test patch at the job site for approval of texture and color to be used as the job standard.

### 1.04 QUALITY ASSURANCE

A. Applicator Qualifications: Engage an experienced applicator, who may be approved and certified by the manufacturer, and who has successfully completed at least five epoxy flooring system applications similar in material and extent to those indicated for the Project, in each of the preceding three years.

B. Single-Source Responsibility: Provide primers and compatible undercoat material and broadcast material either produced by, or recommended for use by, the same manufacturer as the finish coats for each type of coating.

### 1.05 DELIVERY, STORAGE, AND HANDLING

A. Deliver materials to the job site in the manufacturer's original, new, unopened packages, and containers bearing manufacturer's name and label.

B. Store materials in a dry, enclosed area protected from the elements, as recommended by the manufacturer. Ensure that ambient environmental conditions within the storage area can be kept within the manufacturer's range of temperature and humidity.

### 1.06 WARRANTY

A. Submit a one year warranty against defects in material and workmanship, upon substantial completion.

## PART 2 - PRODUCTS

### 2.01 MANUFACTURERS:

A. Subject to compliance with requirements, manufacturers offering epoxy flooring products/systems which may be incorporated into the Work include, but are not necessarily limited to, the following:
   1. Dur-O-Quartz, Dur-O-Flex, Inc.
   2. Eucopoxy Tufcoat DBS, Euclid Chemical Co.
   3. Quartzite 6000, Valspar Corp.
   4. Floroquartz System, Florock
   5. Plexiquartz System, Plexi-Chemie, Inc.
   6. Stratashield, Tnemec Company, Inc.

### 2.02 MINIMUM PHYSICAL PROPERTIES OF FLUID-APPLIED FLOORING FINISH

| PHYSICAL PROPERTY | TEST | RESULT |
|---|---|---|
| PENCIL HARDNESS | ASTM D-3363 | HB |
| BOND STRENGTH TO CONC. | ASTM D-4541 | 865 PSI |
| IMPACT RESISTANCE | ASTM D-2794 | 58 IN./LBS. |
| DRY HEAT RESISTANCE | ASTM D-2485 | 180 DEG. F |
| ABRASION RESISTANCE (CS17 WHEEL 1 KG. LOAD 1000 CYCLES) | ASTM D-4060 | 64.8 MG. LOSS |
| FLEXIBILITY (STEEL, 180 DEG. BEND, 1/8" MANDREL) | ASTM D-522 | PASSES |
| COEFFICIENT OF FRICTION (STANDARD SLIP-RESISTANCE) | ASTM C-1028 | .60 (PASSES WET AND DRY) |
| | | |

## PART 3 - EXECUTION

### 3.01 EXAMINATION AND TESTING

A. Examine substrates and conditions under which coatings will be applied for compliance with requirements on applying coatings. Surfaces to receive coatings must be thoroughly dry before coatings are applied.
   1. Do not proceed with coating application until unsatisfactory conditions have been corrected. Start of application will be construed as the Applicator's acceptance of surfaces within that particular area.

B. Test concrete slab and / or bedding substrate for moisture using ASTM F1869 “Standard Test Method for Measuring Moisture Vapor Emission Rate of Concrete Subfloor Using Anhydrous Calcium Chloride” or other approved means. Where test results indicate values not acceptable to finish flooring manufacturer, provide and install the following moisture vapor barrier system at no additional cost to the Owner:
   1. VAP 1 PH, Koester American Corp. or equal approved product.

C. Where vapor barrier system may be required, finish flooring manufacturer shall furnish certification indicating suitability of barrier system product as a substrate material, together with manufacturers' instructions and recommendations regarding preparation and installation.

## 3.02 PREPARATION

A. General: Surface preparation of concrete slab as substrate or of moisture barrier as substrate. shall be performed in strict accord with written specifications of manufacturer of applied coating system coming into direct contact with substrate.

B. Concrete Surface Preparation: Clean and prepare concrete surfaces to be coated according to the manufacturer's instructions for bare concrete floor slabs. Refer to SSPC-SP13/NACE 6. Minimum concrete substrate cure is 28 days at 75 deg. F.
   1. Create a surface profile with a steel blast machine and diamond grinders for edges.
   2. Rinse thoroughly to achieve a final pH between 6.0 and 10.0.
   3. Verify that surface is dry and perfectly clean, free of all oil, grease, detergent film, sealers and/or curing compounds, suitably profiled, and within acceptable pH range.

## 3.03 DETAILS

A. Thoroughly rout and vacuum moving cracks and joints, then fill with manufacturer's self-leveling filler.

B. Pre-patch non-moving surface deviations with patching compound comprised of 100% solids epoxy and aggregate.

C. Key in" all drains, edges and transition points according to manufacturers instructions.

D. Install integral cove base at perimeter wall, as shown and where scheduled.

## 3.04 FLUID-APPLIED FLOORING INSTALLATION

A. Adhere strictly to manufacturer's current written instructions and recommended spreading rates per coat.

B. Apply prime color coat of product and allow to cure.

C. Apply second color coat of product and apply aggregate before allowing to cure.

D. Broadcast application of non-skid aggregate to excess into wet color coat. Allow to cure.

E. Sweep up excess aggregate.

F. Repeat above application steps as required by manufacturer to attain recommended dry coat thickness for intended use of room areas being coated.

G. Apply final topcoat of epoxy.

## 3.05 CLEANING

A. Cleanup: At the end of each work day, remove rubbish, empty cans, rags, and other discarded materials from the site. After completing work, clean spattered surfaces. Do not scratch or damage adjacent finished surfaces.

## 3.06 PROTECTION

A. Protect work of other trades against damage from seamless flooring operation. Correct damage by cleaning, repairing, replacing, and recoating, as acceptable to the Architect. Leave in an undamaged condition.

B. At completion of other trade's construction activities, touch up and restore damaged or defaced flooring surfaces.

**END OF SECTION 096750**

**SECTION 099000**
**PAINTING**

## PART 1 - GENERAL

### 1.01 RELATED DOCUMENTS:

A. Drawings and general provisions of Contract, including General and Supplementary Conditions and Division-1 Specification sections, apply to work of this section.

### 1.02 DESCRIPTION OF WORK:

A. Extent of painting work is indicated on drawings and schedules, and as herein specified.

B. Work includes painting and finishing of interior and exterior exposed items and surfaces throughout project, except as otherwise indicated.

C. Surface preparation, priming and coats of paint specified are in addition to shop-priming and surface treatment specified under other sections of work.

D. Work includes field painting of exposed bare and covered pipes and ducts (including color coding), and of hangers, exposed steel and iron work, and primed metal surfaces of equipment installed under mechanical and electrical work, except as otherwise indicated.

E. "Paint" as used herein means all coating systems materials, including primers, emulsions, enamels, stains, sealers and fillers, and other applied materials whether used as prime, intermediate or finish coats.

F. Surfaces to be Painted: Except where natural finish of material is specifically noted as a surface not to be painted, paint exposed surfaces whether or not colors are designated in "schedules". Where items or surfaces are not specifically mentioned, paint the same as similar adjacent materials or areas. If color or finish is not designated, Architect will select these from standard colors or finishes available.

G. Following categories of work are not included as part of field-applied finish work.

H. Pre-Finished Items: Unless otherwise indicated, do not include painting when factory- finishing or installer-finishing is specified for such items as (but not limited to) metal toilet enclosures, prefinished partition systems, acoustic materials, architectural woodwork and casework, elevator entrance doors and frames, elevator equipment, and finish mechanical and electrical equipment, including light fixtures, switchgear and distribution cabinets.

I. Concealed Surfaces: Unless otherwise indicated, painting is not required on surfaces such as walls or ceilings in concealed areas and generally inaccessible areas, foundation spaces, furred areas, utility tunnels, pipe spaces, duct shafts and elevator shafts.

J. Finished Metal Surfaces: Unless otherwise indicated, metal surfaces of anodized aluminum, stainless steel, chromium plate, copper, bronze and similar finished materials will not require finish painting.

K. Operating Parts: Unless otherwise indicated, moving parts of operating units, mechanical and electrical parts, such as valve and damper operators, linkages, sinkages, sensing devices, motor and fan shafts will not require finish painting.

L. Following categories of work are included under other sections of these specifications.

M. Shop Priming: Unless otherwise specified, shop priming of ferrous metal items is included under various sections for structural steel, metal fabrications, hollow metal work and similar items.

N. Unless otherwise specified, shop priming of fabricated components such as architectural woodwork, wood casework and shop-fabricated or factory-built mechanical and electrical equipment or accessories is included under other sections of these specifications.

O. Do not paint over any code-required labels, such as Underwriters' Laboratories and Factory Mutual, or any equipment identification, performance rating, name, or nomenclature plates.

**1.03 QUALITY ASSURANCE:**

A. Single Source Responsibility: Provide primers and other undercoat paint produced by same manufacturer as finish coats. Use only thinners approved by paint manufacturer, and use only within recommended limits.

B. Coordination of Work: Review other sections of these specifications in which prime paints are to be provided to ensure compatibility of total coatings systems for various substrates. Upon request from other trades, furnish information or characteristics of finish materials provided for use, to ensure compatible prime coats are used.

**1.04 SUBMITTALS:**

A. Product Data: Submit manufacturer's technical information including paint label analysis and application instructions for each material proposed for use.

B. Samples: Prior to beginning work, Architect will furnish color chips for surfaces to be painted. Use representative colors when preparing samples for review. Submit samples for Architect's review of color and texture only. Provide a listing of material and application for each coat of each finish sample.

C. On 12" x 12" hardboard, provide two samples of each color and material, with texture to simulate actual conditions. Resubmit samples as requested by Architect until acceptable sheen, color, and texture is achieved.

D. On actual wood surfaces, provide two 4" x 8" samples of natural and stained wood finish. Label and identify each as to location and application.

E. On concrete masonry, provide two 4" square samples of masonry for each type of finish and color, defining filler, prime and finish coat.

**1.05 DELIVERY AND STORAGE:**

A. Deliver materials to job site in original, new and unopened packages and containers bearing manufacturer's name and label, and following information:

B. Name or title of material.Manufacturer's name.

C. Fed. Spec. number, if applicable.Thinning instructions.

D. Manufacturer's stock number Contents by volume, for major pigment

E. and date of manufacturer and vehicle constituents

F. Application instructions.Color name and number.

G. Store materials not in actual use in tightly covered containers. Maintain containers used in storage of paint in a clean condition, free of foreign materials and residue.

H. Protect from freezing where necessary. Keep storage area neat and orderly. Remove oily rags and waste daily. Take all precautions to ensure that workmen and work areas are adequately protected from fire hazards and health hazards resulting from handling, mixing and application of paints.

**1.06 JOB CONDITIONS:**

A. Apply water-base paints only when temperature of surfaces to be painted and surrounding air temperatures are between 50 degrees F (10 degrees C) and 90 degrees F (32 degrees C), unless otherwise permitted by paint manufacturer's printed instructions.

B. Apply solvent-thinned paints only when temperature of surfaces to be painted and surrounding air temperatures are between 45 degrees F (7 degrees C) and 95 degrees F (35 degrees C), unless otherwise permitted by paint manufacturer's printed instructions.

C. Do not apply paint in snow, rain, fog or mist, or when relative humidity exceeds 85%, or to damp or wet surfaces, unless otherwise permitted by paint manufacturer's printed instructions.

D. Painting may be continued during inclement weather if areas and surfaces to be painted are enclosed and heated within temperature limits specified by paint manufacturer during application and drying periods.

## PART 2 - PRODUCTS

### 2.01 ACCEPTABLE MANUFACTURERS:

A. Manufacturers:
   1. Sherwin Williams (basis of design)
   2. Coronado Paint Company/Benjamin Moore

### 2.02 MATERIALS:

A. Material Quality: Provide best quality grade of various types of coatings as regularly manufactured by acceptable paint materials manufacturers. Materials not displaying manufacturer's identification as a standard, best-grade product will not be acceptable.

B. Color Pigments: Pure, non-fading, applicable types to suit substrates and service indicated.

### 2.03 INTERIOR PAINT SYSTEMS (IPS):

A. IPS 1:Concrete and Concrete Block
   1. 1st coat:Sherwin Williams Loxon Primer
   2. 2nd coat:Sherwin Williams - K46W00151-Pro Industrial Precatalyzed Waterbased Semi-Gloss Epoxy.
   3. 3rd coat:Sherwin Williams - K46W00151-Pro Industrial Precatalyzed Waterbased Semi-Gloss Epoxy.

B. IPS 2:Glass Mat Gyp. Bd. Ceilings:
   1. 1st coat:Sherwin Williams - B28W08000-PVA Drywall Primer & Sealer
   2. 2nd coat:Sherwin Williams - K46W00151-Pro Industrial Precatalyzed Waterbased Semi-Gloss Epoxy
   3. 3rd coat:Sherwin Williams - K46W00151-Pro Industrial Precatalyzed Waterbased Semi-Gloss Epoxy

### 2.04 EXTERIOR PAINT SYSTEMS (EPS)

A. EPS 1:Metal Doors and Frames
   1. 1st coat:Sherwin Williams - B66W00011 - Pro Industrial DTM Primer/Finish
   2. 2nd coat:Sherwin Williams - B66W01151 - Pro Industrial DTM Acrylic Semi-Gloss
   3. 3rd coat:Sherwin Williams - B66W01151 - Pro Industrial DTM Acrylic Semi-Gloss

B. EPS 2:Cementitious Siding:
   1. 1st coat:Sherwin Williams - A82W00151 - A100 Exterior Latex Satin
   2. 2nd coat:Sherwin Williams - A82W00151 - A100 Exterior Latex Satin

## PART 3 - EXECUTION

### 3.01 INSPECTION:

A. Applicator must examine areas and conditions under which painting work is to be applied and notify Contractor in writing of conditions detrimental to proper and timely completion of work. Do not proceed with work until unsatisfactory conditions have been corrected in a manner acceptable to Applicator.

B. Starting of painting work will be construed as Applicator's acceptance of surfaces and conditions within any particular area.

C. Do not paint over dirt, rust, scale, grease, moisture, scuffed surfaces, or conditions otherwise detrimental to formation of a durable paint film.

### 3.02 SURFACE PREPARATION:

A. General: Perform preparation and cleaning procedures in accordance with paint manufacturer's instructions and as herein specified, for each particular substrate condition.

B. Provide barrier coats over incompatible primers or remove and reprime as required. Notify Architect in writing of any anticipated problems in using the specified coating systems with substrates primed by others.

C. Remove hardware, hardware accessories, machined surfaces, plates, lighting fixtures, and similar items in place and not to be finish-painted, or provide surface-applied protection prior to surface preparation and painting operations. Remove, if necessary, for complete painting of items and adjacent surfaces. Following completion of painting of each space or area, reinstall removed items.

D. Clean surfaces to be painted before applying paint or surface treatments. Remove oil and grease prior to mechanical cleaning.

E. Program cleaning and painting so that contaminants from cleaning process will not fall onto wet, newly-painted surfaces.

F. Cementitious Materials: Prepare cementitious surfaces of concrete, concrete block, cement plaster and cement-asbestos board to be painted by removing efflorescence, chalk, dust, dirt, grease, oils, and by roughening as required to remove glaze.

G. Determine alkalinity and moisture content of surfaces to be painted by performing appropriate tests. If surfaces are found to be sufficiently alkaline to cause blistering and burning of finish paint, correct this condition before application of paint. Do not paint over surfaces where moisture content exceeds that permitted in manufacturer's printed directions.

H. Clean concrete floor surfaces scheduled to be painted with a commercial solution of muriatic acid, or other etching cleaner. Flush floor with clean water to neutralize acid, and allow to dry before painting.

I. Wood: Clean wood surfaces to be painted of dirt, oil, or other foreign substances with scrapers, mineral spirits, and sandpaper, as required. Sandpaper smooth those finished surfaces exposed to view, and dust off. Scrape and clean small, dry, seasoned knots and apply a thin coat of white shellac or other recommended knot sealer, before application of priming coat. After priming, fill holes and imperfections in finish surfaces with putty or plastic wood-filler. Sandpaper smooth when dried.

J. Prime, stain, or seal wood required to be job-painted immediately upon delivery to job. Prime edges, ends, faces, undersides, and backsides of such wood, including cabinets, counters, cases, paneling.

K. When transparent finish is required, use spar varnish for backpriming.

L. Backprime paneling on interior partitions only where masonry, plaster, or other wet wall construction occurs on backside.

M. Seal tops, bottoms, and cut-outs of unprimed wood doors with a heavy cot of varnish or equivalent sealer immediately upon delivery to job.

N. Ferrous Metals: Clean ferrous surfaces, which are not galvanized or shop-coated, of oil, grease, dirt, loose mill scale and other foreign substances by solvent or mechanical cleaning.

O. Touch-up shop-applied prime coats wherever damaged or bare, where required by other sections of these specifications. Clean and touch-up with same type shop primer.

P. Galvanized Surfaces: Clean free of oil and surface contaminants with non-petroleum based solvent.

**3.03 MATERIALS PREPARATION:**

A. Mix and prepare painting materials in accordance with manufacturer's directions.

B. Maintain containers used in mixing and application of paint in a clean condition, free of foreign materials and residue.

C. Stir materials before application to produce a mixture of uniform density, and stir as required during application. Do not stir surface film into material. Remove film and, if necessary, strain material before using.

**3.04 APPLICATION:**

A. General: Apply paint in accordance with manufacturer's directions. Use applicators and techniques best suited for substrate and type of material being applied.

B. Paint colors, surface treatments, and finishes, are indicated in "schedules" of the contract documents.

C. Provide finish coats which are compatible with prime paints used.

D. Apply addition coats when undercoats, stains or other conditions show through final coat of paint, until paint film is of uniform finish, color and appearance. Give special attention to insure that surfaces, including edges, corners, crevices, welds, and exposed fasteners receive a dry film thickness equivalent to that of flat surfaces.

E. Paint surfaces behind movable equipment and furniture same as similar exposed surfaces. Paint surfaces behind permanently- fixed equipment or furniture with prime coat only before final installation of equipment.

F. Paint interior surfaces of ducts, where visible through registers or grilles, with a flat, non-specular black paint.

G. Paint back sides of access panels, and removable or hinged covers to match exposed surfaces.

H. Finish exterior doors on tops, bottoms and side edges same as exterior faces, unless otherwise indicated.

I. Sand lightly between each succeeding enamel or varnish coat.

J. Omit first coat (primer) on metal surfaces which have been shop-primed and touch-up painted, unless otherwise indicated.

K. Scheduling Painting: Apply first-coat material to surfaces that have been cleaned, pretreated or otherwise prepared for painting as soon as practicable after preparation and before subsequent surface deterioration.

L. Allow sufficient time between successive coatings to permit proper drying. Do not recoat until paint has dried to where it feels firm, does not deform or feel sticky under moderate thumb pressure, and application of another coat of paint does not cause lifting or loss of adhesion of the undercoat.

M. Minimum Coating Thickness: Apply materials at not less than manufacturer's recommended spreading rate, to establish a total dry film thickness as indicated or, if not indicated, as recommended by coating manufacturer.

N. Mechanical items to be painted include, but are not limited to, items which may be indicated on drawings or in Division 15 specifications section.

O. Electrical items to be painted include, but are not limited to, : items which may be indicated on drawings or in Division 16 specifications section text.the following:

P. Prime Coats: Apply prime coat of material which is required to be painted or finished, and which has not been prime coated by others.

Q. Recoat primed and sealed surfaces where there is evidence of suction spots or unsealed areas in first coat, to assure a finish coat with no burn-through or other defects due to insufficient sealing.

R. Stipple Enamel Finish: Roll and redistribute paint to an even and fine texture. Leave no evidence of rolling such as laps, irregularity in texture, skid marks, or other surface imperfections.

S. Pigmented (Opaque) Finishes: Completely cover to provide an opaque, smooth surface of uniform finish, color, appearance and coverage. Cloudiness, spotting, holidays, laps, brush marks, runs, sags, ropiness or other surface imperfections will not be acceptable.

T. Transparent (Clear) Finishes: Use multiple coats to produce glass-smooth surface film of even luster. Provide a finish free of laps, cloudiness, color irregularity, runs, brush marks, orange peel, nail holes, or other surface imperfections.

U. Provide satin finish for final coats, unless otherwise indicated.

V. Completed Work: Match approved samples for color, texture and coverage. Remove, refinish or repaint work not in compliance with specified requirements.

**3.05 CLEAN-UP AND PROTECTION:**

A. Clean-Up: During progress of work, remove from site discarded paint materials, rubbish, cans and rags at end of each work day.

B. Upon completion of painting work, clean window glass and other paint-spattered surfaces. Remove spattered paint by proper methods of washing and scraping, using care not to scratch or otherwise damage finished surfaces.

C. Protection: Protect work of other trades, whether to be painted or not, against damage by painting and finishing work. Correct any damage by cleaning, repairing or replacing, and repainting, as acceptable to Architect.

D. Provide "Wet Paint" signs as required to protect newly-painted finishes. Remove temporary protective wrappings provided by others for protection of their work, after completion of painting operations.

E. At completion of work of other trades, touch-up and restore all damaged or defaced painted surfaces.

**END OF SECTION 099000**

**SECTION 101400**
**PLASTIC SIGNS**

## PART 1 - GENERAL

### 1.01 RELATED DOCUMENTS:

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division-1 Specification sections, apply to the work of this section.

### 1.02 DESCRIPTION OF WORK:

A. Forms of specialty signs required include the following:
   1. Panel Signs (Plastic Room Identification Signs). Signs to be installed at every room.

### 1.03 QUALITY ASSURANCE:

A. Uniformity of Manufacturer: For each sign form and graphic image process indicated furnish products of a single manufacturer.

### 1.04 SUBMITTALS:

A. Shop Drawings: Submit shop drawings for fabrication and erection of specialty signs. Include plans, elevations, and large scale details of sign wording and lettering layout. Show anchorages and accessory items. Furnish location template drawings for items supported or anchored to permanent construction.

B. Furnish full-size spacing templates for individual building- mounted letters and numbers.

C. Product Data: Submit manufacturer's technical data and installation instructions for each type of sign required.

D. Samples: Submit samples of each sign form and material showing finishes, colors, surface textures and qualities of manufacturer and design of each sign component including graphics.

## PART 2 - PRODUCTS

### 2.01 MANUFACTURERS:

A. Acceptable Manufacturers: Subject to compliance with requirements, manufacturers offering products which may be incorporated into the Work include, but are not necessarily limited to, the following:
   1. Manufacturers of Panel Signs (Plastic Room Identification Signs):
      a. Andco Industries Corp.
      b. Best Manufacturing Co.
      c. U.S. Identity Group, LLC
      d. Multi-graphics
      e. Inner-Graphic Systems

### 2.02 PANEL SIGNS (PLASTIC ROOM IDENTIFICATION SIGNS):

A. Plastic Room Identification Signs shall be 8" x 8" or as otherwise indicated, with minimum 3/4" high letters and numbers (see details of specific sign types at end of this section)., with 1/32" thick raised letters, and Braille tag each (Grade 2). Sign thickness shall be 3/16". Mounting shall be SAM (Silastic Adhesive Mount). Colors to be selected. Where signs are scheduled to be mounted on glass panels, provide adhesive film on inside of glass surface of same size of sign, to cover mounting. Color same as sign.

B. Handicapped Access Signage shall be square corner, level edge, full center format featuring International Symbol for handicapped access.

## PART 3 - EXECUTION

### 3.01 INSTALLATION:

A. General: Locate sign units and accessories where shown or scheduled, using mounting methods of the type described and in compliance with the manufacturer's instructions.

B. Install sign units level, plumb and at the height indicated, with sign surfaces free from distortion or other defects in appearance.

C. Metal Numbers: Mount letters and numbers using standard fastening methods recommended by the manufacturer for the letter form, type of mounting, wall construction and condition of exposure indicated. Provide heavy paper template to establish letter spacing and to locate holes for fasteners.

D. Projected Mounting: Mount letters at 1/2" from the wall surface indicated.

E. Panel Signs (Plastic Room Identification Signs):
   1. Attach plastic panel signs to wall, door and door frame surfaces using Mohawk SAM mounting system or equal. Use double-sided vinyl tape to hold sign in place until adhesive has been fully cured.

**3.02 CLEANING AND PROTECTION:**

A. At completion of the installation, clean soiled sign surfaces in accordance with the manufacturer's instructions. Protect units from damage until acceptance by the Owner.

**3.03 NOTES:**

A. Install the following sign on outside face of all Mechanical and Electrical Room doors, using 3/4" high letters (all caps):
   1. STORAGE NOT PERMITTED

B. Provide “FIRE ALARM PULL STATION AND FIRE EXTINGUISHER INSIDE” signs where indicated on the drawings, Architectural and Electrical, or if not so indicated, where required by applicable Code. Arrange sign on 8" x 8" plaque using appropriate size lettering. Color to be selected.

**END OF SECTION**

**SECTION 102800**
**TOILET ACCESSORIES**

## PART 1 GENERAL

### 1.01 SECTION INCLUDES

A. Accessories for toilet rooms.

B. Grab bars.

### 1.02 REFERENCES

A. ASTM A 123/A 123M - Standard Specification for Zinc (Hot-Dip Galvanized) Coatings on Iron and Steel Products; 2002.

B. ASTM A 269 - Standard Specification for Seamless and Welded Austenitic Stainless Steel Tubing for General Service; 2004.

C. ASTM A 666 - Standard Specification for Annealed or Cold-Worked Austenitic Stainless Steel Sheet, Strip, Plate, and Flat Bar; 2003.

D. ASTM C 1036 - Standard Specification for Flat Glass; 2001.

E. GSA CID A-A-3002 - Mirrors, Glass; U.S. General Services Administration; 1996.

### 1.03 SUBMITTALS

A. See Section 013000 - Submittals, for submittal procedures.

B. Product Data: Provide data on accessories describing size, finish, details of function, attachment methods.

C. Manufacturer's Installation Instructions: Indicate special procedures and conditions requiring special attention.

### 1.04 COORDINATION

A. Coordinate the work with the placement of internal wall reinforcement and reinforcement of toilet partitions to receive anchor attachments.

## PART 2 PRODUCTS

### 2.01 MANUFACTURERS

A. Products listed are made by Bobrick, unless noted otherwise.

B. Other Acceptable Manufacturers, subject to compliance with the Contract Documents:
   1. American Specialties, Inc: www.americanspecialties.com.
   2. Bradley Corporation: www.bradleycorp.com.
   3. Substitutions: Section 016000 - Product Requirements.

C. All items of each type to be made by the same manufacturer.

### 2.02 MATERIALS

A. Accessories - General: Shop assembled, free of dents and scratches and packaged complete with anchors and fittings, steel anchor plates, adapters, and anchor components for installation.
   1. Grind welded joints smooth.
   2. Fabricate units made of metal sheet of seamless sheets, with flat surfaces.

B. Keys: Provide 20 keys for each accessory to Port Orange ; master key all lockable accessories.

C. Stainless Steel Sheet: ASTM A 666, Type 304.

D. Stainless Steel Tubing: ASTM A 269, Type 304 or 316.

E. Mirror Glass: Float glass, ASTM C 1036 Type I, Class 1, Quality Q2, with silvering, copper coating, and suitable protective organic coating to copper backing in accordance with GSA CID A-A-3002.

F. Fasteners, Screws, and Bolts: Hot dip galvanized, tamper-proof , security type.

G. Expansion Shields: Fiber, lead, or rubber as recommended by accessory manufacturer for component and substrate.

**2.03 FINISHES**

A. Stainless Steel: No. 4 satin brushed finish, unless otherwise noted.

B. Galvanizing for Items Other than Sheet: Comply with ASTM A 123/A 123M; galvanize ferrous metal and fastening devices.

**2.04 TOILET ROOM ACCESSORIES**

A. See drawing A2.1 for drawings & schedule showing locations and quantities of toilet accessories.

**PART 3 EXECUTION**

**3.01 EXAMINATION**

A. Verify existing conditions before starting work.

B. Verify exact location of accessories for installation.

C. Verify that field measurements are as indicated on drawings.

D. See Section 061000 - Rough Carpentry for installation of blocking in walls.

**3.02 PREPARATION**

A. When applicable, deliver inserts and rough-in frames to site for timely installation.

B. Provide templates and rough-in measurements as required.

**3.03 INSTALLATION**

A. Install accessories in accordance with manufacturers' instructions.

B. Install plumb and level, securely and rigidly anchored to substrate.

C. Mounting Heights and Locations: As required by accessibility regulations and as indicated on drawings.

**END OF SECTION**

## SECTION 104400
## LIFE SAFETY EQUIPMENT AND ACCESSORIES

### PART 1 GENERAL

### 1.01 SECTION INCLUDES

A. Fire extinguishers to be installed as directed by Fire Marshall.

### 1.02 REFERENCE STANDARDS

A. NFPA 10 - Standard for Portable Fire Extinguishers; 2013.

B. UL (DIR) - Online Certifications Directory; current listings at database.ul.com.

### 1.03 PERFORMANCE REQUIREMENTS

A. Conform to NFPA 10.

B. Provide extinguishers classified and labeled by Underwriters Laboratories Inc. for the purpose specified and indicated.

### 1.04 SUBMITTALS

A. See Section 013000 - Submittals, for submittal procedures.

B. Product Data: Provide extinguisher operational features, color and finish, and anchorage details.

C. Manufacturer's Certificate: Certify that products meet or exceed specified requirements.

D. Maintenance Data: Include test, refill or recharge schedules and re-certification requirements.

### PART 2 PRODUCTS

### 2.01 FIRE EXTINGUISHERS

A. Fire Extinguishers - General: Comply with product requirements of NFPA 10 and applicable codes, whichever is more stringent.

B. Dry Chemical: Stainless steel tank, with pressure gage.
   1. Class 4A:60B:C.
   2. Size 10.
   3. Finish: Baked enamel, red color.

### 2.02 ACCESSORIES

A. Extinguisher Brackets: Formed steel, chrome-plated, with latching steel strap.

### PART 3 EXECUTION

### 3.01 EXAMINATION

A. Verify existing conditions before starting work.

### 3.02 INSTALLATION

A. Install all specified products in accordance with manufacturer's instructions.

B. Secure all specified products rigidly in place.

C. Place extinguishers on wall brackets, as directed.

### 3.03 CLEANING AND PROTECTION

A. Clean all specified products after installation and prior to Substantial Completion and Owner occupancy.

B. Protect all installed products from damage by subsequent construction activities.

**END OF SECTION**

**SECTION 31 10 00**
**SITE CLEARING**

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

B. All material and construction shall comply with all applicable FDOT and OSHA requirements and standards (latest editions).

C. Refer to Geotechnical Report for additional information and requirements for site clearing, fill, pavement, underdrain and other geotechnical components.

D. Contractor required to submit an NOI to DEP and comply with all erosion control best management practices and inspection reporting requirements.

1.2 SUMMARY

A. Section Includes:

1. Protecting existing vegetation to remain.
2. Removing existing vegetation.
3. Clearing and grubbing.
4. Stripping and stockpiling topsoil.
5. Stripping and stockpiling rock.
6. Removing above- and below-grade site improvements.
7. Disconnecting, capping or sealing, and removing site.
8. Temporary erosion and sedimentation control.

B. Related Requirements:

1. Section 01 50 00 "Temporary Facilities and Controls" for temporary erosion- and sedimentation-control measures.

C. Related Requirements:

1. Section 01500 "Temporary Facilities and Controls" for temporary erosion- and sedimentation-control measures.

1.3 DEFINITIONS

A. Subsoil: Soil beneath the level of subgrade; soil beneath the topsoil layers of a naturally occurring soil profile, typified by less than 1 percent organic matter and few soil organisms.

B. Surface Soil: Soil that is present at the top layer of the existing soil profile. In undisturbed areas, surface soil is typically called "topsoil," but in disturbed areas such as urban environments, the surface soil can be subsoil.

C. Topsoil: Top layer of the soil profile consisting of existing native surface topsoil or existing in-place surface soil; the zone where plant roots grow.

D. Topsoil: Top layer of the soil profile consisting of existing native surface topsoil or existing in-place surface soil; the zone where plant roots grow. Its appearance is generally friable, pervious, and black or a darker shade of brown, gray, or red than underlying subsoil; reasonably free of subsoil, clay lumps, gravel, and other objects larger than 2 inches in diameter; and free of weeds, roots, toxic materials, or other nonsoil materials.

E. Plant-Protection Zone: Area surrounding individual trees, groups of trees, shrubs, or other vegetation to be protected during construction and indicated on Drawings.

F. Tree-Protection Zone: Area surrounding individual trees or groups of trees to be protected during construction and indicated on Drawings.

G. Vegetation: Trees, shrubs, groundcovers, grass, and other plants.

## 1.4 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at Project site.

## 1.5 MATERIAL OWNERSHIP

A. Except for materials indicated to be stockpiled or otherwise remain Owner's property, cleared materials shall become Contractor's property and shall be removed from Project site.

## 1.6 INFORMATIONAL SUBMITTALS

A. Existing Conditions: Documentation of existing trees and plantings, adjoining construction, and site improvements that establishes preconstruction conditions that might be misconstrued as damage caused by site clearing.

1. Use sufficiently detailed photographs or video recordings.
2. Include plans and notations to indicate specific wounds and damage conditions of each tree or other plant designated to remain.

B. Topsoil stripping and stockpiling program.

C. Rock stockpiling program.

D. Record Drawings: Identifying and accurately showing locations of capped utilities and other subsurface structural, electrical, and mechanical conditions.

E. Burning: Documentation of compliance with burning requirements and permitting of authorities having jurisdiction. Identify location(s) and conditions under which burning will be performed.

## 1.7 QUALITY ASSURANCE

A. Topsoil Stripping and Stockpiling Program: Prepare a written program to systematically demonstrate the ability of personnel to properly follow procedures and handle materials and

equipment during the Work. Include dimensioned diagrams for placement and protection of stockpiles.

B. Rock Stockpiling Program: Prepare a written program to systematically demonstrate the ability of personnel to properly follow procedures and handle materials and equipment during the Work. Include dimensioned diagrams for placement and protection of stockpiles.

1.8 FIELD CONDITIONS

A. Traffic: Minimize interference with adjoining roads, streets, walks, and other adjacent occupied or used facilities during site-clearing operations.

1. Do not close or obstruct streets, walks, or other adjacent occupied or used facilities without permission from Owner and authorities having jurisdiction.
2. Provide alternate routes around closed or obstructed trafficways if required by Owner or authorities having jurisdiction.

B. Improvements on Adjoining Property: Authority for performing site clearing indicated on property adjoining Owner's property will be obtained by Owner before award of Contract.

1. Do not proceed with work on adjoining property until directed by Architect.

C. Salvageable Improvements: Carefully remove items indicated to be salvaged and store on Owner's premises where indicated by owner.

D. Utility Locator Service: Notify utility locator service for area where Project is located before site clearing.

E. Do not commence site clearing operations until temporary erosion- and sedimentation-control and plant-protection measures are in place.

F. Tree- and Plant-Protection Zones: Protect according to requirements in Tree Protection Plan

G. Soil Stripping, Handling, and Stockpiling: Perform only when the soil is dry or slightly moist.

PART 2 - PRODUCTS

2.1 MATERIALS

A. Satisfactory Soil Material: Requirements for satisfactory soil material are specified in Section 31 20 00 "Earth Moving."

1. Obtain approved borrow soil material off-site when satisfactory soil material is not available on-site.

PART 3 - EXECUTION

3.1 PREPARATION

A. Protect and maintain benchmarks and survey control points from disturbance during construction.

B. Verify that trees, shrubs, and other vegetation to remain or to be relocated have been flagged and that protection zones have been identified and enclosed according to requirements in the Tree Protection Plan

C. Protect existing site improvements to remain from damage during construction.

1. Restore damaged improvements to their original condition, as acceptable to Owner.

3.2 TEMPORARY EROSION AND SEDIMENTATION CONTROL

A. Provide temporary erosion- and sedimentation-control measures to prevent soil erosion and discharge of soil-bearing water runoff or airborne dust to adjacent properties and walkways, according to erosion- and sedimentation-control Drawings and requirements of authorities having jurisdiction.

B. Verify that flows of water redirected from construction areas or generated by construction activity do not enter or cross protection zones.

C. Inspect, maintain, and repair erosion- and sedimentation-control measures during construction until permanent vegetation has been established.

D. Remove erosion and sedimentation controls, and restore and stabilize areas disturbed during removal.

3.3 TREE AND PLANT PROTECTION

A. Protect trees and plants remaining on-site according to requirements in the Tree Protection Plan

B. Repair or replace trees, shrubs, and other vegetation indicated to remain or be relocated that are damaged by construction operations according to requirements in the Tree Protection Plan

3.4 EXISTING UTILITIES

A. Owner will arrange for disconnecting and sealing indicated utilities that serve existing structures before site clearing, when requested by Contractor.

1. Verify that utilities have been disconnected and capped before proceeding with site clearing.

B. Locate, identify, disconnect, and seal or cap utilities indicated to be removed or abandoned in place.

1. Arrange with utility companies to shut off indicated utilities.
2. Owner will arrange to shut off indicated utilities when requested by Contractor.

C. Locate, identify, and disconnect utilities indicated to be abandoned in place.

D. Interrupting Existing Utilities: Do not interrupt utilities serving facilities occupied by Owner or others, unless permitted under the following conditions and then only after arranging to provide temporary utility services according to requirements indicated:

1. Notify Owner not less than two days in advance of proposed utility interruptions.
2. Do not proceed with utility interruptions without Architect's written permission.

E. Excavate for and remove underground utilities indicated to be removed.

F. Removal of underground utilities is included in earthwork sections; in applicable fire suppression, plumbing, HVAC, electrical, communications, electronic safety and security, and utilities sections; and in Section 02 41 19 "Selective Demolition."

G. The contractor is responsible for the confirmation and protection of all existing utilities including Security Conduits. FPL feeder to control tower and main security lines may not be altered by the General Contractor without field verification and coordination with the owner. Contractor may not perform work within 5 feet of these lines without owner’s representation present.

## 3.5 CLEARING AND GRUBBING

A. Remove obstructions, trees, shrubs, and other vegetation to permit installation of new construction.

1. Do not remove trees, shrubs, and other vegetation indicated to remain or to be relocated.
2. Grind down stumps and remove roots larger than 2 inches in diameter, obstructions, and debris to a depth of 12 inches below exposed subgrade.
3. Use only hand methods or air spade for grubbing within protection zones.
4. Chip removed tree branches and dispose of off-site.

B. Fill depressions caused by clearing and grubbing operations with satisfactory soil material unless further excavation or earthwork is indicated.

1. Place fill material in horizontal layers not exceeding a loose depth of 8 inches, and compact each layer to a density equal to adjacent original ground.

## 3.6 TOPSOIL STRIPPING

A. Remove sod and grass before stripping topsoil.

B. Strip topsoil to depth of 6 inches in a manner to prevent intermingling with underlying subsoil or other waste materials.

1. Remove subsoil and nonsoil materials from topsoil, including clay lumps, gravel, and other objects larger than 2 inches in diameter; trash, debris, weeds, roots, and other waste materials.

C. Stockpile topsoil away from edge of excavations without intermixing with subsoil or other materials. Grade and shape stockpiles to drain surface water. Cover to prevent windblown dust and erosion by water.

1. Limit height of topsoil stockpiles to 72 inches.
2. Do not stockpile topsoil within protection zones.
3. Dispose of surplus topsoil. Surplus topsoil is that which exceeds quantity indicated to be stockpiled or reused.
4. Stockpile surplus topsoil to allow for respreading deeper topsoil.

## 3.7 STOCKPILING ROCK

A. Remove from construction area naturally formed rocks that measure more than 1 foot across in least dimension. Do not include excavated or crushed rock.

1. Separate or wash off non-rock materials from rocks, including soil, clay lumps, gravel, and other objects larger than 2 inches in diameter; trash, debris, weeds, roots, and other waste materials.

B. Stockpile rock away from edge of excavations without intermixing with other materials. Cover to prevent windblown debris from accumulating among rocks.

1. Limit height of rock stockpiles to 36 inches.
2. Do not stockpile rock within protection zones.
3. Dispose of surplus rock. Surplus rock is that which exceeds quantity indicated to be stockpiled or reused.
4. Stockpile surplus rock to allow later use by the Owner.

## 3.8 SITE IMPROVEMENTS

A. Remove existing above- and below-grade improvements as indicated and necessary to facilitate new construction.

B. Remove slabs, paving, curbs, gutters, and aggregate base as indicated.

1. Unless existing full-depth joints coincide with line of demolition, neatly saw-cut along line of existing pavement to remain before removing adjacent existing pavement. Saw-cut faces vertically.
2. Paint cut ends of steel reinforcement in concrete to remain with two coats of antirust coating, following coating manufacturer's written instructions. Keep paint off surfaces that will remain exposed.

## 3.9 DISPOSAL OF SURPLUS AND WASTE MATERIALS

A. Remove surplus soil material, unsuitable topsoil, obstructions, demolished materials, and waste materials including trash and debris, and legally dispose of them off Owner's property.

B. Burning tree, shrub, and other vegetation waste is permitted according to burning requirements and permitting of authorities having jurisdiction. Control such burning to produce the least smoke or air pollutants and minimum annoyance to surrounding properties. Burning of other waste and debris is prohibited.

C. Separate recyclable materials produced during site clearing from other nonrecyclable materials. Store or stockpile without intermixing with other materials, and transport them to recycling facilities. Do not interfere with other Project work.

END OF SECTION 31 10 00

**SECTION 31 20 00**
**EARTH MOVING**

PART 1 – GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

B. All material and construction shall comply with all applicable FDOT and OSHA requirements and standards (latest editions).

C. Refer to Geotechnical Report for additional information and requirements for site clearing, fill, pavement, underdrain and other geotechnical components.

D. Coordination with architectural information for additional building pad requirements.

1.2 SUMMARY

A. Section Includes:

1. Excavating and filling for rough grading the Site.
2. Preparing subgrades for slabs-on-grade, walks, pavements, turf and grasses, and plants.
3. Excavating and backfilling for buildings and structures.
4. Drainage course for concrete slabs-on-grade.
5. Subbase course for concrete walks and pavements.
6. Subbase course and base course for asphalt paving.
7. Subsurface drainage backfill for walls and trenches.
8. Excavating and backfilling trenches for utilities and pits for buried utility structures.
9. Excavating well hole to accommodate elevator-cylinder assembly.

B. Related Requirements:

1. Section 01 32 00 "Construction Progress Documentation" for recording preexcavation and earth-moving progress.
2. Section 03 30 00 "Cast-in-Place Concrete" for granular course if placed over vapor retarder and beneath the slab-on-grade.
3. Section 31 10 00 "Site Clearing" for site stripping, grubbing, stripping [and stockpiling] topsoil, and removal of above- and below-grade improvements and utilities.
4. Section 31 23 19 "Dewatering" for lowering and disposing of ground water during construction.
5. Section 31 50 00 "Excavation Support and Protection" for shoring, bracing, and sheet piling of excavations.
6. Section 32 92 00 "Turf and Grasses" for finish grading in turf and grass areas, including preparing and placing planting soil for turf areas.
7. Section 32 93 00 "Plants" for finish grading in planting areas and tree and shrub pit excavation and planting.

1.3 UNIT PRICES

A. Work of this Section is affected by unit prices for earth moving specified in Section 01 22 00 "Unit Prices."

B. Quantity allowances for earth moving are included in Section 01 21 00 "Allowances."

C. Rock Measurement: Volume of rock actually removed, measured in original position, but not to exceed the following. Unit prices for rock excavation include replacement with approved materials.

1. 24 inches outside of concrete forms other than at footings.
2. 12 inches outside of concrete forms at footings.
3. 6 inches outside of minimum required dimensions of concrete cast against grade.
4. Outside dimensions of concrete walls indicated to be cast against rock without forms or exterior waterproofing treatments.
5. 6 inches beneath bottom of concrete slabs-on-grade.
6. 6 inches beneath pipe in trenches, and the greater of 24 inches wider than pipe or 42 inches wide.

1.4 DEFINITIONS

A. Backfill: Soil material or controlled low-strength material used to fill an excavation.

1. Initial Backfill: Backfill placed beside and over pipe in a trench, including haunches to support sides of pipe.
2. Final Backfill: Backfill placed over initial backfill to fill a trench.

B. Base Course: Aggregate layer placed between the subbase course and hot-mix asphalt paving.

C. Bedding Course: Aggregate layer placed over the excavated subgrade in a trench before laying pipe.

D. Borrow Soil: Satisfactory soil imported from off-site for use as fill or backfill.

E. Drainage Course: Aggregate layer supporting the slab-on-grade that also minimizes upward capillary flow of pore water.

F. Excavation: Removal of material encountered above subgrade elevations and to lines and dimensions indicated.

1. Authorized Additional Excavation: Excavation below subgrade elevations or beyond indicated lines and dimensions as directed by Architect. Authorized additional excavation and replacement material will be paid for according to Contract provisions for unit prices.
2. Bulk Excavation: Excavation more than 10 feet in width and more than 30 feet in length.
3. Unauthorized Excavation: Excavation below subgrade elevations or beyond indicated lines and dimensions without direction by Architect. Unauthorized excavation, as well as remedial work directed by Architect, shall be without additional compensation.

G. Fill: Soil materials used to raise existing grades.

H. Rock: Rock material in beds, ledges, unstratified masses, conglomerate deposits, and boulders of rock material that exceed 1 cu. yd. for bulk excavation or 3/4 cu. yd. for footing, trench, and pit excavation that cannot be removed by rock-excavating equipment equivalent to the following

in size and performance ratings, without systematic drilling, ram hammering, ripping, or blasting, when permitted:

1. Equipment for Footing, Trench, and Pit Excavation: Late-model, track-mounted hydraulic excavator; equipped with a 42-inch maximum-width, short-tip-radius rock bucket; rated at not less than 138-hp flywheel power with bucket-curling force of not less than 28,700 lbf and stick-crowd force of not less than 18,400 lbf with extra-long reach boom.
2. Equipment for Bulk Excavation: Late-model, track-mounted loader; rated at not less than 230-hp flywheel power and developing a minimum of 47,992-lbf breakout force with a general-purpose bare bucket.

I. Rock: Rock material in beds, ledges, unstratified masses, conglomerate deposits, and boulders of rock material 3/4 cu. yd. or more in volume that exceed a standard penetration resistance of 100 blows/2 inches when tested by a geotechnical testing agency, according to ASTM D 1586.

J. Structures: Buildings, footings, foundations, retaining walls, slabs, tanks, curbs, mechanical and electrical appurtenances, or other man-made stationary features constructed above or below the ground surface.

K. Subbase Course: Aggregate layer placed between the subgrade and base course for hot-mix asphalt pavement, or aggregate layer placed between the subgrade and a cement concrete pavement or a cement concrete or hot-mix asphalt walk.

L. Subgrade: Uppermost surface of an excavation or the top surface of a fill or backfill immediately below subbase, drainage fill, drainage course, or topsoil materials.

M. Utilities: On-site underground pipes, conduits, ducts, and cables as well as underground services within buildings.

## 1.5 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct preexcavation conference at Project site.

1. Review methods and procedures related to earthmoving, including, but not limited to, the following:

a. Personnel and equipment needed to make progress and avoid delays.
b. Coordination of Work with utility locator service.
c. Coordination of Work and equipment movement with the locations of tree- and plant-protection zones.
d. Extent of trenching by hand or with air spade.
e. Field quality control.

## 1.6 ACTION SUBMITTALS

A. Product Data: For each type of the following manufactured products required:

1. Geotextiles.
2. Controlled low-strength material, including design mixture.
3. Geofoam.
4. Warning tapes.

B. Samples for Verification: For the following products, in sizes indicated below:

1. Geotextile: 12 by 12 inches.
2. Warning Tape: 12 inches long; of each color.

## 1.7 INFORMATIONAL SUBMITTALS

A. Qualification Data: For qualified testing agency.

B. Material Test Reports: For each on-site and borrow soil material proposed for fill and backfill as follows:

1. Classification according to ASTM D 2487.
2. Laboratory compaction curve according to ASTM D 1557.Retain one or both of first two paragraphs below if explosives are permitted. Retain second paragraph only if seismic survey is required with blasting.

C. Preexcavation Photographs or Videotape: Show existing conditions of adjoining construction and site improvements, including finish surfaces that might be misconstrued as damage caused by earth-moving operations. Submit before earth moving begins.

## 1.8 QUALITY ASSURANCE

A. Blasting: Comply with applicable requirements in NFPA 495, "Explosive Materials Code," and prepare a blasting plan reporting the following:

1. Types of explosive and sizes of charge to be used in each area of rock removal, types of blasting mats, sequence of blasting operations, and procedures that will prevent damage to site improvements and structures on Project site and adjacent properties.
2. Seismographic monitoring during blasting operations.

B. Seismic Survey Agency: An independent testing agency, acceptable to authorities having jurisdiction, experienced in seismic surveys and blasting procedures to perform the following services:

1. Report types of explosive and sizes of charge to be used in each area of rock removal, types of blasting mats, sequence of blasting operations, and procedures that will prevent damage to site improvements and structures on Project site and adjacent properties.
2. Seismographic monitoring during blasting operations.

C. Geotechnical Testing Agency Qualifications: Qualified according to ASTM E 329 and ASTM D 3740 for testing indicated.

## 1.9 FIELD CONDITIONS

A. Traffic: Minimize interference with adjoining roads, streets, walks, and other adjacent occupied or used facilities during earth-moving operations.

1. Do not close or obstruct streets, walks, or other adjacent occupied or used facilities without permission from Owner and authorities having jurisdiction.
2. Provide alternate routes around closed or obstructed traffic ways if required by Owner or authorities having jurisdiction.

B. Improvements on Adjoining Property: Authority for performing earth moving indicated on property adjoining Owner's property will be obtained by Owner before award of Contract.

1. Do not proceed with work on adjoining property until directed by Architect.

C. Utility Locator Service: Notify utility locator service for area where Project is located before beginning earth-moving operations.

D. Do not commence earth-moving operations until temporary site fencing and erosion- and sedimentation-control measures specified in Section 01 50 00 "Temporary Facilities and Controls" and Section 31 10 00 "Site Clearing" are in place.

E. Do not commence earth-moving operations until plant-protection measures specified in the Tree Protection Plan are in place.

F. The following practices are prohibited within protection zones:

1. Storage of construction materials, debris, or excavated material.
2. Parking vehicles or equipment.
3. Foot traffic.
4. Erection of sheds or structures.
5. Impoundment of water.
6. Excavation or other digging unless otherwise indicated.
7. Attachment of signs to or wrapping materials around trees or plants unless otherwise indicated.

G. Do not direct vehicle or equipment exhaust towards protection zones.

H. Prohibit heat sources, flames, ignition sources, and smoking within or near protection zones.

## PART 2 - PRODUCTS

### 2.1 SOIL MATERIALS

A. General: Provide borrow soil materials when sufficient satisfactory soil materials are not available from excavations: See Geotechnical Report.

B. Terms, descriptions, and gradations of granular soil materials in remaining paragraphs are examples only. Revise to comply with local practices and to suit Project. For example, granular materials may be referenced by state or local highway designations rather than by ASTM classifications.

C. Subbase Material: Naturally or artificially graded mixture of natural or crushed gravel, crushed stone, and natural or crushed sand; ASTM D 2940/D 2940M; with at least 90 percent passing a 1-1/2-inch sieve and not more than 12 percent passing a No. 200 sieve.

D. Base Course: Naturally or artificially graded mixture of natural or crushed gravel, crushed stone, and natural or crushed sand; ASTM D 294/D 2940M 0; with at least 95 percent passing a 1-1/2-inch sieve and not more than 8 percent passing a No. 200 sieve.

E. Engineered Fill: Naturally or artificially graded mixture of natural or crushed gravel, crushed stone, and natural or crushed sand; ASTM D 2940/D 2940M; with at least 90 percent passing a 1-1/2-inch sieve and not more than 12 percent passing a No. 200 sieve.

F. Bedding Course: Naturally or artificially graded mixture of natural or crushed gravel, crushed stone, and natural or crushed sand; ASTM D 2940/D 2940M; except with 100 percent passing a 1-inch sieve and not more than 8 percent passing a No. 200 sieve.

G. Drainage Course: Narrowly graded mixture of [washed ]crushed stone, or crushed or uncrushed gravel; ASTM D 448; coarse-aggregate grading Size 57; with 100 percent passing a 1-1/2-inch sieve and zero to 5 percent passing a No. 8 sieve.

H. Filter Material: Narrowly graded mixture of natural or crushed gravel, or crushed stone and natural sand; ASTM D 448; coarse-aggregate grading Size 67; with 100 percent passing a 1-inch sieve and zero to 5 percent passing a No. 4 sieve.

I. Sand: ASTM C 33/C 33M; fine aggregate.

J. Impervious Fill: Clayey gravel and sand mixture capable of compacting to a dense state.

## 2.2 GEOTEXTILES

A. Subsurface Drainage Geotextile: Nonwoven needle-punched geotextile, manufactured for subsurface drainage applications, made from polyolefins or polyesters; with elongation greater than 50 percent; complying with AASHTO M 288 and the following, measured per test methods referenced:

1. Survivability: Class 2; AASHTO M 288.
2. Survivability: As follows:

    a. Grab Tensile Strength: 157 lbf; ASTM D 4632.
    b. Sewn Seam Strength: 142 lbf; ASTM D 4632.
    c. Tear Strength: 56 lbf; ASTM D 4533.
    d. Puncture Strength: 56 lbf; ASTM D 4833.

3. Apparent Opening Size: No. 40 sieve, maximum; ASTM D 4751.
4. Permittivity: 0.5 per second, minimum; ASTM D 4491.
5. UV Stability: 50 percent after 500 hours' exposure; ASTM D 4355.

B. Separation Geotextile: Woven geotextile fabric, manufactured for separation applications, made from polyolefins or polyesters; with elongation less than 50 percent; complying with AASHTO M 288 and the following, measured per test methods referenced:

1. Survivability: Class 2; AASHTO M 288.
2. Survivability: As follows:

    a. Grab Tensile Strength: 247 lbf; ASTM D 4632.
    b. Sewn Seam Strength: 222 lbf; ASTM D 4632.
    c. Tear Strength: 90 lbf; ASTM D 4533.
    d. Puncture Strength: 90 lbf; ASTM D 4833.

3. Apparent Opening Size: No. 60 sieve, maximum; ASTM D 4751.
4. Permittivity: 0.02 per second, minimum; ASTM D 4491.
5. UV Stability: 50 percent after 500 hours' exposure; ASTM D 4355.

2.3 ACCESSORIES

A. Warning Tape: Acid- and alkali-resistant, polyethylene film warning tape manufactured for marking and identifying underground utilities, 6 inches wide and 4 mils thick, continuously inscribed with a description of the utility; colored as follows:

1. Red: Electric.
2. Yellow: Gas, oil, steam, and dangerous materials.
3. Orange: Telephone and other communications.
4. Blue: Water systems.
5. Green: Sewer systems.

B. Detectable Warning Tape: Acid- and alkali-resistant, polyethylene film warning tape manufactured for marking and identifying underground utilities, a minimum of 6 inches wide and 4 mils thick, continuously inscribed with a description of the utility, with metallic core encased in a protective jacket for corrosion protection, detectable by metal detector when tape is buried up to 30 inches deep; colored as follows:

1. Red: Electric.
2. Yellow: Gas, oil, steam, and dangerous materials.
3. Orange: Telephone and other communications.
4. Blue: Water systems.
5. Green: Sewer systems.

PART 3 - EXECUTION

3.1 PREPARATION

A. Protect structures, utilities, sidewalks, pavements, and other facilities from damage caused by settlement, lateral movement, undermining, washout, and other hazards created by earth-moving operations.

B. Protect and maintain erosion and sedimentation controls during earth-moving operations.

C. Protect subgrades and foundation soils from freezing temperatures and frost. Remove temporary protection before placing subsequent materials.

3.2 DEWATERING

A. Prevent surface water and ground water from entering excavations, from ponding on prepared subgrades, and from flooding Project site and surrounding area.

B. Protect subgrades from softening, undermining, washout, and damage by rain or water accumulation.

1. Reroute surface water runoff away from excavated areas. Do not allow water to accumulate in excavations. Do not use excavated trenches as temporary drainage ditches.

## 3.3 EXPLOSIVES

A. Explosives: Do not use explosives.

## 3.4 EXCAVATION, GENERAL

A. Unclassified Excavation: Excavate to subgrade elevations regardless of the character of surface and subsurface conditions encountered. Unclassified excavated materials may include rock, soil materials, and obstructions. No changes in the Contract Sum or the Contract Time will be authorized for rock excavation or removal of obstructions.

1. If excavated materials intended for fill and backfill include unsatisfactory soil materials and rock, replace with satisfactory soil materials.
2. Remove rock to lines and grades indicated to permit installation of permanent construction without exceeding the following dimensions:

    a. 24 inches outside of concrete forms other than at footings.
    b. 12 inches outside of concrete forms at footings.
    c. 6 inches outside of minimum required dimensions of concrete cast against grade.
    d. Outside dimensions of concrete walls indicated to be cast against rock without forms or exterior waterproofing treatments.
    e. 6 inches beneath bottom of concrete slabs-on-grade.
    f. 6 inches beneath pipe in trenches and the greater of 24 inches wider than pipe or [42 inches wide.

B. Classified Excavation: Excavate to subgrade elevations. Material to be excavated will be classified as earth and rock. Do not excavate rock until it has been classified and cross sectioned by Architect. The Contract Sum will be adjusted for rock excavation according to unit prices included in the Contract Documents. Changes in the Contract Time may be authorized for rock excavation.

1. Earth excavation includes excavating pavements and obstructions visible on surface; underground structures, utilities, and other items indicated to be removed; and soil, boulders, and other materials not classified as rock or unauthorized excavation.

    a. Intermittent drilling; blasting, if permitted; ram hammering; or ripping of material not classified as rock excavation is earth excavation.

2. Rock excavation includes removal and disposal of rock. Remove rock to lines and subgrade elevations indicated to permit installation of permanent construction without exceeding the following dimensions:

    a. 24 inches outside of concrete forms other than at footings.
    b. 12 inches outside of concrete forms at footings.
    c. 6 inches outside of minimum required dimensions of concrete cast against grade.
    d. Outside dimensions of concrete walls indicated to be cast against rock without forms or exterior waterproofing treatments.
    e. 6 inches beneath bottom of concrete slabs-on-grade.
    f. 6 inches beneath pipe in trenches and the greater of 24 inches wider than pipe or 42 inches wide.

## 3.5 EXCAVATION FOR STRUCTURES

A. Excavate to indicated elevations and dimensions within a tolerance of plus or minus 1 inch. If applicable, extend excavations a sufficient distance from structures for placing and removing concrete formwork, for installing services and other construction, and for inspections.

1. Excavations for Footings and Foundations: Do not disturb bottom of excavation. Excavate by hand to final grade just before placing concrete reinforcement. Trim bottoms to required lines and grades to leave solid base to receive other work.
2. Pile Foundations: Stop excavations 6 to 12 inches above bottom of pile cap before piles are placed. After piles have been driven, remove loose and displaced material. Excavate to final grade, leaving solid base to receive concrete pile caps.
3. Excavation for Underground Tanks, Basins, and Mechanical or Electrical Utility Structures: Excavate to elevations and dimensions indicated within a tolerance of plus or minus 1 inch. Do not disturb bottom of excavations intended as bearing surfaces.

B. Excavations at Edges of Tree- and Plant-Protection Zones:

1. Excavate by hand or with an air spade to indicated lines, cross sections, elevations, and subgrades. If excavating by hand, use narrow-tine spading forks to comb soil and expose roots. Do not break, tear, or chop exposed roots. Do not use mechanical equipment that rips, tears, or pulls roots.
2. Cut and protect roots according to requirements in Section 01 56 39 "Temporary Tree and Plant Protection."

## 3.6 EXCAVATION FOR WALKS AND PAVEMENTS

A. Excavate surfaces under walks and pavements to indicated lines, cross sections, elevations, and subgrades.

## 3.7 EXCAVATION FOR UTILITY TRENCHES

A. Excavate trenches to indicated gradients, lines, depths, and elevations.

1. Beyond building perimeter, excavate trenches to allow installation of top of pipe below frost line.

B. Excavate trenches to uniform widths to provide the following clearance on each side of pipe or conduit. Excavate trench walls vertically from trench bottom to 12 inches higher than top of pipe or conduit unless otherwise indicated.

1. Clearance: 12 inches each side of pipe or conduit.

C. Trench Bottoms: Excavate and shape trench bottoms to provide uniform bearing and support of pipes and conduit. Shape subgrade to provide continuous support for bells, joints, and barrels of pipes and for joints, fittings, and bodies of conduits. Remove projecting stones and sharp objects along trench subgrade.

1. For pipes and conduit less than 6 inches in nominal diameter, hand-excavate trench bottoms and support pipe and conduit on an undisturbed subgrade.
2. For pipes and conduit 6 inches or larger in nominal diameter, shape bottom of trench to support bottom 90 degrees of pipe or conduit circumference. Fill depressions with tamped sand backfill.

3. For flat-bottomed, multiple-duct conduit units, hand-excavate trench bottoms and support conduit on an undisturbed subgrade.
4. Excavate trenches 6 inches deeper than elevation required in rock or other unyielding bearing material to allow for bedding course.

D. Trench Bottoms: Excavate trenches 4 inches deeper than bottom of pipe and conduit elevations to allow for bedding course. Hand-excavate deeper for bells of pipe.

1. Excavate trenches 6 inches deeper than elevation required in rock or other unyielding bearing material to allow for bedding course.

E. Trenches in Tree- and Plant-Protection Zones:

1. Hand-excavate to indicated lines, cross sections, elevations, and subgrades. Use narrow-tine spading forks to comb soil and expose roots. Do not break, tear, or chop exposed roots. Do not use mechanical equipment that rips, tears, or pulls roots.
2. Do not cut main lateral roots or taproots; cut only smaller roots that interfere with installation of utilities.
3. Cut and protect roots according to requirements in the Tree Protection Plan

## 3.8 SUBGRADE INSPECTION

A. Notify Architect when excavations have reached required subgrade.

B. If Architect determines that unsatisfactory soil is present, continue excavation and replace with compacted backfill or fill material as directed.

C. Proof-roll subgrade below the building slabs and pavements with a pneumatic-tired to identify soft pockets and areas of excess yielding. Do not proof-roll wet or saturated subgrades.

1. Completely proof-roll subgrade in one direction, repeating proof-rolling in direction perpendicular to first direction. Limit vehicle speed to 3 mph.
2. Excavate soft spots, unsatisfactory soils, and areas of excessive pumping or rutting, as determined by Architect, and replace with compacted backfill or fill as directed.

D. Authorized additional excavation and replacement material will be paid for according to Contract provisions for unit prices.

E. Reconstruct subgrades damaged by freezing temperatures, frost, rain, accumulated water, or construction activities, as directed by Architect, without additional compensation.

## 3.9 UNAUTHORIZED EXCAVATION

A. Fill unauthorized excavation under foundations or wall footings by extending bottom elevation of concrete foundation or footing to excavation bottom, without altering top elevation. Lean concrete fill, with 28-day compressive strength of 2500 psi, may be used when approved by Architect.

1. Fill unauthorized excavations under other construction, pipe, or conduit as directed by Architect.

## 3.10 STORAGE OF SOIL MATERIALS

A. Stockpile borrow soil materials and excavated satisfactory soil materials without intermixing. Place, grade, and shape stockpiles to drain surface water. Cover to prevent windblown dust.

1. Stockpile soil materials away from edge of excavations. Do not store within drip line of remaining trees.

## 3.11 BACKFILL

A. Place and compact backfill in excavations promptly, but not before completing the following:

1. Construction below finish grade including, where applicable, subdrainage, dampproofing, waterproofing, and perimeter insulation.
2. Surveying locations of underground utilities for Record Documents.
3. Testing and inspecting underground utilities.
4. Removing concrete formwork.
5. Removing trash and debris.
6. Removing temporary shoring, bracing, and sheeting.
7. Installing permanent or temporary horizontal bracing on horizontally supported walls.

B. Place backfill on subgrades free of mud, frost, snow, or ice.

## 3.12 UTILITY TRENCH BACKFILL

A. Place backfill on subgrades free of mud, frost, snow, or ice.

B. Place and compact bedding course on trench bottoms and where indicated. Shape bedding course to provide continuous support for bells, joints, and barrels of pipes and for joints, fittings, and bodies of conduits.

C. Trenches under Footings: Backfill trenches excavated under footings and within 18 inches of bottom of footings with satisfactory soil; fill with concrete to elevation of bottom of footings. Concrete is specified in Section 03 30 00 "Cast-in-Place Concrete."

D. Trenches under Roadways: Provide 4-inch thick, concrete-base slab support for piping or conduit less than 30 inches below surface of roadways. After installing and testing, completely encase piping or conduit in a minimum of 4 inches of concrete before backfilling or placing roadway subbase course. Concrete is specified in Section 03 30 00 "Cast-in-Place Concrete." Backfill voids with satisfactory soil while removing shoring and bracing.

E. Initial Backfill:

1. Soil Backfill: Place and compact initial backfill of satisfactory soil, free of particles larger than 1 inch in any dimension, to a height of 12 inches over the pipe or conduit.

a. Carefully compact initial backfill under pipe haunches and compact evenly up on both sides and along the full length of piping or conduit to avoid damage or displacement of piping or conduit. Coordinate backfilling with utilities testing.

2. Controlled Low-Strength Material: Place initial backfill of controlled low-strength material to a height of 12 inches over the pipe or conduit. Coordinate backfilling with utilities testing.

F. Final Backfill:

1. Soil Backfill: Place and compact final backfill of satisfactory soil to final subgrade elevation.
2. Controlled Low-Strength Material: Place final backfill of controlled low-strength material to final subgrade elevation.

G. Warning Tape: Install warning tape directly above utilities, 12 inches below finished grade, except 6 inches below subgrade under pavements and slabs.

## 3.13 SOIL FILL

A. Plow, scarify, bench, or break up sloped surfaces steeper than 1 vertical to 4 horizontal so fill material will bond with existing material.

B. Place and compact fill material in layers to required elevations as follows:

1. Under grass and planted areas, use satisfactory soil material.
2. Under walks and pavements, use satisfactory soil material.
3. Under steps and ramps, use engineered fill.
4. Under building slabs, use engineered fill.
5. Under footings and foundations, use engineered fill.

C. Place soil fill on subgrades free of mud, frost, snow, or ice.

## 3.14 CONTROL

A. Uniformly moisten or aerate subgrade and each subsequent fill or backfill soil layer before compaction to within 2 percent of optimum moisture content.

1. Do not place backfill or fill soil material on surfaces that are muddy, frozen, or contain frost or ice.
2. Remove and replace, or scarify and air dry, otherwise satisfactory soil material that exceeds optimum moisture content by 2 percent and is too wet to compact to specified dry unit weight.

## 3.15 COMPACTION OF SOIL BACKFILLS AND FILLS

A. Place backfill and fill soil materials in layers not more than 6 inches in loose depth for material compacted by heavy compaction equipment and not more than 4 inches in loose depth for material compacted by hand-operated tampers.

B. Place backfill and fill soil materials evenly on all sides of structures to required elevations and uniformly along the full length of each structure.

C. Compact soil materials to not less than the following percentages of maximum dry unit weight according to ASTM D 1557

## 3.16 GRADING

A. General: Uniformly grade areas to a smooth surface, free of irregular surface changes. Comply with compaction requirements and grade to cross sections, lines, and elevations indicated.

1. Provide a smooth transition between adjacent existing grades and new grades.
2. Cut out soft spots, fill low spots, and trim high spots to comply with required surface tolerances.

B. Site Rough Grading: Slope grades to direct water away from buildings and to prevent ponding. Finish subgrades to elevations required to achieve indicated finish elevations, within the following subgrade tolerances:

1. Turf or Unpaved Areas: Plus or minus 1 inch
2. Walks: Plus or minus 1 inch.
3. Pavements: Plus or minus 1/4 inch.

C. Grading inside Building Lines: Finish subgrade to a tolerance of 1/2 inch when tested with a 10-foot straightedge.

## 3.17 SUBBASE AND BASE COURSES UNDER PAVEMENTS AND WALKS

A. Place subbase course and base course on subgrades free of mud, frost, snow, or ice.

B. On prepared subgrade, place subbase course and base course under pavements and walks as follows:

1. Install separation geotextile on prepared subgrade according to manufacturer's written instructions, overlapping sides and ends.
2. Place base course material over subbase course under hot-mix asphalt pavement.
3. Shape subbase course and base course to required crown elevations and cross-slope grades.
4. Place subbase course and base course 6 inches or less in compacted thickness in a single layer.
5. Place subbase course and base course that exceeds 6 inches in compacted thickness in layers of equal thickness, with no compacted layer more than 6 inches thick or less than 3 inches thick.
6. Compact subbase course and base course at optimum moisture content to required grades, lines, cross sections, and thickness to not less than 98 percent of maximum dry unit weight according to ASTM D 1557.

## 3.18 DRAINAGE COURSE UNDER CONCRETE SLABS-ON-GRADE

A. Place drainage course on subgrades free of mud, frost, snow, or ice.

B. On prepared subgrade, place and compact drainage course under cast-in-place concrete slabs-on-grade as follows:

1. Install subdrainage geotextile on prepared subgrade according to manufacturer's written instructions, overlapping sides and ends.
2. Place drainage course 6 inches or less in compacted thickness in a single layer.
3. Place drainage course that exceeds 6 inches in compacted thickness in layers of equal thickness, with no compacted layer more than 6 inches thick or less than 3 inches thick.

4. Compact each layer of drainage course to required cross sections and thicknesses to not less than 98 percent of maximum dry unit weight according to ASTM D 698.

## 3.19 FIELD QUALITY CONTROL

A. Special Inspections: Owner will engage a qualified special inspector to perform the following special inspections:

1. Determine prior to placement of fill that site has been prepared in compliance with requirements.
2. Determine that fill material classification and maximum lift thickness comply with requirements.
3. Determine, during placement and compaction, that in-place density of compacted fill complies with requirements.

B. Testing Agency: Owner will engage a qualified geotechnical engineering testing agency to perform tests and inspections.

C. Allow testing agency to inspect and test subgrades and each fill or backfill layer. Proceed with subsequent earth moving only after test results for previously completed work comply with requirements.

D. Footing Subgrade: At footing subgrades, at least one test of each soil stratum will be performed to verify design bearing capacities. Subsequent verification and approval of other footing subgrades may be based on a visual comparison of subgrade with tested subgrade when approved by Architect.

E. Testing agency will test compaction of soils in place according to ASTM D 1556, ASTM D 2167, ASTM D 2937, and ASTM D 6938, as applicable. Tests will be performed at the following locations and frequencies:

1. Paved and Building Slab Areas: At subgrade and at each compacted fill and backfill layer, at least one test for every 2000 sq. ft. or less of paved area or building slab but in no case fewer than three tests.
2. Foundation Wall Backfill: At each compacted backfill layer, at least one test for every 100 feet or less of wall length but no fewer than two tests.
3. Trench Backfill: At each compacted initial and final backfill layer, at least one test for every 150 feet or less of trench length but no fewer than two tests.

F. When testing agency reports that subgrades, fills, or backfills have not achieved degree of compaction specified, scarify and moisten or aerate, or remove and replace soil materials to depth required; recompact and retest until specified compaction is obtained.

## 3.20 PROTECTION

A. Protecting Graded Areas: Protect newly graded areas from traffic, freezing, and erosion. Keep free of trash and debris.

B. Repair and reestablish grades to specified tolerances where completed or partially completed surfaces become eroded, rutted, settled, or where they lose compaction due to subsequent construction operations or weather conditions.

1. Scarify or remove and replace soil material to depth as directed by Architect; reshape and recompact.

C. Where settling occurs before Project correction period elapses, remove finished surfacing, backfill with additional soil material, compact, and reconstruct surfacing.

1. Restore appearance, quality, and condition of finished surfacing to match adjacent work, and eliminate evidence of restoration to greatest extent possible.

## 3.21 DISPOSAL OF SURPLUS AND WASTE MATERIALS

A. Remove surplus satisfactory soil and waste materials, including unsatisfactory soil, trash, and debris, and legally dispose of them off Owner's property.

B. Transport surplus satisfactory soil to designated storage areas on Owner's property. Stockpile or spread soil as directed by Architect.

1. Remove waste materials, including unsatisfactory soil, trash, and debris, and legally dispose of them off Owner's property.

UES Project No. A25147.01095.000
UES Report No. 2154739

Dear Ms. Ogle:

UES has completed the geotechnical evaluation for the subject project. This report contains the results of our evaluation, an engineering interpretation of these with respect to the project characteristics described to us, and recommendations for foundation support, pavement support, site preparation, and stormwater management design.

We appreciate the opportunity to have worked with you on this project and look forward to a continued association. Please do not hesitate to contact us if you should have any questions, or if we may further assist you as your plans proceed.

Respectfully Submitted,

# 1.0 PROJECT DESCRIPTION

Project information has been provided to us during correspondence with you. We were provided with a conceptual site plan indicating the layout of the proposed construction and requested boring locations. We understand three sports fields with a restroom building, associated parking lot and stormwater management areas will be constructed at the subject address. We assume the maximum wall and column loads for the building will not exceed 4 kips per linear foot and 25 kips, respectively. We anticipate two to three feet of fill will be placed within the structure and pavement areas.

Our recommendations are based upon the above considerations. If any of this information is incorrect, or if you anticipate any changes, inform UES so that we may review our recommendations.

# 2.0 PURPOSE AND SCOPE

## 2.1 PURPOSE

The purposes of this investigation were:

- to investigate the general subsurface conditions at the site;
- to interpret and review the subsurface conditions with respect to the proposed construction;
- to provide geotechnical engineering recommendations for foundation design, pavement design and site preparation; and,
- to provide recommendations for stormwater management design.

This report presents an evaluation of site conditions on the basis of traditional geotechnical procedures for site characterization. The recovered samples were not examined, either visually or analytically, for chemical composition or environmental hazards. UES would be pleased to perform these services, at your request.

Our investigation was confined to the zone of soil likely to be influenced by the proposed construction. Our work did not address the potential for surface expression of deep geological conditions, such as sinkhole development related to karst activity. A deep geological evaluation requires a more extensive range of field services than performed in this study.

## 2.2 FIELD INVESTIGATION

### 2.2.1 BORINGS

The subsurface conditions were investigated with:

- One (1) Standard Penetration Test (SPT) boring, B-1, advanced to a depth of approximately 20 feet below existing grade within the proposed building area;
- Six (6) SPT borings, P-1 through P-6, advanced to a depth of approximately 20 feet each below existing grade within the proposed stormwater management facilities; and,
- Two (2) auger borings, R-1 and R-2, advanced to a depth of approximately 4 and 6 feet each below existing grade within the proposed pavement areas.

We performed the SPT and auger borings according to the procedures of ASTM D-1586 and ASTM D-1452, respectively.

The borings were located using handheld Global Positioning System (GPS) Unit. The approximate locations of the borings are presented on the attached Boring Location Plan in Appendix A.

Samples obtained from the borings were transported to our laboratory for further evaluation. Samples of the soils encountered will be held in our laboratory for your inspection for 60 days unless we are notified otherwise.

### 2.3 LABORATORY TESTING

#### 2.3.1 INDEX TESTING

The soil samples recovered from the soil borings were returned to our laboratory and then a UES Engineer visually examined and reviewed the field descriptions. The soils were classified in accordance with the Unified Soil Classification System (USCS). Tests consisting of percent passing a No. 200 sieve determination were performed to aid in classification of the soils.

#### 2.4.2 PERMEABILITY TESTS

Twenty-seven (27) permeability tests were performed on the relatively undisturbed soil samples obtained from the retention pond borings. The permeability is a measure of the degree to which water can flow through the soil under varying hydraulic gradients.

## 3.0 FINDINGS

### 3.1 SUBSURFACE CONDITIONS

The boring locations and detailed subsurface conditions are illustrated in Appendix A: Boring Location Plan and Subsurface Profiles. The classifications and descriptions shown on the profiles are based upon visual characterizations of the recovered soil samples. Also, see Appendix A: Key to Boring Log, for further explanation of the symbols and placement of data on the Subsurface Profiles. The following discussion summarizes the soil conditions encountered.

The results of the SPT Borings, B-1 and P-1 through P-6, generally indicated intermittent layers of very loose to very dense fine sand with trace silt (SP), fine sand with silt (SP-SM), weakly cemented fine sand with silt (SP-SM, HARDPAN), silty fine sand (SM), weakly cemented silty fine sand (SM, HARDPAN) and sandy shell to the boring termination depth of approximately 20.0 feet below existing grade.

The results of the Auger Borings, R-1 and R-2, generally indicated intermittent layers of fine sand with trace silt (SP) and fine sand with silt (SP-SM) to the deepest boring termination depth of approximately 6.0 feet below existing grade.

### 3.2 GROUNDWATER

We recorded groundwater subsequent to drilling at depths between approximately 1.0 and 3.3 feet below existing grade at our Boring Locations. It should be noted that groundwater may perch above weakly cemented (HARDPAN) and silty (SM) soils after significant rainfall activity. Based on available published literature, existing site features, boring elevations and the results of the borings, we estimate the normal seasonal high groundwater level to be approximately at the measured levels. We can provide detailed high seasonal information once the boring elevations have been surveyed in the field. It should also be noted that the estimated seasonal high-water level does not provide any assurance that groundwater levels will not exceed these estimated levels during any given year in the future. Should impediments to surface water drainage be present, or should rainfall intensity and duration, or total rainfall quantities, exceed the normally anticipated rainfall quantities, groundwater levels might once again exceed our seasonal high estimates. The depth of the groundwater level encountered at the boring location is presented on the Subsurface Profiles.

## 4.0 FOUNDATION DESIGN RECOMMENDATIONS

### 4.1 GENERAL

The following recommendations are made based upon a review of the attached soil test data, our understanding of the proposed construction, and experience with similar projects and subsurface conditions. If the structural loadings, construction locations, or grading information change from those discussed previously, we request the opportunity to review and possibly amend our recommendations with respect to those changes.

Additionally, if subsurface conditions are encountered during construction, which were not encountered in the borings, report those conditions immediately to us for observation and recommendations.

## 4.2 STRUCTURE FOUNDATIONS

Based on the results of our subsurface exploration, we consider the subsurface conditions at the site favorable for support of the proposed structure when constructed on a properly designed shallow foundation system. Provided the soils are prepared in accordance with the Site Preparation Section of this report, the following parameters may be used for foundation design.

### 4.2.1 Bearing Pressure

The maximum allowable net soil bearing pressure for shallow foundation should not exceed 2,500 pounds per square foot (p.s.f.). Net bearing pressure is defined as the soil bearing pressure at the base of the foundation in excess of the natural overburden pressure. The foundation should be designed based upon the maximum load that could be imposed by all loading conditions.

### 4.2.2 Foundation Size

The minimum widths recommended for any isolated column footing and continuous wall footings are 24 inches and 18 inches, respectively. Even though the maximum allowable soil bearing pressure may not be achieved, these width recommendations should control the size of the foundations.

### 4.2.3 Bearing Depth

The exterior foundation should bear at a depth of at least 18 inches below the exterior final grades and the interior footings should bear at a depth of at least 18 inches below the finish floor elevation to provide confinement to the bearing level soils. We recommend storm-water and surface water be diverted away from the building exterior, both during and after construction, to reduce the possibility of erosion beneath the exterior footings.

### 4.2.4 Bearing Material

The foundation may bear on compacted structural fill. The bearing level soils, after compaction, should exhibit densities of at least 95 percent of the maximum dry density of the bearing soils as determined by ASTM D-1557 (Modified Proctor), to the depth described subsequently in the Site Preparation section of the report. In addition to compaction, the bearing soils must exhibit stability and be free of “pumping” conditions.

### 4.2.5 Settlement Estimates

Post-construction settlement of the structure will be influenced by several interrelated factors, such as (1) subsurface stratification and strength/compressibility characteristics of the bearing soils; (2) footing size, bearing level, applied loads, and resulting bearing pressures beneath the foundations; (3) site preparation and earthwork construction techniques used by the contractor, and (4) external factors, including but not limited to vibration from offsite sources and groundwater fluctuations beyond those normally anticipated for the naturally-occurring site and soil conditions which are present.

Our settlement estimates for the structure are based upon the use of successful adherence to the site preparation recommendations presented later in this report. Any deviation from these recommendations could result in an increase in the estimated post-construction settlement of the structure.

Due to the sandy nature of the surficial soils, following the compaction operations, we expect a significant portion of settlement to be elastic in nature. This settlement is expected to occur relatively quickly, upon application of the loads, during and immediately following construction.

Using the recommended maximum bearing pressure, the assumed maximum structural loads, and the field test data which we have correlated to the strength and compressibility characteristics of the subsurface soils, we estimate the total settlements of the structure to be approximately one inch or less.

Differential settlement results from differences in applied bearing pressures and the variations in the compressibility characteristics of the subsurface soils. Based on the subsurface conditions as determined by our borings, it is anticipated that differential settlements will be within tolerable limits.

## 4.3 SITE PREPARATION FOR SHALLOW FOUNDATIONS

We recommend the following site preparation procedures for the building area:

1. Prior to construction, the location of existing underground utility lines within the construction area should be established. Provisions should then be made to relocate interfering utilities to appropriate locations. It should be noted that if underground pipes are not properly removed or plugged, they may serve as conduits for subsurface erosion which may subsequently lead to excessive settlement of overlying structure.

2. Strip the proposed construction limits of all grass, roots, topsoil, concrete and other deleterious materials within and 5 feet beyond the perimeter of the proposed structure. Expect clearing and grubbing of 6 to 12 inches.

3. Compact the exposed surface using tracked dozer or vibratory equipment. **We recommend that vibratory equipment be operated in static mode within 100 feet of any existing structures.** The upper one foot of soils below the exposed surface within the building area should be improved to achieve a minimum compaction requirement of 95% of the Modified Proctor Test (ASTM D-1557). We recommend the compacted soils exhibit moisture content within 2 percent of the soils optimum moisture content as determined by the Modified Proctor Test (ASTM D-1557). Should the soils experience pumping and soil strength loss during the compaction operations, compaction work should be immediately terminated and (1) the disturbed soils removed and backfilled with dry structural fill soils which are then compacted, or (2) the excess moisture content within the disturbed soils allowed to dissipate before recompacting.

4. Test the compacted surface for compliance at a minimum of one location per 2,500 square feet of each building area, or at a minimum of 3 locations.

5. Place the fill material, as required. The fill should consist of "clean," fine sand with less than 5 percent soil fines. You may use fill materials with soil fines between 5 percent and 10 percent, but strict moisture control may be required. Place fill in uniform 10 to 12-inch loose lifts and compact each lift to a minimum density of 95 percent of the Modified Proctor maximum dry density. We recommend the compacted soils exhibit moisture content within 2 percent of the soils optimum moisture content as determined by the Modified Proctor Test (ASTM D-1557). If light compaction equipment is used, we recommend the lift thickness be reduced to 8 inch thick lifts.

6. Perform compliance tests within each lift of fill at a minimum of one location per lift per 2,500 square feet of each building area, or at a minimum of 3 locations.

7. Compact and test footing cuts for compaction to a depth of one foot below bearing level. We recommend that you test one out of every four (25 percent) column footings and perform one test per every 50 linear feet of wall footing. Compaction operations in confined areas, such as footing excavations, can best be performed with a lightweight vibratory sled or other hand-held compaction equipment.

# 5.0 PAVEMENT RECOMMENDATIONS

## 5.1 GENERAL

We anticipate a flexible asphaltic concrete pavement section will be utilized for the subject project.

## 5.2 FLEXIBLE ASPHALTIC PAVEMENT

Because traffic loadings are commonly unavailable, we have generalized our pavement design into two groups. The group descriptions and the recommended component thicknesses are presented in Table 1 below.

**TABLE I**
**Pavement Component Recommendations**

| Traffic Group | Component Thickness | | |
|---|---|---|---|
| | Stabilized Subgrade | Base Course | Surface Course |
| Parking Lot – light duty | 12 | 6 | 1.5 |
| Parking Lot – heavy duty | 12 | 8 | 2.0 |

## 5.3 STABILIZED SUBGRADE

We recommend that subgrade materials be compacted in place according to the requirements in the "Site Preparation" section of this report. Further, stabilize the subgrade materials to a minimum Limerock Bearing Ratio (LBR) of 40 percent as specified by Florida Department of Transportation (FDOT) requirements for Type B Stabilized Subgrade.

Further, the stabilized subgrade can be imported material or a blend of on-site soils and imported materials. If a blend is proposed, we recommend that the contractor perform a mix design to find the optimum mix proportions.

The primary function of stabilized subgrade beneath the base course is to provide a stable and firm subgrade so that the base course can be properly placed and compacted. Depending upon the soil type, the subgrade material may have sufficient stability to provide the needed support without additional stabilizing material. Generally speaking, sands with silt or clay typically have sufficient stability and may not require additional stabilizing material. Conversely, relatively "clean" sands may not provide sufficient stability in order to adequately construct the base course.

## 5.4 BASE COURSE

We recommend that the base course consist of either limerock or graded crushed aggregate (crushed concrete).

### 5.4.1 LIMEROCK

Limerock should have a minimum LBR of 100 percent and should be mined from an FDOT approved source. Place limerock in maximum 6-inch lifts and compact each lift to a minimum density of 98 percent of the Modified Proctor maximum dry density.

### 5.4.2 CRUSHED CONCRETE BASE

Crushed concrete should be supplied by an approved plant with quality control procedures. The crushed concrete stockpiled should be free of sandy pockets, foreign materials, and uncrushed particles. We recommend the following specifications be enforced.

a) Crushed concrete shall not contain lumps, balls or pockets of sand or clay sized material in sufficient quantity as to be detrimental to the proper binding, finishing or strength of the crushed concrete base.

b) Samples of base course materials shall be supplied to the engineer prior to use in the work. Additional samples shall be furnished during construction, as necessary.

At least 97 percent (by weight) of the material shall pass a 3-1/2 inch sieve and the material shall be graded uniformly down to dust. The fine material shall consist entirely of dust or fracture. All crushing or breaking-up which might be necessary in order to meet such size requirements shall be done before the material is placed on the road.

c) The base shall be bladed and shaped to conform to the typical sections shown on the plans. Then the base shall be compacted by rolling with a combination of steel wheel and rubber tired rollers until an average density of 98 percent of the maximum density obtainable under AASHTO Method T-180 is reached. The base shall have an average LBR of not less than 150. The LBR value of material produced at a particular source shall be determined in accordance with an approved quality control procedure.

Testing shall be performed at the following frequency:

1) Perform in-place density tests on crushed concrete base at a minimum frequency of 2 tests per pavement area or 1 test per 300 linear feet whichever is greater.

2) Perform Limerock Bearing Ratio tests at a frequency of 1 test per visual change in material and a minimum of 1 test per pavement area or every 15,000 square feet whichever is greater.

3) Engineer should perform a final visual base inspection prior to placement of prime or tack coat and paving.

## 5.5 SURFACE COURSE

In light duty areas where there is occasional truck traffic, but primarily passenger cars, we recommend using an asphaltic concrete, FDOT Type SP 9.5 mix. In heavy duty areas where truck traffic is predominant, we recommend using an asphaltic concrete, FDOT Type SP 12.5 mix.

It should be noted that if a more aesthetically pleasing asphalt surface is required a layer of Friction Course (FC) (finer aggregate) can be placed. A ½ inch layer of FC asphalt can be placed above the SP asphaltic concrete. However this may result in increased costs.

Asphaltic concrete mixes should be a current FDOT approved design of the materials actually used. Samples of the materials delivered to the project should be tested to verify that the aggregate gradation and asphalt content satisfies the mix design requirements. Compact the asphalt to a minimum of 90 percent of the Gmm (maximum voidless specific gravity).

After placement and field compaction, core the wearing surface to evaluate material thickness and to perform laboratory densities. Obtain cores at frequencies of at least one core per 3,000 square feet of placed pavement or a minimum of two cores per day's production.

In roadways, for extended life expectancy of the surface course, we recommend applying a coal tar emulsion sealer at least six months after placement of the surface course. The seal coat will help to patch cracks and voids, and protect the surface from damaging ultraviolet light and automobile liquid spillage. Please note that applying the seal coat prior to six months after placement may hinder the "curing" of the surface course, leading to its early deterioration.

## 5.6 CURBING

We recommend that curbing around landscaped sections adjacent to the parking roadways and driveways be constructed with full-depth curb sections. Using extruded curb sections which lie directly on top of the final asphalt level, or eliminating the curbing entirely, may not significantly impede the migration

of irrigation water from the landscape areas to the interface between the asphalt and the base. This migration often causes separation of the wearing surface from the base and subsequent rippling and pavement deterioration. It is recommended that the subgrade below the curbing be stabilized to a minimum LBR of 40.

## 5.7 CONSTRUCTION TRAFFIC

Light duty roadways and incomplete pavement sections will not perform satisfactorily under construction traffic loadings. We recommend that construction traffic (construction equipment, concrete trucks, sod trucks, garbage trucks, dump trucks, etc.) be re-routed away from these roadways or that the pavement section be designed for these loadings.

## 5.8 EFFECTS OF GROUNDWATER

We recommend that all pavement sections analyses incorporate the seasonal high groundwater conditions. Based on the groundwater level at the site, the below separations will be maintained.

**TABLE II**
**Recommended Minimum Clearance Between Pavement Base and Wet Season Water Table**

| Type of Base | Separation (inches) |
|---|---|
| Limerock | 18 |
| Crushed Concrete | 12 |

One of the most critical influences on the pavement performance in Central Florida is the relationship between the pavement subgrade and the seasonal high groundwater level. Many roadways and parking areas have been destroyed as a result of deterioration of the base and the base/surface course bond resulting from a high water table. **Regardless of the type of base selected, we recommend that the seasonal high groundwater and the bottom of the base course be separated by at least the amount presented in Table 2 above.**

## 5.9 SITE PREPARATION FOR PAVEMENT AREAS

We recommend the following site preparation procedures:

1) Strip the proposed construction limits of all grass, roots, topsoil, millings and other deleterious materials within, and 3 feet beyond, the proposed pavement limits. Expect initial clearing and grubbing to a depth of approximately 6 inches.

2) Proof-compact the exposed surface with the light to medium roller until you maintain density of at least 98 percent should be obtained in the upper 12 inches below base course. **Vibratory equipment should be operated in static mode within 100 feet of adjacent structures.** We recommend the compacted soils exhibit moisture content within 2 percent of the soils optimum moisture content as determined by the Modified Proctor Test (ASTM D-1557).

3) Should the soils experience pumping and soil strength loss during the compaction operations, compaction work should be immediately terminated and (1) the disturbed soils removed and backfilled with dry structural fill soils which are then compacted, or (2) the excess moisture content within the disturbed soils allowed to dissipate before recompacting.

4) Test the compacted surface for density at a frequency of not less than one test per 10,000 square feet of pavement area (minimum three locations per pavement area).

5) Place and compact backfill material, as required. The fill should consist of "clean," fine sand with less than 5 percent soil fines. You may use fill materials with soil fines between 5 percent and 10 percent, but strict moisture control may be required. Place fill in uniform 10 to 12-inch loose lifts and compact each lift to a minimum density of 95 percent of the Modified Proctor maximum dry

density with the exception that densities of at least 98 percent should be obtained within the upper one foot below base course. We recommend the compacted soils exhibit moisture content within 2 percent of the soils optimum moisture content as determined by the Modified Proctor Test (ASTM D-1557).

6) Perform compliance tests within each lift of fill at a frequency of not less than one test per 10,000 square feet of pavement area (minimum of three locations per pavement area).

# 6.0 STORMWATER MANAGEMENT RECOMMENDATIONS

## 6.1 GENERAL

For a dry bottom retention facility, performance will be significantly influenced by the soil permeability and the vertical separation between the bottom and the seasonal high groundwater level. A wet retention facility should be excavated to a depth necessary to obtain a sufficient water depth to limit growth of aquatic vegetation.

If requested, UES can assist in evaluating the facility design exfiltration rates, underdrains and/or groundwater baseflow as pond geometry and stormwater volume requirements become available.

## 6.2 SOIL PERMEABILITY

Twenty-seven (27) Laboratory Falling-head Saturated Vertical Permeability Tests were performed on relatively undisturbed soil samples. The samples were obtained using thin-walled tube sampling techniques (Shelby Tube). The results of the tests, in feet per day, describe the coefficients of hydraulic conductivity (Permeability) of the soils and are presented on the attached Subsurface Profiles. The measured permeability rates should not be construed to represent the actual pond exfiltration rates.

Upon evaluation of regional and local geology, we have evaluated that the characteristics of the soils within the vicinity of this project are comprised of sedimentary soils which often exhibit thin, alternating layers. Generally, in relatively homogeneous natural deposits where stratification may result from particle orientation, the Permeability in the Horizontal direction can be somewhat greater than that in the Vertical direction. Based on our experience, the estimated coefficient of Horizontal Permeability typically is on the order of 1.5 and 2.0 times greater than the Vertical Permeability for SP-SM and SP soil types, respectively. The weakly cemented fine sand (HARDPAN) encountered should be considered a confining layer. In addition, the silty fine sand (SM) is generally considered to have poor drainage characteristics. All pond backfill material should be clean sandy soils having 5 percent or less fines passing the No. 200 sieve.

# 7.0 CONSTRUCTION RELATED SERVICES

We recommend the owner retain UES to perform construction materials tests and observations on this project. Field tests and observations include verification of foundation subgrades by monitoring filling operations and performing quality assurance tests on the placement of compacted natural soils and structural fill. We can also perform concrete testing, pavement section testing, structural steel testing and other construction materials testing services.

The geotechnical engineering design does not end with the advertisement of the construction documents. The design is an on-going process throughout construction. Because of our familiarity with the site conditions and the intent of the engineering design, we are most qualified to address problems that might arise during construction in a timely and cost-effective manner.

