- Providing an opportunity to build relationships between both parties
- Delivering invaluable operational and administrative information to all stakeholders
- Discussing forecasting and reviewing the debris management plan

Identifying Equipment Staging Areas

While discussing potential plots to stage equipment, the following should be considered:

- Staging away from residential areas
- Easy access from main right-of-ways
- Sufficient acreage to manage a large number of vehicles
- Fencing around the facility is preferable

DMS Site Selection

Criteria at a minimum will include:

- Public versus private land considerations
- Environmental agency approvals
- Dust and fire mitigation
- Ingress and egress considerations
- Security features
- Storm water controls considerations
- Elevation
- Sound buffers and fencing

Previously Utilized DMS Sites
Parking Lot 7 Debris Staging Area -1 Daytona Blvd, Parking Lot 7
US 92 at Indian River Road Debris Staging Area 3819 West International Speedway Blvd

Identifying Permanent Disposal Facilities, Transfer and Recycling Facilities

DRC has agreements in place with most major disposal and recycling facilities in the area. DRC's management will be responsible for working with the jurisdiction to identify these facilities and to secure favorable terms and conditions with each facility. Additionally, DRC's staff includes Steve Crawford, an expert in recycling, resource recovery, and disposal. With 25 years of experience, Crawford brings expertise and exceptional knowledge to every project.

City Approved Final Disposal Site
4057 Bruner Road, Port Orange, FL 32129
Proposed Final Disposal Site
Volusia County Landfill 1990 Tomoka Farms Road, Port Orange, FL

Establishing Emergency Push Routes & Collection Grids

Collection grids and emergency push routes should include:

- Hospitals
- Police departments
- Emergency shelters
- Nursing homes
- Major traffic routes

RESPOND

- Alert Phase
- Disaster Impact
- Response Timeline
- Initial Damage Assessments
- Emergency PUSH Operations
- Loading and Hauling Operations
- Debris Management Site Operations
- Safety
- Prompt Damage Complaint
- Accounting and Document Management
- Post Event Evaluations

Alert Phase

If a potential disaster can be predicted, DRC will activate the following alert phases:

- 72 hours before impending impact, Jay Gunter will contact the City of Daytona Beach and the City of Port Orange to discuss activation and response
- At the discretion of the Cities, DRC will mobilize personnel within 24 hours prior to disaster impact to arrive at the Emergency Operations Center
- Identification and readiness assessment of subcontractor network for Emergency Push and Load and Haul Operations
- Pre-staging of equipment and personnel as needed to respond to the immediate aftermath of the event "push activities"
- Emergency Push Collection routes have been determined

Disaster Impact

DRC has a unique ability to rapidly **respond** to a disastrous event while maintaining communication with communities to help them **prepare** for any trouble, making us a leader in the disaster **recovery** industry.

Response Timeline

The type, intensity, and duration of each event dictates the response time. Upon receipt of Notice to Proceed or Task Order, DRC will commence mobilization of equipment, operators, and laborers.

DRC is highly capable to meet, sustain, and manage all facets of disaster response, including responding within 24 hours. DRC proposes the following time frames in which services can be provided without unwarranted delay or interference:

Within 24 Hours Post Event

- Project Manager and support are in place and interacting with the City of Daytona Beach and the City of Port Orange's Point of Contact
- Staging and measurement (certification) of equipment is underway
- Permitting and mobilization of DMS sites has begun
- Emergency Push activities are well underway with coordination with utility providers
- Initial Damage Assessment complete
- Public Service Announcements are initiated
- Logistical Support requirements have been assessed
- Initial Safety Meeting is held
- Time and location of daily production meetings is established

Within 48 Hours Post Event

- Initial understanding of crew type and quantity has been established with the Cities' Point of Contact
- Roughly 50 percent of required equipment and manpower are in place
- At least one DMS is operational and load and haul activities can begin
- Discussions have begun with final disposal and recycling/composting providers (if applicable)
- Collection Zones have been mapped and discussed with the Cities' Point of Contact
- Truck certifying continues
- Daily Safety Meetings continue

Within 72 Hours Post Event

- Full Mobilization is complete
- Emergency Push complete (if applicable)
- All contractual requirements (bonds, safety plans, dust control, community outreach, etc.) are submitted
- Productivity assessments made based upon existing travel times and DMS requirements adjusted
- Equipment and personnel needs are reassessed
- Additional local and equal opportunity vendor outreach has begun and those applicants vetted
- Daily productivity meeting continues between DRC, the Cities point of contact and the Monitoring Firm assigned to the project
- Daily Safety Meetings continue

Initial Damage Assessment

Initial damage assessments are usually completed within 36 hours of an incident by local, state, federal, and contractors and provide an indication of the loss and recovery needs. The debris assessment will accomplish all of the following:

- Estimate the quantity and mix of debris
- Estimate damage costs
- Determine impact on critical facilities
- Identify impact on residential and commercial areas

Emergency PUSH Operations

- PUSH routes are predetermined with the help of Cities, who have a clear understanding of geography of the community
- Debris is "pushed" or cleared from the Public Roadway generally in an order of priority established by the City of Daytona Beach and the City of Port Orange
- Crews generally consist of equipment capable of moving heavy material (skid steers, front end loaders etc.) and personnel and supervision with chainsaws
- Attempt to make roadways and intersections as safe as possible for sight and traffic obstructions
- This phase of work is accomplished within the first 70 cumulative hours (plus or minus) after the event

Loading and Hauling Operations

Certification of Equipment

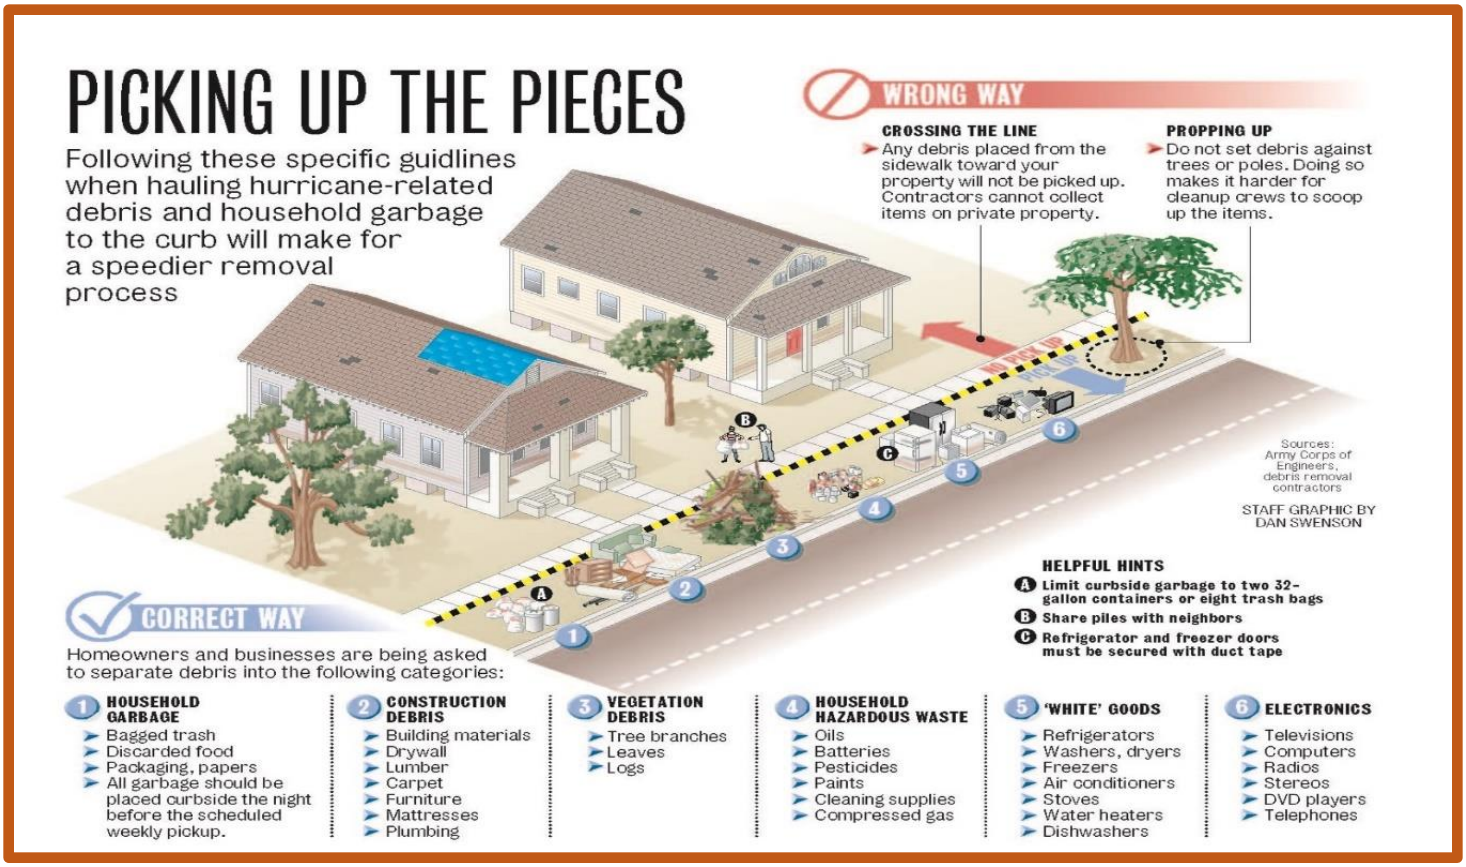
This task can begin as soon as practical but generally 12-24 hours after a Notice to Proceed is issued. In general, trucks are staged at a location where the Cities' third-party monitoring firm can measure load capacity and assign unique identification to each piece of loading and hauling equipment.

Debris Removal from Public Rights of Way

Within 24-48 hours of a Notice to Proceed (or a reasonable amount of time agreed upon by the Cities) DRC will commence debris removal operations with multiple Debris Removal Crews. Debris Removal Crews will many times consist of three to five hauling vehicles of 30 to 150 cubic yard capacity with operators, one front end loader with operator, one foreman, and three laborers/flagmen (when required by traffic conditions). In other instances where conditions allow, self-loading equipment of similar capacity will be utilized to maximize efficiency.

- All field supervisors shall ensure that all debris disposal-hauling operators are licensed and certified to operate required equipment.
- All debris disposal operators will be given area maps designating assignment/authorized areas or zones of operations as well as transport routes designated and/or approved by the Cities.
- As subcontractors complete zones, the areas are jointly surveyed by the City of Daytona Beach and the City of Port Orange or its designated representative and closed out.

Through the installment of PSAs, public participation can enhance the efficiency of the collection/material separation process. A typical flyer which defines material separation:



Multiple Scheduled Passes

In order to allow citizens to return to their properties and bring debris to the right-of-way as recovery progresses, DRC ES adheres to FEMA's guideline of three scheduled collections or passes.

In rare cases, particularly following major flooding, additional collections may be warranted.

Field Operations

All eligible debris will be removed from public easements, property, and rights-of-way to designated Debris Management Site and/or directly to a final disposal site. Eligible debris is generated directly by the event or as a result of the event and is in the public Right of Way; for private property debris to be eligible, Private Property Debris Removal has to be authorized:

The illustration to the right depicts a typical post- disaster scenario that involves construction and demolition debris (C&D). In this case, the public is advised through radio, television, social media, an a graphic such as above to place disaster generated debris to the right of way (ROW) in separate piles by debris type for separate collections.

Vegetative Debris

Vegetative debris is defined as: tree branches, leaves, logs, timber, and stumps.

- Eligibility—Public right of way or improved public property
- Collected from Private property only with FEMA private property debris removal right of entry authority
- Most productive operation combines the collection of leaners and hangers with normal ROW debris collection
- Allows for a wide spectrum of equipment use for productive collection
- Most commonly collected and transported to a Debris Management Site for processing and haul out
- Reduction by grinding provides opportunity for recycling, re-use and consumption as a fuel source
- Reduction by burning provides for the most cost- effective processing, if burning is an option

Construction and Demolition (C & D) Debris

Construction and Demolition (C&D) typically consist of: building materials, drywall, lumber, carpet, furniture, mattresses, and plumbing.

- Generally produced from floods, tidal surge and earthquakes
- Allows for a wide variety of equipment use including self-loading apparatus
- Landfill restrictions on material acceptance should be a consideration and can vary by state
- Utilization of DMS provides opportunity for reduction by material separation and compaction
- Load weight must be monitored particularly upon haul-out to final disposal
- Transportation to final disposal site does not allow for reduction, however is an alternative when travel time is not effected

White Goods

White goods is defined as: refrigerators, washers, dryers, freezers, air conditioners, stoves, water heaters, and dishwashers.

- Separately collected and staged within a designated area at a DMS or hauled directly to a recycler
- Collection can be performed with light duty trucks and trailers typically possessing a lift-gate
- Freon shall be removed by a certified technician under EPA regulations
- Citizens are informed through PSAs , fliers and social media to remove all contents from refrigerators and freezers prior to collection or to duct tape doors shut to facilitate safety and ease of collection
- Refrigerators and freezers collected with contents shall be staged for content removal and disposal

White goods shall be recycled, and any derived proceeds handled in accordance with the con

Household Hazardous Waste

HHW typically consist of oils, batteries, pesticides, paint, cleaning supplies and compressed gas.

- Collected only by trained and certified personnel with proper PPE and typically occurs in advance of load and haul crews
- Collected separately and securely placed in spill-proof containers for transportation to staging at a DMS or direct transport to a qualified recycler/disposal facility
- When stored at a DMS, the area is generally lined or bermed or both depending upon the requirements of the state environmental agency
- Proper packaging and transportation is often performed by the recycler

Electronic Waste Collection (E-Waste)

E-Waste debris includes: televisions, computers, radios, DVD players, telephones, and almost anything with an electric cord

- Collected separately with one or two collections (passes)
- Generally staged in a specific area of a DMS or transported directly to a recycler
- Collected in light duty trucks and trailers by general laborers and a supervisor
- Recycling of the items is always the goal

Tires

Tires often appear on the public ROW for collection following flood events or tidal surge.

- Collection can be accomplished separately using light duty equipment
- Transportation directly to the recycler or shredder is preferred
- Tires create a special problem for landfill operators as they tend to rise or float and can ultimately damage the landfill cap
- Federal/state regulations often require a waste hauler permit during transportation

Private Property Debris Removal

FEMA may extend public assistance to private property debris removal when it poses a threat to the public. Under the request and direction of the City of Daytona Beach and the City of Port Orange or its representative, the contractor will initiate and manage a Right of Entry (ROE) program to remove debris on private property and/or demolish private structures that are a public safety hazard. The property owner must grant access prior to any work, unless there is an immediate threat to the lives, health, and safety to the Cities' citizens.

Hazardous Tree and Limb Removal

A tree is considered "hazardous" if its condition was caused by the disaster and public health and safety are at risk. If possible, leaner and hanger removal will be performed in advance of load and haul activity and collected simultaneously with ROW debris. Eligibility is usually determined by the City of Daytona Beach and the City of Port Orange's independent monitoring firm.

- Equipment may include bucket trucks, automated saw trucks, excavators and climbers with chainsaws
- Criteria to deduce if a leaner or hanger is hazardous is:
  - Must be six inches in diameter or greater when measured at chest height
  - More than 50% of the crown damaged or destroyed
  - Split trunk or broken branches that exposed the heartwood
  - Fallen or uprooted within a public use area
  - Leaning at an angle greater than 30 degrees
  - Hanging limbs must be 2 inches in diameter and must pose a threat of falling into an improved public area or public right-of-way

Removal of Hazardous Stumps

Stump removal usually takes place late in the debris removal process and is generally determined eligible by the City's monitor. A stump may be determined to be hazardous and eligible for Public Assistance grant funding as a per-unit cost for stump removal if it meets all of the following criteria:

- 50 percent or more of the root-ball exposed (less than 50 percent of the root-ball exposed may be flush cut)
- Greater than 24 inches in diameter, as measured 24 inches above the ground
- On improved public property or a public right-of-way
- Poses an immediate threat to life, and public health and safety
- Larger stumps are extracted by excavators and loaded upon flat- bed trailers for transport the DMS or final disposal facility
- Most often, large stumps must be split prior to processing by grinding

Additional debris related collections, operations and projects that may occur during the response or recovery phase include but is not limited to the following:

Canal/Waterway Debris Removal

Canal debris removal is most often performed under the oversight of the State Environmental regulators, especially in environmentally sensitive areas. Environmental factors always take priority when developing an operations plan. Debris often consists of land based and/or water based removal of targets. Collection methods vary widely due to physical dynamics, environmental considerations, regulations, and scope of work, but typical methods are:

- Targets identified by side-scan sonar or below surface observation
- Target removal spans from water-bottom to surface debris or limited to designated depths
- When appropriate, debris can be collected with grapples mounted on different sized barges or even small boats
- Land based operations will consist mostly of removal of targets with long reach excavators equipped with a spoils or dredge bucket
- Temporary Offloading Sites can be used to temporarily stage debris prior to transport to a DMS for processing or to final disposal
- When abundant access points exist, loading can occur directly into trucks for transport to processing or disposal

Vehicle and Vessel Removal

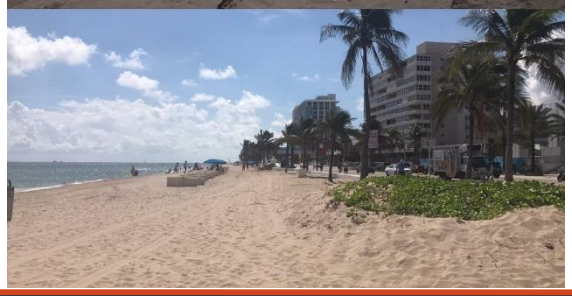
DRC has extensive experience performing large scale vehicle and vessel removal and recovery projects. A single project for the State of Louisiana following Hurricanes Katrina and Rita involved the recovery and management of thousands of vehicles and vessels. The components of these projects vary from State to State due to legal requirements; but in the case of this operation, the scope of work will develop according to the direction of the City of Daytona Beach and the City of Port Orange. Commonly used procedures are:

- Generally, aggregation sites are activated for storage, processing, recordation and access
- For land based recovery, vehicles and vessels are tagged and recorded prior to recovery
- For water based vessel recovery, eligible targets are located and recorded prior to recovery
- Initial notification to owner is sent from VIN information gathered in the field using State Police database (Cities specific)
- Vehicles and vessels are aggregated on one or more sites and gridded for easy access
- Fluids are removed from each unit within the aggregation site
- Additional notifications are sent to owners using certified mail (if required)
- Private insurance companies are allowed to view and access units
- Vessels and vehicles can be retrieved by owner/insurance or destroyed/recycled
- Vehicles that have not been retrieved are crushed and recycled
- Scrap value proceeds (if any) are disbursed according to the contract

Sand, Soil Recovery, Beach Restoration

Many jurisdictions are faced with damaged coastal areas and habitats that may require immediate recovery restoration. DRC has performed these sensitive and precise projects for decades. Permitting requirements will vary by jurisdiction. Typically multiple agencies are involved in beach projects. Recovery from public or private property will require Right of Entry (ROE) authority.

- Typical operating procedure calls for temporary staging site(s) used for storage and processing
  - Processing sand on the beach is a preferred method
  - Soils can sometimes be processed within an established DMS
- Displaced material can be recovered from adjacent property by the use of skid steers and front-end loaders
- Beach rakes are an effective tool for recovering hidden and surface debris from beach-fronts
- Debris collected from processing is usually taken to an operating debris DMS for reduction and haul-out to final disposal
- Quantities are generally measured by loader bucket size as the material is loaded to be screened
- Screening of sand and soils using shaker screens and trammels is a preferred procedure
- Production rates generally range between 100 to 200 processed cubic yards per hour
- Stockpiled and processed (clean) material can be returned to its original location
- Beach contours can be re-created by following engineered plan



Expertise in the Removal of Dead Animals and Putrescent Disposal

Improper disposal of animal carcasses can contaminate drinking water sources or spread disease. It is DRC's policy to handle and dispose of animal remains with care and in accordance with all state and local regulations.

If possible, all identified carcasses should be disposed of within 48 hours of death. There are several approved methods for the disposal of animal carcasses:

- **Incineration** at a secure and pre-approved site.
- **Deposition** in a contained landfill approved for remains disposal.
- **Composting**, with approval, is a sanitary and practical method of carcass disposal.

Demolition

DRC employs many experienced supervisors, project managers, operators, and other technicians, many of whom have many years of experience in the demolition field. Demolition projects will be staffed with a Superintendent to oversee daily operations and a Project Manager responsible for subcontractor relations, schedule maintenance, and coordination with the Cities.

All demolition operations will be conducted in a safe, environmentally responsible manner, in accordance with the requirements of the local government. Operations will proceed with the disconnection of utilities to all structures. The structures will then be demolished to the slab on grade level. Structures will be removed completely prior to the removal of any street or curb improvements, so that a clean and durable means of ingress and egress can be maintained during demolition operations. Slabs on grade will be excavated and removed. Once a structure has been completely removed, the area will be stabilized using the best management practices (DMP).

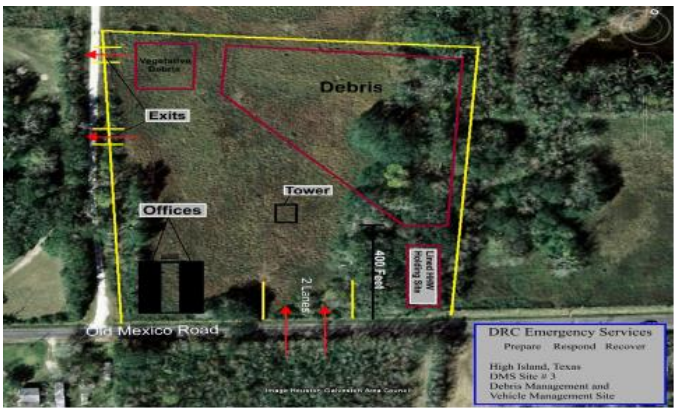
Existing structures will be demolished using conventional construction equipment such as excavators, track loaders and bull dozers. Concrete slabs will be excavated using track type excavators and hammers (if necessary) and will then be crushed on site using portable concrete crushing technology. Debris and recycled materials will be removed from the site using dump trucks.

Debris Management Site Operations

Permitting and Site Mobilization

Within 24 hours of a notice to proceed, mobilization to pre-established DMS locations will begin:

- Phase One—environmental audit is performed
- The number of DMS sites to be used is determined by estimated volumes, travel times, traffic patterns and material to be processed
- Ideally, site placement and number should facilitate a minimum of five loads per truck per day
- Land Use Agreements are immediately executed with any private land owners
- For those sites not already permitted, an immediate permitting request will be submitted by DRC's Vice President of Administration and Compliance (Kristy Fuentes)
- DMS Site Plan is established and submitted



Environmental Considerations

- Where practical, a phase one environmental assessment should be performed prior to use as a DMS
- Soil samples are taken prior to use
- Pictures and video of the site prior to use is considered a best management practice
- DRC may use drone photography before and after use as a best management practice
- An independent engineer is often used to satisfy additional requirements of State regulators such as the need for SWPPP, perimeter silt fencing, air monitoring etc.

Typical On-site Equipment, Supplies and Manpower Needs

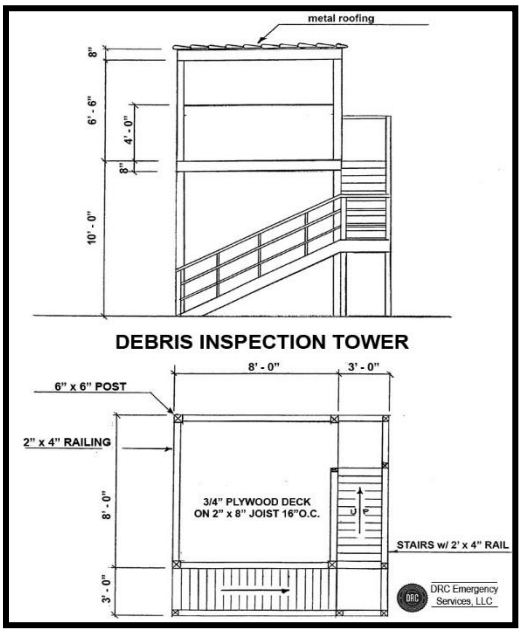
Signage	Inspection Tower(s)
Perimeter Fencing (if required)	Site Manager
Equipment Operators	Traffic Control Personnel
Security Personnel	Traffic Control devices
Front-end loader with thumb	Bulldozer
Grinder- horizontal or Tub	Excavator
Water Truck	Sweeper

Air curtain Incinerator or above ground incinerator (if required)

Site Access

For the success of site access, separate points of ingress and egress should be established if possible and avoidance of truck traffic through residential areas is ultimately important.

- **Traffic Controls** - Traffic control personnel, with appropriate traffic control safety equipment, will be stationed at the ingress observation tower to maintain vehicular traffic control. Additional traffic control personnel can be stationed throughout the site, as needed, to enforce proper traffic flow.
- **Inspection Towers** - Inspection towers shall be constructed to facilitate observation and quantification of debris hauled for storage at debris staging sites. Ideally two inspections towers should be utilized at each DMS if volume warrants. One tower at point of ingress for use by the monitoring firm's employee, one tower at the point of egress to ensure all debris hauling trucks are in fact empty upon leaving the site. One tower may be utilized if ingress and egress point is the same. Additionally, the use of all terrain man lifts are sometimes substituted for the tower shown.



Maintenance and Grading - Maintenance and grading of the debris management site will occur throughout the operating day. Access roads will be constantly maintained, and dust control managed by use of a water truck. Access roads will be swept as often as necessary.

Debris Storage Area

Debris may be segregated into five main areas as determined by the type of event.

Vegetative debris—Vegetative debris will be cleaned of C&D debris to the extent possible to facilitate compliance with requirements for reduction of vegetative debris and processing of C&D.

Construction and Demolition (C&D) Debris—Stored separately within an area that will facilitate separation, compaction or grinding.

Recyclables/Salvage—Recyclable/salvageable materials will be stock piled in accordance with the site plan.

White goods—White goods will be stock piled in a contained area in accordance with the site plan if not transported directly to the recycler.

Household Hazardous Waste (HHW)—HHW will be segregated and stored in an approved containment area that may be lined and bermed.

Debris Reduction Methods

Grinding and/or Chipping Operations—Primarily used for reducing vegetative debris to achieve a 4 to 1 reduction or better. Resulting product is beneficial for use as fuel or reused as compost. The method is less often used as a reduction method for Construction and Demolition material due to its impact on equipment.

- Reduction by grinding provides opportunity for recycling, re-use and consumption as a fuel source

Burning—Environmental impact and safety are primary considerations. Most often allowed in rural settings, it's the most efficient reduction method for vegetative debris as a 95% reduction can be achieved. Air curtain incineration and trench burning can serve to mitigate the release of smoke etc.

- Reduction by burning provides for the most cost- effective processing, if burning is an option

Compaction—The most acceptable reduction method for construction and demolition debris when combined with recycling; a 2 to 1 reduction ratio is most often achieved.

Final Debris Disposal

Selection of final disposal location(s) for processed debris is normally determined during the planning phase. Per Subtitle D, lined sites are generally selected. However, in some cases, permitted construction and demolition sites are used when regulations allow.

Recycling Strategies

Vegetative Debris—Available to serve as a viable fuel source for manufacturing, etc. and used frequently as mulch for agricultural purposes. The resulting product is donated to citizens for use in flower beds and gardens and can be used as alternative daily cover in landfills when allowed. Additional uses are to use as roadbed for temporary roads and can be thinly spread across acreage to produce dirt.

Aggregates—Concrete, brick, and similar materials can be crushed and used as fill material, road base, etc.

Construction and Demolition Debris—Wood, metals, plastics and sometimes gypsum can be pulled from the waste stream and recycled if sufficient quantities exist and recycling facilities are available and accessible.

White Goods— Easy to recycle due to abundant processors.

Electronic Waste (E-Waste)—While these components are quite abundant, particularly following a flood or tidal surge, recyclers of these items have become more difficult to find. Some of the components found in televisions, computer monitors, copy machines etc. contain heavy metals making disposal a poor option, resulting in markets being the best option. Shipping to foreign markets is sometimes the best option.

"This debris removal project has been a resounding success, and the GLO appreciates the many hours of hard work put in by the DRC team."

— Benjamin K. Au Architect, Director of Construction Services GLO, Texas

Debris Management Site Closeout

Restoration is conducted during the close out phase of each DMS. The scope of restoration is determined by post use site conditions, terms of the land lease, or the Cities directive and mutual understanding when public property is used. Restoration can consist of final removal of all debris and other managed components as well as all structures and temporary features. Additionally, grading and leveling, removal of temporary roads and fencing, and grassing or seeding of the site to documented pre-use condition may be necessary.

Post use drone footage and still photography shall be taken to illustrate the current condition of the site as it compares to the baseline or pre-use documentation. Environmental sampling that mirrors pre-use sampling is a best management practice.

- Random soil samples, surface and if necessary water samples, may be taken and sealed in containers for comparison with pre-use samples taken
- Independent third- party engineers and testing labs may be used
- Post use samples and pre-use samples may be tested in an independent lab to determine the presence of contaminants

Final Inspection, Released and Acceptance of the City of Daytona Beach and the City of Port Orange and/or Landowner

In most cases, final closure approval is needed by both the State Environmental Agency and the property owner.

Safety

DRC maintains an unwavering commitment to the health and safety of our employees, subcontractors, customers, and the communities that we service.

Safety comes before profit and productivity.

Our goal is to ensure that all projects operate under the safest possible conditions and as such, DRC maintains a robust in-house safety program. Headed by a dedicated team of Project Managers and Regional Managers, DRC's programs and practices include:

- Morning project safety toolbox meetings
- Weekly "better ideas for improvement" meetings
- Weekly formal safety meetings
- Constant safety training certifications
- Safety recognition through our "challenge coin" award program

DRC follows all OSHA regulations and other federal and state agency guidelines when conducting an operation. DRC's Corporate Safety Plan includes Safety Plans and Policies, an Accident Prevention Plan and a Substance Abuse Policy. It is the policy of this organization to provide and maintain work environments and procedures which will:

1. Safeguard public and Government personnel, property, materials, supplies, and equipment exposed to contractor operations and activities;
2. Avoid interruptions of Government operations and delays in project completion dates; and
3. Control costs in the performance of this contract.

Training programs include:
Smith System Driver Training
Hazardous Materials Training
Demolition Safety
Asbestos Abatement Training
Power Line Awareness
Hazardous Communication
Lockout/Tagout
Fire Prevention Training
Environmental Management Planning

Operational safety, health, and accident prevention measures will be in effect and reinforced daily by all active personnel. These measures and procedures will be reiterated weekly during planning meetings, or as needed.

Immediate action will be taken to correct any safety deficiency while maintaining the utmost respect for all members of our workforce. All actions will be documented and the safety of citizens will be considered vital.

Prompt Damage Complaint

- DRC maintains a damage hotline (888-721-4DRC) for all projects. A complaint manager is assigned to the project and is responsible for tracking all damage and repair.
- DRC will investigate all damages and complaints within 24 hours and will propose a resolution to the damaged party within 48 hours.

Accounting and Document Management

DRC's invoicing procedure is as follows:

- Load tickets are received, logged, and then scanned into DRC's database system. Tickets are then entered and audited for accuracy.
- Invoice is worked up along with the ticket data backup.
- The reconciliation process then takes place with either the Monitoring Firm or the reconciliation contact with the Cities (if there isn't a Monitoring Firm).
- Once the invoice and ticket data has been 100% reconciled, the Monitoring Firm, or the reconciliation contact with the jurisdiction, then recommends the invoice to FEMA for payment.
- Frequency: The invoicing is usually done on a weekly basis

DRC maintains a fully-staffed, fully operational Data Center at its headquarters all year. The Data Center is staffed by experienced and professional personnel with extensive knowledge of recording, reporting, contract, and reimbursement requirements. The Data Center is equipped with state-of-the-art information technology and is prepared to meet and exceed the reporting requirements of each client. All servers and networked computers are backed up both on and off-site every day. The emergency nature of DRC's work requires that the Company remain on-line and in contact across its network at all time.

Please see sample load tickets attached.

Post Event Evaluations

Hot Wash Meetings

DRC holds a Hot Wash with each jurisdiction post event. A Hot Wash is an after-action evaluation that occurs between DRC and the client. This post activation meeting serves as a forum for the client to discuss the project as a whole, the processes that were implemented, and any potential improvements. Additionally, DRC has an internal meeting to discuss development strategies and innovative concepts for future activations.

Subcontractor Evaluation

DRC has a large network of subcontractors and maintains long standing relationships with trained and exclusively committed key subcontractors. Additionally, DRC strongly believes the use of local resources is vitally important to a successful disaster recovery operation. For decades, DRC has been building relationships with subcontractors across the nation. DRC utilizes a 55-point Post Event Subcontractor Evaluation Form to aid in building our reliable network of subcontractors.

RECOVER

Prepare → Respond → **Recover**

- *Demolition*
- *Man Camp Services*
- *Post Disaster Temporary Housing*
- *Marine Services*

Many of the elements of work shown above can be categorized as a recovery functions, although some, if not all, could be performed simultaneously with the debris mission. Of those listed above, marine debris removal, marine salvage, and beach restoration have been previously addressed under the Response phase of operations.

Effective recovery requires a comprehensive effort of all phases that enable logical and efficient execution. The subsequent functions outlined below are all steps in a model that must be executed intelligently and with real-world experience. DRC Emergency Services, LLC, SLS, and Callan Marine comprise a core of companies under single ownership that excel at providing a turn-key approach to total disaster management. We stand alone in the industry as the only provider of these services.

SLS

DRC's sister Company, SLS, is a prominent post disaster Temporary Housing provider. From turnkey temporary trailer facilities to massive man camps designed to house and feed thousands, SLS has designed and performed most all post disaster applications.

SLS pioneered the current FEMA S.T.E.P. program during the aftermath of Hurricane Sandy in New York. The Program in New York was called "Rapid Repair" and a similar program in Baton Rouge was called "Shelter at Home". These programs are designed to perform essential elements of restoring damaged single- family residences and return homeowners back into their homes quickly. As an additional positive result, the cost of the typical S.T.E.P. program is approximately 20% the cost of placing a displaced Family into a trailer or similar structure. Rapidly returning displaced families to their homes provides a sense of community and normalcy to the affected citizens.

SLS is composed of four major divisions: RESPONSE, HEALTH, FEDERAL SERVICES and HOUSING.

Each division is distinct in focus, scope and services provided, but seamlessly utilizes a pool of leadership, talent, resources and financial capabilities. With this industry collaboration, SLS is able to successfully execute any assignment they undertake. Their experience and qualifications, bolstered by the capabilities of our highly experienced team, allow us to offer unparalleled service to our clients.

CALLAN MARINE

DRC's sister Company, Callan Marine is a highly-specialized construction firm capable of providing, design, engineering, management and construction services such as:

- Marine debris management and removal
- Offshore and inland dredging
- Shoreline protection
- Beach re-nourishment
- Port/Dock facility construction
- Wetlands construction
- Marine protection mitigation and improvements

For over ten years, Callan Marine has been serving public and private clients by providing crucial dredging services and executing new maritime construction and expansion projects. We restore berthing depths for ship docks and navigation channels, facilitating transportation in our nation's waterways.

With a mission of safety, quality, and integrity, Callan Marine can customize a response solution for you.

Callan Marine has dredged thousands of miles of waterway in the Gulf Coast region to keep our customers productive.

Re: Letter of Recommendation

To Whom It May Concern,

Please let this serve as a letter of recommendation for DRC Emergency Services, LLC. For the past eight years, St. Bernard Parish Government (SBPG) has worked hand in hand with the DRC team through various challenges - including hurricanes and tornadoes. We have continuously received excellent service throughout these events, as well as normal operations. DRC has proven to be a reliable partner with an inherent understanding of our mission "to protect and enhance the quality of life by providing a high level of service in an efficient and responsive manner for all citizens." Many of DRC's personnel grew up in St. Bernard Parish and still reside in our community. For them, our mission isn't just close to home – it is home.

Over the past four years, we have activated our contract with DRC four times in the wake of Hurricane Zeta, Hurricane Ida, and two tornadoes. Each time, DRC was highly responsive and mobilized equipment and personnel immediately following these disaster events. DRC's ability to efficiently and effectively problem solve under pressure is unparalleled. Additionally, DRC's management personnel were in constant contact, keeping SBPG officials informed and up to date on the project underway. No matter the day or time, when we called, DRC answered.

Not only did DRC Emergency Services deliver on all of their contractual agreements, they also honored verbal commitments that were made to assist SBPG in delivering the highest quality service to our residents.

I would strongly consider choosing DRC Emergency Services as your disaster response contractor. Their professionalism, integrity, accountability, work ethic, and responsiveness are second to none. We've experienced excellence from DRC for the services rendered to St. Bernard. If you have any questions, please feel free to reach out.

Sincerely,

Ronald J. Alonzo, Jr.

March 23, 2023

Dear Sir/Madam,

It is my pleasure to recommend DRC Emergency Services, LLC as a disaster response contractor. As the Parish President, I had the privilege of working with DRC on multiple occasions. When Hurricane Ida, a Category 4 storm, made landfall in Southeast Louisiana, DRC was already in the process of procuring and staging assets to aid in our recovery efforts.

DRC worked closely with Parish personnel to assess damage, establish collection grids, permit emergency debris management sites, and determine the scope of work based on disaster impact. They provided ROW debris removal, waterway debris removal, and logistics services simultaneously, which helped immensely during this difficult time. Moreover, DRC provided essential items such as pallets of water, toiletries, restroom/showers, fuel, and a 100-person emergency shelter which housed National Guard and St. Charles Parish employees. Through their logistic services, DRC gave hope to the community during a time of great need.

Over the past decade, St. Charles Parish has had the opportunity to work with DRC Emergency Services on multiple emergencies, including major hurricanes, a tornado, and a devastating flood from torrential rainfall. DRC has removed and disposed of over 1,443,000 cubic yards of debris in St. Charles Parish, demonstrating their commitment to serving the community. Through all of this, DRC has demonstrated their integrity and resilience in the face of disaster.

Based on my experience, I wholeheartedly endorse DRC Emergency Services, LLC as a disaster response contractor. Their dedication and expertise are unparalleled, and I am confident that they will provide exceptional service to any organization that requires their assistance.

Sincerely,

Matthew L. Jewell

RE: Letter of Reference

It is with great pleasure that I write this letter of reference for SLSO/DRC Emergency Services. I had the opportunity to work with them on the Hurricane Michael disaster in Jackson County, Florida.

When Hurricane Michael hit the Florida Panhandle on Oct. 10, 2018, SLSCO/DRC had employees in our county ready to help. They have proven to be very knowledgeable about the process of debris removal, the regulations and requirements of the state and FEMA.

I would gladly recommend SLSCO/DRC for all your emergency service needs. After the massive cleanup that occurred in our county, our existing contracts were up. We went back out for bid and SLSCO/DRC was selected again because of their excellent performance.

Sincerely,

Clint Pate

AVAILABILITY OF FIRM'S RESOURCES

Availability of Key Personnel

Since its inception, the DRC team has responded to major natural or man-made disasters occurring within the continental United States and its territories. The DRC personnel are trained, motivated and available for immediate deployment in an emergency response. All assigned personnel will be available to the City as needed. Personnel are N.I.M.S-certified and/or have specialized training in safety and asbestos management and are equipped with utility vehicles, digital, handheld, multi-state, two-way radios, cellular communications, and handheld computers. DRC personnel will have the experience and/or training to respond **immediately** to disasters and are provided with a DRC ES supervisor handbook including required reports and forms for successful disaster response and management thereof.

> "DRC's knowledge base, experience, and ability to make experts available in the field were instrumental in the successful completion of this work."
>
> **– Donald G. Donaldson, P.E., Engineering Director/County Engineer, Martin County, FL**

Regional Managers are assigned to specific geographic locations throughout the United States to assist, monitor and lead the project teams in response to emergency situations. Regional Managers from one region may be assigned to support other Regional Managers as needed and all Regional Managers may be mobilized to one location to support emergency situations. Regional Manager for the City of Daytona and the City of Port Orange is Jay Gunter who is capable of responding to the needs of the City 24 hours a day, 7 days a week.

Available Equipment

DRC will use owned equipment, subcontractor equipment, or lease/rent equipment based upon the disaster scenario. DRC has the most expansive collection of rolling stock and equipment in the disaster services industry. The company has 2,568 trucks and 1,657 pieces of support equipment, either owned or under agreement, available for immediate use. As part of the company's Corporate Mobilization Plan, a monthly inventory of available equipment is performed, recorded, and readily available. DRC has actively demonstrated the ability to quickly amass and mobilize significant quantities of equipment. **During the 2021 hurricane season, DRC operated in excess of 4,000 pieces of equipment simultaneously while responding to Hurricane Ida.**

Additionally, DRC has Master Service Agreements in place with national equipment suppliers, such as Hertz, United, Caterpillar, and William Scotsman, to supplement our equipment needs.

Process for Managing Multiple Contracts

DRC has experience staffing, managing, and executing multiple debris management and emergency response projects nationwide. Our management approach is grounded in using highly qualified operational management teams coupled with area/sector/site managers, who provide strong management control, and a single point of contact for communication, responsibility, and accountability. DRC empowers managers to reassign resources as needed and to resolve project, cost, or schedule issues at the lowest possible level. DRC's management staff is provided state-of-the-art resource planning and forecasting systems.

DRC's process for managing multiple task orders has been successfully applied to more than 650 projects over the course of multiple events. Highlights of this proven management process include:

- ✓ *Assigning a Program Manager with the authority to commit resources to ensure proper levels of staffing*
- ✓ *Conducting quarterly meetings with clients, DRC's Program Manager, and other key staff, to review active task orders and overall implementation of the contract*
- ✓ *Providing autonomous decision-making authority to the Operations Manager at the task order execution level to avoid delays*
- ✓ *Developing a Communication Plan to clarify roles and responsibilities, identify all project stakeholders, provide a set format/time for communications, and clearly show the chain of command structure*
- ✓ *Allowing for consistency across multiple task orders through the use of proven project management and field activity control policies, plans, systems, and procedures*
- ✓ *Identifying critical schedule and quality impacts by holding monthly project review meetings with key subcontractors*
- ✓ *Developing look-ahead schedules that indicate resource requirements*

Experience Managing Multiple Contracts

DRC has implemented a comprehensive Corporate Level Advance Mobilization Plan to ensure a coordinated, expeditious and effective response to disasters by its personnel and resources. This plan has been utilized by DRC to respond quickly in the following contracts:

2022 Hurricane Ian

- DRC was activated in 16 jurisdictions, managed 16 DMS sites, and removed and disposed of over 3,200,000 cubic yards of debris.

2021 Hurricane Ida

- DRC was activated in 25 jurisdictions, managed 82 DMS sites, and removed and disposed of over 17,000,000 cubic yards of debris.

2020 Hurricane Season

- DRC was activated in 45 jurisdictions, managed 81 temporary staging and reduction sites, and removed and disposed over 5,900,000 cubic yards of debris.

2019 Storm Season

- DRC was activated in 14 jurisdictions in the Gulf Coast region as Hurricanes Barry, Dorian, and Tropical Storm Imelda hit the coast back-to-back over two months. DRC operated and managed 5 temporary staging and reduction sites in total and removed approximately 140,562 cubic yards of debris.

2018 Hurricane Michael

- DRC was active in 9 jurisdictions, managed 27 debris management sites and removed approximately 5,702,004 cubic yards of debris.

2018 Hurricane Florence

- DRC was concurrently activated in 14 jurisdictions, managed 18 temporary staging and reduction sites and picked up approximately 2,500,000 cubic yards of debris.

2017 Hurricane Maria

- DRC was activated by the Department of Transportation and Public Works in Puerto Rico. During this contract, DRC managed 8 temporary staging and reduction sites and removed over 1,000,000 cubic yards of debris.

2017 Hurricane Irma

- DRC was activated in 26 jurisdictions simultaneously while managing 30 temporary staging and reduction sites. DRC removed and disposed of over 2,000,000 cubic yards of debris.

2017 Hurricane Harvey

- DRC was activated in 17 jurisdictions following Hurricane Harvey and simultaneously ran more than 16 temporary staging and reduction sites during this activation.
- DRC recovered and reduced over 3,500,000 cubic yards during this activation.

2016 Hurricane Hermine

- In Citrus County, Florida, DRC successfully removed and disposed of more than a thousand tons of residential flood debris and tens of thousands of cubic yards of vegetation in less than 30 days.

2016 Louisiana Severe Flooding DR4277

- DRC picked up 1,000,000 cubic yards of debris over the course of 30 days in East Baton Rouge Parish, Louisiana.
- DRC opened and operated two temporary staging and reduction sites to compact and recycle C&D debris prior to haul out for final disposal. These sites operated with such efficiency that FEMA and the USACE filmed the operation to use in training sessions.

Winter Storm Jonas 2016

- The snow from Winter Storm Jonas started the morning of January 22nd and by the evening DRC had started mobilizing in 5 different jurisdictions. Operations continued 24 hours a day and required two operators per piece of equipment, around the clock management and support personnel. The project was completed in 10 days.

Re: DRC Emergency Services, LLC
Project: Request for Proposal #2348RFP – Disaster Debris Removal Services – Joint Procurement (on behalf of The City of Daytona Beach and the City of Port Orange)

Dear Ms. Prevatt:

Travelers Casualty and Surety Company of America (Travelers) has issued surety bonds for DRC Emergency Services, LLC (DRC). In this capacity we have become very familiar with their management, financial and performance capabilities. Through Travelers, we have established a bonding program with a single project limit of $500,000,000 as long as these projects fit within an aggregate program of $1 Billion. DRC has current available bonding capacity of $500,000 for each event and the ability to increase their bonding capacity if necessary. Travelers is currently listed on the U.S. Department of the Treasury's Listing of Certified Companies and is currently rated A++ (Superior) with a Financial Size Category of XV by A. M. Best. Travelers is authorized to do business in Florida.

It is our understanding that DRC Emergency Services, LLC intends to submit a proposal to you. Based on the bonding requirements in this Request for Proposal, Travelers is agreeable to issue the performance and payment bonds, on behalf of DRC, upon issuance of a valid Contract/Task Order/Notice to Proceed, as required by contract, subject to Traveler's acceptable review of contract terms, contract amount, bond forms, and financing and other pertinent underwriting information at the time the bonds are requested. Please understand that any arrangement for any bonds is a matter between DRC and Travelers. We assume no liability to third parties or you if, for any reason, we do not issue requested bonds.

Our experience with DRC has been excellent, and we highly recommend them to you.

Sincerely,

Andrew P. Kratzer
Associate Account Executive

FIVE YEAR LITIGATION AND REGULATORY LIST

(Updated and Revised: June 30, 2023)

The following is a list of any litigation involving DRC Emergency Services, LLC ("DRC") pending, settled, dismissed or abandoned during the five-year period commencing June 30, 2018 and ending June 30, 2023.

ACTIVE PENDING CASES:

Nelson v. RPF Emer. Servs., et al, No. 20-900353, Cir. Ct. Baldwin County, AL. Terminated sub-subcontractor sued DRC and its President seeking damages for termination from the project. Claim unquantified. No liability for DRC or its President; no contract privity.

Fucich v. Great Divide Ins. Co., et al, No. 136124, 16th JDC, Iberia Parish, LA. Automobile accident personal injury claim. Unquantified Claims being handled through insurers.

Fuxench, et al v. Puerto Rico Dept. of Recreation & Sports, No. 20-3148, Puerto Rico Bayomon High Court. Claim against the Puerto Rico Dept. of Recreation & Sports to enjoin it from performing post-hurricane tree and limb removal in a park.

Lambert v. DRC Emergency Services, LLC, et al, 24th Judicial District Court for Jefferson

Parish Louisiana, Civil Action No. 702311. BP Oil Spill personal injury claim. DRC is being indemnified by BP.

Fitzgerald v. DRC Emergency Services, LLC, et al, United States District Court for the Eastern District of Louisiana, Civil Action No. 13-650. BP Oil Spill personal injury claim. DRC is being indemnified by BP.

Brown v. DRC Emergency Services, LLC, United States District Court for the Eastern District of Louisiana, Civil Action No. 12-2333. BP Oil Spill personal injury claim. DRC entitled to indemnity from BP.

Payton v. Progressive Ins., et al, No. C-92655, 10th JDC, Natchitoches Parish, LA. Automobile accident involving lower-tier subcontractor. Insured claim

White v. Florida Dept. of Env'l Protection, et al, #20-1558, 2nd Cir. Leon County. Personal injury action arising from debris management site operations. Insured claim.

Goldman v. DRC Emer. Servs, LLC, et al, #22-900011, Washington County, AL Cir. Ct., Personal injury claim arising from automobile accident. Plaintiff rear-ended debris truck.

DRC, Inc. v. DRC Emer. Srvs., LLC, #22-901120, Mobile County, AL Cir. Ct. Tradename dispute. Matter pending.

Dansby v. First Call Storm Removal, LLC, #22-900074, Marengo Co., AL Circuit Court. Personal injury arising from an automobile accident during debris removal operations.

ABANDONED CASES:

Gulf State Construction v. DRC Emergency Services, LLC, Civil Action No. 2012-10783, Orleans Parish Civil District Court. Pro se lawsuit by a subcontractor seeking $180,000 payment for site work and demolition work on the Orleans Parish Sheriff's Office construction project. DRCES disputes plaintiff's claims on several procedural and substantive grounds: (1) Gulf States had no Louisiana contractor's license and, therefore, the subcontract is unenforceable as a matter of law; (2) Gulf States performed only minimal site work for which it was paid; (3) Gulf States was paid for mobilization but only mobilized three pieces of equipment to the job site and, therefore, could not execute the site work. No action has been taken in this matter for over four years.

Down South Services, LLC v. DRC Emergency Services, LLC, Case No. 59-035, 25th Judicial District Court for Plaquemines Parish, Louisiana. Claim by equipment supplier in connection with the BP oil spill project. DRCES disputed plaintiff's claim and tendered 68% of plaintiff's demand pending further backup detail from plaintiff. No backup detail was provided. The lawsuit is open but plaintiff has abandoned the claim under Louisiana law having taken no step in the litigation since 2011.

American Amphibious Equipment and Rental, Inc. v. Brookhaven Maintenance South Contract Corp., et al, Case No. 55-252, 25th Judicial District Court for Plaquemines Parish, Louisiana. Collection claim by an equipment supplier to a lower-tier subcontractor on the Hurricane Katrina project. On April 13, 2009, one of the lower-tier subcontractors filed for Chapter 11 bankruptcy relief (USDC SD Miss. Case No. 09-50745) and the instant lawsuit was stayed. The Chapter 11 reorganization proceeding was converted to a Chapter 7 liquidation on July 23, 2009. The plaintiff in the instant case did not seek to lift the bankruptcy stay and did not otherwise take any steps in the instant litigation since 2009. The instant matter, therefore, has been abandoned under Louisiana law.

Baudier v. DRC Emergency Services, LLC, et al., 24th Judicial District Court for Jefferson

Parish Louisiana, Civil Action No. 703-286. BP Oil spill personal injury claim. Abandoned.

Turlich v. DRC Emergency Services, LLC, et al., 25th Judicial District Court for Plaquemines Parish Louisiana, Civil Action No. 59-076. BP Oil spill personal injury claim. Abandoned.

Frelich v. DRC Emergency Services, LLC, et al., 25th Judicial District Court for Plaquemines Parish Louisiana, Civil Action No. 59-616. BP Oil spill personal injury claim. Abandoned.

DISMISSED, SETTLED OR CLOSED CASES:

Contreras v. Terrence, et al, No. 18-3519, 134th Dist. Court, Dallas County, TX. Claim by a fourth tier subcontractor for payment. The lawsuit states damages are between $50,000 and $200,000. DRC dismissed from lawsuit on summary judgment on August 12, 2022.

Lewis v. Ft. Lauderdale, #19-2090, 17th JC Broward Co. Personal injury. Resident tripped on defect in sidewalk. DRC proved defect existed prior to work performed by DRC in the area. Plaintiff agreed to voluntarily dismiss DRC.

Hershewe v. DRC Emer. Services, LLC, Case N0. 17-181, Jasper County, MO. Suit for an accounting and claim for payment by an attorney arising out of the Joplin, MO tornado project. Suit dismissed for lack of prosecution.

B&S Equipment v. DRC Emergency Services, LLC, et al, Case No. 708-443, 24th Judicial District Court for Jefferson Parish, Louisiana. Claim by lower-tier sub-subcontractor for unpaid work. Hurricane Katrina project. Case settled on July 3, 2014.

Ultra Lane, Ltd. v. DRC, et al, No. 17-430, USDC MDLA Suit by Ultra Lane against lower-tier sub-subcontractor for payment. Plaintiff voluntarily dismissed DRC from litigation.

Infinity Trucking v. Cahaba Disaster Recovery, et al, USDC EDLA, Case 18-1700. $94,000 claim by lower tier subcontractor on a demolition project. Claim is disputed by DRC based on no contract privity. Settled and dismissed December 10, 2018.

IceX Systems Management, LLC v. DRC Emer. Servs., No. C-201885406, 15th JDC, Lafayette Parish, LA. Claim by equipment lessor for rental. DRC contended that equipment was removed from project by plaintiff. Investigation confirmed that the equipment was removed by plaintiff and that DRC overpaid plaintiff. Plaintiff voluntarily dismissed the lawsuit July 22, 2020.

Yester Avila, et al. vs. SLSCO, Ltd., et al., No.18-cv-00426, USDC SDTX. Class action wage underpayment claim on a project in which DRC had no involvement. Plaintiffs voluntarily dismissed DRC from the lawsuit on July 1, 2019.

Dermansky v. DRC Emer. Servs., No. 20-1803, USDC SDTX. Copyright claim. Photograph use. Settled and dismissed November 19, 2020.

Luke Boudreaux v. The DRC Group, et al, United States District Court for the Eastern District of Louisiana, Civil Action No. 11-03179. BP Oil Spill injury claim. Dismissed June 19, 2020.

Matherne Business Associates v. DRC Emergency Services, LLC, United States District Court for the Eastern District of Louisiana, Civil Action No. 11-449. BP Oil Spill injury claim. Dismissed June 18, 2020.

Rodrigue Business Associates v. DRC Emergency Services, LLC, United States District Court for the Eastern District of Louisiana, Civil Action No. 11-445. BP Oil Spill injury claim. Dismissed June 18, 2020.

Pearson and Black v. DRC Emergency Services, LLC, 24th Judicial District Court for Jefferson Parish Louisiana, removed to USDC EDLA, Civil Action No. 11-778. BP Oil Spill injury claim. Dismissed June 19, 2020.

Chad Rogers v. DRC Emergency Services, LLC, et al., 19th Judicial District Court for East Baton Rouge Parish Louisiana, Civil Action No. 601084 removed to USDC MDLA Civil Action No. 11-331, transferred to USDC EDLA Civil Action No. 11-1295. BP Oil Spill injury claim. Dismissed September 6, 2018.

Foussell, et al, v. DRC Emergency Services, LLC, et al, United States District Court for the Eastern District of Louisiana, Civil Action No. 11-1195. BP Oil Spill injury claim. Dismissed September 6, 2018.

Truong v. Emergency Services, LLC, United States District Court for the Eastern District of Louisiana, Civil Action No. 11-2766. BP Oil Spill injury claim. Dismissed September 6, 2018.

Duong, et al v. Emergency Services, LLC, United States District Court for the Eastern District of Louisiana, Civil Action No. 12-814. BP Oil Spill injury claim. Dismissed September 6, 2018.

Duong, et al v. DRC Emergency Services, LLC, United States District Court for the Eastern District of Louisiana, Civil Action No. 13-605. BP Oil Spill injury claim. Dismissed July 11, 2019.

Dinwiddie v. DRC Emergency Services, LLC, United States District Court for the Eastern District of Louisiana, Civil Action No. 12-426. BP Oil Spill injury claim. Dismissed September 6, 2019.

Elmer Rogers v. DRC Emergency Services, LLC, Orleans Parish Civil District Court, Civil Action No. 14-8304, Div. "J" removed to USCD EDLA Civil Action No. 14-2285. BP Oil Spill injury claim. Dismissed June 19, 2020.

In re Triton Asset Leasing GmbH, U.S. Dist. Court for Eastern District of Louisiana, Case No. 10-2771. Statutory limitation of liability proceeding invoked by a vessel owner which was consolidated with MDL 2179. BP Oil Spill injury claim. Dismissed June 11, 2020.

Alexander v. DRC Emergency Services, LLC, et al, United States District Court for the Eastern District of Louisiana, Civil Action No. 11-951. DRCES is named as a defendant but was never served with legal process. Lawsuit was consolidated in MDL 2179. BP Oil Spill injury claim. Dismissed September 6, 2018.

Strike Zone Charters v. BP, United States District Court for the Eastern District of Louisiana, Civil Action No. 16-5960. BP Oil Spill injury claim. Dismissed July 11, 2019.

Reefkeeper, LLC v. BP, United States District Court for the Eastern District of Louisiana, Civil Action No. 16-5955. BP Oil Spill injury claim. Dismissed March 4, 2020.

Terry v. BP, United States District Court for the Eastern District of Louisiana, Civil Action No. 16-4137. BP Oil Spill injury claim. Dismissed March 4, 2020.

Lim v. BP, United States District Court for the Eastern District of Louisiana, Civil Action No. 16-3950. BP Oil Spill injury claim. Dismissed July 10, 2018.

Duong v. BP, United States District Court for the Eastern District of Louisiana, Civil Action No. 16-3953. BP Oil Spill injury claim. Dismissed January 3, 2019.

Ly v. BP, United States District Court for the Eastern District of Louisiana, Civil Action No. 16-3957. BP Oil Spill injury claim. Dismissed February 5, 2020.

Ly v. BP, United States District Court for the Eastern District of Louisiana, Civil Action No. 16-4027. BP Oil Spill injury claim. Dismissed July 18, 2017.

Nguyen v. BP, United States District Court for the Eastern District of Louisiana, Civil Action No. 16-3952. BP Oil Spill injury claim. Dismissed February 5, 2019.

Nguyen v. BP, United States District Court for the Eastern District of Louisiana, Civil Action No. 16-3955. BP Oil Spill injury claim. Dismissed February 5, 2019.

DeWitt County, et al v. DRC Logistics, Inc. (in rem only), #20-11-9945, DeWitt County, TX. County sent property tax bill to incorrect address for 2 years. Taxpayer address was corrected in County system; tax bill was paid; case was dismissed.

Golladay v. DRC Emer. Servs., et al, #20-23-CA, 14th JC Calhoun County, FL. Personal injury claim. Claim being handled through insurers. Plaintiff voluntarily dismissed DRC June 23, 2021.

Otano v. Desaugust, No. 18-16273, 11th Cir. Miami-Dade County, FL. Payment demand for by lower tier subcontractor on Hurricane Irma project in Miami-Dade County. Dismissed.

Hills v. Tap Out, et al, No. 18-627, 16th JDC Monroe County, Florida. Claim by a pro se plaintiff for alleged failure of tenants to pay rent following home repairs under a public assisted house repair program not involving DRC. The lawsuit is frivolous and was filed by a plaintiff with a history of such pro se filings. Case dismissed March 6, 2019.

Commans v. State Farm, et al, No. 653413, 19th JDC, E. Baton Rouge Parish, LA. Automobile collision case involving truck driver of a lower-tier subcontractor. DRC was dismissed on summary judgment.

Kessler Smith v. BKS Construction, LLC, et al, Case No. 2021-9256, Orleans Parish CDC Louisiana. Automobile accident case. Insured claim. Dismissed on summary judgment.

SCHEDULE A: SCHEDULE OF ITEMS

Items will be used for evaluation purposes only. Quantities are not guaranteed and are used for evaluation purposes only. Prices shall be all-inclusive of requirements as defined in the scope of work. All labor rates are to be fully burdened to include all taxes, benefits, handling charges, overhead and profits.

Management and Reduction

Description of Services	Estimated Quantity	Unit of Measure	Unit Price	Extended Price
Debris Management Site Management: Preparation, management and segregating at debris management site	700,000	Cubic Yard	$ 1.62	$ 1,134,000.00
Above Grade - Air Curtain Burning: Vegetative Debris	300,000	Cubic Yard	$ 0.68	$ 204,000.00
Portable - Air Curtain Burning: Vegetative Debris	300,000	Cubic Yard	$ 1.22	$ 366,000.00
Grinding: Grinding/Chipping Vegetative Debris	600,000	Cubic Yard	$ 4.12	$ 2,472,000.00
			TOTAL MANAGEMENT AND REDUCTION:	$ 4,176,000.00

Load and Haul Vegetative Debris from ROW to a DMS - (Mileage is based on a one-way haul distance)

0-30 Miles	500,000	Cubic Yard	$ 8.98	$ 4,490,000.00

Load and Haul C&D Debris from ROW to a DMS - (Mileage is based on a one-way haul distance)

0-30 Miles	250,000	Cubic Yard	$ 9.24	$ 2,310,000.00
Load and Haul Mixed Debris from ROW to a DMS - Mixed debris consists of personal property items such as furniture, carpet, mattresses, etc. (Mileage is based on a one-way haul distance)				
0-30 Miles	250,000	Cubic Yard	$ 9.24	$ 2,310,000.00
			TOTAL LOAD & HAUL VEGETATIVE, ROW, MIXED DEBRIS FROM ROW TO A DMS:	$ 2,310,000.00
White Goods Collect and Haul				
Removal of Eligible Non-refrigerant White Goods - Work consists of load and haul eligible non-refrigerant white goods from ROW to DMS	1000	Each	$ 30.00	$ 30,000.00
Removal of Eligible Refrigerant White Goods - Work consists of load and haul eligible refrigerant white goods from ROW to DMS. Contractor shall be responsible for the proper removal and disposal of refrigerants as required by law	1000	Each	$ 65.00	$ 65,000.00
			TOTAL WHITE GOODS COLLECT AND HAUL:	$ 95,000.00
Tree Operations				
Removal of Hazardous Trees - Work consists of removing eligible hazardus trees and placing them at the nearest and safest location on the City ROW for collection as normal vegetative debris. (Measurements are the diameter of the tree up 54" from ground level)				
6.0 inch - 12.9 inch diameter	175	Per Tree	$ 98.00	$ 17,150.00
13.0 inch - 24.9 inch diameter	150	Per Tree	$ 195.00	$ 29,250.00
25.0 inch - 36.9 inch diameter	150	Per Tree	$ 295.00	$ 44,250.00
37.0 inch - 48.9 inch diameter	150	Per Tree	$ 350.00	$ 52,500.00
49 inch and greater diameter	150	Per Tree	$ 395.00	$ 59,250.00
Removal of Hazardous Limbs - Work consists of removing eligible hazardus limbs and placing them at the nearest and safest location on the County ROW for collection as normal vegetative debris. (Measurements are the diameter of the tree up 54" from ground level)				
Hazardus Limbs are 2" inches and greater in diameter at point of break.	3075	Per Tree	$ 82.50	$ 253,687.50
			TOTAL TREE OPERATIONS:	$ 456,087.50
Haul-out of Reduced Eligible DMS Debris to City Designated Final Disposal - work consists of loading and transporting reduced eligible disaster debris to a City approved final disposal site. (Mileage is based on one-way haul distance)				
0-30.0 MILES	300,000	Cubic Yard	$ 4.12	$ 1,236,000.00
30.1-60.0 Miles	300,000	Cubic Yard	$ 4.62	$ 1,386,000.00
60.1-90.0 Miles	300,000	Cubic Yard	$ 4.92	$ 1,476,000.00
90.1-120.0 Miles	200,000	Cubic Yard	$ 5.42	$ 1,084,000.00
120.1-150.0 Miles	200,000	Cubic Yard	$ 5.98	$ 1,196,000.00

150.1 Miles or Greater	200,000	Cubic Yard	$ 6.58	$ 1,316,000.00
			TOTAL FINAL DISPOSTION- REDUCED DEBRIS; COLLECT AND HAUL:	$ 7,694,000.00
Haul-out of Unreduced Eligible DMS Debris to City Designated Final Disposal - work consists of loading and transporting unreduced eligible disaster debris from a public property or ROW to a City approved final disposal site. (Mileage is based on one-way haul distance)				
0-30.0 MILES	200,000	Cubic Yard	$ 4.32	$ 864,000.00
30.1-60.0 Miles	200,000	Cubic Yard	$ 4.92	$ 984,000.00
60.1-90.0 Miles	200,000	Cubic Yard	$ 5.42	$ 1,084,000.00
90.1-120.0 Miles	200,000	Cubic Yard	$ 5.88	$ 1,176,000.00
120.1-150.0 Miles	200,000	Cubic Yard	$ 6.38	$ 1,276,000.00
150.1 Miles or Greater	200,000	Cubic Yard	$ 6.78	$ 1,356,000.00
			TOTAL FINAL DISPOSTION- UNREDUCED DEBRIS; COLLECT AND HAUL:	$ 6,740,000.00

LABOR RATES: All labor rates are to be fully burdened to include all taxes, benefits, handling charges, overhead and profits; per diem and fuel is to be included in hourly labor rates.

Labor Category	Unit of Measure	Unit Price
Project Manager with truck and cell phone	HOUR	$ 85.00
Field Supervisor with truck and cell phone	HOUR	$ 75.00
Administrative Assistant	HOUR	$ 30.00
Clerical Worker	HOUR	$ 30.00
PROJECT MANAGEMENT TOTAL:		$ 220.00
Heavy Equipment Operator	HOUR	$ 65.00
Tool Operator (Chainsaw)	HOUR	$ 55.00
Traffic Controller (Flagman)	HOUR	$ 55.00
Laborer with Small Tools	HOUR	$ 55.00
Hazardous Materials Worker with Gear	HOUR	$ 75.00
Mechanic with Truck and Tools	HOUR	$ 95.00
Tree Climber with Chainsaw and Gear	HOUR	$ 95.00
WORK CREWS TOTAL:		$ 495.00

SUMMARY OF SCHEDULE A: COST PROPOSAL FEES

Category	Total Price

Management and Reduction	$	4,176,000.00
Vegetative Collect and Haul	$	4,490,000.00
C & D Collect and Haul	$	2,310,000.00
Mixed Debris Collect and Haul	$	2,310,000.00
White Goods Collect and Haul	$	95,000.00
Tree Operations	$	456,087.50
Final Disposition - Reduced Debris; Collect and Haul	$	7,694,000.00
Final Disposition - Unreduced Debris; Collect and Haul	$	6,740,000.00
Project Management	$	220.00
Work Crews	$	495.00
SCHEDULE A TOTAL:	$	28,271,802.50

Additional Contract Items will be used for evaluation purposes only. Items are contract items and will be ordered at the unit prices provided should they be needed by the City.

SCHEDULE B: SCHEDULE OF ADDITIONAL CONTRACT ITEMS

Specialty Removal			
Labor Category	**Unit of Measure**	**Unit Price**	
Load, Haul and Dispose of Household Hazardous Waste	Pound	$	9.95
Electronic Waste - Removal of Electronic Debris that contains hazardous materials; includes computer monitors and televisions.	Pound	$	25.00
Biowaste - Removal of waste capable of causing infection to humans (animal waste, human blood, pathological waste)	Pound	$	18.95
Putrescent Removal - Removal of debris that will decompose or rot (animals and organic fleshy matter)	Pound	$	4.95
Load, Haul and Dispose of Animal Carcasses	Pound	$	2.95
Canal and Waterway Debris Removal			
Width 0-4 feet	Cubic Yard	$	68.86

Width 4.1-8 feet	Cubic Yard	$ 68.86
Width 8.1-12 feet	Cubic Yard	$ 68.86
Width 12.1-16 feet	Cubic Yard	$ 68.86
Width 16.1-20 feet	Cubic Yard	$ 68.86
Width 20.1 feet or greater	Cubic Yard	$ 68.86
Sand Collection and Screening		
Screen/Sift Sand, Soil and Mud	Cubic Yard	$ 28.86
Load and Haul Sand, Soil and Mud	Cubic Yard	$ 16.82
Removal of Eligible Abandoned Vehicle or Vessel to City approved Staging Area		
Vehicle Removal	Each	$ 350.00
Vessel Removal (Land)	Linear Foot	$ 85.00
Vessel Removal (Marine)	Linear Foot	$ 250.00
Hazardous Tree Bracing		
6.0 inch - 24.0 inch diameter	Each	$ 100.00
24.1 inch - 36.0 inch diameter	Each	$ 150.00
Greater than 36.0 inch diameter	Each	$ 195.00
Hazardous Stump Removal		
Work consists of removing eligible hazardous stumps, backfilling and compacting the stump hole, and transporting the stump to an approved City DMS or final disposal location. Measurement is the diameter of the stump 24 inches above the ground.		
24 -36 inches diameter	Each	$ 300.00
36.1-48 inches diameter	Each	$ 450.00
48.1-72 inches diameter	Each	$ 550.00
Greater than 72 inches diameter	Each	$ 750.00
OTHER: Define other workers that may be required and the hourly rate to provide		
Security - Armed	Hour	$ 95.00
Security - Un-armed	Hour	$ 165.00

Truck Driver		Hour	$ 60.00
		Hour	$ -
		Hour	$ -
		Hour	$ -
		Hour	$ -
		Hour	$ -

Items will be used for evaluation purposes only. Quantities are not guaranteed and are used for evaluation purposes only. Prices shall be all-inclusive of requirements as defined in the scope of work. All labor rates are to be fully burdened to include all taxes, benefits, handling charges, overhead and profits.

Management and Reduction

Description of Services	Estimated Quantity	Unit of Measure	Unit Price	Extended Price
Debris Management Site Management: Preparation, management and segregating at debris management site	700,000	Cubic Yard	$ 2.85	$ 1,995,000.00
Above Grade - Air Curtain Burning: Vegetative Debris	300,000	Cubic Yard	$ 0.40	$ 120,000.00
Portable - Air Curtain Burning: Vegetative Debris	300,000	Cubic Yard	$ 0.40	$ 120,000.00
Grinding: Grinding/Chipping Vegetative Debris	600,000	Cubic Yard	$ 0.65	$ 390,000.00
			TOTAL MANAGEMENT AND REDUCTION:	$ 2,625,000.00

Load and Haul Vegetative Debris from ROW to a DMS - (Mileage is based on a one-way haul distance)

0-30 Miles	500,000	Cubic Yard	$ 6.35	$ 3,175,000.00

Load and Haul C&D Debris from ROW to a DMS - (Mileage is based on a one-way haul distance)

0-30 Miles	250,000	Cubic Yard	$ 6.35	$ 1,587,500.00
Load and Haul Mixed Debris from ROW to a DMS - Mixed debris consists of personal property items such as furniture, carpet, mattresses, etc. (Mileage is based on a one-way haul distance)				
0-30 Miles	250,000	Cubic Yard	$ 6.35	$ 1,587,500.00
			TOTAL LOAD & HAUL VEGETATIVE, ROW, MIXED DEBRIS FROM ROW TO A DMS:	$ 1,587,500.00
White Goods Collect and Haul				
Removal of Eligible Non-refrigerant White Goods - Work consists of load and haul eligible non-refrigerant white goods from ROW to DMS	1000	Each	$ 20.00	$ 20,000.00
Removal of Eligible Refrigerant White Goods - Work consists of load and haul eligible refrigerant white goods from ROW to DMS. Contractor shall be responsible for the proper removal and disposal of refrigerants as required by law	1000	Each	$ 25.00	$ 25,000.00
			TOTAL WHITE GOODS COLLECT AND HAUL:	$ 45,000.00
Tree Operations				
Removal of Hazardous Trees - Work consists of removing eligible hazardus trees and placing them at the nearest and safest location on the City ROW for collection as normal vegetative debris. (Measurements are the diameter of the tree up 54" from ground level)				
6.0 inch - 12.9 inch diameter	175	Per Tree	$ 195.00	$ 34,125.00
13.0 inch - 24.9 inch diameter	150	Per Tree	$ 295.00	$ 44,250.00
25.0 inch - 36.9 inch diameter	150	Per Tree	$ 475.00	$ 71,250.00
37.0 inch - 48.9 inch diameter	150	Per Tree	$ 485.00	$ 72,750.00
49 inch and greater diameter	150	Per Tree	$ 495.00	$ 74,250.00
Removal of Hazardous Limbs - Work consists of removing eligible hazardus limbs and placing them at the nearest and safest location on the County ROW for collection as normal vegetative debris. (Measurements are the diameter of the tree up 54" from ground level)				
Hazardus Limbs are 2" inches and greater in diameter at point of break.	3075	Per Tree	$ 71.00	$ 218,325.00
			TOTAL TREE OPERATIONS:	$ 514,950.00
Haul-out of Reduced Eligible DMS Debris to City Designated Final Disposal - work consists of loading and transporting reduced eligible disaster debris to a City approved final disposal site. (Mileage is based on one-way haul distance)				
0-30.0 MILES	300,000	Cubic Yard	$ 4.50	$ 1,350,000.00
30.1-60.0 Miles	300,000	Cubic Yard	$ 4.55	$ 1,365,000.00
60.1-90.0 Miles	300,000	Cubic Yard	$ 4.60	$ 1,380,000.00
90.1-120.0 Miles	200,000	Cubic Yard	$ 4.65	$ 930,000.00
120.1-150.0 Miles	200,000	Cubic Yard	$ 4.70	$ 940,000.00

150.1 Miles or Greater	200,000	Cubic Yard	$ 4.75	$ 950,000.00
			TOTAL FINAL DISPOSTION- REDUCED DEBRIS; COLLECT AND HAUL:	$ 6,915,000.00
Haul-out of Unreduced Eligible DMS Debris to City Designated Final Disposal - work consists of loading and transporting unreduced eligible disaster debris from a public property or ROW to a City approved final disposal site. (Mileage is based on one-way haul distance)				
0-30.0 MILES	200,000	Cubic Yard	$ 4.50	$ 900,000.00
30.1-60.0 Miles	200,000	Cubic Yard	$ 4.55	$ 910,000.00
60.1-90.0 Miles	200,000	Cubic Yard	$ 4.60	$ 920,000.00
90.1-120.0 Miles	200,000	Cubic Yard	$ 4.65	$ 930,000.00
120.1-150.0 Miles	200,000	Cubic Yard	$ 4.70	$ 940,000.00
150.1 Miles or Greater	200,000	Cubic Yard	$ 4.75	$ 950,000.00
			TOTAL FINAL DISPOSTION- UNREDUCED DEBRIS; COLLECT AND HAUL:	$ 5,550,000.00

LABOR RATES: All labor rates are to be fully burdened to include all taxes, benefits, handling charges, overhead and profits; per diem and fuel is to be included in hourly labor rates.

Labor Category	Unit of Measure	Unit Price
Project Manager with truck and cell phone	HOUR	$ 70.00
Field Supervisor with truck and cell phone	HOUR	$ 65.00
Administrative Assistant	HOUR	$ 60.00
Clerical Worker	HOUR	$ 55.00
PROJECT MANAGEMENT TOTAL:		$ 250.00
Heavy Equipment Operator	HOUR	$ 65.00
Tool Operator (Chainsaw)	HOUR	$ 65.00
Traffic Controller (Flagman)	HOUR	$ 55.00
Laborer with Small Tools	HOUR	$ 50.00
Hazardous Materials Worker with Gear	HOUR	$ 115.00
Mechanic with Truck and Tools	HOUR	$ 60.00
Tree Climber with Chainsaw and Gear	HOUR	$ 90.00
WORK CREWS TOTAL:		$ 500.00

SUMMARY OF SCHEDULE A: COST PROPOSAL FEES

Category	Total Price

Management and Reduction	$	2,625,000.00
Vegetative Collect and Haul	$	3,175,000.00
C & D Collect and Haul	$	1,587,500.00
Mixed Debris Collect and Haul	$	1,587,500.00
White Goods Collect and Haul	$	45,000.00
Tree Operations	$	514,950.00
Final Disposition - Reduced Debris; Collect and Haul	$	6,915,000.00
Final Disposition - Unreduced Debris; Collect and Haul	$	5,550,000.00
Project Management	$	250.00
Work Crews	$	500.00
SCHEDULE A TOTAL:	$	22,000,700.00

Additional Contract Items will be used for evaluation purposes only. Items are contract items and will be ordered at the unit prices provided should they be needed by the City.

SCHEDULE B: SCHEDULE OF ADDITIONAL CONTRACT ITEMS

Specialty Removal			
Labor Category	**Unit of Measure**	**Unit Price**	
Load, Haul and Dispose of Household Hazardous Waste	Pound	$	1.00
Electronic Waste - Removal of Electronic Debris that contains hazardous materials; includes computer monitors and televisions.	Pound	$	1.00
Biowaste - Removal of waste capable of causing infection to humans (animal waste, human blood, pathological waste)	Pound	$	1.00
Putrescent Removal - Removal of debris that will decompose or rot (animals and organic fleshy matter)	Pound	$	1.00
Load, Haul and Dispose of Animal Carcasses	Pound	$	3.00
Canal and Waterway Debris Removal			
Width 0-4 feet	Cubic Yard	$	28.00

Width 4.1-8 feet	Cubic Yard	$ 32.00
Width 8.1-12 feet	Cubic Yard	$ 34.00
Width 12.1-16 feet	Cubic Yard	$ 36.00
Width 16.1-20 feet	Cubic Yard	$ 38.00
Width 20.1 feet or greater	Cubic Yard	$ 40.00
Sand Collection and Screening		
Screen/Sift Sand, Soil and Mud	Cubic Yard	$ 18.00
Load and Haul Sand, Soil and Mud	Cubic Yard	$ 21.00
Removal of Eligible Abandoned Vehicle or Vessel to City approved Staging Area		
Vehicle Removal	Each	$ 325.00
Vessel Removal (Land)	Linear Foot	$ 26.00
Vessel Removal (Marine)	Linear Foot	$ 51.00
Hazardous Tree Bracing		
6.0 inch - 24.0 inch diameter	Each	$ 275.00
24.1 inch - 36.0 inch diameter	Each	$ 475.00
Greater than 36.0 inch diameter	Each	$ 675.00
Hazardous Stump Removal		
Work consists of removing eligible hazardous stumps, backfilling and compacting the stump hole, and transporting the stump to an approved City DMS or final disposal location. Measurement is the diameter of the stump 24 inches above the ground.		
24 -36 inches diameter	Each	$ 375.00
36.1-48 inches diameter	Each	$ 425.00
48.1-72 inches diameter	Each	$ 475.00
Greater than 72 inches diameter	Each	$ 575.00

RE: RFP #2348RFP, Disaster Debris Removal Services

To Whom It May Concern,

The TFR family wishes you the best in your selection of a Disaster Recovery Contractor. We understand that the selection of an emergency contractor is a major decision, and we genuinely appreciate you considering TFR Enterprises. We comprehend and are undaunted by the challenges you may face, as we have been through the process and recovery with over 350 clients who have been impacted by devastating events. TFR Enterprises, Inc. is a national disaster and debris management corporation based in Leander, Texas. With over 34 years of disaster recovery experience, **TFR has collected and processed over 35,000,000 cubic yards of debris**. TFR is prepared, equipped, and ready to provide you with a turnkey, expedited, cost-effective emergency response solution.

No job or disaster is too large for TFR to handle. Our experience speaks for itself. **In 2020, TFR managed 10,361,000 cubic yards of debris serving 57 cities, counties, parishes, and state agencies in Iowa, Louisiana, Mississippi, Alabama, Texas, and Oklahoma.** In response to the crippling 2017 hurricane season, TFR managed 26 simultaneous contract activations that spanned Texas, Florida, California, and Puerto Rico. With a subcontractor database of more than 1,000 and a fleet of owned equipment, TFR Enterprises is prepared to tackle your greatest challenges.

Debris clearing, removal, and processing are only the initial phase of your recovery efforts. Many ancillary tasks must be undertaken for you and your citizens to get back to life as it was before the storm. TFR has extensive experience in all this work, including land clearing, stream and river clearing and diversion, tree removal, trimming and pruning on parks, golf courses, and rights-of-way, tree repair and maintenance, debris recycling, tub grinding, hauling, and demolition.

TFR owns over 200 pieces of equipment, including a fleet of self-loading debris-hauling trucks, rubber-tired/tracked loaders, heavy-haulers, excavators, dozers, field offices, and eight (8) Diamond-Z Model 1463 Tub Grinders for vegetative debris reduction (grinding). Not only is this equipment uncommitted on current long-term contracts, but all of it is primarily designed for debris removal operations. This company-owned and controlled assets resource allows TFR to provide an expedient response.

At TFR, we know that projects of this scope can be a huge financial burden. Our staff is well-trained in the FEMA reimbursement process, and we are ready to assist you throughout the entire reimbursement process. **ALL TFR'S CLIENTS HAVE RECEIVED 100% OF THE ELIGIBLE REIMBURSABLE AMOUNT.** Our financial strength allows us to help you get the project kicked off and funded while the reimbursement process begins.

Many firms within our industry can provide financial stability, past performance, and crews of subcontractors. TFR takes pride in having one of the industry's largest fleets of self-owned and maintained equipment. This fleet allows us to mobilize more expeditiously as well as perform multiple projects at a time.

TFR declares that this proposal is in all respects fair and in good faith without collusion or fraud and that the signor of the proposal has the authority to bind TFR Enterprises, Inc for contractual needs.

Once again, thank you for the opportunity to submit a proposal for Disaster Debris Removal Services to the Cities of Daytona Beach, Port Orange, and its representatives. The authorized representatives for TFR Enterprises, Inc are as follows:

Tab 1. Experience and Qualifications

Company Overview

Disasters are unpredictable. Disasters can vary in size, scope, and intensity. Yet given this inherent unpredictability, governments can take the necessary steps to ensure the safety and relief of their constituency.

TFR Spotlight

TFR has collected more than 35,000,000cy of disaster debris and handled more than 65,000,000cy of disaster debris.

At TFR, we address the needs of our clients long before the establishment of a relationship. Every project is different. Every state, county, or city, desires, and highlights different aspects of disaster relief and recovery that they deem MOST important. With this ever-changing landscape in mind, TFR continually stresses the proper due diligence and planning to fully comprehend the type of service that each client desires. We routinely review and scrutinize our operational and management plans to ensure that we present the most practical, efficient structure to complete the project. TFR's knowledgeable management team retains over 155 years of combined experience responding to hurricanes, floods, and other various disasters. Pre-planning allows TFR to respond to any project rapidly and efficiently in any location should the need arise.

What allows TFR to provide an expedient response? Pre-planning certainly encompasses a large portion of this service. In addition, TFR maintains a fleet of over two hundred (200+) pieces of company-owned equipment pre-positioned across the Southeastern United States. By staging equipment directly outside the impact zone, TFR can respond within hours to immediately begin emergency road clearance services to provide a vital lifeline for federal, state, and local emergency responders to assess the damage. Furthermore, TFR can prep and construct a debris management site for immediate acceptance of storm-generated debris in less than 24 hours. Mobile Command Units can be deployed to enhance response and achieve greater coordination between parties to fully augment our operational capacity and aid the organization of relief efforts. Concurrently, project teams scour the impacted area to quantify debris, deduce an overall damage estimate, and adapt a preplan accordingly.

TFR prepares for economic instability in the immediate aftermath of natural or man-made disasters by maintaining strong relationships with suppliers and organizing resources for dispatch. Additionally, TFR owns the necessary equipment to house and feed personnel temporarily as the local business community reacts and rebounds from such a disaster. Other initial and vital supplies, such as fuel, parts trailers, welders, wood, and other necessities, are brought from the home office to certify that work stoppages shall not occur due to inadequate logistics. However, the backbone of our logistical support team is our maintenance crew. TFR would not be capable of providing the timely, cost-effective service that we provide without the knowledge and experience our maintenance crew retains. With a dedicated warehouse at the home office for two (2) traveling equipment trailers, the TFR maintenance crew ensures that our equipment is functioning safely and efficiently with limited downtime. We strive to foresee any potential encumbrances and take the appropriate actions to safeguard against such occurrences.

Operationally, TFR manages on the principle of transparency. We always remain available to answer questions, address issues immediately, and submit reports on time. This is to the benefit of all parties involved, as this is a team effort to respond to a major disaster. As safety and contract responsibility are the utmost priorities of the principals and officers of TFR, it is the policy of management to see that its employees and subcontractors conduct themselves with integrity and courtesy in the performance of their

duties. Following a disaster event, there is an urgency to remediate the damage and return to normalcy as quickly as possible. The principals and officers of TFR firmly believe that this and price competitiveness can be achieved courteously and without sacrificing health, safety, and contract integrity.

Price is a large determinant of any decision an informed consumer discerns. TFR fully understands that providing the highest value-added service is sometimes not enough to, alone, secure a contract, as different clients desire different qualities in a personalized project. TFR can fulfill these needs by utilizing Company-owned equipment and manpower. These resources allow TFR to control costs, subsequently discounting prices without conceding overall quality and safety, which is a corporate must. Our mission is to provide our customers with the highest level of service at a fair and market-competitive price.

History

TFR Enterprises, Inc. is a Texas-based specialty contractor, first incorporated in 1989 in the State of Tennessee, actively participating in disaster recovery contracts nationwide since Hurricane Andrew in 1992. We have a history of safe, rapid, and professional service in the industry with federal, state, and local governments, providing expedient, cost-effective disaster debris management, removal, reduction, and cleanup services to over 350 satisfied clients, as well as numerous private industries funded by the Federal Emergency Management Agency (FEMA).

A family-owned and operated corporation headquartered in Leander, Texas, 20 miles outside Austin, Texas; TFR also owns and operates a tub-grinding division, responsible for vegetative debris reduction and recycling projects. Although disaster response remains our primary scope of business, TFR exploits natural adaptations and synergies to complement our current service offerings including land clearing, tree removal, trimming, and pruning on parks, golf courses, and right-of-way, tree repair and maintenance, debris management, tub grinding, hauling, and demolition.

TFR has completed more than 100 projects in Disaster Response in the last five (5) years. We have successfully performed on USACE projects, and many other federal, state, and local government projects. In the past, TFR has received multiple multi-million-dollar task orders from our clients spanning a large geographical area. By applying our resources and an efficient operational plan, we completed each designated task on time in compliance with FEMA guidelines.

When you hire TFR Enterprises, you get us, not a General Contractor with mostly subcontractors. We will arrive on time. We will self-perform all key elements of the project to ensure our end service and in some cases much of the entire delivery order with our equipment and personnel. We can bring our camps to house our project personnel until community establishments are staffed and operational again. Our service is disaster relief and recovery, which includes the economic impact our stay will have on the local economy. Our goal is to partner with the Cities of Daytona Beach, Port Orange, and its community to provide a full-service disaster relief and recovery effort.

Organizational Structure

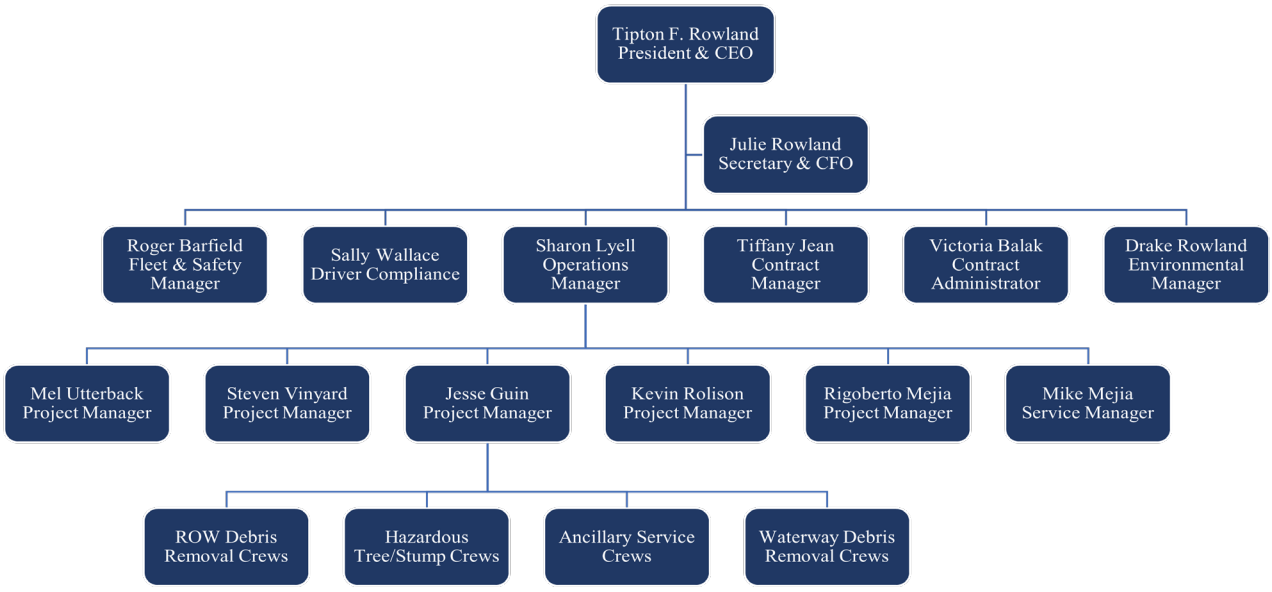
Our organization is designed to deliver proactive leadership to any area, while effectively managing all project risks and providing maximum responsiveness to our clients. We provide each client with a dedicated, proven team prepared to execute any debris management mission with the highest degree of quality, professionalism, and efficiency.

Our management approach, proven on more than 350 FEMA-funded disaster response activations, will be applied to this contract, and establish the roles and responsibilities for the debris mission's management team, as well as support personnel.

With a robust network of subcontractors and vendors and firsthand knowledge of their capabilities and performance in emergency response and debris management, we readily access the best performers to quickly support the demands we expect under this contract.

TFR's organizational structure minimizes the gap between the Operations Manager and the Project/Site Manager(s), depending on the size and scope of the response. We believe that by keeping the degree of separation between the management staff and field supervisors to a minimum, our entire team will be better connected and benefit from the increased level of communication.

Our essential employees have been chosen for their disaster recovery experience, leadership abilities, and debris expertise, as well as their ability to respond immediately to crises around the country.



Equal Employment Opportunity Employer

TFR Enterprises, Inc. provides equal employment opportunities without regard to race, color, sex, religion, national origin, age, or disability. TFR Enterprises, Inc. conforms with all applicable federal and state laws, rules, guidelines, and regulations and provides equal employment opportunities in all employment and employee relations.

Experienced Project Management

Large-Scale Events: TFR demonstrated our capabilities to respond to large-scale events following Hurricane Laura in 2020. We were activated in 36 Parishes to provide hazardous tree removals, debris removal, reduction, and final disposal for state-owned rights-of-way. In total, we supplied more than 150 debris removal crews, and 100 tree crews, managed and closed out 30 debris management sites, and removed more than 2.4 million cubic yards of debris.

Multiple Contract Activations: 2020 proved to be a catastrophic storm season. TFR responded to contract activations within **57 jurisdictions throughout Iowa, Louisiana, Oklahoma, Alabama, Mississippi, and**

Texas. TFR managed 10.3 million cubic yards of debris, partnered with 74 subcontractors, certified more than 1,350 pieces of equipment, and remediated and closed out 67 debris management sites.