# 8.0 LIMITATIONS

During the early stages of most construction projects, geotechnical issues not addressed in this report may arise. Because of the natural limitations inherent in working with the subsurface, it is not possible for a geotechnical engineer to predict and address all possible problems. An Association of Engineering Firms Practicing in the Geosciences (ASFE) publication, "Important Information about Your Geotechnical Engineering Report" appears in Appendix B, and will help explain the nature of geotechnical issues. Further, we present documents in Appendix B: Constraints and Restrictions, to bring to your attention the potential concerns and the basic limitations of a typical geotechnical report.

| G.S. Elevation | Ground Surface Elevation |

## UNIFIED SOIL CLASSIFICATION SYSTEM

| MAJOR DIVISIONS | | | GROUP SYMBOLS | TYPICAL NAMES |
|---|---|---|---|---|
| COARSE GRAINED SOILS More than 50% retained on the No. 200 sieve* | GRAVELS 50% or more of coarse fraction retained on No. 4 sieve | CLEAN GRAVELS | GW | Well-graded gravels and gravel-sand mixtures, little or no fines |
| | | | GP | Poorly graded gravels and gravel-sand mixtures, little or no fines |
| | | GRAVELS WITH FINES | GM | Silty gravels and gravel-sand-silt mixtures |
| | | | GC | Clayey gravels and gravel-sand-clay mixtures |
| | SANDS More than 50% of coarse fraction passes No. 4 sieve | CLEAN SANDS 5% or less passing No. 200 sieve | SW** | Well-graded sands and gravelly sands, little or no fines |
| | | | SP** | Poorly graded sands and gravelly sands, little or no fines |
| | | SANDS with 12% or more passing No. 200 sieve | SM** | Silty sands, sand-silt mixtures |
| | | | SC** | Clayey sands, sand-clay mixtures |
| FINE-GRAINED SIOLS 50% or more passes the No. 200 sieve* | SILTS AND CLAYS Liquid limit 50% or less | | ML | Inorganic silts, very fine sands, rock flour, silty or clayey fine sands |
| | | | CL | Inorganic clays of low to medium plasticity, gravelly clays, sandy clays, lean clays |
| | | | OL | Organic silts and organic silty clays of low plasticity |
| | SILTS AND CLAYS Liquid limit greater than 50% | | MH | Inorganic silts, micaceous or diamicaceous fine sands or silts, elastic silts |
| | | | CH | Inorganic clays or clays of high plasticity, fat clays |
| | | | OH | Organic clays of medium to high plasticity |
| | | | PT | Peat, muck and other highly organic soils |

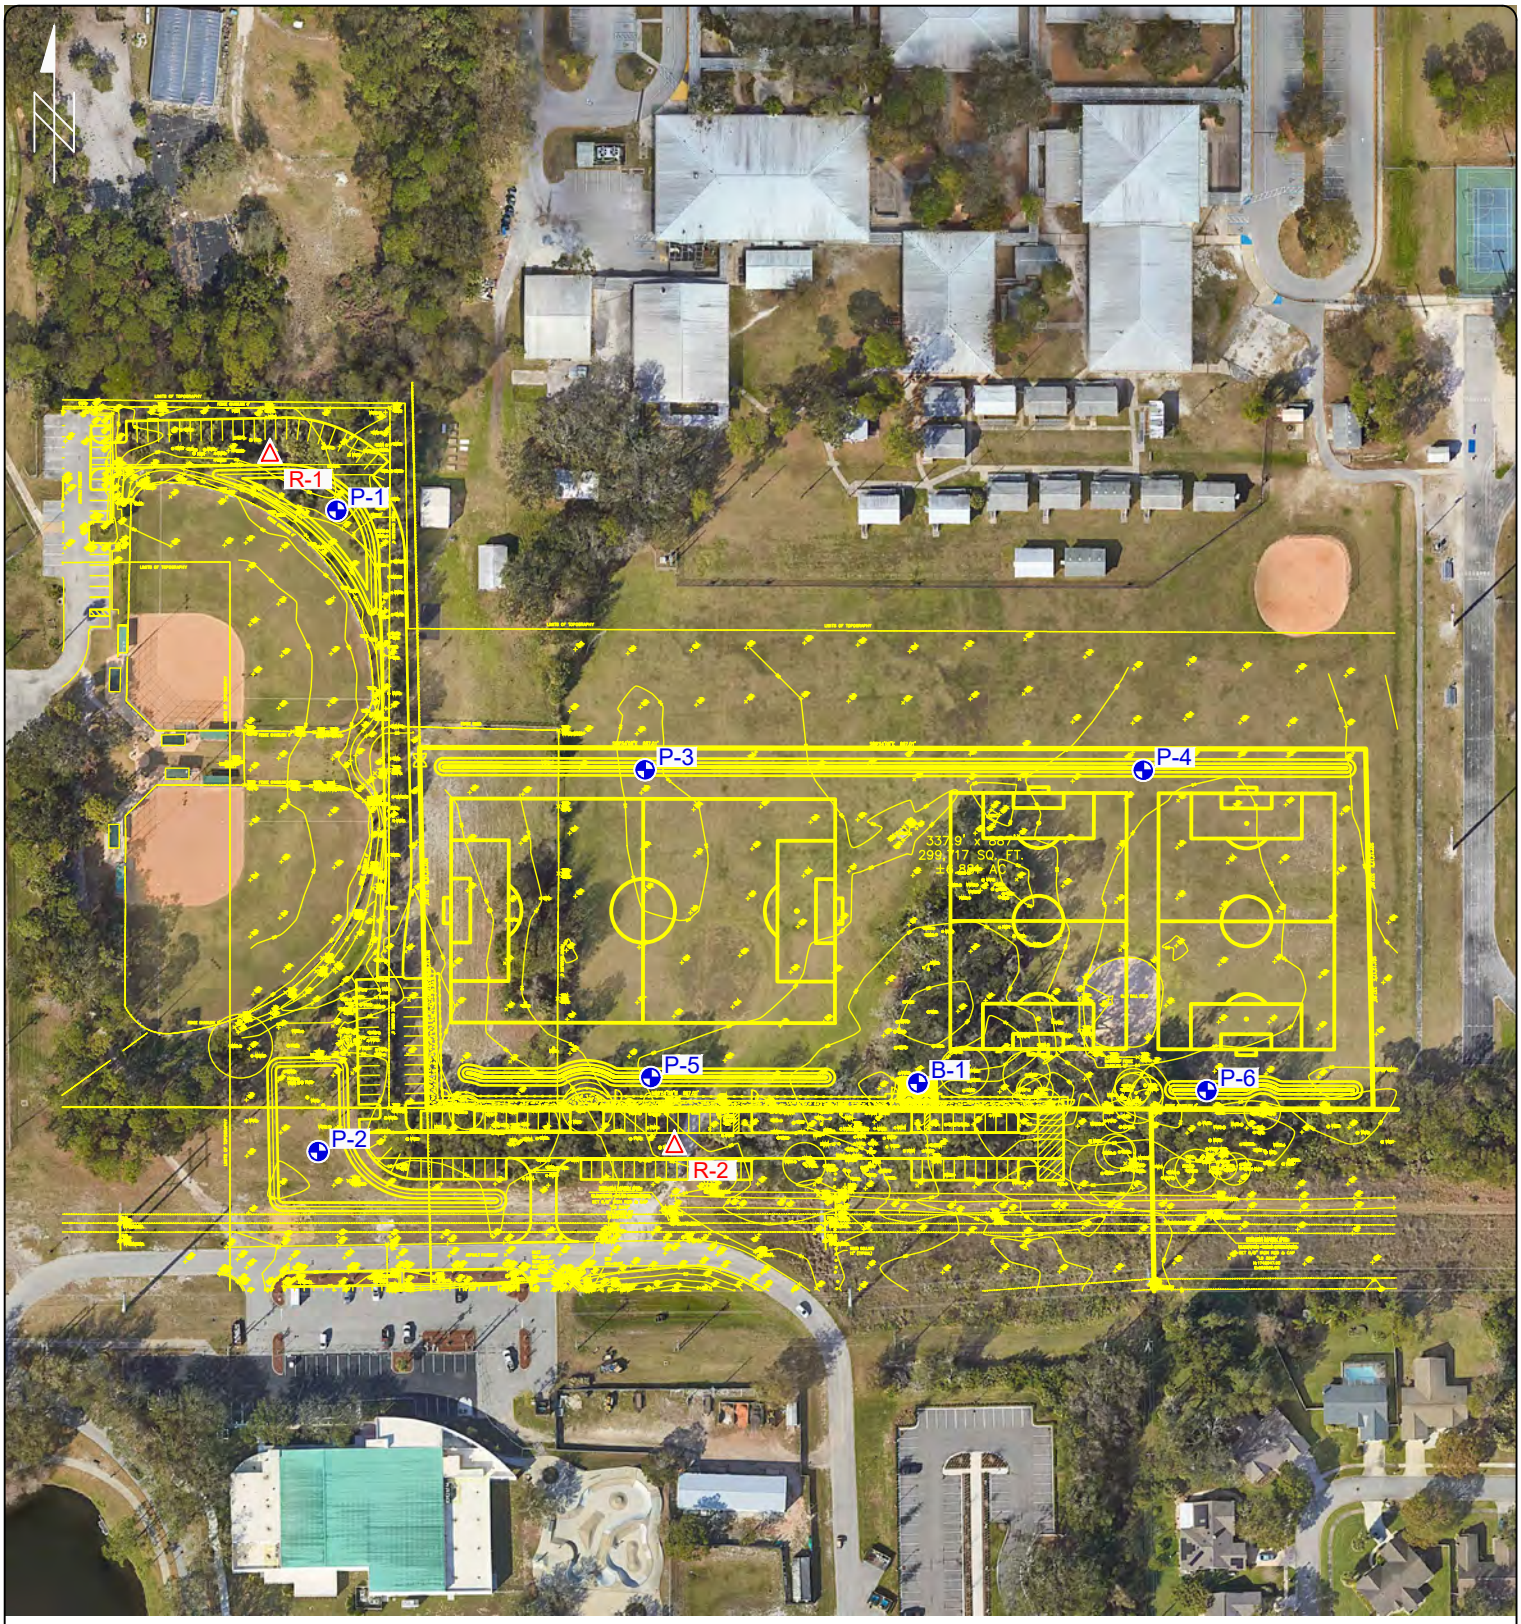
*Based on the material passing the 3-inch (75 mm) sieve
** Use dual symbol (such as SP-SM and SP-SC) for soils with more than 5% but less than 12% passing the No. 200 sieve

**RELATIVE DENSITY**
(Sands and Gravels)
Very loose – Less than 4 Blow/Foot
Loose – 4 to 10 Blows/Foot
Medium Dense – 11 to 30 Blows/Foot
Dense – 31 to 50 Blows/Foot
Very Dense – More than 50 Blows/Foot

**CONSISTENCY**
(Silts and Clays)
Very Soft – Less than 2 Blows/Foot
Soft – 2 to 4 Blows/Foot
Firm – 5 to 8 Blows/Foot
Stiff – 9 to 15 Blows/Foot
Very Stiff – 16 to 30 Blows/Foot
Hard – More than 30 Blows/Foot

**RELATIVE HARDNESS**
(Limestone)
Soft – 100 Blows for more than 2 Inches
Hard – 100 Blows for less than 2 Inches

## MODIFIERS



**These modifiers Provide Our Estimate of the Amount of Minor Constituents (Silt or Clay Size Particles) in the Soil Sample**
Trace – 5% or less
With Silt or With Clay – 6% to 11%
Silty or Clayey – 12% to 30%
Very Silty or Very Clayey – 31% to 50%

**These Modifiers Provide Our Estimate of the Amount of Organic Components in the Soil Sample**
Trace – Less than 3%
Few – 3% to 4%
Some – 5% to 8%
Many – Greater than 8%

**These Modifiers Provide Our Estimate of the Amount of Other Components (Shell, Gravel, Etc.) in the Soil Sample**
Trace – 5% or less
Few – 6% to 12%
Some – 13% to 30%
Many – 31% to 50%

# Important Information about This

# Geotechnical-Engineering Report

**Subsurface problems are a principal cause of construction delays, cost overruns, claims, and disputes.**

**While you cannot eliminate all such risks, you can manage them. The following information is provided to help.**

## Geotechnical Services Are Performed for Specific Purposes, Persons, and Projects

Geotechnical engineers structure their services to meet the specific needs of their clients. A geotechnical-engineering study conducted for a civil engineer may not fulfill the needs of a constructor — a construction contractor — or even another civil engineer. Because each geotechnical- engineering study is unique, each geotechnical-engineering report is unique, prepared *solely* for the client. No one except you should rely on this geotechnical-engineering report without first conferring with the geotechnical engineer who prepared it. *And no one — not even you* — should apply this report for any purpose or project except the one originally contemplated.

## Read the Full Report

Serious problems have occurred because those relying on a geotechnical-engineering report did not read it all. Do not rely on an executive summary. Do not read selected elements only.

## Geotechnical Engineers Base Each Report on a Unique Set of Project-Specific Factors

Geotechnical engineers consider many unique, project-specific factors when establishing the scope of a study. Typical factors include: the client's goals, objectives, and risk-management preferences; the general nature of the structure involved, its size, and configuration; the location of the structure on the site; and other planned or existing site improvements, such as access roads, parking lots, and underground utilities. Unless the geotechnical engineer who conducted the study specifically indicates otherwise, do not rely on a geotechnical-engineering report that was:

- not prepared for you;
- not prepared for your project;
- not prepared for the specific site explored; or
- completed before important project changes were made.

Typical changes that can erode the reliability of an existing geotechnical-engineering report include those that affect:

- the function of the proposed structure, as when it's changed from a parking garage to an office building, or from a light-industrial plant to a refrigerated warehouse;
- the elevation, configuration, location, orientation, or weight of the proposed structure;
- the composition of the design team; or
- project ownership.

As a general rule, *always* inform your geotechnical engineer of project changes—even minor ones—and request an assessment of their impact. *Geotechnical engineers cannot accept responsibility or liability for problems that occur because their reports do not consider developments of which they were not informed.*

## Subsurface Conditions Can Change

A geotechnical-engineering report is based on conditions that existed at the time the geotechnical engineer performed the study. *Do not rely on a geotechnical-engineering report whose adequacy may have been affected by*: the passage of time; man-made events, such as construction on or adjacent to the site; or natural events, such as floods, droughts, earthquakes, or groundwater fluctuations. *Contact the geotechnical engineer before applying this report to determine if it is still reliable.* A minor amount of additional testing or analysis could prevent major problems.

## Most Geotechnical Findings Are Professional Opinions

Site exploration identifies subsurface conditions only at those points where subsurface tests are conducted or samples are taken. Geotechnical engineers review field and laboratory data and then apply their professional judgment to render an opinion about subsurface conditions throughout the site. Actual subsurface conditions may differ — sometimes significantly — from those indicated in your report. Retaining the geotechnical engineer who developed your report to provide geotechnical-construction observation is the most effective method of managing the risks associated with unanticipated conditions.

## A Report's Recommendations Are Not Final

Do not overrely on the confirmation-dependent recommendations included in your report. *Confirmation-dependent recommendations are not final,* because geotechnical engineers develop them principally from judgment and opinion. Geotechnical engineers can finalize their recommendations *only* by observing actual subsurface conditions revealed during construction. *The geotechnical engineer who developed your report cannot assume responsibility or liability for the report's confirmation-dependent recommendations if that engineer does not perform the geotechnical-construction observation required to confirm the recommendations' applicability.*

## A Geotechnical-Engineering Report Is Subject to Misinterpretation

Other design-team members' misinterpretation of geotechnical-engineering reports has resulted in costly

problems. Confront that risk by having your geotechnical engineer confer with appropriate members of the design team after submitting the report. Also retain your geotechnical engineer to review pertinent elements of the design team's plans and specifications. Constructors can also misinterpret a geotechnical-engineering report. Confront that risk by having your geotechnical engineer participate in prebid and preconstruction conferences, and by providing geotechnical construction observation.

## Do Not Redraw the Engineer's Logs

Geotechnical engineers prepare final boring and testing logs based upon their interpretation of field logs and laboratory data. To prevent errors or omissions, the logs included in a geotechnical-engineering report should *never* be redrawn for inclusion in architectural or other design drawings. Only photographic or electronic reproduction is acceptable, *but recognize that separating logs from the report can elevate risk.*

## Give Constructors a Complete Report and Guidance

Some owners and design professionals mistakenly believe they can make constructors liable for unanticipated subsurface conditions by limiting what they provide for bid preparation. To help prevent costly problems, give constructors the complete geotechnical-engineering report, *but* preface it with a clearly written letter of transmittal. In that letter, advise constructors that the report was not prepared for purposes of bid development and that the report's accuracy is limited; encourage them to confer with the geotechnical engineer who prepared the report (a modest fee may be required) and/or to conduct additional study to obtain the specific types of information they need or prefer. A prebid conference can also be valuable. *Be sure constructors have sufficient time* to perform additional study. Only then might you be in a position to give constructors the best information available to you, while requiring them to at least share some of the financial responsibilities stemming from unanticipated conditions.

## Read Responsibility Provisions Closely

Some clients, design professionals, and constructors fail to recognize that geotechnical engineering is far less exact than other engineering disciplines. This lack of understanding has created unrealistic expectations that have led to disappointments, claims, and disputes. To help reduce the risk of such outcomes, geotechnical engineers commonly include a variety of explanatory provisions in their reports. Sometimes labeled "limitations," many of these provisions indicate where geotechnical engineers' responsibilities begin and end, to help others recognize their own responsibilities and risks. *Read these provisions closely.* Ask questions. Your geotechnical engineer should respond fully and frankly.

## Environmental Concerns Are Not Covered

The equipment, techniques, and personnel used to perform an *environmental* study differ significantly from those used to perform a *geotechnical* study. For that reason, a geotechnical-engineering report does not usually relate any environmental findings, conclusions, or recommendations; e.g., about the likelihood of encountering underground storage tanks or regulated contaminants. *Unanticipated environmental problems have led to numerous project failures.* If you have not yet obtained your own environmental information, ask your geotechnical consultant for risk-management guidance. *Do not rely on an environmental report prepared for someone else.*

## Obtain Professional Assistance To Deal with Mold

Diverse strategies can be applied during building design, construction, operation, and maintenance to prevent significant amounts of mold from growing on indoor surfaces. To be effective, all such strategies should be devised for the *express purpose* of mold prevention, integrated into a comprehensive plan, and executed with diligent oversight by a professional mold-prevention consultant. Because just a small amount of water or moisture can lead to the development of severe mold infestations, many mold- prevention strategies focus on keeping building surfaces dry. While groundwater, water infiltration, and similar issues may have been addressed as part of the geotechnical- engineering study whose findings are conveyed in this report, the geotechnical engineer in charge of this project is not a mold prevention consultant; *none of the services performed in connection with the geotechnical engineer's study were designed or conducted for the purpose of mold prevention. Proper implementation of the recommendations conveyed in this report will not of itself be sufficient to prevent mold from growing in or on the structure involved.*

## Rely, on Your GBC-Member Geotechnical Engineer for Additional Assistance

Membership in the Geotechnical Business Council of the Geoprofessional Business Association exposes geotechnical engineers to a wide array of risk-confrontation techniques that can be of genuine benefit for everyone involved with a construction project. Confer with you GBC-Member geotechnical engineer for more information.

# CONSTRAINTS & RESTRICTIONS

The intent of this document is to bring to your attention the potential concerns and the basic limitations of a typical geotechnical report.

## WARRANTY

Universal Engineering Sciences has prepared this report for our client for his exclusive use, in accordance with generally accepted soil and foundation engineering practices, and makes no other warranty either expressed or implied as to the professional advice provided in the report.

## UNANTICIPATED SOIL CONDITIONS

The analysis and recommendations submitted in this report are based upon the data obtained from soil borings performed at the locations indicated on the Boring Location Plan. This report does not reflect any variations which may occur between these borings.

The nature and extent of variations between borings may not become known until excavation begins. If variations appear, we may have to re-evaluate our recommendations after performing on-site observations and noting the characteristics of any variations.

## CHANGED CONDITIONS

We recommend that the specifications for the project require that the contractor immediately notify Universal Engineering Sciences, as well as the owner, when subsurface conditions are encountered that are different from those present in this report.

No claim by the contractor for any conditions differing from those anticipated in the plans, specifications, and those found in this report, should be allowed unless the contractor notifies the owner and Universal Engineering Sciences of such changed conditions. Further, we recommend that all foundation work and site improvements be observed by a representative of Universal Engineering Sciences to monitor field conditions and changes, to verify design assumptions and to evaluate and recommend any appropriate modifications to this report.

## MISINTERPRETATION OF SOIL ENGINEERING REPORT

Universal Engineering Sciences is responsible for the conclusions and opinions contained within this report based upon the data relating only to the specific project and location discussed herein. If the conclusions or recommendations based upon the data presented are made by others, those conclusions or recommendations are not the responsibility of Universal Engineering Sciences.

## CHANGED STRUCTURE OR LOCATION

This report was prepared in order to aid in the evaluation of this project and to assist the architect or engineer in the design of this project. If any changes in the design or location of the structure as outlined in this report are planned, or if any structures are included or added that are not discussed in the report, the conclusions and recommendations contained in this report shall not be considered valid unless the changes are reviewed and the conclusions modified or approved by Universal Engineering Sciences.

## USE OF REPORT BY BIDDERS

Bidders who are examining the report prior to submission of a bid are cautioned that this report was prepared as an aid to the designers of the project and it may affect actual construction operations.

Bidders are urged to make their own soil borings, test pits, test caissons or other investigations to determine those conditions that may affect construction operations. Universal Engineering Sciences cannot be responsible for any interpretations made from this report or the attached boring logs with regard to their adequacy in reflecting subsurface conditions which will affect construction operations.

## STRATA CHANGES

Strata changes are indicated by a definite line on the boring logs which accompany this report. However, the actual change in the ground may be more gradual. Where changes occur between soil samples, the location of the change must necessarily be estimated using all available information and may not be shown at the exact depth.

## OBSERVATIONS DURING DRILLING

Attempts are made to detect and/or identify occurrences during drilling and sampling, such as: water level, boulders, zones of lost circulation, relative ease or resistance to drilling progress, unusual sample recovery, variation of driving resistance, obstructions, etc.; however, lack of mention does not preclude their presence.

## WATER LEVELS

Water level readings have been made in the drill holes during drilling and they indicate normally occurring conditions. Water levels may not have been stabilized at the last reading. This data has been reviewed and interpretations made in this report. However, it must be noted that fluctuations in the level of the groundwater may occur due to variations in rainfall, temperature, tides, and other factors not evident at the time measurements were made and reported. Since the probability of such variations is anticipated, design drawings and specifications should accommodate such possibilities and construction planning should be based upon such assumptions of variations.

## LOCATION OF BURIED OBJECTS

All users of this report are cautioned that there was no requirement for Universal Engineering Sciences to attempt to locate any man-made buried objects during the course of this exploration and that no attempt was made by Universal Engineering Sciences to locate any such buried objects. Universal Engineering Sciences cannot be responsible for any buried man-made objects which are subsequently encountered during construction that are not discussed within the text of this report.

## TIME

This report reflects the soil conditions at the time of exploration. If the report is not used in a reasonable amount of time, significant changes to the site may occur and additional reviews may be required.

UES

**SECTION 31 23 19**
**DEWATERING**

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

B. All material and construction shall comply with all applicable FDOT and OSHA requirements and standards (latest editions).

C. Refer to Geotechnical Report for additional information and requirements for site clearing, fill, pavement, underdrain and other geotechnical components.

D. Contractor required to obtain all required dewatering permits, including but not limited to SJRWMD.

1.2 SUMMARY

A. Section includes construction dewatering.

B. Related Requirements:

1. Section 01 32 33 "Photographic Documentation" for recording preexisting conditions and dewatering system progress.
2. Section 31 20 00 "Earth Moving" for excavating, backfilling, site grading, and controlling surface-water runoff and ponding.

1.3 ALLOWANCES

A. Dewatering observation wells are part of dewatering allowance.

1.4 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at Project site.

1. Verify availability of Installer's personnel, equipment, and facilities needed to make progress and avoid delays.
2. Review condition of site to be dewatered including coordination with temporary erosion-control measures and temporary controls and protections.
3. Review geotechnical report.
4. Review proposed site clearing and excavations.
5. Review existing utilities and subsurface conditions.
6. Review observation and monitoring of dewatering system.

## 1.5 ACTION SUBMITTALS

A. Shop Drawings: For dewatering system, prepared by or under the supervision of a qualified professional engineer.

1. Include plans, elevations, sections, and details.
2. Show arrangement, locations, and details of wells and well points; locations of risers, headers, filters, pumps, power units, and discharge lines; and means of discharge, control of sediment, and disposal of water.
3. Include layouts of piezometers and flow-measuring devices for monitoring performance of dewatering system.
4. Include written plan for dewatering operations including sequence of well and well-point placement coordinated with excavation shoring and bracings and control procedures to be adopted if dewatering problems arise.

## 1.6 INFORMATIONAL SUBMITTALS

A. Qualification Data: For Installer and professional engineer.

B. Field quality-control reports.

C. Existing Conditions: Using photographs or video recordings, show existing conditions of adjacent construction and site improvements that might be misconstrued as damage caused by dewatering operations. Submit before Work begins.

D. Record Drawings: Identify locations and depths of capped wells and well points and other abandoned-in-place dewatering equipment.

## 1.7 QUALITY ASSURANCE

A. Installer Qualifications: An experienced installer that has specialized in design of dewatering systems and dewatering work.

## 1.8 FIELD CONDITIONS

A. Project-Site Information: A geotechnical report has been prepared for this Project and is available for information only. The opinions expressed in this report are those of a geotechnical engineer and represent interpretations of subsoil conditions, tests, and results of analyses conducted by a geotechnical engineer. Owner is not responsible for interpretations or conclusions drawn from this data.

1. Make additional test borings and conduct other exploratory operations necessary for dewatering according to the performance requirements.
2. The geotechnical report is included elsewhere in Project Manual.

B. Survey Work: Engage a qualified land surveyor or professional engineer to survey adjacent existing buildings, structures, and site improvements; establish exact elevations at fixed points to act as benchmarks. Clearly identify benchmarks and record existing elevations.

## PART 2 - PRODUCTS

### 2.1 PERFORMANCE REQUIREMENTS

A. Dewatering Performance: Design, furnish, install, test, operate, monitor, and maintain dewatering system of sufficient scope, size, and capacity to control hydrostatic pressures and to lower, control, remove, and dispose of ground water and permit excavation and construction to proceed on dry, stable subgrades.

1. Design dewatering system, including comprehensive engineering analysis by a qualified professional engineer.
2. Continuously monitor and maintain dewatering operations to ensure erosion control, stability of excavations and constructed slopes, prevention of flooding in excavation, and prevention of damage to subgrades and permanent structures.
3. Prevent surface water from entering excavations by grading, dikes, or other means.
4. Accomplish dewatering without damaging existing buildings, structures, and site improvements adjacent to excavation.
5. Remove dewatering system when no longer required for construction.

B. Regulatory Requirements: Comply with governing EPA notification regulations before beginning dewatering. Comply with water- and debris-disposal regulations of authorities having jurisdiction.

## PART 3 - EXECUTION

### 3.1 PREPARATION

A. Protect structures, utilities, sidewalks, pavements, and other facilities from damage caused by settlement, lateral movement, undermining, washout, and other hazards created by dewatering operations.

1. Prevent surface water and subsurface or ground water from entering excavations, from ponding on prepared subgrades, and from flooding site or surrounding area.
2. Protect subgrades and foundation soils from softening and damage by rain or water accumulation.

B. Install dewatering system to ensure minimum interference with roads, streets, walks, and other adjacent occupied and used facilities.

1. Do not close or obstruct streets, walks, or other adjacent occupied or used facilities without permission from Owner and authorities having jurisdiction. Provide alternate routes around closed or obstructed traffic ways if required by authorities having jurisdiction.

C. Provide temporary grading to facilitate dewatering and control of surface water.

D. Protect and maintain temporary erosion and sedimentation controls, which are specified in Section 31 10 00 "Site Clearing," during dewatering operations.

## 3.2 INSTALLATION

A. Install dewatering system utilizing wells, well points, or similar methods complete with pump equipment, standby power and pumps, filter material gradation, valves, appurtenances, water disposal, and surface-water controls.

1. Space well points or wells at intervals required to provide sufficient dewatering.
2. Use filters or other means to prevent pumping of fine sands or silts from the subsurface.

B. Place dewatering system into operation to lower water to specified levels before excavating below ground-water level.

C. Provide sumps, sedimentation tanks, and other flow-control devices as required by authorities having jurisdiction.

D. Provide standby equipment on-site, installed and available for immediate operation, to maintain dewatering on continuous basis if any part of system becomes inadequate or fails.

## 3.3 OPERATION

A. Operate system continuously until drains, sewers, and structures have been constructed and fill materials have been placed or until dewatering is no longer required.

B. Operate system to lower and control ground water to permit excavation, construction of structures, and placement of fill materials on dry subgrades. Drain water-bearing strata above and below bottom of foundations, drains, sewers, and other excavations.

1. Do not permit open-sump pumping that leads to loss of fines, soil piping, subgrade softening, and slope instability.
2. Reduce hydrostatic head in water-bearing strata below subgrade elevations of foundations, drains, sewers, and other excavations.
3. Maintain piezometric water level a minimum of 36 inches below bottom of excavation.

C. Dispose of water removed by dewatering in a manner that avoids endangering public health, property, and portions of work under construction or completed. Dispose of water and sediment in a manner that avoids inconvenience to others.

D. Remove dewatering system from Project site on completion of dewatering. Plug or fill well holes with sand or cut off and cap wells a minimum of 36 inches below overlying construction.

## 3.4 FIELD QUALITY CONTROL

A. Observation Wells: Provide observation wells or piezometers, take measurements, and maintain at least the minimum number indicated; additional observation wells may be required by authorities having jurisdiction.

1. Observe and record daily elevation of ground water and piezometric water levels in observation wells.
2. Repair or replace, within 24 hours, observation wells that become inactive, damaged, or destroyed. In areas where observation wells are not functioning properly, suspend construction activities until reliable observations can be made. Add or remove water from observation-well risers to demonstrate that observation wells are functioning properly.
3. Fill observation wells, remove piezometers, and fill holes when dewatering is completed.

B. Survey-Work Benchmarks: Resurvey benchmarks regularly during dewatering and maintain an accurate log of surveyed elevations for comparison with original elevations. Promptly notify Architect if changes in elevations occur or if cracks, sags, or other damage is evident in adjacent construction.

C. Provide continual observation to ensure that subsurface soils are not being removed by the dewatering operation.

D. Prepare reports of observations.

## 3.5 PROTECTION

A. Protect and maintain dewatering system during dewatering operations.

B. Promptly repair damages to adjacent facilities caused by dewatering.

END OF SECTION 31 23 19

**SECTION 31 50 00**
**EXCAVATION SUPPORT AND PROTECTION**

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

B. All material and construction shall comply with all applicable FDOT and OSHA requirements and standards (latest editions).

1.2 SUMMARY

A. Section includes temporary excavation support and protection systems.

B. Related Requirements:

1. Section 01 32 33 "Photographic Documentation" for recording preexisting conditions and excavation support and protection system progress.
2. Section 31 20 00 "Earth Moving" for excavating and backfilling and for controlling surface-water runoff and ponding.
3. Section 31 23 19 "Dewatering" for dewatering excavations.

1.3 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at Project site.

1. Review geotechnical report.
2. Review existing utilities and subsurface conditions.
3. Review coordination for interruption, shutoff, capping, and continuation of utility services.
4. Review proposed excavations.
5. Review proposed equipment.
6. Review monitoring of excavation support and protection system.
7. Review coordination with waterproofing.
8. Review abandonment or removal of excavation support and protection system.

1.4 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Include construction details, material descriptions, performance properties, and dimensions of individual components and profiles, and calculations for excavation support and protection system.

B. Shop Drawings: For excavation support and protection system, prepared by or under the supervision of a qualified professional engineer.

1. Include plans, elevations, sections, and details.

2. Show arrangement, locations, and details of soldier piles, piling, lagging, tiebacks, bracing, and other components of excavation support and protection system according to engineering design.
3. Indicate type and location of waterproofing.
4. Include a written plan for excavation support and protection, including sequence of construction of support and protection coordinated with progress of excavation.

## 1.5 INFORMATIONAL SUBMITTALS

A. Qualification Data: For land surveyor and professional engineer.

B. Contractor Calculations: For excavation support and protection system. Include analysis data signed and sealed by the qualified professional engineer responsible for their preparation.

C. Existing Conditions: Using photographs o video recordings, show existing conditions of adjacent construction and site improvements that might be misconstrued as damage caused by inadequate performance of excavation support and protection systems. Submit before Work begins.

D. Record Drawings: Identify locations and depths of capped utilities, abandoned-in-place support and protection systems, and other subsurface structural, electrical, or mechanical conditions.

## 1.6 FIELD CONDITIONS

A. Interruption of Existing Utilities: Do not interrupt any utility serving facilities occupied by Owner or others unless permitted under the following conditions and then only after arranging to provide temporary utility according to requirements indicated:

1. Notify Owner no fewer than two days in advance of proposed interruption of utility.
2. Do not proceed with interruption of utility without Owner's written permission.

B. Project-Site Information: A geotechnical report has been prepared for this Project and is available for information only. The opinions expressed in this report are those of a geotechnical engineer and represent interpretations of subsoil conditions, tests, and results of analyses conducted by a geotechnical engineer. Owner is not responsible for interpretations or conclusions drawn from the data.

1. Make additional test borings and conduct other exploratory operations necessary for excavation support and protection according to the performance requirements.
2. The geotechnical report is included elsewhere in Project Manual.

C. Survey Work: Engage a qualified land surveyor or professional engineer to survey adjacent existing buildings, structures, and site improvements; establish exact elevations at fixed points to act as benchmarks. Clearly identify benchmarks and record existing elevations.

## PART 2 - PRODUCTS

### 2.1 PERFORMANCE REQUIREMENTS

A. Provide design, monitor, and maintain excavation support and protection system capable of supporting excavation sidewalls and of resisting earth and hydrostatic pressures and superimposed and construction loads.

1. Contractor Design: Design excavation support and protection system, including comprehensive engineering analysis by a qualified professional engineer.
2. Prevent surface water from entering excavations by grading, dikes, or other means.
3. Install excavation support and protection systems without damaging existing buildings, structures, and site improvements adjacent to excavation.
4. Continuously monitor vibrations, settlements, and movements to ensure stability of excavations and constructed slopes and to ensure that damage to permanent structures is prevented.

### 2.2 MATERIALS

A. General: Provide materials that are either new or in serviceable condition.

B. Structural Steel: ASTM A 36/A 36M, ASTM A 690/A 690M, or ASTM A 992/A 992M.

C. Steel Sheet Piling: ASTM A 328/A 328M, ASTM A 572/A 572M, or ASTM A 690/A 690M; with continuous interlocks.

1. Corners: Site-fabricated mechanical interlock

D. Wood Lagging: Lumber, mixed hardwood, nominal rough thickness of size and strength required for application.

E. Shotcrete: Comply with Section 03 37 13 "Shotcrete" for shotcrete materials and mixes, reinforcement, and shotcrete application.

F. Cast-in-Place Concrete: ACI 301, of compressive strength required for application.

G. Reinforcing Bars: ASTM A 615/A 615M, Grade 60, deformed.

H. Tiebacks: Steel bars, ASTM A 722/A 722M.

I. Tiebacks: Steel strand, ASTM A 416/A 416M.

## PART 3 - EXECUTION

### 3.1 PREPARATION

A. Protect structures, utilities, sidewalks, pavements, and other facilities from damage caused by settlement, lateral movement, undermining, washout, and other hazards that could develop during excavation support and protection system operations.

1. Shore, support, and protect utilities encountered.

B. Install excavation support and protection systems to ensure minimum interference with roads, streets, walks, and other adjacent occupied and used facilities.

1. Do not close or obstruct streets, walks, or other adjacent occupied or used facilities without permission from Owner and authorities having jurisdiction. Provide alternate routes around closed or obstructed traffic ways if required by authorities having jurisdiction.

C. Locate excavation support and protection systems clear of permanent construction so that construction and finishing of other work is not impeded.

## 3.2 SOLDIER PILES AND LAGGING

A. Install steel soldier piles before starting excavation. Extend soldier piles below excavation grade level to depths adequate to prevent lateral movement. Space soldier piles at regular intervals not to exceed allowable flexural strength of wood lagging. Accurately align exposed faces of flanges to vary not more than 2 inches from a horizontal line and not more than 1:120 out of vertical alignment.

B. Install wood lagging within flanges of soldier piles as excavation proceeds. Trim excavation as required to install lagging. Fill voids behind lagging with soil, and compact.

C. Install wales horizontally at locations indicated on Drawings and secure to soldier piles.

## 3.3 SHEET PILING

A. Before starting excavation, install one-piece sheet piling lengths and tightly interlock vertical edges to form a continuous barrier.

B. Accurately place the piling, using templates and guide frames unless otherwise recommended in writing by the sheet piling manufacturer. Limit vertical offset of adjacent sheet piling to 60 inches. Accurately align exposed faces of sheet piling to vary not more than 2 inches from a horizontal line and not more than 1:120 out of vertical alignment.

C. Cut tops of sheet piling to uniform elevation at top of excavation.

## 3.4 TIEBACKS

A. Drill, install, grout, and tension tiebacks.

B. Test load-carrying capacity of each tieback and replace and retest deficient tiebacks.

1. Have test loading observed by a qualified professional engineer responsible for design of excavation support and protection system.

C. Maintain tiebacks in place until permanent construction is able to withstand lateral earth and hydrostatic pressures.

## 3.5 BRACING

A. Bracing: Locate bracing to clear columns, floor framing construction, and other permanent work. If necessary to move brace, install new bracing before removing original brace.

1. Do not place bracing where it will be cast into or included in permanent concrete work unless otherwise approved by Architect.
2. Install internal bracing if required to prevent spreading or distortion of braced frames.
3. Maintain bracing until structural elements are supported by other bracing or until permanent construction is able to withstand lateral earth and hydrostatic pressures.

## 3.6 FIELD QUALITY CONTROL

A. Survey-Work Benchmarks: Resurvey benchmarks regularly during installation of excavation support and protection systems, excavation progress, and for as long as excavation remains open. Maintain an accurate log of surveyed elevations and positions for comparison with original elevations and positions. Promptly notify Architect if changes in elevations or positions occur or if cracks, sags, or other damage is evident in adjacent construction.

B. Promptly correct detected bulges, breakage, or other evidence of movement to ensure that excavation support and protection system remains stable.

C. Promptly repair damages to adjacent facilities caused by installation or faulty performance of excavation support and protection systems.

## 3.7 REMOVAL AND REPAIRS

A. Remove excavation support and protection systems when construction has progressed sufficiently to support excavation and earth and hydrostatic pressures. Remove in stages to avoid disturbing underlying soils and rock or damaging structures, pavements, facilities, and utilities.

1. Remove excavation support and protection systems to a minimum depth of 48 inches below overlying construction and abandon remainder.
2. Fill voids immediately with approved backfill compacted to density specified in Section 31 20 00 "Earth Moving."
3. Repair or replace, as approved by Architect, adjacent work damaged or displaced by removing excavation support and protection systems.

B. Leave excavation support and protection systems permanently in place.

END OF SECTION 31 50 00

# SECTION 313116
# TERMITE CONTROL

## PART 1 GENERAL

### 1.01 SECTION INCLUDES

A. Chemical soil treatment.

### 1.02 REFERENCE STANDARDS

A. Title 7, United States Code, 136 through 136y - Federal Insecticide, Fungicide and Rodenticide Act; 2006.

### 1.03 QUALITY ASSURANCE

A. Installer Qualifications: Company specializing in performing this type of work and:
   1. Having minimum of 2 years documented experience.
   2. Approved by manufacturer of treatment materials.
   3. Licensed in Florida.

### 1.04 REGULATORY REQUIREMENTS

A. Conform to applicable code for requirements for application, and comply with EPA regulations.

B. Provide certificate of compliance from authority having jurisdiction indicating approval of toxicants.

### 1.05 SEQUENCING

A. Apply toxicant immediately prior to installation of vapor barrier under slabs-on-grade.

### 1.06 WARRANTY

A. See Section 017800 - Closeout Submittals, for additional warranty requirements.

B. Provide five year installer's warranty against damage to building caused by termites.
   1. Include coverage for repairs to building and to contents damaged due to building damage. Repair damage and, if required, re-treat.

## PART 2 PRODUCTS

### 2.01 MATERIALS

A. Manufacturers:
   1. Syngenta Professional Products; Product DemonMax: or equal www.syngentaprofessionalproducts.com.
   2. Substitutions: See Section 016000 - Product Requirements.

B. Toxicant Chemical: EPA approved; synthetically color dyed to permit visual identification of treated soil.

### 2.02 MIXES

A. Mix toxicant to manufacturer's instructions.

## PART 3 EXECUTION

### 3.01 EXAMINATION

A. Verify that soil surfaces are sufficiently dry to absorb toxicant, and ready to receive treatment.

B. Verify final grading is complete.

### 3.02 APPLICATION

A. Comply with requirements of U.S. EPA and applicable State and local codes.

B. Spray apply toxicant in accordance with manufacturer's instructions.

C. Apply toxicant at following locations:
   1. Under Slabs-on-Grade.
   2. At Both Sides of Foundation Surface.

D. Under slabs, apply toxicant immediately prior to installation of vapor barrier.

E. At foundation walls, apply toxicant immediately prior to finish grading work outside foundations.

F. Apply extra treatment to structure penetration surfaces such as pipe or ducts, and soil penetrations such as grounding rods or posts.

G. Re-treat disturbed treated soil with same toxicant as original treatment.

H. If inspection or testing identifies the presence of termites, re-treat soil and re-test.

**3.03 PROTECTION**

A. Do not permit soil grading over treated work.

**END OF SECTION**

**SECTION 32 12 16**
**ASPHALT PAVING**

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

B. All material and construction shall comply with all applicable FDOT and OSHA requirements and standards (latest editions).

C. Refer to Geotechnical Report for additional information and requirements for site clearing, fill, pavement, underdrain and other geotechnical components.

1.2 SUMMARY

A. Section Includes:

1. Cold milling of existing asphalt pavement.
2. Hot-mix asphalt patching.
3. Hot-mix asphalt paving.
4. Hot-mix asphalt overlay.
5. Asphalt curbs.
6. Asphalt traffic-calming devices.
7. Asphalt surface treatments.

B. Related Requirements:

1. Section 02 41 16 "Structure Demolition" and Section 02 41 19 "Selective Demolition" for demolition and removal of existing asphalt pavement.
2. Section 31 20 00 "Earth Moving" for subgrade preparation, fill material, unbound-aggregate subbase and base courses, and aggregate pavement shoulders.

1.3 UNIT PRICES

A. Work of this Section is affected by Insert name of unit price.

1.4 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at Project site.

1. Review methods and procedures related to hot-mix asphalt paving including, but not limited to, the following:

a. Review proposed sources of paving materials, including capabilities and location of plant that will manufacture hot-mix asphalt.

b. Review requirements for protecting paving work, including restriction of traffic during installation period and for remainder of construction period.

## 1.5 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Include technical data and tested physical and performance properties.
2. Job-Mix Designs: Certification, by authorities having jurisdiction, of approval of each job mix proposed for the Work.
3. Job-Mix Designs: For each job mix proposed for the Work.

B. LEED Submittals:

1. Product Data for Credit MR 4: For products having recycled content, documentation indicating percentages by weight of postconsumer and preconsumer recycled content. Include statement indicating cost for each product having recycled content.

## 1.6 INFORMATIONAL SUBMITTALS

A. Qualification Data: For manufacturer and testing agency.

B. Material Certificates: For each paving material. Include statement that mixes containing recycled materials will perform equal to mixes produced from all new materials.

C. Material Test Reports: For each paving material, by a qualified testing agency.

D. Field quality-control reports.

## 1.7 QUALITY ASSURANCE

A. Manufacturer Qualifications: A paving-mix manufacturer registered with and approved by authorities having jurisdiction or the DOT of state in which Project is located.

B. Testing Agency Qualifications: Qualified according to ASTM D 3666 for testing indicated.

C. Regulatory Requirements: Comply with materials, workmanship, and other applicable requirements of FDOT for asphalt paving work.

1. Measurement and payment provisions and safety program submittals included in standard specifications do not apply to this Section.

## 1.8 FIELD CONDITIONS

A. Environmental Limitations: Do not apply asphalt materials if subgrade is wet or excessively damp, if rain is imminent or expected before time required for adequate cure, or if the following conditions are not met:

1. Prime Coat: Minimum surface temperature of 60 deg F.
2. Tack Coat: Minimum surface temperature of 60 deg F.

3. Slurry Coat: Comply with weather limitations in ASTM D 3910.
4. Asphalt Base Course: Minimum surface temperature of 40 deg F and rising at time of placement.
5. Asphalt Surface Course: Minimum surface temperature of 60 deg F at time of placement.

PART 2 - PRODUCTS

2.1 AGGREGATES

A. General: Use materials and gradations that have performed satisfactorily in previous installations.

B. Coarse Aggregate: ASTM D 692/D 692M, sound; angular crushed stone, crushed gravel, or cured, crushed blast-furnace slag.

C. Fine Aggregate: ASTM D 1073 or AASHTO M 29, sharp-edged natural sand or sand prepared from stone, gravel, cured blast-furnace slag, or combinations thereof.

1. For hot-mix asphalt, limit natural sand to a maximum of 20 percent by weight of the total aggregate mass.

D. Mineral Filler: ASTM D 242/D 242M or AASHTO M 17, rock or slag dust, hydraulic cement, or other inert material.

2.2 ASPHALT MATERIALS

A. Asphalt Binder: AASHTO M 320, PG 64-22 PG 58-28 PG 70-22 <Insert performance grade>.

B. Asphalt Cement: ASTM D 3381/D 3381M for viscosity-graded material ASTM D 946/D 946M for penetration-graded material.

C. Cutback Prime Coat: ASTM D 2027, medium-curing cutback asphalt, MC-30 or MC-70 MC-250.

D. Emulsified Asphalt Prime Coat: ASTM D 977 or AASHTO M 140 emulsified asphalt, or ASTM D 2397 or AASHTO M 208 cationic emulsified asphalt, slow setting, diluted in water, of suitable grade and consistency for application.

E. Tack Coat: ASTM D 977 or AASHTO M 140 emulsified asphalt, or ASTM D 2397 or AASHTO M 208 cationic emulsified asphalt, slow setting, diluted in water, of suitable grade and consistency for application.

F. Fog Seal: ASTM D 977 or AASHTO M 140 emulsified asphalt, or ASTM D 2397 or AASHTO M 208 cationic emulsified asphalt, slow setting, factory diluted in water, of suitable grade and consistency for application.

G. Water: Potable.

H. Undersealing Asphalt: ASTM D 3141/D 3141M; pumping consistency.

2.3 AUXILIARY MATERIALS

A. Recycled Materials for Hot-Mix Asphalt Mixes: Reclaimed asphalt pavement; reclaimed, unbound-aggregate base material; and recycled tires asphalt shingles or glass from sources and gradations that have performed satisfactorily in previous installations, equal to performance of required hot-mix asphalt paving produced from all new materials.

B. Herbicide: Commercial chemical for weed control, registered by the EPA, and not classified as "restricted use" for locations and conditions of application. Provide in granular, liquid, or wettable powder form.

C. Sand: ASTM D 1073 or AASHTO M 29, Grade No. 2 or No. 3.

D. Joint Sealant: ASTM D 6690 or AASHTO M 324, Type I Type II or III Type IV, hot-applied, single-component, polymer-modified bituminous sealant.

2.4 MIXES

A. Recycled Content of Hot-Mix Asphalt: To meet FDOT Requirements

1. Surface Course Limit: Recycled content no more than 10 percent by weight.

B. Hot-Mix Asphalt: Dense-graded, hot-laid, hot-mix asphalt plant mixes approved by authorities having jurisdiction ; designed according to procedures in AI MS-2, "Mix Design Methods for Asphalt Concrete and Other Hot-Mix Types"; and complying with the following requirements:

1. FDOT Requirements

C. Emulsified-Asphalt Slurry: ASTM D 3910, and FDOT Requirements

PART 3 - EXECUTION

3.1 EXAMINATION

A. Verify that subgrade is dry and in suitable condition to begin paving.

B. Proof-roll subgrade below pavements with heavy pneumatic-tired equipment to identify soft pockets and areas of excess yielding. Do not proof-roll wet or saturated subgrades.

1. Completely proof-roll subgrade in one direction, repeating proof-rolling in direction perpendicular to first direction. Limit vehicle speed to 3 mph.
2. Proof roll with a loaded 10-wheel, tandem-axle dump truck weighing not less than 15 tons.
3. Excavate soft spots, unsatisfactory soils, and areas of excessive pumping or rutting, as determined by Architect, and replace with compacted backfill or fill as directed.

C. Proceed with paving only after unsatisfactory conditions have been corrected.

## 3.2 COLD MILLING

A. Clean existing pavement surface of loose and deleterious material immediately before cold milling. Remove existing asphalt pavement by cold milling to grades and cross sections indicated.

1. Mill to a depth of 1-1/2 inches
2. Mill to a uniform finished surface free of excessive gouges, grooves, and ridges.
3. Control rate of milling to prevent tearing of existing asphalt course.
4. Repair or replace curbs, manholes, and other construction damaged during cold milling.
5. Excavate and trim unbound-aggregate base course, if encountered, and keep material separate from milled hot-mix asphalt.
6. Patch surface depressions deeper than 1 inch after milling, before wearing course is laid.
7. Handle milled asphalt material according to approved waste management plan required in Section 01 74 19 "Construction Waste Management and Disposal."
8. Keep milled pavement surface free of loose material and dust.
9. Do not allow milled materials to accumulate on-site.

## 3.3 PATCHING

A. Asphalt Pavement: Saw cut perimeter of patch and excavate existing pavement section to sound base. Excavate rectangular or trapezoidal patches, extending 12 inches into perimeter of adjacent sound pavement, unless otherwise indicated. Cut excavation faces vertically. Remove excavated material. Recompact existing unbound-aggregate base course to form new subgrade.

B. Portland Cement Concrete Pavement: Break cracked slabs and roll as required to reseat concrete pieces firmly.

1. Pump hot undersealing asphalt under rocking slab until slab is stabilized or, if necessary, crack slab into pieces and roll to reseat pieces firmly.
2. Remove disintegrated or badly cracked pavement. Excavate rectangular or trapezoidal patches, extending into perimeter of adjacent sound pavement, unless otherwise indicated. Cut excavation faces vertically. Recompact existing unbound-aggregate base course to form new subgrade.

C. Tack Coat: Before placing patch material, apply tack coat uniformly to vertical asphalt surfaces abutting the patch. Apply at a rate of 0.05 to 0.15 gal./sq. yd.

1. Allow tack coat to cure undisturbed before applying hot-mix asphalt paving.
2. Avoid smearing or staining adjoining surfaces, appurtenances, and surroundings. Remove spillages and clean affected surfaces.

D. Placing Patch Material: Fill excavated pavement areas with hot-mix asphalt base mix for full thickness of patch and, while still hot, compact flush with adjacent surface.

E. Placing Patch Material: Partially fill excavated pavements with hot-mix asphalt base mix and, while still hot, compact. Cover asphalt base course with compacted, hot-mix surface layer finished flush with adjacent surfaces.

## 3.4 REPAIRS

A. Leveling Course: Install and compact leveling course consisting of hot-mix asphalt surface course to level sags and fill depressions deeper than 1 inch in existing pavements.

1. Install leveling wedges in compacted lifts not exceeding 3 inches thick.

B. Crack and Joint Filling: Remove existing joint filler material from cracks or joints to a depth of 1/4 inch.

1. Clean cracks and joints in existing hot-mix asphalt pavement.
2. Use emulsified-asphalt slurry to seal cracks and joints less than 1/4 inch wide. Fill flush with surface of existing pavement and remove excess.
3. Use hot-applied joint sealant to seal cracks and joints more than 1/4 inch wide. Fill flush with surface of existing pavement and remove excess.

## 3.5 SURFACE PREPARATION

A. General: Immediately before placing asphalt materials, remove loose and deleterious material from substrate surfaces. Ensure that prepared subgrade is ready to receive paving.

B. Herbicide Treatment: Apply herbicide according to manufacturer's recommended rates and written application instructions. Apply to dry, prepared subgrade or surface of compacted-aggregate base before applying paving materials.

1. Mix herbicide with prime coat if formulated by manufacturer for that purpose.

C. Cutback Prime Coat: Apply uniformly over surface of compacted unbound-aggregate base course at a rate of 0.15 to 0.50 gal./sq. yd. . Apply enough material to penetrate and seal, but not flood, surface. Allow prime coat to cure.

1. If prime coat is not entirely absorbed within 24 hours after application, spread sand over surface to blot excess asphalt. Use enough sand to prevent pickup under traffic. Remove loose sand by sweeping before pavement is placed and after volatiles have evaporated.
2. Protect primed substrate from damage until ready to receive paving.

D. Emulsified Asphalt Prime Coat: Apply uniformly over surface of compacted unbound-aggregate base course at a rate of 0.10 to 0.30 gal./sq. yd. per inch depth. Apply enough material to penetrate and seal, but not flood, surface. Allow prime coat to cure.

1. If prime coat is not entirely absorbed within 24 hours after application, spread sand over surface to blot excess asphalt. Use enough sand to prevent pickup under traffic. Remove loose sand by sweeping before pavement is placed and after volatiles have evaporated.
2. Protect primed substrate from damage until ready to receive paving.

E. Tack Coat: Apply uniformly to surfaces of existing pavement at a rate of 0.05 to 0.15 gal./sq. yd.

1. Allow tack coat to cure undisturbed before applying hot-mix asphalt paving.
2. Avoid smearing or staining adjoining surfaces, appurtenances, and surroundings. Remove spillages and clean affected surfaces..

## 3.6 PLACING HOT-MIX ASPHALT

A. Machine place hot-mix asphalt on prepared surface, spread uniformly, and strike off. Place asphalt mix by hand in areas inaccessible to equipment in a manner that prevents segregation of mix. Place each course to required grade, cross section, and thickness when compacted.

1. Place hot-mix asphalt base course in number of lifts and thicknesses indicated.
2. Place hot-mix asphalt surface course in single lift.
3. Spread mix at a minimum temperature of 250 deg F.
4. Begin applying mix along centerline of crown for crowned sections and on high side of one-way slopes unless otherwise indicated.
5. Regulate paver machine speed to obtain smooth, continuous surface free of pulls and tears in asphalt-paving mat.

B. Place paving in consecutive strips not less than 10 feet wide unless infill edge strips of a lesser width are required.

1. After first strip has been placed and rolled, place succeeding strips and extend rolling to overlap previous strips. Overlap mix placement about 1 to 1-1/2 inches from strip to strip to ensure proper compaction of mix along longitudinal joints.
2. Complete a section of asphalt base course before placing asphalt surface course.

C. Promptly correct surface irregularities in paving course behind paver. Use suitable hand tools to remove excess material forming high spots. Fill depressions with hot-mix asphalt to prevent segregation of mix; use suitable hand tools to smooth surface.

## 3.7 JOINTS

A. Construct joints to ensure a continuous bond between adjoining paving sections. Construct joints free of depressions, with same texture and smoothness as other sections of hot-mix asphalt course.

1. Clean contact surfaces and apply tack coat to joints.
2. Offset longitudinal joints, in successive courses, a minimum of 6 inches.
3. Offset transverse joints, in successive courses, a minimum of 24 inches.
4. Construct transverse joints at each point where paver ends a day's work and resumes work at a subsequent time. Construct these joints using either "bulkhead" or "papered" method according to AI MS-22, for both "Ending a Lane" and "Resumption of Paving Operations." as shown on Drawings. Compact joints as soon as hot-mix asphalt will bear roller weight without excessive displacement.
5. Compact asphalt at joints to a density within 2 percent of specified course density.

## 3.8 COMPACTION

A. General: Begin compaction as soon as placed hot-mix paving will bear roller weight without excessive displacement. Compact hot-mix paving with hot, hand tampers or with vibratory-plate compactors in areas inaccessible to rollers.

1. Complete compaction before mix temperature cools to 185 deg F.

B. Breakdown Rolling: Complete breakdown or initial rolling immediately after rolling joints and outside edge. Examine surface immediately after breakdown rolling for indicated crown, grade, and smoothness. Correct laydown and rolling operations to comply with requirements.

C. Intermediate Rolling: Begin intermediate rolling immediately after breakdown rolling while hot-mix asphalt is still hot enough to achieve specified density. Continue rolling until hot-mix asphalt course has been uniformly compacted to the following density:

1. Average Density: 96 percent of reference laboratory density according to ASTM D 6927 or AASHTO T 245 , but not less than 94 percent or greater than 100 percent.
2. Average Density: 92 percent of reference maximum theoretical density according to ASTM D 2041, but not less than 90 percent or greater than 96 percent.

D. Finish Rolling: Finish roll paved surfaces to remove roller marks while hot-mix asphalt is still warm.

E. Edge Shaping: While surface is being compacted and finished, trim edges of pavement to proper alignment. Bevel edges while asphalt is still hot; compact thoroughly.

F. Repairs: Remove paved areas that are defective or contaminated with foreign materials and replace with fresh, hot-mix asphalt. Compact by rolling to specified density and surface smoothness.

G. Protection: After final rolling, do not permit vehicular traffic on pavement until it has cooled and hardened.

H. Erect barricades to protect paving from traffic until mixture has cooled enough not to become marked.

## 3.9 ASPHALT CURBS

A. Construct hot-mix asphalt curbs over compacted pavement surfaces. Apply a light tack coat unless pavement surface is still tacky and free from dust. Spread mix at a minimum temperature of 250 deg F.

1. Asphalt Mix: Same as pavement surface-course mix.

B. Place hot-mix asphalt to curb cross section indicated or, if not indicated, to local standard shapes, by machine or by hand in wood or metal forms. Tamp hand-placed materials and screed to smooth finish. Remove forms after hot-mix asphalt has cooled.

## 3.10 ASPHALT TRAFFIC-CALMING DEVICES

A. Construct hot-mix asphalt speed bumps humps cushions and tables over compacted pavement surfaces. Apply a tack coat unless pavement surface is still tacky and free from dust. Spread mix at a minimum temperature of 250 deg F.

1. Tack Coat Application: Apply uniformly to surfaces of existing pavement at a rate of 0.05 to 0.15 gal./sq. yd. Revise "Asphalt Mix" Subparagraph below to insert designations of state or local DOT if mixes are different.
2. Asphalt Mix: Same as pavement surface-course mix.

3. Before installation, mill pavement that will be in contact with bottom of traffic-calming device. Mill to a depth of 1 inch from top of pavement to a clean, rough profile.

B. Place and compact hot-mix asphalt to cross section indicated, by machine or by hand in wood or metal forms. Tamp hand-placed materials and screed to smooth finish. Remove forms after hot-mix asphalt has cooled.

## 3.11 INSTALLATION TOLERANCES

A. Pavement Thickness: Compact each course to produce the thickness indicated within the following tolerances:

1. Base Course: Plus or minus 1/2 inch.
2. Surface Course: Plus 1/4 inch, no minus.

B. Pavement Surface Smoothness: Compact each course to produce a surface smoothness within the following tolerances as determined by using a 10-foot straightedge applied transversely or longitudinally to paved areas:

1. Base Course: 1/4 inch
2. Surface Course: 1/8 inch
3. Crowned Surfaces: Test with crowned template centered and at right angle to crown. Maximum allowable variance from template is 1/4 inch.

C. Asphalt Traffic-Calming Devices: Compact and form asphalt to produce the contour indicated and within a tolerance of plus or minus 1/8 inch of height indicated above pavement surface.

## 3.12 SURFACE TREATMENTS

A. Fog Seals: Apply fog seal at a rate of 0.10 to 0.15 gal./sq. yd. to existing asphalt pavement and allow to cure. With fine sand, lightly dust areas receiving excess fog seal.

B. Slurry Seals: Apply slurry coat in a uniform thickness according to ASTM D 3910 and allow to cure.

1. Roll slurry seal to remove ridges and provide a uniform, smooth surface.

## 3.13 FIELD QUALITY CONTROL

A. Testing Agency: Owner will engage a qualified testing agency to perform tests and inspections.

B. Thickness: In-place compacted thickness of hot-mix asphalt courses will be determined according to ASTM D 3549.

C. Surface Smoothness: Finished surface of each hot-mix asphalt course will be tested for compliance with smoothness tolerances.

D. Asphalt Traffic-Calming Devices: Finished height of traffic-calming devices above pavement will be measured for compliance with tolerances.

E. In-Place Density: Testing agency will take samples of uncompacted paving mixtures and compacted pavement according to ASTM D 979 or AASHTO T 168 .

1. Reference maximum theoretical density will be determined by averaging results from four samples of hot-mix asphalt-paving mixture delivered daily to site, prepared according to ASTM D 2041, and compacted according to job-mix specifications.
2. In-place density of compacted pavement will be determined by testing core samples according to ASTM D 1188 or ASTM D 2726.

    a. One core sample will be taken for every 1000 sq. yd. or less of installed pavement, with no fewer than three cores taken.
    b. Field density of in-place compacted pavement may also be determined by nuclear method according to ASTM D 2950 and correlated with ASTM D 1188 or ASTM D 2726.

F. Replace and compact hot-mix asphalt where core tests were taken.

G. Remove and replace or install additional hot-mix asphalt where test results or measurements indicate that it does not comply with specified requirements.

## 3.14 WASTE HANDLING

A. General: Handle asphalt-paving waste according to approved waste management plan required in Section 01 74 19 "Construction Waste Management and Disposal."

END OF SECTION 32 12 16

**SECTION 32 13 13**
**CONCRETE PAVING**

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

B. All material and construction shall comply with all applicable FDOT and OSHA requirements and standards (latest editions).

C. Refer to Geotechnical Report for additional information and requirements for site clearing, fill, pavement, underdrain and other geotechnical components.

1.2 SUMMARY

A. Section Includes Concrete Paving, Including the Following:

1. Driveways.
2. Roadways.
3. Parking lots.
4. Curbs and gutters.
5. Walks.

B. Related Requirements:

1. Section 03 30 00 "Cast-in-Place Concrete" for general building applications of concrete.

1.3 DEFINITIONS

A. Cementitious Materials: Portland cement alone or in combination with one or more of blended hydraulic cement, fly ash, slag cement, and other pozzolans.

B. W/C Ratio: The ratio by weight of water to cementitious materials.

1.4 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at Project site.

1. Review methods and procedures related to concrete paving, including but not limited to, the following:

a. Concrete mixture design.
b. Quality control of concrete materials and concrete paving construction practices.

2. Require representatives of each entity directly concerned with concrete paving to attend, including the following:

a. Contractor's superintendent.
b. Independent testing agency responsible for concrete design mixtures.
c. Ready-mix concrete manufacturer.
d. Concrete paving Subcontractor.
e. Manufacturer's representative of stamped concrete paving system used for stamped detectable warnings.

## 1.5 ACTION SUBMITTALS

A. Product Data: For each type of product.

B. LEED Submittals:

1. Laboratory Test Reports for Credit SS 7.1: For concrete paving mixtures, documentation indicating that cured concrete complies with requirement for Solar Reflectance Index.
2. Product Certificates for Credit MR 5: For products and materials required to comply with requirements for regional materials, certificates indicating location of material manufacturer and point of extraction, harvest, or recovery for each raw material. Include statement indicating distance to Project, cost for each regional material, and fraction by weight that is considered regional.
3. Design Mixtures for Credit ID 1: For each concrete mixture containing fly ash as a replacement for Portland cement or other Portland cement replacements. For each design mixture submitted, include an equivalent concrete mixture that does not contain Portland cement replacements, to determine amount of Portland cement replaced.

C. Samples for Initial Selection: For each type of product, ingredient, or admixture requiring color selection.

D. Samples for Verification: For each type of product or exposed finish, prepared as Samples of size indicated below:

1. Exposed Aggregate: 10-lb Sample of each mix.

E. Design Mixtures: For each concrete paving mixture. Include alternate design mixtures when characteristics of materials, Project conditions, weather, test results, or other circumstances warrant adjustments.

## 1.6 INFORMATIONAL SUBMITTALS

A. Qualification Data: For qualified Installer of stamped detectable warnings ready-mix concrete manufacturer and testing agency.

B. Material Certificates: For the following, from manufacturer:

1. Cementitious materials.
2. Steel reinforcement and reinforcement accessories.
3. Fiber reinforcement.
4. Admixtures.
5. Curing compounds.
6. Applied finish materials.
7. Bonding agent or epoxy adhesive.
8. Joint fillers.

C. Material Test Reports: For each of the following:

1. Aggregates: [Include service-record data indicating absence of deleterious expansion of concrete due to alkali-aggregate reactivity.]

D. Field quality-control reports.

E. Contractor to provide joint layout to engineer for review.

1.7 QUALITY ASSURANCE

A. Stamped Detectable Warning Installer Qualifications: An employer of workers trained and approved by manufacturer of stamped concrete paving systems.

B. Ready-Mix-Concrete Manufacturer Qualifications: A firm experienced in manufacturing ready-mixed concrete products and that complies with ASTM C 94/C 94M requirements for production facilities and equipment.

1. Manufacturer certified according to NRMCA's "Certification of Ready Mixed Concrete Production Facilities" (Quality Control Manual - Section 3, "Plant Certification Checklist").

C. Testing Agency Qualifications: Qualified according to ASTM C 1077 and ASTM E 329 for testing indicated.

1. Personnel conducting field tests shall be qualified as ACI Concrete Field Testing Technician, Grade 1, according to ACI CP-1 or an equivalent certification program.

D. Mockups: Build mockups to verify selections made under Sample submittals and to demonstrate aesthetic effects and set quality standards for materials and execution.

1. Build mockups of full-thickness sections of concrete paving to demonstrate typical joints; surface finish, texture, and color; curing; and standard of workmanship.
2. Build mockups of concrete paving in the location and of the size indicated or, if not indicated, build mockups where directed by Architect and not less than 96 inches by 96 inches.
3. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Architect specifically approves such deviations in writing.
4. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.8 PRECONSTRUCTION TESTING

A. Preconstruction Testing Service: Engage a qualified independent testing agency to perform preconstruction testing on concrete paving mixtures.

1.9 FIELD CONDITIONS

A. Traffic Control: Maintain access for vehicular and pedestrian traffic as required for other construction activities.

B. Cold-Weather Concrete Placement: Protect concrete work from physical damage or reduced strength that could be caused by frost, freezing, or low temperatures. Comply with ACI 306.1 and the following:

1. When air temperature has fallen to or is expected to fall below 40 deg F, uniformly heat water and aggregates before mixing to obtain a concrete mixture temperature of not less than 50 deg F and not more than 80 deg F at point of placement.
2. Do not use frozen materials or materials containing ice or snow.
3. Do not use calcium chloride, salt, or other materials containing antifreeze agents or chemical accelerators unless otherwise specified and approved in design mixtures.

C. Hot-Weather Concrete Placement: Comply with ACI 301 and as follows when hot-weather conditions exist:

1. Cool ingredients before mixing to maintain concrete temperature below 90 deg F at time of placement. Chilled mixing water or chopped ice may be used to control temperature, provided water equivalent of ice is calculated in total amount of mixing water. Using liquid nitrogen to cool concrete is Contractor's option.
2. Cover steel reinforcement with water-soaked burlap, so steel temperature will not exceed ambient air temperature immediately before embedding in concrete.
3. Fog-spray forms, steel reinforcement, and subgrade just before placing concrete. Keep subgrade moisture uniform without standing water, soft spots, or dry areas.

## PART 2 - PRODUCTS

### 2.1 CONCRETE, GENERAL

A. ACI Publications: Comply with ACI 301 unless otherwise indicated.

### 2.2 FORMS

A. Form Materials: Plywood, metal, metal-framed plywood, or other approved panel-type materials to provide full-depth, continuous, straight, and smooth exposed surfaces.

1. Use flexible or uniformly curved forms for curves with a radius of 100 feet or less.

B. Form-Release Agent: Commercially formulated form-release agent that will not bond with, stain, or adversely affect concrete surfaces and that will not impair subsequent treatments of concrete surfaces.

### 2.3 STEEL REINFORCEMENT

A. Recycled Content: Postconsumer recycled content plus one-half of preconsumer recycled content not less than 25 percent.

B. Plain-Steel Welded-Wire Reinforcement: ASTM A 1064/A 1064M, fabricated from galvanized steel wire into flat sheets.

C. Deformed-Steel Welded-Wire Reinforcement: ASTM A 1064/A 1064M, flat sheet.

D. Epoxy-Coated Welded-Wire Reinforcement: ASTM A 884/A 884M, Class A, plain steel.

E. Reinforcing Bars: ASTM A 615/A 615M, Grade 60; deformed.

F. Galvanized Reinforcing Bars: ASTM A 767/A 767M, Class II zinc coated, hot-dip galvanized after fabrication and bending; with ASTM A 615/A 615M, Grade 60 deformed bars.

G. Epoxy-Coated Reinforcing Bars: ASTM A 775/A 775M or ASTM A 934/A 934M; with ASTM A 615/A 615M, Grade 60 deformed bars.

H. Steel Bar Mats: ASTM A 184/A 184M; with ASTM A 615/A 615M, Grade 60 deformed bars; assembled with clips.

I. Plain-Steel Wire: ASTM A 1064/A 1064M, galvanized.

J. Deformed-Steel Wire: ASTM A 1064/A 1064M.

K. Epoxy-Coated-Steel Wire: ASTM A 884/A 884M, Class A; coated, plain.

L. Joint Dowel Bars: ASTM A 615/A 615M, Grade 60 plain-steel bars [; zinc coated galvanized after fabrication according to ASTM A 767/A 767M, Class I coating. Cut bars true to length with ends square and free of burrs.

M. Epoxy-Coated, Joint Dowel Bars: ASTM A 775/A 775M; with ASTM A 615/A 615M, Grade 60 plain-steel bars.

N. Tie Bars: ASTM A 615/A 615M, Grade 60; deformed.

O. Hook Bolts: ASTM A 307, Grade A, internally and externally threaded. Design hook-bolt joint assembly to hold coupling against paving form and in position during concreting operations, and to permit removal without damage to concrete or hook bolt.

P. Bar Supports: Bolsters, chairs, spacers, and other devices for spacing, supporting, and fastening reinforcing bars, welded-wire reinforcement, and dowels in place. Manufacture bar supports according to CRSI's "Manual of Standard Practice" from steel wire, plastic, or precast concrete of greater compressive strength than concrete specified, and as follows:

1. Equip wire bar supports with sand plates or horizontal runners where base material will not support chair legs.
2. For epoxy-coated reinforcement, use epoxy-coated or other dielectric-polymer-coated wire bar supports.

Q. Epoxy Repair Coating: Liquid, two-part, epoxy repair coating, compatible with epoxy coating on reinforcement.

R. Zinc Repair Material: ASTM A 780/A 780M.

## 2.4 CONCRETE MATERIALS

A. Regional Materials: Concrete shall be manufactured within 500 miles of Project site from aggregates [and cement] that have been extracted, harvested, or recovered, as well as manufactured, within 500 miles of Project site.

B. Cementitious Materials: Use the following cementitious materials, of same type, brand, and source throughout Project:

1. Portland Cement: ASTM C 150/C 150M, gray Portland cement Type I/II.
2. Fly Ash: ASTM C 618, Class C.
3. Slag Cement: ASTM C 989/C 989M, Grade 100 or 120.
4. Blended Hydraulic Cement: ASTM C 595/C 595M, Type IS, cement.

C. Normal-Weight Aggregates: ASTM C 33/C 33M, Class 4S, uniformly graded. Provide aggregates from a single source [with documented service-record data of at least 10 years' satisfactory service in similar paving applications and service conditions using similar aggregates and cementitious materials].

1. Maximum Coarse-Aggregate Size: 1 inch nominal.
2. Fine Aggregate: Free of materials with deleterious reactivity to alkali in cement.

D. Exposed Aggregate: Selected, hard, and durable; washed; free of materials with deleterious reactivity to cement or that cause staining; from a single source, with gap-graded coarse aggregate as follows:

1. Aggregate Sizes: 3/4 to 1 inch nominal.
2. Aggregate Source, Shape, and Color

E. Air-Entraining Admixture: ASTM C 260/C 260M.

F. Chemical Admixtures: Admixtures certified by manufacturer to be compatible with other admixtures and to contain no more than 0.1 percent water-soluble chloride ions by mass of cementitious material.

1. Water-Reducing Admixture: ASTM C 494/C 494M, Type A.
2. Retarding Admixture: ASTM C 494/C 494M, Type B.
3. Water-Reducing and Retarding Admixture: ASTM C 494/C 494M, Type D.
4. High-Range, Water-Reducing Admixture: ASTM C 494/C 494M, Type F.
5. High-Range, Water-Reducing and Retarding Admixture: ASTM C 494/C 494M, Type G.
6. Plasticizing and Retarding Admixture: ASTM C 1017/C 1017M, Type II.

G. Color Pigment: ASTM C 979/C 979M, synthetic mineral-oxide pigments or colored water-reducing admixtures; color stable free of carbon black, nonfading, and resistant to lime and other alkalis.

1. Color: As selected by Architect from manufacturer's full range

H. Water: Potable and complying with ASTM C 94/C 94M.

## 2.5 FIBER REINFORCEMENT

A. Synthetic Fiber: Monofilament polypropylene fibers engineered and designed for use in decorative concrete paving, complying with ASTM C 1116/C 1116M, Type III, 1/2 to 1-1/2 inches long.

B. Synthetic Fiber: Fibrillated polypropylene fibers engineered and designed for use in decorative concrete paving, complying with ASTM C 1116/C 1116M, Type III, 1/2 to 1-1/2 inches long.

## 2.6 CURING MATERIALS

A. Absorptive Cover: AASHTO M 182, Class 3, burlap cloth made from jute or kenaf, weighing approximately 9 oz. /sq. yd. dry.

B. Moisture-Retaining Cover: ASTM C 171, polyethylene film or white burlap-polyethylene sheet.

C. Water: Potable.

D. Evaporation Retarder: Waterborne, monomolecular, film forming, manufactured for application to fresh concrete.

E. Clear, Waterborne, Membrane-Forming Curing Compound: ASTM C 309, Type 1, Class B, dissipating.

F. White, Waterborne, and Membrane-Forming Curing Compound: ASTM C 309, Type 2, Class B, dissipating.

## 2.7 RELATED MATERIALS

A. Joint Fillers: ASTM D 1751, asphalt-saturated cellulosic fiber in preformed strips.

B. Slip-Resistive Aggregate Finish: Factory-graded, packaged, rustproof, nonglazing, abrasive aggregate of fused aluminum-oxide granules or crushed emery aggregate containing not less than 50 percent aluminum oxide and not less than 20 percent ferric oxide; unaffected by freezing, moisture, and cleaning materials.

C. Bonding Agent: ASTM C 1059/C 1059M, Type II, non-redispersible, acrylic emulsion or styrene butadiene.

D. Epoxy-Bonding Adhesive: ASTM C 881/C 881M, two-component epoxy resin capable of humid curing and bonding to damp surfaces; of class suitable for application temperature, of grade complying with requirements, and of the following types:

1. Types IV and V, load bearing, for bonding hardened or freshly mixed concrete to hardened concrete.

E. Chemical Surface Retarder: Water-soluble, liquid, set retarder with color dye, for horizontal concrete surface application, capable of temporarily delaying final hardening of concrete to a depth of 1/8 to 1/4 inch.

F. Pigmented Mineral Dry-Shake Hardener: Factory-packaged, dry combination of Portland cement, graded quartz aggregate, color pigments, and plasticizing admixture. Use color pigments that are finely ground, nonfading mineral oxides interground with cement.

1. Color: As selected by Architect from manufacturer's full range.

G. Rock Salt: Sodium chloride crystals, kiln dried, coarse gradation with 100 percent passing 3/8-inch sieve and 85 percent retained on a No. 8 sieve.

## 2.8 STAMPED DETECTABLE WARNING MATERIALS

A. Detectable Warning Stamp: Semirigid polyurethane mats with formed underside capable of imprinting detectable warning pattern on plastic concrete; perforated with a vent hole at each dome.

1. Size of Stamp: One piece, matching detectable warning area shown on Drawings.

B. Liquid Release Agent: Manufacturer's standard, clear, evaporating formulation designed to facilitate release of stamp mats.

## 2.9 CONCRETE MIXTURES

A. Prepare design mixtures, proportioned according to ACI 301, for each type and strength of normal-weight concrete, and as determined by either laboratory trial mixtures or field experience.

1. Use a qualified independent testing agency for preparing and reporting proposed concrete design mixtures for the trial batch method.
2. When automatic machine placement is used, determine design mixtures and obtain laboratory test results that comply with or exceed requirements.

B. Cementitious Materials: Use fly ash, pozzolan, slag cement, and silica fume as needed to reduce the total amount of Portland cement, which would otherwise be used, by not less than 40 percent.] [ Limit percentage, by weight, of cementitious materials other than Portland cement in concrete as follows:

1. Fly Ash or Pozzolan: 25 percent.
2. Slag Cement: 50 percent.
3. Combined Fly Ash or Pozzolan, and Slag Cement: 50 percent, with fly ash or pozzolan not exceeding 25 percent.

C. Add air-entraining admixture at manufacturer's prescribed rate to result in normal-weight concrete at point of placement having an air content as follows:

1. Air Content: 4-1/2 percent plus or minus 1-1/2 percent for 1-1/2-inch (nominal maximum aggregate size.
2. Air Content: 4-1/2 percent plus or minus 1-1/2 percent for 1-inch nominal maximum aggregate size.
3. Air Content: 5 percent plus or minus 1-1/2 percent for 3/4-inch nominal maximum aggregate size.

D. Limit water-soluble, chloride-ion content in hardened concrete to 0.15 percent by weight of cement.

E. Chemical Admixtures: Use admixtures according to manufacturer's written instructions.

1. Use high-range, water-reducing admixture in concrete as required for placement and workability.
2. Use water-reducing and retarding admixture when required by high temperatures, low humidity, or other adverse placement conditions.

F. Synthetic Fiber: Uniformly disperse in concrete mixture at manufacturer's recommended rate, but not less than 1.5 lb/cu. yd.

G. Color Pigment: Add color pigment to concrete mixture according to manufacturer's written instructions and to result in hardened concrete color consistent with approved mockup.

H. Concrete Mixtures: Normal-weight concrete.

1. Compressive Strength (28 Days): 3500 psi. Insert another subparagraph for flexural strength if required.
2. Maximum W/C Ratio at Point of Placement: 0.45.
3. Slump Limit: 4 inches, plus or minus 1 inch.
4. Solar Reflectance Index: Not less than 29.

2.10 CONCRETE MIXING

A. Ready-Mixed Concrete: Measure, batch, and mix concrete materials and concrete according to ASTM C 94/C 94M. Furnish batch certificates for each batch discharged and used in the Work.

1. When air temperature is between 85 and 90 deg F, reduce mixing and delivery time from 1-1/2 hours to 75 minutes; when air temperature is above 90 deg F, reduce mixing and delivery time to 60 minutes.

B. Project-Site Mixing: Measure, batch, and mix concrete materials and concrete according to ASTM C 94/C 94M. Mix concrete materials in appropriate drum-type batch machine mixer.

1. For concrete batches of 1 cu. yd. or smaller, continue mixing at least 1-1/2 minutes, but not more than 5 minutes after ingredients are in mixer, before any part of batch is released.
2. For concrete batches larger than 1 cu. yd., increase mixing time by 15 seconds for each additional 1 cu. yd.
3. Provide batch ticket for each batch discharged and used in the Work, indicating Project identification name and number, date, mixture type, mixing time, quantity, and amount of water added.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine exposed subgrades and subbase surfaces for compliance with requirements for dimensional, grading, and elevation tolerances.

B. Proof-roll prepared subbase surface below concrete paving to identify soft pockets and areas of excess yielding.

1. Completely proof-roll subbase in one direction and repeat in perpendicular direction. Limit vehicle speed to 3 mph.
2. Proof-roll with a pneumatic-tired and loaded, 10-wheel, tandem-axle dump truck weighing not less than 15 tons.
3. Correct subbase with soft spots and areas of pumping or rutting exceeding depth of 1/2 inch > according to requirements in Section 31 20 00 "Earth Moving."

C. Proceed with installation only after unsatisfactory conditions have been corrected.

## 3.2 PREPARATION

A. Remove loose material from compacted subbase surface immediately before placing concrete.

## 3.3 EDGE FORMS AND SCREED CONSTRUCTION

A. Set, brace, and secure edge forms, bulkheads, and intermediate screed guides to required lines, grades, and elevations. Install forms to allow continuous progress of work and so forms can remain in place at least 24 hours after concrete placement.

B. Clean forms after each use and coat with form-release agent to ensure separation from concrete without damage.

## 3.4 STEEL REINFORCEMENT INSTALLATION

A. General: Comply with CRSI's "Manual of Standard Practice" for fabricating, placing, and supporting reinforcement.

B. Clean reinforcement of loose rust and mill scale, earth, ice, or other bond-reducing materials.

C. Arrange, space, and securely tie bars and bar supports to hold reinforcement in position during concrete placement. Maintain minimum cover to reinforcement.

D. Install welded-wire reinforcement in lengths as long as practicable. Lap adjoining pieces at least one full mesh, and lace splices with wire. Offset laps of adjoining widths to prevent continuous laps in either direction.

E. Zinc-Coated Reinforcement: Use galvanized-steel wire ties to fasten zinc-coated reinforcement. Repair cut and damaged zinc coatings with zinc repair material.

F. Epoxy-Coated Reinforcement: Use epoxy-coated steel wire ties to fasten epoxy-coated reinforcement. Repair cut and damaged epoxy coatings with epoxy repair coating according to ASTM D 3963/D 3963M.

G. Install fabricated bar mats in lengths as long as practicable. Handle units to keep them flat and free of distortions. Straighten bends, kinks, and other irregularities, or replace units as required before placement. Set mats for a minimum 2-inch overlap of adjacent mats.

## 3.5 JOINTS

A. General: Form construction, isolation, and contraction joints and tool edges true to line, with faces perpendicular to surface plane of concrete. Construct transverse joints at right angles to centerline unless otherwise indicated.

1. When joining existing paving, place transverse joints to align with previously placed joints unless otherwise indicated.

B. Construction Joints: Set construction joints at side and end terminations of paving and at locations where paving operations are stopped for more than one-half hour unless paving terminates at isolation joints.

1. Continue steel reinforcement across construction joints unless otherwise indicated. Do not continue reinforcement through sides of paving strips unless otherwise indicated.
2. Provide tie bars at sides of paving strips where indicated.
3. Butt Joints: Use bonding agent at joint locations where fresh concrete is placed against hardened or partially hardened concrete surfaces.
4. Keyed Joints: Provide preformed keyway-section forms or bulkhead forms with keys unless otherwise indicated. Embed keys at least 1-1/2 inches into concrete.
5. Doweled Joints: Install dowel bars and support assemblies at joints where indicated. Lubricate or coat with asphalt one-half of dowel length to prevent concrete bonding to one side of joint.

C. Isolation Joints: Form isolation joints of preformed joint-filler strips abutting concrete curbs, catch basins, manholes, inlets, structures, other fixed objects, and where indicated.

1. Locate expansion joints at intervals of 50 feet unless otherwise indicated.
2. Extend joint fillers full width and depth of joint.
3. Terminate joint filler not less than 1/2 inch or more than 1 inch below finished surface if joint sealant is indicated.
4. Place top of joint filler flush with finished concrete surface if joint sealant is not indicated.
5. Furnish joint fillers in one-piece lengths. Where more than one length is required, lace or clip joint-filler sections together.
6. During concrete placement, protect top edge of joint filler with metal, plastic, or other temporary preformed cap. Remove protective cap after concrete has been placed on both sides of joint.

D. Contraction Joints: Form weakened-plane contraction joints, sectioning concrete into areas as indicated. Construct contraction joints for a depth equal to at least one-fourth of the concrete thickness, as follows:

1. Grooved Joints: Form contraction joints after initial floating by grooving and finishing each edge of joint with grooving tool to a 1/4-inch radius. Repeat grooving of contraction joints after applying surface finishes.

    a. Tolerance: Ensure that grooved joints are within 3 inches either way from centers of dowels.

2. Sawed Joints: Form contraction joints with power saws equipped with shatterproof abrasive or diamond-rimmed blades. Cut 1/8-inch- wide joints into concrete when cutting action will not tear, abrade, or otherwise damage surface and before developing random contraction cracks.

    a. Tolerance: Ensure that sawed joints are within 3 inches either way from centers of dowels.

3. Doweled Contraction Joints: Install dowel bars and support assemblies at joints where indicated. Lubricate or coat with asphalt one-half of dowel length to prevent concrete bonding to one side of joint.

E. Edging: After initial floating, tool edges of paving, gutters, curbs, and joints in concrete with an edging tool to a 1/4-inch radius. Repeat tooling of edges after applying surface finishes.

## 3.6 CONCRETE PLACEMENT

A. Before placing concrete, inspect and complete formwork installation, steel reinforcement, and items to be embedded or cast-in.

B. Remove snow, ice, or frost from subbase surface and steel reinforcement before placing concrete. Do not place concrete on frozen surfaces.

C. Moisten subbase to provide a uniform dampened condition at time concrete is placed. Do not place concrete around manholes or other structures until they are at required finish elevation and alignment.

D. Comply with ACI 301 requirements for measuring, mixing, transporting, and placing concrete.

E. Do not add water to concrete during delivery or at Project site. Do not add water to fresh concrete after testing.

F. Deposit and spread concrete in a continuous operation between transverse joints. Do not push or drag concrete into place or use vibrators to move concrete into place.

G. Consolidate concrete according to ACI 301 by mechanical vibrating equipment supplemented by hand spading, rodding, or tamping.

   1. Consolidate concrete along face of forms and adjacent to transverse joints with an internal vibrator. Keep vibrator away from joint assemblies, reinforcement, or side forms. Use only square-faced shovels for hand spreading and consolidation. Consolidate with care to prevent dislocating joint devices.

H. Screed paving surface with a straightedge and strike off.

I. Commence initial floating using bull floats or darbies to impart an open-textured and uniform surface plane before excess moisture or bleedwater appears on the surface. Do not further disturb concrete surfaces before beginning finishing operations or spreading surface treatments.

J. Curbs and Gutters: Use design mixture for automatic machine placement. Produce curbs and gutters to required cross section, lines, grades, finish, and jointing.

K. Slip-Form Paving: Use design mixture for automatic machine placement. Produce paving to required thickness, lines, grades, finish, and jointing.

   1. Compact subbase and prepare subgrade of sufficient width to prevent displacement of slip-form paving machine during operations.

## 3.7 FLOAT FINISHING

A. General: Do not add water to concrete surfaces during finishing operations.

B. Float Finish: Begin the second floating operation when bleedwater sheen has disappeared and concrete surface has stiffened sufficiently to permit operations. Float surface with power-driven floats or by hand floating if area is small or inaccessible to power units. Finish surfaces to true planes. Cut down high spots and fill low spots. Refloat surface immediately to uniform granular texture.

1. Burlap Finish: Drag a seamless strip of damp burlap across float-finished concrete, perpendicular to line of traffic, to provide a uniform, gritty texture.
2. Medium-to-Fine-Textured Broom Finish: Draw a soft-bristle broom across float-finished concrete surface, perpendicular to line of traffic, to provide a uniform, fine-line texture.
3. Medium-to-Coarse-Textured Broom Finish: Provide a coarse finish by striating float-finished concrete surface 1/16 to 1/8 inch deep with a stiff-bristled broom, perpendicular to line of traffic.

## 3.8 SPECIAL FINISHES

A. Monolithic Exposed-Aggregate Finish: Expose coarse aggregate in paving surface as follows:

1. Immediately after float finishing, spray-apply chemical surface retarder to paving according to manufacturer's written instructions.
2. Cover paving surface with plastic sheeting, sealing laps with tape, and remove when ready to continue finishing operations.
3. Without dislodging aggregate, remove mortar concealing the aggregate by lightly brushing surface with a stiff, nylon-bristle broom. Do not expose more than one-third of the average diameter of the aggregate and not more than one-half of the diameter of the smallest aggregate.
4. Fine-spray surface with water and brush. Repeat cycle of water flushing and brushing until cement film is removed from aggregate surfaces to depth required.

B. Seeded Exposed-Aggregate Finish: Immediately after initial floating, spread a single layer of aggregate uniformly on paving surface. Tamp aggregate into plastic concrete and float finish to entirely embed aggregate with mortar cover of 1/16 inch.

1. Spray-apply chemical surface retarder to paving according to manufacturer's written instructions.
2. Cover paving surface with plastic sheeting, sealing laps with tape, and remove sheeting when ready to continue finishing operations.
3. Without dislodging aggregate, remove mortar concealing the aggregate by lightly brushing surface with a stiff, nylon-bristle broom. Do not expose more than one-third of the average diameter of the aggregate and not more than one-half of the diameter of the smallest aggregate.
4. Fine-spray surface with water and brush. Repeat cycle of water flushing and brushing until cement film is removed from aggregate surfaces to depth required.

C. Slip-Resistive Aggregate Finish: Before final floating, spread slip-resistive aggregate finish on paving surface according to manufacturer's written instructions and as follows:

1. Uniformly spread 40 lb/100 sq. ft. of dampened, slip-resistive aggregate over paving surface in two applications. Tamp aggregate flush with surface using a steel trowel, but do not force below surface.
2. Uniformly distribute approximately two-thirds of slip-resistive aggregate over paving surface with mechanical spreader, allow to absorb moisture, and embed by power floating. Follow power floating with a second slip-resistive aggregate application, uniformly distributing remainder of material at right angles to first application to ensure uniform coverage, and embed by power floating.
3. Cure concrete with curing compound recommended by slip-resistive aggregate manufacturer. Apply curing compound immediately after final finishing.
4. After curing, lightly work surface with a steel-wire brush or abrasive stone and water to expose nonslip aggregate.

D. Pigmented Mineral Dry-Shake Hardener Finish: After initial floating, apply dry-shake materials to paving surface according to manufacturer's written instructions and as follows:

1. Uniformly spread dry-shake hardener at a rate of 100 lb/100 sq. ft. unless greater amount is recommended by manufacturer to match paving color required.
2. Uniformly distribute approximately two-thirds of dry-shake hardener over the concrete surface with mechanical spreader; allow hardener to absorb moisture and embed it by power floating. Follow power floating with a second application of pigmented mineral dry-shake hardener, uniformly distributing remainder of material at right angles to first application to ensure uniform color, and embed hardener by final power floating.
3. After final power floating, apply a hand-troweled finish followed by a broom finish.
4. Cure concrete with curing compound recommended by dry-shake hardener manufacturer. Apply curing compound immediately after final finishing.

## 3.9 DETECTABLE WARNING INSTALLATION

A. Blockouts: Form blockouts in concrete for installation of detectable paving units.

1. Tolerance for Opening Size: Plus 1/4 inch, no minus.

B. Cast-in-Place Detectable Warning Tiles: Form blockouts in concrete for installation of tiles. Screed surface of concrete where tiles are to be installed to elevation, so that edges of installed tiles will be flush with surrounding concrete paving. Embed tiles in fresh concrete immediately after screeding concrete surface.

C. Stamped Detectable Warnings: Install stamped detectable warnings as part of a continuous concrete paving placement and according to stamp-mat manufacturer's written instructions.

1. Before using stamp mats, verify that the vent holes are unobstructed.
2. Apply liquid release agent to the concrete surface and the stamp mat.
3. Stamping: While initially finished concrete is plastic accurately align and place stamp mats in sequence. Uniformly load, gently vibrate, and press mats into concrete to produce imprint pattern on concrete surface. Load and tamp mats directly perpendicular to the stamp-mat surface to prevent distortion in shape of domes. Press and tamp until mortar begins to come through all of the vent holes. Gently remove stamp mats.
4. Trimming: After 24 hours, cut off the tips of mortar formed by the vent holes.
5. Remove residual release agent according to manufacturer's written instructions, but no fewer than three days after stamping concrete. High-pressure-wash surface and joint patterns, taking care not to damage stamped concrete. Control, collect, and legally dispose of runoff.

## 3.10 CONCRETE PROTECTION AND CURING

A. General: Protect freshly placed concrete from premature drying and excessive cold or hot temperatures.

B. Comply with ACI 306.1 for cold-weather protection.

C. Evaporation Retarder: Apply evaporation retarder to concrete surfaces if hot, dry, or windy conditions cause moisture loss approaching 0.2 lb/sq. ft. x h before and during finishing operations. Apply according to manufacturer's written instructions after placing, screeding, and bull floating or darbying concrete but before float finishing.

D. Begin curing after finishing concrete but not before free water has disappeared from concrete surface.

E. Curing Methods: Cure concrete by moisture-retaining-cover as follows:

1. Moisture Curing: Keep surfaces continuously moist for not less than seven days with the following materials:

a. Water.
b. Continuous water-fog spray.
c. Absorptive cover, water saturated and kept continuously wet. Cover concrete surfaces and edges with 12-inch lap over adjacent absorptive covers.

2. Moisture-Retaining-Cover Curing: Cover concrete surfaces with moisture-retaining cover, placed in widest practicable width, with sides and ends lapped at least 12 inches, and sealed by waterproof tape or adhesive. Immediately repair any holes or tears occurring during installation or curing period, using cover material and waterproof tape.
3. Curing Compound: Apply uniformly in continuous operation by power spray or roller according to manufacturer's written instructions. Recoat areas subjected to heavy rainfall within three hours after initial application. Maintain continuity of coating, and repair damage during curing period.

## 3.11 PAVING TOLERANCES

A. Comply with tolerances in ACI 117 and as follows:

1. Elevation: 3/4 inch.
2. Thickness: Plus 3/8 inch , minus 1/4 inch
3. Surface: Gap below 10-feet- long; unleveled straightedge not to exceed 1/2 inch
4. Alignment of Tie-Bar End Relative to Line Perpendicular to Paving Edge: 1/2 inch per 12 inches of tie bar.
5. Lateral Alignment and Spacing of Dowels: 1 inch
6. Vertical Alignment of Dowels: 1/4 inch
7. Alignment of Dowel-Bar End Relative to Line Perpendicular to Paving Edge: 1/4 inch per 12 inches of dowel.
8. Joint Spacing: 3 inches
9. Contraction Joint Depth: Plus 1/4 inch, no minus.
10. Joint Width: Plus 1/8 inch, no minus.

## 3.12 FIELD QUALITY CONTROL

A. Testing Agency: Engage a qualified testing agency to perform tests and inspections.

B. Testing Services: Testing and inspecting of composite samples of fresh concrete obtained according to ASTM C 172/C 172M shall be performed according to the following requirements:

1. Testing Frequency: Obtain at least one composite sample for each 5000 sq. ft. or fraction thereof of each concrete mixture placed each day.

a. When frequency of testing will provide fewer than five compressive-strength tests for each concrete mixture, testing shall be conducted from at least five randomly selected batches or from each batch if fewer than five are used.

2. Slump: ASTM C 143/C 143M; one test at point of placement for each composite sample, but not less than one test for each day's pour of each concrete mixture. Perform additional tests when concrete consistency appears to change.
3. Air Content: ASTM C 231/C 231M, pressure method; one test for each composite sample, but not less than one test for each day's pour of each concrete mixture.
4. Concrete Temperature: ASTM C 1064/C 1064M; one test hourly when air temperature is 40 deg F and below and when it is 80 deg F and above, and one test for each composite sample.
5. Compression Test Specimens: ASTM C 31/C 31M; cast and laboratory cure one set of three standard cylinder specimens for each composite sample.
6. Compressive-Strength Tests: ASTM C 39/C 39M; test one specimen at seven days and two specimens at 28 days.

    a. A compressive-strength test shall be the average compressive strength from two specimens obtained from same composite sample and tested at 28 days.

C. Strength of each concrete mixture will be satisfactory if average of any three consecutive compressive-strength tests equals or exceeds specified compressive strength and no compressive-strength test value falls below specified compressive strength by more than 500 psi.

D. Test results shall be reported in writing to Architect, concrete manufacturer, and Contractor within 48 hours of testing. Reports of compressive-strength tests shall contain Project identification name and number, date of concrete placement, name of concrete testing and inspecting agency, location of concrete batch in Work, design compressive strength at 28 days, concrete mixture proportions and materials, compressive breaking strength, and type of break for both 7- and 28-day tests.

E. Nondestructive Testing: Impact hammer, sonoscope, or other nondestructive device may be permitted by Architect but will not be used as sole basis for approval or rejection of concrete.

F. Additional Tests: Testing and inspecting agency shall make additional tests of concrete when test results indicate that slump, air entrainment, compressive strengths, or other requirements have not been met, as directed by Architect.

G. Concrete paving will be considered defective if it does not pass tests and inspections.

H. Additional testing and inspecting, at Contractor's expense, will be performed to determine compliance of replaced or additional work with specified requirements.

I. Prepare test and inspection reports.

## 3.13 REPAIR AND PROTECTION

A. Remove and replace concrete paving that is broken, damaged, or defective or that does not comply with requirements in this Section. Remove work in complete sections from joint to joint unless otherwise approved by Architect.

B. Drill test cores, where directed by Architect, when necessary to determine magnitude of cracks or defective areas. Fill drilled core holes in satisfactory paving areas with Portland cement concrete bonded to paving with epoxy adhesive.

C. Protect concrete paving from damage. Exclude traffic from paving for at least 14 days after placement. When construction traffic is permitted, maintain paving as clean as possible by removing surface stains and spillage of materials as they occur.

D. Maintain concrete paving free of stains, discoloration, dirt, and other foreign material. Sweep paving not more than two days before date scheduled for Substantial Completion inspections.

END OF SECTION 32 13 13

**SECTION 32 31 13**
**CHAIN LINK FENCES AND GATES**

PART 1 – GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

B. FDOT requirements (latest editions) for materials and installation shall apply to all fence construction with the most restrictive governing. Contractor to contact engineer and architect if discrepancies exist.

1.2 SUMMARY

A. Section Includes:

1. Chain-link fences.
2. Manual operated gates.

B. Related Requirements:

1. Section 03 30 00 "Cast-in-Place Concrete" for cast-in-place concrete equipment bases/pads for gate operators and controls and post footings.

1.3 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at Project site.

1. Review coordination of interlocked equipment specified in this Section and elsewhere. Review required testing, inspecting, and certifying procedures.

1.4 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for the following:

a. Fence and gate posts, rails, and fittings.
b. Chain-link fabric, reinforcements, and attachments.
c. Gates and hardware.

B. Shop Drawings: For each type of fence and gate assembly.

1. Include plans, elevations, sections, details, and attachments to other work.
2. Include accessories, hardware, gate operation, and operational clearances.

C. Samples for Initial Selection: For each type of factory-applied finish.

D. Samples for Verification: For each type of component with factory-applied finish, prepared on Samples of size indicated below:

1. Polymer-Coated Components: In 6-inch lengths for components and on full-sized units for accessories.

E. Delegated-Design Submittal: For structural performance of chain-link fence and gate frameworks, including analysis data signed and sealed by the qualified professional engineer responsible for their preparation.

## 1.5 INFORMATIONAL SUBMITTALS

A. Qualification Data: For testing agency, factory-authorized service representative.

B. Product Certificates: For each type of chain-link fence, operator, and gate.

C. Product Test Reports: For framework strength according to ASTM F 1043, for tests performed by manufacturer and witnessed by a qualified testing agency. Retain "Field quality-control reports" Paragraph below if Contractor is responsible for field quality-control testing and inspecting.

D. Field quality-control reports.

E. Sample Warranty: For special warranty.

## 1.6 CLOSEOUT SUBMITTALS

A. Operation and Maintenance Data: For gate operators to include in emergency, operation, and maintenance manuals.

## 1.7 QUALITY ASSURANCE

A. Testing Agency Qualifications: For testing fence grounding; member company of NETA or an NRTL.

1. Testing Agency's Field Supervisor: Certified by NETA to supervise on-site testing.

B. Emergency Access Requirements: According to requirements of authorities having jurisdiction for gates serving as a required means of access.

C. Mockups: Build mockups to set quality standards for fabrication and installation.

1. Build mockup for typical chain-link fence and gate, including accessories.

a. Size: 10-foot length of fence.

1.8 FIELD CONDITIONS

A. Field Measurements: Verify layout information for chain-link fences and gates shown on Drawings in relation to property survey and existing structures. Verify dimensions by field measurements.

1.9 WARRANTY

A. Special Warranty: Installer agrees to repair or replace components of chain-link fences and gates that fail in materials or workmanship within specified warranty period.

1. Failures include, but are not limited to, the following:

a. Failure to comply with performance requirements.
b. Deterioration of metals, metal finishes, and other materials beyond normal weathering.

2. Warranty Period: 15 years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Delegated Design: Engage a qualified professional engineer, as defined in Section 01 40 00 "Quality Requirements," to design chain-link fence and gate frameworks.

B. Structural Performance: Chain-link fence and gate frameworks shall withstand the design wind loads and stresses for fence height(s) and under exposure conditions indicated according to Local Code requirements.

1. Design Wind Load: As indicated on Architectural Drawings.

a. Minimum Post Size: Determine according to ASTM F 1043 for post spacing not to exceed 10 feet for Material Group IA, ASTM F 1043, Schedule 40 steel pipe.
b. Minimum Post Size and Maximum Spacing: Determine according to CLFMI WLG 2445, based on mesh size and pattern specified.

C. Lightning Protection System: Maximum resistance-to-ground value of 25 ohms at each grounding location along fence under normal dry conditions.

2.2 Decorative Fence

A. Ameristar Montage II Invincible 2/3/4 Rail

2.3 CHAIN-LINK FENCE

A. General: Provide fabric in one-piece heights measured between top and bottom of outer edge of selvage twist according to "CLFMI Product Manual" and requirements indicated below:

1. Fabric Height: As indicated on Drawings.

2. Steel Wire for Fabric per FDOT requirements 2” mesh black vinyl coated steel

2.4 FENCE COMPONENTS

A. Posts, Top rails, braces, barbed wire, bottom tension wire, gates, fittings – comply with FDOT requirements to match mesh.

PART 3 – EXECUTION

3.1 Execution installation per AC150 and FDOT requirements.

3.2 FIELD QUALITY CONTROL

A. Testing Agency: [Engage] a qualified testing agency to perform tests.

B. Grounding Tests: Comply with requirements in Section 26 41 13 "Lightning Protection for Structures."

C. Prepare test reports.

3.3 ADJUSTING

A. Gates: Adjust gates to operate smoothly, easily, and quietly, free of binding, warp, excessive deflection, distortion, nonalignment, misplacement, disruption, or malfunction, throughout entire operational range. Confirm that latches and locks engage accurately and securely without forcing or binding.

3.4 DEMONSTRATION

A. Engage a factory-authorized service representative to train Owner's maintenance personnel to adjust, operate, and maintain chain-link fences and gates.

END OF SECTION 32 31 13

**SECTION 32 91 15**
**ATHLETIC FIELD CONSTRUCTION**

PART 1 - GENERAL

1.1 DESCRIPTION:

A. The work includes, but is not necessarily limited to, the construction of the athletic field, including installation of drain lines, four (4") inch coarse sand layer, eight (8") inch root zone mix layer, and fine grading, in accordance with this Section of the Specifications and all applicable drawings, and subject to the terms and conditions of the Contract.

PART 2 - PRODUCTS

2.1 Transport pipe and fittings shall be new, of the best quality, high density polyethylene corrugated drainage pipe with an integrally formed smooth interior (perforated and non-perforated) conforming to AASHTO M-252 or M-294 Type S or SP; as manufactured by Advanced Drainage Systems, Inc., 4640 Trueman Blvd., Hilliard, OH 43026, (800)821-6710, (ADS N-12 Pipe), Hancor, Inc., 12370 Jacksontown Rd. #172, Findlay, OH 45840, (888)367-7473 (Hancor Hi-Q) or equal. (REFER TO CIVIL DRAWINGS FOR THIS ITEM)

2.2 Collection pipe and fittings shall be new, of the best quality, high density polyethylene with the core constructed using interconnected corrugated pipes that define and provide the flow channels and structural integrity of the drain, and geotextile functioning only as a filter, with outside dimensions of 1” x 12” as manufactured by Varicore Technologies, Inc., PO Box 131, Prinsburg, MN 56281, (800) 978-8007 (12” Multi-Flow Pipe), or equal.

2.3 The four (4") inch coarse sand layer shall be 315 Golf Course Construction Sand, as produced by Vulcan Materials Company Keuka Industrial Sand Plant 76-137, 400 Keuka Rd., Interlachen, FL 32148, (386) 684-2599. A sample of aggregate shall be submitted to the approved laboratory for approval prior to use.

2.4 Root zone mix shall consist of 85% sand and 15% Canadian Sphagnum Peatmoss. The physical properties of the root zone mix shall fall within current USGA recommended ranges. Final mix will have between .75% and .95% organic matter by weight, per testing method ASTM F1647.

2.5 Sand for root zone mix shall conform to current USGA particle size recommendations and performance specifications, shall be clean, washed and screened, and shall be approved by the approved laboratory.

2.6 Organic material for the root zone mix shall be Canadian Sphagnum Peatmoss, having minimum organic matter content of 85% by weight as determined by loss on ignition (ASTM D 2974 Method D) and shall be approved by the approved laboratory.

2.7 The Contractor shall be certain that all suppliers of coarse sand, sand and organic matter have insurance and/or be bonded to insure that all materials delivered to the site for field construction conform to the approved materials and recommendations of the approved laboratory. Suppliers shall be in the business of normally supplying these materials and must have adequate supplies on hand to ensure their future availability as needed. All materials shall be approved by Owner/Designer prior to delivery. It should be verified that the transport vehicles are clean and free of contamination prior to dumping. Once the materials are dumped on site, all cleanliness issues become the responsibility of the Contractor.

2.8 All materials shall be approved by, and the root zone mix shall be formulated per the recommendations of an A2LA Currently Accredited Putting Green Laboratory (PUG). See www.a2la.org for a complete list of labs. Recommended lab is Tifton Physical Soil Testing Laboratory, Inc., 1412 Murray Ave., Tifton, GA 31794, (229) 382-7292, pgaines@friendlycity.net. One lab shall be used for all testing, from formulation of the mix, through completion of the project.

2.9 Root Zone Amendments shall consist of the following, and be added to the root zone mix during the sand/peat blending operations:

| | |
|---|---|
| Dolomite: | 3 lbs/ton of finished mix |
| Iron Humate: | ½ lb/ton of finished mix |
| Tenn Brown Rock Phosphate (0-20-0): | ¼ lb/ton of finished mix |
| Sunflower Hull Ash (0-3-22): | ¼ lb/ton of finished mix |
| Organic Nitrogen (6-3-2): | ½ lb/ton of finished mix |

2.10 TESTING

A. Sampling procedures shall be performed per ASTM D-75 Guidelines.

B. After formulation of the root zone mix by the approved laboratory, the selected sand shall be stockpiled in fifteen hundred (1,500) ton piles. **Each** sand stockpile shall then be tested and approved for particle size at the sand plant or blending site prior to blending. Sand samples for each stockpile shall be taken as follows: The sand sample shall be representative of the entire stockpile, and therefore shall not be taken from one spot. Subsamples from random locations within the stockpile shall be combined into one sample for the stockpile. The subsamples shall not be taken from the surface of the stockpile, but from several inches within the pile. Subsample collection should be accomplished through use of a two to four (2-4") inch diameter PVC pipe with a beveled end, and a clean bucket. The pipe shall be inserted into the pile at several random locations, and the material that is collected in the pipe shall be hand mixed in the bucket to create an overall sample for the stockpile. The sample shall be double bagged in one (1) gallon zip-lock bags and well labeled to indicate the project and the particular stockpile the sample came from. This procedure shall be repeated for each fifteen hundred (1,500) ton stockpile. Request that results also be sent to the Owner and the Designer.

C. After a sand stockpile has been approved for particle size, then blending can begin using the approved stockpile. During blending, a sample shall be taken, using the methods described in 2.10.1 above, from the first five hundred (500) tons of blended material (root zone mix). This sample shall be sent to the lab with guaranteed morning delivery. This sample shall have organic matter testing, and a full physical evaluation, to correlate the performance to the results from the approved lab-made root zone mix. The field sample, when approved, will become the new reference mix for future testing. Should the sample be rejected, the lab will consult with the Designer and Contractor to determine how to proceed to bring the root zone mix into compliance. Blending shall not progress beyond the first five hundred (500) tons until the root zone mix has been brought into compliance. No root zone mix shall be placed on the field until that particular mix has been approved by the lab.

D. After the initial five hundred (500) tons of root zone mix has been brought into compliance, additional mixing shall be done in fifteen hundred (1,500) ton batches. Each batch shall be sampled using the methods described in 2.10.1 above, and the samples submitted to the lab for organic matter testing and approval. No root zone mix shall be placed on the field until that particular mix has been approved by the lab.

E. Material for the four (4") inch coarse sand layer shall be sampled at four hundred (400) cubic yard intervals, prior to leaving the supplier, for testing and approval by the approved laboratory.

F. Testing shall be done at the Owner's expense. Regardless of proprietary testing rights due the payee, all testing as it pertains to the project shall be copied to the Owner and the Designer.

PART 3 - EXECUTION

3.1 GENERAL

A. The field shall be sub-graded to a depth of twelve (12") inches below finished grade, to allow for placement of the four (4") inch coarse sand layer and eight (8") inch root zone mix layer. The subgrade shall be properly compacted to a minimum ninety-five (95%) percent of Standard Proctor.

B. Irrigation shall be installed, in the properly prepared subgrade, prior to the installation of drain lines and gravel layer. Irrigation risers shall be of sufficient length to match final grade. Trench lines shall be re-compacted to the specified density.

C. Collector drain lines shall be laid flat over the top of one (1") inch of coarse sand. Collector pipe shall be tied into transport pipe with manufacturer approved fittings for this purpose.

D. A four (4") inch coarse sand layer shall be installed over the entire field and graded to conform to the plane of the subgrade. Laser grade to a tolerance of plus or minus one half (0.5") inch over the plane of the field.

E. The Contractor shall make every effort to install the remainder of the four (4") inch coarse sand layer as soon as possible, after drainage installation, and shall protect drain lines from contamination and crushing. Should any soil wash or blow into drain lines before they are covered by the coarse sand layer, the Contractor shall remove all contamination before installing said gravel layer. The Contractor shall replace any crushed pipes at his own cost and expense.

F. The Contractor shall ensure that the coarse sand layer is not contaminated by native soil prior to installation of root zone mix. The Contractor shall remove and replace any contaminated coarse sand immediately prior to installation of root zone mix.

3.2 ROOT ZONE MIX

A. Root zone mix shall be mixed in one or more central locations--**mixing on the field is absolutely prohibited**. Mixing shall be performed by use of a mechanical soil blender. Other methods of mixing shall be subject to the approval of the Designer. Care should be taken to avoid over shredding the peat. The peat should be moist during mixing to ensure uniform mixing and to minimize peat and sand separation.

B. Before placement on the field, the mix shall be tested by the approved laboratory. Should the mix not meet the recommendations of the laboratory, it shall be modified before placement on the greens or tees. Testing shall occur as indicated above in 2.10-TESTING. Approval by the Owner or Designer does not relieve the Contractor from the responsibility of maintaining a mix of the proper proportions, which is free of objectionable materials.

C. Root zone mix shall be spread on the field by dumping at the periphery of the gravel base and spreading it to the proper depth. The mix shall be spread with a small crawler tractor or other approved track equipment only. **No** wheeled equipment will be allowed. The Contractor shall avoid backing trucks or scrapers onto the field to minimize disturbance and infiltration of root zone mix into the lower layer. For the same reasons, the track equipment spreading the mix

shall keep a minimum of six (6") inches of mix underneath at all times and shall work in a back and forth motion as much as possible.

D. Root zone mix shall be spread to a compacted depth of eight (8") inches over the entire field surface. The mix shall be moist when spread to discourage migration into the lower layer and to assist in compaction. **No** wheeled equipment will be allowed prior to final floating of the field.

E. Laser grade to a finish grade tolerance of plus or minus one quarter (0.25”) inch over the plane of the field.

F. The root zone mix shall be uniformly compacted, to ninety (90%) percent of the Standard Proctor by raking and footing, or other approved methods. A roller is not satisfactory, as it will "bridge" soft spots.

G. Grades shall be verified by survey, conducted by a third party licensed surveyor, paid for by the Contractor. Survey points shall be at twenty (20’) foot increments throughout the site, and as otherwise necessary.

H. Prior to substantial completion, the field shall be subject to inspection to ensure uniform root zone depths. The Contractor shall repair any defective areas with the approved materials and replant the disturbed area according to original specifications. Work shall be at the Contractor's expense and subject to the Designer's approval.

I. In the event the field performance is not satisfactory during the grow-in period, the Designer reserves the right to have the laboratory review the maintenance operation of the greens and conduct a site evaluation at the Owner’s expense to determine if the unsatisfactory performance is due to construction or maintenance problems.

END OF SECTION 32 91 15

**SECTION 32 92 00**
**TURF AND GRASSES**

PART 1 - GENERAL

1.1 DESCRIPTION:

A. This section includes, but is not necessarily limited to, adjusting soil pH; fertilizing, and sodding; in accordance with this Section of the Specifications and all applicable drawings, and subject to the terms and conditions of the Contract.

1.2 GENERAL

A. The Contractor shall be responsible for coordinating his work with that of the field construction and irrigation contractors. No area shall be sodded until it meets the approval of the Designer and Owner, and the irrigation system has been tested and proven to be operational.

B. The Contractor shall work closely with the Designer and Owner, in determining the sodding schedule.

C. Sod suppliers and grassing subcontractors shall be approved by the Owner and the Designer.

PART 2 - PRODUCTS

2.1 Preplant fertilizer (for non-root zone mix areas) shall be Lesco Premium 18-24-12 Starter Fertilizer, utilizing POLY-PLUS technology, or approved equal.

2.2 Postplant fertilizer shall be Lesco 12-24-14 Elite Starter, utilizing POLY-PLUS technology, or approved equal.

2.3 Just prior to sodding, the Contractor shall apply Lesco 18-24-12 Premium Starter, or approved equal, to the areas to be sodded **(excluding root zone mix areas)** at the rate of eight (8) pounds per thousand (1,000) square feet. The Owner should apply postplant fertilizer for one (1) year after germination.

2.4 Root Zone Amendments shall consist of the following, and be added to the root zone mix during the sand/peat blending operations:

| | |
|---|---|
| Dolomite: | 3 lbs/ton of finished mix |
| Iron Humate: | ½ lb/ton of finished mix |
| Tenn Brown Rock Phosphate (0-20-0): | ¼ lb/ton of finished mix |
| Sunflower Hull Ash (0-3-22): | ¼ lb/ton of finished mix |
| Organic Nitrogen (6-3-2): | ½ lb/ton of finished mix |

2.5 Sod shall be SSCA Certified Celebration Hybrid, from a sod farm approved by the Owner and Designer. It shall be strongly rooted and not less than one year old, in vigorous condition and free of uncontrollable weeds or grasses. It shall be rolled sod, with minimum width of forty-two (42”) inches, with any netting removed prior to installation. Before any sod is to be delivered, the Contractor shall notify the Designer in writing as to the location from which the sod is to be obtained and the approximate quantity available, the same shall be subject to inspection and approval before it is lifted. No sod grown on peat or clay shall be used. Sod shall be delivered to the job site within 24 hours after being cut, unless circumstances beyond the Contractor’s control

make it necessary for the sod to be placed in storage, in which case, permission shall be obtained from the Designer. Any sod permitted to dry out or rot may be rejected if, in the judgment of the Owner or Designer, it's survival after placement is doubtful. Owner, or its approved representative, has the right to reject any grass not meeting the highest quality industry standards.

PART 3 - EXECUTION

3.1 FERTILIZATION

A. Prior to final floating and sodding, the planting bed **(excluding root zone mix areas)** shall be fertilized with the preplant fertilizer. Root zone mix shall be treated separately. The Contractor shall not drag soil from outside the root zone mix into the root zone mix.

B. On areas to be sodded **(excluding root zone mix areas)**, the fertilizer shall be applied to the surface prior to laying the sod.

C. The Contractor shall take all care and apply all materials under favorable climatic conditions to ensure uniform distribution at the specified rates.

3.2 SODDING

A. Prior to sodding, these areas shall have been graded smooth, cleaned of debris, and tamped to the satisfaction of the Owner or Designer.

B. Prior to sodding contractor is to verify that soil conditions allow for a permeable rate of ½ inch per hour or greater at least 30” below final grade. If minimum permeability rate is not met underdrains are to be installed per FIFA design standards section 2.4.2.

C. Prior to the placement of sod, the area to be sodded shall receive the soil amendments at the recommended rates. The sod shall then be placed on the prepared surface with the edges in close contact and alternate courses staggered. All spaces between sections of sod, openings at angles and similar gaps shall be plugged with sod. After laying, the sod shall be watered thoroughly and then tamped with approved sod tampers or rolled sufficiently to incorporate the sod with the sod bed and insure tight joints between the sections of strips. Any voids, openings or crevices still left after rolling shall be filled with the root zone mix or topsoil, as appropriate. Upon completion of the above work, the surface of the sodded areas shall coincide with the finished grade, and shall be flush with other grassed areas.

D. The sod shall be trimmed with a sharp cutting tool to conform to the shape and boundary intended by the Designer.

E. The sod along the edge of a sodded area shall be countersunk to soil depth on said sod so that it shall blend smoothly with the surrounding planted areas and shall not cause scalping by normal mowing equipment.

F. The Contractor shall be responsible for maintaining the intended slopes and shapes during the sodding operation. Footprints, etc., shall be smoothed prior to laying the sod, and the sod shall be leveled and tamped in place to conform to the intended slopes and shapes.

G. The Contractor is responsible for properly watering sod immediately after installation. The Owner shall provide any required hoses or nozzles for said watering. After this initial watering, the Owner shall be responsible for further irrigation and maintenance.

## 3.3 POST-PLANTING RESPONSIBILITIES

A. The Contractor shall be responsible for proper, fertilization and watering of each area planted, seeded, or sodded till astablishment. The Contractor shall immediately notify the Owner upon completion of each area, and the Owner shall then be responsible for irrigation and maintenance beyond the initial watering.

B. After initial watering, the planting bed shall be irrigated and maintained by the Contractor as required for the proper establishment of the turf. The Contractor shall not be directly responsible for said maintenance, but shall be responsible for determining whether or not the grass is or isn't being properly cared for. If he fails in this responsibility, he shall be responsible for any required resodding at his own expense. The Contractor shall not be held liable for damage caused due to the Owner's failure to follow the Contractor's recommendations.

C. The Contractor will not be responsible for unsatisfactory growth due to Acts of God, extremely unusual weather (temperature twenty (20%) percent beyond normal extremes, or rainfall two hundred (200%) percent above normal), governmentally imposed watering restrictions, or other circumstances beyond his control.

D. The Contractor shall be responsible for repair of damage caused by his men and equipment, or by his negligence. Repairs shall be done in accordance with the Specifications applicable to the area damaged. Erosion or other damage, not caused by the Contractor shall be the Owner's responsibility.

E. Mowing shall be initiated by the Owner when growth has reached a height of three quarter (3/4”) inches. The Owner and Contractor shall closely coordinate mowing operations to minimize damage caused by such operations.

END OF SECTION 32 92 00

**SECTION 33 05 00**
**COMMON WORK RESULTS FOR UTILITIES**

PART 1 – GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

B. All material and construction shall comply with all applicable FDOT, FAA, and OSHA requirements and standards (latest editions).

C. Refer to Geotechnical Report for additional information and requirements for site clearing, fill, pavement, underdrain and other geotechnical components.

D. All construction shall be in accordance with DEP. City of Port Orange requirements with the most restrictive governing. The lift station standards shall meet City of Port Orange requirements.

1.2 SUMMARY

A. This Section includes the following:

1. Piping joining materials.
2. Transition fittings.
3. Dielectric fittings.
4. Sleeves.
5. Identification devices.
6. Grout.
7. Flowable fill.
8. Piped utility demolition.
9. Piping system common requirements.
10. Equipment installation common requirements.
11. Painting.
12. Concrete bases.
13. Metal supports and anchorages.

1.3 DEFINITIONS

A. Exposed Installations: Exposed to view outdoors or subject to outdoor ambient temperatures and weather conditions.

B. Concealed Installations: Concealed from view and protected from weather conditions and physical contact by building occupants but subject to outdoor ambient temperatures. Examples include installations within unheated shelters.

C. ABS: Acrylonitrile-butadiene-styrene plastic.

D. CPVC: Chlorinated polyvinyl chloride plastic.

E. PE: Polyethylene plastic.

F. PVC: Polyvinyl chloride plastic.

## 1.4 ACTION SUBMITTALS

A. Product Data: For the following:

1. Dielectric fittings.
2. Identification devices.

## 1.5 INFORMATIONAL SUBMITTALS

A. Welding certificates.

## 1.6 QUALITY ASSURANCE

A. Steel Support Welding: Qualify procedures and personnel according to AWS D1.1/D1.1M, "Structural Welding Code - Steel."

B. Steel Piping Welding: Qualify processes and operators according to ASME Boiler and Pressure Vessel Code: Section IX, "Welding and Brazing Qualifications."

1. Comply with provisions in ASME B31 Series, "Code for Pressure Piping."
2. Certify that each welder has passed AWS qualification tests for welding processes involved and that certification is current.

C. Comply with ASME A13.1 for lettering size, length of color field, colors, and viewing angles of identification devices.

## 1.7 DELIVERY, STORAGE, AND HANDLING

A. Deliver pipes and tubes with factory-applied end caps. Maintain end caps through shipping, storage, and handling to prevent pipe end damage and to prevent entrance of dirt, debris, and moisture.

B. Store plastic pipes protected from direct sunlight. Support to prevent sagging and bending.

## 1.8 COORDINATION

A. Coordinate installation of required supporting devices and set sleeves in poured-in-place concrete and other structural components as they are constructed.

B. Coordinate installation of identifying devices after completing covering and painting if devices are applied to surfaces.

C. Coordinate size and location of concrete bases. Formwork, reinforcement, and concrete requirements are specified in [Section 03 30 00 "Cast-in-Place Concrete."]

## PART 2 - PRODUCTS

### 2.1 PIPING JOINING MATERIALS

A. Pipe-Flange Gasket Materials: Suitable for chemical and thermal conditions of piping system contents.

1. ASME B16.21, nonmetallic, flat, asbestos free, 1/8-inch maximum thickness, unless otherwise indicated.

a. Full-Face Type: For flat-face, Class 125, cast-iron and cast-bronze flanges.
b. Narrow-Face Type: For raised-face, Class 250, cast-iron and steel flanges.

2. AWWA C110, rubber, flat face, 1/8 inch thick, unless otherwise indicated; and full-face or ring type, unless otherwise indicated.

B. Flange Bolts and Nuts: ASME B18.2.1, carbon steel, unless otherwise indicated.

C. Plastic, Pipe-Flange Gasket, Bolts, and Nuts: Type and material recommended by piping system manufacturer, unless otherwise indicated.

D. Solder Filler Metals: ASTM B 32, lead-free alloys. Include water-flushable flux according to ASTM B 813.

E. Brazing Filler Metals: AWS A5.8, BCuP Series, copper-phosphorus alloys for general-duty brazing, unless otherwise indicated; and AWS A5.8, BAg1, silver alloy for refrigerant piping, unless otherwise indicated.

F. Welding Filler Metals: Comply with AWS D10.12/D10.12M for welding materials appropriate for wall thickness and chemical analysis of steel pipe being welded.

G. Solvent Cements for Joining Plastic Piping:

1. ABS Piping: ASTM D 2235.

2. CPVC Piping: ASTM F 493.
3. PVC Piping: ASTM D 2564. Include primer according to ASTM F 656.
4. PVC to ABS Piping Transition: ASTM D 3138.

H. Fiberglass Pipe Adhesive: As furnished or recommended by pipe manufacturer.

### 2.2 TRANSITION FITTINGS

A. Transition Fittings, General: Same size as, and with pressure rating at least equal to and with ends compatible with, piping to be joined.

B. Transition Couplings NPS 1-1/2 and Smaller:

1. Underground Piping: Manufactured piping coupling or specified piping system fitting.
2. Aboveground Piping: Specified piping system fitting.

C. AWWA Transition Couplings NPS 2 and Larger:

1. Description: AWWA C219, metal sleeve-type coupling for underground pressure piping.

D. Plastic-to-Metal Transition Fittings:

1. Description: [CPVC] [CPVC and PVC] [PVC] one-piece fitting with manufacturer's Schedule 80 equivalent dimensions; one end with threaded brass insert, and one solvent-cement-joint [or threaded] end.

E. Plastic-to-Metal Transition Unions:

1. Description: MSS SP-107, CPVC and PVC four-part union. Include brass threaded end, solvent-cement-joint plastic end, rubber O-ring, and union nut.

F. Flexible Transition Couplings for Underground Nonpressure Drainage Piping:

1. Description: ASTM C 1173 with elastomeric sleeve, ends same size as piping to be joined, and corrosion-resistant metal band on each end.

## 2.3 DIELECTRIC FITTINGS

A. Dielectric Fittings, General: Assembly of copper alloy and ferrous materials or ferrous material body with separating nonconductive insulating material suitable for system fluid, pressure, and temperature.

B. Dielectric Unions:

1. Description: Factory fabricated, union, NPS 2 and smaller.

a. Pressure Rating: 150 psig minimum at 180 deg F
b. End Connections: Solder-joint copper alloy and threaded ferrous; threaded ferrous.

C. Dielectric Flanges:

1. Description: Factory-fabricated, bolted, companion-flange assembly, NPS 2-1/2 to NPS 4 and larger.

a. Pressure Rating: 150 psig minimum
b. End Connections: Solder-joint copper alloy and threaded ferrous; threaded solder-joint copper alloy and threaded ferrous.

D. Dielectric-Flange Kits:

1. Description: Nonconducting materials for field assembly of companion flanges, NPS 2-1/2 and larger.

a. Pressure Rating: 150 psig minimum
b. Gasket: Neoprene or phenolic.
c. Bolt Sleeves: Phenolic or polyethylene.
d. Washers: Phenolic with steel backing washers.

E. Dielectric Couplings:

1. Description: Galvanized-steel coupling with inert and noncorrosive, thermoplastic lining, NPS 3 and smaller.

a. Pressure Rating: 300 psig at 225 deg F.
b. End Connections: Threaded.

F. Dielectric Nipples:

1. Description: Electroplated steel nipple with inert and noncorrosive, thermoplastic lining.

a. Pressure Rating: 300 psig at 225 deg F
b. End Connections: Threaded or grooved.

## 2.4 SLEEVES

A. Mechanical sleeve seals for pipe penetrations are specified in Section 22 05 17 "Sleeves and Sleeve Seals for Plumbing Piping."

B. Galvanized-Steel Sheet Sleeves: 0.0239-inch minimum thickness; round tube closed with welded longitudinal joint.

C. Steel Pipe Sleeves: ASTM A 53/A 53M, Type E, Grade B, Schedule 40, galvanized, plain ends.

D. Cast-Iron Sleeves: Cast or fabricated "wall pipe" equivalent to ductile-iron pressure pipe, with plain ends and integral waterstop, unless otherwise indicated.

E. Molded PVC Sleeves: Permanent, with nailing flange for attaching to wooden forms.

F. PVC Pipe Sleeves: ASTM D 1785, Schedule 40.

G. Molded PE Sleeves: Reusable, PE, tapered-cup shaped, and smooth outer surface with nailing flange for attaching to wooden forms.

2.5 IDENTIFICATION DEVICES

A. General: Products specified are for applications referenced in other utilities Sections. If more than single type is specified for listed applications, selection is Installer's option.

B. Equipment Nameplates: Metal permanently fastened to equipment with data engraved or stamped.

1. Data: Manufacturer, product name, model number, serial number, capacity, operating and power characteristics, labels of tested compliances, and essential data.
2. Location: Accessible and visible.

C. Stencils: Standard stencils prepared with letter sizes complying with recommendations in ASME A13.1. Minimum letter height is 1-1/4 inches for ducts, and 3/4 inch for access door signs and similar operational instructions.

1. Material: Brass.
2. Stencil Paint: Exterior, oil-based, alkyd-gloss black enamel, unless otherwise indicated. Paint may be in pressurized spray-can form.
3. Identification Paint: Exterior, oil-based, alkyd enamel in colors according to ASME A13.1, unless otherwise indicated.

D. Snap-on Plastic Pipe Markers: Manufacturer's standard preprinted, semirigid, snap-on type. Include color-coding according to ASME A13.1, unless otherwise indicated.

E. Pressure-Sensitive Pipe Markers: Manufacturer's standard preprinted, color-coded, pressure-sensitive-vinyl type with permanent adhesive.

F. Pipes with OD, Including Insulation, Less Than 6 Inches: Full-band pipe markers, extending 360 degrees around pipe at each location.

G. Pipes with OD, Including Insulation, 6 Inches and Larger: Either full-band or strip-type pipe markers, at least three times letter height and of length required for label.

H. Lettering: Manufacturer's standard preprinted captions as selected by Architect.

I. Lettering: Use piping system terms indicated and abbreviate only as necessary for each application length.

1. Arrows: Either integrally with piping system service lettering to accommodate both directions of flow, or as separate unit on each pipe marker to indicate direction of flow.

J. Plastic Tape: Manufacturer's standard color-coded, pressure-sensitive, self-adhesive vinyl tape, at least 3 mils thick.

1. Width: 1-1/2 inches on pipes with OD, including insulation, less than 6 inches; 2-1/2 inches for larger pipes.
2. Color: Comply with ASME A13.1, unless otherwise indicated.

K. Valve Tags: Stamped or engraved with 1/4-inch letters for piping system abbreviation and 1/2-inch sequenced numbers. Include 5/32-inch hole for fastener.

1. Material: 0.032-inch- thick, polished brass or aluminum.

2. Material: 0.0375-inch- thick stainless steel.
3. Material: 3/32-inch- thick plastic laminate with 2 black surfaces and a white inner layer.
4. Material: Valve manufacturer's standard solid plastic.
5. Size: 1-1/2 inches in diameter, unless otherwise indicated.
6. Shape: As indicated for each piping system.

L. Valve Tag Fasteners: Brass, wire-link or beaded chain; or brass S-hooks.

M. Engraved Plastic-Laminate Signs: ASTM D 709, Type I, cellulose, paper-base, phenolic-resin-laminate engraving stock; Grade ES-2, black surface, black phenolic core, with white melamine subcore, unless otherwise indicated. Fabricate in sizes required for message. Provide holes for mechanical fastening.

1. Engraving: Engraver's standard letter style, of sizes and with terms to match equipment identification.
2. Thickness: 1/8 inch, unless otherwise indicated.
3. Thickness: 1/16 inch, for units up to 20 sq. in. or 8 inches in length, and 1/8 inch for larger units.
4. Fasteners: Self-tapping, stainless-steel screws or contact-type permanent adhesive.

N. Plastic Equipment Markers: Manufacturer's standard laminated plastic, in the following color codes:

1. Green: Cooling equipment and components.
2. Yellow: Heating equipment and components.
3. Brown: Energy reclamation equipment and components.
4. Blue: Equipment and components that do not meet criteria above.
5. Hazardous Equipment: Use colors and designs recommended by ASME A13.1.
6. Terminology: Match schedules as closely as possible. Include the following:

    a. Name and plan number.
    b. Equipment service.

    c. Design capacity.
    d. Other design parameters such as pressure drop, entering and leaving conditions, and speed.

7. Size: 2-1/2 by 4 inches for control devices, dampers, and valves; 4-1/2 by 6 inches for equipment.

O. Plasticized Tags: Preprinted or partially preprinted, accident-prevention tags, of plasticized card stock with mat finish suitable for writing.

1. Size: 3-1/4 by 5-5/8 inches
2. Fasteners: Brass grommets and wire.
3. Nomenclature: Large-size primary caption such as DANGER, CAUTION, or DO NOT OPERATE.

P. Lettering and Graphics: Coordinate names, abbreviations, and other designations used in piped utility identification with corresponding designations indicated. Use numbers, letters, and terms indicated for proper identification, operation, and maintenance of piped utility systems and equipment.

1. Multiple Systems: Identify individual system number and service if multiple systems of same name are indicated.

2.6 GROUT

A. Description: ASTM C 1107, Grade B, nonshrink and nonmetallic, dry hydraulic-cement grout.

1. Characteristics: Post hardening, volume adjusting, nonstaining, noncorrosive, nongaseous, and recommended for interior and exterior applications.
2. Design Mix: 5000-psi, 28-day compressive strength.
3. Packaging: Premixed and factory packaged.

2.7 FLOWABLE FILL

A. Description: Low-strength-concrete, flowable-slurry mix.

1. Cement: ASTM C 150, Type I, Portland.
2. Density: 115- to 145-lb/cu. ft.
3. Aggregates: ASTM C 33, natural sand, fine and crushed gravel or stone, coarse.
4. Aggregates: ASTM C 33, natural sand, fine.
5. Admixture: ASTM C 618, fly-ash mineral.
6. Water: Comply with ASTM C 94/C 94M.
7. Strength: 100 to 200 psig at 28 days.

PART 3 - EXECUTION

3.1 PIPED UTILITY DEMOLITION

A. Refer to Section 02 41 19 "Selective Demolition" for general demolition requirements and procedures.

B. Disconnect, demolish, and remove piped utility systems, equipment, and components indicated to be removed.

1. Piping to Be Removed: Remove portion of piping indicated to be removed and cap or plug remaining piping with same or compatible piping material.
2. Piping to Be Abandoned in Place: Drain piping. Fill abandoned piping with flowable fill, and cap or plug piping with same or compatible piping material.
3. Equipment to Be Removed: Disconnect and cap services and remove equipment.
4. Equipment to Be Removed and Reinstalled: Disconnect and cap services and remove, clean, and store equipment; when appropriate, reinstall, reconnect, and make operational.
5. Equipment to Be Removed and Salvaged: Disconnect and cap services and remove equipment and deliver to Owner.

C. If pipe, insulation, or equipment to remain is damaged in appearance or is unserviceable, remove damaged or unserviceable portions and replace with new products of equal capacity and quality.

3.2 DIELECTRIC FITTING APPLICATIONS

A. Dry Piping Systems: Connect piping of dissimilar metals with the following:

1. NPS 2 and Smaller: Dielectric unions.
2. NPS 2-1/2 to NPS 12: Dielectric flanges.

B. Wet Piping Systems: Connect piping of dissimilar metals with the following:

1. NPS 2 and Smaller: Dielectric couplings or dielectric nipples.
2. NPS 2-1/2 to NPS 4: Dielectric nipples.
3. NPS 2-1/2 to NPS 8: Dielectric nipples [or dielectric flange kits].
4. NPS 10 and NPS 12: Dielectric flange kits.

3.3 PIPING INSTALLATION

A. Install piping according to the following requirements and utilities Sections specifying piping systems.

B. Drawing plans, schematics, and diagrams indicate general location and arrangement of piping systems. Indicated locations and arrangements were used to size pipe and calculate friction loss, expansion, pump sizing, and other design considerations. Install piping as indicated unless deviations to layout are approved on the Coordination Drawings.

C. Install piping indicated to be exposed and piping in equipment rooms and service areas at right angles or parallel to building walls. Diagonal runs are prohibited unless specifically indicated otherwise.

D. Install piping to permit valve servicing.

E. Install piping at indicated slopes.

F. Install piping free of sags and bends.

G. Install fittings for changes in direction and branch connections.

H. Select system components with pressure rating equal to or greater than system operating pressure.

I. Sleeves are not required for core-drilled holes.

J. Permanent sleeves are not required for holes formed by removable PE sleeves.

K. Install sleeves for pipes passing through concrete and masonry walls and concrete floor and roof slabs.

1. Cut sleeves to length for mounting flush with both surfaces.

a. Exception: Extend sleeves installed in floors of equipment areas or other wet areas 2 inches above finished floor level.

2. Install sleeves in new walls and slabs as new walls and slabs are constructed.

    a. PVC Pipe Sleeves: For pipes smaller than NPS 6.
    b. Steel Sheet Sleeves: For pipes NPS 6 and larger, penetrating gypsum-board partitions.

L. Verify final equipment locations for roughing-in.

M. Refer to equipment specifications in other Sections for roughing-in requirements.

## 3.4 PIPING JOINT CONSTRUCTION

A. Join pipe and fittings according to the following requirements and utilities Sections specifying piping systems.

B. Ream ends of pipes and tubes and remove burrs. Bevel plain ends of steel pipe.

C. Remove scale, slag, dirt, and debris from inside and outside of pipe and fittings before assembly.

D. Threaded Joints: Thread pipe with tapered pipe threads according to ASME B1.20.1. Cut threads full and clean using sharp dies. Ream threaded pipe ends to remove burrs and restore full ID. Join pipe fittings and valves as follows:

1. Apply appropriate tape or thread compound to external pipe threads unless dry seal threading is specified.
2. Damaged Threads: Do not use pipe or pipe fittings with threads that are corroded or damaged. Do not use pipe sections that have cracked or open welds.

E. Welded Joints: Construct joints according to AWS D10.12/D10.12M, using qualified processes and welding operators according to Part 1 "Quality Assurance" Article.

F. Flanged Joints: Select appropriate gasket material, size, type, and thickness for service application. Install gasket concentrically positioned. Use suitable lubricants on bolt threads.

G. Grooved Joints: Assemble joints with grooved-end pipe coupling with coupling housing, gasket, lubricant, and bolts according to coupling and fitting manufacturer's written instructions.

H. Soldered Joints: Apply ASTM B 813 water-flushable flux, unless otherwise indicated, to tube end. Construct joints according to ASTM B 828 or CDA's "Copper Tube Handbook," using lead-free solder alloy (0.20 percent maximum lead content) complying with ASTM B 32.

I. Brazed Joints: Construct joints according to AWS's "Brazing Handbook," "Pipe and Tube" Chapter, using copper-phosphorus brazing filler metal complying with AWS A5.8.

J. Pressure-Sealed Joints: Assemble joints for plain-end copper tube and mechanical pressure seal fitting with proprietary crimping tool to according to fitting manufacturer's written instructions.

K. Plastic Piping Solvent-Cemented Joints: Clean and dry joining surfaces. Join pipe and fittings according to the following:

1. Comply with ASTM F 402 for safe-handling practice of cleaners, primers, and solvent cements.
2. ABS Piping: Join according to ASTM D 2235 and ASTM D 2661 appendixes.
3. CPVC Piping: Join according to ASTM D 2846/D 2846M Appendix.
4. PVC Pressure Piping: Join schedule number ASTM D 1785, PVC pipe and PVC socket fittings according to ASTM D 2672. Join other-than-schedule-number PVC pipe and socket fittings according to ASTM D 2855.
5. PVC Nonpressure Piping: Join according to ASTM D 2855.
6. PVC to ABS Nonpressure Transition Fittings: Join according to ASTM D 3138 Appendix.

L. Plastic Pressure Piping Gasketed Joints: Join according to ASTM D 3139.

M. Plastic Nonpressure Piping Gasketed Joints: Join according to ASTM D 3212.

N. Plastic Piping Heat-Fusion Joints: Clean and dry joining surfaces by wiping with clean cloth or paper towels. Join according to ASTM D 2657.

1. Plain-End PE Pipe and Fittings: Use butt fusion.
2. Plain-End PE Pipe and Socket Fittings: Use socket fusion.

O. Bonded Joints: Prepare pipe ends and fittings, apply adhesive, and join according to pipe manufacturer's written instructions.

## 3.5 PIPING CONNECTIONS

A. Make connections according to the following, unless otherwise indicated:

1. Install unions, in piping NPS 2 and smaller, adjacent to each valve and at final connection to each piece of equipment.
2. Install flanges, in piping NPS 2-1/2 and larger, adjacent to flanged valves and at final connection to each piece of equipment.
3. Install dielectric fittings at connections of dissimilar metal pipes.

## 3.6 EQUIPMENT INSTALLATION

A. Install equipment level and plumb, unless otherwise indicated.

B. Install equipment to facilitate service, maintenance, and repair or replacement of components. Connect equipment for ease of disconnecting, with minimum interference with other installations. Extend grease fittings to an accessible location.

C. Install equipment to allow right of way to piping systems installed at required slope.

## 3.7 PAINTING

A. Painting of piped utility systems, equipment, and components is specified in Section 09 91 13 "Exterior Painting," Section 09 91 23 "Interior Painting," and Section 09 96 00 "High-Performance Coatings."

B. Damage and Touchup: Repair marred and damaged factory-painted finishes with materials and procedures to match original factory finish.

## 3.8 IDENTIFICATION

A. Piping Systems: Install pipe markers on each system. Include arrows showing normal direction of flow.

1. Stenciled Markers: According to ASME A13.1.
2. Plastic markers, with application systems. Install on insulation segment if required for hot noninsulated piping.

3. Locate pipe markers on exposed piping according to the following:

    a. Near each valve and control device.
    b. Near each branch, excluding short takeoffs for equipment and terminal units. Mark each pipe at branch if flow pattern is not obvious.
    c. Near locations where pipes pass through walls or floors or enter inaccessible enclosures.
    d. At manholes and similar access points that permit view of concealed piping.
    e. Near major equipment items and other points of origination and termination.

B. Equipment: Install engraved plastic-laminate sign or equipment marker on or near each major item of equipment.

1. Lettering Size: Minimum 1/4 inch high for name of unit if viewing distance is less than 24 inches, 1/2 inch high for distances up to 72 inches, and proportionately larger lettering for greater distances. Provide secondary lettering two-thirds to three-fourths of size of principal lettering.
2. Text of Signs: Provide name of identified unit. Include text to distinguish among multiple units, inform user of operational requirements, indicate safety and emergency precautions, and warn of hazards and improper operations.

C. Adjusting: Relocate identifying devices that become visually blocked by work of this or other Divisions.

## 3.9 CONCRETE BASES

A. Concrete Bases: Anchor equipment to concrete base according to equipment manufacturer's written instructions and according to seismic codes at Project.

1. Construct concrete bases of dimensions indicated, but not less than 4 inches larger in both directions than supported unit.
2. Install dowel rods to connect concrete base to concrete floor. Unless otherwise indicated, install dowel rods on 18-inch centers around the full perimeter of base.

3. Install epoxy-coated anchor bolts for supported equipment that extend through concrete base, and anchor into structural concrete floor.
4. Place and secure anchorage devices. Use supported equipment manufacturer's setting drawings, templates, diagrams, instructions, and directions furnished with items to be embedded.
5. Install anchor bolts to elevations required for proper attachment to supported equipment.

6. Install anchor bolts according to anchor-bolt manufacturer's written instructions.
7. Use 3000-psi, 28-day compressive-strength concrete and reinforcement as specified in Section 03 30 00 "Cast-in-Place Concrete."

## 3.10 ERECTION OF METAL SUPPORTS AND ANCHORAGES

A. Refer to Section 05 50 00 "Metal Fabrications" for structural steel.

B. Cut, fit, and place miscellaneous metal supports accurately in location, alignment, and elevation to support and anchor piped utility materials and equipment.

C. Field Welding: Comply with AWS D1.1/D1.1M.

## 3.11 GROUTING

A. Mix and install grout for equipment base bearing surfaces, pump and other equipment base plates, and anchors.

B. Clean surfaces that will come into contact with grout.

C. Provide forms as required for placement of grout.

D. Avoid air entrapment during placement of grout.

E. Place grout, completely filling equipment bases.

F. Place grout on concrete bases and provide smooth bearing surface for equipment.

G. Place grout around anchors.

H. Cure placed grout.

END OF SECTION 33 05 00

# CITY OF PORT ORANGE, FLORIDA

# INVITATION TO BID
# ITB #26-07
# CITY CENTER SPORTS COMPLEX EXPANSION

City of Port Orange Purchasing Division
Prepared by: Rita Cooper
Release Date: APRIL 17, 2026

## Bid Due Date & Time: MAY 15, 2026 @ 3:30 PM

City of Port Orange, Florida
1000 City Center Circle, Port Orange, FL 32129
(386) 506-5740
purchdiv@port-orange.org; www.port-orange.org

# Legal Notice to Bidders

## ITB #26-07
## City Center Sports Complex Expansion

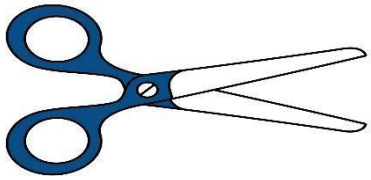
**Notice is hereby given that the City of Port Orange is soliciting bids for ITB#26-07 City Center Sports Complex Expansion.** Bids will be accepted in the City Clerk's office, Port Orange City Hall, 1000 City Center Circle, Port Orange, Florida 32129 until **3:30 PM Eastern Standard Time (EST) on MAY 15, 2026** which may be amended by addendum issued by the City. All untimely bids will not be considered and will be returned to the Bidder unopened. All bids will be evaluated to ensure they contain all required forms in order to deem the Bidder responsive or non-responsive. **Bids will be opened and read aloud at 3:30 PM EST in Council Chambers.**

There will be a **Mandatory Pre-Bid Conference and site visit @4651 City Center Circle** for the project at **2:00 PM EST** on **APRIL 24, 2026** at City Hall, Council Chambers (1st floor), 1000 City Center Circle, Port Orange, FL 32129. All prospective Bidders must attend the meeting and site visit. **Only Bidders attending the Mandatory Pre-Bid Conference and site visit will be eligible to submit a Bid.** All attendees to the Pre-Bid Conference and site visit must sign in. The representative of each Bidder shall be an authorized employee of the Bidder and MUST sign in accordingly. Bidders are urged to obtain bid documents and familiarize themselves with the documents prior to the pre-bid conference.

**DESCRIPTION: THE EXPANSION OF CITY CENTER SPORTS COMPLEX, THE PROJECT WILL INCLUDE TWO (2) MULTI-PURPOSE FIELDS WITH LIGHTS, A SUPPORT BUILDING (RESTROOM, CONCESSION AND STORAGE) AND PARKING.**

**Bidders must be a commercial entity licensed to do business in the State of Florida and perform the services identified herein. Bidders must be properly registered and licensed to provide the services identified in the scope of work by all applicable state and local agencies.**

Bidder must include with their submittal a bid guarantee in the form of a bid bond executed by the Bidder and an acceptable surety or a certified check or bank draft payable to the City of Port Orange, Florida in an amount equal to five percent (5%) of the proposed bid. If awarded, the Bidder must also be able to obtain both payment and performance bonds equal to one hundred percent (100%) of the project value from a surety company licensed in Florida and must submit proof of their present bonding capacity with their submitted bid package in the form of a current (not older than 3 months) letter from Bidder's bonding agent. Bidder's failure to include the bonding capacity letter with bid package may result in rejection of Bidder's submittal.



All bids are solicited and shall be made pursuant to the Code of Ordinances, City of Port Orange, Chapter 2, Article VI, Division 2, Section 2-263, and all bids will be evaluated in accordance with Chapter 2, Article VI, Division 2, Section 2-266. Code of Ordinances, City of Port Orange is on file in the Office of the City Clerk, City Hall, 1000 City Center Circle, Port Orange, Florida 32129 and at www.municode.com.

Copies of the bid documents, requirements, scope of service and all other pertinent information necessary to submit a complete package may be obtained electronically from the City of Port Orange Purchasing web page at www.port-orange.org/bids.aspx and DemandStar via their website at www.demandstar.com.

All questions shall be directed **in writing** to RITA COOPER, BUYER, RCOOPER@PORT-ORANGE.ORG and purchdiv@port-orange.org and reference "Questions on "ITB 26-07 CITY CENTER SPORTS COMPLEX EXPANSION" in the subject line. Last day for questions will be MAY 1, 2026, by 5:00 PM EST.

The Cone of Silence begins with the issuance of the solicitation document and continues until City Council meets to make a final decision on an award. During this time Bidders, suppliers, contractors and sub-contractors are prohibited from all communications regarding the solicitation with City staff, City consultants, City legal counsel, City agents, or elected officials. Any Bidder who initiates any discussions or attempts to influence a member or members of the aforementioned shall be disqualified from continued participation in the procurement process with regard to that particular solicitation. While the Cone of Silence is in effect, all communications from potential Bidders, suppliers, contractors and sub-contractors must be directed to the Purchasing Division @ purchdiv@port-orange.org.

**Cut along the outer border and affix this label to the outside of your sealed bid envelope/package to identify it as a "Sealed Bid". Be sure to include the name of the company submitting the bid where requested.**

**SEALED BID – DO NOT OPEN**

**SEALED BID NO.:** **ITB #26-07**

# SECTION 1 – PURPOSE AND OVERVIEW

The purpose of this Invitation to Bid (ITB) is to solicit competitive sealed bids from Firms or Companies (Bidders) for **the expansion of City Center Sports Complex, the project will include two (2) multi-purpose fields with lights,(install of owner furnished lights), a support building (restroom, concession and storage) and parking.**

It is the intent and purpose of the City of Port Orange (City) that this Invitation to Bid promotes competitive selection. It shall be the Bidder's responsibility to advise the Purchasing Division of any language, requirements, etc. or any combination thereof that inadvertently restricts or limits the requirements stated in this ITB to a single source.

# SECTION 2 – INSTRUCTIONS TO BIDDERS

Bidders desiring to provide services, as described herein shall submit sealed bids, including one (1) original and one (1) digital (flash drive) version in PDF format, in conformance with the detailed submittal instructions.

**TIMELINE (Eastern Standard Time)**

*The City reserves the right to alter dates as needed.*

| DESCRIPTION | DATE |
|---|---|
| Date of distribution | APRIL 17, 2026 |
| Mandatory Pre-bid conference and site visit | APRIL 24, 2026 @2PM |
| Deadline for questions | MAY 1, 2026 by 5:00 PM |
| Addendum posting (if needed) | MAY 8, 2026 |
| **Bids due** | MAY 15, 2026 by 3:30 PM |
| City Council meeting for approval of Recommendation of Award | To Be Determined |

Bids must be delivered in a sealed envelope/package and delivered to:

City of Port Orange City Clerk's Office
Attn: RITA COOPER, BUYER
Purchasing Division
1000 City Center Circle
Port Orange, FL 32129

Sealed bids must be delivered no later than the date and time listed in the Timeline above. All times referenced are local time. Bids shall be sealed and Bidders shall clearly indicate on the outside of their bid the following:

a. Invitation to Bid (ITB) Number and Title
b. Date of Opening
c. Name of Bidder
d. Address of Bidder

Due to the timing of mail service, the City cautions Bidders to ensure actual delivery of bids to the City prior to the deadline set for receiving bids. Carrier and hand deliveries of bids will be accepted in the City Clerk's Office, Port Orange City Hall, 1000 City Center Circle, Port Orange, Florida 32129 until the date and time referenced in the Timeline above or as amended by addendum issued by the City. Bids received after the established deadline shall not be considered.

**Bidders are cautioned that they are responsible for delivery to the specific location cited above. Therefore, if your bid, proposal, statement or quotation is delivered by an express mail carrier or by any other means, it is your responsibility to ensure delivery to the above address. The City will not be responsible for deliveries made to any place other than the specified address.**

Offers by telephone, email or fax will not be accepted.

All bids will be opened publicly and the names of all Bidders shall be read aloud. All conferences and meetings regarding this ITB are recorded electronically (audio only). The City of Port Orange reserves the right to reject any or all bids or parts of bids if it is in the best interest of the City.

**PRE-BID CONFERENCE**

There will be a Mandatory pre-bid conference and site visit 4651 City Center Circle on the date and time referenced in the Timeline above at City Hall, Council Chambers (1st Floor), 1000 City Center Circle, Port Orange, Florida 32129. All prospective Bidders must attend the meeting and site visit. **Only Bidders attending the Mandatory pre-bid conference and site visit will be eligible to submit a bid.** All attendees to the Mandatory pre-bid conference and site visit MUST sign in. The representative of each Bidder shall be an authorized employee of the Bidder and must sign in accordingly. The site visit will immediately follow the meeting in Council Chambers.

**QUESTIONS**

All questions shall reference ''ITB #26-07 CITY CENTER SPORTS COMPLEX EXPANSION" in the subject line. All questions concerning this ITB shall be submitted in writing no later than the date and time referenced in the Timeline above to:

Rita Cooper, Buyer
1000 City Center Circle
Port Orange, FL 32129
RCOOPER@PORT-ORANGE.ORG
purchdiv@port-orange.org

**ADDENDA**

The City will issue responses to inquiries and any other corrections or amendments it deems necessary in written addenda issued prior to the bid due date. Bidders should not rely on any representations, statements or explanations other than those made in this ITB or in any addendum to this ITB. Where there appears to be a conflict between the ITB and any addenda issued, the last addendum issued will prevail. The Bidder should verify prior to submitting a bid that all addenda have been received and reviewed. All addenda will be published on the City Purchasing web page at www.port-orange.org/bids.aspx and the DemandStar website at www.demandstar.com.

**The City of Port Orange reserves the right to consider the omission of an acknowledgment of addendum as cause for rejection of the ITB submittal.**

This provision exists solely for the convenience and administrative efficiency of the City of Port Orange. No Bidder or other third party gains any rights by virtue of this provision or the application thereof, nor shall any Bidder or third party have any standing to sue or cause of action arising therefrom.

**CLARIFICATIONS**

It is the Bidder's responsibility to become familiar with and fully informed regarding the terms, conditions and specifications of this ITB. Lack of understanding and/or misinterpretation of any portions of this ITB shall not be cause for withdrawal of your bid after opening or for subsequent protest of award.

**MINIMUM QUALIFICATIONS**

Bidders shall be licensed to do business in the State of Florida. Submit Sunbiz report showing your company registered as "Active".

Bidders must provide a minimum of three (3) verifiable references from similar scopes of work as identified in this ITB on the provided *Professional References* form (Form 7.8). Failure to provide verifiable references may cause the Bidder to be deemed non-responsive. The City of Port Orange is not to be used as a reference.

**NO LOBBYING**

All Bidders are hereby placed on notice that the City of Port Orange Council, City Employees/Staff, nor Members of the Evaluation Committee (with the exception of the City of Port Orange Purchasing Division personnel designated to receive requests for interpretations or corrections) are not to be lobbied, directly or indirectly either individually or collectively, regarding this ITB. During the entire procurement process, all Bidders and their subcontractors, sub-consultants, or agents are hereby placed on notice that they are not to contact any persons listed above for such purposes as holding meetings of introduction, dinners, etc. if they intend to submit or have

submitted bids for this project. Any Bidder contacting individuals mentioned herein in violation of this warning may automatically be disqualified from further consideration for this ITB.

**SCHEDULE OF UNIT PRICING**

Schedule of Unit Pricing is to be completed as directed and without modification and returned as part of the ITB submittal prior to the ITB deadline for submission. Failure to fill out the Schedule of Unit Pricing as directed and without modification will negatively affect the evaluation of your bid. If the City has a need to revise the Schedule of Unit Pricing prior to the bid submittal deadline, it will do so in a published addendum. If the City does revise the Schedule of Unit Pricing, bidders **must** complete and return the City issued revised version of the Schedule of Unit Pricing. If bidder does NOT complete and return the City issued revised version of the Schedule of Unit Pricing their bid submittal will be deemed non-responsive.

**EXCEPTIONS TO SPECIFICATIONS**

If taking exception to any portion of the ITB specifications, the Bidder must indicate those exceptions as stated on the *Bidder's Acknowledgement* (Form 7.2).

**BID SUBMISSION AND WITHDRAWAL**

Unless otherwise specified, Bidder shall use the forms supplied by the Purchasing Division. Bids, once opened, become the property of the City, cannot be withdrawn, and will not be returned to the Bidders. Upon opening, bids become subject to public disclosure in accordance with Chapter 119, Florida Statutes.

**CORRECTION OF BIDS**

Correction of inadvertently erroneous bids shall be permitted up to the time of ITB opening. Bidders shall not be allowed to modify their bids after the opening time and date.

**WITHDRAWAL OF BIDS**

NO bid shall be withdrawn for a period of one-hundred-twenty (120) days subsequent to the bid opening without the consent of the City of Port Orange. Negligence on the part of the Bidder's firm in preparing their bid confers no right of withdrawal or modification after the bid has been opened at the appointed time and place by the City of Port Orange. Any such withdrawn bid shall not be resubmitted.

**OPENING OF BIDS**

Bids will be received until the date and time stated in this ITB and will be publicly opened and read at the place, time and date stated. The City bears no responsibility for the premature opening of a bid not properly addressed and identified.

**LITIGATION HISTORY**

The City will consider a Bidder's litigation history information in its review and determination of responsibility. All Bidders are required to disclose to the City all "material" cases filed, pending, or resolved during the last five (5) years prior to the solicitation response due date, whether such cases were brought by or against the Bidder, any parent or subsidiary of the Bidder, or any predecessor organization. If the Bidder is a joint venture, the information provided should encompass the joint venture (if it is not newly formed for purposes of responding to the solicitation) and each of the entities forming the joint venture. Although the review of a Bidder's litigation history is an issue of responsibility, the failure to provide litigation history as required in the Evaluation Criteria may result in a recommendation of non- responsive by the Purchasing Manager.

**DEBARMENT HISTORY**

The City will consider a Bidder's debarment history information in its review and determination of responsibility. All Bidders are required to disclose to the City all cases of debarment filed, pending, or resolved by the City or other public entity during the last five (5) years prior to the solicitation response due date, whether such actions were brought by or against the Bidder, any parent or subsidiary of the Bidder, or any predecessor organization. If the Bidder is a joint venture, the information provided should encompass the joint venture (if it is not newly formed for purposes of responding to the solicitation) and each of the entities forming the joint venture. Although the review of a Bidder's debarment history is an issue of responsibility, the failure to provide debarment history as required on the *Certification Regarding Debarment, Suspension and Other Responsibility Matters* (contained herein) may result in a recommendation of non-responsive by the Purchasing Manager.

**REJECTION OF BIDS**
The City reserves the right to reject any and/or all bids when such rejection is in the best interest of the City.

**BIDS MAY BE REJECTED AND/OR BIDDER(S) DISQUALIFIED FOR THE FOLLOWING REASONS:**
(a) Failure to update the information on file including address, product, service or business descriptions.
(b) Failure to perform according to contract provisions.
(c) Conviction in a court of law of any criminal offense in connection with the conducting of business.
(d) Evidence of a violation of any federal or state antitrust law based on the submission of bids or proposals, or the awarding of contracts.
(e) Evidence that the Bidder has attempted to give a City employee a gratuity of any kind for the purpose of influencing a recommendation or decision in connection with any part of the City's purchasing activity.
(f) Other reasons deemed appropriate by the City.

**OWNERSHIP OF DOCUMENTS**
All documents resulting from this solicitation will become the sole property of the City of Port Orange. The Bidder must meet all requirements for retaining public records and transfer, at no cost, to the City all public records in the possession of the Bidder upon termination of this Agreement and destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. All records stored electronically must be provided to the City in a format that is compatible with the information technology systems of the City.

**AMERICANS WITH DISABILITIES ACT (ADA)**
If you need special services provided under the Americans with Disabilities Act, contact the ADA Coordinator in our Human Resources office at 386-506-5560 at least 48 hours before the scheduled event.

**REQUIRED DOCUMENTS FOR AWARDED BIDDER**
The awarded Bidder shall return all the required post-award documents within 10 days after the issuance of the Notice of Intent to Award in order to execute the contract.

## SECTION 3 – SCOPE OF WORK

**SCOPE OF WORK:**

This project is for the expansion of City Center Sport Complex located adjacent to the REC at 4651 City Center Circle. The project will include two (2) multi-purpose fields with lights, install of owner furnished lights, a support building (restroom, concession and storage) and parking more particularly described in the Attachment 2 City Center Sport Complex Expansion Project Manual and Attachment 3 City Center Sport Complex Expansion Drawing documents found on the City's webpage at www.port-orange.org/bids.aspx and DemandStar via their website at www.demandstart.com.

# SECTION 4 – STANDARD PURCHASE DEFINITIONS

The City will use the following definitions in instructions to Bidders, terms and conditions, special provisions, technical specifications and any other solicitation documents.

1. **Addendum** is a formal written document, released prior to the public opening that modifies any aspect of a Solicitation. Plural: Addenda
2. **Alternate Bid** means multiple bids with substantive variations from the same Bidder in response to a Solicitation.
3. **Amendment** is a formal written agreement, signed by both parties, that modifies an existing contractual agreement.
4. **Appropriate, Appropriated, or Appropriation** means the adoption by the City Council of the City of a budget fora fiscal year that includes payments to be made under the Contract during the respective fiscal year.
5. **Best Value** means the highest overall value to the City based on factors that include, but are not limited to, price, quality, design, and workmanship.
6. **Bid** is a complete, properly signed response to an Invitation to Bid, which if accepted, would bind the Bidder to perform the resultant Contract.
7. **Bid Guaranty (Bid Bond)** guarantees that the Bidder (a) will not withdraw the bid within the period specified for acceptance, and (b) will execute a Contract and furnish required bonds and any necessary insurance within the time specified in the Solicitation, unless a longer time is allowed by the City. The guarantee will be returned to the Bidder upon execution of a Contract
8. **Bidder or Proposer** is a person, firm, or entity that that submits a Response to a Solicitation. Any Bidder/Proposer may be represented by an agent after submitting evidence demonstrating the agent's authority. The agent cannot certify as to his own agency status.
9. **City** means the City of Port Orange.
10. **Competitive Negotiation** means a method for acquiring goods, services, and construction for public use in which discussions or negotiations may be conducted with responsible offerers who submit Responses through a Request for Proposals, Request for Statements of Qualifications, or Invitation to Negotiate.
11. **Competitive (Formal) Solicitation** is the process of requesting and receiving two or more sealed bids, proposals, statements of qualifications or replies submitted by responsive Bidders/Proposers in accordance with the terms of a competitive process, regardless of the method of procurement.
12. **Competitive Range** means the responsive submissions that meet the evaluation criteria and are considered to be reasonably susceptible of award.
13. **Construction** means the process of building, repairing, improving, and alterations, conversion or extension of building, parks, utilities, streets or other improvements or alterations to real property.
14. **Contract** is a written agreement or purchase order issued for the purchase of goods or services.
15. **Contractor** means the person, firm or entity selling goods or services to the City under a Contract.
16. **Deliverables** means the goods, products, materials, and/or services to be provided to the City by a Bidder.
17. **Due Date** means the date and time specified for receipt of Responses to a Solicitation.
18. **End User** is a person, program, agency, or other eligible user who uses a contract to purchase a commodity or contractual service.
19. **Evaluation Committee/Team** is a temporary group of City personnel who are responsible for the evaluation of proposals, statements of qualifications or replies as part of a Request for Proposals (RFP), Request for Submission of Qualifications (RFSQ), or Invitation to Negotiate (ITN), or competitive grant process.
20. **Evaluator** is a member of the evaluation committee/team.
21. **Goods** are supplies, materials, or equipment.
22. **Intent to Award** is a document, published on DemandStar, that informs the public and respondents of the City's decision to award a contract pursuant to a previously issued competitive solicitation.
23. **Invitation to Bid (ITB) or Bid** means a formal request to prospective Bidders requesting pricing for a specified Good or Service which has been advertised for bid in a newspaper.
24. **Invitation to Negotiate (ITN)** means a formal request to prospective proposers requesting proposed specifications and pricing of a product and/or service which has been advertised for replies in a newspaper.
25. **Issues** means points, matters, or concerns to be addressed during negotiations.

26. **Lead Negotiator** is the negotiator responsible for leading and facilitating the formal negotiation discussions and selecting other required negotiation team members. Is often the "driver of change" and seeks alternatives/options.
27. **Lowest Responsible Bid** means the responsive bid meeting all requirements of the specifications, terms, and conditions of the Invitation to Bid resulting in the lowest cost to the City in a total cost concept or based solely on price, taking into consideration the financial and practical ability of the Bidder to perform the Contract, past performance of the Bidder, and compliance with all City ordinances concerning the purchasing process.
28. **Lowest Responsible Bidder** means the Bidder submitting lowest responsible bid.
29. **Negotiation Team** is a temporary group of City personnel who are responsible for negotiations as part of an Invitation to Negotiate (ITN).
30. **Negotiator** is a member of the negotiation team.
31. **Non-Professional Services** are services performed that are not of a professional nature such as lawn care, security, janitorial, etc.
32. **Offer** means a complete signed Response submitted to the City in response to a Solicitation including, but not limited to, a bid submitted in response to an Invitation to Bid, a Proposal submitted in response to a Request for Proposal, a Quote submitted in response to a Request for Quotation, a Statement of Qualifications and interest submitted in response to a Request for Statements of Qualifications, or a Reply submitted in response to an Invitation to Negotiate.
33. **DemandStar** is the official online repository for all City competitive solicitations.
34. **Outlier** is a bid, offer, or proposal which is determined by the Purchasing Director or Manager to be significantly dissimilar to or inconsistent with, competing bids or offers.
35. **Pre-Bid/Proposal/Statement/Reply Conference** means a meeting conducted by the Purchasing Office, held in order to allow Bidders/Proposers to ask questions about the proposed Contract and particularly the Contract specifications with the City department requesting the goods/services.
36. **Price Analysis** is an evaluation of the total cost of a contract in order to determine if the price is reasonable.
37. **Procurement (Process)** is a term used in the governmental sector for the combined functions of acquiring (purchasing) needed goods and/or services, receiving and inspection, inventory management, contract administration, and disposal/surplus.
38. **Professional Services** means those services within the scope of the practice of architecture, professional engineering, landscape architecture, or registered surveying and mapping, as defined by the laws of the state, or those performed by any architect, professional engineer, landscape architect, or registered surveyor and mapper in connection with his or her professional employ mentor practice.
39. **Protest** is a formalized process by which respondents have an opportunity to challenge a procurement practice or contract award.
40. **Proposal** is a complete, properly signed Response to a Request for Proposal, based on performance that is offered rather than on that of price alone, which if accepted, would bind the Proposer to perform the resultant Contract.
41. **Purchase Order** is an order placed by the Purchasing Division for the purchase of Goods or Services written on the City's standard Purchase Order form and which, when accepted by the Bidder, becomes a contract. The Purchase Order is the Bidder's authority to deliver and invoice the City for Goods or Services specified, and the City's commitment to accept the Goods or Services for an agreed upon price.
42. **Request for Proposal (RFP)** means a formal request to prospective proposers requesting qualifications of the proposer and pricing for a specified Good or Service which has been advertised for Proposal in a newspaper.
43. **Request for Statement of Qualifications (RFSQ)** means a formal request to prospective proposers requesting statements of qualifications pursuant to Florida Statute 287.055 "Consultant's Competitive Negotiation Act" which has been advertised for Statement in a newspaper.
44. **Respondent** means an entity that has (or will, i.e. "prospective respondents") submitted a response to a competitive solicitation conducted to create a contractual relationship for the provision of commodities or services.
45. **Response/Submission** means all materials submitted to the City by a respondent as part of a solicitation. A response may be called a bid, proposal, statement of qualifications, or a reply, depending on the type of competitive solicitation being issued.

46. **Responsible (Bidder)** is a Bidder who has the capability in all respects to fully perform the contract requirements and the integrity and reliability that will assure good faith performance.
47. **Responsive (Bidder)** is a Bidder that has submitted a bid, proposal, statement of qualifications, or reply that conforms in all material respects to the solicitation.
48. **Scope** means the extent of the area or subject matter that something deals with or to which it is relevant.
49. **Scope of Work** means a description of the work activities, deliverables, and/or timeline that a Bidder must execute in terms of delivering specific commodities or in performance of contractual services.
50. **Services** include all work or labor performed for the City on an independent contractor basis other than construction.
51. **Solicitation** means a formal request, as applicable, for prospective Bidders/Proposers to submit responses to an Invitation to Bid, Request for Proposal, Request for Qualifications, Invitation to Negotiate, or a Request for Quotation.
52. **Solicitation Document** means a document, or collection of documents, either paper or electronic, that contains all information required to conduct a competitive procurement project according to § 287.057, Florida Statutes.
53. **Stakeholder** means an individual, who is not likely to become a supplier, who has an interest in the commodities/contractual services needed.
54. **Subcontractor** means a person, firm or entity providing goods or services to a Bidder/Proposer to be used in the performance of the Bidder/Proposer's obligations under the Contract.
55. **Subject Matter Expert** means a person who has working or expert knowledge about a particular topic or field.
56. **Unbalanced Bid** means a bid that is based on prices which are significantly less than cost for some bid items and significantly more than cost for others.

## SECTION 5 – GENERAL TERMS AND CONDITIONS

These terms and conditions are standard for all contracts for commodities or services issued through the City of Port Orange Purchasing Division. These General Terms and Conditions apply to all advertised Solicitations; however, said terms and conditions may be superseded, in whole or in part, by Section 6, Special Requirements/Instructions.

1. **ACCEPTANCE BY CITY**

   The City shall have a reasonable time (but not less than 30 days) after receipt to inspect the goods and services tendered by the Bidder. The City at its option may reject all or any portion of such goods or services which do not, in City's sole discretion, comply in every respect with all terms and conditions of the contract. The City may elect to reject the entire goods and services tendered even if only a portion thereof is nonconforming. If the City elects to accept nonconforming goods and services, the City, in addition to its other remedies, shall be entitled to deduct a reasonable amount from the price thereof to compensate the City for the nonconformity. Any acceptance by the City, even if non-conditional, shall not be deemed a waiver or settlement of any defect in such goods and services. The material delivered as a result of this solicitation shall remain the property of the seller until a physical inspection and actual usage of the item(s) is made and thereafter deemed acceptable to the satisfaction of the City, in compliance with the terms and specifications contained herein. In the event that the item(s) supplied to the City is/are found to be defective, or does/do not conform to specifications, the City reserves the right to cancel the order upon written notice to the seller and return the item(s) to the seller at the seller's expense.

2. **ADDENDA**

   When specifications are revised, the City of Port Orange Purchasing Division will issue an addendum addressing the nature of the change. Bidders must acknowledge all addenda by completing Form 7.3 *Addendum and Change Order Procedure Acknowledgement* and include it in the returned response package. Failure to acknowledge the correct number of addenda issued may result in rejection of the response. It is the responsibility of the Bidder to ensure all addenda have been received and reviewed prior to submitting a bid. All addenda shall be posted by the City on DemandStar at www.demandstar.com and the City of Port Orange Purchasing web page at https://www.port-orange.org/bids.aspx. The City shall issue responses to inquiries and any other corrections or amendments it deems necessary in written

addenda issued prior to the solicitation response due date. Bidders should not rely on any representations, statements or explanations other than those made in this solicitation or in any addendum to the solicitation. Where there appears to be a conflict between the solicitation and any addenda issued, the last addendum issued shall prevail.

3. **ADDITIONAL GOODS**

Products, materials and goods not specifically identified in this bid request may be added to any resultant contract upon mutual consent of the contracting parties. The City reserves the right to add or delete products or materials of similar nature, within the family of products of "ITB Item(s)" and their commodity codes, to those items requested in this bid.

4. **ANTI-COLLUSION STATEMENT**

By submitting a response to a formal solicitation, the Bidder affirms that this response is without previous understanding, agreement, or connection with any person, business, or corporation submitting a response for the same materials, supplies, or equipment, and that the response is in all respects fair, and without collusion or fraud. Additionally, Bidder agrees to abide by all conditions of this solicitation and certifies that he/she is authorized to sign the response for the bidding company/firm. In submitting a response to the City of Port Orange, the Bidder offers and agrees that if the response is accepted, the Bidder shall convey, sell, assign or transfer to the City of Port Orange all rights, title and interest in and to all causes of action it may now or hereafter acquire under the Anti-trust laws of the United States and the State of Florida for price fixing relating to the particular commodities or services purchased or acquired by the City of Port Orange. At the City's discretion, such assignment shall be made and become effective at the time the City tenders final payment to the Bidder.

5. **APPLICABLE LAWS**

In connection with the furnishing of supplies or performance of work under the contract, the Bidder agrees to comply with the Fair Labor Standards Act, Equal Opportunity Employment Act, and all other applicable federal and state laws, regulations and executive orders to the extent that the same may be applicable.

6. **ASSIGNMENT**

The successful Bidder shall not sell, assign, transfer or convey this contract in whole or in part, without the prior written consent of the City of Port Orange. Any such assignment or transfer shall not release the Bidder from all contractual obligations.

7. **AUTHORITY TO CONDUCT BUSINESS IN FLORIDA**

A Florida corporation or partnership is required to provide evidence with its response that it is authorized to transact business in Florida and is in good standing with the Florida Department of State. If not with its response, such evidence must be submitted to the City no later than five (5) business days from request of the Purchasing Manager. A foreign (out-of-state) corporation or partnership is required to provide evidence with its response that it is authorized to transact business in Florida and is in good standing with the Florida Department of State. If not with its response, such evidence must be submitted to the City no later than five (5) business days from request of the Purchasing Manager. A joint venture is required to provide evidence with its response that it, or at least one of the joint venture partners, is authorized to transact business in Florida and is in good standing with the Florida Department of State. If not with its response, such evidence must be submitted to the City no later than five (5) business days from request of the Purchasing Manager. However, the joint venture is required to provide evidence prior to contract execution that the joint venture is authorized to transact business in Florida and provide the City with a copy of the joint venture Agreement. A joint venture is also required to provide with its response a Statement of Authority indicating that the individual submitting the joint venture's proposal has the legal authority to bind the joint venture. If not with its response, such evidence must be submitted to the City no later than five (5) business days from the request of the Purchasing Manager.

8. **AWARDS**

Recommendation for award will be considered by the City of Port Orange City Council at the earliest possible regular meeting subsequent to the evaluation process. This ITB is issued in accordance with and shall be governed by the provisions of the City's Purchasing Manual. The City of Port Orange City Council reserves the right to make award(s) by individual sections, groups, all or none, or a combination thereof, with one or more Bidders; to reject any and all bids, or to waive any informality or technicality in bids received as deemed to be in the best interest of the City. The City does not award publicly funded contracts to those who knowingly employ unauthorized alien workers in violation of section 274A(e) of the

Immigration and Naturalization Act, 8 United States Code s1324a(e). Such employment deprives legal workers of job opportunities. Violation of section 274A(e) shall be grounds for unilateral cancellation of the contract, bid or quote for purchase of services and goods by the City of Port Orange.

9. **AWARD AND EXECUTION OF CONTRACT**

When a bid received has been determined to be satisfactory, a contract will be awarded, or Purchase Order issued to the lowest responsive and responsible Bidder within the time designated in the contract documents. The Bidder(s) to whom the award is made shall execute the contract(s) and return it, together with the properly executed bonds and insurance certificates to the City within the time specified.

10. **BID RETURNS**

Bidders shall return all completed responses to the City of Port Orange at the address set forth in Section 2 of this document on the date and at the time specified. Late submissions will not be accepted and shall be returned to Bidders unopened.

11. **BID PROTEST**

Any person who is adversely affected by the City's decision or intended decision shall file with the City Purchasing Manager a notice of protest in writing within 72 hours after the posting of the notice of decision or intended decision. With respect to a protest of the terms, conditions, and specifications contained in a solicitation, including any provisions governing the methods for ranking bids, proposals, statements, or replies, awarding contracts, reserving rights of further negotiation, or modifying or amending any contract, the notice of protest shall be filed in writing within 72 hours after the posting of the solicitation. Saturdays, Sundays, and state holidays shall be excluded in the computation of the 72-hour time established herein. The formal written protest shall be filed with the Purchasing Manager in writing within ten (10) days after the date the notice of protest is filed. The formal written protest shall state with particularity the facts and law upon which the protest is based. Failure to file a notice of protest or failure to file a formal written protest shall constitute a waiver of proceedings. Upon receipt of the formal written protest that has been timely filed, the City shall stop the solicitation or contract award process until the subject of the protest is resolved by final City action. However, the City may continue the solicitation or award process, provided the City Manager sets forth in writing particular facts and circumstances which require the continuance of the solicitation or contract award process without delay in order to avoid an immediate and serious danger to the public health, safety, or welfare. The City shall provide an opportunity to resolve the protest by mutual agreement between the parties. The policy this City has established is as follows:

a. As soon as possible after receipt, the Purchasing Manager shall provide written bid protest to City Manager, City Attorney, Department Head involved, and Supervisor directly involved in the acquisition.
b. Purchasing Manager shall schedule within seven (7) business days, excluding weekends and holidays, a meeting with the above-mentioned individuals or designee and protestor. The intent of the meeting is to provide a review and/or solution prior to going before Council. After reviewing all relevant information, the City Manager shall render a decision.
c. If the protestor disagrees, he/she may appeal to the City Council at a formal council meeting. After reviewing the evidence, the City Council will issue their decision. The City Council's decision is final; however, the protestor can appeal the decision to the Circuit Court in Volusia County, Florida within thirty (30) days of the City Council's final decision. Decisions at all levels shall be in writing to the protester.

12. **BID TABULATION**

Bidders who wish to receive a copy of the bid tabulation may obtain it via DemandStar at www.demandstar.com or on the City Purchasing web page at www.port-orange.org/bids.aspx.

13. **BIDDER'S PRODUCT OR SERVICES**

The Bidder's product (if applicable) delivered to the City shall be free of all liens, claims or encumbrances, and the Bidder warrants that it has a clear title to the product being delivered.

a. If the Bidder is contracted to provide services, such services shall be fully satisfactory to the City as determined by the City.
b. The Bidder shall provide the City with any data, reports or other information as required and requested by the City to enable it to utilize the product or service furnished by the Bidder.
c. In furnishing the service or product to the City, the Bidder shall comply with all federal, state, county laws, and city rules, regulations and codes and their successors or amendments. Violation of such

laws, rules, regulations and codes may be grounds for delaying or reducing the amount due, or in rescinding the contract, proposal or quote.

14. **BONDS**

If this solicitation requires submission of bid guarantee and payment and performance bonds, there will be a separate section explaining those requirements. When the Purchasing Manager deems it necessary, bid bonds/deposits shall be prescribed and are advertised in the public notices inviting bids. Responses submitted without the required bid bond or certified check shall be deemed non-responsive. Normally, if a bid bond/deposit is requested, it is in the amount of five percent (5%) of the bid amount.

Depending on the amount and/or nature of the work to be performed, a Payment and Performance Bond may be requested and shall be in an amount equal to one hundred percent (100%) of the total contract amount which will be recorded by the City, at the awarded Bidder's sole cost and expense, with the Clerk of the Circuit Court, Volusia County, Florida. After recording, the City will furnish to the awarded Bidder the recording information for the bond to evidence that the Bidder has met the requirements of Florida law. The City will bill the cost of recording to the awarded Bidder. Unsuccessful respondents are entitled to the return of their bid bond. A successful respondent shall forfeit any surety required by the Purchasing Manager upon failure of the respondent to enter into a contract within the time specified after the award of bid.

15. **CERTIFICATE OF INSURANCE**

Upon issuance of a notice of intent to award, the selected Bidder will be required to submit a Certificate of Insurance showing proof of adequate coverage for professional general liability, errors and omissions and workers' compensation as identified under the insurance requirements of this solicitation and listing the City of Port Orange as Additional Insured prior to execution of the contract.

16. **CHANGE ORDERS**

No oral statement of any person shall modify or otherwise change, or affect the terms, conditions or specifications stated in the resulting contract. All change order requests shall be made in writing by the supplier/contractor for review by the Contract Administrator for the City of Port Orange. No work shall be performed as set forth in the change order until the Bidder receives an executed Purchase Order for the requested change.

17. **CHANGE ORDER REQUEST NOTIFICATION**

The awarded Bidder is responsible for giving the City of Port Orange, prior to the contract expiration date, at least forty-five (45) calendar days of advance notice for any anticipated changes in price greater than $25,000, and any changes in time and/or scope of the awarded contract. The Bidder shall not continue to provide services past the contract expiration date unless approved by a written Change Order Notice from the City.

18. **CLEAN UP**

Upon completion of the delivery of materials, the Bidder shall restore any/all public and private property which may have been damaged during delivery. Restoration is meant to include removal of any spillage or restoring damage to the edge of pavement, sidewalks, driveways, landscaped areas, etc. Bidder shall make repairs consistent with or better than what existed prior to delivery. This shall be understood to include the use of sod or seed and mulch to replace (if necessary) existing grass that has been damaged. If sod is used it shall match the sod present on the effected property. Bidder shall make all repairs and restorations at his/her expense.

19. **CONDUCT OF BIDDERS**

All Bidders or individuals acting on behalf of a Bidder are hereby prohibited from lobbying or otherwise attempting to persuade or influence any member of the Evaluation Committee, City Council members, or City staff at any time during the course of the solicitation process. The solicitation process shall end upon issuance of the written staff recommendation (Notice of Intent to Award) for selection of a Bidder. All Bidders or individuals acting on behalf of a Bidder are further prohibited from contacting or otherwise attempting to communicate with any member of the staff, Evaluation Committee or City Council members regarding the pending solicitation or its outcome until after the issuance of the written recommendation of the most qualified Bidder. Until such recommendation is issued in writing, any questions regarding the pending solicitation shall be submitted to the Purchasing Division. Failure to comply with this procedure shall result in rejection/disqualification of said submittal without exception. Contact with staff, City Council members or the Evaluation Committee during a public meeting shall not be considered a violation of this requirement.

20. **CONE OF SILENCE**

The Cone of Silence is designed to protect the integrity of the procurement process by shielding it from undue influences prior to the execution of the award. The Cone of Silence is defined as the period beginning with the issuance of the solicitation document and continues through the execution of the award document. During this time Bidders, service providers and the like are prohibited from all communications regarding the solicitation with City staff, City consultants, City legal counsel, City Agents, or elected officials. Any Bidder who initiates any discussions or attempts to influence a member or members of the aforementioned shall be disqualified from continued participation in the procurement process with regard to that particular solicitation.

*Exceptions to the Cone of Silence:*

- Written communication directed to the Procurement Officer;
- All communications occurring at Pre-Proposal Conferences;
- Oral presentations before publicly noticed committee meetings;
- Procurement of goods and services for Emergency situations; and
- Contractors already on contract with the City to perform services for the City are allowed discussions necessary for the completion of an existing contract.

21. **CONFLICT OF INTEREST**

For purposes of determining any possible conflict of interest, all Bidders must disclose if any City of Port Orange employee is also an owner, corporate officer, or employee of Bidder's business. No official or employee of the City who exercises any functions or responsibilities in the review or approval of the undertaking or carrying out of the Scope of Work covered by the contract shall voluntarily acquire any personal interest, directly or indirectly, in the contract or proposed contract.

22. **CONFLICT OF INSTRUCTIONS**

If a conflict exists between the General Terms and Conditions and instructions contained herein, and the Special Terms and Conditions and instructions contained herein, the Special Terms and Conditions shall govern.

23. **CONTRACT OBLIGATION**

Except as otherwise stated herein, the City of Port Orange City Council shall approve the contract if greater than $25,000.00 annually. The Mayor or other person authorized by the Mayor must sign the contract before it becomes binding on the City of Port Orange or the Bidder. Department heads are NOT authorized to sign contracts for the City of Port Orange. Binding agreements shall remain in effect until all products and/or services covered by this purchase have been satisfactorily delivered and accepted.

24. **CONTRACT RENEWALS**

Renewals may be made ONLY by written agreement between the City of Port Orange and the Bidder. Any price escalations are limited to those stated by the Bidder on the original response.

25. **COPYRIGHT AND PATENT RIGHTS**

Bidder warrants that there has been no violation of copyrights or patent rights in manufacturing, producing and/or selling the item(s) ordered or shipped as a result of this response, and successful Bidder agrees to hold the City harmless from any and all liability, loss or expense by any such violation.

26. **COST INCURRED BY BIDDER**

All expenses, including costs for required bonds, involved with the preparation and submission of Responses to the City, or any work performed in connection therewith shall be borne by the Bidder. No payment shall be made for any response received, nor for any other effort required of or made by the Bidder prior to commencement of work as defined by the contract approved by the City Council.

27. **DAMAGE**

Any damage to driveways, irrigation systems, sidewalks, pavement, or landscaping will be evaluated by the City's representative and the Bidder. If the Bidder is found to be at fault, all repairs, restitution, or reimbursements to the City must be completed within one week of discovery.

28. **DEBARMENT HISTORY**

The City will consider a Bidder's debarment history information in its review and determination of responsibility. All Bidders are required to disclose to the City all cases of debarment filed, pending, or resolved by the City or other public entity during the last five (5) years prior to the solicitation response due date, whether such actions were brought by or against the Bidder, any parent or subsidiary of the Bidder, or any predecessor organization. If the Bidder is a joint venture, the information provided should

encompass the joint venture (if it is not newly formed for purposes of responding to the solicitation) and each of the entities forming the joint venture. Although the review of a Bidder's debarment history is an issue of responsibility, the failure to provide debarment history as required on the *Certification Regarding Debarment, Suspension and Other Responsibility Matters* (contained herein) may result in a recommendation of non-responsive by the Purchasing Manager.

29. **DEFAULT PROVISIONS**

In the event of default by the Bidder, the City reserves the right to procure the item(s) bid from other sources and hold the Bidder responsible for excess costs incurred as a result. If a Bidder defaults on a City contract, the City Council may elect to refrain from doing business with the Bidder for a period of 36 months from the date of default.

30. **DELIVERY OF GOODS/SERVICES**

All materials are to be delivered F.O.B.; City of Port Orange designated facility. Delivery dates pertaining to this invitation must be clearly stated in the bid form where required and include weekends and holidays. Failure to comply with this requirement may be a cause for disqualification of bid. Unless otherwise specified, delivery at the earliest date is required. The Bidder shall clearly state in the response the time required for delivery upon receipt of contract or purchase order. Proposed delivery time must be specific and such phrases "as required," "as soon as possible" or "prompt" may result in disqualification of the bid. Delivery time will be a factor for any orders placed as a result of this response. The City reserves the right to cancel such order(s) or any part thereof, without obligation, if delivery is not made within the time(s) specified herein and hold the Bidder in default. Upon approval of a contract, the Bidder is obligated to deliver the goods to the destination specified in the solicitation or the purchase order and bears the risk of loss until delivery. If this solicitation or purchase order does not contain delivery instructions, Bidder shall request instructions in writing from the Purchasing Manager. If the delivery instructions contained in the solicitation allocate delivery costs and risks in a manner contrary to this section, the provisions of this competitive solicitation shall prevail. When delivery is not met as provided for in the contract, the Purchasing Division reserves the right to make the purchase on the open market, with any cost in excess of the contract price paid by the Bidder, in addition to any other damages, direct or consequential, incurred by the City as a result thereof. In addition, failure of the Bidder to meet the contract delivery dates will be cause for removal of the Bidder from the City's list of eligible Bidders/Proposers as determined by the Purchasing Division.

31. **DETERMINATION OF LOWEST AND BEST RESPONSIBLE BIDDER**

In determining the lowest and best responsible Bidder, in addition to price, there will be considered the following:

a. The ability, capacity and skill of the Bidder to perform the contract.
b. Whether the Bidder can perform the contract within the time specified, without delay or interference.
c. The character, integrity, reputation, judgment, experience, and efficiency of the Bidder.
d. The quality of performance of previous contracts.
e. The previous and existing compliance by the Bidder with laws and ordinances relating to the contract.
f. The sufficiency of the financial resources and ability of the Bidder to perform the contract or provide the service.
g. The quality, availability and adaptability of the supplies or contractual services to the particular use required.
h. The ability of the Bidder to provide further maintenance and service for the use of the subject of the contract.
i. The number and scope of conditions attached to the bid.
j. Such other factors as appear to the city council to be pertinent to the bid or the contract under all of the circumstances involved.

32. **DISCLOSURE OF CONFLICTS**

The award is subject to the provisions of Chapter 112.313, Florida Statutes. All Bidders must disclose with their response the name of any officer, director, or agent who is also an employee of the City. Further, all Bidders must disclose the name of any employee who owns, directly or indirectly, an interest in the Bidder's firm or any of its branches. The Bidder shall not compensate, in any manner, directly or indirectly, any officer, agent, or employee of the City for any act or service that he/she may do, or perform for, or on behalf of any officer, agent or employee of the Bidder. No officer, agent, or employee of the City shall have

any interest, directly or indirectly, in any contract or purchase made, or authorized to be made by anyone for, or on behalf of the City. The Bidder shall have no interest and shall not acquire any interest that shall conflict in any manner or degree with the performance of the services required under the solicitation.

33. **DISQUALIFICATION OF BIDDER**

The Purchasing Manager shall maintain a current listing of qualified Bidders. The Purchasing Manager may, from time to time, remove any Bidder's name from the list of qualified Bidders. Normally the removal of a Bidder from the Bidder list is done after non-response from that Bidder for three (3) consecutive solicitations. Such action may also arise out of breach of contract, default, or irregular business practice, based on the Finance Director and City Attorney's recommendation. Any or all responses may be rejected if the City believes that collusion exists among the Bidders. Responses in which the prices are obviously unbalanced may be rejected. If multiple responses are submitted by a Bidder and after the responses are opened one of the responses is withdrawn, the result will be that all of the responses submitted by that Bidder will be withdrawn; however, nothing herein prohibits a Bidder from submitting multiple responses for different products or services.

34. **EVALUATION**

Evaluation shall be used as a determinant as to which response items or services are the most efficient and/or most economical for the City. It shall be based on all factors which have a bearing on price and performance of the items in the user environment. All responses are subject to tabulation by the City of Port Orange Purchasing Division and recommendation to the governing body. Compliance with all solicitation requirements, delivery and needs of the using department are considerations in evaluating responses. Pricing is NOT the only criteria for making a recommendation. The City of Port Orange Purchasing Division reserves the right to contact any Bidder/Proposer, at any time, to clarify, verify or request information with regard to any response.

35. **EXCEPTIONS TO SPECIFICATIONS**

For purposes of evaluation, the Bidder must indicate any exception to the specifications, terms, and/or conditions, no matter how minor. This includes any agreement or contract forms supplied by the Bidder that are required to be signed by the City. If exceptions are not stated by the Bidder, in his/her bid, it will be understood that the item(s)/services fully comply with the specifications, terms and/or conditions stated by the City. Exceptions are to be listed by the Bidder on Form 7.2 *Bidder's Acknowledgement* included with the bid. The City will not determine exceptions based on a review of any attached sales or manufacturer's literature.

36. **E-VERIFY**

Bidders shall utilize the U.S. Department of Homeland Security's E-Verify system to verify the employment eligibility of all new employees hired by the Bidder during the term of contract and shall expressly require any subcontractor performing services pursuant to the contract to likewise utilize the U.S. Department of Homeland Security's E-Verify system to verify the employment eligibility of all new employees hired by the subcontractor during the term of contract. Bidders shall complete Form 7.12 *E-Verify Affidavit* and include it in the returned bid package. Failure to include the affidavit may result in rejection of the bid.

37. **FACILITIES**

The City reserves the right to inspect the Bidder's facilities at any time.

38. **FAILURE TO RESPOND**

If the Bidder elects not to bid, the City requests that Bidder return the enclosed Form 7.15 *No Bid Response* by the bid due date and state the reason(s) for not bidding. Failure to respond, either by submitting a bid, or by submitting Form 7.15 *No Bid Response*, three (3) times, shall result in the Bidder's name being removed from the City's mailing list.

39. **FINANCIAL STABILITY**

Bidders shall be prepared to supply a financial statement upon request, preferably a certified audit of the last available fiscal year. A third party prepared financial statement **and** the latest Dunn & Bradstreet report will be accepted in lieu thereof.

40. **FORCE MAJEURE**

Neither party shall be liable for any delay in performance or failure to perform any obligation hereunder if, and to the extent that, such failure or delay is caused by an event of force majeure. Force majeure shall mean any act, event or condition that is beyond the party's reasonable control, that materially and adversely affects the party's ability to perform its obligations hereunder, and that is not the result of the party's willful neglect, error, omission or failure to exercise reasonable due diligence.