Meeting Client's Needs: In August 2020, a severe weather event wreaked havoc in the state of Iowa. The Iowa Department of Homeland Security contracted TFR to grind and dispose of 1.6 million cubic yards of vegetative waste. "The professionalism, knowledge, understanding, and work ethic demonstrated by TFR Enterprises' employees is a compliment to your organization and is in keeping with the best standards of emergency response contractors everywhere," says Jordan Moser, Strategic Planner.

Financial Capability

Since the company's incorporation in 1989, TFR has completed over 350+ federally funded debris removal contracts in its 34-year history. From a dedicated owner to experienced staff, TFR offers not only the knowledge to perform any size job, but also the financial flexibility to complete multiple large-scale projects simultaneously.

Company Owned Equipment

TFR owns over 200 pieces of equipment**,** including debris-handling trucks, such as self-loaders, heavy-haulers, excavators, dozers, and numerous mobile command units. TFR also owns six (6) Diamond Z 1463 Tub Grinders and two (2) horizontal grinders to accommodate our client's debris reduction needs. With the industry's largest collection of tub grinders, TFR can rapidly and efficiently dispose of massive amounts of storm-generated debris.

Subcontractors

In addition, to our extensive list of company-owned equipment, TFR maintains highly valued, working relationships with over one thousand (1000) subcontractors nationwide, who are versed in TFR project procedures and multiply the resources available to the project.

Client Testimonials

Client	Testimonial
THE HUB OF CITY OF ROBERTSDALE BALDWIN COUNTY	"We would like to commend TFR Enterprises for their responsiveness and diligence in removing vegetative debris following Hurricane Sally in September of 2020." **Gregory B. Smith, City Engineer (2020)**
Iowa Fields of opportunities	"On behalf of the State of Iowa, I would like to thank TFR Enterprises for the exceptional debris removal service provided in the wake of the devastating severe weather event that impacted Iowa on August 10th, 2020. TFR's swift response and unwavering commitment to this mission has assisted Iowans, at every level, in returning to normal life in a time when the very definition of the word "normal" seems to be

Client	Testimonial
	ever in doubt." **Jordan Moser, Strategic Planner (2020)**
	"We were very pleased with the rapid deployment of equipment and resources to start the clean-up process. The workers and equipment were both top-notch and were ready to work once their boots hit the ground in Citronelle." **Jason T. Stringer, Mayor (2020)**
	"In closing should the need arise again for debris removal services in Hancock County I hope TFR would be the one's here to help" **Vic Johnson, Hancock County Road Manager (2020)**
	"This Hurricane, and the devastation it left behind, will stick with me the rest of my life. I hope that we never experience another storm event with the same potential for destruction. However, if we do, the assurance knowing that TFR Enterprises is ready to provide their professional services gives us the confidence we need to weather another storm." **Jeffrey Garrett, Maintenance Engineer, NCDOT (2018)**
	"You and your team work tirelessly to achieve the mission laid out by ECC and MCAS Cherry Point. Your leadership and work ethic was much appreciated and valued." **Craig Duncan, Cherry Point Program and Project Manager (2018)**
	"T.F.R. Enterprises, Inc. performed extremely well in an emergency environment. T.F.R. responded within less than 48 hours to the Governments need for assistance hauling debris in the Santa Barbara County area, due to rains and flooding that occurred on January 8, 2018." **Juan Martinez, Civil Engineer, United States Army Corps of Engineers (2018)**

Performance Dates:
05/2021 to 10/2021

DEBRIS VOLUME: 36,050 TONS

CONTRACT VALUE: $4,297,152.00

On February 8th, the state of Kentucky endured an ice storm event that left more than 150,000 homes without power. Many of these power outages were caused by broken, twisted, and uprooted trees that could not handle the sheer weight of the accumulated ice. This was only the beginning of their battle. Once the ice began to melt, the influx of water exceeded the capacity of the creeks, rivers, and drainage systems, leading to flooding in many areas. Once the power was restored and flooding had receded, the state worked to secure FEMA funding, and procure contractor assistance with debris and hazardous tree removal. The quantities of debris left behind were far more than they were capable of handling with in-house or force-account labor.

TFR Enterprises was awarded a contract by the Kentucky Transportation Cabinet in May of 2021 to remove ice storm and flood debris from state rights-of-way in ten eastern Kentucky counties. TFR management arrived on site within 24 hours of contract activation and immediately started mobilizing equipment. TFR crews removed more than 100 tons of debris within the first 72 hours following the notice to proceed.

Because of the region's geography, which includes steep embankments, high rock walls, deep valleys, and small winding roads, TFR needed to use specialized equipment to fully service the client's needs. A fleet of excavators, skilled operators, grapple trucks, sawmen, and traffic control personnel were deployed. Over 14,000 tons of garbage and thousands of hazardous trees were removed by these crews, who worked nonstop. TFR cleared more than double the expected

quantities of debris from KYTC rights-of-way in the first 30 days of work. TFR's capacity to overcome hurdles while exceeding our client's expectations were demonstrated throughout the contract, resulting in the effective completion of the work we were tasked with.

DEBRIS VOLUME: 1,600,000 CUBIC YARDS

CONTRACT VALUE:
$7,722,536.00

On August 10, 2020, an unprecedented wind event caused enormous destruction over a large portion of the State of Iowa. In response to this storm, TFR Enterprises was awarded the Derecho debris clean-up contract administered by the Iowa Department of Homeland Security. Due to the unparalleled nature of this storm, storm response rollout was slow as making the right decisions rightfully trumped quick decisions.

A mixture of communities self-performing the debris collection in the ROW combined with independent contractors hired independently to perform debris collection services led to an ambiguity in the ever-expanding scope of the job. Initial responses from communities seeking the state's help started at approximately 20 communities in 8 counties and as the debris reduction work and subsequent mulch haul outgained traction, that list quickly ballooned to 45 communities in 15 counties across the state. Initial estimates for the master agreement were in the 600,000-800,000 cubic yards of debris to process but fell just shy of 1,400,000 yards of reduced and disposed of vegetative debris at completion.

Testimonial

"The professionalism, knowledge, insight, and work ethic, displayed by TFR Enterprises' staff is a tribute to your company and is in keeping with the highest standards of emergency response contractors everywhere." Jordan Moser

As we settled into the final scope of work, TFR staff began working with local community points of contact to eliminate any issues that would cause delays in the performance of the work. Our staff researched and secured locations for final mulch disposal and coordinated with Iowa DNR to ensure each site passed the requirements necessary for an FDS designation. Once these locations

were state-approved, TFR staff coordinated with the state-appointed monitoring firm to eliminate potential inefficiencies and ensure monitoring staff and equipment were positioned at the necessary sites. Once all site prep had been completed, production and support equipment was placed on-site to begin debris reduction. Following a 3-4 day grinding lead time, our fleet of 8 mulch haul-out trucks followed the debris reduction crews onto the site. These 8 trucks were able to efficiently haul and dispose of approximately 300,000 yards of mulch debris at FDS sites ranging from 4-55 miles from DMS while working around inclement weather deterrents.

Due to the widely varying size of communities requesting the work, TFR staffed and equipped crews to simultaneously reduce and/or haul debris from 6 different sites. This staffing arrangement gave us the ability to consolidate multiple grinding crews with up to several hundred thousand cubic yards of debris, and at completion, enabled us to disperse crews back to smaller communities in the area. We are certainly pleased to have served a small part in helping Iowans return to normal life absent large piles of vegetive debris on every street corner and feel quite accomplished that the project was completed in the safest, most efficient, and most effective way possible.

DEBRIS VOLUME: 180 CREWS FOR HOURLY CUT & TOSS

CONTRACT VALUE:
$2,613,534.00

In September 2018, weather forecasters were preparing the coast of North Carolina for the "storm of a lifetime" Hurricane Florence. Three months before the formation of Florence, TFR was awarded the Pre-Event Contract with the North Carolina Department of Transportation for Emergency Cut & Shove services. TFR had a kickoff meeting shortly after the award to go over the scope of the contract and meet and greet. We expressed to the department that we had just provided over 50 cut and toss crews to Florida DOT after Hurricane Irma, to reassure them that we are not only experienced but have very recent experience in emergency roadway clearance. Three months later, TFR Project Management mobilized to North Carolina on September 12, 2018, in response to Florence. We met with key members of NCDOT to prepare for TFR's response to debris-ridden state roads. It was determined by NCDOT and TFR after reviewing the State Maps that the 6 counties under contract each needed thirty crews. The contract defined a push crew as 4 people; a bobcat with an operator, 2 saw men/flaggers, and one supervisor with a pickup. TFR immediately activated resources from its extensive database on standby: 180 bobcats and 720 personnel. Immediately upon Florence's winds reducing to less than 40 MPH, those resources were mobilized to their assigned county and began clearing roadways. This was one of the largest and most expedient push crew responses in TFR's 33 years of disaster response. Many of the counties, if not all of them: Pender, Onslow, New Hanover, Brunswick, Sampson, and Duplin had severe flooding and power outages. One of the serious obstacles TFR faced with this catastrophe was the logistics of housing 720 people. Minimal hotels had power, and those had no rooms. TFR was able to engage with local business owners

Testimonial

"This Hurricane, and the devastation it left behind, will stick with me the rest of my life. I hope that we never experience another storm event with the same potential for destruction. However, if we do, the assurance knowing that TFR Enterprises is ready to provide their professional services, gives us the confidence we need to weather another storm." Jeffrey Garrett

as well as state offices to secure housing when the state was virtually shutting down road by road. With that said, it never affected our crew's ability to maintain a speedy recovery and provide the client with the help they desperately needed. TFR also arranged close coordination with local and state electric authorities to report any major electrical concerns and to expedite the electrical restoration work. All agencies were contacted, and introductions were made 48 hours before landfall. This was essential, as the majority of these counties had standing floodwaters, downed trees, and debris, as well as live electrical lines often in the same location. With those obstacles addressed in the pre-event planning stages North Carolina DOT, with the help of TFR, was able to transition from disaster response to disaster recovery with minimal time and impact on the communities affected.

DEBRIS VOLUME: WORK ORDER 1: REDUCTION & HAUL OUT OF 151,000 CY OF VEGETATIVE DEBRIS.
WORK ORDER 2: 71,500 OPERATOR & EQUIPMENT HOURS

CONTRACT VALUE:
$13,669,959.00

On October 10, 2018, less than one month after Florence made landfall, Hurricane Michael showed up in the Florida Panhandle as a Category 4 hurricane. Michael presented the strongest winds to make US landfall since Andrew in 1992, and the damage was evident. TFR was mobilized to Florida but rode out the storm well out of the destruction way. TFR must always ensure the equipment and management is not in a dangerous position, as we cannot risk the absence of it in response. TFR's management immediately headed to Tyndall Air Force Base to help. TFR had just finished responding to Camp LeJeune and Cherry Point military installations after Hurricane Florence, so we are very familiar with the processes, procedures, and needs of these facilities. Although the base was a disaster area and looked as if combat had just ended, TFR immediately mobilized all requested resources and we were working 5 days after landfall, clearing roadways, and removing hazardous trees and hazardous limbs. We completed several work orders, vegetative and construction and demolition debris removal, tree trimming and removal, and reducing the vegetative debris by grinding and hauling out and disposal of C&D and Vegetative mulch. TFR was able to recycle vegetative debris and metal material as recycling any debris that can avoid landfills is one of our top company goals. One of the obstacles that TFR experienced in performing this project was access to the base. Their key problem with base access was that several different procedures were being used for granting access. There was a separate contractor involved so it was not done directly by the military and communications were an issue. We worked very closely with the base and the security contractor to resolve the base access issues so the work would not be interrupted, delayed, or stopped completely. Another obstacle that presented itself was the wide variety of materials that this monstrous storm created. TFR houses a staff of highly trained individuals who are proficient in the identification, removal, and storage of all

materials that are incidental to a natural or man-made disaster. TFR provided project managers with experience in military base operations to meet the expectations of the base OPSEC office. Safety and security are high priorities within TFR organization and management as well as teamwork, and teamwork is what it takes to get the job done. We were honored to help our US military facilities recover from the devastation of the 2018 Hurricanes that made US landfall.

Performance Dates:
10/2018 to 08/2019

DEBRIS VOLUME: 13,838 OPERATOR & EQUIPMENT HOURS

CONTRACT VALUE:
$7,532,510.00

September 2018 was the wettest in Texas history. Across Central Texas and the Hill Country, heavy rains led to catastrophic flooding. The floods caused a bridge on FM 2900 in Kingsland Texas to collapse and fall into the surrounding water, Lake LBJ. This surrounding water is used for recreational boating which is essential to the local economy. This bridge is about a quarter mile long and serves as one of the main thoroughfares for the city.

TFR was contracted by the Texas Department of Transportation, TXDOT, to remove the bridge pieces and other hazardous debris from the water so a new bridge could be constructed, and the public could begin to use the lake again. To perform this work in a timely matter, TFR placed excavators and cranes onto barges to help remove the debris while hiring divers to help locate the debris. TFR had 23 individual barges, two excavators on the barges, a 30-ton crane, two-three teamed dive crews and multiple pieces of heavy equipment. TFR has removed debris from the collapsed bridge as deep as 39 feet under the surface of the water.

TFR is operating two sites, the first is on the barge and is used to pull debris from the water and temporarily stockpile it. Each barge holds an excavator, a 30-ton crane, and various other pieces of equipment that are used to remove the debris, along with TFR personnel and the divers. The other various equipment is specialty types used for breaking the larger pieces of the bridge into smaller, more manageable sizes. After the debris is placed on the barge it is transported to our second site, the segregation site, which is on land. At the segregation site, there are self-loading grapple trucks (knuckle booms), excavators, wheel loaders, and personnel that oversee separating debris by types: C&D, vegetative, concrete, metals, etc. After

separating the debris, our knuckle booms load and haul the debris to the final disposal sites or crush debris for reuse such as crushed concrete and recycled metals.

As previously mentioned, TFR has acquired various types of specialty equipment to remove debris efficiently and safely. The collapsed sections were long, heavy, and irregularly shaped. The concrete is reinforced with rebar which makes it harder to break into pieces and even heavier. This new specialized equipment helps with cutting through the rebar, so the pieces become smaller and easier to remove. This has included new attachments for the company-owned excavators and renting equipment for the divers to use. TFR has purchased a concrete crusher attachment for the excavators to speed up the process of breaking the larger pieces of the bridge into smaller pieces that can be removed. This crusher can be submerged in water and break the concrete to reveal the rebar within it. Then the crusher also has powerful shears to cut the rebar safely and quickly which creates a smaller piece of the bridge that is removed with the crane. The divers are also using diamond saws that can be completely submerged to quickly cut through large pieces of debris making them more manageable to remove. Other equipment that has been procured by TFR includes a specialty plasma cutter that can be safely used underwater to cut pieces of rebar that the crusher or diamond saw cannot reach.

TXDOT and TFR have been working closely together to ensure all eligible debris is removed safely and efficiently. TXDOT contracted TFR to assist the company that was contracted to replace the bridge. The other company needed help in removing the previous bridge's footers that were still intact. TFR quickly moved our working barge with the help of a few tugboats to the new site and removed the footers. The footers, like the pieces of bridge, were broken into smaller pieces and removed from the water. These footers were the deepest debris removed at 39 feet and required two dive teams to operate two diamond saws and the specialty welder. TFR efficiently removed the footers from the site so the other company could begin their contracted work.

Minillas Station
San Juan, PR 00940
(787) 722-2929

Performance Dates:
12/2017 to 12/2018

DEBRIS VOLUME: 494,974 CY OF DEBRIS REMOVAL AND 39,411 HAZARDOUS TREE REMOVALS

CONTRACT VALUE: $35,404,180.00

In 2017, TFR was tasked by the Department of Transportation of Puerto Rico, with the debris removal and hazardous tree abatement for the eastern quadrant of the island. This included a wide-spread area encompassing 15 major towns, many miles of rural roads, and "El Yunque", the only rain forest in the United States Forest System. This area was devastated by cat 5 Hurricane Maria, which brought landslides, flooding, and extensive wind damage. Upon activation TFR quickly mobilized a team of project, safety, and quality control managers to assess the area and plan the best strategy for recovery. Our managers first segmented the island into 5 regions, with each region reporting bi-daily to the project superintendent. TFR coordinated directly with all entities such as DTOP, NFS, and NPS to determine their priorities and build the foundation for our mission planning. This allowed our team to cater resources to where they were needed the quickest and provided a seamless line of communication across the entire project. Once management and assessments were in place, TFR deployed over 40 experienced arborists to begin removing downed and hazardous trees in areas where power had not yet been restored. By forming business relationships with state-side freight companies, we were able to rapidly deploy numerous self-loaders, tracked machines, and other important support equipment by barge, with minimal delay to the task at hand. We partnered with local labor providers to ensure a large pool of general labor availability to meet the demands of our clients in the timeliest manner. Using in-house resources, continuing sub-contract agreements, and local resources TFR was able to staff hundreds of qualified individuals within a matter of days, and begin recovery operations almost immediately following our NTP. Each region was assigned multiple safety officers to ensure that we maintained a 0% reportable injury rate, as well as to train new hires during the fast-paced onboarding. These safety officers performed daily tailgate meetings, insured traffic control guidelines were

followed, and provided for the overall safety of the workers in their respective districts. All safety officers were responsible for implementing the approved AHA/JSA guidelines. This job safety analysis was reviewed by the QCO throughout the project and revised to reflect unforeseen hazards that arose during the mission. After these revisions were made the QC department performed regional training sessions to ensure that all safety officers as well as general employees, were aware of the amendment or addition. Any safety concerns or issues with each sector were reported back to the Regional Quality Control Officer daily. These allowed problems arising in one area to be potentially circumvented in other areas of the project ahead of time.

Our team worked hand and hand with our Leander, Texas headquarters to ensure that all supplies, housing, and logistical needs were streamlined. This support staff was an integral part of ensuring efficient operations given their ability to secure vital resources on a day-to-day basis, many times on short notice. All support staff from HR to the Contract Administrator maintained around-the-clock availability, allowing them to provide our team with the assistance they needed when they needed it. These off-site team members were able to procure land use agreements, coordinate subcontractor dispatching, and build vendor partnerships that eased the burden for on-site managers, allowing them to focus on completing the mission. Through clear communications, precise planning, adaptability, and team coordination we successfully removed, reduced, and disposed of more than 494,000 cubic yards of debris and over 39,000 hazardous trees. Crews worked seven days a week and employees were staggered to prevent fatigue and maintain productivity. Our QC Officers made daily status checks with TFR regional project managers as well as the client. Each Officer's task was project-area specific. This allowed for all work performed to be verified and either corrected or approved, immediately following its completion. With detailed reporting from our quality control department, transparency between operations and safety managers, and constant communication with headquarters as well as the client, TFR restored a sense of normalcy to an area that was devastated. Our management system and company policies proved to accomplish this with the shortest impact on the local community, as well as the lowest cost to the Department of Transportation.

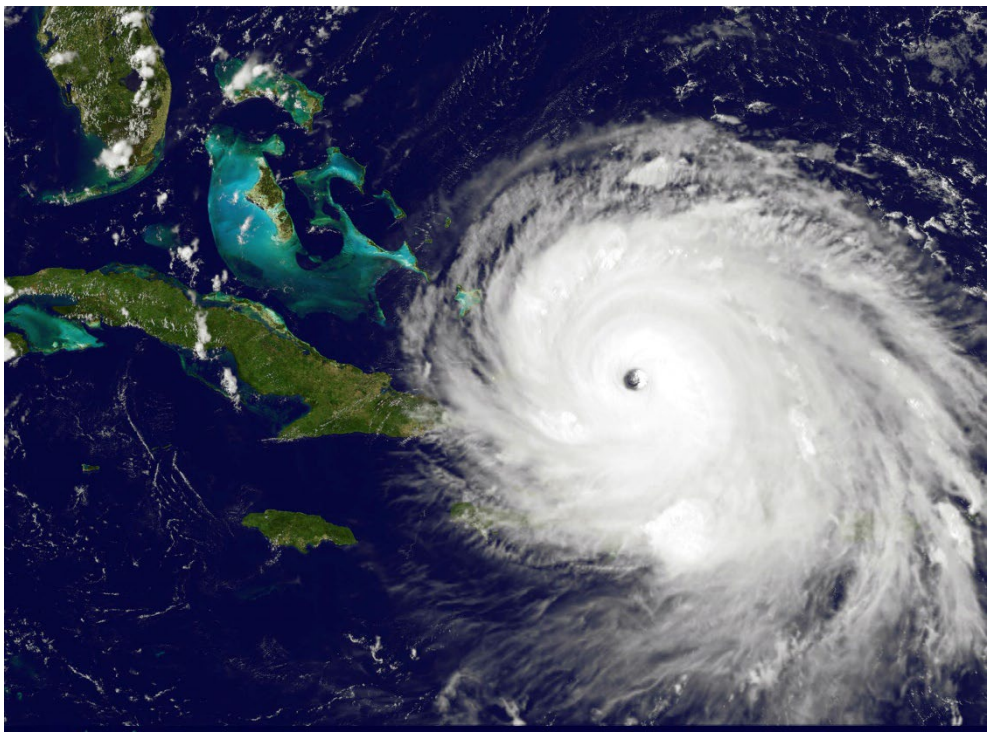
Event: Hurricane Irma, FEMA-4337-DR



City of Plantation

Steve Rodgers
Director of Public Works
400 NW 73rd Avenue
Plantation, FL 33317
(954) 452-2535

Performance Dates:
09/2017 to 12/2017

DEBRIS VOLUME: 500,000 CY OF DEBRIS REMOVAL AND 12,000 HAZARDOUS TREE, LIMBS, AND STUMP REMOVALS

CONTRACT VALUE: $8,200,063.00

The 2017 hurricane season was an extremely active year with multiple large-scale disasters impacting the United States mainland. Upon the landfall of Hurricane Harvey causing widespread damage throughout the western gulf coast, TFR was activated to assist the Texas Dept. of Transportation with debris removal operations in many areas of the state. Within two weeks of these activations, disaster struck again with the south Florida landfall of Hurricane Irma. Making an initial impact near the Florida Keys, as a category 4 storm and moving rapidly inland, this cyclone brought with it widespread power outages and countless: downed, snapped, and uprooted trees throughout the state. TFR held a pre-event, secondary contract with the City of Plantation, Florida. However, when this catastrophe struck, the primary contractor did not respond. Within 24 hours of receiving NTP from our client, resources were dispatched and TFR management, as well as equipment, arrived on-site to assist with their recovery efforts. Our extensive in-house resource availability allowed us to self-perform this entire project, without the use of subcontractors, while still fulfilling our demands on other removal missions nationwide.

Given the vast amount of vegetative as well as construction and demolition debris that this storm left behind and the need to segregate, haul, and dispose of it accordingly, TFR dispatched a variety of much-needed assistance to the area. This included numerous bobcat crews for ROW debris segregation, hazardous tree removal crews, large-capacity self-loaders, and field assessors. TFR worked closely with city roadway managers to prioritize our operations planning and provide the fastest

Testimonial

"In 2017, Hurricane Irma devastated the City of Plantation, Florida. TFR Enterprises was successful with completing the debris removal and recovery efforts for our community."
Steve Rodgers

benefit to their community. The city was split into grids, allowing for maximum productivity, and simplifying the QC process. Within the first two weeks of beginning our mission, crews removed over 70,000cyds of debris from the city right-of-way system. This momentum was maintained throughout our contract. With this event occurring in early September, TFR understood our client's sense of urgency to clear this debris quickly, as hurricane season had just begun. With that in mind, crews swiftly collected and delivered for final disposal over 500,000 total cubic yards of debris as well as safely removed nearly 12,000 hazardous limbs and trees well ahead of our contractual deadline.

Recognizing the expertise, speed, and versatility that TFR encompassed, the City of Plantation amended the scope of work to include the city's floodwater management system. This work consisted of removing debris from drainage canals that had been left behind by Hurricane Irma. To accomplish this efficiently, specialized equipment was required. TFR utilized a 20-foot barge which was set into the waterways at strategic locations using a crane. This barge was equipped with a separate crane and grapple combo, which was used to collect the debris and deposit it onto loading areas for our haul units to remove and dispose of. This work was started immediately upon issuance of the amended task order and was concluded within a matter of weeks.

Our experience in disaster preparedness, proven ability to react and respond, and our strive for fast recovery, allowed us to deliver our clients with an unmatched level of service. The City of Plantation was successfully restored to pre-storm conditions, without delay, and at a minimal financial expense, setting the foundation for an ongoing government/contractor partnership.

Additional Disaster Experience

The following pages document TFR's extensive experience within the debris removal industry over the past fourteen (14) years, including the season, storm, contract terms, and contract amounts. Simply put, this is ALL we do. We are dedicated to our trade as a disaster relief and recovery contractor. As we have stated before, TFR takes extreme pride in conducting ourselves with professionalism, completing projects on time and within project requirements, and fulfilling the desires and wants of our clients. In the end, we always remember our reputation is all we have to sell.

Qualifications and Experience of Key Personnel

Experience and Qualifications of Key Personnel

TFR has assembled a team with a combined 155 years of experience in emergency debris removal, reduction, and management services. From Hurricane Andrew to the devastating effects of Hurricane Ida, TFR personnel have participated in relief efforts across the country, on different continents, and in varying debris capacities. As one of the most experienced project teams in the industry, agencies are contracting with a company deeply rooted in customer value, experience, and expediency. These principles, on which TFR is built, drive our current customer relationships and further the growth of the company.

TFR's Management Team

Key Personnel	Contact Information	Worked Together	Industry Experience	Disaster Experience
Sharon Lyell Operations Manager	sharon@tfrinc.com (512) 576-3000	✓	**15 Years**	HURRICANE, TORNADO, FIRE, ICE / SNOW, FLOODING
Tiffany Jean Contract Manager	tiffany@tfrinc.com (512) 565-0710	✓	**13 Years**	HURRICANE, TORNADO, FIRE, ICE / SNOW, FLOODING
Rigo Mejia Site Manager	rigo@tfrinc.com (512) 779-7722	✓	**13 Years**	HURRICANE, TORNADO, FIRE, ICE / SNOW, FLOODING
Kevin Rolison Project Manager	kevin@tfrinc.com (512) 944-8766	✓	**20 Years**	HURRICANE, TORNADO, FIRE, ICE / SNOW, FLOODING
Melvin Utterback Project Manager	melvin@tfrinc.com (606) 776-9782	✓	**18 Years**	HURRICANE, TORNADO, FIRE, ICE / SNOW, FLOODING
Steven Vinyard Project Manager	steven@tfrinc.com (512) 619-1087	✓	**7 years**	HURRICANE, ICE / SNOW, FLOODING
Roger Barfield Safety Manager	roger@tfrinc.com (407) 868-0568	✓	**6 Years**	HURRICANE, TORNADO, ICE / SNOW, FLOODING

Operations Manager: The operations manager will supervise and direct all field operations for TFR. In addition to the execution of field operations, the operations manager will ensure full compliance with all corporate, municipal, state, and federal safety and environmental policies. Duties also include:

- Direct all project managers, site managers, and safety officers.
- Assign company-owned and subcontractor resources to debris zones, ensuring that the equipment placed in each zone is the most efficient, depending upon the zone's geographic and demographic constitution.
- Maximization of debris stream recycling if possible

Snapshot of Certifications

- ☑ **United States Army Corps of Engineers,** Construction Quality Management
- ☑ **United States Army Corps of Engineers,** 30-Hour Construction Safety
- ☑ **United States Army Corps of Engineers,** Safety Level 2 Assessment
- ☑ **United States Army Corps of Engineers,** Debris Level Two
- ☑ **National Incident Management System** ICS-100,200,700,703,706,800
- ☑ **OSHA** 40-Hour HAZWOPER

Contract Manager: The contract manager will be the ultimate liaison between the client and TFR for the entirety of the debris mission. The contract manager will be available 24 hours per day, 7 days per week, with redundant communication capabilities including cell phones, satellite phones, and email. His/her responsibilities will include:

- Primary client/consulting firm point of contact.
- Receipt of client direction and development of a corporate strategy to best fulfill the client's needs.
- Communicate with the operations manager regarding mobilizing resources.
- Supervise and execute contract documents.
- Ensure all corporate reports and deliverables meet the client's expectations.

Site Manager: The site manager is responsible for all operations within their assigned debris management site, including:

- Safety compliance
- Environmental compliance and monitoring at the site.
- Proper debris segregation and reduction
- Coordination of reduction and haul-out schedules

Project Manager: The project managers are primarily responsible for the day-to-day operations within the zone(s) to which they are assigned. The responsibilities of the project managers include:

- Ensure all operational processes within their debris sone are being executed to full compliance with the FEMA Debris Management Guide/Public Assistance Program and Policy Guide
- In conjunction with the safety officer, host daily instructional and safety meetings
- Serve as initial contact and point of resolution for any complaints.
- Direct all debris crews to their assigned work zones.
- Execution of daily reports, including the keeping of a daily log of activities within their zone
- Assignment of daily road schedules

Safety Manager: The safety manager has complete responsibility and authority over all safety issues at all levels of contract performance including the power to unilaterally alter, suspend and/or halt any operation or portion thereof that endangers or potentially endangers life, health, and safety or threatens the protection of the environment. Includes documentation, daily reporting requirements, communication, and conducting onsite training and inspections. The safety manager is responsible for ensuring complete compliance with OSHA, USDOT, DOL, as well as all other applicable regulatory bodies.

Please see the enclosed resumes for more information on the qualifications of our management team and resource personnel.

Tipton Rowland
President/Chief Executive Officer
601 Leander Drive
Leander, Texas 78641
M: (281) 731-4398

Introduction

Tipton Rowland founded TFR Enterprises, Inc. in 1989. A disaster services division was added in 1992 to include debris management following disasters such as hurricanes, floods, ice storms, tornados, and earthquakes. Projects that have been undertaken and completed under his supervision include Vegetative and C&D Debris Removal from Rights-of-Way and streams and canals, Temporary Debris Storage and Reduction Site (TDSRS) management, weed and brush control services, tree pruning, trimming and removal services, mulch and compost production services, vegetative debris incineration (Open Burn and Air Curtain), vegetative reduction by grinding, separation and recycling of C&D debris and demolition of residential structures. Mr. Rowland has overseen 250+ separate disaster response projects, which were federally funded by the Federal Emergency Management Agency (FEMA). By providing "hands-on" oversight as President and Chief Executive Officer of TFR Enterprises, Inc., he has successfully performed as a damage assessment evaluator, cost proposal estimator, project supervisor, safety, and compliance officer, and has assisted in interacting with local government officials in developing debris management policies in compliance with State and Federal (FEMA) reimbursement regulations.

Julie Rowland
Chief Financial Officer
julier@tfrinc.com
601 Leander Drive
Leander, Texas 78641
M: (512) 751-9799

Introduction

Julie Rowland joined TFR Enterprises, Inc. in 1989 and came on board full time after graduating from the University of Memphis with a bachelor's degree. She has been involved in the overall well-being of the company since its formation. Julie has 30 years of experience in Debris Management Operations. She possesses the ability to effectively manage on-site and off-site project personnel and operations management. Julie monitors key metrics on projects and immediately acts to rectify any inefficiencies. Julie has strong relationships with customers, subcontractors, vendors, monitoring firms, and suppliers. Transparency and open communication are key to a successful emergency debris removal contract and that is Mrs. Rowland's approach. Her leadership and ability to work in fast-paced environments make her an important asset on disaster projects. Applying lessons learned from 30 years of involvement in hundreds of projects, she has put processes and procedures in place to ensure compliance and reduce or eliminate the possibility of deficiencies. Her experience in the management of debris removal operations is unparalleled in the industry.

Drake Rowland
Environmental Manager
Draker@tfrinc.com
601 Leander Drive
Leander, Texas 78641
M: (512) 569-4605

Introduction

Drake Rowland is the son of the owner Tipton Rowland. He has been working at TFR since he was in high school spending his summers assisting in any way possible. Drake has first-hand experience from the ground up with all aspects of TFR's work. From assisting our mechanics to running job sites Drake has seen it all. He also graduated from Texas A&M University in 2018 with a Bachelor's in Mechanical Engineering. Since then, he has worked full-time at TFR as the Environmental Manager. In this role he has performed client outreach, ensured TFR compliance with all regulations, and other roles to help TFR run smoothly and grow as a company. Drake has extensive knowledge of the industry and knows what it takes to get the job done efficiently and correctly.

Jack Anderson
Director of Government Relations and Business Development
jack@tfrinc.com
601 Leander Drive
Leander, Texas 78641
M: (407) 760-0758

Introduction

Mr. Anderson has extensive experience in government affairs and public policy, having worked in multiple roles within state government. He has served as a public affairs officer, a legislative aide in the Florida House of Representatives, and most recently as the Chief of Staff to a Florida state Senator. Mr. Anderson has in-depth knowledge of the legislative, regulatory, and political processes governing the emergency management industry, and is highly skilled at developing collaborative relationships with government entities. During his tenure in the Florida Legislature, Mr. Anderson was assigned as the legislative liaison to county emergency operations centers during Hurricanes Dorian, Laura, Eta, and Ian, assisting with intergovernmental relations and serving constituents impacted by the storms. Mr. Anderson is responsible for establishing and maintaining strong relationships with state, county, local, and tribal governments across the country to prepare for and respond to natural disasters.

Kevin Rolison
Project Manager
Kevin@tfrinc.com
601 Leander Drive
Leander, Texas 78641
M: (512) 944-8766

Introduction

Mr. Rolison joined TFR Enterprises, Inc. in 2002 and immediately began taking a very hands-on approach to debris removal operations. He started as a grapple truck operator and is now a seasoned Operations Manager. He has deployed to more than 80 emergency debris removal projects for federal, state, and local government entities. Before joining TFR, Kevin had 10 years of heavy equipment and commercial truck driving experience. In 2004, Mr. Rolison served as project manager on various projects resulting from Hurricanes Charley, Frances, Jeanne, and Ivan in the state of Florida. In 2005 after Hurricane Katrina, Kevin deployed to Louisiana and worked as a Project Manager for Belle Chase Military Base. In 2006, he deployed immediately to Texas after Hurricane Rita where he continued as a Project Manager, working simultaneously in 6 counties. His strong verbal and written communication skills, leadership skills, experience, and diplomacy quickly promoted him to project Operations Manager. Mr. Rolison's tenure enables him to easily estimate cubic yardage at a historically accurate level, create an operational plan and efficiently execute it for a successful response to complex and diverse debris removal projects caused by natural and manmade disasters.

Melvin Utterback
Project Manager
Mel@tfrinc.com
601 Leander Drive
Leander, Texas 78641
M: (606) 776-9782

Introduction

Melvin Utterback became an integral part of the TFR Team in 2004 when he came on board to assist in the clean-up efforts following Hurricane Ivan. TFR was called upon for immediate support in debris removal and hazardous tree trimming at the Naval Air Station (NAS) Pensacola. Mel proved to be a capable self-loading grapple truck operator, as well as an excellent equipment operator with effective leadership skills. With the specialized skills and teamwork attitude that Mel possesses, he earned a swift promotion to Project Manager for TFR. After Katrina hit the Mississippi-Louisiana coast in 2005, Mel was called to the lead at Gulfport Navy Base and Belle Chase Naval Air station in New Orleans. Conditions at the bases were extremely primitive, Mel and his team slept on the ground for 6 weeks while building a man cap out of a golf course for the military and Seabees. Because of his accurate documentation, strict adherence to Job Safety Analysis, and Zero Defects, Mel is TFR's go-to Senior Project Manager for Federal Contracts and Military installations. Mr. Utterback can successfully lead debris management crews in all operations; debris hauling, ROW emergency push, hazardous tree work, large and multiple debris site management, and grinding operations to load and haul out and final disposal. Mel has successfully managed emergency debris projects for TFR for over 17 years and has had zero recordable injuries throughout his tenure with the company. Mr. Utterback's effective communication skills and experience with critical logistics planning continue to earn him excellent project evaluations from Emergency Debris Management contracts managed under his direction.

Rigoberto Mejia
Site Manager
Rigo@tfrinc.com
601 Leander Drive
Leander, Texas 78641
M: (512) 779-7722

Introduction

Mr. Mejia joined TFR Enterprises, Inc., in 2008 after Hurricane Ike made landfall in Texas. Rigo's on-site experience since joining TFR includes emergency debris operations responding to hurricanes, ice storms, floods, fires, tornados, and mudslides. With experience working in all phases of debris management such as hauling, grinding, equipment operations, tree trimming and removal, waterway debris removal, site set-up (permitting) and restoration, equipment repairs, managing personnel and subcontractors, and more. Well-versed in field and site operations, he has become a veteran operations planner. Rigo worked with USACE on LA Division Basin and Channel Debris Removal after the mudslides in 2017. Rigo attends pre-event readiness meetings with clients annually and assists with the creation of debris management plans as needed. When TFR is not on an active project, Rigo spends his time at Austin headquarters taking inventory and assessing equipment needs. He schedules maintenance and repairs, and orders necessary inventory of critical stock parts so that equipment can be immediately repaired to avoid downtime during a debris recovery project. He keeps open communication with subcontractors to retain critical relationships even when no contracts are active. He has responded to more than 28 federally declared disasters and has a vast knowledge of debris removal operations, equipment, and FEMA guidelines.

Steven Vinyard
Project Manager
Steven@tfrinc.com
601 Leander Drive
Leander, Texas 78641
M: (254) 396-2995

Introduction

Steven Vinyard joined TFR Enterprises, Inc. in June of 2015 as a field supervisor and his enthusiasm for quality and efficiency quickly led him into the role of Project Manager for emergency debris management. Mr. Vinyard has more than 20 years of hands-on experience with all types of heavy equipment, specialized machinery, and commercial trucks. His experience in operating, repairing, and maintaining all types of equipment is invaluable in managing daily operations of emergency debris removal projects. Steven's positive attitude, willingness to help others, and clear communication skills naturally lead others to reach maximum potential in safety, production, and quality. Mr. Vinyard has participated in the successful management of more than 30 contract task orders responding to a variety of natural disasters such as hurricanes, floods, tornados, and straight-line winds. Mr. Vinyard's experience has allowed him to become proficient in FEMA guidelines on eligibility for the right of way debris removal, hazardous leaners and hangers, stumps, right of entry requirements for private property debris removal and waterway debris removal, exceptions for gated community access as well as locating, permitting, setting up and site remediation for temporary debris management sites.

Juan (Mike) Mejia
Service Manager
Mike@tfrinc.com
601 Leander Drive
Leander, Texas 78641
M: (512) 944-4327

Introduction

Mike Mejia joined TFR Enterprises, Inc in 2008 after Hurricane Ike made landfall in Texas. Mr. Mejia has 12 years of experience performing equipment repairs and maintenance. The specialized fleet owned by TFR requires Mike to have an in-depth knowledge of every type of equipment from Self-Loading Knuckleboom trucks to Diamond Z 1463 Tub Grinders. Mike can design and fabricate any part for any machine in our fleet during emergency debris operations, ensuring minimal to no downtime. Mike leads the maintenance crews both on-site during disaster response and in-house at the TFR Headquarters where the fleet is maintained and repaired when not responding to disasters. Mike also orders all inventory of critical replacement parts for key components as well as shop supplies and specialty tools. He also sets the priorities and schedules of equipment repairs and maintenance for all in-house mechanics. Mike oversees safety and housekeeping in the TFR shop and has successfully managed zero injuries or incidents in the last 5 years.

Roger Barfield
Fleet Manager/Safety Manager
Roger@tfrinc.com
601 Leander Drive
Leander, Texas 78641
M: (407) 868-0568

Introduction

Mr. Barfield joined TFR Enterprises, Inc., in 2016 following successful employment for a Heavy Highway Construction Firm out of Texas. As a safety manager in civil construction, Roger gained valuable knowledge in all aspects of Occupational Health and Safety and Project Supervision. Roger was specifically tasked with implementing road detours, road closures, bridge closures, high traffic maintenance, and direction/diversion of traffic. This experience makes him the TFR expert on ROW safety. Mr. Barfield recruits, trains, and manages all maintenance of traffic crews for TFR Department of Transportation jobs nationwide as well as flaggers on city and county projects. Roger spent several months in deteriorated conditions in Puerto Rico in response to Hurricane Maria devastating the island. He was the safety manager for debris operations for the entire eastern quadrant of the island. His supervision led to a successful zero injury and zero-incident record for that project. Roger has also served as administrator and project supervisor on 4 military bases. His position on other storm recovery contracts includes quality assurance, safety, traffic maintenance, and project superintendent.

Sharon Lyell
Operations Manager
Sharon@tfrinc.com
601 Leander Drive
Leander, Texas 78641
M: (512) 576-3000

Introduction

Sharon Lyell has 30 years of experience in successful project management and quality control. As TFR's Operations Manager, Mrs. Lyell is fully committed to the successful operations of all projects by ensuring safe and efficient productivity for every client. She has established detailed quality control procedures and measures for all aspects of performance, which encompasses both office and field operations to ensure that key metrics are met or exceeded. She has successfully overseen field operations and administration of more than one hundred thirty projects during TFR's contract performance over the past 15 years, ensuring subcontractor conformity and project reimbursement documentation compliance for FEMA funding. She builds and maintains excellent working relationships with hundreds of qualified debris hauling and hazardous tree removal subcontractors nationwide. Sharon ensures that subcontractors are trained annually on TFR's procedures and FEMA eligibility, guidelines, and policies. Sharon has the authority to stop work for quality issues &/or non-compliance. Sharon has extensive training and experience in quality control, quality assurance, zero defects, and process improvements. This experience has proven invaluable in assuring full compliance with Public Assistance Program and Policies throughout Emergency Debris Removal Contract performance. Sharon continually reviews FEMA policies and stays abreast of changes to policies to ensure complete satisfaction and 100% eligible funding for applicants.

Tiffany Jean
Contract Manager
Tiffany@tfrinc.com
601 Leander Drive
Leander, Texas 78641
M: (512) 565-0710

Introduction

Tiffany Jean joined TFR Enterprises, Inc after graduating from Texas A&M University in 2007. She has more than 13 years of Contract Management experience where her attention to detail and responsiveness is extraordinary and her value within the organization is unparalleled. Mrs. Jean handles all contract documentation, and all city, county, and state registrations throughout the United States. Tiffany ensures field documentation on debris removal projects follows contract requirements and the Quality Control Plan for FEMA reimbursement. She stays abreast of FEMA changes in policy while maintaining excellent ongoing relationships with all TFR's clients. This experience has proven invaluable in complying with federal regulations required by Emergency Debris Removal contract performance and documentation to receive FEMA reimbursements.

Emergency Debris Management Projects		2007-2020

Education/Certifications

- Bachelor of Arts- History, Texas A&M University
- FEMA IS: 001, 005, 035, 100, 200, 800, 906, 907, and 909.
- USACE: Construction Quality Management for Contractors, #784
- Project Management Workshop
- DOT Compliance Workshops: Audit Survival, Driver Qualification Files, Hours of Service, Maintenance Management, Accident Reporting, Supervisor Drug and Alcohol
- GHC TS 10: Debris Management
- CPR Certified

Sally Wallace
Human Resources/Driver Compliance
sally@tfrinc.com
601 Leander Drive
Leander, Texas 78641
M: (512) 931-9031

Introduction

Sally Wallace joined TFR Enterprises, Inc. in February of 2018. She has over 20 years of experience in Accounting, HR, and Payroll serving as both a Full Charge Bookkeeper and Office Manager. She has experience in certified payroll for multiple jobs and has effectively handled an increase in employee count from 18 employees to 160 employees in less than two weeks when disasters strike. Sally also participates in continuing education classes to remain in compliance with DOT regulations for onboarding of CDL drivers and assists our fleet department and project management to ensure employee training and documentation of training is current.

Education/Certifications

- Bachelor of Management, University of Phoenix
- Mastering QuickBooks, Level 1
- CPR Certified

Victoria Balak
Contract Administrator
victoria@tfrinc.com
601 Leander Drive
Leander, Texas 78641
M: (512) 410-9166

Introduction

Since joining TFR in 2021 Mrs. Balak has been responsible for all aspects of office personnel and communications. She is responsible for the oversight of bid and contract documentation and management and serves as the key administrative contact in the home office for project supervisors in need of additional resources in the field, such as equipment rental, fuel companies, sub-contractors, local temporary labor agencies, etc. Mrs. Balak also represents TFR Enterprises at national trade shows and conferences, exhibiting the company's services and capabilities.

Proposed Subcontractors

TFR Enterprises, Inc. maintains a current, constantly updated database of subcontractors by location, classification, equipment resources, and capability. The working relationship with this reservoir of close-knit subcontractors has been so successful that a majority of them, following a disaster event, will not offer their services to, or accept an offer from, another contractor until first consulting with TFR's management personnel as to their subcontracting needs. A network of communication and contact of these subcontractors in the event of a disaster has been divided among the TFR management team in advance, which has enabled the company to contact, activate, and mobilize as many as 630 pieces of equipment in 30 days as the company did following Hurricane Laura in 2020. These subcontractors are considered as much a part of the disaster response team as are the full-time employees of TFR.

Local and Disadvantaged Business Subcontracting

At TFR, we firmly believe that local contractors provide the most cost-effective measure to complete the contract requirements while aiding the local economy after the impact of a disaster. TFR plans to utilize local subcontractors to the extent to which they are available and properly licensed. TFR shall exhaust any avenues to obtain qualified local subcontractors to meet the needs of the community while infusing the local economy with needed revenue. As such, TFR is committed to identifying the local subcontractors qualified and prepared to support the community on the path to recovery.

During the past three (3) decades, TFR has actively promoted the participation of Small Business Enterprises (SBE), Disadvantaged Business Enterprises (DBE), Women-Owned Business Enterprises (WBE), Minority-Owned Business Enterprises (MBE), and Veteran-Owned Business Enterprises (VBE), in the performance of disaster-related debris removal projects. Born from a small tree service company in 1954, TFR was a long-time small business-enabled firm working in Memphis, Tennessee. Renamed TFR and incorporated in 1989, owner, Tipton Rowland, considers this sector of the industry to be a vital and reliable source of debris management resources recalling his days as a small business owner himself. As such, TFR executives are directly involved in the achievement of SBE's and DBE's plans and goals by the project.

Proposed Major Subcontractor

Timberline Trading Inc. Disaster Recovery Division	• 35 years of proven disaster debris removal and management experience • Over 200 units of company-owned specialized equipment including knuckle boom trucks, heavy haulers, dump trucks, bunkhouses, airboats, barges, skid steers, dozers, excavators, loaders, skidders, and tree cutters • Owner and key employees certified in tree removal/chainsaw management by the Missouri Forestry Department • Partnered on more than 50 projects with TFR, over the last 20 years.	**Recent Projects Completed with TFR:** • Jacksonville, AR • City of Cedar Park, TX • Hancock County, MS • City of Choctaw, OK • City of Enid, OK • City of Blanchard, OK • City of Norman, OK • City of Citronelle, AL • Alabama DOT, Dallas County • City of Robertsdale, AL • Rapides Parish, LA • City of Corpus Christi, TX

Timberline Trading is a leading subcontractor in the disaster debris removal industry. Thirty-five years of experience has allowed the team at Timberline to master the skills and FEMA knowledge necessary to

complete any size debris mission. Timberline's tenured management team gives them added ability to manage a wide range of disaster response services. With more than 200 pieces of specialty equipment, Timberline can respond immediately to all emergencies. Company-owned bunkhouses and generators allow Team Timberline to respond to devastated areas where housing or electricity is not available. Timberline has been a major subcontractor for TFR since 1995.

Proposed Major DBE Subcontractor		
LYELLCO	• **Women-Owned Business (WBE)** • Incorporated in 2013 • Principles hold Florida & California Contractors License • Owner and Principles have more than 25 years of combined experience in Disaster Response, Debris Removal, and Hazardous Tree Removal Services • Partnered on 7 projects with TFR, over the last 8 years.	**Recent Projects Completed with TFR:** • Hardin County, TN • City of Leader, TX • FDEP- Highland Hammock State Park • Kentucky Transportation Cabinet, KY • Oklahoma City Parks, OK • City of Corpus Christi, TX • Texas DOT, Montague County • Louisiana DOT, Cameron Parish • Tyndall Airforce Base, FL • North Carolina DOT, Sampson County

Lyellco, Inc. is a family-owned tree trimming and disaster response company incorporated in 2013 as a small woman-owned business. Lyellco owns 27 pieces of equipment and has performed more than 20 federal and state contracts nationwide, responding to hurricanes, tornados, ice storms, floods, and more. Lyellco strives for the safety of its employees and the communities affected and operates according to FEMA rules and regulations.

The following list is just a few of our available DBE Partners:

DBE Partners	State	Type	Services
Ayleen Trash Hauling Services, Inc.	FL	SBE/MBE	Hauling Services, Hazardous Tree Removal
CSA Land Clearing	FL	DBE	Site Management
Florida Developers of Tallahassee	FL	DBE	Site Management
Gulf Coast Environmental Contractors	FL	WBE	Hazardous Tree Removal

What services does your business provide?

- ☐ Emergency Road Clearance
- ☐ Debris Collection
- ☐ Site Management
- ☐ Debris Reduction
- ☐ Tree Trimming and Removal
- ☐ Hauling
- ☐ Permitted Solid Waste Facility
- ☐ Stumps
- ☐ Snow Removal
- ☐ Project Staffing
- ☐ Marine Debris Removal
- ☐ Sand Screening
- ☐ Recycling
- ☐ Household Hazardous Waste

What equipment is owned by your business? (not contracted equipment)

Tab 2. Operations Plan

Mobilization

Our team has developed efficiencies to deliver exceptional service while minimizing expenses based on decades of experience conducting work on local, state, and federal contracts. We have years of experience with time-sensitive response efforts and emergency debris removal, employing fast-tracked operations to get the job done. We're also cognizant of the fact that following a disaster event, the local economy will have taken a severe hit and the income of many area residents may be temporarily impacted. Our team makes it a point to hire as many local subcontractors as possible and to purchase products and supplies from local suppliers.

Our nationwide subcontractors and vendors have locations across the US and can respond with assets to any disaster nationwide. Our operations manager will call all subcontractors and vendors and place them on 24-hour on-call "standby" and will require them to provide us with a list of available equipment, materials, personnel, and timelines for deployment.

Rapid Deployment

- ☑ **Management Team,** within 12 hours of receiving NTP, TFR will have our management team on-site.
- ☑ **Emergency PUSH Crews,** PUSH crews will immediately begin mobilizing upon notice.
- ☑ **ROW Debris Removal Crews,** hauling operations will begin 24-48 hours from NTP.
- ☑ **Hazardous Tree Removal Crews,** tree crews will begin 24-48 hours from NTP.
- ☑ **Debris Management Site Locating/Set-up,** if not previously identified, we will begin locating/site set-up operations immediately following NTP.
- ☑ **Establish Temporary Office Location,** immediately following NTP, TFR will set up a temporary office or mobilize one of our company-owned command centers.

Key Advantages of TFR's Readiness, Transition, and Mobilization Procedures	
Strategic Planning and Prepositioning	Our readiness, deployment, and mobilization plans outline our steps to mobilize and execute under emergency conditions.
Pre-Event Monitoring	We maintain situational awareness of pending events through continuous monitoring of weather outlets. We begin pre-planning 72 hours before a known projected event will occur.
Continuous Training and Exercises	We will hold annual in-house training sessions and implement programs based on lessons learned from past events.
Subcontracting and Procurement	We have built a large database of specialized, pre-qualified subcontractors and vendors that allow us to procure multiple sources for labor, equipment, and required materials.
Understanding of Emergency Response Processes	We're convinced that, with more than three decades of disaster response experience, we'll exceed the objectives of this RFP.

Project Management Approach

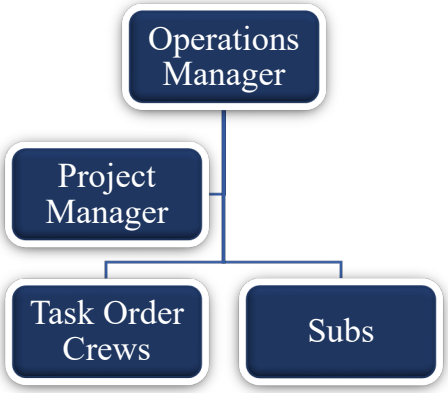
As Prime Contractor, TFR possesses effective program management systems for overall management, reporting, cost and schedule control, and quality assurance. We have a strong track record on similar contingency contracts with USACE, FEMA, and other Federal agencies that will provide valuable lessons learned to be used when disaster strikes. To expediently serve our clients, our organizational approach features several important organizational initiatives, including an emphasis on logistics, optimized subcontractor teaming with regional and nationwide coverage, a 24/7 response from our home office, and localized, dedicated project support.

Managing On and Off-Site Personnel

In a disaster, TFR's approach to resource management is to keep the degrees of separation between the operations manager and field personnel as minimal as possible and ensure that the span of control remains manageable. We provide our managers with the authority to make swift decisions in often unforeseen circumstances. These concepts enable us to remain informed of daily operations, maintain efficiencies, and remain agile to adjust to changes.

On-Site Management

Our team's proposed key personnel have more than 155 years of debris management experience and are committed to sharing their knowledge and capabilities with our clients and mobilizing within 24 hours of notification. Our team is aware of the issues that may arise in the aftermath of a natural or man-made disaster and is prepared and experienced in dealing with them. The debris team will gain a comprehensive knowledge of project goals beyond what is stated in the written scope of work by coordinating with government and municipal disaster management personnel.



Our management structure clearly defines duties and reporting lines for our team and clients. We understand the importance of providing the management team and field personnel with defined roles and a span of control that creates a stable structure for workers functioning in a post-disaster environment. Allowing our personnel to concentrate on specific tasks allows them to focus on the project's objectives and manage them in a way that meets or surpasses all contractual standards set within the scope of work.

Daily operations and planning meetings will be attended by all key personnel to convey the status of ongoing operations, quality, safety, and scheduled activities. These meetings are meant to provide for an open discussion of problems as well as an opportunity for attendees to share ideas that will improve efficiency, safety, and quality. Meeting minutes will be kept and made available so that the project status and work assignments may be documented. The project manager will assign specific crews to localities based on the priorities established by the client's priority routes, debris volume, debris category, disposal options, and available equipment resources.

Our team management and integration plan include the following:

- Subcontract agreements

- Define protocols
- Documentation processes
- Daily/weekly schedule reviews
- Training on quality control, safety, and data reporting
- Performance reviews

Off-Site Management

When multiple missions occur, our program manager will oversee the performance of each operations manager deployed from our corporate office in Leander, Texas. He/she will provide support for subcontracting resources, lodging, fuel, equipment resources, quality control, and health and safety compliance.

Quality Control Overview

TFR has a strong quality assurance/quality control culture, a tried-and-true corporate quality management system that has been employed in all recent disasters, and a track record of high-quality recovery projects. Our quality assurance team is well-versed in corporate procedures. We confirm that the processes, equipment, and verification testing utilized on a wide range of debris removal and other recovery operations correspond to contracts and task order requirements through 3-Phase inspections. (Preparatory Phase, Initial Phase, and Follow-up Inspections), we know that a one-size-fits-all approach to quality control is not realistic, based on lessons learned from previous disaster initiatives. TFR is dedicated to delivering high-quality standards in a cost-effective and timely manner while adhering to government guidelines and regulations.

Clean As You Go Policy

TFR's "Clean as you go" policy applies to all employees and subcontractors during all phases of work. It is designed to ensure and maintain the cleanliness and safety of each work zone to the highest standard. The policy places the responsibility on all workers to maintain the working environment in a clean, tidy, and safe condition at all times when carrying out duties on each pass as thoroughly as practicable.

Safety Overview

The safety and health of our employees continue to be the first consideration in the operation of our business. TFR Enterprises, Inc., and its principals are committed to maintaining a safe and healthy workplace for each employee by providing guidelines for safe practices and accident prevention. Safety is considered a condition of employment and is the responsibility of all personnel associated with TFR, whether in the capacity of employee or subcontractor. As a condition of employment, each employee is expected to use safe work practices and identify all unsafe conditions immediately. All employees/subcontractors are required to report any violations, unsafe conditions, or known safety hazards to their immediate supervisors at once. All subcontractors are subject to TFR's safety and health policy as a condition of the contract agreement.

The responsibility for the health and safety of TFR employees' rests with all levels of management. The specific areas of responsibility are as follows:

- Creating and implementing safe and healthy work practices, working conditions, and a safety mindset among all employees.
- Appointment of appropriate persons to administer the safety and health program.
- Provide a means of collecting, evaluating, and circulating safety and health information, necessary audio-visual aids, and other appropriate materials.
- Maintenance of injury and illness recordkeeping systems with periodic review and evaluation.
- Inspections of health and safety work practices and conditions in the field on a routine basis, utilizing checklists that will be reviewed with site personnel.
- All levels of management and supervisory personnel are committed to the following principles that are the foundation on which the TFR safety and health program are built:
    - All injuries and occupational illnesses can be prevented.
    - All construction and operating expenses can be reasonably safeguarded.
    - Working safely is a condition of employment.

Environmental Overview

TFR is committed to protecting the environment and preserving the Nation's historic resources while complying with applicable Federal environmental and historic preservation laws such as:

- National Historic Preservation Act
- National Environmental Policy Act
- Endangered Species Act
- Clean Water Act
- Clean Air Act
- Coastal Barrier Resources Act
- Migratory Bird Treaty Act
- Resource Conservation and Recovery Act
- Coastal Zone Management Act
- Farmland Protection Policy Act
- Fish and Wildlife Act
- Wild and Scenic Rivers Act
- Magnuson-Stevens Conservation and Management Act
- Executive Order 11988, Floodplain Management
- Executive Order 11990, Protection of Wetlands
- Executive Order 12898, Environmental Justice

The primary potential environmental impacts occur from activities related to debris management sites, individual demolition sites, and transportation activities associated with moving debris and waste along with general transportation activities.

A comprehensive Environmental Protection Plan will be prepared and submitted within five days of notice of award. It will identify specific debris management sites and specific impacts associated with the location(s). This includes site-specific information such as depth to the water table, distance to potential receptors and pathways, and the site setting parameters that may be affected by activities such as dust, odor, noise, traffic, etc. Until the specific debris site is identified, the Environmental Protection Plan cannot be finalized.

This framework is intended to demonstrate our familiarity with the requirement and our ability to deliver the submittal plan as required. It's not intended to be a complete or thorough model for the Environmental Protection Plan.

Pathways to be evaluated and issues to be addressed in the Environmental Protection Plan:

- Air/Dust, Odor, Gases, Smoke
- Water/Storm Water Runoff/Erosion Control, Leaching into Water Table
- Esthetics & Community Relations -Setbacks, Noise, Traffic, Hours of Operation, Tree Preservation, Site Restoration
- Spills and Spill Response

Special Considerations:

- Wetlands Protection
- Ground Water Recharge and Discharge
- Aquatic Food Chain Support
- Fish and Wildlife Habitat
- Fire/Rodent/Wind/Hauling Control

Primary considerations also include prevention of soil erosion and sedimentation, improved air quality, reduced noise pollution, energy conservation through site layout and design, protection of privacy by maintaining and establishing buffers between conflicting land uses and maintaining or enhancing habitat for wildlife through final restoration.

Technical Approach

This operational plan has been thoroughly vetted over years and years of disaster-related debris management projects. Utilized in Plantation, Florida to smaller projects such as Port Aransas, Texas, the operational plan outlined below maintains the flexibility to administer and complete multiple large-scale projects simultaneously without sacrificing safety, transparency, and performance. In 2017, TFR's flexible operational plan was tested. With projects spanning from Puerto Rico, California, and Florida, to Beaumont, Texas, **TFR operated, funded, and completed 26 simultaneous projects with a total value of over $78 MIL.**

FEMA Understanding and Experience

TFR possesses an intimate understanding of the FEMA funding and reimbursement process. **ALL TFR CLIENTS HAVE RECEIVED 100% OF THEIR ELIGIBLE REIMBURSEMENT. TFR HAS NEVER HAD A SINGLE DOLLAR DEOBLIGATED BY FEMA or the FHWA.** We understand that our client's reimbursement is directly correlated to their ability to pay TFR and we work with our clients to ensure this process is as fast and efficient as possible.

TFR personnel has conducted over 350+ federally funded projects, and as such, have gained invaluable experience and familiarity with the FEMA recording and reimbursement process conducted under the federal *Public Assistance Program*. With minimal turnover in our key personnel for the past five (15) years, our employees have been working as a cohesive team to confront FEMA issues and ensure the reimbursement of our clients for 33 years. Sharon Lyell, our Project Administrator, in conjunction with Tiffany Jean, Senior Contract Administrator, heads our *FEMA Compliance Team* in all disaster-related projects. Our *FEMA Compliance Team* is deeply vetted in FEMA management and operational styles, and **NEVER** has TFR, or its officers, had a disputed claim for FEMA reimbursement. These individuals are very familiar with and aware of the federal guidelines for independence in accountability and reporting as well as recognizing that it cannot perform or assume the sovereign duties of the government officials. However, this does not preclude TFR from offering the following services to aid our clients in complying with the federal *Public Assistance Program*:

- Provide extensive pre-event training sessions with a review of previously submitted FEMA paperwork
- Design appropriate cost tracking systems before approval of Project Worksheets is received
- Assist in the estimation of debris volumes by debris types and debris management costs for Preliminary Damage Assessments
- Train clients on FEMA's Cost Estimating Format, a forward pricing model allowing FEMA to account for all possible costs on large projects
- Assist in the preparation of Immediate Needs Funding (INF) requests
- Review the operational procedures of the FEMA Public Assistance Program as it relates to the overall recovery process

Supporting Communities from the Ground Up

☑ Ready
With years of experience helping hundreds of customers, TFR offers a deep understanding of the disaster recovery process. We help our clients put together a plan before a disaster strikes so that they will be ready to respond when it does.

☑ React
TFR hits the ground running as soon as a disaster strike. We can mobilize our expert project managers, crews, and state-of-the-art equipment within hours.

☑ Respond
TFR carefully coordinates every disaster recovery/debris management plan to meet the needs of the community. Our deep planning and project expertise enable us to provide extremely accurate time/cost estimates and meet or exceed all project expectations.

☑ Recover
TFR provides support and technical assistance to help clients navigate a complex maze of state and federal public assistance programs, including FEMA reimbursements, to help disaster-impacted communities get back on their feet as quickly as possible.

- Inform and prepare for critical meetings with FEMA, with emphasis on "Kick-off Meeting" and "Applicant's Briefing"
- Aid in the preparation of Project Worksheets
- Provide, review, and confirm the accuracy of supporting documentation (i.e., Truck Certifications, Load Tickets, Equipment Time Sheets, etc.) for the Project Worksheets to realize full reimbursement

TFR takes a proactive approach to debris management. Enacting a comprehensive, efficient debris management plan, which retains operational flexibility to address problems on the fly, is vital to the success of the project and our client's realization of full FEMA reimbursement. Upon establishment of a debris management plan, we strongly suggest submitting the plan for FEMA review, relieving undue stress over FEMA acceptance following a disaster event.

Training Sessions and Tabletop Exercises

Preparation is the be-all of good emergency management. As such, TFR offers annual on-site training and tabletop exercises for all Clients wishing to participate. Usually lasting 4 to 5 hours, TFR conducts the training service in the months preceding Hurricane Season on simulated events developed by TFR. In the past, we have offered this value-added service to Clients to familiarize ourselves with key emergency management officials and local agencies designated to the project. TFR believes understanding the needs of the local officials allows us to tailor-make a debris management plan that best suits the community.

With TFR's expertise and guidance, the client and TFR will develop a complete, full-service debris management plan that anticipates encumbrances, highlights transparency, emphasizes expediency, and forces accuracy. The preparation and experience gained during our training exercises will position local officials to respond quickly and realize full FEMA reimbursement. Additionally, by identifying key elements, such as DMS and Staging locations, TFR can rapidly mobilize to ensure an efficient response immediately following the storm.

TFR's training session focuses heavily on the following topics:

TFR Spotlight

TFR has successfully completed more than $350,000,000.00 in federally funded task orders.

FEMA Guidelines and Policies

This portion of the training is billed as "How Best to Maximize Your Federal Reimbursement." We walk through, step-by-step, the FEMA *Public Assistance Program* from the Disaster Declaration by the President to the submittal of the "Letter Requesting Project Closeout." TFR will inform our clients of topical and current FEMA guidelines and policies that are affecting the reimbursement process. Additionally, to benefit and familiarize Officials with federal documentation and expectations, TFR will review and analyze a FEMA Reimbursement Submittal from a current client that received full funding. This portion of the training is customized to fit the knowledge and expertise of the local officials, however, in every training session we stress key elements of the process outlined below:

- Review and recommendations for the *Request for Public Assistance Form*
- Training of personnel on federal expectations in Project Worksheets (PW)
    - Review the scope of work justifications including narratives, fiscal documentation, and
    - Analyze accepted content documentation of completed projects, including photo documentation, invoices, etc.
    - Review supporting documentation for PW's for accuracy.
    - Familiarize the client with an individual project and deficiencies of the file, scope of work relating to the project worksheets, and cost estimates.
- Review and identification of eligible equipment, labor, and contracts, accurate unit costs, and scope of work.
- Review and analyze the utilization of Force Account Equipment, Force Account Materials, and Force Account Labor practices for reconciliation with Work Orders and Equipment Codes

- Review and recommendations for *Force Account Labor Summary Record, Force Account Equipment Summary Record,* and *Contract Work Summary Record*
- Review and analysis of the documentation program in keeping with FEMA reimbursement guidelines:
  - Update existing documentation and record-keeping systems to comply with federal reporting and record-keeping, or
  - Propose a record-keeping and documentation system that will comply with federal reporting and record-keeping requirements.
- Provide training and orientation to clerical and department heads on required documentation quality and quantity requirements
- Examine the reconciliation of invoices to appropriate Purchase Orders and PW's scope of work.
- Examine status reports and PW tracking through State and Federal Agencies.
- Review the organization and preparation of invoices, canceled checks, contracts, public notices, bid tabulations, force account labor and equipment information summaries with easy reference tabs, attached in document format, to coincide with the guidance documents utilized by FEMA inspectors
- Examine the drafting and final submittal of the "Letter Requesting Closeout"

Debris Management Site Location and Testing

In conjunction with Government Officials, TFR seeks to aid in selecting and qualifying Debris Management Sites. Identification and selection of an appropriate DMS are vital to the debris management process's efficiency, cost control, and overall safety. The FEMA *Debris Management Guide* outlines the selection of a DMS through the following:

1. Ownership
2. Size
3. Location
4. Environmental and historic concerns

In past planning sessions, TFR and Government Officials have scoured potential areas locating and qualifying numerous DMS through a stringent identification process. Examining the layout of the City/County, possible high-volume areas, and environmental impact, TFR and Officials can establish probable locations that best suit the debris management effort. After sites have been identified, historical information is pulled to ensure compliance with the National Historic Preservation Act, and soil and water samples are collected to file with State Environmental Protection Agencies. Coupled with TFR's unique ability to operate 8 concurrent debris management sites with Company-owned Diamond Z Grinders, the qualification process of logistically, geographically, and environmentally appropriate DMS is key to the efficient, rapid mobilization effort TFR can offer.

Sectoring of the Impacted Area

TFR strongly recommends our clients develop and review sector maps for the debris management plan. If requested, TFR will assist in the establishment of emergency routes with a pivotal focus on immediate-need facilities. TFR prioritizes certain immediate need facilities, including EOCs, government buildings, hospitals, and FEMA Distribution Centers, to employ a rapid 70-hour "Push" to secure facility access. Following the establishment of emergency routes, TFR and Government Officials will review preliminary sector maps and designated DMS for debris collection. Our goal is to develop sector maps that retain flexibility post-storm to ensure efficient allocation of resources to debris-ridden areas while emphasizing safety to our crews and the community.

Pre-Strike Procedures

48-72 hours before anticipated landfall: Both the President and Director of Operations of TFR Enterprises, Inc. have been monitoring and tracking "Mock" hurricanes through local communication and weather channels.

The Director of Operations will contact the known designated Government Representatives and provide them with the primary and secondary, 24-hour emergency contact personnel and points of contact (e-mail and cell phone).

The Contract Administrator in the home office will produce a list of known, experienced subcontractors from the database and sort the list by State (a list can be provided upon request) *Note: The subcontractors listed as pre-qualified are companies familiar with TFR procedures and expectations. In past projects, these subcontractors have been successful in operating alongside TFR and thoroughly vetted.

Project Managers will each be given a group of these subcontractors to contact. Each Project Manager will begin calling the subcontractors and make the following determinations for each and in aggregate:

- Current equipment and personnel on hand and available to commit if tasked.
- Best-estimated anticipated response time if tasked.
- Plans for housing, feeding personnel, and fuel supply resources.

During this same period, the Service Manager in the home office will begin calling Equipment Rental Dealers to identify available equipment on hand, such as Rubber Tired Front End Loaders, Skid Steer Loaders, Grapple attachments, Knuckleboom Loaders, Bucket Trucks, Vacuum Trucks, Water Trucks, Bulldozers, Portable Generators, and Portable Toilets, to augment, if necessary, TFR owned equipment. Also, the Service Manager will prepare preliminary tracking routes for Company-owned equipment and determine what states and what permits may be required if tasked.

An evaluation of the information gathered from the Subcontractors who have been contacted and an estimated crew/response capability will be made in the following priority:

1) Subcontractors on a call with Emergency Road Clearing Equipment.
2) Subcontractors on a call with Loading and Hauling Equipment.
3) Subcontractors on a call with Site Management Equipment.

This information will be added to the estimated crew/response capability of TFR's Company-owned equipment and personnel, and a preliminary mobilization schedule will be prepared.

24-48 hours before anticipated landfall: The Service Manager will begin acquiring trip permits for dispatching the initial transport of heavy equipment (debris clearing and site preparation equipment) to the designated staging area.

Loading and Hauling equipment and personnel will be dispatched to the designated staging area as well as mobile campers and temporary housing units.

The experienced subcontractors previously notified will be contacted by the Project Managers and placed on standby, if necessary. Their mobilization capability and preparedness will be noted and updated in the preliminary crew assessment.

0-24 hours before anticipated landfall: Upon notification of the Government Representative, or at the discretion of the Director of Operations, the *Pre-Execution Planning Team* (Operations Manager, Operations Planner, Project Managers, Environmental Health and Safety Officer, and the Program/QC Manager) will deploy.

To provide an immediate point of contact, at least one (1) TFR Representative shall "ride out" the storm with Government Officials. This TFR representative shall be responsible for coordinating the "push" effort as the *Pre-Execution Planning Team* assesses the damage, and sections of the City/County, if not completed, and mobilizes resources.

A workforce of Management and Loading and Hauling crews (minimum of ten) have been notified, prepared, and will be in the affected Sector/Subsector and poised to respond within a few hours following the landfall or strike for the immediate emergency needs response.

In a post-strike environment, with a Notice to Proceed, the planning team will deploy to the designated location within hours to participate in estimating debris volume, sectoring the disaster area, locating debris sites, determining personnel and equipment requirements, evaluating environmental and health and safety issues, and identifying necessary permits and license requirements. Once this meeting has taken place, a defined list of equipment and personnel necessary will be identified.

During this planning session, the following determinations will be made:

- Total area affected
- Estimated number of Debris (This can be performed by Government Officials or TFR, either by aerial assessment or by "windshield" drive-by through the damaged area)
- Number of Sectors to be assigned for best management
- Number of estimated DMS required for efficient removal
- Location of best possible DMS

Mobilization of Personnel and Equipment

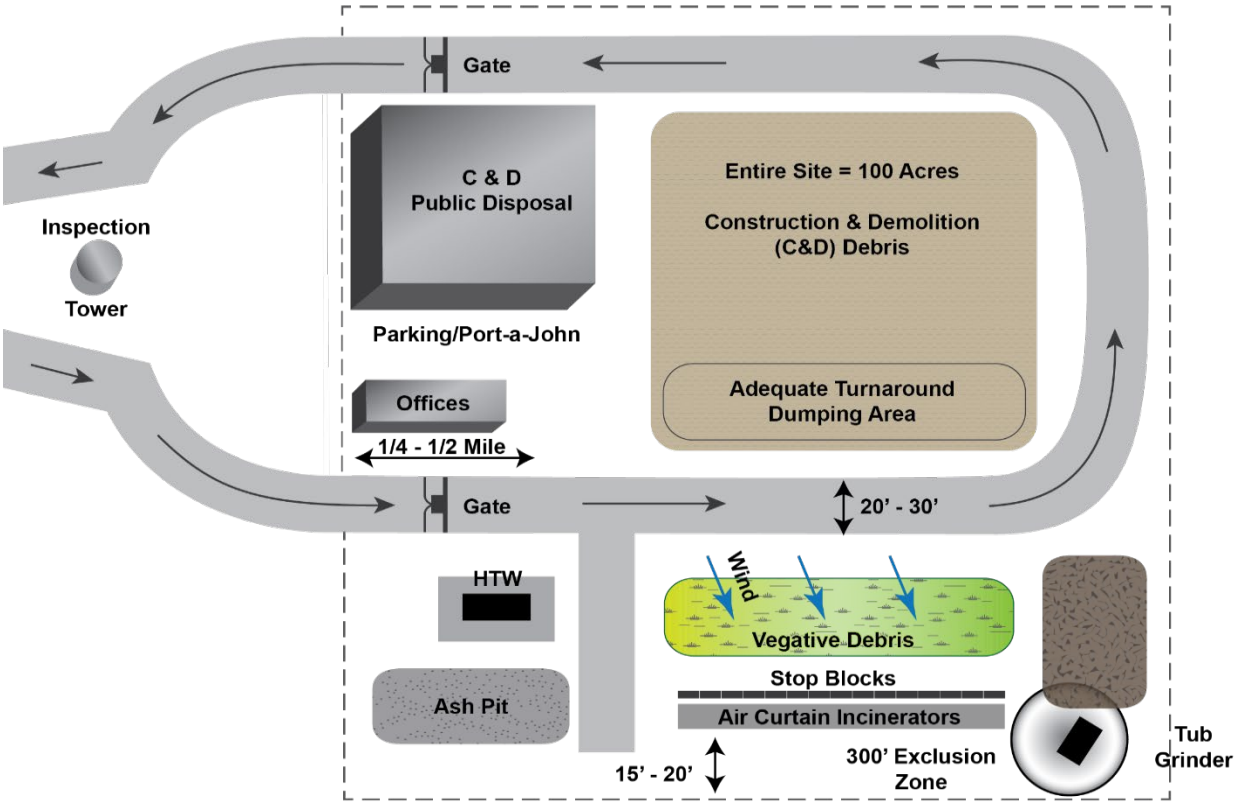
Following the coordination with Government Representatives, and identifying the quantities, sectors, DMS, and production requirements, TFR will continue the mobilization process.

Pre-Execution Planning Team will call a meeting of all Project Managers and alert them to prepare to leave within 24 hours and be away from home for an extended period. Being within relative proximity of the disaster area, TFR can provide an expedient response, as personnel fully understand the requirements and urgency associated with disaster relief and recovery and the little notice provided after the award of a contract. TFR and its partners are fully prepared to meet the mobilization requirements, including the extended time away from families, and fulfill those requirements with the utmost pride in the end product.

- The Operations Manager and his assistant will locate a Staging area where equipment and personnel can be mobilized for inspection and orientation.
- The Service Manager in the home office will deploy one or more of the company's Mobile Field Offices to the Staging area if needed.
- Project Managers will review the equipment and personnel requirements and compare them with equipment already on hand to determine the additional equipment and personnel to be mobilized. The Project managers will then review the Company-owned equipment available list, the selected Subcontractor's immediately available list, and equipment suppliers list. The project managers will notify the subcontractors selected for use on this task order.

- Communication will be given to the dispatcher in the home office about the need for any Company-owned equipment so that they may begin the process of permitting and shipping the necessary pieces. If additional equipment is needed, the project managers will communicate with the equipment manager who will contact the equipment suppliers on standby and order the necessary equipment for the completion of equipment requirements.
- The Operations manager and his assistant will attempt to secure temporary housing, such as RV parks or other suitable locations for temporary use for parking travel trailers. (The company, as well as many of its employees and subcontractors, have self-contained travel trailers which are used in the early response and mobilization of the project. As the local infrastructure improves and the demand for housing (hotels, etc.) decreases, many employees will relocate.)
- The Operations Manager or his assistant will prepare a list of all TFR employees and their Points of Contact (i.e., cell phone, e-mail) and deliver copies to Government Officials.
- The Operations Manager or his assistant will review Subcontract Agreements and supply copies of Current Wage Rates.

Preparation of Debris Management Sites



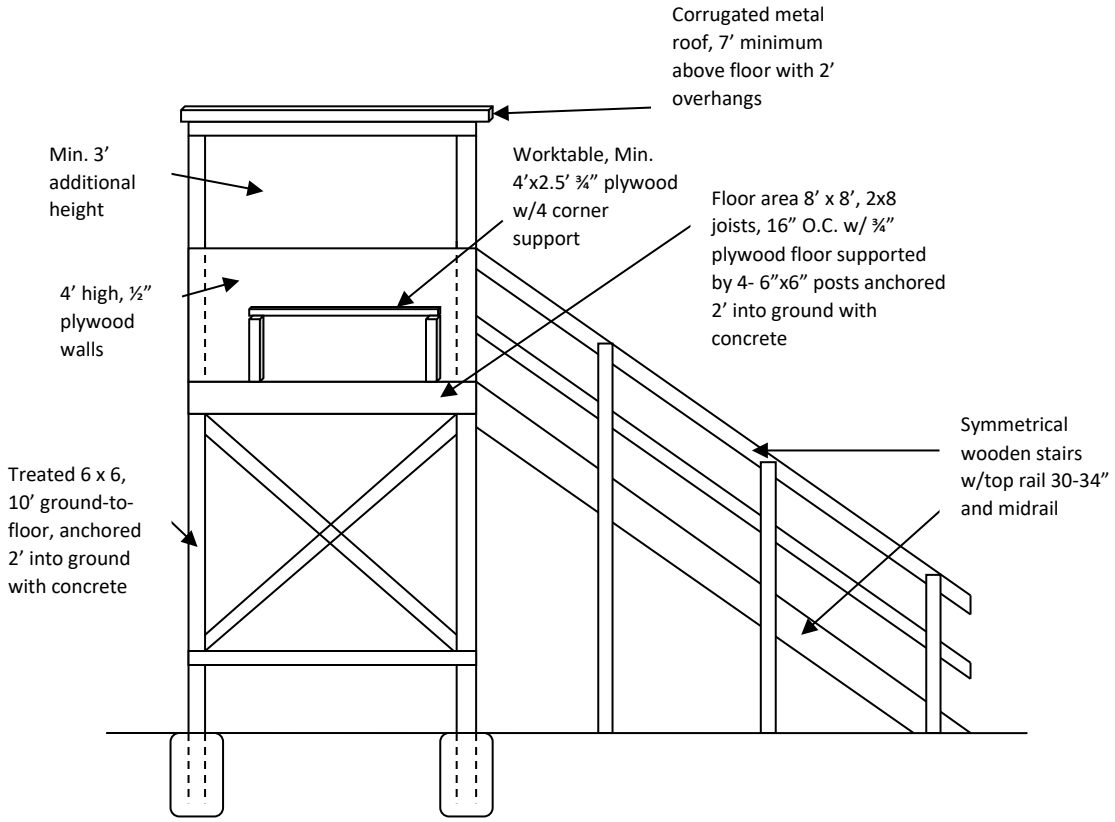
Obtaining and Possessing Necessary Licenses and Permits - The Operations Manager or his designee will investigate the state and local statutory requirements needed to perform the work described in the pre-position planning in the affected areas and determine what permits are necessary to complete the work. Video and/or digital photographs of the site, before the occupation, will be made for the record, in addition to any soil, water, or other test documents. After acquiring all necessary permits and licenses, the Operations Manager and the EHS Manager will then prepare copies of all necessary permits for delivery to Government Representatives.

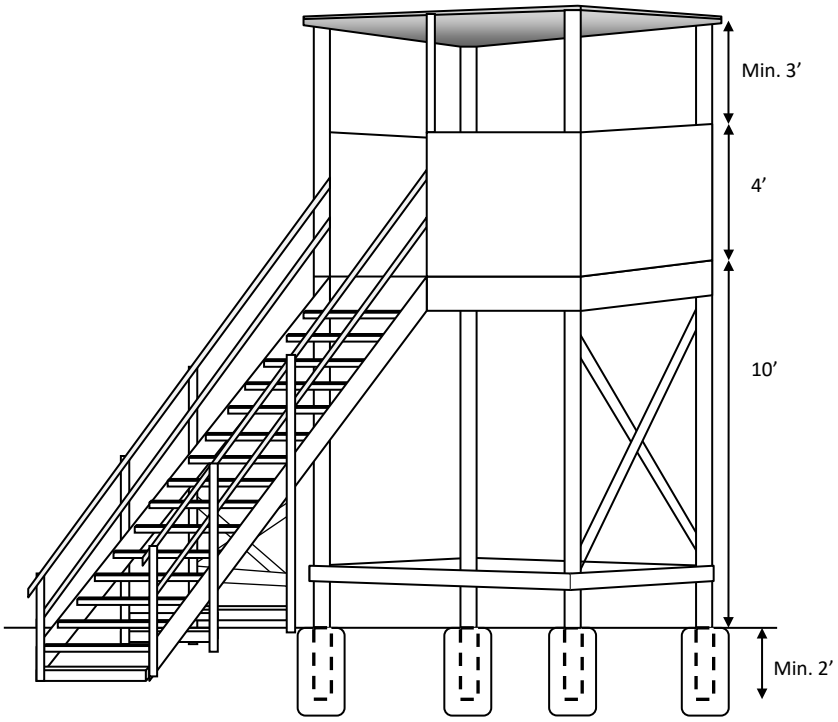
Submittal of Site Plan and Establish Field Offices and Equipment Staging Area - After the approval/assignment by Government Representatives of the DMS, which currently is unidentified, a physical review of the site will be

made by the OM, the site manager, and representatives. Within 12 hours of the location and inspection of the site, a final site plan will be submitted for approval. The Site Plan shall reflect:(1) access to the site (ingress, egress) (2) Site preparation-clearing, erosion control, and grading, (3) traffic control procedures, (4) safety, (5) segregation of debris, (6) location of ash disposal area, hazardous material containment area, contractor work area, and inspection tower, (7) location of vegetative debris dump, (8) location of Mixed Debris and C&D dump, (9) Location of Temporary sanitary facilities, (10) location of reduction operations including incineration operations, chipping operations, (11) location of any existing structures or sensitive areas requiring protection from smoke, dust, noise and with awareness to existing traffic conditions (12) location of dump area for debris hauled from the public or haulers other than TFR with traffic patterns reflected for this area. Tasks will then be assigned to construct and establish the required elements of the site, such as the inspection tower, hazardous materials containment area, temporary fencing, etc.

For this RFP and the general understanding of the layout offered by TFR, included is a general site plan utilized by TFR on previous projects that directly address the uses outlined above. However, before these site plans can be formally submitted, the necessary soil and water samples will need to be taken, checked, and filed with appropriate Government Agencies and maintained, on hand, at the TFR field office. The site plan will be reviewed and accepted by Government Representatives before DMS accepts storm-generated debris.

Inspection Tower Construction Diagrams





Hazardous Materials Containment Area – TFR's employees have been involved in the preparation and construction of many DMS to FEMA/USACE specifications. The Company will have had all necessary tools and supplies shipped from its home office for the first deployment of equipment. Once again, this is done as a safeguard measure if supplies and materials may not be readily available in the area following a disaster event. This Hazardous Materials Containment Area shall be constructed to the specifications outlined in the RFP.

Before construction, the site will be graded, and a berm constructed to provide a Hazardous Containment Area that will direct site runoff away from the Hazardous Containment Area. The area shall be 30'x30'. The perimeter shall be lined with hay bales and staked in place. The area shall be lined with a heavy gauge plastic (or tarp for colder climates where plastic may be too brittle) to provide a waterproof barrier. Six inches (6") of sand shall be spread within the area to provide an additional defense against hazardous leakage while also protecting the heavy gauge plastic against rips and tears. Additional plastic or tarp sufficient to cover the area will be available to prevent rain or snow from entering the containment. Lastly, site runoff shall be redirected away and from the containment area through the utilization of site grading.

Additional Construction Procedures that may be necessary are:

- The establishment of a lined temporary storage area for ash, fuels, and other materials that could contaminate soils and groundwater.
- Construction of temporary fencing around debris material storage areas for segregation and protection from traffic.
- Construct non-combustible stop blocks for equipment located at the burn pit.
- Establishment of an equipment staging area where equipment can be isolated and inspected regularly for fuel and oil leaks. Describe provisions for a lined area for fueling and equipment repair to protect soils from spills of petroleum products, hydraulic fluids, etc.
- Provision of plastic liners under stationary equipment such as generators and mobile light plants.
- Construct Roadways Throughout the Site - Traffic will be designed for one way in and one way out to avoid congestion.
- Erect Stop, Slow, and Direction Signs for safety and traffic flow. Signs will also be provided at the main entrance with the site name and directions, i.e., Office/Visitor Check-in, visitor parking, truck inspection tower, etc. There will also be signs designating the HTW area, white goods area, first aid area, mixed debris, etc.
- Establish a gated entrance for security to the perimeter of the site and a guard building to record visitors and authorized personnel visiting the site.
- If necessary, establish a "public" or separate dump area for debris hauled by others with separate traffic patterns and a distinguished and separated (by temporary fencing or other means) perimeter to avoid mixing the debris with the debris hauled by the contractor.

Once the Site Plan is approved, the Company will locate its office command center. TFR owns five self-contained command centers constructed on a 45-foot travel trailer. They are inventoried with all needed onsite management, communications, record-keeping, and safety materials. This includes such items as truck tickets, safety forms, identification signage, cellular phone, radio broadcast systems, desktop computer/fax and copying equipment, hard hats, steel-toed boots, flags, safety vests, and other miscellaneous items necessary to the immediate operations. These command centers will be equipped with self-supporting generators and temporary sanitary facilities if not, or until, available on site.

Establish Field Office Communications

- Mobile telephones and Company radios will be the main source of communication in the field office until local landline telephones can be installed. All TFR truck drivers are equipped with smartphones. In addition, all TFR managers, supervisors, and foremen are equipped with mobile telephones for outside communication to coordinate the mobilization and dispatching of equipment as well as being available to the client.
- All Company administrative personnel, including the Operations Manager, have electronic linkage capability for cellular telephones, satellite communications, Internet access, and fax access.
- Records and communications are made using a network of personal desktop and laptop computers.
- As quickly as the equipment is available (local services may be out for a time following a disaster) all major field locations are given at least one local number to facilitate communication with other local Government Agencies, local suppliers, and members of the public.
- As soon as the field office is established, office personnel will be available during hours of operation.
- Inspection of Equipment before beginning Task Order. All equipment previously dispatched and on hand for debris loading and hauling will be brought into the staging area for a safety inspection, identification, measuring, and numbering before being deployed to any work area.
- Each piece of equipment will be inspected, and a written inspection report prepared to denote the results of the inspection.
- In addition to the safety inspection checklist for trucks, all vehicles (trucks and trailers) will be inspected for a current license, tags, registration, and insurance. The inspection report will denote the truck owner and the truck driver. A copy of the operator's driver's license will be copied and on file.
- A determination of driver qualification will be made (i.e., a requirement for a Class A License).
- Trucks to be used in hauling debris will be inspected for proper tailgates and proper sideboards or other extensions as well as the previous checklist.
- Before a truck will be assigned a number, the inspection report and driver information will be made available for review by a Government Representative, and they shall physically inspect, approve the tailgate and any sideboards or other extensions, and measure the truck for capacity.

Personnel Safety Orientation

All Company employees will receive a copy of the Company's Health and Safety Manual at the time of employment. As part of the Company's Safety and Occupational Health plan and in compliance with the Accident Prevention Plan, a safety meeting will be held before any personnel is assigned to a task order.

- The Company Safety Officer will conduct the meeting in the presence of a Government Representative.
- All personal protective equipment required for the assigned task will be checked before personnel are dispatched to the assigned task.
- A Personal Emergency Contact List and Map of Key Facilities for emergency conditions will be passed on to all Company and Government field personnel.

Following the Equipment Inspections and Safety Orientation, Truck Measurement, and Numbering, equipment and personnel will be dispatched to the work areas prescribed as a result of meetings between the Project Managers and Government Representatives.

Daily Coordination with Government Representatives

The following is an outline of the company's daily procedures for keeping an informed dialogue between TFR and Government Representatives.

- Each debris removal project is assigned a Load and Haul Project Manager. Before the beginning of each Project or Task Order, the Load and Haul Project Manager and the Project Operations Manager will meet with the Government's Representative to define the scope of work, work area, and any Government priority as to areas included in the Task Order.

- After the total area of work to be performed under the Task Order has been defined, a map of the area is prepared to divide the total area into sections. These sections are then given a territorial reference (for example Section 1, Section 2, etc.,).
- Two identical copies of this map of the total area divided into sections are prepared, one for the Contractor and one for the Government. The contractor's copy is kept in the field office headquarters of the contractor.
- Each evening a meeting is held between a Government Representative and the Load and Haul Project Manager to review the areas which have not been worked on.
- The Loading and Hauling Project Manager shall confer with a Government Representative and shall provide a work schedule plan daily reflecting the assigned location of all loading crews daily.
- A daily work schedule assigning crews to specific Sections previously approved by the Government's Representative, is prepared by the Load and Haul Project Manager, and distributed to the foremen of each crew.
- Loading and Hauling crews shall not be re-assigned to another location until the Load and Haul Project Manager and the Government Representative have inspected the area worked and they have determined that the work performed has met the Scope of Work requirements in the Task Order.
- Each evening following the workday, the Crew Foremen will meet with the Load and Haul Project Manager and will report on the amount of progress in the sections assigned to them.
- The Load and Haul Project Manager, along with the Government Representative will tour each section daily to confirm progress.

When a section has been completed to the satisfaction of TFR and the Government Representative, the Load and Haul Project Manager will indicate the completed section on the map by color-coding the completed section. This map will provide a visual display of work completed and work remaining daily.

Public Service Announcements

TFR shall aid Government Representatives in developing a comprehensive Public Information Strategy. Oftentimes, residents hold local, state, and federal officials responsible for slow progress, however, enacting specific procedures to control the efficient flow of information to residents is vital to the community's recovery process. This includes the establishment of a Disaster/Debris Information Center, centralizing the release of vital information to the public. Operated from TFR's Mobile Command Unit utilizing satellite communications, Government Officials, in conjunction with TFR's Management Team, shall create television and radio advisories in the immediate aftermath of an event to be broadcasted five times daily. Additionally, when print media resumes, TFR shall aid in the development of pertinent newsletters detailing the recovery phases while providing a conservative timeline of events. These will be released online, through local newspapers, and posted at pivotal locations throughout the impacted area. TFR also recommends the establishment of an information hotline with a brief recording outlining the information listed below and additional vital information, i.e., debris drop-off locations, etc. This allows citizens to obtain up-to-date information immediately and on their schedule.