41. **FOREIGN COUNTRIES OF CONCERN**

A governmental entity may not knowingly enter into a contract with an entity which would give access to an individual's personal identifying information if: a) the entity is owned by the government of a foreign country of concern to include the People's Republic of China, the Russian Federation, the Islamic Republic of Iran, the Democratic People's Republic of Korea, the Republic of Cuba, the Venezuelan regime of Nicolas Maduro, or the Syrian Arab Republic, including any agency of or any other entity of significant control of such foreign country of concern; b) the government of a foreign country of concern has a controlling interest in the entity; or c) the entity is organized under the laws of or has its principal place of business in a foreign country of concern.

42. **GOVERNING FORMS**

In the event of any conflict between the terms and provisions of these requirements and the specifications, the specifications shall govern. In the event of any conflict of interpretation of any part of this overall document, the City's interpretation shall govern.

43. **GOVERNING LAW**

Bidders shall comply with all applicable federal, state and local laws and regulations. All responses are solicited and shall be made pursuant to the Code of Ordinances, City of Port Orange, Chapter 2, Article VI, Division 2, Section 2-263, and all responses will be evaluated in accordance with the provisions thereof. Code of Ordinances, City of Port Orange is on file in the Office of the City Clerk, City Hall, 1000 City Center Circle, Port Orange, Florida and at www.municode.com. The City of Port Orange is also governed by the Consultants' Competitive Negotiation Act, Section 287.055, Florida Statutes, as the method of selecting architects, engineers and land surveyors. The City has utilized the procedures in the Act for Professional counselors, environmentalists, planners, general contractors, computer systems, designers, telecommunications consultants, maintenance technicians, financial services and other professional services. Every acquisition equal to or greater than $35,000.00 must have a signed, notarized *Sworn Statement of Public Entity Crimes* (Form 7.5) contained herein to comply with Section 287.133(3)(a), Florida Statutes. Also required is the *Drug- Free Preference Statement* (Form 7.4) also contained herein to comply with Section 287.087, Florida Statutes.

44. **GRANT FUNDING**

Any contract entered into by the City that is to be paid from grant funds shall be limited to payment from the grant funding and the Bidder understands that the City has not set aside any City funds for the payment of obligations under a grant contract. If grant funding should become unavailable at any time for the continuation of services paid for by the grant, and further funding cannot be obtained for the contract, then the sole recourse of the provider shall be to terminate any further services under the contract, and the contract shall be null and void.

45. **HIPAA COMPLIANCE**

The Bidder agrees to comply with the Standards for Privacy of Individually Identifiable Health Information of the Health Insurance Portability and Accountability Act of 1996, PL 104-191, 45 CFR Parts 160-164, as amended, referred to as "HIPAA," to the extent that the Bidder uses, discloses or has access to protected health information as defined by HIPAA.

46. **HUMAN TRAFFICKING**

When a contract is executed, renewed, or extended between a nongovernmental entity and a governmental entity, the nongovernmental entity must provide the governmental entity with an affidavit signed by an officer or a representative of the nongovernmental entity under penalty of perjury attesting that the nongovernmental entity does not use coercion for labor or services as defined in this section. For purposes of this subsection, the term "governmental entity" has the same meaning as in s. 287.138(1).

47. **IDENTICAL TIE BIDS**

If there are tie bids, meaning everything except the information relating to the submitting firm is the same, the following methods shall be used in the order below to break the tie:

- The Bidder that has a Business Tax Receipt (BTR) within Port Orange City limits (confirmed through Sunbiz).
- The commodity was manufactured in the State of Florida.
- Florida business as confirmed thru SunBiz.org.
- If one has or had a contract with the City and performance is or was satisfactory. If performance of a tie Bidder who has or had a contract with the City and performance is or was not satisfactory, the other tied Bidder is awarded.

- Drug free workplace policy in place.

48. **INDEMNIFICATION/HOLD HARMLESS**

(a) Bidder shall be liable for any loss of, or damage to, City property caused by the negligence, recklessness, or intended wrongful misconduct of Bidder, his/its agents, servants and employees and shall indemnify and save the City harmless against all actions, proceedings, claims, demands, costs, damages and expenses, including attorney's fees, by reason of any suit or action brought for any actual or alleged injury to or death of any person or damage to property other than City property, resulting from the performance of the contract by the Bidder, his/its agents, servants and employees. Bidder shall submit a full written report to the Finance Director within twenty-four (24) hours following the occurrence of such damage, loss or injury.

(b) To the fullest extent permitted by law, in addition to the express duty to indemnify the City when there is any causal connection between Bidder's work and any injury, loss, damage, death or property damage, Bidder expressly undertakes a duty to defend City as a separate duty, independent of and broader than the duty to indemnify. The duty to defend agreed to by Bidder hereby expressly include all costs of litigation, attorney's fees, settlement costs and reasonable expenses in connection with the litigation, whether or not the claims made for loss, injury, damage or property damage are valid or groundless and regardless of whether the defense of City is maintained by the City or assumed by Bidder as long as the claims made could be causally connected to Bidder as reasonable determined by the City.

49. **INDEPENDENT CONTRACTOR**

It is expressly understood and agreed by both parties hereto that the City is contracting with the successful Bidder as an independent contractor. The parties hereto understand and agree that the City shall not be liable for any claims which may be asserted by any third party occurring in connection with the services to be performed by the successful Bidder under this contract and that the successful Bidder has no authority to bind the City. The Bidder represents itself to be an independent contractor offering such services to the public and shall not represent himself or his employees to be an employee of the City. Therefore, the Bidder shall assume all legal and financial responsibility for taxes, FICA, employee fringe benefits, worker's compensation, employee insurance, minimum wage requirements, overtime, etc., and agrees to indemnify, save, and hold the City, its officers, agents, and employees, harmless from and against, any and all loss; cost (including attorney's fees); and damage of any kind related to such matters. The Bidder shall further understand that the City cannot save and hold harmless and or indemnify the Bidder and/or the Bidder's employees against any liability incurred or arising as a result of any activity of the Bidder or any activity of the Bidder's employees performed in connection with the contract.

50. **INSPECTIONS AND TESTING**

City of Port Orange reserves the right to inspect any item(s) or service location for compliance with specifications and requirements and needs of the using department. If a Bidder cannot furnish a sample of a response item, where applicable, for review, or fails to satisfactorily show an ability to perform, the City can reject the response as inadequate and non-responsive.

51. **INSURANCE CANCELLATION**

No change or cancellation in insurance shall be made without thirty (30) days of written notice by the Bidder to the City. Insurance coverage required in these specifications shall be in force throughout the contract term. Should any awardee fail to maintain or to provide acceptable evidence of current insurance within five (5) days after receipt of written notice at any time during the contract term, the City shall have the right to consider the contract breached which shall justify the termination thereof.

52. **INSURANCE REQUIREMENTS**

Bidder shall maintain insurance, as required herein, during the life of this contract. Bidder shall provide to the City, a certificate of insurance endorsing the City of Port Orange as an additional named insured. All insurance coverages of the Bidder shall be primary and non- contributory. All insurance coverages of the Bidder shall not seek contribution from any other insurance or self-insurance available to the City. For workers' compensation coverage, the Bidder's insurance certificate shall include the insurer's waiver of subrogation in lieu of endorsing the City as an additional insured for workers' compensation.

**IMPORTANT:** The City does not accept Workers' Compensation Exemptions. Bidder may use leased employees if the Bidder ensures that all workers who access the jobsite are employees covered by the employee leasing company, and no non-employees are permitted to access the jobsite. Any Bidder using a leased employee shall complete the City's *Leased Employee Affidavit* contained herein. Policies for

Workers' Compensation may be issued by companies authorized as a group self-insurer by F.S. 440.572. Policies other than Workers' Compensation shall be issued by insurers licensed and/or duly authorized under Florida Law to do business in the State of Florida and all insuring companies are required to have a minimum rating of "A-" in the "Best Key Rating Guide" published by A.M. Best & Company, Inc. Bidder shall not commence work under this contract until the City has received a certificate or certificates of insurance with endorsement evidencing the required insurance. Insurer shall provide the City written notice of cancellation, non-renewal or any other changes in coverage no later than thirty (30) days prior to the effective date of the change and shall provide notice to the City no later than 10 days after non-payment. The Certificates of Insurance and required insurance policies shall contain provisions that thirty (30) days of prior written notice shall be given to the City of any cancellation, intent not to renew, or reduction in the policies or coverages. Bidder shall require and ensure each of its subcontractors to maintain, until the completion of the subcontractor's work, insurance of the types and to the limits set forth herein. All insurance coverages shall be primary and non-contributory. All insurance coverages of the subcontractors shall not seek contribution from any other insurance or self-insurance available to the City. The Bidder is responsible for ensuring that its subcontractors maintain the required coverage. Failure of the Bidder to ensure the subcontractors maintain the required coverage, shall not relieve the Bidder of any contractual responsibility, obligation or liability. The City reserves the right to increase the insurance coverage requirement as determined for higher risk contracts. The acceptance by the City of any Certificate of Insurance does not constitute approval or agreement by the City that the insurance requirements have been satisfied or that the insurance policy shown on the Certificate of Insurance is in compliance with and does not waive the insurance required by this. Should at any time the Bidder or subcontractors not maintain the insurance coverages required herein, the City may terminate the contract or at its sole discretion shall be authorized to purchase such coverages and charge the Bidder for such coverages purchased. The City shall be under no obligation to purchase such insurance, nor shall it be responsible for the coverages purchased or the insurance company or companies used. The decision of the City to purchase such insurance coverages shall in no way be construed to be a waiver of any of its rights under the contract.

53. **INVOICES AND PAYMENTS**

All invoices shall be sent to: City of Port Orange, Accounts Payable, P.O. Box 291759, Port Orange, Florida, 32129 or email apbilling@port-orange.org. In accordance with Florida Statutes, Chapter 218, payment will be made within 45 days after receipt of merchandise and a proper invoice. The City will attempt to pay within fewer days if contractor offers a payment discount. The City cannot make advance payments, make deposits in advance of receipt of goods, or pay C.O.D. The awarded firm is encouraged to accept payment via ACH. This can be accommodated after the contract is fully executed.

54. **IRREVOCABILITY OF RESPONSES**

Each Bidder agrees that responses shall remain open until the contract effective date not to exceed 90 days after the award selection, shall not be subject to revocation or withdrawal, and shall be subject to the City Council's acceptance of a contract with the Bidder.

55. **LATE SUBMISSIONS, LATE MODIFICATIONS AND LATE WITHDRAWALS**

Responses received after the response due date and time are late and shall not be considered. Modifications received after the response due date are also late and shall not be considered. Letters of withdrawal received after the response due date are late and shall not be considered. Letters of withdraw received after contract award shall be deemed a breach of contract, subject to penalties as set forth in the contract and solicitation.

56. **LEGAL REQUIREMENTS**

Applicable provision of all federal, state, county and local laws, and all ordinances, rules, and regulations shall govern development, submittal and evaluation of all responses received in response hereto and shall govern any and all claims and disputes which may arise between person(s) submitting a response to a solicitation hereto and the City by and through its officers, employees and authorized representatives, or any other person, natural or otherwise; and lack of knowledge by any Bidder shall not constitute a cognizable defense against the legal effect thereof.

57. **LICENSES, PERMITS AND TAXES**

The Bidder shall comply with all rules, regulations, laws and permitting requirements of the City, Volusia County, the State of Florida, and the United States Government now in force or hereafter to be adopted. The Bidder shall abide by all ordinances and laws pertaining to his/her operations and shall secure, at his/her expense, all licenses and permits necessary for construction and operation.

58. **LITERATURE (if applicable):**

If no brand, model or make is specified, Bidders shall submit descriptive literature and technical data, fully detailing all features, designs, construction, appointments, finishes and the like not covered in the specifications, necessary to fully describe the equipment, material, and/or services Bidder proposes to furnish.

59. **LOCAL PREFERENCE**

A local supplier or contractor is interpreted as a respondent to a solicitation, which as of the date of the solicitation opening, has a valid Business Tax Receipt (BTR) issued by the City of Port Orange to do business in the City of Port Orange which authorizes the supplier or contractor to provide the goods, services, or construction to be purchased and has a physical address located within the limits of Port Orange from which the supplier or contractor operates or performs business. A Post Office Box cannot be used to establish physical address. This local preference is only used as part of a tie breaker during a formal solicitation. The City uses Sunbiz to verify a supplier or contractor's business address. Sunbiz is a database on the Florida Department of State, Division of Corporations website and can be accessed using this link: https://dos.myflorida.com/sunbiz/.

60. **MAINTENANCE**

If maintenance is required for equipment purchased as a result of this solicitation, it is preferred that such maintenance be available to the City of Port Orange by a manufacturer-authorized maintenance facility. Costs for this service shall be shown on the Schedule of Unit Pricing form for the solicitation. If the City of Port Orange opts to include maintenance, it shall be so stated in the purchase order and said cost will be included. Service will commence only upon expiration of applicable warranties and shall be priced accordingly.

61. **NAME BRANDS**

Specifications may reference name brands and model numbers. It is not the intent of the City of Port Orange to restrict these bids in such cases, but to establish a desired quality level of merchandise or to meet a pre-established standard due to like existing items. Bidders may offer items of equal stature and

the burden of proof of such stature rests with the Bidder, unless otherwise specified by the City. The City of Port Orange shall act as sole judge in determining equality and acceptability of products offered.

62. **NON-DISCRIMINATION**

There shall be no discrimination as to race, color, religion, gender, age, marital status, national origin, ancestry, and physical or mental disability in the operations conducted under this contract. Included as applicable activities by the contractor under this section are the solicitation for or purchase of goods or services, or the subcontracting of work in performance of this contract.

63. **NON-EXCLUSIVITY OF CONTRACT**

The selected Bidder understands and agrees that any resulting contractual relationship is non-exclusive, and the City of Port Orange reserves the right to seek similar or identical services elsewhere if deemed in the best interest of the City of Port Orange.

64. **NON-PERFORMANCE**

Failure to meet the expected quality of workmanship, schedule, or other criteria agreed upon, shall be considered a default. In case of default, the City may procure the required services from other sources and hold the contractor responsible for any excess costs occasioned thereby and may immediately cancel the contract.

65. **NOTICE TO CONTRACTOR**

The employment of unauthorized aliens by any contractor is considered a violation of Section 274A (e) of the Immigration and Nationality Act. If the contractor knowingly employs unauthorized aliens, such violation shall be cause for unilateral cancellation of the contract.

66. **OPTIONAL CONTRACT USAGE**

As provided in Section 287.042(16), Florida Statutes, State of Florida agencies may purchase from a contract resulting from this solicitation, provided the Department of Management Services, Division of Purchasing, has certified its use to be cost effective and in the best interest of the State. Contractor(s) may sell such commodities or services certified by the Division to State of Florida agencies at the contractor's option.

67. **OTHER AGENCIES**

(a) All Bidders awarded contracts from this bid may, upon mutual agreement, permit any municipality or other governmental agency to participate in the contract under the same prices, terms, and conditions, if agreed to by both parties.

(b) It is understood that at no time will any city, municipality, or other agency be obligated for placing an order for any other city, municipality, or agency; nor will any city, municipality, or agency be obligated for any bills incurred by any other city, municipality, or agency. Further, it is understood that each agency will issue its own purchase order to the awarded Bidder(s).

68. **PATENTS/COPYRIGHTS**

The successful Bidder agrees to indemnify and hold the City harmless from any claim involving patent infringement or copyrights on goods supplied.

69. **PRE-BID CONFERENCE**

The Purchasing Manager shall determine if a pre-bid conference is required and provide the date, time and location in the solicitation legal advertisement and solicitation specifications. The conference shall normally be held in the Council Chambers, located on the first floor of City Hall, 1000 City Center Circle, Port Orange, Florida. A site visit may be included and shall immediately follow. Only Bidders attending a mandatory pre-bid conference will be eligible to submit a response. The representative of each Bidder shall be an authorized employee of the Bidder and shall sign in accordingly.

70. **PREPARATION OF RESPONSES**

In preparing responses, the Schedule of Unit Pricing form, the Bid Bond form (when a Bid Bond is required as bid security), Certificate as to Corporate Principal, Public Entity Crimes Statement, Anti- Collusion Statement, and Drug Free Preference Statement must be properly executed in ink. The prescribed Schedule of Unit Prices shall be typewritten or written in ink, or electronically imputed in the blank spaces for each item, with the amounts extended if a unit price bid, and all amounts totaled. The sum of the total bid as calculated from the individual items, Schedule of Unit Prices, shall equal the Total Price. Except as provided below, bids containing substitutions or combinations of alternates will not be considered unless such substitutions or combinations are specifically authorized by the solicitation. The Bidder shall sign his/her name and give his/her business address in the spaces provided therefore. If the submittal is made

as a partnership, it shall be signed by all partners; if made by a corporation, it shall be signed in the name of the corporation by one of the officers thereof and shall have affixed the seal of the corporation.

71. **POSTPONEMENT/CANCELLATION/WAIVER OF IRREGULARITIES**

The City may, at its sole and absolute discretion, reject any and all, or parts of responses; re- advertise the solicitation for new responses; postpone or cancel, at any time, the solicitation process; or waive any irregularities in the solicitation or in the responses received as a result of the solicitation, or to accept that response which best serves the interest of the City.

72. **PRICING**

Responses may not be withdrawn before the expiration of one-hundred-twenty (120) days. Prices shall be firm, with no escalator clauses unless specified by the City. Responses may be withdrawn after one-hundred-twenty (120) days only upon written notification to the City. Prices for all goods and/or services shall be firm for the duration of this contract and shall be stated on the Schedule of Unit Pricing form. Prices shall be all inclusive: no price changes, additions, or subsequent qualifications will be honored during the course of the contract. All prices must be written in ink or typewritten. Pricing on all transportation, freight, drayage and other charges are to be prepaid by the contractor and included in the bid prices. If there are any additional charges of any kind, other than those mentioned above, specified or unspecified, the Bidder shall indicate the items required and attendant costs or forfeit the right to payment for such items. Where unit pricing and extended pricing differ, unit pricing prevails. In the event of any discrepancy between the written amounts and the numerals, the written amounts shall govern and will be considered as the price bid. When submitting bids/proposals based on a lump sum basis, Bidders shall be required to submit a price for each line item listed on the Schedule of Unit Pricing in order to be considered for award.

73. **PRODUCTS/ESTIMATES**

Items included on the bid form represent the needs of various departments within the City. This is in no way to be construed as the entire or complete list of products to be purchased from the resulting contract. There is no anticipated dollar volume for this contract and estimated quantities provided on the Schedule of Unit Pricing are for bidding purposes only and are not guaranteed. Items shall be ordered on an as needed, when needed basis. Exact quantities or estimated quantities cannot be predetermined.

74. **PROPRIETARY INFORMATION**

Upon receipt by the City, responses to solicitations, become public records subject to the provisions Florida's state policy on public records, Section 119, Florida Statutes. If you believe that any portion of your response is exempt, you should clearly identify the specific documents for which confidentiality is claimed and provide specific legal authority of the asserted exemption. Any financial statement that an agency requires a prospective Bidder to submit in order to prequalify for bidding or for responding to a proposal for a road or any other public works project is exempt from Section 119.07, Florida Statutes, and Article I, 24(a), Florida Constitution.

75. **PROTECTION**

Precaution shall be exercised at all times for the protection of persons, (including employees) and property. All existing structures, utilities, services, roads, trees, shrubbery, etc. shall be protected against damage or interrupted service at all times by the contractor during the term of contract, and the contractor shall be held responsible for any damage to the property occurring by reason of his/her operation on the property.

76. **PUBLIC ENTITY CRIMES**

In accordance Section 287.133 (2)(a), Florida Statutes: A person or affiliate who has been placed on the convicted Bidder list following a conviction for a public entity crime may not submit a bid on a contract to provide any goods or services to a public entity, may not submit a bid on a contract with a public entity for the construction or repair of a public building or public work, may not submit bids on leases of real property to a public entity, may not be awarded or perform work as a contractor, supplier, subcontractor or consultant under a contract with any public entity, and may not transact business with any public entity in excess of the threshold amount provided Section 287.017, Florida Statutes, for CATEGORY TWO for a period of 36 Months from the date of being placed on the convicted Bidder list.

77. **PUBLIC RECORDS COMPLIANCE**

Contractor shall comply with public records laws as set forth in Section 119, Florida Statutes, and shall specifically:

(a) Keep and maintain public records that ordinarily and necessarily would be required by the City in order to perform the service.

(b) Provide the public with access to public records on the same terms and conditions that the City would provide the records and at a cost that does not exceed the cost provided in Section 119, Florida Statutes, or as otherwise provided by law.

(c) Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law.

(d) Meet all requirements for retaining public records and transfer to the City, at no cost, all public records in possession of the contractor upon termination of the contract and destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. All records stored electronically must be provided to the City in a format that is compatible with the information technology systems of the City.

**IF THE VENDOR HAS QUESTIONS REGARDING THE APPLICATION OF CHAPTER 119, FLORIDA STATUTES, TO THE VENDOR'S DUTY TO PROVIDE PUBLIC RECORDS RELATING TO THIS CONTRACT, CONTACT THE OFFICE OF THE CITY CLERK AT 386-506-5563, cityclerk@port-orange.org, CITY OF PORT ORANGE, 1000 CITY CENTER CIRCLE, PORT ORANGE, FLORIDA, 32129.**

The failure of contractor to comply with a public records request shall constitute a material breach of the contract.

78. **PUBLIC RECORDS/PUBLIC MEETINGS EXEMPTION STATEMENT**

Section 119.071(1)(c), Florida Statutes: **Any financial statement that an agency requires a prospective Bidder to submit in order to prequalify for bidding or for responding to a proposal for a road or any other public works project is exempt from s. 119.07(1) and s. 24(a), Art. I of the State Constitution. On June 2, 2011, Governor Scott signed HB 7223 into law.** This new legislation amends Florida's Public Records and Sunshine Laws, by expanding "exemptions" applicable to bids, proposals and replies to sealed competitive solicitations, and closes evaluation meetings from the public in certain instances. First, Section 119.071, Florida Statutes was amended to provide that sealed bids, proposals, or replies received by a Florida public agency shall remain exempt from disclosure until an intended decision is announced or until 30 days from the opening, whichever is earlier. This means that Bidders will not be able to procure a copy of their competitors' bids until an intended decision is reached or 30 days has elapsed since the time of the bid opening. The prior version of the law provided for a 10-day exemption. Next, Section 286.0113, Florida Statutes was amended to provide that meetings of persons appointed to evaluate bids or proposals and negotiate contracts shall be closed in certain circumstances. Specifically, portions of such meetings may now be closed to the public during oral presentations made by a Bidder, or where a Bidder answers questions. In other words, neither Bidders, nor the public will be permitted to sit in on meetings, unless this exemption is waived by the City Council, wherein their competitors are making presentations or discussing their bid or proposal with the committee members. The portions of these meetings must still be recorded and are subject to disclosure at the time of an intended award decision or within 30 days of the bid or proposal opening, whichever is earlier. Portions of the meetings that do not involve presentations, questions and answers, or negotiation strategy or negotiation sessions are still open to the public and competing Bidders, but the new law limits public attendance to portions of such meetings.

79. **PURCHASE ORDER AND DELIVERY**

The successful Bidder shall not deliver products or provide services without a City of Port Orange purchase order, signed by an authorized agent of the City of Port Orange. The fastest, most reasonable delivery time shall be indicated by the Bidder. Any special information concerning delivery should also be included, on a separate sheet, if necessary. All items shall be shipped F.O.B. INSIDE DELIVERY unless otherwise stated in the specifications. This shall be understood to include bringing merchandise to the appropriate room or place designated by the using department. Every tender or delivery of goods must fully comply with all provisions of these requirements and the specifications including time, delivery and quality. Nonconformance shall constitute a breach which shall be rectified prior to expiration of the time

for performance. Failure to rectify within the performance period shall be considered cause to reject future deliveries and cancellation of the contract by City of Port Orange without prejudice to other remedies provided by law. Where delivery times are critical, the City of Port Orange reserves the right to award accordingly.

80. **QUALITY**

All materials used for the manufacture or construction of any supplies, materials or equipment covered by this bid shall be new. The items bid must be new, the latest model, of the best quality and highest-grade workmanship unless otherwise specified in this bid by the City.

81. **QUESTIONS/INTERPRETATIONS**

Questions regarding interpretation of responses, solicitation results or solicitation awards shall be directed in writing to the Purchasing Division and referenced by the solicitation number no later than the last day for questions as specified in the solicitation documents. The City of Port Orange shall not be responsible for oral interpretations given by any City personnel or representative or others. The issuance of a written addendum is the only official method whereby interpretation, clarification or additional information can be given.

82. **RECORDS/AUDIT**

(a) The contractor agrees that the City, or any duly authorized representative, shall, until the expiration of five (5) years after final payment hereunder, have access to and the right to examine and copy any pertinent books, documents, papers and records of the contractor involving transactions related to this contract.

(b) The contractor further agrees to include in any subcontract for more than $10,000 entered into as a result of this contract, a provision to the effect that the subcontractor agrees that the City or any duly authorized representative shall, until the expiration of five (5) years after final payment under the subcontract, have access to and the right to examine and copy any pertinent books, documents, papers and records of such contractor involved in transactions related to such subcontract, or this contract. The term subcontract as used herein shall exclude purchase orders for public utility services at rates established for uniform applicability to the general public.

(c) The period of access provided in subparagraphs (a) and (b) above for records, books, documents and papers which may relate to any arbitration, litigation, or the settlement of claims arising out of the performance of this contract or any subcontract shall continue until any appeals, arbitration, litigation or claims shall have been finally disposed of.

83. **RECYCLED MATERIALS**

City of Port Orange encourages the use of products made of recycled materials.

84. **REJECTING OF RESPONSES/RE-BIDDING**

The City reserves the right to accept or reject any or all responses or parts of responses, to waive irregularities and technicalities, and to request re-bids. The City also reserves the right to award the contract on such items the City deems will best serve the interests of the City. The City further reserves the right to award the contract on a "split order" basis, or such combination as shall best serve the interests of the City unless otherwise specified. The City Council shall have the authority to reject any and all responses. If the lowest and best response exceeds the budgeted amount and the City Council does not make additional funds available, the Purchasing Division with the help of the department head shall have the authority to re-advertise the article or articles for bidding after making sufficient changes in the plans or specifications to bring the cost within the limit of the money available. (Code 1981, § 8-28.)

85. **REQUEST FOR ADDITIONAL INFORMATION**

Prior to the final solicitation selection, Bidders may be required to submit additional information which the City may deem necessary to further evaluate the Bidder's qualifications to perform under the terms of the solicitation and subsequent contract.

86. **REVIEW OF RESPONSES/SUBMISSIONS**

Each response will be reviewed to determine if the response is responsive to the submission requirements outlined in the solicitation. A responsive response is one which follows the requirements of the solicitation, includes all required documentation, is submitted in the format outlined in the solicitation, is of timely submission, and has the appropriate signatures as required on each document. Failure to comply with these requirements may deem your response non-responsive.

87. **RIGHT OF WITHDRAWAL**

A bid, proposal, statement, or reply may not be withdrawn before the expiration of one-hundred-twenty (120) days from the response due date.

88. **RIGHTS TO SOLICITATION SUBMITTED MATERIAL**

All responses, inquiries, or correspondence relating to or in reference to a solicitation, and all reports, charts, and other documentation submitted by Bidders shall become the property of the City when received.

89. **RULES, REGULATIONS AND LICENSING REQUIREMENT**

The Bidder shall comply with all laws, ordinances and regulations applicable to the services contemplated herein, including those applicable to conflict of interest and collusion. Bidders are presumed to be familiar with all federal, state and local laws, ordinances, codes and regulations that may in any way affect the services offered.

90. **SAMPLES**

Samples, when requested, must be furnished at, or before the bid opening, (unless otherwise specified), and will be delivered at no charge to the City. If not used and/or destroyed in testing, said sample(s) will, at the Bidder's request, be returned within thirty (30) days after bid award at the Bidder's expense. If requested by the City, samples and/or inspection of like items are to be made available in the central Florida area.

91. **SCRUTINIZED COMPANIES LIST**

The contractor shall refrain from any of the prohibited business activities with the Governments of Sudan and Iran as described in section 215.473, Florida Statutes. Pursuant to section 287.135(5), Florida Statutes, the City may immediately terminate this contract for cause if the contractor is found to have submitted a false certification or if the contractor is placed on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List or is engaged in business operations with Cuba or Syria during the term of the contract. The contractor shall provide a completed *Scrutinized Companies Certification* (Form 7.10), certifying the contractor's compliance with this section, prior to the execution of this contract.

92. **SEPARATION AND DISTRUBUTION**

The solicitation has been designed for transmittal as a complete document to interested parties. It is recommended that it not be separated; however, it may be reproduced in its entirety as additional distribution might dictate.

93. **SEVERABILITY**

If any section, subsection, paragraph, sentence, clause, phrase or word of these requirements or the specifications shall be held invalid, such holding shall not affect the remaining portions of these requirements and the specifications and it is hereby declared that such remaining portions would have been included in these requirements and the specifications as though the invalid portion had been omitted.

94. **SIGNATURE REQUIRED**

All responses must show the company name and be signed by a company officer or employee who has the authority to bind the company or firm by their signature. UNSIGNED RESPONSES WILL BE REJECTED. All manual signatures must be original - no rubber stamp, photocopy, etc.

95. **SIGNED RESPONSE CONSIDERED AN OFFER**

The signed response is considered an offer on the part of the Bidder, which offer shall be considered accepted upon approval by the City of Port Orange City Council (if required). The City of Port Orange will issue a purchase order or a letter of authorization to the successful Bidder, as authorization for delivery of the items awarded subject to requirements of detailed specifications and those contained herein. In the event of default on the part of the Bidder after such acceptance, the City may take such action as it deems appropriate including legal action for damages or specific performance.

96. **SILENCE OF SPECIFICATIONS**

The apparent silence of specifications as to any detail, or the apparent omission from it of a detailed description concerning any point, shall be regarded as meaning that only the best commercial practice is to prevail and that only material and workmanship of the finest quality are to be used. All interpretations of specifications shall be made on the basis of this statement. The items furnished under this contract shall be new, unused of the latest product in production to commercial trade and shall be of the highest quality

as to materials used and workmanship. Manufacturer furnishing these items shall be experienced in design and construction of such items and shall be an established supplier of the item bid.

97. **SOCIAL, POLITICAL, OR IDEOLOGICAL INTERESTS**

Pursuant to Florida Statute 287.05701, the governing body of a county, municipality, special district, or any other political subdivision of the state may not request documentation of or consider a vendor's social, political, or ideological interests when determining if the vendor is responsible. Furthermore, an awarding body may not give preference to a vendor based on the vendor's social, political, or ideological interests.

98. **SOLICITATION FORM COMPLETION, SUBMISSION AND RECEIPT OF RESPONSES**

Unless otherwise specified, Bidders shall use the solicitation forms supplied by the Purchasing Division. Responses shall be typewritten or handwritten in ink and shall bear the original signature of the Bidder's authorized representative. Responses containing erasures or corrections must be initialed by the Bidder in ink. Responses shall be submitted by mail or hand delivery only. No response will be accepted by facsimile transmission, e-mail or other electronic delivery. Responses submitted by mail shall be addressed to: City Clerk, City of Port Orange, Attn: Purchasing Division, Port Orange City Hall, 1000 City Center Circle, Port Orange, Florida 32129. Responses submitted by hand delivery shall be delivered to: City Clerk, Port Orange City Hall, 1000 City Center Circle, Port Orange, Florida 32129. Responses will be accepted until 3:30 PM (Eastern Standard Time) on the date indicated in the solicitation documents or an addendum issued by the City. One (1) sealed envelope or package shall be submitted. The sealed envelope/package must contain the required forms and price proposals, where applicable, and will be evaluated and deemed responsive or non-responsive. All late responses will be returned to the Bidder and will not be opened. Bids (Envelope/Package) shall contain one (1) original and one (1) digital (CD or flash drive) version unless otherwise indicated in the legal advertisement and shall be mailed or delivered as set forth in the preceding paragraph in one (1) SEALED ENVELOPE/PACKAGE. The envelope/ package shall be clearly marked on the outside to include the bid project name, bid number, name and address of the Bidder.

99. **STATE LICENSING REQUIREMENTS**

All entities defined under Chapters 607, 608, 617 or 620, Florida Statutes, seeking to do business with the City shall be on file and in good standing with the State of Florida's Department of State. Prior to making an offer, the Bidder shall have met the license, certification, and any other requirements of the state, county, city and/or other agency of authority with jurisdiction in such matters and should provide copies of documentation that evidence such qualifications with the response to the solicitation; and, that the Bidder shall provide follow-up evidence that the Bidder maintains such credentials throughout the period of the agreement. A copy of a current certificate of authority from the Secretary of State authorizing the Bidder/responder to do business in the State of Florida, or other evidence of legal authority to do business in the state, county, city and/or any other agency of authority should be provided with your response to the solicitation. Information concerning certification with the Secretary of State may be obtained at https://dos.fl.gov/sunbiz/. Contract documents shall be executed by the entity's duly authorized officer as evidenced by entity records.

100. **SUBCONTRACTING**

The awarded Bidder will not sub-contract or enter into any subcontracting agreements pertaining to this contract, without obtaining written approval from the City of Port Orange.

101. **SUPPLEMENTAL MATERIALS**

Bidders are responsible for including all pertinent product data in the returned bid package. Literature, brochures, data sheets, specification information, completed forms requested as part of the bid package and any other facts which may affect the evaluation and subsequent contract award should be included. Materials such as legal documents and contractual agreements that the Bidder wishes to include as a condition of the bid must also be in the returned bid package. Failure to include all necessary and proper supplemental materials may be cause to reject the entire bid.

102. **TAXES**

The City of Port Orange is exempt from all federal excise, state and local taxes unless otherwise stated in this document. A Tax Exemption Certificate will be furnished upon written request to the City of Port Orange Purchasing Division.

103. **TERM CONTRACTS**

Acceptance by the City of Port Orange of Bidder's offer shall be limited to the terms herein unless expressly agreed in writing by the City. If the contract is intended to cover a specific time-period, the term will be given in the bid specifications.

104. **TERMINATION**

**For Convenience:** The City of Port Orange reserves the right to terminate the contract or any work or delivery required hereunder, from time to time either in whole or part, whenever the City Manager of Port Orange shall determine that such termination is in the best interest of the City. Termination, in whole or in part, shall be effected by delivery of a Notice of Termination signed by the City Manager or his designee, postmarked or delivered to the contractor at least thirty (30) days prior to the date of termination, and specifically setting forth the effective date of termination.

**For Default:** The City may terminate the contract if the contractor breaches any of the terms therein, including, but not limited to, warranties of the contractor or if the contractor becomes insolvent or commits acts of bankruptcy. Such right of termination is in addition to and not in lieu of any other remedies which the City of Port Orange may have in law or equity. Default may be construed as, but is not limited to, failure to deliver the proper goods and/or services within the proper amount of time, and/or to properly perform any and all services required to the City's satisfaction and/or to meet all other obligations and requirements. The City may cancel the contract at any time for breach of contractual obligations by providing the contractor with a written notice of such cancellation. Should the City exercise its right to cancel the contract for such reasons, the cancellation shall become effective on the date as specified in the notice of cancellation sent to the contractor. In the event of default by the contractor, the City reserves the right to procure the item(s) bid from other sources and holds the contractor responsible for excess costs incurred as a result. City Council may elect to refrain from doing business with the contractor as stipulated in City Code 2-276 Suspension and Disbarment.

**For Non-Appropriation of Funds:** If funds are not appropriated for any succeeding fiscal years subsequent to the one in which this contract is entered into, for the purpose of this contract, then the City may terminate this contract upon thirty (30) days prior written notice to the contractor. Should termination be accomplished in accordance with this Section, the City shall be liable only for payments due through the date of termination.

105. **TITLE TRANSFER**

Title and Risk of Loss of goods shall not pass to City of Port Orange until City of Port Orange actually receives and takes possession of the goods at the point or points of delivery. Receiving times may vary with the using department. Generally, deliveries may be made between 8:30 a.m. and 3:00 p.m., Monday through Friday. The contractor is advised to consult the using department for instructions. The place of delivery shall be specified in the bid specification and/or on the purchase order as a "Deliver To:" address.

106. **UNBALANCED BID**

A mathematically unbalanced bid is when a Bidder places a high price on some items and a low price on other items in a unit price contract. A bid is materially unbalanced when there is reasonable doubt that acceptance of a mathematically unbalanced bid will result in the lowest overall cost to the City. Unbalanced bids will be rejected if the prices are deemed materially unbalanced.

107. **USE OF SOLICITATION FORMS**

The Bidder shall complete the appropriate solicitation form(s) included in the solicitation. All blanks on the solicitation forms shall be completed. If a question or confirmation is not applicable, it should be answered with an "N/A." Supplemental information may be attached to the solicitation forms. Failure to fully complete the appropriate solicitation forms may result in disqualification of the response. If additional space for a response is required, attach an additional page to the page on which the question is stated. Clearly identify the number of the question to which the response is attached. Further, if additional solicitation form pages are needed, photocopy or replicate as appropriate, and attach such additional pages to the page on which the question or chart is stated. The signature of the Authorized Person or entity must be that of an officer, partner or a sole proprietor of the entity making the response. The original response, and each copy submitted shall contain an original signature on the *Bidder's Acknowledgement Form* contained in each solicitation.

108. **VARIANCES**

For purposes of response evaluation, Bidders must indicate any variances, no matter how slight, contained in the response. No variations or exceptions by a Bidder will be considered or deemed a part of the response submitted unless such variances or exceptions are listed in the response and referenced in the space provided on the response pages. If variances are not stated, or referenced as required, it will be assumed that the product or service complies with the City's terms, conditions and specifications. By receiving a response, the City does not necessarily accept any variances contained in the response. All variances submitted are subject to review and approval by the City. If any response contains material variances that, in the City's sole opinion, make that response conditional in nature, the City reserves the right to reject the response or part of the response that is declared, by the City, as conditional.

109. **WAIVER OF IRREGULARITIES**

The City of Port Orange reserves the right to waive and/or reject any non-substantial irregularity in responses received whenever such waiver or rejection is in the best interest of the City and/or it does not meet the minimum requirements set forth. All reasonably responsive responses will be considered. However, the City reserves the right to waive formalities or informalities in responses, to reject, with or without cause, any or all responses or portions of responses, or to interview or not interview individual Bidders, and to accept any responses or portions of responses deemed to be in the best interest of the City. The City Council shall grant the City Manager the ability to waive any and all non-substantial irregularities in any and all formal solicitations. (Code 1981, § 8-29; Ord. No. 2015-17, § 1, 5-19-2015)

110. **WARRANTIES**

Bidders shall furnish all data pertinent to warranties or guarantees which may apply to items in the response. Bidders may not limit or exclude any implied warranties. The Bidder warrants that products sold to the City shall conform to the standards established by the U.S. Department of Labor under the Occupational Safety and Health Act of 1970. In the event product does not conform to OSHA Standards, where applicable, City of Port Orange may return the product for correction or replacement at the Bidder's expense. If the Bidder fails to make the appropriate correction within a reasonable time, City of Port Orange may correct at the Bidder's expense.

**[Remainder of this page left intentionally blank]**

# SECTION 6 – SPECIAL REQUIREMENTS/INSTRUCTIONS

**PERIOD OF OFFER VALIDITY:**
Bids offered in this ITB must remain firm for a period of one-hundred-twenty (120) days from the ITB opening date.

**AWARD RECOMMENDATION:**
It is the intent of the City to award a contract to the lowest responsive and responsible Bidder as outlined in Section 5.

**CONTRACT TERM:**
Two Hundred and seventy (270) days from issuance of a Notice to Proceed from the City for substantial completion for the term of the contract.

**ELIGIBILITY OF BIDDER:**
Bidders shall be licensed to do business in the State of Florida and shall be certified General Contractors. Bidders must submit their SunBiz report showing their company registered as "Active" and their valid General Contractor license(s) with the other required documents listed on Bidder Submittal Checklist (Form 7.1). In addition, to be eligible to respond to this ITB, the Bidder must demonstrate proof of prior experience working with the services described in this ITB. Please provide eligibility experience with your submittal by completing Form 7.7 Statement of Bidder's Qualifications in its entirety.

**PROOF OF E-VERIFY REGISTRATION**
Bidders who do not include proof of E-Verify registration with Form 7.12 City of Port Orange Contractor E-Verify Affidavit may be deemed non-responsive. Bidder must include printed pages from the E-Verify website showing company name and E-Verify registration number (My Company Profile). Bidder's failure to include Form 7.12 and proof of registration with their bid submittal may result in rejection of Bidder's submittal.

**LICENSES AND PERMITS**
Contractor is responsible for all applicable local and state licenses, permits and fees. Bidders shall be certified General Contractors.

**PAYMENT & PERFORMANCE BONDS**
If awarded, the Bidder must be able to obtain payment and performance bonds from a surety company licensed in Florida and must submit proof of their present bonding capacity with their bid submittal package in the form of a current (not older than 3 months) letter from Bidder's bonding agent. Bidder's bonding capacity must be equal to or greater than 100% of the total amount bid. Bidders who do not include their present bonding capacity letter in their submittal package may be deemed non-responsive.

Upon award, the successful Bidder will be required to furnish and pay for a Payment and Performance Bond equal to one hundred percent (100%) of the contract amount to be recorded by the City, with the Clerk of the Circuit Court, Volusia County, Florida. After recording, the City will furnish to the awarded Bidder the recording information for the bond to evidence that the Bidder has met the requirement of Florida law. The City will bill the cost of recording to the awarded Bidder.

**BID BONDS:**
The Bidder must submit with their bid package a certified check or bank draft, payable to the City of Port Orange, FL or a satisfactory bid bond executed by the Bidder and an acceptable surety in the amount equal to (5%) of the total amount of the bid. If submitting a bid bond in lieu of a certified check or bank draft, the original bid bond must be included with bid submittal. If submitting a bid bond in lieu of a certified check or bank draft, Bidders who do not include their original bid bond with their submittal may be deemed non-responsive.

**NOTICE:**
The City reserves the right to consider cooperative contracts, federal, state municipal etc., in the evaluation process. If in the City's best interest, the City may utilize a cooperative contract in lieu of making an award.

**SAFETY:**

The awarded Bidder will comply with all applicable OSHA, State of Florida Safety Regulations and comply with all construction safety requirements of local authorities having jurisdiction. The awarded Bidder shall exercise all due caution to exclude the public from the work area and especially from contact with any hazardous materials.

**REPAIR OF DAMAGES:**

It is the responsibility of the awarded Bidder to repair any damages incurred in the area directly related to the services being provided as described herein. When damages occur, the City of Port Orange Representative is to be notified immediately (within an hour of the occurrence) and shall inspect the repairs upon completion.

## FORM 7.2 – BIDDER'S ACKNOWLEDGEMENT

I have carefully examined the Invitation to Bid (ITB), Instructions to Bidders, General and/or Special Conditions, Specifications and any other documents accompanying or made a part of this invitation.

I hereby propose to furnish the goods or services specified in the ITB at the prices or rates as finally negotiated. I agree that my bid will remain firm for a period of up to one-hundred-twenty (120) days in order to allow the City of Port Orange adequate time to evaluate the proposed bid. Furthermore, I agree to abide by all conditions of the ITB.

I certify that all information contained in the bid is truthful to the best of my knowledge and belief. I further certify that I am duly authorized to submit this bid on behalf of the Bidder/Contractor as its act and deed and that the Bidder/Contractor is ready, willing and able to perform if awarded the contract.

I further certify that this bid is made without prior understanding, contract, connection, discussion or collusion with any person, firm or corporation submitting a bid for the same product or service; no officer, employee or agent of the City of Port orange City Council or of any other Bidder interested in said ITB; and that the undersigned executed this Bidder's Acknowledgement with full knowledge and understanding of the matters therein contained and was duly authorized to do so.

I further certify that having read and examined the specifications and documents for the designated services and understanding the general conditions for the contract under which services will be performed, does hereby propose to furnish all labor, equipment and material to provide the services set forth in the ITB.

I hereby declare that the following listing states any clarifications, any and all variations from and exceptions to the requirements of the specifications and documents. The undersigned further declares that the "work" will be performed in strict accordance with such requirements and understands that any exceptions to the requirements of the specifications and documents may render the bid non-responsive.

**NO EXCEPTIONS ALLOWED AFTER THE BID IS SUBMITTED:**

## FORM 7.4 – DRUG-FREE PREFERENCE STATEMENT

IDENTICAL TIE BIDS – Preference shall be given to businesses with drug-free workplace programs. Whenever two or more bids, proposals, statements or replies are equal with respect to price, quality and service are received by the City for procurement of commodities or contractual services, a bid received from a business that certifies that it has implemented a drug-free workplace program shall be given preference in the award process. Established procedures for processing tie bids will be followed if none of the tied Bidders have a drug-free workplace program.

In order to have a drug-free workplace program, a business shall:

1. Publish a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession or use of a controlled substance is prohibited in the workplace and specifying the actions that will be taken against employees for violations of such prohibition.

2. Inform employees about the dangers of drug abuse in the workplace, the business's policy of maintaining a drug-free workplace, any available drug counseling, rehabilitation and employee assistance programs and the penalties that may be imposed upon employees for drug abuse violations.

3. Give each employee engaged in providing the commodities or contractual services that are under a bid a copy of the statement specified in subsection (1).

4. In the statement specified in subsection (1), notify the employees that, as a condition of working on the commodities or contractual services that are under the bid, the employee will abide by the terms of the statement and will notify the employer of any conviction of, or plea of guilty or nolo contendere to, any violation of chapter 893 or of any controlled substance the law of the United States or any state, for a violation occurring in the workplace no later than five (5) days after such conviction.

5. Impose a sanction on or require the satisfactory participation in a drug abuse assistance or rehabilitation program if such is available in the employee's community, by an employee who is so convicted.

6. Make a good faith effort to continue to maintain a drug-free workplace through implementation of Section 287.087, Florida Statutes.

As an authorized representative of the firm, I certify that this firm complies fully with the above requirements.

## FORM 7.5 – SWORN STATEMENT ON PUBLIC ENTITY CRIMES

**UNDER SECTION 287.133(3)(A), FLORIDA STATUTES**

(To be signed in the presence of a notary public or other authorized to administer oaths.)

Before me, the undersigned Authority, personally appeared affiant_____, who, being by me first duly sworn, made the following statement:

1. The business address of _____(name of Offeror or business) is

   _____.

2. My relationship to _____(name of Offeror or business) is _____

   _____(relationship such as sole proprietor, partner, president, vice president.)
3. I understand that a public entity crime as defined in Section 287.133 of the Florida Statutes includes a violation of any state or federal law by a person with respect to and directly related to the transaction of business with any public entity in Florida or with an agency or political subdivision of any other state or with the United States, including, but not limited to, any proposal or contract for goods or services to be provided to any public entity or such and agency or political subdivision and involving antitrust, fraud, theft, bribery, collusion, racketeering, conspiracy or material misrepresentation.
4. I understand that "convicted" or "conviction" is defined by the Florida Statutes to mean a finding of guilt or a conviction of a public entity crime, with or without an adjudication of guilt, in any federal or state trial court of record relating to charges brought by indictment or information after July 1, 1989, as a result of a jury verdict, non-jury trial, or entry of a plea of guilt or nolo contendere.
5. I understand that "affiliate" is defined by the Florida Statutes to mean (1) a predecessor or successor of a person or a corporation convicted of a public entity crime, or (2) an entity under the control of any natural person who is active in the management of the entity and who has been convicted of a public entity crime, or (3) those officers, directors, executives, partners, shareholders, employees, members, and agents who are active in the management of an affiliate, or (4) a person or corporation who knowingly entered into a joint venture with a person who has been convicted of a public entity crime in Florida during the preceding 36 months.
6. Neither the Offeror or contractor, nor any officer, director, executive, partner, shareholder, employee, member or agent who is active in the management of the Offeror or contractor, nor any affiliate of the Offeror or contractor has been convicted of a public entity crime subsequent to July 1, 1989. **(Draw a line through paragraph 6 if paragraph 7 below applies.)**
7. There has been a conviction of a public entity crime by the Offeror or contractor, or an officer, director, executive, partner, shareholder, employee, member or agent of the Offeror or contractor who is active in the management of the Offeror or contractor or an affiliate of the Offeror or contractor. A determination has been made pursuant to Section 287.133(3) by order of the Division of Administrative Hearings that it is not in the public interest for the name of the convicted person or affiliate to appear on the convicted Bidder list. The name of the convicted person or affiliate is: _____. A copy of the order of the Division Administrative Hearing is attached. **(Draw a line through paragraph 7 if paragraph 6 above applies)**

**FORM 7.10 SCRUTINIZED COMPANIES CERTIFICATION**

***(To be signed in the presence of a notary public or other officer authorized to administer oaths.)***

**SCRUTINIZED COMPANIES CERTIFICATION PURSUANT TO SECTION 287.135, FLORIDA STATUTES**

I, _____, on behalf
(Print Name and Title)

of_____ ("Company"), certify that _____
(Company Name) (Company Name)

does not:
1. Participate in a boycott of Israel; and
2. Is not on the Scrutinized Companies with Boycott Israel List; and
3. Is not on the Scrutinized Companies with Activities in Sudan List; and
4. Is not on the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List; and
5. Has not engaged in business operations in Syria.

Submitting a false certification shall be deemed a material breach of contract. The City of Port Orange shall provide notice, in writing, to the Company of the City's determination concerning the false certification. The Company shall have ninety (90) days following receipt of the notice to respond in writing and demonstrate that the determination of false certification was made in error. If the Company does not demonstrate that the City's determination of false certification was made in error, then the City shall have the right to terminate the contract and seek civil remedies pursuant to Florida Statute § 287.135.

Section 287.135, Florida Statutes prohibits the City from: 1) Contracting with companies for goods or services in any amount if at the time of bidding on, submitting a proposal for, or entering into or renewing a contract if the company is on the Scrutinized Companies that Boycott Israel List, created pursuant to Section 215.4725, F.S. or is engaged in a boycott of Israel; and 2) Contracting with companies for goods or services over $1,000,000.00 that are on either the Scrutinized Companies with activities in the Iran Petroleum Energy Sector List, created pursuant to s. 215.473, or are engaged in business operations in Syria.

As the person authorized to sign on behalf of the Company, I hereby certify that the company identified above in the section entitled "Company Name" does not participate in any boycott of Israel, is not listed on the Scrutinized Companies that Boycott Israel List, is not listed on either the Scrutinized Companies with activities in the Iran Petroleum Energy Sector List and is not engaged in business operations in Syria. I understand that pursuant to Section 287.135, Florida Statutes, the submission of a false certification may subject the company to civil penalties, attorney's fees, and/or costs. I further understand that any contract with the City for goods or services may be terminated at the option of the City if the company is found to have submitted a false certification or has been placed on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List.

# FORM 7.11 – LOCAL BUSINESS AFFIDAVIT OF ELIGIBILITY

City of Port Orange

*This declaration is executed under penalty of perjury of the laws to the United States and the State of Florida*

**THIS AFFIDAVIT IS SUBMITTED IN REFERENCE TO THE FOLLOWING SOLICITATION:**

Project# *(as applicable)*: _____

Business Name: _____ Contact Person/Title: _____

Mailing Address: _____ City,State,Zip: _____

Phone Number: _____ Email address: _____

Physical Presence of Business: ☐Headquarters ☐Principal Place of Business

Within Legal Boundaries: ☐City of Port Orange ☐Volusia County ☐State of Florida

FEIN (Federal Employer Identification Number): _____

Business Structure: ☐Corporation ☐LLC ☐Partnership ☐Sole Proprietorship ☐Other (Specify): _____

****PLEASE ATTACH A VALID BUSINESS TAX RECEIPT OR OTHER SUCH DOCUMENTATION****

ATTESTATION – I understand that:
A local supplier or contractor is interpreted as a respondent to a solicitation, which as of the date of the solicitation opening, has a valid Business Tax Receipt (BTR) issued by the City of Port Orange to do business in the City of Port Orange which authorizes the supplier or contractor to provide the goods, services, or construction to be purchased and has a physical address located within the limits of Port Orange from which the supplier or contractor operates or performs business. A Post Office Box cannot be used to establish physical address. This local preference is only used as part of a tie breaker during a formal solicitation. The City uses Sunbiz to verify a supplier or contractor's business address. Sunbiz is a database on the Florida Department of State, Division of Corporations website and can be accessed using this link: https://dos.myflorida.com/sunbiz/.

*Exemptions from Local Preference*
Local preference is not permitted when (1) the purchase is funded, in whole or in part, by an entity prohibiting application of the preferences by grant agreement, contract or applicable federal, state or local law; or (2) emergency purchasing.

As an authorized representative of the Firm, I certify that this Firm complies fully with the above requirements.

## APPENDIX A, 44 C.F.R. PART 18 – CERTIFICATION REGARDING LOBBYING Certification for Contracts, Grants, Loans, and Cooperative Agreements

***(Required for each bid or offer exceeding $100,000)***

The undersigned certifies, to the best of his or her knowledge and belief, that:

1. No federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of an agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any federal contract, the making of any federal grant, the making of any federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any federal contract, grant, loan, or cooperative agreement.

2. If any funds other than federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.

3. The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.

4. This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, Title 31, U.S.C. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

The Contractor, _____, certifies or affirms the truthfulness and accuracy of each statement of its certification and disclosure, if any. In addition, the Contractor understands and agrees that the provisions of 31 U.S.C. Chap. 38, Administrative Remedies for False Claims and Statements, apply to this certification and disclosure, if any.

**BID BOND**

**BID BOND**

Bond No.:

KNOW ALL MEN BY THESE PRESENTS that _____, as Contractor, duly authorized to conduct business in the State of Florida, whose principal place of business is located at_____ , Tel.:_____, (hereinafter called "PRINCIPAL"), and_____, as SURETY, duly authorized to conduct business in the State of Florida, whose principal place of business is located at _____ _____, Tel:_____(hereinafter called "SURETY"), are held and firmly bound unto the City of Port Orange, Florida, as CITY, a Florida municipal corporation, whose address is City of Port Orange, 1000 City Center Circle, Port Orange, Florida 32129, Tel: (386) 506-5501, (hereinafter called "OBLIGEE" or CITY", in the penal sum of_____dollars and (_____)/100 ($_____), lawful money of the United States, for the payment of which sum shall and truly be made, whereof PRINCIPAL and SURETY bind themselves, their heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presents.

THE CONDITION OF THIS OBLIGATION IS SUCH that, whereas the Principal has submitted the accompanying bid, dated_____, 20_____ , for:

**Project Name/Bid No.:**

**Project Address:**

**Legal Description:** See Attached

**Description of Work:**

NOW, THEREFORE,

A. If the Principal shall not withdraw said bid withing one hundred twenty (120) days after date of opening of the same, and shall within ten (10) days after the prescribed forms are presented to it for signature, enter into a written contract with the City in accordance with the bid as accepted, and give bonds with good and sufficient surety or sureties, as may be required, for the faithful performance and proper fulfillment of such contract, then the above obligations shall be void and of no effect, otherwise to remain in full force and virtue.

B. In the event of the withdrawal of said bid within the period specified, or the failure to enter into such contract and give such bonds withing the time specified, if the principal shall pay the City the difference between the amount specified in said bid and the amount for which the City may procure the required work and supplies. If the latter amount be in excess of the former, then the above obligations then the above obligations shall be void and of no effect, otherwise to remain in full force and virtue.

IN WITNESS WHEREOF, the above parties have executed this instrument under their several seals, this _____day of_____, 20____, the name and corporate seal of each corporate party being hereto affixed and these presents duly signed by its undersigned representative, pursuant to authority of its governing body.

*Note: If the firm is a sole ownership or partnership including limited liability company, two (2) witnesses are required to attest the signature. If the firm is a corporation, then the corporate secretary shall attest and affix the corporate seal (Attach power of attorney to the original bid bond and financial statement of Surety Company).*

# HUMAN TRAFFICKING AFFIDAVIT
# (SECTION 787.06, FLORIDA STATUTES)

STATE OF FLORIDA §
§
COUNTY OF VOLUSIA §

The undersigned ("Affiant"), on behalf of the entity listed below ("Entity"), after being duly sworn, hereby attests as follows:

1. My name is _____. I am over the age of Twenty-one years old. I am the _____ of _____, a non- governmental entity which does business in the State of Florida, hereinafter called the "Entity."
   **(Title)** **(Business Name)**
2. I have personal knowledge of each and every statement of fact contained herein, and each and every statement of fact is true and correct.
3. Entity does not use coercion, as defined in Section 787.06, Florida Statutes, for labor or services.
4. The undersigned is an officer or representative of the entity and is authorized to execute this affidavit on behalf of the Entity.
5. Under penalties of perjury, I declare that I have read the foregoing Human Trafficking Affidavit and that the facts stated herein are true.

Further Affiant sayeth not.

**Reference:** **Recovery Analysis**
City Center Sports Complex Expansion
Port Orange, Volusia County, Florida
UES Project No. A25147.01095.000
UES Report No. 2154739-RA

Dear Mr. Ogle:

UES Professional Solutions (UES) has completed the recovery evaluation for the proposed stormwater management areas. Attached are the results of the recovery analyses for the proposed retention areas.

## PROJECT DESCRIPTION

We understand the proposed project will consist of constructing three (3) retention ponds for the proposed project in Port Orange, Florida. We have been provided with the geometry, required Pollution Abatement Volume (PAV) to be recovered in 72 hours, and stage-storage data by Zev Cohen & Associates, Inc. UES previously submitted a geotechnical report for this project (UES Report No. 2154739, dated October 6, 2025).

## MODEL AND INPUT PARAMETERS

As requested, UES performed three (3) recovery analyses for the subject retention ponds. The recovery analyses were performed with the computer program "PONDS" which utilizes the "MODFLOW" code. The "MODFLOW" program is the Modular Three-Dimensional Finite Difference Groundwater Flow Model written by Michael G. McDonald and Arlen W. Harbaugh (1984). The program model can be used to simulate actual loading conditions and predict input parameters and the groundwater mound utilized for this study.

## RECOVERY ANALYSIS RESULTS AND RECOMMENDATIONS

### Soil Design Parameters

The recovery analyses were performed to determine the parameters required for the provided PAVs to recover within 72 hours. The soils design parameters are based on the results of soil borings performed for UES Report No. 2154739 and are provided in Table 1. The Subsurface Profiles for each boring are also included in Appendix A.

**TABLE 1 – Soil Design Parameters from Each Boring**

| Retention System | Relevant Borings | Estimated Ground Surface Elevation (Feet, Elevation) | Fillable Porosity (percent) | Base of Aquifer (Feet, Elevation) | Seasonal High Groundwater Level (Feet, Elevation) |
|---|---|---|---|---|---|
| RA-1 | P-2 | 25.5 | 25 | 18.5* | 22.9 |
| RA-2 | P-5 | 23.0 | 25 | 3.0 | 21.1 |
| RA-3 | P-4 | 23.5 | 25 | 16.5* | 20.2 |
| | P-6 | 23.5 | 25 | 3.5 | 20.3 |

*Base of Aquifer is located above confining layer (SP-SM, HARDPAN) or poor draining soil (SM)

The design parameters used in each analysis are provided in Table 2. Additionally, the calculations used to determine the vertical and horizontal permeability rates are included in Appendix A

**TABLE 2 – Soil Design Parameters Used for Each Recovery Analysis**

| Retention System | Average Fillable Porosity (percent) | Average Base of Aquifer (Feet, Elevation) | Average Seasonal High Groundwater Level (Feet, Elevation) | Vertical Permeability (feet/day)* | Horizontal Permeability (feet/day)* |
|---|---|---|---|---|---|
| RA-1 | 25 | 18.5 | 22.9 | 6.25 | 12.64 |
| RA-2 | 25 | 3.0 | 21.1 | 5.12 | 3.75 |
| RA-3 | 25 | 10.0 | 20.25 | 5.63 | 6.09 |

* A factor of safety of 2 was applied

Results of Recovery Analyses

The results of the analysis indicate that the stormwater areas will recover each of their respective PAV within the allotted time and are outlined in Table 3.

**TABLE 3 – Recovery Analysis Results**

| Retention System | Required Recovery Time (Days/Hours) | Proposed Pond Bottom (Feet, Elevation) | Total Treatment Volume (Cubic Feet) | Approximate Recovery Time (Days/Hours) | Pond Stage at 72 Hours (Feet, Elevation) |
|---|---|---|---|---|---|
| RA-1 | 3 Days / 72 Hours | 23.75 | 3,485 | 1.5 Days / 36 Hours | 23.40 |
| RA-2 | 3 Days / 72 Hours | 23.0 | 14,201 | 1.0 Day / 24 Hours | 22.24 |
| RA-3 | 3 Days / 72 Hours | 22.0 | 14,288 | 0.25 Day / 6 Hours | 20.70 |

We recommend that any fill material placed within the limits of the proposed stormwater areas contain 5% fines or less passing the No. 200 sieve and have a minimum vertical permeability of 7.0 ft/day. In addition, we also recommend that UES inspect the pond bottoms and underlying soils subsequent to the construction of the systems.

## CLOSURE

We appreciate the opportunity to have worked with you on this project and look forward to a continued association. Please do not hesitate to contact us if you should have any questions, or if we may further assist you as your plans proceed.

Respectfully Submitted,
**UES Professional Solutions, LLC**

## Project Data

| | |
|---|---|
| Project Name: | City Center Sports Complex Expansion |
| Simulation Description: | Retention Area RA-2<br>72 Hour Recovery |
| Project Number: | |
| Engineer : | MAM |
| Supervising Engineer: | |
| Date: | 01-19-2026 |

## Aquifer Data

| | |
|---|---|
| Base Of Aquifer Elevation, [B] (ft datum): | 3.00 |
| Water Table Elevation, [WT] (ft datum): | 21.10 |
| Horizontal Saturated Hydraulic Conductivity, [Kh] (ft/day): | 5.12 |
| Fillable Porosity, [n] (%): | 25.00 |
| Unsaturated Vertical Infiltration Rate, [Iv] (ft/day): | 3.75 |
| Maximum Area For Unsaturated Infiltration, [Av] ($ft^2$): | 16617.7 |

## Geometry Data

| | |
|---|---|
| Equivalent Pond Length, [L] (ft): | 248.1 |
| Equivalent Pond Width, [W] (ft): | 62.9 |

Ground water mound is expected to intersect the pond bottom

## Stage vs Area Data

| Stage (ft datum) | Area ($ft^2$) |
|---|---|
| 23.00 | 14390.0 |
| 24.00 | 16838.0 |
| 25.00 | 19385.0 |

## Ditch Data

Ditch (or interceptor trench) parallel to length axis is inactive

Ditch (or interceptor trench) parallel to width axis is inactive

## Discharge Structures

**Discharge Structure #1 is inactive**

## Discharge Structures (cont'd.)

**Discharge Structure #2 is inactive**

**Discharge Structure #3 is inactive**

## Scenario Input Data

*Scenario 1 :: 14201 ft³ slug load*

Hydrograph Type: Slug Load
Modflow Routing: Routed with infiltration

Treatment Volume (ft³) 14201

Initial ground water level (ft datum) 21.10 (default)

### Infiltration - Cumulative Volume - Maximum Negative

| Rank | Scenario Number | Maximum Negative Cumulative Infiltration Volume (ft³) | Time (hours) | Description |
|---|---|---|---|---|
| 1 | 1 | None | N.A. | 14288 ft³ slug load |

### Infiltration - Cumulative Volume - End of Simulation

| Rank | Scenario Number | Cumulative Infiltration Volume End Of Simulation (ft³) | Time (hours) | Description |
|---|---|---|---|---|
| 1 | 1 | 14288.0 | 480.000 | 14288 ft³ slug load |

## Sort-By-Category Report (cont'd.)

### Discharge - Rate - Maximum Positive

| Rank | Scenario Number | Maximum Positive Discharge Rate ($ft^3/s$) | Time (hours) | Description |
|---|---|---|---|---|
| 1 | 1 | None | N.A. | 14288 $ft^3$ slug load |

### Discharge - Rate - Maximum Negative

| Rank | Scenario Number | Maximum Negative Discharge Rate ($ft^3/s$) | Time (hours) | Description |
|---|---|---|---|---|
| 1 | 1 | None | N.A. | 14288 $ft^3$ slug load |

### Discharge - Cumulative Volume - Maximum Positive

| Rank | Scenario Number | Maximum Positive Cumulative Discharge Volume ($ft^3$) | Time (hours) | Description |
|---|---|---|---|---|
| 1 | 1 | None | N.A. | 14288 $ft^3$ slug load |

### Discharge - Cumulative Volume - Maximum Negative

| Rank | Scenario Number | Maximum Negative Cumulative Discharge Volume ($ft^3$) | Time (hours) | Description |
|---|---|---|---|---|
| 1 | 1 | None | N.A. | 14288 $ft^3$ slug load |

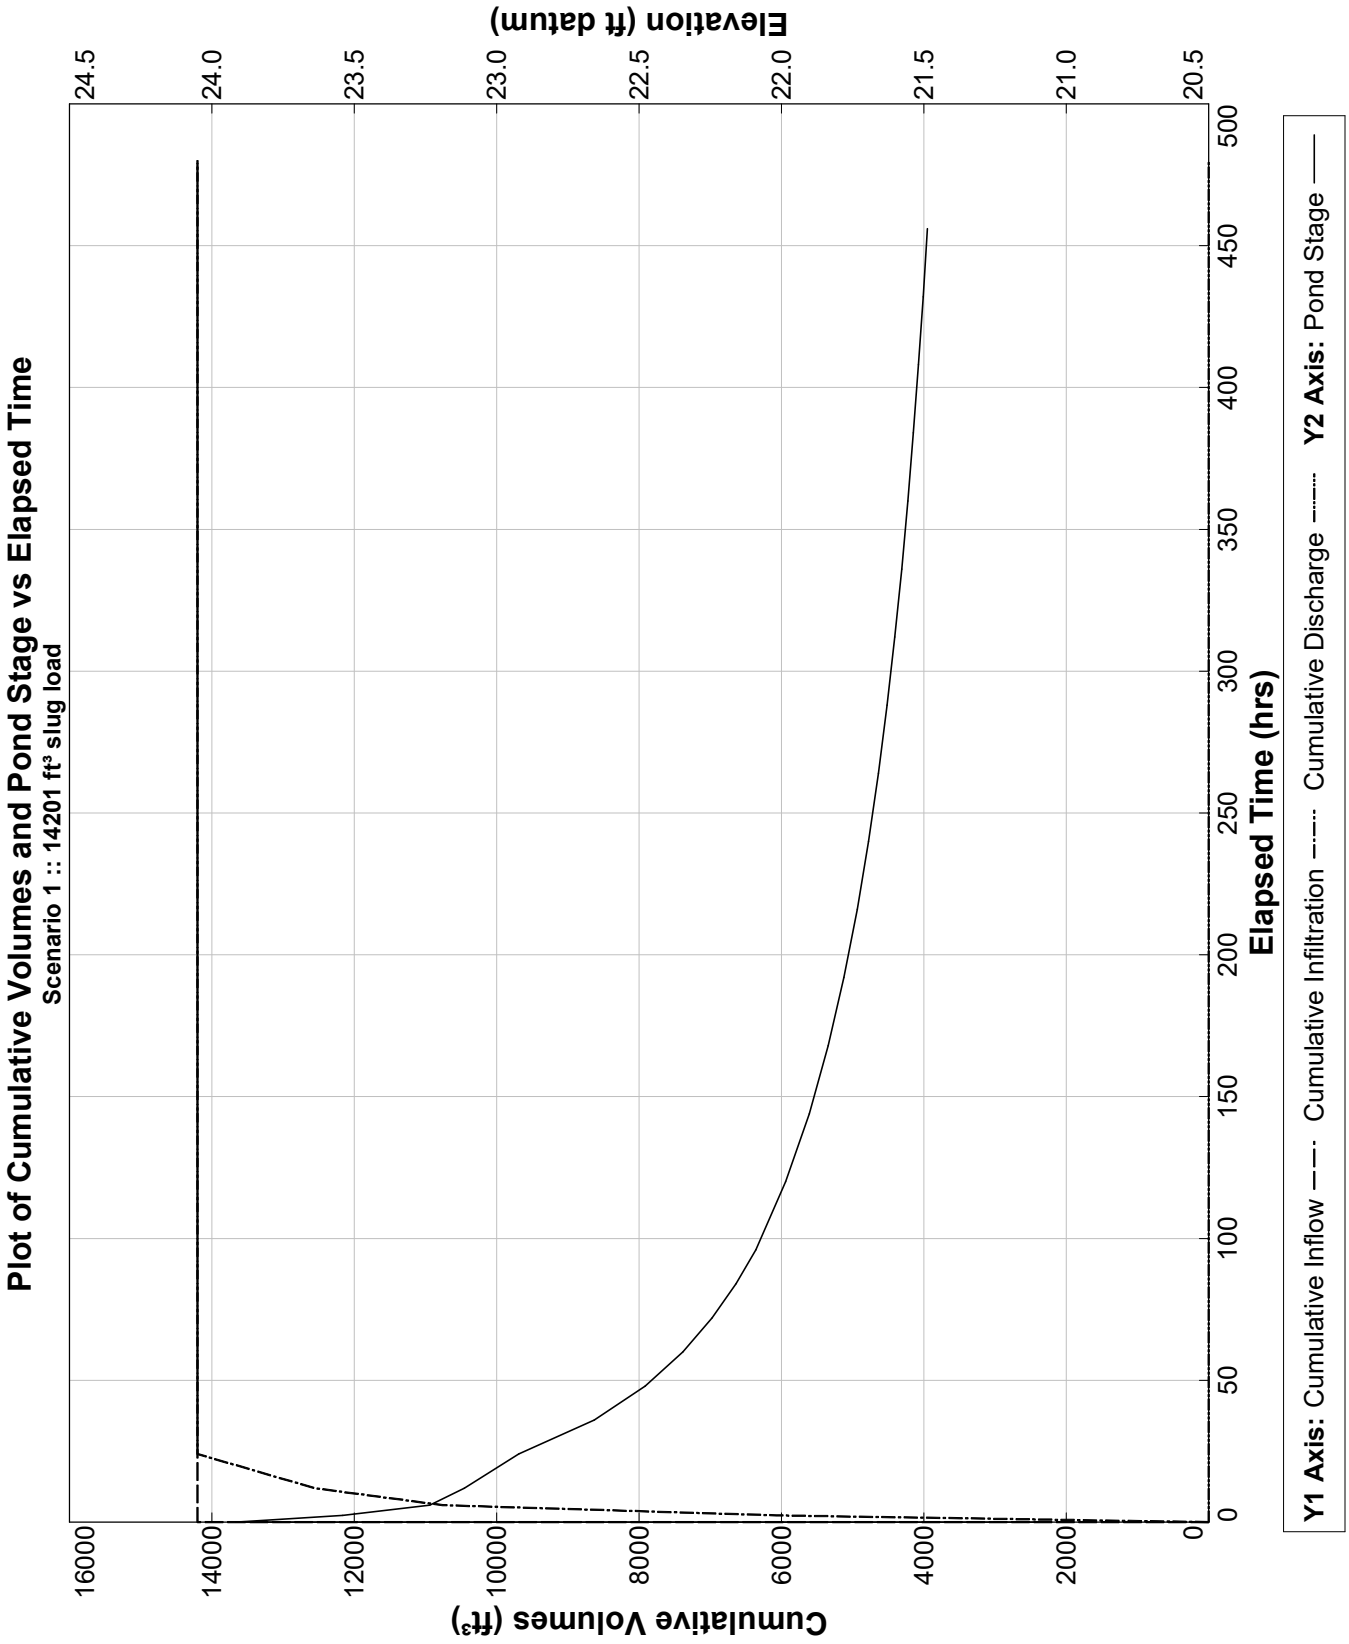
### Discharge - Cumulative Volume - End of Simulation



| Rank | Scenario Number | Cumulative Discharge Volume End Of Simulation ($ft^3$) | Time (hours) | Description |
|---|---|---|---|---|
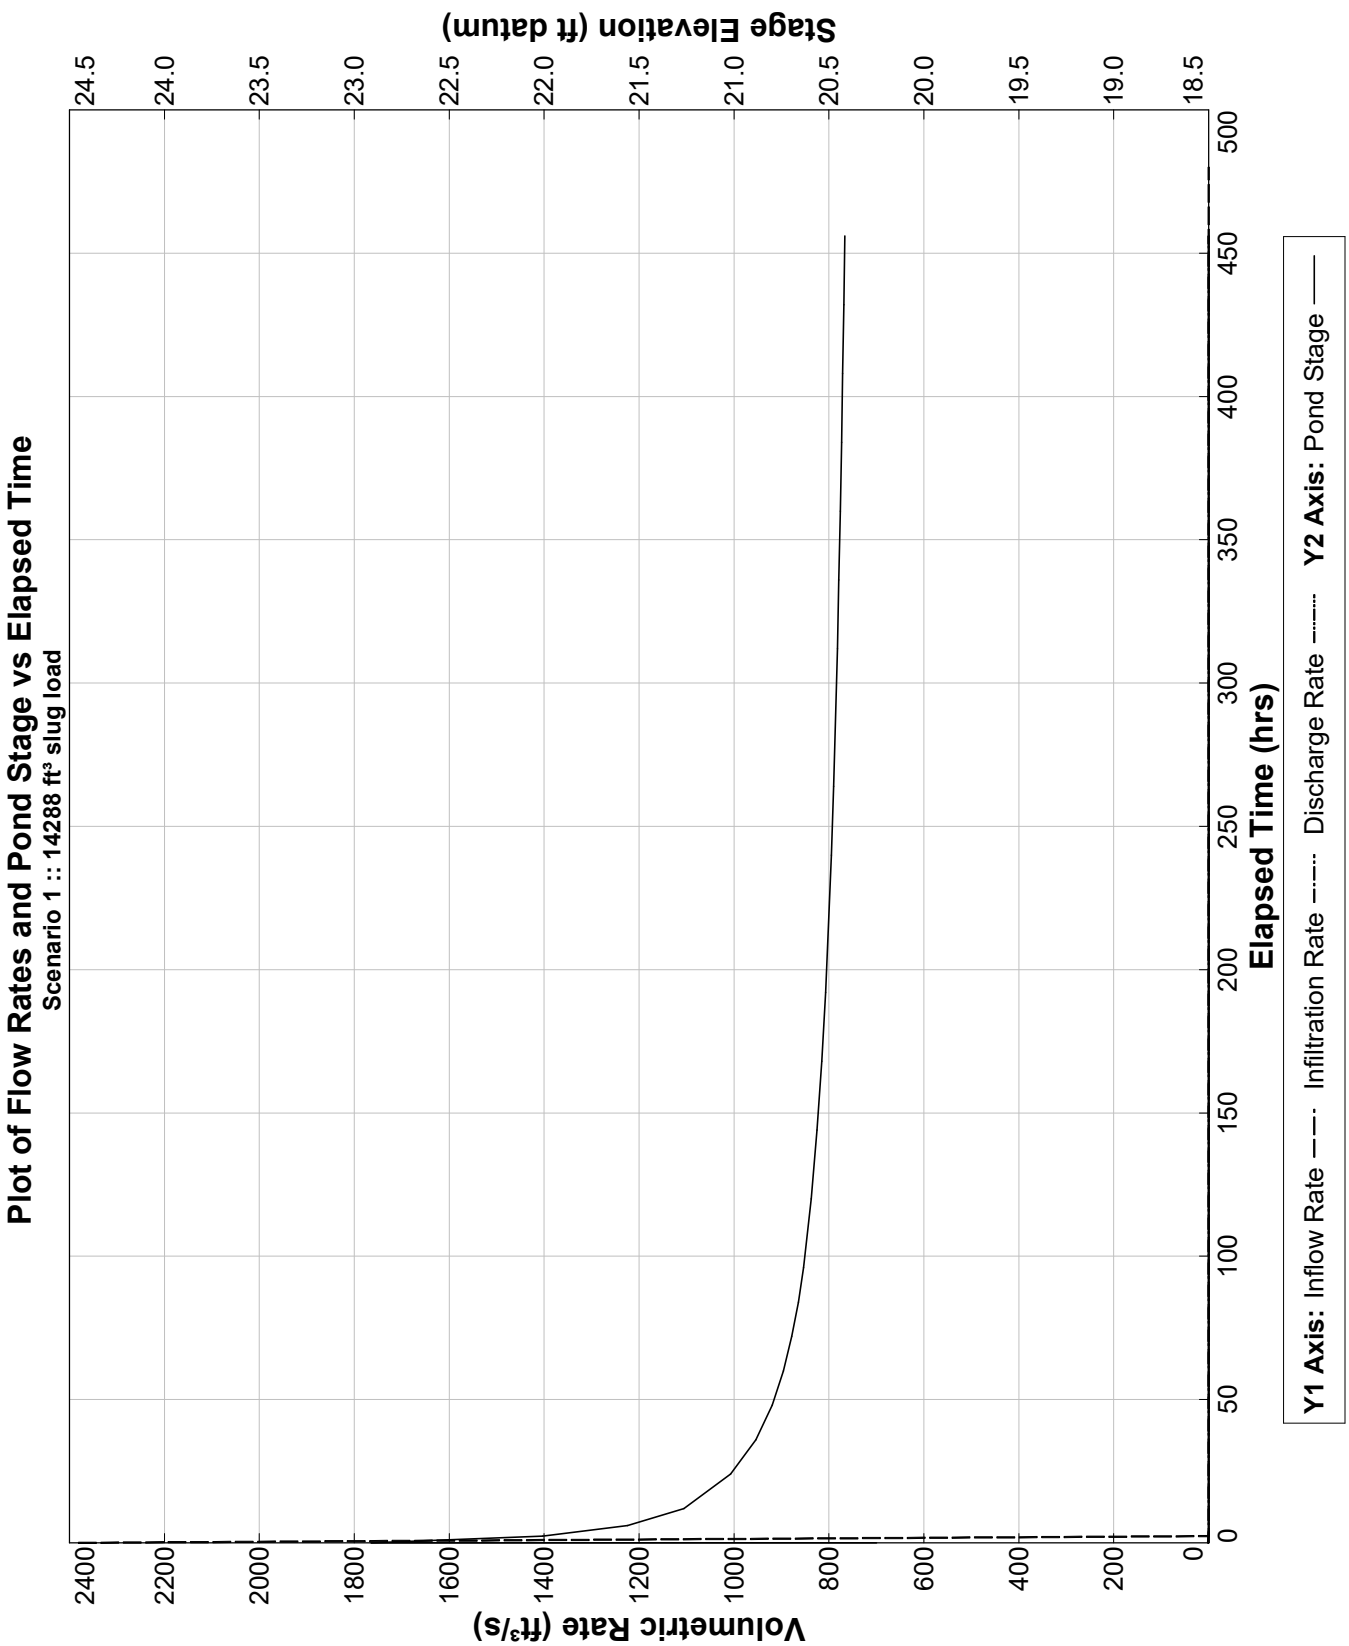
| 1 | 1 | 0.0 | 480.000 | 14288 $ft^3$ slug load |



## Detailed Results *:: Scenario 1 :: 14288 ft³ slug load*

| Elapsed Time (hours) | Instantaneous Inflow Rate (ft³/s) | Outside Recharge (ft/day) | Stage Elevation (ft datum) | Infiltration Rate (ft³/s) | Combined Instantaneous Discharge Rate (ft³/s) | Cumulative Inflow Volume (ft³) | Cumulative Infiltration Volume (ft³) | Combined Cumulative Discharge (ft³) | Flow Type |

# PERMEABILITY CALCULATIONS - 72 Hour

**Retention Area:** RA-1
**Boring:** P2
**Ground Surface Elevation at Boring (ft):** 25.5
**Seasonal High Water Table (SHWT) Elevation (ft):** 22.9
**Base of Aquifer Elevation (ft):** 18.5
**Pond Bottom Elevation (ft):** 23.75
**Max Stage of Groundwater Mound (GM) Elevation (ft):** 24.30

## Vertical Permeability

Distance Between Pond Bottom and Ground Surface (ft): -1.75
Distance between Pond Bottom and SHWT (ft): 0.85 → Thickness of Soil Profile
No. of Soil Layers Between Pond Bottom and SHWT: 1

| Soil Layer | Thickness of Soil Layer (ft) | Is Vertical Perm. of soil layer Estimated or Measured? | Vertical Perm. Rate of Soil Layer (ft/day) |
|---|---|---|---|
| Layer 1 | 0.85 | Measured | 12.5 |
| Layer 2 | | | |
| Layer 3 | | | |
| Layer 4 | | | |
| Layer 5 | | | |
| Layer 6 | | | |
| Layer 7 | | | |
| Layer 8 | | | |

Weighted Vertical Permeability (ft/day): 12.50
Vertical Permeability with a Safety Factor of 2.0 (ft/day): 6.25

## Horizontal Permeability

Distance Between Avg. GM and Pond Bottom (ft): 0.28
Distance between Pond Bottom and Ground Surface (ft): -1.75
Distance between Avg. GM and Base of Aquifer (ft): 5.53 → Thickness of Soil Profile
No. of Soil Layers Between Avg. GM and Base of Aquifer: 2

| Soil Layer | Thickness of Soil Layer (ft) | Horizontal Perm. Coefficient** | Is Vertical Perm. Estimated or Measured? | Vertical Perm Rate (ft/day) |
|---|---|---|---|---|
| Layer 1 | 4.03 | 2.0 | Measured | 12.5 |
| Layer 2 | 1.50 | 2.0 | Measured | 13.0 |
| Layer 3 | | | | |
| Layer 4 | | | | |
| Layer 5 | | | | |
| Layer 6 | | | | |
| Layer 7 | | | | |
| Layer 8 | | | | |

** 2.0 for SP soil type, 1.5 for SP-SM soil type, and 1.0 for other soil types. These values are multiplied by the vertical perm. rate for each soil layer

Weighted Horizontal Permeability (ft/day): 25.27
Horizontal Permeability with a Safety Factor of 2.0 (ft/day): 12.64

# Important Information about This

# Geotechnical-Engineering Report

**Subsurface problems are a principal cause of construction delays, cost overruns, claims, and disputes.**

**While you cannot eliminate all such risks, you can manage them. The following information is provided to help.**

## Geotechnical Services Are Performed for Specific Purposes, Persons, and Projects

Geotechnical engineers structure their services to meet the specific needs of their clients. A geotechnical-engineering study conducted for a civil engineer may not fulfill the needs of a constructor — a construction contractor — or even another civil engineer. Because each geotechnical- engineering study is unique, each geotechnical-engineering report is unique, prepared *solely* for the client. No one except you should rely on this geotechnical-engineering report without first conferring with the geotechnical engineer who prepared it. *And no one — not even you* — should apply this report for any purpose or project except the one originally contemplated.

## Read the Full Report

Serious problems have occurred because those relying on a geotechnical-engineering report did not read it all. Do not rely on an executive summary. Do not read selected elements only.

## Geotechnical Engineers Base Each Report on a Unique Set of Project-Specific Factors

Geotechnical engineers consider many unique, project-specific factors when establishing the scope of a study. Typical factors include: the client's goals, objectives, and risk-management preferences; the general nature of the structure involved, its size, and configuration; the location of the structure on the site; and other planned or existing site improvements, such as access roads, parking lots, and underground utilities. Unless the geotechnical engineer who conducted the study specifically indicates otherwise, do not rely on a geotechnical-engineering report that was:

- not prepared for you;
- not prepared for your project;
- not prepared for the specific site explored; or
- completed before important project changes were made.

Typical changes that can erode the reliability of an existing geotechnical-engineering report include those that affect:

- the function of the proposed structure, as when it's changed from a parking garage to an office building, or from a light-industrial plant to a refrigerated warehouse;
- the elevation, configuration, location, orientation, or weight of the proposed structure;
- the composition of the design team; or
- project ownership.

As a general rule, *always* inform your geotechnical engineer of project changes—even minor ones—and request an assessment of their impact. *Geotechnical engineers cannot accept responsibility or liability for problems that occur because their reports do not consider developments of which they were not informed.*

## Subsurface Conditions Can Change

A geotechnical-engineering report is based on conditions that existed at the time the geotechnical engineer performed the study. *Do not rely on a geotechnical-engineering report whose adequacy may have been affected by*: the passage of time; man-made events, such as construction on or adjacent to the site; or natural events, such as floods, droughts, earthquakes, or groundwater fluctuations. *Contact the geotechnical engineer before applying this report to determine if it is still reliable.* A minor amount of additional testing or analysis could prevent major problems.

## Most Geotechnical Findings Are Professional Opinions

Site exploration identifies subsurface conditions only at those points where subsurface tests are conducted or samples are taken. Geotechnical engineers review field and laboratory data and then apply their professional judgment to render an opinion about subsurface conditions throughout the site. Actual subsurface conditions may differ — sometimes significantly — from those indicated in your report. Retaining the geotechnical engineer who developed your report to provide geotechnical-construction observation is the most effective method of managing the risks associated with unanticipated conditions.

## A Report's Recommendations Are Not Final

Do not overrely on the confirmation-dependent recommendations included in your report. *Confirmation-dependent recommendations are not final,* because geotechnical engineers develop them principally from judgment and opinion. Geotechnical engineers can finalize their recommendations *only* by observing actual subsurface conditions revealed during construction. *The geotechnical engineer who developed your report cannot assume responsibility or liability for the report's confirmation-dependent recommendations if that engineer does not perform the geotechnical-construction observation required to confirm the recommendations' applicability.*

## A Geotechnical-Engineering Report Is Subject to Misinterpretation

Other design-team members' misinterpretation of geotechnical-engineering reports has resulted in costly

problems. Confront that risk by having your geotechnical engineer confer with appropriate members of the design team after submitting the report. Also retain your geotechnical engineer to review pertinent elements of the design team's plans and specifications. Constructors can also misinterpret a geotechnical-engineering report. Confront that risk by having your geotechnical engineer participate in prebid and preconstruction conferences, and by providing geotechnical construction observation.

## Do Not Redraw the Engineer's Logs

Geotechnical engineers prepare final boring and testing logs based upon their interpretation of field logs and laboratory data. To prevent errors or omissions, the logs included in a geotechnical-engineering report should *never* be redrawn for inclusion in architectural or other design drawings. Only photographic or electronic reproduction is acceptable, *but recognize that separating logs from the report can elevate risk.*

## Give Constructors a Complete Report and Guidance

Some owners and design professionals mistakenly believe they can make constructors liable for unanticipated subsurface conditions by limiting what they provide for bid preparation. To help prevent costly problems, give constructors the complete geotechnical-engineering report, *but* preface it with a clearly written letter of transmittal. In that letter, advise constructors that the report was not prepared for purposes of bid development and that the report's accuracy is limited; encourage them to confer with the geotechnical engineer who prepared the report (a modest fee may be required) and/or to conduct additional study to obtain the specific types of information they need or prefer. A prebid conference can also be valuable. *Be sure constructors have sufficient time* to perform additional study. Only then might you be in a position to give constructors the best information available to you, while requiring them to at least share some of the financial responsibilities stemming from unanticipated conditions.

## Read Responsibility Provisions Closely

Some clients, design professionals, and constructors fail to recognize that geotechnical engineering is far less exact than other engineering disciplines. This lack of understanding has created unrealistic expectations that have led to disappointments, claims, and disputes. To help reduce the risk of such outcomes, geotechnical engineers commonly include a variety of explanatory provisions in their reports. Sometimes labeled "limitations," many of these provisions indicate where geotechnical engineers' responsibilities begin and end, to help others recognize their own responsibilities and risks. *Read these provisions closely.* Ask questions. Your geotechnical engineer should respond fully and frankly.

## Environmental Concerns Are Not Covered

The equipment, techniques, and personnel used to perform an *environmental* study differ significantly from those used to perform a *geotechnical* study. For that reason, a geotechnical-engineering report does not usually relate any environmental findings, conclusions, or recommendations; e.g., about the likelihood of encountering underground storage tanks or regulated contaminants. *Unanticipated environmental problems have led to numerous project failures.* If you have not yet obtained your own environmental information, ask your geotechnical consultant for risk-management guidance. *Do not rely on an environmental report prepared for someone else.*

## Obtain Professional Assistance To Deal with Mold

Diverse strategies can be applied during building design, construction, operation, and maintenance to prevent significant amounts of mold from growing on indoor surfaces. To be effective, all such strategies should be devised for the *express purpose* of mold prevention, integrated into a comprehensive plan, and executed with diligent oversight by a professional mold-prevention consultant. Because just a small amount of water or moisture can lead to the development of severe mold infestations, many mold- prevention strategies focus on keeping building surfaces dry. While groundwater, water infiltration, and similar issues may have been addressed as part of the geotechnical- engineering study whose findings are conveyed in this report, the geotechnical engineer in charge of this project is not a mold prevention consultant; *none of the services performed in connection with the geotechnical engineer's study were designed or conducted for the purpose of mold prevention. Proper implementation of the recommendations conveyed in this report will not of itself be sufficient to prevent mold from growing in or on the structure involved.*

## Rely, on Your GBC-Member Geotechnical Engineer for Additional Assistance

Membership in the Geotechnical Business Council of the Geoprofessional Business Association exposes geotechnical engineers to a wide array of risk-confrontation techniques that can be of genuine benefit for everyone involved with a construction project. Confer with you GBC-Member geotechnical engineer for more information.

# CONSTRAINTS & RESTRICTIONS

The intent of this document is to bring to your attention the potential concerns and the basic limitations of a typical geotechnical report.

Ground Surface El. 28.5

## WARRANTY

Universal Engineering Sciences has prepared this report for our client for his exclusive use, in accordance with generally accepted soil and foundation engineering practices, and makes no other warranty either expressed or implied as to the professional advice provided in the report.

## UNANTICIPATED SOIL CONDITIONS

The analysis and recommendations submitted in this report are based upon the data obtained from soil borings performed at the locations indicated on the Boring Location Plan. This report does not reflect any variations which may occur between these borings.

The nature and extent of variations between borings may not become known until excavation begins. If variations appear, we may have to re-evaluate our recommendations after performing on-site observations and noting the characteristics of any variations.

## CHANGED CONDITIONS

We recommend that the specifications for the project require that the contractor immediately notify Universal Engineering Sciences, as well as the owner, when subsurface conditions are encountered that are different from those present in this report.

No claim by the contractor for any conditions differing from those anticipated in the plans, specifications, and those found in this report, should be allowed unless the contractor notifies the owner and Universal Engineering Sciences of such changed conditions. Further, we recommend that all foundation work and site improvements be observed by a representative of Universal Engineering Sciences to monitor field conditions and changes, to verify design assumptions and to evaluate and recommend any appropriate modifications to this report.

## MISINTERPRETATION OF SOIL ENGINEERING REPORT

Universal Engineering Sciences is responsible for the conclusions and opinions contained within this report based upon the data relating only to the specific project and location discussed herein. If the conclusions or recommendations based upon the data presented are made by others, those conclusions or recommendations are not the responsibility of Universal Engineering Sciences.

## CHANGED STRUCTURE OR LOCATION

This report was prepared in order to aid in the evaluation of this project and to assist the architect or engineer in the design of this project. If any changes in the design or location of the structure as outlined in this report are planned, or if any structures are included or added that are not discussed in the report, the conclusions and recommendations contained in this report shall not be considered valid unless the changes are reviewed and the conclusions modified or approved by Universal Engineering Sciences.

## USE OF REPORT BY BIDDERS

Bidders who are examining the report prior to submission of a bid are cautioned that this report was prepared as an aid to the designers of the project and it may affect actual construction operations.

Bidders are urged to make their own soil borings, test pits, test caissons or other investigations to determine those conditions that may affect construction operations. Universal Engineering Sciences cannot be responsible for any interpretations made from this report or the attached boring logs with regard to their adequacy in reflecting subsurface conditions which will affect construction operations.

## STRATA CHANGES

Strata changes are indicated by a definite line on the boring logs which accompany this report. However, the actual change in the ground may be more gradual. Where changes occur between soil samples, the location of the change must necessarily be estimated using all available information and may not be shown at the exact depth.

## OBSERVATIONS DURING DRILLING

Attempts are made to detect and/or identify occurrences during drilling and sampling, such as: water level, boulders, zones of lost circulation, relative ease or resistance to drilling progress, unusual sample recovery, variation of driving resistance, obstructions, etc.; however, lack of mention does not preclude their presence.

## WATER LEVELS

Water level readings have been made in the drill holes during drilling and they indicate normally occurring conditions. Water levels may not have been stabilized at the last reading. This data has been reviewed and interpretations made in this report. However, it must be noted that fluctuations in the level of the groundwater may occur due to variations in rainfall, temperature, tides, and other factors not evident at the time measurements were made and reported. Since the probability of such variations is anticipated, design drawings and specifications should accommodate such possibilities and construction planning should be based upon such assumptions of variations.

## LOCATION OF BURIED OBJECTS

All users of this report are cautioned that there was no requirement for Universal Engineering Sciences to attempt to locate any man-made buried objects during the course of this exploration and that no attempt was made by Universal Engineering Sciences to locate any such buried objects. Universal Engineering Sciences cannot be responsible for any buried man-made objects which are subsequently encountered during construction that are not discussed within the text of this report.

## TIME

This report reflects the soil conditions at the time of exploration. If the report is not used in a reasonable amount of time, significant changes to the site may occur and additional reviews may be required.

UES

# Important Information about This

# Geotechnical-Engineering Report

**Subsurface problems are a principal cause of construction delays, cost overruns, claims, and disputes.**

**While you cannot eliminate all such risks, you can manage them. The following information is provided to help.**

## Geotechnical Services Are Performed for Specific Purposes, Persons, and Projects

Geotechnical engineers structure their services to meet the specific needs of their clients. A geotechnical-engineering study conducted for a civil engineer may not fulfill the needs of a constructor — a construction contractor — or even another civil engineer. Because each geotechnical- engineering study is unique, each geotechnical-engineering report is unique, prepared *solely* for the client. No one except you should rely on this geotechnical-engineering report without first conferring with the geotechnical engineer who prepared it. *And no one — not even you* — should apply this report for any purpose or project except the one originally contemplated.

## Read the Full Report

Serious problems have occurred because those relying on a geotechnical-engineering report did not read it all. Do not rely on an executive summary. Do not read selected elements only.

## Geotechnical Engineers Base Each Report on a Unique Set of Project-Specific Factors

Geotechnical engineers consider many unique, project-specific factors when establishing the scope of a study. Typical factors include: the client's goals, objectives, and risk-management preferences; the general nature of the structure involved, its size, and configuration; the location of the structure on the site; and other planned or existing site improvements, such as access roads, parking lots, and underground utilities. Unless the geotechnical engineer who conducted the study specifically indicates otherwise, do not rely on a geotechnical-engineering report that was:

- not prepared for you;
- not prepared for your project;
- not prepared for the specific site explored; or
- completed before important project changes were made.

Typical changes that can erode the reliability of an existing geotechnical-engineering report include those that affect:

- the function of the proposed structure, as when it's changed from a parking garage to an office building, or from a light-industrial plant to a refrigerated warehouse;
- the elevation, configuration, location, orientation, or weight of the proposed structure;
- the composition of the design team; or
- project ownership.