Sample Radio Address

_____ has adopted regulations for the removal of disaster-generated debris. We have established an efficient and effective system in coordination with our debris contractor, so you, the citizen, will know what to expect and how to have your disaster-generated debris removed successfully. Contractors are working seven (7) days a week, twelve (12) hours a day to collect ONLY storm-generated debris.

_____ has divided the City/County into multiple debris collection zones. All zones are being worked simultaneously with the goal of coordinated, safe, and efficient recovery. Debris contractors are collecting all the disaster-generated debris moved to the curb from one subdivision/street/block in a zone before moving to the next. Your cooperation and patience are much appreciated during this trying time.

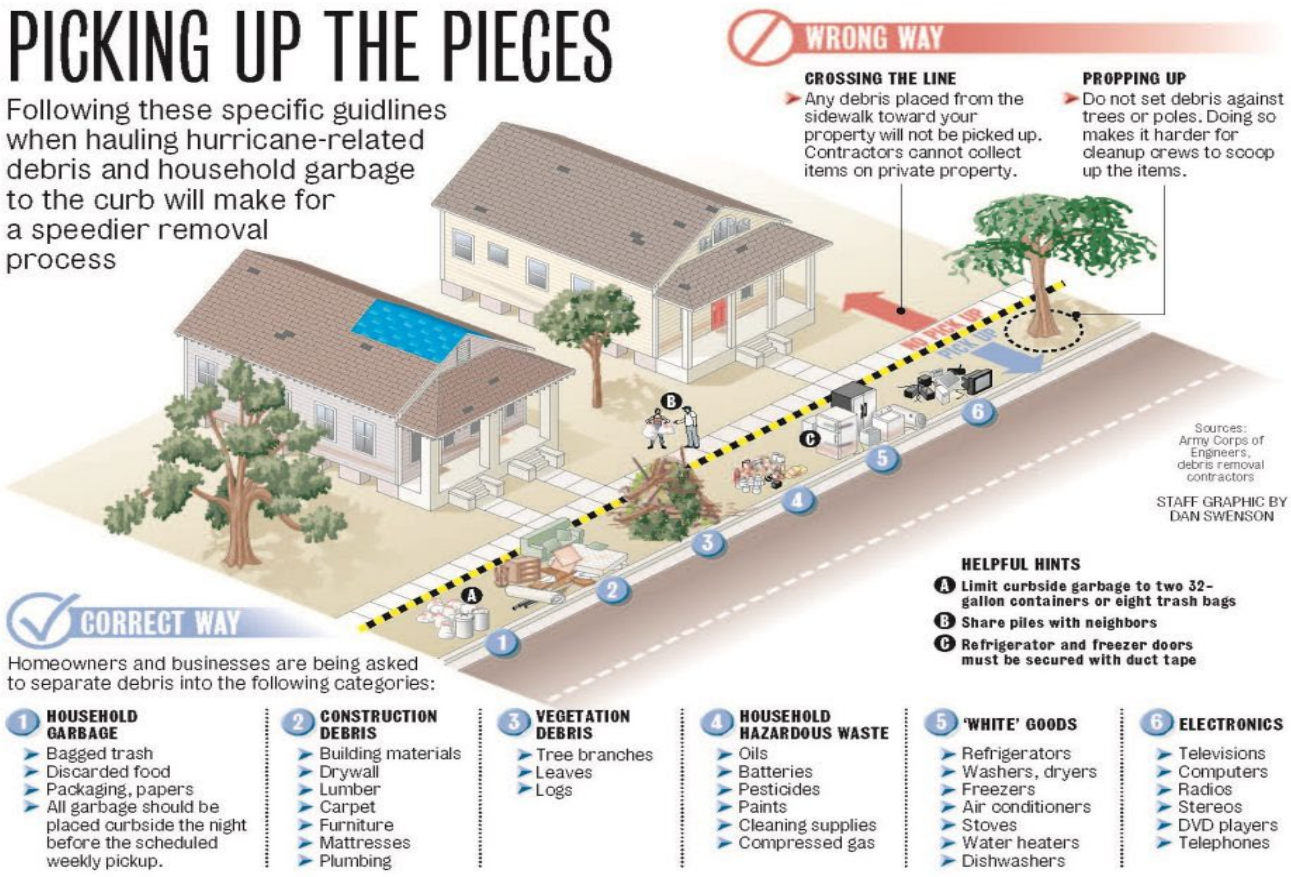
The first pass will be made in your neighborhood beginning _____.

Fellow citizens, as you prepare to place your debris curbside for collection, please adhere to the following guidelines:

1. Do not place debris on top of utilities, for example, cable, phone, electrical, or storm drain boxes.
2. Please do not place debris in front of or around your mailbox.
3. Please do not place debris in front of or around your driveway, as emergency vehicles may need to enter the area.
4. Please drive with extreme caution in areas with large debris piles.
5. Please do not block or dump any debris into the storm drains or ditches. This will cause flooding.
6. Please aid contractors by sweeping excess and loose debris from the street in front of your house for collection.
7. Report damages that occur to your personal property to the TFR hotline, at (512) 260-3322.
8. Please sort debris according to the following outline.

We are a community, and we shall recover as a community. We appreciate your patience, cooperation, and assistance as we undertake this monumental cleanup effort.

The following page, "Picking up the Pieces" will be posted online, distributed in local newspapers, and available for residents to properly segregate disaster debris along the ROW.



Debris Collection Operations

During the daily collection, movement, and disposition of debris, the TFR Operations Manager remains in constant contact with all Foremen and Supervisors via 2-way radio/ smartphones to ensure that proper accounting and operational management of debris collection complies with TFR operational procedures. Midday conferences, either in person or by radio, ensure that right-of-way, public/private, and local issues are quickly addressed, often immediately. TFR's manager and principals are mindful of other disaster operations taking place in the affected areas during the debris removal process and are cautious not to interfere with the efforts of others during the performance of the contract.

The CQC Plan and TFR's Quality Control Manager shall address the Recording and Reporting requirements with all levels of supervisors and crew foremen. Different levels shall have different requirements. A sample form will be provided and approved with the final CQC Plan, including any additional required modifications. This discussion shall include the general procedures set forth below:

- All loading and hauling crews are under the direction of a TFR supervisor.
- Daily reports are maintained by the crew foreman and all equipment downtime for repairs is noted on the daily reports.
- Hours of each piece of equipment and each employee are recorded and reconciled with a Government Representative daily.
- Daily Reports shall have daily and year-to-date totals for each piece of equipment/personnel tasked.
- Daily Reports shall be signed by the Contractor's Representative and by a Government Representative.

The TFR's Quality Control Officer shall prepare, sign, and submit to a Government Representative a Daily Quality Control Report. This report at a minimum shall include originals and one copy of all levels of QC reports received and in addition shall include a summary of safety issues, infrastructure damage, total numbers of trucks loaded, equipment, and plant hours worked, and idled or down, testing performed and by whom, loads and quantities hauled to DMS, the quantity of debris reduced, number of subcontractors working, contract non-compliance issues and all corrective actions.

Removal of Debris from Public Right of Way

Upon receipt of the task order and at the direction of Government Representatives, the Operations Manager will direct the Load and Haul Supervisor to dispatch the previously selected loading and hauling equipment to locations designated by the Government's Debris Managers.

One foreman will oversee the loading and hauling operations for each crew. The foreman is responsible for conducting toolbox safety meetings, and a general briefing of operations including truck routes, local ordinances, and other pertinent information. The foreman is equipped with a fire extinguisher, a pick-up truck with mobile radio and cellular telephone, a first aid safety kit and a list of emergency telephone numbers, and a map to emergency medical facilities. The foreman is responsible for preparing a daily report of activities.

Before Truck Certification and Inspection, all Subcontractors will have met with the sector superintendent or field administrator and provided the necessary paperwork including copies of current certificates of insurance (general, auto, workers comp.) copies of driver's licenses, and the execution of Subcontractor Agreements including:

- Copy of Scope of Work
- Copy of Accident Prevention Plan
- Copy of Safety Sheet
- Copy of Ticket Reporting Procedures
- Location of Emergency Response Facilities and Contact Numbers
- Copy of Equal Opportunity Policy
- Copy of Alcohol and Drug Abuse Policy

A truck Measure/Certification Site will be established at the DMS, or another appropriately designated location determined by the City/County, for all trucks to be inspected, measured, photographed, and, in case of tonnage contracts, a tare weight. Truck Certification, available upon request, will include the recording (first on a paper Certification Form and by Electronic Form) of the following:

- Date of Measure
- Assigned Truck Number
- Truck Measured Capacity
- Truck Description (including model, type, and color)
- License No. and State
- VIN No.
- Truck Owner
- Name of Subcontractor Truck is working for
- Truck Driver
- Truck Driver's License No. and State
- Truck Drivers cell phone or contact number
- Truck Tare Weight
- Notes or exceptions (i.e., descriptions, deductions for a doghouse, etc.)
- Signature space for
    - Truck Driver
    - Contractor's Representative
    - Government Representative
- A photograph of the Measured Truck w/driver will either be, taken by Polaroid Camera and attached to the Certification Sheet; or by Digital and Stored.
- Each Truck Dump Bed will be assigned the required TFR-issued side signs on each dump body, all to be weather durable, tamperproof, and non-removable:
    - Company Name
    - Truck Number
    - Maximum Volume in Cubic Yards
    - Inspector's Name and Date

These signs will be placed, one each on each side of the dump bed body and are maintained throughout the project to ensure readability.

Additional Truck dump trailers (pup trailers) will each have a separate truck measure certification including all of the information outlined above along with a notation as to the truck that it is coupled with.

Before equipment is dispatched to the loading sites, it will have already undergone all the necessary safety inspection, measurement, and hauling procedures at the staging area as outlined in the section above. All loading

and hauling crews will have received a copy of the scope of work, accident prevention plan, safety indoctrination, and assigned a crew foreman. All crews and foremen will be instructed by the Load and Haul Supervisor that they are to work in areas designated by a Government Debris Manager and are not to relocate or move from one area to another without prior approval. No employees or subcontractors of TFR will be allowed to work for private or other public entities while employed or contracted under this project.

Hazardous Tree Removal

Unstable and leaning trees along a public ROW or within a naturalized area, such as public parks or golf courses, are eligible for removal. The Sub-Grantee may choose to attempt to save the tree through straightening and bracing if the cost of repair is less than the removal and disposal. A tree is deemed hazardous and eligible for removal if:

- The tree is an immediate threat to public health and safety or improved property
- It has a DBH of 6" or greater
- AND one or more of these criteria:
  - 50% or more of the crown is damaged or destroyed
  - A split trunk or broken branches that expose the heartwood
  - Fallen or uprooted within a public use area
  - Leaning at an angle greater than 30 degrees

After a tree has been deemed eligible and scheduled for removal, TFR tree crews will discuss a tree-specific removal plan to ensure a safe, proper felling operation, considering:

- Surrounding area for anything that may cause trouble when the tree falls
- The shape of the tree, the lean of the tree, and decayed or weak spots
- Wind force and direction
- Location of other people
- Electrical hazards

Once the tree crew has identified a tree-specific removal plan, the following procedures shall take place:

1. The employee shall work from the uphill side whenever possible.
2. Before felling operations, the work area shall be cleared to permit safe working conditions and an escape route shall be planned.
3. Each worker shall be instructed as to exactly what he/she is to do. All workers not directly involved in the operation shall be kept clear of the work area.
4. Before starting to cut, the operator shall be sure of his/her footing and must clear away brush, fallen trees, and other materials that might interfere with cutting operations.
5. A notch and back cut shall be used in felling trees over 5 inches in diameter measured at breast height (DBH). No tree shall be felled by "slicing" or "ripping" cuts.
6. The depth of penetration of the notch shall be about one-third the diameter of the tree. The opening or height of the notch shall be about 2.5 inches for each 1 ft. of the tree's diameter. The back cut shall be made higher (approximately 2 inches) than the base of the notch to prevent kickback.
7. The resulting notch shall be flush cut to the ground.

Hazardous Limb Removal

Hazardous limb removal work shall consist of the removal and disposal of storm-damaged limbs that are:

- Imminent and impending peril to the general public
- Greater than 2" in diameter at the point of breakage
- Broken and still attached to the tree

The resulting debris will be collected from the grounds and hauled by normal debris collection standards.

Hazardous Stump Removal
The removal of hazardous stumps is a unique process requiring specialized equipment. As such, this process requires unique documentation and costing to realize full reimbursement, and meet the following criteria:

- 50% or more of the root ball exposed
- Greater than 24" in diameter, as measured 24" above the ground
- Located on public property or a public ROW
- Immediate threat to public health and safety

Once the diameter is established, pictures are taken, GPS coordinates establish the location, and the specific threat is documented, the stump will be physically removed by the best means available. The resulting hole from the stump removal will be backfilled and the amount of material needed will be recorded.

Reduction of Debris

Reduction of debris is normally applied to vegetative debris such as brush and tree debris, which is also referred to as "burnable debris". However, the reduction process can also be applied to some items that are considered non-burnable or construction and demolition debris. This would include such items as household furniture, construction materials such as roofing, and treated timber. This process is applied to reduce the volume of the material that is being landfilled. The economic evaluation of weighing the reduction cost against the unreduced landfill cost will be a factor in determining the feasibility of this approach. The most common methods of reduction are burning, chipping, grinding, and recycling. Recycling is covered in various sections as appropriate.

Incineration
There are two general classifications of the burning method, open burn, and air curtain incineration.

Open Burning: Open burning, although very cost-effective, may not be suitable for urban areas. The feasibility of this method is very dependent on the location and the cleanliness of the debris. Many areas and locations will not permit open burn, particularly in urban environments where heavy smoke can create health and property damage concerns. However, in rural locations, if the debris is clean, there is very little environmental impact, and the resulting ash can remain on the site or be used as a soil additive. Bulldozers and loaders are the primary equipment required to operate an open burn process.

Air Curtain Incineration: Air curtain incineration is also a very cost-effective method of reducing clean, vegetative debris but with less environmental impact than the open burning method. Air curtain incineration incorporates the use of a "burn pit" aided by a forced-air blower. The pit can be constructed below or above grade (depending on the water table) and includes a mechanical blower to create constant optimal burn rates and an "air curtain" effect. The air curtain incineration system is a combination of the blower and pit, engineered as a unit to achieve the effect of holding the smoke while feeding air to the fire pit. Since differing site locations contain differing conditions, such as soil composition, water table levels, etc., there are no air curtain incineration systems standards in the industry. In the construction and operation of an efficient air curtain incineration system, special consideration must be given to the following factors:

1. A setback of at least 100 feet between debris piles and the burn area with a minimum setback from buildings and structures of at least 1,000 feet.
2. Construction of non-combustible "warning" stop blocks (at least 1 foot in height) for equipment located at the burn pit
3. Use limestone (or equal material) for the construction of the "pit" with reinforced earth anchors, or wire mesh to support the loader ramps.
4. Use clay or limestone to create an impervious layer on the bottom of the pit to prevent the leaching of the ash from the aquifer. This layer shall be at least 1 foot deep and will be regularly inspected and maintained at that depth in the event scraper activity removes part of the layer during operations.
5. Seal the pit ends at least four feet high.

6. Pit construction (by this solicitation) shall be 8-9 feet wide, and 14 feet deep.
7. A 12" dirt seal will be placed on the lip of the burn pit area to seal the lower nozzle.
8. The blower will be configured to direct the airflow to strike the wall of the pit 2 feet below the edge. Operators will be instructed that the debris should not break the path of the airflow except during dumping.
9. Equipment used will be tested and adjusted to assure that a minimum nozzle velocity of 8,800 ft/min (100 mph) and a volume of 900 cf/min/linear feet is produced during burn operations.
10. The length of the pit shall be no longer than the length of the blower nozzle.
11. The operators shall be instructed to load the pit uniformly along its length.
12. Operators will also be instructed to extinguish the fire at least 2 hours before removing the ash.
13. Water trucks will be used to dampen ash residue as well as areas surrounding the burn site.

Chipping/Grinding

Reduction of debris by chipping and/or grinding is an opportunity to recycle the vegetative debris back to economically beneficial use. However, the overall economic impact of chipping/grinding compared to burning will have to be reviewed before a determination can be made. Grinding/Chipping is the reduction of woody, vegetative debris by cutting and pounding the debris to reduce the woody materials into small pieces or "chips" This method normally produces a reduction of between 3 to 1 and 5 to 1, whereas burning reduces the debris by approximately 95%. However, wood chips can be recycled and used as mulch, fuel, ground cover, and animal bedding to name a few. The availability to recycle the chips would be a significant factor in determining the economic value of chipping/grinding. In the construction and operation of a chipping/grinding reduction operation, special consideration is given to the following factors:

1. Grinding machines must have a clearance of 300 feet. Warning signs must be stationed around the perimeter of the grinding equipment, warning of possible flying objects from the grinders.
2. The grinding machines must have screens, which produce chips not exceeding 4 inches in length and ½ inch in diameter.
3. Liners shall be placed underneath grinders, and other stationary equipment, as a preventative measure against possible leaks or spills exposing the soil and groundwater to contaminants.
4. Debris must be sorted and cleaned of other contaminants such as metals.
5. Operators must wear hard hats even in closed cab machines while operating.
6. Root Rake loaders are used to avoid contaminating the debris entering the grinder with dirt or sand.
7. Ground debris or mulch shall be stored onsite in piles no higher than 15 feet. Such piles shall not remain on-site for longer than seven (7) days and haul-out procedures shall ensure. Ground debris or mulch is monitored daily for heat and internal combustion.

Segregation of Debris

Before the material is brought into the DMS, all preparations outlined above will be substantially completed. The DMS will have staging areas for each category of debris brought to the site. All debris will pass by the inspection tower after entering the site and all loads will be inspected.

Although every effort will be made to segregate debris on the right-of-way before loading, debris materials still become mixed, and some loads are so co-mingled that they are classified as mixed debris loads. These loads will be directed to the area defined on the site plan as the "mixed debris" pile. This material will be sorted and separated

by machines with grapples and "thumbs" and by hand labor and placed into the C&D, Vegetative, HHW, White Goods, and Metals Piles.

C&D Debris is non-burnable, non-recyclable debris that will eventually be delivered to a landfill. Samples of this type of debris include mattresses, clothing, household garbage, concrete, asphalt, metals, plastics, manufactured furniture, building components, etc. Parts of this material, if well separated, can be reduced by grinding before the landfill, to reduce the cost of hauling and tipping fees (if charged by volume). Other parts, such as metal can be recycled if well separated and cleaned.

Vegetative Debris is burnable debris and can be reduced by either incineration or by chipping/grinding. If reduced by incineration, the estimated reduction rate is 95% and leaves the ash residue to be hauled off and disposed of. If reduced by chipping/grinding, the reduction rate is estimated at only 60%-75%, however, the by-product, mulch, can be recycled. The vegetative debris may become mixed with earth materials such as dirt, gravel, rock, or sand during the disaster. Root rakes are employed to shake and separate the brush and vegetative debris before it is reduced. Sometimes shaker screens or trommels are necessary to separate the earthen debris before reducing it.

Household Hazardous Waste (HHW) is debris such as household chemicals, pesticides, unidentified liquids, paint, batteries, etc. As mentioned earlier, the primary goal is to separate this material on the curbside and pick it up separately by a designated HHW crew. These items are then delivered to the collection points designated by the Government Debris Manager. However, if HHW inadvertently becomes co-mingled with other debris and enters the site, it is separated from the other debris and placed into a Hazardous Containment area on the site for further disposal by those licensed to handle and dispose of this type of debris.

White Goods refer to items such as refrigerators, air conditioners, freezers, etc. which may contain chemicals or fluids such as freon or oil, which must be remediated by someone with the appropriate license and certifications to do so. These items should be separated at the curbside and delivered to the collection points designated by the Government Debris Manager. If they are brought to the site for temporary storage, they will be contained in a separate staging area so that they may be inspected and properly cleaned of all chemicals or fluids.

Metals will be separated at the curbside and delivered to a separate staging area at the DMS unless directed otherwise by the Government Debris Manager. These items may be recycled.

During the operation of a DMS, special attention is afforded to the following areas:

Site Safety: The Operations Manager and the Site Project Manager will conduct a Pre-Operations Site Safety meeting before the beginning of operations of the debris reduction site. Items to be included in the Safety meeting will be:

a. An overall review of the Site Plan and directions as to the location of all temporary structures, the planned traffic flow, the location of first aid stations, eyewash stations, fire extinguishers, and the location of a sign with postings of emergency numbers.
b. The first Weekly Safety Meeting will be held and all information as outlined in the Company Safety and Occupational Health Plan will be covered.
c. The Activity Hazard Analysis for each operations activity will be reviewed and discussed.
d. A communication path between the site management and site personnel will be established in the event of an emergency so that an orderly and efficient means is established to mitigate the event.

Dust Control: TFR provides water trucks, which do routine trips throughout the site during the operations, keeping dry roads dampened to minimize the dust count. Water trucks are also used to dampen ash residue when removed from the burn pit to the ash pit. Attention is given to normal wind direction when the layout of the site is prepared.

Hazardous Materials Containment Area: The Site Manager will regularly inspect the Hazardous Materials Containment area for any cuts, tears, or leaks in the protective membrane that lines the containment area. The Manager will also inspect the berm surrounding the area to ensure proper site runoff is still intact.

Roadways: Traffic will be designed to allow the flow of incoming and outgoing debris trucks to avoid congestion. Safety and directional signs will be posted throughout the site along with flagmen to assist and control traffic flow as well as for safety reasons. Road surfaces will be rock-laid for easier maintenance and to protect from erosion. Private, non-operation-related traffic will be prohibited from the site.

Communication: Operators and flagmen are equipped with two-way radios on the same frequency as the office base radio unit so that communications will be readily accessible throughout the site.

Disposal Procedures

Disposal sites for the debris will be determined before operations begin. This submittal encompasses the possibility that permanent or final debris resting place may not be immediately available at the beginning of operations, and we have therefore included the general operations of a Debris Management Site (DMS) in this proposal.

Disposal of debris is the operation of placing debris in its final resting place such as a licensed, permitted permanent landfill or as expressed above, at a DMS. This operation includes the use of hauling equipment. In the Hauling and Dumping operations, special consideration is given to the following:

1. All loading and hauling crews are under the direction of a TFR supervisor. Daily reports are maintained by the Crew Foreman, and all equipment downtime for repairs is noted on the daily reports. Hours of each piece of equipment and each employee, are recorded and reconciled with a Government Representative, daily.
2. Qualification of all operators/drivers is reviewed and determined before being allowed to haul materials.
3. All insurance documents and copies of driver's licenses are on file in the field office before beginning operations.
4. The safety orientation meeting is held by the Load and Haul Project Manager before operations begin.
5. Equipment is inspected and a record of the inspection is retained on file in the field office before operations begin.
6. Operators/drivers are versed in the dumpsite procedures before leaving the loading site.
7. All truck operators will be instructed to observe traffic regulations and follow the instructions of the flag persons.
8. All operators will report to the weigh station/inspection tower and deliver their "load ticket" to the QC operator (or government inspector) for inspection and approval before proceeding to dump debris.
9. Each truck operator will be directed as to where to dump each load at the dumpsite location by the designated dumpsite operator.
10. Each truck operator will inspect his truck and tailgate after the dumping process is completed to assure that it is secure before leaving the dump area.
11. Truck operators will follow the designed traffic flow when leaving the dump and returning to the designated loading area.

Haul Out Procedures

Hauling out of debris is the operation of hauling reduced debris from a DMS to a final resting place at a designated destination to be used in any number of capacities such as ground cover, biofuel, and fertilizer. This operation

includes the use of hauling equipment. In the hauling out operations, special consideration is given to the following:

1. All hauling crews are under the direction of a TFR supervisor. Daily reports are maintained by the Site Manager, and all equipment downtime for repairs is noted on the daily reports. Hours of each piece of equipment and each employee, are recorded and reconciled with a Government Representative, daily.
2. Qualification of all operators/drivers is reviewed and determined before being allowed to haul materials.
3. All insurance documents and copies of driver's licenses are on file in the field office before beginning operations.
4. The safety orientation meeting is held by the Load and Haul Project Manager before operations begin.
5. Equipment is inspected and a record of the inspection is retained on file in the field office before operations begin.
6. Operators/drivers are versed in the dumpsite procedures before beginning loading activities and hauling reduced debris out of the DMS.
7. Trucks are loaded by rubber-tired backhoes, or excavators, utilizing a mulch ramp constructed approximately twelve (12) feet high, eight (8) feet wide, and at a grade, not to exceed thirty-five (35) degrees. This shall be determined at the site depending on topography and availability. No individuals will be allowed on the structure unless otherwise instructed to do so by the Site Manager and/or by assessing the overall safety of the structure.
8. Each truck operator shall inspect his/her truck before proceeding to the inspection tower to ensure the load is filled and any items are secured and covered by a tarp or other covering preventing chips from being blown from the bed.
9. All truck operators will be instructed to observe traffic regulations and follow the instructions of the flag persons.
10. All operators will report to the weigh station/inspection tower and deliver their "load ticket" to the QC operator (or government inspector) for inspection and approval before proceeding to leave the dump to its final destination.
11. Truck operators will follow the designed traffic flow when leaving the dump and returning to the designated loading area.

White Goods

White Goods refer to items such as refrigerators, air conditioners, freezers, etc. which may contain chemicals or fluids such as Freon or oil, which must be remediated by someone with the appropriate license and certification to do so. These items will be separated at the curbside and will be delivered to the DMS collection point. At the DMS we will contain Dirty White Goods separate from White Goods and they will be inspected and properly cleaned of all chemicals or fluids or removed by professionals certified and licensed to dispose of them. TFR shall submit a Dirty White Goods Operations, Cleaning, and Disposal Plan before beginning site operations.

Upon award of a contract, a Hazmat removal team will be assigned to oversee the curbside removal and HHW removal at the DMS and, if given a contract for ROE, precede the demolition team. The Hazmat team will remove all HHW and White Goods to the curbside, separated, before hauling off, or demolition begins. This team will document on a daily reporting form, the type and quantity of HHW and White goods at the pick-up location.

- Refrigerants with putrescible wastes will be sealed by taping closed so as not to have accidental openings and spillage while in transit to a disposal site.
- The separated HHW and White Goods will be transported by separate containers from the demolition site to the DMS.
- Any HHW that may inadvertently become mixed with truckloads shall be separated at the DMS and stored in the HHW area for removal by the HHW crew.
- Automobiles will be moved to a separate temporary storage area where they will be held for recycling.

- Loose tires located at the curbside will be kept separate and removed by the HHW crew.
- Extra caution will be applied to the handling of dirty white goods that still contain putrescible wastes, such as sealed freezers, refrigerators, coolers, and iceboxes. Putrescible waste is solid waste that contains organic matter capable of being decomposed by microorganisms and of such a character and proportion as to cause obnoxious odors and to attract or provide food for birds or animals. Improper handling of putrescible waste could lead to odor issues that make sitting and operating a DMS difficult. There are also numerous potential employee health and safety issues related to the removal and disposal of putrescible waste.
- White goods may also have refrigerants (Freon and Freon replacements), and often plastics and motors and sometimes other electronic components that need to be removed before recycling. Refrigerant removal must be done by trained and qualified personnel and can potentially lead to spills of regulated chemicals. Only certified, experienced, and trained personnel will be used for these critical tasks to minimize risk and maximize efficiency.
- All waste removal, cleaning, and handling will be managed to minimize the potential exposure of workers and others to waste and minimize the generation of odors.
- Procedures such as proper sealing of refrigerants and containers will be in place to control vector exposure and the attraction of wildlife and minimize volume expansion through the addition of water to the waste stream.

Vehicles and Vessels

Abandoned Vehicles and Vessels will be removed and taken to a temporary staging/storage area. It is anticipated that the State Government's Department of Transportation or Department of Motor Vehicles will be the project manager for the title of ownership issues related to any vehicle recovery and recycling project associated with the disaster response. Vehicles and vessels brought to the staging areas will be inventoried by license plate, make, model, color, and vehicle identification number. They shall be staged, and site tagged for easy retrieval.

- For a vehicle or a vessel to be deemed eligible it must:
- Present a hazard or immediate threat that blocks ingress/egress in a public-use area
- Ownership is undetermined
- The applicant followed all local ordinances and State laws by securing ownership
- The applicant verified the chain of custody, transport, and disposal of the vehicle or vessel

Private Property Debris Removal

Private property debris removal must present an immediate health and safety threat to the general public before it is reimbursed under the Public Assistance Program. This is typically the responsibility of private property owners however if the debris poses a threat to the general public at large and the property owners are unavailable the State or local municipalities may need to enter onto private property to alleviate the immediate threat.

If authorized, FEMA 325, Public Assistance Debris Management Guide states applicants are required to document all legal processes used to gain access to private property through the following:

1) Each property owner must sign a right-of-entry which includes a hold harmless agreement and indemnification applicable to the scope of work.
2) Photos to document the condition of the property before beginning work.
3) PPDR Assessment to establish the scope of eligible work.
4) Documentation of Environmental and Historic Review.

Bastrop County PPDR

"We are fortunate to have TFR as an experienced contractor, with an abundance of specialized equipment and an experienced management staff helping us with our recovery efforts. I am thankful for all that TFR has done to help Bastrop County in our recovery efforts, and I am pleased to provide this endorsement and recommendation to others that are in need of the services TFR provides."

Ronnie Moore
Bastrop County Engineer

616,500 Total Cubic Yards **(245,700 PPDR)**
38,000 Total Hazardous Trees **(27,000 PPDR)**

Disaster Debris Recycling

TFR is a green industry company. The principals of TFR are proponents of recycling whenever possible and many members of management are LEED Certified. As such, TFR utilizes tub grinders, slow-speed shredders, trommels, loaders, and excavators which are used to sort, separate, and reduce vegetative debris to reusable mulch, dirt, metals, and other construction products. Following each disaster event, TFR will make every effort to locate a reusable purpose for this material such as bedding material for plants, ground cover for parks, animal bedding, and reusable energy sources such as boiler fuel for co-generation plants or production mills. In addition to vegetative recycling, every effort is made to keep the metals segregated and clean so that the Ferris and non-Ferris metals can be recycled. In cases of large quantities of mixed debris, a system of separation using a trommel, air curtain burner, picking line conveyor, and tub grinder, can be used which will allow the paper and plastic to be separated, and the clean dirt, rock & concrete, Ferris metals, non-Ferris metals, and clean vegetative debris sorted and piled for recycling.

Sources will be sought for the following recyclable material:

Asphalt
C&D
Concrete/Aggregate
Dirt
E-Waste
Metals
Roofing Materials
White Goods
Mulch
Tires

TFR Spotlight

Bastrop County Wildfire

100% of the mulch created from grinding of trees was utilized in a beneficial reuse or was recycled.

100% of the C&D was recycled.

TFR has vast experience employing recycling activities and maintains established relationships with recycling firms to accept various types of debris. While completing debris reduction of 2,000,000 CYD for the City of Tulsa, TFR loaded the chips on railcars and shipped the excess reduced debris to a Company-owned mulching facility in Leander, Texas. Alternative methods of disposal exist and are well documented by TFR. During Hurricane Ike, storm-generated debris from Polk County was hauled and burned at a local paper mill in Orange County, Texas. This strict commitment to recycling storm-generated debris has benefited both clients and TFR.

DMS Remediation and Restoration

In the event of a natural disaster, a Debris Management Site (DMS), usually selected by the government, may be used to process debris before its final disposal. Substantial site preparation may be required such as proper access points of entry, security devices, control gates, fenced storage compounds, adequate internal haul roads, proper erosion, and sediment control fencing, and stormwater retention features, to name a few. If a DMS is required, then TFR will, upon entering each site for the first time, photo-document the existing site conditions using both a video camera and still photographs.

At the cessation of DMS operations, all sites will be restored to the satisfaction of Government Representatives/Owners with the intent of maintaining the utility of each site, leaving it unencumbered for future use and safeguarding the environment. Soil and water samples will be taken and compared to pre-work samples to ensure that TFR operations have not negatively affected the environment. Other factors that are considered during the remediation process are:

- All pre-existing grades including roads, ditches, etc. will be restored to the satisfaction of the customer before the final closure of each site.
- Areas where soils were excavated (e.g., ditches and retention ponds) or stockpiled (e.g., berms) will also be restored to pre-existing grade before vacating each site.
- Pre-construction drainage patterns will also be restored, as well as all improvements (e.g., trailers, fencing, construction entrances, and built-up aggregate haul roads) will be removed from each DMS unless otherwise instructed by the Government's Representative.

Upon completion of the above remediation tasks, TFR will photo-document site conditions using both video cameras and still photographs. As done with the water and soil samples, the post-work photos will be compared to pre-work photos to ensure that the site was remediated to its original condition.

Emergency Services

TFR has partnered with companies throughout the United States to provide emergency services beyond debris removal. The following is a list of additional services that TFR stands ready to supply if needed.

Emergency Services	Suppliers	
Water/Ice	• Reddy Ice • Water Monster	• H2eco • Sparkletts
Kitchen Facilities	• Kitchen Corps, Inc • Temporary Kitchens 123	• RK Emergency Management Support • Disaster Management Group, LLC
Ready Meals	• Heater Meals • Mountain House	• Chef Minute Meals • GA Foods
Base Camps	• Granny's Alliance • Ellipse Global	• Brookstone Emergency Services • Disaster Management Group, LLC
Restroom/Shower Units	• United Site Services, Inc • Daisy Waste	• Ellipse Global • Afford-A-Potty
Environmental Services	• Payne's Environmental Services, LLC • FGL Environmental	• SWS Environmental Services • One Stop Environmental
Temporary Office	• Mobile Office Pros • Pac-Van	• Mobile Modular • US Construction Trailers
Aerial Video/Photos	• Drone Aire	• Airborne Response
Housing	• CLC Lodging	• Ellipse Global
Security	• Off Duty Services	• Safety Cop LLC
Generators	• Aggreko	• Genset Services, Inc
Fuel Suppliers	• Suncoast Resources • Jaguar Fueling Services, LLC	• Atlas Oil • Fuel Master
Equipment Rental	• Deep South Crane Rentals • United Rentals • Caterpillar • Sunbelt Rentals • Hertz Equipment Rental	• Volvo • Komatsu • Herc Rentals • John Deere
Emergency Roof Tarping	• Beyond Exteriors • Affordable Roofing	• Storm Guard • Servpro
Barge Transport	• Poseidon Barge	• American Commercial Barge Line
Satellite Service/Communication	• Verizon	
Diving Services	• Lone Star Diving Services, Inc	• Diver Dan

Subcontracting Plan

TFR is uniquely positioned within the debris removal industry as one of the premier companies maintaining an extensive fleet of machinery utilized in debris removal, reduction, and management efforts to fully operate independently. To accommodate your debris project needs, TFR provides access to 200+ pieces of equipment

including, but not limited to, twenty-five (25) self-loaders with trailers, six (6) Diamond Z Tub Grinders, two (2) horizontal grinders, heavy haulers, excavators, and five (5) mobile command units maintaining electronic access to manage entire projects. This extensive list would be insufficient without the pairing of our in-house maintenance crew. These individuals ensure that key equipment necessary for fluid, efficient operations shall never hamper the ongoing project and impact TFR's project timeline. TFR's maintenance crew augments the daily responsibilities of our employees and subcontractors for fulfilling any duties to the City/County by securing the vitality of our equipment.

With a large fleet of equipment and the necessary logistical support, TFR is fully capable of quickly and efficiently responding independently with a substantial workforce of equipment and personnel to an affected community almost immediately. However, this independence does not secure the necessary goals strictly outlined and routinely reinforced by upper management in response to our service-minded attitudes. TFR firmly believes that our business cannot be sustained and grow without a strong, positive working relationship with our clients, suppliers, and our countless subcontractors. This service-minded attitude drives the business and fortifies the strong relationships TFR maintains with our subcontractors. Therefore, such relationships maintained with small businesses, minority-owned, and numerous other companies allow TFR to fulfill the requirements that may be mandated by Government Representatives and other Government Agencies.
At TFR, we firmly believe that local contractors provide the most cost-effective measure to complete the contract requirements while aiding the local economy after the impact of a disaster. TFR plans to utilize local subcontractors to the extent to which they are available and properly licensed. TFR shall exhaust any avenues to obtain qualified local subcontractors to meet the needs of the community while infusing the local economy with needed revenue. As such, TFR is committed to identifying the local subcontractors qualified and is prepared to support the community on the path to recovery. TFR plans to solicit and establish local subcontractors through the following plan:

TFR Enterprises' principals and managers have always exercised a policy of recruiting subcontractors in the affected work locally. This practice is considered good business because of the advantages received by contracting with local companies residing in the affected area. Several factors contribute to the overall effectiveness of local subcontractors: (1) familiarity with the areas to be worked, (2) knowledge of the most efficient traffic patterns, (3) information on local suppliers for parts, equipment repairs, etc., (4) reduction in end project costs as local subcontractors do not require housing and travel cost, per diem, etc. These factors reduce the cost of the project while allowing the City/County to retain large portions of the money in the hands of its constituency. With these reasons in mind, TFR is committed to fulfilling the requirements by implementing the Local Subcontracting Plan listed below:

1. Establish a local telephone line so that it may be contacted easier than calling long-distance cell phone numbers.
2. The Company will post signs and telephone numbers at the entrance to its worksite and its field office.
3. Subcontracting opportunities are advertised by local newspapers/online.
4. During the search for subcontractors following an award, the company's Chief Operating Officer will contact the Small Business Administration office in the work area and access the Procurement Marketing and Access Network, National Minority Purchasing Council Vendor Information Service, and the Research and Information Division of the Minority Business Development Agency in the Department of Commerce.
5. The local Veteran's Administration is contacted upon the company's assignment of task order and alerted as to the type of products and service the contract requires, and the company's local telephone number and address are registered with them, not only for subcontracting but for short-term employment opportunities

6. State and local trade agencies will be contacted, such as the Association of General Contractors (AGC) for example. They oftentimes maintain databases sorted by business classification and status and can provide a resource for small businesses in the area.
7. The Chamber of Commerce in the affected area will be contacted and asked to provide a listing of any (a) trade associations, (b) business development organizations, and (c) HUBZone concerns.

Contacts arising from these inquiries are followed up with calls to local subcontractors requesting detailed information leading to their qualification for work. With such action, TFR shall exhaust all avenues to identify, qualify and employ any local subcontractor. Under circumstances in which local subcontractors are unavailable, outside sources may be contacted to achieve the desired mobilization goals.

Subcontractor Management

TFR manages subcontracts through a five-step process:

1. Selection of the most appropriate subcontractors. This is done by balancing geography and capability. Local subcontractors are almost always more cost-effective as they go home at night to sleep and eat. They also have local resources for materials, supplies, and equipment repairs, and thus, are preferred.
2. The issuing of the formal subcontract establishes contract compliance requirements, formalizes expectations, and provides an established, impartial mechanism for quick resolution of disputes as they arise.
3. Production is tracked and expectations are communicated daily.
4. Daily active Quality Control results in the immediate identification and correction of problems.
5. QC and other reporting get rolled up regularly into Contract compliance and reporting, such as small business subcontracting plans.

TFR's Subcontractor Management Plan and approach are focused on three main performance evaluation criteria

- Production
- Safety, explained in Safety Section
- Quality Control

Production:

Ready means that the subcontractors have completed appropriate administrative actions, have their equipment and personnel on-site and in condition to work and know the tasks they are expected to perform. Before NTP, the subcontractors are identified, selected, and notified by the Operations Manager. Priorities are based upon a review of the database of all experienced subcontractors. The priority list for subcontracts is grouped into our known, experienced subcontractors, and augmented by the capabilities of the local subcontractors.

Upon receiving notice to proceed from the contracting agency or at the discretion of the Operations Manager, we will notify subcontractors on stand-by to execute mobilization plans and their personnel and provide us with a firm arrival ready-to-work time. Additionally, TFR personnel will also review the equipment and personnel requirements and compare them with equipment already on hand to determine the additional equipment and personnel to be mobilized. This will first come from the Company-owned available list, then Level 1 Subcontractors' immediately available list, comprised of our known, experienced subcontractors and local contractors, and equipment suppliers list.

No employees or subcontractors of TFR will be allowed to work for private or other public entities while employed or contracted under this project.

Working effectively means good communication of expectations and regular optimization. There will be daily formal and informal communications between the Project Managers and the subcontractor's superintendents. At

the start of each day, the geographic area assigned will be reviewed and verified, along with any known hindrances to free-flowing operations. Also covered will be production expectations, other difficulties expected, and the performance of the previous period (usually the previous day). In addition to this startup communication, the subcontractors will have the chance to review and comment on the previous QC report, noting key items like production reported, equipment and personnel readiness, and actions and variances.

Each day (or other period depending on project requirements) subcontractors will get the chance to communicate and "buy in" to the immediate operations plan.

Subcontractor Safety:
Subcontractor safety is addressed in the Corporate Safety Program Section of this proposal.

Subcontractor Quality Control Program:
The purpose of this Quality Control Program is for TFR to establish a quality control system to perform sufficient inspection and tests of all items of work, including that of our subcontractors, to ensure conformance to applicable specifications and drawings concerning the production, quantities, field activities, materials, workmanship, construction, finish, functional performance, and identification.

During work on this contract, the quality control personnel will perform the required inspections of the subcontractor's work. The Quality Control Officer is responsible for the direct supervision of all superintendents and subcontractors to ensure that the work is being performed according to the Scope of Work and TFR's Quality Control Program. Additionally, the TFR Quality Control Officer shall prepare, sign, and submit to Government Representatives a Daily Quality Control Report. This will include the identification of Subcontractor QC actions. Subcontractor actions subject to QC verification and reporting, include, at a minimum:

- Summary of safety issues
- Infrastructure damage
- Total number of trucks loaded
- Equipment and plant hours worked and idled or down
- Testing performed and by whom
- Loads and quantities hauled to DMS
- Quantity of debris reduced (if applicable)
- Number of subcontractor personnel working
- Contract non-compliance issues
- All corrective actions

In the event of notice of a violation as a result of the actions of any employee or subcontractor, the Operations Manager will take immediate corrective action and follow up on the enforcement of such action and so notate in his daily log record. Additional quality control measures will be discussed later in the Quality Control Section.

Multiple Delivery Orders in Multiple Locations

In general, the company management approach applied to multiple projects being performed simultaneously is:

- Each Task Order has its own Task Order Superintendent assigned.
- Task Order Superintendents have the authority to commit the company.
- All Task Order Superintendents report to the Operations Manager
- Depending on the scope of work and size of the contract:
  - A Project manager will be assigned to each phase of the debris removal/management operations, (i.e., Load & Haul Manager, Site Manager).
  - Each Project manager will report daily to the Task Order Superintendent
  - Each crew will be under the direction of a Crew Foreman who will report to the Project

manager
  - Crew foremen will be responsible for maintaining daily reports and overseeing the crew operations
- Each Project manager will:
  - Provide daily work assignments to each crew foreman
  - Perform daily reviews with the Task Order Superintendent of work performed, time schedules, performance targets, and work assignments for the following day.

Managing Multiple Subcontractors on Multiple Task Orders
If awarded multiple task orders in different geographical areas, TFR will assign a separate Project Manager for each region to oversee TFR operations and subcontractors. Subcontracting agreements will often be executed in the field and copies of all agreements along with necessary, tax, insurance, and license information will be available for review and approval by Government Representatives. As in all projects, it remains absolute condition precedence; all subcontractors will be under the direction of a TFR Supervisor.

Each superintendent will establish a field office located within the area of the assigned Task Order. The Superintendent for each task order will have the authority to hire subcontractors and additional field personnel when necessary. All field office personnel will have electronic linkage with the capability of communicating and sending information and daily records to the home office. Daily ticket recording and recordkeeping will be conducted and maintained in the field. Should the quantity of work warrant enhance capabilities for the region and at the discretion of the Superintendent, TFR shall dispatch additional mobile command units where necessary. Reconciled information for subcontractors will be sent to the home office weekly and billings and subcontractor payments, as well as local employees, vendors, and suppliers, will be recorded and posted, and checks written on National Banks from the home office. Checks for payments will be processed weekly and sent to the field office by either courier or public carrier (such as Federal Express or UPS) for disbursement.

Task Order Superintendents will appoint Load & Haul Crew Managers, Hazardous Tree Trimming and Removal Managers, Site Managers, and Demolition and ROE Managers (as needed per task order).

Each Task Order Superintendent shall have the authority to commit the Corporation, and resources of TFR including signing contracts and modifications. They shall also have the authority to provide administrative and financial resources, equipment, and personnel in support of the project. Their authority will include supporting and investing authority and oversight to Project Managers and Supervisors, Safety officers, Quality Control officers, Environmental officers, and Health and Safety officers.

The Task Order Superintendent is responsible for day-to-day operations, including waste stream documentation, daily reporting/progress, and planning requirements, communications with Government Representatives, enforcement of the Scope of Work, and oversight of Load and Haul and Site Managers. They report to the Operations Manager and the on-site Government Representative and act as liaisons between the two.

Subcontracting agreements will often be executed in the field and copies of all agreements along with necessary, tax, insurance, and license information will be available for review and approval by Government Representatives. As in all projects, as it remains absolute condition precedence, all subcontractors will be under the direction of a TFR Supervisor.

Corporate Safety Program

The safety and health of our employees continue to be the first consideration in the operation of our business. TFR Enterprises, Inc., and its' principals are committed to maintaining a safe and healthy workplace for each employee by providing guidelines for safe practices and accident prevention. Safety is considered a condition of employment and is the responsibility of all associated with TFR Enterprises, Inc. whether in the capacity of

employee or subcontractor. As a condition of employment, each employee is expected to use safe work practices and identify all unsafe conditions immediately. All employees are required to report any violations, unsafe conditions, or known safety hazards to their immediate supervisors at once.

All subcontract agreements are subject to the Company's Safety and Occupational Health Policy as a condition of the contract agreement. To ensure compliance, the Safety Officer is empowered with the authority to take such actions necessary to protect life, health, and safety and to protect the environment, as they deem necessary. This authority shall be irrevocable and shall include, but is not limited to, the power to unilaterally alter, suspend and/or halt any operation or portion thereof that endangers or potentially endangers life, health, and safety or threatens the protection of the environment. The Safety Officer will report to the Operations Manager and the Chief Executive Officer of the corporation.

A copy of the Company's Safety and Occupational Health Policy and its related Accident Prevention Plan was not included with this proposal because of its length but can be supplied upon request.

Safety for Subcontractors and Suppliers
Safety is considered a condition of employment and is the responsibility of all associated with TFR, whether in the capacity of employee or subcontractor. All subcontract agreements are subject to this Safety and Occupational Health Policy as a condition of the contract agreement.

The following procedures will be administered to ensure that all subcontractor activities are fully integrated into the project safety plan and job hazards analysis. When subcontractors first report to the job site and before beginning work, the project manager shall review with the subcontractor safety representative the contractual obligation to safety and the project safety rules that subcontractor employees are required to follow.

1. Review the Corporate Accident Prevention Plan and stress all the applicable requirements and procedures.
2. Review the specific Company safety rules and regulations.
3. Review hazardous work conditions presented by the physical assessment of the project.
4. Instruct their safety representative that they are to attend a monthly safety meeting.
5. It must be firmly established that all subcontractors' employees must abide by the applicable OSHA regulations.

Housekeeping
Housekeeping is essential in accident prevention and is the responsibility of each employee and subcontractor. The work area must be maintained in a neat and orderly manner and excess materials and waste should be removed daily. Supervisors and managers are to inspect and enforce orderly, safe, and clean working areas at all times.

Subcontractors will generally be responsible for their First Aid and medical treatment. However, the following will be required in writing in the subcontract agreement:

- Contact the Contractors foreman and supervisor of any incident requiring First Aid treatment.
- Provide all their foremen and supervisors a listing (with directional maps) indicating the location of the nearest emergency facilities such as Hospitals, Emergency Medical Facilities, Police Departments, and Fire Departments.
- Provide their foremen and supervisors with a 16-man first aid kit.

Quality Control Program

The purpose of this Quality Control Program is for TFR to establish a quality control system to perform sufficient inspections and tests of all items of work, including that of our subcontractors, to ensure conformance to applicable specifications and drawings concerning the production, quantities, field activities, materials, workmanship, construction, finish, functional performance, and identification. This control will be established for all activities except where the special provisions and the technical provisions of the contract provide for specific government control by inspections, tests, or other means.

The TFR control system will specifically include the surveillance and tests required in the technical provisions of the contract specifications. Both onsite and off-site fabrication will be controlled and keyed to the proposed construction sequence. The personnel assigned to the Quality Control Section will also be charged with the responsibility of policing TFR's approved safety program as required by the Accident Prevention Plan of the contract specifications.

General

The Quality Control System will include at least three phases of inspection for all technical provisions of the specifications as follows:

Preparatory Inspection:

1. This inspection is to be performed before beginning any work on a section of the technical provisions of the specifications.
2. The inspection will include a review of contract requirements; a check to assure that all materials and/or equipment have been tested, submitted, and approved.
3. Check to ensure that provisions have been made to provide required control testing.
4. Examination of the work area to ascertain that all preliminary work has been completed.
5. A physical examination of materials and equipment to assure that they conform to approved shop drawings or submittal data and that all materials, certificates, and other submittal data are before submission to the contracting officer.
6. Each submittal offered to the contracting officer for approval will bear the date and signature of a member of TFR's Quality Control organization indicating that he has reviewed the submittal and found it to be acceptable (or showing the required changes).
7. Review the appropriate Activity Hazard Analysis to assure safety requirements are met.
8. Discussion of procedures for controlling the quality of the work including repetitive deficiencies. Document construction tolerances and workmanship standards for that feature of work.
9. Check to ensure that a Government Representative has accepted the plan for the work to be performed.

Initial Inspection:

An initial inspection will be performed as soon as a representative segment of the particular item of work has been accomplished and to include an examination of the quality of workmanship and a review of control testing for compliance with contract requirements, use of defective or damaged materials, omissions, and dimensional requirements. This phase shall be accomplished at the beginning of a definable feature of work. The following shall be accomplished:

1. A check of work to ensure that it is in full compliance with contract requirements. Review minutes of the preparatory meeting.
2. Verify adequacy of controls to ensure full contract compliance. Verify required control inspection and testing.
3. Establish the level of workmanship and verify that it meets minimum acceptable workmanship standards.
4. Resolve all differences.

5. Check safety to include compliance with an upgrade of the safety plan and activity hazard analysis. Review the activity analysis with each worker.
6. Notify a Government Representative at least 24 hours in advance of the beginning of the initial phase. Separate minutes of this phase shall be prepared by the CQC System Manager and attached to the daily CQC report. The exact location of the initial phase shall be indicated for future reference and comparison with follow-up phases.
7. The initial phase will be repeated for each new crew to work onsite, or at any time acceptable specified quality standards are not being met.

Follow Up Inspections:
Follow-up inspections will be performed daily or as frequently as necessary to assure continuing compliance with contract requirements, including control testing, until completion of the particular segment of work.

Records: TFR will maintain current records of all inspections and tests performed in the format detailed below, entitled *Quality Control Report*. This form will provide factual evidence of the required inspections or tests involved, results of inspections or tests, nature of defects, causes for rejection, etc., proposed remedial action, and corrective actions taken. TFR's records will cover both conforming and defective items and must include a statement that all supplies and materials incorporated in the work are in full compliance with the terms of the contract. Legible copies of these records will be furnished to a Government Representative daily. Daily, TFR's designated representative will verify records.

Site-Specific Quality Control Plan
The site or contract-specific QC Plan must accomplish the complete daily documentation of operations, utilization and production, safety, and variations from normal operations of a debris management operation. It must be in place and approved for use before beginning any field operations, including site preparation. It must be in full compliance with contract requirements.

Multiple forms are usually formatted for the Plan, which covers different activities. A summary general daily form is also usually formatted for the project that is completed by the CQC Officer, and totals of all activities are reported on summary forms. Usually, all originals and one set of copies are delivered to a Government Representative, and TFR keeps two copies of each form.

Quality Control Organization

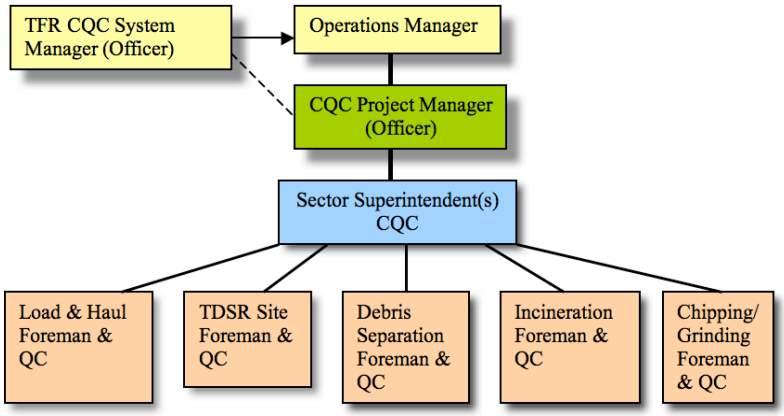
The duties and specific areas of responsibility of the various members of the Quality Control Organization are as follows:

Operations Manager: Advises all supervisory personnel including, but not limited to, Sector superintendents and key foremen assigned to critical areas, of the requirements of the specifications and advises supervisors concerning methods to be used and the degree of workmanship required.

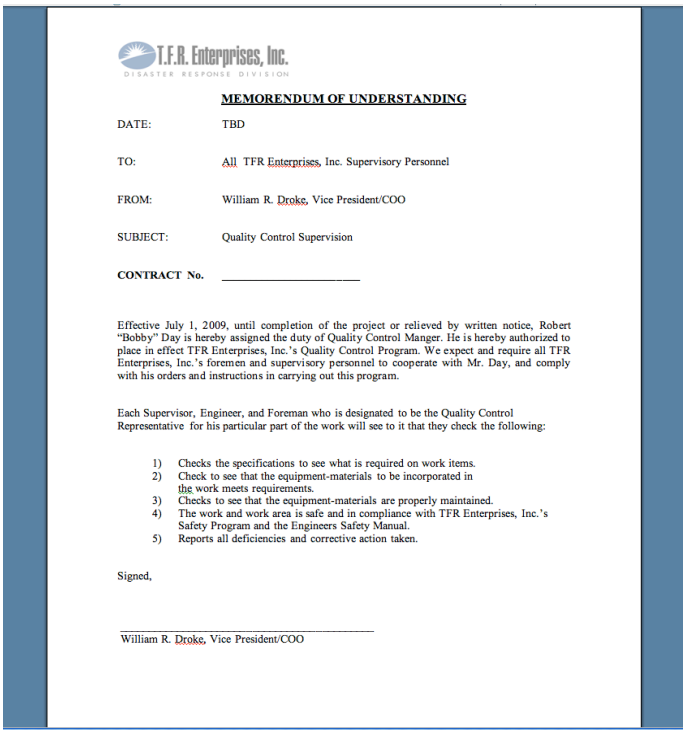
Quality Control Officer: The Quality Control Officer is responsible for the direct supervision of all superintendents and subcontractors and superintendents to ensure that the work is being performed according to the Contract Plans and Specifications and TFR's Contractor Quality Control Program. He/she will supervise the Quality Control Personnel and advise other job personnel in advance of Quality Control Requirements, submittal material, inspections, etc. of their work. When work does not comply with contract requirements, he will immediately advise the Project Manager and together they will decide what corrective action should be taken. The corrective action taken will be shown in the daily log. The designated Quality Control Supervisor will have full authority in implementing the Quality Control Program and the Safety Program of TFR Enterprises, Inc.

Quality Control Technician: Performs inspections as directed by the Quality Control Supervisor and reports any deviations from the contract directly to the Quality Control Supervisor.

A chart, documenting TFR's Quality Control organizational structure is detailed below:



Memorandum of Appointment
A sample memorandum of appointment and notification to supervisors and foremen of the appointment of the Quality Control Officer is detailed below:



T.F.R. Enterprises, Inc.
DISASTER RESPONSE DIVISION

MEMORENDUM OF UNDERSTANDING

DATE: TBD

TO: All TFR Enterprises, Inc. Supervisory Personnel

FROM: William R. Droke, Vice President/COO

SUBJECT: Quality Control Supervision

CONTRACT No. _____

Effective July 1, 2009, until completion of the project or relieved by written notice, Robert "Bobby" Day is hereby assigned the duty of Quality Control Manger. He is hereby authorized to place in effect TFR Enterprises, Inc.'s Quality Control Program. We expect and require all TFR Enterprises, Inc.'s foremen and supervisory personnel to cooperate with Mr. Day, and comply with his orders and instructions in carrying out this program.

Each Supervisor, Engineer, and Foreman who is designated to be the Quality Control Representative for his particular part of the work will see to it that they check the following:

1) Checks the specifications to see what is required on work items.
2) Check to see that the equipment-materials to be incorporated in the work meets requirements.
3) Checks to see that the equipment-materials are properly maintained.
4) The work and work area is safe and in compliance with TFR Enterprises, Inc.'s Safety Program and the Engineers Safety Manual.
5) Reports all deficiencies and corrective action taken.

Signed,

_____
William R. Droke, Vice President/COO

QC Daily Reporting Procedures
The CQC Plan and the TFR Quality Control Manager shall address the Recording and Reporting requirements with all levels of supervisors and Crew Foremen. Different levels will have different requirements. A sample form as a model is provided above, and all final versions of all forms will be approved with the final CQC Plan,

including any additional required modifications. This discussion shall include the general procedures set forth below:

- All loading and hauling crews are under the direction of a TFR supervisor.
- Daily reports are maintained by the crew foreman and recording all equipment downtime for repairs is on the daily reports.
- Hours of each piece of equipment and each employee, are recorded and reconciled daily.
- Daily Reports shall have daily and year-to-date totals for each piece of equipment/personnel tasked.
- Signatures of both TFR's Representative and a Government Representative are required on all Daily Reports.

The TFR Quality Control Officer shall prepare, sign, and submit to the Government Representative a *Quality Control Summary Sheet*. This report at a minimum shall include originals and one copy of all levels of QC reports received and in addition shall include a summary of safety issues, infrastructure damage, total numbers of trucks loaded, equipment, and plant hours worked, and idled or down, testing performed and by whom, loads and quantities hauled to DMS, the quantity of debris reduced, number of subcontractors working, contract non-compliance issues and all corrective actions.

QC Inspection Methods and Procedures
During work on the contract, the Quality Control personnel will perform the required inspections of both the TFR's and subcontractor's work. The staff that performs the Quality Control inspections will be charged with the following duties:

1. Maintain and keep in serviceable condition, all machinery, and materials.
2. Take whatever corrective action is necessary to replace or repair deficiencies observed at any time that affect the operation of machinery and materials.
3. Inspect for compliance with contract requirements.
4. Maintain copies of Inspection Records.

Detailed below are the procedures and methods that will be implemented:

Safety Issues:
The role of QC in support of safety is to document that the safety plan provisions are being followed. At each level, the *Quality Control Report* has appropriate reporting requirements for safety, including worker protection, equipment safety, trimming of loads, flagmen, work zone safety, and traffic control. Each level of the *Quality Control Report* for each activity should have a section addressing daily safety meetings, issues, and activities.

Debris Eligibility:
TFR should only be handling materials authorized by our contract. The CQC Officer shall train the field ROW personnel on these materials classifications, and shall include the general eligibility requirements set forth below:

Eligible Debris-
C&D Debris is non-burnable debris and can consist of recyclable as well as non-recyclable debris that will eventually be delivered to a landfill. Samples of this type of debris include, but are not limited to, mattresses, clothing, masonry, concrete, asphalt, metals, plastics, lumber, manufactured furniture, building components, etc.

Vegetative Debris is burnable debris of natural origin such as grass, shrubs, and trees and can be reduced and/or recycled by either incineration or by chipping/grinding.
Household Hazardous Waste (HHW) is the debris of a chemical nature and includes such items as household chemicals, pesticides, liquids, paint, batteries, waste oil, waste fuels, antifreeze, spray cans, etc.

White Goods refer to items such as refrigerators, air conditioners, freezers, etc. which may contain chemicals or fluids such as freon or oil, which must be remediated by someone with the appropriate license and certifications to do so.

Metals, both Ferris and non-Ferris such as copper, aluminum, steel, or iron may include parts from automobiles, trucks, bicycles, small engines, buildings, small appliances, and other items.

Ineligible Debris-
Any Debris which is not located on the Right of Way, regardless of category, i.e., C&D, Vegetative, Household Hazardous Waste, White Goods, or Metals is INELIGIBLE DEBRIS. Debris removal from private property is the responsibility of the individual property owner. No TFR crews or Subcontractors are allowed to work for the private sector while underemployment/contract to TFR Enterprises, Inc. during the duration of the Project/Task Order. Fallen trees located on public property but in an unused forested or wilderness area are ineligible unless specifically directed.

Daily Household Garbage, or what could be classified as Municipal Solid Waste (MSW), is ineligible debris.

Debris, which is not the result of the disaster event, for example, debris from a demolition that was performed before the disaster event occurred, is ineligible.

Segregation of Debris at Curbside Pick Up

1. All loading operators are also instructed on the importance of maintaining the segregation of eligible debris when loading.
2. All vegetative debris will be loaded on trucks hauling vegetative debris only. If other debris is encountered alongside the vegetative debris, it will be left at the curbside to be later loaded on the trucks hauling whatever type of debris that is left.
3. Separate trucks will be used for loading Construction and Demolition debris.
4. Metals and white goods will also be loaded and hauled separately.
5. Any household hazardous waste shall be left at the curbside for the HHW crew to load and haul.
6. When possible, any “mixed piles” of debris encountered at the curbside will be separated by hand before loading. If it is not practical to separate the mixed piles at the curbside by hand, the mixed piles will be loaded on separate trucks and the load ticket will indicate “mixed debris.”

Loading:

1. All Loaders will have been previously inspected at the staging area for safety and compliance before being dispatched to the loading location.
2. All Loader operators will receive safety briefings before beginning loading operations.
3. Flagmen will be located ahead of loading operations to direct and control traffic.
4. All flagmen will be properly attired and wearing safety equipment including hard hats, safety shoes, reflective vests, and carrying traffic-directing flags.
5. All flagmen are under the supervision of the crew foreman.
6. Operators are cautioned to be observant and conscious of their surroundings at all times, in particular being aware of hanging and downed power lines and structures hidden by debris, such as fire hydrants, water mains, fences, etc.
7. Operators are cautioned not to overload trucks with debris so that the transporting of the debris could cause the excess debris to become dislodged and fall into traffic areas.
8. Operators are cautioned to stay in the right of way and not to enter private property during the loading process.
9. Operators are equipped with mobile radios and are supervised by a crew foreman.

10. Operators are instructed to keep the debris loads segregated between (a) burnable (vegetative), (b) non-burnable (C&D), and (c) mixed piles where C&D, non-burnable, and vegetative are co-mingled and cannot efficiently be separated at the curbside, (d) other (such as household hazardous waste [HHW])
11. Household hazardous waste (HHW) crew, trained in EPA requirements for handling of HHW, will load HHW materials, (household cleansers, butane, poisons, etc.) at the curbside by hand in a specially equipped compartmental truck. HHW will be delivered to the collection point.
12. As it is TFR policy, Loading and Hauling Crews shall complete any debris-clearing operations that have been started on any particular pass through a neighborhood, and shall not "skip" through designated work areas for "gravy" loads.
13. All Loading and hauling crews are under the direction of a TFR supervisor. Daily reports are maintained by the crew foreman who records all equipment downtime for repairs on the daily reports. The hours of each piece of equipment and each employee are recorded and reconciled with the Government Representative daily.
14. In the event of notice of a violation as a result of the actions of any employee or subcontractor, the Operations Manager will take immediate corrective action and follow up on the enforcement of such action and so notate in his daily log record.

Hauling:

1. All Trucks will have been previously inspected at the staging area for measurement, numbering, safety, and compliance before being dispatched to the loading location.
2. All truck operators will be instructed to observe traffic regulations and follow the instructions of the flag persons.
3. All truck operators are to wear safety equipment, hard hats, and steel-toed shoes.
4. Truck operators are not allowed to leave with "overhanging" loads. Loads will either be trimmed or reloaded before being allowed to leave the loading area.
5. It is the truck operator's responsibility to check and determine that his load is safe before leaving the loading site.
6. Truck operators are equipped with mobile radios and are supervised by crew foremen.
7. Truck operators will be issued a "load ticket" at the loading site and will deliver the ticket to the inspector at the dump site.

Dumping:

1. Dumping operations will be at either the DMS or at a landfill/disposal site designated.
2. All traffic regulations and speed limits will be observed at the dump site.
3. Truck operators will report to the weigh station and deliver their "load ticket" to the TFR QC and Government QA for inspection and approval before proceeding to dump his/her debris.
4. Each truck operator will be directed as to where to dump each load at the dumpsite location by the designated dumpsite operator.
5. Each truck operator will inspect his truck and tailgate after the dumping process is completed to assure that it is secure before leaving the dump area.
6. Truck operators will follow the designed traffic flow when leaving the dump and returning to the designated loading area.

QC Private Property (ROE) Program Procedures

The Company's Quality Control Manager shall discuss the requirements and procedures for the removal of debris from private property under the Right of Entry (ROE) Program with all Crew Foremen. This discussion shall include the general procedures set forth below:

1. Before a demolition project on private property can begin, a Right-of-Entry document must be executed, including:

   a. Authorization to enter the property for demolition
   b. Hold harmless agreement accompanied by a non-duplication of benefits agreement from the City/County.
2. TFR crews are not permitted to enter private property except at the direction of the TFR ROE Manager or Government Representative.
3. Proper completion of a TFR ROE Program Checklist:
   a. HHW crew will be assigned to remove any hazardous materials from the property.
   b. All HHW materials will be cataloged, and disposition defined.
   c. All utility connections will be inspected to ensure that they are disconnected.

After demolition, all materials can be either placed on the right of way to be picked up under the debris removal agreement or taken directly to the DMS for separation and disposal.

QC Rental of Equipment with Operators

1. Inspection and Identification of Equipment & Materials before any machinery or materials are placed in use; they shall be inspected and tested by competent personnel. The Contractor's personnel will perform such duties.
2. The contractor's personnel chosen by the Quality Control Officer will perform an inspection of all machinery and materials daily.
3. Records of inspections shall be maintained at the site and shall be available on request.
4. Preventative maintenance procedures recommended by the manufacturer shall be followed.
5. All repairs on machinery or materials shall be made at a location, which will protect traffic for repairmen. Any machinery or equipment found by the contractor to be unsafe shall be deadlined until unsafe conditions have been corrected.
6. Only TFR-designated personnel shall operate machinery and mechanized equipment.
7. The Quality Control Supervisor shall instruct all operators in the use and details of Safety Operations.
8. Operators of machinery will establish and confirm requirements daily to comply with contract documents with TFR's representative.
9. Material deficiencies observed shall be reported to the proper TFR personnel for correction.
10. All safety procedures will be used by TFR's Accident Prevention Plan.
11. All phases of work being performed will be inspected daily by the responsible member of the Quality Control team.

Business Relationships with Monitoring Companies

TFR has never experienced conflict with any of the monitoring firms. Our nest practices can be summed up with communication. We work together as a team to provide safe and effective recovery practices. Below is a list of some of the firms we've worked on multiple recovery projects.

Thompson Engineering
2970 Cottage Hill Road
Mobile, AL 36606
Jon Hoyle
(321 303-2543
Jhoyle@thompsoncs.net

Tetra Tech
3475 East Foothill Boulevard
Pasadena, CA 91107-6024
John Buri

Metric Engineering
13940 SW 136 Street
Miami, FL 33186
Jared George
(850) 980-9700

Rostan Solutions
3433 Lithia Pinecrest Rd., Ste. 287
Valrico, FL 33596
(954) 707-8637
jcousins@rostan.com

Daily coordination between City Representatives and TFR Enterprises

Our daily communication is provided so that City officials, monitors, and residents are up to date with our daily progress. This information can be distributed on our Facebook page, the City's website, and local news stations if needed.

- Zone/sector identifications
- Daily planning for work area assignments
- Daily review of work performed and project issues (complaints, performance progress, hot spots)
- Update of expectations for completion

Equipment Resources

TFR maintains an extensive amount of equipment to provide our clients with greater value and to ensure the quality of our work. With the largest fleet in the industry coupled with numerous staging areas, TFR can respond to any natural or man-made disaster quickly and efficiently. This rapid response capability provides the client with vital emergency road clearance services to allow federal, state, and local officials access to debris-restricted areas and begin disaster recovery efforts. Often on TFR projects, our equipment, and manpower completely fulfill all project scopes and requirements in a timely matter. When subcontractors are used on large-scale projects, TFR self-performs all key elements of the project to the satisfaction of the client and certifies the work is done properly to the TFR standard.

Equipment Highlights

(56) Self-Loading Haul Units
(45) Self-Loading Haul Units (Trailers)
(19) Bucket Trucks
(17) Dozers
(12) Excavators
(14) Service Trucks
(7) Heavy Haulers
(6) Diamond Z1463 Tub Grinders
(2) Diamond Z4000 Horizontal Grinders

Furthermore, our in-house maintenance crew provides immediate support to our field operators to ensure the sustainability of our equipment and operations. With years of experience working on Diamond Z's to overhauling dozer engines, TFR's maintenance crew is the logistical support necessary to ensure the limiting of costly downtime. Dedicated to their trade, TFR's maintenance crew can quickly identify, address, and repair any problem befalling our equipment and additionally, make the appropriate modifications on other similar equipment to avoid future pitfalls.

For large-scale projects, TFR can augment our own resources with local rental suppliers in the area. TFR maintains valuable, fruitful relationships with rental companies to rapidly obtain any additional equipment needed to perform the work under contract. With corporate accounts and a priority call rating with Hertz Equipment Rental, Sunbelt Rentals, United Rentals, and Volvo Construction Equipment, TFR can readily access hundreds of pieces of specialized equipment quickly to achieve desired project goals and time requirements. Furthermore, with years of loyalty with National Dealers for Caterpillar, Prentice Loaders, and Diamond Z Corporation, TFR can obtain new and used equipment for rent or purchase faster than any other company in the industry. This vital lifeline to equipment suppliers allows TFR to mobilize a job however large and specialized the project may be.

Real-Time GPS Tracking

Our fleet is equipped with Real-Time tracking so that we can ensure our trucks are deployed and active where assistance is needed most. This gives our leaders the tools to adapt to the ever-changing demands of the project. The helicopter view is an easy-to-use feature that displays all the information one needs to efficiently dispatch &/or locate crews. All vehicle movement is saved in the Samsara cloud allowing for the routes to be reviewed and the next day's work plan. Geofencing is another feature that provides a variety of alerts to help us efficiently manage trucks and routes in the recovery efforts. With this state-of-the-art technology, TFR is always in compliance with ELD mandates and DOT/FMCSA regulations.

Samsara Features

REAL-TIME GPS TRACKING

- Live vehicle location tracking
- Trip histories
- Geofence alerts

Learn more | Watch video

TRAILER TRACKING

- Theft detection
- Utilization reporting
- Cargo and temperature

Learn more

SAFETY & DASH CAMS

- Distracted driving detection
- In-cab voice coaching
- Automatic incident upload

Learn more | Watch video

ROUTING & MESSAGING

- Real-time route tracking
- Historical performance analysis
- Two-way messaging

Learn more | Watch video

DOCUMENTS

- Document upload with photos
- Centralized record-keeping
- Proof of delivery, fuel & more

Learn more | Watch video

FLEET MAINTENANCE

- Fault code monitoring
- Paperless DVIRs
- Usage-based maintenance

Learn more | Watch video

WIFI HOTSPOT

- In-cab WiFi
- Cellular data included
- For any mobile app or device

Learn more

ELD COMPLIANCE

- FMCSA-listed ELD
- Works with any mobile device
- Centralized real-time visibility

Learn more | Watch video

REEFER MONITORING

- Easy to install wireless monitors
- Live temperature change alerts
- Automatic historical logs

Learn more

REPORTING & ALERTS

- Fuel efficiency & vehicle health
- Activity and driver behavior
- IFTA, ELD, and FSMA

Learn more | Get a demo

DEVELOPER APIS

- Open REST APIs
- TMS, payroll, GIS integrations
- Custom software and apps

Developer docs

Documentation Process, Procedures, and Data Management System

TFR Enterprises, Inc has developed a Disaster Debris Data Management System (DDD) used for creating, gathering, managing, and retaining all project information for all stakeholders involved in each debris mission. This disaster-specific debris management system includes documents, processes, and procedures which ensure accurate and timely invoices, subcontractor payments, and client reimbursement. These processes are specific to FEMA documentation compliance and employ quality controls to ensure accuracy with a goal of zero defects.

Material Tracking and Quantification

There are three critical data management forms used for material tracking and quantification:

1. Truck Certification forms which certify and measure each hauling unit. The certified truck number and measured hauling capacity are transferred onto a Placard which is affixed to each haul unit at the beginning of the job.
2. Load tickets for quantifying the right-of-way Debris Collection
3. Unit tickets for documenting Hazardous Leaners and Hangers (tree trimming and removal)

A truck certification form is a form used at the beginning of the project that documents all hauling units and their precise measurements calculated and recorded in unit measure Cubic Yards. The client or its contracted monitoring company performs this certification. This critical record at the beginning of operations records all truck-specific information, including assigning a unique truck number or unit number sometimes referred to as a placard number, the truck owner or subcontractor contact information, legal state vehicle registration, and measured capacity in cubic yards. Proof of liability insurance for that specific vehicle is also validated at this time. Some of this information is then transferred to a placard and affixed onto each haul unit identifying 3 key items: Truck number, the Measured Capacity of the unit, and the Contract Name (Applicant/Client). These placards are then used by the monitors to document the hauling operations onto haul tickets. TFR scans the certification along with the photographs of each unit and driver information for that vehicle into our DDD system and it is downloaded into our database.

When documenting the right of way debris removal operations, and Hazardous Leaners and Hangers there are two different methods for capturing and documenting the unit data of the work being performed in the field: **hand-written paper tickets or ADMS (Automated Data Management System)** tickets using handheld units such as smartphones or tablets. Both methods are provided by either the client's personnel, if self-monitoring the project, or by monitoring company personnel selected and hired by the client. Load tickets allow all applicants or recipients to document billable activities accurately during the debris mission and are submitted to FEMA as required documentation. The following data is collected on the paper haul tickets:

Ticket number
Load Date
Load Time
Material Type
Pickup location or origin or GPS
Contractor Name
Truck number
Driver Name
Certified Capacity of Truck
Load Call % (if applicable)

Net Cubic Yards Delivered (CY or Tons)
Destination of Material
Landfill Disposal ticket number (if applicable)
Monitor Name and Signature

Similar information is collected on the Hazardous Leaner/Hanger tickets but includes Tree, Stump, or Hanger Qty and Diameter instead of truck capacity and load call and must include GPS coordinates and be accompanied by before and after photo representation.

ADMS Technology (Automated Data Management Systems) is an electronic means of capturing data on all operations in the field. ADMS technology uses handheld units such as smartphones, tablets, or other portable hardware. The field monitors capture all pertinent data with these devices including date, time, truck number, capacity, debris type, and pick-up location (with GPS coordinates), and these units typically can take photographs documenting the operations.

Load quantities will be verified and "scored" or "called" by tower monitors at DMS or final destination sites. Once the official call is recorded onto the "open" load ticket, and a validation signature is executed by the tower monitor, the ticket is “closed” and carbon copies of the ticket are distributed as follows: one copy to the truck driver, one copy to the TFR Enterprises, Inc Project manager, two copies to the monitoring firm (one for monitor and one for client). Having 5-part tickets ensure that proper reconciliation is done between Prime Contractor, Sub-contractors (if any), the monitoring company, and the Client to maintain the integrity of the processes and to follow FEMA guidelines

TFR Data Processing. All recorded load tickets are scanned every day at our field office and downloaded into our debris database. Quality control procedures are completed on the data to ensure no duplicate tickets are entered and each ticket line is checked through programming to ensure that the measured capacity of the trucks, from the truck certifications, is correct on each ticket. The data is then reconciled with each of our subcontractor invoices to ensure data matches and is approved through our debris data management system. This process is only used with the hand-written paper ticket method, it is eliminated when an ADMS system is utilized. These procedures incorporate multiple types of billing items to include several units of measure such as “Cubic Yard”, and “Ton” for right-of-way hauling items such as vegetative, C&D, sand, water-way debris removal, unit of measure “each” for hazardous tree removal, hazardous hanging limbs (hanger), white goods, e-waste, vessels, abandoned vehicles, etc.) as well as “Hours/Days” for emergency debris clearance or 72-hour push. These items are the basis for customer invoicing as well as subcontractor payments.

Customer Invoicing. TFR will invoice using this data per the contract’s applicable invoicing cycles: weekly, bi-weekly, monthly, etc.). TFR will not invoice for duplicate tickets or debris collected off the designated right-of-way. If a duplicate ticket is invoiced, TFR will immediately revise and resubmit the invoice. These procedures adhere to FEMA and FHWA guidelines and Record Retention and Access (2 C.F.R. 200.333-337) regulations and will maintain records for a minimum of seven years (TFR exceeds these guidelines and retains these records for 10 years). These processes are well-vetted, have been improved upon over the last 33 years, and ultimately streamline our subcontractor invoice approval and payment process as well as increase the speed and accuracy of our reconciliation and invoicing to the Client. Each invoice will be accompanied by excel spreadsheets exported from our debris data management system and will include all pertinent data from each load ticket from the period of each invoice and will comply with FEMA guidelines for reimbursement.

Subcontractor Data Management and Weekly Payments

The above-described data management processes are used for managing subcontractor data. TFR's typical workweek is Monday through Sunday unless specified otherwise by contract. Sub-Contractors email weekly invoices to TFR's Project Administration team the week following the workweek for reconciliation. Reconciliation is done quickly using TFR's debris data management system and any discrepancies are sent to the subcontractor until completely reconciled. Payment for each week is made the second Friday after the workweek ends. The TFR Project Administration team sends a weekly Partial Payment and Release to the sub-contractors for signature before payment is made. This Payment release is accompanied by a spreadsheet that includes all tickets that are included in that week's payment. The subcontractor's signature on the release warrants four critical items:

a) Covenants and warrants that all labor, materials, equipment, services, and other items, including without limitation, all payroll, sales, and privilege taxes furnished under the above subcontract or purchase order(s) have been paid for, and

b) Releases TFR Enterprises, Inc., Project Owner, and Project Prime Contractor from all claims whatsoever arising out of or relating to the subcontract or purchase order, and

c) Waives any lien rights concerning the project to the extent of payments received and,

d) Agrees to indemnify TFR Enterprises, Inc., Project Owner, and Project Prime Contractor against any claim or lien asserted through or under the undersigned concerning the project.

TFR Enterprises, Inc., has prepared and submitted invoices with backup documentation for, received payments of over $240,000,000 over the past 5 years, and made subcontractor payments of over $125,000,000 on more than 100 municipal FEMA-reimbursed disaster debris management contracts. TFR's extensive FEMA experience, thorough understanding of FEMA guidelines and procedures, and reporting and payment processes allow for successful reimbursement to our customers. TFR's thoroughly vetted data management system results in the successful completion of FEMA reimbursements and audits.

Pre-Event Assistance - TFR can guide the development of debris management plans. Coordinate annual readiness (kick-off) meetings after the award. Assist in locating and pre-approving temporary debris management sites with the appropriate authorities (i.e., Department of Environmental Quality, etc.)

Post-Event Assistance - Provide guidance and assistance with debris volume assessments post-storm. Attend kickoff meetings and subsequent meetings. Provide daily progress reports. Assist with Public Announcements. Provide client-requested reports. Keep in constant communication with the client on all debris operations and provide supporting data for FEMA reimbursement.

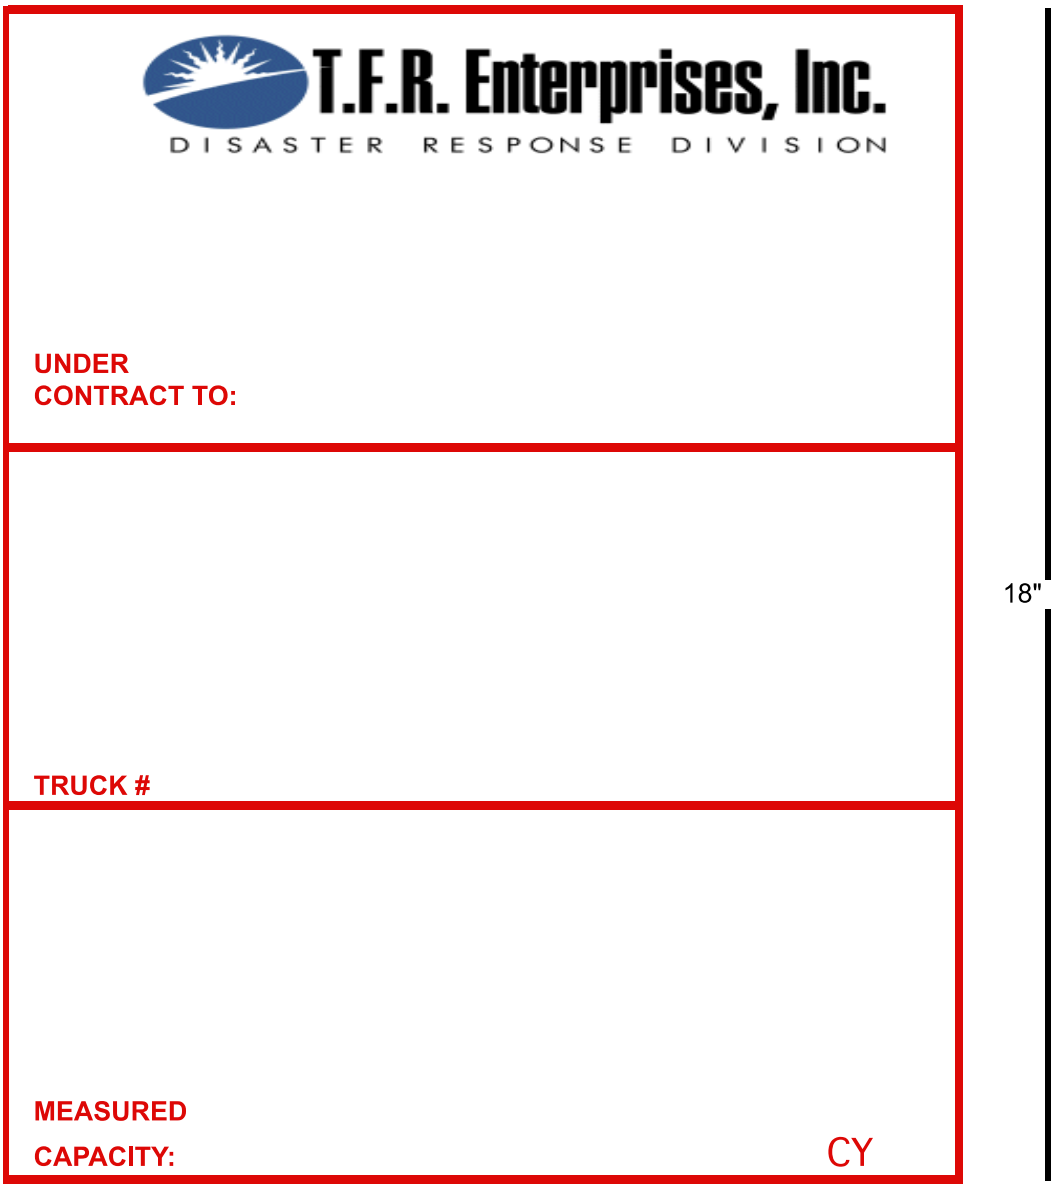
SAMPLE TRUCK IDENTIFICATION PLACARD



Understanding of Scope of Work

Event Type 1: Spot Jobs – Localized

# DMS Sites	Type of Equipment	Estimated CY	Quantity of Haul Units	Mobilization time from NTP
N/A	Chainsaw Crews Self-Loading Kucklebooms Bobcats	Hourly Cut & Shove Operations	3-5	6-12 Hours

TFR Spotlight

TFR mobilized 180 Emergency Cut & Shove Crews within 6 hours after Hurricane Florence made landfall in North Carolina. The crews responded in 6 counties and were comprised of 720 responders and 180 bobcats.

Although the state was devastated with historical flooding caused by the storm, TFR had the roads and highways cleared within 72 hours

Methodology: TFR will aid local government forces in the clearing, removing, hauling, and/or reduction by chain saw of localized woody debris by cutting and removing vegetative debris to a point of two feet beyond the curb or gutter. The entire scope of this event may be performed on an hourly basis utilizing local subcontractors and company-owned resources. (The number of personnel, push equipment, and cut crews will depend on the severity of the storm.) Although a debris management site is not normally required for this type of event, if one is required, TFR can select and set up a site within 24 hours.

Event Type 2: Small Event – Widespread or County/City Wide

# DMS Sites	Type of Equipment	Estimated CY	Quantity of Haul Units	Mobilization time from NTP
1	Chainsaw Crews Self-Loading Kucklebooms Bobcats Bucket Trucks	Less than 25,000CY	5-8	24 Hours

Methodology: Using company-owned resources, TFR will provide all necessary supervision, manpower, and equipment to clear, remove, haul, recycle, and/or dispose of all types of debris. For an event of this size, we anticipate needing one debris management site, which we will either locate or use government land that may be suitable for segregation activities. Throughout the setup, maintenance, and closeout of the project, all federal guidelines and regulations will be followed. Debris types that cannot be recycled will be hauled to a permitted final disposal facility.

TFR Spotlight

Town of Madisonville, Louisiana

Event: Hurricane Ida

TFR provided all necessary supervision, labor, and equipment to clear, remove, haul, recycle and dispose of 27,000 cubic yards of storm debris. TFR was onsite 24-hours from notice to proceed.

TFR does not anticipate needing subcontractors in an event of this size, however, if necessary, we will pull from our list of local subcontractors first. All subcontractors will be required to adhere to all federal contract requirements and report directly to a TFR project manager.

Event Type 3: Significant Event – Removal, Reduction, Hauling – Woody Debris Only Widespread or County/City Wide

# DMS Sites	Type of Equipment	Estimated CY	Quantity of Haul Units	Mobilization time from NTP
2	Self-Loading Kucklebooms Tub Grinders Bucket Trucks DMS Support Equipment (Excavators, Dozers)	100,000 CY	20-25	24 Hours-50% 48 Hours-100%

Methodology: Using subcontractors' and company-owned resources, TFR will provide all necessary supervision, manpower, and equipment to remove, reduce (grind and mulch) and haul woody debris to a disposal site. We will operate two debris management sites for an event of this size, which we will either locate or use government land that may be suitable for reduction activities. TFR will comply with all federal guidelines and regulations for debris management site operations.

Immediately following activation, TFR will implement an aggressive mobilization and hauling schedule. Haul trucks, bucket trucks, grinders, and support equipment will mobilize to a staging yard to begin the certification process. Next, a meeting will be held with all personnel to discuss priority routes, safety protocols, and documentation processes, and review onsite points of contact. Simultaneously, our site operations manager is constructing towers, addressing any ingress/egress issues, and reviewing the site layout plans. Finally, all bucket trucks/haul trucks have been given the green light to begin cutting and hauling operations.

TFR Spotlight

City of Choctaw, Oklahoma

Event: 2021 Ice Storm

TFR provided all necessary supervision, labor, and equipment to remove, reduce, haul, and dispose of 81,694 cubic yards of woody debris. TFR was onsite 24-48 hours from notice to proceed.

Safety is of utmost concern at TFR and all standard safety policies and procedures, including signage, flagging, etc., will be implemented and strictly followed. Once the vegetative material reaches the DMS, it will be stockpiled, reduced, and hauled out for final disposal. If the DMS is located near occupied structures, our quieter, but slower, horizontal grinders will be utilized to reduce noise pollution. If it is a rural area, large, high-speed tub grinders will be used.

Event Type 4: Significant Event – Removal, Reduction, Hauling, and Separating Mixed Debris Widespread or County/City Wide

# DMS Sites	Type of Equipment	Estimated CY	Quantity of Haul Units	Mobilization time from NTP
3	Self-Loading Kucklebooms Tub Grinders Bucket Trucks DMS Support Equipment (Excavators, Dozers)	250,000 CY	25-35	24 Hours-25% 48 Hours-50% 72 Hours-100%

Methodology: This event type is identical to Event Type 3, except that debris segregation on the right-of-way and at the debris management site will be mandatory. TFR will work with government representatives to create public service announcements and distribute literature on how to properly segregate material on the right-of-way.

Through clear communication, proper planning, the adaptability of our team, and their combined knowledge of the industry, we ensure that our clients receive the best service possible, maintain FEMA eligibility for reimbursement, and recover with minimal hindrance or delays.

Event Type 5: Catastrophic Event – Removal, Reduction, Hauling, and Separating Mixed Debris Widespread

# DMS Sites	Type of Equipment	Estimated CY	Quantity of Haul Units	Mobilization time from NTP
3-4	Self-Loading Kucklebooms Tub Grinders Bucket Trucks Bobcats DMS Support Equipment (Excavators, Dozers)	500,000- 1,000,000CY	50-75	24 Hours-25% 48 Hours-50% 72 Hours-100%

Methodology: The same operational process utilized for Event Type 4 will be utilized but in an expanded manner. This type of event has the potential to generate up to 1,000,000 cubic yards of debris. We will consult with Government officials to assess the appropriate number of haul units to have on the road. In jobs of this capacity, the contractor must ensure not to "flood" the impacted area with hauling units. This leads to traffic safety hazards, a slowdown in traffic flow, and increased lines at the debris management sites and landfills; however, TFR would estimate a need for 50-75 trucks and at minimum three debris management sites for this type of event. That said, our primary concern is meeting our client's needs and we will bring on as many units as necessary to ensure that this occurs safely and expeditiously.

The operational plan remains the same as the scale of the disaster grows in destruction. We are confident in our capacity to maintain compliance, enforce safety regulations, and offer the necessary supervision, personnel, and equipment resources.

TFR Spotlight

Rapides Parish, Louisiana

Event: Hurricane Laura

TFR provided all necessary supervision, labor, and equipment to remove, reduce, recycle, haul, and dispose of 692,024 cubic yards of mixed debris. TFR was onsite 24 hours from notice to proceed.

Event Type 6: Catastrophic Event – Site Management -County/City Wide

# DMS Sites	Type of Equipment	Estimated CY	Quantity of Haul Units	Mobilization time from NTP
3-4	Tub Grinders DMS Support Equipment (Excavators, Dozers)	1,000,000 CY	N/A	24 Hours-25% 48 Hours-50% 72 Hours-100%

Methodology: With eight tub grinders, two horizontal grinders, and more than 200 pieces of heavy equipment, TFR can single-handedly set up, manage, operate, and close out enough debris management sites to assist the client in its recovery from the most devastating events. Our ability to mobilize owned equipment, along with equipment from a list of over 1000 subcontractors, will allow TFR to mobilize and expeditiously complete a project of any size and scope. This event may require multiple debris management sites and we're committed to providing the necessary traffic control, weighing, measuring, reduction, and recycling services simultaneously, if needed.

TFR Spotlight

Cedar Rapids, Iowa

Event: 2020 Derecho

TFR was tasked to equip, operate, and manage 8 debris management sites. TFR managed and processed more than 3,500,000 cubic yards of debris.

TFR Enterprises, INC
601 Leander Drive
Leander, TX 78641

To All it May Concern,

I would strongly recommend TFR Enterprises for any debris clearing and especially Hurricane cleanup duties after our state park's experience with them after Hurricane Ian in 2022. I manage both Highlands Hammock State Park in Sebring and Lake June in Winter Scrub Preserve State Park in Lake Placid, Florida. I would start by saying that they arrived on site within three days of the storm, stayed on site for 3 months and were wonderful to work with throughout the entire process. And after almost 30 years as a Florida Park Service Park Manager, I wish that all park vendors were as helpful, communicative, flexible, efficient, safe, and trustworthy. They were an extension of our own staff during a trying time with extensive damage over 11,000 acres in two parks separated by 20 miles. Not only did they clean up downed debris but also cleared flooded ditching, cut damaged trees, burned off the debris by Florida Forestry Service specifications, and worked very well with our debris monitoring company, Tetra Tech who did not show up until a week later. I can not say enough good about TFR and their employees. I hope to work with them again under different, less stressful circumstances again.

TFR Enterprises were worth much more than their cost,

V. Morgan Tyrone, PM

FLORIDA SOUTHWESTERN STATE COLLEGE

RE: TFR Debris Removal

To Whom It May Concern,

Please accept this letter of recommendation from Florida Southwestern State College in Fort Myers, FL. We would like to commend TFR Enterprises for the extremely fast mobilization and diligence in removing debris from our campuses immediately following Hurricane Ian in Sept 2022. Within 24 hours of my call, TFR had mobilized equipment and personnel to begin emergency clean-up clearing our roadways. The remainder of the project was handled professionally and timely in which FSW is greatly appreciative. I would recommend and utilize TFR's services in the future.

Sincerely,

Mat Mason
FSW Director, Facilities and Construction Management

RE: TFR Enterprises

To whom it may Concern:

The City of Lake Mary would like to acknowledge the excellent level of service that was provided by TFR Enterprises after Hurricane Ian in September 2022. TFR Enterprises is the City's primary emergency debris management contractor and was very responsive to the City's needs and wishes. TFR's on the ground crew was a pleasure to work with and the project went smoothly from the onset. The City of Lake Mary is appreciative of the service provided and would recommend TFR Enterprises to other municipalities.

Sincerely,

Bruce Paster, P.E.
Director of Public Works

STATE OF IOWA

KIM REYNOLDS
GOVERNOR

ADAM GREGG
LT. GOVERNOR

IOWA DEPARTMENT OF HOMELAND SECURITY
AND EMERGENCY MANAGEMENT
PAUL TROMBINO III, HOMELAND SECURITY ADVISOR
AND EMERGENCY MANAGEMENT DIRECTOR

Tiffany,

On behalf of the State of Iowa, I would like to thank TFR Enterprises for the exceptional debris removal services provided in the wake of the devastating severe weather event that impacted Iowa on August 10th, 2020. TFR's swift response and unwavering commitment to this mission has assisted Iowan's, at every level, in returning to normal life in a time when the very definition of the word, "normal," seems to be ever in doubt.

Battling a global pandemic environment, inclement winter weather, while also responding to multiple hurricanes that impacted other areas of the country during 2020, TFR has successfully aided the State of Iowa in grinding and disposing of more than 1.6 million cubic yards of vegetative debris in less than six months, a feat which, to my knowledge, is unprecedented in Iowa's Emergency Management history.

The professionalism, knowledge, insight, and work ethic, displayed by TFR Enterprises' staff is a tribute to your company and is in keeping with the highest standards of emergency response contractors everywhere.

Thank you for all that you have done and continue to do. Having secured a standing master agreement with your company through 2021, I take great comfort in the knowledge that, should the State of Iowa require these services in the future, TFR Enterprises is standing by, at the ready, to help Iowa travel the road to recovery.

Sincerely,

Jordan Moser
Strategic Planner

Andy Beshear
GOVERNOR

Jim Gray
SECRETARY

To whom it may concern,

In May of 2021 KYTC was pleased to have TFR Enterprises, Inc as the prime contractor for the 2021 Ice Storm Debris Removal project.

This project required extensive removal of vegetative debris in the Ashland, KY area. TFR provided fast and quality work on KYTC's Interstates, state primary, state secondary, and rural secondary routes across our region. TFR responded with fully staffed crews and the proper equipment to complete the work in a timely and quality manner. Project Manager Melvin Utterback responded to all calls, emails, and requests made by me and all KYTC representatives at the time they were made.

TFR followed all state and federal guidelines that were in place for our state and region. Those requirements included work zone safety, work zone traffic control, and the ozone requirements in effective for Boyd County, KY. TFR's attention to these details were greatly appreciated by KYTC and the Kentucky Division of Air Quality.

I ask that TFR Enterprises, Inc accept this letter of recommendation for their responsiveness, quality of work, and excellent working relationships they established with our organization. TFR's knowledge, professionalism, and insight of the work they completed made this project simple for our organization.

Sincerely,

Darren Gifford
Engineer-in-Training II
KYTC – District 9
Ashland Section

Current Contractual Obligations

The following list contains TFR's current contractual obligations throughout the United States. TFR is confident in our ability to fulfill each contract within this region, regardless of the number of activations. We own more than 200 pieces of debris removal equipment, are partnered with the largest subcontractor in the industry, and have an extensive database of additional subcontractors to lean into, if needed.

Ability to Execute Contracts in Multiple Regions

TFR is capable of executing multiple contract activations within one or more regions because our team brings:

- An experienced Prime who has successfully completed 350+ FEMA funded debris removal contracts and procured more than $2B in contingency contracts.
- Management processes proven on disaster events.
- Central oversight by experienced Operations staff and empowered project delivery teams.
- Prime Subcontractors who are committed and proven responders.
- Nationwide partners for personnel and equipment/trucking resources, along with a commitment to utilization of local and disadvantaged business enterprises as much as possible.

The primary execution and staffing options are:

- The TFR team self-performs using in-house resources.
- The TFR team plus additional local/regional subcontractors perform the task order.

The selected option is based upon a number of factors, including cost and availability of local technical resources with relevant skill and experience to successfully accomplish contractual requirements. Regardless of the execution strategy, the managing staff will come from the TFR team and strictly follow our proven management processes and procedures.

Our management approach to execute multiple contract activations is based on the following:

Single Point of Contact	The operations manager will serve as single point of contact, ensuring a clear and direct communication channel. For simultaneous projects, multiple sectors, or when needed, sites will have either an operations or project/site manager.
Clear Roles and Responsibilities	The operations manager will select the project and site managers, as needed, depending on project scope. All support staff, subcontractors, and crews will report to the site manager. Our team has a large pool of assets that ensure we can readily provide the correct mix of labor, equipment, and materials for every project. The project manager will be responsible for staffing, subcontractors, budget, schedule, technical, and quality aspects of the task order assigned.
Proactive Corporate Leadership	Working with our overall Program Manager, our operations manager will monitor team performance and ensure resource availability and client satisfaction. We're committed to ensuring appropriate resources for all projects.
Cohesive Team	Our combined team is accustomed to working at multiple locations and coordinating within the team, as well as with local government, regulatory, and state agencies. The site manager will be responsible for coordinating with the technical staff for scheduling and deliverables. All personnel will be linked by our robust communication system/tools to ensure seamless delivery of services.
Access to Vast Reach-Back Capabilities	TFR has a database of 1,000+ previously employed subcontractors and hundreds of equipment dealerships throughout the US. Our operations manager will coordinate access to these vast resources in coordination with our project managers.

MANAGING MULTIPLE CONTRACTS IN 2020

Iowa

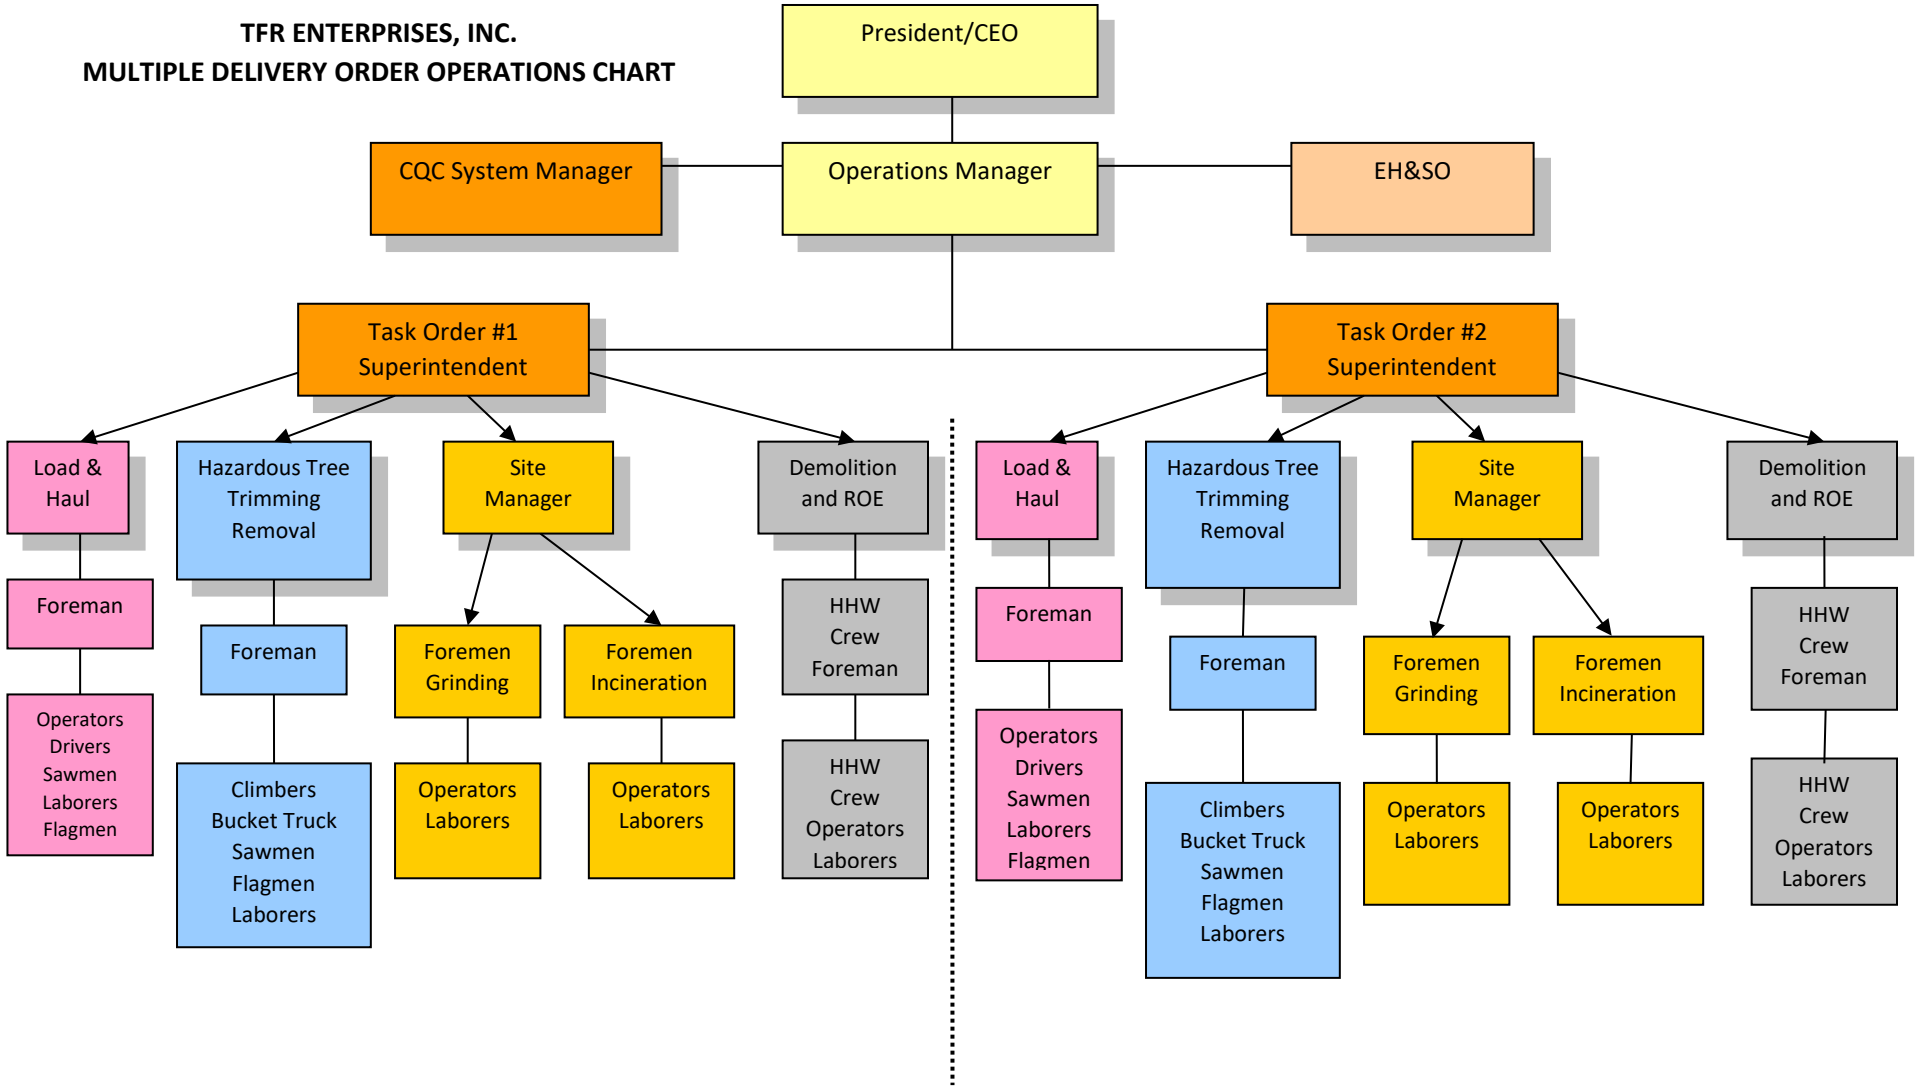
Client Testimonial

"Battling a global pandemic environment, inclement winter weather, while also responding to multiple hurricanes that impacted other areas of the country during 2020, TFR has successfully aided the State of Iowa in grinding and disposing of more than 1.6 million cubic yards of vegetative debris in less than six months" Jordan Moser, Iowa Department of Homeland Security

TFR ENTERPRISES, INC.
MULTIPLE DELIVERY ORDER OPERATIONS CHART



Financial Stability

Since the company's incorporation in 1989, TFR has completed over 350+ federally funded debris removal contracts in its 33-year history. From a dedicated owner to experienced staff, TFR offers not only the knowledge to perform any size job, but also the financial flexibility to complete multiple large-scale projects simultaneously. This was exemplified during the 2020 Hurricane season in which TFR performed 57 debris missions stemming from Iowa, Louisiana, Mississippi, Alabama, Texas, and Oklahoma, in excess of $76 Million.

With such large-scale performance across an enormous geographical area, a company must retain the financial flexibility and strength to pay subcontractors, suppliers and employees on time, every week.

"TFR Enterprises Inc. as well as the principle's Tipton and Julie Rowland, have been an excellent customer of the bank for over 15 years. Currently, TFR Enterprises Inc. has a $4,250,000.00 Revolving Line of Credit that is unfunded, and they keep considerable deposits with Prosperity Bank. The Rowland's have always performed as agreed and are a pleasure to work with." ~ Travis Freeman, Prosperity Bank Regional President

For additional information on TFR's financial capabilities, please feel free to contact Toby Miclette or Travis Freeman. Contact information is listed for your convenience and audited financial statements are available upon request.

Financial Stability Overview

- ☑ Bonding capacity $200,000,000.00
- ☑ Line-of-credit to fund multiple projects in multiple locations.
- ☑ Completed every project it was tasked to execute and has never been terminated for default.
- ☑ Never filed for bankruptcy and has never been involved in any liens or litigation involving financial performance or subcontractor non-payment.

Re: T.F.R. Enterprises, Inc. – Disaster Debris Removal Services

Dear Ms. Prevatt:

Travelers Casualty and Surety Company of America (Travelers) is the surety for T.F.R. Enterprises, Inc. (TFR). In this capacity we have become very familiar with their management, financial and performance capabilities. Through Travelers, we have established a bonding program with a single project limit of $100,000,000 as long as these projects fit within an aggregate program of $200,000,000. TFR currently has available capacity for a minimum of $500,000 for each event and Travelers has the ability to increase the bonding capacity for TFR if necessary. Travelers is currently listed on the U.S. Department of the Treasury's Listing of Certified Companies and is currently rated A++ (Superior) with a Financial Size Category of XV ($2 Billion or greater) by A. M. Best. Travelers is licensed to do business in the State of Louisiana.

It is our understanding that T.F.R. Enterprises, Inc. intends to submit a proposal to you. Travelers is agreeable to issue the performance and payment bonds, on behalf of TFR, upon issuance of a valid Contract/Task Order/Notice to Proceed, as required by contract, subject to Traveler's acceptable review of contract terms, contract amount, bond forms, and financing and other pertinent underwriting information at the time the bonds are requested. Please understand that any arrangement for any bonds is a matter between TFR and Travelers. We assume no liability to third parties or you if, for any reason, we do not issue requested bonds.

Our experience with TFR has been excellent, and we highly recommend them to you.

Sincerely.

Andrew P. Kratzer, Associate Account Executive

RE: Banking Relationship with TFR Enterprises Inc.

To Whom it may Concern:

TFR Enterprises Inc. as well as the principle's Tipton and Julie Rowland, have been excellent customers of the bank for over 18 years. TFR Enterprises Inc. has a $5,000,000 Revolving Line of Credit that is currently unfunded. Additionally, they keep considerable deposits with Prosperity Bank. The Rowland's have always performed as agreed and are a pleasure to work with. If you have any questions, please call me at 281-465-5323.

Sincerely,

Katie Williams
Assistant Vice President

Litigation Statement

Year	Type of Action	Title of Action	TFR Enterprises, Inc. Status	Nature of Action	Status
2022	Arbitration	In the matter of Arbitration Between Core Tree Care, Inc. vs. TFR Enterprises, Inc	Claimant	Payment Dispute- TFR withheld retainage	**Open**
2019	Lawsuit	TFR Enterprises, Inc. vs. Florida Department of Transportation, Target Engineering Group, LLC formerly known as Target Engineering Group, Inc.	Plaintiff	Non-Payment for Services	**Settled pending final receipt of payment**.

Core Tree Care
Core Tree filed this arbitration demand seeking payment of retainage TFR rightfully withheld due to Core Tree's failure to timely and properly perform and provide the necessary number of trucks related to certain TFR projects with the Florida Department of Transportation. TFR is permitted to withhold retainage to offset the fees and expenses incurred in connection with Core Tree's failures, which it did. TFR is vigorously defending against this arbitration. The amount in controversy is less than $100,000. This arbitration is currently in the early, pre-discovery, discussions phase.

Florida Department of Transportation
After repeated efforts to obtain payment for Monitoring-firm issued and signed tickets for a debris removal job contracted by the Florida Department of Transportation, TFR was forced to file suit to protect the interests of its local subcontractors, the Company, and other vendors. Despite repeated requests by TFR to amicably resolve this matter, FDOT provided no reasonable grounds for refusing payment (all payments were for work authorized and completed as evidenced by signed debris tickets or other comparable support). TFR spent almost two years negotiating with FDOT to resolve the nonpayment without the need for formal legal proceedings. TFR only undertook formal legal action after exhausting all other avenues failed and when FDOT refused to resolve this matter in good faith. **Settled pending final receipt of payment.**

SCHEDULE A: SCHEDULE OF ITEMS

Items will be used for evaluation purposes only. Quantities are not guaranteed and are used for evaluation purposes only. Prices shall be all-inclusive of requirements as defined in the scope of work. All labor rates are to be fully burdened to include all taxes, benefits, handling charges, overhead and profits.

Management and Reduction

Description of Services	Estimated Quantity	Unit of Measure	Unit Price	Extended Price
Debris Management Site Management: Preparation, management and segregating at debris management site	700,000	Cubic Yard	$ 2.85	$ 1,995,000.00
Above Grade - Air Curtain Burning: Vegetative Debris	300,000	Cubic Yard	$ 0.40	$ 120,000.00
Portable - Air Curtain Burning: Vegetative Debris	300,000	Cubic Yard	$ 0.40	$ 120,000.00
Grinding: Grinding/Chipping Vegetative Debris	600,000	Cubic Yard	$ 0.65	$ 390,000.00
			TOTAL MANAGEMENT AND REDUCTION:	$ 2,625,000.00

Load and Haul Vegetative Debris from ROW to a DMS - (Mileage is based on a one-way haul distance)

0-30 Miles	500,000	Cubic Yard	$ 6.35	$ 3,175,000.00

Load and Haul C&D Debris from ROW to a DMS - (Mileage is based on a one-way haul distance)

0-30 Miles	250,000	Cubic Yard	$ 6.35	$ 1,587,500.00
Load and Haul Mixed Debris from ROW to a DMS - Mixed debris consists of personal property items such as furniture, carpet, mattresses, etc. (Mileage is based on a one-way haul distance)				
0-30 Miles	250,000	Cubic Yard	$ 6.35	$ 1,587,500.00
TOTAL LOAD & HAUL VEGETATIVE, ROW, MIXED DEBRIS FROM ROW TO A DMS:				$ 1,587,500.00
White Goods Collect and Haul				
Removal of Eligible Non-refrigerant White Goods - Work consists of load and haul eligible non-refrigerant white goods from ROW to DMS	1000	Each	$ 20.00	$ 20,000.00
Removal of Eligible Refrigerant White Goods - Work consists of load and haul eligible refrigerant white goods from ROW to DMS. Contractor shall be responsible for the proper removal and disposal of refrigerants as required by law	1000	Each	$ 25.00	$ 25,000.00
TOTAL WHITE GOODS COLLECT AND HAUL:				$ 45,000.00
Tree Operations				
Removal of Hazardous Trees - Work consists of removing eligible hazardus trees and placing them at the nearest and safest location on the City ROW for collection as normal vegetative debris. (Measurements are the diameter of the tree up 54" from ground level)				
6.0 inch - 12.9 inch diameter	175	Per Tree	$ 195.00	$ 34,125.00
13.0 inch - 24.9 inch diameter	150	Per Tree	$ 295.00	$ 44,250.00
25.0 inch - 36.9 inch diameter	150	Per Tree	$ 475.00	$ 71,250.00
37.0 inch - 48.9 inch diameter	150	Per Tree	$ 485.00	$ 72,750.00
49 inch and greater diameter	150	Per Tree	$ 495.00	$ 74,250.00
Removal of Hazardous Limbs - Work consists of removing eligible hazardus limbs and placing them at the nearest and safest location on the County ROW for collection as normal vegetative debris. (Measurements are the diameter of the tree up 54" from ground level)				
Hazardus Limbs are 2" inches and greater in diameter at point of break.	3075	Per Tree	$ 71.00	$ 218,325.00
TOTAL TREE OPERATIONS:				$ 514,950.00
Haul-out of Reduced Eligible DMS Debris to City Designated Final Disposal - work consists of loading and transporting reduced eligible disaster debris to a City approved final disposal site. (Mileage is based on one-way haul distance)				
0-30.0 MILES	300,000	Cubic Yard	$ 4.50	$ 1,350,000.00
30.1-60.0 Miles	300,000	Cubic Yard	$ 4.55	$ 1,365,000.00
60.1-90.0 Miles	300,000	Cubic Yard	$ 4.60	$ 1,380,000.00
90.1-120.0 Miles	200,000	Cubic Yard	$ 4.65	$ 930,000.00
120.1-150.0 Miles	200,000	Cubic Yard	$ 4.70	$ 940,000.00

150.1 Miles or Greater	200,000	Cubic Yard	$ 4.75	$ 950,000.00
TOTAL FINAL DISPOSTION- REDUCED DEBRIS; COLLECT AND HAUL:				$ 6,915,000.00

Haul-out of Unreduced Eligible DMS Debris to City Designated Final Disposal - work consists of loading and transporting unreduced eligible disaster debris from a public property or ROW to a City approved final disposal site. (Mileage is based on one-way haul distance)				
0-30.0 MILES	200,000	Cubic Yard	$ 4.50	$ 900,000.00
30.1-60.0 Miles	200,000	Cubic Yard	$ 4.55	$ 910,000.00
60.1-90.0 Miles	200,000	Cubic Yard	$ 4.60	$ 920,000.00
90.1-120.0 Miles	200,000	Cubic Yard	$ 4.65	$ 930,000.00
120.1-150.0 Miles	200,000	Cubic Yard	$ 4.70	$ 940,000.00
150.1 Miles or Greater	200,000	Cubic Yard	$ 4.75	$ 950,000.00
TOTAL FINAL DISPOSTION- UNREDUCED DEBRIS; COLLECT AND HAUL:				$ 5,550,000.00

LABOR RATES: All labor rates are to be fully burdened to include all taxes, benefits, handling charges, overhead and profits; per diem and fuel is to be included in hourly labor rates.

CERTIFICATION REGARDING LOBBYING

Required Certification for Federal Contract (FEMA)
Byrd Anti-Lobbying Amendment, 31 U.S.C. § 1352 (as amended)

If applicable, Contractor must sign and submit the following certification to The City of Daytona Beach with each bid or odder exceeding $100,000.

APPENDIX A, 44 C.F.R. PART 18 – CERTIFICATION REGARDING LOBBYING

Certification for Contracts, Grants, Loans, and Cooperative Agreements

The undersigned certifies, to the best of his or her knowledge and belief, that:

1. No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of an agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

2. If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.

3. The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

The Contractor, TFR Enterprises, Inc, certifies or affirms the truthfulness and accuracy of

each statement of its certification and disclosure, if any. In addition, the Contractor understands and agrees that the provisions of 31 U.S.C. Chap. 38, Administrative Remedies for False Claims and Statements, apply to this certification and disclosure, if any.

THE E-VERIFY MEMORANDUM OF UNDERSTANDING FOR EMPLOYERS

ARTICLE I
PURPOSE AND AUTHORITY

The parties to this agreement are the Department of Homeland Security (DHS) and TFR Enterprises, Inc (Employer). The purpose of this agreement is to set forth terms and conditions which the Employer will follow while participating in E-Verify.

E-Verify is a program that electronically confirms an employee's eligibility to work in the United States after completion of Form I-9, Employment Eligibility Verification (Form I-9). This Memorandum of Understanding (MOU) explains certain features of the E-Verify program and describes specific responsibilities of the Employer, the Social Security Administration (SSA), and DHS.

Authority for the E-Verify program is found in Title IV, Subtitle A, of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (IIRIRA), Pub. L. 104-208, 110 Stat. 3009, as amended (8 U.S.C. § 1324a note). The Federal Acquisition Regulation (FAR) Subpart 22.18, "Employment Eligibility Verification" and Executive Order 12989, as amended, provide authority for Federal contractors and subcontractors (Federal contractor) to use E-Verify to verify the employment eligibility of certain employees working on Federal contracts.

ARTICLE II
RESPONSIBILITIES

A. RESPONSIBILITIES OF THE EMPLOYER

1. The Employer agrees to display the following notices supplied by DHS in a prominent place that is clearly visible to prospective employees and all employees who are to be verified through the system:

   a. Notice of E-Verify Participation

   b. Notice of Right to Work

2. The Employer agrees to provide to the SSA and DHS the names, titles, addresses, and telephone numbers of the Employer representatives to be contacted about E-Verify. The Employer also agrees to keep such information current by providing updated information to SSA and DHS whenever the representatives' contact information changes.

3. The Employer agrees to grant E-Verify access only to current employees who need E-Verify access. Employers must promptly terminate an employee's E-Verify access if the employer is separated from the company or no longer needs access to E-Verify.

Company ID Number: 303767

4. The Employer agrees to become familiar with and comply with the most recent version of the E-Verify User Manual.

5. The Employer agrees that any Employer Representative who will create E-Verify cases will complete the E-Verify Tutorial before that individual creates any cases.

a. The Employer agrees that all Employer representatives will take the refresher tutorials when prompted by E-Verify in order to continue using E-Verify. Failure to complete a refresher tutorial will prevent the Employer Representative from continued use of E-Verify.

6. The Employer agrees to comply with current Form I-9 procedures, with two exceptions:

a. If an employee presents a "List B" identity document, the Employer agrees to only accept "List B" documents that contain a photo. (List B documents identified in 8 C.F.R. § 274a.2(b)(1)(B)) can be presented during the Form I-9 process to establish identity.) If an employee objects to the photo requirement for religious reasons, the Employer should contact E-Verify at 888-464-4218.

b. If an employee presents a DHS Form I-551 (Permanent Resident Card), Form I-766 (Employment Authorization Document), or U.S. Passport or Passport Card to complete Form I-9, the Employer agrees to make a photocopy of the document and to retain the photocopy with the employee's Form I-9. The Employer will use the photocopy to verify the photo and to assist DHS with its review of photo mismatches that employees contest. DHS may in the future designate other documents that activate the photo screening tool.

Note: Subject only to the exceptions noted previously in this paragraph, employees still retain the right to present any List A, or List B and List C, document(s) to complete the Form I-9.

7. The Employer agrees to record the case verification number on the employee's Form I-9 or to print the screen containing the case verification number and attach it to the employee's Form I-9.

8. The Employer agrees that, although it participates in E-Verify, the Employer has a responsibility to complete, retain, and make available for inspection Forms I-9 that relate to its employees, or from other requirements of applicable regulations or laws, including the obligation to comply with the antidiscrimination requirements of section 274B of the INA with respect to Form I-9 procedures.

a. The following modified requirements are the only exceptions to an Employer's obligation to not employ unauthorized workers and comply with the anti-discrimination provision of the INA: (1) List B identity documents must have photos, as described in paragraph 6 above; (2) When an Employer confirms the identity and employment eligibility of newly hired employee using E-Verify procedures, the Employer establishes a rebuttable presumption that it has not violated section 274A(a)(1)(A) of the Immigration and Nationality Act (INA) with respect to the hiring of that employee; (3) If the Employer receives a final nonconfirmation for an employee, but continues to employ that person, the Employer must notify DHS and the Employer is subject to a civil money penalty between $550 and $1,100 for each failure to notify DHS of continued employment following a final nonconfirmation; (4) If the Employer continues to employ an employee after receiving a final nonconfirmation, then the Employer is subject to a rebuttable presumption that it has knowingly

employed an unauthorized alien in violation of section 274A(a)(1)(A); and (5) no E-Verify participant is civilly or criminally liable under any law for any action taken in good faith based on information provided through the E-Verify.

b. DHS reserves the right to conduct Form I-9 compliance inspections, as well as any other enforcement or compliance activity authorized by law, including site visits, to ensure proper use of E-Verify.

9. The Employer is strictly prohibited from creating an E-Verify case before the employee has been hired, meaning that a firm offer of employment was extended and accepted and Form I-9 was completed. The Employer agrees to create an E-Verify case for new employees within three Employer business days after each employee has been hired (after both Sections 1 and 2 of Form I-9 have been completed), and to complete as many steps of the E-Verify process as are necessary according to the E-Verify User Manual. If E-Verify is temporarily unavailable, the three-day time period will be extended until it is again operational in order to accommodate the Employer's attempting, in good faith, to make inquiries during the period of unavailability.

10. The Employer agrees not to use E-Verify for pre-employment screening of job applicants, in support of any unlawful employment practice, or for any other use that this MOU or the E-Verify User Manual does not authorize.

11. The Employer must use E-Verify for all new employees. The Employer will not verify selectively and will not verify employees hired before the effective date of this MOU. Employers who are Federal contractors may qualify for exceptions to this requirement as described in Article II.B of this MOU.

12. The Employer agrees to follow appropriate procedures (see Article III below) regarding tentative nonconfirmations. The Employer must promptly notify employees in private of the finding and provide them with the notice and letter containing information specific to the employee's E-Verify case. The Employer agrees to provide both the English and the translated notice and letter for employees with limited English proficiency to employees. The Employer agrees to provide written referral instructions to employees and instruct affected employees to bring the English copy of the letter to the SSA. The Employer must allow employees to contest the finding, and not take adverse action against employees if they choose to contest the finding, while their case is still pending. Further, when employees contest a tentative nonconfirmation based upon a photo mismatch, the Employer must take additional steps (see Article III.B. below) to contact DHS with information necessary to resolve the challenge.

13. The Employer agrees not to take any adverse action against an employee based upon the employee's perceived employment eligibility status while SSA or DHS is processing the verification request unless the Employer obtains knowledge (as defined in 8 C.F.R. § 274a.1(l)) that the employee is not work authorized. The Employer understands that an initial inability of the SSA or DHS automated verification system to verify work authorization, a tentative nonconfirmation, a case in continuance (indicating the need for additional time for the government to resolve a case), or the finding of a photo mismatch, does not establish, and should not be interpreted as, evidence that the employee is not work authorized. In any of such cases, the employee must be provided a full and fair opportunity to contest the finding, and if he or she does so, the employee may not be terminated or suffer any adverse employment consequences based upon the employee's perceived employment eligibility status

(including denying, reducing, or extending work hours, delaying or preventing training, requiring an employee to work in poorer conditions, withholding pay, refusing to assign the employee to a Federal contract or other assignment, or otherwise assuming that he or she is unauthorized to work) until and unless secondary verification by SSA or DHS has been completed and a final nonconfirmation has been issued. If the employee does not choose to contest a tentative nonconfirmation or a photo mismatch or if a secondary verification is completed and a final nonconfirmation is issued, then the Employer can find the employee is not work authorized and terminate the employee's employment. Employers or employees with questions about a final nonconfirmation may call E-Verify at 1-888-464-4218 (customer service) or 1-888-897-7781 (worker hotline).

14. The Employer agrees to comply with Title VII of the Civil Rights Act of 1964 and section 274B of the INA as applicable by not discriminating unlawfully against any individual in hiring, firing, employment eligibility verification, or recruitment or referral practices because of his or her national origin or citizenship status, or by committing discriminatory documentary practices. The Employer understands that such illegal practices can include selective verification or use of E-Verify except as provided in part D below, or discharging or refusing to hire employees because they appear or sound "foreign" or have received tentative nonconfirmations. The Employer further understands that any violation of the immigration-related unfair employment practices provisions in section 274B of the INA could subject the Employer to civil penalties, back pay awards, and other sanctions, and violations of Title VII could subject the Employer to back pay awards, compensatory and punitive damages. Violations of either section 274B of the INA or Title VII may also lead to the termination of its participation in E-Verify. If the Employer has any questions relating to the anti-discrimination provision, it should contact OSC at 1-800-255-8155 or 1-800-237-2515 (TDD).

15. The Employer agrees that it will use the information it receives from E-Verify only to confirm the employment eligibility of employees as authorized by this MOU. The Employer agrees that it will safeguard this information, and means of access to it (such as PINS and passwords), to ensure that it is not used for any other purpose and as necessary to protect its confidentiality, including ensuring that it is not disseminated to any person other than employees of the Employer who are authorized to perform the Employer's responsibilities under this MOU, except for such dissemination as may be authorized in advance by SSA or DHS for legitimate purposes.

16. The Employer agrees to notify DHS immediately in the event of a breach of personal information. Breaches are defined as loss of control or unauthorized access to E-Verify personal data. All suspected or confirmed breaches should be reported by calling 1-888-464-4218 or via email at E-Verify@dhs.gov. Please use "Privacy Incident – Password" in the subject line of your email when sending a breach report to E-Verify.

17. The Employer acknowledges that the information it receives from SSA is governed by the Privacy Act (5 U.S.C. § 552a(i)(1) and (3)) and the Social Security Act (42 U.S.C. 1306(a)). Any person who obtains this information under false pretenses or uses it for any purpose other than as provided for in this MOU may be subject to criminal penalties.

18. The Employer agrees to cooperate with DHS and SSA in their compliance monitoring and evaluation of E-Verify, which includes permitting DHS, SSA, their contractors and other agents, upon

reasonable notice, to review Forms I-9 and other employment records and to interview it and its employees regarding the Employer's use of E-Verify, and to respond in a prompt and accurate manner to DHS requests for information relating to their participation in E-Verify.

19. The Employer shall not make any false or unauthorized claims or references about its participation in E-Verify on its website, in advertising materials, or other media. The Employer shall not describe its services as federally-approved, federally-certified, or federally-recognized, or use language with a similar intent on its website or other materials provided to the public. Entering into this MOU does not mean that E-Verify endorses or authorizes your E-Verify services and any claim to that effect is false.

20. The Employer shall not state in its website or other public documents that any language used therein has been provided or approved by DHS, USCIS or the Verification Division, without first obtaining the prior written consent of DHS.

21. The Employer agrees that E-Verify trademarks and logos may be used only under license by DHS/USCIS (see M-795 (Web)) and, other than pursuant to the specific terms of such license, may not be used in any manner that might imply that the Employer's services, products, websites, or publications are sponsored by, endorsed by, licensed by, or affiliated with DHS, USCIS, or E-Verify.

22. The Employer understands that if it uses E-Verify procedures for any purpose other than as authorized by this MOU, the Employer may be subject to appropriate legal action and termination of its participation in E-Verify according to this MOU.

B. RESPONSIBILITIES OF FEDERAL CONTRACTORS

1. If the Employer is a Federal contractor with the FAR E-Verify clause subject to the employment verification terms in Subpart 22.18 of the FAR, it will become familiar with and comply with the most current version of the E-Verify User Manual for Federal Contractors as well as the E-Verify Supplemental Guide for Federal Contractors.

2. In addition to the responsibilities of every employer outlined in this MOU, the Employer understands that if it is a Federal contractor subject to the employment verification terms in Subpart 22.18 of the FAR it must verify the employment eligibility of any "employee assigned to the contract" (as defined in FAR 22.1801). Once an employee has been verified through E-Verify by the Employer, the Employer may not create a second case for the employee through E-Verify.

a. An Employer that is not enrolled in E-Verify as a Federal contractor at the time of a contract award must enroll as a Federal contractor in the E-Verify program within 30 calendar days of contract award and, within 90 days of enrollment, begin to verify employment eligibility of new hires using E-Verify. The Employer must verify those employees who are working in the United States, whether or not they are assigned to the contract. Once the Employer begins verifying new hires, such verification of new hires must be initiated within three business days after the hire date. Once enrolled in E-Verify as a Federal contractor, the Employer must begin verification of employees assigned to the contract within 90 calendar days after the date of enrollment or within 30 days of an employee's assignment to the contract, whichever date is later.

b. Employers enrolled in E-Verify as a Federal contractor for 90 days or more at the time of a contract award must use E-Verify to begin verification of employment eligibility for new hires of the Employer who are working in the United States, whether or not assigned to the contract, within three business days after the date of hire. If the Employer is enrolled in E-Verify as a Federal contractor for 90 calendar days or less at the time of contract award, the Employer must, within 90 days of enrollment, begin to use E-Verify to initiate verification of new hires of the contractor who are working in the United States, whether or not assigned to the contract. Such verification of new hires must be initiated within three business days after the date of hire. An Employer enrolled as a Federal contractor in E-Verify must begin verification of each employee assigned to the contract within 90 calendar days after date of contract award or within 30 days after assignment to the contract, whichever is later.

c. Federal contractors that are institutions of higher education (as defined at 20 U.S.C. 1001(a)), state or local governments, governments of Federally recognized Indian tribes, or sureties performing under a takeover agreement entered into with a Federal agency under a performance bond may choose to only verify new and existing employees assigned to the Federal contract. Such Federal contractors may, however, elect to verify all new hires, and/or all existing employees hired after November 6, 1986. Employers in this category must begin verification of employees assigned to the contract within 90 calendar days after the date of enrollment or within 30 days of an employee's assignment to the contract, whichever date is later.

d. Upon enrollment, Employers who are Federal contractors may elect to verify employment eligibility of all existing employees working in the United States who were hired after November 6, 1986, instead of verifying only those employees assigned to a covered Federal contract. After enrollment, Employers must elect to verify existing staff following DHS procedures and begin E-Verify verification of all existing employees within 180 days after the election.

e. The Employer may use a previously completed Form I-9 as the basis for creating an E-Verify case for an employee assigned to a contract as long as:

i. That Form I-9 is complete (including the SSN) and complies with Article II.A.6,

ii. The employee's work authorization has not expired, and

iii. The Employer has reviewed the Form I-9 information either in person or in communications with the employee to ensure that the employee's Section 1, Form I-9 attestation has not changed (including, but not limited to, a lawful permanent resident alien having become a naturalized U.S. citizen).

f. The Employer shall complete a new Form I-9 consistent with Article II.A.6 or update the previous Form I-9 to provide the necessary information if:

i. The Employer cannot determine that Form I-9 complies with Article II.A.6,

ii. The employee's basis for work authorization as attested in Section 1 has expired or changed, or

iii. The Form I-9 contains no SSN or is otherwise incomplete.

Note: If Section 1 of Form I-9 is otherwise valid and up-to-date and the form otherwise complies with

Article II.C.5, but reflects documentation (such as a U.S. passport or Form I-551) that expired after completing Form I-9, the Employer shall not require the production of additional documentation, or use the photo screening tool described in Article II.A.5, subject to any additional or superseding instructions that may be provided on this subject in the E-Verify User Manual.

g. The Employer agrees not to require a second verification using E-Verify of any assigned employee who has previously been verified as a newly hired employee under this MOU or to authorize verification of any existing employee by any Employer that is not a Federal contractor based on this Article.

3. The Employer understands that if it is a Federal contractor, its compliance with this MOU is a performance requirement under the terms of the Federal contract or subcontract, and the Employer consents to the release of information relating to compliance with its verification responsibilities under this MOU to contracting officers or other officials authorized to review the Employer's compliance with Federal contracting requirements.

C. RESPONSIBILITIES OF SSA

1. SSA agrees to allow DHS to compare data provided by the Employer against SSA's database. SSA sends DHS confirmation that the data sent either matches or does not match the information in SSA's database.

2. SSA agrees to safeguard the information the Employer provides through E-Verify procedures. SSA also agrees to limit access to such information, as is appropriate by law, to individuals responsible for the verification of Social Security numbers or responsible for evaluation of E-Verify or such other persons or entities who may be authorized by SSA as governed by the Privacy Act (5 U.S.C. § 552a), the Social Security Act (42 U.S.C. 1306(a)), and SSA regulations (20 CFR Part 401).

3. SSA agrees to provide case results from its database within three Federal Government work days of the initial inquiry. E-Verify provides the information to the Employer.

4. SSA agrees to update SSA records as necessary if the employee who contests the SSA tentative nonconfirmation visits an SSA field office and provides the required evidence. If the employee visits an SSA field office within the eight Federal Government work days from the date of referral to SSA, SSA agrees to update SSA records, if appropriate, within the eight-day period unless SSA determines that more than eight days may be necessary. In such cases, SSA will provide additional instructions to the employee. If the employee does not visit SSA in the time allowed, E-Verify may provide a final nonconfirmation to the employer.

Note: If an Employer experiences technical problems, or has a policy question, the employer should contact E-Verify at 1-888-464-4218.

D. RESPONSIBILITIES OF DHS

1. DHS agrees to provide the Employer with selected data from DHS databases to enable the Employer to conduct, to the extent authorized by this MOU:

a. Automated verification checks on alien employees by electronic means, and

b. Photo verification checks (when available) on employees.

2. DHS agrees to assist the Employer with operational problems associated with the Employer's participation in E-Verify. DHS agrees to provide the Employer names, titles, addresses, and telephone numbers of DHS representatives to be contacted during the E-Verify process.

3. DHS agrees to provide to the Employer with access to E-Verify training materials as well as an E-Verify User Manual that contain instructions on E-Verify policies, procedures, and requirements for both SSA and DHS, including restrictions on the use of E-Verify.

4. DHS agrees to train Employers on all important changes made to E-Verify through the use of mandatory refresher tutorials and updates to the E-Verify User Manual. Even without changes to E-Verify, DHS reserves the right to require employers to take mandatory refresher tutorials.

5. DHS agrees to provide to the Employer a notice, which indicates the Employer's participation in E-Verify. DHS also agrees to provide to the Employer anti-discrimination notices issued by the Office of Special Counsel for Immigration-Related Unfair Employment Practices (OSC), Civil Rights Division, U.S. Department of Justice.

6. DHS agrees to issue each of the Employer's E-Verify users a unique user identification number and password that permits them to log in to E-Verify.

7. DHS agrees to safeguard the information the Employer provides, and to limit access to such information to individuals responsible for the verification process, for evaluation of E-Verify, or to such other persons or entities as may be authorized by applicable law. Information will be used only to verify the accuracy of Social Security numbers and employment eligibility, to enforce the INA and Federal criminal laws, and to administer Federal contracting requirements.

8. DHS agrees to provide a means of automated verification that provides (in conjunction with SSA verification procedures) confirmation or tentative nonconfirmation of employees' employment eligibility within three Federal Government work days of the initial inquiry.

9. DHS agrees to provide a means of secondary verification (including updating DHS records) for employees who contest DHS tentative nonconfirmations and photo mismatch tentative nonconfirmations. This provides final confirmation or nonconfirmation of the employees' employment eligibility within 10 Federal Government work days of the date of referral to DHS, unless DHS determines that more than 10 days may be necessary. In such cases, DHS will provide additional verification instructions.

ARTICLE III
REFERRAL OF INDIVIDUALS TO SSA AND DHS

A. REFERRAL TO SSA

1. If the Employer receives a tentative nonconfirmation issued by SSA, the Employer must print the notice as directed by E-Verify. The Employer must promptly notify employees in private of the finding and provide them with the notice and letter containing information specific to the employee's E-Verify

case. The Employer also agrees to provide both the English and the translated notice and letter for employees with limited English proficiency to employees. The Employer agrees to provide written referral instructions to employees and instruct affected employees to bring the English copy of the letter to the SSA. The Employer must allow employees to contest the finding, and not take adverse action against employees if they choose to contest the finding, while their case is still pending.

2. The Employer agrees to obtain the employee's response about whether he or she will contest the tentative nonconfirmation as soon as possible after the Employer receives the tentative nonconfirmation. Only the employee may determine whether he or she will contest the tentative nonconfirmation.

3. After a tentative nonconfirmation, the Employer will refer employees to SSA field offices only as directed by E-Verify. The Employer must record the case verification number, review the employee information submitted to E-Verify to identify any errors, and find out whether the employee contests the tentative nonconfirmation. The Employer will transmit the Social Security number, or any other corrected employee information that SSA requests, to SSA for verification again if this review indicates a need to do so.

4. The Employer will instruct the employee to visit an SSA office within eight Federal Government work days. SSA will electronically transmit the result of the referral to the Employer within 10 Federal Government work days of the referral unless it determines that more than 10 days is necessary.

5. While waiting for case results, the Employer agrees to check the E-Verify system regularly for case updates.

6. The Employer agrees not to ask the employee to obtain a printout from the Social Security Administration number database (the Numident) or other written verification of the SSN from the SSA.

B. REFERRAL TO DHS

1. If the Employer receives a tentative nonconfirmation issued by DHS, the Employer must promptly notify employees in private of the finding and provide them with the notice and letter containing information specific to the employee's E-Verify case. The Employer also agrees to provide both the English and the translated notice and letter for employees with limited English proficiency to employees. The Employer must allow employees to contest the finding, and not take adverse action against employees if they choose to contest the finding, while their case is still pending.

2. The Employer agrees to obtain the employee's response about whether he or she will contest the tentative nonconfirmation as soon as possible after the Employer receives the tentative nonconfirmation. Only the employee may determine whether he or she will contest the tentative nonconfirmation.

3. The Employer agrees to refer individuals to DHS only when the employee chooses to contest a tentative nonconfirmation.

4. If the employee contests a tentative nonconfirmation issued by DHS, the Employer will instruct the

employee to contact DHS through its toll-free hotline (as found on the referral letter) within eight Federal Government work days.

5. If the Employer finds a photo mismatch, the Employer must provide the photo mismatch tentative nonconfirmation notice and follow the instructions outlined in paragraph 1 of this section for tentative nonconfirmations, generally.

6. The Employer agrees that if an employee contests a tentative nonconfirmation based upon a photo mismatch, the Employer will send a copy of the employee's Form I-551, Form I-766, U.S. Passport, or passport card to DHS for review by:

a. Scanning and uploading the document, or

b. Sending a photocopy of the document by express mail (furnished and paid for by the employer).

7. The Employer understands that if it cannot determine whether there is a photo match/mismatch, the Employer must forward the employee's documentation to DHS as described in the preceding paragraph. The Employer agrees to resolve the case as specified by the DHS representative who will determine the photo match or mismatch.

8. DHS will electronically transmit the result of the referral to the Employer within 10 Federal Government work days of the referral unless it determines that more than 10 days is necessary.

9. While waiting for case results, the Employer agrees to check the E-Verify system regularly for case updates.

ARTICLE IV
SERVICE PROVISIONS

A. NO SERVICE FEES

1. SSA and DHS will not charge the Employer for verification services performed under this MOU. The Employer is responsible for providing equipment needed to make inquiries. To access E-Verify, an Employer will need a personal computer with Internet access.

ARTICLE V
MODIFICATION AND TERMINATION

A. MODIFICATION

1. This MOU is effective upon the signature of all parties and shall continue in effect for as long as the SSA and DHS operates the E-Verify program unless modified in writing by the mutual consent of all parties.

2. Any and all E-Verify system enhancements by DHS or SSA, including but not limited to E-Verify checking against additional data sources and instituting new verification policies or procedures, will be covered under this MOU and will not cause the need for a supplemental MOU that outlines these changes.

Company ID Number: 303767

B. TERMINATION

1. The Employer may terminate this MOU and its participation in E-Verify at any time upon 30 days prior written notice to the other parties.

2. Notwithstanding Article V, part A of this MOU, DHS may terminate this MOU, and thereby the Employer's participation in E-Verify, with or without notice at any time if deemed necessary because of the requirements of law or policy, or upon a determination by SSA or DHS that there has been a breach of system integrity or security by the Employer, or a failure on the part of the Employer to comply with established E-Verify procedures and/or legal requirements. The Employer understands that if it is a Federal contractor, termination of this MOU by any party for any reason may negatively affect the performance of its contractual responsibilities. Similarly, the Employer understands that if it is in a state where E-Verify is mandatory, termination of this by any party MOU may negatively affect the Employer's business.

3. An Employer that is a Federal contractor may terminate this MOU when the Federal contract that requires its participation in E-Verify is terminated or completed. In such cases, the Federal contractor must provide written notice to DHS. If an Employer that is a Federal contractor fails to provide such notice, then that Employer will remain an E-Verify participant, will remain bound by the terms of this MOU that apply to non-Federal contractor participants, and will be required to use the E-Verify procedures to verify the employment eligibility of all newly hired employees.

4. The Employer agrees that E-Verify is not liable for any losses, financial or otherwise, if the Employer is terminated from E-Verify.

ARTICLE VI
PARTIES

A. Some or all SSA and DHS responsibilities under this MOU may be performed by contractor(s), and SSA and DHS may adjust verification responsibilities between each other as necessary. By separate agreement with DHS, SSA has agreed to perform its responsibilities as described in this MOU.

B. Nothing in this MOU is intended, or should be construed, to create any right or benefit, substantive or procedural, enforceable at law by any third party against the United States, its agencies, officers, or employees, or against the Employer, its agents, officers, or employees.

C. The Employer may not assign, directly or indirectly, whether by operation of law, change of control or merger, all or any part of its rights or obligations under this MOU without the prior written consent of DHS, which consent shall not be unreasonably withheld or delayed. Any attempt to sublicense, assign, or transfer any of the rights, duties, or obligations herein is void.

D. Each party shall be solely responsible for defending any claim or action against it arising out of or related to E-Verify or this MOU, whether civil or criminal, and for any liability wherefrom, including (but not limited to) any dispute between the Employer and any other person or entity regarding the applicability of Section 403(d) of IIRIRA to any action taken or allegedly taken by the Employer.

E. The Employer understands that its participation in E-Verify is not confidential information and may be disclosed as authorized or required by law and DHS or SSA policy, including but not limited to,

Company ID Number: 303767

Congressional oversight, E-Verify publicity and media inquiries, determinations of compliance with Federal contractual requirements, and responses to inquiries under the Freedom of Information Act (FOIA).

F. The individuals whose signatures appear below represent that they are authorized to enter into this MOU on behalf of the Employer and DHS respectively. The Employer understands that any inaccurate statement, representation, data or other information provided to DHS may subject the Employer, its subcontractors, its employees, or its representatives to: (1) prosecution for false statements pursuant to 18 U.S.C. 1001 and/or; (2) immediate termination of its MOU and/or; (3) possible debarment or suspension.

G. The foregoing constitutes the full agreement on this subject between DHS and the Employer.

To be accepted as an E-Verify participant, you should only sign the Employer's Section of the signature page. If you have any questions, contact E-Verify at 1-888-464-4218.

E-Verify

How To Find Participating Employers

Use the E-Verify search tool to find employers who are currently enrolled in E-Verify. Your search will display the following information:

- **Employer name** – The name the employer used when they enrolled in E-Verify. This can be the business' legal name, a trade name, or an abbreviation.
- **Doing Business As (DBA) name** – The name an employer uses publicly. The public may see the DBA, but the employer may have used another name when they enrolled in E-Verify.
- **Account Status** – Indicates whether the account is currently enrolled or terminated.
- **Enrollment date** – The date the E-Verify Memorandum of Understanding is signed.
- **Termination Date** – The E-Verify Memorandum of Understanding termination date.
- **Workforce size** – Appears as long as the employer reported they have at least five employees.
- **Number of hiring sites** – The locations where employers hire employees and where they complete Form I-9.
- **Hiring site locations (by state)** – The geographic location(s) of hiring sites, by state, reported by the employer.

Parameters:

- USCIS updates the search tool data every quarter. However, employer status may be updated as needed.
- Employers report their own data at the time they enroll in E-Verify. The accuracy and completeness of the data depend on what was submitted by employers at the time of enrollment and as reported throughout the employer's relationship with E-Verify.
- Review Employer Data Parameters

CITY COUNCIL AGENDA ITEM

COUNCIL MEETING DATE 9/5/2023

SUBJECT: (B7h) Approval of the First Amendment to the Interlocal Agreement with Volusia County for Traffic Signal Maintenance

DEPARTMENT: Public Works

GOAL: 1 - Public Safety
2 - Infrastructure

RECOMMENDED MOTION: Move to approve the First Amendment to the County of Volusia Standard Interlocal Agreement for Provision of Municipal Services related to traffic signal maintenance and authorize the the Mayor and City Clerk to execute the associated documents.

SUMMARY: The City of Port Orange entered into an Interlocal Agreement with the County of Volusia for the provision of municipal services related to traffic signal maintenance for a term of three years commencing on October 1, 2022 to September 30, 2025 ("Interlocal Agreement"). This agreement covers the maintenance and repair of specific traffic signals throughout the city, some of which are owned by the Florida Department of Transportation ("FDOT") and subject to an agreement between the city and FDOT ("Contract ARY84"), making said FDOT signals the responsibility of the city.

Under an agreement with FDOT, the city's staff was responsible for the maintenance of FDOT-owned traffic devices, as well as city-owned traffic devices. Public Works does not have the equipment, supplies or staff to maintain these traffic signals, so an Interlocal Agreement with the County of Volusia was negotiated to maintain both the FDOT-owned and city-owned traffic devices.

In April 2022, FDOT notified the city that they intended to terminate the contract with the city, effective July 1, 2023. Going forward, FDOT will directly contract with Volusia County to maintain their traffic devices. The termination of Contract ARY84 requires the Interlocal Agreement to be amended to remove the FDOT-owned traffic signal devices from the list of traffic signal devices that are subject to the Interlocal Agreement.

The city-owned traffic devices include: Traffic Signals with Mast Arms, Interconnected Traffic Signals with Mast Arms, Emergency Fire Department Beacons, all include Opticon for the Fire Department.

This First Amendment will remove the FDOT-owned traffic signal devices from the Interlocal Agreement. The city-owned devices will continue to be maintained by the county per the terms of the Interlocal Agreement.

FIRST AMENDMENT TO THE COUNTY OF VOLUSIA STANDARD INTERLOCAL AGREEMENT FOR PROVISION OF MUNICIPAL SERVICES TO THE CITY OF PORT ORANGE, FLORIDA

THIS FIRST AMENDMENT to the County of Volusia Interlocal Agreement for Provision of Municipal Services to the City of Port Orange, Florida **("**First Amendment**")** entered into by and between the County of Volusia, a political subdivision of the State of Florida, with administrative offices at 123 West Indiana Avenue, DeLand, Florida 32720-4613, hereinafter referred to as **COUNTY**, and the City of Port Orange, a municipal corporation duly incorporated pursuant to the laws of the State of Florida, with administrative offices at 1000 City Center Circle, Port Orange, Florida 32129 hereinafter referred to as **CITY**.

RECITALS

WHEREAS, this amendment to the Interlocal Agreement is entered into pursuant to Section 163.01, Florida Statutes, as amended, also known as the "Florida Interlocal Cooperation Act of 1969"; and

WHEREAS, CITY and COUNTY entered into the *County of Volusia Interlocal Agreement for Provision of Municipal Services to the City of Port Orange, Florida* on September 27, 2022, with a term commencing on October 1st, 2022, terminating September 30, 2025, for the purpose of providing specified municipal services and equipment to the CITY related to traffic signal maintenance ("Agreement"); and

WHEREAS, it is necessary to update the service locations listed in Exhibit "A" to the Addendum to the Agreement for the purpose of removing equipment and service locations no longer subject to the Agreement; and

NOW, THEREFORE, in consideration of the mutual promises contained herein, the parties agree as follows:

1. The foregoing representations are hereby adopted as a material part of this Agreement.

2. Exhibit "A" to the Addendum to the Agreement is hereby deleted in its entirety and replaced with **Exhibit "A"**, attached hereto and made a part hereof by reference. All references in the Agreement to Exhibit "A" shall be deemed to refer to Exhibit "A", attached hereto.

3. The provisions of this First Amendment shall prevail against any conflict with a provision of the Agreement. Otherwise, the terms and conditions set forth in the Agreement shall remain in full force and effect.

4. This First Amendment shall be deemed effective upon execution by the Parties.

5. This First Amendment may be fully executed in multiple originals by the Parties, each of which bearing original signatures, shall have the force and effect of an original document.

IN WITNESS WHEREOF, the parties to this *First Amendment to the County of Volusia Standard Interlocal Agreement for Provision of Municipal Services to the City of Port Orange, Florida* have caused the same to be signed by their duly authorized representatives on the dates indicated below.

COUNTY OF VOLUSIA INTERLOCAL AGREEMENT FOR PROVISION OF MUNICIPAL SERVICES TO THE CITY OF PORT ORANGE, FLORIDA

THIS AGREEMENT is entered into by and between the County of Volusia, a political subdivision of the State of Florida, with administrative offices at 123 West Indiana Avenue, DeLand, Florida 32720-4613, hereinafter referred to as **COUNTY**, and the City of Port Orange, a municipal corporation duly incorporated pursuant to the laws of the State of Florida, with administrative offices at 1000 City Center Circle, Port Orange, Florida 32129, hereinafter referred to as **CITY**.

RECITALS

1. The COUNTY is authorized by Section 125.01(1)(p), Florida Statutes, to enter into agreements with other governmental agencies within or outside the boundaries of the county for the joint performance, or performance by one unit on behalf of the other, of any of either agency's authorized functions.

2. Public agencies (including COUNTY and CITY) are authorized by Section 163.01(14), Florida Statutes, to enter into contracts for the performance of service functions of such public agencies, but shall not be deemed to authorize the delegation of the constitutional or statutory duties of county or city officers. The parties expressly deny any intent, expressed or implied, in this Agreement to provide for a delegation by CITY of such constitutional or statutory duties to COUNTY.

3. The foregoing authorization for such agreements is granted to counties and cities for the purpose of permitting local governments to make the *most efficient use* of their powers by enabling them to cooperate with the other localities on a basis of mutual advantage and thereby to provide services and facilities in a manner and pursuant to forms of governmental organization that will accord best with geographic, economic, population, and other factors influencing the needs and development of local communities as set forth in Section 163.01(2), Florida Statutes.

4. Pursuant to Section 768.28, Florida Statutes, neither the COUNTY nor the CITY waives any defense of sovereign immunity, or increases the limits of its liability, upon entering into this Agreement. This Agreement does not contain any provision that requires one party to indemnify or insure the other party for the other party's negligence, or to assume any liability for the other party's negligence.

5. The City Council of CITY, after evaluation of options for the provision to its residents of the municipal services enumerated herein, has made a legislative determination that the interests of its residents will be best served by contracting with COUNTY for provision of such services, which services will be performed by COUNTY personnel.

6. COUNTY certifies that it has qualified personnel or subcontractors to perform the services enumerated herein.

NOW, THEREFORE, in consideration of the mutual promises contained herein, the parties agree as follows:

PART I. GENERAL PROVISIONS

7. The foregoing representations are hereby adopted as a material part of this Agreement.

8. **PURPOSE.** The purpose of this Agreement is for the COUNTY to provide specified *municipal* services and equipment to the CITY (hereinafter, the Contract Services), at an agreed upon level of service (LOS) herein specified, in lieu of the CITY using its own personnel and equipment therefor.

9. **COUNTY DEPARTMENTS.** COUNTY shall manage the delivery of the Contract Services by allocating service task responsibilities along the organization lines of the COUNTY'S DEPARTMENTS (hereinafter, Departments). The Director of the applicable Department (or his or her designee) shall be the COUNTY'S liaison to CITY for purposes of performance, interpretation and implementation of this Agreement.

10. **MUNICIPAL SERVICES.** The Contract Services purchased by CITY herein are *municipal* level of services as described in the attached Addendum. Such Contract Services shall be provided by COUNTY resources distinct from the level of services that are funded by county-wide ad valorem and other county-wide revenues (hereinafter, "County Services"), which services COUNTY would provide irrespective of this Agreement, and which services COUNTY will continue to provide notwithstanding this Agreement. The CITY government shall pay COUNTY for the Contract Services provided for herein.

11. **NO PLEDGE OF AD VALOREM TAXES.** The parties agree that this Agreement does not constitute a general indebtedness of the CITY within the meaning of any constitutional, statutory, or charter provision or limitation and it is expressly agreed by the parties that the COUNTY shall not have the right to require or compel the exercise of ad valorem taxing power of CITY, or taxation of any real or personal property therein for payment of any monetary obligations due under the terms of this Agreement. It is further agreed that this Agreement and any funds called for to be paid hereunder shall not constitute a lien upon any real or personal property of CITY, any part thereof, and that the obligation for monetary payments called for to be made hereunder shall be deemed to exist for less than a year at any point in time and shall be entirely subject to the legislative budgetary discretion of the CITY and the COUNTY.

12. **DIVISION OF MANAGEMENT RESPONSIBILITIES.** The Contract Services specified in this Agreement reflect the general managerial and policy decisions of the CITY. The CITY may identify specific tasks within the Services described in Article 21 of this Agreement to be performed by COUNTY, and the portion of the relevant budget to be allocated thereto, including, but not limited to the location, and nature of specific projects. Except as set forth below,

the COUNTY shall have the responsibility for the operational management of the provision of the actual service. It is the intent of the CITY that the CITY'S general management decisions referenced above are to be the exercise of a legislative, planning level function of the CITY, and that the CITY shall not undertake to exercise specific operational control over the provision of the Contract Services except as set forth below in this Article 12 or specifically set forth in the Addendum referenced in Article 21. Should the CITY direct or exercise operational control in fact and there be liability to third parties and/or to the COUNTY that flows therefrom, then the CITY shall have responsibility for all liability arising therefrom subject to the provisions in recital number 4 and Article 13 of this Agreement. For all other services provided by the COUNTY where specific professional standards are applicable to the performance of service tasks, the COUNTY'S designated officer in charge (OIC), or his or her designee, shall have the authority for decision making within that realm. The relevant COUNTY Department Director, or the OIC, shall be available on a regular basis to the City Manager to provide consultation and recommendations to the City Manager in his or her general management decisions as contemplated herein. The CITY shall make no claim against the COUNTY predicated upon the theory that the failure to provide services at a given time caused damages to the CITY or a third party complainant.

13. **SOVEREIGN IMMUNITY**. Each party to this Agreement expressly retains all rights, benefits and immunities of sovereign immunity that they presently enjoy under the Constitution and Statutes of the State of Florida, and particularly with respect to Chapter 768, Florida Statutes. Notwithstanding anything set forth in any article of this Agreement to the contrary, nothing in this Agreement shall be deemed as a waiver of immunity or limits of liability of either party beyond any statutory limited waiver of immunity or limits of liability which may have been adopted or may be adopted by the Florida Legislature, and any liability of either party for damages shall not exceed the statutory limits of liability for tort, regardless of the number or nature of any claim which may arise, including but not limited to, a claim sounding in tort, equity, or contract. Nothing in this Agreement shall inure to the benefit of any third party for the purpose of allowing any claim against any party, which would otherwise be barred under the doctrine of sovereign immunity or by operation of law.

14. **PERSONNEL MATTERS.** COUNTY shall allocate manpower and equipment for the performance of the Contract Services on an as needed basis. This Agreement shall not require any particular COUNTY employee to be dedicated full time to the Contract Services. All COUNTY personnel assigned to perform Contract Services shall remain subject to the COUNTY Merit System of Rules and Regulations for all purposes contemplated thereunder, including, but not limited to initial appointment and probation, training and assignment, promotions, merit and cost-of-living raises, annual leave and sick leave, and disciplinary actions. Any claim of a disciplinary nature by CITY regarding a COUNTY employee shall be referred to the Department Director, who shall remain the appointment authority for such employee, for all purposes designated under the COUNTY Merit System of Rules and Regulations. Such COUNTY employees shall have no right to elect or choose any procedures available to CITY employees.

15. **TERM.** This Agreement shall commence on **October 1st, 2022** and shall terminate at midnight on **September 30th, 2025** unless terminated pursuant to the provisions of Article 16.

16. **TERMINATION.** Either party may terminate this Agreement without cause or further liability to the other, upon written notice to the party representative specified in Article 17, given no less than **90** days prior to the requested termination date. Such notice shall be delivered by certified mail, return receipt requested, and the date of the notice shall be the date the receipt therefor is signed by an employee, official, or representative of the other party.

17. **NOTICE.** Notice as required to be given in this Agreement shall be provided to the following persons:

a. COUNTY: County Manager, George Recktenwald, Thomas C. Kelly Administration Center, 123 W. Indiana Avenue, DeLand, Florida 32720.

b. CITY: City Manager, Wayne Clark, 1000 City Center Circle, Port Orange, Florida 32129.

18. **THIRD PARTIES.** In no event shall any of the terms of this Agreement confer upon any third person, corporation, or entity other than the parties hereto any right or cause of action for damages claimed against any of the parties to this Agreement arising from the performance of the obligations and responsibilities of the parties herein or for any other reason.

19. **DISPUTE RESOLUTION.** Any disputes concerning non-performance, or other aspects of this agreement for which either party initiates litigation to enforce its rights hereunder, shall be subject to the provisions of Chapter 164, Florida Statutes, the "Florida Governmental Conflict Resolution Act."

20. **SEVERABILITY.** If any provision of this Agreement is found to be unconstitutional, illegal, or otherwise unenforceable by judgment of a court of competent jurisdiction, such judgment shall not invalidate the remainder of this Agreement, unless such judgment renders the purpose or performance of this Agreement no longer practical for either party.

This space intentionally left blank

PART II. SPECIFIC SERVICES

21. **LEVEL OF SERVICE.** COUNTY agrees to provide the personnel and equipment at the level of service specified in the *The Delivery of Municipal Services to the City of Port Orange Fiscal Years 2022-23, 2023-24 and 2024-25* which is hereby attached as the twelve page Addendum to this Agreement and is incorporated in this Agreement by this reference. Should the CITY desire the COUNTY provide services either different in kind, or at a service level different than that contemplated herein, the City Manager shall make written request therefor to the County Manager or his designee and such notice shall be sent in accordance with Article 17. Any mutually agreed-upon modification to the kind of service and/or level of service to be provided by the COUNTY shall be reduced to writing and approved by the appropriate officials of both parties. Any reduction in level of service desired by the CITY shall only be effective at the beginning of a new contract year unless both parties agree otherwise. Upon the written agreement of the COUNTY to provide a change to services which increases the level of service, the new level of service shall commence within sixty days following the date of execution of the written agreement by the COUNTY or the beginning of a new contract year whichever shall first occur. The foregoing shall not be construed as requiring the COUNTY to agree to make a change to the kind of service and/or increase to the level of service to be provided by the COUNTY. Upon a change in kind of service and/or increase in the level of service to be provided by the COUNTY compensation to the COUNTY shall be immediately adjusted to conform to the new service provided.

22. **COMPENSATION**. CITY shall pay the COUNTY in accordance with the compensation set forth in the Addendum. CITY shall pay the sum invoiced within thirty (30) days of receipt of the bill from COUNTY.

23. **ENTIRE AGREEMENT**. This Agreement reflects the full and complete understanding of the parties and may be modified or amended only by a document in writing executed by all the parties, with the same formalities as this Agreement.

This space intentionally left blank

IN WITNESS WHEREOF, the parties to this County of Volusia Interlocal Agreement for Provision of Municipal Services to the City of Port Orange have caused the same to be signed by their duly authorized representatives on the dates indicated below.

ADDENDUM

COUNTY OF VOLUSIA, FLORIDA

The Delivery of Municipal Services
to the
City of Port Orange

Fiscal Years 2022-23, 2023-24 and 2024-25

DEPARTMENT OF PUBLIC WORKS SERVICES
CITY OF PORT ORANGE
FY 2022-23, 2023-24 AND 2024-25

Services	Annual Cost
Road and Bridge	As Needed
Traffic Engineering	As Needed

Public Works Services Overview

The City of Port Orange (CITY) contracts with the County of Volusia (COUNTY) to provide services from the Department of Public Works Divisions of Road & Bridge and Traffic Engineering.

Compensation

Compensation will account for actual services provided and will be charged in accordance with the following unless otherwise specified in the below description of services:

a. **Labor (First 40 hrs of work week)**: Work hours x current hourly wage rate x current overhead rate at the time of service. Labor will be charged to the nearest one-quarter hour.

b. **Overtime Labor (Hours over 40 for work week)**: Work hours x current hourly wage rate at time of service x 1.5 x current overtime overhead rate at the time of service. Overtime labor will be charged to the nearest one-quarter hour.

c. **Parts, Materials and Chemicals**: All parts, materials and chemicals that are used will be billed at actual cost.

d. **Equipment**: All equipment will be billed at the Public Works equipment rate at the time of service.

After hours work shall be work that was performed during those hours other than regular time and shall include holidays. Holidays are defined as those days officially designated as holidays by the Volusia County Council. After hours work shall be compensated based on both work time and travel time. There is a minimum two (2) hour after-hours call-out charge.

Billing
The COUNTY shall send the CITY a monthly invoice with documentation. The CITY shall pay all charges made in accordance with this Agreement within 30 days of receipt of the invoice, regardless of whether one or multiple CITY departments/divisions received services under this agreement.

Road and Bridge Division

The COUNTY may perform general maintenance and repair work on an "as available" basis for CITY maintained roadway and drainage infrastructure. For all requested work, the COUNTY will provide the CITY with a written cost estimate. The CITY manager or designee must then provide the COUNTY written authorization prior to commencement of the work, with the COUNTY's cost estimate as an attachment referenced in the authorization.

All Road and Bridge services are subject to the availability of personnel and equipment at the sole discretion and determination of the COUNTY.

Traffic Engineering Division

A. Maintenance and Operation of Traffic Control Devices

The CITY is responsible for the maintenance and operation of the Traffic Control Devices identified in Exhibit "A". The COUNTY, at the request of the CITY, shall maintain and operate these traffic control devices to ensure uniform traffic control of the road network. The coordination of the CITY'S traffic control devices with the COUNTY will promote an integrated and balanced traffic network in Volusia County to the benefit of all residents.

The COUNTY shall also maintain and operate auxiliary equipment such as overhead internally illuminated street name signs, fire preemption devices, transit priority devices, audible pedestrian signals, high intensity LED signs, and other devices associated with those identified in Exhibit "A" as requested by the CITY. The CITY will reimburse the COUNTY for all operational work performed on auxiliary equipment at the CITY's request regardless of whether the signal is a City, County or State signal.

The CITY and COUNTY may modify Exhibit "A" throughout the life of this Agreement to account for new or removed Traffic Control Devices by written notification between the CITY'S Public Works Director and the Volusia County Traffic Engineering Director. CITY is aware that the Florida Department of Transportation (FDOT) is revising their signal maintenance agreements so that FDOT signals in the CITY currently required to be maintained by the CITY shall become the COUNTY's responsibility per FDOT requirements beginning in either July 2023 or 2024. As such, those signals identified as FDOT ownership in Exhibit "A" will transition to the COUNTY and be removed from this agreement in July 2023 or 2024.

Service requests for the maintenance and operation of traffic control devices covered by this agreement shall be satisfied by the COUNTY when personnel and equipment are available.

1. **Preventative (Routine) Maintenance**
   Preventive (routine) maintenance is a program to inspect and perform a set of standard actions to reduce the chance of a traffic control device failure. This maintenance also includes the repair and/or replacement of components as necessary to ensure continued proper operation of the devices.

   a. **Traffic Signal Preventive Maintenance**
      The COUNTY shall perform a minimum of two (2) preventive maintenances per year on each Traffic Signal, Traffic Signal with Pedestrian Features, and Emergency Traffic Signal as identified in Exhibit "A". The preventive maintenance will be done to current COUNTY standards, which are consistent with Florida DOT standards. The COUNTY's current standard for mast arms is galvanized steel. If the CITY requests painted mast arms, the CITY shall be responsible for maintaining the paint and will notify the COUNTY at least one week prior to performing preventative painting maintenance.

   b. **Traffic Signal Rebuild**
      Traffic Signal overheads should be rebuilt every 5 – 10 years due to the impact of the environment on the electronic components. The COUNTY will recommend a traffic signal rebuild when multiple failures requiring immediate repair occur in the same year. The COUNTY will submit a recommendation and a cost estimate to the CITY for the rebuild and the work will not be completed without the written approval of the CITY.

   c. **Flasher Inspection and Timing (School Flashers, RRFBs, Warning Flashers, etc.)**
      i. The COUNTY shall perform a minimum of one (1) flasher inspection per year, including the verification or new programming of each school flasher timing.
      ii. The COUNTY shall perform an initial (one-time) assessment and inventory of all school flashers, if none is available. This is a separate task from the annual inspection.

   d. **Painted Mast Arm Structures**
      Maintenance of the paint finish for mast arm structures that were painted at the direction of the CITY is not included as part of this agreement. Paint maintenance shall be the responsibility of the CITY and shall be performed in accordance with FDOT specifications. Any mast arm paint finish agreements executed between the CITY and FDOT will continue to govern painted mast arm structures in the event that Exhibit "A" is modified.

2. Response (Emergency) Maintenance

Response (emergency) maintenance is the immediate repair of a failed traffic control device to restore the device to normal operation. Response maintenance repairs can be either a Final Repair or a Temporary Repair as defined below:

Final Repair – The traffic control device is returned to normal operation.

Temporary Repair – The traffic control device is set into a mode of safe operation (such as on flash) until a final repair can be made. If the device is not able to be placed into a mode of safe operation, alternative traffic control methods (i.e. stop signs) will be implemented by the City.

During business hours (7:00AM - 3:30 PM, Monday through Friday), the CITY shall contact Volusia County Traffic Engineering (386-736-5968) to request response maintenance repairs. At all other times, the CITY shall contact the County Central Dispatch Center (Sheriff Operations Center) (386-736-5999).

The CITY shall identify three (3) City employees and provide contact information for each to the COUNTY for the purpose of providing emergency follow up information. Any call for response maintenance repairs from either the CITY or from the County Central Dispatch Center (Sheriff's Office Dispatch) will be responded to by the COUNTY and the services performed will be paid for by the CITY.

The COUNTY shall establish the priority of each response maintenance call based on the number of calls, the resources available and the nature of each call.

If response maintenance repairs are significant in nature (signal pole knock-down, traffic control device rebuild) the COUNTY will begin work on a Temporary Repair while contacting the CITY for authorization to complete the Final Repair. The Temporary Repair will be kept in place and maintained by the CITY until the COUNTY receives written authorization from the CITY for the Final Repair. Upon request, the COUNTY will provide the CITY with a cost estimate for the Final Repair. It is the CITY'S responsibility to collect insurance or other compensation from the parties that damaged the city equipment.

If COUNTY personnel cannot complete a response maintenance repair, COUNTY personnel will complete a Temporary Repair. The COUNTY will contact the CITY for written authorization to issue a Notice to Proceed to one of the COUNTY'S contractors to complete the repair. Upon request, the COUNTY will provide the CITY a cost estimate from the Contractor.

3. Operational Maintenance – Traffic Signal Timing

Traffic signal retiming may be required every few years due to changes in traffic flow. Controllers will be inventoried and brought up to COUNTY standards.

Requests received by the COUNTY from the Public or the CITY regarding traffic signal malfunctioning, signals not operating correctly or signals needing retiming shall be handled as Response Maintenance to ensure all equipment and controller timings are functioning correctly.

The CITY can request that the COUNTY complete a study to retime an intersection. Upon request, the COUNTY will provide the CITY with a cost estimate. If CITY approves the retiming effort, then the COUNTY will conduct the study and implement any necessary retiming.

4. Design Modifications

Design modifications are changes to the approved design and operation of an existing traffic control device/signal. Design modifications can include changes in signal locations, configuration or displays among other design aspects.

The COUNTY will not begin work on any design modifications without an engineering study signed and sealed by a Professional Engineer licensed in the State of Florida. The COUNTY can provide the CITY with a cost estimate to complete the modification upon request.

The COUNTY can provide the CITY left-turn warrants and left-turn display (protected versus protected-permitted or Flashing Yellow Arrow conversion) studies upon request. If the study recommends a change, which is approved by the CITY, the COUNTY can then implement the modification. Cost estimates for the COUNTY to complete the above work can be provided to the CITY as requested.

5. Maintenance of Traffic

During preventive maintenance, the COUNTY or its contractor shall be responsible for maintaining safe traffic flow. During response (emergency) maintenance when law enforcement personnel are necessary to maintain safe traffic flow or worker safety, the COUNTY or its contractor shall notify local police to arrange for law enforcement.

In case of an Act of God emergency situation (e.g., hurricane, summer thunder or winter storm, tornado) that causes the loss of power to multiple traffic signals or major damage to traffic signals, the CITY shall arrange for any necessary law enforcement or placement of temporary traffic control devices (e.g., stop signs) at all appropriate traffic signal locations. Where the CITY has made previous modifications for emergency service generator hook-ups, the COUNTY will coordinate with the CITY on the need to place said generators. It will be the CITY'S responsibility to ensure the emergency service generator(s) are fueled and operational.

6. **Equipment and Stock**
The COUNTY will provide all equipment, parts and materials for work done for the CITY. The COUNTY shall maintain standard signal equipment in stock. The COUNTY may not stock auxiliary items such as emergency preemption devices, audible pedestrian signals and transit priority devices, but will order on an as-needed basis.

7. **Electrical and Communication Costs**
The CITY shall retain the responsibility to pay all related traffic control device power and communication costs. The CITY shall be responsible for the installation of any necessary communication devices in any master cabinet and shall pay the monthly charges for such communications.

8. **Red Light Running Cameras and License Tag Readers**
Red Light Running Cameras and License Tag Readers are typically maintained and operated through a separate agreement between the CITY and a Vendor. The COUNTY will not provide any services related to Red Light Running Cameras or License Tag Readers. If the CITY desires to install Red Light Running Cameras or License Tag Readers on Traffic Control Devices maintained by the COUNTY along state or county roads, the CITY agrees to (1) install and pay for any separate power service hook-ups, (2) reimburse the COUNTY for any power or lightning damage repairs if any device is installed within the controller cabinet to monitor the red indication output, and (3) the CITY will hold harmless the COUNTY for any power or lightning damage emanating from the COUNTY Traffic Control Device infrastructure and power service.

9. **Emergency Vehicle Preemption**
Emergency vehicle preemption devices on CITY (or COUNTY) emergency vehicles improve the safety of first responders and motorists on Volusia County's roadways while also reducing response times to life-threatening emergencies. The following Standard Operating Procedure shall be implemented on all CITY emergency vehicles to ensure that this technology is used effectively and efficiently:

   a. **Use of only Opticom GPS vehicle kits**
   Commitment to Opticom GPS ensures that an emergency vehicle that comes to a stop on approach to an intersection will not lock up the intersection in an extended preemption. The CITY will upgrade any Opticom Infrared vehicle kits within 12 months. If the CITY requires more than 12 months to complete the upgrades, the CITY will notify the COUNTY and provided an estimated completion date.

   b. **Use of Opticom GPS only when traveling in the emergency mode**
   The CITY shall establish a directive that allows for the use of Opticom emergency vehicle preemption equipment only when responding or transporting in the emergency mode. The CITY shall ensure Opticom GPS units will not be used when the vehicle's emergency lighting is not activated.

c. **Passive installation design**
Opticom GPS vehicle kits will be wired to only activate when the vehicle's primary emergency lighting is activated. This design will prevent the potential for inappropriate use of the emergency vehicle preemption system.

d. **Information sharing with employees**
The CITY shall disseminate a directive to its employees explaining the functions and limitations of emergency vehicle preemption. This document will specifically instruct employees not to presume that a green light will be guaranteed and clearly asserts that Opticom preemption devices will only be used in the emergency mode.

e. **Potential for Future Requirements from the Florida Department of Transportation**
The Florida Department of Transportation (DOT) required each local jurisdiction in Seminole, Orange and Osceola counties to activate the license key and enter into an annual maintenance agreement with Opticom, to assign a unique identity number for each vehicle, and to monitor the usage of emergency vehicles to minimize any potential misuse of Opticom. If the Florida DOT requires this in Volusia County, the local jurisdictions will need to budget for the additional expense. The license key is approximately $750 per intersection and there will be an ongoing annual maintenance agreement fee with Opticom.

10. Florida DOT Requirements for State Roads
If the CITY has entered into the Florida DOT Signal Maintenance Agreement (750-010-22 4/15), the COUNTY shall also maintain the following devices identified in Exhibit "A": emergency fire signal, pedestrian flashing beacon, speed activated warning displays, traffic warning beacons, travel time detector, UPSW/battery backup and traffic signal interconnected and maintained (TSIM) locations.

a. **Preventative (Routine) Maintenance**
This maintenance includes locates and preventative maintenance of all electronic signal equipment with the exception that the COUNTY will not structurally maintain any mast arms. Furthermore, for new mast arms, or mast arm structures subject to a separate agreement with the Florida DOT regarding painted mast arm structures, the COUNTY is unable to perform Periodic Maintenance and recommends that the CITY procure the services of a Traffic Signal Contractor to perform periodic maintenance.

b. **Response (Emergency) Maintenance**
If restoration of services is delayed and stop signs or other methods to maintain traffic (e.g., law enforcement personnel) are required, the COUNTY shall notify the CITY to provide the appropriate response. In addition, the COUNTY shall coordinate with the CITY on how to respond to critical detection device malfunctions. The COUNTY shall notify the CITY if 8% of all critical detection devices are malfunctioning at any one time.

c. **Performance Measures and Reporting**
The County shall submit to the Florida DOT an Annual Report prior to June 30 of each year detailing critical detection device malfunctions, traffic signal preventative maintenance inspections, annual conflict monitoring testing, and personnel (and location) overseeing interconnected signals. The COUNTY will identify the number of critical detection devices for each location on Exhibit "A."

d. **Retainage**
The CITY shall indemnify and hold harmless the COUNTY for any retainage held back by the Florida DOT due to the CITY's failure to comply with the requirements of the Florida DOT Agreement based upon the CITY's failure to act once notified by the Florida DOT or COUNTY.

e. **Florida DOT Agreement Cancellation**
If the CITY notifies the Florida DOT of the CITY's intent to cancel the Florida DOT Agreement, the CITY shall also notify the COUNTY. If COUNTY notifies the Florida DOT of COUNTY's intent to cancel the Florida DOT Agreement, the COUNTY shall also notify the CITY.

B. Other Services

Other traffic engineering services not identified in this agreement can be requested by the CITY in writing. The services are subject to the availability of personnel and equipment at the sole discretion and determination of the COUNTY. These services include:

1. **Administrative Services**
Administrative Services involving new or replacement signal design or COUNTY staff appearance or attendance before CITY meetings per CITY Staff request.

2. **Traffic Counts and Studies**
Traffic Counts and Studies involving annual daily traffic counts on city roads and unique traffic studies responding to and resolving traffic related complaints from the public or elected officials. Such studies could include, but not limited to: Spot Speed, Multi-Way Stop, Signal Warrant, Vehicle Classification and Turning Movement Count.

3. **Other Services**
Other services include, but are not limited to, additional on-call personnel, traffic control for special events (parades, festivals), house moving, etc.

Natural and Manmade Disaster Emergency Response Services
Department of Public Works

The COUNTY can provide Emergency Response Services for state and federally declared disasters as requested by the CITY for the above listed services. The emergency response services are subject to the availability of personnel and equipment at the sole discretion and determination of the COUNTY. Emergency services provided by the COUNTY will be billed to the CITY in accordance with this Agreement.

Florida Department of Transportation

RON DESANTIS
GOVERNOR

719 S. Woodland Boulevard
DeLand, Florida 32720-6834

JARED W. PERDUE, P.E.
SECRETARY

April 26, 2022

Ms. Lynn Stevens
Public Works and Utilities Director
CITY OF PORT ORANGE
1000 City Center Circle
Port Orange, Florida 32119-4144

RE: TRAFFIC SIGNAL MAINTENANCE AND COMPENSATION AGREEMENT TERMINATION
CONTRACT NO.: ARY84

Dear Ms. Stevens:

The Florida Department of Transportation District 5 (Department) respectfully requests that on July 1, 2023 your traffic signal maintenance be reassigned to Volusia County. The Department is aware that maintenance activities covered under the Traffic Signal Maintenance and Compensation Agreement (Agreement) are currently being subcontracted to Volusia County. As the service is being provided by an entity with whom the Department already has a separate Agreement, arrangement of the transfer will improve FDOT's ability to manage Agreements and remove some administrative steps.

It is the Department's understanding that your agency may have local signals that are maintained by Volusia County, and you may choose to continue contracting with Volusia County for these other signals within your jurisdiction. This modification may result in administrative changes to the City/County. Assisting the Department with the reassignment to Volusia County would result in a substantial savings to the Department.

Again, because of the administrative savings, if the agency does not wish to reassign responsibility, the Department will be looking to exercise Clause 41 on diversion routes from the interstate and Clause 38 for other intersections. Both clauses being from the Traffic Signal Maintenance and Compensation Agreement, meaning the Department would terminate the Agreement with the local agency on July 1, 2023, for diversion routes and July 1, 2024, for the remaining routes. The Department would be working with Volusia County, as it stands today, to maintain the signals. The clauses are shown below for easy reference.

None Remaining

Clause 41

The Department reserves the right to remove select corridors or critical intersections from the Maintaining Agency's obligation under this Agreement. The remaining intersections and corridors would continue to be covered under this Agreement. The Department will provide a minimum of one year notice prior to take-over of maintenance of critical corridors or critical intersections.

DocuSign Envelope ID: FDA4BFA8-C027-4CB5-8358-999FE8D74FD1

Clause 38

The term of this Agreement is twenty (20) years from the date of execution of the Agreement; provided that either party may cancel this Agreement prior to the expiration of the term of this Agreement. A minimum notice period of two (2) years plus the remaining months of the Department's fiscal year shall be provided to the other party in writing. Should the Maintaining Agency provide its written notice of cancellation to the Department, the notice shall be endorsed by the elected body (County Commission, City Council, or local agency governing body) under which the Agency operates.

Detour Routes may be found on the Department's website, https://noemi.cflsmartroads.com/ssv/, selecting Layers, Detour Routes.

The goal is to simplify the process of maintenance and the oversite. Volusia County has done a great job maintaining signals and should continue to do so in the future. If there are concerns from the agency standpoint, please feel free to reach out.

Sincerely,

DocuSigned by:

CITY COUNCIL AGENDA ITEM

COUNCIL MEETING DATE 9/5/2023

SUBJECT: (B7i) Approval of Task Authorization No. 2 with Hall & Ogle Architects, Inc. for the design of the Forestry Management Storage Building

DEPARTMENT: Engineering

GOAL: 2 - Infrastructure

RECOMMENDED MOTION: Move to approve Task Authorization No. 2 with Hall & Ogle Architects, Inc. for the design of the Forestry Management Storage Building for an amount not to exceed $68,500 and authorize the Mayor and City Clerk to execute all necessary documents.

SUMMARY: The Engineering Department is requesting Council to approve Task Authorization No. 2 under the Master Contract for Architectural Services CA8000 (RFSQ 22-03) as it relates to the Forestry Management Storage Barn in the amount of $68,500. Funding for this project is included in the current Fiscal Year budget.

The project involves the construction of a storage barn to house equipment for the maintenance of the wellfield and conservation lands owned by the City. The current situation of storing equipment outside is causing a decrease in the equipment's lifespan due to exposure to the elements. The design and architectural aspects of the project are being done by Hall & Ogle Architects, Inc. They will be responsible for creating all the necessary design documents required for permitting and construction.

The new storage barn will be a 5,000 square feet pre-engineered metal building (PEMB). It will serve two primary functions:

- Covered Equipment Parking: The barn will provide a sheltered area to park the equipment, protecting it from rain, sunlight, and other environmental factors.
- Enclosed Mechanically Ventilated Shop Space: The barn will also include an enclosed shop space for the city forester. This space will be used for equipment maintenance and will be equipped with mechanical ventilation for a comfortable working environment.

The building will be located adjacent to the ground storage tank and high service pump room at the reclaimed reservoir site.

PRESENTER: Junos Reed

TASK AUTHORIZATION NO. 2
Master Contract for Architectural Services dated May 17, 2022
Between the City of Port Orange, Florida and Hall & Ogle Architects, Inc.

THIS Task Authorization is entered into by and between the **CITY OF PORT ORANGE, FLORIDA**, a chartered municipal corporation with its principal place of business at 1000 City Center Circle, Port Orange, Florida 32129 (the "City") and **HALL & OGLE ARCHITECTS, INC.**, a Florida corporation withits principal place of business at 208 Magnolia Avenue, Daytona Beach, Florida 32114 ("Architect"), and hereinafter collectively referred to as the "Parties," and is to that certain Master Contract relating to Professional Architectural Services, as dated above, and any amendments thereto, hereinafter collectively referred to as the "Contract." The Parties, in exchange for the mutual covenants contained herein and in the Contract, agree as follows:

1. This Task Authorization expressly modifies the Contract and in the event of a conflict, the terms and conditions of this Task Authorization shall prevail.

2. In addition to all other terms and conditions contained in the Contract, Architect shall provide services relating to the design of a Forestry Management Storage Barn, and as more particularly described in the Scope of Servicesattached hereto and incorporated herein as Task Authorization Exhibit "1."