As a general rule, *always* inform your geotechnical engineer of project changes—even minor ones—and request an assessment of their impact. *Geotechnical engineers cannot accept responsibility or liability for problems that occur because their reports do not consider developments of which they were not informed.*

## Subsurface Conditions Can Change

A geotechnical-engineering report is based on conditions that existed at the time the geotechnical engineer performed the study. *Do not rely on a geotechnical-engineering report whose adequacy may have been affected by*: the passage of time; man-made events, such as construction on or adjacent to the site; or natural events, such as floods, droughts, earthquakes, or groundwater fluctuations. *Contact the geotechnical engineer before applying this report to determine if it is still reliable.* A minor amount of additional testing or analysis could prevent major problems.

## Most Geotechnical Findings Are Professional Opinions

Site exploration identifies subsurface conditions only at those points where subsurface tests are conducted or samples are taken. Geotechnical engineers review field and laboratory data and then apply their professional judgment to render an opinion about subsurface conditions throughout the site. Actual subsurface conditions may differ — sometimes significantly — from those indicated in your report. Retaining the geotechnical engineer who developed your report to provide geotechnical-construction observation is the most effective method of managing the risks associated with unanticipated conditions.

## A Report's Recommendations Are Not Final

Do not overrely on the confirmation-dependent recommendations included in your report. *Confirmation-dependent recommendations are not final,* because geotechnical engineers develop them principally from judgment and opinion. Geotechnical engineers can finalize their recommendations *only* by observing actual subsurface conditions revealed during construction. *The geotechnical engineer who developed your report cannot assume responsibility or liability for the report's confirmation-dependent recommendations if that engineer does not perform the geotechnical-construction observation required to confirm the recommendations' applicability.*

## A Geotechnical-Engineering Report Is Subject to Misinterpretation

Other design-team members' misinterpretation of geotechnical-engineering reports has resulted in costly

problems. Confront that risk by having your geotechnical engineer confer with appropriate members of the design team after submitting the report. Also retain your geotechnical engineer to review pertinent elements of the design team's plans and specifications. Constructors can also misinterpret a geotechnical-engineering report. Confront that risk by having your geotechnical engineer participate in prebid and preconstruction conferences, and by providing geotechnical construction observation.

## Do Not Redraw the Engineer's Logs

Geotechnical engineers prepare final boring and testing logs based upon their interpretation of field logs and laboratory data. To prevent errors or omissions, the logs included in a geotechnical-engineering report should *never* be redrawn for inclusion in architectural or other design drawings. Only photographic or electronic reproduction is acceptable, *but recognize that separating logs from the report can elevate risk.*

## Give Constructors a Complete Report and Guidance

Some owners and design professionals mistakenly believe they can make constructors liable for unanticipated subsurface conditions by limiting what they provide for bid preparation. To help prevent costly problems, give constructors the complete geotechnical-engineering report, *but* preface it with a clearly written letter of transmittal. In that letter, advise constructors that the report was not prepared for purposes of bid development and that the report's accuracy is limited; encourage them to confer with the geotechnical engineer who prepared the report (a modest fee may be required) and/or to conduct additional study to obtain the specific types of information they need or prefer. A prebid conference can also be valuable. *Be sure constructors have sufficient time* to perform additional study. Only then might you be in a position to give constructors the best information available to you, while requiring them to at least share some of the financial responsibilities stemming from unanticipated conditions.

## Read Responsibility Provisions Closely

Some clients, design professionals, and constructors fail to recognize that geotechnical engineering is far less exact than other engineering disciplines. This lack of understanding has created unrealistic expectations that have led to disappointments, claims, and disputes. To help reduce the risk of such outcomes, geotechnical engineers commonly include a variety of explanatory provisions in their reports. Sometimes labeled "limitations," many of these provisions indicate where geotechnical engineers' responsibilities begin and end, to help others recognize their own responsibilities and risks. *Read these provisions closely.* Ask questions. Your geotechnical engineer should respond fully and frankly.

## Environmental Concerns Are Not Covered

The equipment, techniques, and personnel used to perform an *environmental* study differ significantly from those used to perform a *geotechnical* study. For that reason, a geotechnical-engineering report does not usually relate any environmental findings, conclusions, or recommendations; e.g., about the likelihood of encountering underground storage tanks or regulated contaminants. *Unanticipated environmental problems have led to numerous project failures.* If you have not yet obtained your own environmental information, ask your geotechnical consultant for risk-management guidance. *Do not rely on an environmental report prepared for someone else.*

## Obtain Professional Assistance To Deal with Mold

Diverse strategies can be applied during building design, construction, operation, and maintenance to prevent significant amounts of mold from growing on indoor surfaces. To be effective, all such strategies should be devised for the *express purpose* of mold prevention, integrated into a comprehensive plan, and executed with diligent oversight by a professional mold-prevention consultant. Because just a small amount of water or moisture can lead to the development of severe mold infestations, many mold- prevention strategies focus on keeping building surfaces dry. While groundwater, water infiltration, and similar issues may have been addressed as part of the geotechnical- engineering study whose findings are conveyed in this report, the geotechnical engineer in charge of this project is not a mold prevention consultant; *none of the services performed in connection with the geotechnical engineer's study were designed or conducted for the purpose of mold prevention. Proper implementation of the recommendations conveyed in this report will not of itself be sufficient to prevent mold from growing in or on the structure involved.*

## Rely, on Your GBC-Member Geotechnical Engineer for Additional Assistance

Membership in the Geotechnical Business Council of the Geoprofessional Business Association exposes geotechnical engineers to a wide array of risk-confrontation techniques that can be of genuine benefit for everyone involved with a construction project. # CONSTRAINTS & RESTRICTIONS

**The intent of this document is to bring to your attention the potential concerns and the basic limitations of a typical geotechnical report.**

## WARRANTY

Universal Engineering Sciences has prepared this report for our client for his exclusive use, in accordance with generally accepted soil and foundation engineering practices, and makes no other warranty either expressed or implied as to the professional advice provided in the report.

## UNANTICIPATED SOIL CONDITIONS

The analysis and recommendations submitted in this report are based upon the data obtained from soil borings performed at the locations indicated on the Boring Location Plan. This report does not reflect any variations which may occur between these borings.

The nature and extent of variations between borings may not become known until excavation begins. If variations appear, we may have to re-evaluate our recommendations after performing on-site observations and noting the characteristics of any variations.

## CHANGED CONDITIONS

We recommend that the specifications for the project require that the contractor immediately notify Universal Engineering Sciences, as well as the owner, when subsurface conditions are encountered that are different from those present in this report.

No claim by the contractor for any conditions differing from those anticipated in the plans, specifications, and those found in this report, should be allowed unless the contractor notifies the owner and Universal Engineering Sciences of such changed conditions. Further, we recommend that all foundation work and site improvements be observed by a representative of Universal Engineering Sciences to monitor field conditions and changes, to verify design assumptions and to evaluate and recommend any appropriate modifications to this report.

## MISINTERPRETATION OF SOIL ENGINEERING REPORT

Universal Engineering Sciences is responsible for the conclusions and opinions contained within this report based upon the data relating only to the specific project and location discussed herein. If the conclusions or recommendations based upon the data presented are made by others, those conclusions or recommendations are not the responsibility of Universal Engineering Sciences.

## CHANGED STRUCTURE OR LOCATION

This report was prepared in order to aid in the evaluation of this project and to assist the architect or engineer in the design of this project. If any changes in the design or location of the structure as outlined in this report are planned, or if any structures are included or added that are not discussed in the report, the conclusions and recommendations contained in this report shall not be considered valid unless the changes are reviewed and the conclusions modified or approved by Universal Engineering Sciences.

## USE OF REPORT BY BIDDERS

Bidders who are examining the report prior to submission of a bid are cautioned that this report was prepared as an aid to the designers of the project and it may affect actual construction operations.

Bidders are urged to make their own soil borings, test pits, test caissons or other investigations to determine those conditions that may affect construction operations. Universal Engineering Sciences cannot be responsible for any interpretations made from this report or the attached boring logs with regard to their adequacy in reflecting subsurface conditions which will affect construction operations.

## STRATA CHANGES

Strata changes are indicated by a definite line on the boring logs which accompany this report. However, the actual change in the ground may be more gradual. Where changes occur between soil samples, the location of the change must necessarily be estimated using all available information and may not be shown at the exact depth.

## OBSERVATIONS DURING DRILLING

Attempts are made to detect and/or identify occurrences during drilling and sampling, such as: water level, boulders, zones of lost circulation, relative ease or resistance to drilling progress, unusual sample recovery, variation of driving resistance, obstructions, etc.; however, lack of mention does not preclude their presence.

## WATER LEVELS

Water level readings have been made in the drill holes during drilling and they indicate normally occurring conditions. Water levels may not have been stabilized at the last reading. This data has been reviewed and interpretations made in this report. However, it must be noted that fluctuations in the level of the groundwater may occur due to variations in rainfall, temperature, tides, and other factors not evident at the time measurements were made and reported. Since the probability of such variations is anticipated, design drawings and specifications should accommodate such possibilities and construction planning should be based upon such assumptions of variations.

## LOCATION OF BURIED OBJECTS

All users of this report are cautioned that there was no requirement for Universal Engineering Sciences to attempt to locate any man-made buried objects during the course of this exploration and that no attempt was made by Universal Engineering Sciences to locate any such buried objects. Universal Engineering Sciences cannot be responsible for any buried man-made objects which are subsequently encountered during construction that are not discussed within the text of this report.

## TIME

This report reflects the soil conditions at the time of exploration. If the report is not used in a reasonable amount of time, significant changes to the site may occur and additional reviews may be required.

| Phone Number | Email |

**THE FOLLOWING INFORMATION MUST BE SUBMITTED WITH THIS COMPLETED APPLICATION BY EMAIL WITH HARD COPIES AND CHECK TO BE MAILED TO THE APPRROPRIATE FPL REPRESENTATIVE.**
*(**See Page 3 for Contact Information,** call appropriate person before mailing and sending email).*

1. ☐ A letter requesting and describing the proposed use and impacts to FPL easements along with the estimated start and end date of construction. Each and all encroachments need to be described in detail.
2. ☐ The application fee made in the form of a check made payable to Florida Power & Light Company. **The application fee is non-refundable.** The amount of the check is determined by the complexity of consent request. Consult with the designated FPL real estate office to determine the appropriate application fee.
3. ☐ Copies of all drawings associated with the proposed project. Drawings shall be provided hard copy and electronic format 11x17 PDF of a detailed and scalable site plan. Additionally, once your request has been assigned an FPL Consent Agreement number is created, you will receive a link to update native format electronic files. These electronic files shall be provided in AutoCAD .dwg or MicroStation .dgn. Do not submit native files with your original submittal. Drawings are to include the following:
   a. ☐ Accurate depiction of the proposed use for the site and distances from the FPL easement boundaries.
   b. ☐ Accurate depiction of all transmission and distribution facilities (i.e. poles, guy wires and anchors, patrol road area) adjacent to or in the proposed use area including the limits of the FPL easement. **The FPL easement boundaries and all FPL facilities shall be clearly shown and highlighted in yellow, with the OR Book and Page number.**
   c. ☐ Transmission pole/structure numbers of all poles/structures within 600ft of the proposed use. **NOTE** - Pole/Structure #'s are typically in a number-letter-number sequence (***Example: 243M4***) located at eye level.
   d. ☐ Locations of existing swales, ditches, ponds, rivers and/or canals located within the easement.
   e. ☐ LAT and LONG and Section/Township/Range of the project, as well as County tax identification numbers for the affected tract(s) of land.
4. ☐ One (1) copy in a 11x17 format of a grading plan including profiles, showing existing and proposed elevation changes within easement, and height of the conductor at the insulator attachment point above existing grade and PDF. Clearly show the elevation changes proposed in the easement and PDF.
5. ☐ One (1) copy in a 11x17 format of drainage plan clearly showing the drainage intent, proposed improvements, and any modifications or changes to historical flows and the existing surface water management system.
6. ☐ One (1) copy in a 11x17 format of landscaping plan with planting list, depicting maximum maturity height of all proposed vegetation (vegetation capable of growing above 14' at maturity is not allowed) and PDF.
7. ☐ One (1) copy in a 11x17 format lighting plan with material list, depicting fixture/pole heights from original grade (lighting structures, including the can fixture, that exceed 14' above grade are not allowed) and grounding specification and PDF.
8. ☐ One (1) copy in a 11x17 of the utility plan with material list and method of installation (directional bore or trench) and PDF.
9. ☐ Copy of a legal sketch and legal description in PDF of just the area within the transmission easement that will be encroached into by the project once it has been approved. This is an exhibit to the Consent Agreement.
10. ☐ The type of equipment that will be used during construction and/or stored after construction on the FPL Right-Of-Way (bulldozer, cranes, front-end loaders, etc.). Refueling or maintenance of vehicles is not permitted within the Right-Of-Way.
11. ☐ Include the correct name and address of the entity to which the Right-Of-Way Consent Agreement is to be issued when approved, along with the correct name and title of the person or persons that will be signing the Consent Agreement.

Simple right-of-way uses might not require all the documentation listed above. For simple uses, please contact the designated FPL real estate office. **(See Page 3 for Contact Information)**

After receipt of all needed information, FPL will review in a timely manner on a case by case basis. **(See Page 2 for Process Map)**

All plans submitted must show the FPL easement area with the OR Book and Page, the structures, with the structure numbers, and distance from the FPL structures to the proposed work is to be performed.

Based on the FPL Right-Of-Way Guidelines, Section IV Prohibited Uses, please identify specific area for special considerations.

Date

# CONSENT AGREEMENT

## APPLICATION FEE SCHEDULE

The application fee will be determined in accordance with the complexity of consent request:

- Category 1 Fee is $250
- Category 2 Fee is $1,000
- Category 3 Fee is $2,500

| **CATEGORY 1** *(Residential Uses)* | **CATEGORY 2** | **CATEGORY 3** |
|---|---|---|
| Fencing & Gates | Temporary overflow parking | Road crossings of the FPL right-of-way |
| Any residential use not requiring a change in ground elevation | Temporary storage areas | Permanent overflow parking areas or storage yards |
| Signage | | Any use requiring a change in ground elevation |
| | | Dry detention systems |
| | | Pipeline crossings of the FPL right-of-way |
| | | Landscaping within the FPL right-of-way |
| | | Any other permanent governmental/commercial /developmental type of use |

In the event a consent request includes multiple categories or multiple items within a category, the application fee will be no more than the highest applicable category fee. For example:

- A consent request for a Temporary overflow parking (Category 2) and permanent storage yard (Category 3) will result in an application fee of $2,500
- A consent request for temporary overflow parking (Category 2) and temporary storage area (Category 2) will result in an application fee of $1,000

Based on the FPL Right-Of-Way Guidelines, Section IV Prohibited Uses, please identify specific area for special considerations.

This is part of the Contract Documents and modifies the Project Plans and Specifications as follows:

A1.1 DRAWINGS – COVER SHEET CS:

Cover Sheet CS is being reissued to add the survey sheets to the drawing set.

A1.2 DRAWINGS – SURVEY SHEETS:

Survey Sheets 1 of 5 through 5 of 5 are being issued for the first time.

A1.3 DRAWINGS – ELECTRICAL SHEETS:

Electrical Sheets E1.0 and E2.0 are being reissued with miscellaneous revisions.

ATTACHMENTS:

Sheets CS, Survey Sheets 1 of 5 through 5 of 5, E1.0, and E2.0

***KEY SHEET***
***NOT TO SCALE***

NOTE:
THIS SURVEY IS NOT VALID WITHOUT SHEETS 1 TO 5

### *LEGAL DESCRIPTION:* (BY SLIGER & ASSOCIATES, INC.)

A PORTION OF THE SOUTH 25 CHAINS OF GOVERNMENT LOT 2 SECTION 8, TOWNSHIP 15 SOUTH, RANGE 33 EAST, VOLUSIA COUNT FLORIDA. DESCRIBED AS FOLLOWS:

BEGIN AT THE CENTER OF SAID SECTION 8, AS ESTABLISHED AND OCCUPIED; THENCE RUN N01°12'18"E, ALONG THE WEST LINE OF SAID GOVERNMENT LOT 2, A DISTANCE OF 337.90 FEET; THENCE DEPART SAID WEST LINE S89°54'08"E, A DISTANCE OF 887.00 FEET; THENCE S01°12'18"E, A DISTANCE OF 337.90 FEET TO THE SOUTH LINE OF SAID GOVERNMENT LOT 2; THENCE N89°55'08"W ALONG SAID SOUTH LINE, A DISTANCE OF 887.00 FEET TO THE POINT OF BEGINNING.

CONTAINING 299,275 SQ.FT. OR 6.881 ACRES MORE OR LESS.

### *SURVEY NOTES:*

1. *THIS PLAT OF SURVEY HAS BEEN PREPARED WITHOUT THE BENEFIT OF A CURRENT REPORT FROM AN AUTHORIZED TITLE PROFESSIONAL, OR A TITLE OPINION ISSUED BY AN ATTORNEY LICENSED BY THE FLORIDA BAR. THEREFORE, THERE MAY BE ADDITIONAL MATTERS OF RECORD NOT SHOWN ON THIS SURVEY.*
2. *THE MEASURED BEARINGS SHOWN HEREON ARE (GRID BEARINGS) BASED ON THE FLORIDA STATE PLANE COORDINATE SYSTEM, EAST ZONE, 1983 NORTH AMERICAN DATUM, 2007 ADJUSTMENT, DERIVING A BEARING OF N01°12'18"W, ALONG WESTERLY LINE OF GOVERNMENT LOT 2, SECTION 8, TOWNSHIP 15 SOUTH RANGE 33 EAST.*
3. *UNLESS OTHERWISE SHOWN, RECORD DISTANCES AND DIRECTIONS AND FIELD MEASURED DISTANCES AND DIRECTIONS ARE THE SAME.*
4. *DIMENSIONS ARE SHOWN IN FEET AND DECIMALS THEREOF.*
5. *UNDERGROUND FOUNDATIONS, IF ANY HAVE NOT BEEN LOCATED OR SHOWN AS A PART OF THIS SURVEY.*
6. *ELEVATIONS REFER TO NAVD 1988 DATUM PER ST. JOHNS RIVER WATER MANAGEMENT DISTRICT BENCHMARK MONUMENT 04–08–063–0 (STA. #105), ELEVATION 32.605 FEET.*
7. *THIS PROPERTY IS LOCATED IN FLOOD INSURANCE RATE MAP (F.I.R.M.) ZONE X. PER F.I.R.M. MAP NO. 12127C0369 J. MAP EFFECTIVE DATE: SEPTEMBER 29, 2017. APPROXIMATE SCALE: 1"=500'. PER FEMA.GOV WEBSITE.*
8. *REVISE SURVEY TO ADD PARCEL IDENTIFICATION No. AS IDENTIFIED ON COUNTY OF VOLUSIA PROPERTY APPRAISER'S OFFICE WEBSITE. NO ADDITIONAL FIELD WORK THIS DATE. FEBRUARY 28, 2026. (JM)*

### *REFERENCE MATERIAL:*

PLAT OF PORT ORANGE CORPORATE PARK, MAP BOOK 47, PAGE 99.

# SOLICITATION REQUEST FORM
## (ITB, RFP, RFSQ, ITN)

# 26-07
(# will be assigned by Purchasing Division)

**Assigned Purchasing Lead:** Rita Cooper

| **Section 1: Solicitation Name, Scope, Type** | |
|---|---|
| Project name: | City Center Sports Complex Expansion |
| General scope of project: | Build multipurpose field, restroom/concession facility, and additional parking lot area at City Center Sports Complex adjacent to the REC Building |
| Type of project: | ☑ *ITB* ☐ *RFP* ☐ *RFSQ Design/Professional Services (engineering, architect, surveying, landscape)* ☐ *ITN* |
| | ☑ *Capital* ☐ *Non-Capital* |

| **Section 2: Solicitation Information** | |
|---|---|
| Requested by: | Peter Ferreira |
| Department: | Parks & Recreation |
| Special Legal Ad: | ☐ Y or ☑ N *Per 180.24FS, see below *Section 9: Solicitation FAQ* |
| Estimated cost: | $1,500,000 to $2,000,000.00 |
| Bid Bond: | ☑ Y or ☐ N (To be determined by Purchasing) |
| Grant funded: | ☐ Y or ☑ N *(If yes, list date & requirements)* Deadline Date: |
| | Type / Special Requirements: |
| Fund Account: | 321 - bond fund |
| Project#: | PB250 |
| City Project Manager: | Peter Ferreira |
| Contract Administrator: | Jennifer Cox |
| Project Inspector: | |
| Blueprint provided by: | |
| Engineer of Record: | Hall & Ogle Architects |

| **Section 3: List of Evaluation Committee Members (RFP/RFSQ/ITN) (Minimum 3)** | |
|---|---|
| Committee Member 1: | N/A |
| Committee Member 2: | |
| Committee Member 3: | |
| Committee Member 4: | |
| Committee Member 5: | |

## Section 4: Suggested Solicitation Dates

**All dates are subject to scheduling and availability**

| | | |
|---|---|---|
| Release date urgency: | ☐ High ☑ Medium ☐ Low | Suggested Date: |
| Pre-Solicitation Conference Requested: | ☑ Y or ☐ N (Purchasing may decide to hold one even if dept. doesn't require it.) | |
| Pre-Solicitation Conference date: | TBD | Site Visit: ☑ Y or ☐ N Mandatory: ☑ Y or ☐ N |
| Due date/opening: | TBD | |
| Delivery/Completion: | TBD | |
| Award to Council: | | *Note: funding source must be listed on the agenda summary* |

## Section 5: Creating Details/Specifications/Scope of Work

☑ *Project Manager* ☑ *Project Engineer/Architect* ☐ *Other* _____ ☐ *Assistance from Purchasing**

**The department provides the specifications/scope of work to Purchasing in **Word** format. Purchasing reviews the specifications/scope of work, incorporates them into the draft of the solicitation and distributes and advertises it. If the Project Manager, Engineer or Architect prepares the specifications/scope of work, the department must review and approve them and ensure Purchasing receives a **Word** copy for incorporation into the solicitation draft.*

## Section 6: Contract Type, Term, Completion Time

***** Discuss with Legal Dept. prior to releasing the solicitation to ensure the appropriate contract is placed in the solicitation document *****

Contract Type: ☐ *Standard services (Supplies/Services)* ☐ *EJCDC (Engineers Joint Contract Document Committee) (Site/Structures & Design Build)* ☑ *AIA (American Institute of Architects) (Building construction)*

| | |
|---|---|
| Contract Term: | 365 days |
| Renewal Options: | |
| (Days) Substantial Completion: | 365 days |

P&P Bond: ☑ Y or ☐ N *Payment and Performance Bonds are required for construction projects on public property

** If the project engineer is responsible for contract administration and project inspection services, ascertain that the contract with the engineer provides for that service. If not, the Engineer's Contract needs to be approved by the City Manager.*

## Section 7: Suggested Bidder's List (include email address of potential bidder)

| | |
|---|---|
| Bidder: | Paul Culver Construction Inc, paul@paulculverconstruction.com, 376-763-4190 |
| Bidder: | A.G. Pifer Construction Co., Inc.; agpiferinc@gmail.com, 386-257-4448 |
| Bidder: | |
| Bidder: | |
| Bidder: | |
| Bidder: | |

## Section 8: Director's Approval

☑ Approved ☐ Rejected Date: 3/26/26 Susan Lovallo

Director's Name

X _____

Director's Signature

## Section 9: Solicitation FAQ

**Who fills out the Solicitation Request Form?**
Sections 1-7 are to be completed by the Project Manager/Director.

**When do I use this form?**
When purchases exceed $100,000 and do not fall under the exclusions listed in City Ordinance 2023-02. Ex: (Sole source, piggyback, utilities, travel, postage, registration fees, etc.)

**How do I submit this form?**
After Director/Department Head signs approval of Solicitation Request Form, the department sends an email to purchdiv@port-orange.org to request a Bid Kick-Off Meeting. The draft Solicitation Request Form must be attached to this email. Purchasing will contact the department within 10 days of receipt of the email to setup the Bid Kick-Off Meeting. The Solicitation Request Form will be reviewed in detail during the Bid Kick-Off Meeting. If edits to the form are needed, the department makes the edits and submits the completed form to CivicClerk in the Bid Requests section of Contract Management. The department will also include with the request the Scope of Work/Specifications for the solicitation.

**How early should I plan for an ITB/RFP/RFSQ/ITN?**
Departments should allow for at least 90 days from *receipt of bid specifications* to *opening* (120 days for council award date). An additional 30-60 days should be allowed for RFPs, RFSQs, and ITNs.

**Advertising:**
Florida Statutes mandate that Capital Projects with a projected cost of under $200,000 shall be publicly advertised for a minimum of ten (10) days; over $200,000 Twenty-one (21) days and over $500,000 a minimum of thirty (30) days prior to bids being opened.

Per 180.24FS, public utility projects require additional advertising: two (2) consecutive ads *or* postings in three (3) conspicuous places around city hall, one (1) of which shall be the door of city hall. 180.07FS Examples: solicitations for jails, airports, hospitals, golf courses, reservoirs, pump stations, pipelines, & water/reclaim/sewage systems.

**Distribution/Release:**
The City is currently using DemandStar www.demandstar.com for releasing solicitation documents/addenda on the internet and the Hometown News to release the legal advertisement. Solicitation documents are also posted on the Purchasing Division's web page.

**Specifications:**
Document specifications should be sent to the assigned Purchasing Representative in WORD file format.

**One envelope solicitation process**:
One envelope shall be submitted. The envelope contains required forms, technical and price information. The envelopes from all timely bidders will be opened and read aloud at the time of the solicitation opening.

**CCNA**:
The City of Port Orange is also governed by Florida Statutes 287.055 the Consultants Competitive Negotiations Act, as the method of selecting architects, engineers, land surveyors and landscape architects.

**Design-Build:**
The City has written and enacted a set of Design-Build Policies and Procedures which sets forth very specific requirements the City must use for a design-build type of bid or contract. This was done to comply with Florida Statutes, Chapter 287.055 as amended; Consultants Competitive Negotiation Act. Public announcement/advertisement shall be made:

- If planning or study activity for professional services exceeds $35K
- If basic construction costs estimated by the agency exceeds $325K

**Grants**:
Grant Money Bids and Projects also have their own set of governing laws and regulations which require the City's compliance. The compliance with these laws is strictly the Project Manager's responsibility. The Project Manager must familiarize himself/herself with each and every grant to ensure that the City not only complies with those rules but fulfills every requirement that those grants contain so as not to forfeit the money that they bring.

**Bonds:**
When bid bond/deposits are required they are advertised in the public notices inviting bids. Normally, if a bid bond/deposit is required, it is in the amount of five (5%) percent of the bid amount. Payment and Performance Bonds are required for construction projects on public property in the amount equal to one hundred percent (100%) of the total contract amount unless stated otherwise in the solicitation documents.

Payment and Performance Bonds must also be recorded in the Office of the Clerk of the Circuit Court, Volusia County, Florida. Required bonds are included in the Invitation to Bid notice which will appear in a locally distributed newspaper.

**Public Entity Crimes Form:**
Every acquisition with Federal funds equal to or greater than $10,000.00 and all formal solicitations must have a signed, notarized Public Entity Crimes Form.

**Drug Free Tie Bid Form**:
The Drug Free Tie Bid Preference Form is in accordance with Section 287.087, Florida Statutes and became law in January 1991. It is used in determining tiebreaker in the event of tie bids.

# CITY COUNCIL AGENDA ITEM

**COUNCIL MEETING DATE 6/2/2026**

**SUBJECT:** (B7e) Approval of Amendment No. 1 to Task Authorization No. 6 to Paul Culver Construction Co., Inc. for Fire Suppression System Modifications at the YMCA

**DEPARTMENT:** Parks & Recreation

**GOAL:** 1 - Public Safety

**RECOMMENDED MOTION:** Move to approve an Amendment to Task Authorization No. 6 with Paul Culver Construction, Inc. for an amount not to exceed $145,398.00, for fire suppression system modifications at the YMCA, and authorize the Mayor and City Clerk to execute the associated documents.

**SUMMARY:** Staff is requesting approval of Amendment No. 1 to Task Authorization (TA) No. 6 to ITB #24-01 with Paul Culver Construction, Inc. under the City's Master Contract for Small Construction Projects, in an amount not to exceed $55,698, for the additional required upgrades and modifications to the fire suppression system at the YMCA. The total of the project with the amendment to the task authorization will not exceed $145,398.00.

The modifications include providing required upgrades to the existing sprinkler system, additional smoke detectors, alarm pull stations, fire alarm speakers and strobes, additional emergency lights and other fire suppression items. All upgrades and modifications have been required by the City Fire Marshal pursuant to current National Fire Protection Association (NFPA) code requirements.

Upon approval and issuance of the Notice to Proceed, the work is anticipated to be completed within 60 days, increasing the total days by 30.

PRESENTER: Susan Lovallo

**AMENDMENT NO. 1 TO TASK AUTHORIZATION NO. 6**
**OF STANDARD CONTRACT DATED FEBRUARY 14, 2017**

**THIS AMENDMENT NO. 1** ("2026 Amendment") is made and entered into the day and year set forth hereinafter by and between the **CITY OF PORT ORANGE, FLORIDA**, a Florida municipal corporation located at 1000 City Center Circle, Port Orange, Volusia County, Florida 32129-4144 (the "City"), and **PAUL CULVER CONSTRUCTION, INC.** ("Contractor"), a Florida corporation, whose principal address is 201 Osceola Avenue, Florida 32114, collectively the "Parties."

WHEREAS, the Parties entered into a Standard Contract for Services for General Contracting Services for Small Projects, pursuant to RFP 24-01, which has an initial term commencing on March 5, 2024 and continuing for a period of two (2) years, and which may be renewed upon written agreement of the Parties and budget appropriation for up to three (3) one-year periods; and

WHEREAS, on the 23rd day of 2025, the Parties executed a City of Port Orange Renewal Form for the first of three available renewal options, to continue services for the period through March 2, 2027; and

WHEREAS, on the 13th day of January 2026, the Parties entered into Task Authorization No. 6 to the Standard Contract for Services for YMCA Fire Alarm Modification Services ("Task Authorization"), with services to be completed within 30 days from the date of written Notice to Proceed issued by the City to the Contractor, in an amount not to exceed $89,700.00; and

WHEREAS, the Parties desire to amend Task Authorization No. 6 to include additional emergency lights, extending and repairing existing soffit/ceiling, and providing a fire sprinkler permit for compliance with the City Fire Marshall requirements, increasing the amount for the additional services by $55,698.00, for a revised total amount not to exceed $145,398.00, and amend the services completion date from 30 days from the date of written Notice to Proceed, to 60 days to allow for completion of the project; and

WHEREAS, the Port Orange City Council has determined that the execution of this 2026 Amendment is beneficial to the citizens of the City of Port Orange.

**NOW, THEREFORE**, the Parties, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, agree as follows:

The foregoing recitals are true and correct and incorporated herein.

1. The scope of Task Authorization No. 6 is hereby amended to include additional emergency lights, extending and repairing existing soffit/ceiling, and providing a fire sprinkler permit for compliance with the City Fire Marshall requirements, and as more specifically described in Contractor's quote dated March 8, 2026, attached hereto as Exhibit "1."

2. The term of Task Authorization No. 6 is hereby amended from 30 days from the date of written Notice to Proceed, to 60 days to allow for completion of the project.

3. In return for the services identified above, City agrees to increase the amount of Task Authorization No. 6 from $89,700.00, by an amount of $55,698.00, for a revised total amount not to exceed $145,398.00.

4. *Counterparts*. This 2026 Amendment may be executed in one or more counterparts, each of which shall be deemed to be an original but all of which together shall constitute one and the same instrument. The delivery by facsimile or e-mail of an executed copy of this 2026 Amendment shall be deemed

valid as if an original signature was delivered. No contract shall be formed between Contractor and the City until the City signs this 2026 Amendment.

5. All other terms and conditions of the Contract shall remain in full force and effect.

**IN WITNESS WHEREOF**, the Parties hereto have signed, sealed, and delivered this 2026 Amendment on the day and year stated hereinafter.

**TASK AUTHORIZATION NO. 6**
**Standard Contract for Services**
**for General Contracting Services for Small Projects**
**dated March 5, 2024,**
**Between the City of Port Orange, Florida and Paul Culver Construction, Inc.**

THIS Task Authorization is entered into by and between the **CITY OF PORT ORANGE, FLORIDA**, a chartered municipal corporation with its principal place of business at 1000 City Center Circle, Port Orange, Florida 32129 (the "City") and **Paul Culver Construction, INC.**, Florida corporation, with its principal place of business at 201 Osceola Avenue, Daytona Beach, Florida 32114 ("Contractor"), and hereinafter collectively referred to as the "Parties," and is to that certain Standard Contract for Services relating to General Contracting Services for Small Projects, as dated above, and any amendments thereto, hereinafter collectively referred to as the "Contract." The Parties, in exchange for the mutual covenants contained herein and in the Contract, agree as follows:

1. This Task Authorization expressly modifies the Contract and in the event of a conflict, the terms and conditions of this Task Authorization shall prevail.

2. In addition to all other terms and conditions contained in the Contract, Contractor shall provide YMCA fire alarm modifications, and as more particularly described in the Scope of Services attached hereto and incorporated herein as **Task Authorization Exhibit "1."**

3. Contractor shall complete the services to be provided herein no later than **thirty (30) days** from the date of issuance of a written Notice to Proceed by the City to the Contractor.

4. In return for the services identified above, the City agrees to compensate Contractor at the prices set forth in Exhibit "1," attached hereto and made a part hereof, subject to a limit not to exceed **$89,700.00.** All payments shall be governed by the Local Government Prompt Payment Act as Set forth in Sections 218.70 through 218.79, Florida Statutes, as amended.

5. This Task Authorization may be executed in one or more counterparts, each of which shall be deemed to be an original but all of which together shall constitute one and the same instrument. The delivery by facsimile or e-mail of an executed copy of this Task Authorization shall be deemed valid as if an original signature was delivered. No contract shall be formed between the Contractor and the City, until the City signs this Task Authorization.

IN WITNESS WHEREOF, the Parties have made and executed this Task Authorization for the purposes herein expressed on the dates set forth below.

**RE: YMCA – Fire Alarm Modifications** **REVISED**

Dear Kevin:

We have visited the site to familiarize ourselves with the existing conditions and are pleased to submit the following proposal to provide all Labor, Materials, Equipment, Tools, Taxes, Insurance & Permits necessary to complete the following work for a lump sum price of **EIGHTY-NINE THOUSAND SEVEN HUNDRED DOLLARS & 00/100's ($89,700.00)** as follows:

**GENERAL CONDITIONS** **$ 11,000**

- Supervision & Project Management (Super 2-wks.@ $1,750 + PM 1-wk.@ $3,220 = $6,720
- General Liability & Worker's Compensation Insurance $1,580
- Equipment & Tools $400
- Daily & Final Clean-Up $500
- Permits $1,800

**ELECTRICAL** **$ 13,000**

- Provide new Exit/Emergency Lights new emergency lights and change out certain existing Exit Lights to New Exit/Emergency lights per plans marked up for review by The City of Port Orange Building & Fire Department. These plans would need to be approved by the Building and Fire Department as it does change/remark the path of egress throughout the building.
  **NOTE:** Should we be required by the Building or Fire Departments to provide a Life Safety Plan, we would need to procure the services of an architect which is not included.
- Existing Emergency Lights to be changed to high Lumen Emergency Lights designed for larger areas at the Basketball Gym.
- Existing Emergency Lights to be changed to high Lumen Emergency Lights designed for larger areas at the Volleyball Gym.
- The children's area wing is included in this quote.
- The new Weight Room is up to code in our opinion, and no changes are included.

**FIRE ALARM** **$ 54,000**

- Furnish and install a new Addressable Fire Alarm System complete including the children's wing and work out room.
- This quote is based on a walk-through of the building and assessing all existing devices and areas where new devices are needed.
- All boxes, sleeves and conduits needed for a complete system is included in the quote.

**K. Sweat**
**11/21/2025**
**Page 2**

- The new system is quoted with Firelite equipment, including installation of the above system per plans, submittals, drawings, and as-built's as required.
- Provide Final Testing, Inspection, Systems Certification and Training as required.
- Customer to provide communication medium for monitoring of the account.
- Changes required by either the AHJ or customer that expand the Scope of Work will be estimated and invoiced separately.
  **NOTE:** Given that no Life Safety Plan exists, The City of Port Orange will need to review and coordinate approval from the Building Official and the Fire Marshal.

| | |
|---|---|
| **Sub-Total:** | **$ 78,000** |
| **Overhead & Profit:** | **$ 11,700** |
| **GRAND TOTAL:** | **$ 89,700** |

We appreciate the opportunity to submit this proposal and look forward to a successful project.

Gentlemen/Ladies:

We are Pleased to submit our Fire Sprinkler Budget in the amount of: **$ 4440.00**
on the referenced project as further described below.

The price is based solely on Attachment "A", and the further designations, clarifications and qualifications stated on the Attachment "A" and the attached "Conditions of Proposal".
Specifically, this price is predicated upon the conditions that we shall receive prompt monthly payment for the value of work properly performed and material delivered, and that payment can be withheld only to the extent that the owner is withholding due to deficiencies in our work. Also, retainage shall not exceed the percentage actually withheld by the owner relative to our work.
This information transmitted in this proposal supersedes any previously communicated information to the contrary. Further, we reserve the right to modify our price and terms at any time prior to the time for submitting your bid to the owner to reflect adjustments resulting from our continuing review.
Finally, and unless otherwise extended in writing from Master Craft Plumbing Contractors, Inc., this bid including any such modifications shall remain effective and will not be further modified or withdrawn for 30 days from this bid.
We appreciate the opportunity to participate in your bid process. If you have any questions or wish additional information, please contact me.

NOTES:

- All work to be performed during normal working hours.
- Terms: 50% with signed proposal.
  50% Upon Completion.

Title: _____

## CONDITIONS OF PROPOSAL

1. Acceptance of this proposal by Buyer shall be acceptance of all terms and conditions recited herein or incorporated by reference. Allowing the Seller to commence work or preparation for work will constitute acceptance by Buyer of this Proposal and all terms and conditions. Quotations herein, unless otherwise stated, are for immediate acceptance and subject to change.
2. The Seller shall be paid monthly progress payments on or before the 10th of each month for the value of work completed plus the amount of materials and equipment suitably stored applied to the contract sum less the aggregate of previous payment to the Seller. Final Payment shall be due the day the work described in this Proposal is substantially completed. Sales of materials are payable in cash on delivery of the goods.
3. No back charges of claim of the Buyer for services shall be valid except by the agreement in writing by the Seller before work is executed.
4. All sums not paid when due shall bear interest at the rate of 1-1/2% per month from due date until paid or the maximum legal rate permitted by law whichever is less; and all costs of collection, including a reasonable attorney's fee, shall be paid by Buyer.
5. If the Buyer fails to make payments to the Seller as herein provided, then the Seller may stop work without prejudice to any other remedy it may have.
6. Buyer is to prepare all work areas so as to be acceptable for Seller's work under the contract. Seller will not be called upon to start work until sufficient areas are ready to insure continued work until job completion.
7. After acceptance of this proposal as provided, Seller shall be given a reasonable time in which to make delivery of material and/or labor to commence and complete the performance of the contract. Seller shall not be responsible for delays or defaults where occasioned by any causes of any kind and extent beyond its control, including but not limited to: delays caused by owner, general contractor, architect and/or engineers; armed conflict or economic dislocation resulting therefrom; embargoes, shortages of labor, equipment or materials production facilities or transportation; labor difficulties, civil disorders of any kind; action of civil or military authorities; vendor priorities and allocations, fires, floods, accidents and acts of God.
8. All workmanship is guaranteed against defects in workmanship for a period of one year from the date of installation. THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES EXPRESS OR IMPLIED INCLUDING ANY WARRANTIES OR MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Seller will not be responsible for special, incidental, or consequential damages. Seller shall not be responsible for damage to its work by other parties. Any repair work necessitated by caused damage will be considered as an order for extra work. Our responsibility for damage or loss in transit ceases upon delivery in good condition to a public carrier.
9. Work called for herein is to be performed during Seller's regular working hours. Overtime rates will be charged for all work performed outside such hours at extra costs.
10. All materials shall be furnished in accordance with the respective industry tolerance of color variation, thickness, size, finish, texture and performance standards.
11. Notwithstanding any provision contained in this Proposal or the contract documents between Owner and Contractor, Seller may file a lien or claim on its behalf in the event that any payment to Seller is not made as and when provided for by the agreement.
12. The subcontract form used between the Seller and the Buyer will be the current AIA Standard Form Subcontract Document A401. Where there is a conflict between provisions of either the AIA Subcontract Form, or the contract documents between Owner and Contractor, and this Proposal, then this Proposal shall govern.
13. The Buyer shall furnish all temporary site facilities including suitable covered storage space and hoisting at no cost to Seller.
14. The Buyer shall make no demand for liquidated damages for delays or actual damages for delays in any sum in excess of such amount as may be specifically named in this Proposal and no liquidated damages may be assessed against the Seller for delays or causes attributed to other contractors or arising outside the scope of this Proposal.
15. Buyer shall purchase and maintain property insurance upon the full value of the entire work and/or materials to be supplied which shall include the interest of the Seller.

| ! | NOTICE | (4) Compliance and Non-compliance Tag.<br>(a) If a fire protection system is found to be in compliance with the applicable NFPA ITM standards, a GREEN Compliance Tag shall be attached to the main water control valve in such a manner as to be plainly visible and not more than 60 inches above the finished floor. GREEN tags shall not be placed on a system if deficiencies or impairments still exist from a previous inspection.<br>(b) If a fire protection system is found to have noncritical deficiencies and is not in compliance with the applicable NFPA ITM standards, a completed YELLOW Non-compliance Tag shall be attached to the main water control valve of the system to indicate that corrective action is necessary. The building owner or authorized representative shall be notified by copy of the NFPA 25 inspection report within 30 days of the inspection. If the building owner or authorized representative has not contracted with the inspecting contractor so that the noncritical deficiencies are corrected within 90 days from the date of the inspection, or the inspecting contractor has not received confirmation from the building owner or authorized representative that the corrections have been performed by another licensed contractor, the inspecting contractor shall notify the authority having jurisdiction.<br>(c) If the system has critical deficiencies or is found to be impaired, a completed RED Non-Compliance Tag shall be attached to the main water control valve of the system, and the contractor or inspector shall notify the building owner or authorized representative within 24 hours of the time of the inspection. If the building owner or authorized representative has not contracted with the inspecting contractor so that the critical deficiencies are corrected within 30 days from the date of the inspection, or the inspecting contractor has not received confirmation from the building owner or authorized representative that the corrections have been performed by another licensed contractor, the inspecting contractor shall notify the authority having jurisdiction. If a system is found to be impaired, the inspecting contractor shall notify the authority having jurisdiction within 72 hours of the time of the inspection if the impairment has not been corrected within 72 hours of the finding.<br>(d) If a system is found to have noncritical deficiencies or critical deficiencies, and the building tenant(s) is different from the building owner, the building owner shall notify the tenant(s) within 30 days of receipt of the NFPA 25 inspection report.<br>(e) If a system is found to have impairments, and the building tenant(s) is different from the building owner, the building owner shall notify the tenant(s) within 72 hours of receiving notification of the impairment. | | | |
| ! | NOTICE | These are all of the deficiencies found during the visual inspection and testing listed on this report. This Report does not cover all weekly, month, and Electrical portions of this inspection. | | Owners Rep: | |

# CITY OF PORT ORANGE
# STANDARD CONTRACT FOR SERVICES

This Standard Contract for Services ("Contract") is entered into this 5 day of March, **2024**, by and between the **CITY OF PORT ORANGE**, a Florida municipal corporation, whose principal address is 1000 City Center Circle, Port Orange, Florida 32129 (the "City"), and **PAUL CULVER CONSTRUCTION, INC.** ("Contractor"), a Florida corporation whose principal address is 201 Osceola Avenue, Daytona Beach, Florida 32114. The City and Contractor are collectively referred to herein as the "Parties."

1. *Provision of Services*

(a) The Contractor hereby agrees to perform General Contracting Services for Small Projects in accordance with Request for Proposal 24-01 ("RFP 24-01"). This Contract, together with RFP 24-01, Addendum No. 1, and Contractor's Proposal, all of which may be referred to as the "Contract" and all of which are made a part hereof by reference, shall constitute the formal written contract between the City and Contractor. For convenience, Section 3, Scope of Services of RFP 24-01 and the Contractor's Proposal as submitted by Contractor, are attached hereto as Exhibit "1". In the event of any inconsistencies or conflicts between this Contract, RFP 24-01, Contractor's Proposal, Addendum No. 1, precedence shall be given to the documents in the following order: 1) the terms and conditions of this Contract; 2) RFP 24-01; 3) Addendum No. 1; and 4) Contractor's Proposal. A complete copy of all solicitation documents is available in the Office of the City Clerk, City Hall, 1000 City Center Circle, Port Orange, Florida. Contractor represents that they are familiar with the documents that make up the Contract, as referenced hereinabove.

(b) The time, manner and place for performance of such services shall be:

*Term*: This Contract shall become effective on the last date the Contract is signed by the Parties and continue for a period of two (2) years ("Term").

*Renewals*. Upon written agreement of the Parties, this Contract may be renewed for three (3) one-year periods, subject to City Manager approval and budget appropriation.

*Manner and Place*: The work shall be performed in accordance with and in a manner as required by all current federal, state, county, fire, building and land development codes, laws, ordinances and regulations, and with applicable permits and licenses per the City Code of Ordinances.

*Time and Essence*: Contractor acknowledges that time is of the essence for this Contract.

*Authorization for Services*: This Contract standing alone does not authorize the purchase of any goods or services or require the City to place any orders for goods or service. Authorization for the performance of services by the Contractor under this Contract shall be in the form of written Task Authorization(s) issued and executed by the City and signed by the Contractor. A sample Task Authorization is attached hereto as Exhibit "2." Task Authorization(s) may require a Payment and Performance Bond. Task Authorization(s) requiring a Payment and Performance Bond, shall include an Exhibit attaching the required Payment and Performance Bond. The City reserves the right to

contract with other parties for the goods and services contemplated by this Contract, as determined in the City's sole and absolute discretion.

2. *City Obligations*. In return for the services identified above, the City agrees to compensate the Contractor at the pricing set forth in periodic written quotes at the rates set forth in Exhibit "1," attached hereto, in an amount not to exceed the appropriated budget. All payments shall be governed by the Local Government Prompt Payment Act as set forth in Sections 218.70 through 218.79, Florida Statutes, as amended.

3. *Contract Documents*. The following forms, attached as Exhibit "3," are an integral part of this Contract and must be completed, signed, witnessed and notarized as indicated and returned with signed Task Authorization, when required:

(a) Front Page for Bond (F.S. § 255.05)
(b) Combination Payment and Performance Bond (F.S. § 255.05)

4. *Contract Administration*. The Parks and Recreation Director, Susan Lovallo, shall perform contract administration of this Contract. The City may change the contract administrator, from time to time and at any time, upon written notice to Contractor. For notice provisions, see the paragraph below entitled "Notice."

5. *Liens*. Contractor acknowledges that Contractor shall not be entitled to lien the City or other public property.

6. *Termination for Convenience of the City*

(a) The parties agree that the City may terminate this Contract, or any work or delivery required hereunder, from time to time either in whole or part, whenever the City Manager of Port Orange shall determine that such termination is in the best interest of the City.

(b) Termination, in whole or in part, shall be effected by delivery of a Notice of Termination signed by the City Manager or his designee, mailed or delivered to the Contractor, and specifically setting forth the effective date of termination.

(c) Upon receipt of such Notice, the Contractor shall:

(i) cease any further deliveries or work due under this Contract, on the date, and to the extent, which may be specified in the Notice;

(ii) place no further orders with any subcontractors except as may be necessary to perform that portion of this Contract not subject to the Notice;

(iii) terminate all subcontracts except those made with respect to contract performance not subject to the Notice;

(iv) settle all outstanding liabilities and claims which may arise out of such termination, with the ratification of the Finance Director of Port Orange; and

(v) use best efforts to mitigate any damages which may be sustained by the Contractor as a consequence of termination under this clause.

(d) After complying with the provisions of subparagraph (c), above, the Contractor shall submit a termination claim, in no event later than six (6) months after the effective date of termination, unless one or more extensions of three (3) months each are granted by the Finance Director.

(e) The Finance Director, with the approval of the City Manager, shall pay from the using department's budget, reasonable costs of termination, including a reasonable amount for profit on supplies or services delivered or

made prior to Notice of Termination, and further reduced by the price of the supplies not delivered or the services not provided. This Contract shall be amended accordingly, and the Contractor shall be paid the agreed amount.

(f) In the event that the parties cannot agree on the whole amount to be paid to the Contractor by reason of termination under this clause, the Finance Director shall pay the Contractor the amounts determined as follows, without duplicating any amounts which may have already been paid under the preceding paragraph of this clause:

(i) With respect to all Contract performance prior to the effective date of Notice of Termination, the total of:

(1) the cost of work performed or supplies delivered;

(2) the cost of settling and paying any reasonable claims as provided in paragraph (c) (iv), above;

(3) a sum as profit on (a) determined by the Finance Director to be fair and reasonable.

(ii) The total sum to be paid under (i) above shall not exceed the contract price, as further reduced by the contract price of work or supplies not terminated.

(g) In the event that the Contractor is not satisfied with any payments which the Finance Director shall determine to be due under this clause, the Contractor may appeal any claim to the City Council in accordance with Paragraph 23 of this contract concerning disputes.

7. *Termination for Convenience for Subcontractors*. In accordance with the termination for the convenience of the City provision of this contract, the Contractor shall include similar provisions in any subcontract, and shall specifically include a requirement that subcontractors make all reasonable efforts to mitigate damages which may be suffered. Failure to include such provisions shall bar the Contractor from any recovery from the City whatsoever of loss or damage sustained by a subcontractor as a consequence of termination for convenience.

8. *Termination for Default*. Either party may terminate this Contract, without further obligation, for the default of the other party or its agents or employees with respect to any agreement or provision contained herein. In the event of default by the contractor, the City reserves the right to procure the item(s) bid from other sources and holds the bidder responsible for excess costs incurred as a result. City Council may elect to refrain from doing business with the bidder as stipulated in City Code 2-276 Suspension and Disbarment.

9. *Examination of Records*

(a) The Contractor agrees that the City, or any duly authorized representative, shall, until the expiration of five (5) years after final payment hereunder, have access to and the right to examine and copy any pertinent books, documents, papers and records of the Contractor involving transactions related to this Contract.

(b) The Contractor further agrees to include in any subcontract for more than $10,000 entered into as a result of this Contract, a provision to the effect that the subcontractor agrees that the City or any duly authorized representative shall, until the expiration of five (5) years after final payment under the subcontract, have access to and the right to examine and copy any pertinent books, documents, papers and records of such contractor involved in transactions related to such subcontract, or this Contract. The term subcontract as used herein shall exclude purchase orders for public utility services at rates established for uniform applicability to the general public.

(c) The period of access provided in subparagraphs (a) and (b) above for records, books, documents and papers which may relate to any arbitration, litigation, or the settlement of claims arising out of the performance of this contract or any subcontract shall continue until any appeals, arbitration, litigation or claims shall have been finally disposed of.

10. *Public Records Compliance*. Contractor shall comply with public records laws as set forth in Chapter 119, Florida Statutes, and shall specifically:

(a) Keep and maintain public records required by the City to perform the service.

(b) Upon request from the City's custodian of public records, provide the City with a copy of the requested record or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in Section 119, Florida Statutes, or as otherwise provided by law.

(c) Ensure that public records that are exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the Contract term and following completion of the Contract if the Contractor does not transfer the records to the City.

(d) Upon completion of the Contract, Contractor shall transfer to the City, at no cost, all public records in possession of the Contractor and destroy any duplicate public records that are exempt from public records disclosure requirements. All records stored electronically must be provided to the City, upon request from the City's custodian of public records, in a format that is compatible with the information technology systems of the City.

If Contractor does not comply with a public records request, the City shall deem the non-compliance a breach of this Contract, and the Contractor may be subject to penalties under Section 119.0701, Florida Statutes.

**CONTRACTOR QUESTIONS RELATING TO CONTRACTOR'S DUTIES TO PROVIDE PUBLIC RECORDS RELATING TO THIS CONTRACT MUST BE FORWARDED TO THE OFFICE OF THE CITY CLERK, CITY HALL, 1000 CITY CENTER CIRCLE, PORT ORANGE, FLORIDA 32129; TELEPHONE: (386) 506-5563; E-MAIL: CITYCLERK@PORT-ORANGE.ORG.**

11. *Termination for Non-Appropriation of Funds*

(a) If funds are not appropriated for any succeeding fiscal years subsequent to the one in which this contract is entered into, for the purpose of this Contract, then the City may terminate this Contract upon thirty (30) days prior written notice to the Contractor. Should termination be accomplished in accordance with this Section, the City shall be liable only for payments due through the date of termination.

(b) The City agrees that should it terminate in accordance with this Section, it shall not obtain services which are substantially equal to or similar to those for which this contract was entered into. This provision shall survive any termination of the Contract.

12. *Insurance*. Contractor shall maintain insurance, as required herein, during the life of this Contract. Contractor shall provide to the City, a certificate of insurance endorsing the City of Port Orange as an additional named insured. All insurance coverages of the Contractor shall be primary and non-contributory. All insurance coverages of the Contractor shall not seek contribution from any other insurance or self-insurance available to the City. For workers' compensation coverage, the Contractor's insurance certificate shall include the insurer's waiver of subrogation in lieu of endorsing the City as an additional insured for workers' compensation. The City shall not accept Workers' Compensation Exemptions Contractor may use leased employees if the Contractor ensures that all workers who access the jobsite are employees covered by the employee leasing company, and no non-employees are permitted to access the jobsite. Any Contractor using a leased employee shall complete the City's Leased Employee Affidavit Form Exhibit. Policies for Workers' Compensation may be issued by companies authorized as a group self-insurer by F.S. 440.572.

Policies other than Workers' Compensation shall be issued by insurers licensed and/or duly authorized under Florida Law to do business in the State of Florida and all insuring companies are required to have a minimum rating

of "A-" in the "Best Key Rating Guide" published by A.M. Best & Company, Inc. Contractor shall not commence work under this Contract until the City has received a certificate or certificates of insurance with endorsement evidencing the required insurance. Insurer shall provide the City written notice of cancellation, nonrenewal or any other changes in coverage no later than thirty (30) days prior to the effective date of the change and shall provide notice to the City no later than 10 days after non-payment. The Certificates of Insurance and required insurance policies shall contain provisions that thirty (30) days prior written notice shall be given to the City of any cancellation, intent not to renew, or reduction in the policies or coverages.

Contractor shall require and ensure each of its subcontractors to maintain, until the completion of the subcontractor's work, insurance of the types and to the limits set forth herein. All insurance coverages shall be primary and non-contributory. All insurance coverages of the subcontractors shall not seek contribution from any other insurance or self-insurance available to the City. The Contractor is responsible for ensuring that its subcontractors maintain the required coverage. Failure of the Contractor to ensure the subcontractors maintain the required coverage, shall not relieve the Contractor of any contractual responsibility, obligation or liability.

The City reserves the right to increase insurance coverage as determined for higher risk contracts.

The acceptance by the City of any Certificate of Insurance does not constitute approval or agreement by the City that the insurance requirements have been satisfied or that the insurance policy shown on the Certificate of Insurance is in compliance with this Contract and does not waive the insurance required by this Contract.

Should at any time the Contractor or subcontractors not maintain the insurance coverages required herein, the City may terminate the Contract or at its sole discretion shall be authorized to purchase such coverages and charge the Contractor for such coverages purchased. The City shall be under no obligation to purchase such insurance, nor shall it be responsible for the coverages purchased or the insurance company or companies used. The decision of the City to purchase such insurance coverages shall in no way be construed to be a waiver of any of its rights under the Contract.

13. *A Contract for the purchase* of supplies shall be governed by the City of Port Orange Code of Ordinances, as amended, and such supplies shall be deemed "goods," as defined therein.

14. *Assignability of Contract*. Neither this contract, nor any part hereof, may be assigned by the Contractor to any other party without the express written approval of the City Council.

15. *Modifications or Changes to this Contract*

(a) Change Orders. The Department Head, with the concurrence of the City's signatory as required by the City's Purchasing Policy, shall without notice to any sureties, have the authority to order changes in this Contract which affect the cost or time of performance. Such changes shall be ordered in writing specifically designated to be a change order. Such orders shall be limited to reasonable changes in the services to be performed or the time of the performance. The City will not be held liable for any changes which have not been properly authorized and approved in accordance with this Contract.

(b) If any change under this clause causes an increase or decrease in Contractor's cost of, or time required for the performance of the work hereunder, Contractor shall receive an equitable adjustment in accordance with subparagraph (d), which shall include all compensation to the Contractor, or the City, of any kind in connection with such change, including all costs and damages related to or incidental to such change.

(c) Contractor need not perform any work described in any change order unless it has received a certification from the City that there are funds budgeted and appropriated sufficient to cover the cost of such changes.

(d) No claim for changes ordered hereunder shall be considered if made after final payment in accordance with the Contract.

16. *Sovereign Immunity*. The City expressly retains all rights, benefits and immunities of sovereign immunity in accordance with Section 768.28, Florida Statutes. Notwithstanding anything set forth in any section of this Contract to the contrary, nothing in this Contract shall be deemed as a waiver of immunity or limits of liability of the City beyond any statutory limited waiver of immunity or limits of liability which may have been adopted by the Florida Legislature or may be adopted by the Florida Legislature and the cap on the amount and liability of the City for damages regardless of the number or nature of claims in tort or equity shall not exceed the dollar amount set by the legislature for tort. Nothing in this Contract shall inure to the benefit of any third party for the purpose of allowing any claim against the City which would otherwise be barred under the Doctrine of Sovereign Immunity or operation of law.

17. *Warranties*. Contractor warrants that (1) the supplies to be provided to the City pursuant to this Contract are fit and sufficient for the purpose intended; (2) the supplies are merchantable, of good quality, and free from defects, whether patent or latent, in material or workmanship, and (3) the supplies sold to the City pursuant to this Contract conform to the standards required by this Contract.

Contractor further warrants that Contractor has title to the supplies provided, and that the supplies are free and clear of all liens encumbrances, and security interests. All warranties made in this Contract, together with service warranties and guarantees, shall run to the City and its successors and assigns.

18. *Additional Warranties*. Contractor further expressly warrants that materials and workmanship are warranted from defect for a one-year period. This is a minimum acceptable warranty.

19. *Additional Bond Security*. If any surety bond furnished in connection with this Contract becomes unacceptable to the City, Contractor shall promptly furnish such additional security as may be required from time to time to protect the interests of the City and a person supplying labor and materials in the prosecution of work contemplated by this Contract. Contractor expressly acknowledges that if the work to be performed hereunder is a public work, a Payment and Performance Bond, in accordance with Florida Statutes Section 255.05, in a form acceptable to the City, shall be provided and recorded with the Clerk of Volusia County at Contractors expense.

20. *Inspection*

(a) All supplies (which term throughout this clause includes without limitation raw materials, components, intermediate assemblies, and their products) shall be subject to inspection and test by the City, to the extent practicable at all times and places including the place of manufacturer, and in any event prior to acceptance.

(b) In the event any supplies or lots of supplies are defective in material or workmanship, or otherwise not in conformity with the requirements of this Contract, the City shall have the right either to reject them (with or without instructions as to their disposition) or to require their correction. Supplies or lots of supplies which have been rejected or required to be corrected shall be removed or, if permitted or required by the Finance Director, corrected in place by and at the expense of Contractor promptly after notice, and shall not thereafter be tendered for acceptance unless the former rejection or requirement of correction is disclosed. If Contractor fails promptly to remove such supplies or lots of supplies which are required to be removed or promptly to replace or correct such supplies or lots of supplies, the City may either (i) by contract or otherwise replace or correct such supplies and charge Contractor the cost for such replacement or correction; or (ii) may terminate this Contract for default as provided in the clause of this Contract entitled "Termination for Default." Unless Contractor corrects or replaces such supplies within the

delivery schedule, the Finance Director may require the delivery of such supplies at a reduction in price, which is equitable under the circumstances. Acceptance or rejection of the supplies shall be made as promptly as practicable after delivery, except as otherwise provided in this Contract. Failure to inspect and accept or reject supplies shall neither relieve Contractor from responsibility for such supplies as are not in accordance with the Contract requirements nor impose liability on the City therefor.

(c) The inspection and test by the City of any supplies or lots thereof does not relieve Contractor from any responsibility regarding defects or other failures to meet the Contract requirements, which may be discovered prior to acceptance. Except as otherwise provided in this Contract, acceptance shall be conclusive except as regards latent defects, fraud, or such gross mistakes as amount to fraud.

21. *Liability for Loss or Damage*.

(a) Contractor shall be liable for any loss of, or damage to, City property caused by the negligence, recklessness, or intended wrongful misconduct of Contractor, his/its agents, servants and employees and shall indemnify and save the City harmless against all actions, proceedings, claims, demands, costs, damages and expenses, including attorney's fees, by reason of any suit or action brought for any actual or alleged injury to or death of any person or damage to property other than City property, resulting from the performance of the Contract by Contractor, his/its agents, servants and employees. Contractor shall submit a full written report to the Finance Director within twenty-four (24) hours following the occurrence of such damage, loss or injury.

(b) To the fullest extent permitted by law, in addition to the express duty to indemnify City when there is any causal connection between Contractor's work and any injury, loss, damage, death or property damage, Contractor expressly undertakes a duty to defend City as a separate duty, independent of and broader than the duty to indemnify. The duty to defend agreed to by Contractor hereby expressly include all costs of litigation, attorney's fees, settlement costs and reasonable expenses in connection with the litigation, whether or not the claims made for loss, injury, damage or property damage are valid or groundless and regardless of whether the defense of City is maintained by the City or assumed by Contractor as long as the claims made could be causally connected to Contractor as reasonable determined by City.

22. *Non-discrimination*. During the performance of this Contract, Contractor agrees as follows:

(a) Contractor will not discriminate against any employee or applicant for employment because of race, religion, color, sex, disability, marital status, age or national origin, except where such is a bona-fide occupational qualification reasonably necessary to the normal operation of Contractor. Contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices setting forth the provisions of this non-discrimination clause. Contractor agrees and fully supports and complies with the Americans with Disabilities Act of 1990.

(b) Contractor shall state in all solicitations or advertisements for employees placed by or on behalf of Contractor that Contractor is an equal opportunity employer.

(c) Notices, advertisements and solicitations placed in accordance with federal law, rule or regulation shall be deemed sufficient compliance with this provision. Contractor shall include the provisions of the foregoing subparagraphs (a), (b), and (c) in every subcontract or purchase order of over $10,000 so that the provisions will be binding upon each subcontractor or vendor.

23. *Disputes*. The City Manager, who shall reduce his decision to writing and mail or otherwise furnish a copy thereof to Contractor, shall decide disputes with respect to this Agreement. The decision by the City Manager shall be final and binding unless, within five (5) business days from the date of delivery of the decision of the City Manager,

appeal is made to the City Council in writing and delivered to the City Clerk, Robin L. Fenwick, MMC. The decision of the City Council shall be final and binding unless set aside by a court of competent jurisdiction as fraudulent, capricious, arbitrary, or so grossly erroneous as necessary to imply bad faith, or not to be supported by any evidence.

24. *Force Majeure*. Neither party shall be liable for any delay in performance or failure to perform any obligation hereunder if, and to the extent that, such failure or delay is caused by an event of Force Majeure. Force Majeure shall mean any act, event or condition that is beyond the party's reasonable control, that materially and adversely affects the party's ability to perform its obligations hereunder, and that is not the result of the party's willful neglect, error, omission or failure to exercise reasonable due diligence.

25. *E-Verify*. Contractor shall utilize the U.S. Department of Homeland Security's E-Verify system to verify the employment eligibility of all new employees hired by the Contractor during the term of this Contract and shall expressly require any sub-contractors performing services pursuant to this Contract to likewise utilize the U.S. Department of Homeland Security's E-Verify system to verify the employment eligibility of all new employees hired by the sub-contractor during the term of this Contract.

26. *Controlling Law*. **THIS AGREEMENT CONTAINS IMPORTANT MATTERS AFFECTING LEGAL RIGHTS AND IS ACCEPTED AND ENTERED INTO IN FLORIDA AND ANY QUESTION REGARDING ITS VALIDITY, CONSTRUCTION, ENFORCEMENT, OR PERFORMANCE SHALL BE GOVERNED BY FLORIDA LAW. ANY LEGAL PROCEEDING ARISING FROM OR IN ANY WAY REGARDING THE AGREEMENT SHALL HAVE ITS VENUE LOCATED EXCLUSIVELY IN THE CIRCUIT COURT OF VOLUSIA COUNTY, FLORIDA, AND THE PARTIES HEREBY EXPRESSLY CONSENT AND SUBMIT THEMSELVES TO THE PERSONAL JURISDICTION AND VENUE OF THE COURT.**

27. *Additional Provisions*. This Contract includes all additional provisions as may have been outlined in written quotes and purchase orders and any attachments or exhibits to this Contract whether delivered herewith or subsequently approved as a part hereof, such as drawings or technical specifications prepared in the performance of this work. In the event of a conflict between any attachments or exhibits to this Contract, and this Contract, the language of this Contract shall control.

28. *Integration*. This Contract and the documents incorporated herein by reference shall constitute the whole agreement between the parties. There are no promises, terms, conditions, or obligations other than those contained herein, and this Contract shall supersede all previous communications, representations, or agreements, written or verbal, between the parties hereto.

29. *Notice*. For purposes of this agreement, notices shall be sent as follows:

City:
City of Port Orange
Attention: City Manager
1000 City Center Circle
Port Orange, Florida 32129
(386) 506-5501

Copy to:
City of Port Orange

Attention: Paul K. Culver, President
201 Osceola Avenue
Daytona Beach, Florida 32114
(386) 763-6200 – Telephone
paul@paulculverconstruction.com

Any notice or other communication given under the Contract will be in writing and delivered by hand, sent by facsimile (provided acknowledgement of receipt thereof is delivered to the sender), sent by certified, registered mail, or sent by any nationally recognized overnight courier service to the addresses provided herein. The parties may, from time to time and at any time, change their respective addresses and each will have the right to specify as its address any other address by at least 10 days written notice to the other party.

30. *Contract Construction*

This Agreement may be executed in one or more counterparts, each of which shall be deemed to be an original but all of which together shall constitute one and the same instrument. The delivery by facsimile or e-mail of an executed copy of this Agreement shall be deemed valid as if an original signature was delivered. No contract shall be formed between Contractor and the City until the City signs this Agreement.

31. *Authority to Sign*. Each person signing this Agreement warrants that he or she is duly authorized to do so and to bind the respective party to the Agreement.

## SECTION 3 – SCOPE OF SERVICES AND REQUIREMENTS

**SCOPE OF WORK:** The City of Port Orange (City) is soliciting sealed proposals for General Contracting Services for projects throughout the City with an estimated cost of less than $200,000 each on an as-needed basis.

The specifications are listed below and on the Services Costs/Fees Proposal Form. General Contractors will be responsible for meeting all specifications as outlined herein and on the Services Costs/Fees Proposal Form.

The City reserves the right to offer any project to any selected General Contractor (Contractor) regardless of the estimated dollar amount of the work, and to contract using a purchase order issued by the City.

**SERVICE AND PRODUCT WARRANTY**

All Products are warranted by the Proposer to be free from defects in materials and workmanship. The awarded Contractor will promptly replace any product that proves to be defective at no cost to the City or refund the City the purchase price. The Contractor will be responsible for repairing all of its work during the warranty period, at **no cost** to the City. Contractor agrees to repair and return faulty or defective equipment within thirty (30) days from receipt of request from the City or provide a temporary replacement. Manufacturers standard warranty shall be maintained with the application of all materials furnished for any work performed under the contract resulting from this solicitation. It is the Contractor's responsibility to perform preventive maintenance pursuant to the manufacturer's standard warranty guidelines during the term of the warranty. The Contractor shall provide a one (1) year warranty from the manufacturer, which will include all related products including labor, on all repair and installation work. Warranties for new work shall be for a total of one (1) year unless a different duration is requested by the City. In addition to all other warranties, the Contractor shall be responsible for faulty labor or workmanship and shall promptly correct improper work, without cost to the City, within 24 hours after receipt of notification of such faulty labor or workmanship. If the Contractor fails to correct defects within 24 hours, the City shall be entitled to have such work remedied by an authorized and certified installer, and the General Contractor shall be fully liable for all costs and expenses incurred by the City to remediate the defect(s). Payments in full or otherwise do not constitute a waiver of this warranty.

The Contractor shall reimburse the City for any losses or damages to the City and or personal property as a result of water or other damages due to faulty workmanship and or materials. The Contractor shall provide ready availability of parts and service to maintain all items when requested. The Contractor must provide service within the warranty period. If the repairs cannot be made at the location where the item is located, the Contractor must pick up the item, repair the item and return the item to the location where it is being used. The warranty period(s) will commence on the date of the acceptance by the City. The Contractor shall provide two (2) copies of documentation of all warranty coverage associated with work performed against this Contract, including all manufacturers' warranties. At a minimum, this documentation shall include:

1. Manufacturer and purchasing information;
2. Building physical addresses work was completed on;
3. Number of operating units;
4. Warranty start and expiration dates;
5. Specific warranty coverage detail;
6. Building and specific location on which warranted work was completed on items installed;
7. Points of contact for Warranty work, with address and telephone number;
8. All documentation provided by the manufacturer, including preventive maintenance warranty requirements.

All system installation and repairs shall be accomplished in accordance with applicable standards and specification of the City and individual manufacturer's installation recommendations. It will be the Contractor's responsibility for any and all clearing or cleaning of installation site.

All requested work shall be completed in accordance with all federal, state and local codes, and shall be inspected for compliance by the City's Building Code Enforcement inspector.

The Contractor shall be certified by the systems manufacturers as qualified to install systems (new, restoration or repairs). A written certification from each system manufacturer shall be submitted with bid package or within 24 hours of request. If the Contractor is not certified to install a specific manufacturer's product, the Contractor shall enter into a Sub-contract with a certified installer.

The Contractor shall, and in addition to all other guarantees, be responsible for faulty labor or workmanship and shall promptly correct improper work, without cost to the City, within 24 hours after receipt of notification of such faulty labor or workmanship. If the Contractor fails within 24 hours to correct defects, the Owner shall be entitled to have such work remedied and the Contractor shall be fully liable for all costs and expense reasonably incurred by the City. Payments in full or otherwise do not constitute a waiver of this guarantee. The guarantee period shall be effective for one (1) year after acceptance of the work by the City.

**SERVICE REQUIREMENTS**

The Contractor shall have sufficient number of personnel, materials, transportation and an adequate inventory of tools and equipment to perform work at the job site.

The Contractor shall provide sufficient staff, resources and facilities to ensure that the City's business is handled in a timely manner.

If the Contractor is unable to perform the work in a timely manner as agreed upon, the City shall have the right to rescind the Purchase Order and award to another Contractor.

If the Contractor for any reason fails to remain a Contractor for the City, then all records pertaining to City projects, scheduling, paperwork, warranty information and technical data shall be surrendered to the City within 10 business days.

Normal business hours for the City are 7:00a.m. to 5:00p.m. Monday through Friday. From time to time, work may be requested to be performed after normal business hours, on weekends, or holidays. If work to be performed under this contract is needed after normal business hours, such work must be approved by the City in writing prior to such work beginning. Any work done after normal business hours must be reflected as such on supporting documentation that accompanies applications for payment or invoices.

Emergency Work Requests may be needed from time to time. The Contractor must be able to meet the City's authorized representative within one (1) hour of notice at the job site, to review the scope of work, provide an estimate, and proceed with work after approval by owner, and in general be responsive to the emergency request.

The Contractor shall have at the time of the proposal opening and throughout the term of any contract, a current Florida General Contractors state license applicable to the performance of work as described.

The City reserves the right on a project-by-project basis to provide materials at which time the cost of materials will be deducted from the project price. The City will negotiate with the Contractor prior to the start of the project.

The City authorized representative shall provide a set of plans to the Contractor with a detailed scope of work which identifies the specific job description and the project schedule. A survey shall be conducted by the City's authorized representative or an approved consultant (depending on the size of the project at the discretion of the authorized City representative).

The Contractor acknowledges that work will be performed only after receipt of an authorized Notice to Proceed and/or Purchase Order. If during the course of work, the Contractor encounters unforeseen conditions which impact the cost of the work and which could not initially be evaluated, the Contractor shall not proceed without written authorization in the form of a change order and a change to the Purchase Order.

The Contractor's required time of performance shall commence when the Contractor mobilizes at the job site. Any travel time expenses shall be borne by the Contractor and will not be reimbursed by the City. The Contractor shall be responsible for notifying the City in writing of any conditions detrimental to proper and timely completion of work, including the presence of PCB'S and Asbestos. The Contractor shall not proceed with work until unsatisfactory conditions have been corrected in a manner acceptable to the Contractor and the City. It is the responsibility of the Contractor to locate any underground and above ground utilities and notify the utility companies when trenching or working near any utility lines, such as cable service, water and sewer service, telephone service and power lines.

# EXHIBIT "2"

## Sample Task Authorization

Consisting of 3 Pages

**TASK AUTHORIZATION NO. ___**
**Standard Contract for Services**
**for General Contracting Services for Small Projects**
**dated _____, 2024,**
**Between the City of Port Orange, Florida and Paul Culver Construction, Inc.**

THIS Task Authorization is entered into by and between the **CITY OF PORT ORANGE, FLORIDA**, a chartered municipal corporation with its principal place of business at 1000 City Center Circle, Port Orange, Florida 32129 (the "City") and **Paul Culver Construction, INC.**, Florida corporation, with its principal place of business at 201 Osceola Avenue, Daytona Beach, Florida 32114 ("Contractor"), and hereinafter collectively referred to as the "Parties," and is to that certain Standard Contract for Services relating to General Contracting Services for Small Projects, as dated above, and any amendments thereto, hereinafter collectively referred to as the "Contract." The Parties, in exchange for the mutual covenants contained herein and in the Contract, agree as follows:

1. This Task Authorization expressly modifies the Contract and in the event of a conflict, the terms and conditions of this Task Authorization shall prevail.

2. In addition to all other terms and conditions contained in the Contract, Contractor shall provide _____, and as more particularly described in the Scope of Services attached hereto and incorporated herein as **Task Authorization Exhibit "1."**

3. Contractor shall complete the services to be provided herein no later than _____ from the date of issuance of a written Notice to Proceed by the City to the Contractor.

4. In return for the services identified above, the City agrees to compensate Contractor at the prices set forth in Exhibit "1," attached hereto and made a part hereof, subject to a limit not to exceed $_____. All payments shall be governed by the Local Government Prompt Payment Act as Set forth in Sections 218.70 through 218.79, Florida Statutes, as amended.

5. Contractor shall provide a 100% Combination Payment and Performance Bond in accordance with Florida Statutes Section 255.05, including the Front Page and Certificate for Filing in Public Records, in a form substantially similar to the forms attached hereto as Task Authorization Exhibit "1," and acceptable to the Port Orange City Attorney, and recorded with the Clerk of Volusia County at Contractor's expense. A separate bond shall be provided from the Surety which identifies and covers the scope of work for the project stated in this Task Authorization along with all other provisions of this Task Authorization with the penal sum of such bond being not less that the contract sum described in this Task Authorization. If any surety bond furnished in connection with this Task Authorization becomes unacceptable to the City, Contractor shall promptly furnish such additional security as may be required from time to time to protect the interests of the City and a person supplying labor and materials in the prosecution of work contemplated by this Task Authorization No. 2.

6. This Task Authorization may be executed in one or more counterparts, each of which shall be deemed to be an original but all of which together shall constitute one and the same instrument. The delivery by facsimile or e-mail of an executed copy of this Task Authorization shall be deemed valid as if an original signature was delivered. No contract shall be formed between the Contractor and the City, until the City signs this Task Authorization.

IN WITNESS WHEREOF, the Parties have made and executed this Task Authorization for the purposes herein expressed on the dates set forth below.

# COMBINATION PAYMENT AND PERFORMANCE BOND
# FOR
# PUBLIC CONSTRUCTION

*per Section 255.05, Florida Statutes*
Guaranty for Construction of Public Improvements

BY THIS BOND, We, _____ as Principal, and _____, a corporation, as Surety, are bound to **CITY OF PORT ORANGE, FLORIDA**, a Florida municipal corporation, herein called "Owner" or sometimes referred to as "City," in the sum of _____ **DOLLARS** (**$**_____), for payment of which we bind ourselves, our heirs, personal representatives, successors, and assigns, jointly and severally.

THE CONDITION OF THIS BOND is that if Principal:

1. Performs the terms of that certain _____ having an effective date of _____, entered into by and between the Principal and the City, for _____, hereinafter referred to as the "Contract," being made a part of this bond by reference, at the times and in the manner prescribed in the Contract; and

2. Promptly makes payments to all claimants, as defined in Section 255.05(1), Florida Statutes, supplying Principal with labor, materials, or supplies, used directly or indirectly by Principal in the prosecution of the work provided for in the Contract (the "Work"); and

3. Pays Owner all losses, damages, delay damages (including contractually authorized liquidated damages), expenses, costs, and attorney's fees, including appellate proceedings, that Owner sustains because of a breach or material breach by Principal under the Contract documents; and

4. Performs the guarantee of all work and materials furnished under the Contract for the time specified in the Contract, then this bond is void; otherwise it remains in full force.

**Notice of Nonpayment and Time Limitations**

Any action instituted by a claimant under this bond for payment must be in accordance with the notice and time limitation provisions in Sections 255.02(2), (8) and (10), Florida Statutes.

Any changes in or under the contract documents and compliance or noncompliance with any formalities connected with the contract or the changes does not affect Surety's obligation under this bond.

IN WITNESS WHEREOF, this performance and payment bond is executed in duplicate originals, each of which shall be deemed an original, this _____, day of _____, 20__.

# CITY COUNCIL AGENDA ITEM

**COUNCIL MEETING DATE 6/2/2026**

**SUBJECT:** (B8) Resolution No. 26-25 - Budget Resolution for Fire Suppression System Modifications at the YMCA

**DEPARTMENT:** Parks & Recreation

**GOAL:** 1 - Public Safety

**RECOMMENDED MOTION:** Move to approve a budget transfer for the Amendment to Task Authorization #6 to Paul Culver Construction, Inc. for $55,698, and authorize the Mayor and City Clerk to sign the necessary documents

**SUMMARY:** As part of the Fire Marshal's inspection process for a new fire panel, it was determined that additional fire suppression items are needed in some areas of the YMCA where the use and structure have changed over the years. These changes are necessary to comply with current National Fire Protection Association (NFPA) code requirements.

The modifications include providing required upgrades to the existing sprinkler system, additional smoke detectors, alarm pull stations, fire alarm speakers and strobes, additional emergency lights and other fire suppression items. All upgrades and modifications have been required by the City Fire Marshal pursuant to current code requirements and increase the project cost by $55,698.

The project expenditure account does not currently have sufficient budgeted funds to cover this additional expense. Staff is requesting a budget transfer from the Fund Balance of the Recreation Facilities Fund (Fund 106) to the project expenditure account to fund the required improvements.

Timely completion of this work is critical, as the YMCA operates after-school programs and day camps that require a current fire inspection approval from the State of Florida for licensing purposes.

PRESENTER: Susan Lovallo

RESOLUTION NO. 26-25

A RESOLUTION OF THE CITY OF PORT ORANGE, VOLUSIA COUNTY, FLORIDA, APPROPRIATING OPERATING, AND CAPITAL FUNDS FOR THE FISCAL YEAR 2025-2026 BUDGET; TO APPROPRIATE FUNDS FOR THE UPGRADES TO THE YMCA FIRE ALARM MODIFICATIONS PROJECT FROM EXISTING AVAILABLE FUND EQUITY IN THE RECREATION FACILITIES FUND BALANCE (106) IN THE AMOUNT OF $55,698 SETTING FORTH REVENUES AND EXPENDITURES; PROVIDING FOR SCRIVENER'S ERRORS; AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, the City Council desires to budget for the designation of funds from the existing available fund equity in the Recreation Facilities Fund (Fund 106) to the appropriate project expenditure account within the Recreation Facilities Fund to fund the additional upgrades and modifications to the fire alarm system at the YMCA; and

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF PORT ORANGE, VOLUSIA COUNTY, FLORIDA:

Section 1. The above Recitals are incorporated by reference into the body of this Resolution.

Section 2. The funds for the City operating and capital items are hereby appropriated as set forth in Composite Exhibit A, attached hereto, which reflects revenues and corresponding expenditures for the designated project.

Section 2. The budget item adopted in the preceding section shall govern the expenditures relating to such items for the City during the ensuing fiscal year effective October 1, 2025, through September 30, 2026.

Section 3. Supplemental appropriations, reductions of appropriations, emergency appropriations, and interdepartmental transfers of appropriations may be affected by the City Council and the City Manager as deemed necessary in strict compliance with the procedures specified in Chapter 2, Article VI, Division 3, Code of Ordinances, City of Port Orange, Florida.

Section 4. Scrivener's Errors. Typographical errors and other matters of a similar nature that do not affect the intent of this Resolution, as determined by the City Clerk and City Attorney, may be corrected.

Section 5. This resolution shall become effective immediately upon adoption.

# CITY COUNCIL AGENDA ITEM

**COUNCIL MEETING DATE 6/2/2026**

---

**SUBJECT:** (B9) Resolution No. 26-26 - Waiver of Building Permit Fees to bring a Substantially Damaged Structure into Compliance

**DEPARTMENT:** Community Development

**GOAL:** 3 - Quality of Life 2 - Infrastructure

---

**RECOMMENDED MOTION:** Move to approve Resolution No. 26-26.

---

**SUMMARY:** At the March 18, 2025, City Council Meeting, Council approved waiving building permit fees for structures damaged by Hurricanes Ian, Nicole, and Idalia for participants in the FEMA Hazard Mitigation Grant Program (HMGP), FEMA Flood Mitigation Assistance (FMA) Program, or the Volusia County Transform 386 Program, as well as for property owners bringing substantially damaged structures into compliance with the City's Land Development Code (LDC) using funds other than state or county grant funding (Resolution No. 25-18). At the time Resolution No. 25-18 was approved, building permit fees for work associated with Hurricane Milton were waived through July 28, 2025, pursuant to Resolution No. 25-10. Therefore, the current resolution waiving building permit fees for structures determined to be substantially damaged by the city, or for participants in the FEMA Hazard Mitigation Grant Program (HMGP), FEMA Flood Mitigation Assistance (FMA) Program, Elevate Florida Program, or the Volusia County Transform 386 Program, does not clearly include building permits submitted due to Hurricane Milton.

Staff has recently begun receiving building permit applications for the demolition and rebuilding of homes through the Volusia County Transform 386 Program due to damage from Hurricane Milton, as well as applications from property owners using funding sources other than federal, state or county grant programs to demolish and rebuild homes that were determined by the City to be substantially damaged as a result of Hurricane Milton.

Staff requests approval of Resolution No. 26-26, which will amend and restate Resolution No. 25-18 to waive building permit fees for property owners who participate in the FEMA Hazard Mitigation Grant Program (HMGP), FEMA Flood Mitigation Assistance (FMA) Program, Elevate Florida Program, or the Volusia County Transform 386 Program, or who are bringing substantially damaged structures into compliance with the Florida Building Code, FEMA National Flood Insurance Program (NFIP) requirements, and the City's LDC, regardless of funding source, including grant funding, personal funds, or other sources. This resolution will extend the building permit fee

waivers to include demolition, repair, or rebuilding of structures that City Staff determines are substantially damaged, as well as participants in a federal, state or county grant program.

PRESENTER: Tim Burman

# RESOLUTION NO. 26-26

A RESOLUTION OF THE CITY COUNCIL OF PORT ORANGE FLORIDA AMENDING AND RESTATING RESOLUTION NO. 25-18 RELATING TO PROVISION OF A WAIVER OF BUILDING PERMIT FEES FOR REPAIRS RELATED TO BUILDINGS AND STRUCTURES DETERMINED BY THE CITY OF PORT ORANGE TO BE SUBSTANTIALLY DAMAGED BY HURRICANES IAN, NICOLE, OR MILTON FOR CURRENT PARTICIPANTS IN THE VARIOUS STATE AND FEDERAL GRANT PROGRAMS, INCLUDING BUT NOT LIMITED TO THE CITY'S FEMA HAZARD MITIGATION GRANT PROGRAM (HMGP), FLOOD MITIGATION ASSISTANCE (FMA), ELEVATE FLORIDA, OR VOLUSIA COUNTY'S TRANSFORM 386 PROGRAM SEEKING ASSISTANCE AVAILABLE FOR HURRICANES IAN, NICOLE, IDALIA, AND MILTON; PROVIDING FOR A WAIVER OF BUILDING PERMIT FEES FOR THOSE WITH REPAIRS RELATED TO BUILDINGS AND STRUCTURES DETERMINED BY THE CITY OF PORT ORANGE TO BE SUBSTANTIALLY DAMAGED BY HURRICANES IAN, NICOLE, OR MILTON AND WHO ARE BRINGING SAID BUILDINGS AND STRUCTURES INTO COMPLIANCE WITH THE FLORIDA BUILDING CODE, FEMA NATIONAL FLOOD INSURANCE PROGRAM (NFIP) REQUIREMENTS, AND/OR THE CITY'S LDC, REGARDLESS OF THE FUNDING SOURCE, WHICH MAY INCLUDE GRANT FUNDING, PERSONAL FUNDS, OR OTHER SOURCES; PROVIDING FOR AN INTENT AND PURPOSE OF THIS RESOLUTION; PROVIDING FOR REPEAL OF CONFLICTING RESOLUTIONS; PROVIDING FOR SEVERABILITY AND PROVIDING AN EFFECTIVE DATE.

WHEREAS**,** Hurricanes Ian and Nicole caused significant damage to properties within the geographic area of the City of Port Orange in late September and early November of 2022, respectively; and

WHEREAS, Hurricane Milton caused significant damage to properties within the geographic area of the City of Port Orange in early October of 2024; and

WHEREAS**,** Section 252.38(3), *Florida Statutes,* provides authority for local governments such as the City of Port Orange to declare a local state of emergency and to take actions in emergency situations such as waiving the procedures and formalities otherwise required of political subdivisions by State law; and

WHEREAS, the permit fee waivers established by Executive Order and Resolution No.23-21 for repairs associated with bringing a building or structure that has been determined by the City of Port Orange to have been substantially damaged due to Hurricanes Ian and Nicole ended on December 31, 2023;

WHEREAS, the permit fee waivers established by Executive Order and Resolution No.25-10 and Resolution No. 25-18 for repairs associated with bringing a building or

structure that has been determined by the City of Port Orange to have been substantially damaged due to Hurricane Milton ended on July 28, 2025; and

WHEREAS, due to the significant and widespread impacts of Hurricanes Ian, Nicole, and Milton to the City of Port Orange, the recovery effort has been lengthy and ongoing, specifically for those citizens who are currently in the process of seeking recovery and assistance through the City's FEMA Hazard Mitigation Grant Program (HMGP) or City's FEMA Flood Mitigation Assistance (FMA), or Volusia County Transform 386 Program, Elevate Florida, and other available state and federal grant programs to bring a building or structure that has been determined by the City of Port Orange to have been substantially damaged by Hurricanes Ian, Nicole, and Milton into compliance; and

WHEREAS, due to the significant and widespread impacts of Hurricanes Ian, Nicole, and Milton to the City of Port Orange, the recovery effort has been lengthy and ongoing, specifically for those citizens currently funding their recovery efforts to bring a building or structure that has been determined by the City of Port Orange to have been substantially damaged by Hurricanes Ian, Nicole, and Milton into compliance, regardless of the funding source, which may include grant funding, personal funds, or other sources; and

WHEREAS**,** due to the protracted process of seeking recovery and assistance from the impacts of Hurricanes Ian, Nicole, and Milton for those citizens currently navigating the particular requirements and timelines of the City's FEMA Hazard Mitigation Grant Program (HMGP), City's FEMA Flood Mitigation Assistance (FMA), Volusia County's Transform 386 Program, Elevate Florida, and other available state and federal grant programs to bring a building or structure that has been determined by the City of Port Orange to have been substantially damaged by Hurricanes Ian, Nicole, or Milton into compliance, the City desires to provide building permit waivers for said citizens in a continuing effort to assist those in their ongoing recovery efforts; and

WHEREAS, due to the protracted process of recovery from the impacts of Hurricanes Ian, Nicole, and Milton for those citizens funding their recovery efforts, regardless of the funding source, which may include grant funding, personal funds, or other sources, to bring a building or structure that has been determined by the City of Port Orange to have been substantially damaged by Hurricanes Ian, Nicole, or Milton into compliance, the City desires to provide building permit waivers for said citizens in a continuing effort to assist those in their ongoing recovery efforts; and

WHEREAS, in addition to the assistance available for Hurricanes Ian, Nicole, and Milton, assistance as a result of Hurricane Idalia has been made available for repairs demolition, or rebuilding of buildings associated with damage due to Hurricanes Ian, Nicole, and Milton; and

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Port Orange, Florida, as follows:

SECTION 1. Recitals. The foregoing recitals are hereby fully incorporated herein by this reference and are deemed a material part of this Resolution.

SECTION 2. The City Council of the City of Port Orange hereby approves a waiver of permit fees for building permits for demolition, repair, or rebuilding of buildings and structures associated with damage due to Hurricanes Ian, Nicole, or Milton, for property owners who participate in the FEMA Hazard Mitigation Grant Program (HMGP), FEMA Flood Mitigation Assistance (FMA) Program, the Volusia County Transform 386 Program, Elevate Florida, and other available state and federal grant programs, to bring buildings and structures determined by the City of Port Orange to have been substantially damaged by Hurricanes Ian, Nicole, or Milton into compliance; and for those property owners currently funding their recovery efforts to bring buildings and structures determined by the City of Port Orange to have been substantially damaged by Hurricanes Ian, Nicole, or Milton into compliance, regardless of the funding source, which may include grant funding, personal funds, or other sources.

SECTION 3. For purposes of this resolution, the repairs may include but is not limited to building permits to elevate, demolish, repair, or rebuild structures.

SECTION 4. All resolutions or parts of resolutions in conflict with the provisions of this Resolution are hereby repealed to the extent of such conflict.

SECTION 5. If any provision of this Resolution or the application thereof to any person or circumstance is held invalid, the invalidity shall not affect other provisions or applications of this Resolution which can be given effect without the invalid provision or application, and to this end the provisions of this Resolution are declared severable.

SECTION 6. Resolution No. 25-18 is hereby amended and superseded.

SECTION 7. This Resolution No. 26-26 shall become effective immediately upon adoption by the City Council.

# CITY COUNCIL AGENDA ITEM

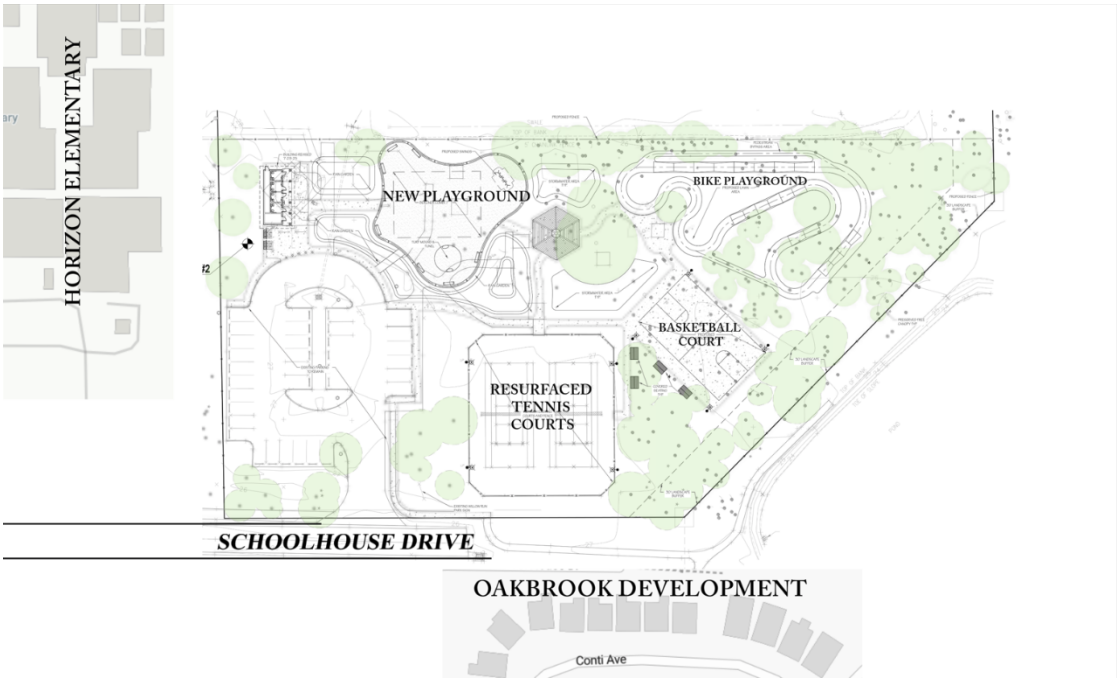
**COUNCIL MEETING DATE 6/2/2026**

---

**SUBJECT:** (B10) Resolution No. 26-27 - Approval to apply for a Volusia ECHO Grant Application for the Willow Run Park Expansion

**DEPARTMENT:** Parks & Recreation

**GOAL:** 3 - Quality of Life



---

**RECOMMENDED MOTION:** Move to approve Resolution No. 26-27.

---

**SUMMARY:** Parks and Recreation staff is requesting permission to apply for a Volusia ECHO grant to improve Willow Run Park to include a new restroom facility, lighted basketball court, bicycle playground and a traditional playground. Improving this area and offering more recreational activities will enhance the value of the park to residents and visitors. If awarded, ECHO will require the City to commit up to a $2,000,000 match. An additional budgeted amount of $6,000 is required for ECHO signage, which brings the total project cost to $4,006,000.00. Willow Run Park Expansion is a bond project.

If awarded a Volusia County ECHO Grant, the City would be required to provide restrictive Covenants to the County that will limit future use of the improved areas for twenty years. Those restrictions include the site remaining a park and maintenance of the park and amenities as described in the contract.

PRESENTER: Susan Lovallo

## 8.4 Restrictive Covenants

Prepared by and return to:
[NAME]
County of Volusia
Legal Department
123 West Indiana Avenue
DeLand, Florida 32720

**ECHO GRANT RESTRICTIVE COVENANTS AND LIEN**

THESE ECHO GRANT RESTRICTIVE COVENANTS AND LIEN are entered into this [DATE] day of [MONTH] 20 [YEAR], by [COMPLETE LEGAL NAME], with its principal place of business at [STREET ADDRESS] (hereinafter referred to as "Grant Recipient" or "Owner") and shall be effective for a period of **[insert years from guidelines]** years from the date of recordation in the Office of the Clerk of the Circuit Court of Volusia County, Florida.

WHEREAS, the Owner is the fee simple titleholder of the Property located at [**Project Street Address, Project City]** **,** Volusia County, Florida, (hereinafter the "Property") as more particularly described in the legal description of Exhibit A, attached to and made a part hereof; and

WHEREAS, the **Grant Recipient** is to receive funds from the ECHO Grant Program administered by the County of Volusia, with its administrative offices located at 123 W. Indiana Avenue, DeLand, Florida 32720, (hereinafter referred to as the "County"), in the amount of $ **(Grant Award Amount)**, to be used for the construction or improvement as specifically described in the ECHO Grant Application and its attached documents for public use on the Property; and

WHEREAS, said County ECHO Program funds have been or will be expended for the purpose of acquisition, restoration, construction, and improvement of environmental, cultural, historic, and outdoor recreation projects for the public's use throughout Volusia County.