3. Architect shall complete the services to be provided herein 180 days form the issue of the Notice to Proceed.

4. In return for the services identified above, the City agrees to compensate Architect at the prices set forth in Exhibit "1" attached hereto and made a part hereof, subject to a limit not to exceed **$68,500**. All payments shall be governed by the Local Government Prompt Payment Act as set forth in Sections 218.70 through 218.79, Florida Statutes, as amended.

5. *Truth-in-Negotiations*

(a) For any fixed fee, cost-plus-a-fixed-fee or guaranteed maximum-not-to-exceed compensation professional service contract or compensation in a Task Authorization over $150,000.00, Architect shall execute a truth-in-negotiation certificate stating that wage rates and other factual unit costs supporting the compensation are accurate, complete, and current at the time of contracting. Any professional service contract or Task Authorization under which such certificate is required must contain a provision that the original contract price or compensation and any additions thereto will be adjusted to exclude any significant sums by which the City determines the contract price or compensation was increased due to inaccurate, incomplete, or noncurrent wage rates and other factual unit costs. All such contract or compensation adjustments must be made within one (1) year following the end of the Contract. Otherwise, such adjustments shall be deemed waived by the Architect and null and void for the purposes of this Contract or Task Authorization. The signature on this Contract by the Architect shall act as the execution of a truth- in-negotiation certificate stating that the wage rates and other factual unit costs supporting the compensation of this Contract are accurate, complete, and current at the time of contracting.

(b) Architect's signature on this Contract or a Task Authorization shall act as execution of a truth-in-negotiation certificate stating that wage rates and other factual unit costs supporting the compensation set forth in this Contract or a Task Authorization are accurate, complete, and current at the time of contract. The certification shall also constitute an affirmation that Architect has

disclosed all debts or fees owed to or that are pending before the City prior to the execution of this Contract of Task Authorization.

6. This Task Authorization may be executed in one or more counterparts, each of which shall be deemed to be an original but all of which together shall constitute one and the same instrument. The delivery by facsimile or e-mail of an executed copy of this Task Authorization shall be deemed valid as if an original signature was delivered. No contract shall be formed between the Architect and the City until the City signs this Task Authorization.

IN WITNESS WHEREOF, the Parties have made and executed this Task Authorization for the purposes herein expressed on the dates set forth below.

Re: Forestry Management Storage Barn
Task Authorization Proposal

Dear Dick:

It is my pleasure to submit this proposal to provide architectural and engineering services for the proposed Forestry Management Storage Barn.

The scope of work is to provide all necessary documents to permit and construct the approximate 5,000 S.F. storage building to provide covered equipment parking and an enclosed mechanically ventilated shop space. It is anticipated the building will be a prefabricated metal building on a concrete slab with exhaust fans and complete electrical system being fed by the existing adjacent building.

The scope of work will include all necessary engineering including civil, structural, mechanical, and electrical. We have also included allowances for a specific purpose site survey and geotechnical services as required.

The scope also includes full Construction Administration to include bidding assistance, answering RFI's, submittal review, review/approval of pay applications, processing change orders, observation of the work, attending OAC meetings, substantial completion inspection, final completion inspection, and warranty inspections as required.

The work will commence upon Notice to Proceed. The deliverables for this project shall include the required number of sets for review and permitting of the project and electronic files will be provided as well.

The fee proposal is as follows:

Architectural/Engineering Fee	$	62,000
Surveying Allowance	$	3,500
Geotechnical Allowance	$	2,500
Reimbursables:		
Printing		500
Total Fees (not to exceed)	$	**68,500**

Let me know if you require anything further to complete the Task Authorization.

Thank you for the opportunity, we look forward to working with you on this project.

Respectfully,

David Ogle, Principal

CITY OF PORT ORANGE
MASTER CONTRACT
FOR ARCHITECTURAL SERVICES

This Master Contract for Architectural Services ("Contract") is entered into this 17 day of May, **2022**, by and between the **CITY OF PORT ORANGE**, a Florida municipal corporation, whose principal address is 1000 City Center Circle, Port Orange, Florida 32129 (the "City"), and **HALL & OGLE ARCHITECTS, INC.** ("Architect"), a Florida corporation whose principal address is 208 Magnolia Avenue, Daytona Beach, Florida 32114. The City and Architect are collectively referred to herein as the "Parties."

1. *Provision of Services*

(a) The Architect hereby agrees to provide the following services to the City of Port Orange:

(i) Professional continuous architectural design and consulting services to provide various renovation, restoration, construction and general consulting projects, and may include preparation of design and specifications, conducting and/or attending preconstruction meetings, review of shop drawings, record drawing review, cost estimating, and additional architectural services as required during the course of construction, in accordance with Consultants Competitive Negotiation Act, and as more specifically described in City of Port Orange Request for Statements of Qualifications No. 22-03 ("RFSQ 22-03") This Contract together with RFSQ 22-03, and Architect's Proposal, all of which may be referred to as the "Master Contract" and/or "Contract" and all of which are made a part hereof by reference shall constitute the formal written Contract between the City and Contractor. For convenience, Section 3 Scope of Services and Requirements, and the Architect's Hourly Rate Proposal as submitted by the Architect in Architect's Response; are attached hereto as Exhibit "1." A complete copy of RFSQ 22-03 is available in the Office of the City Clerk. Architect represents that they are familiar with the documents that make up the Contract, as referenced herein above.

(b) The time, manner and place for performance of such services shall be:

Term: The term of this Contract shall commence on the date this Contract is signed on behalf of the City and shall continue for a period of three (3) years (the "Initial Term").

Renewals: Upon written agreement of the Parties, this Contract may be renewed for two (2) additional one-year terms, upon review and approval of City Manager and budget appropriation.

Manner and Place: The Architect shall perform the services as outlined in each project assignment, in accordance with the Master Contract for Architectural Services as required on all City owned facilities and properties (i.e. rights-of-way) and in a manner as required by all current federal, state, county, fire, building and land development codes, laws, ordinances and regulations, and with applicable permits and licenses per the City Code of Ordinances. Architect shall not deliver goods or services without a fully executed task authorization and a written purchase order, signed by an authorized agent of the City of Port Orange.

Time and Essence: Architect acknowledges that time is of the essence in the completion of the services contemplated by this contract, and shall complete all services within the timeline specified by this contract, and shall complete all services within the timeline specified in the project, and as reflected on the Notice to Proceed.

2. *Authorization for Services*. This Contract standing alone does not authorize the performance of any work or services to be provided by the Architect or require the City to place any orders for work or service. Authorization for performance of services by the Architect under this Contract shall be in the form of written Task Authorization(s) issued and executed by the City and signed by the Architect. A sample Task Authorization is attached hereto as Exhibit "2." The City makes no covenant or promise as to the number of orders placed, nor that the City shall place any orders for goods or services during the life of this Contract. The City reserves the right to contract with other Parties for the goods and services contemplated by this Contract, as determined in the City's sole and absolute discretion.

3. *City Obligations*. The City reserves the right to utilize lump sum or hourly rate compensation, at the hourly rate compensation as set forth in Exhibit "1." Rates may be adjusted on the anniversary of the effective date of this Contract, upon mutual written agreement of the Parties. The City's obligation to pay Architect under this Contract is limited to an amount not to exceed the appropriated budget per fiscal year. All payments shall be governed by the Local Government Prompt Payment Act as set forth in Sections 218.70 through 218.79, Florida Statutes, as amended. The Architect shall be paid compensation for all services, labor and material required thereby, and for all expenditures as specified in each Task Authorization. The fee shall be negotiated for each Project Task Authorization to this Contract. The Architect shall submit a monthly statement for professional services rendered and expenses incurred to date of the statement. The statements for lump sum shall be based upon Architect's estimate of the proportion of the total services actually completed at the time of billing to the total services to be performed. Such estimates are to be prepared by the Architect and accompanied by such supporting data as may be required by the Contract Administrator. Compensation for any authorized cost which is not set forth in the Contract shall not exceed the actual, documented out-of-pocket cost to the Architect. The Contract and Task Authorization(s) do not include retainer fees, nor is there a minimum fee guaranteed during the Contract period.

4. *Contract Administration*. The Purchasing Manager, Jill Poolman ("Contract Administrator"), shall perform contract administration of this Master Contract. The Department Head requesting the Task Authorization under this Master Contract, shall preform the Contract Administration for their respective Task Authorization for services. For notice provisions, see the paragraph entitled "Notice." The work shall be under the direction of the authorized Contract Administrator who shall have final decision authority for all phases of the work, including general direction, review, and approval of the work. Neither the Contract Administrator's review, approval or acceptance of, nor payment for, any of the services required under this Contract shall be construed to operate as a waiver of any rights under this Contract or of any cause of action arising out of the performance of this Contract, and the Architect shall be and remain liable to the City for all costs of any kind which were incurred by the City as a result of the Architect's negligent performance of the services furnished under this Contract.

5. *Statement if Architectural Services*. The Architect shall:

(a) Provide all certifications ("Architect of Record" function) surveys, calculations, drawings, and any other documents required for special permits and authorizations from various government bodies or agencies having jurisdiction over the project;

(b) Prepare a time scaled diagram showing the dates of completion of various design phases and scheduled completion of working drawings and specifications and submit for Contract Administrator's review and approval.

(c) Verify and evaluate technical proposals furnished by the construction contractor if requested by the City and provide such amplifications and explanations that may be necessary to clarify the intent of the drawings and specifications.

(d) Furnish consultation and advice as requested by the City during the construction of project, including Construction Administration Services (unless otherwise stipulated in a specific amendment attached hereto and made a part thereof);

(e) Furnish all other Architectural services including without limitation those specified hereinafter and those required for the completion of specific projects as described in amendments to this Contract:

(i) *Site Visits/Special Permits*. The Architect shall visit the site and shall initiate and hold such conferences with representatives of the City and other agencies, boards or government bodies having jurisdiction over the area the project covers and take such other action as may be necessary to obtain permits and authorizations (except the construction permits) and other data upon which to develop the design and preliminary sketches showing the contemplated project.

(ii) *Preliminary Sketches and Opinion of Probable Construction Costs*. The preliminary sketches shall include plans, elevations and sections development in such detail and with such descriptive specifications as will clearly indicate the scope of work, and make possible a reasonable opinion of the construction cost and satisfy the requirements of permitting and regulatory agencies having jurisdiction. An opinion of probable construction costs shall be prepared.

(iii) *Working Drawings and Specifications*. After the preliminary sketches and opinion of probable construction costs have been approved, the Architect shall proceed with the preparation of working drawings and specifications as required by the Contract Administrator for the construction of said project. Working drawings, specifications and estimates shall be delivered to the Contract Administrator in such sequence and at such times as required by the City such that the construction work can be initiated promptly, procurement of materials made without delay and continuous prosecution of the work promoted, all in strict accordance with the approved design schedule as provided in Paragraph 5 (b) above. Working drawings and specifications shall be revised as necessary and as required by the Contract Administrator. After working drawings and specifications have been approved by the Contract Administrator, the Architect shall furnish such number of sets of prints of the approved working drawings and such number of sets of the approved specifications, as may be required by the Contract Administrator.

(iv) *Original Drawings - Final Plans*. Upon approval of final plans the Architect shall deliver to the City one set of original drawings in such medium and on such materials as may be required by the Contract Administrator, suitable for blueprinting, showing approved constructed requirements (not of "as-built" construction unless otherwise stipulated), provided, however, that should this Contract be terminated by the City the Architect shall deliver to the City one set of original drawings as they exist at the time of termination. Such plans as are delivered shall become and remain the property of the City.

(v) *Revision of Final Drawings and Specifications*. The Architect shall, without additional fee, correct and revise the drawings, specifications, or other materials

furnished under this Contract, if the Contract Administrator finds that such revision is necessary to correct errors or deficiencies for which the Architect is responsible.

(vi) *Bidding*. The Architect shall perform all necessary Architectural services required in connection with the competitive bidding for construction of the project and the preparation of all documents required thereof, including preparation of documents for separate bid packages for multiple contractors if so required by Contract Administrator.

6. *Responsibility of the Architect*. The Architect shall be responsible for the professional and technical accuracy and the coordination of all designs, drawings, and specifications and other work or materials furnished by the Architect under this Contract. The Architect shall without additional cost or fee to the City, correct or revise any errors or deficiencies in his performance.

7. *Reuse of Documents*. The City shall have unlimited rights, for the benefit of the City in all drawings, designs, specifications, notes and other Architect's work produced in the performance of this Contract, or in contemplation thereof, and all as-built drawings produced after completion of the work, including the right to use same on any other City work without additional cost to the City. All documents including drawings and specifications prepared by the Architect pursuant to this Contract are instruments of service in respect of the project. They are not intended or represented to be suitable for reuse by the City of others for any other project. Reuse for another project without written verification or adaption by Architect for the specific purpose intended will be at the City's risk. Any such verification or adaption will entitle Architect to further compensation at rates to be agreed upon by the City and Architect. A reproducible set of plans and specifications shall be delivered to and become the property of the City upon completion of the Project by the Architect.

8. *Expert Witness*. The Architect shall serve as an expert witness for the City in any legal proceedings regarding this Project if the City so requests. The expert witness fee for Architect shall be negotiated at the time the Architect is called as an expert.

9. *Modifications to Scope of Work/Change Orders*.

(a) *Change Orders*. The Contract Administrator, upon written approval as required by the City's Purchasing Policy, shall without notice to any sureties, have the authority to order changes in this Contract which affect the cost or time of performance. Such changes shall be ordered in writing specifically designated to be a change order. Such orders shall be limited to reasonable changes in one or more of the following: the services to be performed, the contract price of the time of the performance. The City will not be held liable for any changes which have not been properly authorized and approved in accordance with this Contract.

(b) If any change under this clause causes an increase or decrease in Architect's cost of, or time required for performance of the work hereunder, Architect shall receive an equitable adjustment and the Contract shall be modified in writing accordingly. Any change shall include all costs and damages related to or incidental to such change.

(c) Any claim by the Architect for adjustment under this clause shall be asserted in writing within thirty (30) days from the date of receipt by the Architect of the notification of change unless the Contract Administrator grants a further period of time before the date of final payment under the Contract. The Architect shall proceed with the prosecution of the work as changed. Except as provided in this Contract, the Architect shall not be entitled to payment for a charge for any extra work or material.

10. *Subcontractors and Outside Associates and Consultants*. Any subcontractors and outside associates or consultants required by the Architect in connection with the services covered by the Contract will be limited to such individulas or firms as are specifically identified and approved in writing by the Contract Administrator. Any

substitution in such subcontractors, associates, or consultants shall be subject to the prior approval of the Contract Administrator.

11. *Termination*.

(a) The performance of work under this Contract may be terminated by the City in accordance with this clause in whole, or from time to time in part, whenever the Contract Administrator shall determine that such termination is in the best interest of the City. Any such termination shall be effected by delivery to the Architect of a Notice of Termination specifying the extent to which performance of work under the Contract is terminated, and the date upon which such termination becomes effective.

(b) After receipt of a Notice of Termination, and except as otherwise directed by the Contract Administrator, the Architect shall:

(i) Stop work under the Contract on the date and to the extent specified in the Notice of Termination.

(ii) Place no further orders or subcontracts for materials, services or facilities, except as may be necessary for completion of such portion of the work under the Contract as it is not terminated.

(iii) Terminate all orders and subcontracts to the extent that they relate to the performance of work terminated by the Notice of Termination.

(iv) Assign to the City in the manner, at the times and to the extent directed by the Contract Administrator, all of the right, title, and interest of the Architect under the orders and subcontracts so terminated, in which case the City shall have the right, in its discretion, to settle or pay any or all claims arising out of thee termination of such orders and subcontracts.

(v) Settle all outstanding liabilities and claims arising out of such termination of orders and subcontracts, with the approval or ratification of the Contract Administrator, to the extent the City may require which approval or ratification shall be final for all the purposes of this clause.

(vi) Transfer title and deliver to the City in the manner, at the times, and to the extent, if any, directed by the Contract Administrator.

a. The fabricated or un-fabricated parts, work in process, completed work, supplies, and other material produced as a part of, or acquired in connection with the performance of, the work terminated by the Notice of Termination; and

b. The completed or partially completed plans, drawings, information, and other property which, if the Contract has been completed, would have been required to be furnished by the City.

(vii) Complete performance of such part of the work as shall not have been terminated by the Notice of Termination.

(c) After receipt of a Notice of Termination, the Architect shall submit to the City's Contract Administrator its termination claim, in the form and with certification prescribed by the Contract Administrator. Such claim shall be submitted promptly but in no event later than thirty (30) days from the effective date of termination, unless one or more extensions in writing are granted by the Contract Administrator, upon request of the Architect made in writing such thirty (30) days period or authorized extension thereof. Upon failure of the Architect to submit his termination claim within the time allowed, the Contract Administrator may determine on the basis of information available to him,

the amount, if any, due to the Architect by reason of the termination and shall thereupon pay to the Architect thee amount so determined.

(d) Subject to the provisions of Paragraph 11(c), the Architect and the Contract Administrator may agree upon the whole or any part of the amount or amounts to be paid the Architect by reason of the total or partial termination of work pursuant to this clause, the total or partial termination of work pursuant to this clause, which amount or amounts may include a reasonable allowance for profit on work done; provided, that such agreed amount or amounts exclusive of settlement costs, shall not exceed the total Contract price as reduced by the amount of payments otherwise made and as further reduced by the Contract price of work not terminated. The Contract shall be amended accordingly and the Architect shall be paid the agreed amount. Nothing in Paragraph 11 prescribing the amount to be paid to the Architect, shall be deemed to limit, restrict, or otherwise determine or affect the amount or amounts which may be agreed upon to be paid.

(e) In the event of the failure of the Architect and the Contract Administrator to agree as provided in Paragraph 11(d), upon the whole amount to be paid to the Architect by reason of the termination of work pursuant to this subparagraph, the Contract Administrator shall pay to the Architect the amounts determined by the Contract Administrator, but without duplication of any amounts agreed upon as follows:

(i) For completed work and services accepted by the City, the price or prices specified in the Contract for such work, less any payments previously made.:

(ii) The total of:

a. The costs incurred in the performance of the work and service terminated, including initial costs and preparatory expenses allocable thereto, but exclusive of any costs attributed to the work and services paid or to be paid for under Paragraph 11(e)(i) hereof:

b. The cost of settling and paying claims arising out of the termination of work or services under subcontracts or orders as provided in Paragraph 11(b)(v) above, which are properly chargeable to the terminated portion of the Contract exclusive of amounts paid or payable on account of work or services delivered or furnished by subcontractors prior to the effective date of termination, which amounts shall be included in the costs payable under Paragraph 11(a) above; and

c. A sum, as profit on Paragraph 11(a) above, determined by the Contract Administrator to be fair and reasonable, not to exceed 5% of the Task Authorization.

(iii) In the event the Contract is terminated because of Architect's default, the City may take over the work and services and complete the same by Contract or otherwise, and the Architect shall be liable to the City for any increased cost of the project.

12. *Examination of Records*

(a) The Architect agrees that the City, or any duly authorized representative, shall, until the expiration of five (5) years after final payment hereunder, have access to and the right to examine and copy any pertinent books, documents, papers and records of the Architect involving transactions related to this Contract.

(b) The Architect further agrees to include in any subcontract for more than $10,000 entered into as a result of this Contract, a provision to the effect that the subcontractor agrees that the City or any duly authorized representative shall, until the expiration of five (5) years after final payment under the subcontract, have access to and the right to examine and copy any pertinent books, documents, papers and records of such Architect involved in

transactions related to such subcontract, or this Contract. The term subcontract as used herein shall exclude purchase orders for public utility services at rates established for uniform applicability to the general public.

(c) The period of access provided in subparagraphs (a) and (b) above for records, books, documents and papers which may relate to any arbitration, litigation, or the settlement of claims arising out of the performance of this contract or any subcontract shall continue until any appeals, arbitration, litigation or claims shall have been finally disposed of.

13. *Public Records Compliance*. The Architect shall comply with public records laws as set forth in Chapter 119, Florida Statutes, and shall specifically:

(a) Keep and maintain public records required by the City to perform the service.

(b) Upon request from the City's custodian of public records, provide the City with a copy of the requested record or allow the records to be inspected or copied within a reasonable time at a cost that does not exceed the cost provided in Section 119, Florida Statutes, or as otherwise provided by law.

(c) Ensure that public records that are exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the Contract term and following completion of the Contract if the Architect does not transfer the records to the City.

(d) Upon completion of the Contract, Architect shall transfer to the City, at no cost, all public records in possession of the Architect and destroy any duplicate public records that are exempt from public records disclosure requirements. All records stored electronically must be provided to the City, upon request from the City's custodian of public records, in a format that is compatible with the information technology systems of the City.

If Architect does not comply with a public records request, the City shall deem the non-compliance a breach of this Contract, and the Architect may be subject to penalties under Section 119.10, Florida Statutes.

ARCHITECT QUESTIONS RELATING TO ARCHITECT'S DUTIES TO PROVIDE PUBLIC RECORDS RELATING TO THIS CONTRACT MUST BE FORWARDED TO THE OFFICE OF THE CITY CLERK, CITY HALL, 1000 CITY CENTER CIRCLE, PORT ORANGE, FLORIDA 32129 TELEPHONE: (386) 506-5563 E-MAIL: CITYCLERK@PORT-ORANGE.ORG.

14. *Termination for Non-Appropriation of Funds*.

(a) If funds are not appropriated for any succeeding fiscal years subsequent to the one in which this Contract is entered into, for the purpose of this Contract, then the City may terminate this Contract upon thirty (30) days prior written notice to the Architect. Should termination be accomplished in accordance with this Section, the City shall be liable only for payments due through the date of termination.

(b) The City agrees that should it terminate in accordance with this Section, it shall not obtain services which are substantially equal to or similar to those for which this Contract was entered into. This provision shall survive any termination of the Contract.

15. *Insurance* Architect shall maintain insurance, as required herein, during the life of this Contract. Architect shall provide to the City, a certificate of insurance endorsing the City of Port Orange as an additional named insured. All insurance coverages of the Architect shall be primary and non-contributory. All insurance coverages of the Architect shall not seek contribution from any other insurance or self-insurance available to the City. For workers' compensation coverage, the Architect's insurance certificate shall include the insurer's waiver of subrogation in lieu of endorsing the City as an additional insured for workers' compensation. The City shall not accept Workers' Compensation Exemptions. Architect may use leased employees if the Architect ensures that all workers who access the jobsite are employees covered by the employee leasing company, and no non-employees are permitted to access

the jobsite. Any Architect using a leased employee shall complete the City's Leased Employee Affidavit Form Exhibit. Policies for Workers' Compensation may be issued by companies authorized as a group self-insurer by F.S. 440.572.

Policies other than Workers' Compensation shall be issued by insurers licensed and/or duly authorized under Florida Law to do business in the State of Florida and all insuring companies are required to have a minimum rating of "A-" in the "Best Key Rating Guide" published by A.M. Best & Company, Inc. Architect shall not commence work under this Contract until the City has received a certificate or certificates of insurance with endorsement evidencing the required insurance. Insurer shall provide the City written notice of cancellation, nonrenewal or any other changes in coverage no later than thirty (30) days prior to the effective date of the change and shall provide notice to the City no later than 10 days after non-payment. The Certificates of Insurance and required insurance policies shall contain provisions that thirty (30) days prior written notice shall be given to the City of any cancellation, intent not to renew, or reduction in the policies or coverages.

Architect shall require and ensure each of its subcontractors to maintain, until the completion of the subcontractor's work, insurance of the types and to the limits set forth herein. All insurance coverages shall be primary and non-contributory. All insurance coverages of the subcontractors shall not seek contribution from any other insurance or self-insurance available to the City. The Architect is responsible for ensuring that its subcontractors maintain the required coverage. Failure of the Architect to ensure the subcontractors maintain the required coverage, shall not relieve the Architect of any contractual responsibility, obligation or liability.

The City reserves the right to increase insurance coverage as determined for higher risk contracts.

The acceptance by the City of any Certificate of Insurance does not constitute approval or agreement by the City that the insurance requirements have been satisfied or that the insurance policy shown on the Certificate of Insurance is in compliance with this Contract and does not waive the insurance required by this Contract.

Should at any time the Architect or subcontractors not maintain the insurance coverages required herein, the City may terminate the Contract or at its sole discretion shall be authorized to purchase such coverages and charge the Architect for such coverages purchased. The City shall be under no obligation to purchase such insurance, nor shall it be responsible for the coverages purchased or the insurance company or companies used. The decision of the City to purchase such insurance coverages shall in no way be construed to be a waiver of any of its rights under the Contract.

Standard Insurance Requirements			
	Insurance	**Standards**	**Additional Requirements**

16. *Assignability of Contract*. Neither this Contract, nor any part hereof, may be assigned by the Architect to any other party without the express written approval of the City Council.

17. *Sovereign Immunity*. The City expressly retains all rights, benefits and immunities of sovereign immunity in accordance with Section 768.28, Florida Statutes. Notwithstanding anything set forth in any section of this Contract to the contrary, nothing in this Contract shall be deemed as a waiver of immunity or limits of liability of the City beyond any statutory limited waiver of immunity or limits of liability which may have been adopted by the Florida Legislature or may be adopted by the Florida Legislature and the cap on the amount and liability of the City for damages regardless of the number or nature of claims in tort or equity shall not exceed the dollar amount set by the legislature for tort. Nothing in this Contract shall inure to the benefit of any third party for the purpose of allowing any claim against the City which would otherwise be barred under the Doctrine of Sovereign Immunity or operation of law.

18. *Liability for Loss or Damage*. Architect shall be liable for any loss of, or damage to, City property caused by the negligence, recklessness, or intended wrongful misconduct of Architect, his/its agents, servants and employees and shall indemnify and save the City harmless against all actions, proceedings, claims, demands, costs, damages and expenses, including attorney's fees, by reason of any suit or action brought for any actual or alleged injury to or death of any person or damage to property other than City property, to the extent caused by negligent performance of the Contract by Architect, his/its agents, servants and employees. Architect shall submit a full written report to the Finance Director within twenty-four (24) hours following the occurrence of such damage, loss or injury.

19. *Non-discrimination*. During the performance of this Contract, Architect agrees as follows:

(a) Architect will not discriminate against any employee or applicant for employment because of race, religion, color, sex, disability, marital status, age or national origin, except where such is a bona-fide occupational qualification reasonably necessary to the normal operation of Architect. Architect agrees to post in conspicuous places, available to employees and applicants for employment, notices setting forth the provisions of this non-discrimination clause. Architect agrees and fully supports and complies with the Americans with Disabilities Act of 1990.

(b) Architect shall state in all solicitations or advertisements for employees placed by or on behalf of Architect that Architect is an equal opportunity employer.

(c) Notices, advertisements and solicitations placed in accordance with federal law, rule or regulation shall be deemed sufficient compliance with this provision. Architect shall include the provisions of the foregoing subparagraphs (a), (b), and (c) in every subcontract or purchase order of over $10,000 so that the provisions will be binding upon each subcontractor or vendor.

20. *E-Verify*. Architect shall utilize the U.S. Department of Homeland Security's E-Verify system to verify the employment eligibility of all new employees hired by the Architect during the term of this Contract and shall expressly require any subcontractors performing services pursuant to this Contract to likewise utilize the U.S. Department of Homeland Security's E-Verify system to verify the employment eligibility of all new employees hired by the subcontractor during the term of this Contract.

21. *Disputes*. The City Manager, who shall reduce his decision to writing and mail or otherwise furnish a copy thereof to Architect, shall decide disputes with respect to this Contract in the first instance. The decision shall be final and binding unless, within ten (10) days from the date of receipt of the decision of the City Manager, appeal is made to the City Council. The decision of the City Council shall be final and binding unless set aside by a court of competent jurisdiction as fraudulent, capricious, arbitrary, or so grossly erroneous as necessary to imply bad faith, or not to be supported by any evidence. Pending a final determination of a properly appealed decision of the City Council, Architect shall proceed diligently with the performance of this Contract in accordance with that decision.

22. *Force Majeure*. Neither party shall be liable for any delay in performance or failure to perform any obligation hereunder if, and to the extent that, such failure or delay is caused by an event of Force Majeure. Force Majeure shall mean any act, event or condition that is beyond the party's reasonable control, that materially and adversely affects the party's ability to perform its obligations hereunder, and that is not the result of the party's willful neglect, error, omission or failure to exercise reasonable due diligence.

23. *Controlling Law*. **THIS AGREEMENT CONTAINS IMPORTANT MATTERS AFFECTING LEGAL RIGHTS AND IS ACCEPTED AND ENTERED INTO IN FLORIDA AND ANY QUESTION REGARDING ITS VALIDITY, CONSTRUCTION, ENFORCEMENT, OR PERFORMANCE SHALL BE GOVERNED BY FLORIDA LAW. ANY LEGAL PROCEEDING ARISING FROM OR IN ANY WAY REGARDING THE AGREEMENT SHALL HAVE ITS VENUE LOCATED EXCLUSIVELY IN THE CIRCUIT COURT OF VOLUSIA COUNTY, FLORIDA, AND THE PARTIES HEREBY EXPRESSLY CONSENT AND SUBMIT THEMSELVES TO THE PERSONAL JURISDICTION AND VENUE OF THE COURT.**

24. *Additional Provisions*. This Contract includes all additional provisions as may have been outlined in written quotes and purchase orders and any attachments or exhibits to this Contract whether delivered herewith or subsequently approved as a part hereof, such as drawings or technical specifications prepared in the performance of this work. In the event of a conflict between any attachments or exhibits to this Contract, and this Contract, the language of this Contract shall control.

25. *Integration*. This Contract and the documents incorporated herein by reference shall constitute the whole agreement between the parties. There are no promises, terms, conditions, or obligations other than those contained herein, and this Contract shall supersede all previous communications, representations, or agreements, written or verbal, between the parties hereto.

26. *Notice*. For purposes of this agreement, notices shall be sent as follows:

City: City of Port Orange
Attention: City Manager
1000 City Center Circle
Port Orange, Florida 32129
(386) 506-5501

Copy to: City of Port Orange
Attention: Jill Poolman, Purchasing Manager

Port Orange, Florida 32129
(386) 506-5718

Contractor: Hall & Ogle, Architects, Inc.
Attention: David D. Ogle, Jr., Vice President
208 Magnolia Avenue
Daytona Beach, Florida 32114
(386) 255-6163 – Telephone
dogle@hoarchitects.com

Any notice or other communication given under the Contract will be in writing and delivered by hand, sent by facsimile (provided acknowledgement of receipt thereof is delivered to the sender), sent by certified, registered mail, or sent by any nationally recognized overnight courier service to the addresses provided herein. The parties may, from time to time and at any time, change their respective addresses and each will have the right to specify as its address any other address by at least 10 days written notice to the other party.

27. *Truth-in-Negotiations*

(a) For any fixed fee, cost-plus-a-fixed-fee or guaranteed maximum-not-to-exceed compensation professional service contract or compensation in a Task Authorization over $150,000.00, Architect shall execute a truth-in-negotiation certificate stating that wage rates and other factual unit costs supporting the compensation are accurate, complete, and current at the time of contracting. Any professional service contract or Task Authorization under which such certificate is required must contain a provision that the original contract price or compensation and any additions thereto will be adjusted to exclude any significant sums by which the City determines the contract price or compensation was increased due to inaccurate, incomplete, or noncurrent wage rates and other factual unit costs. All such contract or compensation adjustments must be made within one (1) year following the end of the Contract. Otherwise, such adjustments shall be deemed waived by the Architect and null and void for the purposes of this Contract or Task Authorization. The signature on this Contract by the Architect shall act as the execution of a truth-in-negotiation certificate stating that the wage rates and other factual unit costs supporting the compensation of this Contract are accurate, complete, and current at the time of contracting.

(b) Architect's signature on this Contract or a Task Authorization shall act as execution of a truth-in-negotiation certificate stating that wage rates and other factual unit costs supporting the compensation set forth in this Contract or a Task Authorization are accurate, complete, and current at the time of contract. The certification

shall also constitute an affirmation that Architect has disclosed all debts or fees owed to or that are pending before the City prior to the execution of this Contract of Task Authorization.

28. *Waiver of Breach and Materiality* Failure to enforce any provision of this Contract shall not be deemed a waiver of such provision or modification of this Contract. A waiver of any breach of a provision of this Contract shall not be deemed a waiver of any subsequent breach and shall not be construed as a modification of the terms of this Contract.

29. *Contract Construction*

This Agreement may be executed in one or more counterparts, each of which shall be deemed to be an original but all of which together shall constitute one and the same instrument. The delivery by facsimile or e-mail of an executed copy of this Agreement shall be deemed valid as if an original signature was delivered. No contract shall be formed between Architect and the City until the City signs this Agreement.

30. *Authority to Sign*. Each person signing this Agreement warrants that he or she is duly authorized to do so and to bind the respective party to the Agreement.

EXHIBIT "1"

RFSQ 22-03 Section 3 and Architect's Quote

Consisting of 4 Pages

Hall & Ogle Architects, Inc.

Rates are as follows:

Principal:	$200.00/hr
Sr. Project Architect	$150.00/hr
CAD Technician	$ 80.00/hr
Clerical/Support	$ 50.00/hr

SECTION 3 – SCOPE OF SERVICES AND REQUIREMENTS

PROJECT DESCRIPTION:

The purpose of this RFSQ is to establish a master agreement for Professional Architectural Services for various renovation, restoration, construction and general consulting projects in the City of Port Orange in accordance with Florida Statue 287.055, known as the "Consultants' Competitive Negotiation Act" (the "CCNA"). Services for projects may include conducting and/or attending preconstruction meetings, review of shop drawings, record drawing review, cost estimating, and additional architectural services as required during the course of construction.

Authorization for Services under the contract shall be in the form of written Task Authorization issued and executed by the City and signed by the Architect. Each Task Authorization shall describe the services required, state the date of the commencement and completion of work, and establish the amount and method of payment. The City makes no covenant or promise as to the number of available projects during the life of this Contract.

GENERAL INFORMATION:

Sub-consultants

The City of Port Orange reserves the right to approve all sub-consultants for this contract. If sub-consultants are to be utilized, their names and references must be included within this initial statement. Responsibility for the performance of the contract remains with the main Consultant exclusively. Sub-consultants may be added to this contract during the contract period only with PRIOR WRITTEN PERMISSION from the City of Port Orange.

Qualifications

The proposer must have architects or other professional personnel that are registered and licensed in the State of Florida, qualified inspectors, financial advisors or other personnel as required to perform the duties necessary to complete the various services for this project.

Anticipated Services Awarded

The firms will submit a detailed scope of services for consideration during negotiations for individual Task Authorizations under the continuing service contract. The negotiated scope of services for the specified project(s) may include, but may not be limited to, the scope of work discussed above.

Compensation

After a final ranking of all statements received has been decided, the City will begin negotiations with the top ranked firms for a master contract and pricing, per the Consultant's Competitive Negotiations Act requirements.

The City may elect to provide compensation in the Lump-Sum or Unit Cost with maximum format.

Progress payments may be requested monthly. All invoices shall include the Purchase Order Number, the City Contract Number, the name of the project, the authorized amount, the total of previous billings, the current billing amount, and the amount remaining unbilled. In addition, a narrative summary of services provided, explanation of expenses billed under the current billing amount and all back-up documentation needed to confirm the appropriateness of the Consultant's billing shall be provided.

The City's normal payment procedures in accordance with the Florida Prompt Payment Act will be observed. No early payments shall be approved.

No out of scope services shall be provided or compensated in the absence of prior, written authorization in the form of a supplemental Contract and issuance of an appropriate change order to the existing Purchase Order. The City will accept no obligation for any services provided which do not conform to this requirement.

ARCHITECTURAL SERVICES:

1. Provide all certifications ("Architect of Record" function) surveys, calculations, drawings, technical specifications and any other documents required for special permits and authorizations from various government bodies or agencies having jurisdiction over the project;

2. Prepare time scaled diagrams showing the dates of completion of various design phases and scheduled completion of working drawings and specifications and submit for Contract Administrator's review and approval;

3. During construction bidding, provide such amplifications and explanations that may be necessary to clarify the intent of the drawings and specifications.

4. Furnish consultation and advice as requested by the City during the construction of a project, including Construction Administration Services (unless otherwise stipulated in a specific amendment attached to the Task Authorization);

5. Furnish all other Architectural services included without limitation those specified hereinafter and those required for the completion of specific projects as described in amendments to the Master Agreement Contract:

   (a) Site Visits/Special Permits: The Architect shall visit the site and shall initiate and hold such conferences with representatives of the City and other agencies, boards or government bodies having jurisdiction over the area the project covers and take such other action as may be necessary to obtain permits and authorizations (except the construction permits) and other data upon which to develop the design and preliminary sketches showing the contemplated project.

   (b) Preliminary Sketches and Opinion of Probable Construction Costs: The preliminary sketches shall include plans, elevations and sections development in such detail and with such descriptive specifications as will clearly indicate the scope of work and make possible a reasonable opinion of the construction cost and satisfy the requirements of permitting and regulatory agencies having jurisdiction. A preliminary opinion of probable construction costs shall be prepared based on the preliminary sketch or plan.

   (c) Working Drawings and Specifications: After the preliminary sketches and opinion of probable construction costs have been approved, the Architect shall proceed with the preparation of working drawings and specifications as required by the Contract Administrator for the construction of said project. Working drawings, specifications and estimates shall be delivered to the Contract Administrator in such sequence and at such times as required by the City such that the construction work can be initiated promptly, procurement of materials made without delay and continuous prosecution of the work promoted, all in strict accordance with the approved design schedule provided with a Task Authorization. A typical design schedule would include 30%, 60% and 90% drawings unless otherwise indicated on the Task Authorization. Working drawings and specification shall be revised as necessary to meet the requirements of permitting and regulatory agencies and as required by the Contract Administrator. After working drawings and specifications have been approved by the Contract Administrator, the Architect shall furnish such number of sets of prints of the approved working drawings and such number of sets of the approved specifications, as may be required by permitting and regulatory agencies and the Contract Administrator.

   (d) Original Drawings – Final Plans: Upon approval of final plans the Architect shall deliver to the City one set of original drawings, in such medium and on such materials, as may be required by the Contract Administrator, suitable for blueprinting, showing approved constructed requirements (not of "as-built" construction unless otherwise stipulated), provided, however, that should this contract be terminated by the City the Architect shall deliver to the City one set of originals as they exist at the time of termination. Such plans as are delivered shall become and remain the property of the City.

(e) Revision of Final Drawings and Specifications: The Architect shall without additional fee correct and revise the drawings, specifications, or other materials furnished under this contract, if the Contract Administrator finds that such revision is necessary to correct errors or deficiencies for which the Architect is responsible.

(f) Bidding: The Architect shall perform all necessary Architectural services required in connection with the competitive bidding for construction of the project and the preparation of all documents required thereof, including preparation of documents for separate bid packages for multiple contractors if so required by the Contract Administrator.

(g) Reuse of Documents: The City shall have unlimited rights, for the benefit of the City in all drawings, designs, specifications, notes and other Architect's work produced for a project in the performance of this contract, or in contemplation thereof, and all as-built drawings produced after completion of the work, including the right to use same on any other City work without additional cost to the City.

(h) Expert Witness: The Architect shall serve as an expert witness for the City in any legal proceedings regarding a project under this Contract if the City so requests. The expert witness fee for the Architect shall be negotiated at the time the Architect is called as an expert.

[End of Scope of Services - Remainder of this page left intentionally blank]

EXHIBIT "2"

Example Task Authorization

Consisting of 4 Pages

TASK AUTHORIZATION NO. ____
Master Contract for Architectural Services dated _____
Between the City of Port Orange, Florida and Hall & Ogle Architects, Inc.

THIS Task Authorization is entered into by and between the **CITY OF PORT ORANGE, FLORIDA**, a chartered municipal corporation with its principal place of business at 1000 City Center Circle, Port Orange, Florida 32129 (the "City") and **HALL & OGLE ARCHITECTS, INC.**, a Florida corporation withits principal place of business at 208 Magnolia Avenue, Daytona Beach, Florida 32114 ("Architect"), and hereinafter collectively referred to as the "Parties," and is to that certain Master Contract relating to Professional Architectural Services, as dated above, and any amendments thereto, hereinafter collectively referred to as the "Contract." The Parties, in exchange for the mutual covenants contained herein and in the Contract, agree as follows:

1. This Task Authorization expressly modifies the Contract and in the event of a conflict, the terms and conditions of this Task Authorization shall prevail.

2. In addition to all other terms and conditions contained in the Contract, Architect shall provide services relating to _____ as more particularly described in the Scope of Servicesattached hereto and incorporated herein as Task Authorization Exhibit "1."

3. Architect shall complete the services to be provided herein within ____ days of the date of written notice by the City to the Architect.

4. In return for the services identified above, the City agrees to compensate Architect at the prices set forth in Exhibit "1" attached hereto and made a part hereof, subject to a limit not to exceed $_____. All payments shall be governed by the Local Government Prompt Payment Act as set forth in Sections 218.70 through 218.79, Florida Statutes, as amended.

5. *Truth-in-Negotiations*

(a) For any fixed fee, cost-plus-a-fixed-fee or guaranteed maximum-not-to-exceed compensation professional service contract or compensation in a Task Authorization over $150,000.00, Architect shall execute a truth-in-negotiation certificate stating that wage rates and other factual unit costs supporting the compensation are accurate, complete, and current at the time of contracting. Any professional service contract or Task Authorization under which such certificate is required must contain a provision that the original contract price or compensation and any additions thereto will be adjusted to exclude any significant sums by which the City determines the contract price or compensation was increased due to inaccurate, incomplete, or noncurrent wage rates and other factual unit costs. All such contract or compensation adjustments must be made within one (1) year following the end of the Contract. Otherwise, such adjustments shall be deemed waived by the Architect and null and void for the purposes of this Contract or Task Authorization. The signature on this Contract by the Architect shall act as the execution of a truth- in-negotiation certificate stating that the wage rates and other factual unit costs supporting the compensation of this Contract are accurate, complete, and current at the time of contracting.

(b) Architect's signature on this Contract or a Task Authorization shall act as execution of a truth-in-negotiation certificate stating that wage rates and other factual unit costs supporting the compensation set forth in this Contract or a Task Authorization are accurate, complete, and current at the time of contract. The certification shall also constitute an affirmation that Architect has

disclosed all debts or fees owed to or that are pending before the City prior to the execution of this Contract of Task Authorization

6. This Task Authorization may be executed in one or more counterparts, each of which shall be deemed to be an original but all of which together shall constitute one and the same instrument. The delivery by facsimile or e-mail of an executed copy of this Task Authorization shall be deemed valid as if an original signature was delivered. No contract shall be formed between the Architect and the City until the City signs this Task Authorization.

IN WITNESS WHEREOF, the Parties have made and executed this Task Authorization for the purposes herein expressed on the dates set forth below.

CITY COUNCIL AGENDA ITEM

COUNCIL MEETING DATE 9/5/2023

SUBJECT: (B8) Resolution No. 23-30 - Request for Inclusion of the City of Port Orange's Water Reclamation Facility Plan in the State Revolving Fund Loan Program

DEPARTMENT: Public Utilities

GOAL: 1 - Public Safety
2 - Infrastructure
5 - Fiscal Sustainability

RECOMMENDED MOTION: Move to approve Resolution No. 23-30 for the Request for Inclusion of the City of Port Orange's Water Reclamation Facility Plan in the State Revolving Fund Loan Program.

SUMMARY: The City of Port Orange Water Reclamation Facility was originally built in 1965. The most recent treatment upgrades were performed in 1990. The plant is designed to treat an average of 12 million gallons per day (mgd) of sewage. The system serves 80,000 residents in Port Orange, Ponce Inlet, Daytona Beach Shores, Spruce Creek Fly In, and some parcels of unincorporated Volusia County.

The State of Florida has modified its requirements for the level of wastewater treatment, disposal quality, and the quality of reclaimed water. While operating within current levels, the new regulations require all treatment plants to meet more stringent levels of treatment by the year 2032. In order for the Port Orange facility to meet these levels, a major upgrade in the treatment process will be required.

Staff has researched various options for funding sources to perform these upgrades. One source is a State Revolving Fund (SRF) Loan Program which is a low-interest loan over a longer period. The loan terms include a 20-year amortization and low-interest rates. State Revolving Fund (SRF) loans are financial assistance programs provided by the U.S. Environmental Protection Agency to help states and communities address water and wastewater infrastructure needs. These loans offer several benefits: low interest rates, flexible repayment terms, and can be used for a variety of infrastructure projects. Staff believes a SRF Loan is the appropriate mechanism to finance the upgrades to the Water Reclamation Facility for the City of Port Orange.

In order to be considered for an SRF loan, the City was required to develop a Facility Plan. This plan is a thorough evaluation of the existing condition of the plant and what is required to meet the future needs of the City while meeting all upcoming state treatment regulations. Mead & Hunt was contracted to perform the evaluation of the treatment plant and provide the facility plan. The plan outlines current and future upgrades

required to meet the new regulations with cost estimates.

Florida Administrative Code 62-503 requires formal adoption by City Council of the facility plan to comply with SRF loan program requirements. To be considered for these funding resources, the facility plan must be approved by resolution and a Request for Inclusion must be entered into the state clearinghouse for consideration and evaluation. The Facility Plan for the Water Reclamation Facility was adopted by City Council on 5-16-2023. A Request for Inclusion is now requested from City Council for approval and authorization to submit to the state clearinghouse. Now, staff is requesting authorization to submit a Request for Inclusion form. If the state determines that the projects outlined in the facility plan are eligible for funding, the City would be notified to formally apply for the loan.

RESOLUTION NUMBER 23-30

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF PORT ORANGE, FLORIDA, RELATING TO THE FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION (FDEP) STATE REVOLVING FUND (SRF), APPROVING THE SUBMISSION TO THE STATE OF FLORIDA, DEPARTMENT OF ENVIRONMENTAL PROTECTION OF A REQUEST FOR INCLUSION (RFI) IN THE CLEAN WATER STATE REVOLVING FUND (CWSRF) PROGRAMS' PRIORITY LISTS, AS IT RELATES TO THE WASTEWATER TREATMENT FACILITY IMPROVEMENTS; AUTHORIZING THE CITY MANAGER, TO TAKE ALL NECESSARY STEPS AND TO EXECUTE ALL NECESSARY DOCUMENTS RELATED TO THE ABOVE-REFERENCED SUBMISSION, PROVIDING FOR AN EFFECTIVE THIS DATE

WHEREAS, Florida Statutes provide for loans to local government agencies to finance the construction of wastewater facilities; and Florida Administrative Code requires the formal authorization by the City Council to formally adopt a facility plan outlining necessary upgrades for improved treatment, efficiency, and enhanced reliability in order for facility improvements to comply with State of Florida funding requirements;

WHEREAS, on or about May 16, 2023, the City of Port Orange formally adopted a facility plan for the City's wastewater treatment facility by Resolution 23-18 ("Facility Plan");

WHEREAS, the City of Port Orange intends to apply for the State Revolving Fund (SRF) and enter into a loan agreement with the Florida Department of Environmental Protection under the SRF for project financing for the construction of upgrades to the City's wastewater treatment facilities in accordance with the Facility Plan;

WHEREAS, in order to participate in the SRF Program, a Request for lnclusion (RFl) form, Form RFI 1, per subsection 62-503.200(33), F.A.C. ("RFI Form") must be submitted to the State of Florida for inclusion on the CWSRF Priority List;

WHEREAS, the City Council of the City of Port Orange, wishes to approve the submission of the RFI form and authorize the City Manager to execute all necessary documents.

NOW THEREFORE BE IT RESOLVED by the City Council of the City of Port Orange, Florida as follows:

SECTION 1. FINDINGS.

A. The foregoing findings are incorporated herein by reference and made a part hereof.

B. The City of Port Orange Florida hereby approves the submission to the State of Florida, Department of Environmental Protection, a Request for lnclusion form, Form RFI 1, per subsection 62-503.200(33), F.A.C., for the purpose of inclusion on the Clean Water State Revolving Fund (CWSRF) program Priority List.

C. The City Manager is hereby authorized to execute all necessary documents related to said submission.

D. All Resolutions or part of Resolutions in conflict with any of the provisions of this Resolution are hereby repealed.

E. If any section or portion of a section of this Resolution proves to be invalid, unlawful, or unconstitutional, it shall not be held to invalidate or impair the validity, force, or effect or any other section or part of this Resolution.

SECTION 2. EFFECTIVE DATE. This Resolution shall take effect upon its approval and adoption by the City Council.

Florida Department of Environmental Protection

REQUEST FOR INCLUSION ON THE CWSRF PRIORITY LIST

Clean Water State Revolving Fund Loan Program
3900 Commonwealth Blvd, MS 3505, Tallahassee, FL 32399-3000

Process to receive a State Revolving Fund (SRF) Loan. The Request for Inclusion (RFI) form, 62-503.900(1), lets us know that you are interested in obtaining a SRF loan. Each RFI will be assigned a project engineer to assist you throughout the SRF funding process. The information contained in the RFI is used to determine a priority score for your project; and the priority score is used to rank projects on the SRF priority list. Only projects ranked on the fundable portion of the priority list will receive consideration for a loan. Your project engineer will assist you in understanding all program requirements necessary before you are asked to submit a loan application, forms 62-503.900(2) or 62-503.900(3). Please note that project costs incurred before a SRF loan agreement is executed or an authorization to incur costs is provided are ineligible for reimbursement.

4. Eligible Projects.

a. Stormwater management facilities, such as detention/retention facilities, treatment facilities, etc. sponsored by a local government (eligible under Section 212 of the amended Clean Water Act).

b. Wastewater management facilities, such as sewers, pump stations, treatment plants, reuse facilities, sludge facilities, etc. sponsored by a local government (eligible under Section 212 of the amended Clean Water Act).

c. Nonpoint source pollution control best management practices for agriculture, silviculture, on-site treatment and disposal, wetlands, mining, marinas, brownfields or groundwater protection sponsored by any entity (eligible under Section 319 or 320 of the amended Clean Water Act).

5. Project Information (Please attach).

Describe the project, its location, the scope, why it's needed and the environmental benefit.

Attach maps showing system boundaries, existing and proposed service area, and project area.

6. Estimated Costs (Clean Water Act Section 212, 319, and 320).

a.	Planning and/or SSES	
b.	Design	$6,000,000.00
c.	Special Studies	
d.	*Eligible Land	
e.	Construction, Equipment, Materials, Demolition and Related Procurement	
f.	Construction Contingency (10% of Item e)	
g.	Technical Services during Construction	
h.	Sum of Items a. through g.	

*Funding shall be limited to the fair market value of the acreage of land necessary for and integral to the treatment process, including the zone of discharge. If additional land is purchased, the eligible amount shall be the acreage of land necessary for treatment divided by the total area purchased times the purchase price.

7. Project Schedule.

	(Month and Year)
Submit the planning or SSES documentation	7/23
Submit the design documents, obtain permits, and acquire sites (as necessary)	10/25
Start activity (such as construction or non-structural best management practice)	10/23
Complete activity (such as construction or non-structural best management practice)	10/25

8. Population

Population served by the system	64842
Population to be served by the project	64842

9. Project Priority

a. Baseline Priority Categorization.

Identify the category score(s) and construction costs(s) for which the project qualifies. The baseline priority score (BPS) shall be determined by prorating each component.

Project Component	Priority Points	Component Construction Cost
1. Eliminate a documented acute or chronic public health hazard. Examples: Elimination of failing septic tanks or failing package plants or elimination of sanitary sewer overflows.	500 points	_____
2. Implement a project included in, or to be implemented as a direct result of, an adopted Basin Management Action Plan or a Reasonable Assurance Plan approved pursuant to section 403.067, F.S.	450 points	_____
3. Protect surface or ground water by reducing a documented source of pollution, pollution reductions necessary to meet regulatory requirements, or repairs by local governments or on-site system management entities, under section 319 of the Act, that correct septic tank failures in springsheds of first-magnitude springs.	400 points	_____
4. Address a compliance problem documented in an enforcement action where the Department has issued a notice of violation or entered into a consent order with the project sponsor.	375 points	_____
5. Meet the criteria for Innovative/Alternative; correct excessive inflow/ infiltration, scheduled rehabilitation, replacement; repair described in an approved asset management plan; or reuse that replaces an existing or proposed demand on a water supply.	350 points	_____
6. Planning and design loans and rehabilitation, replacement or repair not included in an approved asset management plan.	340 points	$6,000,000.00
7. Projects that construct other reclaimed water systems or residuals reuse that do not meet the criteria of component 5. above.	300 points	_____
8. Ensure compliance with other enforceable standards or requirements.	200 points	_____
9. Timely submitted projects that otherwise meet the requirements of the Act.	100 points	_____

b. Restoration and Protection of Special Water Bodies.

In order to qualify for a base score multiplier, identify which of the water bodies listed below that the project will assist in restoring or protecting and reference the location in existing documentation where substantiating information may be found or attach other such substantiating information. If none are selected, the multiplier equals 1.0. If one or more are selected, the multiplier is 1.2.

A priority water body identified in an adopted Surface Water Improvement and Management (SWIM) Plan.	☒
A water body classified as Outstanding Florida Waters.	☒
A water body classified as Wild and Scenic Rivers.	☐
A water body located in a priority watershed established under the Unified Watershed Assessment Program.	☐

c. Projects that document any of the following shall have bonus points added to the priority score after the adjustment under paragraph (a) above, as indicated.

1. Elimination of Ocean Outfalls	15 points	☐
2. Projects that demonstrate consistency with a Water Resource Management plan	15 points	☐

Return the completed form to the State Revolving Fund Program, 3900 Commonwealth Blvd., MS 3505, Tallahassee, Florida, 32399-3000. The form may be scanned and emailed to SRF_Reporting@dep.state.fl.us or may be sent by FAX to (850) 245-2857.

Port Orange Design RFI Project Description

The Port Orange Wastewater Treatment Plant (WWTP) was constructed in 1989. The treatment process and majority of the equipment currently in operation was installed approximately 32 years ago. Much of the equipment has either been re-built or upgraded; however most has reached or exceeded its useful life. This project will modernize the WWTP to the latest standards while managing to achieve the advanced wastewater treatment standards of advanced wastewater treatment (AWT) criteria and effluent limits of 5-5-3-1 for Biological Oxygen Demand-Total Suspended Solids (BOD-TSS), Total Nitrogen (TN) and Total Phosphorus (TP) respectively.

The process conversion and upgrade project are needed for the reasons listed below:
• Replace/upgrade equipment that has exceeded its useful life and provide for dependable WRF operation
through end of the planning period.
• **Continuously meet advanced wastewater treatment (AWT) criteria and effluent limits of 5-5-3-1 for Biological Oxygen Demand-Total Suspended Solids (BOD-TSS), Total Nitrogen (TN) and Total Phosphorus (TP) respectively**.
• Improve operational efficiency, automation capabilities and accessibility.
• Rehabilitate structures, piping, valves, fitting, and ancillary equipment.
• Replace outdated and or inoperable electrical and I&C systems.
• Construct a state-of-the-art facility that can serve Port orange for the next 30+ years

The total conceptual cost for all the recommended modifications is approximately $86,481,000. The key recommendations are summarized here.

1. West Master Lift Station (WMLS) Pump Alternatives
The recommended alternative is installation of two (2) new 5,200 gpm screw centrifugal pumps with valves, VFDs and controls to match the upgrades currently taking place at the East Master Lift Station (EMLS).

2. WMLS and EMLS Primary Screening
One (1) Duperon 'FlexRake' primary screen is recommended for both WMLS and EMLS to address the severe issue of ragging at the WWTP. This alternative also includes converting the existing two out of three digesters to flow equalization tanks providing operational flexibility at the WWTP.

3. Influent Headworks
The recommendation includes replacement of the existing non-performing Vulcan screens with two (2) new 3mm center flow screens. The 3mm screens, considered as fine screens, provide the additional requirement of being the "right" screen for biological nutrient removal (BNR) alternatives considerations needed to meet AWT standards. In addition, the existing grit removal system (teacups) will be replaced with two (2) new Head cells, capable of removing up to 95% grit.

4. Biological Nutrient Removal (BNR) Facilities
The 5-stage Integrated Fixed-Film Activated Sludge (IFAS) system was recommended, based on significant capital construction cost savings as compared to other technologies, lower footprint requirements and its compatibility with other unit processes within the WWTP. Six (6) new hybrid positive displacement (PD) blowers will be installed to support the IFAS system.

5. Secondary Clarifiers

Replace entire collection and drive mechanism in all four (4) clarifiers with spiral-blade collection system (Ovivo "C4" components system) with submerged weirs. This will provide additional protection against algae growth.

6. Disinfection and Effluent Disposal

Following improvements undertaken as part of improving the disinfection and effluent disposal operations:

- Replacing existing submersible aerators in the reaeration basin with new coarse air system with two (2) blowers
- Internal expansion of chlorine contact chamber (CCC) with coverting part of existing reaeration basin
- New chlorine diffusers and instrumentation including chlorine instant analyzers.
- Replacement of existing transfer pumps with three (3) new transfer pumps
- Improvements to existing outfall piping with new flowmeters and replacement of 36-in check valve.
- Improvements to WWTP reuse piping to provide operational flexibility.
- Replacement/ upgrade of entire Decholorination system
- Canopy cover for entire Reaeration-CCC-Pump Area

7. Sludge Handling Improvements

The sludge handling improvements consists of:

- Optimizing the excess digester volume availability by converting two (out of three) of available digesters to flow equalization basins with three (3) new blowers.
- Increased operational controls for aerated sludge holding tanks and one (1) remaining digester
- Replacement of existing aging belt filter presses with four (4) new belt filter presses

8. WWTP Support Facilities

The following support facilities will be addressed as part of WWTP improvements:

- Installation of elevated walkways
- Modifications to existing operation building with addition of second floor and modernization of WWTP operations and laboratory
- New Maintenance Building
- Sludge Press Building Modifications

9. Reclaimed Water and Effluent Disposal

The following reclaimed water and effluent disposal improvements include:

- Modify Existing Reclaimed Lake Reservoirs
- Repair splitter structure intake pipe and repair filter
- Inspect and Repair/Replace Gravity Sewer System Components
- Construct New Reclaimed Lake Reservoir
- Relocate existing filter WWTP to Reservoir
- Permit & Construct Underground Injection Control (UIC) Test Well
- New Western GST & PS at Pioneer Trail

Executive Summary

The Port Orange Wastewater Treatment Plant (WWTP) was constructed in 1989. The treatment process and majority of the equipment currently in operation was installed approximately 32 years ago. Much of the equipment has either been re-built or upgraded; however most has reached or exceeded its useful life. The anaerobic-anoxic-aerobic (A^2O) process was advanced for its time, but new processes are available and new equipment and automation techniques can be implemented to improve treatment, efficiency and enhance reliability. The process conversion and upgrade project discussed within this document has been planned for nearly 10 years.

This Facility Plan details the alternatives and recommended improvements for all facets of the City's WWTP. Each alternative was evaluated based on the following criteria: cost, compatibility, and O&M/Reliability.

With the recommendations provided within this Facility Plan, the WWTP will be modernized to latest standards while managing to achieve the advanced wastewater treatment standards of Meet advanced wastewater treatment (AWT) criteria and effluent limits of 5-5-3-1 for Biological Oxygen Demand-Total Suspended Solids (BOD-TSS), Total Nitrogen (TN) and Total Phosphorus (TP) respectively.

The total conceptual cost for all the recommended modifications is approximately **$86,481,000**. The key recommendations discussed within this Facility Plan are summarized here and shown in **Figure 1**.

1. **West Master Lift Station (WMLS) Pump Alternatives**
   The recommended alternative is installation of two (2) new 5,200 gpm screw centrifugal pumps with valves, VFDs and controls to match the upgrades currently taking place at the East Master Lift Station (EMLS).

2. **WMLS and EMLS Primary Screening**
   One (1) Duperon 'FlexRake' primary screen is recommended for both WMLS and EMLS to address the severe issue of ragging at the WWTP. This alternative also includes converting the existing two out of three digesters to flow equalization tanks providing operational flexibility at the WWTP.

3. **Influent Headworks**
   The recommendation includes replacement of the existing non-performing Vulcan screens with two (2) new 3mm center flow screens. The 3mm screens, considered as fine screens, provide the additional requirement of being the "right" screen for biological nutrient removal (BNR) alternatives considerations needed to meeting AWT standards.
   In addition, the existing grit removal system (teacups) will be replaced with two (2) new Headcells, capable of removing upto 95% grit.

4. **Biological Nutrient Removal (BNR) Facilities**
   Three different technologies were evaluated for WWTP to meet the AWT standards required for now and future. After a detailed evaluation, the 5-stage Integrated Fixed-Film Activated Sludge (IFAS) system was recommended, based on significant capital construction cost savings as compared to other technologies, lower footprint requirements and its compatibility with other unit processes within the WWTP. Six (6) new hybrid positive displacement (PD) blowers will be installed to support the IFAS system.

5. **Secondary Clarifiers**
   It is recommended that the entire collection and drive mechanism in all four (4) clarifiers be replaced with spiral-blade collection system (Ovivo “C4” components system) with submerged weirs. This will provide additional protection against algae growth.

6. **Deep Bed Filters**
   The City is currently undertaking a project to replace their current deep bed filters with the new DeNora system. The improvements will also include new controls, and filter effluent valve replacements and will be compatible with other WWTP improvements discussed in the Facility Plan.

7. **Disinfection and Effluent Disposal**
   Following improvements are recommended as part of improving the disinfection and effluent disposal operations:
   - Replacing existing submersible aerators in the reaeration basin with new coarse air system with two (2) blowers
   - Internal expansion of chlorine contact chamber (CCC) with coverting part of existing re-aeration basin
   - New chlorine diffusers and instrumentation including chlorine instant analyzers
   - Replacement of existing transfer pumps with three (3) new transfer pumps
   - Improvements to existing outfall piping with new flowmeters and replacement of 36-in check valve
   - Improvements to WWTP reuse piping to provide operational flexibility
   - Replacement/ upgrade of entire Decholorination system
   - Canopy cover for entire Reaeration-CCC-Pump Area

8. **Sludge Handling Improvements**
   The sludge handling improvements consists of:
   - Optimizing the excess digester volume availability by converting two (out of three) of available digesters to flow equalization basins with three (3) new blowers
   - Increased operational controls for aerated sludge holding tanks and one (1) remaining digester
   - Replacement of existing aging belt filter presses with four (4) new belt filter presses

9. **WWTP Support Facilities**

   The following support facilities will be addressed/ recommended as part of WWTP improvements:

   - Installation of elevated walkways
   - Modifications to existing operation building with addition of 2nd floor and modernization of WWTP operations and laboratory
   - New Maintenance Building
   - Sludge Press Building Modifications

10. **Reclaimed Water and Effluent Disposal**

    The following reclaimed water and effluent disposal improvements include:

    - Modify Existing Reclaimed Lake Reservoirs
    - Repair splitter structure intake pipe and repair filter
    - Inspect and Repair/Replace Gravity Sewer System Components
    - Construct New Reclaimed Lake Reservoir
    - Relocate existing filter WWTP to Reservoir
    - Permit & Construct Underground Injection Control (UIC) Test Well
    - New Western GST & PS at Pioneer Trail

Table 1 displays a summary of the recommended improvements and associated costs.

TABLE 1: SUMMARY OF RECOMMENDATIONS AND COST ESTIMATES

Option #[1]	Description	Cost
	3.2 & 3.3 Biological Nutrient Reduction (BNR) Facilities	
A-2	New IFAS BNR Process	$19,860,000
	New PD Blowers	$2,520,000
	A Subtotal	**$22,380,000**
	3.4 Influent Pumping	
B-1 (a)	Replacement of WMLS Influent Pumps	$756,000
B-2 (a)	New Primary Screening	$3,744,000
B-3 (a)	Two (2) EQ Tanks (converted Digester Tanks)	$1,662,000
B-4 (a)	New HIBOCS Biological Odor Control System at WMLS and EMLS	$1,461,600
	B Subtotal	**$7,623,600**
	3.5 Influent Structure / Headworks	
C-1 (b)	New Grit Removal System	$4,320,000
C-2 (b)	Two New Center Flow 3 mm Fine Screens	$2,940,000
	C Subtotal	**$7,260,000**
	3.6 Secondary Clarifiers	
D-1 (b)	New Spiral Blade Collection Mechanism with Submerged Weirs (Includes RAS/WAS Pumps)	$6,078,000
	D Subtotal	**$6,078,000**
	3.8 Disinfection and Effluent Transfer Pumps	
E-1 (b)	Replacement of Existing Transfer with New In-Plant Reuse and Cover CCC	$2,652,000
	E Subtotal	**$2,652,000**
	3.9 Sludge Handling Facilities	
F-1 (b)	New Blowers with Converted EQ Tanks	$1,320,000
F-2 (b)	Replace Existing (5) Belt Presses with 4 New Belt Presses	$3,510,000
	F Subtotal	**$4,830,000**
	4.0 Electrical and Instrumentation	
	4.1 Electrical Improvements	$9,000,000
	4.2 Instrumentation and Controls	$3,900,000
	Electrical and Instrumentation Subtotal	**$12,900,000**
	5.0 Support Facilities	
	5.1 Elevated Walkways	$500,000
	5.2 Modified Operations and Laboratory Facilities	$2,000,000
	5.3 New Maintenance Building	$300,000

Option #[1]	Description	Cost
	Support Facilities Subtotal	**$2,800,000**
	(Subtotals A-F, Support Facilities and Electrical/I&C)	$66,524,000
	Contingency @ 30%	$19,957,000
	Total Construction Cost	**$86,481,000**
	Outside the Fence	
	5.4 Reclaimed Water and Effluent Disposal	$8,000,000

1. Introduction

1.1 Background

The City of Port Orange is located in eastern Volusia County, see **Figure 2**. The City of Port Orange owns and operates a utility service which provides potable water, wastewater and reclaimed water services to residents and businesses within the City of Port Orange, Town of Ponce Inlet, portions of Daytona Beach Shores and unincorporated Volusia County. Port Orange has a municipal boundary encompassing approximately 29 square miles and a utility service area encompassing approximately 70 square miles. The current utility service area has a residential population of approximately 68,000, based on U.S. Census Tract data. Utility service area boundaries were clearly defined in a 1989 Inter-local Agreement with Volusia County. There are no pending issues regarding the service area delineation.

1.2 Justification and Need

The Port Orange Wastewater Treatment Plant (WWTP) was constructed in 1989. The treatment process and majority of the equipment currently in operation was installed approximately 34 years ago. Much of the equipment has either been re-built or upgraded; however most has reached or exceeded its useful life. The anaerobic-anoxic-aerobic (A^2O) process was advanced for its time, but new processes are available and new equipment and automation techniques can be implemented to improve treatment, efficiency and enhance reliability. The process conversion and upgrade project discussed within this document has been planned for nearly 10 years and are needed for the reasons listed below:

- Replace/upgrade equipment that has exceeded its useful life and provide for reliable WRF operation through end of the planning period.
- Continuously meet advanced wastewater treatment (AWT) criteria and effluent limits of 5-5-3-1 for Biological Oxygen Demand-Total Suspended Solids (BOD-TSS), Total Nitrogen (TN) and Total Phosphorus (TP) respectively.
- Improve operational efficiency, automation capabilities and accessibility.
- Rehabilitate structures, piping, valves, fitting and ancillary equipment.
- Replace outdated and or inoperable electrical and I&C systems.
- Construct a state of the art facility that can serve Port orange for the next 30+ years.

1.3 Flow Estimates

The City of Port Orange encompasses a service area of approximately 4.5 square miles and is bounded on the north by Daytona Beach, on the east by the Halifax River and the Atlantic Ocean, on the south by New Smyrna Beach, and on the west by unincorporated county area and Daytona Beach.

Recorded influent wastewater flow data provided by the City between January 2016 through September 2021 are presented in **Table 2** below.

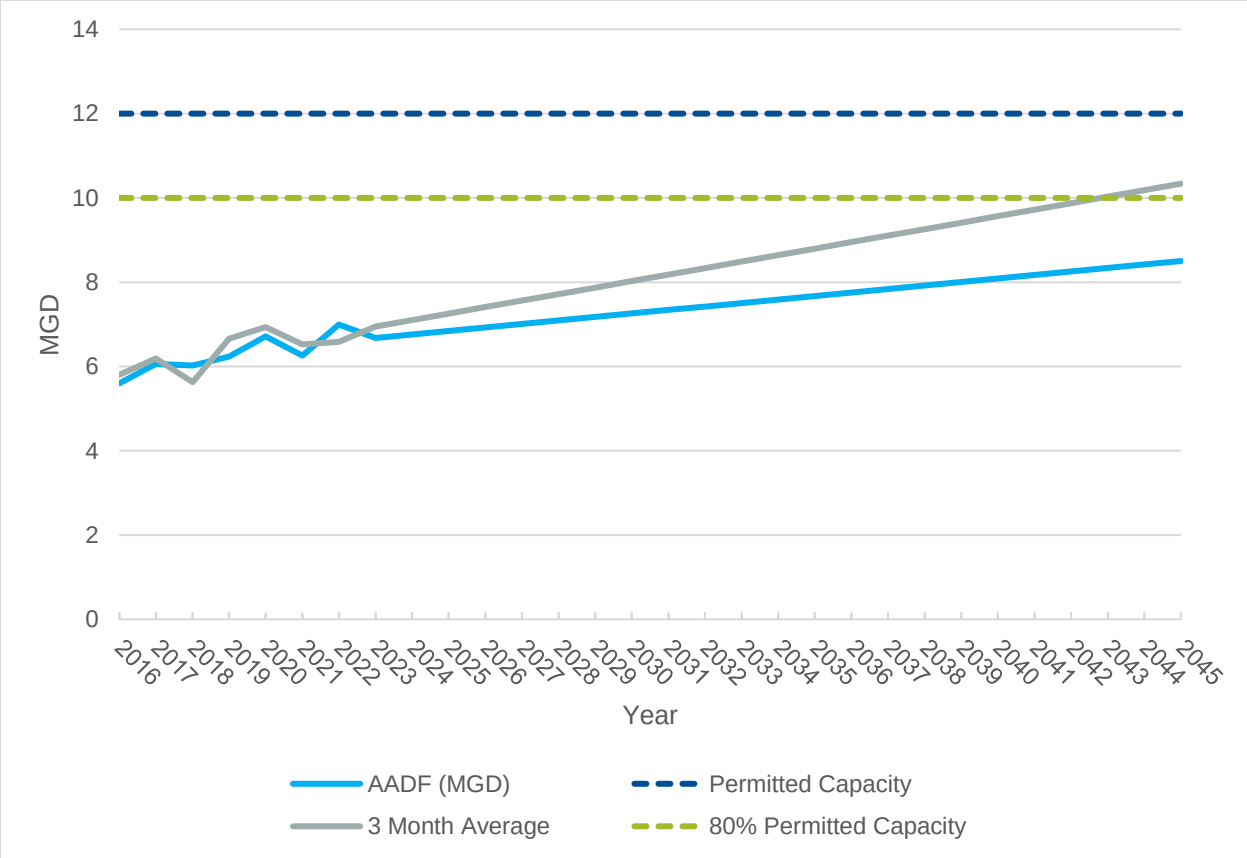
TABLE 2: INFLUENT WASTEWATER FLOW AND FLOW PROJECTIONS

Year	Average Annual Daily Flow	3 Month Average	Yearly Change
2016	5.60	5.80	
2017	6.06	6.19	8.25%
2018	6.02	5.63	-0.64%
2019	6.24	6.66	3.55%
2020	6.72	6.93	7.68%
2021	6.26	6.52	-6.84%
2022	6.99	6.59	11.77%
2023	6.68	6.95	-4.52%
2024	6.76	7.10	1.24%
2025	6.84	7.26	1.23%
2026	6.93	7.41	1.21%
2027	7.01	7.56	1.20%
2028	7.09	7.72	1.18%
2029	7.17	7.87	1.17%
2030	7.26	8.03	1.16%
2031	7.34	8.18	1.14%
2032	7.42	8.33	1.13%
2033	7.51	8.49	1.12%
2034	7.59	8.64	1.10%
2035	7.67	8.80	1.09%
2036	7.76	8.95	1.08%
2037	7.84	9.10	1.07%
2038	7.92	9.26	1.06%
2039	8.00	9.41	1.05%
2040	8.09	9.57	1.04%
2041	8.17	9.72	1.03%
2042	8.25	9.87	1.02%

2043	8.34	10.03	1.00%
2044	8.42	10.18	0.99%
2045	8.50	10.34	0.99%

The projected wastewater flows through 2045 are displayed in **Figure 3.** The projection is based on a historical trendline dating back to 2010.

FIGURE 3: PROJECTED WASTEWATER FLOWS



2. Existing Conditions

2.1 Description of Planning Area

2.1.1 Planning Area

The City of Port Orange is located in Volusia County south of Daytona Beach and north of New Smyrna Beach. The City of Port Orange is included within the area dubbed the “Fun Coast.” Located in the eastern part of Volusia County it borders along the Halifax River on the east. As of the American Community Survey (ACS) done in 2019 the population of the City is 64,842 and a total land area of 26.66 square miles. Port Orange is a coastal community that has two rivers, the Halifax and Spruce Creek. The Halifax River is an estuary.

The City owns and operates the R. Dwayne Huffman Reclaimed Water Plant located at 817 Oak St; Port Orange, FL, 32127, LAT. and LONG. (29.137351, -80.994504). The rated capacity for this plant is 12 MGD AADF. The public access reclaimed water produced is discharged to irrigation, wetlands, and the Halifax River. The sewage collected by the system includes the City of Port Orange, Town of Ponce Inlet, Daytona Beach Shores, and portions of the unincorporated surrounding area. The service area population is approximately 69,830. **Figure 4** displays the City of Port Orange’s service area.

Port Orange WWTP Facility Plan

FIGURE 4

"\\corp.meadhunt.com\sharedfolders\entp\100071\211394.01\TECH\GIS\PO WWTP Facility Plan.aprx"

2.1.2 Climate

The City of Port Orange has a climate that can be categorized as humid and sub-tropic. The summers are long, hot, and oppressive and the winters are short, windy, and partly cloudy. As detailed in **Figure 5** and in **Table 3**, the warmest months of the year are June, July, August, and September. During the months of October, November, January, February, March, April, and May the temperature is lower, it is less humid, and the rainfall numbers drop.

The windiest time of the year begins in September and lasts until May. The average wind speeds during this time range from 8.5 miles per hour to 10.4 miles per hour. During the periods of June to August the wind speeds decrease to a range of 6.5 miles per hour to 8.5 miles per hour. Wind direction varies throughout the year. From March to June the wind is primarily from the east. The wind direction changes from June to August, coming from the south. From September to February the wind blows from the north.

FIGURE 5: PORT ORANGE CLIMATE

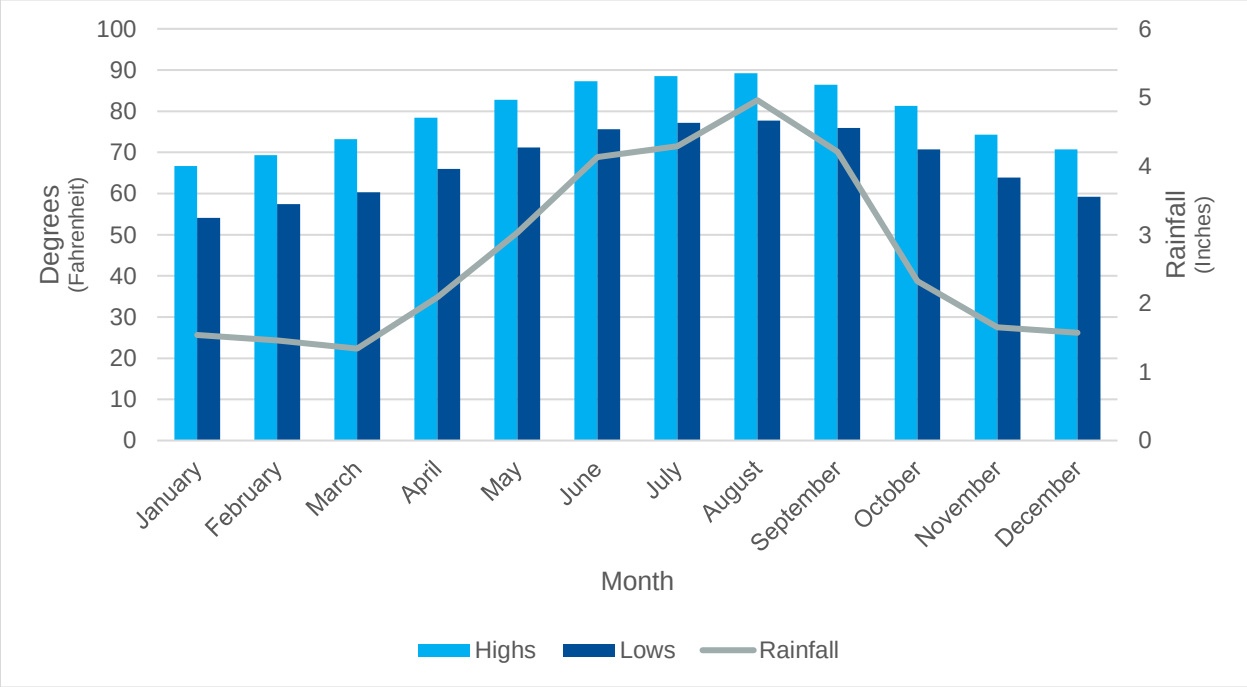

TABLE 3: CLIMATE BY THE NUMBERS

	Jan	Feb	March	April	May	June	July	August	Sept	Oct	Nov	Dec
Highs	66.7	69.3	73.2	78.4	82.8	87.3	88.5	89.2	86.4	81.3	74.3	70.7
Lows	54.1	57.4	60.3	66	71.2	75.6	77.2	77.7	75.9	70.7	63.9	59.2
Rainfall	1.54	1.46	1.34	2.09	3.03	4.13	4.29	4.96	4.21	2.32	1.65	1.57

2.1.3 Topography

The topography of the area is characterized by generally flat lands interspersed with pine forests,

wetland, and rivers. The area west of I-95 has an average elevation of 30-feet above sea level. Approximately one-half mile east of Nova Road the elevation begins to decrease to approximately eight feet over a distance of 3,000-feet and then remains level until the Atlantic Ocean. Different varieties of poorly drained sandy soils are found in the mainland region. Several varieties of well drained sandy soils are found in the beachside region.

2.1.4 Geology, Soils, and Hydrographic

The City of Port Orange is within the lower Atlantic Coastal Plan. The surface is covered with sandy marine sediments of Pleistocene to Recent age. The broad, nearly level marine terraces, relict shorelines, and karst ridges that characterize the landscape are of the Pleistocene age. The areas adjacent to the Atlantic Ocean and the St. Johns River are of more recent geologic origin.

The geologic material can be divided in an upper sequence of unconsolidated or poorly consolidated clastic deposits and a lower sequence of carbonate rocks. The upper surface of the rock unit dips eastward toward the coast at about three feet per mile. At the coast depth to rock is about 100-feet. At the eastern edge of the DeLand Ridge, the depth to rock is about 65-feet. The thickness of the clastic deposits varies from 50 to 100 feet under the DeLand Ridge because of differences in local relief.

2.1.5 Surface and Ground Water Hydrology

A thin clay layer, 60-feet below the surface, serves as an intermediate confining unit which hydraulically separates the potentiometric heads of the Upper Floridan Aquifer from the surficial aquifer system. Based on data obtained annually by St. Johns River Water Management District typical potentiometric water surface elevations of the Floridan Aquifer in the vicinity of the Central Recharge Wellfield, located outside of city limits within Volusia County on the Rima Ridge. Elevations in the area range from 20 to 30 feet NGVD (National Geodetic Vertical Datum). They hydraulic gradient is towards the northeast.

The source of water for the surficial aquifer is primarily local rainfall. Water is stored in the pore space of the soils. Water exits the surficial aquifer via downward leakance, horizontal flow to drainage ways and evapo-transpiration. The volume available for withdrawal from the Volusia Floridan Aquifer is dependent upon the surficial system.

2.1.5.1 Aquifer Identification

Ground water resources in the service area include the surficial and the Floridan Aquifers. The carbonate rocks of the lower sequence are limestone and dolomite of middle and upper Eocene age. These rocks are also known as the Floridan Aquifer. The surficial aquifer varies in depth from 50 to 100 feet from ground level and generally serves as a storage reservoir for percolating precipitation. The surficial aquifer recharges the Floridan Aquifer and is not used as a potable water source but is primarily used for irrigation purposes. Downward movement of slightly acid ground water has resulted in the formation of solution caverns that hold and transmit large quantities of water. About 95-percent of the area's freshwater supply for domestic and agricultural use comes from the Floridan Aquifer. The City operates 40 deep water wells and has a current capacity of 15 MGD and the water is in compliance with potable

water standards. The Garnsey Water Treatment Plant (WTP) is located on Wellfield Drive. The City has operated a reclaimed water system since 1986 and installed ground water monitoring wells in the surficial aquifer to monitor affects to the aquifer.

2.1.5.2 Aquifer Source Protection

The protection of the aquifer system is of prime importance to the City of Port Orange. As its sole source for potable drinking water, the sustainability and health of the system is critical to the residents. Well-draining recharge areas are known to be major areas of development and modification happens frequently. With development brings roads, roofs, and parking lots that make groundwater recharge difficult in those areas. Development also brings with it materials and supplies that can leech into the ground possibly contaminating the water supply.

The City has several measures established to prevent such contamination from occurring. Development is regulated within areas of any wellfield. The City has protocols set in place that prevent development at or near the Rima Ridge where the City's Recharge Wellfield is located. The City employs the use of best management practices (BMP), groundwater monitoring, conservative well spacing, reduction of public reliance, and prohibiting excavation projects from removing the confining layer. Wellhead protection measures are also in place to protect the aquifers from hazardous substances and contamination.

2.1.5.3 Recharge

Ground surface elevations in the Central Recharge Wellfield and corresponding water surface/surficial aquifer elevations range between 40 to 50 feet NGVD. As a result of the net downward gradient between the surficial aquifer and Upper Floridan, and leakance through the confining layer, the terrace and ridge areas provide some recharge to the Upper Floridan Aquifer. Recharge rates are estimated at 8 or 9 inches per year.

The confining layer of the thin clay, 60-feet below the surface, exhibits leakance and as such, promotes recharge. This characteristic is valuable as it renews water supplies withdrawn for consumption; however, leakance creates a hydraulic connection from the surficial aquifer to the Upper Floridan Aquifer. If contamination of the surficial aquifer occurs, it is possible to compromise the City's water supply.

2.1.6 Ecology

2.1.6.1 Environmentally Sensitive Areas or Features

2.1.6.1.1 Wetlands

The City of Port Orange is classified as an estuarine wetland with salt marshes, areas of freshwater wetlands associated with upper reaches of Spruce Creek, and areas of isolated freshwater wetlands in other scattered areas within the city.

Many of the salt marshes and the associated vegetation such as mangroves and seagrass beds are found in the Halifax River with salt marshes and vegetation also found in the areas along Spruce Creek, Rose Bay, and Strickland Bay where tidal influences are present. The majority of the inland freshwater

wetlands are isolated areas located along the western and southern borders of the city limits. Freshwater marshes occur in seasonally flooded depressions and along streams, creeks, lakes, and drainageways. The dominate plant growth is emergent water plants and water tolerant grasses and sedges. Few trees inhabit marsh areas except for low growing, water tolerant species such as the coastal plains willow. Marshes are well suited for wading birds and aquatic wildlife. Threatened or endangered species found in freshwater marshes are the Florida Sandhill Crane, the Snowy Egret, and the Silver Rice Bat. Occasionally, Bald Eagles inhabit freshwater marshes.

The vegetative communities perform important natural functions. Mangroves and estuarine marshes improve water quality, control erosion, and provide protection from storms by trapping sediments and debris, removing excess nitrogen and phosphorous nutrients, stabilizing shorelines, and buffering winds. Seagrass beds trap and bind sediments improving water quality and stabilizing the shoreline. The seagrass beds also provide food and protection for many kinds of juvenile fish.

The mangroves provide a perfect habitat for many types of fish, crustaceans, and birds. Several species of the birds that frequent mangroves in Volusia County are threatened or endangered such as the Snowy Egret, the Brown Pelican, the Roseate Spoonbill, and the Least Tern.

2.1.6.1.2 Flora and Fauna

Port Orange has a variety of plants and animals that inhabit the area. The pine woods vegetative community is dominated by the slash pine and includes pine flatwoods. These trees form the highest layer of vegetation above the ground and the floor is usually covered by palmetto bushes. Threatened or endangered wildlife found in the pine flatwoods are Gopher Frog, the Gopher Tortoise, and the Indigo Snake. In addition, nesting Bald Eagles and Osprey are also found in these communities.

Improved pasture sites are 75 to 95 percent of open grasslands with few scattered trees. Few native wildlife species inhabit these areas because of the lack of available food. Common garden varieties of birds, such as the house sparrow and starling makeup the majority of wildlife in these areas.

2.1.6.1.3 Endangered and Threatened Species

There are several mammals, birds, amphibians, and reptiles listed as endangered, threatened, or species of special concern that nest, breed, feed, or winter in the Port Orange area. **Table 4** is a list of the more commonly known species.

TABLE 4: COMMON ENDANGERED AND THREATENED SPECIES OF VOLUSIA COUNTY

BIRDS	
American Oystercatcher	Limpkin
Bald Eagle	Red-cockaded Woodpecker
Brown Pelican	Snowy Egret
Florida Sandhill Crane	Southeaster Kestrel
Least Tern	Tri-colored heron
Little Blue Heron	Wood Stork

MAMMALS	
Florida Black Bear	Shermans Fox Squirrel
Florida Mouse	Western Indian Manatee
Florida Panther	

AMPHIBIANS AND REPTILES	
Gopher Frog	American Alligator
Gopher Tortoise	Indigo Snake
Atlantic Salt Marsh Water Snake	Florida Pine Snake

2.1.7 Flood Plain

The City of Port Orange has flood plains associated with the Halifax River, Spruce Creek, and the tributaries to these waterways. A large portion of the flood plain associated with the Halifax River has been developed. The majority of the flood plan associated with Spruce Creek remains undeveloped.

2.1.8 Archeological and Historic Sites

According to the National Parks Service (NPS) and the US National Register of Historic Places, there are six areas of historic significance within the City of Port Orange. At one point in time, there were seven; however, the Halifax Drive Historic District was removed from the list on January 29, 2009. **Table 5** provides the listing of all six locations.

TABLE 5: ARCHEOLOGICAL AND HISTORIC SITES

Ref #	Property Name	Street & Number	Listed Date
98000055	Dunlawton Avenue Historic District	Roughly along Dunlawton Ave. to Lafayette Ave., and Orange Ave. and Wellman St.	2/5/1998
73000606	Dunlawton Plantation-Sugar Mill Ruins	W of Port Orange off Nova Rd.	8/28/1973
93000563	Gamble Place Historic District	1819 Taylor Rd.	9/29/1993
98000058	Grace Episcopal Church and Guild Hall	4100 Ridgewood Ave.	2/5/1998
98000057	Port Orange Florida East Coast Railway Freight Depot	415C Herbert St.	2/5/1998
90001761	Spruce Creek Mound Complex	Address Restricted	12/3/1990

2.1.9 Air Quality

According to EPA, Volusia County is classified as an area of attainment with respect to the National Ambient Air Quality Standards for all of the criteria air pollutants. In 2020, there were 366 days recorded with 331 “Good” days, and 35 “Moderate” days (**Figure 6**). The majority of the pollution indicated during the year was Ozone, followed by Fine Particulate Matter of 2.5 microns or less in diameter. The Air Quality Index (AQI) Max is the highest daily value in the year. The AQI 90th %ile is the 90 percent of daily AQI values during the year were less than or equal to the 90th percentile value. The AQI Median is half of daily AQI values during the year were less than or equal to the median value, and half equaled or

exceeded it.

The proposed improvements in this Facility Plan will not have any impact to permitted facilities, will not require any air permitting, and will not have any effect on the “attainment” status. The improvements will comply with the various Florida Department of Environmental Protection (FDEP) air resource management regulations including Chapters 62-4, 62-204, 62-210, 62-212, 62-213, 62-214, 62-242, 62-243, 62-252, 62-256, 62-257, 62-281, 62-296, and 62-297 of the Florida Administrative Code.

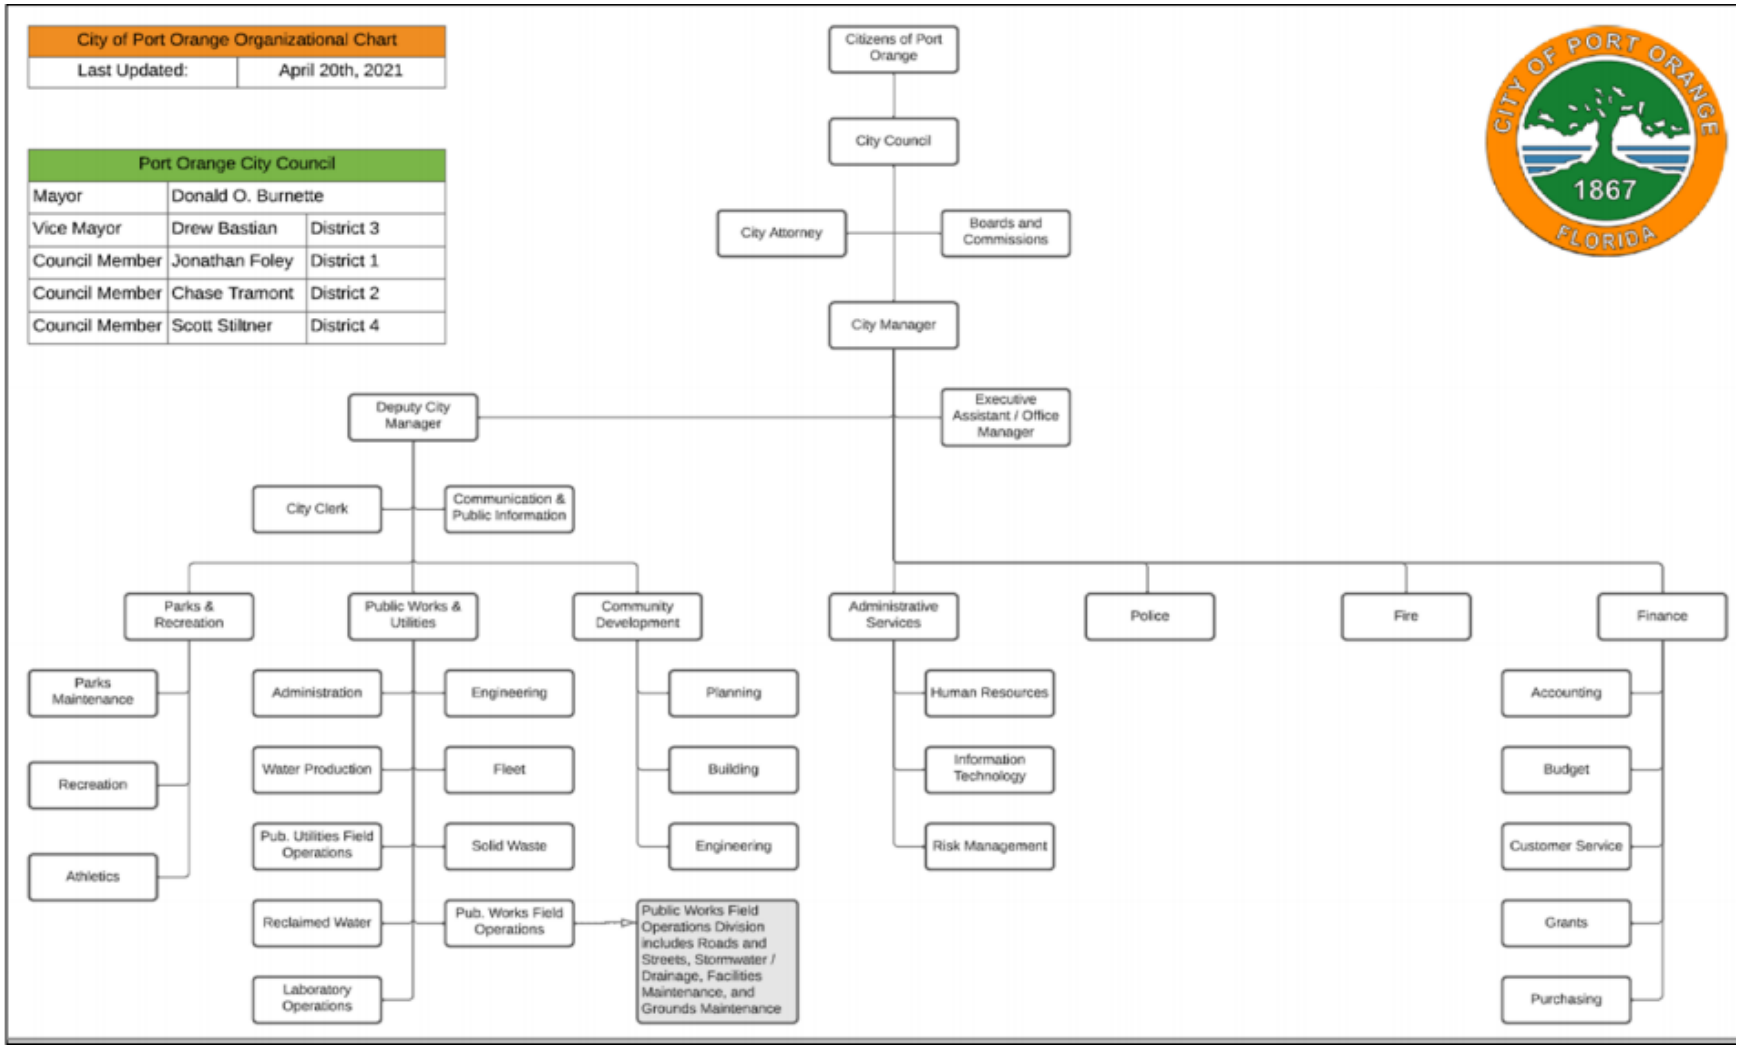
2.1.10 Organization

The City of Port Orange operates under the council-manager form of government with a City Council consisting of the Mayor and four other members. The Mayor and Council members are non-partisan and elected to serve four-year staggered terms. The Council is the governing board and has legislative responsibilities, including setting policy, adopting ordinances and resolutions, adopting an annual millage rate and budget, appointing committees, and appointing both the City Manager and City Attorney. The City Manager is responsible for carrying out the governing body's policies and ordinances, overseeing the City's day-to-day operations, and appointing the heads of various departments. **Figure 7** displays the City’s Organizational Chart.

FIGURE 7: CITY OF PORT ORANGE ORGANIZATIONAL CHART



2.2 Socio-economic Conditions

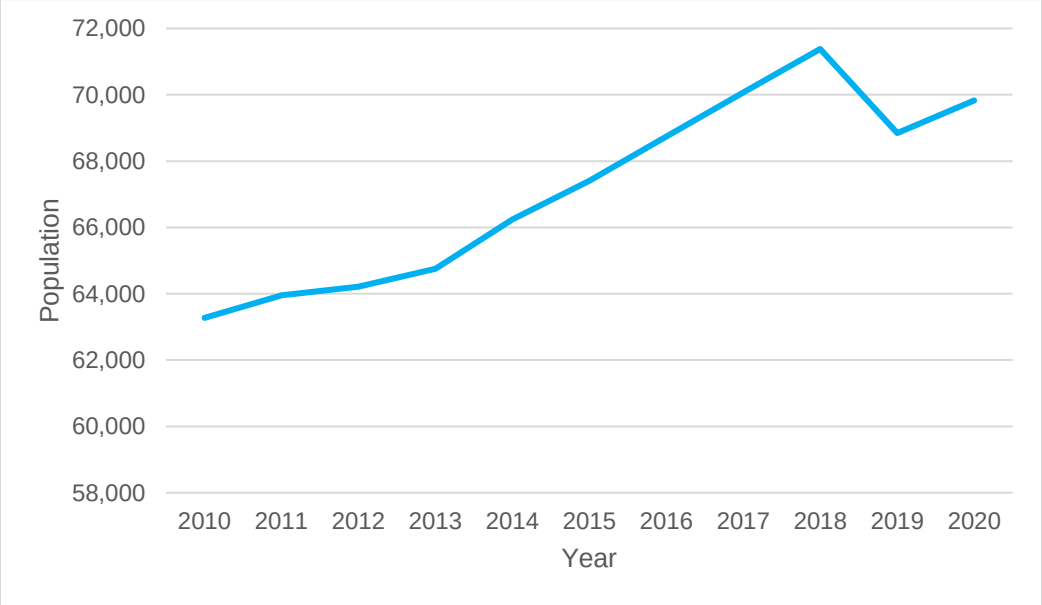
2.2.1 Population

The service area population of Port Orange has fluctuated over the past 10 years. From 2010 to 2011 the population increased by a percent difference of 1.20 percent. However, over the next two years the population continued to climb, but not at the rate seen between 2010 and 2011. From 2014 to 2017 the percent difference climbed considerably to almost 2 percent growth, to 2.66 percent growth. Over these past three years from 2018 to 2020 the rate of growth is decreasing, but the population totals are still climbing. **Table 5** displays the historical service area population.

TABLE 6: PORT ORANGE SERVICE POPULATION

Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020
Population	63,273	63,955	64,217	64,753	66,237	67,406	68,740	70,075	71,380	68,842	69,830
Difference		682	262	536	1,484	1,169	1,334	1,635	1,005	-2,538	988
Percent Change		1.11%	0.41%	0.83%	2.24%	1.73%	1.94%	1.91%	1.83%	-3.69%	1.41%

FIGURE 8: 2010 TO 2020 PORT ORANGE SERVICE AREA POPULATION



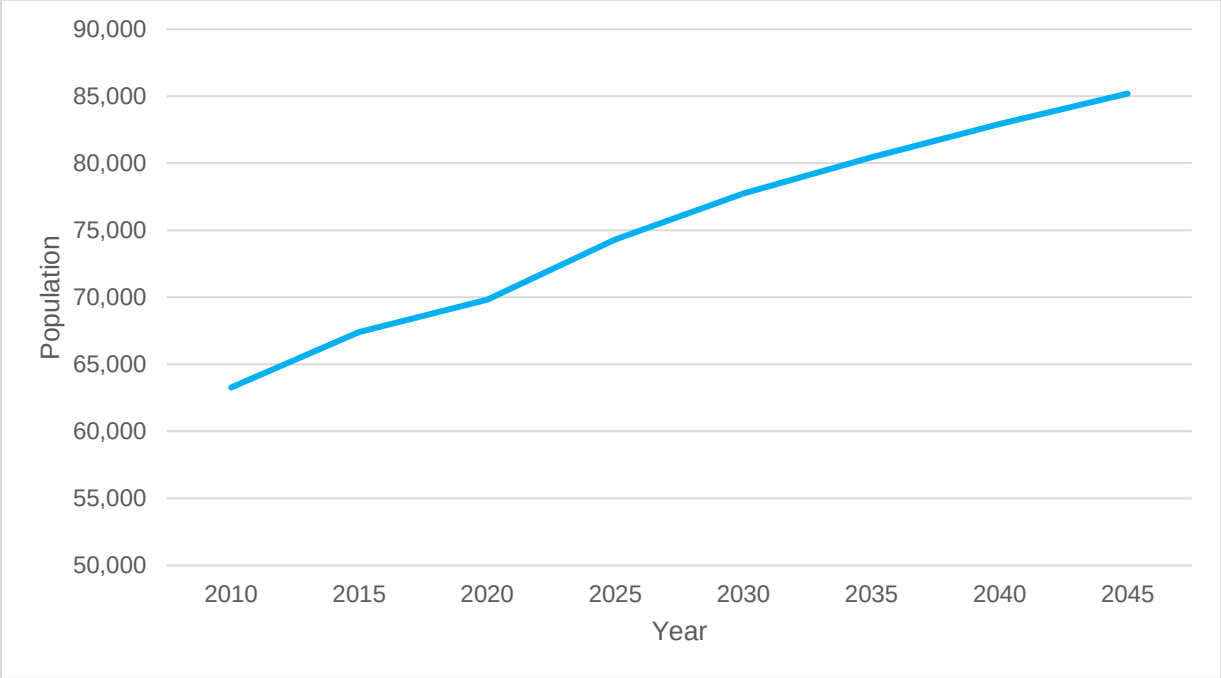
The service area population of Port Orange is expected to keep growing. Based on estimates and projections provided by Shimberg Center for Housing Studies, based on 2000 and 2010 U.S. Census data and population projections by the Bureau of Economic and Business Research (BEBR), University of Florida (UF) the population is expected to grow by approximately 1% per year. The data provided shows

the population estimates in increments of 5 years starting at 2020.

TABLE 7: PROJECTED PORT ORANGE POPULATION

Year	2010	2019	2020	2025	2030	2035	2040	2045
Population	63,273	68,842	69,830	74,302	77,747	80,452	82,922	85,193
Difference		5,569	988	4472	3,445	2,705	2,470	2,271
Percent Change		8.1%	1.4%	6%	4.4%	3.4%	3%	2.7%
Percent per Year				1.2%	0.88%	0.68%	0.60%	0.54%

FIGURE 9: 2010 TO 2040 PROJECTED PORT ORANGE POPULATION



2.2.2 Economy

The City of Port Orange is home to Thompson Pump and Manufacturing as well as another large company, Raydon Corporation. In 2010, the Raydon Corporation moved its headquarters and all operations to the City. The Raydon Corporation is a simulation training defense contractor.

Property tax values escalated by 8.3% by the end of 2020 fiscal year. The City's business district is expected to maintain its current occupancy rate with various stores, specialty shops, and commercial businesses. Residential growth is stable. Development and construction are anticipated to remain steady based upon local and regional population growth.

2.2.3 Land Use and Development

Over the past 20-years the City of Port Orange has focused its land use on growth and vitality. Now, as

the community has grown, the City's Comprehensive Plan has moved beyond growth to pursue its next endeavor, sustainability. Sustainability is focus on neighborhoods and marketplaces, on parks and civic space, on places and spaces. The foundation of a sustainable community is driven by land use, mobility, people, energy, and environment.

The City's plan to is to promote energy efficiency with a wide range of ideas. The City would like to support an increased growth in pedestrians, bicycles, and transit that reduces greenhouse gas (GHGs) emissions. The land use pattern that they City has developed is to foster the health, safety, and welfare of the residents of Port Orange. The environment is a crucial element to a sustainable community. By protecting the air, water, forests, and natural resources by preserving the significant areas and open space. The City will coordinate the intensity of future development with natural constraints such as topography, soils, floodplains, wetlands, and wildlife habitats. Increasing the job opportunities and providing for commercial and industrial development aids in the economic health of the City, needless to say an increase in the per capita income and convenience for its residents. Augmenting the functional mix of living, working, shopping, and recreational activities provides for energy-efficient land use patters, compact development, urban infill, and redevelopment and supports a multi-modal transportation system.

2.3 Wastewater Collection, Treatment, and Effluent Disposal

2.3.1 Treatment Process Description

The treatment process at the WWTP consists of the following unit processes:

1. Influent Pumping
    a. East Master Lift Station (EMLS)
    b. West Master Lift Station (WMLS)
2. Influent Structure/Headworks
3. A^2O Structure
4. Secondary Clarifiers
    a. Return activated sludge (RAS) and waste activated sludge (WAS) Pumps
5. Deep Bed Filters/Denitrification Reactors
6. Re-aeration/Chlorine (Cl_2) Contact/De-chlorination
    a. Transfer/Outfall Pumps
7. Reclaimed Water Recharge Reservoir and Pump Station
8. Sludge Holding Tanks
    a. Sludge Thickener
9. Belt Filter Presses
10. Reclaimed Water Storage and Pumping
11. Operations and Control Building

Figure 10 displays a site plan with the individual processes labeled. Reclaimed Water Recharge Reservoir and Pump Station is not labeled as neither are located at the WWTP site.

2.3.1.1 Influent Pumping

Raw sewage entering the plant flows to one of two master lift stations (MLS), East and West (EMLS and WMLS). The pump stations discharge into a common 36” diameter header feeding the influent structure. A single magnetic flow meter records influent flow from both pump stations, and in-house process water that gravity flows to the EMLS and WMLS.

There are a total of five (5) influent pumps, each on variable frequency drives rated for 5,200 gallons per minute (gpm). With one of the influent pumps out of service, the combined capacity is 20,800 gpm. The EMLS has three (3) pumps, the WMLS has two (2). The hydraulic peaking factor used in the design of the system facilities is 2.0 x average daily flow (ADF) or 16,670 gpm (24 MGD).

Influent Structure/Headworks

Raw sewage is pumped into the elevated influent structure. Two mechanical bar screens, 3 mm stepscreens, in parallel remove rags and plastic from the influent stream. The screens are designed to capture all particles larger than 3 mm and process 1.6 cubic yards of material per hour.

Flow from the screens enters the centrifugal grit removal "Teacups". The four (4) teacups have a rated capacity of 24.0 MGD. A bypass weir passes all flow exceeding 24.0 MGD. The Teacups were originally designed for 90+% grit removal at design flows. **Figure 11** displays the influent structure.

FIGURE 11: INFLUENT STRUCTURE

2.3.1.2 A^2O Treatment Structure

The City of Port Orange WWTP has an anaerobic-anoxic-aerobic (A^2O) treatment process for biological treatment which removes nitrogen and phosphorous from wastewater. Treated influent and RAS enters the anaerobic mixing zones and flows through to the anoxic mixing zones where it is blended with internal recycle flow from the last oxic zone. Blended mixed liquor is aerated by fine bubble diffused aeration in the oxic zones prior to secondary clarification.

At design flow rates the process achieves 95% BOD reduction and reduces soluble NOx and phosphorous levels to 10.0 and 1.0, respectively. Internal recycle capacity for each train is 200% of ADF with one pump out of service. **Figure 12** shows an overview of the biological nutrient reduction (BNR) structure.

FIGURE 12: A2O TREATMENT STRUCTURE

2.3.1.3 Secondary Clarifiers

Flow from the oxic zones is directed to one of four (4) clarifiers. All clarifiers are 80 feet diameter circular structures with a 12-foot sidewater depth. The surface loading rates for each are approximately 600 gallons per day (gpd) per square foot under average daily flow conditions. The central stilling wells in the clarifier enhance sludge settling properties.

Return sludge and waste sludge pumping is accomplished at two (2) locations. Each pair of clarifiers is served by three (3) RAS pumps and two (2) WAS pumps. The return sludge capacity is 2,100 gpm, with

one pump out of service. This capacity represents a 50% return sludge rate under design flow conditions. **Figure 13** displays the existing secondary clarifiers.

FIGURE 13: EXISTING CLARIFIERS

2.3.1.4 Deep Bed Filters/Denitrification Reactors

Clarified effluent flows by gravity to the deep bed filtration units. Six (6) filter bays with mixed media and supplemental carbon feed facilities provide for suspended solids reduction and effluent nitrate reduction.

The surface loading rate for each of the filters is 2.48 gpm per square foot. The filters are designed for continuous operation and have automatic controls for backwash and "bump" cycles.

One supplemental carbon feed pump is in place for supplemental carbon feed. Supplemental carbon is fed prior to filtration and acts as a carbon source to drive the reduction of effluent nitrate. The filters are capable of producing effluent with total $NO_x \leq 3.0$ milligrams per liter (mg/L). The current permit does not limit TN ≤ 3.0 mg/L; therefore, a target TN = 6.0 mg/L is typically achieved. **Figure 14** shows an aerial of the deep bed filters. The City is currently preparing design plans to upgrade the filters and controls.

FIGURE 14: DEEP BED FILTERS

2.3.1.5 Re-aeration/Chlorine Contact/De-chlorination

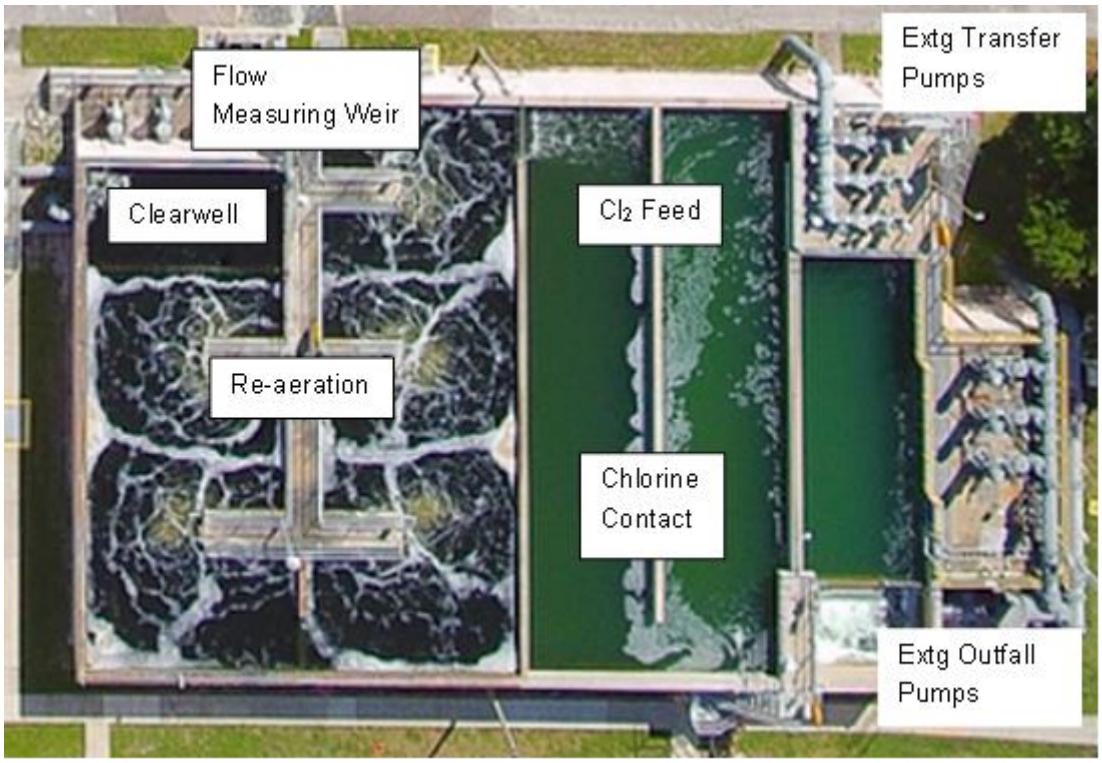
The existing clearwell is an 11.5_l feet (ft) x 14_w ft x 11.5_d ft rectangular basin. The deep bed filter effluent is pumped to the clearwell using four (4) 5,600 gpm clearwell feed pumps. The water in the clearwell spills over a weir into the reaeration basin.

Five (5) submersible aerators are in place to elevate soluble dissolved oxygen levels. Reaeration chamber volume is 47,000 cubic feet, hydraulic detention time is 42 minutes.

The chlorine contact chamber volume is 45,000 cubic feet, hydraulic detention time is 40 minutes, under average daily flow conditions and 20 minutes at peak daily flow (PDF). High level disinfection is provided for public access reuse (PAR) production. The liquid sodium hypochlorite is paced by flow meters. **Figure 15** shows an aerial of the clearwell/re-aeration/chlorine contact basins.

The City has two outfalls for effluent disposal: the Halifax River and the Lakes. Outfall to the Halifax has a pumped capacity of 24 MGD and a gravity capacity of 9 MGD. Effluent transmission to the lakes is approximately 8 MGD via an existing 24” force main.

FIGURE 15: CLEARWELL/CHLORINE CONTACT/DE-CHLORINATION BASIN



2.3.1.6 Reclaimed Water Recharge Reservoir and Pump Station

The City of Port Orange owns and operates a reclaimed water reservoir storage and pump station facility. The reservoir provides aquifer recharge, seasonal reuse storage, wetland outfall and filtration for reuse recovery. The facility includes the following:

- Two (2) reclaimed water recharge/storage reservoirs, 175 acres of total area, 180 million gallon (MG) total volume at 3-foot depth
- 6,000 gpm high service reuse pump station building
- 3 MG ground storage tank
- On-site reclaimed filtration and disinfection facility

Figure 16 exhibits the reclaimed water reservoirs.

FIGURE 16: RECLAIMED WATER RECHARGE RESERVOIR

2.3.1.7 Sludge Handling

WAS is removed from the treatment process on a daily basis in order to manage sludge age. Calculations for volume of WAS removed from the process are provided below:

Port Orange operates three (3) aerated sludge holding tanks. Each has a capacity of 120,500 cubic feet, the total volume available is 361,500 cubic feet or 2,704,000 gallons (gal). Typical WAS concentration is approximately 1.0% (±).

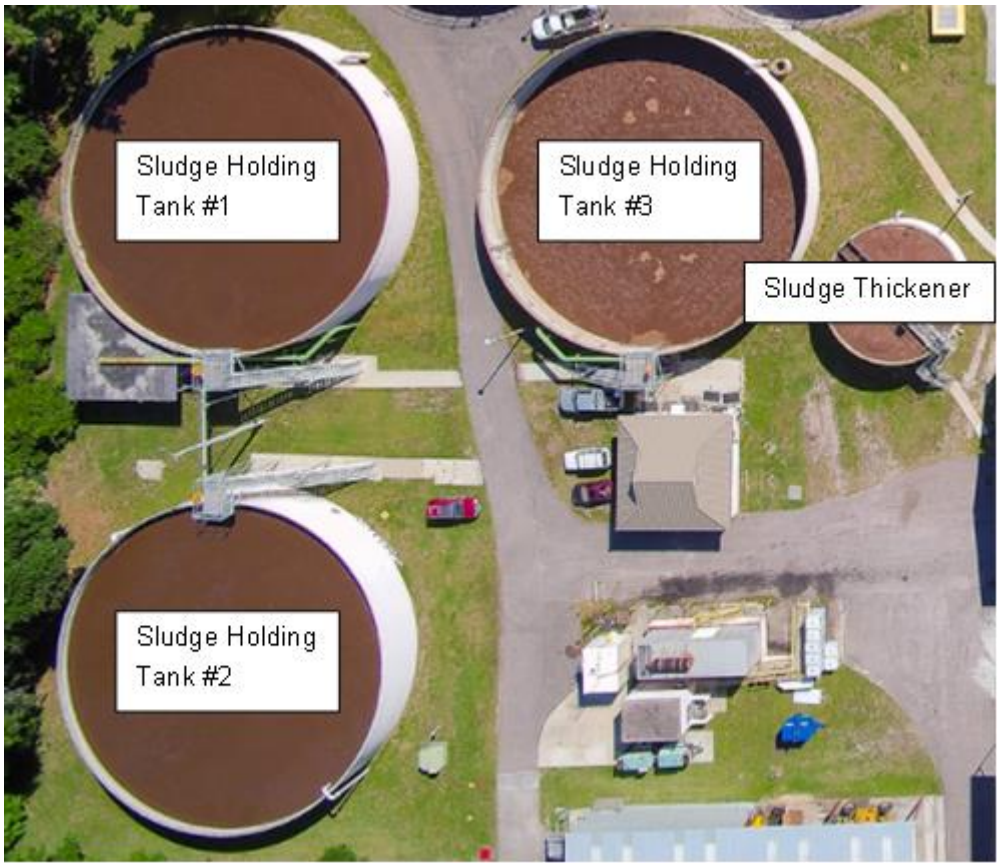
Each aerated holding basin has coarse bubble air diffusers, which provide mixing and aeration for digestion. The biosolids are aerated by three blowers: (2) 150 horsepower (hp) and (1) 100 hp. The combined capacity of the aerated holding tanks provides approximately 9.0 days of storage volume.

Biosolids are transferred from the three holding tanks to the sludge thickener where the sludge is allowed to settle by gravity, assisted by occasional pulses of air, and is decanted to approximately 2% solids content. Decanting is not performed in the three primary aerobic digesters.

The thickener is 40 ft diameter with a side water depth of 15.0 ft. The thickener can hold 141,000 gal or which represents a minimum of 0.5 days storage. Decanted sludge is then pumped to the belt filter presses.

Figure 17 shows the three (3) sludge holding tanks and the sludge thickening tank.

FIGURE 17: SLUDGE HOLDING TANKS AND THICKENERS



2.3.1.8 Belt Filter Presses

Five (5) belt filter presses are available for use at the sludge press facility. Each press is fed by a variable speed progressing cavity pump and an emulsion polymer mixing unit. All components are controlled by the press control panels.

The five (5) belt presses onsite are capable of dewatering the biosolids to 13-15% solids content. The dewatered biosolids are loaded into a dump truck for hauling and disposal. The truck provides the following storage capacity:

120,000 gpd (2%/14%) = 17,143 gpd @ 14%
Truck Volume: 40 cubic yard (CY) (27 ft^3/CY) (7.48 gal/1 ft^3) = 8,078 gal

The City has at least two (2) sludge truck on site at all times. Each truck provides 0.5 days of biosolids storage.

Figure 18 shows a picture of the belt filter presses.

FIGURE 18: BELT FILTER PRESS

2.3.1.9 Reuse Storage, Pumping and Effluent Discharge

The City of Port Orange WWTP site has reclaimed water storage and high service pumping. The site components include:

- 3 MG ground storage tank at the WWTP
- 9,000 gpm high service pump station
- 3 MG GST & 6,000 gpm pump station at Williamson Blvd.

The City currently utilizes three (3) 8,300 gpm pumps to transfer effluent to their on-site ground storage tank. These pumps also have the ability to discharge effluent to the Halifax River. **Figure 19** shows an aerial of the WWTP's ground storage tank and high service pump station building.

The WWTP is currently permitted to discharge upto 24 MGD to Halifax river via its existing 24-inch outfall discharge pipe. The existing outfall pipe can handle upto 9 MGD by gravity flow. When flows exceed

9 MGD, the three (3) outfall transfer pumps can convey 24 MGD via the 24-inch forcemain to the river.

FIGURE 19: HIGH SERVICE PUMP STATION AND STORAGE TANK

2.3.2 Physical Condition and Treatment Efficiency

This section addresses the physical condition and treatment efficiency of the unit processes at the Port Orange WWTP and identifies components needing upgrades/replacement.

2.3.2.1 Influent Pumping

The Port Orange WWTP has two (2) master lift stations (MLS), the EMLS and WMLS. The WMLS was rehabilitated in 2012.

COMPONENT's	EAST MLS	WEST MLS
Structure	Good	Good
Pumps	Poor	Fair
Electrical	Poor	Poor
Instrumentation	Fair	Fair
#/Capacity (All on variable frequency drives (VFD's))	Three (3) Pumps, each rated @ 5,200 gpm	Two (2) Pumps, each rated @ 5,200 gpm
Treatment Efficiency	All pumps experience somewhat frequent clogging due to rags requiring maintenance attention.	

Design is complete for replacement of all pumps, valves, and fittings in the EMLS. Construction will commence in 2023. Replacement of influent pumps, valves, piping, and related equipment in the WMLS pump station is recommended. Primary screening upstream of both the EMLS and WMLS is also evaluated herein.

2.3.2.2 Influent Structure/Headworks

The influent structure accepts flow from both MLS's. The influent structure includes self-cleaning bar screens and centrifugal grit removal equipment. The City replaced the bar screens in 2020.

The headworks is served by an Activated Carbon Odor Control system that was rebuilt in 2011. The grit "Teacups" are in poor condition with interior failures and exterior rust. Both bar screens and the control panel were replaced in 2020. A new belt for the grit "snail" was replaced in 2016.

COMPONENTS	CONDITION
Structure	Good
Barscreens, (2 each)	Good
Grit "Teacups", (4 each)	Poor
Grit "Snail"	Fair
Odor Control	Good
Electrical	Fair
Instrumentation	Poor
Capacity	16,667 gpm
Treatment Efficiency	Removes rags, plastic, and grit particles

2.3.2.3 A^2O Process

The biological nutrient removal process consists of two (2) parallel 6 MGD process trains. Each train consists of three (3) anaerobic mixing zones, three (3) anoxic mixing zones and eight (8) oxic aeration chambers.

COMPONENTS (per Train)	NORTH TRAIN	SOUTH TRAIN
Structure	Fair	Fair
Mixers, (6) 5hp	Fair	Fair
Aeration: (3) 150 hp Blowers + Fine Bubble Diffusers	Good	Good
I.R. Pumps, (3)	Poor	Poor
Electrical	Fair	Fair
Instrumentation	N/A	N/A
Capacity	6 MGD	6 MGD
Treatment Efficiency	95% BOD reduction, nitrogen & phosphorous reduction	

Multiple BNR process conversion technologies to achieve TN and TP reduction below 3.0 mg/L and 1.0 mg/L biologically within the BNR structure will be evaluated in the next section. Replacement of mechanical mixers with parabolic, non-fouling mixers, in tank aeration equipment with process specific diffusers and aeration, and existing weir gates and sluice gates is recommended. Evaluation of centrifugal blowers with hybrid positive displacements (PD's) vs. variable speed turbo blowers is recommended. Installation of nutrient analyzers capable of analyzing effluent stream from both process trains is recommended.

2.3.2.4 Secondary Clarifiers

Each process train is served by two (2) clarifiers. Train #1, North, is served by clarifiers #1 and 2. Train #2, South, is served by clarifiers #3 and 4. The North clarifiers were rehabilitated in 2012.

COMPONENT	CLARIFIER #1	CLARIFIER #2*	CLARIFIER #3	CLARIFIER #4*
Structure	Good	Good	Good	Good
Drive Mechanism	Fair	Fair	Fair	Fair
Collection Mechanism	Fair	Poor	Poor	Fair
Weirs & Launders	Fair	Fair	Good	Fair
Electrical	Good	Good	Poor	Poor
Capacity	3 MGD	3 MGD	3 MGD	3 MGD

*Clarifier was not in use during inspection

Replacement of ported sludge collection system with spiral blade system and scum troughs with full length skimmers and troughs is recommended. Evaluation of submerged weirs vs. fiberglass weir covers is recommended.

2.3.2.5 RAS and WAS Pumping

The RAS. and WAS pumping is in generally good condition. The second RAS pump in the south train was recently replaced. The first and third RAS/WAS pumps are planned to be replaced.

CONDITION	NORTH TRAIN	SOUTH TRAIN
Structure	Good	Good
R.A.S. Pumps, (3) 7.5hp	Poor	Good/Poor*
Capacity	1050 gpm each	1050 gpm each
W.A.S. Pumps, (2) 3.0hp	Fair	Fair
Capacity	250 gpm each	250 gpm each
Electrical	Fair	Poor
Instrumentation	Poor	Poor

*There is one new ‘chopper’ style pump in good condition

Replacement of existing RAS and WAS pumps, valves, piping, and flow meters is recommended.

2.3.2.6 Deep Bed Filters/Denitrification Reactors

The City operates six (6) parallel deep bed filters. The filter structure is equipped with automatic bump, backwash and chemical feed facilities. The facility previously used methanol to feed filter influent for denitrification and has recently switched to glycerin for this purpose. Media is added on an as-needed basis.

COMPONENTS	CONDITION
Structures	Good
Piping & Valves	Poor
Blowers, (3)	Good
Backwash Pumps, (2)	Good
Dirty Backwash, (2)	Poor
Electrical	Fair
Instrumentation	Fair

It is recommended to decommission and abandon methanol feed systems in conjunction with BNR upgrades. Replace existing flow meters, level sensors and ancillary devices. Replace filter media, pumps, and blowers. Construct covers for filter structure to reduce algae growth and associated maintenance. Construct elevated walkways connecting filter structure to chlorine contact chamber (CCC) and clarifiers #1 through #4.

2.3.2.7 Disinfection and Transfer

Flow from the deep bed filters is directed to the clearwell and reaeration chamber. Submersible aerators elevate dissolved oxygen levels prior to chlorine contact and transfer to the reuse storage tank. All flow not transferred to reuse is dechlorinated prior to discharge to the Halifax River.

COMPONENTS	CONDITION
Structures	Good
Clearwell Pumps, (4)	Poor
Aerators, (5)	Good
NaOCl Equipment: (3) diaphragm pumps	Good
$NaHSO_3$ Equipment: (2) diaphragm pumps	Good
Transfer Pumps, (3) 40hp	Poor
Electrical	Fair
Instrumentation	Good
Outfall/Transfer Pumps, (3) 75hp	Fair

It is recommended to replace clearwell transfer pumps, replace submersible aerators, replace all flow meters, level sensors, chlorine analyzers and ancillary devices. Replace bi-sulfite feed and distribution equipment as necessary. Evaluate and replace existing outfall and transfer pumps as necessary. Evaluate covers to reduce maintenance and CL consumption.

2.3.2.8 Reclaimed Water Storage and Pump Station

A 3 MG ground storage tank is located at the treatment plant site. The interior of the tank was inspected in 2012. There is no indication of current or historical leaks.

COMPONENTS	CONDITION
Structures	Good
Pumps: (1) 350hp + (3) 250hp	Good
Capacity: (1) xxx gpm + (3) xxx gpm	Fair
Electrical	Poor
Instrumentation	Fair

It is recommended to prepare recommendations for replacement of existing high service pumps, VFD's and related equipment, as necessary. Evaluate the existing storage tank and ancillary equipment. Prepare planning level designs and cost estimates for installation of VFD's at the reclaimed water reservoir site. Prepare conceptual designs and cost estimates for a 2nd storage tank at the reservoir site, install a flow meter for tank discharge into Lake A. Evaluate existing filtration and chemical feed systems at reclaimed reservoir.

2.3.2.9 Sludge Handling Facilities

The City operates three (3) aerobic digesters, a gravity thickener and five (5) mechanical belt presses for sludge dewatering. All biosolids are transferred for further treatment to a contracted biosolids treatment facility (BTF) which is permitted by FDEP. The belt press structure was rehabilitated in 2009. The digesters were cleaned in 2016.

Digesters

COMPONENTS	CONDITION
Structures	Good
Mechanical Piping	Good
Blowers, (2) 150hp + (1) 100hp	Poor
Transfer Pumps (2) (to Thickener)	Fair
Electrical	Poor
Instrumentation	N/A

It is recommended to evaluate the current sludge digestion and thickening practices and prepare recommendations for future sludge management practices. Evaluate replacement of blowers, aeration grids and ancillary equipment in conjunction with digester assessment. Replace all VFD's, motor starters and ancillary devices. Remove and replace existing blower enclosure. Relocate blower electrical equipment to a new structure.

Aerated Thickener

COMPONENTS	CONDITION
Structures	Good
Aerator	Good
Electrical	Poor
Instrumentation	N/A
Treatment Efficiency	Thickens sludge to 2% solids

Dewatering Facilities

The City of Port Orange WRF operates 5 belt presses, thickening sludge to approximately 15% solids. All 5 belt presses were rebuilt in 2007.

COMPONENTS	CONDITION
Structures	Fair
Feed Pumps	Good
Pipes	Poor
Belt Presses*, (5)	Fair
Sludge Pumps, (5)	Fair
Polymer Pumps, (5)	Fair

The belt filter presses are greater than 20 years old. Replacement of (5) existing with (4) new belt filter presses or screw presses is recommended. Replace all VFD's, meters, sensors, and ancillary systems.

3. Alternatives Evaluation and Selection

3.1 Approach

All major processes being considered shall be evaluated and three (3) alternatives will be developed to maximum extent possible. The alternatives will include a “No Action” alternative where applicable.

The evaluation will include process design comparisons with cost estimates for each alternative. An evaluation matrix will be developed to summarize the comparison and recommendation of preferred alternative. The evaluation matrix will include the following criteria:

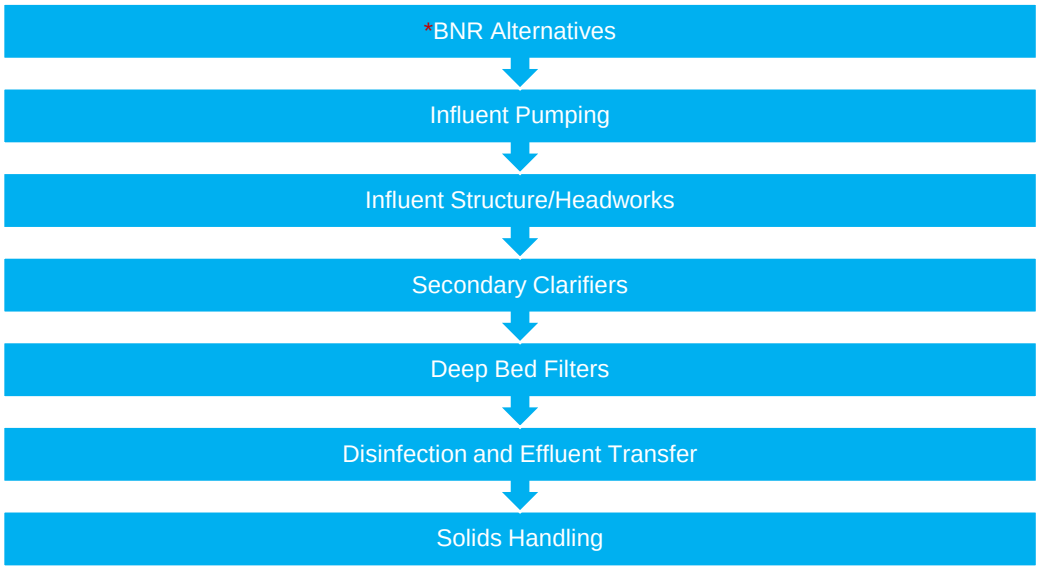
- Cost – This criterion involves comparing total cost of construction (with present worth analysis) for the required process. The scoring scale is between 1-3 with 3 being the lowest cost option and 1 being the highest cost option

- Compatibility - This criterion measures the complexity of operating an existing process while modifications/upgrades are made at the WWTP to switch to the new process. The scoring scale is between 1-3 with 3 being the least complex option and 1 being the most complex option.

- O&M/ Reliability - This criterion compares the O&M/Reliability of each option once the modifications at the WWTP is complete. The scoring scale is between 1-3 with 3 being option with lowest O&M and highest reliability and 1 being option with highest O&M and least reliability.

In addition, the evaluation of the processes will begin with the evaluation of the BNR alternatives required to address the AWT standards. Each BNR alternative can potentially impact other upstream and downstream processes and thereby will be taken into considerations. The evaluation shall follow process flowchart as shown in **Figure 20**.

FIGURE 20 - EVALUATION PROCESS FLOWCHART



*This analysis starts with BNR evaluation due to upstream process considerations.

3.2 Biological Nutrient Reduction (BNR) Facilities

The options being considered for BNR facilities is as follows:

A-1 5-Stage BNR Carrousel Oxidation Ditch

A-2 5-Stage Integrated Fixed Film Activated Sludge (IFAS)

A-3 Aerobic Granular Sludge (AGS) Technology

Descriptions, cost estimates and figures depicting the alternatives are detailed below:

3.2.1 Option A-1 - 5-Stage BNR Carrousel Oxidation Ditch

A 5-stage BNR Bardenpho® Carrousel Oxidation Ditch design was evaluated to address the Advanced Wastewater Treatment (AWT) permit requirements while trying to optimize the existing WRF infrastructure. A 5-stage BNR Carrousel Oxidation Ditch will include the following:

- Anaerobic Zone
- Pre-Anoxic Zone
- Aerobic Zone
- Post-Anoxic Zone
- Reaeration Zone

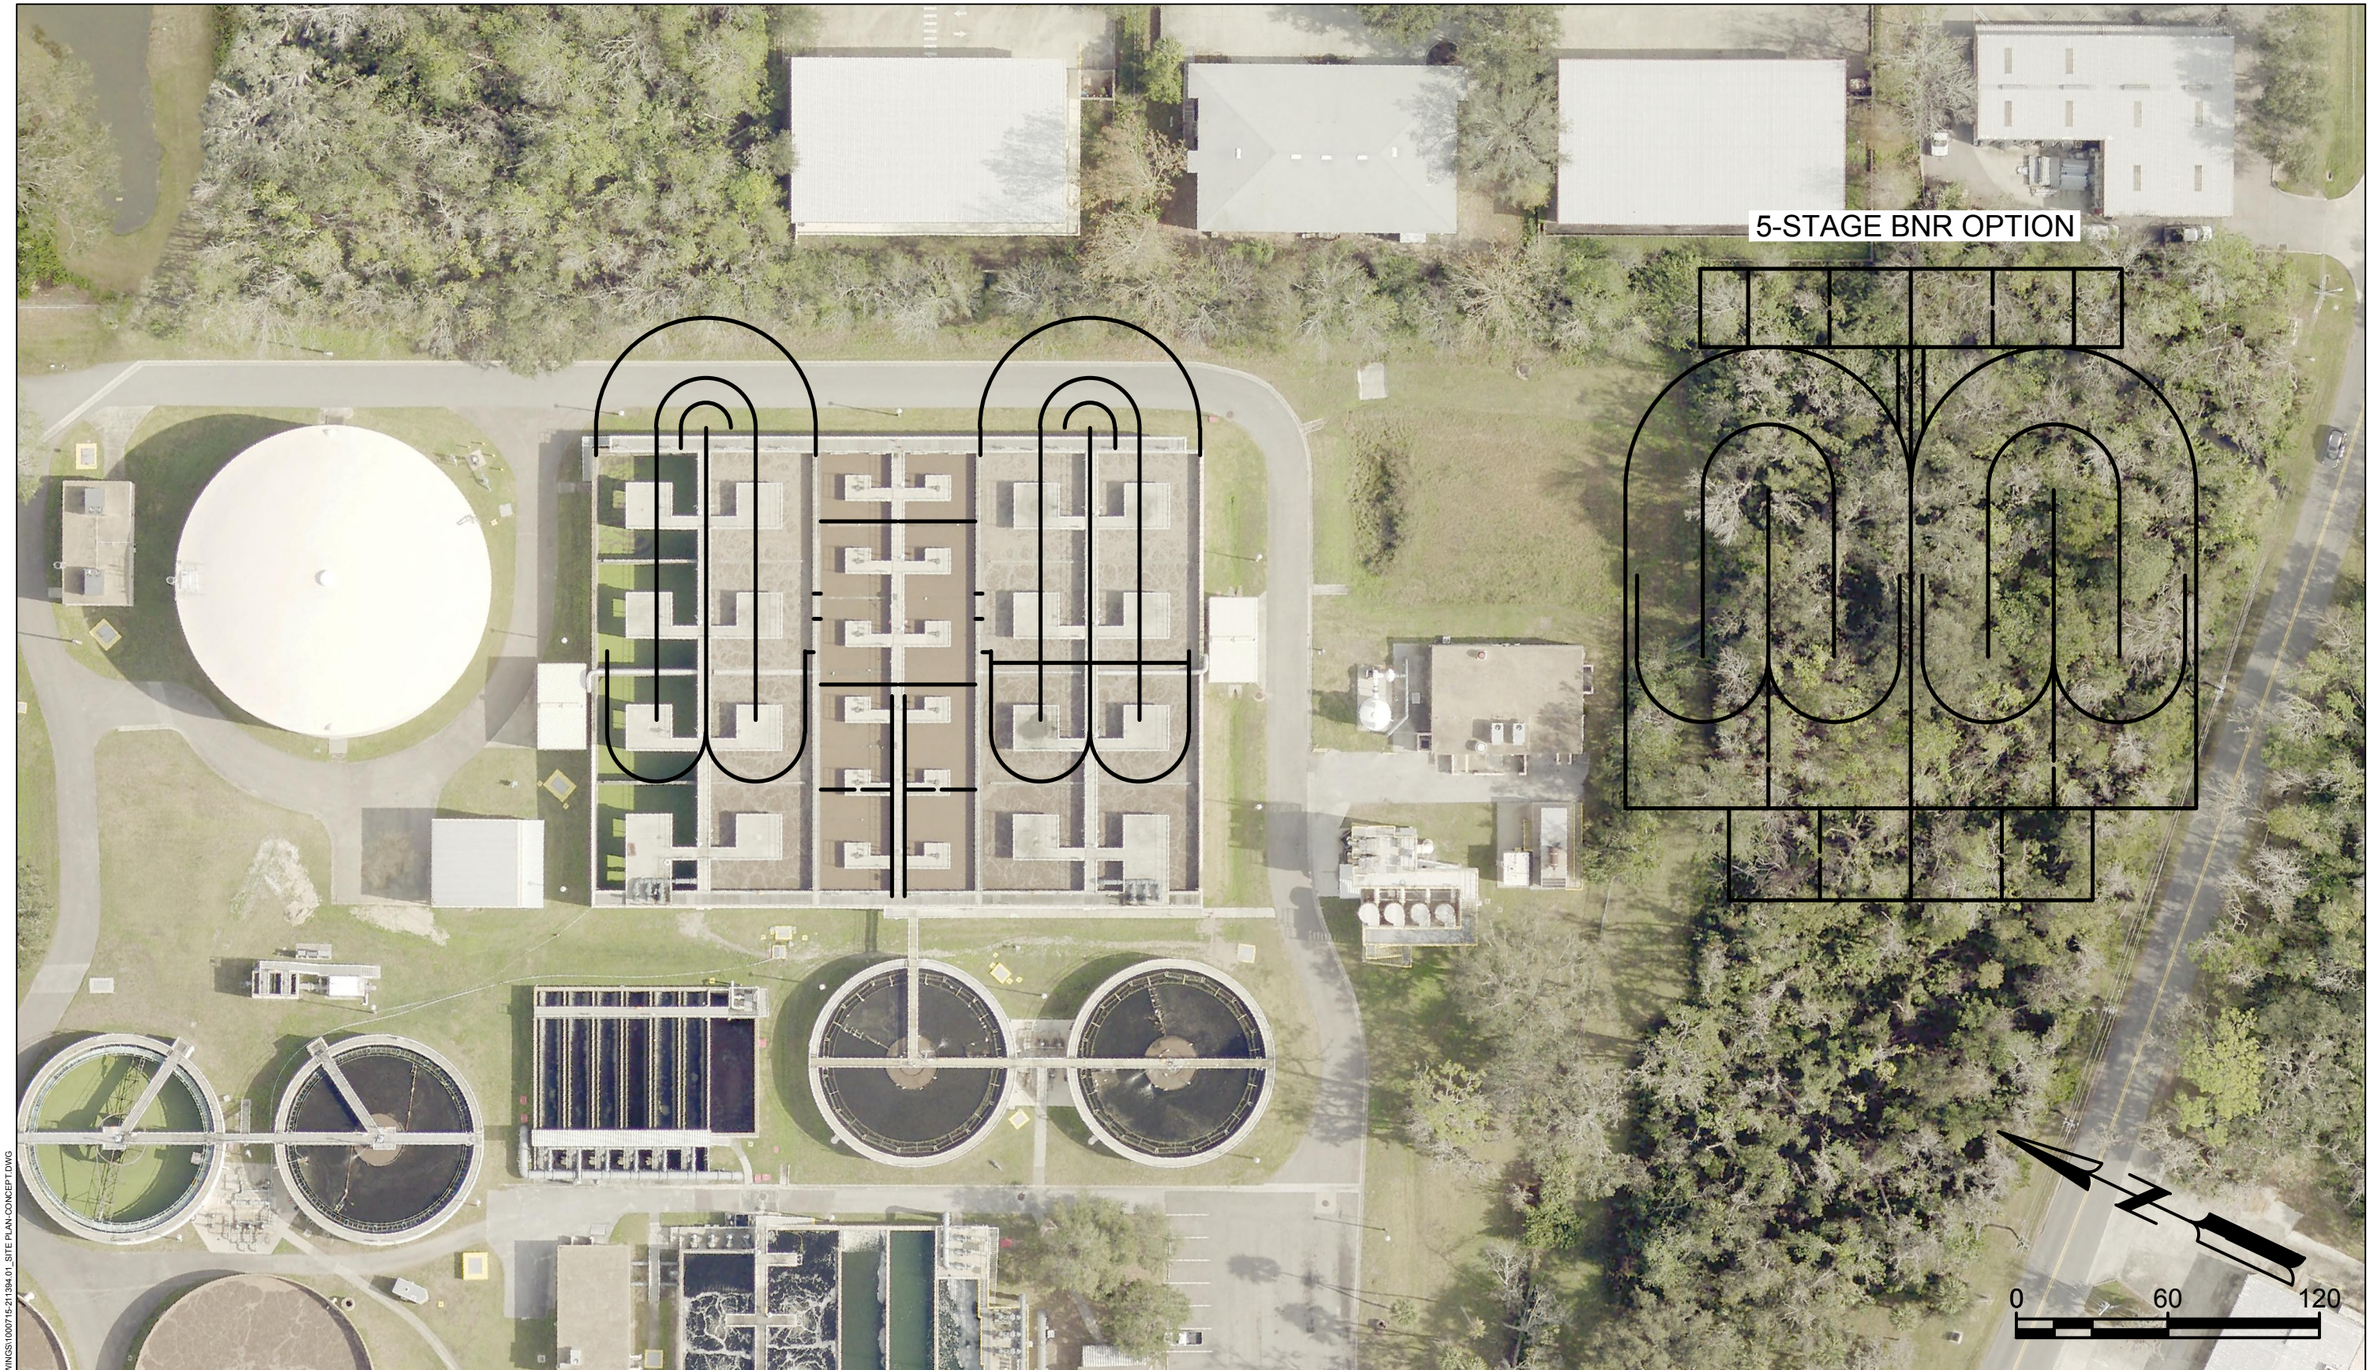
A 50-50% Flow Split design was evaluated for this option:

- 50% flow (6 MGD) shall be treated in the existing basins after modifying them to 5-stage BNR Bardenpho Carrousel system
- 50% flow (6 MGD) shall require new construction of 5-stage BNR Carrousel oxidation ditch

There shall be a total of four (4) trains and includes:

- Two (2) Trains in within existing basin volumes. New influent channel will be constructed on top of the existing structure.
- Two (2) Trains in new construction

The arrangement is shown in **Figure 21** and details on basin sizing of the proposed BNR process are detailed in **Table 8**.



OVIVO 5-STAGE BNR PROCESS
(STRUCTURE # 200)

FIGURE 21

2/23/2023 10:37:32 AM
X:\10007182\1394.01\TECH\CAD\DRAWINGS\10007182-211394.01_SITE PLAN-CONCEPT.DWG

TABLE 8: 5-STAGE BARDENPHO BASIN SIZING

Treatment Zone	Located at	Available Volume (ft^3)	Required Volume (ft^3)
Anaerobic	1. Reuse Existing A^2O Basin Volume 2. New External BNR Basin	83,640	195,700
First Anoxic	1. Reuse Existing A^2O Basin Volume 2. New External BNR Basin	124,418	289,400
Aerobic	1. New Carousel using a Portion of Existing A^2O Basin Volume 2. New External Carousel Oxidation Ditch	435,581	1,102,000
Second Anoxic	1. Reuse Existing A^2O Basin Volume 2. New External BNR Basin	64,770	149,400
Reaeration	1. Reuse Existing A^2O Basin Volume 2. New External BNR Basin	16,906	39,080
TOTAL BASIN VOLUME		**725,315**	**1,775,580**

The available volume of 725,315 ft^3 is 1,050,265 ft^3 less than the required volume of 1,775,580 ft^3. The proposed layout of BNR basins in presented in Appendix A. It is noted that due to WWTP site constraints of available land (as shown in **Figure X**), no new construction including new trains for BNR oxidation ditches is possible. Therefore, the Option A-1 is not evaluated any further.

3.2.2 Option A-2 - 5-Stage IFAS

The IFAS processes is a continuous flow through, non-clogging bio-film reactors containing “carrier elements” or media with high specific surface. The media does not require backwashing or cleaning.

The biomass that treats the wastewater is attached to the surfaces of the media. The media is designed to provide a large, protected surface area for the biofilm and optimal conditions for biological activity when suspended in water. Polyethylene media of different shapes and sizes provide flexibility to use the most suitable type depending on wastewater characteristics, discharge standards and available volumes. Density of the media is slightly less than water.

The IFAS process is considered for upgrading the existing A^2O system within existing tankage for AWT criteria and challenging nitrification requirements. This is accomplished by adding media directly to activated sludge reactors to enhance the growth of the autotrophic bacteria. The IFAS system is capable of meeting AWT effluent requirements at low solids retention times (SRTs) and short hydraulic retention times (HRTs).

The proposed design option is a customized solution to incorporate AnoxKaldnes IFAS system into the existing A^2O system to achieve biological nutrient removal. Since this is a retrofit design, to take best

advantage of the walls of existing tanks and minimize demolition/construction, the total plant flow shall be split into two trains.

Each process train is designed to:

- Keep both the existing three-stage anaerobic selector
- Keep existing three-stage pre-anoxic reactor
- Following the last stage of the pre-anoxic reactor, the flow of each train is further split into two (2) sub-trains to include:
  - One (1) Swing zone reactor,
  - One (1) IFAS reactor
  - One (1) Polishing reactor
  - One (1) Post-anoxic reactor
  - One (1) Re-aeration reactor.

Provisions for glycerin and alum addition are based on max month conditions and a Total Kjeldahl Nitrogen (TKN) and TP concentrations in the raw wastewater of 40 mg/L and 6 mg/L, respectively. Reduction of chemicals by dynamic online control of the nutrient removal will be considered in the detailed design. The yearly average chemical consumption quantities for both chemicals will be significantly lower than the max month quantities. Equipment for adding chemicals shall be provided to ensure that effluent AWT requirements can be met under all circumstances.

Implementing a swing zone as a first stage after the existing pre-anoxic reactors shall provide a more flexible process that will minimize glycerin addition by allowing increased internal mixed liquor recirculation (IMLR) flow rate and ensure that more of the produced nitrate will be removed by the BOD in the raw influent. The flexibility of adding air to the swing reactor will ensure that during high TKN loads the ammonium effluent requirements will be met.

In order to implement dynamic controls in the BNR process, ammonium analyzers as well as nitrate probes will be implemented as part of this project. The PLC controls shall include:

- Swing Zone Phase Control
- IMLR Flowpacing Control
- Ammonium based DO control in all three Oxic zones (Swing, IFAS and Polishing)
- Glycerin addition Control
- Alum Addition Control (will require an additional phosphate analyzer but not included in current scope)

The mixing of the media within the IFAS reactors is provided by a medium bubble aeration system in aerobic application, whereas specially designed submersible mixers are used in anoxic environments for denitrification.

Figure 22 displays a typical IFAS reactor and media with air grids and media retention screens.

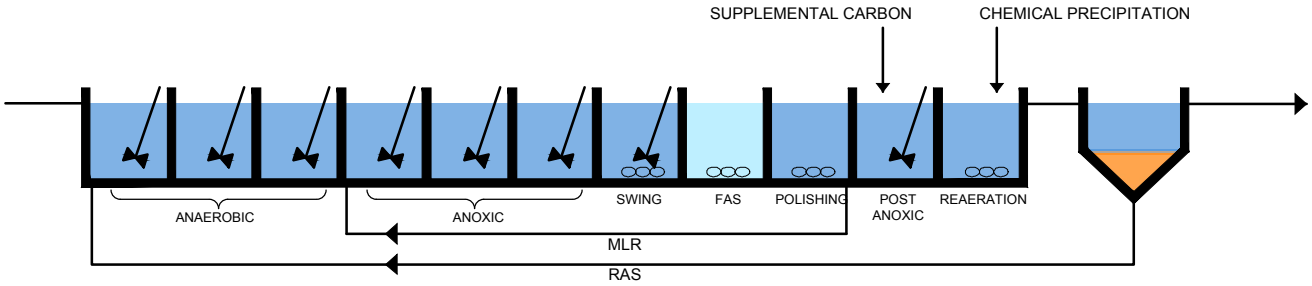
FIGURE 22: IFAS REACTOR AND MEDIA

The proposed system consists of two trains as shown in **Figure 23.** Each train consists of a three-stage anaerobic selector, a three-stage pre-anoxic reactor, two swing reactors, two IFAS reactors, two polishing reactors, two post-anoxic reactors and two re-aeration reactors.

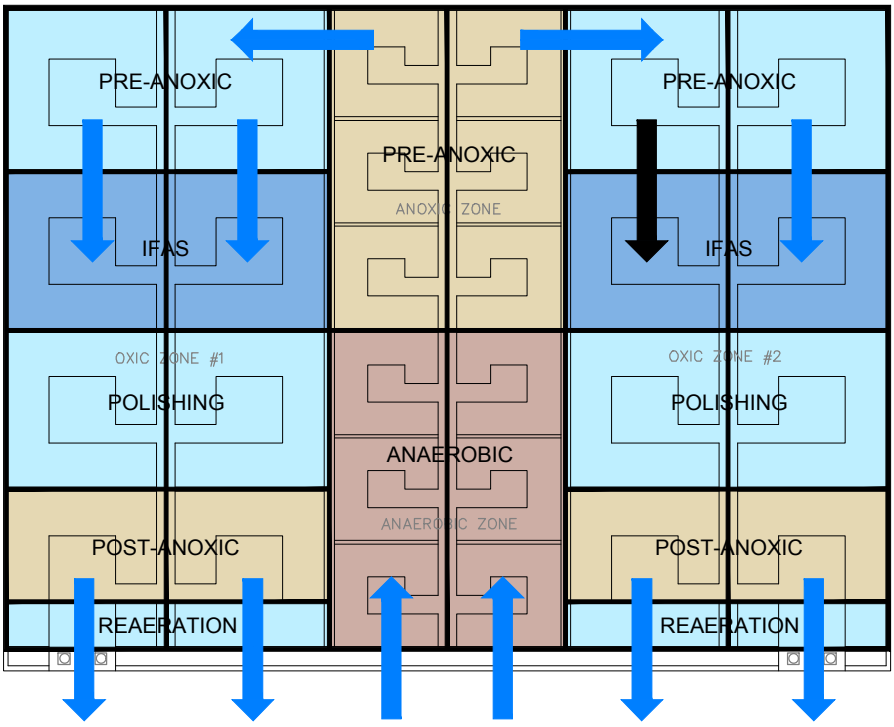
The design is based on the WWTP influent wastewater characteristics and incorporating peak flow conditions for screen design purposes only. The design assumes that the raw influent wastewater is biodegradable, no toxic compounds are present, sufficient alkalinity is available to avoid pH depressions, that the chemical oxygen demand (COD)/BOD ratio is between 1.7 and 2.3, and that none of the equipment provided would be used in a classified area.

The headworks will be designed to prevent passage of unscreened or poorly screened wastewater into the media reactors, including during maintenance or high-flow bypass events.

To provide compatibility with the AnoxKTM5 media and sieves, the plant's headworks will include perforated mesh screens with a maximum of 3 mm diameter openings for removal of particulate matter prior to entering the AnoxKaldnes IFAS reactors. **Table 9** displays the influent design parameters for this project.



IFAS SYSTEM PROCESS SCHEMATIC



PROPOSED IFAS CONFIGURATION

PROPOSED IFAS DESIGN SCHEMATIC (STRUCTURE 200)

TABLE 9: INFLUENT DESIGN BASIS

Parameter	Units	Design Values
Flow, Design	MGD	12
Flow, Peak Hourly	MGD	24
BOD_5, Design Flow	mg/L	182
TSS, Design Flow	mg/L	270
TKN, Design Flow	mg/L	40
TP	mg/L	6
Min/Max Temperature	^oF	68/82.4

Table 10 shows the effluent objectives of the proposed IFAS system.

TABLE 10: EFFLUENT OBJECTIVES - 30 DAY AVERAGE

Parameter	Units	Values
$cBOD_5$	mg/L	5.0
TSS	mg/L	5.0
TN	mg/L	≤ 3.0
TP	mg/L	≤ 1.0

Per Veolia's design, a blower capacity of 15,000 standard cubic feet per minute (SCFM) is required. This will be accomplished by utilizing the plant's existing (6) 3400 SCFM Hoffman centrifugal blowers working in conjunction with new positive displacement or hybrid blowers or a replacement of all existing blowers.

Currently, influent average TKN and TP values of 45 mg/L and 11 mg/L, respectively, have been measured. Port Orange has no industrial flow and historical BOD values are in the 200 mg/L range. Elevated TKN and TP values are partially attributable to side stream flows from sludge dewatering operations. Measured TP values in press side streams are greater than 20 mg/L. We recommend modification of aerated sludge holding operations to reduce HRT in order to decrease Bio-P release during dewatering operations. This will decrease influent TKN and TP concentrations; however, final design considerations will need to account for elevated values that cannot be mitigated.

Specifically, the clarifiers may need to be modified to allow for average mixed liquor suspended solids (MLSS) values of 3,500 mg/L – 4,000 mg/L. Additionally, micro 'C' and alum addition can enhance removal of NO_3 and TP. Any residual micro 'C' will facilitate supplemental TN reduction in the deep bed filters. Aeration capacity will be sized to facilitate enhanced nitrification. This combination of factors will enable reliable effluent TN and TP reduction below 3 mg/L and 1 mg/L, respectively.

The arrangement and basin sizing of the proposed BNR process are detailed in **Table 11**.

TABLE 11: IFAS BASIN SIZING

Treatment Zone	Located at	Total Required Volume (ft^3)
Anaerobic	1. Reuse Existing BNR Basin for 6 Reactors	91,800
Pre-Anoxic	1. Reuse Existing BNR Basin for 6 Reactors	91,800
Swing	1. Reuse Existing BNR Basin for 4 Reactors	118,544
IFAS	1. Reuse Existing BNR Basin for 4 Reactors	118,544
Polishing	1. Reuse Existing BNR Basin for 4 Reactors	118,544
Post-Anoxic	1. Reuse Existing BNR Basin for 4 Reactors	86,580
Reaeration	1. Reuse Existing BNR Basin for 4 Reactors	31,916
TOTAL BASIN VOLUME		**657,728**[a]

a. Existing basin volume = 725,000 cf, greater than needed

Further details on the IFAS design can be found in **Appendix A**. The cost estimate for the IFAS process retrofit is found in **Table 14.**

3.2.3 Option A-3 - Aerobic Granular Sludge Technology

The AquaNereda Aerobic Granular Sludge (AGS) Technology is an innovative wastewater treatment technology that provides advanced biological treatment using the unique features of aerobic granular biomass. Due to the quick settling of AGS compared to conventional activated sludge, secondary clarifiers are typically not needed. This makes a AquaNereda installation very compact, as all treatment processes take place within a single reactor.

Upstream Process Requirements:

- 1/4 inch (3 mm) screening (perforated plate-style preferred) and grit removal (95% removal at 140 mesh)
- Neutralization is required ahead of the biological system if the pH falls outside of 6.5-8.5 for significant durations.

Aeration:

- The aeration system has been designed to provide 1.25 lbs. O_2/lb. BOD_5 applied and 4.6 lbs. O_2/lb. TKN applied at the design average loading conditions, while maintaining a residual DO concentration of 2.0 mg/L.

AGS Process Design Assumptions:

- The anticipated effluent nitrogen requirement is predicated upon an influent waste temperature of 18 °C or greater. While lower temperatures may be acceptable for a short-term duration, nitrification and (if required) denitrification below 10 °C can be unpredictable, requiring special operator attention
- Sufficient alkalinity is required for nitrification, as approximately 7.1 mg alkalinity (as CaCO3) is required for every mg of NH_3-N nitrified. If the raw water alkalinity cannot support this consumption, while maintaining a residual concentration of 50 mg/L, supplemental alkalinity shall be provided
- To achieve the effluent monthly average total phosphorus limit, the biological process, chemical feed systems, and filtration needs to be designed to facilitate optimum performance.
- Influent TP shall be either in a particle associated form or in a reactive soluble phosphate form or in a soluble form that can be converted to reactive phosphorus in the biological system. Soluble hydrolyzable and organic phosphates are not removable by chemical precipitation with metal salts. A water quality analysis is required during detailed design to determine the phosphorus speciation with respect to soluble and insoluble reactive, acid hydrolyzable and total phosphorus at the system Influent, point(s) of chemical addition, and final effluent.
- Chemical feed lines (i.e., metal salts) shall be provided to each reactor, aerobic digester and dewatering supernatant streams as necessary. Metal salts shall be added to each reactor during the React phase of the cycle.
- pH monitoring and control of the biological reactor is required when adding metal salts.
- The ability to meet the anticipated effluent nitrogen concentration is contingent upon the system's ability to hydrolyze the influent organic nitrogen to NH_3-N. A certain fraction of the organic nitrogen may be refractory and, therefore, will not be biologically converted.
- In order to meet the required nitrogen limit, strict operator attention will be necessary for process and operational control. It is also recommended that provisions be made for supplemental carbon source addition in order to facilitate denitrification.
- The average and maximum design flow and loading conditions, shown within the report, are based on maximum month average and maximum day conditions, respectively.
- The proposed process evaluates splitting flows between the oxic zones and clarifiers onsite. Provisions to correctly modify the headworks and split the flows between these two trains shall be .
- 20 ft of process depth in the oxic zones and 16 ft of process depth in the clarifiers shall be accommodated for this process with additional freeboard to the existing basins.

Equipment:

- The influent enters the basin near the reactor floor. Adequate hydraulic capacity shall be made in the headworks to prevent backflow from one reactor to the other during transition of influent.
- The system has been designed to fit within existing, given basin footprint (with freeboard modification

required).

- Provisions should be made, , for overflows in each of the recommended basins.
- If the cloth media filter will be offline for extended periods of time, protection from sunlight is required.

Table 12 displays the influent design parameters for the AGS process.

TABLE 12: INFLUENT DESIGN PARAMETERS

Parameter	Units	Design Values
Flow, Design	MGD	12
Flow, Peak Hourly	MGD	24
BOD_5, Design Flow	mg/L	182
TSS, Design Flow	mg/L	270
TKN, Design Flow	mg/L	49
TP	mg/L	11
Min/Max Temperature	Celsius	18/25

For AGS systems, the entire BNR process occurs in individual basins, a sequencing batch reactor (SBR) process. **Figure 24** displays the AGS design configuration. Additional freeboard will be required for the existing basin. The arrangement and basin sizing of the proposed BNR process are detailed in **Table 13**.

FIGURE 24: AGS BASIN

TABLE 13: AGS BASIN SIZING

Treatment Zone	Located at	Total Required Volume (ft^3)
AGS Basins (within Existing A^2O Basin Volume)	1. Reuse Existing BNR Basin for 4 New Rectangular Basins	678,300
Clarifier Train (Convert Clarifiers to AGS Basins	1. Reuse Four (4) Existing Clarifier Basins with an additional 12-inches of side water depth (SWD)	373,337
Water Level Correction Tank	1. New Rectangular Basin for AGS Basins within A^2O Basin Volume 2. New Rectangular Basin for Clarifier Train within A^2O Basin Volume	18,661
Sludge Buffer	1. Two (2) New Rectangular Basins for Oxic Zone within A^2O Basin Volume 2. Two (2) New Rectangular Basins for Clarifier Train	24,150
TOTAL BASIN VOLUME		1,094,448

Appendix B displays the AquaNereda design summary including the oxic zone train design summary, clarifier train design summary, water level correction tank design summary, sludge buffer design summary and the AquaDISK tertiary filtration design summary. It is noted that the required filtration will be achieved within the WWTP existing deep bed filters.

3.2.4 Cost Comparison

Cost estimates provided herein are based on budgetary equipment pricing by each process manufacturer. Additional costs for concrete tankage, ancillary equipment, electrical gear, control panels, piping etc. are based on recent construction bids of similar projects and/or pricing provided by contractors and vendors.

TABLE 14: BNR OPTIONS COST COMPARISON

Item	Description	Option A-1 - 5-Stage BNR	Option A-2 - IFAS	Option A-3 - Aerobic Granular Sludge
1	Structural		$500,000	$650,000
2	Process Equipment (Installed Cost)		$15,000,000	$38,000,000
3	Electrical and I&C		$500,000	$550,000
4	Weirs, Gates, and Valves		$350,000	$650,000
5	Pipe, Valves and Fittings		$200,000	$250,000
6	Blowers (See Section 3.3)		N/A	N/A
	Subtotal		**$16,550,000**	**$40,100,000**
	GC OH & Profit @ 20%		$3,310,000	$8,020,000
	Total Capital Cost		$19,860,000	$48,120,000
		Life Cycle Cost Analysis		
	Annual O&M		$827,500	$2,005,000
	Planning Period		20	20
	Estimated Inflation		3%	3%
	Present Worth		$32,171,000	$77,949,000

3.2.5 BNR Recommendation

Table 15 represents a tabular listing of evaluation criteria for each BNR alternative considered.

TABLE 15: BNR ALTERNATIVES EVALUATION MATRIX

Alternatives	Evaluation Criteria[1]			
	Cost	**Compatibility**	**O&M/Reliability**	**Total**
Option A-1 - 5-Stage BNR[2]	NA	NA	NA	
Option A-2 - IFAS	3	3	3	9
Option A-3 - Aerobic Granular Sludge	1	1	1	3

[1]Highest Score: 3; Lowest Score: 1. *See Section 3.1 for detailed explanation*

[2]This option not considered in evaluation due to site constraints with new construction of tankage required.

Based on the evaluation contained herein, it is recommended that IFAS BNR process be installed for City of Port Orange WWTP. The IFAS BNR process provides the following advantages over the Aerobic Granular Sludge Process:

- Significant cost savings in new construction

- More compatible with the existing processes
- Easier WWTP operation during construction
- Lower O&M cost

3.3 BNR Blower Evaluation

New BNR blowers are proposed to accommodate the new BNR treatment process. The existing six (6) centrifugal blowers will be replaced with new blowers. The types of blowers being evaluated are hybrid positive displacement blowers and turbo blowers.

3.3.1 Hybrid Positive Displacement Blowers

Remote VFD's on hybrids enable the ability for climate control to reduce potential for overheating and premature failure of drives and PLC equipment.

Design parameters for the hybrid PD blowers include:

TABLE 16: HYBRID PD DESIGN PARAMETERS

Parameter	Design	60%	20%
Mass Airflow Requirement (SCFM)	3750	2250	750
Volume Airflow Requirement (ICFM)	4266	2560	853
Differential Pressure (psig)	12.3	12.3	12.3
System RPM	1656	1105	547
Compressor Power Draw (bhp)	237.6	150.3	71.4
System Noise Level at 1m (dBA)	85	81	78

3.3.2 Turbo Blowers

Design parameters for the turbo blowers include:

TABLE 17: TURBO BLOWER DESIGN PARAMETERS

Parameter	Value
Max Input Power (HP)	250
Max Motor Speed (RPM)	26,100
Operating Pressure Ratio	1.83
Differential Pressure (psig)	12
Max Discharge Temp (°F)	232
Operating Pressure Ratio Limit	1.90
Discharge Pressure (psia)	26.7

3.3.3 Cost Evaluation

TABLE 18: BNR BLOWER COST EVALUATION

Item	Description	Hybrid PD Blowers	Turbo Blowers
1	(6) New BNR Blowers	$1,500,000	$1,800,000
2	(6) New VFD's	$300,000	$350,000
3	Piping and Valves	$200,000	$200,000
4	I&C Upgrades	$100,000	$100,000
	Subtotal	$2,100,000	$1,800,000
	GC OH & Profit @ 20%	$420,000	$360,000
	Total Capital Cost	**$2,520,000**	**$2,450,000**
		Life Cycle Cost Analysis	
	Annual O&M		
	Planning Period	20.00	20.00
	Estimated Inflation	3%	3%
	Present Worth		

3.3.4 Blower Recommendation

TABLE 19: BLOWER EVALUATION

Alternatives	Evaluation Criteria[1]			
	Cost	**Compatibility**	**O&M/Reliability**	**Total**
Hybrid PD Blower	2	2	3	7
Turbo Blower	2	2	2	6

Based on the above evaluation, Hybrid PD Blowers are recommended for the IFAS process. Hybrid PD blowers are better suited for warmer climates like Port Orange and provides a significant advantage over Turbo Blowers. The No Action alternative was not considered for this evaluation.

3.4 Influent Pumping

The existing EMLS is currently undergoing architectural, structural, mechanical improvements and electrical replacement and rehabilitation (R&R). This project, scheduled for construction in 2022, includes new pumps, VFD's, emergency power generators and related improvements. No further upgrades to the EMLS are being proposed in this Facility Plan

Per section 2.3.1.1, the EMLS and WMLS process upgrade recommendations include the following improvements:

1. WMLS Pump Replacement
2. EMLS and WMLS Raw Sewage Screening
3. Flow Equalization
4. Odor Control

Alternatives considered for each process are described below:

B-1. WMLS Pump Replacement

a. Screw Centrifugal Pumps
b. Dry Pit Submersible Pumps
c. No Action

B-2. EMLS and WMLS Raw Sewage Screening

a. Screening Only
b. Screening and Flow Equalization
c. No Action

B-3. Flow Equalization (EQ)

a. Conversion of Two (2) Existing Digestors to Flow EQ Tanks
b. No Action

B-4. Odor Control

a. Biological Odor Control
b. No Action

3.4.1 B-1 – WMLS Pump Replacement

Replacement of the WMLS pumps, VFD's and controls are proposed herein and further described below.

3.4.1.1 Option B-1 (a) – Screw Centrifugal Pumps

Three (3) new Heyward-Gordon 5,200 gpm screw centrifugal pumps are proposed for installation under the above referenced EMLS project. This option will match the proposed pumps and two (2) new 5,200 gpm screw centrifugal pumps would be installed with matching valves, VFD's and controls.

3.4.1.2 Option B-1 (b) – Dry Pit Submersible Pumps

The City's collection system department has standardized upon submersible pumps in the collection system. Dry pit submersible pumps are essentially identical and are relatively compact, allowing more space to access and maintain the equipment. These pumps may also facilitate addition of a third pump that could potentially be used for flow equalization. **Figure 25** displays dry pit submersible pumps.

FIGURE 25: DRY PIT SUBMERSIBLE PUMPS

3.4.1.3 Option B-1 (c) – No Action

Under this alternative the existing pumps, VFD's and controls will not be replaced. They will be maintained using current R&R schedules.

3.4.1.4 Option B-1 - Cost Evaluation

TABLE 20: COST COMPARISON FOR B-1 WMLS PUMP REPLACEMENT [1]

Item	Description	Option B-1 (a) – Screw Centrifugal Pumps	Option B-1 (b) - Dry Pit Submersible Pumps
1	Influent Pumps	$480,000	$500,000
2	Electrical and I&C Upgrades	$150,000	$150,000
	Subtotal	$630,000	$650,000
	GC OH & Profit @ 20%	$126,000	$130,000
	Total Capital Cost	**$756,000**	**$780,000**
		Life Cycle Cost Analysis	
	Annual O&M	$31,500	$32,500
	Planning Period	20	20
	Estimated Inflation	3%	3%
	Present Worth	$1,225,000	$1,264,000

[1]No capital cost associated with Option A-1(c) – No action

3.4.1.5 Option B-1 – Evaluation and Recommendation

TABLE 21: EVALUATION MATRIX FOR B-1 WMLS PUMP REPLACEMENT

Alternatives	Evaluation Criteria[1]			
	Cost	**Compatibility**	**O&M/ Reliability**	**Total**
Option B-1 (a) – Screw Centrifugal Pumps	3	3	3	9
Option B-1 (b) - Dry Pit Submersible Pumps	3	2	3	8
Option B-1 (c) - No Action	-[2]	3	1	4

[1]Highest Score: 3; Lowest Score: 1. *See Section 3.1 for detailed explanation*

[2]No capital cost associated with this option

Based on the above evaluation, Option B-1 (a) Screw Centrifugal Pumps is being recommended for WMLS pump replacement, primarily to match the existing EMLS project. Though Option B-1 (b) – Dry Pit Submersible Pumps has similar weightage for cost and O&M/ Reliability, the WWTP will benefit from having pumps similar to EMLS (currently under contract for replacement) for future O&M. Option B-1 (c) – No Action has the least weightage for O&M/ reliability and the yearly maintenance with limited parts availability and supply chain constraints, makes this the least acceptable option over the planning period of 20 years.

3.4.2 Option B-2 – EMLS and WMLS Raw Sewage Screening

Flushable wipes and other inorganic debris entering the collection system is a major problem for the EMLS and WMLS. The problem has continued to increase and represents a pump clogging and influent screening problem that can be solved with primary screening. The City has visited other sites where primary screening has dramatically improved plant performance and reduced maintenance.

.

3.4.2.1 Option B-2 (a) – Primary Screening

To facilitate primary screening at each lift station, new, external structures will be required. A sketch of the layout for the EMLS and screen details are included below as **Figure 26, Figure 27** and **Figure 28** respectively.

The figures depict re-routing influent pipes and installation of a single, in-line rake style screen. The proposed equipment is a Duperon 'FlexRake' 6 mm screen with a hydraulic capacity of 12 MGD. The structure would include fixed bypass weirs on each side of the rake screen to allow automatic bypass if the screen is blinded or fails. A summary of Duperon's hydraulic calculations is shown below in **Table 22**.

Duperon requires a minimum of 1.00 ft water depth when the unit is in operation to keep the SSTL FlexLinks lubricated and ensure an optimal amount of screening area. This does not apply to LowFlow, FR IQ, and GTS units.

Head loss is calculated using Bernoulli equation: $HL=(1/C^2)*(V^2-v^2)/(2g)$. Flow coefficient $(1/C^2)=1.43$ should be used for general applications (FP,HD,SCT,FRIQ≥.62). $(1/C^2)=.99$ is used for teardrop bars (LF,FPFS, FPFS-M, FRIQ≤.5, GTS). ǂ

At design average flow conditions, approach velocities should be no less than 1.25 fps, to prevent settling. ǂǂ

Satisfactory designs have provided for velocities of 2 to 4 fps through the openings of mechanically cleaned screens.ǂǂǂ

	Planning Period	20
	Estimated Inflation	3%
	Present Worth	$4,672,000

[1]No capital cost associated with Option A-2 (c) – No action

3.4.2.4 B-2 – Evaluation and Recommendation

TABLE 24: EVALUATION MATRIX FOR A-2 EMLS AND WMLS RAW SEWAGE SCREENING

Alternatives	Evaluation Criteria[1]			
	Cost	**Compatibility**	**O&M/ Reliability**	**Total**
Option B-2 (a) - Primary Screening Only	3	3	3	9
Option B-2 (b) - No Action	-[2]	-[3]	1	1

[1]Highest Score: 3; Lowest Score: 1. *See Section 3.1 for detailed explanation*

[2]No capital cost associated with this option

[3]Not applicable for this option

Based on the evaluation contained herein, it is recommended that Option B-2 (a) Primary Screening be installed as part of this alternative. Option B-2 (a) Primary Screening provides following advantages:

- Removes large solids such as rags which will protect the influent pump stations
- Better treatment performance for the recommended IFAS BNR
- Finer screening from upstream headworks

Option B-2 (b) – No Action provides only capital cost savings and no long-term solutions for the existing

screening problems at both EMLS and WMLS. If this option is selected, it will continue to have significant increase in O&M costs and can impact the performance of all BNR options being considered.

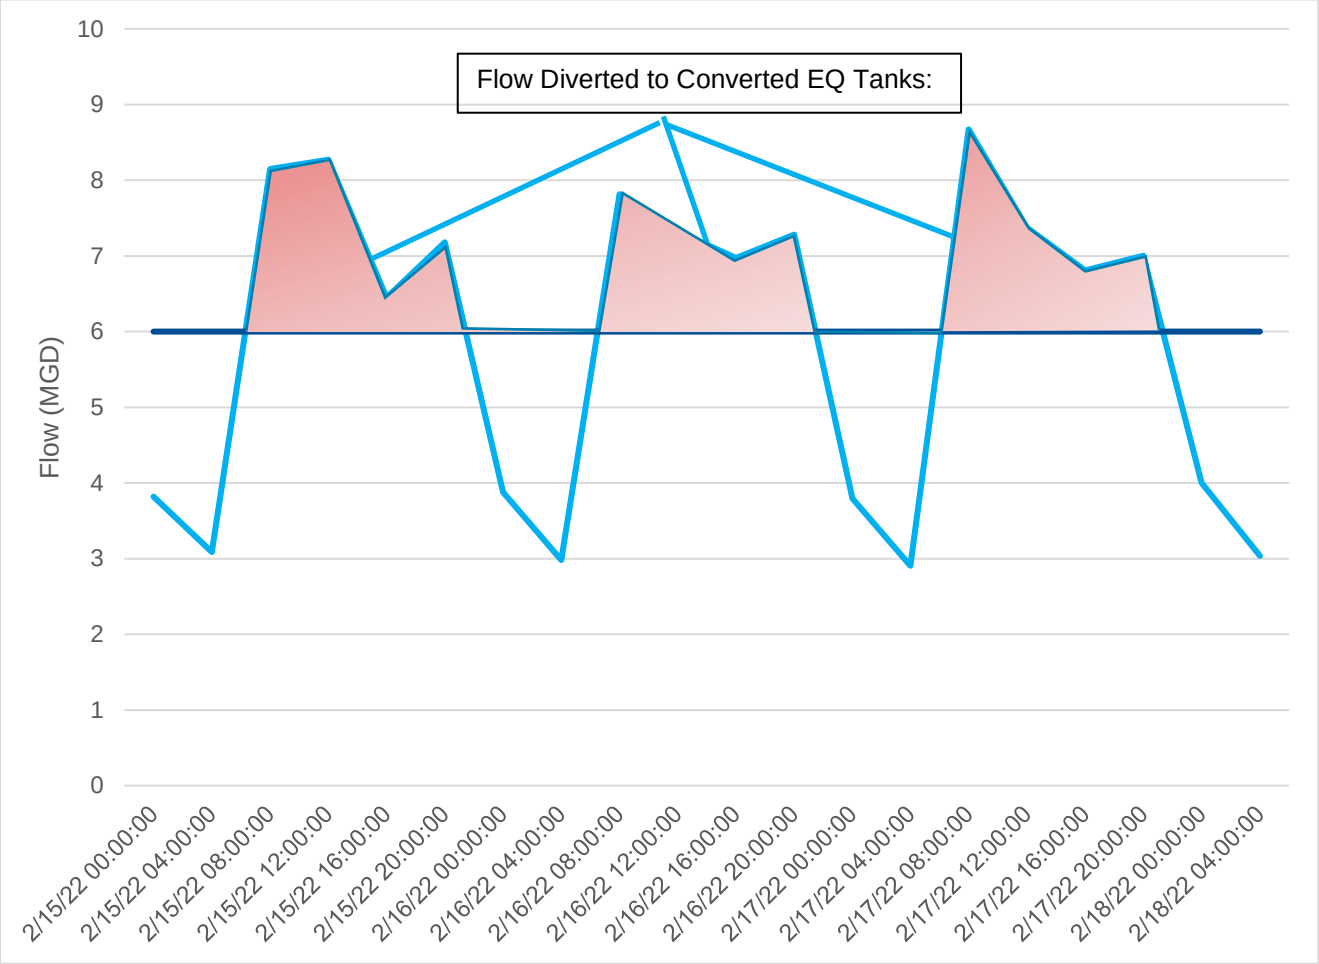
3.4.3 Flow Equalization (EQ)

3.4.3.1 Option B-3 (a) - Conversion of Two (2) Existing Digesters into Flow EQ Tanks

This alternative involves converting two (2) of the existing digesters into flow equalization (EQ) basins. One (1) submersible pump will be added inside the WMLS wetwell to act as an EQ transfer pump. This will reduce sludge age and reduce Bio-P release during dewatering. This option also includes covering the converted EQ tanks.

The EQ transfer pump will typically transfer flows greater than 6 MGD during a 24-hr period, via a new 16-in forcemain to the two (2) converted EQ basins (EQ #1 and EQ #2) with a combined usable volume of 1.48 MG (with 24-in freeboard). **Figure 29** shows a typical 4-hour influent flows to the WWTP. During low flow conditions (night-time), submersible pumps (one in each EQ Basin) will transfer wastewater back to the WMLS through the same 16-in forcemain. This will allow the WWTP to be operated at a consistent flow rate.

FIGURE 29: TYPICAL INFLUENT FLOWS TO WWTP

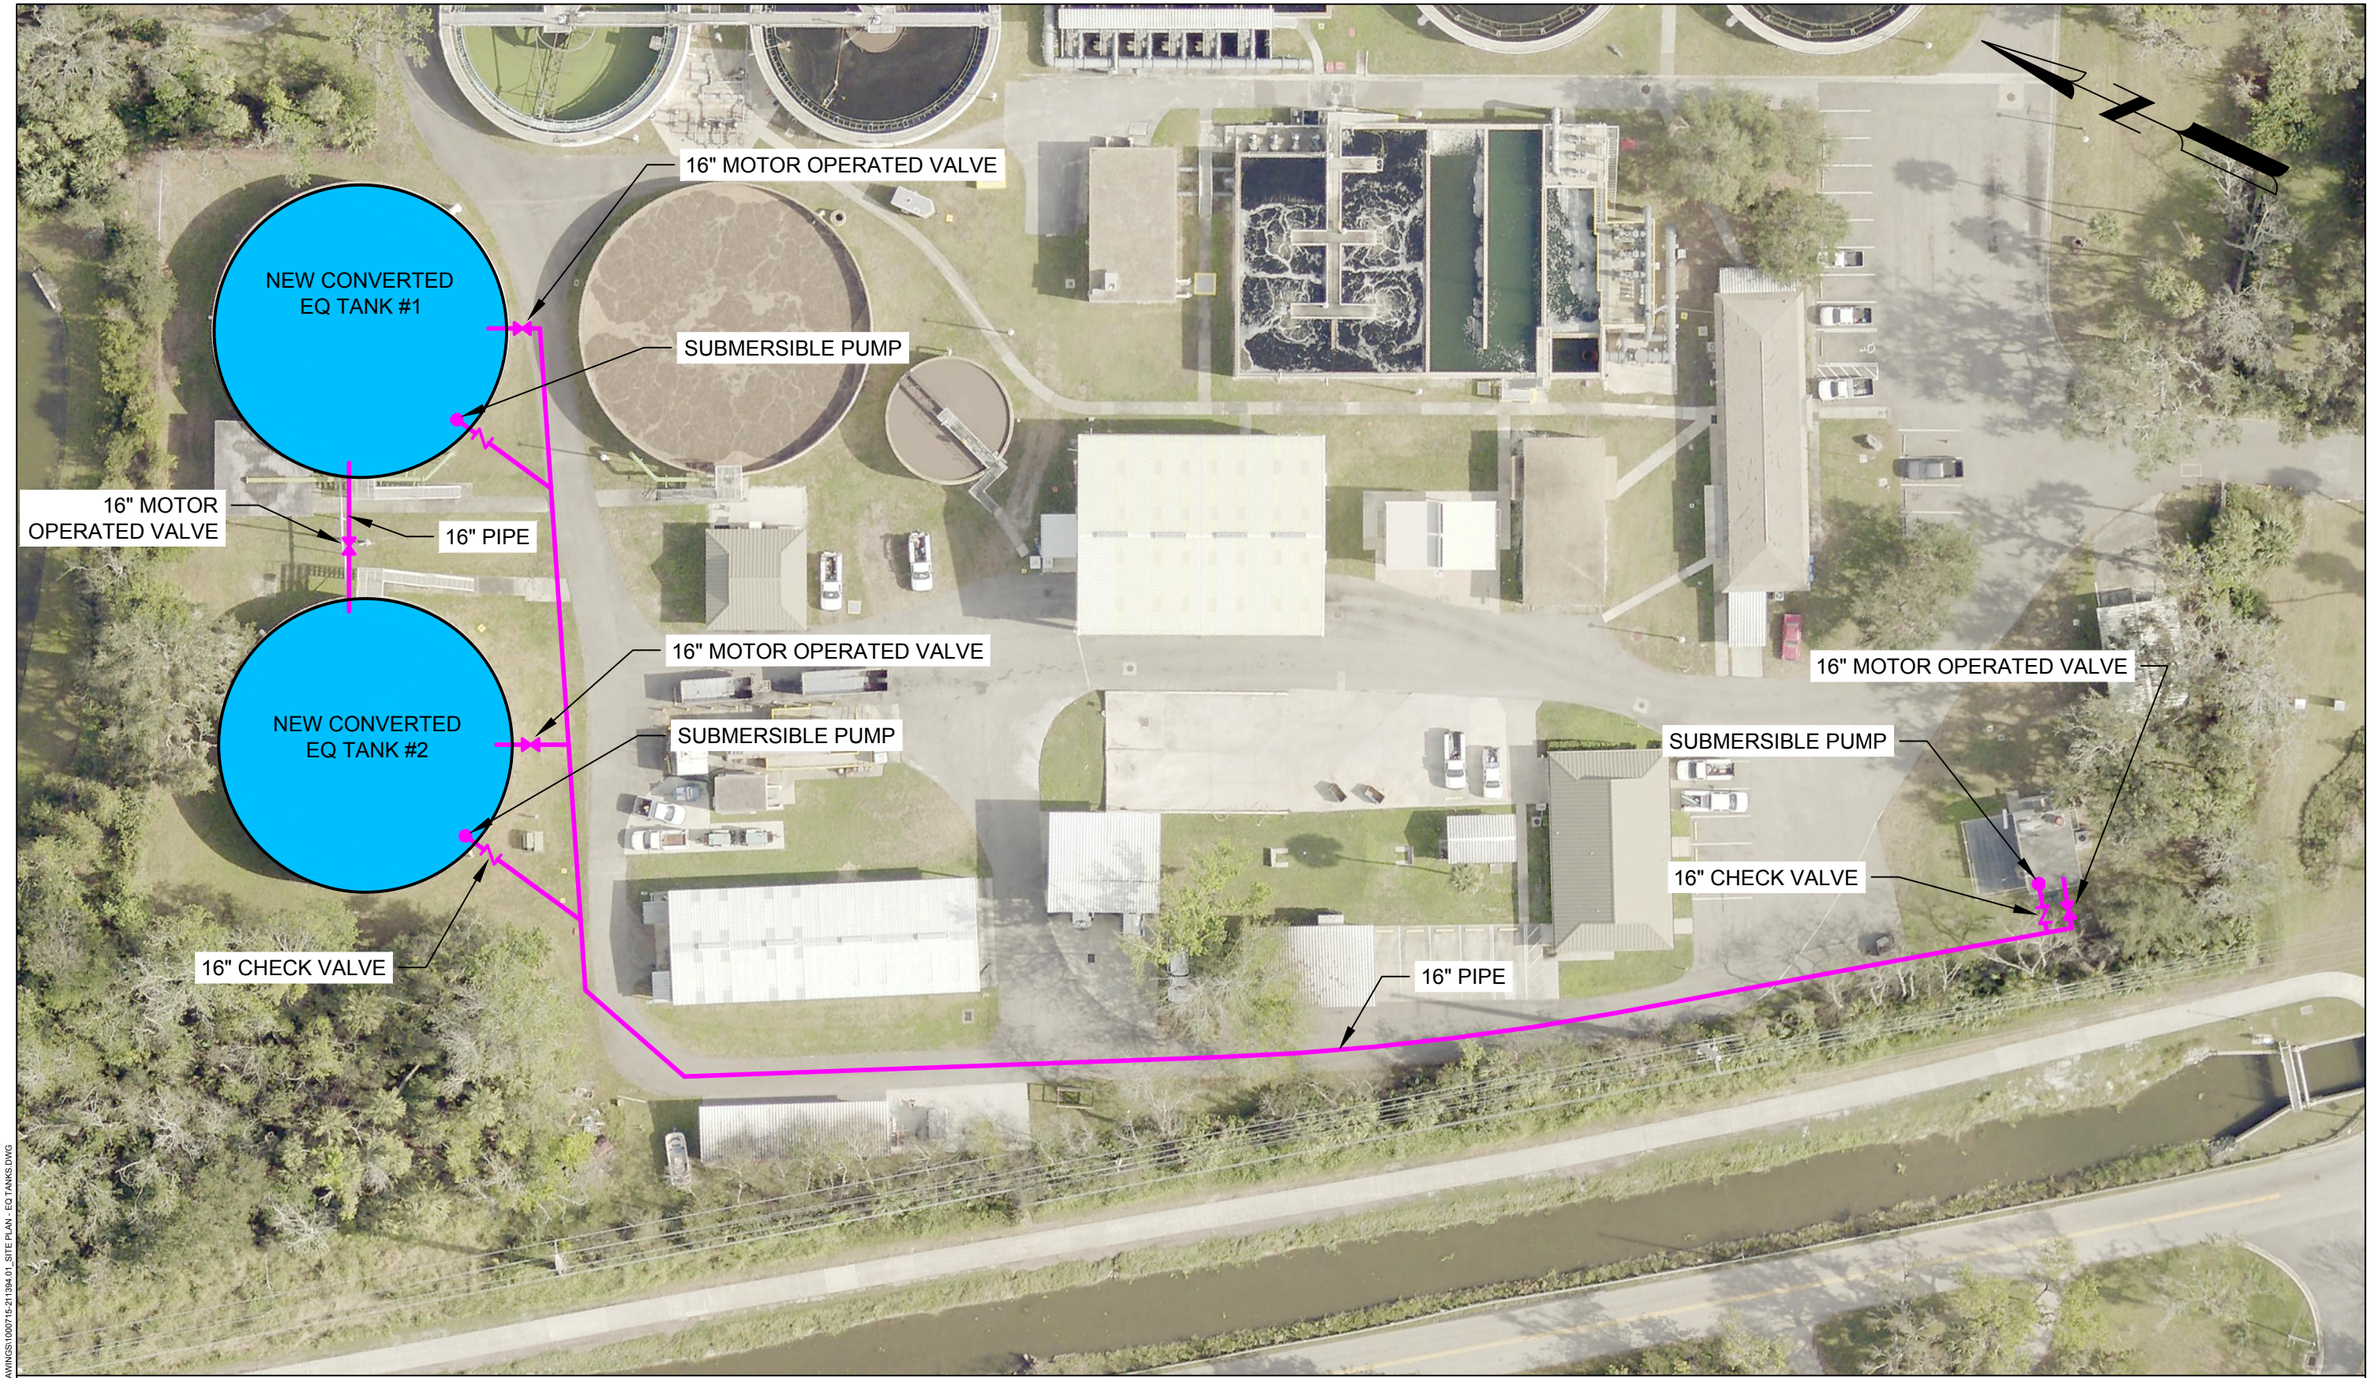


As shown in **Figure 29**, flows were observed for days between February 16-18 (2022) and average flows of 1 MGD per day will be diverted to the EQ tanks.