NOW THEREFORE, as part of the consideration for the ECHO Grant, the Grant Recipient hereby makes and declares the following restrictive covenants which shall run with the title to said Property and be binding on the Grant Recipient as owner of the Property and, if any, its heirs, successors in title, legal representatives and assigns, for the period stated in the preamble above:

1. The Grant Recipient grants to the County a security interest in the Property in the amount of $ [**Grant Amount]**, for the period stated in the recitals above.

2. The Grant Recipient agrees to maintain the Property as an ECHO facility as defined in the ECHO Application and as described in ECHO Application [App Number] , including, but not limited to, maintaining the facility, maintaining public access for the covenant period, complying with applicable laws, including the Americans with Disabilities Act, and complying with monitoring requirements.

3. The Grant Recipient agrees that the County, its agents and its designees shall have the right to enter upon and inspect the Property at all reasonable times in order to ascertain whether the conditions of the Grant Award Agreement and these covenants are being observed.

4. For historic projects, the Grant Recipient agrees to maintain the Property in accordance with good preservation practices and in compliance with the Secretary of the Interior's Standards for Rehabilitation.

5. To ensure the ability to repay the Grant Amount, the Grant Recipient agrees to maintain unencumbered equitable value in the Property of least the Grant Amount during the Restrictive Covenant Period. The Grant Recipient shall not mortgage or otherwise hypothecate the equitable value of the Property in excess of the Grant Amount.

6. The Grant Recipient agrees that these restrictions shall encumber the Property for a period of **[insert years]** years from the date of recordation with the Clerk of Court, and that if a restriction is violated during the Restrictive Covenant period, the County shall be entitled to liquidated damages pursuant to the following schedule:

a. If any a violation occurs or begins to occur within the first half of the Restrictive Covenant period, the County shall be entitled to return of the entire grant amount;

b. If the violation occurs within the second half of the Restrictive Covenant period, the County shall be entitled to a prorated return of the grant amount calculated using the following equation: the entire grant amount less the quotient of two (2) divided by the number of years (partial years shall count as a full year) in the Restrictive Covenant period that are in excess of half of the Restrictive Covenant period (Liquidated damages = Grant Amount – (2/Total Years of Restrictive Covenant period x years past the midpoint x Grant Amount)

7. If the Grant Recipient violates any part of these Restrictive Covenants or the Grant Award Agreement dated _____, then the Grant Recipient will be in default and the County shall have the right to exercise any of the following rights:

a. The County will have the right to declare the liquidated damages described in paragraph 5, plus interest at the statutory rate from the time of the Grant Recipient's receipt of the grant funds, to be immediately due and payable without notice or demand on the Grant Recipient, which notice or demand are hereby expressly waived by the Grant Recipient, and upon the making of any such declaration, the entire amount shall become immediately due and payable;

b. The County may enforce its security interest in the Property to collect the entire amount described in paragraph 6a. through foreclosure proceedings or any other manner allowed by law;

c. All cash proceeds received by the County in respect of any sale of, collection from, or other realization upon all or any part of the Property and all payments made in respect of the Property and received by the County may, in the discretion of the County, be held by the County as collateral for the security interest plus interest, costs and fees, or may be applied (after payment to the County of the reasonable expenses, including attorneys' fees and legal expenses, incurred by the County in retaking, foreclosing, collecting, selling, or disposing of the Property) at any time in whole or part by the County against all or any part of Grant Recipient's obligations in such order as the County shall elect. Any surplus of such payments held by the County and remaining after payment in full of all of the obligations shall be paid over to the Grant Recipient or to whomsoever may be lawfully entitled to receive such surplus. If there is a deficit after sale of the Property, the Grant Recipient shall remain liable for any obligations remaining unpaid.

8. The County acknowledges and agrees that any liens or lien rights it may have or it may be entitled to in the Property owned by the Grant Recipient are and shall be subordinate to the lien rights of any and all lienholders whose liens were recorded before this document's date of recordation. Under no circumstance shall the County's liens or lien rights be subordinated to any lienholders other than those whose liens were recorded before this document's date of recordation.

9. The Grant Recipient agrees that the Department shall incur no tax liability as a result of these restrictive covenants.

IN WITNESS WHEREOF, the Grant Recipient has read, understood, and voluntarily consents these Restrictive Covenants and has hereto affixed their signature.

LEGAL DESCRIPTION

RESOLUTION NO. 26-27

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF PORT ORANGE, VOLUSIA COUNTY, FLORIDA, AUTHORIZING THE SUBMISSION OF AN APPLICATION FOR FINANCIAL ASSISTANCE TO VOLUSIA COUNTY, VOLUSIA ECHO GRANT PROGRAM FOR WILLOW RUN PARK IMPROVEMENTS; AUTHORIZING THE CITY MANAGER OR DESIGNEE TO EXECUTE ALL DOCUMENTS NECESSARY FOR THE APPLICATION SUBMITTAL AND GRANT ADMINISTRATION; AUTHORIZING THE CITY MANAGER TO EXECUTE THE RESTRICTIVE COVENANTS; PROVIDING FOR MATCHING FUND CONTRIBUTION; PROVIDING FOR COMPLIANCE WITH ECHO PROGRAM REQUIREMENTS; AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, the City of Port Orange is committed to improving the quality of life for residents by providing parks and recreation opportunities that meet the changing needs of the community; and

WHEREAS, the County of Volusia provides financial assistance under the Volusia ECHO Grant Program for the encouragement of Environmental, Cultural, Historic, and Outdoor projects that benefit Volusia County; and

WHEREAS, the City Council of the City of Port Orange is proposing improvements to Willow Run Park; and

WHEREAS, the City Council of the City of Port Orange desires to authorize the submission of an application for financial assistance to the County of Volusia under the Volusia ECHO Grant Program for an amount up to $2,000,000.00 for the Willow Run Park Improvements Project.

WHEREAS, the City Council of the City of Port Orange finds that submission of the ECHO grant application and implementation of the Willow Run Park Improvements

Project serves a valid public purpose and is in the best interest of the citizens of the City of Port Orange.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF PORT ORANGE, VOLUSIA COUNTY, FLORIDA:

Section 1. The foregoing recitals are true and correct and are incorporated herein as if fully set forth herein by this reference.

Section 2. The City Council of the City of Port Orange hereby supports and approves the submission of the Grant Application for the Willow Run Park Improvements Project in the amount of $2,000,000.00.

Section 3. The city is committed to a $2,000,000.00 cash match contribution plus a $6,000.00 cost for required signage not covered by the grant, for a total match of $2,006,000.00. The total project cost is $4,006,000.00.

Section 4. The City Manager or designee is authorized to execute any documents and contracts related to the grant application, acceptance, and administration of said grant.

Section 5. The City of Port Orange agrees to comply with all applicable requirements of the Volusia County ECHO Program, applicable Florida Building Codes, ADA accessibility standards, procurement requirements, and all other applicable local, state, and federal regulations associated with the project.

Section 6. The City Manager is hereby authorized to execute the Restrictive Covenants.

Section 7. This resolution shall become effective immediately upon adoption.

17. Mandatory Workshop was attended by: **Theresa E. Brooks**

    Date of Workshop**: April 23, 2026**

PROJECT DESCRIPTION

18. Describe the project and explain how it will achieve the goals of Resolution 2020-79 to plan for future growth of Volusia County and enhance the quality of life for its residents (ECHO Guidebook p. 3): **Willow Run Park improvements will advance the goals of Resolution 2020-79 by expanding accessible, user-oriented outdoor recreation and enhancing quality of life for Volusia County residents. The project upgrades an existing public park with a new restroom, accessible routes and parking, an expanded playground, accessible bike track, improved courts with LED lighting, and added seating, pavilions, and landscaping. These improvements increase capacity, safety, and usability for residents of all ages and abilities while supporting future growth through modernized, sustainable recreation infrastructure. This aligns with the ECHO program's focus on funding outdoor recreation projects that enhance community well-being and access to physical activity.**

19. Describe the project and construction timeline:

    - **Final design and permitting coordination: Spring–Summer 2026**
    - **Bid solicitation and contractor procurement: Summer 2026**
    - **Construction mobilization and site preparation: Late Summer 2026**
    - **Major construction activities, including utilities, restroom construction, courts, playground improvements, pathways, lighting, landscaping, irrigation, and accessibility upgrades: Fall 2026 through Spring 2027**
    - **Final inspections, punch-list completion, and project closeout: Spring–Summer 2027**

How does the project design incorporate green infrastructure or nature-based solutions and meet sustainability standards (Green Building Standards | US EPA)?

**The Willow Run Park improvements incorporate green infrastructure and sustainable design principles with efficient site planning, water-conscious landscaping systems, durable**

DRAFT

**materials, and infrastructure improvements intended to support long-term environmental performance. The project enhances an existing public park rather than developing undeveloped land, maximizing the use of existing community infrastructure while improving accessibility, safety, and recreational capacity.**

**The project includes upgraded landscaping, irrigation, drainage, and site circulation systems designed to reduce runoff impacts and improve long-term site sustainability. The irrigation system utilizes dripline technology with pressure-compensating emitters, check valves, optimized spacing, rain sensors, and metered controls to minimize water waste and deliver irrigation efficiently to planted areas.**

**The plans also incorporate sustainable infrastructure elements including LED lighting for recreational courts, modernized utility coordination, and pressure-regulated plumbing systems that contribute to reduced energy and water consumption. The project documentation references compliance with Florida Building Code Energy Conservation standards, supporting efficient system performance and reduced operational demand over the life of the facility.**

**Nature-based and environmentally responsible site features include expanded landscaped areas, turf and planting improvements, and preservation-focused site coordination intended to improve aesthetics, shade, stormwater performance, and user comfort. The project manual also requires environmental protection measures during construction to minimize impacts to air, waterways, soils, and surrounding properties throughout implementation.**

**Collectively, these improvements align with sustainable design best practices and support the goals of the U.S. EPA Green Building Standards by promoting resource efficiency, long-term durability, reduced maintenance demands, and environmentally responsible public recreation infrastructure.**

20. How will the project conserve water and energy consumption?

**The Willow Run Park improvements incorporate several water-efficient design elements that support responsible resource use. The irrigation system utilizes dripline technology with pressure-compensating emitters, check valves, and optimized spacing to deliver water directly to plant roots while minimizing evaporation and runoff. A rain sensor and controller further enhance efficiency by preventing unnecessary irrigation during rainfall, and a metered system allows for monitoring of water usage over time. Additionally, pressure-reducing valves within the plumbing system help prevent excessive water flow, supporting overall conservation. These components collectively promote water efficiency and align with best practices for long-term resource management.**

21. What green building standards, certifications, or best practices will guide the design and construction of this project?

**The Willow Run Park Improvements project will be guided by sustainable design principles, applicable Florida Building Code standards, and best municipal practices that promote long-**

DRAFT

**term environmental performance, resource conservation, and resilient public infrastructure. The project incorporates design and construction elements consistent with the Florida Building Code Energy Conservation standards and aligns with sustainability objectives identified within the City of Port Orange Comprehensive Plan and Green Initiative policies.**

**Our project construction documents reference compliance with the 2023 Florida Building Code and Florida Energy Conservation Code requirements for building systems, plumbing, electrical coordination, and site infrastructure. The project also incorporates energy-efficient LED lighting, pressure-regulated plumbing systems, water-efficient irrigation controls, and durable low-maintenance materials intended to reduce long-term operational demand and lifecycle costs.**

**The City of Port Orange Comprehensive Plan encourages the use of Low Impact Development (LID) principles, Florida-friendly landscaping, water conservation practices, green infrastructure systems, and sustainable site design strategies. Consistent with these policies, the Willow Run Park project incorporates landscaped open space improvements, upgraded drainage and irrigation systems, efficient water distribution technologies, pedestrian connectivity, and recreation-focused green space enhancements within an existing developed park site.**

**In addition, the City's Green Initiative promotes energy-efficient lighting, sustainable municipal infrastructure, and environmentally responsible public facility design. The project's design team will utilize established municipal construction standards, code-compliant engineering practices, ADA accessibility requirements, and environmentally responsible construction protocols throughout implementation to support long-term sustainability, resiliency, and reduced maintenance impacts.**

22. Will the project comply with the ADA accessibility requirements (Americans with Disabilities Act of 1990, As Amended | ADA.gov)? ☒ Yes ☐ No

Describe the ADA components of the project:

**The Willow Run Park improvements incorporate ADA accessibility through compliance with the Florida Building Code and applicable accessibility standards, ensuring that all new facilities are designed for inclusive use. The plans include accessible pathways, ramps, and site circulation connecting key amenities such as parking, restrooms, playground areas, and courts, supporting barrier-free movement throughout the park. Accessible design is further reinforced through features such as designated accessible parking, curb transitions, and coordination of grades and clearances to meet required standards. Collectively, these elements ensure the park is usable by individuals of all abilities and aligns with ADA requirements for public recreational facilities.**

23. If applicable, describe any additional phases: n/a

PROJECT TEAM

DRAFT

24. Identify the project manager and budget officer for this project, including their name, role, phone number, email address, and a brief description of their experience managing projects and budgets of similar scope and complexity. You may also list any additional staff dedicated to the project by name and role:

    **Susan Lovallo, Director, Parks & Recreation Department; Experience: Ms. Lovallo has demonstrated experience leading both park construction and renovation projects, including oversight of the Coraci Sports Complex, renovations to All Children's Park, and redevelopment of the City's multi-use recreation center ("The REC"). Her role in managing capital improvements involves facility renovation, adaptive reuse, and coordination of design, funding, and construction, with a focus on accessibility, multi-generational programming, and enhanced community quality of life.**

    **Additional staff dedicated to the project: Parks & Recreation Director (Project Lead) - Overall leadership, stakeholder coordination, project alignment; Parks & Recreation Project Manager - Day-to-day coordination, scheduling, contractor communication; City Engineer / Engineering Staff - Design review, permitting, ADA compliance, inspections; Public Works / Construction Manager - Construction oversight, site logistics, safety, utilities/drainage; Finance / Grants Administrator - Budgeting, procurement, grant compliance, reporting; Community Development / Planning - Land use, permitting support, public engagement; Consultants (Architect/Engineer) - Design, technical plans, construction support; Contractor - Construction execution, materials, site management.**

<u>PERFORMANCE MEASURES</u>

25. Describe the project's goals and objectives, including what the project aims to achieve and how the outcomes will benefit the public:

    **The primary objectives of the Willow Run Park improvements are to modernize and expand recreational amenities, enhance accessibility for users of all abilities, and improve overall site functionality and safety. The project includes the addition and upgrade of key features such as a new restroom facility, playground, courts, pathways, parking, and site furnishings, supported by updated civil, electrical, and plumbing systems to ensure dependable and code-compliant infrastructure. The project also emphasizes efficient site design through improved circulation, drainage, and irrigation systems, contributing to long-term maintenance and operational sustainability. Overall, the project is intended to increase community use, support future growth, and elevate the quality of life for residents by providing a safe, accessible, and well-equipped public park.**

26. Elaborate on how these goals and objectives will be measured over the length of the restrictive covenant period:

    **The success of the Willow Run Park Improvements project will be measured throughout the restrictive covenant period through ongoing monitoring of park usage, accessibility, safety, operational performance, and long-term infrastructure condition. The City of Port Orange Parks & Recreation Department will evaluate whether the project is achieving its intended**

DRAFT

**goals of expanding recreational opportunities, increasing public access, improving safety, and enhancing overall quality of life for residents.**

**Increased community use will be measured through observed park attendance, participation in recreational activities, organized programming, court and playground utilization, and overall public engagement at the facility. The City will monitor usage trends during peak and non-peak periods to assess how the improvements support growing recreational demand and community needs over time. Public feedback, resident comments, and user satisfaction may also be used to evaluate the effectiveness of the improvements and identify future maintenance or operational needs.**

**Accessibility objectives will be measured through continued compliance with ADA standards and routine inspection of accessible features, including pathways, parking areas, restroom facilities, playground access points, site circulation routes, and recreational amenities. The City will conduct ongoing evaluations to ensure facilities remain safe, inclusive, and usable for individuals of all ages and abilities.**

**Safety and site functionality goals will be assessed through regular maintenance inspections, lighting evaluations, condition assessments, and monitoring of infrastructure performance. The upgraded civil, plumbing, drainage, irrigation, and electrical systems will be routinely maintained and evaluated to ensure reliable operation, code compliance, and long-term functionality. Maintenance records, repair response times, inspection reports, and operational logs will help measure the effectiveness and sustainability of the improvements over time.**

**Operational sustainability objectives will also be measured through monitoring of irrigation efficiency, drainage performance, landscape health, facility durability, and overall maintenance demands. The project's improved circulation patterns, modernized infrastructure systems, and energy- and water-conscious design elements are intended to reduce long-term operational costs while maintaining a high-quality recreational environment for the public.**

DRAFT

<u>BUDGET INFORMATION</u>

Applicants will use Budget Detail Chart to create budget once application is complete. Budgets must be accurate and realistic, as projects will be held to the funding amount approved at the time of application submittal.

27. The budget should be presented by each type of funding.
    a. UC = Unencumbered Cash
    b. LM = Land Match
    c. IK = In-kind
    d. PSC = Previously Spent Cash

    We acknowledge and agree to this requirement. ☒ Yes ☐ No

28. The budget must include temporary and permanent ECHO signage.

We acknowledge and agree to this requirement. ☒ Yes ☐ No

Note: Signs may not be funded with ECHO funding.

| BUDGET DETAIL CHART Construction Phase Expenditures *Add rows as needed* | UC + | LM + | IN-KIND + | PSC | = MATCH | ECHO | TOTAL |
|---|---|---|---|---|---|---|---|
| General Requirements: | | | | | | | |
| Mobilization, Waste Collection, etc. | . | . | . | . | . | . | . |
| Contractor Fees | . | . | . | . | . | . | . |
| Professional Services: | | | | | | | |
| Consultant Services | . | . | . | . | . | . | . |
| Construction: | 2000000 | | | | 2000000 | 2000000 | 4000000 |
| Earthwork/Excavation | . | . | . | . | . | . | . |
| Concrete, Stucco, Paving | . | . | . | . | . | . | . |
| Wiring, Smoke Detectors, | . | . | . | . | . | . | . |
| Plumbing | . | . | . | . | . | . | . |
| HVAC | . | . | . | . | . | . | . |
| Landscaping | . | . | . | . | . | . | . |
| Specialties | | | | | | | |
| Playground Equipment | . | . | . | . | . | . | . |
| Picnic tables, grilles | . | . | . | . | . | . | . |
| Signage: | 6000 | | | | 6000 | | 6000 |
| Educational Signage | . | . | . | . | . | . | . |
| ECHO Temp Sign | . | . | . | . | . | . | . |
| ECHO Permanent Sign | . | . | . | . | . | . | . |
| PROJECT TOTALS | 2006000 | | | | 2006000 | 2000000 | 4006000 |

Line items should be made to match your project (examples are Equipment, Metals, Finishes, Wood, and Plastic, Thermal, Plumbing). Budgeted match amounts should be placed in the corresponding description column (Unencumbered Cash, Land Match, In-kind Services/Items or Previously Spent

Cash). Requests amounts should be comprised of all line items and entered in the detail category heading.

MATCH DOCUMENTATION

All required match documentation must be included in the application as outlined in the ECHO Guidebook pp. 9-10. Acceptable documentation may include invoices, cancelled checks or bank statements, and other supporting materials appropriate to the match category being claimed.

29. We acknowledge and agree to this requirement. ☒ Yes ☐ No

RESTRICTIVE COVENANTS

30. We acknowledge and agree to comply with the requirement to file a Restrictive Covenant with the Volusia County Clerk of Court if an ECHO Grant is awarded.
    ☒ Yes ☐ No

    △ *If the project of the application is mortgaged or leased property, other than those applying for trails in the County Master Plan or projects on land not owned by the applicant, a letter from the Mortgagee or Lessor, stating that they agree to sign the Restrictive Covenants must be provided with the application.*

    △ *Applicants with projects on State or Federal owned lands are automatically exempt from this requirement but are held to the same liquidated damages cited within the Restrictive Covenants through language found in the final ECHO agreement for which the grantee is held responsible. A letter from the owner is required to acknowledge the restrictive covenants.*

DRAFT

OPERATING FORECAST DETAIL AND BUSINESS PLAN

A Business Plan specific to this project and Volusia County must be submitted with your final application (ECHO Guidebook p. 14). In addition, the following questions must be answered directly within the application.

31. How will the facility or site be operated once the project is complete? Describe the operational model, including hours of operation, staffing approach, fee and management structure.

**The Willow Run Park improvements will be owned, operated, and maintained by the City of Port Orange Parks & Recreation Department as part of the City's existing public parks system. The Department's mission is to "improve quality of life by providing Parks and Recreation opportunities to meet the changing needs of the community." Once complete, Willow Run Park will continue operating as a public outdoor recreation facility offering upgraded amenities including an expanded playground, lighted basketball and tennis courts, pavilions, accessible pathways, restroom facilities, and a children's bike trail.**

**The park is currently open daily from dawn to dusk, with lighted facilities available until 10:00 p.m. Operations and maintenance will be managed through the City's existing municipal staffing structure, including Parks & Recreation leadership, maintenance personnel, Public Works staff, engineering support, and contracted professional services as needed.**

**Operational responsibilities include facility oversight, inspections, contractor coordination, utilities and drainage management, ADA compliance, budgeting, and long-term maintenance planning.**

**The facility is intended to function primarily as a free public recreation resource with no membership requirement for general park access. Any reservations, organized programming, leagues, or special event activities will be administered in accordance with existing City of Port Orange Parks & Recreation policies and fee schedules.**

**Routine maintenance activities, including landscaping, irrigation management, restroom servicing, lighting maintenance, inspections, and safety monitoring, will be incorporated into the City's ongoing parks maintenance program to ensure long-term operational sustainability and compliance with the project's restrictive covenant requirements.**

DRAFT

32. What are the expected annual operating costs for this project once completed and how will they be funded? Complete Table A.

## TABLE A – ANNUAL OPERATING COSTS

Instructions: Complete this table with your best estimates of annual operating costs once the project is fully operational. All costs should be expressed in current dollars. Add rows as needed for additional cost categories.

| Cost Category | Annual Cost Estimate | Notes/Assumptions |
|---|---|---|
| Personnel Costs | | |
| Salaries and wages | $ | |
| Benefits (health, retirement, etc.) | $ | |
| Contract/seasonal staff | $ | |
| Facility Operations | | |
| Utilities (electric, water, sewer, gas) | $ | |
| Telephone/internet | $ | |
| Janitorial/cleaning services | $ | |
| Security services | $ | |

35. How do you plan to fund major replacements or repairs over the restrictive covenant period?

DRAFT

36. Please confirm your commitment to maintaining and replacing all necessary project components for the full restrictive covenant period by Completing the Maintenance and Operations Certification and Compliance Form.

Maintenance and Operations Certification and Compliance Form

Instructions: This certification documents your formal commitment to the long-term maintenance and operations of the ECHO-funded project and confirms compliance with applicable laws and grant conditions. This certification will be incorporated into the grant agreement and restrictive covenant.

By signing below, the Applicant certifies and agrees to the following:

1. The Applicant commits to maintaining, repairing, and replacing all project components funded by this ECHO grant for the full restrictive covenant period.
2. The Applicant has reviewed the 20-Year Maintenance Schedule (Table C) and affirms that the projected capital replacement costs and funding sources are realistic and achievable.
3. The Applicant understands that failure to maintain the project in accordance with ECHO program requirements may result in enforcement action, including potential repayment of grant funds as specified in the grant agreement and restrictive covenant.
4. The Applicant agrees to notify ECHO staff promptly if circumstances arise that may affect the organization's ability to fulfill this sustainability commitment.
5. The Applicant acknowledges that this certification will be incorporated by reference into the grant agreement and restrictive covenant.
6. The Applicant certifies that all information contained within this application and subsequent attachments is true and correct to the best of my/our knowledge, that the project shall be in compliance with the Americans with Disabilities Act of 1990, and that should a grant be awarded, the organization agrees to comply with the conditions of the grant award agreement including the Restrictive Covenants.

| | |
|---|---|
| Organization Name: | City of Port Orange |
| Project Name: | Willow Run |
| ECHO Grant Amount Requested: | $**2,500,000** |

CERTIFICATION:

☒ Yes, I certify and agree to all commitments and compliance statements stated above.

☐ No, I am unable to make this certification. (Explain below)

If no, explain:

DRAFT

Authorized Signature: _____

Printed Name: _____

Title: _____

Date: _____

37. Do you anticipate any difficulties in maintaining this project for the compliance period?
☐ Yes ☒ No
If yes, describe the challenges and your mitigation strategies.

Operating Forecast: Category-Specific Questions:
Note: Answer the question below that corresponds with your project category.

E - What partnerships or technical assistance will support ongoing environmental stewardship of this project?

Describe the environmental management practices that will be employed to maintain this project.

C - How will this project contribute to Volusia County's cultural tourism economy?

Describe the programming schedule anticipated for this project, including types of events, frequency, and expected attendance.

H - What preservation maintenance protocols will be followed to protect the historic integrity of this project?

Identify any specialized expertise or partnerships for ongoing historic preservation maintenance.

O - Describe the anticipated usage patterns for this project, including peak seasons, days, and hours.

**Willow Run Park is anticipated to experience year-round use, with peak activity occurring during spring, summer, and fall, particularly on weekends, holidays, school breaks, and during after-school and evening hours. The improved playground, accessible bike track, lighted courts, pavilions, and seating areas are expected to increase family recreation, youth activity, and neighborhood use throughout the day and evening. ADA-accessible pathways, parking,**

DRAFT

**and lighting improvements will support safe and inclusive public access for users of all ages and abilities.**

What safety inspection and maintenance protocols will be implemented? Describe the anticipated usage patterns for this project, including peak seasons, days, and hours.

**Willow Run Park is anticipated to experience year-round use, with peak activity occurring during spring, summer, and fall, particularly on weekends, holidays, school breaks, and during after-school and evening hours. The improved playground, accessible bike track, lighted courts, pavilions, and seating areas are expected to increase family recreation, youth activity, and neighborhood use throughout the day and evening. ADA-accessible pathways, parking, and lighting improvements will support safe and inclusive public access for users of all ages and abilities.**

What safety inspection and maintenance protocols will be implemented?

**The City of Port Orange will implement routine inspections and preventative maintenance for playground equipment, courts, lighting, sidewalks, ADA-accessible features, irrigation systems, landscaping, restrooms, and other park amenities. Maintenance and safety protocols will follow municipal park standards and applicable code requirements. The project documents also include quality-control procedures, environmental protections, inspection/testing requirements, tree protection measures, and temporary safety controls to support long-term safe operation of the facility.**

Not-for-profit applicants:

38. Does your organization have a capital reserve fund or endowment? ☐ Yes ☐ No
    If yes, what is the current balance and what % is designated for this project?

39. Describe your board's role in overseeing facility operations and long-term sustainability planning:
40. Has your organization successfully operated a facility of similar scope and complexity?
    ☐ Yes ☐ No
    If yes, provide an example and status.
    If no, explain what relevant experience or capacity the organization does bring.

41. If operating costs exceed projections, what is your contingency plan?

42. Does your organization have succession planning for key staff positions responsible for this project?

FEASIBILITY STUDY

A Feasibility Study specific to this project and Volusia County must be submitted with your final application (ECHO Guidebook p. 14). In addition, the following questions must be answered directly within the application.

DRAFT

43. Have you conducted any public engagement to support or inform this project?
☒ Yes ☐ No
If yes, briefly describe what was done and summarize key findings.

**The project is supported by documented public input and voter support. The City announced a community meeting at Willow Run Park on June 28 to gather input on planned improvements funded by the voter-approved Parks Bond. Residents approved a $30 million parks bond in 2024, with Willow Run included among planned park improvements.**

44. How will this project provide quality of life benefits to Volusia County residents?

**The project will improve quality of life by renovating an existing public park into a safer, more accessible, and more usable outdoor recreation facility. Planned improvements include replacement and expansion of the playground, a lighted full-court basketball area, renovated tennis courts, added pavilions, restroom replacement, and a Bike City Trail for young children. These improvements support physical activity, family recreation, youth play, informal community gathering, and multi-generational use. The City's Parks and Recreation mission is to improve quality of life by providing recreation opportunities that meet changing community needs.**

45. What existing facilities or resources in Volusia County serve a similar purpose to this project and how does the project address a gap or enhance existing resources**?**

**Existing Volusia County and Port Orange parks provide outdoor recreation, but Willow Run Park serves a neighborhood-level and family-oriented recreation role in southeast Volusia. Existing amenities include tennis courts, restroom, playground, picnic area, parking, multipurpose courts, baseball field, and basketball. The project addresses a gap by modernizing aging amenities, expanding playground capacity, adding a child-focused bike trail, improving court lighting, replacing the restroom facility, and improving accessible circulation. This enhances existing resources rather than duplicating them.**

46. Identify all permits, approvals, or regulatory requirements applicable to this project and the status of each**:**

**Applicable requirements include City building permits, construction permits, utility connection approvals, final occupancy or closeout approvals, ADA/accessibility compliance, Florida Building Code compliance, plumbing/electrical/mechanical code compliance, environmental protection requirements, tree protection requirements, inspections, and ECHO restrictive covenant requirements.**

47. What construction or implementation risks have you identified, and how will they be mitigated?

**Risks include permitting delays, utility conflicts, weather impacts, material lead times, coordination between trades, site safety, protection of existing trees, accessibility**

DRAFT

**compliance, and temporary disruption to park users. These risks will be mitigated through completed 100% construction documents, required contractor schedules and submittals, pre-construction and progress meetings, field verification of utilities, quality-control inspections, tree protection measures, barricades/signage, environmental protection practices, and coordination among the City, architect, engineers, contractor, and inspectors. The project manual specifically requires project coordination, progress meetings, temporary facilities/security protections, testing/inspection procedures, and field verification of underground utilities.**

48. Is this project scalable if funding is reduced? ☒ Yes ☐ No
If yes, describe the minimum viable project scope:

**If funding is reduced, we will prioritize improvements that preserve safety, accessibility, and core public recreation benefits. The minimum viable project would include the restroom replacement, ADA-accessible routes and parking connections, essential site/civil work, playground replacement/expansion with accessible surfacing, and required code/utility improvements. Additive or deferrable items could include selected pavilion enhancements, some site furnishings, landscaping enhancements, and non-essential amenity upgrades, provided the reduced scope remains code-compliant, publicly usable, and consistent with ECHO requirements.**

Feasibility Study: Category-Specific Questions:
Note: Answer the question below that corresponds with your project category.

E – How many residents will have improved access to environmental resources or education because of this project and how the estimate was determined?
What measurable environmental outcomes will this project achieve?

C – What is the projected annual attendance or participation at this facility once operational?
Provide basis for estimate: **N/A**

How will this project increase access to cultural experiences for underserved populations? N/A

H – What is the historical significance of this resource, and what would be the consequences of not undertaking this project? N/A

How will this project enhance heritage tourism or educational opportunities in Volusia County? N/A

O – What is the projected annual usage of this facility? Provide basis for estimate.

How does this project address identified recreation needs in Volusia County?

**The Willow Run Park improvements address identified recreation needs by modernizing and expanding an existing public park to better serve current and future residents through safe, accessible, and multi-generational recreational opportunities. The project improves outdoor recreation access by replacing aging infrastructure, expanding accessible play areas,**

DRAFT

**improving athletic courts, adding extended usability, upgrading restroom facilities, and enhancing pedestrian circulation and ADA accessibility throughout the site. The project also supports Volusia County and City of Port Orange goals related to quality of life, healthy living, outdoor activity, and equitable access to public recreation resources. By reinvesting in an established neighborhood park, the project maximizes use of existing public land while improving functionality, safety, and long-term community value.**

Not-for-profit applicants:

49. How long has your organization been in operation? N/A

50. How will your organization manage this financial commitment without compromising existing programs and services? N/A

Acquisition Projects

51. Has an independent appraisal been completed for this property? ☐ Yes ☐ No
    If yes, provide date and appraised value.

52. What is the timeline for making this acquisition available for public benefit after purchase?

53. Are there any encumbrances, easements, or restrictions on this property that could affect ECHO-eligible use? ☐ Yes ☐ No If yes, describe:

54. Has an environmental assessment (Phase I or Phase II) been completed? ☐ Yes ☐ No
    If yes, summarize which phase and findings:

MARKETING PLAN

A Marketing Plan specific to this project and Volusia County must be submitted with your final application (ECHO Guidebook p. 14). In addition, the following comprehensive checklist and questions must be answered directly within the application.

55. Please confirm your commitment to the following requirements:

| Signage, Recognition & Outreach Requirements | Yes | No |
|---|---|---|
| Will you display ECHO temporary construction signage during project implementation and meet specifications per the ECHO Guidebook? | ☒ | ☐ |
| Will you install ECHO permanent recognition signage upon project completion and meet specifications per the ECHO Guidebook? | ☒ | ☐ |
| Will you include the ECHO logo and acknowledgment on all print materials, press releases, public relations materials, and website content related to this project? | ☒ | ☐ |
| Will you participate in the ECHO Transparency Dashboard by providing requested project data and photos? | ☒ | ☐ |

DRAFT

| Signage, Recognition & Outreach Requirements | Yes | No |
|---|---|---|
| Will you notify ECHO staff of media opportunities related to this project? | ☒ | ☐ |
| Will you issue a press release and/or hold a ribbon cutting ceremony upon project completion? | ☒ | ☐ |
| Will you invite ECHO staff and Advisory Committee members to any ribbon cutting or public celebration? | ☒ | ☐ |
| Will this project be included in any tourism marketing efforts (e.g., visitor bureau, chamber of commerce)? | ☒ | ☐ |

56. What communication channels does your organization currently use to reach the public?

**The City of Port Orange currently utilizes a broad range of public communication channels to reach residents and visitors. These include the City's official website, Parks and Recreation website, social media platforms (Facebook, Instagram, X/Twitter, and YouTube), digital newsletters, press releases, public meetings, City Council meetings, community events, podcasts, informational videos, emergency notification systems, and email communications. The City's Public Information Office coordinates media relations, newsletters, public outreach campaigns, and social media communication across multiple platforms. The Parks & Recreation Department also actively promotes programs, events, and park updates through its dedicated website and social media channels.**

57. How will you inform Volusia County residents about this ECHO-funded project and its availability for public use?

**The City of Port Orange will utilize multiple communication methods to inform Volusia County residents about the ECHO-funded Willow Run Park improvements and the facility's availability for public use. Outreach efforts will include announcements on the City and Parks & Recreation websites, social media posts, digital newsletters, press releases, community event promotion, public meetings, and City Council communications. Project information and construction updates will also be shared through the City's existing public information channels and Parks & Recreation outreach platforms. Upon completion, the City will promote improved amenities, park features, accessibility improvements, and recreational opportunities through coordinated marketing and community engagement efforts designed to encourage public participation and use. The City will also recognize Volusia ECHO funding support in accordance with ECHO program requirements.**

DRAFT

Marketing Plan: Category Specific Questions:

Note: Answer the question below that corresponds with your project category.

E: How will you promote environmental education programming and public access opportunities at this site?

C: How will you market events and programming at this facility to reach diverse audiences across Volusia County?

H: How will you integrate this project into heritage tourism efforts and promote its historic significance to visitors?

O: How will you inform residents about recreational opportunities and access points at this facility?

**The City of Port Orange will inform residents about recreational opportunities and park access through the City website, Parks & Recreation website, social media platforms, press releases, digital newsletters, public meetings, event promotions, and community outreach efforts. Informational signage at the site will identify park amenities, accessible routes, parking areas, playground facilities, courts, pavilions, and pedestrian connections. The City will also promote improved amenities and recreational opportunities through existing Parks & Recreation communication channels and community programming. Marketing efforts will emphasize ADA accessibility improvements, family-oriented recreation, youth activities, and year-round public availability to encourage broad community use of the facility.**

FISCAL STABILITY

58. Has this organization defaulted on any grant in the past five years? ☐ Yes ☒ No
    If yes, please explain:

59. Not-for-Profit Organizations must submit the following:
    a. Bylaws/Charter as filed with the FL Div. of Corporations
    b. Most recent 12 consecutive months of Board Minutes
    c. List of Board Members

FINANCIAL AUDIT/REVIEW/AGREED UPON PROCEDURES

60. Local Municipalities must provide a link to their Financial Statement under GASB 34.
    The link should include the following documents:
    **https://www.port-orange.org/ArchiveCenter/ViewFile/Item/2603**

    A Management Letter from the last fiscal year Independent Auditor's Report on the Basic Financial Statement.
    a. A Response Letter from the last fiscal year Independent Auditor's Report on the Basic Financial Statement.
    b. An Opinion Letter from the last fiscal year Independent Auditor's Report on the Basic Financial Statement.

DRAFT

61. Not-for-Profit Organizations: the required financial information is determined by the operating revenue or expenses/expenditures annual average of the three fiscal years prior to the application deadline, as outlined in the ECHO Guidebook p. 14.

    a. Additional supporting documents for Not-for-Profit organizations:
        i. IRS determination letter granting Not-for-Profit 501(c)(3) status in Florida.
        ii. The most recent Uniform Business Report (Annual Report) filed with the State of Florida Division of Corporations.
        iii. Unrestricted ownership or undisturbed use of facility documentation (unless the project is an acquisition).
        iv. Letter of intent to sell from the owner for Acquisition Projects.

DRAWINGS

62. Drawings are required from ALL applicants (documents must be legible and to scale with legends):
    a. Current drawings and/or excavation plans for the facility.

63. Vacant land acquisition projects shall include:
    a. Conceptual drawings of improvements to the property, which are to be completed within two years of acquisition, consistent with the applicable grant period.
    b. Proposed structures must include elevations, floor plans and design elements such as landscaping.

64. Street Locator Map (indicate the physical location of the project within the local areas; include road names and "North" for directional reference).

DRAFT

65. Site Plan should show the building footprint, travel ways, parking, landscaping, etc. This section should include:
    a. Site Survey
    b. Trees and topography
    c. Civil drawing
    d. Water retention drainage and circulation

66. Preliminary and Schematic Drawings. Drawings should show:
    a. A general model of floor/site plans, showing the location of project elements.
    b. (Suggested) Florida-friendly landscape plan (The Florida Friendly Landscaping guide can be found at Publications - Florida-Friendly Landscaping™ Program - University of Florida, Institute of Food and Agricultural Sciences - UF/IFAS (ufl.edu).

67. Design and Development Documents. Documents should show more detail including:
    a. Selection of materials and engineering systems involved
    b. Detailed cost estimate
    c. Environmentally sustainable materials

68. Construction Documents should include written and graphic instructions. These documents should be focused on specifications for the project (building systems, floor plans, elevations, etc.) and should include site utilities and ADA information.

    a. Outdoor trails, parks, sports facilities and playgrounds require a bid set of plans, which are ready to be used for the procurement process.

    b. New construction, improvements and historic projects require a set of A&E plans, which are ready to be used for the procurement process.
       EXCEPTION: For projects involving the improvement of a previously engineered site, pre-engineered structures, such as playgrounds, prefabricated buildings, pavilions, and modular restrooms, etc. may substitute manufacturer's engineered plans and installation specifications in lieu of custom architectural and engineering drawings for those components. This exception applies only to the prefabricated elements themselves. The site should already be pre-engineered.

    c. Historic projects need to demonstrate research and compliance with the Historic Preservation Standards and Guidelines.

69. Project/Construction Timeline Chart – Complete Table D.

TABLE D - PROJECT/CONSTRUCTION TIMELINE CHART

| Description (fill in item/category descriptions as needed) | April - June 2026 | July - Sept 2026 | Oct - Dec 2026 | Jan - March 2027 | April - June 2027 | July - Sept 2027 | Oct - Dec 2027 | Jan - March 2028 | April - June 2028 |

# CITY COUNCIL AGENDA ITEM

**COUNCIL MEETING DATE 6/2/2026**

**SUBJECT:** (B11) Resolution No. 26-28 - Approval of State of Florida Department of Transportation (FDOT) Highway Lighting, Maintenance, and Compensation Agreement (FDOT #AT673)

**DEPARTMENT:** Public Works

**GOAL:** 2 - Infrastructure

**RECOMMENDED MOTION:** Move to approve Resolution No. 26-28.

**SUMMARY:** The State Highway Agreement between the City and the Florida Department of Transportation (FDOT) provides for FDOT to compensate the City in exchange for the maintenance of the lighting and lighting systems on State roads located within City limits.

FDOT is proposing a new seven-year agreement (#AT763) effective July 1, 2026 through June 30, 2033. Under the new agreement, the per-light unit rate shall increase by 3% each fiscal year with the upcoming fiscal year 2026/27 rate being $358.33. The State agrees to pay the City $92,234.14 for fiscal year 2026-27.

The lighting and lighting systems to be maintained by the City are located on the following State roads:

Nova Road (SR 5A)
US 1/Ridgewood Ave. (SR 5)
Dunlawton Ave. (SR 421) (excluding the Dunlawton bridge lights)
S. Peninsula Drive (SR 441)

PRESENTER: Junos Reed

RESOLUTION NO. 26-28

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF PORT ORANGE, VOLUSIA COUNTY, FLORIDA, AUTHORIZING THE MAYOR AND CITY CLERK TO EXECUTE A STATE HIGHWAY LIGHTING, MAINTENANCE, AND COMPENSATION AGREEMENT (AT763) WITH THE FLORIDA DEPARTMENT OF TRANSPORTATION FOR MAINTENANCE OF THE MAINTENANCE OF THE LIGHTING AND LIGHTING SYSTEMS ON STATE ROADS LOCATED WITHIN CITY LIMITS; DIRECTING THE CITY CLERK TO FORWARD A COPY OF SAID RESOLUTION; AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, the State of Florida Department of Transportation ("FDOT") has installed lighting and lighting systems on portions of the State Highway System within the City of Port Orange; and

WHEREAS, the FDOT agrees to compensate the City of Port Orange in exchange for the maintenance of the lighting and lighting systems on portions of the State Highway System within the City of Port Orange; and

WHEREAS, the City Council of the City of Port Orange wishes to authorize the Mayor and City Clerk to execute a State Highway Lighting, Maintenance, and Compensation Agreement (AT763) between the City of Port Orange and the Florida Department of Transportation for maintenance of the lighting and lighting systems along the right-of-way areas specified in the agreement.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF PORT ORANGE, VOLUSIA COUNTY, FLORIDA:

Section 1. The City Council of the City of Port Orange, Florida, hereby authorizes the Mayor and City Clerk to execute a State Highway Lighting, Maintenance, and Compensation Agreement (AT763) between the City of Port Orange and the Florida Department of Transportation for maintenance of the lighting and lighting systems on portions of the State Highway System within the City of Port Orange State along the rights-of-way specified in the agreement, a copy of which is attached hereto as **Exhibit "1."**

Section 2. The City Clerk of the City of Port Orange is hereby directed to send a copy of this resolution to the Florida Department of Transportation.

Section 3. This resolution shall become effective immediately upon adoption.

_____
SCOTT STILTNER, MAYOR

ATTEST:

_____
Robin L. Fenwick, MMC, City Clerk

Adopted on the _____ day of _____, 2026.

Shannon K. Balmer, Senior Assistant City Attorney

# EXHIBIT "1"

STATE OF FLORIDA DEPARTMENT OF TRANSPORTATION

## STATE HIGHWAY LIGHTING, MAINTENANCE, AND COMPENSATION AGREEMENT

CONTRACT NO. AT763
FINANCIAL PROJECT NO. 458316-1-78-01
F.E.I.D. NO. VF-596000412018

**THIS AGREEMENT**, entered into this _____ day of _____, year of _____, by and between the **STATE OF FLORIDA DEPARTMENT OF TRANSPORTATION**, hereinafter referred to as **"FDOT"**, and the Ctiy of Port Orange, hereinafter referred to as the "**MAINTAINING AGENCY**";

**WITNESSETH:**

**WHEREAS, FDOT** is authorized under Sections 334.044 and 335.055, Florida Statutes, to enter into this Agreement, and the **MAINTAINING AGENCY** has the authority to enter into this Agreement and to undertake the maintenance and operation of lighting on the State Highway System; and

**WHEREAS,** the **MAINTAINING AGENCY** has authorized its undersigned officers to enter into and execute this Agreement;

**WHEREAS, FDOT** has identified sites where lighting and/or lighting systems, hereinafter referred to as "Facilities", are located on the State Highway System within the jurisdictional boundaries of the **MAINTAINING AGENCY.** A list of the Facilities is included as Exhibit A, attached hereto and incorporated herein.

**WHEREAS,** the **MAINTAINING AGENCY** agrees to maintain the Facilities as further set forth herein.

**NOW, THEREFORE**, in consideration of the premises and the mutual covenants contained herein, **FDOT** and the **MAINTAINING AGENCY** hereby agree as follows:

**1. Maintenance of Facilities**

a. The **MAINTAINING AGENCY** shall maintain the Facilities listed in Exhibit A. The Facilities may include lighting for roadways, as well as park and ride, pedestrian overpasses, and recreational areas owned by or located on the property of **FDOT.** The Facilities shall not include lighting located in weigh stations, rest areas, or on Interstate highways.

The location and type of lighting to be maintained pursuant to this Agreement is set forth in Exhibit A. Any changes or modifications to Exhibit A must be in writing and signed by both **FDOT** and the **MAINTAINING AGENCY**. Any Facilities added to Exhibit A during the **FDOT**'s fiscal year shall be maintained and operated by the **MAINTAINING AGENCY** upon the **FDOT**'s final acceptance of installation of any new lighting and/or lighting systems. Prior to the start of each new fiscal year, the **MAINTAINING AGENCY** and **FDOT** shall amend Exhibit A to reflect any changes to the Facilities, including addition, removal, or change in lighting type maintained pursuant to this Agreement.

The **MAINTAINING AGENCY** will be compensated for Facilities added to Exhibit A by amendment of this Agreement in the **FDOT**'s fiscal year occurring after the lighting and/or lighting systems are installed and final acceptance of such installation is given by **FDOT**. In the event that no change is made to the previous year's Exhibit A, a certification from the **MAINTAINING AGENCY** shall be provided to **FDOT** certifying that no change has been made to Exhibit A during **FDOT**'s previous fiscal year. Unless stated otherwise, all references to fiscal years within this agreement refer to **FDOT's** fiscal year, beginning July 1st and ending June 30th.

b. In maintaining the Facilities, the **MAINTAINING AGENCY** shall perform all activities necessary to keep the Facilities fully operating, properly functioning, with a minimum of 90% of the lights burning for any lighting type (e.g., high mast, standard, underdeck, and sign) or roadway system at all times in accordance with the original design thereof, whether necessitated by normal wear and tear, accidental or intentional damage, or acts of nature. Required maintenance includes, but is not limited to, providing electrical power and paying all charges associated therewith, routine inspection and testing, preventative maintenance, emergency maintenance, replacement of any component parts of the Facilities (including the poles and any and all other component parts installed as part of the Facilities), and locating (both vertically and horizontally) the Facilities. All repairs or replacement will be in kind unless a variance is approved in writing by **FDOT**.

c. All maintenance must be in accordance with the provisions of the following:

(1) Manual of Uniform Traffic Control Devices; and

(2) All other applicable local, state, or federal laws, rules, resolutions, or ordinances, and **FDOT** procedures.

d. For lighting installed as part of a **FDOT** project, the **MAINTAINING AGENCY**'**s** obligation to maintain the Facility commences upon the **MAINTAINING AGENCY**'**s** receipt of notification from **FDOT** that **FDOT** has formally accepted the project, except for the obligation to provide for electrical power, which obligation to provide for electrical power commences at such time as the lighting system is ready to be energized; provided, however, that the **MAINTAINING AGENCY** is not required to perform any activities which are the responsibilities of **FDOT's** contractor.

Prior to acceptance by **FDOT**, the **MAINTAINING AGENCY** shall have the opportunity to inspect and request modifications/corrections to the installation(s). **FDOT** agrees to make modifications/corrections prior to acceptance so long as the modifications/corrections comply with the installation contract documents and specifications.

e. The term for this Agreement is seven (7) years. Either party may terminate this Agreement by a notice of termination. The notice of termination must be in writing. Should the **MAINTAINING AGENCY** choose to terminate the Agreement, the **MAINTAINING AGENCY** shall provide a minimum notice period of two (2) fiscal years prior to the effective date of termination and the notice shall be endorsed by the elected body (County Commission, City Council, or local agency governing body) under which the Agency operates. The effective date of the termination will coincide with the end of the FDOT's fiscal year of June 30th following the two-year notice.

The termination of this Agreement will not terminate maintenance responsibilities for lighting owned by the **MAINTAINING AGENCY**. Maintenance obligations for lights owned by the **MAINTAINING AGENCY** will remain the responsibility of the **MAINTAINING AGENCY**. Nor does termination of this Agreement operate to relieve the **MAINTAINING AGENCY** of any maintenance obligations contained in other agreements. Maintenance of lights governed by a separate maintenance agreement will continue per the terms of that separate maintenance agreement.

**2. Compensation and Payment**

**FDOT** shall pay to the **MAINTAINING AGENCY** a sum of $ 92,234.14 for the fiscal year in which this Agreement is signed. Payments will be calculated and made in accordance with Exhibit A.

Prior to the beginning of each fiscal year, the **MAINTAINING AGENCY** shall submit an amended Exhibit A or a certification of no change to Exhibit A and **FDOT** and the **MAINTAINING AGENCY** shall agree on the amount and percentage of lighting to be paid for the coming fiscal year. **FDOT** will issue a work order confirming the amount and authorizing the performance of maintenance for each new fiscal year. The work order must be an **FDOT**-signed letter of authorization to the **MAINTAINING AGENCY** with a subject line containing the terms "State Highway Lighting, Maintenance, and Compensation Agreement work order". The work order must reflect the contract number, financial project number, FEID No. of the **MAINTAINING AGENCY**, the fiscal year, the percentage of lighting funded and the lump sum amount to be paid for the fiscal year indicated. The work order must be signed by the **MAINTAINING AGENCY** and returned to **FDOT**. Failure by the **MAINTAINING AGENCY** to take any of the actions required by this paragraph may result in nonpayment by **FDOT**.

**FDOT** expressly assigns its rights, interests and privileges pertaining to damage to Facilities caused by third parties to the **MAINTAINING AGENCY**, so they may pursue all claims and causes of actions against the third parties responsible for the damage. **FDOT** will assist the **MAINTAINING AGENCY** and will confirm the **MAINTAINING AGENCY**'s authorization to pursue recovery. The **MAINTAINING AGENCY** will be responsible for all attorneys' fees and litigation costs incurred in its recovery activities.

**3. Record Keeping**

The **MAINTAINING AGENCY** shall keep records of all activities and report all maintenance performed and replacement components and parts installed pursuant to this Agreement. The records shall be kept in an electronic format approved by **FDOT**.

Records shall be maintained and made available upon request to **FDOT** during the period of this Agreement and for three (3) years after final payment for the work pursuant to this Agreement is made. Copies of these documents and records will be furnished to **FDOT** upon request.

**4. Invoicing**

The **MAINTAINING AGENCY** shall invoice **FDOT** annually in a format acceptable to the FDOT. Invoices must be submitted no earlier than May 1 and no later than June 15 of the fiscal year in which the services were provided in order to be processed for payment by June 30.

Upon receipt, **FDOT** has five (5) working days to inspect and approve the goods and services. **FDOT** has twenty (20) days to deliver a request for payment (voucher) to the Department of Financial Services. The twenty (20) days are measured from the latter of the date the invoice is received or the goods or services are received, inspected, and approved.

If a payment is not available within forty (40) days, a separate interest penalty at a rate as established pursuant to Section 215.422, Florida Statutes, will be due and payable, in addition to the invoice amount, to the **MAINTAINING AGENCY**. Interest penalties of less than one (1) dollar will not be enforced unless the **MAINTAINING AGENCY** requests payment. Invoices returned to a **MAINTAINING AGENCY** because of **MAINTAINING AGENCY** preparation errors will result in a delay in the payment. The invoice payment requirements do not start until a properly completed invoice is provided to **FDOT**.

A Vendor Ombudsman has been established within the Department of Financial Services. The duties of this individual include acting as an advocate for contractors/vendors who may be experiencing problems in obtaining timely payment(s) from a state agency. The Vendor Ombudsman may be contacted at (850) 410-9724 or by calling the Chief Financial Officer's Hotline, 1-800-848-3792.

The State of Florida's performance and obligation to pay under this Agreement is contingent upon an annual appropriation by the Legislature. In the event this Agreement is in excess of $25,000 and has a term for a period of more than one (1) year, the provisions of Section 339.135(6)(a), Florida Statutes, are hereby incorporated:

**FDOT**, during any fiscal year, shall not expend money, incur any liability, or enter into any contract which, by its terms, involves the expenditure of money in excess of the amounts budgeted as available for expenditure during such fiscal year. Any contract, verbal or written, made in violation of this subsection shall be null and void, and no money may be paid on such contract. **FDOT** shall require a statement from the Comptroller of **FDOT** that funds are available prior to entering into any such contract or other binding commitment of funds. Nothing herein contained shall prevent the making of contracts for periods exceeding 1 year, but any contract so made shall be executory only for the value of the services to be rendered or agreed to be paid for in succeeding fiscal years; and this paragraph shall be incorporated verbatim in all contracts of **FDOT** which are for an amount in excess of $25,000 and which have a term for a period of more than 1 year.

**5. Default**

In the event that the **MAINTAINING AGENCY** breaches any provision of this Agreement, then in addition to any other remedies which are otherwise provided for in this Agreement, **FDOT** may exercise one or more of the following options, provided that at no time may **FDOT** be entitled to receive double recovery of damages:

a. Pursue a claim for damages suffered by **FDOT** or the public.

b. Pursue any other remedies legally available.

c. As to any work not performed by the **MAINTAINING AGENCY**, perform such work with its own forces or through contractors and seek reimbursement for the cost thereof from the **MAINTAINING AGENCY** if the **MAINTAINING AGENCY** fails to cure the non-performance within fourteen (14) days after written notice from **FDOT** of the non-performance; provided, however, that advance notice and cure will not be preconditions in the event of an emergency.

**6. Force Majeure**

Neither the **MAINTAINING AGENCY** nor **FDOT** will be liable to the other for any failure to perform under this Agreement to the extent such performance is prevented by an act of God, war, riots, natural catastrophe, or other event beyond the control of the non-performing party and which could not have been avoided or overcome by the exercise of due diligence; provided that the party claiming the excuse from performance has (a) promptly notified the other party of the occurrence and its estimated duration, (b) promptly remedied or mitigated the effect of the occurrence to the extent possible, and (c) resumed performance as soon as possible.

**7. Miscellaneous**

a. **FDOT** shall consider the employment by any contractor of unauthorized aliens a violation of Section 274A(e) of the Immigration and Nationality Act. If the contractor knowingly employs unauthorized aliens, such violation will be cause for unilateral cancellation of this Agreement.

b. The **MAINTAINING AGENCY** shall allow public access to all documents, papers, letters, or other material subject to the provisions of Chapter 119, Florida Statutes, and made or received by the **MAINTAINING AGENCY** in conjunction with this Agreement. Failure by the **MAINTAINING AGENCY** to grant such public access will be grounds for immediate unilateral cancellation of this Agreement by **FDOT**.

c. This Agreement constitutes the complete and final expression of the parties with respect to the subject matter hereof and supersedes all prior agreements, understandings, or negotiations with respect thereto. Without limiting the generality of the foregoing, this Agreement shall replace and supersede all prior agreements between **FDOT** and the **MAINTAINING AGENCY** with respect to maintenance of the lighting and/or lighting systems for the Facilities identified in Exhibit A.

d. This Agreement is governed by the laws of the State of Florida. Any provision hereof found to be unlawful or unenforceable are severable and will not affect the validity of the remaining provisions hereof.

e. All notices required pursuant to the terms hereof may be sent by first class United States Mail, facsimile transmission, hand delivery, electronic mail, or express mail and will be deemed to have been received by the end of five (5) business days from the proper sending thereof unless proof of prior actual receipt is provided. The **MAINTAINING AGENCY** must notify the local District of **FDOT** of the appropriate persons for notices to be sent pursuant to this Agreement. Unless otherwise notified in writing, notices must be sent to the following addresses:

**MAINTAINING AGENCY:**

| |
|---|
| City of Port Orange |
| 100 City Center Circle |
| Port Orange, Florida 32119 |
| 386-506-5502 |

**FDOT:**

| |
|---|
| District Maintenance Engineer |
| 719 S Woodland Blvd |
| Deland, Florida 32720-6834 |
| |

f. **PUBLIC ENTITY CRIME INFORMATION STATEMENT**: A person or affiliate who has been placed on the convicted vendor list following a conviction for a public entity crime may not submit a bid on a contract to provide any goods or services to a public entity, may not submit a bid on a contract with a public entity for the construction or repair of a public building or public work, may not submit bids on leases of real property to a public entity, may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity, and may not transact business with any public entity in excess of the threshold amount provided in Section 287.017, Florida Statutes, for **CATEGORY TWO** for a period of thirty six (36) months from the date of being placed on the convicted vendor list.

g. An entity or affiliate who has been placed on the discriminatory vendor list may not submit a bid on a contract to provide any goods or services to a public entity, may not submit a bid on a contract with a public entity for the construction or repair of a public building or public work, may not submit bids on leases of real property to a public entity, may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity, and may not transact business with any public entity.

h. By signing this agreement the Maintaining Agency certifies that it is not: (1) listed on the Scrutinized Companies that Boycott Israel List, created pursuant to Section 215.4725, F.S., (2) engaged in a boycott of Israel, (3) or listed on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, created pursuant to Section 215.473, Florida Statutes. For contracts involving $1,000,000 or more, if the Department determines the Maintaining Agency submitted a false certification under Section 287.135(5) of the Florida Statutes regarding the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, created pursuant to Section 215.473, Florida Statutes, or for contracts involving any amount, if the Maintaining Agency has been placed on the Scrutinized Companies that Boycott Israel List, or is engaged in a boycott of Israel, the Department shall either terminate the Contract after it has given the Maintaining Agency notice and an opportunity to demonstrate the Department's determination of false certification was in error pursuant to Section 287.135(5)(a) of the Florida Statutes, or maintain the Contract if the conditions of Section 287.135(4) of the Florida Statutes are met.

i. Nothing herein shall be construed as a waiver of either party's sovereign immunity.

j. **MAINTAINING AGENCY**:

1. shall utilize the U.S. Department of Homeland Security's E-Verify system to verify the employment eligibility of all new employees hired by the **MAINTAINING AGENCY** during the term of the contract; and

2. shall expressly require any subcontractors performing work or providing services pursuant to the state contract to likewise utilize the U.S. Department of Homeland Security's E-Verify system to verify the employment eligibility of all new employees hired by the subcontractor during the contract term.

3. Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the Agreement term and following completion of the Agreement if the **Maintaining Agency** does not transfer the records to **FDOT**

4. Upon completion of the Agreement, transfer, at no cost, to **FDOT**, all public records in possession of the Consultant or keep and maintain public records required by **FDOT** to perform the service. If the Consultant transfers all public records to **FDOT** upon completion of the Agreement, the Consultant shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If the Consultant keeps and maintains public records upon completion of the Agreement, the Consultant shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to **FDOT**, upon request from **FDOT's** custodian of public records, in a format that is compatible with the information technology systems of **FDOT**

5. Failure by the **Maintaining Agency** to comply with Chapter 119, Florida Statutes, shall be grounds for immediate unilateral cancellation of this Agreement by **FDOT**

**8. Certification**

This document is a printout of an **FDOT** form maintained in an electronic format and all revisions thereto by the **MAINTAINING AGENCY** in the form of additions, deletions, or substitutions are reflected only in an Appendix entitled “Changes to Form Document” and no change is made in the text of the document itself. Hand notations on affected portions of this document may refer to changes reflected in the above-named Appendix but are for reference purposes only and do not change the terms of the document. By signing this document, the **MAINTAINING AGENCY** hereby represents that no change has been made to the text of this document except through the terms of the Appendix entitled “Changes to Form Document."

You MUST signify by selecting one of the applicable options:

☒ No changes have been made to this Forms Document and no Appendix entitled "Changes to Form Document" is attached.

☐ No changes have been made to this Form Document, but changes are included on the attached Appendix entitled "Changes to Form Document."

**IN WITNESS WHEREOF**, the parties hereto have executed this Agreement effective the day and year first written.

**Exhibit A**
**STATE HIGHWAY LIGHTING, MAINTENANCE, AND COMPENSATION AGREEMENT**
**For Fiscal Year 2027**

## 1.0 PURPOSE

This exhibit defines the method and limits of compensation to be made to the **MAINTAINING AGENCY** for the services described in this Agreement and method by which payments will be made.

## 2.0 FACILITIES

The lighting or lighting systems listed below, or in an attached spreadsheet, or other electronic form are included with this Agreement and represent the Facilities to be maintained by the **MAINTAINING AGENCY**:

1. 69 Lights on SR 5
2. 7 Lights on SR 441
3. 98 SR 5A
4. 112 SR 421
5. 
6. 

## 3.0 COMPENSATION

For the satisfactory completion of all services detailed in this Agreement, **FDOT** will pay the **MAINTAINING AGENCY** the Total Sum as provided in Section 2 of the Agreement. The **MAINTAINING AGENCY** will receive one single payment at the end of each fiscal year for satisfactory completion of service.

The per-light unit rate shall increase by 3% each fiscal year. E.g., the per-light unit rate of $347.89 in fiscal year 25/26 shall increase to $358.33 in fiscal year 26/27.

Total Payment Amount for each fiscal year is calculated by inputting the actual number of qualifying types of lights into the table below and multiplying by the unit rate and 90%. Example: 330 (lights) x $358.33 (unit rate) x 0.90 (90% requirement) = $106,424.01

| Type of Light | # of lights | LED or HPS | Unit rate | 90.00% | Total |
|---|---|---|---|---|---|
| High Mast | | HPS | | 0.90 | 0.00 |
| Standard | | HPS | | 0.90 | 0.00 |
| Underdeck | | HPS | | 0.90 | 0.00 |
| Sign | | HPS | | 0.90 | 0.00 |
| High Mast | | LED | | 0.90 | 0.00 |
| Standard | 286 | LED | 358.33 | 0.90 | 92,234.14 |
| Underdeck | | LED | | 0.90 | 0.00 |
| Sign | | LED | | 0.90 | 0.00 |

**THIS AGREEMENT**, entered into this _____ day of _____, year of _____, by and between the **STATE OF FLORIDA DEPARTMENT OF TRANSPORTATION**, hereinafter referred to as **"FDOT"**, and the Ctiy of Port Orange, hereinafter referred to as the "**MAINTAINING AGENCY**";

**WITNESSETH:**

**WHEREAS, FDOT** is authorized under Sections 334.044 and 335.055, Florida Statutes, to enter into this Agreement, and the **MAINTAINING AGENCY** has the authority to enter into this Agreement and to undertake the maintenance and operation of lighting on the State Highway System; and

**WHEREAS,** the **MAINTAINING AGENCY** has authorized its undersigned officers to enter into and execute this Agreement;

**WHEREAS, FDOT** has identified sites where lighting and/or lighting systems, hereinafter referred to as "Facilities", are located on the State Highway System within the jurisdictional boundaries of the **MAINTAINING AGENCY.** A list of the Facilities is included as Exhibit A, attached hereto and incorporated herein.

**WHEREAS,** the **MAINTAINING AGENCY** agrees to maintain the Facilities as further set forth herein.

**NOW, THEREFORE**, in consideration of the premises and the mutual covenants contained herein, **FDOT** and the **MAINTAINING AGENCY** hereby agree as follows:

**1. Maintenance of Facilities**

a. The **MAINTAINING AGENCY** shall maintain the Facilities listed in Exhibit A. The Facilities may include lighting for roadways, as well as park and ride, pedestrian overpasses, and recreational areas owned by or located on the property of **FDOT.** The Facilities shall not include lighting located in weigh stations, rest areas, or on Interstate highways.

The location and type of lighting to be maintained pursuant to this Agreement is set forth in Exhibit A. Any changes or modifications to Exhibit A must be in writing and signed by both **FDOT** and the **MAINTAINING AGENCY**. Any Facilities added to Exhibit A during the **FDOT**'s fiscal year shall be maintained and operated by the **MAINTAINING AGENCY** upon the **FDOT**'s final acceptance of installation of any new lighting and/or lighting systems. Prior to the start of each new fiscal year, the **MAINTAINING AGENCY** and **FDOT** shall amend Exhibit A to reflect any changes to the Facilities, including addition, removal, or change in lighting type maintained pursuant to this Agreement.

The **MAINTAINING AGENCY** will be compensated for Facilities added to Exhibit A by amendment of this Agreement in the **FDOT**'s fiscal year occurring after the lighting and/or lighting systems are installed and final acceptance of such installation is given by **FDOT**. In the event that no change is made to the previous year's Exhibit A, a certification from the **MAINTAINING AGENCY** shall be provided to **FDOT** certifying that no change has been made to Exhibit A during **FDOT**'s previous fiscal year. Unless stated otherwise, all references to fiscal years within this agreement refer to **FDOT's** fiscal year, beginning July 1st and ending June 30th.

b. In maintaining the Facilities, the **MAINTAINING AGENCY** shall perform all activities necessary to keep the Facilities fully operating, properly functioning, with a minimum of 90% of the lights burning for any lighting type (e.g., high mast, standard, underdeck, and sign) or roadway system at all times in accordance with the original design thereof, whether necessitated by normal wear and tear, accidental or intentional damage, or acts of nature. Required maintenance includes, but is not limited to, providing electrical power and paying all charges associated therewith, routine inspection and testing, preventative maintenance, emergency maintenance, replacement of any component parts of the Facilities (including the poles and any and all other component parts installed as part of the Facilities), and locating (both vertically and horizontally) the Facilities. All repairs or replacement will be in kind unless a variance is approved in writing by **FDOT**.

c. All maintenance must be in accordance with the provisions of the following:

(1) Manual of Uniform Traffic Control Devices; and

(2) All other applicable local, state, or federal laws, rules, resolutions, or ordinances, and **FDOT** procedures.

d. For lighting installed as part of a **FDOT** project, the **MAINTAINING AGENCY**'**s** obligation to maintain the Facility commences upon the **MAINTAINING AGENCY**'**s** receipt of notification from **FDOT** that **FDOT** has formally accepted the project, except for the obligation to provide for electrical power, which obligation to provide for electrical power commences at such time as the lighting system is ready to be energized; provided, however, that the **MAINTAINING AGENCY** is not required to perform any activities which are the responsibilities of **FDOT's** contractor.

Prior to acceptance by **FDOT**, the **MAINTAINING AGENCY** shall have the opportunity to inspect and request modifications/corrections to the installation(s). **FDOT** agrees to make modifications/corrections prior to acceptance so long as the modifications/corrections comply with the installation contract documents and specifications.

e. The term for this Agreement is seven (7) years. Either party may terminate this Agreement by a notice of termination. The notice of termination must be in writing. Should the **MAINTAINING AGENCY** choose to terminate the Agreement, the **MAINTAINING AGENCY** shall provide a minimum notice period of two (2) fiscal years prior to the effective date of termination and the notice shall be endorsed by the elected body (County Commission, City Council, or local agency governing body) under which the Agency operates. The effective date of the termination will coincide with the end of the FDOT's fiscal year of June 30th following the two-year notice.

The termination of this Agreement will not terminate maintenance responsibilities for lighting owned by the **MAINTAINING AGENCY**. Maintenance obligations for lights owned by the **MAINTAINING AGENCY** will remain the responsibility of the **MAINTAINING AGENCY**. Nor does termination of this Agreement operate to relieve the **MAINTAINING AGENCY** of any maintenance obligations contained in other agreements. Maintenance of lights governed by a separate maintenance agreement will continue per the terms of that separate maintenance agreement.

**2. Compensation and Payment**

**FDOT** shall pay to the **MAINTAINING AGENCY** a sum of $ 92,234.14 for the fiscal year in which this Agreement is signed. Payments will be calculated and made in accordance with Exhibit A.

Prior to the beginning of each fiscal year, the **MAINTAINING AGENCY** shall submit an amended Exhibit A or a certification of no change to Exhibit A and **FDOT** and the **MAINTAINING AGENCY** shall agree on the amount and percentage of lighting to be paid for the coming fiscal year. **FDOT** will issue a work order confirming the amount and authorizing the performance of maintenance for each new fiscal year. The work order must be an **FDOT**-signed letter of authorization to the **MAINTAINING AGENCY** with a subject line containing the terms "State Highway Lighting, Maintenance, and Compensation Agreement work order". The work order must reflect the contract number, financial project number, FEID No. of the **MAINTAINING AGENCY**, the fiscal year, the percentage of lighting funded and the lump sum amount to be paid for the fiscal year indicated. The work order must be signed by the **MAINTAINING AGENCY** and returned to **FDOT**. Failure by the **MAINTAINING AGENCY** to take any of the actions required by this paragraph may result in nonpayment by **FDOT**.

**FDOT** expressly assigns its rights, interests and privileges pertaining to damage to Facilities caused by third parties to the **MAINTAINING AGENCY**, so they may pursue all claims and causes of actions against the third parties responsible for the damage. **FDOT** will assist the **MAINTAINING AGENCY** and will confirm the **MAINTAINING AGENCY**'s authorization to pursue recovery. The **MAINTAINING AGENCY** will be responsible for all attorneys' fees and litigation costs incurred in its recovery activities.

**3. Record Keeping**

The **MAINTAINING AGENCY** shall keep records of all activities and report all maintenance performed and replacement components and parts installed pursuant to this Agreement. The records shall be kept in an electronic format approved by **FDOT**.

Records shall be maintained and made available upon request to **FDOT** during the period of this Agreement and for three (3) years after final payment for the work pursuant to this Agreement is made. Copies of these documents and records will be furnished to **FDOT** upon request.

**4. Invoicing**

The **MAINTAINING AGENCY** shall invoice **FDOT** annually in a format acceptable to the FDOT. Invoices must be submitted no earlier than May 1 and no later than June 15 of the fiscal year in which the services were provided in order to be processed for payment by June 30.

Upon receipt, **FDOT** has five (5) working days to inspect and approve the goods and services. **FDOT** has twenty (20) days to deliver a request for payment (voucher) to the Department of Financial Services. The twenty (20) days are measured from the latter of the date the invoice is received or the goods or services are received, inspected, and approved.

If a payment is not available within forty (40) days, a separate interest penalty at a rate as established pursuant to Section 215.422, Florida Statutes, will be due and payable, in addition to the invoice amount, to the **MAINTAINING AGENCY**. Interest penalties of less than one (1) dollar will not be enforced unless the **MAINTAINING AGENCY** requests payment. Invoices returned to a **MAINTAINING AGENCY** because of **MAINTAINING AGENCY** preparation errors will result in a delay in the payment. The invoice payment requirements do not start until a properly completed invoice is provided to **FDOT**.

A Vendor Ombudsman has been established within the Department of Financial Services. The duties of this individual include acting as an advocate for contractors/vendors who may be experiencing problems in obtaining timely payment(s) from a state agency. The Vendor Ombudsman may be contacted at (850) 410-9724 or by calling the Chief Financial Officer's Hotline, 1-800-848-3792.

The State of Florida's performance and obligation to pay under this Agreement is contingent upon an annual appropriation by the Legislature. In the event this Agreement is in excess of $25,000 and has a term for a period of more than one (1) year, the provisions of Section 339.135(6)(a), Florida Statutes, are hereby incorporated:

**FDOT**, during any fiscal year, shall not expend money, incur any liability, or enter into any contract which, by its terms, involves the expenditure of money in excess of the amounts budgeted as available for expenditure during such fiscal year. Any contract, verbal or written, made in violation of this subsection shall be null and void, and no money may be paid on such contract. **FDOT** shall require a statement from the Comptroller of **FDOT** that funds are available prior to entering into any such contract or other binding commitment of funds. Nothing herein contained shall prevent the making of contracts for periods exceeding 1 year, but any contract so made shall be executory only for the value of the services to be rendered or agreed to be paid for in succeeding fiscal years; and this paragraph shall be incorporated verbatim in all contracts of **FDOT** which are for an amount in excess of $25,000 and which have a term for a period of more than 1 year.

**5. Default**

In the event that the **MAINTAINING AGENCY** breaches any provision of this Agreement, then in addition to any other remedies which are otherwise provided for in this Agreement, **FDOT** may exercise one or more of the following options, provided that at no time may **FDOT** be entitled to receive double recovery of damages:

a. Pursue a claim for damages suffered by **FDOT** or the public.

b. Pursue any other remedies legally available.

c. As to any work not performed by the **MAINTAINING AGENCY**, perform such work with its own forces or through contractors and seek reimbursement for the cost thereof from the **MAINTAINING AGENCY** if the **MAINTAINING AGENCY** fails to cure the non-performance within fourteen (14) days after written notice from **FDOT** of the non-performance; provided, however, that advance notice and cure will not be preconditions in the event of an emergency.

**6. Force Majeure**

Neither the **MAINTAINING AGENCY** nor **FDOT** will be liable to the other for any failure to perform under this Agreement to the extent such performance is prevented by an act of God, war, riots, natural catastrophe, or other event beyond the control of the non-performing party and which could not have been avoided or overcome by the exercise of due diligence; provided that the party claiming the excuse from performance has (a) promptly notified the other party of the occurrence and its estimated duration, (b) promptly remedied or mitigated the effect of the occurrence to the extent possible, and (c) resumed performance as soon as possible.

**7. Miscellaneous**

a. **FDOT** shall consider the employment by any contractor of unauthorized aliens a violation of Section 274A(e) of the Immigration and Nationality Act. If the contractor knowingly employs unauthorized aliens, such violation will be cause for unilateral cancellation of this Agreement.

b. The **MAINTAINING AGENCY** shall allow public access to all documents, papers, letters, or other material subject to the provisions of Chapter 119, Florida Statutes, and made or received by the **MAINTAINING AGENCY** in conjunction with this Agreement. Failure by the **MAINTAINING AGENCY** to grant such public access will be grounds for immediate unilateral cancellation of this Agreement by **FDOT**.

c. This Agreement constitutes the complete and final expression of the parties with respect to the subject matter hereof and supersedes all prior agreements, understandings, or negotiations with respect thereto. Without limiting the generality of the foregoing, this Agreement shall replace and supersede all prior agreements between **FDOT** and the **MAINTAINING AGENCY** with respect to maintenance of the lighting and/or lighting systems for the Facilities identified in Exhibit A.

d. This Agreement is governed by the laws of the State of Florida. Any provision hereof found to be unlawful or unenforceable are severable and will not affect the validity of the remaining provisions hereof.

e. All notices required pursuant to the terms hereof may be sent by first class United States Mail, facsimile transmission, hand delivery, electronic mail, or express mail and will be deemed to have been received by the end of five (5) business days from the proper sending thereof unless proof of prior actual receipt is provided. The **MAINTAINING AGENCY** must notify the local District of **FDOT** of the appropriate persons for notices to be sent pursuant to this Agreement. Unless otherwise notified in writing, notices must be sent to the following addresses:

**MAINTAINING AGENCY:**

| |
|---|
| City of Port Orange |
| 100 City Center Circle |
| Port Orange, Florida 32119 |
| 386-506-5502 |

f. **PUBLIC ENTITY CRIME INFORMATION STATEMENT**: A person or affiliate who has been placed on the convicted vendor list following a conviction for a public entity crime may not submit a bid on a contract to provide any goods or services to a public entity, may not submit a bid on a contract with a public entity for the construction or repair of a public building or public work, may not submit bids on leases of real property to a public entity, may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity, and may not transact business with any public entity in excess of the threshold amount provided in Section 287.017, Florida Statutes, for **CATEGORY TWO** for a period of thirty six (36) months from the date of being placed on the convicted vendor list.

g. An entity or affiliate who has been placed on the discriminatory vendor list may not submit a bid on a contract to provide any goods or services to a public entity, may not submit a bid on a contract with a public entity for the construction or repair of a public building or public work, may not submit bids on leases of real property to a public entity, may not be awarded or perform work as a contractor, supplier, subcontractor, or consultant under a contract with any public entity, and may not transact business with any public entity.

h. By signing this agreement the Maintaining Agency certifies that it is not: (1) listed on the Scrutinized Companies that Boycott Israel List, created pursuant to Section 215.4725, F.S., (2) engaged in a boycott of Israel, (3) or listed on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, created pursuant to Section 215.473, Florida Statutes. For contracts involving $1,000,000 or more, if the Department determines the Maintaining Agency submitted a false certification under Section 287.135(5) of the Florida Statutes regarding the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, created pursuant to Section 215.473, Florida Statutes, or for contracts involving any amount, if the Maintaining Agency has been placed on the Scrutinized Companies that Boycott Israel List, or is engaged in a boycott of Israel, the Department shall either terminate the Contract after it has given the Maintaining Agency notice and an opportunity to demonstrate the Department's determination of false certification was in error pursuant to Section 287.135(5)(a) of the Florida Statutes, or maintain the Contract if the conditions of Section 287.135(4) of the Florida Statutes are met.

i. Nothing herein shall be construed as a waiver of either party's sovereign immunity.

j. **MAINTAINING AGENCY**:

1. shall utilize the U.S. Department of Homeland Security's E-Verify system to verify the employment eligibility of all new employees hired by the **MAINTAINING AGENCY** during the term of the contract; and

2. shall expressly require any subcontractors performing work or providing services pursuant to the state contract to likewise utilize the U.S. Department of Homeland Security's E-Verify system to verify the employment eligibility of all new employees hired by the subcontractor during the contract term.

3. Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the Agreement term and following completion of the Agreement if the **Maintaining Agency** does not transfer the records to **FDOT**

4. Upon completion of the Agreement, transfer, at no cost, to **FDOT**, all public records in possession of the Consultant or keep and maintain public records required by **FDOT** to perform the service. If the Consultant transfers all public records to **FDOT** upon completion of the Agreement, the Consultant shall destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. If the Consultant keeps and maintains public records upon completion of the Agreement, the Consultant shall meet all applicable requirements for retaining public records. All records stored electronically must be provided to **FDOT**, upon request from **FDOT's** custodian of public records, in a format that is compatible with the information technology systems of **FDOT**

5. Failure by the **Maintaining Agency** to comply with Chapter 119, Florida Statutes, shall be grounds for immediate unilateral cancellation of this Agreement by **FDOT**

**8. Certification**

This document is a printout of an **FDOT** form maintained in an electronic format and all revisions thereto by the **MAINTAINING AGENCY** in the form of additions, deletions, or substitutions are reflected only in an Appendix entitled “Changes to Form Document” and no change is made in the text of the document itself. Hand notations on affected portions of this document may refer to changes reflected in the above-named Appendix but are for reference purposes only and do not change the terms of the document. By signing this document, the **MAINTAINING AGENCY** hereby represents that no change has been made to the text of this document except through the terms of the Appendix entitled “Changes to Form Document."

You MUST signify by selecting one of the applicable options:

☒ No changes have been made to this Forms Document and no Appendix entitled "Changes to Form Document" is attached.

☐ No changes have been made to this Form Document, but changes are included on the attached Appendix entitled "Changes to Form Document."

**IN WITNESS WHEREOF**, the parties hereto have executed this Agreement effective the day and year first written.

**Exhibit A**
**STATE HIGHWAY LIGHTING, MAINTENANCE, AND COMPENSATION AGREEMENT**
**For Fiscal Year 2027**

## 1.0 PURPOSE

This exhibit defines the method and limits of compensation to be made to the **MAINTAINING AGENCY** for the services described in this Agreement and method by which payments will be made.

## 2.0 FACILITIES

The lighting or lighting systems listed below, or in an attached spreadsheet, or other electronic form are included with this Agreement and represent the Facilities to be maintained by the **MAINTAINING AGENCY**:

1. 69 Lights on SR 5
2. 7 Lights on SR 441
3. 98 SR 5A
4. 112 SR 421
5. 
6. 

## 3.0 COMPENSATION

For the satisfactory completion of all services detailed in this Agreement, **FDOT** will pay the **MAINTAINING AGENCY** the Total Sum as provided in Section 2 of the Agreement. The **MAINTAINING AGENCY** will receive one single payment at the end of each fiscal year for satisfactory completion of service.

The per-light unit rate shall increase by 3% each fiscal year. E.g., the per-light unit rate of $347.89 in fiscal year 25/26 shall increase to $358.33 in fiscal year 26/27.

Total Payment Amount for each fiscal year is calculated by inputting the actual number of qualifying types of lights into the table below and multiplying by the unit rate and 90%. Example: 330 (lights) x $358.33 (unit rate) x 0.90 (90% requirement) = $106,424.01

| Type of Light | # of lights | LED or HPS | Unit rate | 90.00% | Total |
|---|---|---|---|---|---|
| High Mast | | HPS | | 0.90 | 0.00 |
| Standard | | HPS | | 0.90 | 0.00 |
| Underdeck | | HPS | | 0.90 | 0.00 |
| Sign | | HPS | | 0.90 | 0.00 |
| High Mast | | LED | | 0.90 | 0.00 |
| Standard | 286 | LED | 358.33 | 0.90 | 92,234.14 |
| Underdeck | | LED | | 0.90 | 0.00 |
| Sign | | LED | | 0.90 | 0.00 |

# CITY COUNCIL AGENDA ITEM

**COUNCIL MEETING DATE 6/2/2026**

---

**SUBJECT:** (B12) Resolution No. 26-29 - Amending the CDBG PY2025 Annual Action Plan

**DEPARTMENT:** Finance

**GOAL:** 5 - Fiscal Sustainability

---

**RECOMMENDED MOTION:** Move to approve Resolution No. 26-29.

---

**SUMMARY:** The City received a $354,806 allocation from the U.S. Department of Housing and Urban Development (HUD) to support the Memorial Park Multi-Use Trail Project.

During project implementation, staff determined that the federal procurement, bidding, and compliance requirements associated with the grant would significantly increase the administrative complexity, cost, and timeline of delivering the trail project. After further evaluation, it was determined that reallocating the funding to an eligible infrastructure project with a more efficient implementation path would better maximize the use of the grant funds and expedite delivery of community benefits.

As a result, the City proposes to amend the Program Year (PY) 2025 Annual Action Plan (AAP) to reallocate the $354,806 in HUD funding from the Memorial Park Multi-Use Trail Project to the Jackson and Oak Street Drainage Improvements Project, an eligible project that addresses stormwater and neighborhood infrastructure needs.

The proposed PY2025 Annual Action Plan Amendment No. 1 was made available for public review through the City's Community Development Block Grant (CDBG) webpage. In accordance with the City's Citizen Participation Plan, notice of the opportunity for public comment was published in the Daytona Beach News-Journal on April 17, 2026. The required 30-day public comment period, including a public hearing held on May 20, 2026, concluded on May 20, 2026. Upon City Council approval, the PY2025 Annual Action Plan Amendment No. 1 will be submitted to HUD for review and approval.

RESOLUTION NO. 26-29

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF PORT ORANGE, VOLUSIA COUNTY, FLORIDA; APPROVING AND AUTHORIZING THE AMENDMENT OF PY2025 ANNUAL ACTION PLAN TO SHIFT ALL FUNDS FOR THE MEMORIAL PARK MULTI-USE TRAIL PROJECT IN THE AMOUNT OF $354,806.00 AND REALLOCATE TO DIRECT COSTS FOR JACKSON STREET AND OAK STREET DRAINAGE IMPROVEMENTS PROJECT; AUTHORIZE THE MAYOR AND CITY CLERK TO SIGN ALL REQUIRED CERTIFICATIONS, AND AUTHORIZE STAFF TO SUBMIT TO THE U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT COMMUNITY DEVELOPMENT BLOCK GRANT; PROVIDING FOR CONFLICTS; PROVIDING FOR SCRIVENER'S ERRORS; AND PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the City has previously received a $354,806 allocation from the U.S. Department of Housing and Urban Development (HUD) for the Memorial Park Multi-Use Trail Project in the PY2025 Annual Action Plan; and

WHEREAS, the City Council of the City of Port Orange desires to approve the amendment of the PY2025 Annual Action Plan to shift funds in the amount of $354,806 from the PY2025 Annual Action Plan allocating funds for the Memorial Park Multi-Use Trail Project and reallocate said funds to direct costs for Jackson Street and Oak Street Drainage Improvements Project: and

WHEREAS, the City Council of the City of Port Orange desires to authorize and submit to the U.S. Department of Housing and Urban Development ("HUD") for approval of the amendment to said annual action plan in order to shift funds from the Memorial Park Multi-Use Trail Project in the amount of $354,806 in grant funding through amendment to the PY2025 Annual Action Plan and reallocate said funds to direct costs for the Jackson Street and Oak Street Drainage Improvements Project; and

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF PORT ORANGE, VOLUSIA COUNTY, FLORIDA:

Section 1. The City Council of the City of Port Orange hereby approves and authorizes the amendment to the PY2025 Annual Action Plan to shift all funds from Memorial Park Multi-Use Trail Project in the amount of $354,806 and reallocate to direct costs for Jackson Street and Oak Street Drainage Improvements.

Section 2. The City Council of the City of Port Orange hereby authorizes staff to submit to the U.S. Department of Housing and Urban Development ("HUD") for the approval of the amendment to said annual action plan in order to shift funds from Memorial Park Multi-Use Trail Project in the amount of $354,806 in grant funding through amendment to the PY2025 Annual Action Plan and

reallocate said funds to direct costs for the Jackson Street and Oak Street Drainage Improvements Project.

Section 3. The Mayor and City Clerk shall be authorized to execute any and all documents, agreements, or contracts necessary to implement this Resolution.

Section 4. All prior Resolutions in conflict or inconsistent herewith are hereby expressly repealed only to the extent of such conflict or inconsistency.

Section 5. Scrivener's Errors. Typographical errors and other matters of a similar nature that do not affect the intent of this Resolution, as determined by the City Clerk and City Attorney, may be corrected.

Section 7. This Resolution shall become effective immediately upon adoption.

Shannon K. Balmer, Senior Assistant City Attorney

To more effectively serve low/mod community needs, the City of Port Orange PY2025-2026 Annual Action Plan (AAP) is being amended to move $354,806 from Memorial Park Multi-Use Trail Project to Jackson Street and Oak Street Drainage Improvement Project.

# Executive Summary

## AP-05 Executive Summary - 24 CFR 91.200(c), 91.220(b)

### 1. Introduction

### Amendment Update 4/14/2026

*The City of Port Orange PY2025-2026 Annual Action Plan (AAP) is being amended to move $354,806 from Memorial Park Multi-Use Trail Project to Jackson Street and Oak Street Drainage Improvement Project. An amendment is necessary to reallocate these funds.*

As a recipient of federal grant funds, the U.S. Department of Housing and Urban Development (HUD) required the City of Port Orange to prepare and adopt a Five-Year Consolidated Plan for PY2021 to PY2025. This PY2025 Annual Action Plan is the fifth year of implementation of the Consolidated Plan.

The Action Plan serves as the City's application for Community Development Block Grant (CDBG) funding, and describes needs, goals, and objectives. This plan covers a period beginning October 1, 2025, and ending on September 30, 2026. This plan was developed pursuant to Federal guidelines found at 24 CFR 91.

The City of Port Orange is located within Volusia County Florida. As of 2024, the population estimate is 65,966 people. As of 2024, there are three Census Tracts (0824.14, 0825.03, 0825.11) within the City that have a population whose income is at or below 47.62% of the area median income. The City has not defined specific target areas within the City.

Port Orange has been advised that it will receive a CDBG entitlement allocation of $354,806 in PY2025. The proposed use of this funding is, primarily, continuation of major infrastructure projects. An estimated 100% of the PY2025 CDBG allocation will be focused on the continuation of major infrastructure projects in this area.

Aligned with the adopted five (5) Year CDBG Consolidated Plan previously approved by HUD, staff are proposing to utilize the city's PY2025 CDBG allocation on the Jackson Street and Oak Street Drainage Improvement Project. ($354,806).

The 2021-2025 Five-year Consolidated Plan addresses improvement projects by the City to improve infrastructure.

## 2. Summarize the objectives and outcomes identified in the Plan

This could be a restatement of items, or a table listed elsewhere in the plan or a reference to another location. It may also contain any essential items from the housing and homeless needs assessment, the housing market analysis, or the strategic plan.

The City of Port Orange developed its 2021-2025 Five-Year Consolidated Plan and Annual Action Plans based on an analysis of the data presented along with community participation and stakeholder consultation process.

Through these efforts established during the development of the Consolidated Plan the city identified two high priority needs in which to invest CDBG funding throughout the five-year period. The priority needs included: 1) Public Improvements and Infrastructure, and 2) Public Facilities.

To provide for the top priority needs, the goals for the period continue to be as follows:

1. Improve public infrastructure – Including improvements to streets, sidewalks, stormwater drainage, sewer, and other public infrastructure in low/moderate income areas. Residents have also expressed a desire for improving roads and striping on streets, fixing drainage, and stormwater runoff improvement.
2. For PY2025, the City will continue drainage improvements in Census tract 825.03/ block group 2. This activity will benefit all the residents in this low moderate-income area.

## 3. Evaluation of past performance

This is an evaluation of past performance that helped lead the grantee to choose its goals or projects.

The City of Port Orange became eligible to receive HUD CPD funds in 2006. Since that time, the City has received $5,561,001 in CDBG funds. The Consolidated Plan for the prior Five-Year period of 2016-2020 provided oversight and guidance to accomplish established goals through annual action plans directed toward the identified priority of public infrastructure improvement. Two multi-year priority projects for the City, the Virginia Avenue and Monroe Street Drainage Improvement Project and the Howe Street Drainage Improvement Project, receive multiple annual allocations of CDBG funding. These projects

have provided a direct positive impact to more than 10,000 residents of the City of Port Orange, exceeding the project outcomes and alleviating flooding in an LMI neighborhood. Roadway and Resurfacing Improvements provided a direct positive impact in four LMI census groups, also exceeding the projected outcomes of assistance to 3000 residents by more than double. During the first year of the 2021-2025 Five-Year Consolidated Plan the Jackson Street and Oak Street Drainage Improvements. In the second and third year of the plan CDBG funds were being used on the Jackson Street and Oak Street Drainage Improvements. The fourth year of the plan CDBG funds were used on the South Causeway Boat Ramp. In conclusion, this is the fifth year of the plan and the CDBG funds will be used for the Jackson Street and Oak Street Drainage Improvements.

## 4. Summary of Citizen Participation Process and consultation process

Summary from citizen participation section of plan.

**Update:**

**Amendment Update 4/14/2026**

**1st Amendment to move $354,806 from Memorial Park Multi-Use Trail Project to direct project costs to the Jackson Street and Oak Street Drainage Improvements Project.**

The City of Port Orange held a Public Hearing on Wednesday, May 20, 2026 at 5:00 p.m. in Council Chambers, City Hall, 1000 City Center Circle, Port Orange, FL, 32129. The City sought public input on the PY2025 Annual Action Plan (AAP) to move $354,806 from Memorial Park Multi-Use Trail Project to direct project costs to the Jackson Street and Oak Street Drainage Improvements Project.

During the preparation of the 2021-2025 Five-Year Consolidated Plan the City of Port Orange consulted with community service providers, other jurisdictions, and other entities, public and private, with a potential interest in or knowledge of that jurisdiction's housing and non-housing community development issues.

The City solicited public feedback through newspapers, local media outlets and public hearings. During the preparation of the PY2025 Annual Action Plan a Notice of Public Hearing appeared in the local newspaper, the Hometown News, on Friday, July 4, 2025, to invite the community to participate in a Public Hearing on Tuesday July 8, 2025, regarding the Proposed PY2025 Annual Action Plan. The newspaper advertisement encouraged the public to submit written comments on the PY2025 Action Plan during the 30-day public comment period from Friday, July 4, 2025, to Friday, August 8, 2025. The plan was posted on the City's website, and hard copies were also available for review at City Hall and by request. The plan was submitted for final approval to the City Council on August 5, 2025.

## 5. Summary of public comments

The comments received at the Public Hearing or during the 30-day comment period were all general inquiries regarding the process utilized to select projects for funding.

## 6. Summary of comments or views not accepted and the reasons for not accepting them

All comments were accepted.

## 7. Summary

The City intends to leverage other funding sources whenever possible to address the other priority needs of housing, public services, and economic development.

## AP-10 Consultation – 91.100, 91.200(b), 91.215(l)

### 1. Introduction

HUD Consolidated Plan regulations mandate that the City consult with other public and private agencies, State or local health and child welfare agencies, adjacent governments, the local Continuum of Care (CoC), and Public Housing Authorities during the preparation of the Consolidated Plan. In its administration of the CDBG program, the City works with local, regional, and statewide agencies and organizations to ensure that services are provided or available to its residents. During the preparation of the 2021-2025 Five-Year Consolidated Plan a consultation process was conducted with stakeholders in the housing and community development industry. The City engaged with stakeholders by reaching out through its website, conducting online surveys, placing notices in City Hall and the Port Orange Regional Library, conducting stakeholder interviews (phone calls and emails), and placing newspaper advertisements in the Hometown News. This original consultation process is still informing the project decision making for each annual plan.

**Provide a concise summary of the jurisdiction's activities to enhance coordination between public and assisted housing providers and private and governmental health, mental health and service agencies (91.215(l))**

The City of Port Orange works very closely with the Volusia County Community Assistance Division. The County receives State Housing Initiatives Program (SHIP) funding from the Florida Housing Finance Corporation to provide affordable housing for very low, low, and moderate-income households. The SHIP program encourages the development of local housing partnerships between municipalities in the County, lenders, real estate professionals, and advocates.

The City does not have a public housing authority, but the Volusia County Community Assistance Division manages the Section 8 Housing Choice Voucher Program. The County PHA provides portable housing choice vouchers that may be used in the City of Port Orange.

The City also works with local and regional non-profit housing providers and social service agencies to coordinate homelessness efforts.

**Describe coordination with the Continuum of Care and efforts to address the needs of homeless persons (particularly chronically homeless individuals and families, families with children, veterans, and unaccompanied youth) and persons at risk of homelessness.**

The Volusia/Flagler County Coalition for the Homeless (VFCCH) is the lead agency for the Continuum of Care (CoC) which serves Volusia County. The CoC is responsible for conducting the annual count of people experiencing homelessness, identifying the gaps in available housing and services to homeless subpopulations, and strategically planning and organizing the expansion of housing and supportive

services to meet the needs. These “gaps” are missing services that are needed to ensure that clients can successfully exit homelessness. The Continuum's priorities are in accordance with the Federal Strategy to Prevent and End Homelessness, the Volusia-Flagler County Ten Year Plan to End Homelessness as revised in the VFCoC Strategic Plan, and as set forth in HUD's National Performance Objectives for Continuums of Care, as follows:

- The highest priority is permanent housing for chronically homeless persons, with a special emphasis on chronically homeless veterans. Since Volusia County has achieved functional zero for veterans as vetted by USICH and HUD, Prevention has taken on a new role with maintaining veterans in their housing.
- The second highest priority is placed on the Homeless Management Information System (HMIS) for the CoC to measure system performance and meet HUD's reporting requirements under the HEARTH Act.
- The third priority is to develop a coordinated entry process which is a key step in assessing the needs of homeless/at risk of homeless individuals and families and prioritizing them for assistance.
- The fourth priority is to prevent and end homelessness for families and unaccompanied youth.
- The fifth priority is domestic violence victims.

**Describe consultation with the Continuum(s) of Care that serves the jurisdiction's area in determining how to allocate ESG funds, develop performance standards for and evaluate outcomes of projects and activities assisted by ESG funds, and develop funding, policies and procedures for the operation and administration of HMIS.**

The City of Port Orange does not receive ESG funds and does not participate extensively in CoC deliberations.

As required by HUD, there is at least one homeless individual and several formerly homeless individuals who participate on committees for the Commission on Homelessness for Volusia Flagler Board of Directors for the FL 504 CoC. All meetings are open to the public and homeless individuals and homeless advocates are encouraged to attend. The public was an active part in the identification of goals and objectives and the formulation of the most recently updated Volusia Flagler CoC Strategic Plan. The whole CoC membership was invited to participate in a Continuum-wide poll to prioritize and rank the identified gaps in order of priority. In addition, the development of action steps within the objectives was voted on in planning meetings and brought to the Board meetings for discussion and final approval. Currently the Commission on Homelessness for the Volusia-Flagler CoC is developing a Five-Year Action Plan to coincide with Opening Doors, the Federal Strategic Plan to End Homelessness. The public, including homeless individuals and families, are encouraged to attend the Strategic Planning Meetings and make public comments.

Within the planning process for the FL-504 CoC, the development of shelter housing for the area has been a long-standing issue. Several workgroups including homeless representatives have been convened to assist with surveying the homeless population to get views on housing options, services, and service delivery. The surveys request input on their preferences regarding shelters, shelter location(s), Housing First options, Rapid Re-Housing (RRH), outreach and other wrap-around services such as mental health, substance abuse and SSI/SSDI Outreach, Access, and Recovery (SOAR) services. These surveys will assist in identifying where and how the CoC will proceed in addressing the need, size, and location for additional shelter beds (if determined necessary) as well as steering dollars to RRH and PSH beds and units.

The County of Volusia, which is an entitlement district for ESG, consults with the CoC in formulating its agenda for ESG funding. The County holds community development meetings which are open to the public and requests stakeholders to attend to provide the needed input necessary to determine how the funding will be used. The County of Volusia has previously used ESG funding for prevention but is shifting its focus to Rapid Rehousing in the coming year in alignment with HUD's goal of ending family homelessness.

The State of Florida released local solicitations for funding to non-entitlement areas (Flagler County, Daytona Beach, Port Orange, and Deltona) for ESG through CoC Lead Agencies. The local funding supports Emergency Shelter, Rapid Rehousing, Prevention and Street Outreach for these non-entitlement areas. The sub-recipients awarded local funding include Halifax Urban Ministries, Salvation Army, New Hope Ministries and Family Life Center of Flagler County.

**2. Describe Agencies, groups, organizations and others who participated in the process and describe the jurisdiction's consultations with housing, social service agencies and other entities**

| | **Agency/Group/Organization Type** | Services-Employment |
| | **What section of the Plan was addressed by Consultation?** | Economic Development<br>Anti-poverty Strategy |

DRAFT

| | | |
|---|---|---|
| | **Briefly describe how the Agency/Group/Organization was consulted. What are the anticipated outcomes of the consultation or areas for improved coordination?** | Input collected through stakeholder interview. CareerSource provides workforce development services to a wide range of individuals, including those transitioning out of homelessness and seeking stable employment. CareerSource provided insight into the needs of its client base, including a need for stronger public transportation options between residential areas and employment centers. |
| 9 | **Agency/Group/Organization** | Pregnancy Crisis Center |
| | **Agency/Group/Organization Type** | Services-Health |
| | **What section of the Plan was addressed by Consultation?** | Housing Need Assessment |
| | **Briefly describe how the Agency/Group/Organization was consulted. What are the anticipated outcomes of the consultation or areas for improved coordination?** | Input collected through a stakeholder interview with Pregnancy Crisis Center. The Center provides free pregnancy tests and other referrals and resources to women in need. The Center emphasized the importance of access to affordable housing in the area, particularly for single mothers expecting a child. |
| 10 | **Agency/Group/Organization** | Beach House Youth Prevention Center |
| | **Agency/Group/Organization Type** | Services-Children<br>Services-homeless |
| | **What section of the Plan was addressed by Consultation?** | Homelessness Needs - Unaccompanied youth |
| | **Briefly describe how the Agency/Group/Organization was consulted. What are the anticipated outcomes of the consultation or areas for improved coordination?** | Input collected through a stakeholder interview with Beach House Youth Prevention Center. BHYPC works with children at risk for delinquency and children with serious emotional disturbances. BHYPC said that safe, affordable housing for families in unstable situations would be ideal since many of their clients are from unstable home situations. |

DRAFT

| | | |
|---|---|---|
| 11 | **Agency/Group/Organization** | Council on Aging of Volusia County |
| | **Agency/Group/Organization Type** | Services-Elderly Persons |
| | **What section of the Plan was addressed by Consultation?** | Housing Need Assessment<br>Non-Homeless Special Needs |
| | **Briefly describe how the Agency/Group/Organization was consulted. What are the anticipated outcomes of the consultation or areas for improved coordination?** | Solicited input through a stakeholder interview. The Council on Aging of Volusia County helps with the elderly, including Meals on Wheels and other services, with an overall mission of keeping elderly residents in their home of choice. The Council indicated that many of their clients would benefit from rehabilitation funding because their homes are in poor condition, and they have limited income to renovate or replace appliances. |

### Identify any Agency Types not consulted and provide rationale for not consulting

There was no agency types not consulted during this process.

### Other local/regional/state/federal planning efforts considered when preparing the Plan

| Name of Plan | Lead Organization | How do the goals of your Strategic Plan overlap with the goals of each plan? |
|---|---|---|
| Continuum of Care | Volusia/Flagler County Coalition for the Homeless | The goal to provide shelter and other housing facilities along with supportive services for the homeless population aligned with the CoC Homeless Plan |
| 2021 City of Port Orange Citizen Survey Report | City of Port Orange | The report helped to determine priority needs based on residents' responses to survey questions and comments. |
| FY 2020-2025 Capital Improvement Plan | City of Port Orange | The goals of the Strategic Plan were supported by the capital needs identified in the CIP. |

DRAFT

| Name of Plan | Lead Organization | How do the goals of your Strategic Plan overlap with the goals of each plan? |
|---|---|---|
| Volusia County Consolidated Plan | Volusia County Community Assistance Division | The County's affordable housing goals and Housing Choice Voucher program overlap with the City's housing goals to expand the supply of affordable housing and preserve the existing affordable housing stock. |
| Local Housing Assistance Plan | Florida Housing Finance Corporation | The Strategic Plan is consistent with the Local Housing Assistance Plan which is based on the criteria established by FHFC to serve low- and moderate-income households by providing housing assistance and homeownership opportunities. |
| Analysis of Impediments to Fair Housing Choice | City of Port Orange | This plan was used to address sections of the Consolidated Plan related to barriers to affordable housing with the City of Port Orange. |

DRAFT

## AP-12 Participation – 91.105, 91.200(c)

### 1. Summary of citizen participation process/Efforts made to broaden citizen participation

**Summarize citizen participation process and how it impacted goal-setting**

CDBG regulations require that the City of Port Orange provide ample opportunity for residents to participate in the development of the Annual Action Plan. The City's Citizen Participation Plan adheres to the HUD requirements at 24 CFR Part 91. The plan includes soliciting participation from all City residents including low-and moderate-income persons, minorities, persons with disabilities, non-English speaking persons, and residents of slum and blighted areas. During the preparation of the PY2025 Annual Action Plan a Notice of Public Hearing appeared in the local newspaper, the Hometown News, on Friday, July 4, 2025, to invite the community to participate in a Public Hearing on Tuesday, July 8, 2025, regarding the Proposed PY2025 Annual Action Plan. The newspaper advertisement encouraged the public to submit written comments on the PY2025 Action Plan during the 30-day public comment period from Friday, July 4, 2025, to Friday, August 8, 2025. The plan was posted on the City's website, and hard copies were also available for review at City Hall and by request. The plan was submitted for final approval to the City Council on August 5, 2025.

DRAFT

# Expected Resources

## AP-15 Expected Resources – 91.220(c)(1,2)

### Introduction

The City of Port Orange is receiving $354,806 in CDBG funds from HUD for PY2025, the fifth year of the Five-Year Consolidated Plan. The City does not expect to receive any program income and prior year funds will not be reallocated at this time.

### Anticipated Resources

| Program | Source of Funds | Uses of Funds | Expected Amount Available Year 1 | | | | Expected Amount Available Remainder of ConPlan $ | Narrative Description |
|---|---|---|---|---|---|---|---|---|
| | | | Annual Allocation: $ | Program Income: $ | Prior Year Resources: $ | Total: $ | | |
| CDBG | public - federal | Acquisition<br>Admin and Planning<br>Economic Development<br>Housing<br>Public Improvements<br>Public Services | 354,806 | 0 | 0 | 354,806 | 0 | Resources based on the PY2025 allocation. |

**Table 5 - Expected Resources – Priority Table**

DRAFT

**Explain how federal funds will leverage those additional resources (private, state and local funds), including a description of how matching requirements will be satisfied**

The CDBG program does not require a match from non-federal sources. However, CDBG funds will leverage additional sources of funding including general and local funds and possible State funding.

As evidenced by the historical allocations, the needs of the City far outweigh the CDBG allocation and projects where CDBG funding is invested will often be partially funded by other sources to make the project feasible. Traditionally, the source of these additional funds depends on both the nature of the activity and the location.

DRAFT

**If appropriate, describe publicly owned land or property located within the jurisdiction that may be used to address the needs identified in the plan**

Not currently applicable.

**Discussion**

While the City has not committed any local land or property resources to address the priority needs as of the writing of the Plan, as projects are identified during the planning period, if there are funding deficits, the City may utilize available local funding and State funding to fill the gap, as needed.

DRAFT

# Annual Goals and Objectives

## AP-20 Annual Goals and Objectives

# Projects

## AP-35 Projects – 91.220(d)

### Introduction

**Amendment Update 4/16/2026**

*With citizen approval the City has amended the original funding of $354,806 set aside for Memorial Park Multi-Use Trail Project to use for the Jackson Street and Oak Street Drainage Improvements.*

The following table contains the projects that the City will fund in PY2025 using CDBG funds. All the CDBG allocation will be expended on the *Jackson Street and Oak Street Drainage Improvements.*

**Projects**

| # | Project Name |
|---|---|
| 1 | Jackson Street and Oak Street Drainage Improvements. |
| | |

**Table 7 - Project Information**

### Describe the reasons for allocation priorities and any obstacles to addressing underserved needs

Priorities were determined based on stakeholders and community input, the needs assessment and market analysis, as well as other reports and studies conducted by the City including the Capital Improvement Plan.

The primary obstacle to meeting the underserved needs in Port Orange is the limited financial resources. The activities that are proposed for funding in PY2025 will have a significant impact on low- and moderate-income persons in the City.

DRAFT

## AP-38 Project Summary

### Project Summary Information

| | | |
|---|---|---|
| 1 | **Project Name** | Jackson Street and Oak Street Drainage Improvements |
| | **Target Area** | LMI Area |
| | **Goals Supported** | Improve Public Infrastructure and Facilities |
| | **Needs Addressed** | Public Improvements and Infrastructure |
| | **Funding** | CDBG: $354,806 |
| | **Description** | The City of Port Orange will pipe the existing open drainage ditches on the west side of Jackson Street (between Dunlawton Ave. and Canal View Blvd) and the south side of Oak Street (between Jackson St. and Dunlawton Ave). In addition, they will also mill and resurface the roads on Jackson and Oaks Streets along the limits of the ditch piping and construct a five-foot-wide sidewalk on the west side of Jackson Street where none existed previously for pedestrian safety. |
| | **Target Date** | 9/30/2026 |
| | **Estimate the number and type of families that will benefit from the proposed activities** | It is estimated that all 1,245 residents in LMI Census Tract 825.03 Block group 2 will benefit from this multi-use trail improvement project. |
| | **Location Description** | The location will be on the west side of Jackson Street (between Dunlawton Ave. and Canal View Blvd) and the south side of Oak Street (between Jackson St. and Dunlawton Ave). |
| | **Planned Activities** | Pipe the existing open drainage ditches, mill and resurface roads along the limits of the ditch piping and construct a five-foot-wide sidewalk. |
| 2 | **Project Name** | PY2025 Planning & Administration |
| | **Target Area** | LMI Area |
| | **Goals Supported** | Planning and Administration |
| | **Needs Addressed** | Public Improvements and Infrastructure |
| | **Funding** | $0 |

| | | |
|---|---|---|
| | **Description** | |
| | **Target Date** | 9/30/2026 |
| | **Estimate the number and type of families that will benefit from the proposed activities** | N/A |
| | **Location Description** | N/A |
| | **Planned Activities** | Administration of PY2025 CDBG program and oversight of grant activities. |

## AP-50 Geographic Distribution – 91.220(f)

### Description of the geographic areas of the entitlement (including areas of low-income and minority concentration) where assistance will be directed

### Geographic Distribution

| Target Area | Percentage of Funds |
|---|---|
| Citywide | |
| LMI Area | 100% |

**Table 8 - Geographic Distribution**

### Rationale for the priorities for allocating investments geographically

Since the primary objective of the CDBG program is to benefit low- and moderate-income persons, the City of Port Orange will utilize CDBG funds for projects and activities that will provide assistance to this target population and benefit the City as a whole by improving the living environment for the residents.

### Discussion

For PY2025, the city will carry out the Jackson Street and Oak Street Drainage Improvements project in Census tract 825.03/ block group 2. This activity will benefit all the residents in this block group.

# Affordable Housing

## AP-55 Affordable Housing – 91.220(g)

### Introduction

Throughout this Five-Year Consolidated Plan period the City of Port Orange did not plan on funding any affordable housing activities using CDBG funds. Due to the limited CDBG resources, the funds have been used for public infrastructure projects that will have a greater impact on the residents of the City. Affordable housing goals will continue to be addressed by the Volusia County Community Assistance Division through their allocation of SHIP funds and any other funding sources that become available that can be used countywide including municipalities within the County.

| One Year Goals for the Number of Households to be Supported | |
|---|---|
| Homeless | 0 |
| Non-Homeless | 0 |
| Special-Needs | 0 |
| Total | 0 |

**Table 9 - One Year Goals for Affordable Housing by Support Requirement**

| Acquisition of Existing Units | 0 |
| Total | 0 |

**Table 10 - One Year Goals for Affordable Housing by Support Type**

### Discussion

The City may utilize general funds to continue to address the housing and supportive services needs of the homeless population in Port Orange. During PY2024-2025, the City provided approximately $35,000 in general revenue funds to the First Step Shelter to assist with emergency shelter operations.

## AP-60 Public Housing – 91.220(h)

### Introduction

Public housing was established to provide decent and safe rental housing for eligible low-and moderate-income families, the elderly, and persons with disabilities. Public housing includes federally subsidized affordable housing that is owned and operated by the public housing authorities. The Volusia County Community Assistance Division is the county's Public Housing Agency and covers Port Orange. This organization works closely with state and federal agencies in administering various housing public assistance programs.

### Actions planned during the next year to address the needs to public housing

There is currently no public housing units managed in the City of Port Orange. The public housing needs in Port Orange are served by the County of Volusia Department of Community Services (VDCS). As the county's Public Housing Agency (PHA), the Community Assistance Division administers approximately 322 housing choice vouchers. As Volusia County Public Housing Agency (PHA), the Community Assistance Division manages the Housing Choice Voucher Program (Section 8) the federal government major program which assists very low-income families including the elderly, and the disabled to afford decent, safe, and sanitary housing in the private market. Since housing assistance is provided on behalf of the family or individual, participants can find their own suitable housing, including single-family homes, townhouses, and apartments.

### Actions to encourage public housing residents to become more involved in management and participate in homeownership

The County of Volusia Department of Community Services will continue to provide opportunities using public meetings to inform citizens of engagement opportunities and review issues presented by the County's Human Services Advisory Board. VDCS administers the Family Self Sufficiency (FSS) Program which helps residents of Public Housing attain success in their financial future. Participants sign a contract to be a part of the (FSS) Program for five (5) years, and they are compensated monetarily at the end of the program. Monies received at the end of the program can be used in a variety of ways, such as a down payment of a home. The (FSS) Program also provides information and resources to the residents on how to repair their credit and is also a link to agencies that can provide financial guidance by putting them in touch with realtors and banks that can assist the resident in attaining homeownership if that is their goal.

### If the PHA is designated as troubled, describe the manner in which financial assistance will be provided or other assistance

The PHA is not listed as "troubled" by HUD. VDCS will continue to provide services that improve the lives

of its public housing residents.

## AP-65 Homeless and Other Special Needs Activities – 91.220(i)

### Introduction

The City of Port Orange partners with Volusia/Flagler County Coalition for the Homeless for our Continuum of Care. Their mission is to prevent and end homelessness in Volusia and Flagler Counties and assist homeless and at risk of homeless individuals and families move towards self-sufficiency.

### Describe the jurisdictions one-year goals and actions for reducing and ending homelessness including

### Reaching out to homeless persons (especially unsheltered persons) and assessing their individual needs

The City of Port Orange partners with Volusia/Flagler County Coalition for the Homeless for our Continuum of Care. Here are their current goals:

1. Goal: To develop located crisis response shelters/day programs for East and West Volusia.
2. Goal: Address the needs of those individuals' experiencing homelessness who were encamped at the Volusia County Service Center
3. Goal: Reorganize the Continuum of Care committee as the Volusia/Flagler Commission on Homelessness (COH)
4. Goal: County and City governments remain committed to providing capital outlay and operational funding for crisis response shelters/day programs in East and West Volusia.

### Addressing the emergency shelter and transitional housing needs of homeless persons

The City of Port Orange annually budgets funds in the amount of $35,000 for the First Step Shelter to assist with emergency shelter operations.

### Helping homeless persons (especially chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth) make the transition to permanent housing and independent living, including shortening the period of time that individuals and families experience homelessness, facilitating access for homeless individuals and families to affordable housing units, and preventing individuals and families who were recently homeless from becoming homeless again

The City of Port Orange partners with the Volusia/Flagler County Coalition for the Homeless (VFCCH) which is an administrative agency designed to procure, distribute, and monitor grants and other funding, and to provide oversight to agencies in the community who provide direct services to the homeless and those at risk of homelessness. VFCCH serves as the Lead Agency, Lead Agency for Homeless Management Information System (HMIS), and Collaborative Applicant for the Commission on

Homelessness for Volusia & Flagler Counties (FL-504 Continuum of Care). It provides assistance and guidance in planning, coordinating, and applying for federal, state, and local funds, facilitates various bureaucratic activities of the CoC, and monitors the implementation, activities, and outcomes of direct service-providing agencies according to various rules and regulations set forth by HUD (Department of Housing and Urban Development), state and local rules/regulations, rules defined within the grants themselves, and various public policies regarding homelessness. VFCCH also conducts community research and is the primary agency responsible for coordinating and executing HUD's annual Point-in-Time Count.

**Helping low-income individuals and families avoid becoming homeless, especially extremely low-income individuals and families and those who are: being discharged from publicly funded institutions and systems of care (such as health care facilities, mental health facilities, foster care and other youth facilities, and corrections programs and institutions); or, receiving assistance from public or private agencies that address housing, health, social services, employment, education, or youth needs.**

The City of Port Orange partners with Volusia Flagler County Coalition for the Homeless for our Continuum of Care. There are over 600,000 people that call Volusia and Flagler Counties home. On any given day there are approximately 700 people experiencing homelessness in the two-county area. Homelessness doesn't target one population or another. The Volusia Flagler County Coalition for the Homeless has programs in place to address low-income individuals and families avoid becoming homeless, especially extremely low-income individuals and families.

## AP-75 Barriers to affordable housing – 91.220(j)

### Introduction:

See discussion below.

### Actions it planned to remove or ameliorate the negative effects of public policies that serve as barriers to affordable housing such as land use controls, tax policies affecting land, zoning ordinances, building codes, fees and charges, growth limitations, and policies affecting the return on residential investment

The median household income as of 2023 was $67,240. In 2020, it was $56,242. Median contract rent in 2023 was $1,220 and in 2020, it was $929. High home values and rents have resulted in much of the housing stock being out of the affordable range for large portions of the population and high percentages of cost burdened households when housing is able to be obtained. To combat market trends that prevent access to affordable housing, the City of Port Orange continues to strive to create an environment where existing affordable housing stock is supported and has provided guidance through several City policies to foster the development of additional affordable housing stock in the community.

### Discussion:

Overall, Port Orange's Comprehensive Plan Housing Element contains several good-faith measures to promote affordable and multi-family housing. However, with a growing population and the lack of existing affordable housing options, Port Orange may wish to expand zoning tools for promoting affordable housing. If homeowners in residential districts could rent secondary living quarters or ADUs to unrelated tenants, the supply of affordable housing in desirable neighborhoods could be significantly expanded, depending on the level of interest among homeowners in becoming landlords. The strongest regulatory tool to promote affordable housing development, at least in new multi-family developments not yet developed—would be to require inclusionary housing measures and density bonus measures for the development of affordable housing units.

## AP-85 Other Actions – 91.220(k)

### Introduction:

This section of the Action Plan outlines the planned actions of the City and its partner agencies to meeting underserved needs, fostering, and maintaining affordable housing, reducing lead-based paint hazards, reducing the number of poverty-level families, and developing institutional structure.

### Actions planned to address obstacles to meeting underserved needs

The primary obstacle to meeting all the identified needs is the lack of financial resources available to public and private agencies who serve the needs of the City's low-and moderate-income residents. For PY2025, the City has allocated $354,806 in CDBG funding to assist residents in low-income neighborhoods by addressing the public infrastructure needs of these communities. The City will continue to foster existing partnerships and collaborate with new partners to bring needed resources to meet the needs of Port Orange residents.

### Actions planned to foster and maintain affordable housing

The affordable housing needs of Port Orange residents will continue to be addressed by the Volusia County Community Assistance Division.

### Actions planned to reduce lead-based paint hazards

Lead-based paint hazards continue to be managed by Volusia County where regulatorily required. The Florida Department of Health will also reduce lead-based paint hazards through its Lead Poisoning Prevention program.

### Actions planned to reduce the number of poverty-level families

According to the 2023 ACS, the poverty-rate in Port Orange was 12.5% as compared to 11.8% poverty-rate in Volusia County. For citizens living in Port Orange, educational attainment is the leading disparity influencing wage earnings and access to employment opportunities. Understanding the value of having a trained workforce, the City of Port Orange participates with the East Central Florida Regional Planning Council and with Volusia County on economic development and workforce training initiatives. The jurisdiction has a general goal of encouraging education/workforce training and providing services to mitigate some of the effects of living in poverty.

### Actions planned to develop institutional structure

The Grants Administration staff currently coordinates with City departments and Volusia County to meet the goals and objectives of the Consolidated Plan. During FY2025-2026, the City will continue to foster

existing relationships and collaborate with new partners to meet the needs of residents. The partnership with the CoHH and its member organizations will be further developed to address the needs of the homeless population.

### Actions planned to enhance coordination between public and private housing and social service agencies.

The City will continue to consult with the City of Daytona Beach, the City of Ormond Beach, and Volusia County to ensure that the needs of homeless persons in the City are met.

### Discussion:

See above.

# Program Specific Requirements

## AP-90 Program Specific Requirements – 91.220(l)(1,2,4)

### Introduction:

The City of Port Orange anticipates spending 100% of 2025 CDBG funds on activity(s) that benefit low to moderate income persons.

**Community Development Block Grant Program (CDBG)**
**Reference 24 CFR 91.220(l)(1)**

Projects planned with all CDBG funds expected to be available during the year are identified in the Projects Table. The following identifies program income that is available for use that is included in projects to be carried out.

| | |
|---|---|
| 1. The total amount of program income that will have been received before the start of the next program year and that has not yet been reprogrammed | 0 |
| 2. The amount of proceeds from section 108 loan guarantees that it will be used during the year to address the priority needs and specific objectives identified in the grantee's strategic plan. | 0 |
| 3. The amount of surplus funds from urban renewal settlements | 0 |
| 4. The amount of any grant funds returned to the line of credit for which the planned use has not been included in a prior statement or plan | 0 |
| 5. The amount of income from float-funded activities | 0 |
| **Total Program Income:** | **0** |

**Other CDBG Requirements**

| | |
|---|---|
| 1. The amount of urgently need activities | 0 |
| 2. The estimated percentage of CDBG funds that will be used for activities that benefit persons of low and moderate income.<br><br>Overall Benefit - A consecutive period of one, two or three years may be used to determine that a minimum overall benefit of 70% of CDBG funds is used to benefit persons of low and moderate income. # CITY COUNCIL AGENDA ITEM

**COUNCIL MEETING DATE 6/2/2026**

**SUBJECT:** (B13) Police Department K9 Mila Transfer to Officer J. Alevisatos

**DEPARTMENT:** Police Services

**GOAL:** 1 - Public Safety

**RECOMMENDED MOTION:** Move to approve the transfer of ownership of K-9 Mila to her handler, Officer Jarrad Alevisatos.

**SUMMARY:** K-9 Mila has served as a Police Dog with the Port Orange Police Department for three and a half years. Due to her performance issues and multiple handlers, K-9 Mila will be retired from service. Ownership of K-9 Mila will be transferred to her handler, Officer Jarrad Alevisatos, pursuant to the agreement drafted by the City Attorney's Office.

PRESENTER: Manuel Marino

# CANINE TRANSFER AGREEMENT

This Agreement is made and entered into by and between the City of Port Orange, a Florida municipal corporation with the following mailing address: 1000 City Center Circle, Port Orange, Florida 32129, (hereinafter referred to as "City"), and Jarrad Alevisatos, whose address is 4545 Clyde Morris Blvd., Port Orange, FL 32129, (hereinafter referred to as the "Transferee"), collectively referred to as the "Parties" hereto; and they do hereby stipulate and agree as follows:

## WITNESSETH

WHEREAS, the City owns and has in its possession a three (3) year old female, black and tan in color, Belgian Malinois ("K9 Mila") which is no longer needed by the Port Orange Police Department due to performance and medical reasons, but which in the past has been used by the canine unit of the Police Department; and

WHEREAS, Transferee was the designated handler of K9 Mila for over three (3) years, and during that timeframe partook in a substantial amount of training with K9 Mila; and

WHEREAS, Transferee fully understands that Belgian Malinois, in general, can be very dangerous and can cause risks and dangers of serious bodily injury, including permanent disability, paralysis and even death; and

WHEREAS, Transferee is willing to assume said risks and dangers in order to take possession of K9 Mila and provide for its care.

NOW THEREFORE, in consideration of the mutual covenants, conditions and terms set forth herein, the City and the Transferee hereby agree as follows:

1. The City agrees to do the following:

    a. On or before June 2, 2026, to transfer possession and ownership and to relinquish all claims of right, title, ownership and possession to the aforesaid K9 Mila to the Transferee; and

    b. Complete all documentation necessary to effectuate the aforesaid transfer of possession and ownership.

2. The Transferee agrees to do the following:

    a. Accept transfer of possession and ownership of the aforesaid K9 Mila from the City and assume all rights, liabilities and responsibilities of ownership including but not limited to the costs associated with the medical care, food and shelter for K9 Mila; and

    b. Hold Harmless Agreement. Upon transfer of possession of the aforesaid K9 Mila to the Transferee, the Transferee assumes the entire responsibility for said K9 Mila and as such the Transferee hereby releases the City and all its employees and representatives thereof from all liability arising from the transfer of said K9 Mila to the Transferee, including negligence on the part of the Transferee or the City. Transferee further expressly agrees to indemnify the City and all its employees and representatives, and agrees to hold them and shall hold all of them harmless from any

and all claims and actions for personal injury, death or property damage and from any other losses, and all damages (including but not limited to: compensatory, consequential, and incidental), charges or expenses, including reasonable attorney's fees, which arise out of or which are alleged to have arisen out of, in connection with or by reason of, the transfer of possession and/or ownership of the aforesaid K9 Mila.

3. Secondary Transfer of Animal Prohibited. Transferee shall not transfer K9 Mila to any individual or entity without first obtaining the express written consent of the Chief of Police in and for the City of Port Orange.

4. Mutual Intent. It is agreed between the City and Transferee that the provisions in this Agreement represent the true intent of the Parties and that sufficient consideration exists for each to be bound thereby.

5. Enforcement. In the event any party incurs legal expenses or costs to enforce the terms of this Agreement, the prevailing party shall be entitled to recover the costs such action so incurred, including but not limited to all reasonable attorney's fees. The City does not waive any protections, available defenses or limitations of actions, to which the City may be entitled in accordance with section 768.28, Florida Statutes and Florida law.

6. Amendments to Agreement. It is further agreed that no modification, amendment, or alternation in the terms or conditions contained herein shall be effective unless contained in a written document executed with the same formality and of equal dignity herewith.

7. Assignability. Unless otherwise permitted herein, neither party shall assign this Agreement.

8. Severability. In the event any provision of this Agreement is held to be unenforceable for any reason, the unenforceability thereof shall not affect the remainder of the Agreement which shall remain in full force and effect and enforceable in accordance with its terms.

9. No Warranties. The Parties recognize and agree that the City makes no warranties, expressed or implied, as to the fitness and reliability of said K9 Mila and specifically disclaims any warranty of merchantability, fitness and suitability for a particular use or purpose, or the fitness or suitability of the aforesaid K9 Mila for any specific application, performance, result or use. The Transferee agrees that he is accepting transfer of possession and ownership of said K9 Mila in "as is" condition. Furthermore, the Parties agree that the City expressly denies any further responsibility for the maintenance and/or behavior of said animal but that henceforth Transferee shall be fully and solely responsible for the maintenance and behavior of said animal.

10. Entire Agreement. This document incorporates and includes all prior negotiations, correspondence, conversations, agreements, and understandings applicable to the matters contained herein and the Parties agree that there are no commitments, agreements, or understandings concerning the subject matter of this Agreement that are not contained in this document. Accordingly, it is agreed that no deviation from the terms hereof shall be predicated upon any prior representations or agreements whether oral or written.

11. Governing Law, Jurisdiction, Venue. This Agreement and all of the rights and obligations of the Parties hereto shall be governed both procedurally and substantively by and construed according to the Laws of Florida. The Parties further agree that jurisdiction regarding the rights and obligations of all Parties under this Agreement and all litigation resulting there from, whether by arbitration or otherwise, shall be vested in the Seventh Judicial Circuit, in and for Volusia County, Florida.

# CITY COUNCIL AGENDA ITEM

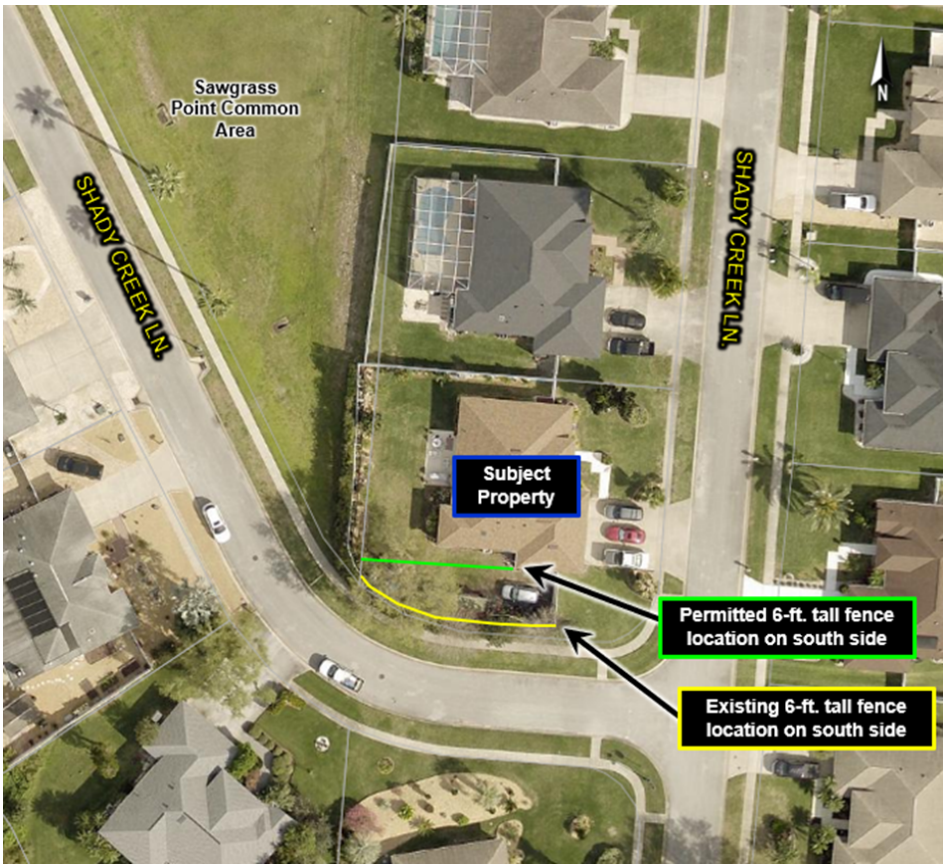
**COUNCIL MEETING DATE 6/2/2026**

---

**SUBJECT:** (H20) Appeal of Planning Commission Denial of a Variance for 5968 Shady Creek Lane

**DEPARTMENT:** Community Development

**GOAL:** 3 - Quality of Life



---

**RECOMMENDED MOTION:** Move to uphold the Planning Commission's decision to deny the variance request.

---

**SUMMARY:** At the April 2026 Planning Commission meeting, the Planning Commission denied (4-1) the applicant's request to allow a 6-foot-tall fence, installed approximately 10 years ago without a building permit, to remain in a secondary front yard on a corner lot in lieu of being relocated to comply with the requirement that it be aligned with the front plane of the house. The subject property is located at 5968 Shady Creek Lane, at the northwest corner where two segments of Shady Creek Lane intersect.

According to the Land Development Code (LDC), the subject property is classified as a corner lot because it is adjacent to two public rights-of-way (the intersection of two segments of Shady Creek Lane) and therefore has both a primary and secondary front yard. The LDC requires that a 6-foot-tall fence located in a secondary front yard be either aligned with the front plane of the home (approximately 10 to 27 feet from the secondary front property line) or set back to the zoning district front yard setback (30 feet), whichever is less.

A photo that shows the existing 6' fence location and the permitted 6' fence location in the secondary front yard of 5968 Shady Creek Lane

In accordance with Chapter 19, Section 1(f) of the Land Development Code (LDC), the **Council's decision to uphold or reverse the Planning Commission's determination must be based on the facts presented at the Planning Commission meeting, the established review criteria for variance requests, and the Planning Commission's decision on the requested variance. No new evidence may be presented, heard, or discussed during the appeal**. Any new information would have to be submitted as part of a new variance request.

Attached are the variance appeal letter submitted by the applicant, the DRAFT minutes from the April 2026 Planning Commission meeting, and the April 2026 Planning Commission staff report for the variance.

PRESENTER: Tim Burman

# STAFF REPORT

## CASE NO. VARC-26-0002

**Variance from LDC, Chapter 16, Section 3(b)(2)(f) and Section 3(b)(3)(a)**

| | |
|---|---|
| **REQUEST:** | Variance from Chapter 16, Section 3(b)(2)(f) and Section 3(b)(3)(a) of the Land Development Code (LDC), to allow a 6-foot-tall fence to be located less than 5 feet from the right-of-way in lieu of being placed in line with the front plane of the house. |
| **LOCATION:** | 5968 Shady Creek Lane (Figure 1 – Location Map) |
| **OWNERS:** | Victor Francis and Samia Fezy |
| **APPLICANT:** | Peter Francis |
| **STAFF RECOMMENDATION:** | Denial |
| **STAFF CONTACT:** | Tim Burman, Community Development Director, (386) 506-5675 |
| **PLANNING COMMISSION:** | April 23, 2026 |

## INTRODUCTION

The subject property is located at 5968 Shady Creek Lane, at the northwest corner where two segments of Shady Creek Lane intersect (Figure 1). The applicant is requesting a variance to allow an existing 6-foot-tall fence to remain in a secondary front yard setback less than 5-feet from the Shady Creek Lane right-of-way line in lieu of being placed in line with the front plane of the house as permitted. According to the applicant, the 6-foot-tall fence was installed about 10 years ago to provide privacy and safety for the well-being of a family member with a medical condition that lives at this address with the property owners.

**Figure 1. Location Map**

**DISCUSSION**

According to the Land Development Code (LDC), the subject property is a corner lot because it is adjacent to two public rights-of-way (intersection of two sections of Shady Creek Lane) and therefore has two front yards, a primary front yard and secondary front yard. The purpose of the citywide requirement regulating 6-foot-tall fences within the primary and secondary front yards of residential corner lots is to protect public safety and maintain neighborhood character by controlling the placement and height of fences adjacent to public rights-of-way.

For safety, the setback ensures that 6-foot-tall fences do not encroach into required sight triangles at street intersections and driveways. These sight triangles are needed for maintaining adequate visibility for motorists, pedestrians, and cyclists, particularly at corner lots where two street frontages intersect, and visibility conflicts are more likely to occur. By limiting fence height and requiring appropriate setbacks in these areas, the regulation reduces potential hazards associated with obstructed views of oncoming traffic and pedestrian activity.

In this case, the existing 6-foot-tall fence is located outside of the required 25-foot visual clearance triangle for the intersection of two public roadways. The 25-foot sight triangle is established by measuring 25 feet along each of the intersecting rights-of-way and connecting those points to define the area that must remain clear for visibility. Based on this configuration, the fence does not encroach into the sight triangle and is not anticipated to impact visual clearance for vehicles or pedestrians along Shady Creek Lane.

In addition to safety considerations, the requirement supports community design objectives by preserving visual openness within residential neighborhoods. Limiting the height and placement of fences in these areas helps ensure that views from neighboring homes and from the public right-of-way are not unnecessarily blocked. This maintains a more open and visually connected streetscape, where front yards, landscaping, and home façades remain visible and contribute to the overall aesthetic quality of the neighborhood.

Together, these provisions balance safety and livability by ensuring that fencing within visible front yard areas does not block intersection visibility while also preventing front-facing residential areas from being enclosed in a way that reduces openness and visibility along the street.

For the subject property, the east property line along Shady Creek Lane is the primary front yard and the south property line along Shady Creek Lane is the secondary front yard (Figure 1). Both streets are local public roads. According to the LDC, a 6-foot-tall fence in a secondary front yard must be set back either in line with the front plane of the home (approximately 10 - 27 feet from the secondary front lot line) or to the zoning district front yard setback (30 feet), whichever is less (Figure 2). Therefore, the LDC allows a 6-foot-tall fence to be installed up to the front plane of the house.

In this case, while the lot includes a secondary front yard, it does not directly abut any single-family residential lots where a 6-foot-tall fence would obstruct views from adjacent homes. In addition, the proposed fence location is outside of the required sight triangle

areas, and therefore does not interfere with intersection visibility or roadway safety (Figure 2).

Therefore, there are two options for a fence on the subject property that would meet the LDC requirements: 1) A 4-foot-tall fence installed up to 5-feet from the right-of-way for the a primary front yard and secondary front yard; or 2) a 6-foot-tall fence installed in line with the front plane of the house for the a primary front yard (30 feet) and the secondary front yard (10 - 27 feet).

**Figure 2. Existing Fence Location Compared to Permitted Fence Location**

It should be noted that a 6-foot-tall fence currently exists along the rear property line and extends into the secondary front yard; however, that rear fence is not part of the current variance request. It is located within the HOA common area and is outside the subject property boundary. The variance request applies only to the portion of fence located within the south secondary front yard along the Shady Creek Lane right-of-way on the subject property. The existing 6-foot-tall fence on HOA property is being addressed separately and is not included in this request.

## BACKGROUND

The subject property contains a single-family home built in 2000. The applicant states that approximately 10 years ago, a 6-foot-tall fence was installed roughly 5 feet from the south property line along the Shady Creek Lane right-of-way. According to City records, no permit was issued for this portion of the fence. In the applicant's variance request letter, he notes that the fence was installed around 2016 and has remained in place for nearly 10 years with no known complaints to Code Enforcement, the City, or the homeowners' association, aside from a single complaint received by Code Enforcement in 2024, and with no identified adverse impacts to surrounding properties.

As indicated in the applicant's variance request letter, the primary reason for installing the 6-foot-tall fence is to address the safety and well-being of a family member with a medical condition who resides at the property. According to the applicant, the fence serves as a necessary protective measure, allowing this individual to be outdoors within a secure, enclosed yard.

The applicant has stated that a 4-foot-tall fence would not provide adequate security for their family member with a medical condition, as it could be easily climbed or crossed, whereas a 6-foot-tall fence provides an appropriate level of protection while still allowing safe outdoor access. The applicant also notes that similar fence heights are commonly used in residential and care settings for individuals with comparable needs. Based on these concerns, the applicant is requesting a variance to allow the existing 6-foot-tall fence along Shady Creek Lane to remain.

Based on discussions with the applicant, he acknowledges that a permit should have been obtained prior to the installation of the fence. However, the applicant has indicated that if a permit had been requested and subsequently denied in 2016 due to the fence height, he would have pursued a variance to seek approval for the 6-foot-tall fence based on the same safety considerations described above.

## REVIEW OF VARIANCE CRITERIA

Chapter 19, Section 1 of the Land Development Code (LDC), outlines the criteria to be used in determining whether the requested variance should be granted. The following summarizes these criteria, along with relevant staff information and the applicant's justification for the variance:

*a) Special conditions and circumstances exist which are peculiar to the land, structure or building involved, and which are not applicable to other lands, structure or buildings in the same zoning district.*

This criterion typically refers to conditions or circumstances such as steep slope, presence of historic trees, odd lot shape, etc. that might make installing a 6-foot-tall fence in line with the front plane of the home impractical. There are no special conditions or circumstances which are peculiar and would otherwise prevent installation of either a 6-foot-tall fence in line with the front plane of the home or a 4-foot-tall fence a minimum of 5 feet from the right-of-way along Shady Creek Lane in accordance with the Land Development Code (LDC).

The subject property is a corner lot that has two front yards according to the LDC, which is not a unique condition or circumstance. The subject property is developed with a single-family home. The lot size of the subject property (11,325 SF) exceeds the lot size requirement (9,600 SF) for a corner lot in the Sawgrass Point Planned Unit Development (PUD) zoning district.

According to the applicant, although the property is classified as a corner lot, it differs from a typical residential corner lot because the secondary front yard does not abut another single-family residence, but instead borders a HOA-owned common area. As a result, the applicant asserts that the 6-foot-tall fence does not negatively impact the visibility, aesthetics, or enjoyment of neighboring residential properties. The applicant further notes that the fence provides additional privacy for the subject property from pedestrians and vehicles traveling east on Shady Creek Lane.

The applicant also states that existing mature hedges and landscaping located outside the fence line exceed 6 feet in height and already provide substantial visual screening of the fence (see pictures below). Because landscaping is not regulated under the Land Development Code in the same manner as fence height (provided it does not obstruct sidewalks or roadway visibility), similar screening would remain in place even if the fence were reduced to 4 feet in height.

In addition, the applicant states that the fence does not obstruct visibility near intersections and that there are no known traffic incidents, police reports, or safety concerns associated with its placement. Landscaping along the south side of the property also screens much of the fence from adjacent homes, further reducing its visual impact.

Staff have confirmed with the Police Department that there have been no reported accidents or safety incidents at the intersection of Shady Creek Lane and Shady Creek associated with the fence.

*Picture of subject property/fence looking east*

*Picture of subject property/fence looking west*

*Picture of subject property/fence looking west from intersection of Shady Creek Lane and Shady Creek Lane*

b) *The special conditions and circumstances are not the result of the applicant's actions.*

There are no special conditions or circumstances.

According to the applicant there are special conditions or circumstances, specifically, that the layout of the roadway, lots, and common areas predate the applicant's ownership of the property; the subdivision was developed in 1997, and the home was constructed in 2000, while the current property owner has only owned the home since 2007. The applicant believes these pre-existing conditions create unique circumstances that justify the requested variance and are not attributable to any action of the current owner.

c) *Literal interpretation and enforcement of the development code regulations would deprive the applicant of rights commonly enjoyed by other properties in the same zoning district under the terms of the development code and would work unnecessary and undue hardship on the applicant.*

When a new fence is installed, it is required to comply with the current requirements of the Land Development Code. These standards are intended to protect public safety and maintain neighborhood character by regulating the placement and height of fences located within primary and secondary front yard areas adjacent to public rights-of-way. From a safety standpoint, the requirements ensure that fences do not encroach into required sight triangles at street intersections and driveways, where clear visibility is necessary for motorists, pedestrians, and cyclists, particularly in corner lot conditions where two street frontages intersect.

In addition, the regulations support neighborhood design objectives by limiting visual obstructions within front yard areas that contribute to the public-facing character of residential subdivisions. These provisions help ensure that front yards, home façades, and streetscapes remain open and visible, rather than enclosed by tall fencing along the roadway.

For corner lots, these standards apply to both primary and secondary front yard areas regardless of adjacent conditions. However, the Land Development Code still provides flexibility in fence placement and height, allowing a 4-foot-tall fence to be installed within the front yard setback closer to the right-of-way, or a 6-foot-tall fence to be installed in alignment with the front plane of the home, provided applicable setback requirements are met.

In this case, the subject property's configuration, with its secondary front yard adjacent to a HOA-owned common area rather than a residential lot, presents a condition that differs from the typical corner lot scenario the standards are primarily intended to address. Based on the current layout, the 6-foot-tall fence does not appear to create the types of impacts the code is designed to prevent, as it does not obstruct required sight triangles, does not interfere with intersection visibility, and does not negatively affect visibility or access related to adjacent residential properties or public safety considerations.

According to the applicant, the variance is requested to allow the existing 6-foot-tall fence to remain in its current location along the Shady Creek Lane right-of-way. The applicant notes that this condition differs from a typical corner lot scenario because the secondary front yard does not abut another residential property but instead fronts a HOA-owned common area. As a result, the applicant asserts that the fence does not impact adjacent residential properties, does not interfere with intersection visibility or sight triangles, and is screened in part by existing landscaping.

The applicant further states that the fence provides enhanced privacy from vehicles and pedestrians traveling along Shady Creek Lane, as well as an added level of safety and security for a family member with a medical condition residing at the property.

d) *The variance, if granted, is the minimum variance necessary to make possible reasonable use of the land, building or structure.*

Although not the applicant's preference, the property owners could install a fence that complies with the setback requirements of the LDC. Doing so would require removing the existing fence and either replacing it with a 4-foot-tall fence or installing a 6-foot-tall fence in line with the front plane of the house from the Shady Creek Lane right-of-way.

According to the applicant, keeping the existing 6-foot-tall fence in its current location is necessary to allow reasonable use of the property by providing safety

and security for a family member with a medical condition who lives at the home. The applicant states that the fence, as it is currently placed, does not affect neighboring residential properties or block sight lines for drivers or pedestrians in the subdivision.

Staff have confirmed with the Police Department that there have been no reported accidents or safety incidents at the intersection of Shady Creek Lane and Shady Creek related to the fence. In addition, there are existing mature hedges and landscaping outside the fence line that are over 6 feet tall and already block much of the view of the fence. Since landscaping is not regulated in the same way as fence height under the Land Development Code (as long as it does not block sidewalks or roadway visibility), similar landscape would remain even if the fence were reduced to 4 feet.

Based on these conditions, the applicant believes keeping the fence in its current location is the smallest change needed to allow reasonable use of the property while meeting the stated safety and security needs.

e) *Granting of the variance request will not confer on the applicant any special privilege that is denied by the development code to other lands, buildings, or structures in the same zoning district.*

According to the applicant, the subject property is not a typical corner lot. The secondary front yard does not abut or directly adjoin any single-family residential lot but instead borders a HOA-owned common area. As a result, the 6-foot-tall fence does not affect the view, privacy, or enjoyment of any neighboring residential property.

The applicant further notes that this condition differs from most corner lots in residential subdivisions, which typically directly abut other single-family homes along one or more front yard exposures. In this case, there are no adjacent residential lots along the secondary frontage that would experience view obstruction or other impacts from the fence.

In addition, the fence is not located in a position that impacts visibility clearance at the intersection or within required sight triangles, and it does not interfere with the safe movement of vehicles or pedestrians. Based on these conditions, the applicant states that the fence in this location does not create the typical impacts associated with corner lots where fences may directly face or border other homes or obstruct intersection visibility. Accordingly, allowing the 6-foot-tall fence to remain would not provide a special advantage compared to similarly situated properties, since it does not reduce visibility or affect adjacent residential use or safety.

*f)* *The granting of the variance will be in harmony with the general intent and purpose of this code and will not be injurious to the surrounding properties or detrimental to the public welfare.*

The fence requirements in the LDC are intended to protect the health, safety and general welfare of the citizens of the city, and to enhance the appearance, function and livability of the city and improve the overall quality of life within the community. The intent of the city-wide setback requirement for a residential 6-foot-tall fence in a front yard is to ensure fences that abut streets in residential subdivisions with a narrow right-of-way width are set back off the right-of-way line to provide adjacent properties adequate visual sight lines from their home.

The height and location of the proposed fence is inconsistent with other fences in the neighborhood installed consistent with the LDC. There are 12 corner lots in Sawgrass Point subdivision and 3 of them have fences that conform to the fence height/setback requirements of the LDC and the rest have no fence (Figure 3).

The location of the existing 6-foot fence is located outside of the 25-foot visual clearance triangle requirement for intersections of two public roadways. The 25-foot visual triangle is determined by measuring 25-feet along the two intersecting rights-of-way that form the intersection then connecting those two points and measuring. If a variance is approved, the fence is not anticipated to impact visual clearance for vehicles and pedestrians along Shade Creek Lane.

**Figure 3. Corner Lots in Sawgrass Point Subdivision**

The applicant notes that the fence, installed around 2016, has remained in place for nearly 10 years with no known complaints, aside from a single complaint received by Code Enforcement in 2024. Staff have confirmed with the Police Department that there have been no accidents or safety incidents at the intersection of Shady Creek Lane and Shady Creek associated with the fence.

g) *The variance represents a reasonable disposition of a claim brought under the Bert J. Harris Private Property Rights Protection Act, chapter 95-181, Laws of Florida, that a development order of the city has unreasonably burdened the applicant's property, based upon the recommendations of the special master appointed in accordance with the act, or the order of a court as described in the act.*

The variance requested is not based upon a claim brought under the Bert J. Harris Private Property Rights Protection Act.

**PUBLIC NOTICE**

Public Notices regarding the variance were posted in the *News-Journal* and mailed to adjacent property owners and the property was posted with a public notice sign, as required by the LDC. As of April 17, 2026, staff have received two phone calls regarding the proposed variances.

**RECOMMENDATION**

Based on the findings of this report, staff recommends denial of the variance from Chapter 16, Section 3(b)(2)(f) and Section 3(b)(3)(a) of the LDC to allow for a secondary front yard setback of less than 5 feet for the existing 6-foot-tall fence.

However, if the Planning Commission recommends approval of the variance, it should be limited to the existing fence installed within the secondary front yard setback and should not permit any additional fencing within that setback area.

Exhibit 1 – Applicant's Request Letter

## Exhibit 1 – Applicant's Request Letter

5968 SHADY CREEK LN
PORT ORANGE, FL 32128

**Proposed Development Variance Description – Fence**

The existing fence was installed approximately in 2015–2016, nearly ten (10) years ago. The fence has remained in place for close to a decade prior to any complaint being received by Code Enforcement regarding its height. During this extended period, there have been no known complaints submitted to the City or the homeowners' association, nor have there been any identified adverse impacts to surrounding properties.

The fence is set back approximately five (5) feet from the right-of-way and does not obstruct or impede visibility at or near the intersection of Shady Creek Lane. To the best of the property owners' knowledge, there have been no traffic incidents, police reports or safety concerns attributable to the presence of the fence.

Although the property is classified as a corner lot, it does not function as a traditional corner lot. The secondary front yard abuts a homeowners' association-owned common area rather than another residential property. As a result, the six (6) foot fence does not negatively affect the visibility, aesthetics, or enjoyment of neighboring residences.

The fence provides practical benefits, including enhanced privacy and reduction of vehicle headlight intrusion into the home during nighttime hours. Additionally, there is an existing hedge and dense landscaping located outside of the fence line that exceeds six (6) feet in height, effectively obscuring the fence from view. If the fence height were reduced to four (4) feet, the hedge would remain, resulting in a similar barrier along Shady Creek Lane.

The primary reason for installing the six (6) foot fence in 2015–2016 relates to the safety and well-being of a family member with a medical condition. The fence serves as a necessary protective measure to prevent unsupervised exit from the enclosed yard area. A four (4) foot fence would not provide adequate containment, as it could be easily climbed or crossed, whereas the six (6) foot fence provides an appropriate level of security while still allowing safe outdoor access. Similar fencing heights are commonly utilized in residential and care settings for individuals with comparable needs.

Based on these factors, the existing fence has functioned without issue for nearly a decade and has not negatively impacted public safety, as demonstrated by its long-standing presence without any incidents. It has also not adversely affected community aesthetics. The variance request is respectfully submitted for consideration.

REGULAR PLANNING COMMISSION MEETING MINUTES
COUNCIL CHAMBERS – CITY HALL
1000 CITY CENTER CIRCLE
PORT ORANGE, FLORIDA
APRIL 23, 2026

THE REGULAR PLANNING COMMISSION MEETING of the City of Port Orange was called to order by Chair Scott Steger at 5:30 p.m.

CALL TO ORDER

1. Pledge of Allegiance

2. Roll Call

| | |
|---|---|
| Present: | Chair Scott Steger<br>Vice Chair Stan Schmidt<br>Commissioner Thomas Jordan<br>Commissioner Daniel Mallegol<br>Commissioner Angela LeDuc |
| Absent: | Commissioner Bo Bofamy (excused)<br>Commissioner Maria Mills-Benat (excused) |
| Also Present: | Shannon Balmer, City Attorney<br>Tim Burman, Community Development Director<br>Amanda Bonin, Deputy City Clerk |

DISCUSSION/ACTION

3. Consideration of Minutes

Motion to approve the March 26, 2026 meeting minutes was made by Commissioner Thomas Jordan and Seconded by Vice Chair Stan Schmidt. Motion carried unanimously by roll call vote.

4. APPLICATION: VARIANCE/5968 Shady Creek Lane
CASE NO.: VARC-26-0002
APPLICANT: Peter Francis
STAFF CONTACT: Tim Burman, Community Development Director, (386) 5056-5675/tburman@port-orange.org

A request by the applicant for a variance from Chapter 16, Section 3(b)(2)(f) and Section 3(b)(3)(a) of the Land Development Code, to allow a 6-foot-tall fence to be located less than 5 feet from a right-of-way in lieu of being placed in line with the front plane of the house.

Motion to approve Variance/5968 Shady Creek Lane CASE NO.:VARC-26-0002 was made by Commissioner Thomas Jordan and Seconded by Vice Chair Stan Schmidt.

Jared Trent, Assistant City Attorney, read the guidelines when reviewing a variance.

Tim Burman, Community Development Director, introduced the item, provided details, and answered Commissioners' questions.

Peter Francis, representative of the applicant/property owner, provided further details on the variance request, and answered Commissioners' questions.

Al Rivera, HOA President, stated he does not believe there was HOA approval for the fence in question, and expressed his opposition regarding the variance.

Mike Anders, resident, expressed his concerns and opposition regarding the variance and commented on the installation of the rear fence on the property as well.

Tim, resident, commented on the rear fence of the property, noting there is litigation in process regarding this section of fencing, and expressed his concerns and opposition regarding the variance.

James Turnt, Vice President of the HOA, expressed his concerns and opposition regarding the variance.

Mr. Francis stated the fence was approved by the HOA and that there have been no complaints in the last ten years. He requested approval of the fence, noting the need for the safety of a family member.

Chair Scott Steger asked the applicant if there was evidence showing the HOA provided approval.

Mr. Francis said there is but he didn't have it with him.

Commissioner Stan Schmidt clarified what the variance request is asking for and asked Assistant City Attorney Trent if the HOA can override City code.

Assistant City Attorney Trent stated the City's code overrides the HOA's code. It was further clarified that the back fence is a separate issue and should not be in consideration of the vote.

Mr. Burman clarified that the Planning Commission members either need to approve or deny the variance request and further stated this item will not go to Council unless the vote is appealed.

Commissioner Thomas Jordan asked if a 6-foot fence would be allowed in line with the setback of the home, to which Mr. Burman advised it would.

Commissioner Angela DeLuc stated she drove through the neighborhood yesterday and noted there is established landscaping. She further advised the area seemed safe as it does not impede any visibility.

Motion failed 1-4 by roll call vote with Commissioner Thomas Jordan, Commissioner Daniel Mallegol, Vice Chair Stan Schmidt, and Chair Scott Steger voting no.

OTHER BUSINESS

5. Commissioner Comments

The Commissioner's expressed their appreciation to staff for their hard work.

6. Staff Comments

There were none.

PUBLIC COMMENTS

Mr. Anders expressed his appreciation to the Commissioners for their vote and to Tim Burman for all of his hard work on this item.

ADJOURNMENT - 6:08 p.m.

_____
Chair Scott Steger

**CITY OF PORT ORANGE**

# NOTICE OF APPEAL TO CITY COUNCIL

**Applicant/Appellant :** Peter Francis
**Property Owner:** Victor Francis and Samia Fezy
**Property Address:** 5968 Shady Creek Lane, Port Orange, Florida 32128
**Case Number:** VARC-26-0002
**Decision Appealed:** Planning Commission Denial — April 23, 2026
**Date of This Notice:** April 29, 2026
**Submitted To:** Port Orange City Council, 1000 City Center Circle, Port Orange, FL 32129

## I. INTRODUCTION AND NOTICE OF APPEAL

Pursuant to Port Orange Land Development Code (LDC) Chapter 19, Section 1, the property owners, Victor Francis and Samia Fezy, through Applicant Peter Francis, hereby submit this formal Notice of Appeal to the City Council. We respectfully challenge the Planning Commission's April 23, 2026, denial of Variance Case No. VARC-26-0002.

The decision to deny this variance was not based on the facts or the satisfaction of the established criteria as required by code & law. Instead, the decision was procedurally defective, factually incorrect, and legally insufficient. The Appellant identifies the following grounds for reversal:

- **Lack of Findings of Fact:** The Commission moved to deny the application (4-1) without articulating any specific findings tied to the six LDC criteria, when each LDC criteria was presented and satisfied rendering the decision unsupported by the record.
- **Recommendation:** Staff admitted that the recommendation for denial was based "***solely on code alone***" during the Planning Commission hearing, rather than a finding that any of the criterias were not satisfied. This approach fundamentally ignores the legal purpose of the variance process, which is specifically designed to provide relief from the code when a property meets the required standards for an exception.
- **Material Factual Error:** The staff report incorrectly stated the fence is located "less than 5 feet" from the right-of-way. In reality, the fence is situated approximately **7 feet** from the right-of-way, a difference that materially changes the analysis of visual clearance from the right-of-way and neighborhood impact.
- **Violation of Procedural Due Process:** The Commission denied the Applicant the opportunity for final rebuttal and closing remarks, despite City Staff's representation that such an opportunity would be provided. This deprived the Applicant of a fair chance to respond to material misstatements and inaccuracies presented by certain individuals associated with the HOA, including references to irrelevant, previously resolved HOA disputes, and also prevented the Applicant from submitting additional evidence in support of the application.
- **ADA/FHA Mandates:** Despite LDC Chapter 19, Section 1, expressly authorizing variances as ADA Reasonable Accommodations, the Commission failed to discuss or

address the fact that this is a medical necessity for a family member residing at the property.
- **Administrative Inconsistency:** The denial is directly contradicted by the City's own staff reports in Case No. 16-90000001 (March 2016) and Case No. 16-90000009 (December 2016), in which the City approved a similar variances on corner lots. This inconsistent application of the variance code demonstrates that the same legal standard has not been applied uniformly.

Based on these arguments, the Applicant respectfully requests that the City Council **reverse the denial and approve the variance** to allow this 10-year-old fence to remain in place.

## II. STATEMENT OF FACTS

**A. The Property and the Fence** 5968 Shady Creek Lane is a single-family residential corner lot within the Sawgrass Point Planned Unit Development (PUD), platted in 1997 and constructed in 2000. The current owners, Victor Francis and Samia Fezy, purchased the property in 2007. The lot is uniquely configured: while it is adjacent to two public rights-of-way, the secondary front yard abuts a common area rather than an adjoining residential lot.

Over ten years ago, a six-foot vinyl fence was installed primarily to address the safety and well-being of a family member with a medical condition residing at the property. The fence serves as a critical protective measure to prevent unsupervised exit from the yard; a standard four-foot fence would not provide adequate containment as it could be easily climbed or crossed. Prior to installation, the owners acquired necessary HOA approval (see attached exhibit J); however, the contractor hired for the project failed to obtain the required City building permit in 2015. This omission remained unknown to the owners for a long period of time. Only one single code enforcement action was initiated in 2024, the only such complaint received in the fence's history.

**B. Safety and Aesthetic Considerations** The Port Orange Police Department has confirmed zero traffic accidents or safety incidents attributable to the fence in its ten-year existence. The fence is situated entirely outside the 25-foot visual clearance triangle required for intersection visibility and does not impact motorists, pedestrians, or cyclists. Notably, the fence is located approximately seven feet from the Shady Creek Lane right-of-way, correcting a material misstatement in the staff report that estimated the distance at less than five feet.

Furthermore, existing mature hedges and landscaping exceeding six feet in height provide substantial visual screening. Because the Land Development Code does not regulate landscaping in the same manner as fence height, these barriers would remain in place regardless of a variance decision, rendering the removal or altering of the fence ineffective at increasing "visual openness" along the streetscape.

## III. THE PLANNING COMMISSION HEARING, APRIL 23, 2026

**A. The Planning Commission hearing** for Case No. VARC-26-0002 was conducted with five of seven members present. Prior to the hearing when the application was being reviewed, Tim Burman, Community Development Director, informed the Applicant that they would have the opportunity to present their case fully, speak as much as needed to present their case, and be granted the "final word" to respond to any public comments.

The hearing commenced with the City Attorney reading the six Land Development Code (LDC) variance criteria. Tim Burman then presented the City's staff report and findings. The Applicant, Peter Francis, delivered a comprehensive presentation specifically addressing all six LDC criteria by name, including but limited to:

- The pre-existing 1997 subdivision and lot layout;
- The unique atypical lot adjacency to HOA common area rather than residential lots;
- The ten-year safety record confirmed by the Police Department;
- The medical necessity for a family member's safety;
- The existing mature hedges & landscaping higher than 6 feet providing primary visual screening;
- And property value data demonstrating no negative neighborhood impact.

**B. Public Comment and Misinformation -** Four individuals, associated with the HOA Board, appeared in opposition. Their comments failed to address LDC criteria, safety, sightlines, or neighborhood character. Instead, the comments centered on irrelevant HOA issues and disputes from the past.

The comments were characterized by significant false information. For instance, the HOA Vice President asserted that the HOA had never approved the subject fence, which made one of the commissioners ask if we had the HOA approval letter. The applicant asked for a few minutes to present the letter but the commissioners showed no interest to see it after asking for it. Despite the Applicant having documentation showing the HOA approved the fence in 2015 (see attached exhibit J). These irrelevant and inaccurate comments by the HOA individuals negatively impacted the Commission's view and decision. Conversely, one family member provided supporting comments, explaining the medical necessity, hardship and safety risks involved.

**C. Procedural Errors -** Following public comments, the Applicant sought to exercise the "final word", stating: *'Let me just comment on some of the stuff being said today.'* as the applicant wanted to provide more evidence into the record. The Chair did not allow the applicant to present further, suggesting the Applicant could only reapproach if the Commissioners had specific questions. Immediately thereafter, Commissioner Stan Schmidt started talking, effectively denying the Applicant any opportunity to correct the record or present evidence to rebut the opposition's misinformation. The Applicant was never recalled.

During deliberation, Commissioner Angela LeDuc, the only member who performed due diligence by personally visiting and investigating the site, stated that she found no issues with sightlines as she stated "I went from every angle … I noticed that it didn't impede

my sight, I could see. There is established landscaping that is pretty … It seemed safe, I know it's not to code but it seemed safe to me as I was driving around" and described it as "aesthetically pretty." She voted in favor of the variance. The remaining commissioners voted to deny the request (4-1) without articulating findings of fact tied to the six LDC criteria.

**D. Flawed Basis for Staff Recommendation -** During the hearing, Community Development Director Tim Burman was asked to clarify the basis for the staff's recommendation of denial. Mr. Burman responded that the recommendation was based ***"solely on code alone."*** Mr. Burman stated in his presentation "*… basically staff's recommendation was not to approve the variance there as basically in terms of the general intent of the code in terms of we have to enforce them."* When Commissioner Daniel Mallegol asked if the recommendation is based "solely on code alone," Mr Burman responded and said "*yes, basically yes… that's why we have the variances to bring forward to get your your guys opinions on that too*"

By definition, every variance application is a request for relief because a proposal is not up to code. If "failure to meet code" were the only standard for denial, the City's variance provisions would be rendered meaningless. The Land Development Code (LDC) variances explicitly exist to allow exceptions when specific criteria are met.

Furthermore, this recommendation deviates from established administrative precedent. In numerous other variance applications over multiple years, staff has recommended approval despite the requests clearly not being "up to code." Recommending denial of this application "solely on code" is inconsistent with other staff recommendations of other variances neglecting the facts of the criteria of this case.

Tim Burman himself, the same Community Development Director who recommended denial of this application "solely on code alone" submitted the staff recommendation of approval for Case No. 16-90000009 (December 15, 2016) (see attached exhibit H), a variance allowing a 6-foot PVC fence to be placed in a secondary front yard on a corner lot at 5835 Wales Avenue, Port Orange, directly on the Wiltshire Boulevard right-of-way line with zero setback from the right-of-way (see attached Exhibit H). That case involved the similar LDC provisions, Chapter 16, Section 3(b)(2)(b) and the similar fence height. The fence in that approved case had no setback from the right-of-way whatsoever. This application's fence sits approximately seven feet from the right-of-way. Mr. Burman found all six criteria satisfied and recommended approval when the fence was at zero feet setback. He recommended denial for this application based "solely on code" when the fence is at seven feet setback.

**E. Material Misstatement of Fact Regarding Setbacks** - The staff report for VARC-26-0002 states in its introduction and throughout: 'The applicant is requesting a variance to allow an existing 6-foot-tall fence to remain in a secondary front yard setback less than 5 feet from the Shady Creek Lane right-of-way line in lieu of the required setback.' This is a factual error that negatively biased the Commission's evaluation of the fence's impact. The report states under the recommendation section for denial and mentions that the fence is located **"**less than 5 feet**"** from the Shady Creek Lane right-of-way. The fence is actually located approximately 7 feet from the right-of-way. A 7-foot setback provides significantly more "visual openness" and safety

margin than the "less than 5 feet" cited by staff. The Commission's decision was therefore based on an inaccurate physical description of the property. It is a material error that affected the commission's perception of the application in the following ways:

- It overstated the degree of non-compliance, making the variance appear more extreme than it actually is.
- It placed the fence closer to the right of way than it actually is, suggesting a greater encroachment on the public right-of-way than exists.
- The March 2016 approved Case No. 16-90000001 (see attached exhibit D) had the fence setback at exactly five feet from the and was approved. The Applicant's fence at approximately seven feet has more setbacks from the right of way than the 2016 approved case.
- The December 2016 approved Case No. 16-90000009 (see attached exhibit H) had no setback whatsoever and was approved for a 6 foot fence similar to the one requested in this variance.
- A quasi-judicial decision based on a factually incorrect record is not supported by competent substantial evidence. The commission's understanding of how far the fence is from the right of way, a basic geographic fact, was misinformed by the staff report's error.

The Applicant requests that the City Council note this factual error and evaluate the application on the accurate fact that the fence is located approximately seven feet from the right-of-way.

**F. Staff's Acknowledgement of a Reasonable Resolution -** Crucially, the staff report included a provision for a reasonable disposition of this case. It stated that "*if the Planning Commission recommends approval of the variance, it should be limited to the existing fence installed within the secondary front yard setback"* and should not allow for any additional fencing in that area.

This language suggests that even staff recognized that allowing the existing fence to remain given its 10-year safety record and the medical needs of the resident is a viable solution that does not harm the public.

The Commission's 4-1 vote to deny was not supported by "substantial evidence" that the criteria were not met; rather, it was a reaction to "code alone" and irrelevant public comments.

## IV. DEMONSTRATION THAT ALL SIX LDC CRITERIA ARE SATISFIED

The following sets forth the affirmative case on each criterion, drawing directly from the evidence in the record, the staff report, the Applicants presentation, the Police Department confirmation and commissioner comments. Each criterion is met.

**Criterion (A): Special conditions and circumstances exist which are peculiar to the land, structure or building involved, and which are not applicable to other lands, structure or buildings in the same zoning district.**

The staff report and presentation by Tim Burman acknowledges in its hardship analysis that '*the subject property's configuration, with its secondary front yard adjacent to a HOA-owned common area rather than a residential lot, presents a condition that differs from the typical corner lot scenario the standards are primarily intended to address*.' This is a de facto acknowledgment that criterion (a) is satisfied. The special condition is the atypical configuration of the secondary front yard, it abuts HOA-owned common area rather than an adjoining residential property. This condition is not shared by standard corner lots and renders this lot uniquely situated within its subdivision.

Notably, the subject property qualifies as an "atypical lot" under the Port Orange LDC Chapter 2, Section 2 definition, which states:

*"A lot within a subdivision which, as a result of subdivision design, abuts a street at one end and any of the following at the opposite end: (a) a waterway or body of water, either of which is 100 feet or more in width, including but not limited to the Halifax River, Spruce Creek, or a designated common open space area within the same subdivision which is a body of water; or (b) a golf course fairway or green within the same subdivision."*

This property fits this regulatory classification as it abuts Shady Creek Lane at its frontage and an HOA-owned common area, specifically an open detention area exceeding 100 feet in width, at the rear. By the City's own legal definition, the lot is considered "atypical," providing definitive evidence that its configuration presents a special condition that differs fundamentally from the typical corner lot scenarios the LDC standards are primarily intended to address. This classification confirms that the unique layout of the land was established during the original 1997 subdivision design and is not a result of any action by the Applicants.

The LDC's secondary front yard fence setback requirement exists to protect neighboring residential properties' visibility. That purpose is entirely absent here on this atypical lot because the secondary frontage does not obstruct any one's view from adjacent properties nor does it obstruct any view for motorists, cyclists, or pedestrians on the right of way as it is not in the 25-foot visual clearance triangle.

The pre-existing 1997 Sawgrass Point subdivision design that created this atypical adjacency is a special condition peculiar to this land. The secondary frontage abuts non-residential land that no neighboring resident owns, occupies, or relies upon for visibility or privacy.

**Based on the above argument, Criterion (A) is SATISFIED ✔**

**Criterion (B): The special conditions and circumstances are not the result of the applicant's actions.**

The Sawgrass Point subdivision was platted in 1997. The home was constructed in 2000. The current owners purchased the property in 2007, a decade after the subdivision was designed and the lot's atypical configuration was permanently established.

The owners had no role in designing the unique layout of the property, the subdivision, placing the HOA common area adjacent to their secondary front yard, or creating the road configuration. Many of these conditions classified this lot specifically as atypical lot. These conditions existed before any action by the current owners. The contractor's administrative failure to obtain a permit, a separate matter entirely, does not bear on who created the pre-existing land conditions that constitute the special circumstances justifying this variance.

The staff report admittedly stated that this Lot is unique and different from the typical corner lot scenario under the report's criterion (c) it states "*In this case, the subject property's configuration, with its secondary front yard adjacent to a HOA-owned common area rather than a residential lot, presents a condition that differs from the typical corner lot scenario the standards are primarily intended to address. Based on the current layout, the 6-foot-tall fence does not appear to create the types of impacts the code is designed to prevent, as it does not obstruct required sight triangles, does not interfere with intersection visibility, and does not negatively affect visibility or access related to adjacent residential properties or public safety considerations."* which makes this condition unique and special.

Most critically, the City approved VARC-25-0004 in October 2025 (see attached exhibit F) and Case 16-90000001 in March 2016 (see attached exhibit D) using Criterion (B) language very similar in structure to this application. In both previously approved variances, the special conditions that were not the result of the applicant's actions were due to the layout, design, and road configuration of the property, all of which were in existence prior to the homeowners purchasing the properties. In those cases, staff found the criterion met because the property conditions predated the current owner's purchase. Both applications were approved, making the reasons we have provided also viable and acceptable under this criterion.

In summary:

1. The design, unique layout, atypical lot different from other corner lots and configuration of roads and the placement of this property predated current ownership, making this situation not the result of the applicant's actions.
2. A contractor's error in failing to obtain a permit ten years ago in 2015 is not the reason why criterion is met and does not change the unique layout and configuration, which independently satisfy the criterion.
3. This similar language and the special conditions regarding property layouts were accepted previously by both staff in their staff reports and commissioners, setting a precedent that the reason given is acceptable to satisfy the criterion.

**Based on the above argument, Criterion (B) is SATISFIED ✔**

**Criterion (C): Literal interpretation and enforcement of the development code regulations would deprive the applicant of rights commonly enjoyed by other properties in the same zoning district under the terms of the development code and would work unnecessary and undue hardship on the applicant.**

The staff report itself acknowledges that 'the subject property's configuration with its secondary front yard adjacent to a HOA-owned common area rather than a residential lot presents a condition that differs from the typical corner lot scenario.' Staff further acknowledges the fence 'does not appear to create the types of impacts the code is designed to prevent, as it does not obstruct required sight triangles, does not interfere with intersection visibility, and does not negatively affect visibility or access related to adjacent residential properties. These are the staff's own words (see attached exhibit A.)

Furthermore, LDC Chapter 19 Section 1 expressly provides that variances may be granted as ADA reasonable accommodations for persons with disabilities residing in the applicant's household. A family member with a medical condition resides at this property. The six-foot fence is medically necessary for that family member's safe outdoor access and enjoyment of the entire property including the secondary front yard. Due to the layout of the property, a four-foot fence is inadequate because it can be crossed, jumped creating a direct safety risk to the family member. A four-foot fence is lower than the average person's height, while it may protect a pet from jumping or crossing it, it does not protect a human being from jumping or crossing it. In addition, the fence adds safety, privacy, and security for the family members who live in this property. The code's own disability accommodation provision mandates that this criterion be evaluated through the lens of the ADA and on that standard, the hardship is not merely undue but federally protected under both the American Disability Act (ADA) and the Fair Housing Act (FHA).

In comparison, the City approved Case 16-90000001 (see attached Exhibit D) in March 2016 based mostly on aesthetics alone, the family's needs for privacy and security for their children and dog. The City also approved Case No. 16-90000009 (December 2016) (see attached Exhibit H), finding criterion (c) satisfied based on the owner's hardship that reducing the fence height would not provide sufficient screening and moving it 30 feet back would reduce the size of his yard. The City accepted that losing yard space and insufficient screening constituted undue hardship sufficient to meet criterion (c). Here, the hardship is demonstrably greater, a family member's physical safety depends on the six-foot enclosure, reducing the height creates a direct safety risk, and moving the fence inward eliminates the functional use of the enclosed yard for a person with a medical condition. If loss of yard space and aesthetic screening satisfied criterion (c) in 2016, the physical safety and medical necessity of a family member unquestionably satisfies it here.

**Based on the above argument, Criterion (C) is SATISFIED ✔**

**Criterion (D): The variance, if granted, is the minimum variance necessary to make possible reasonable use of the land, building or structure.**

This variance request represents the absolute minimum variance necessary to permit the reasonable use of the property. The application seeks only to retain the existing fence at its current location, which is approximately seven feet from the right-of-way, correcting the staff report's estimate of "less than five feet" and requires no new construction, expansion, or additional structures. A four-foot fence provides insufficient privacy and security for a family member with a medical condition because it can be easily climbed or crossed; only the current six-foot height provides the protective measure necessary for their well-being. Furthermore, relocating the fence to the required setback would eliminate the functional use and enjoyment of the enclosed yard as it has functioned for the past decade.

The current placement is the smallest possible deviation needed to meet these critical safety needs without impacting public welfare which was never impacted for over 10 years. The Port Orange Police Department has confirmed there have been **zero reported accidents or safety incidents** related to the fence in its ten-year history. The requested variance is only for a 2 feet difference in height, in other words, it is very minimal. Additionally, the fence is located entirely outside of required visual clearance triangles and is screened by mature, over six-foot-tall landscaping that would remain regardless of the outcome. Retaining an existing structure that has proven safe for a decade is a far more reasonable and minimal solution than demanding a relocation that would disrupt the property's established layout and landscape as well as take away the enjoyment of land for the resident with medical need.

Additionally, the City's approval of Case No. 16-90000001 establishes a definitive administrative precedent that justifies the current request as the minimum variance necessary. In that 2016 case, the City approved a 5-foot setback for a 6-foot privacy fence, a distance more intrusive than the approximate 7-foot setback currently existing at Shady Creek Lane, primarily to achieve "**aesthetic uniformity**" and match a neighboring utility lift station. Notably, city staff in the 2016 case explicitly stated that the 5-foot setback was "not the minimum variance necessary" to make reasonable use of the property, yet they still recommended approval. By comparison, the current application at 5968 Shady Creek Lane presents a far more compelling justification for relief: a medical necessity and the physical safety of a vulnerable resident. With a more conservative 7-foot setback, compliance with a more stringent 25-foot visual clearance triangle, and a verified 10-year record of zero traffic accidents, the subject fence is undeniably in greater harmony with the general intent of the code than the 2016 precedent. Denying this request while having previously approved a less significant application with less critical reasons and proven history would be inconsistent.

Removing the fence or reducing the fence to a height of four feet would compromise the **aesthetic uniformity** currently enjoyed by the property and the surrounding streetscape. Over the past decade, the mature landscaping has grown and been specifically maintained to integrate with the existing six-foot layout and height of the fence. Because this landscaping is already fully established and physically "set" to the current fence line, lowering the structure would create a significant visual disconnect and a fragmented appearance, undermining a landscape design that has been meticulously matured over ten years surrounding the subject fence.

Furthermore, Case No. 16-90000009 (December 2016) (see attached Exhibit H), which was approved and found criterion (d) satisfied despite explicitly acknowledging that two fully compliant alternatives existed: a four-foot fence set back five feet from the right-of-way, or a six-foot fence set back 30 feet from the right-of-way. Staff accepted that neither alternative was workable because reducing the height would not provide sufficient screening and placing the fence 30 feet inward would reduce the functional size of the yard  and on that basis approved the fence at zero setback directly on the right-of-way line. The standard applied in that case compels the same result here. This application's compliant alternatives are identically unworkable: a four-foot fence fails to provide the physical safety required for a family member with a medical condition, and relocating the fence 27 feet inward eliminates the functional use of the enclosed yard for that same family member. The hardship justifying the minimum variance finding in Case No. 16-90000009 was loss of yard space and inadequate screening. The hardship here is physical safety and medical necessity. By any objective measure, this application presents a more compelling basis for the minimum variance finding than a case where the fence was approved at zero feet from the right-of-way.

**Based on the above argument, Criterion (D) is SATISFIED ✔**

**Criterion (E): Granting of the variance request will not confer on the applicant any special privilege that is denied by the development code to other lands, buildings, or structures in the same zoning district.**

The request is a proportional response to a unique lot configuration and a medical hardship that distinguishes this property from others. According to Port Orange LDC Chapter 2, Section 2, this property is legally classified as an "atypical lot" because it abuts a street at one end and a designated common open space, a detention area exceeding 100 feet in width, at the other. This configuration creates a condition where the secondary front yard borders a public common area rather than an adjoining residential lot, meaning the fence does not obstruct the views, privacy, or enjoyment of any neighboring homeowner.  Notably, this specific lot does not create the impacts the code was intended to address per staff's findings (see attached exhibit A). as the staff report states "does not appear to create the types of impacts the code is designed to prevent,"

as it does not obstruct required sight triangles, interfere with intersection visibility, or negatively affect adjacent residential properties.

Furthermore, the City has already established an administrative precedent by approving Case No. 16-90000001, which granted a more intrusive 5-foot setback for a 6-foot fence based on “aesthetic.” Granting a more conservative approximate 7-foot setback in this instance, necessitated by the safety and medical needs of a resident rather than mere aesthetics, is a matter of equal treatment and reasonable accommodation under the law. With a verified ten-year record of zero traffic accidents or safety incidents as well as the fact that majority of the neighborhood’s homeowners raised no objection to its continued existence, it is clear that allowing this fence to remain addresses a specific hardship without granting a privilege that would be denied to any other similarly situated property owner.

The approval of Case No. 16-90000009 (December 2016) directly confirms that granting this variance confers no special privilege. In that case, for a 6-foot fence on a corner lot at zero setback from the right-of-way was approved, a configuration far more deviant from the code than the approximately seven feet maintained here. If that approval did not confer a special privilege denied to others, then this approval cannot either. The privilege being requested here, retaining an existing six-foot fence at seven feet from the right-of-way on an atypical lot with no adjacent residential properties affected, is less than what was already granted in December 2016 at zero setback and March 2016 at five feet setback. Granting less than what has already been approved for others is by definition not a special privilege. It is equal treatment.

**Based on the above argument, Criterion (E) is SATISFIED ✔**

**Criterion (F): The granting of the variance will be in harmony with the general intent and purpose of this code and will not be injurious to the surrounding properties or detrimental to the public welfare.**

The existing fence has been in place for over ten years, providing a definitive, long-term record that it is not injurious to the community. The Port Orange Police Department has confirmed that there have been **zero traffic accidents or safety incidents** attributable to the fence during its entire history. Furthermore, city staff explicitly stated in their findings that the fence does not impact visual clearance for vehicles or pedestrians because it is located entirely outside the required 25-foot sight triangle.

The staff report further acknowledges that the fence does not create the negative impacts the code is designed to prevent, specifically noting that it "does not negatively affect visibility or access related to adjacent residential properties or public safety considerations.” This is supported by the fact that the secondary front yard abuts an HOA-owned common area rather than any single-family residential lots that would suffer from obstructed views. Additionally, Commissioner Angela LeDuc, the only member of the Planning Commission to perform a site visit, stated for the record that she found it to

be "aesthetically pretty" and she also said “I went from every angle … I noticed that it didn’t impede my sight, I could see. There is established landscaping that is pretty … It seemed safe,” (see Planning Commission hearing timestamp 39:40 of April 23, 2026, exhibit C).

Regarding neighborhood character and property values, the lack of objection from the community is telling. Despite full public notice, including signs posted at both subdivision entrances posted by the HOA, certified mail sent to surrounding properties, and notices in the *News-Journal*, the vast majority of the 103 homeowners in the neighborhood did not express concern. Out of 103 homes, 99 owners did not care to show up to the hearing or object. The opposition consisted primarily of four individuals associated with the HOA Board members whose comments centered on irrelevant past disputes and speculations rather than the LDC criteria.

Notably, this opposition was characterized by demonstrable misinformation intended to negatively bias the Commission. For example, the HOA Vice President claimed the HOA never approved the fence, yet a 2015 approval letter exists from a time when that individual served on the board (see attached exhibit J). In addition, he mentioned that he was president of the HOA for many years while living across the subject fence, he never made any complaints or motions to object to it during its 10 years lifespan. As a matter of fact, he approved it as a board member in 2015. These personal grievances and inaccuracies did not constitute "competent substantial evidence" of injury to the public welfare. On the contrary, the ten-year incident-free record, which the Port Orange Police Department has formally verified, and the absence of any neighborhood complaints for nearly a decade serve as affirmative proof that the fence exists in harmony with the community. This sustained record of safety and long-standing public acceptance demonstrates that the enclosure poses no threat to surrounding properties or the public welfare.

Furthermore, substantial evidence presented during the Planning Commission hearing confirms that the existing fence has not negatively impacted surrounding property values. Multiple surrounding homes within the Sawgrass Point subdivision have sold at fair market value, with several reaching prices in the the half a million dollars range, all while the fence was already in place as shown in the presentation (see attached exhibit B). These home sales represent an implied public acceptance of the fence's presence, as a reasonable buyer would not invest such significant capital into a home if the adjacent aesthetics were considered an "eyesore" or injurious to the property's appeal. The fact that residents chose to purchase their homes while the fence was in existence and raised no objections serves as affirmative proof that the fence is not detrimental to the surrounding properties or the public welfare.

**Based on the above argument, Criterion (F) is SATISFIED ✔**

## V. THE 2016 PORT ORANGE PRECEDENT

## CASE NO. 16-90000001 & CASE NO. 16-90000009

The Port Orange Planning Commission approved a variance on March 24, 2016 (Case No. 16-90000001) for a six-foot vinyl fence on a corner lot at 868 Millers Way, Port Orange, installed without a building permit, under LDC Chapter 19, Section 1. Port Orange Planning Commission also approved a second variance for a 6-foot fence on a corner lot, Case No. 16-90000009 at 5835 Wales Avenue under the same LDC. the similar criteria applicable to VARC-26-0002. Staff recommended approval for the two variances, while staff recommended "denial" based "***solely on code alone"*** *for this application*. Notably, Tim Burman prepared and recommended approval for the December 2016 case. The following comparison demonstrates the two cases are materially similar on every criterion:

| Criterion | March 2016 Case 16-90000001 (APPROVED) | December 2016 Case 16-90000009 (APPROVED) | April 2026 Case VARC-26-0002 (DENIED) |
|---|---|---|---|

| Permit Status | Installed without permit | Variance before permit | Installed without permit |
| Staff Recommendation | **APPROVAL** | **APPROVAL**<br>**By Tim Burman** | **DENIAL** |

As shown above, both the March 2016 and December 2016 cases are similar to this application across every Land Development Code criterion, yet all the applicant's variance produced an opposite outcome without a principled distinction appearing anywhere in the record. In March 2016, the City approved a six-foot corner lot fence at a five-foot setback from the right-of-way for aesthetic uniformity. Nine months later in December 2016, Tim Burman recommended approval for a six-foot corner lot fence placed directly on the right-of-way line at zero setback, an even more significant deviation from the code. In both cases, all six criteria were found satisfied and approval was granted. In contrast, the current application at 5968 Shady Creek Lane maintains a more conservative approximately seven-foot setback than either approved case, is supported by a ten-year zero-incident safety record confirmed by the Police Department, involves an atypical lot configuration acknowledged by staff itself as differing from the typical corner lot scenario, and is necessitated by the physical safety and medical well-being of a family member, a far more compelling hardship than aesthetics or screening preferences. Yet it was denied. During the 2026 hearing, the Planning

Commission failed to conduct any substantive discussion of the six LDC criteria or allow the Applicant to present all necessary evidence or a final response to public comment. Instead, the decision was biased by irrelevant HOA disputes that the City Attorney advised were not pertinent to the variance review. Despite the applicant being informed by the Community Development Director that they would have the "final word", the Commission moved immediately and quickly to a vote, denying the Applicant a fair opportunity to respond or present further. If the City's criteria were satisfied in both 2016 cases based on aesthetics, privacy, screening preferences, and yard size concerns, they must be considered satisfied here as a matter of equal treatment and reasonable accommodation. Denying a variance that creates no safety hazards, serves a medical purpose for safety, involves a more conservative setback than both prior approvals, and has a proven ten-year record, is inconsistent with the City's own administrative record given the precedent set in March 2016 Case No. 16-90000001 and December 2016 Case No. 16-90000009

## VI. CRITERION (B) SIMILLAR LANGUAGE TO OTHER APPROVED VARIANCES

The City of Port Orange's own staff reports in two separate approved variance cases, one from March 2016 and one from October 2025, contain criterion (b) language that is structurally and substantively identical to the criterion (b) argument documented in the VARC-26-0002 staff report.

| Case | Criterion (b) Language in Staff Report | Outcome |
|---|---|---|
| 2016 Case16-90000001 | "The special circumstances associated with the property is not a result of actions by the applicant. The lift station parcel was created as part of the subdivision in 1987." | (APPROVED) |
| 2025 VARC-25-0004 | "The special conditions are not the result of the current property owners. The lot was created in 1992, and the existing house was constructed in the current location in 1995. The current property owners purchased the home in 2016." | (APPROVED) |
| 2026 VARC-26-0002 | "The layout of the roadway, lots, and common areas predate the applicant's ownership of the property; the subdivision was developed in 1997, and the home was constructed in 2000, while the current property owner has only owned the home since 2007. The applicant believes these pre-existing conditions create unique circumstances that justify the requested variance and are not attributable to any action of the current owner." | (DENIED) |

The City of Port Orange's own administrative record reveals documented inconsistency in the evaluation of Criterion (b). Staff reports for two separately approved variance cases,

Case No. 16-90000001 (March 2016) and Case No. VARC-25-0004 (October 2025), utilize Criterion (b) analysis that is structurally and substantively similar to the logic presented in the VARC-26-0002 staff report.

Mr Burman also informed the planning commission during the hearing that the denial is based on ***"solely on code alone."*** Commissioner Thomas Jordan focused his question on asserting that the absence of a building permit was the Applicant's fault. This line of questioning persists despite the Applicant's evidence that the oversight was a contractor's administrative error, and more importantly, that the permit status is irrelevant to the legal standard of Criterion (b). Although the Applicant addressed this by demonstrating that the hardship stems from the unique layout of the atypical lot, a permanent condition established in 1997 that predates their 2007 purchase. Commissioner Jordan repeatedly focused on the issue of not obtaining a permit back in 2015, even though it was presented under the "History of The Fence" solely to provide background and explain why a permit was not obtained ten years ago due to a contractor slip up. This approach is fundamentally conflicted, as Commissioner Jordan has previously voted to approve other and similar applications, such as "2016 Case 16-90000001" where the "pre-existing layout" that was not created by the homeowners and a fence was not permitted rationale was accepted as satisfying the criteria for a variance.

As established in this appeal, the design, unique layout, and atypical configuration of the roads and property placement were permanent fixtures of the land long before the current ownership, meaning this situation is not a result of the Applicant's actions. A contractor's failure to obtain a permit in 2015 is an independent administrative matter that does not change the physical land conditions; those unique configurations alone stand to satisfy the criterion. Because similar language and rationale have been previously accepted by both staff and the Commission to grant variances, a clear precedent has been set that the applicant's Case No. VARC-26-0002 undeniably meets the legal standard for approval.

## VII. CONCLUSION

Every criterion required by Port Orange LDC Chapter 19, (a) through (f), is satisfied, and the evidence in the record proves it. This property is an atypical lot by the City's own definition. The fence sits outside the 25-foot visual clearance triangle, borders no residential property, and has coexisted with homes sold between $430,000 and $550,000 surrounding the subject fence in just the past few years, because the community accepted this fence long ago. No buyer pays over half a million dollars for a home if their view is not accepted. Homeowners in the subdivision were notified by certified mail, signage on the property, notice in the newsletter as well as HOA posted notes on both entrances. However, 99 out of 103 homeowners did not care to show up to the hearing or object to the fence, more importantly none of the homeowners surrounding the fence made an appearance or objected to its existence. The Port Orange Police Department confirmed zero safety incidents in ten years. Commissioner LeDuc, the only commission member who performed a due diligence visit to the site, found no sight line issues, described it as "aesthetically pretty", and voted yes. The mature landscaping that is higher than 6 feet surrounding this fence will remain regardless of any decision made,

meaning removing or lowering the fence produces zero visibility gain, zero public benefit, and one guaranteed outcome: a safety risk for a family member who depends on this enclosure for protected outdoor access. This Council should also note that Port Orange LDC Chapter 19, Section 1 expressly authorizes this exact variance as an ADA reasonable accommodation, a mandatory provision of the City's own ordinance that the Planning Commission never once acknowledged or discussed during its deliberation.

The process that produced this denial was inconsistent and procedurally flawed. The staff recommendation was admittedly based "solely on code," that standard alone would have required denial of every variance brought to this commission that has been approved in the past. The staff report contained a material factual error placing the fence closer to the right-of-way than it actually is, while both of the 2016 approved cases had their fences even closer and was unanimously approved.

The opposition consisted of HOA board members raising personal grievances, not one of whom presented evidence of a safety concern, a sight line problem, or any impact on neighborhood character. The Applicant was denied the opportunity to provide further evidence and respond to public comments that contained misinformation, including but not limited to a claim about HOA never approving the fence which is false information as evident by exhibit J. The Commission then voted 4–1 to deny the application without specifically identifying how the request failed to satisfy any of the required criteria, and without citing any safety concerns, the very type of harm the code is intended to prevent.

We acknowledge that a building permit was not obtained at installation 10 years ago, however, that administrative omission does not change what ten years of real-world performance confirms: this fence works, it is safe, it harms no one, it raises property value, make better use of land and it protects a family member who needs it. If this variance had been requested in 2015, we would have made the same arguments, the only difference today is that we have a decade of supporting safety data. Removing this fence serves no legitimate public purpose. It corrects nothing. It protects no one. It simply eliminates a structure needed for medical reasons because of a procedurally flawed decision based on inaccurate facts and inconsistency with the "2016 Case No. 16-90000001" and "2016 Case No. 16-90000009." The City Council is respectfully asked to look at the actual facts argued above, apply the criteria as written, honor the City's own precedent, and approve this variance. It is the right decision, and it is the consistent one.

## REFERENCES

# STAFF REPORT

## CASE NO. VARC-26-0002

**Variance from LDC, Chapter 16, Section 3(b)(2)(f) and Section 3(b)(3)(a)**

| | |
|---|---|
| **REQUEST:** | Variance from Chapter 16, Section 3(b)(2)(f) and Section 3(b)(3)(a) of the Land Development Code (LDC), to allow a 6-foot-tall fence to be located less than 5 feet from the right-of-way in lieu of being placed in line with the front plane of the house. |
| **LOCATION:** | 5968 Shady Creek Lane (Figure 1 – Location Map) |
| **OWNERS:** | Victor Francis and Samia Fezy |
| **APPLICANT:** | Peter Francis |
| **STAFF RECOMMENDATION:** | Denial |
| **STAFF CONTACT:** | Tim Burman, Community Development Director, (386) 506-5675 |
| **PLANNING COMMISSION:** | April 23, 2026 |

## INTRODUCTION

The subject property is located at 5968 Shady Creek Lane, at the northwest corner where two segments of Shady Creek Lane intersect (Figure 1). The applicant is requesting a variance to allow an existing 6-foot-tall fence to remain in a secondary front yard setback less than 5-feet from the Shady Creek Lane right-of-way line in lieu of being placed in line with the front plane of the house as permitted. According to the applicant, the 6-foot-tall fence was installed about 10 years ago to provide privacy and safety for the well-being of a family member with a medical condition that lives at this address with the property owners.

**Figure 1. Location Map**

EXHIBIT: A

**DISCUSSION**

According to the Land Development Code (LDC), the subject property is a corner lot because it is adjacent to two public rights-of-way (intersection of two sections of Shady Creek Lane) and therefore has two front yards, a primary front yard and secondary front yard. The purpose of the citywide requirement regulating 6-foot-tall fences within the primary and secondary front yards of residential corner lots is to protect public safety and maintain neighborhood character by controlling the placement and height of fences adjacent to public rights-of-way.