The WMLS and the EMLS are currently interconnected through a 30-in main and will continue to operate within the same operational levels providing additional redundancy and flexibility to the WWTP operations. In a scenario, if flows exceed the usable volume within the two (2) EQ Basins, the WMLS and EMLS combined have pumping capacity of 24 MGD and shall be able to handle all flows to the WWTP.

Figure 30 displays a sketch of the proposed flow equalization line running from the WMLS to the converted digesters.

After the conversion to EQ tanks and based on its operation, odor control measures will be evaluated and implemented as a separate project.



PROPOSED FLOW EQUALIZATION

FIGURE 26

3.4.3.1 Option B-3 (b) – No Action

Under this alternative, Flow EQ tanks will not be considered.

3.4.3.2 B-3 – Cost Evaluation

TABLE 25: COST EVALUATION FOR B-3

Item	Description	Option B-3 (a) Flow Equalization
1	Structural/ Mechanical	$600,000
2	New Converted Flow EQ Tanks	$375,000
3	Yard Piping /Bypass/ Valves	$225,000
4	Transfer and Mixing Pumps	$110,000
5	Electrical and I&C	$75,000
	Subtotal	$1,385,000
	GC OH & Profit @ 20%	$277,000
	Total Capital Cost	**$1,662,000**
	Life Cycle Cost Analysis	
	Annual O&M	$59,500
	Planning Period	20
	Estimated Inflation	0
	Present Worth	$2,852,000

[1]No capital cost associated with Option B-3 (b) – No action

3.4.3.3 B-3 – Evaluation and Recommendation

TABLE 26: EVALUATION MATRIX FOR FLOW EQ

Alternatives	Evaluation Criteria[1]			
	COST	**COMPATIBILITY**	**O&M/ RELIABILITY**	**TOTAL**
Option B-3 (a) – Flow EQ	3	3	3	9
Option B-3 (b) - No Action	-[2]	-[3]	1	1

[1]Highest Score: 3; Lowest Score: 1. *See Section 3.1 for detailed explanation*

[2]No capital cost associated with this option

[3]Not applicable for this option

Based on the above table, Option B-3 (a) Flow EQ alternative is recommended. The Option B-3 (b) No action provides no benefits other than capital cost savings.

3.4.4 B-4 - Odor Control

3.4.4.1 Option B-4 (a) – Biological Odor Control

Currently, a single activated carbon odor control scrubber at the EMLS treat H_2S from both the EMLS and WMLS. We are proposing to replace the single scrubber with (2) biological odor control units, one at each lift station.

This alternative involves replacing and relocating the existing odor control unit with a HIBOCS biological odor control system. HIBOCS is designed to remove vapor phase odorous gases, primarily hydrogen sulfide (H2S). The EMLS would be outfitted with a HIBOCS-400 model, while the WMLS would be outfitted with a HIBOCS-200 model. In addition, if the Flow Equalization alternative is chosen, a HIBOCS odor control unit (or recommendation will be based on evaluation of odors) will be installed at the EQ tanks. **Figure 31** displays a site plan with the location of the proposed odor control units called out. **Figure 32** and **Figure 33** display a drawing of the HIBOCS units, one for the EMLS and WMLS, respectively.

3.4.4.2 Option B-4 (b) – No Action

Under this alternative, no new odor control would be implemented at the EMLS or WMLS. Depending on whether primary screening is selected, the existing EMLS odor control system may be removed. Leaving the EMLS with no odor control.

3.4.4.3 B-4 – Cost Evaluation

TABLE 27: COST FOR ODOR CONTROL[1]

Item	Description	Option B-4 (a) - Biological Odor Control
1	Concrete	$200,000
2a	EMLS Odor Control Unit (with Blower)	$500,000
2b	WMLS Odor Control Unit (with Blower)	$500,000
3	Electrical and I&C	$18,000
	Subtotal	$1,218,000
	GC OH & Profit @ 20%	$243,600
	Total Capital Cost	**$1,461,600**
		Life Cycle Cost Analysis
	Annual O&M	$60,900
	Planning Period	20
	Estimated Inflation	3%
	Present Worth	$2,368,000

[1]No capital cost associated with Option A-3 (b) – No action

3.4.4.4 B-4 – Evaluation and Recommendation

TABLE 28: EVALUATION MATRIX FOR ODOR CONTROL

Alternatives	Evaluation Criteria[1]			
	COST	**COMPATIBILITY**	**O&M/ RELIABILITY**	**TOTAL**
Option B-4 (a) - Biological Odor Control	3	3	3	9
Option B-4 (b) - No Action	-[2]	-[3]	1	1

[1]Highest Score: 3; Lowest Score: 1. *See Section 3.1 for detailed explanation*

[2]No capital cost associated with this option

[3]Not applicable for this option

Based on the above table, Option B-4 (a) Biological Odor Control alternative is recommended for the EMLS and WMLS. The Option B-4 (b) No action provides no benefits other than capital cost savings and

does not address the issues arising from H_2S odors at both EMLS and WMLS.

3.5 Influent Structure / Headworks

The existing influent structure was constructed with the 1989 WWTP Expansion and has been in continuous service since that time. The following upgrades to the structure have been constructed since it was originally constructed:

- Fiberglass reinforced plastic (FRP) decking and odor control
- Concrete restoration and interior lining with 'Raven' lining system
- Above grade bypass valves and piping
- Two (2) new 48" wide, 3 mm stepscreens

The original grit removal 'Teacups' remain in service along with a 'Grit Snail' grit dewatering device. All four (4) Teacups and the Grit Snail have outlived their useful life and require replacement. Additionally, the new stepscreens should be outfitted with compactors and 'fine screening' is required if the City elects to pursue the recommended IFAS treatment process.

Figure 34 displays the existing headworks and barscreens.

FIGURE 34: EXISTING HEADWORKS AND BARSCREENS

Project descriptions, cost estimates and a cost effectiveness analysis for each are included. The options being considered for the influent structure are as follows:

C-1 – Grit Removal System

a. Replace four (4) Eutek Teacups and Grit Snail with Matching Equipment
b. Remove Existing Teacups and Install two (2) Headcells with Grit Cleanse System
c. No Action

C-2 – Center Flow Fine Screening

a. Add Supplemental 2 mm Fine Screen and Bypass + Compactors on Existing Screens
b. Replace two (2) Existing 3 mm Vulcan Stepscreens with two (2) 3 mm Center Flow Screens + Compactors
c. No Action

Descriptions, cost estimates and figures depicting the alternatives are detailed below:

3.5.1 C-1 - Grit Removal System

The City's existing Eutek "Teacups" and "Grit Snail" grit removing and dewatering units have outlived their useful life and are in need of replacement. Possible replacements are exhibited in the following alternatives:

3.5.1.1 Option C-1 (a) - Replace Four (4) Eutek Teacups and Grit Snail

This alternative involves replacing the four (4) Eutek Teacups and Grit Snail in kind. No modification to the existing headworks structure would be required. **Figure 35** and **Figure 36** show a plan and profile of the existing Eutek Teacups.

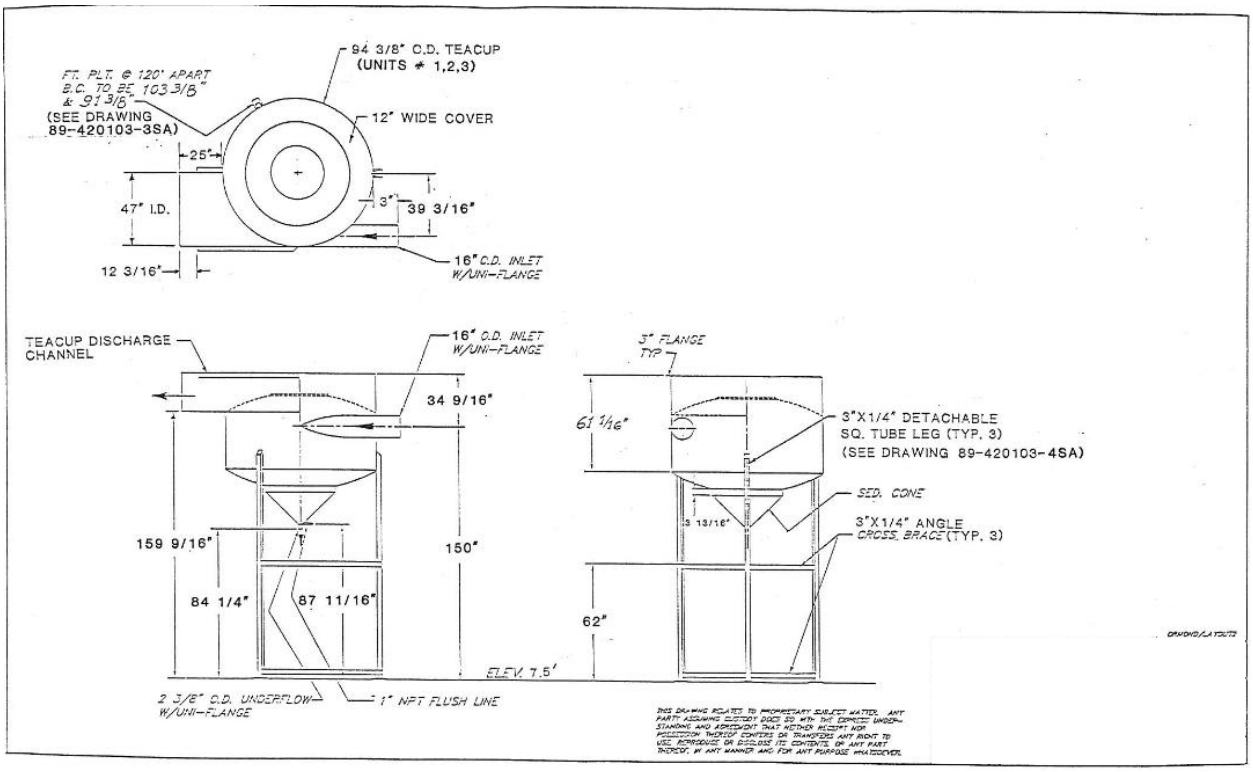
FIGURE 36: EUTEK TEACUP PROFILE VIEW



3.5.1.2 Option C-1 (b) - Install two (2) Headcells with Grit Cleanse System

The HeadCell is an all-hydraulic grit concentrator, which uses vortex flow and a stacked tray design to efficiently capture and settle fine grit via large surface area and short settling distances. The unit can be installed into the process flow, downstream of screening, in any system where limited head is available. The unit requires no external power source, has no internal moving parts, is self-cleaning, and has a compact modular construction.

Details of the HeadCell unit within the Port Orange WWTP existing influent structure is shown in **Figure 37** and **Figure 38**. **Appendix C** details the design specifications for the HeadCell unit.

The Hydro GritCleanse™ is a fully automated, high efficiency unit that effectively removes, washes, and dewaters fine grit, sugar sand, and high-density fixed solids from grit slurries. The large conical clarifier with tangential inlet and internal baffle enhances the settling of fine particles and the fluidized sand bed scrubs off and separates attached organics, resulting in a dry grit with extremely low organic content suitable for landfill disposal.

Figure 39 displays a drawing of the Hydro GritCleanse unit. **Appendix C** details the design specifications for the GritCleanse unit.

DO NOT CHANGE DUCT LAYOUT OR PIPE ORIENTATION

Upstream of the HeadCell units will be revised screening configuration based on selected BNR process.

3.5.1.3 Option C-1 (c) – No Action

Under this alternative there are no changes to the existing grit removal system. The existing Eutek Teacups and Grit Snail would continue to operate and would likely need frequent maintenance and repair as they continue to age.

3.5.1.4 C-1 – Cost Evaluation

TABLE 29: COST COMPARISON FOR GRIT REMOVAL[1]

Item	Description	Option C-1 (a) - Replace Eutek Teacups in Kind	Option C-1 (b) - Remove Teacups and Install (2) HeadCells

3.5.1.5 C-1 – Evaluation and Recommendation

TABLE 30: EVALUATION MATRIX FOR GRIT REMOVAL

Alternatives	Evaluation Criteria[1]			
	Cost	**Compatibility**	**O&M/ Reliability**	**Total**
Option C-1 (a) - Replace Eutek Teacups in Kind	3	2	2	7
Option C-1 (b) - Remove Teacups and Install (2) HeadCells	2	3	3	8
Option C-1 (c) - No Action	-	-	1	1

[1]Highest Score: 3; Lowest Score: 1. *See Section 3.1 for detailed explanation*

[2]No capital cost associated with this option

[3]Not applicable for this option

Based on the evaluation contained herein, Option C-1 (b) - Remove Teacups and Install two (2) Headcells is the recommended alternative for WWTP Grit Removal System. It offers the following advantages over Option C-1 (a) – Replace Existing Teacups in Kind:

- Significantly higher grit capture rate
- Better suited for the recommended IFAS BNR process

Option C-1 (c) – No action provides no benefits other than initial capital cost savings and will continue to have increased O&M costs over time with diminished performance,

3.5.2 C-2 – Center Flow Screening

The City's current solids capture rate from primary screening is inadequate for the recommended IFAS BNR process. The implementation of center flow screening would greatly increase the solids capture rate and satisfy the upstream requirements of the IFAS BNR process.

3.5.2.1 Option C-2 (a) – Supplemental 12 MGD, 2 mm Center Flow Fine Screening

If the IFAS BNR process is selected, supplemental fine screening is required. This alternative involves the installation of a 2 mm center flow fine screen downstream of the existing Vulcan 3 mm stepscreens. The 2 mm center flow fine screen will provide a sufficient capture rate for the IFAS process. The center flow screen will have a back plate set at a specific elevation that will act as a bypass weir in case of blinding. Since the screen has its own bypass, there is no need to construct a concrete bypass around the channel. This screen will need to have an ADF capacity of 12 MGD and peak hour (PHF) capacity of 24 MGD.

Figure 40 displays the layout of the headworks with the proposed fine screen.

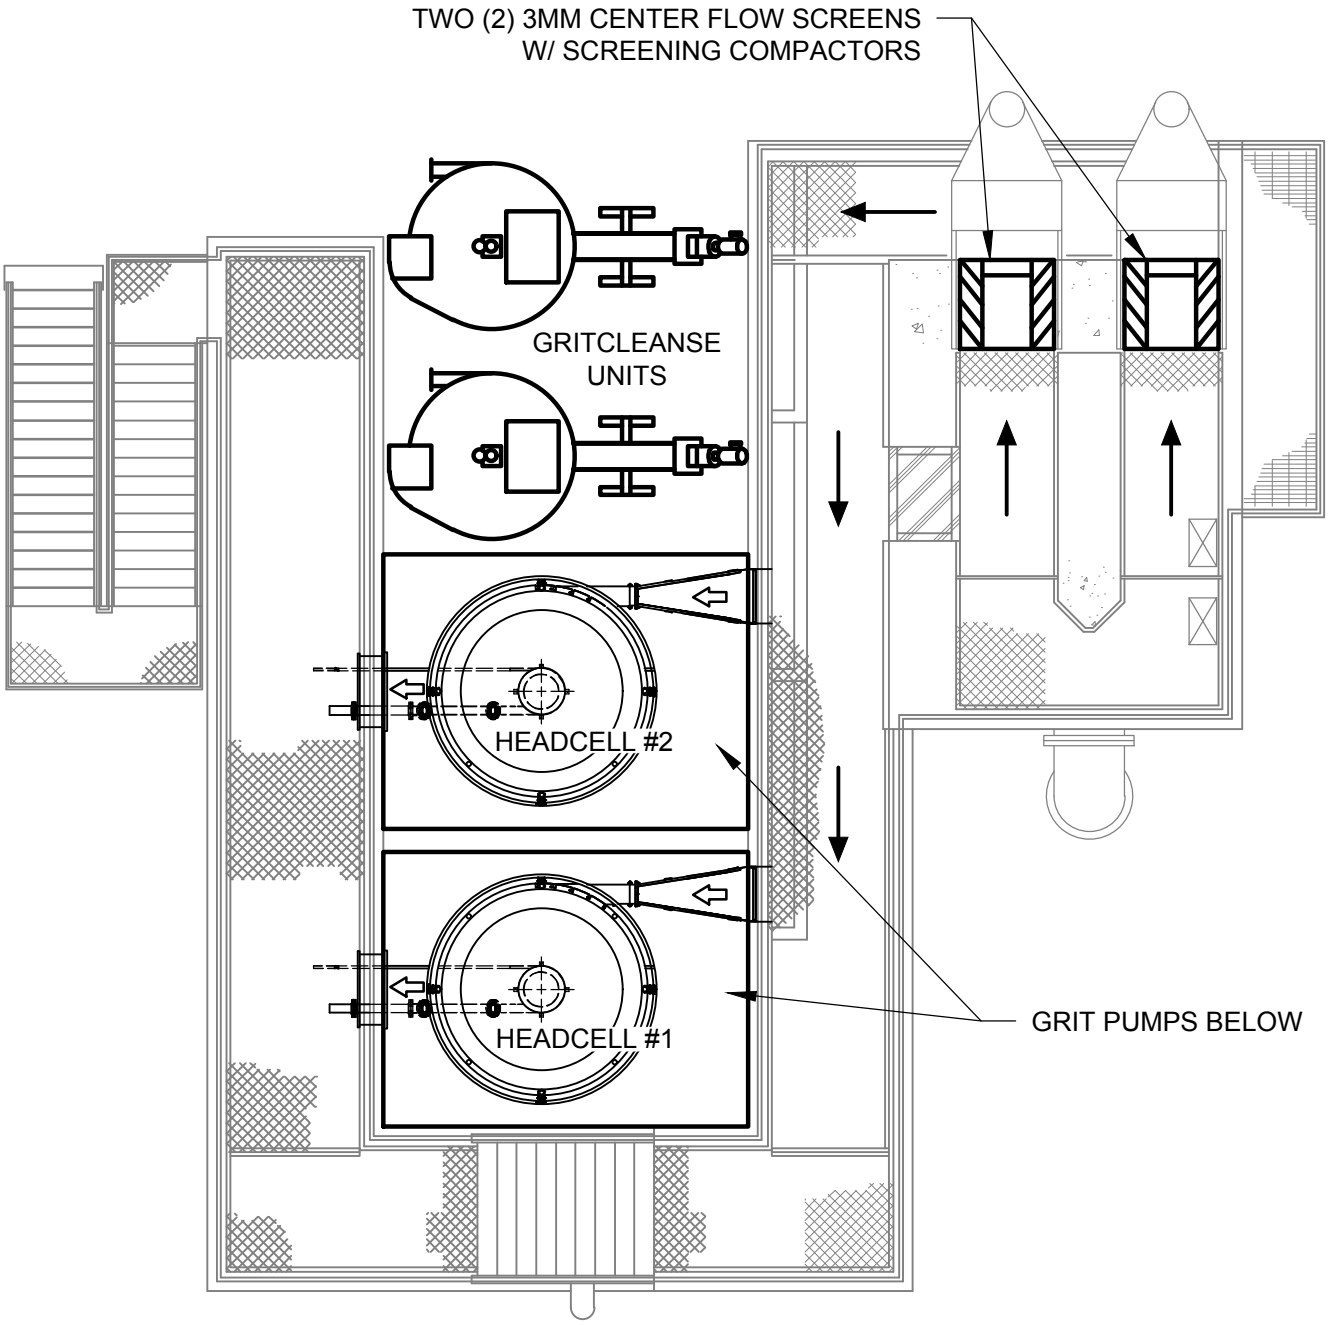
X:\10007152\11394.01\TECH\CAD\DRAWINGS\10007152-211394.01_HEADWORKS.DWG

3.5.2.2 Option C-2 (b) – Two New 6 MGD, 3 mm Center Flow Screens

This alternative involves replacing the existing Vulcan 3 mm stepscreens with two (2) 3 mm center flow screens. By installing center flow screens in place of the existing barscreens, there would be no need for supplemental fine screening. The performance of two (2) 3 mm Hydro-Dyne center flow screens would be sufficient for all BNR process being evaluated, including the recommended IFAS BNR Process. Each screen would have an ADF capacity of 6 MGD and PHF capacity of 12 MGD. In addition, this alternative would require minimal concrete work as the center flow screens would set in the same location of the existing barscreens. **Figure 41** shows two (2) center flow screens in the existing headworks structure.



HEADWORKS WITH HEADCELLS (STRUCTURE #130)

FIGURE 41

X:\10007152\11394.01\TECH\CAD\DRAWINGS\10007715-211394.01_HEADWORKS.DWG

3.5.2.3 Option C-2 (c) – No Action

Under this alternative no center flow screening will be added to the headworks. Since the existing screening is not sufficient for alternative BNR processes, other methods of fine screening would need to be explored if the City wanted to move away from the current A^2O process.

3.5.2.4 C-2 – Cost Evaluation

TABLE 31: COST COMPARISON FOR CENTER FLOW SCREENING[1]

Item	Description	Option C-2 (a) - Supplemental 12 MGD, Center Flow Fine Screen	Option C-2 (b) – Two (2) New 6 MGD, 3 mm Center Flow Screens
1	Structural and Channel Modifications	$500,000	$50,000
2	Center Flow Screens	$1,300,000	$1,800,000
3	Washing Compactor	$200,000	$400,000
4	Electrical I&C	$200,000	$200,000
	Subtotal	$2,200,000	$2,450,000
	GC OH & Profit @ 20%	$440,000	$490,000
	Total Capital Cost	**$2,640,000**	**$2,940,000**
		Life Cycle Cost Analysis	
	Annual O&M	$30,000	$49,000
	Planning Period (yrs.)	20	20
	Estimated Inflation	3%	3%
	Present Worth	$3,086,000	$3,669,000

[1]No capital cost associated with Option C-2 (c) – No action

3.5.2.5 C-2 – Evaluation and Recommendation

TABLE 32: EVALUATION MATRIX FOR CENTER FLOW SCREENING

Alternatives	Evaluation Criteria[1]			
	Cost	**Compatibility**	**O&M/ Reliability**	**Total**
Option C-2 (a) – Supplemental 12 MGD, 2 mm Center Flow Fine Screen	**3**	**2**	**2**	**7**
Option C-2 (b) – Two 6 MGD, 3 mm Center Flow Screens	**2**	**3**	**3**	**8**
Option C-2 (c) - No Action	-[2]	-[3]	1	1

[1]Highest Score: 3; Lowest Score: 1. *See Section 3.1 for detailed explanation*

[2]No capital cost associated with this option

[3]Not compatible with any alternative BNR Processes

Based on the above table, **Option C-2 (b) Two 6 MGD, 3 mm Center Flow Screens** is the recommended alternative for Center Flow Screening due to its cost and higher compatibility with the recommended IFAS BNR Process.

3.6 Secondary Clarifiers

The existing collection and clarifier drive equipment are greater than 30 years old and have already been rebuilt once. They have reached the end of their useful life and are in need of replacement. The tanks are in good condition. The existing weirs are exposed to atmosphere and have developed considerable algae growth that requires frequent maintenance. Submerged weirs or weir covers are recommended to mitigate algae growth.

All clarifier alternatives will include new dry pit submersible RAS/WAS pumps, valves, piping and flow meters for both trains.

The options being considered for secondary clarification are as follows:

D-1 (a) – Spiral Blade Collection Mechanism with Weir Covers

D-1 (b) – Spiral Blade Collection Mechanism with Submerged Weirs

D-1 (c) – No Action

Descriptions, cost estimates and figures depicting the alternatives are detailed below:

3.6.1.1 Option D-1 (a) – Spiral Blade Collection Mechanism with Weir Covers

The components within the exiting secondary clarifiers have reached the end of their useful life and are in need of replacement. Four (4) 80-foot diameter clarifiers will be stripped down and replaced with Ovivo "C4" spiral blade clarifier components. The internal components as shown in **Figure 42** include:

- Complete C40HT drive assembly, with gear motor and drive torque control
- Complete motor drive package, including 1 hp gearmotor, sprockets, chain, and guard
- Drive torque control with micro switches and actuating pin
- Cage, 4 ft square box truss design, Carbon Steel
- Influent column, 30" diameter x 1/4" plate, flanged with influent ports, Carbon Steel.
- Rake arms, two full radius square box truss design including spiral rake blades (3/16" thick plate), Carbon Steel, with stainless steel squeegees. Blades taper from 8" at tank wall to 24" at tank center
- Rotating sludge collection drum, 8'-0" diameter, Carbon Steel
- Feedwell, 20' diameter x 6' deep x 3/16" plate with supports, Carbon Steel
- Energy dissipating inlet, 7' diameter x 3.5' deep with scoop gates and bottom plate, Carbon Steel
- Two (2) scum skimmers arms, Carbon Steel with skimming mechanisms and (1) 4' wide scum collection box with supports and outlet nozzle.
- Effluent weir plates, FRP, 9 inch deep x 1/4" thick with 2 1/2" deep 90 degree V-

notches spaced at 6 inch intervals.

- Scum baffle plates, FRP, 12 inch deep x 1/4" thick includes FRP supports.
- Launder system, FRP, 30 inch wide x 21 inch (nom) deep x 1/4” thick including drop out launder and supports fastened to tank wall.
- FRP weir covers will be installed to mitigate algae growth.

Ovivo’s complete design proposal is shown in **Appendix** D**.**

X:\100071852\11394.01\TECH\CAD\DRAWINGS\100071521394.01_CLARIFIERS-OVVO.DWG

3.6.1.2 Option D-1 (b) – Submerged Weirs

This alternative includes all the components of Option D-1 (a) Spiral Blade Mechanism with Weir Covers described above except the FRP launder system and weir covers which will be replaced with:

- FRP Submerged Effluent Launder (self-supporting)

The Submerged Effluent Launder comprising of an upper and lower launder section that performs the following five functions:

- Weir
- Scum Baffle
- Launder
- Density Current Baffle
- Launder Cove

3.6.1.3 Option D-1 (c) – No Action

This alternative involves no modifications to the existing clarifiers.

3.6.1.4 D-1 - Cost Evaluation

TABLE 33: COST COMPARISON FOR CLARIFIER UPGRADES[1]

Item	Description	Option D-1 (a) - Spiral Blade Collection Mechanism with Weir Covers	Option D-1 (b) - Spiral Blade Collection Mechanism with Submerged Weirs
1	Clarifier Replacement Components including Installation	$3,200,000	$4,000,000
2	Structural work (Repairs)	$115,000	$115,000
	Weir Covers	$550,000	-
	Electrical and I&C	$150,000	$150,000
	RAS & WAS Pumps	$800,000	$800,000
	Subtotal	$4,815,000	$5,065,000
	GC OH & Profit @ 20%	$963,000	$1,013,000
	Total Capital Cost	**$5,778,000**	**$6,078,000**
		Life Cycle Cost Analysis	
	Annual O&M	$96,300	$101,300
	Planning Period	20	20
	Estimated Inflation	3%	3%
	Present Worth	$7,211,000	$7,585,000

[1]No capital cost associated with Option D-1 (c) – No action

3.6.1.5 D-1 – Evaluation and Recommendation

TABLE 34: EVALUATION MATRIX FOR CLARIFIER UPGRADES

Alternatives	Evaluation Criteria[1]			
	Cost	**Compatibility**	**O&M/ Reliability**	**Total**
Option D-1 (a) - Spiral Blade Collection Mechanism with Weir Covers	3	3	1	7
Option D-1 (b) - Spiral Blade Collection Mechanism with Submerged Weirs	**2**	**3**	**3**	**8**
Option D-1 (c) - No Action	-[2]	-[3]	-	-

[1]Highest Score: 3; Lowest Score: 1. *See Section 3.1 for detailed explanation*
[2]No capital cost associated with this option
[3]Not applicable for this option

Based on the above evaluation, Option D-1 (b) – Spiral Blade Collection Mechanism with Submerged Weirs is recommended alternative for secondary clarification. This option has a slightly higher capital cost than Option D-1 (b) – Spiral Blade Collection Mechanism with Weir Covers but the City Staff has provided a higher weightage (score) on O&M/Reliability.

Option D-1 (c) – No Action provided no benefits except capital cost savings. The WWTP will continue to incur increased O&M costs and will eventually have to replace all internal components described above.

3.7 Deep Bed Filters

The existing filters are recommended for replacement with DeNora filters due to the City's proven and successful history with the DeNora filters along with the existing filter layout and dimensions. Technological advancements including significant control system improvements have been made in the DeNora TETRA™ DeepBed™ filter system to automate operations and reduce maintenance needs including automated carbon dosing, nitrate monitoring, air valve control, filter valve control, and backwash sequencing. Proposed filter improvements and replacement are detailed in this section. This work is already under design and scheduled for construction in the beginning of 2023. Estimated costs are not included herein. This work is already funded under the current C.I.P.

Filter Underdrain and Media

The filter underdrain provides support to the heavy filter media and passage for the collected filtered water. While the underdrain must support the filter media, it must also resist uplift and distribute backwash water and air. Rehabilitation and replacement of the existing filters will consist of:

- Removal of existing underdrain block and replace with new concrete filled HDPE jacketed underdrain block in each of the six (6) filter cells (**Figure 43**)
- Removal of all existing gravel and sand media and replacement with 1'-6" of new gravel and 6'-0" of new sand filter media in each of the six (6) filter cells

- Remove existing sump cover and debris inside sump in each filter of the six (6) filter cells and reinstall sump covers
- Power wash all filter floors, walls, and sump surfaces in each of the six (6) filter cells

FIGURE 43: PROPOSED DENORA UNDERDRAIN BLOCK

Flow Monitoring and Filter Flow Split

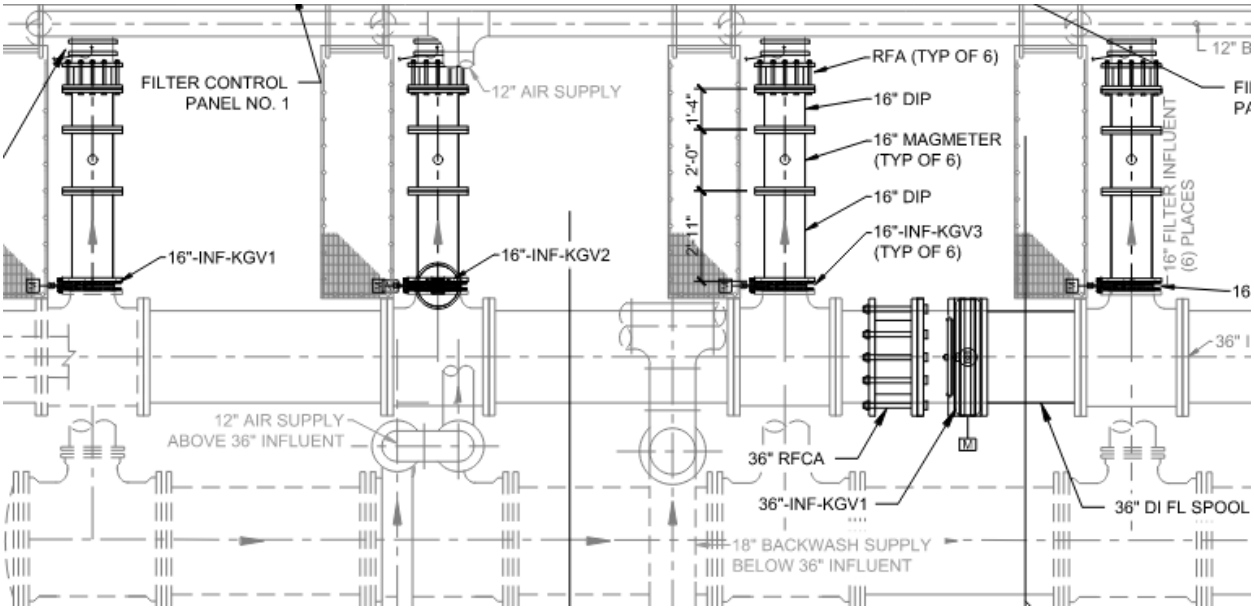
The two (2) existing in-line venturi flow meters do not currently provide accurate flow measurements and does not provide the City with the ability to determine flow to each filter cell. Inaccurate readings may be due to flow meter location being too far from the filter influent and/or recalibration is needed. The following is recommended:

- Remove and dispose of two (2) existing 36-inch insert venturi flow meters (optional)
- Remove all six (6) 16-inch pneumatic actuated influent line butterfly valves and replace with six (6) new 16-inch electric actuated modulating butterfly valves. Valves will modulate to provide an even flow split across all online filter cells.
- Install six (6) new mag meters, one (1) on each 16-inch filter influent line, proving individualized filter cell flow rates
- Install one (1) 36-inch motorized butterfly valve to provide ability to isolate the north and south clarifier flows and allow shut down of half of the filter cells
- Remove all pneumatic air lines
- Clean, sand blast and paint all existing piping

Dedicated mag meters, as shown in **Figure 44** below, will allow the City to measure and record flows going to each filter cell and modulate the proposed butterfly valves to obtain even flow split across all six (6) filter cells. The mag meters will also provide more accurate flow measurement over a wider range of flows than the existing venturi meters. Manufacturer upstream and downstream straight run tolerances will be coordinated in the detailed design phase to ensure accurate flow measurements.

In addition to the proposed flow split control scheme, each existing filter weir elevation should be verified through field survey or at a minimum visually inspected. Modifications to the weirs such as adjustable weir plates and concrete grinding can be utilized to modify existing weir elevations to match across all six (6) filter cells.

FIGURE 44: PROPOSED INFLUENT HEADER MODIFICATIONS

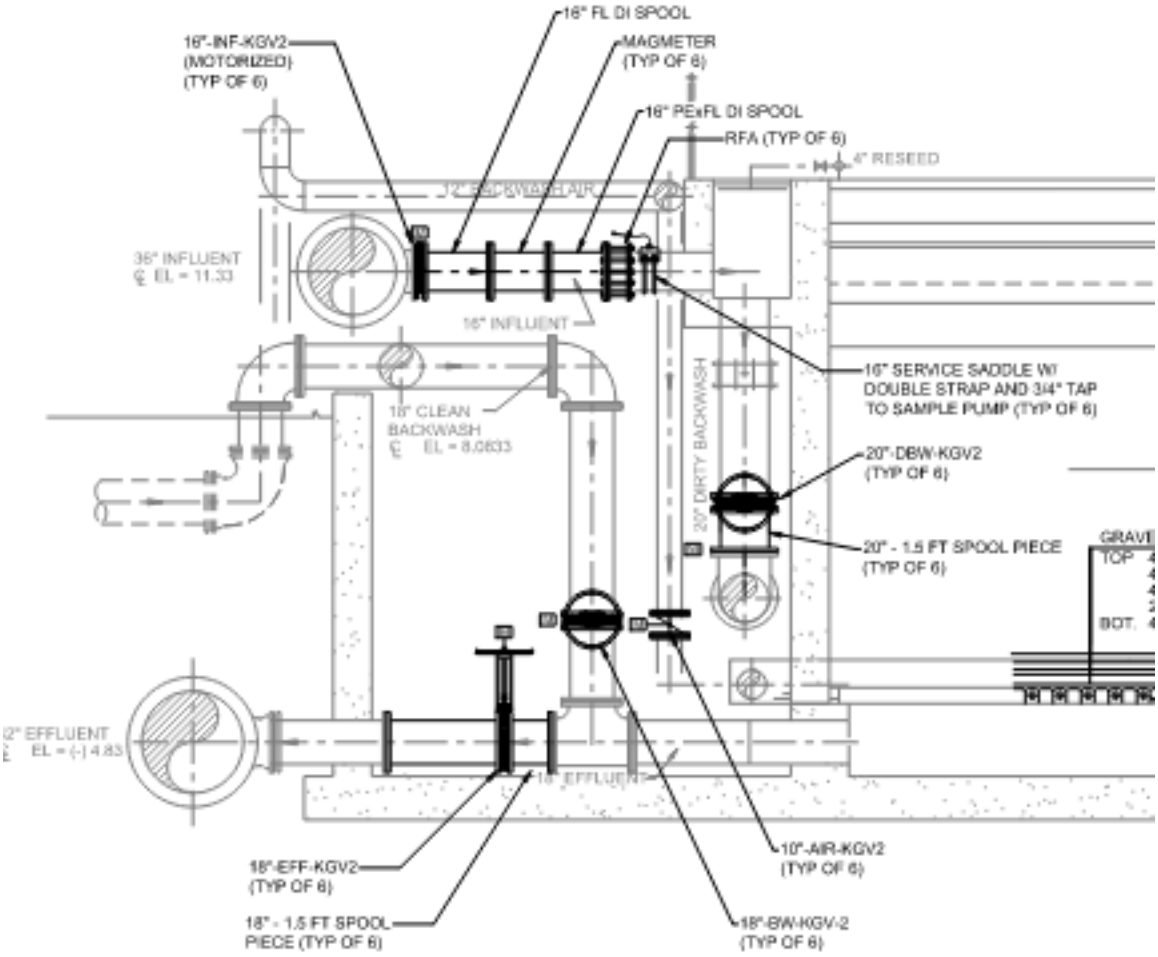


Effluent Piping and Filter Level

The filter levels can be better controlled by modulating the filter effluent butterfly valves. Filter level control will alleviate clearwell surges and limit dissolved oxygen (DO) introduction over the influent weir (minimizing carbon demand for denitrification). The following is recommended and is shown in **Figure 45** below:

- Install six (6) 18-inch insertion resilient seated gate valves on the existing effluent header located inside the filter piping gallery to provide operational flexibility of effluent line maintenance; installation will require special attention to maintenance of plant operations
- Replace all six (6) existing 18-inch effluent header butterfly valves with new 18-inch motor actuated modulating butterfly valves
- City to verify existing conditions of filter piping gallery sump pump and float switches
- Provisions to minimize valve electric actuator flooding in filter gallery piping area such as replacement of existing sump pump and control floats, additional sump pump installation, diesel back up power connection to the sump pumps, and/or IP68 rated actuators for valves located below the top of wall.
- Clean, sand blast and paint all existing piping

FIGURE 45: PROPOSED EFFLUENT FILTER PIPING MODIFICATIONS



The City is currently under working on above-described improvements as part of a separate contract and hence, these improvements will not be considered to part of this Facility Plan.

3.7.1.1 Cost Evaluation

This project is currently being designed and will be constructed in fiscal year (FY) 22/23. It is not currently proposed for funding as part of this clean water state revolving fund (SRF) program. As such, a separate cost evaluation is not prepared for the improvements described herein.

3.8 Disinfection and Effluent Transfer

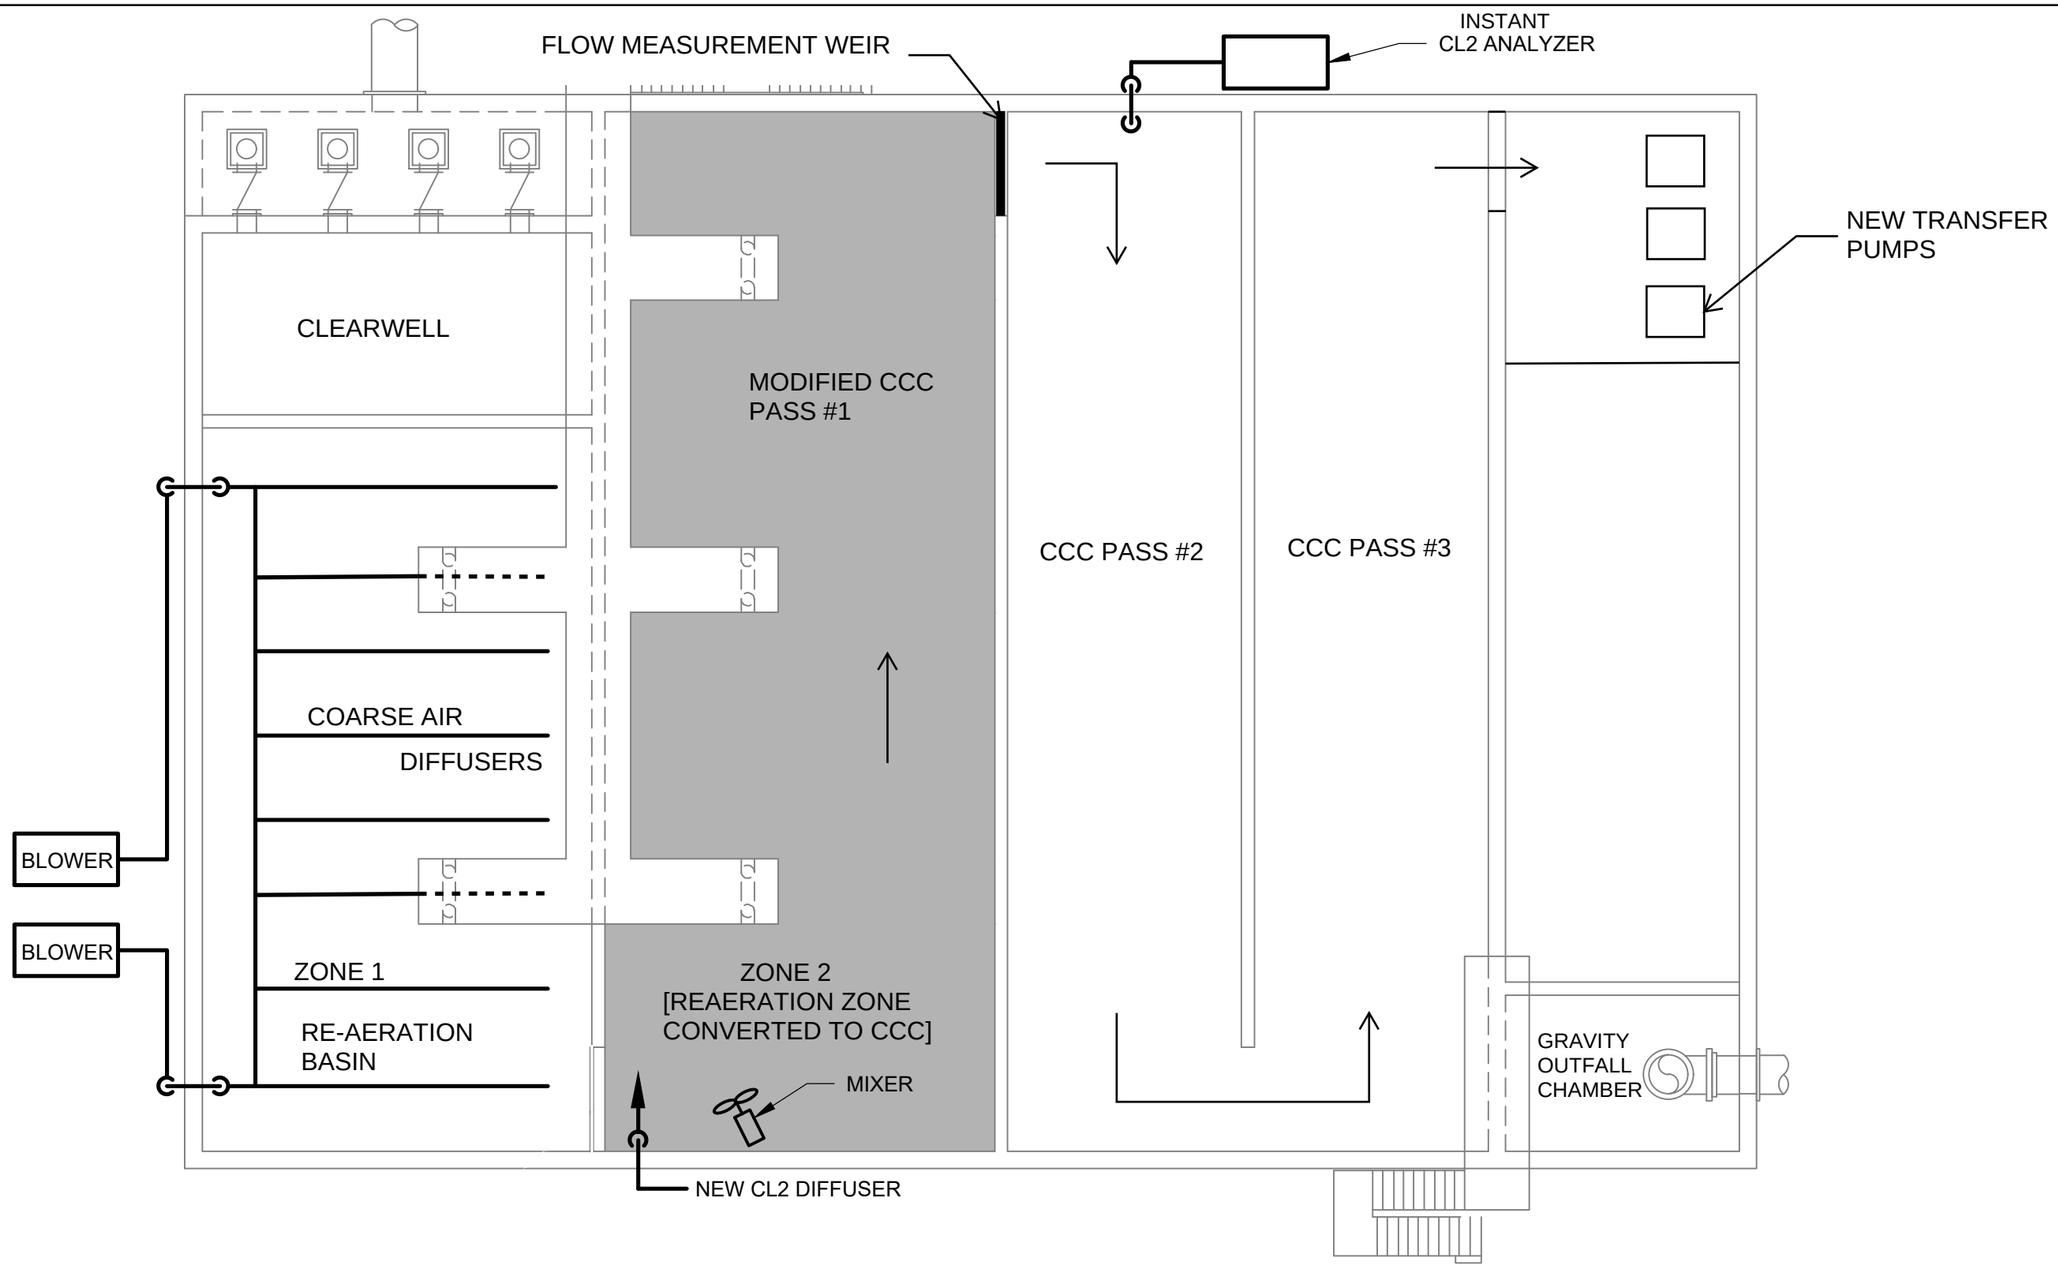
Flow from the deep bed filters is directed to the clearwell and reaeration chamber. Submersible aerators elevate dissolved oxygen levels prior to chlorine contact and transfer to the reuse storage tank. All flow not transferred to reuse is dechlorinated prior to discharge to the Halifax River.

The existing reaeration basin and chlorine contact chamber (CCC) have not been modified in over 20 years. The City's Staff have demonstrated operational challenges of re-aeration and CCC basins with variability of flow changes occurring due to filter backwash and other instrumentation accuracies. Following changes are being proposed as part of WWTP improvements:

- Addressing filterback wash flow variability into the clearwell by installing filter effluent flow modulating valves. This will maintain a steady filter level during the backwash cycle. **This project will be undertaken by the City in 2023-24 and not part of the overall Facility Plan**.
- Removal of existing submersible aerators and installing coarse air bubble diffuser system in Zone 1 as shown in **Figure 46** with two (2) new PD blowers.
- Conversion of Zone 2 of existing re-aeration basin to chlorine contact chamber, as shown in **Figure 46** , providing additional contact time.
- Addition of instantaneous Cl_2 measurement and Cl_2 injection points for optimum Cl_2 dosing.
- Lowering existing stilling wells around the outfall pumps by 1-foot, to increase outfall wetwell capacity, as shown in **Figure 47.**
- Replacing existing 36-in check valve and replacing effluent magmeter (as shown in **Figure 48**) with 90° bends for flooded discharge.
- Dechlorination (sulfur dioxide) improvements including new chemical skids and controls.
- Cover existing structure with aluminum roof system.
- Replace existing three transfer pumps and connect discharge to in-plant reuse system and 14" distribution main.

The outfall pumps are in good condition and will be kept in service as outfall pumps and provide backup to reuse transfer system as its currently utilized.

The transfer pumps need replacement and the entire structure should be covered to reduce Cl_2 consumption and algae growth.



RE-AERATION & CHLORINE CONTACT TANK IMPROVEMENTS

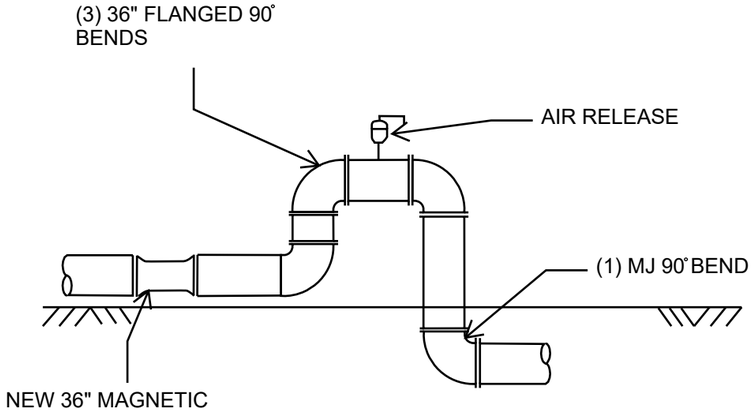
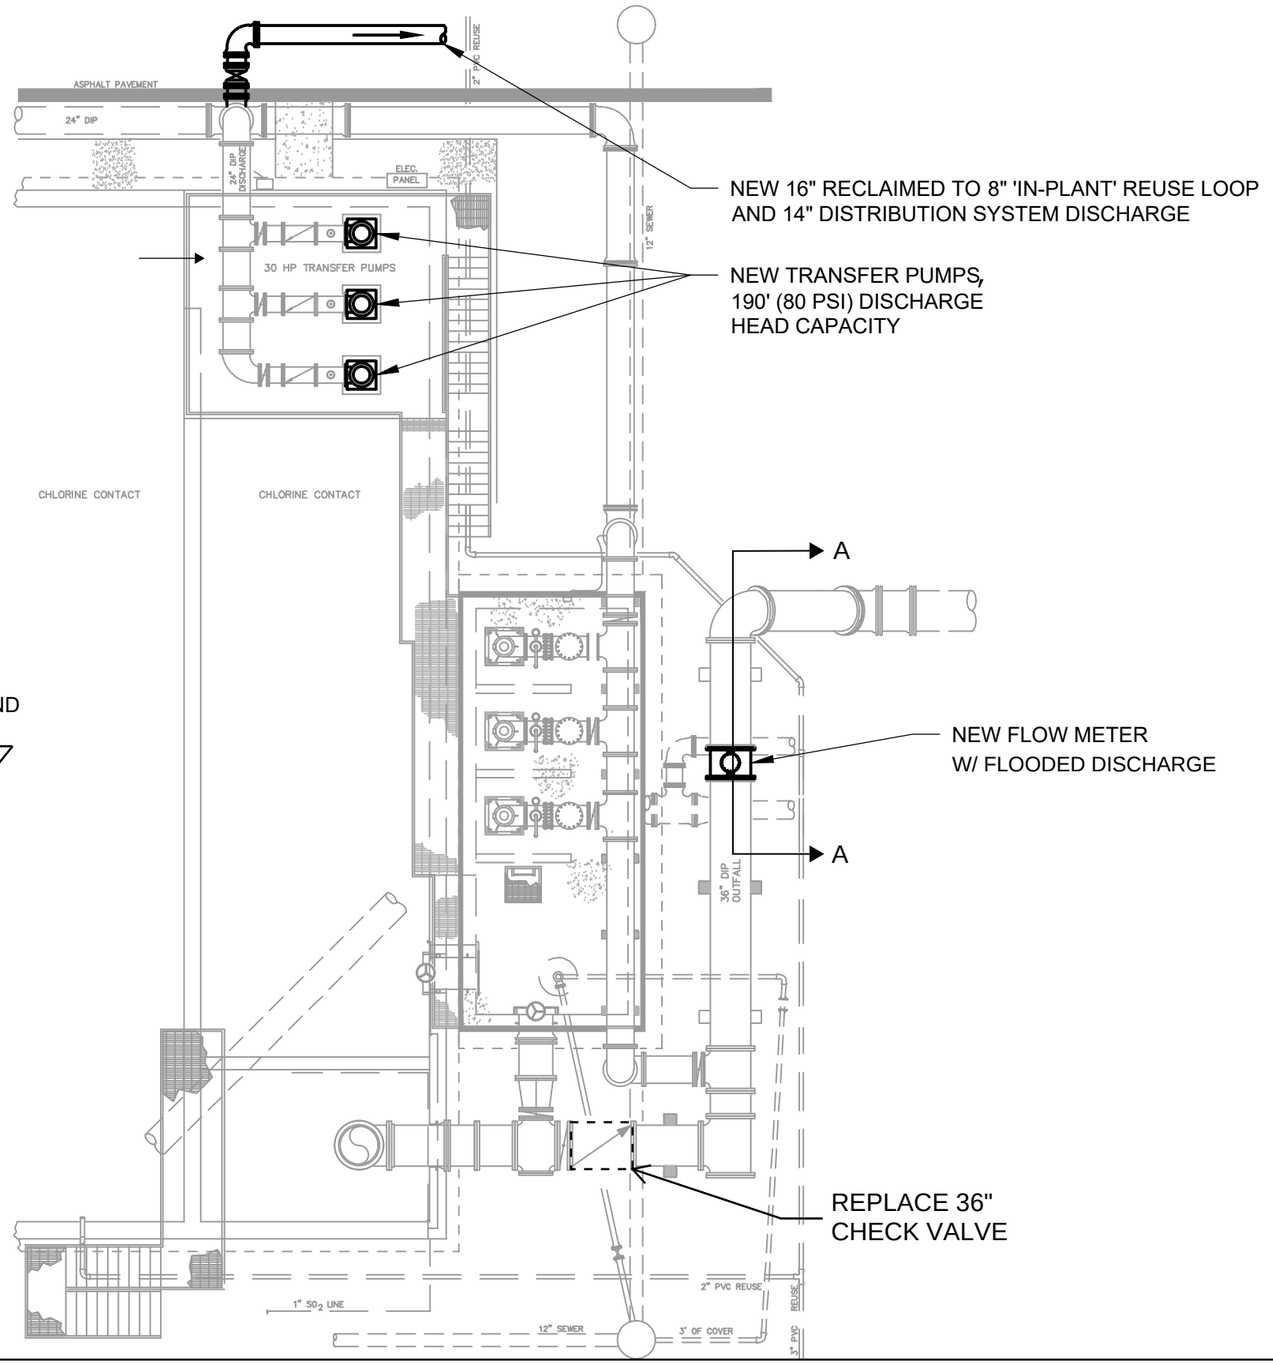
OUTFALL/TRANSFER PUMP STATION IMPROVEMENTS
(STRUCTURE #520)

FIGURE 47



SECTION A



OUTFALL/TRANSFER PUMP STATION IMPROVEMENTS (STRUCTURE #520)

FIGURE 48

The alternatives for existing transfer pumps are evaluated below:

E-1 (a) – Replace Existing Transfer Pumps and Cover Structure

E-1 (b) – Replace Existing Transfer Pumps with New In-Plant Reuse and Cover Structure

E-1 (c) – No Action

Descriptions, cost estimates and figures depicting the alternatives are detailed below:

3.8.1.1 Option E-1 (a) – Replace Existing Transfer Pumps and Cover Structure

The existing transfer pumps will be replaced with three (3) 700 gpm 190 ft vertical turbine pumps. Install aluminum canopy system over CCC.

3.8.1.2 Option E-1 (b) – Replace Existing Transfer Pumps with New In-Plant Reuse and Cover CCC

The existing transfer pumps will be replaced with three (3) 700 gpm 190 ft vertical turbine pumps. A 16-inch line will tie into the existing 24-inch discharge line and the 8-inch in plant reuse line, as shown in **Figure 48**. The transfer pumps will then be able to serve the in-plant reuse system and primary backup for high service. This will allow the plant to utilize in-plant reuse water even if the City closes their distribution. This alternative also includes covering the CCC with an aluminum canopy.

3.8.1.3 Option E-1 (c) – No Action

This alternative involves no modifications to existing Transfer Pumps.

3.8.1.4 E-1 - Cost Evaluation

TABLE 35: COST COMPARISON FOR DISINFECTION AND EFFLUENT TRANSFER[1]

Item	Description	Option E-1 (a) - Replace Existing Transfer Pumps and Cover CCC	Option E-1 (b) - Replace Existing Transfer Pumps with New In-Plant Reuse and Cover CCC
1	New Transfer Pumps	$500,000	$500,000
2	Piping and Valves	$15,000	$300,000
3	I&C Upgrades	$60,000	$60,000
4	Aluminum Canopy System	$250,000	$250,000
5	New Aeration and Expand CCC	$600,000	$600,000
6	Replace 36" Flow Meter and Check Valve (Includes Piping and Stilling Well Modifications	$500,000	$500,000
	Subtotal	$1,925,000	$2,210,000
	GC OH & Profit @ 20%	$385,000	$442,000
	Total Capital Cost	**$2,310,000**	**$2,652,000**
		Life Cycle Cost Analysis	
	Annual O&M	$38,500	$44,200
	Planning Period	20	20
	Estimated Inflation	3%	3%
	Present Worth	$2,883,000	$3,310,000

[1]No capital cost associated with Option E-1 (c) – No action

3.8.1.5 E-1 – Evaluation and Recommendation

TABLE 36: EVALUATION MATRIX FOR DISINFECTION AND EFFLUENT TRANSFER

Alternatives	Evaluation Criteria[1]			
	Cost	**Compatibility**	**O&M/ Reliability**	**Total**
Option E-1 (a) - Replace Existing Transfer Pumps and Cover CCC	3	3	2	8
Option E-1 (b) - Replace Existing Transfer Pumps with New In-Plant Reuse and Cover CCC	3	3	3	9
Option E-1 (c) - No Action	-[2]	-[3]	1	1

[1]Highest Score: 3; Lowest Score: 1. *See Section 3.1 for detailed explanation*

[2]No capital cost associated with this option

[3]Not applicable for this option

Based on the above evaluation matrix, it is recommended to implement Option E-1 (b) – Replace Existing Transfer with New In-Plant Reuse for the WWTP. This alternative provides additional flexibility and reliability for WWTP operations than the alternative of Option E-1 (a) – Replace Existing Transfer Pumps.

Option E-1 (c) – No Action alternative provides no benefit than initial capital cost savings and will eventually lead to higher O&M costs.

3.9 Sludge Handling Facilities

The City operates three (3) aerobic digesters, a gravity thickener and five (5) mechanical belt presses for sludge dewatering. All biosolids are transferred for further treatment to a contract BTF which is permitted by FDEP.

Project descriptions, cost estimates and a cost effectiveness analysis for each are included. The options being considered for each for the Sludge Handling Facilities are as follows:

3.9.1 Aerated Sludge Holding

Options considered for the Aerated Sludge Holding tanks include

Option F-1 (a) - (3) Digesters with Blower Replacement

Option F-1 (b) – New Blowers with Converted EQ Tanks

Option F-1 (c) – No Action

Descriptions, cost estimates and figures depicting the alternatives are detailed below:

3.9.1.1 Option F-1 (a) – (3) Digesters with Blower Replacement

This option includes the utilizing all (3) digesters in its current capacity as the aerated sludge holding tanks. This option also supports the EQ option described in Section 3.3.2.9. Per Section 3.3.2.9, it is recommended to:

- Replace the blowers with existing centrifugal blowers from the BNR structure.
- Remove and replace existing blower enclosure.
- Relocate blower electrical equipment.
- Maintain aeration grids.

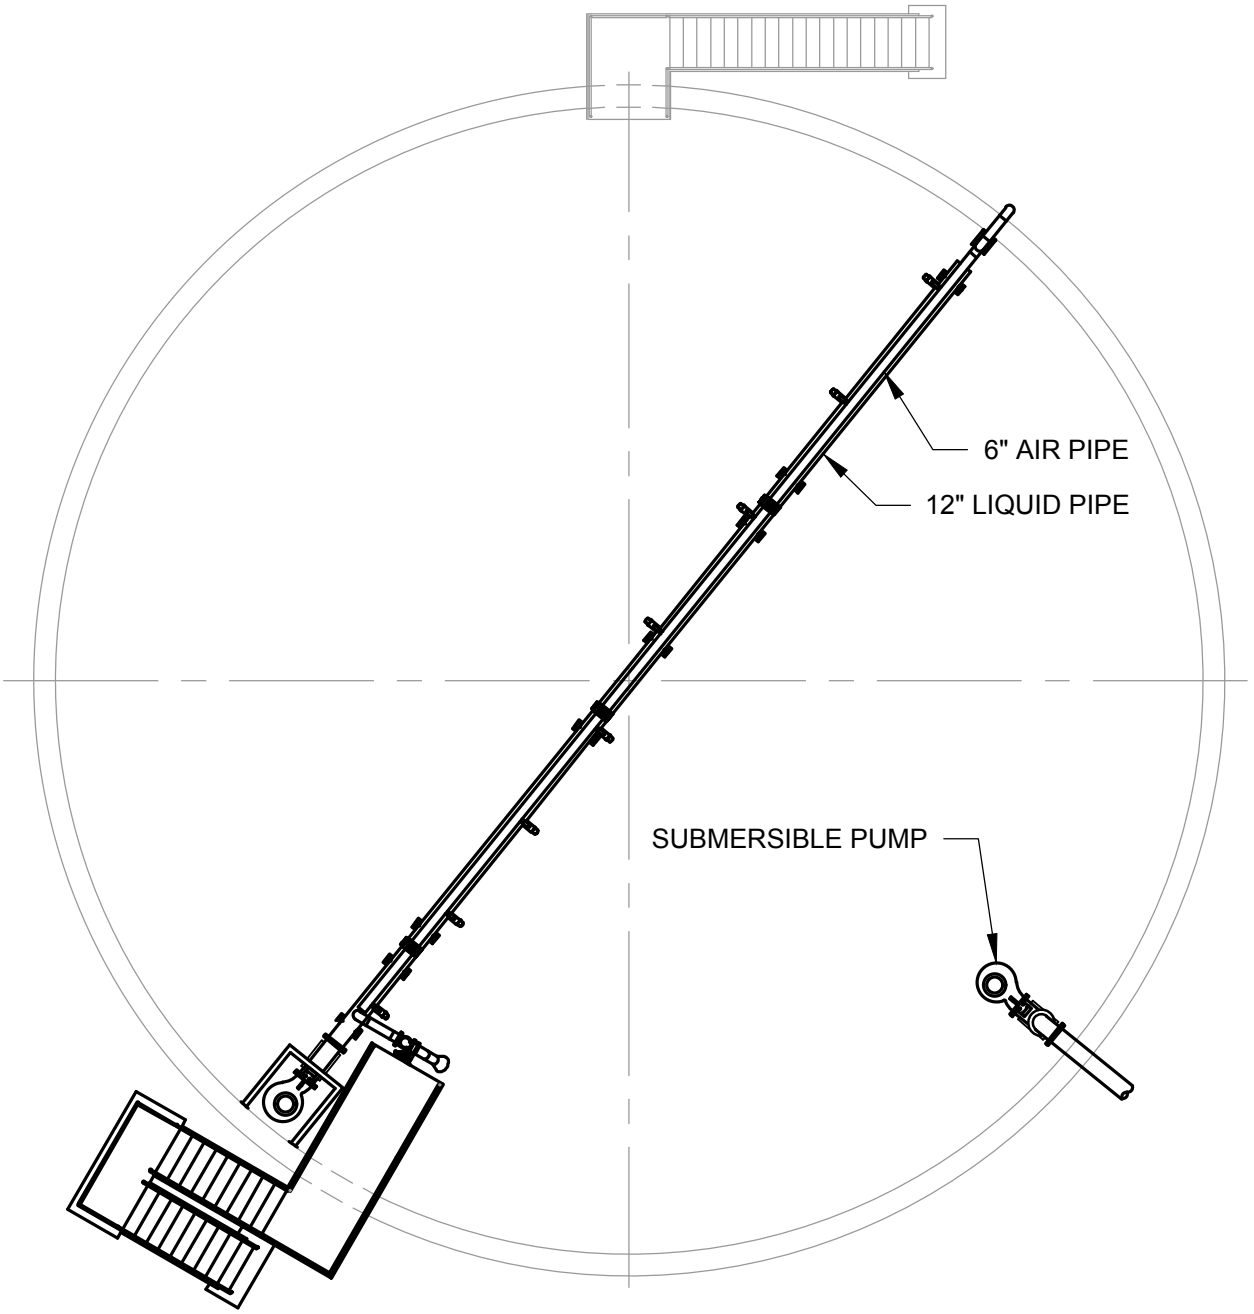
3.9.1.2 Option F-1 (b) – New Blowers with Converted EQ Tanks

This option will only be applicable if the City chooses Option B-3 (a) Flow Equalization (EQ) (See Section 3.3.3.2). This option involves converting two of the existing aeration sludge holding tanks to EQ Tanks. The EQ tanks will be interconnected and valved in such a manner that when needed, the WWTP can utilize one or both of the EQ tanks as sludge holding tanks. All existing sludge handling blowers will be replaced with three (3) hybrid PD blowers. To address the existing aerated sludge holding tank, per Section 3.3.2.9, one blower will be replaced along with the applicable ancillary equipment described above in Section 3.8.1.1 The proposed equalization tank and pump mounting detail are shown in **Figure**

49 and **Figure 50**.

3.9.1.3 Option F-1 (c) – No Action

This alternative involves no modifications to the existing aerated sludge holding tanks.



CONVERTED EQUALIZATION TANK

3.9.1.4 F-1 - Cost Evaluation

TABLE 37: AERATED SLUDGE HOLDING TANKS COST EVALUATION[1]

Item	Description	Option F-1 (a) - 3 Digesters with Blower Replacement	Option F-1 (b) - New Blowers with Converted EQ Tanks
1	Aeration Equipment Incl. Blower Replacement	$600,000	$600,000
2	Piping and Valves	-	$200,000
3	New Blower Enclosure	$100,000	$100,000
4	I&C Upgrades	-	$200,000
	Subtotal	$700,000	$1,100,000
	GC OH & Profit @ 20%	$140,000	$220,000
	Total Capital Cost	**$840,000**	**$1,320,000**
		Life Cycle Cost Analysis	
	Annual O&M	$14,000	$22,000
	Planning Period	20	20
	Estimated Inflation	3%	3%
	Present Worth	$1,048,000	$1,647,000

[1]No capital cost associated with Option F-1 (c) – No action

3.9.1.5 F-1 – Evaluation and Recommendation

TABLE 38: EVALUATION MATRIX FOR AERATED SLUDGE HOLDING TANKS

Alternatives	Evaluation Criteria[1]			
	Cost	**Compatibility**	**O&M/ Reliability**	**Total**
Option F-1 (a) - Digesters with Blower Replacement	3	3	1	7
Option F-1 (b) - New Blowers with Converted EQ Tanks	1	3	3	7
Option F-1 (c) - No Action	-[2]	-[3]	1	1

[1]Highest Score: 3; Lowest Score: 1. *See Section 4.1 for detailed explanation*

[2]No capital cost associated with this option

[3]Not applicable for this option

Based on the above evaluation matrix, Options F-1(a) and F-1(b) are tied. It is ultimately recommended to implement Option F-1 (b) due to the performance upgrade associated with converting to flow equalization.

3.9.2 Sludge Dewatering Alternatives

Options considered for the Aerated Sludge Holding tanks include:

Option F-2 (a) – Replace Existing 5 Belt Presses with 4 New Belt Presses and Add Sludge Truck Scale

Option F-2 (b) – Replace Existing 5 Belt Presses with 4 New Screw Presses and Add Sludge Truck Scale

Option F-2 (c) – No Action

3.9.2.1 Option F-2 (a) – Replace Existing 5 Belt Presses with 4 New Belt Presses and Add Sludge Truck Scale

This option includes replacement of all the existing five (5) belt presses with Four (4) New Belt Presses and installing a truck scale to measure sludge weight and volume.

3.9.2.2 Option F-2 (b) – Replace Existing 5 Belt Presses with 4 New Screw Presses and Add Truck Scale

This option includes replacement of all the existing five (5) belt presses with Four (4) New Screw Presses and installing a truck scale to measure sludge weight and volume.

3.9.2.3 Option F-2 (c) – No Action

This alternative involves no modifications to the existing dewatering equipment.

3.9.2.4 Cost Evaluation

TABLE 39: SLUDGE DEWATERING COST ESTIMATE[1]

Item	Description	Option F-2 (a) - Replace Existing 5 Belt Presses with 4 New Belt Presses	Option F-2 (b) – Replace Existing 5 Belt Presses with 4 New Screw Presses
1	Sludge Dewatering Equipment	$2,500,000	$2,800,000
2	I&C Upgrades	$25,000	$25,000
3	Progressive Cavity Pumps	$200,000	$200,000

	Subtotal	$2,925,000	$3,225,000
	GC OH & Profit @ 20%	$585,000	$645,000
	Total Capital Cost	**$3,510,000**	**$3,870,000**
		Life Cycle Cost Analysis	
	Annual O&M	$100,000	$129,000
	Planning Period	20	20
	Estimated Inflation	3%	3%
	Present Worth	$4,998,000	$5,789,000

[1]No capital cost associated with Option F-2 (c) – No action

3.9.2.5 F-2 – Evaluation and Recommendation

TABLE 40: EVALUATION MATRIX FOR DEWATERING EQUIPMENT

Alternatives	Evaluation Criteria[1]			
	Cost	**Compatibility**	**O&M/ Reliability**	**Total**
Option F-2 (a) - Replace Existing 5 Belt Presses with 4 New Belt Presses	3	3	3	9
Option F-2 (b) – Replace Existing 5 Belt Presses with 4 New Screw Presses	2	3	2	7
Option F-2 (c) - No Action	-[2]	-[3]	1	1

1. Highest Score: 3; Lowest Score: 1. *See Section 4.1 for detailed explanation*
2. No capital cost associated with this option
3. Not applicable for this option

Based on the above evaluation matrix, it is recommended to implement Option F-2 (a) – Replace Existing 5 Belt Presse with Four (4) New Belt Presses as dewatering alternative for WWTP. This option has lower

capital and O&M costs and provides easier operational advantages over Option F-2 (b) – Replace Existing Five (5) Belt Presses with Four (4) New Screw Presses. Option F-2 (c) – No Action has no advantages other than initial capital cost savings and eventually the existing belt presses will need to be replaced at a higher cost. O&M costs will also increase progressively with time.

4. Electrical and Instrumentation

This section discusses the existing electrical, instrumentation controls (I&C) present within the WWTP and proposed electrical and I&C improvements required to support all the recommended process improvements discussed in this Facility Plan Report

4.1 Electrical

4.1.1 Electrical System Criteria

The primary focus of the electrical system improvements is to achieve gains in overall electrical system reliability and improve the overall system's operational abilities. MH/BEC has identified that the existing electrical system does not provide EPA defined Class 1 Electrical Reliability and the single main breaker design is unreliable. Based on EPA guidelines for facilities of this type producing Class 1 reuse, it is recommended that a dual main electrical service be implemented for this facility. The existing electrical power system will need significant improvements in the near term in order to implement Class 1 reliability. The following serves to identify the suggested approach for achieving these improvements.

4.1.2 Normal Power System Recommendations

The existing WWTP site is served from two (2) separate FPL service points, north and south. The existing plant electrical service equipment is located near the north and south FPL transformers. This distribution equipment serves all plant electrical loads. The south electrical distribution equipment is currently being upgraded as part of the facility reliability improvements. The focus of this report is the facility's north electrical system.

A single 1600 amp main breaker/ATS/Switchboard serves the north electrical equipment. The service equipment is located below the 100 year flood plane and has received water damage. The reliability of the existing north electrical system is degraded and replacement is needed for all electrical components. In order to serve the estimated 1200 KVA of north facility loading and to implement Class 1 electrical service, we are providing a new north electrical system. Drawing E-1 shows the connections for this new service. Dual 1600 amp services are recommended. Each service will consist of a main breaker, ATS and MCC. The services will be interconnected after the ATS' to permit complete WRF operations in the event a single ATS or primary feeder is out of service. A single 1600 amp main breaker is capable of serving 1250 KVA (1250 HP) of loading continuously. This is designed to carry the entire north WWTF. The new electrical service equipment will be installed in an air conditioned building just west of the existing high service pump station. The proposed building size is 30' X 20'. The location will allow the most economical re feed of the north electrical components.

TABLE 41: ELECTRICAL IMPROVEMENTS COST ESTIMATE

Item	Description	Cost
1	Switchgear/VFDs	$2,100,000
2	Miscellaneous Electrical Equipment	$350,000
3	Conduit and Wire	$1,800,000
4	Labor	$2,200,000
5	Emergency Generator	$1,050,000
	Subtotal	$7,500,000
	GC OH & Profit @ 20%	$1,500,000
	Total Capital Cost	**$9,000,000**
		Life Cycle Cost Analysis
	Annual O&M	$150,000
	Planning Period	20
	Estimated Inflation	3%
	Present Worth	$11,232,000.00

4.1.3 Emergency Power System Recommendations

A single 600KW generator serves the north WRF facility. The existing generator is aging and requires replacement. The City desires to mirror the generator reliability installed with the South WRF electrical improvements. The upsized the generator size to handle the anticipated VFD loading for the future north facility improvements. MH/BEC recommend that dual natural gas fired 1000KW generators be installed to serve the north process improvements.

Dual generators increase emergency operational flexibility. In the event a single generator fails the second generator can be connected to operate the entire facility. Connecting generators via individual automatic transfer switches is less complicated than traditional paralleling equipment. This reduces down time and repair costs.

The estimated costs for this work are:

Total Emergency Generators **$1,050,000.00**

4.2 Instrumentation and Controls

4.2.1 Control System Considerations

4.2.1.1 Existing System

The existing process monitoring and control system has begun migrating from the old Data Flow system to the Rockwell Automation PlantPAx modern distributed control system (DCS). The initial foundation for this SCADA system is being completed in the East Master Lift Station Upgrades project. The new PlantPAx design allows for scaling and expansion as the rest of the facility migrates over.

The existing Data Flow SCADA system of the existing plant is provided via a Human Machine Interface (HMI) sub-system in the existing Operations Building and eighteen (18) Remote Telemetry Units (RTU) based control panels distributed throughout the plant.

The HMI sub-system comprises two PC-based server/workstations running HyperScada HMI application program. and miscellaneous peripherals. These components are inter-connected by a master Ethernet switch. This switch also provides a connection to Ethernet copper to fiber media converters. The fiber connections are then linked via separate fiber optic cables to similar media converters and Ethernet switches in each RTU.

Each of the above RTU control panels contain a data flow system (DFS) based PLC, Ethernet switch with Ethernet to fiber converter for network connections and an Uninterruptible Power Supply (UPS).

Between them, the PLC are directly connected (hard-wired) to all control equipment and field instruments thereby providing plant-wide monitoring and control functions via automatic PLC programs with centralized operator interface via the HMI sub-system.

4.2.1.2 Proposed Control System

4.2.1.2.1 Initial Considerations

Almost all of the existing process equipment will be affected by the plant improvements with extensive equipment replacements. Whereas the existing control system is largely still functional, much of the equipment is at or nearing end of life conditions. In addition, it is necessary to maintain plant operations to the maximum extent possible during the expansion process.

Because of the preceding requirements, a phased replacement plan shall be developed to migrate over the existing RTUs over to the PlantPAx system. This will allow new process equipment to be tested and started up while the existing process equipment continues to operate with the existing system. Once the newly installed equipment is sufficiently operational, the remainder of the existing equipment can be removed from the existing system and replaced.

4.2.1.2.2 PICS Design

As with any wastewater treatment facility, continued process operation is essential. This is why process equipment is provided in a minimum of X+1 configuration – i.e. any failure of a specific process component can be tolerated while maintaining full treatment capacity. Likewise, the control system must be designed such that any component failure causes minimal loss of process operation.

The proposed HMI sub-system will generally comprise the following:

- Rack-mounted, dual redundant HMI application servers. These will be furnished with the latest version PlantPAx (Factory Talk Supervisory Edition) application software package. It is recommended that an annual service agreement be procured such that all future upgrades to the software be provided thereby ensuring the system remains current. The redundancy feature ensures that no data or operational functions are lost in the event of a server failure.

- Two tower PC-based operator workstations in the Control Room. Each will be provided with PlantPAx thick client application software to allow operators complete interface with the HMI server software. The workstations will be provided with minimum 32” displays and a Uninterruptible Power Supply (UPS).

- A full color network laser printer in the Control Room for reports and screen capture.

- A third PC-based operator workstation in the Laboratory. This workstation will be equipped the same as the Control Room workstations. It will allow users to enter laboratory data directly into the HMI package for development of required reports. In addition this workstation will be provided with a local printer.

- Two rack-mounted Ethernet mixed media switches. These switches will provide interconnection between all HMI sub-system components and the distributed plant PLC. Each HMI server will be connected to both switches which will, in turn, connect to two independent network Local Area Networks (LAN). Dual switches provides network resiliency in that, if a network link fails, only a maximum of 50% of automatic operations are affected.

- A System Network Rack. This will be a rack housing the HMI servers, master Ethernet switches and miscellaneous RJ45 and Fiber marshalling panels. It will be provided with a UPS for all included equipment. Space will also be provided for any City IT components needed for Wide Area Network (WAN) or administrative networking components.

New process equipment will be powered through Solid State Soft (SSS) starters, Variable Frequency Drives (VFD) and Full Voltage Non-reversing (FVNR) starters located within the existing facility buildings.

All new process equipment will be provided with Ethernet/IP communications. This significantly reduces installation and start-up problems by allowing the MCC line-ups to be fully factory tested prior to shipment to the job site and reduces necessary field wiring following installation.

The plant PLC control will be based on redundant Allen Bradley Controllogix Programmable Logic Controller (PLC). The first redundant PLC-1A will be located in the East Master Lift Station building,the second redundant PLC-1B will be located at the Future West Electrical building, initially located at the East Master Lift Station Building. Each Process Control Panel (PCP-1A and PCP-1B) will contain its respective PLC, an Allen Bradley ControlLogix 1756-L85EP PLC, external tower PC HMI operator workstation and external Network Interface Panel (NIP-1A and NIP-1B). The PLC will provide automatic control of associated plant processes while the operator workstations will provide operators at that location with monitoring and control capability over the entire plant via a new HMI sub-system in the Future Operations Building. Each NIP contains components needed to interconnect the system into a single, integrated unit.

Hard-wired field signals will be connected to Remote Input/Output RIO drops containing Allen Bradley Flex 5000 modules. In addition to RIO drops at each PLC location, new Remote Control Panels (RCP) will be provided throughout the facility to interface with field instruments. Each RCP remote RIO will be connected via fiber to the NIPs. See attached network diagram with possible RIO locations.

Future Vendor PICS equipment will be furnished by the Process Supplier while those in the Electrical Buildings and Operations Building will be provided by the PICS System Supplier. The latter will also be responsible for ensuring overall system operation.

The new PICS equipment at all new buildings and the Future Operations Building will be interconnected by an Ethernet/IP fiber optic network. The use of fiber optic maintains electrical independence of each structure while rendering the connections impervious to electrical disturbances such as lightning strikes.

4.2.1.2.3 System Availability Design

This sub-section describes the PICS design features that maximize overall system availability.

100% control system availability, while possible, is prohibitively expensive. However, it is possible to approach that goal relatively cost-effectively through the use of industrialized, high reliability components that results in infrequent failures coupled with a resilient PICS design that ensures such infrequent failures cause minimal loss of overall automatic control of the affected processes.

The redundant PLCs in the East Master Lift Station Building (PLC-1A) and Future West Electrical Building (PLC-1B) will be interconnected over the fiber network and configured as dual redundant PLCs. This means that, should PLC-1A fail, then PLC-1B will automatically assume control– hence no process disruption. To provide this increased availability requires minimal additional hardware cost and, though it increases PLC programming complexity somewhat, should not cost significantly more than a non-redundant configuration.

All Network Interface Panels; NIP-1A in the East Master Lift Station Building, NIP-1B in the Future West Electrical Building, NIP-3 in the Blower/Filter Building, and the SNR in the Future Operations Building will each be provided with two UPS power supplied Ethernet switches. The NIP switches will be powered by

the PCP Uninterruptible Power Supply (UPS) to avoid switch self-reconfiguration delays in the event of an MCC power loss. The witches will be inter-connected between the buildings to form two separate Local Area Networks (LAN); LAN-1 and LAN-2. This ensures that, in the unlikely event that a connection fails, at least half the network will remain unaffected.

Further availability will be provided by dual MCC at each new building. Like process equipment at each location will be split between the MCC. In addition, each MCC will be provided with dual Ethernet switches with like equipment within an MCC split evenly between switches. This again ensures that a switch fault causes minimal loss of automatic control. The MCC switches will be powered by the PCP Uninterruptible Power Supply (UPS) to avoid switch self-reconfiguration delays in the event of an MCC power loss.

Each I/O drop will be provided with a communications adapter (RIO) that connects to the PICS via a Device Level Ring (DLR). A DLR is a ring network that reroutes data automatically should there be a fault in the ring thereby increasing PICS availability.

Finally, processes will be reviewed and any that are critical to operations (e.g. effluent pumping) will be provided with an independent back-up control panel that will automatically assume control of the process using different (non-PLC) technology in the event of loss of PLC control.

Following drawings for preliminary control system network diagrams are included in **Appendix E**:

I-01: INSTRUMENTATION NOTES, LEGEND & ABBREVIATIONS
I-02 : FACILTY PLAN NETWORK DIAGRAM

I-04: PCP-1B AND NIP-2 NETWORK RISER DIAGRAM 2
I-05: NIP-3 AND RIO NETOWRK RISER DIAGRAM 3

4.2.2 Instrumentation And Control Requirements

4.2.2.1 General

To ensure a consistent approach is used throughout the PICS and that ongoing local system support is available, a single company, the SYSTEM SUPPLIER, will be assigned overall responsibility for the PICS. The SYSTEM SUPPLIER will furnish and program all PICS HMI, PLC and networking equipment except for the Process specific equipment. The Process Supplier will be responsible for furnishing the PlantPAx compatible programming, to be integrated to the two redundant PLC and related PICS equipment. The Process Supplier will be required to furnish the same components as used in the rest of the PICS. Furthermore, to ensure availability of long term system support, all Process programming will be required to be performed either by the PROCESS Supplier's own direct employees or by sub-contracting the Work to the SYSTEM SUPLIER.
The SYSTEM SUPPLIER shall be responsible for:

- The integration of the system including the OWNER furnished Process Control Panel, PLC and

SCADA programming, networking, computer system network, panel layouts and wiring,VFD programming and configuration, network communications programming, assignment of all Ethernet IP addresses (in coordination with the City's IT Department) and computer system application software setup.

- All application software configuration including all operator interface screens, reports, and database(s).
- All hardware and software submittals. The SYSTEM SUPPLIER shall develop the panel shop drawings, wiring diagrams, plumbing diagrams, PLC and computer hardware configuration drawings and layouts, software documentation. Coordination with the CONTRACTOR and other subcontractors (particularly the Process Supplier) shall be the responsibility of the SYSTEM SUPPLIER.
- Ordering, fabrication, assembly, delivery and start-up of the PICS. All panels furnished by the SYSTEM SUPPLIER shall be fabricated at the SYSTEM SUPPLIER's shop.
- Coordinating all interface requirements with mechanical and electrical system suppliers and furnishing any signal isolation devices that might be required In order to insure compatibility between all equipment.
- Defining the final installation and connection requirements of the PICS at the jobsite through development of interconnection diagrams.
- The final system operation and reliability. All required tests and training shall be under the on-site supervision of the SYSTEM SUPPLIER.

The SYSTEM SUPPLIER will be required to submit a System Integration Plan (SIP) prior to any other shop drawing. The SIP shall contain:

- A PICS network diagram showing all components connected to the network.
- The network switches to which they connect including identification of all spare ports.
- Proposed IP addresses of all network connected components.
- A preliminary listing of all field instruments and their supplier.
- A preliminary listing of all PICS I/O.

The intent of the SIP is to ensure, as soon as possible, that all required PICS components are accounted for and which entity will be supplying them.

Extensive testing will be required at various stages of the project including:

- A witnessed Factory Acceptance Test (FAT). Following shop factory tests, the MCC line-ups and sample stand-alone drives and starters will be shipped to the SYSTEM SUPPLIER's facility for integration with the PLC and HMI components. The test will cover all aspects of PICS operation and be conducted using pre-approved test procedures. The SYSTEM SUPPLIER will be required to pay reasonable travel and lodging expenses for four City or Engineer personnel to attend this test which is expected to last a week.
- Operational Readiness Tests (ORT). Following satisfactory completion of the FAT the PICS equipment will be shipped to the plant for installation and start-up. As part of the start-up the SYSTEM SUPPLIER will be required to check-out each individual control loop from the field device through to the HMI using pre-approved check-out and calibration sheets.

- Field Demonstration Tests (FDT). Following start-up, all functions of the PICS operation shall be demonstrated as operational. These witnessed tests will be sporadic since equipment will be brought on-line at different times during construction,
- System Availability Test (SAT). Once the complete PICS is on-line and operational, a 30-day SAT will be started. During this test City personnel will be operating the system which shall be required to provide a sequential 30-day fully operating system without a field repairable failure (i.e. not repaired within 24 hours) and a system availability of 99.5%.

4.2.2.2 Field Instruments

Where available, field instruments which provide Ethernet communications (i.e. electromagnetic flow meters, analyzers, etc.) will be used in lieu of hard-wired. Such Ethernet connections will be implemented via fiber over a DLR network.

All loop powered field instruments shall be equipped with surge protection on the 4-20 ma signal lines. The surge protectors shall be encapsulated in Stainless Steel nipples for conduit mounting. All other analog field instruments shall be equipped with surge protection on the 4-20 mA signal lines and the power lines. The instrument, a breaker and the surge suppressor shall be mounted on a ½-inch aluminum plate. Outdoor plates shall be equipped with 1/8 inch sun shields on top and both sides with front panel facing north wherever practical.

4.2.2.3 Control Panels

Except where specifically noted otherwise, all outdoor panels and enclosures containing electronic or electrical components shall be equipped with sunshields on both sides, the front, the back and the top with a minimum separation of one inch and a maximum separation of one and one-half inches. Sun shields shall be 14 gauge Stainless Steel or 12 gauge Anodized Aluminum or thicker. Finish with reflective white, two part epoxy coating or reflective, white, polyester powder deposited coating.

All outdoor control panels and enclosures shall also be equipped with 3 ½" stainless steel mounting uni-struts across the width of the back. For free-standing panels the struts shall be located half-way up the panel and six inches from the top. For other panels they shall be located 3" from the top and 3" from the bottom.

All panels containing PICS components (e.g. PLC, remote I/O drops, network switches, etc.) will be provided with a hand switched LED light, duplex convenience outlet and Uninterruptible Power Supply.