For safety, the setback ensures that 6-foot-tall fences do not encroach into required sight triangles at street intersections and driveways. These sight triangles are needed for maintaining adequate visibility for motorists, pedestrians, and cyclists, particularly at corner lots where two street frontages intersect, and visibility conflicts are more likely to occur. By limiting fence height and requiring appropriate setbacks in these areas, the regulation reduces potential hazards associated with obstructed views of oncoming traffic and pedestrian activity.

In this case, the existing 6-foot-tall fence is located outside of the required 25-foot visual clearance triangle for the intersection of two public roadways. The 25-foot sight triangle is established by measuring 25 feet along each of the intersecting rights-of-way and connecting those points to define the area that must remain clear for visibility. Based on this configuration, the fence does not encroach into the sight triangle and is not anticipated to impact visual clearance for vehicles or pedestrians along Shady Creek Lane.

In addition to safety considerations, the requirement supports community design objectives by preserving visual openness within residential neighborhoods. Limiting the height and placement of fences in these areas helps ensure that views from neighboring homes and from the public right-of-way are not unnecessarily blocked. This maintains a more open and visually connected streetscape, where front yards, landscaping, and home façades remain visible and contribute to the overall aesthetic quality of the neighborhood.

Together, these provisions balance safety and livability by ensuring that fencing within visible front yard areas does not block intersection visibility while also preventing front-facing residential areas from being enclosed in a way that reduces openness and visibility along the street.

For the subject property, the east property line along Shady Creek Lane is the primary front yard and the south property line along Shady Creek Lane is the secondary front yard (Figure 1). Both streets are local public roads. According to the LDC, a 6-foot-tall fence in a secondary front yard must be set back either in line with the front plane of the home (approximately 10 - 27 feet from the secondary front lot line) or to the zoning district front yard setback (30 feet), whichever is less (Figure 2). Therefore, the LDC allows a 6-foot-tall fence to be installed up to the front plane of the house.

In this case, while the lot includes a secondary front yard, it does not directly abut any single-family residential lots where a 6-foot-tall fence would obstruct views from adjacent homes. In addition, the proposed fence location is outside of the required sight triangle

EXHIBIT: A

areas, and therefore does not interfere with intersection visibility or roadway safety (Figure 2).

Therefore, there are two options for a fence on the subject property that would meet the LDC requirements: 1) A 4-foot-tall fence installed up to 5-feet from the right-of-way for the a primary front yard and secondary front yard; or 2) a 6-foot-tall fence installed in line with the front plane of the house for the a primary front yard (30 feet) and the secondary front yard (10 - 27 feet).

**Figure 2. Existing Fence Location Compared to Permitted Fence Location**

It should be noted that a 6-foot-tall fence currently exists along the rear property line and extends into the secondary front yard; however, that rear fence is not part of the current variance request. It is located within the HOA common area and is outside the subject property boundary. The variance request applies only to the portion of fence located within the south secondary front yard along the Shady Creek Lane right-of-way on the subject property. The existing 6-foot-tall fence on HOA property is being addressed separately and is not included in this request.

EXHIBIT: A

**BACKGROUND**

The subject property contains a single-family home built in 2000. The applicant states that approximately 10 years ago, a 6-foot-tall fence was installed roughly 5 feet from the south property line along the Shady Creek Lane right-of-way. According to City records, no permit was issued for this portion of the fence. In the applicant's variance request letter, he notes that the fence was installed around 2016 and has remained in place for nearly 10 years with no known complaints to Code Enforcement, the City, or the homeowners' association, aside from a single complaint received by Code Enforcement in 2024, and with no identified adverse impacts to surrounding properties.

As indicated in the applicant's variance request letter, the primary reason for installing the 6-foot-tall fence is to address the safety and well-being of a family member with a medical condition who resides at the property. According to the applicant, the fence serves as a necessary protective measure, allowing this individual to be outdoors within a secure, enclosed yard.

The applicant has stated that a 4-foot-tall fence would not provide adequate security for their family member with a medical condition, as it could be easily climbed or crossed, whereas a 6-foot-tall fence provides an appropriate level of protection while still allowing safe outdoor access. The applicant also notes that similar fence heights are commonly used in residential and care settings for individuals with comparable needs. Based on these concerns, the applicant is requesting a variance to allow the existing 6-foot-tall fence along Shady Creek Lane to remain.

Based on discussions with the applicant, he acknowledges that a permit should have been obtained prior to the installation of the fence. However, the applicant has indicated that if a permit had been requested and subsequently denied in 2016 due to the fence height, he would have pursued a variance to seek approval for the 6-foot-tall fence based on the same safety considerations described above.

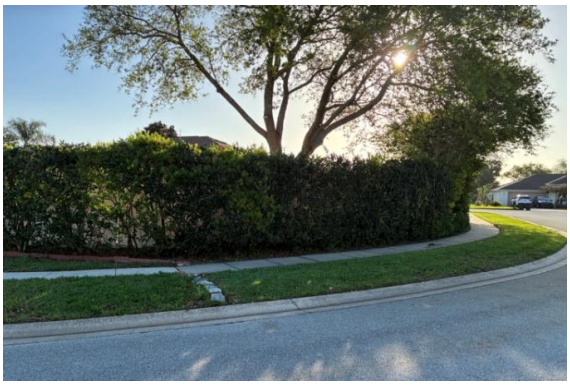
**REVIEW OF VARIANCE CRITERIA**

Chapter 19, Section 1 of the Land Development Code (LDC), outlines the criteria to be used in determining whether the requested variance should be granted. The following summarizes these criteria, along with relevant staff information and the applicant's justification for the variance:

a) *Special conditions and circumstances exist which are peculiar to the land, structure or building involved, and which are not applicable to other lands, structure or buildings in the same zoning district.*

This criterion typically refers to conditions or circumstances such as steep slope, presence of historic trees, odd lot shape, etc. that might make installing a 6-foot-tall fence in line with the front plane of the home impractical. There are no special conditions or circumstances which are peculiar and would otherwise prevent installation of either a 6-foot-tall fence in line with the front plane of the home or a 4-foot-tall fence a minimum of 5 feet from the right-of-way along Shady Creek Lane in accordance with the Land Development Code (LDC).

**EXHIBIT: A**



The subject property is a corner lot that has two front yards according to the LDC, which is not a unique condition or circumstance. The subject property is developed with a single-family home. The lot size of the subject property (11,325 SF) exceeds the lot size requirement (9,600 SF) for a corner lot in the Sawgrass Point Planned Unit Development (PUD) zoning district.

According to the applicant, although the property is classified as a corner lot, it differs from a typical residential corner lot because the secondary front yard does not abut another single-family residence, but instead borders a HOA-owned common area. As a result, the applicant asserts that the 6-foot-tall fence does not negatively impact the visibility, aesthetics, or enjoyment of neighboring residential properties. The applicant further notes that the fence provides additional privacy for the subject property from pedestrians and vehicles traveling east on Shady Creek Lane.

The applicant also states that existing mature hedges and landscaping located outside the fence line exceed 6 feet in height and already provide substantial visual screening of the fence (see pictures below). Because landscaping is not regulated under the Land Development Code in the same manner as fence height (provided it does not obstruct sidewalks or roadway visibility), similar screening would remain in place even if the fence were reduced to 4 feet in height.

In addition, the applicant states that the fence does not obstruct visibility near intersections and that there are no known traffic incidents, police reports, or safety concerns associated with its placement. Landscaping along the south side of the property also screens much of the fence from adjacent homes, further reducing its visual impact.

Staff have confirmed with the Police Department that there have been no reported accidents or safety incidents at the intersection of Shady Creek Lane and Shady Creek associated with the fence.

*Picture of subject property/fence looking east*

*Picture of subject property/fence looking west*

**EXHIBIT: A**

*Picture of subject property/fence looking west from intersection of Shady Creek Lane and Shady Creek Lane*

b) *The special conditions and circumstances are not the result of the applicant's actions.*

There are no special conditions or circumstances.

According to the applicant there are special conditions or circumstances, specifically, that the layout of the roadway, lots, and common areas predate the applicant's ownership of the property; the subdivision was developed in 1997, and the home was constructed in 2000, while the current property owner has only owned the home since 2007. The applicant believes these pre-existing conditions create unique circumstances that justify the requested variance and are not attributable to any action of the current owner.

c) *Literal interpretation and enforcement of the development code regulations would deprive the applicant of rights commonly enjoyed by other properties in the same zoning district under the terms of the development code and would work unnecessary and undue hardship on the applicant.*

When a new fence is installed, it is required to comply with the current requirements of the Land Development Code. These standards are intended to protect public safety and maintain neighborhood character by regulating the placement and height of fences located within primary and secondary front yard areas adjacent to public rights-of-way. From a safety standpoint, the requirements ensure that fences do not encroach into required sight triangles at street intersections and driveways, where clear visibility is necessary for motorists, pedestrians, and cyclists, particularly in corner lot conditions where two street frontages intersect.

EXHIBIT: A

In addition, the regulations support neighborhood design objectives by limiting visual obstructions within front yard areas that contribute to the public-facing character of residential subdivisions. These provisions help ensure that front yards, home façades, and streetscapes remain open and visible, rather than enclosed by tall fencing along the roadway.

For corner lots, these standards apply to both primary and secondary front yard areas regardless of adjacent conditions. However, the Land Development Code still provides flexibility in fence placement and height, allowing a 4-foot-tall fence to be installed within the front yard setback closer to the right-of-way, or a 6-foot-tall fence to be installed in alignment with the front plane of the home, provided applicable setback requirements are met.

In this case, the subject property's configuration, with its secondary front yard adjacent to a HOA-owned common area rather than a residential lot, presents a condition that differs from the typical corner lot scenario the standards are primarily intended to address. Based on the current layout, the 6-foot-tall fence does not appear to create the types of impacts the code is designed to prevent, as it does not obstruct required sight triangles, does not interfere with intersection visibility, and does not negatively affect visibility or access related to adjacent residential properties or public safety considerations.

According to the applicant, the variance is requested to allow the existing 6-foot-tall fence to remain in its current location along the Shady Creek Lane right-of-way. The applicant notes that this condition differs from a typical corner lot scenario because the secondary front yard does not abut another residential property but instead fronts a HOA-owned common area. As a result, the applicant asserts that the fence does not impact adjacent residential properties, does not interfere with intersection visibility or sight triangles, and is screened in part by existing landscaping.

The applicant further states that the fence provides enhanced privacy from vehicles and pedestrians traveling along Shady Creek Lane, as well as an added level of safety and security for a family member with a medical condition residing at the property.

d) *The variance, if granted, is the minimum variance necessary to make possible reasonable use of the land, building or structure.*

Although not the applicant's preference, the property owners could install a fence that complies with the setback requirements of the LDC. Doing so would require removing the existing fence and either replacing it with a 4-foot-tall fence or installing a 6-foot-tall fence in line with the front plane of the house from the Shady Creek Lane right-of-way.

According to the applicant, keeping the existing 6-foot-tall fence in its current location is necessary to allow reasonable use of the property by providing safety

EXHIBIT: A

and security for a family member with a medical condition who lives at the home. The applicant states that the fence, as it is currently placed, does not affect neighboring residential properties or block sight lines for drivers or pedestrians in the subdivision.

Staff have confirmed with the Police Department that there have been no reported accidents or safety incidents at the intersection of Shady Creek Lane and Shady Creek related to the fence. In addition, there are existing mature hedges and landscaping outside the fence line that are over 6 feet tall and already block much of the view of the fence. Since landscaping is not regulated in the same way as fence height under the Land Development Code (as long as it does not block sidewalks or roadway visibility), similar landscape would remain even if the fence were reduced to 4 feet.

Based on these conditions, the applicant believes keeping the fence in its current location is the smallest change needed to allow reasonable use of the property while meeting the stated safety and security needs.

e) *Granting of the variance request will not confer on the applicant any special privilege that is denied by the development code to other lands, buildings, or structures in the same zoning district.*

According to the applicant, the subject property is not a typical corner lot. The secondary front yard does not abut or directly adjoin any single-family residential lot but instead borders a HOA-owned common area. As a result, the 6-foot-tall fence does not affect the view, privacy, or enjoyment of any neighboring residential property.

The applicant further notes that this condition differs from most corner lots in residential subdivisions, which typically directly abut other single-family homes along one or more front yard exposures. In this case, there are no adjacent residential lots along the secondary frontage that would experience view obstruction or other impacts from the fence.

In addition, the fence is not located in a position that impacts visibility clearance at the intersection or within required sight triangles, and it does not interfere with the safe movement of vehicles or pedestrians. Based on these conditions, the applicant states that the fence in this location does not create the typical impacts associated with corner lots where fences may directly face or border other homes or obstruct intersection visibility. Accordingly, allowing the 6-foot-tall fence to remain would not provide a special advantage compared to similarly situated properties, since it does not reduce visibility or affect adjacent residential use or safety.

EXHIBIT: A

*f) The granting of the variance will be in harmony with the general intent and purpose of this code and will not be injurious to the surrounding properties or detrimental to the public welfare.*

The fence requirements in the LDC are intended to protect the health, safety and general welfare of the citizens of the city, and to enhance the appearance, function and livability of the city and improve the overall quality of life within the community. The intent of the city-wide setback requirement for a residential 6-foot-tall fence in a front yard is to ensure fences that abut streets in residential subdivisions with a narrow right-of-way width are set back off the right-of-way line to provide adjacent properties adequate visual sight lines from their home.

The height and location of the proposed fence is inconsistent with other fences in the neighborhood installed consistent with the LDC. There are 12 corner lots in Sawgrass Point subdivision and 3 of them have fences that conform to the fence height/setback requirements of the LDC and the rest have no fence (Figure 3).

The location of the existing 6-foot fence is located outside of the 25-foot visual clearance triangle requirement for intersections of two public roadways. The 25-foot visual triangle is determined by measuring 25-feet along the two intersecting rights-of-way that form the intersection then connecting those two points and measuring. If a variance is approved, the fence is not anticipated to impact visual clearance for vehicles and pedestrians along Shade Creek Lane.

**Figure 3. Corner Lots in Sawgrass Point Subdivision**

EXHIBIT: A

The applicant notes that the fence, installed around 2016, has remained in place for nearly 10 years with no known complaints, aside from a single complaint received by Code Enforcement in 2024. Staff have confirmed with the Police Department that there have been no accidents or safety incidents at the intersection of Shady Creek Lane and Shady Creek associated with the fence.

g) *The variance represents a reasonable disposition of a claim brought under the Bert J. Harris Private Property Rights Protection Act, chapter 95-181, Laws of Florida, that a development order of the city has unreasonably burdened the applicant's property, based upon the recommendations of the special master appointed in accordance with the act, or the order of a court as described in the act.*

The variance requested is not based upon a claim brought under the Bert J. Harris Private Property Rights Protection Act.

**PUBLIC NOTICE**

Public Notices regarding the variance were posted in the *News-Journal* and mailed to adjacent property owners and the property was posted with a public notice sign, as required by the LDC. As of April 17, 2026, staff have received two phone calls regarding the proposed variances.

**RECOMMENDATION**

Based on the findings of this report, staff recommends denial of the variance from Chapter 16, Section 3(b)(2)(f) and Section 3(b)(3)(a) of the LDC to allow for a secondary front yard setback of less than 5 feet for the existing 6-foot-tall fence.

However, if the Planning Commission recommends approval of the variance, it should be limited to the existing fence installed within the secondary front yard setback and should not permit any additional fencing within that setback area.

**ATTACHMENT**

Exhibit 1 – Applicant's Request Letter

EXHIBIT: A

## Exhibit 1 – Applicant's Request Letter

5968 SHADY CREEK LN
PORT ORANGE, FL 32128

**Proposed Development Variance Description – Fence**

The existing fence was installed approximately in 2015–2016, nearly ten (10) years ago. The fence has remained in place for close to a decade prior to any complaint being received by Code Enforcement regarding its height. During this extended period, there have been no known complaints submitted to the City or the homeowners' association, nor have there been any identified adverse impacts to surrounding properties.

The fence is set back approximately five (5) feet from the right-of-way and does not obstruct or impede visibility at or near the intersection of Shady Creek Lane. To the best of the property owners' knowledge, there have been no traffic incidents, police reports or safety concerns attributable to the presence of the fence.

Although the property is classified as a corner lot, it does not function as a traditional corner lot. The secondary front yard abuts a homeowners' association-owned common area rather than another residential property. As a result, the six (6) foot fence does not negatively affect the visibility, aesthetics, or enjoyment of neighboring residences.

The fence provides practical benefits, including enhanced privacy and reduction of vehicle headlight intrusion into the home during nighttime hours. Additionally, there is an existing hedge and dense landscaping located outside of the fence line that exceeds six (6) feet in height, effectively obscuring the fence from view. If the fence height were reduced to four (4) feet, the hedge would remain, resulting in a similar barrier along Shady Creek Lane.

The primary reason for installing the six (6) foot fence in 2015–2016 relates to the safety and well-being of a family member with a medical condition. The fence serves as a necessary protective measure to prevent unsupervised exit from the enclosed yard area. A four (4) foot fence would not provide adequate containment, as it could be easily climbed or crossed, whereas the six (6) foot fence provides an appropriate level of security while still allowing safe outdoor access. Similar fencing heights are commonly utilized in residential and care settings for individuals with comparable needs.

Based on these factors, the existing fence has functioned without issue for nearly a decade and has not negatively impacted public safety, as demonstrated by its long-standing presence without any incidents. It has also not adversely affected community aesthetics. The variance request is respectfully submitted for consideration.

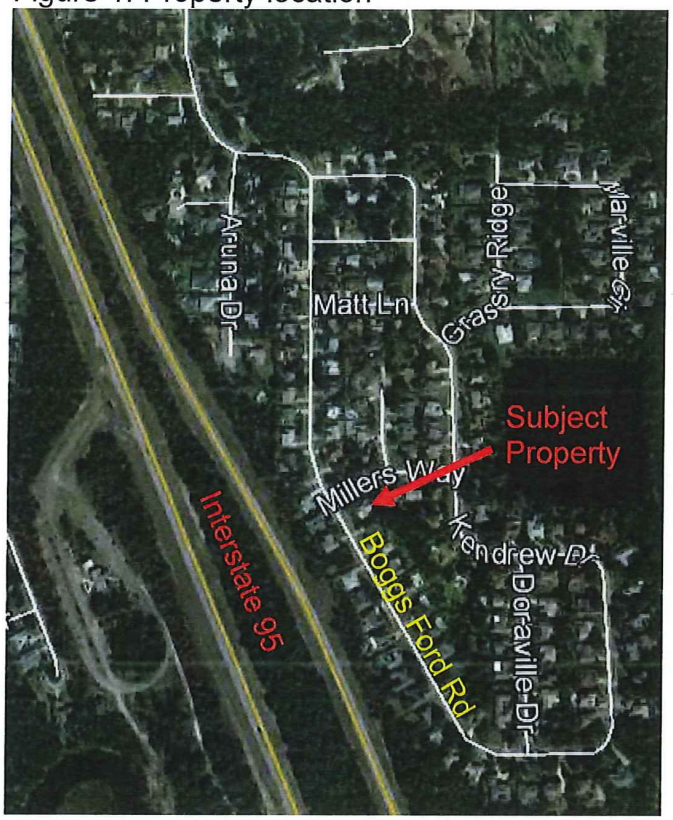
EXHIBIT: D

# STAFF REPORT

**VARIANCE FROM LDC CHAPTER 16, SECTION 3(b)(2)(b)**
**CASE NO. 16-90000001**

| | |
|---|---|
| **REQUEST:** | Variance from the Land Development Code (LDC) to reduce the setback from a right-of-way for a 6-foot tall privacy fence from 30 feet to 5 feet. |
| **LOCATION:** | 868 Millers Way |
| **PROPERTY OWNER/ APPLICANT:** | Rollin A. Tobie |
| **STAFF RECOMMENDATION:** | **APPROVAL** |
| **STAFF CONTACT:** | Gwen Perney, Planner (386) 506-5673 |
| **PLANNING COMMISSION DATE:** | March 24, 2016 |

**BACKGROUND/DISCUSSION:**



The applicant is requesting the variance to allow a fence constructed in the fall of 2015 on the subject property to remain in its current location. The fence was constructed without a building permit. On December 3, 2015, Code Enforcement notified the property owner that a building permit for the fence was required. In December 2015, the applicant met with staff to review the necessary building permit application and staff identified that the 6-foot tall fence did not meet the required 30-foot setback from the Boggs Ford Road right-of-way.

The fence application has been reviewed by staff and meets all other code requirements. The applicant is requesting approval of the variance to reduce the 30-foot setback requirement from the right-of-way to a 5-foot setback and to allow the constructed 6-foot fence to remain.

The applicant's lot is located at the corner of Boggs Ford Road and Millers Way (Figure 1). According to the Land Development Code, any portion of a lot that abuts a right-of-way is considered a front yard and a 6-foot tall fence is to be located beyond the front yard setback line. The setback requirement for a 6-foot fence is intended to provide the homes adjacent to a corner lot with adequate sight lines of the right-of-way from their home. The Land Development Code does allow a 4-foot tall fence within the front yard setback because adequate sight lines of the right-of-way can still be met. The 6-foot tall fence the applicant had installed is located approximately 5 feet from the Boggs Ford Road right-of-way and would have to be approximately 30 feet from the right-of-way to meet code requirements.

**EXHIBIT: D**

Figure 1. Property location

At the front corner of the applicant's lot, there is a small parcel of land owned by the City of Port Orange that is the location of a utility lift station (Figure 2). The 6-foot fence installed by the City around the lift station is allowed, according to the City screening standard for lift stations, and is located outside the 25-foot visual clearance angle measured at the intersection of Boggs Ford Road and Millers Way. According to Public Utilities Department staff, there are only a few locations in the City where a lift station parcel is located in the front yard of a residential lot. The lift station parcel is a 25' X 30' lot platted on the Skylake subdivision plat. The subdivision plat was recorded in 1987.

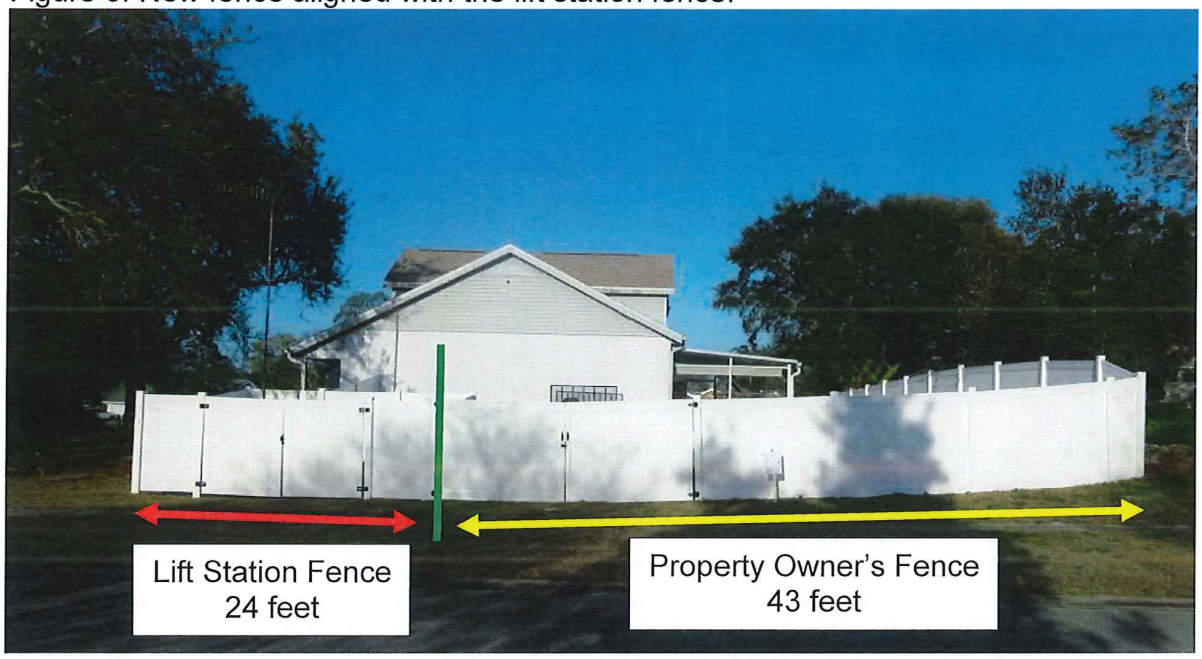


Figure 2. Lift station and previous 4-foot fence (2014)

**EXHIBIT: D**

Prior to submitting the variance application, the applicant appeared before the City Council on March 1 and had the variance application fee and building permit penalty fees waived for installing the fence without a permit. At the meeting, the applicant indicated that the 6-foot fence was installed to match the 6-foot fence installed around the City's lift station property and to provide additional screening of his rear yard from the traffic on Boggs Ford Road. Although the Council did not formally hear a variance case, the members discussed the location of the fence and the justifications for the variance due to the location of the lift station fence. They also discussed how the continuous 6-foot fence improved the appearance of the area.

Figure 3. New fence aligned with the lift station fence.

**REVIEW OF VARIANCE CRITERIA:**

Chapter 19, Section 1, LDC, lists the review criteria that are used to determine whether a variance request should be granted. These criteria, accompanied by staff's analysis, are as follows:

a) *Special conditions and circumstances exist which are peculiar to the land, structure, or building involved, and which are not applicable to other lands, structures or buildings in the same zoning district.*

There is a special circumstance that exists on the subject property. At the front corner of the applicant's lot, there is a small parcel of land owned by the City of Port Orange that is the location of a utility lift station enclosed with a 6-foot tall PVC fence. According to Public Utilities Department Staff, there are only a few locations in the City where a lift station parcel is located in the front yard of a residential lot.

**EXHIBIT: D**

The intent of the 30-foot setback requirement for a residential 6-foot fence in a front yard is to ensure fences that abutted residential streets in residential subdivisions with a narrow right-of-way width are set back off the right-of-way line to provide adequate visual sight lines of the rights-of-way from their home. In this case, there appears to be sufficient space between the existing 6-foot fence and the Boggs Ford Road right-of-way line for adequate visual clearance for vehicles and pedestrians traveling along Boggs Ford Road. In addition, the 6-foot fence installed around the lift station is allowed, according to the City screening standard for lift stations, and is located outside the 25-foot visual clearance triangle measured at the intersection of Boggs Ford Road and Millers Way.

b) *The special conditions and circumstances are not a result of actions of the applicant.*

The special circumstances associated with the property is not a result of actions by the applicant. The lift station parcel was created as part of the subdivision in 1987.

c) *Literal interpretation and enforcement of the development code regulations would deprive the applicant of rights commonly enjoyed by other properties in the same zoning district under the terms of the development code, and would work unnecessary and undue hardship on the applicant.*

The City requires a 6-foot fence to be installed around a lift station to secure and screen the equipment. According to Public Utilities Department Staff, there are only a few locations in the City where a lift station parcel is located in the front yard of a residential lot. The enclosed lift station takes up ±400 square feet of the applicant's side yard, denying him the use of that area.

The applicant stated he installed a 6-foot fence on his property to create a uniform fence line along Boggs Ford Road. The applicant also stated he wanted to enclose his yard to match the lift station fence for aesthetics. Other properties with a side corner setback along a local street, would not have an inconsistent fence height with installing a 4-foot tall fence alongside a 6-foot tall lift station enclosure.

Figure 4. View of the fence from Boggs Ford Road

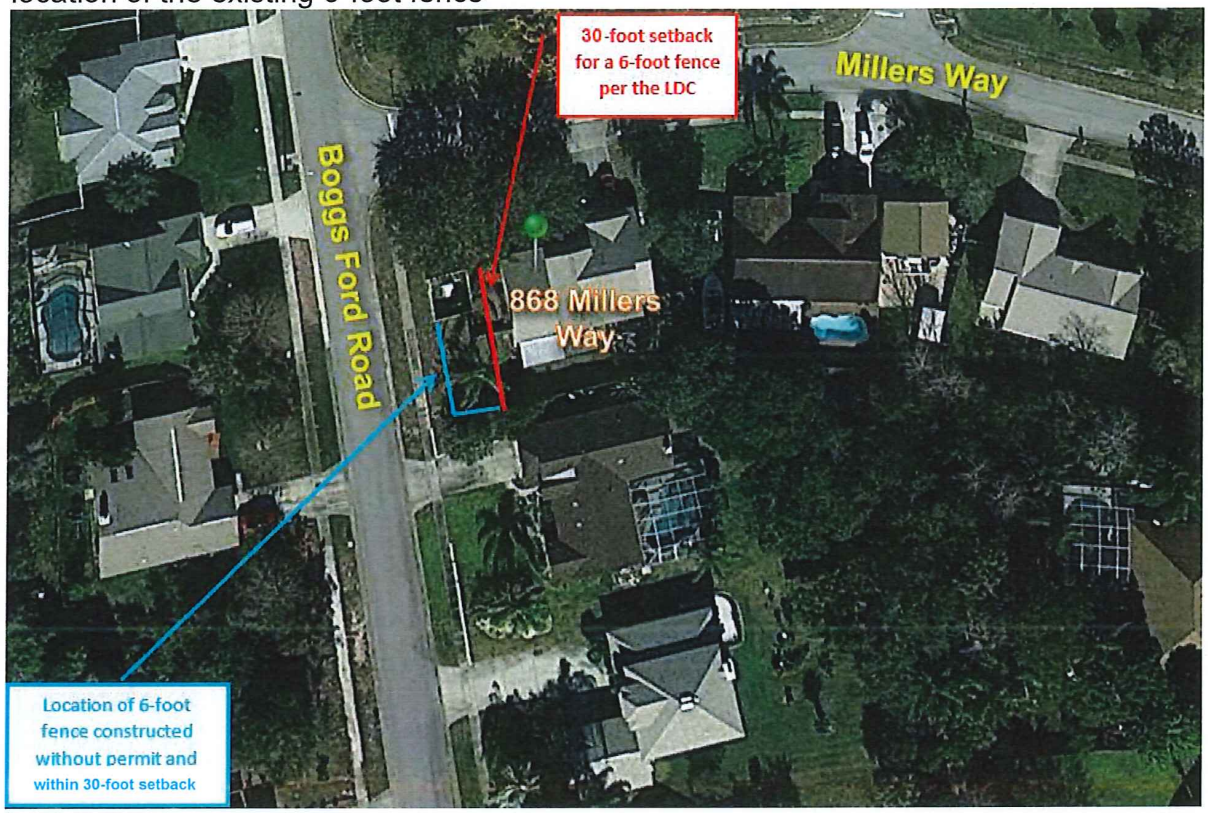
EXHIBIT: D

d) *The variance, if granted, is the minimum variance necessary to make possible the reasonable use of the land, building, or structure.*

The variance is not necessary to make reasonable use of the property because a fence can be installed on the subject property. While the 30 foot setback for a 6-foot tall fence does reduce the size of the side/rear yard, the requested 5-foot setback is not the minimum variance necessary to make reasonable use of the applicant's property.

In this case, the applicant does not prefer to relocate the fence or modify the appearance of the fence to comply with code requirement. The applicant chose to request the variance to allow the new fence to remain in the current location 5-feet from the Boggs Ford Road right-of-way. The applicant also stated that the 6-foot tall fence is necessary for his family's needs for privacy and security for his children and dog.

Meeting the setback requirement would require the 6-foot fence to be moved and reconstructed 30-feet from the Boggs Ford Road right-of-way or for the height of the fence to be reduced from 6-feet to 4-feet. According to the applicant, based on the type of fence (PVC), reducing the height of the existing fence would not be an option.



e) *Granting the variance request will not confer on the applicant any special privilege that is denied by the development code to other lands, buildings, or structures in the same zoning district.*

Due to the platting of a parcel for a lift station and the City's screening standards for a lift station that require a 6-foot opaque fence parcel around the lift station, granting of the setback variance for the 6-foot tall fence will not confer upon the applicant special privileges denied to other properties in this zoning district. As mentioned above, there are only a few locations in the City where a lift station parcel is located in the front yard of a residential lot.

According to the applicant, he installed the 6-foot tall fence to match the fence installed by the City around the lift station and so that the fence line along Boggs Ford Road would be a consistent 6-foot fence to create a uniform fence line. If the fence was installed according to the LDC, the fence line along Boggs Ford Road would consist of sections of 4-foot and 6-foot fencing.

**EXHIBIT: D**

Figure 5. Red line indicates where 6-foot fence is allowed. Blue line indicates location of the existing 6-foot fence

f) *The granting of the variance will be in harmony with the general intent and purpose of this code, and will not be injurious to the surrounding properties or detrimental to the public welfare.*

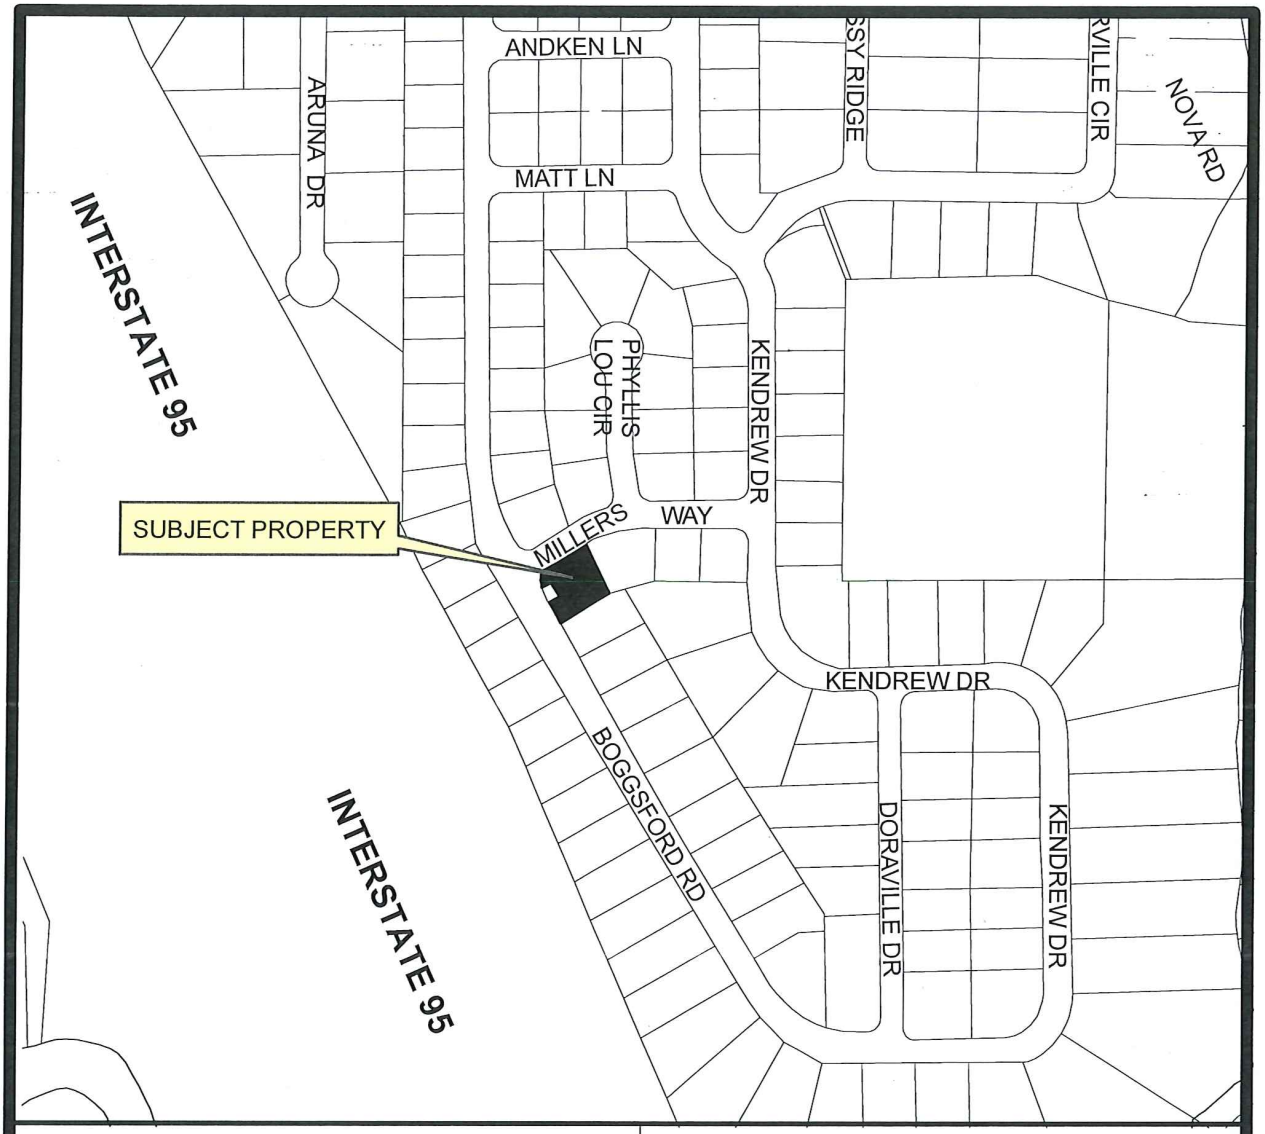
The location of the fence does meet the LDC's ten (10) foot visual clearance triangle requirement for the intersection of Boggs Ford Road and a residential driveway. The ten foot visual triangle is derived by measuring ten feet along the right-of-way and residential driveway that form the intersection then connecting the two measured points. All fences, walls, shrubs, trees, signs or other obstructions are to be located behind the measured triangle. If the variance is approved, the fence is not anticipated to impact visual clearance for vehicles and pedestrians along Boggs Ford Road or the property adjacent to the applicant's property.

There is approximately 15 feet of distance from the pavement edge of the Boggs Ford Road travel lanes to the right-of-way line. The LDC does not provide any mechanism for the 5-foot setback for a 6-foot tall fence from a right-of-way line requirement to be waived based on the fence being located outside the visual clearance triangle.

**EXHIBIT: D**

Figure 6. View of fence facing south on Boggs Ford Rd. showing visual clearance

Moving the fence 30 feet in from the right-of-way line or requiring a 4-foot tall fence would create a non-uniform fence line along Boggs Ford Road. If the variance is approved, the fence would remain in line with the other fence installed around the City's lift station along Boggs Ford Road.



g) *The variance represents a reasonable disposition of a claim brought under the Bert J. Harris Private Property Rights Protection Act, chapter 95-181, Laws of Florida, that a development order of the city has unreasonably burdened the applicant's property, based upon the recommendations of the special master appointed in accordance with the act, or the order of a court as described in the act.*

The variance requested is not based on a claim brought under the Bert J. Harris Private Property Rights Protection Act.

**RECOMMENDATION:**
Staff recommends approval of the variance request to allow a 6-foot tall fence to remain with a 5-foot side yard setback in lieu of the 30-foot setback required by code.

PLANNING COMMISSION MEETING MINUTES
CITY OF PORT ORANGE
1000 CITY CENTER CIRCLE
COUNCIL CHAMBERS
MARCH 24, 2016

THE REGULAR MEETING OF THE PLANNING COMMISSION of the City of Port Orange was called to order by Chairman Sonya Laney at 5:30 p.m.

Pledge of Allegiance

Silent Prayer

ROLL CALL: Present: Lance Green
John Junco
Newton White
Mike Arminio
Thomas Jordan
Frank Crooks
Sonya Laney

Also Present: Matthew Jones, Assistant City Attorney
Robin Fenwick, City Clerk

**B. DISCUSSION/ACTION**

4. Consideration of Minutes

- Memorandum of Voting Conflict for Lance Green must be read publicly

Prior to the meeting, Commissioner White asked the City Clerk to expand the discussion and questions for the Riverwalk item (#7) on the February 25, 2016 meeting minutes. That was done and a revised draft of the minutes was distributed via email. All commissioners have reviewed those revised draft minutes and are prepared to vote on same.

Motion to approve the minutes was made by Commissioner Crooks, and seconded by Commissioner Arminio. Motion carried unanimously by roll call vote.

Chair Laney read the Memorandum of Voting Conflict for Lance Green from the February 25, 2016 meeting.

EXHIBIT: E

Chair Laney asked for approval to hear item #6 prior to item #5.

5. Case No. 16-90000001
VARIANCE/868 MILLERS WAY

A variance from Chapter 16, Section 3(b)(2)(b) of the Land Development Code (LDC) to allow a 6-foot tall privacy fence to be set back 5 feet from the Boggs Ford Road right-of-way in lieu of the required 30-foot setback.

Staff Contact: Gwen Perney (386) 506-5673/gperney@port-orange.org

Gwen Perney, Planner, explained the variance details. The new fence was installed to match the City's fence at the lift station on the property.

Chair Laney asked if there was anything that would obligate the Commission to approve future requests or is this unique because of the lift station. Ms. Perney said it is unique because of the lift station.

Motion to approve was made by Commissioner Arminio, and Seconded by Commissioner Jordan. Motion carried unanimously by roll call vote.

6. Case No. 16-40000002
FIRST AMENDMENT TO THE WOODHAVEN PLANNED UNIT DEVELOPMENT MASTER DEVELOPMENT AGREEMENT AND CONCEPTUAL DEVELOPMENT PLAN
South of Spruce Creek, east and west of I-95, west and north of Williamson Boulevard

A request to amend the Woodhaven Planned Unit Development (PUD) Master Development Agreement (MDA) and Conceptual Development Plan (CDP) to remove language from the MDA that required the construction of Martin Road and remove Martin Road from the CDP.

Staff Contact: Penelope Cruz (386) 506-5671/pcruz@port-orange.org

Penny Cruz, Planner, explained details of the project. This is the zoning component of the project.

There were no questions of the Commissioners.

EXHIBIT: E

Motion to approve was made by Commissioner Crooks, and Seconded by Commissioner Arminio.

There were no public comments

Motion carried unanimously by roll call vote.

**C. OTHER BUSINESS**

7. Development Activity Report

Commissioner Green asked if the Vystar Credit Union project came before the Commission. Mr. Burman said it went through Staff approval accept for the variance for the access point off of Dunlawton Avenue.

Commissioner Arminio asked if there is a way to ensure a verbal agreement made on a waiver of fees on a lien is honored. Mr. Burman said it is a Council decision that they could require to be put in writing but that's a legal issue.

Commissioner Jordan asked about the improvements at the Port Orange Auto Pawn. He asked if the changes being made to the parking area is within the City's Codes. Mr. Burman said the improvements are all within the City's Codes.

8. Commissioner Comments

Chair Laney had a discussion and defended the Commission when allegations were made that they had not properly or completely vetted the Serenity Hills project.

9. Staff Comments: There were none.

**PUBLIC COMMENTS:** There were none.

**CASE NO. VARC-25-0004**

**Variance from LDC, Chapter 17, Section 27**

| | |
|---|---|
| **REQUEST:** | Variance from the Land Development Code (LDC) to reduce the minimum front yard setback from 40 feet to 32.49 feet to allow for the construction of an addition to an existing single-family home. |
| **LOCATION:** | 801 Pheasant Run Court |
| **OWNERS/APPLICANTS:** | Peter and Leticia Ferreira |
| **STAFF RECOMMENDATION:** | Approval |
| **STAFF CONTACT:** | Suzette Cameron, Senior Planner, (386) 506-5676 |
| **PLANNING COMMISSION:** | October 23, 2025 |

## INTRODUCTION

The subject property is a 1-acre lot located at 801 Pheasant Run Court, on the north side of Pheasant Run Court, east of Hensel Road. The property owners are requesting the variance to reduce the secondary front yard setback along Hensel Road, from 40 feet to 32.49 feet to allow the construction of a 20-foot x 53-foot, two-story addition to their existing single-family home. The subject property is a corner lot and according to the Land Development Code (LDC), a corner lot has two front yards, with Pheasant Run Court being the primary front yard and Hensel Road the secondary front yard. If approved, the variance would allow the addition to encroach 7.51 feet into the 40-foot secondary front yard building setback.

**Figure 1. Location Map**

**EXHIBIT: F**

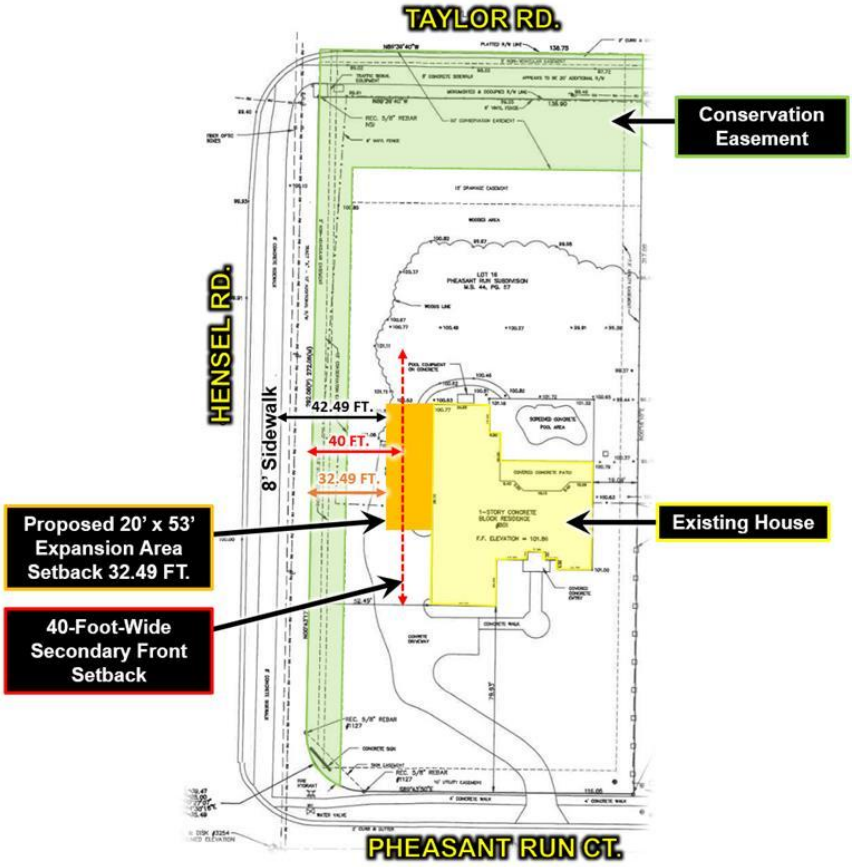
## DISCUSSION

According to the property owners, the requested variance is to allow a 20-foot x 53-foot addition to be built on the west side of their home, at a distance of 32.49 feet from the west (Hensel Road) property line. According to the LDC, a 40-foot setback is required along the west property line adjacent to Hensel Road (See Figure 2). The property owners state that the proposed addition to their home is to accommodate the long-term needs of their family, including the potential need to care for their elderly parents within the home.

The subject property is zoned Rural Residential (RR), a Single-Family Residential Zoning District and is Lot 16 of the Pheasant Run Subdivision; a residential subdivision platted in 1992. The subject property is a corner lot and abuts the Pheasant Run Court and Hensel Road right-of-way and according to the LDC, this lot has two front yards. The home on the subject property is oriented on the lot with the front of the home facing Pheasant Run Court and is considered the primary front yard, and Hensel Road is the secondary front yard.

According to the LDC, the minimum building setbacks for a corner lot zoned RR are: a front yard setback (Pheasant Run Court) of 40 feet, a secondary front yard setback (Hensel Road) of 40 feet, a side yard setback (east side of lot) of 15 feet, and a rear yard setback of 30 feet.

**Figure 2. Proposed Home Addition Location & Current and Proposed Side Setback**



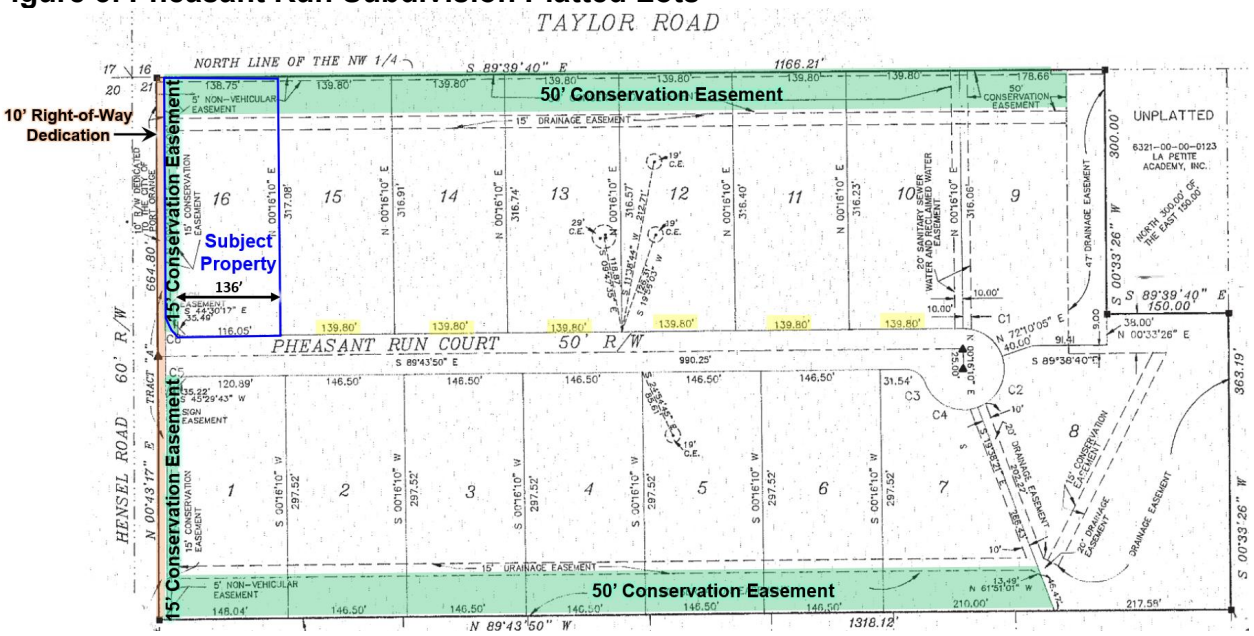


**EXHIBIT: F**

The Pheasant Run Subdivision was platted in 1992 with 16 lots (see Figure 3). The +1-acre interior lots on the north side of Pheasant Run Court were platted at a width of ±139 feet and a length of approximately ± 316 feet, and the +1-acre interior lots on the south side of Pheasant Run Court were platted at a width of ± 146 feet and a length of ± 297 feet.

The LDC requires corner lots to be fifteen percent (15%) wider than standard lots to accommodate the larger secondary front yard setback. The RR zoning district minimum lot width requirement is 100-feet-wide and a minimum of 115-feet-wide for corner lot. While the lot width for the two corner lots in this subdivision are greater than the required 115 feet width, they were platted at the same width of the interior lots.

The Pheasant Run Subdivision was platted with a 50-foot-wide conservation easement along the rear property lines of the lots on the north side of Pheasant Run Court, including the subject property. In addition to this rear conservation easement, the subject property also includes a 15-foot-wide conservation easement along the secondary front yard (west property line) adjacent to the Hensel Road right-of-way (see Figure 3). These conservation easements were established to meet the City's 15% tree preservation requirement at the time the subdivision was platted.

**Figure 3. Pheasant Run Subdivision Platted Lots**

The majority of homes built in this subdivision were laid out to maximize the width of the lot, including the home on the subject property, and the interior layout of the homes were built in a way that any addition to the home would most likely require to be built toward the side compared to the front or rear. The combination of lot width, home layout, and side setback requirements often allows for additions or detached garages on interior lots, which are only subject to a 15-foot side setback. However, corner lots in this subdivision are required to meet the 40-foot secondary front setback, which limits expansion opportunities. As a result, a corner lot with the same width as an interior lot faces greater

EXHIBIT: F

restrictions, making similar additions difficult. If the home on the subject property were located on an interior lot, the proposed addition would not require a variance.

According to the property owners, the addition was designed to avoid encroachment into the 15-foot-wide conservation easement adjacent to Hensel Road, while keeping the appearance of the home compatible with the other homes in the neighborhood. The conservation easement areas on the subject property contain a substantial number of trees, providing a dense buffer that effectively screens the existing home and proposed addition from the Hensel Road and Taylor Road rights-of-way.

**REVIEW OF VARIANCE CRITERIA**

Chapter 19, Section 1, of the LDC, lists the review criteria that shall be used to determine whether the variance requested should be granted. These criteria, accompanied by staff analysis, are as follows:

a) *Special conditions and circumstances are peculiar to the land, structure, or building involved and not applicable to other lands, structures, or buildings in the same zoning district.*

According to the property owners, a special condition exists due to the way the lots on the north side of Pheasant Run Court were platted. Although these lots share similar widths, only their lot is subject to a 15-foot east side yard setback and a 40-foot west secondary front yard setback. In contrast, the other lots on the north side of Pheasant Run Court, which are the same width as their lot, are only required to meet a 15-foot side yard setback on both sides.

The property owners acknowledge that their lot exceeds the minimum required width for a corner lot in the Rural Residential (RR) zoning district. However, because the existing home was constructed with a horizontal orientation across the lot, the west side of the home is the only location for the proposed addition due to available space and based on the interior layout of their home. According to the property owners, efforts were made to design the addition within the required 40-foot setback, but in order to meet their family's current and future needs, the proposed addition reflects the minimum size necessary, which requires the requested variance.

According to the property owners, the home was built in 1995 and is setback approximately 19 feet from the east property line. If the home had been placed at the minimum required setback of 15 feet on the east side, more space would have been available on the west side of the lot for a future addition or detached structures, given the limited area for expansion due to the secondary front setback. The property owners acknowledge that even if the home had been shifted 4 feet toward the east lot line when it was built in 1995, the proposed addition would still require a setback variance, instead of 7.5 feet, it would have been reduced to 3.5 feet.

As part of the subdivision approval in 1992, the dedication of 10 feet of right-of-way was required along Hensel Road. While this area is technically right-of-way, it is not currently utilized, as the necessary intersection improvements at Taylor Road and Hensel Road have already been completed. These improvements

EXHIBIT: F

support existing and future development south of Taylor Road and include the construction of left- and right-turn lanes onto Taylor Road as well as an 8-foot sidewalk along the west side of Hensel Road. Based on current traffic counts and projected traffic counts for the area south of Taylor Road, no additional improvements at the Taylor Road and Hensel Road intersection are anticipated that would require use of the 10-foot right-of-way. As a result, the 10-foot right-of-way dedicated through the Pheasant Run Subdivision plat, provides additional space between the home and the sidewalk/road, which is typically not available for other corner lots in the city (see Figure 3 – Page 3).

b) *The special conditions and circumstances are not the result of the applicants' actions.*

The special conditions are not the result of the current property owners. The lot was created in 1992, and the existing house was constructed in the current location in 1995. The current property owners purchased the home in 2016.

c) *Literal interpretation and enforcement of the development code regulations would deprive the applicants of rights commonly enjoyed by other properties in the same zoning district under the terms of the development code and would work unnecessary and undue hardship on the applicants.*

A literal interpretation of the LDC would not deprive property owners of rights commonly enjoyed by other properties within the same zoning district. As part of the development approval process, all new structures or addition to an existing structure are required to comply with the current development requirements of the LDC or obtain a variance from the requirements of the LDC.

Although not the property owners' preference, there is space in the rear yard of the subject property for an addition that meets the building setback requirements for the subject property. However, according to the property owners, the proposed house addition is to expand the rooms located on the west side of the house, so expanding the house towards the rear would not accomplish the intent of the expansion and would require significant interior alterations to reconfigure the home to address their family's current and future needs.

According to the property owners, the requested variance is necessary based on the constraints of the corner lot along with interior layout of the home. The property owners state that expanding the existing house in the proposed location, set back 32.49 feet from the west property line in lieu of the 40 feet, will not impact adjacent homeowners as the west side of the subject property boarders the Hensel Road right-of-way and their lot is screened from the Hensel Road right-of-way by the dense 15-foot-wide conservation easement along the west side of the subject property.

**EXHIBIT: F**

*d) The variance, if granted, is the minimum variance necessary to make possible the reasonable use of the land, building or structure.*

The proposed location for the addition is approximately 7.51 feet into the 40-foot-wide secondary front yard setback along the west property line, providing a 32.49-foot setback from the Hensel Road right-of-way. The proposed expansion avoids encroaching into the 15-foot-wide conservation easement along Hensel Road and there would be over ± 40 feet of separation between the addition and the Hensel Road travel lanes & sidewalk.

*e) Granting of the variance request will not confer on the applicants any special privilege that is denied by the development code to other lands, buildings, or structures in the same zoning district.*

All properties developed or structures on property redeveloped or expanded that are zoned RR within the city are required to meet the building setback requirements of the LDC or a secure variance. According to the property owners, if the proposed addition is approved, the impact to the surrounding areas will be minimal because of the 15-foot-wide conservation easement along the west side of the subject property along with the additional right-of-way that was dedicated to the City in 1992 that abuts the subject property.

*At Pheasant Run Court and Hensel Road Facing North*

*On Hensel Road Facing South*

*f) The granting of the variance will be in harmony with the general intent and purpose of this code and will not be injurious to the surrounding properties or detrimental to the public welfare.*

The intent of the building setback requirements in the LDC is to provide adequate separation between buildings to minimize the visual appearance of the structures from adjacent properties, ensure adequate separation between structures for air movement, and provide room on the subject property for maintenance and necessary repairs.

According to the property owners, proposed location of the house addition will be in harmony with the current residential structures in the area and will not be

EXHIBIT: F

injurious to the surrounding properties. The proposed addition will be setback 32.49 feet from the Hensel Road right-of-way line and ± 56 feet from Hensel Road travel lanes and buffered by a dense 15-foot-wide conservation easement along the west side of the subject property adjacent to Hensel Road. Therefore, the intent of the building setback requirements in the LDC will still be met if the variance is approved as the requested setback will still provide adequate separation between buildings, minimize the visual appearance of the structure from adjacent properties, ensure adequate separation between structures for air movement, and provide room on the subject property for maintenance and necessary repairs.

g) *The variance represents a reasonable disposition of a claim brought under the Bert J. Harris Private Property Rights Protection Act, chapter 95-181, Laws of Florida, that a development order of the city has unreasonably burdened the applicants' property, based upon the recommendations of the special master appointed in accordance with the act, or the order of a court as described in the act.*

The variance requested is not based upon a claim brought under the Bert J. Harris Private Property Rights Protection Act.

**PUBLIC NOTICE**
Public Notices regarding the variance were posted in the *News-Journal* and mailed to adjacent property owners and the property was posted with a public notice sign, as required by the LDC. As of October 17, 2025, staff has not received any phone calls regarding the proposed variances.

**RECOMMENDATION**
Based on the findings of this report, staff recommends approval of the variance from Chapter 17, Section 27 of the LDC, to allow a 32.49-foot secondary front yard setback (Hensel Road) for a home addition.

Peter and Leticia Ferreira

801 Pheasant Run Court

Port Orange, FL 32127

**9/26/2025**

**Subject: Request for Variance – Home Addition at:** *801 Pheasant Run Court*

Dear Members of the Planning Commission,

We are writing to respectfully request a variance of 7.51 feet into the front setback (Hensel Rd. side) to allow for the construction of an addition to my residence located at 801 Pheasant Run Court in Port Orange. The proposed addition will measure 20' x 53' and is designed to remain fully outside of the existing conservation easement on the property.

The purpose of this addition is twofold:

1. To accommodate the long-term needs of our family, including the potential for our parents to move in with us in the future so that they can receive proper support and care.
2. To allow us to remain in the City of Port Orange, where we have established strong community ties and wish to continue living.

We understand the importance of balancing community development with conservation and neighborhood character. The proposed addition has been carefully planned to avoid encroaching upon the conservation easement and to remain consistent with the surrounding residential area.

We respectfully request the Board's consideration and approval of this variance so that we may move forward with these plans. Please let us know if additional documentation, site plans, or other supporting materials are needed to complete your review.

Thank you for your time and attention to this matter. We appreciate your consideration and look forward to working with the City to ensure this project aligns with both community standards and family needs.

Sincerely,

Peter and Leticia Ferreira

REGULAR PLANNING COMMISSION MEETING MINUTES
COUNCIL CHAMBERS – CITY HALL
1000 CITY CENTER CIRCLE
PORT ORANGE, FLORIDA
OCTOBER 23, 2025

THE REGULAR PLANNING COMMISSION MEETING of the City of Port Orange was called to order by Vice Chair Bo Bofamy at 5:30 p.m.

CALL TO ORDER

1. Pledge of Allegiance

2. Roll Call

Present: Vice Chair Bo Bofamy
Commissioner Scott Steger
Commissioner Mark Bowling
Commissioner Maria Mills-Benat
Commissioner Daniel Mallegol

Absent: Chair Thomas Jordan
Commissioner Stan Schmidt

Also Present: Shannon Balmer, City Attorney
Penelope Cruz, Planning Manager
Amanda Bonin, Deputy City Clerk

DISCUSSION/ACTION

3. Consideration of Minutes

Motion to approve the September 25, 2025 meeting minutes was made by Commissioner Scott Steger and Seconded by Commissioner Maria Mills-Benat. Motion carried unanimously by roll call vote.

4. APPLICATION: Variance/801 Pheasant Run Court
CASE NO.: VARC-25-0004
APPLICANT: Peter and Leticia Ferreira
STAFF CONTACT: Suzette Cameron, Senior Planner, (386) 506-5676/scameron@port-orange.org

A request for a variance from the Land Development Code to reduce the minimum secondary front yard setback along Hensel Road from 40 feet to 32.49 feet to allow for the construction of an addition to an existing single-family home.

Motion to approve Variance/801 Pheasant Run Court Case No.: VARC-25-0004 was made by Commissioner Maria Mills-Benat and Seconded by Commissioner Scott Steger.

Penelope Cruz, Planning Manager, introduced the item, provided details, and answered Commissioners' questions.

Motion carried unanimously by roll call vote.

# STAFF REPORT

**VARIANCE FROM LDC CHAPTER 16, SECTION 3(b)(2)(b), SECTION 3(b)(2)(f), SECTION 3(b)(3)(a) and SECTION 6(a)**
**CASE NO. 16-90000009**

| | |
|---|---|
| **REQUEST:** | Variances from the LDC to allow a 6-foot fence to be placed in a secondary front yard along the right-of-way line. |
| **OWNER / APPLICANT:** | Kevin Price |
| **LOCATION:** | 5835 Wales Avenue |
| **STAFF RECOMMENDATION:** | Approval |
| **STAFF CONTACT:** | Tim Burman, Planning Manager (386) 506-5675 |
| **PLANNING COMMISSION DATE:** | December 15, 2016 |

**DISCUSSION:**
The subject property is located at the northeast corner of Wales Avenue on Wiltshire Boulevard (Figure 1). The property owner is requesting the variances to allow a 6-foot tall fence to be placed in a secondary front yard and on the Wiltshire Boulevard right-of-way line. According to the property owner, the proposed 6' fence is to screen his property from the adjacent City's Parks & Recreation building and the Cambridge Basin drainage facility (Exhibit A).

**Figure 1. Location Map**

According to the Land Development Code (LDC), the subject property is a corner lot because it is adjacent to two public rights-of-way (Wales Avenue and Wiltshire Boulevard). In this case, the south property line of the subject property is adjacent to a right-of-way (Wiltshire Boulevard) that functions as a driveway for authorized vehicles accessing the City's Parks & Recreation building and the Cambridge Basin drainage facility. Unlike a typical corner lot in a residential subdivision, the right-of-way adjacent to the south property line of the subject property is not a designated street used for residential traffic (Figure 2).

**Figure 2. Subject Property & City Owned Property Location:**

The building permit application for the fence has been reviewed by staff and meets all other code requirements. The applicant is requesting approval of the variances to waive the 5-foot setback requirement from the right-of-way and to allow a 6-foot tall fence in a secondary front yard.

The proposed 6-foot fence (Figure 3) requires variances from the following LDC requirements:

Placement of 6' Fence in Front Yard:
The LDC considers any portion of a lot that abuts a right-of-way a front yard and a 6-foot tall fence is to be located beyond the front yard setback line, which, for this property is 30-feet. The setback requirement for a 6-foot fence is intended to provide the homes adjacent to a corner lot with adequate sight lines from their home, meaning that other home owners will generally have a

**EXHIBIT H**

clear line of sight from their front yards. The LDC does allow a 4-foot tall fence within the front yard setback because sight lines are not as impacted by a shorter fence most people can see over.

Right-of- Way Setback:
The LDC requires all residential and commercial fences to be set back 5-feet from any right-of-way. The setback applies to all rights-of-way in the City and is intended to provide adequate visual clearance for vehicles and pedestrians at the intersections of rights-of-way and also rights-of-way and private driveways. The setback prohibits structures being installed that could impede vision when entering/exiting a driveway or turning onto a street.

**Figure 3. Proposed Fence Location:**

As indicated in the letter of request (Exhibit A), there is an existing 4-foot tall chain link fence on the Wiltshire Boulevard right-of-way line and in the secondary front yard (Figure 4). The 4-foot chain link fence has been in the existing location for approximately 25 years and was there before the applicant purchased the house. In its current state, the existing 4-foot chain link fence is non-conforming with the current requirements of the LDC. The request is to remove the existing 4-foot tall chain-link fence and replace it with a 6-foot tall PVC fence in the same location. According to the property owner, he wants to install the 6-foot PVC fence to screen his property from the City's Parks & Recreation building and the Cambridge Basin drainage facility adjacent to his property.

**Figure 4. Existing Fence Location:**

**REVIEW OF VARIANCE CRITERIA:**

Chapter 19, Section 1, LDC, lists the review criteria that are used to determine whether the variances requested should be granted. These criteria, accompanied by staff's analysis, are as follows:

a) *Special conditions and circumstances exist which are peculiar to the land, structure, or building involved, and which are not applicable to other lands, structures or buildings in the same zoning district*.

**EXHIBIT H**

The subject property is located at the northeast corner of Wales Avenue and Wiltshire Boulevard. In this case, the subject property is adjacent to +/- 165-feet of right-of-way (Wiltshire Boulevard) that only serves as a driveway for authorized vehicles accessing the City's Parks & Recreation building and the Cambridge Basin drainage facility. The driveway for non-public access ends at the Cambridge Basin drainage facility (Figure 5).

**Figure 5. City Owned Driveway Access & Dead-End:**

The intent of the 30-foot setback requirement for a residential 6-foot fence in a front yard is to ensure fences that abut streets in residential subdivisions with a narrow right-of-way width are set back off the right-of-way line to provide adjacent properties adequate visual sight lines from their home. Typical corner lots in residential subdivisions are located adjacent to two public streets. In this case, the south property line of the subject property is adjacent to a right-of-way (Wiltshire Boulevard) that functions as a driveway for authorized vehicles accessing the City's Parks & Recreation building and the Cambridge Basin drainage facility. The driveway for non-public access ends at the Cambridge Basin drainage facility. Unlike a typical corner lot in a residential subdivision, the right-of-way adjacent to the south property line of the subject property is not a designated street used for residential traffic. According to the property owner, there is sufficient space between the proposed location of the 6-foot fence and the driveway located within the Wiltshire Boulevard right-of-way line for adequate visual clearance for vehicles exiting/entering the City driveway (Figure 6).

**Figure 6. Right-of-Way Area:**

b) *The special conditions and circumstances are not a result of actions of the applicant.*

The special circumstance associated with the property is not a result of actions by the property owner. The stormwater pond to the east of the subject property was built as a part of the Cambridge Canal Basin improvement project that was completed in 2008 and the property located south of the subject property served as a Fire Station until Parks & Recreation took over the building for offices and storage in late 2007 and early 2008. Currently, the Wiltshire Boulevard right-of-way has not been vacated by the City and there are no plans to vacate at this time.

c) *Literal interpretation and enforcement of the development code regulations would deprive the applicant of rights commonly enjoyed by other properties in the same zoning district under the terms of the development code, and would work unnecessary and undue hardship on the applicant.*

When a new fence is installed, it must comply with current development requirements of the Land Development Code (LDC). The intent of setback and front-yard requirements for a fence is to minimize the impact on adjoining properties, ensure adequate sight lines, and provide room on the subject property for maintenance and necessary repairs to the fence. Although not their preference, the property owner could install a 4-foot tall fence set back 5-feet from the Wiltshire Boulevard right-of-way or install a 6-foot fence set back 30-feet from the Wiltshire Boulevard right-of-way to meet the code requirements. According to the property owner, the variances are necessary to install the 6-foot fence in the secondary front yard and on the Wiltshire Boulevard right-of-way. The property owner states that the proposed location of the 6-foot fence would not impact adjoining properties, ensure adequate sight lines, and provide room on the subject property for maintenance and necessary repairs to the fence. The property owner is concerned that reducing the height of the fence will not provide sufficient screening of the property and installing the 6-foot fence set back 30-feet from the right-of-way would reduce the size of the rear yard.

d) *The variances, if granted, are the minimum variances necessary to make possible the reasonable use of the land, building, or structure.*

EXHIBIT H

The fence could be installed to comply with the setback requirements of the LDC; however, this would require the property owner to change the proposed location and height of the fence. Although not their preference, the property owner could shift the proposed 6-foot fence to be set back 30-feet from the right-of-way or reduce the fence height to 4-foot and set it 5-feet from the right-of-way line.

According to the property owner, the proposed location of the 6-foot fence will not impact adjoining residential properties or sight lines for vehicles exiting the City's facilities. The property owner is also requesting to install the fence to screen his property from the adjacent City facilities.

e) *Granting the variances request will not confer on the applicant any special privilege that is denied by the development code to other lands, buildings, or structures in the same zoning district.*

Any fence located within a front yard on a corner lot cannot exceed 4-feet unless set back the designated front yard setback (30-feet) from the right-of-way line. However, according to the property owner, his corner lot is not a typical corner lot. In this case the installation of the 6-foot fence on the Wiltshire Boulevard right-of-way will not confer upon the applicant special privileges denied to other properties in this zoning district, because no other corner lots have a secondary front yard along the right-of-way used as a driveway to City facilities.

f) *The granting of the variances will be in harmony with the general intent and purpose of this code, and will not be injurious to the surrounding properties or detrimental to the public welfare.*

The proposed location of the fence does meet the LDC's 25-foot visual clearance triangle requirement for intersections. The 25-foot visual triangle is determined by measuring 25-feet along the 2 intersecting rights-of-way that form the intersection then connecting those two points and measuring. There is approximately +/-30-feet from the pavement edge to Wiltshire Boulevard, that serves as the driveway access for the City properties to the applicant's property line and the proposed location of the 6-foot fence installation. If the variance is approved, the fence is not anticipated to impact visual clearance for vehicles and pedestrians along Wiltshire Boulevard, Wales Avenue or Trailwood Drive.

g) *The variances represent a reasonable disposition of a claim brought under the Bert J. Harris Private Property Rights Protection Act, chapter 95-181, Laws of Florida, that a development order of the city has unreasonably burdened the applicant's property, based upon the recommendations of the special master appointed in accordance with the act, or the order of a court as described in the act.*

The variance requested is not based on a claim brought under the Bert J. Harris Private Property Rights Protection Act.

**RECOMMENDATION:**

Based on the findings of this report, Staff recommends **approval** of the variances requested allow a 6-foot tall fence along the Wiltshire Boulevard right-of-way in lieu of the 30-foot setback required by code.

# EXHIBIT H

Exhibit A

November 9, 2016

Mr. Tim Burman
City of Port Orange
Community Development Department
1000 City Center Circle
Port Orange, FL 32129

Mr. Burman,

I Kevin Price own and reside at 5835 Wales Avenue and have lived here 25 years. I am requesting a variance to allow a 6-foot tall fence to be placed in a secondary front yard and on the Wiltshire Boulevard right-of-way line. My property is a corner lot; however, this specific corner lot is not a typical corner lot, because no other corner lots have a secondary front yard along the right-of-way that serves as a driveway to City facilities.

The proposed 6' fence is to screen my property from the adjacent City's Parks & Recreation building and the Cambridge Basin drainage facility. Currently in the same location as the proposed location for the new 6-foot fence, there is an existing 4-foot chain-link fence that's has been there since I purchased and moved into the home some 25 years ago. I am requesting to remove the 4' fence and replace with the 6' tall PVC privacy fence to screen property from the City's Parks & Recreation building and the Cambridge Basin drainage pond that is adjacent to my property. There is enough space between the proposed location of the 6-foot fence and the driveway located within the Wiltshire Boulevard right-of-way line for adequate line of sight for vehicles exiting/entering the City driveway. If were to reduce the height of the fence it will not provide enough screening of my property and installing the 6-foot fence setback 30-feet from the right-of-way would reduce the size of my yard.

The variances I am requesting are necessary to install the 6-foot fence in the secondary front yard and on the Wiltshire Boulevard right-of-way. The proposed location of the 6-foot PVC privacy fence will not impact the City's Parks & Recreation building and the Cambridge Basin drainage pond adjacent to my property, will not limit sight lines, and will provide room on the subject property for maintenance and necessary repairs to the fence.

Sincerely,

Kevin Price

*Motion to approve the request was made by Commissioner Mills-Benat, and Seconded by Commissioner White. Motion carried unanimously by roll call vote.*

6. Case No. 16-40000008 - MASTER DEVELOPMENT AGREEMENT AND CONCEPTUAL DEVELOPMENT PLAN/PC-A WORKPLACE ZONING DISTRICT/THOMPSON PUMP

East side of Williamson Boulevard, south of McGinnis Avenue

A request to approve the Thompson Pump and Manufacturing Company, Inc. Master Development Agreement and Conceptual Development Plan.

Staff Contact: Tim Burman (386) 506-5675/tburman@port-orange.org

*Mr. Burman provided details of the MDA and CDP being proposed by Thompson Pump, as well as the deviations being requested. Staff recommended approval subject to City Council direction on the policy considerations, remaining comments being addressed prior to this item being considered by City Council, and review and approval by the City Attorney's Office for legal form and content.*

*Rachel Pringle, Cobb Cole P.A., explained the plans for Thompson Pump to potentially expand to this site. This request is for rezoning the property but not approving the site plans, which will come later.*

*Chris Thompson said their hours of operations are from 7:00 a.m. to 5:00 p.m. at this time. There are no current plans to change their hours of operations. There is nothing planned for the current facility at this time.*

*Motion to approve as presented was made by Commissioner White, and Seconded by Commissioner Jordan. Motion carried unanimously by roll call vote.*

7. Case No. 16-40000006 - FIFTH AMENDMENT TO THE CLARK PROFESSIONAL CENTER AND WEDDING CHAPEL PLANNED COMMERCIAL DEVELOPMENT MASTER DEVELOPMENT AGREEMENT AND CONCEPTUAL DEVELOPMENT PLAN
5111 South Ridgewood Avenue

**EXHIBIT I**

A request to amend the Clark Professional Center and Wedding Chapel Planned Commercial Development (PCD) Master Development Agreement (MDA) and Conceptual Development Plan (CDP) to provide the regulatory framework to subdivide the subject property into six commercial lots, amend the list of permitted uses allowed for the PCD, and establish the review process for temporary uses and special events.

Staff Contact: Gwen Perney (386) 506-5673/gperney@port-orange.org

*Mr. Burman provided details of the amendment being requested. Staff recommended approval subject to resolution of outstanding comments prior to scheduling for review by the City Council and review by the City Attorney as to legal form and content.*

*Discussion was held regarding parking concerns, as well as drainage concerns.*

*Andy Clark, applicant, explained why they are asking to subdivide the property.*

*Jack Goldey, citizen, believes keeping the property together is more valuable than separating the parcels. Vice Chair Green explained the MDA is still in place no matter who owns the land. Those restrictions will remain on the properties.*

*Motion to approve as presented was made by Commissioner Arminio, and Seconded by Commissioner Jordan. Motion carried unanimously by roll call vote.*

8. Case No. 16-52000003 - SUBDIVISION PLAT AND PLANS DEVELOPMENT ORDER MODIFICATION/THE PINNACLE PLANNED UNIT DEVELOPMENT PHASE 2

East side of Williamson Boulevard, north of Sterling Chase Subdivision, east of Phase 1 of The Pinnacle Subdivision

An update to modifications to the Pinnacle Subdivision Phase 2 Subdivision Final Plat and Plans, previously approved in 2015, adding 14 additional lots.

Staff Contact: Penelope Cruz (386) 506-5671/pcruz@port-orange.org
*Penelope Cruz, Planner, discussed the modifications being requested, which supplements the PUD Amendment previously approved.*

**EXHIBIT I**

*Motion to approve the request was made by Commissioner Arminio, and Seconded by Commissioner White. Motion carried 5-0-1 by roll call vote with Vice Chair Green abstaining due to a conflict.*

**OTHER BUSINESS**

9. Development Activity Report – *Mr. Burman answered questions from Commissioners relating to ongoing projects.*

10. Commissioner Comments – *There were none.*

11. Staff Comments – *There were none.*

**PUBLIC COMMENTS** - *Mr. Goldey doesn't think the 9-acre pond at King's Landing is appropriate. He would like to see something smaller in the plans.*

**ADJOURNMENT:** 6:25 p.m.

ARC APPROVAL

Victor & Samia Francis
5968 Shady Creek Lane
Port Orange, FL 32128

Dear Mr. & Mrs. Francis;

The Sawgrass Point Homeowners Association Architectural Review Committee (ARC) has met on your request to install a 6 foot, white vinyl fence, on the right side of the property and it has been approved with the stipulation that fence will not exceed 6 ft in height and the necessary City Permits are obtained.

This approval is valid for 180 days. Please call me with any questions or concerns.

Regards,

Karen Koch
Community Association Manager

cc: Board of Directors

## CASE NO. VARC-26-0002

**Variance from LDC, Chapter 16, Section 3(b)(2)(f) and Section 3(b)(3)(a)**

| | |
|---|---|
| **REQUEST:** | Variance from Chapter 16, Section 3(b)(2)(f) and Section 3(b)(3)(a) of the Land Development Code (LDC), to allow a 6-foot-tall fence to be located less than 5 feet from the right-of-way in lieu of being placed in line with the front plane of the house. |
| **LOCATION:** | 5968 Shady Creek Lane (Figure 1 – Location Map) |
| **OWNERS:** | Victor Francis and Samia Fezy |
| **APPLICANT:** | Peter Francis |
| **STAFF RECOMMENDATION:** | Denial |
| **STAFF CONTACT:** | Tim Burman, Community Development Director, (386) 506-5675 |
| **PLANNING COMMISSION:** | April 23, 2026 |

## INTRODUCTION

The subject property is located at 5968 Shady Creek Lane, at the northwest corner where two segments of Shady Creek Lane intersect (Figure 1). The applicant is requesting a variance to allow an existing 6-foot-tall fence to remain in a secondary front yard setback less than 5-feet from the Shady Creek Lane right-of-way line in lieu of being placed in line with the front plane of the house as permitted. According to the applicant, the 6-foot-tall fence was installed about 10 years ago to provide privacy and safety for the well-being of a family member with a medical condition that lives at this address with the property owners.

**Figure 1. Location Map**

**DISCUSSION**

According to the Land Development Code (LDC), the subject property is a corner lot because it is adjacent to two public rights-of-way (intersection of two sections of Shady Creek Lane) and therefore has two front yards, a primary front yard and secondary front yard. The purpose of the citywide requirement regulating 6-foot-tall fences within the primary and secondary front yards of residential corner lots is to protect public safety and maintain neighborhood character by controlling the placement and height of fences adjacent to public rights-of-way.

For safety, the setback ensures that 6-foot-tall fences do not encroach into required sight triangles at street intersections and driveways. These sight triangles are needed for maintaining adequate visibility for motorists, pedestrians, and cyclists, particularly at corner lots where two street frontages intersect, and visibility conflicts are more likely to occur. By limiting fence height and requiring appropriate setbacks in these areas, the regulation reduces potential hazards associated with obstructed views of oncoming traffic and pedestrian activity.

In this case, the existing 6-foot-tall fence is located outside of the required 25-foot visual clearance triangle for the intersection of two public roadways. The 25-foot sight triangle is established by measuring 25 feet along each of the intersecting rights-of-way and connecting those points to define the area that must remain clear for visibility. Based on this configuration, the fence does not encroach into the sight triangle and is not anticipated to impact visual clearance for vehicles or pedestrians along Shady Creek Lane.

In addition to safety considerations, the requirement supports community design objectives by preserving visual openness within residential neighborhoods. Limiting the height and placement of fences in these areas helps ensure that views from neighboring homes and from the public right-of-way are not unnecessarily blocked. This maintains a more open and visually connected streetscape, where front yards, landscaping, and home façades remain visible and contribute to the overall aesthetic quality of the neighborhood.

Together, these provisions balance safety and livability by ensuring that fencing within visible front yard areas does not block intersection visibility while also preventing front-facing residential areas from being enclosed in a way that reduces openness and visibility along the street.

For the subject property, the east property line along Shady Creek Lane is the primary front yard and the south property line along Shady Creek Lane is the secondary front yard (Figure 1). Both streets are local public roads. According to the LDC, a 6-foot-tall fence in a secondary front yard must be set back either in line with the front plane of the home (approximately 10 - 27 feet from the secondary front lot line) or to the zoning district front yard setback (30 feet), whichever is less (Figure 2). Therefore, the LDC allows a 6-foot-tall fence to be installed up to the front plane of the house.

In this case, while the lot includes a secondary front yard, it does not directly abut any single-family residential lots where a 6-foot-tall fence would obstruct views from adjacent homes. In addition, the proposed fence location is outside of the required sight triangle

areas, and therefore does not interfere with intersection visibility or roadway safety (Figure 2).

Therefore, there are two options for a fence on the subject property that would meet the LDC requirements: 1) A 4-foot-tall fence installed up to 5-feet from the right-of-way for the a primary front yard and secondary front yard; or 2) a 6-foot-tall fence installed in line with the front plane of the house for the a primary front yard (30 feet) and the secondary front yard (10 - 27 feet).

**Figure 2. Existing Fence Location Compared to Permitted Fence Location**

It should be noted that a 6-foot-tall fence currently exists along the rear property line and extends into the secondary front yard; however, that rear fence is not part of the current variance request. It is located within the HOA common area and is outside the subject property boundary. The variance request applies only to the portion of fence located within the south secondary front yard along the Shady Creek Lane right-of-way on the subject property. The existing 6-foot-tall fence on HOA property is being addressed separately and is not included in this request.

## BACKGROUND

The subject property contains a single-family home built in 2000. The applicant states that approximately 10 years ago, a 6-foot-tall fence was installed roughly 5 feet from the south property line along the Shady Creek Lane right-of-way. According to City records, no permit was issued for this portion of the fence. In the applicant's variance request letter, he notes that the fence was installed around 2016 and has remained in place for nearly 10 years with no known complaints to Code Enforcement, the City, or the homeowners' association, aside from a single complaint received by Code Enforcement in 2024, and with no identified adverse impacts to surrounding properties.

As indicated in the applicant's variance request letter, the primary reason for installing the 6-foot-tall fence is to address the safety and well-being of a family member with a medical condition who resides at the property. According to the applicant, the fence serves as a necessary protective measure, allowing this individual to be outdoors within a secure, enclosed yard.

The applicant has stated that a 4-foot-tall fence would not provide adequate security for their family member with a medical condition, as it could be easily climbed or crossed, whereas a 6-foot-tall fence provides an appropriate level of protection while still allowing safe outdoor access. The applicant also notes that similar fence heights are commonly used in residential and care settings for individuals with comparable needs. Based on these concerns, the applicant is requesting a variance to allow the existing 6-foot-tall fence along Shady Creek Lane to remain.

Based on discussions with the applicant, he acknowledges that a permit should have been obtained prior to the installation of the fence. However, the applicant has indicated that if a permit had been requested and subsequently denied in 2016 due to the fence height, he would have pursued a variance to seek approval for the 6-foot-tall fence based on the same safety considerations described above.

## REVIEW OF VARIANCE CRITERIA

Chapter 19, Section 1 of the Land Development Code (LDC), outlines the criteria to be used in determining whether the requested variance should be granted. The following summarizes these criteria, along with relevant staff information and the applicant's justification for the variance:

*a) Special conditions and circumstances exist which are peculiar to the land, structure or building involved, and which are not applicable to other lands, structure or buildings in the same zoning district.*

This criterion typically refers to conditions or circumstances such as steep slope, presence of historic trees, odd lot shape, etc. that might make installing a 6-foot-tall fence in line with the front plane of the home impractical. There are no special conditions or circumstances which are peculiar and would otherwise prevent installation of either a 6-foot-tall fence in line with the front plane of the home or a 4-foot-tall fence a minimum of 5 feet from the right-of-way along Shady Creek Lane in accordance with the Land Development Code (LDC).

The subject property is a corner lot that has two front yards according to the LDC, which is not a unique condition or circumstance. The subject property is developed with a single-family home. The lot size of the subject property (11,325 SF) exceeds the lot size requirement (9,600 SF) for a corner lot in the Sawgrass Point Planned Unit Development (PUD) zoning district.

According to the applicant, although the property is classified as a corner lot, it differs from a typical residential corner lot because the secondary front yard does not abut another single-family residence, but instead borders a HOA-owned common area. As a result, the applicant asserts that the 6-foot-tall fence does not negatively impact the visibility, aesthetics, or enjoyment of neighboring residential properties. The applicant further notes that the fence provides additional privacy for the subject property from pedestrians and vehicles traveling east on Shady Creek Lane.

The applicant also states that existing mature hedges and landscaping located outside the fence line exceed 6 feet in height and already provide substantial visual screening of the fence (see pictures below). Because landscaping is not regulated under the Land Development Code in the same manner as fence height (provided it does not obstruct sidewalks or roadway visibility), similar screening would remain in place even if the fence were reduced to 4 feet in height.

In addition, the applicant states that the fence does not obstruct visibility near intersections and that there are no known traffic incidents, police reports, or safety concerns associated with its placement. Landscaping along the south side of the property also screens much of the fence from adjacent homes, further reducing its visual impact.

Staff have confirmed with the Police Department that there have been no reported accidents or safety incidents at the intersection of Shady Creek Lane and Shady Creek associated with the fence.

*Picture of subject property/fence looking east*

*Picture of subject property/fence looking west*

*Picture of subject property/fence looking west from intersection of Shady Creek Lane and Shady Creek Lane*

b) *The special conditions and circumstances are not the result of the applicant's actions.*

There are no special conditions or circumstances.

According to the applicant there are special conditions or circumstances, specifically, that the layout of the roadway, lots, and common areas predate the applicant's ownership of the property; the subdivision was developed in 1997, and the home was constructed in 2000, while the current property owner has only owned the home since 2007. The applicant believes these pre-existing conditions create unique circumstances that justify the requested variance and are not attributable to any action of the current owner.

c) *Literal interpretation and enforcement of the development code regulations would deprive the applicant of rights commonly enjoyed by other properties in the same zoning district under the terms of the development code and would work unnecessary and undue hardship on the applicant.*

When a new fence is installed, it is required to comply with the current requirements of the Land Development Code. These standards are intended to protect public safety and maintain neighborhood character by regulating the placement and height of fences located within primary and secondary front yard areas adjacent to public rights-of-way. From a safety standpoint, the requirements ensure that fences do not encroach into required sight triangles at street intersections and driveways, where clear visibility is necessary for motorists, pedestrians, and cyclists, particularly in corner lot conditions where two street frontages intersect.

In addition, the regulations support neighborhood design objectives by limiting visual obstructions within front yard areas that contribute to the public-facing character of residential subdivisions. These provisions help ensure that front yards, home façades, and streetscapes remain open and visible, rather than enclosed by tall fencing along the roadway.

For corner lots, these standards apply to both primary and secondary front yard areas regardless of adjacent conditions. However, the Land Development Code still provides flexibility in fence placement and height, allowing a 4-foot-tall fence to be installed within the front yard setback closer to the right-of-way, or a 6-foot-tall fence to be installed in alignment with the front plane of the home, provided applicable setback requirements are met.

In this case, the subject property's configuration, with its secondary front yard adjacent to a HOA-owned common area rather than a residential lot, presents a condition that differs from the typical corner lot scenario the standards are primarily intended to address. Based on the current layout, the 6-foot-tall fence does not appear to create the types of impacts the code is designed to prevent, as it does not obstruct required sight triangles, does not interfere with intersection visibility, and does not negatively affect visibility or access related to adjacent residential properties or public safety considerations.

According to the applicant, the variance is requested to allow the existing 6-foot-tall fence to remain in its current location along the Shady Creek Lane right-of-way. The applicant notes that this condition differs from a typical corner lot scenario because the secondary front yard does not abut another residential property but instead fronts a HOA-owned common area. As a result, the applicant asserts that the fence does not impact adjacent residential properties, does not interfere with intersection visibility or sight triangles, and is screened in part by existing landscaping.

The applicant further states that the fence provides enhanced privacy from vehicles and pedestrians traveling along Shady Creek Lane, as well as an added level of safety and security for a family member with a medical condition residing at the property.

d) *The variance, if granted, is the minimum variance necessary to make possible reasonable use of the land, building or structure.*

Although not the applicant's preference, the property owners could install a fence that complies with the setback requirements of the LDC. Doing so would require removing the existing fence and either replacing it with a 4-foot-tall fence or installing a 6-foot-tall fence in line with the front plane of the house from the Shady Creek Lane right-of-way.

According to the applicant, keeping the existing 6-foot-tall fence in its current location is necessary to allow reasonable use of the property by providing safety

and security for a family member with a medical condition who lives at the home. The applicant states that the fence, as it is currently placed, does not affect neighboring residential properties or block sight lines for drivers or pedestrians in the subdivision.

Staff have confirmed with the Police Department that there have been no reported accidents or safety incidents at the intersection of Shady Creek Lane and Shady Creek related to the fence. In addition, there are existing mature hedges and landscaping outside the fence line that are over 6 feet tall and already block much of the view of the fence. Since landscaping is not regulated in the same way as fence height under the Land Development Code (as long as it does not block sidewalks or roadway visibility), similar landscape would remain even if the fence were reduced to 4 feet.

Based on these conditions, the applicant believes keeping the fence in its current location is the smallest change needed to allow reasonable use of the property while meeting the stated safety and security needs.

e) *Granting of the variance request will not confer on the applicant any special privilege that is denied by the development code to other lands, buildings, or structures in the same zoning district.*

According to the applicant, the subject property is not a typical corner lot. The secondary front yard does not abut or directly adjoin any single-family residential lot but instead borders a HOA-owned common area. As a result, the 6-foot-tall fence does not affect the view, privacy, or enjoyment of any neighboring residential property.

The applicant further notes that this condition differs from most corner lots in residential subdivisions, which typically directly abut other single-family homes along one or more front yard exposures. In this case, there are no adjacent residential lots along the secondary frontage that would experience view obstruction or other impacts from the fence.

In addition, the fence is not located in a position that impacts visibility clearance at the intersection or within required sight triangles, and it does not interfere with the safe movement of vehicles or pedestrians. Based on these conditions, the applicant states that the fence in this location does not create the typical impacts associated with corner lots where fences may directly face or border other homes or obstruct intersection visibility. Accordingly, allowing the 6-foot-tall fence to remain would not provide a special advantage compared to similarly situated properties, since it does not reduce visibility or affect adjacent residential use or safety.

*f)* *The granting of the variance will be in harmony with the general intent and purpose of this code and will not be injurious to the surrounding properties or detrimental to the public welfare.*

The fence requirements in the LDC are intended to protect the health, safety and general welfare of the citizens of the city, and to enhance the appearance, function and livability of the city and improve the overall quality of life within the community. The intent of the city-wide setback requirement for a residential 6-foot-tall fence in a front yard is to ensure fences that abut streets in residential subdivisions with a narrow right-of-way width are set back off the right-of-way line to provide adjacent properties adequate visual sight lines from their home.

The height and location of the proposed fence is inconsistent with other fences in the neighborhood installed consistent with the LDC. There are 12 corner lots in Sawgrass Point subdivision and 3 of them have fences that conform to the fence height/setback requirements of the LDC and the rest have no fence (Figure 3).

The location of the existing 6-foot fence is located outside of the 25-foot visual clearance triangle requirement for intersections of two public roadways. The 25-foot visual triangle is determined by measuring 25-feet along the two intersecting rights-of-way that form the intersection then connecting those two points and measuring. If a variance is approved, the fence is not anticipated to impact visual clearance for vehicles and pedestrians along Shade Creek Lane.

**Figure 3. Corner Lots in Sawgrass Point Subdivision**

The applicant notes that the fence, installed around 2016, has remained in place for nearly 10 years with no known complaints, aside from a single complaint received by Code Enforcement in 2024. Staff have confirmed with the Police Department that there have been no accidents or safety incidents at the intersection of Shady Creek Lane and Shady Creek associated with the fence.

g) *The variance represents a reasonable disposition of a claim brought under the Bert J. Harris Private Property Rights Protection Act, chapter 95-181, Laws of Florida, that a development order of the city has unreasonably burdened the applicant's property, based upon the recommendations of the special master appointed in accordance with the act, or the order of a court as described in the act.*

The variance requested is not based upon a claim brought under the Bert J. Harris Private Property Rights Protection Act.

**PUBLIC NOTICE**

Public Notices regarding the variance were posted in the *News-Journal* and mailed to adjacent property owners and the property was posted with a public notice sign, as required by the LDC. As of April 17, 2026, staff have received two phone calls regarding the proposed variances.

**RECOMMENDATION**

Based on the findings of this report, staff recommends denial of the variance from Chapter 16, Section 3(b)(2)(f) and Section 3(b)(3)(a) of the LDC to allow for a secondary front yard setback of less than 5 feet for the existing 6-foot-tall fence.

However, if the Planning Commission recommends approval of the variance, it should be limited to the existing fence installed within the secondary front yard setback and should not permit any additional fencing within that setback area.

**ATTACHMENT**

Exhibit 1 – Applicant's Request Letter

## Exhibit 1 – Applicant's Request Letter

5968 SHADY CREEK LN
PORT ORANGE, FL 32128

**Proposed Development Variance Description – Fence**

The existing fence was installed approximately in 2015–2016, nearly ten (10) years ago. The fence has remained in place for close to a decade prior to any complaint being received by Code Enforcement regarding its height. During this extended period, there have been no known complaints submitted to the City or the homeowners' association, nor have there been any identified adverse impacts to surrounding properties.

The fence is set back approximately five (5) feet from the right-of-way and does not obstruct or impede visibility at or near the intersection of Shady Creek Lane. To the best of the property owners' knowledge, there have been no traffic incidents, police reports or safety concerns attributable to the presence of the fence.

Although the property is classified as a corner lot, it does not function as a traditional corner lot. The secondary front yard abuts a homeowners' association-owned common area rather than another residential property. As a result, the six (6) foot fence does not negatively affect the visibility, aesthetics, or enjoyment of neighboring residences.

The fence provides practical benefits, including enhanced privacy and reduction of vehicle headlight intrusion into the home during nighttime hours. Additionally, there is an existing hedge and dense landscaping located outside of the fence line that exceeds six (6) feet in height, effectively obscuring the fence from view. If the fence height were reduced to four (4) feet, the hedge would remain, resulting in a similar barrier along Shady Creek Lane.

The primary reason for installing the six (6) foot fence in 2015–2016 relates to the safety and well-being of a family member with a medical condition. The fence serves as a necessary protective measure to prevent unsupervised exit from the enclosed yard area. A four (4) foot fence would not provide adequate containment, as it could be easily climbed or crossed, whereas the six (6) foot fence provides an appropriate level of security while still allowing safe outdoor access. Similar fencing heights are commonly utilized in residential and care settings for individuals with comparable needs.

Based on these factors, the existing fence has functioned without issue for nearly a decade and has not negatively impacted public safety, as demonstrated by its long-standing presence without any incidents. It has also not adversely affected community aesthetics. The variance request is respectfully submitted for consideration.