All discrete inputs entering a panel containing PLC components shall be wetted by 120 VAC. Provide isolation relays if necessary to accommodate this requirement. All discrete output signals shall be equipped with interposing relays to electrically isolate them from the control system I/O. All wiring entering or leaving the panel shall be provided with surge suppressors.Programming

4.2.2.3.1 HMI Subsystem

The SYSTEM SUPPLIER will be required to provide complete programming of the replacement PlantPAx FactoryTalk SE HMI application. This will start with an initial submittal of all color process graphics. They

will be required to follow the existing general graphic standards to preserve current operator understanding. Operator graphics will include:

- A site overview. This will be a plan view of the plant which indicates problems on specific locations that require operator attention. It will also indicate current major plant information (e.g. influent flow, equalization tank conditions, treatment train status, effluent flow and water quality, etc.). No operator process control will e available directly from this screen.
- A process overview. This will depict the entire plant process with major component status and process values similar to the site overview. Also, like the site overview, no operator process control will e available directly from this screen
- Process Screens. Each individual process (e.g. headworks, equalization, etc.) will be provided with its own graphic depicting more specific conditions for that process. Process graphics will be provided by the Process supplier and will match other graphics in style and structure. All operator graphic screens will be accessible through a pull-down menu or by clicking the appropriate portion on one of the overview screens. Operator control of the process will be available from this screen either directly or through pop-up windows.
- Control System. This graphic will depict the PICS system diagram and indicate the status of all network equipment and communication links. More detailed status information (e.g. individual PLC modules, etc.) will be provided via pop-up displays.
- Electrical System. This will be a tabular list of current values of all power status and monitoring.

The SYSTEM SUPPLIER will also be required to provide a minimum of six reports and six trends to City requirements.

4.2.2.3.2 PLC Programming

Prior to performing any detailed PLC programming, the SYSTEM SUPPLIER and Process Supplier will be required to provide an application programming submittal. The intent is to check that the proposed PLC program meets the specified functional requirements of the PlantPAx system. This submittal will describe each proposed control strategy including specific details of any equations used (e.g. for chemical feed pump speed control).

Regardless of any review comments on this submittal, programming acceptance will only occur following successful performance during the FDT.

4.2.2.4 Training

Although system support will be available locally through the SYSTEM SUPPLIER, it is important that City personnel be adequately use and correct problems with the PICS. The following training will be provided:

- Field Instrument Training. Up to three City personnel will be trained on the operation and maintenance of field instruments by the SYSTEM SUPPLIER, on-site during the ORT.
- Factory Training. $10,000 dollars of recommended on-line factory training will be required of the SYSTEM SUPPLIER for HMI and PLC operation.
- Six operators will be provided with two day’s on-site training on the use of the operator graphic screens.

- Two operators will be provided with four day's on-site training on the PLC programming and maintenance.

4.2.3 Cost Estimate

TABLE 42: INSTRUMENTATION AND CONTROL COST ESTIMATE

Item	Description	Cost
1	PLC ad Network Hardware	$1,800,000
2	Fiber Optic Cable and Miscellaneous Material	$350,000
3	Programming	$1,100,000
	Subtotal	$3,250,000
	GC OH & Profit @ 20%	$650,000
	Total Capital Cost	**$3,900,000**
	Life Cycle Cost Analysis	
	Annual O&M	$65,000
	Planning Period	20
	Estimated Inflation	3%
	Present Worth	$4,867,000

5. Support Facilities

This section describes the additional facility improvements needed to support the WWTP process improvements described in this Facility Plan and modernize the entire Plant.

5.1 Elevated Walkways

This project includes construction of a new elevated steel walkway as shown in **Figure 53** and connecting all process structures within the WWTP site.

Estimated cost = $500,000

5.2 Modified Operations and Laboratory Facilities

The City has recently been exploring alternatives for a new operations building to house the WWTP staff with a modernized laboratory. This Facility Plan provides one such alternative for City to consider and is shown in **Figure 54**. The modifications will include addition of a new 2nd floor which will house new offices and control room thereby providing a complete operational view of the WWTP. The control room shall be connected to the elevated walkway as shown in **Figure 53**.

Estimated cost = $2,000,000

5.3 New Maintenance Building

It is proposed that the existing maintenance storage building (Structure #820) will be demolished and a new 2,500 square feet pre-engineered metal building with parking facilities will be constructed.

Estimated cost = $300,000

5.4 Reclaimed Water and Effluent Disposal

The City of Port Orange (City) owns and operates the R. Dwayne Huffman Reclaimed Water Plant (RDHRWP). The rated capacity for this plant is 12 MGD. The reclaimed water that is produced is used for public access reuse (R-001), recharging wetlands (D-002), and discharge to the Halifax River (D-001). The City's RDHRWP is permitted for 10.5 MGD average annual daily flow (AADF) to public access reuse (PAR) and 0.999 MGD AADF to the Halifax River and to recharging wetlands. The sum of the flows to D-001 and D-002 are not to exceed 0.999 MGD on an annual average basis.

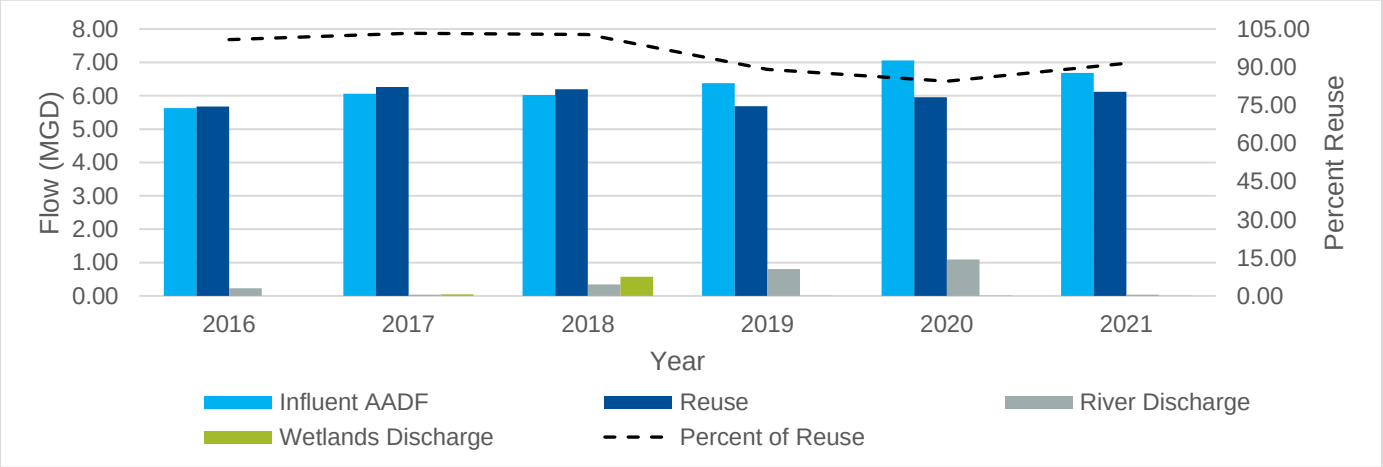
The dominant source of effluent disposal for the past 10+ years has been via public access reclaimed water. The City has a large storage reservoir that occupies 175 acres and provides nearly 200 MG of seasonal storage. Historically, this volume has been sufficient for the City to meet seasonal demands from storage and virtually eliminate river discharge.

Since 2016, the City has beneficially utilized approximately 95% of it's reuse. **Table 43** and **Figure 51** define and depict historical effluent management trends. **Figure 52** depicts excessive rainfall in in 2020 that created a condition wherein the available storage was fully utilized requiring discharge to the river.

TABLE 43: HISTORICAL AND AVERAGE REUSE FLOWS

Year	Influent AADF (MGD)	Reuse AADF (MGD)	Reuse Percentage of Influent AADF
2016	5.63	5.68	101%
2017	6.06	6.26	103%
2018	6.02	6.20	103%
2019	6.37	5.68	89%
2020	7.05	5.96	84%
2021	6.69	6.12	91%
Average	**6.23**	**5.96**	**95%**

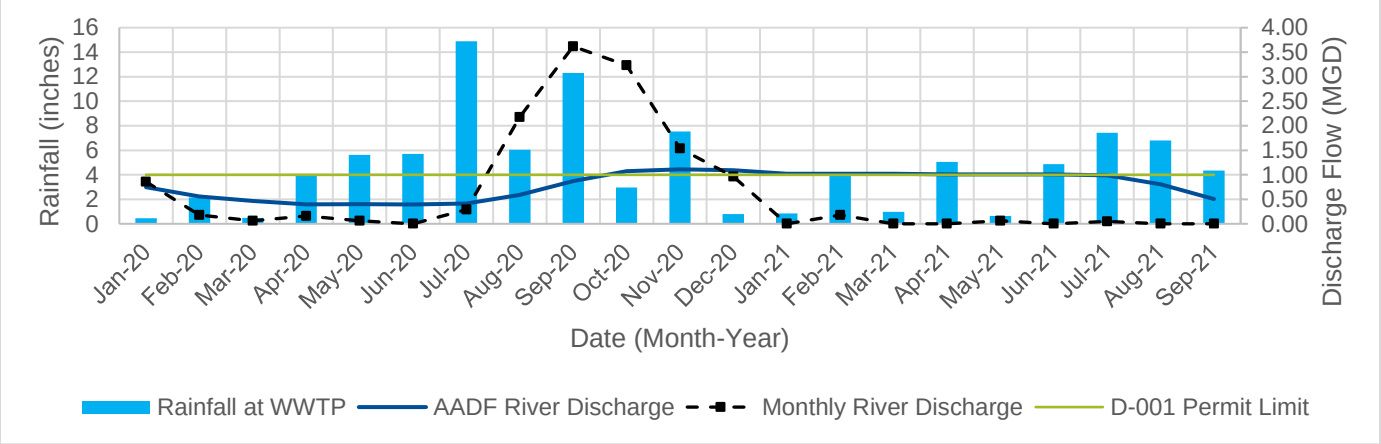
FIGURE 51: TOTAL EFFLUENT DISTRIBUTION



Notes:
(1) Reuse AADF exceeds the influent AADF in some cases due to reservoir storage and augmentation.

(2) Influent AADF in 2020 and 2021 was calculated using the total effluent AADF due to inaccurate readings from the WWTP's influent flow meter.
(3) Influent AADF in 2021 are through September 30, 2021.

FIGURE 52: RAINFALL AND RIVER DISCHARGE RATES



As evidenced this data, the City exceeded its annual average river discharge permit limit of 1.0 MGD in 2020. This exceedance resulted in issuance of a consent order and subsequent compliance plan. An analysis of various alternatives was prepared as a part of the Consent Order. This plan, "Corrective Action Plan (August 2022) ", is included by reference. The City is currently in the process of implementing this plan. An evaluation was prepared identifying various compliance options and an implementation schedule for the selected alternatives. They have been prioritized in order to expedite compliance and plan for future growth. Cost estimates are only provided for those projects not currently funded for consent order compliance. They are prioritized as **Immediate, Short Term and Long-Term** projects. Time horizons for project completion are as follows:

- Immediate 1 to 3 years
- Short Term 3-5 years
- Long Term 5+ years

TABLE 44: EFFLUENT MANAGEMENT ALTERNATIVES AND CORRECTIVE ACTION SUMMARY

Project No.	Priority	Corrective Action	Solution Methodology & Description	Est. Cost
RW - 1	Immediate	Modify Existing Reclaimed Lake Reservoirs	Additional reclaimed water storage during wet season and/or low demands (R-001) and later withdrawn from to meet peak reclaimed water demands	N/A
RW-2	Immediate	Repair splitter structure intake pipe and repair filter	Fix leak in 30” HDPE, replace filter media, install additional CL2 feed equipment and instruments (design for both filters)	N/A
RW-3	Immediate	Inspect and Repair/ Replace Gravity Sewer System Components	Reduction of inflow and infiltration to reduce wastewater influent flow rates, resulting in reduced reclaimed water production during wet weather events	N/A
RW-4	Short Term	Construct New Reclaimed Lake Reservoir	Additional reclaimed water storage during wet season and/or low demands (R-001) and later withdrawn from to meet peak reclaimed water demands	$2M
RW-5	Short Term	Relocate existing filter WWTP to reservoir	Mover existing floc tank and filter from WWTP, install new media and outfit Cl2 feed	$500K
RW-6	Short Term	Permit & Construct Underground Injection Control (UIC) Test Well	Begin UIC test well permitting process and construct test well at Oak St WWTP. Perform cycle testing to determine viability of lower Floridan aquifer ASR or injection.	$2.5M
RW-7	Long Term	New Western GST & PS at Pioneer Trail	Construct new transmission main, 2 MG ground storage tank and pump station at Pioneer Trail	$3M
			TOTAL	**$8M**

6. Proposed Port Orange WWTP Modifications and Conceptual Cost Estimate

This section summarizes all the recommended alternatives described in Section 3 along with all the other required improvements at the WWTP. A brief summary of each recommended project is described in the following subsections.

6.1 Project Descriptions

The following improvements are being proposed for the ELMS and WMLS:

6.1.1 Influent Pumping

6.1.1.1 Option B-1 (a) - Replacement of Influent Pumps with Two (2) 5200 gpm Screw Centrifugal Pumps at WMLS (*Note: EMLS is currently undergoing upgrades*)

1. Replacement of all influent piping valves
2. Installation of new VFDs and controls

6.1.1.2 Option B-2 (b) - New Primary Screening with Flow Equalization

1. Installation of Duperon 'FlexRake' 6 mm screen with a hydraulic capacity of 12 MGD at EMLS and WMLS with associated piping and valves
2. Conversion of existing two (2) digestors to Flow Equalization (EQ) Basins
    a. Includes provision with valves and controls to utilize either or both EQ basins as sludge holding tanks when required
3. Installation of New mixing system per Basin
4. Installation of New Submersible EQ Transfer Pumps at
    a. One (1) per Basin
    b. One (1) at WMLS
5. Installation of New 16-in EQ transfer main between WMLS and Flow EQ Basins with associated valves and controls
6. Installation of New 16-in EQ transfer main between WMLS and Flow EQ Basins with associated valves and controls

6.1.1.3 Option B-3 (a) - Installation of New HIBOCS Biological Odor Control System at WMLS and EMLS

6.1.2 Influent Structure / Headworks

The proposed improvements include:

6.1.2.1 Option C-1 (b) - Removal of Existing Teacups and Installation of two (2) New HeadCells with Grit Cleanse System

6.1.2.2 Option C-2 (a) - Installation of a New Supplemental Center Flow 2 mm Fine Screen

1. Installation of Compactors on Existing Vulcan 3 mm stepscreens
2. New Instrumentation and Controls (I&C)

6.1.3 Biological Nutrient Reduction (BNR) Facilities

The proposed improvements include:

6.1.3.1 Option A-2 – New IFAS BNR Process

1. Conversion of Existing A2O process to a New 4-Stage IFAS Process
2. All New IFAS process related equipment including:
    a. Medium bubble aeration system in aerobic application,
    b. Submersible mixers in anoxic environments for denitrification.
    c. New Analyzers including ammonium, nitrate, and phosphate for dynamic BNR controls
    d. New PLC controls to include:
        i. Swing Zone Phase Control
        ii. IMLR Flowpacing Control
        iii. Ammonium based DO control in all three Oxic zones (Swing, IFAS and Polishing)
        iv. Glycerin addition Control
        v. Alum Addition Control
3. Utilization of WWTP's existing Hoffman centrifugal blowers working in conjunction with the new positive displacement blowers

6.1.4 Secondary Clarifiers

The proposed improvements include:

6.1.4.1 Option D-1 (a) - Installation of New Spiral Blade Collection Mechanism with Weir Covers

1. Installation of new dry pit submersible RAS/WAS pumps, valves, piping and flow meters.
2. New RAS (50-100% of design flow) controls based on IFAS recommendation.

6.1.5 Deep Bed Filters

The City is currently under a separate contract to upgrade the Deep Bed Filters per the recommended improvements. The improvements shall be compatible with the IFAS BNR process recommended in this study.

6.1.6 Disinfection and Effluent Transfer

The proposed improvements include:

6.1.6.1 Option E-1 (b) - Replace Existing Transfer and Outfall Pumps with New In-Plant Reuse

1. Replacement of Submersible Aerators in the Reaeration Tanks
2. Replacement of flow meters, level sensors, chlorine analyzers and ancillary devices
3. Expansion of the Chlorine Contact Chamber
4. Replacement of Existing Transfer Pumps with New In-plant Reuse
5. Stilling Well Modifications

6.1.7 Sludge Handling Facilities

The proposed improvements include:

6.1.7.1 Option F-1 (b) - Replace One (1) Blower with Converted EQ Tanks

1. Instrumentation and Controls Upgrade

6.1.7.2 Option F-2 (b) - Replace Existing (5) Belt Presses with (4) New Belt Presses and Add Truck Scale

1. Dewatered sludge conveyance upgrade with progressive cavity cake pumps.
2. Sludge truck scale to measure weight and volume of sludge.

6.2 Project Summary/ Conceptual Cost Estimate

The conceptual cost estimate of all the proposed WWTP modifications is presented as a series of projects adding up to a total project cost.

Table 45 presents all the major recommended improvements.

TABLE 45: CONCEPTUAL COST ESTIMATE

Option #	Description	Cost
	3.2 & 3.3 Biological Nutrient Reduction (BNR) Facilities	
A-2	New IFAS BNR Process	$19,860,000
	New PD Blowers	$2,520,000
	A Subtotal	**$22,380,000**
	3.4 Influent Pumping	
B-1 (a)	Replacement of WMLS Influent Pumps	$756,000
B-2 (a)	New Primary Screening	$3,744,000
B-3 (a)	Two (2) EQ Tanks (converted Digester Tanks)	$1,662,000
B-4 (a)	New HIBOCS Biological Odor Control System at WMLS and EMLS	$1,461,600
	B Subtotal	**$7,623,600**
	3.5 Influent Structure / Headworks	
C-1 (b)	New Grit Removal System	$4,320,000
C-2 (b)	Two New Center Flow 3 mm Fine Screens	$2,940,000
	C Subtotal	**$7,260,000**
	3.6 Secondary Clarifiers	
D-1 (b)	New Spiral Blade Collection Mechanism with Submerged Weirs (Includes RAS/WAS Pumps)	$6,078,000
	D Subtotal	**$6,078,000**
	3.8 Disinfection and Effluent Transfer Pumps	
E-1 (b)	Replacement of Existing Transfer with New In-Plant Reuse and Cover CCC	$2,652,000
	E Subtotal	**$2,652,000**
	3.9 Sludge Handling Facilities	
F-1 (b)	New Blowers with Converted EQ Tanks	$1,320,000
F-2 (b)	Replace Existing (5) Belt Presses with 4 New Belt Presses	$3,510,000
	F Subtotal	**$4,830,000**
	4.0 Electrical and Instrumentation	
	4.1 Electrical Improvements	$9,000,000
	4.2 Instrumentation and Controls	$3,900,000
	Electrical and Instrumentation Subtotal	**$12,900,000**

Option #	Description	Cost
	5.0 Support Facilities	
	5.1 Elevated Walkways	$500,000
	5.2 Modified Operations and Laboratory Facilities	$2,000,000
	5.3 New Maintenance Building	$300,000
	Support Facilities Subtotal	**$2,800,000**
	(Subtotals A-F, Support Facilities and Electrical/I&C)	$66,524,000
	Contingency @ 30%	$19,957,000
	Total Construction Cost	**$86,481,000**
	Outside the Fence	
	5.4 Reclaimed Water and Effluent Disposal	$8,000,000

7. Implementation and Compliance

7.1 Public Hearing / Dedicated Revenue Hearing

7.1.1 Resolution Approving Facility Plan and Capital Financing Plan

A Public Hearing was held to present this Facility Plan to the public for review and comment prior to adoption of the Plan by the City of Port Orange City Council. The selected alternatives were discussed, and the environmental and cost impacts were presented. This allowed for the public to participate in the evaluation of the alternatives as well as any potential financial impacts to affected parties. **Appendix** E contains a copy of the Notice of Public Hearing and a copy of the Resolution adopted by the Commission.

7.2 Fiscal Sustainability / Asset Management Planning

As part of the Water Resources Reform and Development Act of 2014 (WRRDA) was signed into law on June 10, 2014. Title VI of the Federal Water Pollution Control Act (FWPCA) requires a loan recipient to certify regarding the development and implementation of a fiscal sustainability plan. The City of Port Orange will provide the executed fiscal sustainability plan certification as part of **Appendix G** and will provide the completed plan for the project upon construction conclusion.

Regarding the implementation of an asset management plan, the City has not yet established a plan for their system. However, as their system grows it may be a consideration for the future.

7.3 Regulatory Agency Review

7.3.1 Florida Department of Environmental Protection

FDEP is the lead agency dealing with issues of environmental quality with regulatory authority encompassing large and small quantity hazardous waste generators, air pollution emissions, solid waste disposal, potable water usage, dredge and fill permitting, and development in environmentally sensitive areas. FDEP is the State agency with regulatory authority over the use of submerged lands and waters. FDEP is also charged with protecting and conserving Florida's natural resources and managing State owned land and aquatic preserves. The City of Port Orange service area is within the Central District of FDEP headquartered in Orange County.

7.3.2 Florida Department of Health

The Florida Department of Health performs water tests for surface water quality and has the authority to issue health notices, advisories, and boil water orders when the potential for contamination exists in public water supply systems. It also issues health warnings and notices for surface water bodies and food sources that may place the public at a health risk.

7.3.3 Water Management Districts

The St. John's River Water Management District (SJRWMD) is one of five water management districts in Florida created by the Water Resources Act of 1972. SJRWMD is responsible for managing groundwater and surface water supplies in part or all of 18 counties in northeast and east-central Florida. The district

covers 12,283 square miles, about 7.8 million acres. The main water body in the district is the northerly flowing St. Johns River, the longest river entirely in Florida. SJRWMD provides a variety of regulatory programs including programs regulating the consumptive use of water, construction of wells, licensing water well contractors, surface water management facilities, stormwater management systems, and artificial recharge of ground water.

7.3.4 United State Environmental Protection Agency

The United States (US) Environmental Protection Agency (EPA) reviews the actions of other governmental agencies and retains the authority to veto permits under the provisions of Section 404 of the Clean Water Act. It also manages the collection of water supply quality information under the Information Collection Rule. Many EPA responsibilities have been delegated to State agencies for implementation. In addition, EPA administers the National Estuary Program.

7.3.5 Clean Air Act

The Clean Air Act was amended in 1990. The Clean Air Act Amendments, Title I, address regional air quality for six criteria pollutants: carbon monoxide, lead, nitrogen dioxide, zone, particulate matter, and sulfur dioxide. If a particular area does not meet national ambient air quality standards, it is established as a non-attainment area.

7.3.6 Federal Water Pollution Control Act

The Federal Water Pollution Control Act, commonly known as the Clean Water Act, was passed by Congress in 1972 to restore and maintain the chemical, physical, and biological integrity of the nation's waters by preventing point and nonpoint pollution sources, providing assistance to publicly owned treatment works for the improvement of wastewater treatment, and maintaining the integrity of wetlands.

7.3.7 Florida Safe Drinking Water Act

The Florida Legislature enacted the Florida Safe Drinking Water Act, 403.850-403.864, Florida Statute in 1977. The statute directs FDEP to formulate and enforce rules pertaining to drinking water. The rules, Chapters 62-550, 62-555, and 62-560, Florida Administrative Code (F.A.C.), establish the primary and secondary drinking water standards of the Federal Government and establish additional rules to fulfill State requirements.

7.3.8 United State Army Corps of Engineers

The mission of the US Army Corps of Engineers is to provide vital public engineering services in peace and war to strengthen our Nation’s security, energize the economy, and reduce risks from disasters. The Jacksonville District of the Corps was established in 1884 and encompasses Florida, Puerto Rico, and the US Virgin Islands. The Corps also has a Civil Works environmental mission that ensures all Corps projects, facilities and associated lands meet environmental standards. The program has four functions: compliance, restoration, prevention, and conservation.

7.3.9 Florida Department of Transportation

The Florida Department of Transportation (FDOT) mission is to provide a safe transportation system that ensures the mobility of people and goods, enhances economic prosperity, and preserves the quality of our environment and communities. The Bartow Office of the FDOT issues access, drainage, building moving, highway landscaping, road closure, rest area, utility, banner, and general use permits for projects taking place in Brevard, Flagler, Lake, Marion, Orange, Osceola, Seminole, Sumter, and Volusia.

7.4 Financial Planning / Capital Financing Plan

The Florida Department of Environmental Protection's (FDEP) SRF is expected to be the financing source for the project. The City of Port Orange also intends on submitting grant applications to various agencies to offset the loan amount. A capital financing plan (CFP) has been prepared to explain to the public and FDEP what the financial impact on the users of the reclaimed water system will be. The CFP can be found in **Appendix H**.

7.5 Implementation

The City of Port Orange has the sole responsibility and authority to implement the recommended improvements.

7.6 Schedule for Implementation

Under the SRF program, entities who wish to receive funding must receive project and funding approval before construction may take place. This Facility Plan, including the Capital Financing Plan, biddable plans and specifications with all necessary permits to construct the selected plan must be approved by FDEP for the entity to receive SRF funding for the proposed project.

Adoption of the Facility Plan by the City of Port Orange, City Council is a necessary step to establish eligibility for the SRF program, however, adoption of the Plan in no way commits the City of Port Orange to construct the project, furthermore it does not commit the City to receiving a loan, and it also does not commit the SRF program to provide funding to the City.

It is projected that the schedule for the project will be accomplished in 3-years' time.

Table 46 is a proposed schedule for the project included within this plan:

TABLE 46: PROJECT SCHEDULE

TASK	START	END
SRF Facility Plan City/FDEP Review	May 1, 2022	August 1, 2022
Facility Plan Public Comment and City Council Approval	August 15,2022	September 15, 2022
RFQ and Consultant Selection	September 15, 2022	November 30, 2022
Design and Permitting	December 1, 2022	December 1, 2023

Advertisement For Construction Bids	December 1, 2023	January 15, 2024
Receive Bids	January 15, 2024	February 15, 2024

Water Technologies

Dear Anant:

As always, Veolia Water Technologies, Inc (dba Kruger) appreciates the project opportunity and is pleased to present this revised proposal for our AnoxKaldnes IFAS System for Port Orange, FL. We have updated the influent characteristics and system design per your latest request.

This design and proposal represent one customized solution to incorporate an AnoxKaldnes IFAS system into the existing A^2O system to achieve biological nutrient removal. Since this is a retrofit design, to take best advantage of the existing walls of the tanks and minimize demolition/construction, the total plant flow is split into two trains. Each process train is designed to keep both the existing three-stage anaerobic selector as well as the existing three-stage pre-anoxic reactor. Following the last stage of the pre-anoxic reactor, the flow of each train is further split into two subtrains. Each sub-train consists of one Swing zone reactor, one IFAS reactor and one polishing reactor followed by one post-anoxic reactor and one re-aeration reactor. The process design is summarized in Table 3.

The amount of MicroC and alum are based on max month conditions and a TKN and TP concentrations in the raw wastewater of 40 mg/L and 6 mg/L, respectively. The reduction of chemicals by the dynamic online control of the nutrient removal has not been provided. We believe the yearly average chemical consumption quantities for both chemicals will be significantly lower than the max month quantities. However we do recommend that the equipment for adding chemicals is provided to ensure that the low effluent requirements can be met under all circumstances.

Both our experience and BIOWIN models have shown that implementing a swing zone as a first stage after the existing pre-anoxic reactors will provide a more flexible process that can help reduce the amount of MicroC addition by allowing an increased IMLR flow rate and ensure that more of the produced nitrate will be removed by the BOD in the raw influent. The possibility of adding air to this reactor as well will ensure that during high TKN loads the ammonium effluent requirements will be met.

In order to implement the following dynamic controls in the BNR process, ammonium analyzers as well as Nitrate probes will be implemented as part of the project. The proposal is based on a PLC control which requires more instruments and is a simpler control compared to the cloud based Hubgrade performance that Veolia offers as well.

- Swing Zone Phase Control
- IMLR flowpacing Control
- Ammonium based DO control in all three Oxic zones (Swing, IFAS and Polishing)
- MicroC addition Control

- Alum Addition Control (will require an additional Phosphate analyzer but not included in the current scope)

Please note blowers have not been included in our scope. The proposal assumes the provision of all new equipment. If any existing equipment can be reused, the total IFAS system cost may be optimized.

In addition to the above information, we hope that you find the following extra information helpful and convincing in understanding the advantages and benefits of design and system. We also hope that our superior product quality, technical and financial capabilities and excellent customer services offer your team and the owner an extra measure of assurance in delivering yet another successful project.

Unparalleled IFAS System Experience

- Veolia/AnoxKaldnes is the inventor and worldwide leader in designing, manufacturing and implementing IFAS and MBBR technologies with 30 years of IFAS/MBBR experience and over 1,200 installations worldwide.
- Our process experts are well published on the technology and have a collective design experience of over 250 years, making us the strongest IFAS/MBBR design team in the world.
- Veolia has over seventy (70) worldwide IFAS installations that have been in operation for more than 3 years.
- Veolia has more than 30 US IFAS installations that have been running for more than 3 years, ranging from 0.5 to 78 mgd in flow rate and from secondary treatment to BNR.
- Veolia has eight (8) US municipal IFAS installations in cold weather climates with design influent wastewater temperatures less than or equal to 10°C.
- Veolia has seven (7) US municipal IFAS installations with design average annual flow rates greater than or equal to 15.0 MGD.
- Veolia has four (4) US municipal IFAS installations with design average total nitrogen (TN) loadings greater than or equal to 6,500 lbs/day.
- Veolia has eight (8) US municipal IFAS installations designed for and meeting total phosphorus (TP) effluent concentrations of less than 1.0 mg/L.
- Nearly every one of our US IFAS BNR plants in the attached list meets total nitrogen (TN) effluent concentrations of less than 15 mg/L. The total number exceeds twenty-five (25).
- Veolia also has more than five (5) IFAS plants that meet total nitrogen (TN) effluent concentrations of less than 5 mg/L in the US.
- Veolia also has more than three (3) IFAS plants that meet total nitrogen (TN) effluent concentrations of less than 3 mg/L in the US.
- Veolia has more than ten (10) US municipal IFAS installations designed for and meeting ammonia-nitrogen (NH3-N) effluent concentrations of less than 2.0 mg/L.

Robust, Field-proven and Maintenance-free System

- The Veolia IFAS system utilizes the AnoxKaldnes AnoxK™5 media with a protected (effective) specific surface area (SSA) of 800 m^2/m^3 (243 ft^2/ft^3) that is greater than the SSA of most other media carries, enabling the plant to fit the process within a small footprint while leaving room for future capacity increase.
- The media is field proven and has been successfully used in hundreds of municipal and industrial wastewater treatment plants. Using media that is not field proven could lead to media integrity and performance issues, which could put the project at high risk of failure and jeopardizes the City's return on investment.
- The shallow media depth design of the K5 media enables better mixing with lower mixing energy, better oxygen and mass transfer efficiencies and therefore better system performance. This media design also helps prevent the potential growth of macrofauna animals such as snails within the media.
- To ensure best media quality, the media used for this project will be virgin HDPE manufactured in the USA. Carriers made of recycled materials could result in premature media breakage and demand frequent media replacements.
- The system consists of stainless steel medium-bubble air diffusers that are robust, non-clogging and maintenance free throughout the lifetime of the IFAS system. Compared to fine bubble diffusers that require routine maintenance and replacement every five to ten years, the medium-bubble air diffusers provide significant savings to the City.
- The system employs stainless steel maintenance-free cylindrical perforated plate screens at the reactor effluent wall to retain media, while allowing treated water to pass through. The current perforated plate screen design is a significant improvement over the previous wedge-wire screen design in terms of screen clogging. The wedge wire screen design is prone to clogging by stringy materials that can easily get caught on the wire and are hard to remove.

Excellent Design Support and Customer Service

- Veolia Cary NC office has a staff of over 100 people, including Project Management, Process Engineering, I&C Engineering, Mechanical Engineering and Field Service that are all located within the area of Cary, NC headquarters, providing a coordinated effort and single point of contact to Kruger's technical expertise for your team.
- This project has been assigned to a dedicated Process Manager and a team whose main function is to ensure proper process design, modeling and support for the IFAS system. The team will continue to work closely with your team and the owner to go through the commissioning, startup and performance testing stages.
- This project will have a dedicated Project Manager whose main function is to ensure best communication, on-time equipment delivery, proper installation and startup of the IFAS biological treatment system. Field service is a major component of project execution. Our field service personnel are thoroughly trained and have enormous experience in commissioning IFAS plants. It is crucial to tap into the team's experience and fully inspect the system components before, during and after the installation.

Financial Backing and Process Guarantee

- By collaborating with Veolia, your team and the owner will have access to Veolia, the world's #1 ranked water company. Veolia is a $26 billion USD company with strong financial security. Veolia Water Technologies Inc, dba Kruger, is a subsidiary of Veolia, a world leader in engineering and technical solutions in water treatment. See Company Overview in Appendix I of this RFP Response.
- We are financially capable of supporting this and any other project through design, construction, and completion. You can be rest assured that we will stand behind our system through the warranty period and beyond.
- Bid and performance bonds and/or process guarantee bonds are recommended to protect your teams' interests and can be readily provided when specified.
- We can guarantee the performance of this system as we do for all of our other installations.

Thank you

The Veolia team provides the highest dependability and reliability with the best value: originating from the inventor and leading innovator of the IFAS technology, being engineered as a complete system, and being the beneficiary of decades of wisdom earned from the largest install base, Veolia's AnoxKaldnes IFAS technology has earned the trust of numerous customers.

We appreciate the opportunity to provide this proposal to you and look forward to working with you to deliver yet another successful IFAS project. If you have any questions or need further information, please contact our local Representative, Bob Bierhorst of MTS Environmental,, or our Regional Sales Manager, Daniel Hurt, at 919 523-2328 (daniel.hurt@veolia.com).

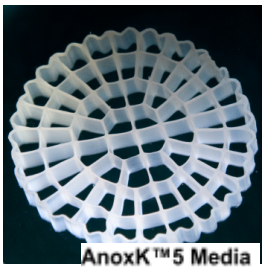
Process Description

AnoxKaldnes MBBR and IFAS

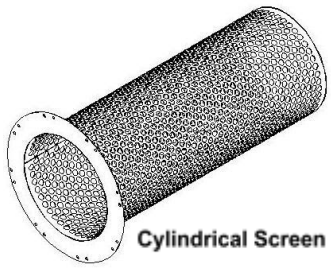


AnoxK™5 Media

Kruger's AnoxKaldnes process design is based on more than 30 years of experience with Moving Bed Biological Reactors (MBBR) and Integrated Fixed Film Activated Sludge (IFAS) systems. Our knowledge is supported by lab and pilot scale studies and data from more than 1,200 AnoxKaldnes operating systems for BOD, nitrification, and TN removal.

The MBBR and IFAS (or Hybas™ – Hybrid Biofilm Activated Sludge) processes are continuous flow through, non-clogging bio-film reactors containing "carrier elements" or media with a high specific surface. The media does not require backwashing or cleaning.

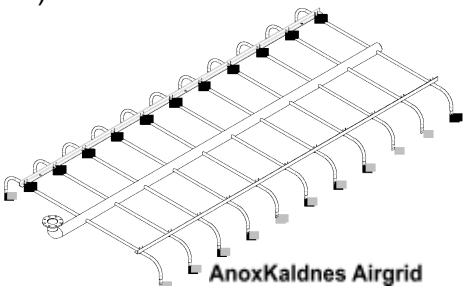
The biomass that treats the wastewater is attached to the surfaces of the media. The media is designed to provide a large protected surface area for the biofilm and optimal conditions for biological activity when suspended in water. Media of different shapes and sizes provide flexibility to use the most suitable type depending on wastewater characteristics, discharge standards and available volumes. AnoxKaldnes media is made from polyethylene and has a density slightly less than water.



Cylindrical Screen

In the MBBR process, all of the biomass is attached to the media and retained in the reactor, with no returned sludge. In the Hybas process, the reactor contains both free-floating biomass (activated sludge) and biomass attached to the media. The free-floating biomass passes through the reactor, is settled and recycled back to the reactor. The media and attached biofilm remain in the reactor as in a MBBR.

The Hybas process is often considered for upgrading existing conventional activated sludge systems within the existing tankage for either maintaining nitrification at new higher flow rates or loads or upgrading a plant to meet new nitrification requirements. It is accomplished by adding the media directly into the activated sludge reactors to enhance the growth of the autotrophic bacteria. The Hybas system is capable of meeting these new effluent requirements at low solids retention times (SRTs) and short hydraulic retention times (HRTs).



AnoxKaldnes Airgrid

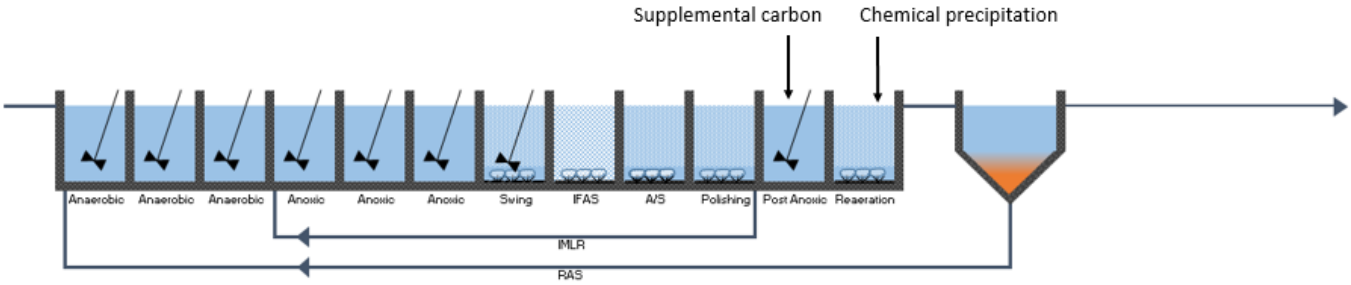
The mixing of the media within MBBR and Hybas reactors is provided by AnoxKaldnes' medium bubble aeration system in aerobic application, whereas specially designed submersible mixers are used in anoxic environments for denitrification.

Kruger's minimum scope of supply for MBBR and Hybas systems includes the AnoxKaldnes media, screen assemblies (to keep media in each reactor), medium bubble aeration grid assemblies and submersible mixers for the anoxic zones. In cases where they are needed, Kruger also provides

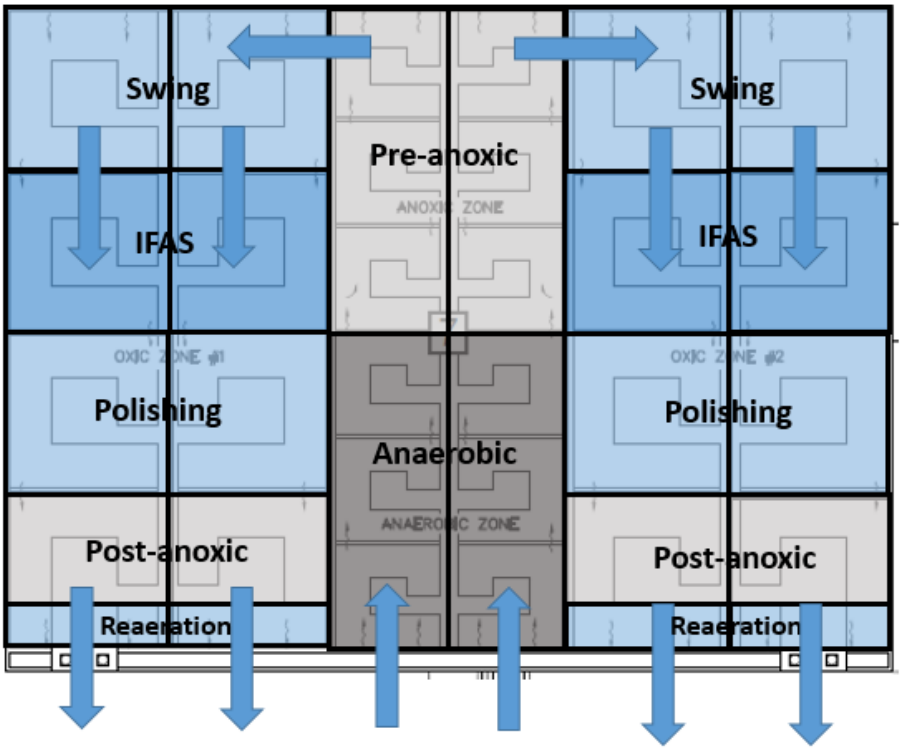
the blowers, instrumentation and controls, SCADA, and field instruments (dissolved oxygen, nitrate, ammonia, etc.) for single source responsibility.

AnoxKaldnes IFAS System Configuration

The proposed system consists of two trains, according to the figures shown below. Each train consists of a three stage anaerobic selector, a three stage pre-anoxic reactor, two swing reactors, two IFAS reactors, two polishing reactors, two post-anoxic reactors and two re-aeration reactors.



IFAS system process schematic



Proposed IFAS Configuration

Design Summary

The proposed design is based on the following influent wastewater characteristics and incorporating peak flow conditions for screen design purposes only. The design assumes that the raw influent wastewater is biodegradable, no toxic compounds are present, sufficient alkalinity is available to avoid pH depressions, that the COD/BOD ratio is between 1.7 and 2.3, and that none of the equipment provided would be used in a classified area (e.g. Class 1, Division 1 or Class 1, Division 2).

The headworks should be designed to prevent the passage of unscreened or poorly screened wastewater into the media reactors, including during maintenance or high-flow bypass events. The use of bar or step screens is discouraged, since they can allow passage of fibrous material that can blind the media retention screens.

To provide the best compatibility with the AnoxKTM5 media and sieves, the plant's headworks should include perforated mesh screens with a maximum of 6 mm (1/4 inch) diameter openings for removal of particulate matter (rags, debris, etc.) prior to entering the AnoxKaldnes IFAS reactors.

Table 1: Influent Design Basis

Parameter	Units	Values
Flow, Design	MGD	12
Flow, Peak Hourly	MGD	24
BOD_5, Design Flow	mg/L	182
TSS, Design Flow	mg/L	270
TKN, Design Flow	mg/L	40
TP	mg/L	6
Elevation	ft	30*
Min/Max Temperature	°C	20/28

* Assumed values.

Table 2: Effluent Objectives - 30 Day Average

Parameter	Units	Values*
$cBOD_5$	mg/L	5.0**
TSS	mg/L	5.0**
TN	mg/L	≤ 3.0*
TP	mg/L	≤ 1.0***

*Listed values represent anticipated performance; any performance guarantees may be different
*Provision for external carbon addition should be provided in the post DN reactor by others.
*Biological non-degradable soluble nitrogen assumed to be less than 1 mg/L
**Tertiary treatment is required to meet BOD and TSS limits and shall be by others.
*** Provision for chemical precipitation shall be provided by others.

Scope of Supply

Kruger is pleased to present our scope of supply which includes process engineering design, equipment procurement, and field services required for the proposed treatment system, as related to the equipment specified. The work will be performed to Kruger's high standards under the direction of a Project Manager. All matters related to the design, installation, or performance of the system shall be communicated through the Kruger representative giving the Engineer and Owner ready access to Kruger's extensive capabilities.

Process and Design Engineering

Kruger will provide process engineering and design support for the system as follows:

- Process Engineering consisting of aeration system sizing and configuration, sieve and outlet design.
- Review and approval of P&I Diagram for the AnoxKaldnes IFAS portion of the process. Preliminary General Arrangement Drawings and review and approval of final General Arrangement Drawings for the process. Review of reactor drawings with respect to penetrations and dimensions, excluding structural design.
- Equipment installation instructions for all equipment supplied by Kruger.

Field Services

Kruger will furnish a Service Engineer to perform the following tasks:

- Inspect installation of key pieces of equipment during construction.
- Inspect the completed system prior to startup.
- Assist the Contractor with initial startup of the system.
- Train the Owner’s staff in the proper operation and maintenance of the AnoxKaldnes IFAS system.
- Test and start any Kruger-supplied control equipment, including PLC programming and SCADA systems.

Extended Services

The Supplier shall include an extended service plan, featuring a blend of remote and on-site services, to support the Owner in the proper operation, maintenance and optimization of the process and equipment. The active service plan period shall be one (1) year and will start upon completion of Supplier’s commissioning activities for the process. The plan shall include the following:

A. One (1) trip to the project site consisting of two (2) days onsite for process and equipment (e.g. instruments/analyzers) inspections and follow-up training in process control and optimization

B. Remote quarterly review of operating data (Owner to provide data to Supplier) with issuance of summary report by a process engineer, noting key observations and recommendations

C. Twenty (20) hours of remote support conducted via phone and/or video conferencing for assistance in further optimization, troubleshooting, training or other needs of the Owner. The Supplier shall include the use of app-based augmented reality tools where such tools would be beneficial, such as FieldBit or equal, at no additional charge. Minimum of 1 hr charged per call.

AnoxKaldnes IFAS System Equipment – Limited to In-Basin Equipment Only

Process and Mechanical Equipment Items	Qty	Description
AnoxKaldnes AnoxK™5 Media, (ft^3)	29,660	High density polyethylene carrier elements.
Cylindrical Screen Assemblies	72	Eighteen per IFAS reactor. 304L SS. 23" ø perforated plate pipes terminated in ANSI flanges for mounting directly to the tank wall.
Air Sparge System	Yes	An air sparging system in 304L SS will be provided to scour the screens.
Open/Close Ball Valves	4	One (1) 2" electric valve for each each sieve air sparge header.
V-port Ball Valves	4	One (1) 2" manual air regulating valve for each sieve air sparge header.
Medium Bubble Aeration System	16	Four (4) medium bubble aeration systems per train. 304L SS including header, lateral piping, and hardware (excluding anchor bolts).
Scum Screen Assemblies	4 Lots	One (1) scum screen assemblies for each IFAS reactor; 304 SS; including spray header assemblies.
Submersible Mixers	20	One (1) for each anaerobic, pre-DN, swing, and post-DN reactor. Submersible Propeller Mixer, 304SS Rails, Hoist, and Receiving Bracket.
IMLR Wall Pumps	8	Two (2) per train rated at 7.5 MGD @ 3 feet TDH.
Modulating Airflow Control Valves	12	One (1) actuated BFV for each swing, IFAS, and polishing reactor.
I&C Equipment Items	**Qty**	**Description**
PLC Control Panel	1	NEMA 12 Freestanding or Wall Mount Control Panel (For Indoor Use). ControlLogix PLC; Panelview HMI; 120V Feed.
High Level Float Switch	4	One (1) for each media zone.
Level transmitters	8	One (1) for each media zone. One (1) for each Polishing reactor.
DO Probe (LDO)	12	One (1) for each Aerobic zone. Aerobic Zone DO Monitoring with protective cage for IFAS zones.
Thermal Mass Flowmeter	12	One (1) for each IFAS, activated sludge, and polishing reactor.
Ammonia Analyzer	2	One (1) Double sampling Amtrax analyzer for control of DO and swing zone
Filtration unit	4	One (1) per Polishing zone
Nitrate Analyzer	5	One (1) for each polishing zone and one (1) for common effluent channel for control of IMLR pumps, swing zone as well as the external carbon addition.

Notes Regarding System Design and Installation

- A note on concrete specifications: For any MBBR or IFAS system, regardless of manufacturer, it is sound practice to require good, quality concrete work for the process reactors. The Consulting Engineer's standard concrete specification section is typically adequate to eliminate large holes, excessive form marks, large pockets, and excessively rough areas. It is particularly important to eliminate the potential for annular space around media retention screens.
- A note on construction sequencing: It is important, particularly for IFAS installations, to have level detection and level communication systems in place and operational prior to the filling of process tanks with water and media.

Scope of Supply BY INSTALLER/PURCHASER

The contractor's scope of supply for the AnoxKaldnes IFAS system should include, but is not limited to, the following items:

- All civil/site and electrical work.
- A concrete foundation for the tanks.
- Reactors to house the IFAS treatment equipment.
- All provisions for interconnecting piping.
- Unloading, storage and installation of equipment.
- Install and test all level floats, level transmitters, level alarms, and alarm communication devices prior to filling a process tank with media and water

Design Options

In addition to the proposed system as detailed herein, Kruger is able to further incorporate our process and controls expertise into wastewater treatment plants, allowing municipalities to meet stringent effluent requirements and future plant upgrades. Kruger is also able to offer our instrumentation and controls expertise to build upon the proposed system by providing a **customized plant-wide SCADA system** or designing a **Motor Control Center (MCC)**, providing clients a single source responsibility for plant controls. Please contact Kruger if the options above are of interest or to be included in the current proposed system or future upgrades. ***Please note that the design options listed above are not included in the pricing noted herein.*

Schedule

- Shop drawings will be submitted within 6-8 weeks of receipt of an executed contract by all parties.
- All equipment will be delivered within 18-20 weeks after receipt of written approval of the shop drawings.
- Installation manuals will be furnished upon delivery of equipment.
- Operation and Maintenance Manuals will be submitted within 90 days after receipt of approved shop drawings.

Pricing

The price for the AnoxKaldnes IFAS system, as defined herein, including process and design engineering, field services, and equipment supply is: **$4,386,000.**

Pricing is FOB shipping point, with freight allowed to the job site. This pricing does not include any sales or use taxes. In addition, the price is valid for 60 days from the date of this Proposal. The proposed goods may be affected by the ongoing market fluctuations impacting material and shipping costs. Kruger reserves the right to re-evaluate the Proposal price prior to order acceptance.

Please note that the above pricing is expressly contingent upon the items in this proposal and are subject to Kruger Standard Terms of Sale detailed herein.

Kruger Standard Terms of Payment

The terms of payment are as follows:

- 10% on receipt of fully executed contract
- 15% on submittal of shop drawings
- 75% on the delivery of equipment to the site

Payment shall not be contingent upon receipt of funds by the Contractor from the Owner. There shall be no retention in payments due to Kruger All other terms per our Standard Terms of Sale are attached.

All payment terms are net 30 days from the date of invoice. Final payment not to exceed 120 days from delivery of equipment.

Statement Regarding Competitive Transparency

Veolia takes all issues surrounding probity and confidentiality very seriously in all of its dealings with competitors and stakeholders. In this spirit and for the sake of transparency, we inform you that the publicly traded parent company Veolia Environnement S.A., recently acquired a 29.9% interest in Suez S.A ("Suez") and launched a public bid for the remainder of Suez' share capital. Consistent with our commitment to competition law compliance, Veolia will continue to act entirely independent of Suez until all relevant antitrust approvals of Veolia's acquisition of Suez have been obtained and we will of course let you know if this would change before the end of the tender proceedings.

Specifically, none of Veolia's representatives sit on the board of Suez, Veolia has no influence over the strategy or operations of Suez, and Veolia has no access to competitively sensitive information about Suez's operations. Accordingly, Veolia's ongoing project to acquire Suez will have no effect on our participation in, or response to, this tender.

Kruger Standard Terms of Sale

1. Applicable Terms. These terms govern the purchase and sale of the equipment and related services, if any (collectively, "Equipment"), referred to in Seller's purchase order, quotation, proposal or acknowledgment, as the case may be ("Seller's Documentation"). Whether these terms are included in an offer or an acceptance by Seller, such offer or acceptance is conditioned on Buyer's assent to these terms. Seller rejects all additional or different terms in any of Buyer's forms or documents.

2. Payment. Buyer shall pay Seller the full purchase price as set forth in Seller's Documentation. Unless Seller's Documentation provides otherwise, freight, storage, insurance and all taxes, duties or other governmental charges relating to the Equipment shall be paid by Buyer. If Seller is required to pay any such charges, Buyer shall immediately reimburse Seller. All payments are due within 30 days after receipt of invoice. Buyer shall be charged the lower of 1 ½% interest per month or the maximum legal rate on all amounts not received by the due date and shall pay all of Seller's reasonable costs (including attorneys' fees) of collecting amounts due but unpaid. All orders are subject to credit approval.

3. Delivery. Delivery of the Equipment shall be in material compliance with the schedule in Seller's Documentation. Unless Seller's Documentation provides otherwise, Delivery terms are F.O.B. Seller's facility.

4. Ownership of Materials. All devices, designs (including drawings, plans and specifications), estimates, prices, notes, electronic data and other documents or information prepared or disclosed by Seller, and all related intellectual property rights, shall remain Seller's property. Seller grants Buyer a non-exclusive, non-transferable license to use any such material solely for Buyer's use of the Equipment. Buyer shall not disclose any such material to third parties without Seller's prior written consent.

5. Changes. Seller shall not implement any changes in the scope of work described in Seller's Documentation unless Buyer and Seller agree in writing to the details of the change and any resulting price, schedule or other contractual modifications. This includes any changes necessitated by a change in applicable law occurring after the effective date of any contract including these terms.

6. Warranty. Subject to the following sentence, Seller warrants to Buyer that the Equipment shall materially conform to the description in Seller's Documentation and shall be free from defects in material and workmanship. The foregoing warranty shall not apply to any Equipment that is specified or otherwise demanded by Buyer and is not manufactured or selected by Seller, as to which (i) Seller hereby assigns to Buyer, to the extent assignable, any warranties made to Seller and (ii) Seller shall have no other liability to Buyer under warranty, tort or any other legal theory. If Buyer gives Seller prompt written notice of breach of this warranty within 18 months from delivery or 1 year from beneficial use, whichever occurs first (the "Warranty Period"), Seller shall, at its sole option and as Buyer's sole remedy, repair or replace the subject parts or refund the purchase price therefore. If Seller determines that any claimed breach is not, in fact, covered by this warranty, Buyer shall pay Seller its then customary charges for any repair or replacement made by Seller. Seller's warranty is conditioned on Buyer's (a) operating and maintaining the Equipment in accordance with Seller's instructions, (b) not making any unauthorized repairs or alterations, and (c) not being in default of any payment obligation to Seller. Seller's warranty does not cover damage caused by chemical action or abrasive material, misuse or improper installation (unless installed by Seller). THE WARRANTIES SET FORTH IN THIS SECTION ARE SELLER'S SOLE AND EXCLUSIVE WARRANTIES AND ARE SUBJECT TO SECTION 10 BELOW. SELLER MAKES NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING WITHOUT LIMITATION, ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR PURPOSE.

7. Indemnity. Seller shall indemnify, defend and hold Buyer harmless from any claim, cause of action or liability incurred by Buyer as a result of third party claims for personal injury, death or damage to tangible property, to the extent caused by Seller's negligence. Seller shall have the sole authority to direct the defense of and settle any indemnified claim. Seller's indemnification is conditioned on Buyer (a) promptly, within the Warranty Period, notifying Seller of any claim, and (b) providing reasonable cooperation in the defense of any claim.

8. Force Majeure. Neither Seller nor Buyer shall have any liability for any breach (except for breach of payment obligations) caused by extreme weather or other act of God, strike or other labor shortage or disturbance, fire, accident, war or civil disturbance, delay of carriers, failure of normal sources of supply, act of government or any other cause beyond such party's reasonable control.

9. Cancellation. If Buyer cancels or suspends its order for any reason other than Seller's breach, Buyer shall promptly pay Seller for work performed prior to cancellation or suspension and any other direct costs incurred by Seller as a result of such cancellation or suspension.

10. LIMITATION OF LIABILITY. NOTWITHSTANDING ANYTHING ELSE TO THE CONTRARY, SELLER SHALL NOT BE LIABLE FOR ANY CONSEQUENTIAL, INCIDENTAL, SPECIAL, PUNITIVE OR OTHER INDIRECT DAMAGES, AND SELLER'S TOTAL LIABILITY ARISING AT ANY TIME FROM THE SALE OR USE OF THE EQUIPMENT SHALL NOT EXCEED THE PURCHASE PRICE PAID FOR THE EQUIPMENT. THESE LIMITATIONS APPLY WHETHER THE LIABILITY IS BASED ON CONTRACT, TORT, STRICT LIABILITY OR ANY OTHER THEORY.

11. Miscellaneous. If these terms are issued in connection with a government contract, they shall be deemed to include those federal acquisition regulations that are required by law to be included. These terms, together with any quotation, purchase order or acknowledgement issued or signed by the Seller, comprise the complete and exclusive statement of the agreement between the parties (the "Agreement") and supersede any terms contained in Buyer's documents, unless separately signed by Seller. No part of the Agreement may be changed or cancelled except by a written document signed by Seller and Buyer. No course of dealing or performance, usage of trade or failure to enforce any term shall be used to modify the Agreement. If any of these terms is unenforceable, such term shall be limited only to the extent necessary to make it enforceable, and all other terms shall remain in full force and effect. Buyer may not assign or permit any other transfer of the Agreement without Seller's prior written consent. The Agreement shall be governed by the laws of the State of North Carolina without regard to its conflict of laws provisions.

VEOLIA

AnoxKaldnes™

Moving Bed Biofilm Reactor (MBBR)
Integrated Fixed-Film Activated Sludge (IFAS)
and ANITA™ Mox Deammonification

WATER TECHNOLOGIES

AnoxKaldnes™ MBBR and Hybas™ Processes

AnoxKaldnes™ MBBR

(Moving Bed Biofilm Reactor) is a biological wastewater treatment process that utilizes specialized polyethylene carriers (media) to create a large protected surface on which biofilm can attach. The media is mixed in the reactor, and the large surface area provides more treatment capacity in a smaller volume compared to activated sludge.

AnoxKaldnes Hybas™

(Hybrid Biofilm Activated Sludge) technology is an application of the IFAS process in which moving media is mixed into an activated sludge environment. The result is both fixed-film and suspended growth biomass working together and lending the strengths of each to the hybrid process. The Hybas process is excellent for retrofitting existing activated sludge plants to improve ammonia and nitrogen removal.

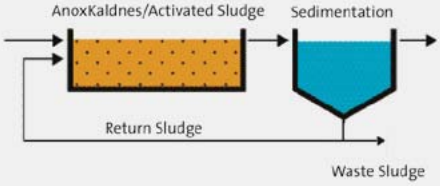
AnoxKaldnes Hybas™ for SBR

AnoxKaldnes Hybas™ systems can be retrofitted into a sequencing batch reactor (SBR) system. The AnoxKaldnes Hybas can increase the capacity of a SBR wastewater treatment process in the same footprint as a conventional SBR without the need for new tankage. The AnoxKaldnes Hybas for SBR uses engineered moving bed media to grow and foster nitrifying bacteria, even at low SRT's and low reactor temperatures. The process allows for greater BOD, NH_3-N, and TN removal.

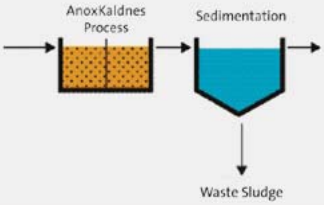
Advantages

- Simple and reliable operation
- Excellent for ammonia and total nitrogen limits (NH_3 -N < 1 mg/L, NO_3 -N < 1 mg/L)
- Smaller footprint than activated sludge
- Increase plant capacity for nitrification and/or denitrification
- Effective in cold water
- Accommodates a wide range of flow and load fluctuations
- Non-clogging media with a long lifespan
- Flexible design for almost any tank configuration

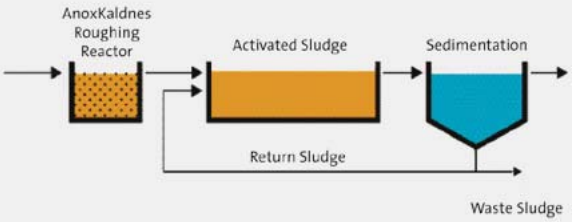
Hybas™ Technology



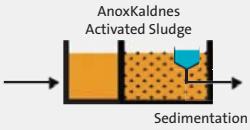
MBBR



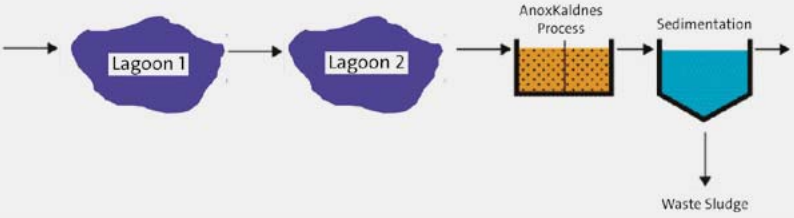
Biofilm Activated Sludge



Hybas™ for SBR



LagoonGuard® MBBR

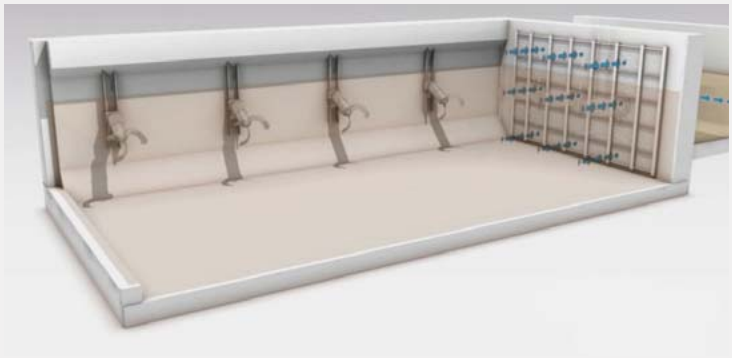


Air Grids and Media Retention Screens

Aerobic Applications

- AnoxKaldnes stainless steel air diffuser system is robust, non-clogging and maintenance free
- Diffusers provide oxygen for process needs and media mixing for optimal biological performance
- Cylindrical screens at reactor's effluent wall retain media while allowing treated water and suspended solids to pass through

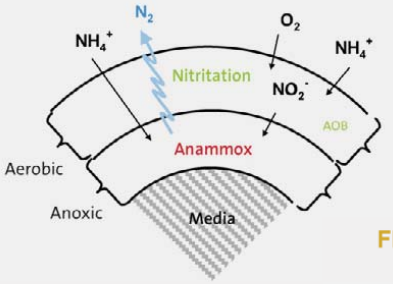
Mixers and Flat Screens



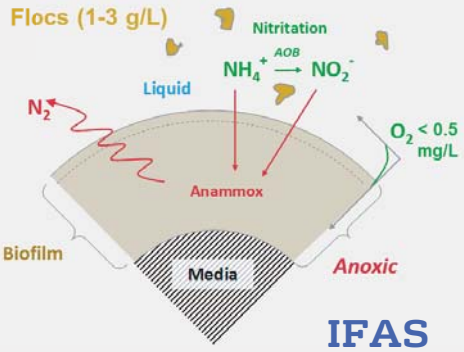
Anoxic Applications

- AnoxKaldnes stainless steel air diffuser system is robust, non-clogging and maintenance free
- Diffusers provide oxygen for process needs and media mixing for optimal biological performance
- Flat screens at reactor's effluent wall retain media while allowing treated water and suspended solids to pass through

ANITA™ Mox Deammonification



MBBR



IFAS

System Supplier Scope of Supply

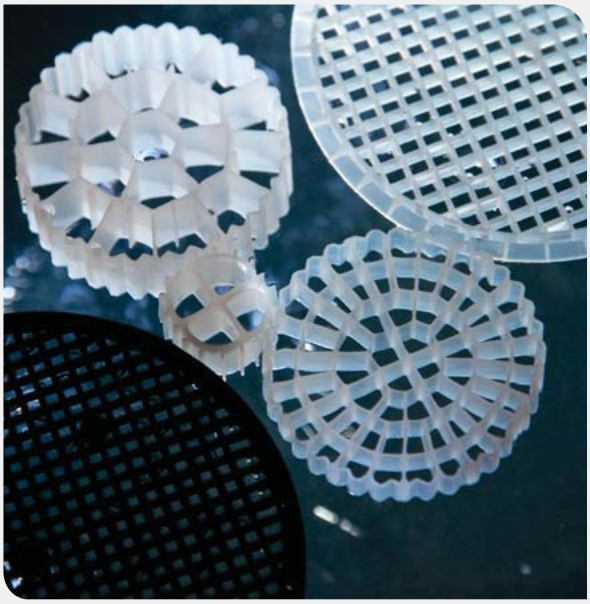
- *Complete process design with effluent guarantees*
- *Process equipment including media, screens, air grids, blowers, pumps, mixers and valves*
- *Field instruments and process control*
- *Customized SCADA for the highest level of operations monitoring and control*

The ANITA Mox process combines aerobic nitritation and anammox reactions simultaneously in a single reactor. With MBBR, the reactions take place in different layers of biofilm on the AnoxKaldnes media. With IFAS ANITA Mox, most of the nitritation reaction occurs in the suspended biomass, while the anammox reaction takes place on the carrier media. The MBBR and IFAS ANITA Mox platforms both provide a robust, stable process with simple operation, energy and chemical savings, and efficient ammonia removal.

AnoxKaldnes Technology Can Benefit A Wide Range of Plant Sizes

Cheyenne, WY
AnoxKaldnes MBBR

- In 2005, MBBR replaced trickling filters and was chosen because it is a biofilm process that is compatible with the existing clarifiers.
- Consists of two trains of two pre-anoxic and four aerobic reactors in series to treat 6.5 MGD and achieve BOD <10 mg/L and ammonia <2 mg/L, NO_x-N <9 mg/L.



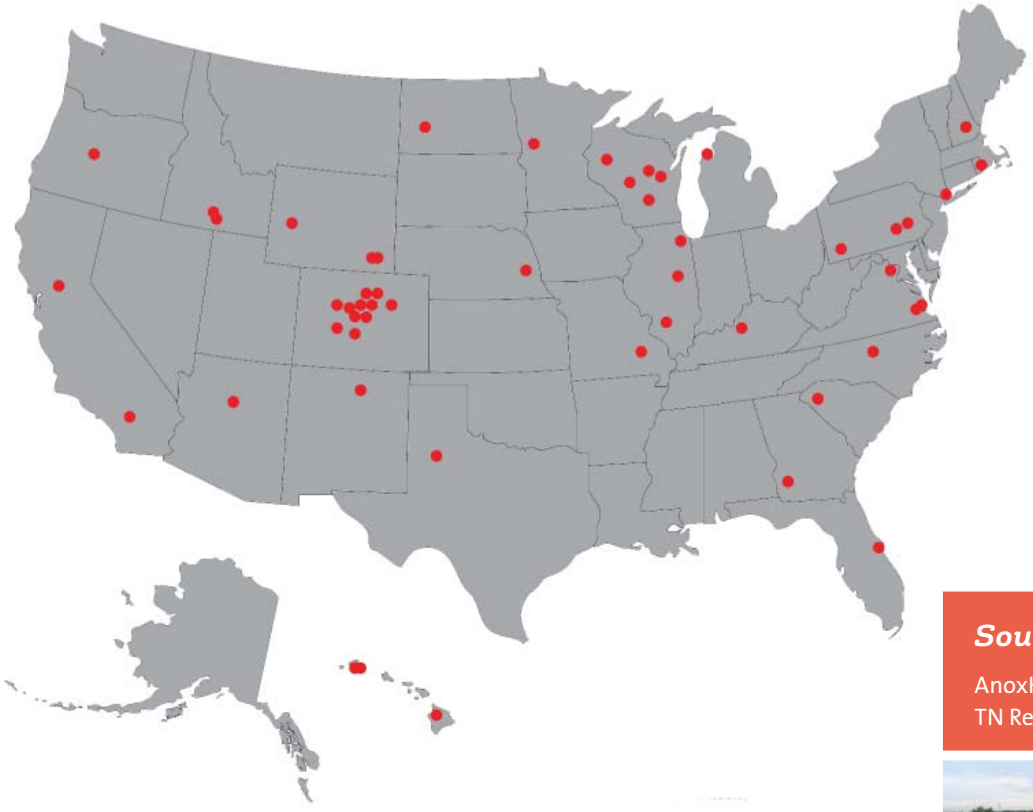
Providence, RI
AnoxKaldnes Hybas Technology

- Ten parallel process trains with a treatment capacity of 77 MGD
- Existing aeration basins converted to a 4 stage process with one IFAS zone per train
- Pre-anoxic stage for denitrification using the influent BOD as a carbon source
- Aerobic Nitrification stage for BOD and Nitrification – IFAS Zone. 52% fill using AnoxKaldnes K3 media type. Total media surface area of 36.3 million square feet
- Post-anoxic stage for additional denitrification using an external carbon source
- Clarification stage for solids separation and collection

Winning Combinations

- *High rate clarification with ACTIFLO®*
- *Primary clarification with MULTIFLO*
- *Filtration with Hydrotech Discfilter*

AnoxKaldnes Technologies Support Municipal Plants in Cities Across the Country



With more than 350 MGD of cumulative capacity at municipal plants based on design flows, there are more US AnoxKaldnes installations for more types of applications than any other MBBR/ IFAS technology.

Sustainable Nutrient Removal with IFAS

Biological | Case Study

City of Cocoa Beach, FL

The Client

Cocoa Beach is located on a barrier island of Florida's Space Coast. The city's plant sits between a golf course and a school complex.

The Benefits

- Total Nitrogen (TN) Removal
- Total Phosphorus (TP) Removal
- Energy Savings
- Low Cost

The Client's Needs

The City of Cocoa Beach faced some challenges. USEPA had established Total Maximum Daily Loads (TMDLs) for nutrients and dissolved oxygen (DO) in the Indian River and Banana River Lagoons in East Central Florida. The city's 6.0 MGD water reclamation plant would therefore need to significantly reduce nutrients in its effluent. Due to its location, any modifications would need to be within the existing plant boundaries. Construction would need to take place while the plant remained online. And the city would need to continue to serve its reclaimed water system that beneficially reclaimed over 90% of the effluent.

To these challenges, the city added some additional goals. At the same time the city wanted to identify the lowest cost solution to meet the effluent limits, the city wished to reduce energy consumption and maintain the existing operations and staffing requirements.

The Solution

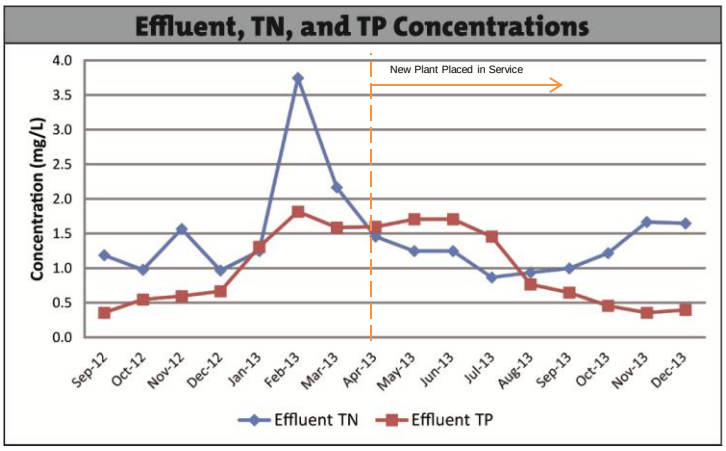
Given the need to create pre-anoxic and post-anoxic treatment zones with minimal space, and factoring in cost, the City of Cocoa Beach selected the AnoxKaldnes™ Hybrid Biofilm Activated Sludge (Hybas™) IFAS technology. An aerobic SRT of 2.25 days was needed for optimal growth of Phosphorous Accumulating Organisms (PAOs). To achieve optimum rates of nitrification and meet the effluent TN limit of 3 mg/L, two aerobic reactors in series were designed. The first was an IFAS reactor with media and the second was an activated sludge reactor without media.

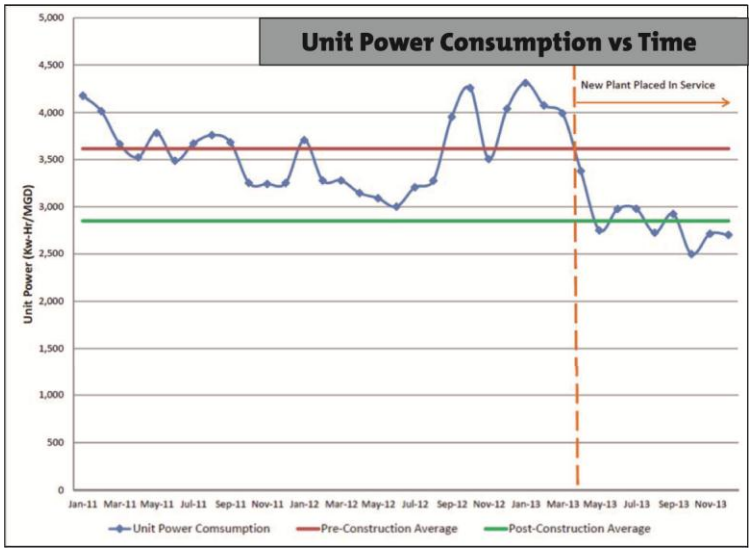
The final design retrofitted six existing A/O basins into six parallel IFAS process trains. Each process train consisted of one pre-anoxic basin, one aerobic IFAS basin, and one aerobic activated sludge basin without media. In order to achieve an effluent TN of less than 3 mg/L, two post-anoxic process trains, each with two post-anoxic basins in series, were constructed. The total SRT in the new constructed post-anoxic basin was 0.5 days, and the total SRT in the entire system was around 4 days. The total aerobic fraction is about 55% of the total volume.

Process Description

The project goals included sustainability and efficiency. The biological process and the equipment selected achieved both. Benchmarks often used to measure sustainability and efficiency are nutrient reduction, residuals production and energy consumption. Upon project completion, the plant saw a decrease in nutrient mass, sludge residuals and unit energy consumption. The data collected proves the reduction for all three parameters.

The Hybas process effectively reduced effluent nitrogen from an average of 8.64 mg/L in 2011 to 1.62 mg/L in 2013. This represented an 81% reduction in effluent TN values. The pre-IFAS baseline value for effluent total phosphorous (TP) was approximately 1.6 mg/L. After project completion and prior to commencing alum feed, the effluent values for TP were 0.46, 0.36 and 0.40 mg/L. This represented a 32% reduction in TP and exceeded the design limit of 1.0 mg/L.





Results

The combination of process design and equipment selection resulted in a completed treatment facility with equal hydraulic treatment capacity, advanced nutrient removal capability, and decreased power requirements. The reduction in energy usage is evidenced by a decrease in connected horsepower and a significantly lower unit power consumption. In terms of connected horsepower, the total load assigned to blowers, mixers and pumps was reduced by 220 HP. Prior to construction, the total rated horsepower for all blowers, mixers and pumps was approximately 1,200 HP. In the post-construction condition, the total connected load was reduced to 980 HP. This represented a reduction of approximately 18% in terms of connected load. With the AnoxKaldnes Hybas IFAS system, the City of Cocoa Beach met the challenges of tighter nutrient regulations, site constraints, and operating conditions. And the project met the city's goals to meet these challenges with a simultaneous decrease in energy use. On top of that, the city did not need to increase operations time or staffing to meet these goals. With the AnoxKaldnes Hybas IFAS system, the city is now meeting stricter nutrient regulations – and doing it sustainably.

AnoxKaldnes™ Expertise

Rocky Mountain Region | MBBR and Hybas™

With over 600 full-scale installations worldwide, the AnoxKaldnes technology is backed by unparalleled experience and expertise.

The AnoxKaldnes™ MBBR (Moving Bed Biofilm Reactor) process is a biological wastewater treatment process that utilizes specialized plastic carriers to create a surface on which a biofilm can attach. The carriers are mixed in the reactor, and their large surface provides capacity for a large biomass inventory, reducing the volume required for treatment. In the AnoxKaldnes MBBR process, most of the biomass resides in the biofilm on the carriers.

The AnoxKaldnes™ Hybas™ technology is an application of the IFAS process – Integrated Fixed-Film Activated Sludge. The same AnoxKaldnes MBBR media are used in the Hybas process, the difference being the carriers are used in an activated sludge environment. The suspended-growth biomass of the activated sludge and the biofilm on the carriers work together to provide higher treatment capacity in a smaller volume than that required for activated sludge alone.

Erie, CO - Hybas™

Started in 2011 with a design flow of 1.75 MGD and a peak flow of 4.2 MGD, this plant meets effluent criteria for ammonia <1 mg/L, NOx <9 mg/L and TP <1 mg/L. It is designed with biological phosphorous removal and pre-anoxic zones ahead of two aerobic Hybas zones with K3 media. In addition, a Kruger Discfilter provides tertiary filtration for water reuse.

Broomfield, CO - Hybas™

This system was installed in 2002 and is the first full-scale Hybas in the World. This plant is designed with biological phosphorous removal and pre-anoxic zones to achieve a TP of <1 mg/L, TN of 8 mg/L, and ammonia <1 mg/L. The Hybas process enabled expansion from 4 MGD to 8 MGD without additional aerobic reactor volume. The City has subsequently added an additional 4 MGD train to the plant.

Cheyenne, WY - Hybas™

The Dry Creek Hybas system was installed in 2005 and designed for 8 MGD, with effluent ammonia <2 mg/l and TN <12 mg/l. This plant was a partial retrofit of an existing circular aeration basin along with one new rectangular train to complete the upgrade.

Cheyenne, WY - MBBR

The Crow Creek MBBR was installed in 2005. The plant previously used a trickling filter. The city chose MBBR because it is also a biofilm process that would be compatible with the existing clarifiers. The MBBR has two trains of 4 aerobic reactors in series to treat 5 MGD and achieve BOD <10 mg/L and ammonia <2 mg/L. In 2010, the plant added two pre-anoxic MBBR reactors to target a TN of 10 mg/l.

Johnstown, CO - MBBR After Lagoons

The original plant consisted of 3 lagoons. The City required an upgrade in order to increase treatment capacity and meet lower ammonia limits. The MBBR system has a design flow of 0.75 MGD with a media fill of 26%. A future, construction-free expansion to 1.5 MGD can be achieved by simply adding media to the MBBR reactors.

Fairplay, CO - Hybas™

This plant formerly consisted of a lagoon system. The Fairplay Sanitation District was challenged in meeting their ammonia permit limits and wanted a process that would produce a stable effluent in a small footprint. The District replaced the lagoons with a new Hybas system in 2008. The plant design temperature is 4.5°C at 10,000 ft of elevation and a flow of 0.3 MGD. The effluent limits are 1 mg/L ammonia, 10 mg/L BOD and 10 mg/L TN. In order to achieve these limits, the plant was designed with pre-anoxic reactors and aerobic Hybas reactors.

South Adams County, CO - MBBR

This MBBR system was completed in 2003 and was designed with pre-anoxic and aerobic zones to achieve TN <11 mg/L. The MBBR was selected due to the City's desire to operate a fixed film system and reuse the existing clarifiers.

Crested Butte, CO - Hybas™

Crested Butte is designed for 0.125 MGD with a peak of 0.5 MGD. The plant includes pre-anoxic and aerobic Hybas reactors containing K3 media to achieve BOD <10 mg/L, ammonia <1 mg/L and TN< 12 mg/L. By choosing Hybas, the City was able to add one new train of treatment capacity while planning for future retrofit of the existing activated sludge plant to Hybas.

Georgetown, CO - Hybas™

This plant is designed for 0.4 MGD with a peak of 0.8 MGD. It has pre-anoxic reactors, one Hybas zone with K3 media, and one aerobic zone with MLSS (no media) to achieve BOD <10 mg/L, ammonia <2 mg/L and TIN <10 mg/L. The MLSS zone is designed to be retrofitted with media for future growth.

AnoxKaldnes Hybas™: Meeting New Limits

Wastewater | Case Study

Providence, RI

The Client

The Narragansett Bay Commission owns and operates the Field's Point Wastewater Treatment Facility (FPWWTF) in Providence, Rhode Island.

The Benefits

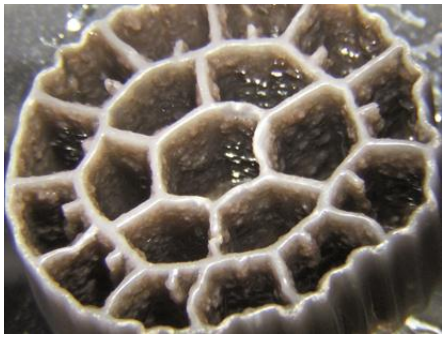
- Retrofit of the existing infrastructure allows the plant to meet stricter nutrient limits without new basins
- Total nitrogen removal in existing activated sludge basin volumes
- Reduced oxic volume required for nitrification allowing for primary and secondary anoxic zones

The Client's Needs

The Narragansett Bay Commission's service area encompasses the metropolitan Providence and Blackstone Valley areas. Originally constructed in 1901, the Field's Point Wastewater Treatment Facility (FPWWTF) provides secondary treatment for maximum monthly flows of up to 77 MGD and primary treatment and disinfection for an additional 123 MGD of wet weather flows. Total treatment capacity at the Field's Point WWTF is 200 MGD.

After receiving an NPDES operating permit that required the plant to remove total nitrogen (TN) to 5 mg/L from May through October the Narragansett Bay Commission chose AnoxKaldnes Hybas™ (Hybrid Biofilm Activated Sludge), an integrated fixed film activated sludge (IFAS) process, as their solution.

The Solution



In 2008, AnoxKaldnes Hybas™ designs were completed by Veolia for the upgrade of the Field's Point Wastewater Treatment Facility to meet new seasonal effluent limits for TN and TIN.

The AnoxKaldnes Hybas™ process has the advantage of accepting a significant combined sewer overflow (CSO) while maintaining a nitrifying biomass and eliminating the need to construct new aeration basins on a constrained site.

The IFAS conversion was accomplished without the need to add secondary clarifier capacity. FPWWTF began operation as the largest IFAS system in the world.

Process Description

The Field's Point Wastewater Treatment project involved process design, equipment supply, training, in-field services, performance testing and guarantees related to the AnoxKaldnes Hybas™ process. The biological nutrient removal process included the following unit processes:

- Pre-Anoxic Stage with two reactors per train for denitrification using the influent BOD as a carbon source and return mixed liquor from the aerobic stage for the source of nitrate.
- Aerobic Nitrification Stage with IFAS and post-IFAS oxic zones for BOD and Nitrification.
- Post-Anoxic Stage with two reactors per train for additional denitrification using an external carbon source (if needed).
- Re-Aeration Stage for removal of any residual carbon source and nitrogen gas stripping.

Corporate Description

Company Overview

Veolia Water Technologies, Inc. (dba Kruger) is a water and wastewater solutions provider specializing in advanced and differentiating technologies. Kruger provides complete processes and systems ranging from biological nutrient removal to mobile surface water treatment. The AnoxKaldness Hybas and MBBR processes, ANITA Mox Deammonification Process, BioCon Dryer, BIOSTYR Biological Aerated Filter (BAF), NEOSEP MBR and HYDROTECH Discfilters are just a few of the innovative technologies offered by Kruger. Kruger is a subsidiary of Veolia Water Technologies, a world leader in engineering and technological solutions in water treatment for industrial companies and municipal authorities.

Veolia, present throughout the world, develops a global approach responding to specific needs of customers at each of their production facilities. This has allowed Veolia to become the world leader in design, project management and execution of projects for water and wastewater treatment plants. The company also creates dedicated technology solutions to meet its customer's needs. Its unique portfolio of differentiating technologies, developed by the group's R&D centers, ensures unsurpassed innovation and control of each treatment line for public organizations and industries. Furthermore, a whole range of associated services is offered on each site to guarantee the technical efficiency and life expectancy of the installed solutions. Veolia continually extends and enriches its offer, to guarantee expertise and competence at every step of the projects it undertakes.

Kruger prides itself for being a customer-focused organization that provides solutions to challenges faced by municipalities and not just another equipment supplier. To achieve this, Kruger has gathered a force of process experts, trained sales staff, and project managers that share our vision and priorities. Please see the attached information describing the experience and expertise of Our People. We are proud of our staff and know that they are the most qualified team in the market to provide your project the right solution to meet the plant's needs and future goals.

Location and Addresses of Corporate and Regional Offices

Kruger's corporate office is located in the Raleigh, NC area.

Kruger	Customer Support Center
4001 Weston Parkway	1500 Garner Road, Suite C
Cary, NC 27513	Raleigh, NC 27610

In addition, Veolia hosts multiple regional offices across North America in support of our clients, including the Customer Support Center (i.e. aftermarket services and equipment spare parts),

within 20 minutes from Veolia's corporate office. See the Summary of Support Services section below for more details.

Date and State of Incorporation

Veolia celebrates 160 years of service to cities, regions and local communities. Established in 1853, Veolia's long history proves our stability and financial strength. Veolia Water Technologies, Inc. (dba Kruger) was incorporated on May 27, 2004 and is incorporated in Delaware. Kruger further builds on Veolia's expertise, offering more than 30 years of experience servicing the US municipal market.

Bonding Qualifications

Veolia Water Technologies, Inc. (dba Kruger) has sufficient financial stability and backing to provide the performance bond as required by the specifications. Kruger can provide a pre-qualification letter for proof of ability to provide such a bond as requested within the specifications upon request.

Corporate and Financial Stability

The Veolia companies in North America, including Veolia Water Technologies, Inc. dba Kruger (Kruger), are part of Veolia Environnement, S.A. (Veolia). Veolia traces its history to the establishment of Compagnie Générale des Eaux (CGE) on December 14, 1853. Since that time and over 160 years, Veolia has continued to focus on new frontiers of environmental business and its traditional markets, in emerging and developed countries. In support of this progress and in line with our commitments, Veolia has strengthened its operating and financial performance.

Veolia is the global leader in optimized resource management. With nearly 171,000 employees worldwide, Veolia designs and provides water, waste and energy management solutions that contribute to the sustainable development of communities and industries. Through its three complementary business activities, Veolia helps to develop access to resources, preserve available resources and replenish them.

In 2018, the Veolia group supplied 95 million people with drinking water and 63 million people with wastewater service, produced nearly 56 million megawatt hours of energy and converted 49 million metric tons of waste into new materials and energy. Veolia Environnement, operating in five continents, realized $30.1 billion (€25.91 billion) in revenue for 2018.

Kruger, as part of the Veolia family of companies, provides financial strength and stability to our customers. Veolia offers the support structure desired by municipal authorities, assuring project stakeholders of Kruger's commitment to meeting performance guarantees, extended project schedules and ongoing warranties. Veolia has been in business for over 160 years, providing the comfort to our customers that Kruger will remain supportive for the life of the project and beyond.

Veolia's 2018 financial statement is available online. Please see the following website for more information.

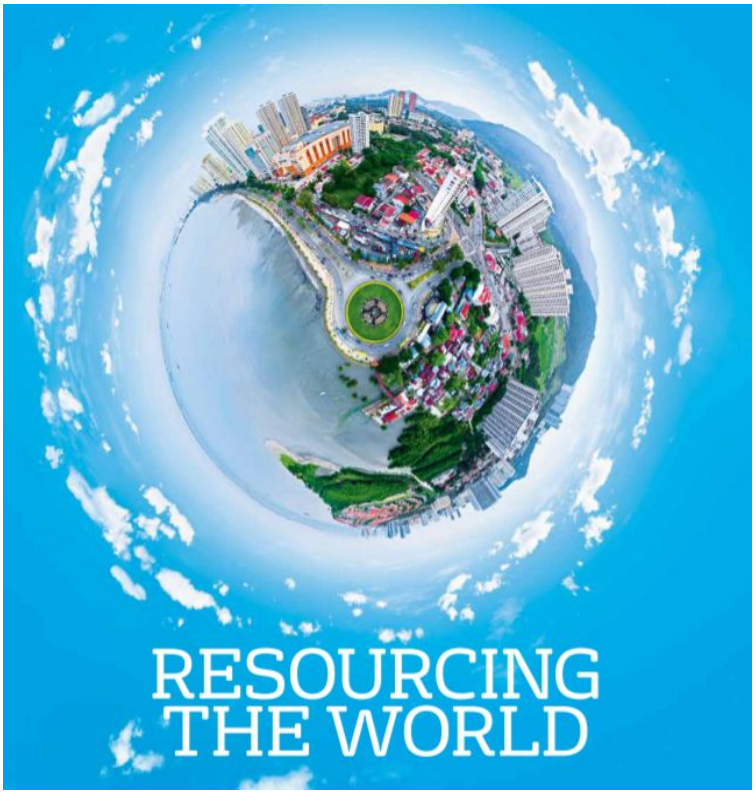
https://www.veolia.com/en/veolia-group/finance

Corporate Sustainability

Veolia's 'Resourcing the world' mission is based on a vision of our environment that is shared by our employees, including those at Kruger: the world as it should be. In this world, fewer resources are wasted and they are shared fairly; waste has a value and uses are found for wastewater; and energy is efficiently managed and reused. In this world, companies as well as government bodies play a central role in anticipating and supporting major global transitions. In this world, companies voluntarily ask themselves what is their purpose and their use. This vision both drives and commits us. Our goal is not only to be the world leader but also the standard setter for environmental businesses: *the company that resolves, prepares the ground and invents, inspires and shows the way.*

Resourcing the World

The world has to rethink its relationship with resources and come up with new social and economic growth models that are more efficient, better balanced and more sustainable.



With 160 years of expertise in the areas of water, energy and waste, Veolia applies its capacity for innovation to pursue human progress and wellbeing, and improving the performance of businesses and regions.

To make the switch from a resource consumption rationale to a use-and-recover approach in today's circular economy, Veolia designs and implements solutions aimed at improving access to resources while at the same time protecting and renewing those same resources.

This is how Veolia and its employees contribute each and every day to resourcing the world.

Hubgrade

WATER TECHNOLOGIES

MEETING CUSTOMER CHALLENGES IN THE WATER INDUSTRY

Hubgrade makes your resources smarter!

We're experiencing unprecedented changes in our climate on a global scale. Now we are facing new challenges, such as health crises that separates us from the places we need to be. For water technologies, we need to anticipate disturbances, prepare for them and respond quickly to ensure the resiliency of operations.

With Hubgrade, water and wastewater operations can be safely and sustainably managed no matter the crisis or location.

Hubgrade is the combination of digital tools and the knowledge of Veolia experts to deliver operational and environmental efficiency. Its specificity? Capitalizing on human competency and digital power to process data and provide you with a continuous supply of optimized solutions adapted to your priorities: compliance, operational excellence, and sustainability.

Hubgrade enables our customers to consider and implement operational solutions in line with day-to-day concerns encountered by the operators and managers.

With Hubgrade, Veolia Water Technologies addresses the water optimization needs of municipalities and industries to respond to customer challenges throughout the water cycle.

VEOLIA WATER TECHNOLOGIES DELIVERS THREE INNOVATIVE SERVICES:

Hubgrade
ASSIST

ACCOMPANY CLIENTS
IN THEIR PROGRESS PLANS
AND REMOTELY **ADVISE**
IN THE PILOTAGE
OF THEIR FACILITIES

Powered by VEOLIA

Veolia's global digital offer

A wide and flexible range of digital solutions responding **to operator and manager challenges**

Fast access to a global network of Veolia experts

Digital platform that relies **on multi-source data, advanced analytics** and VWT lifelong water-treatment **expertise**

Proven solutions already **deployed worldwide** with **excellent customer feedback!**

Main functionalities:

- 24/7 private and secure access.
- Mobile, user-friendly interface.
- Customizable interface by user personas.
- Multiple sources of data and versatile data collection (manual and automatic).
- Best-in-class algorithms to ensure the reliability of data.
- Equipment agnostic (Veolia and non-Veolia equipment).
- Applicable to a standalone technology, a range of equipment and entire water and wastewater plants.

For your water systems, this means:

- Ensuring a high level of water quality to comply with stringent regulations.
- Reduction of operating costs.
- Avoiding investments.
- An increase in productive uptime.
- Sustainable development goals are achieved.

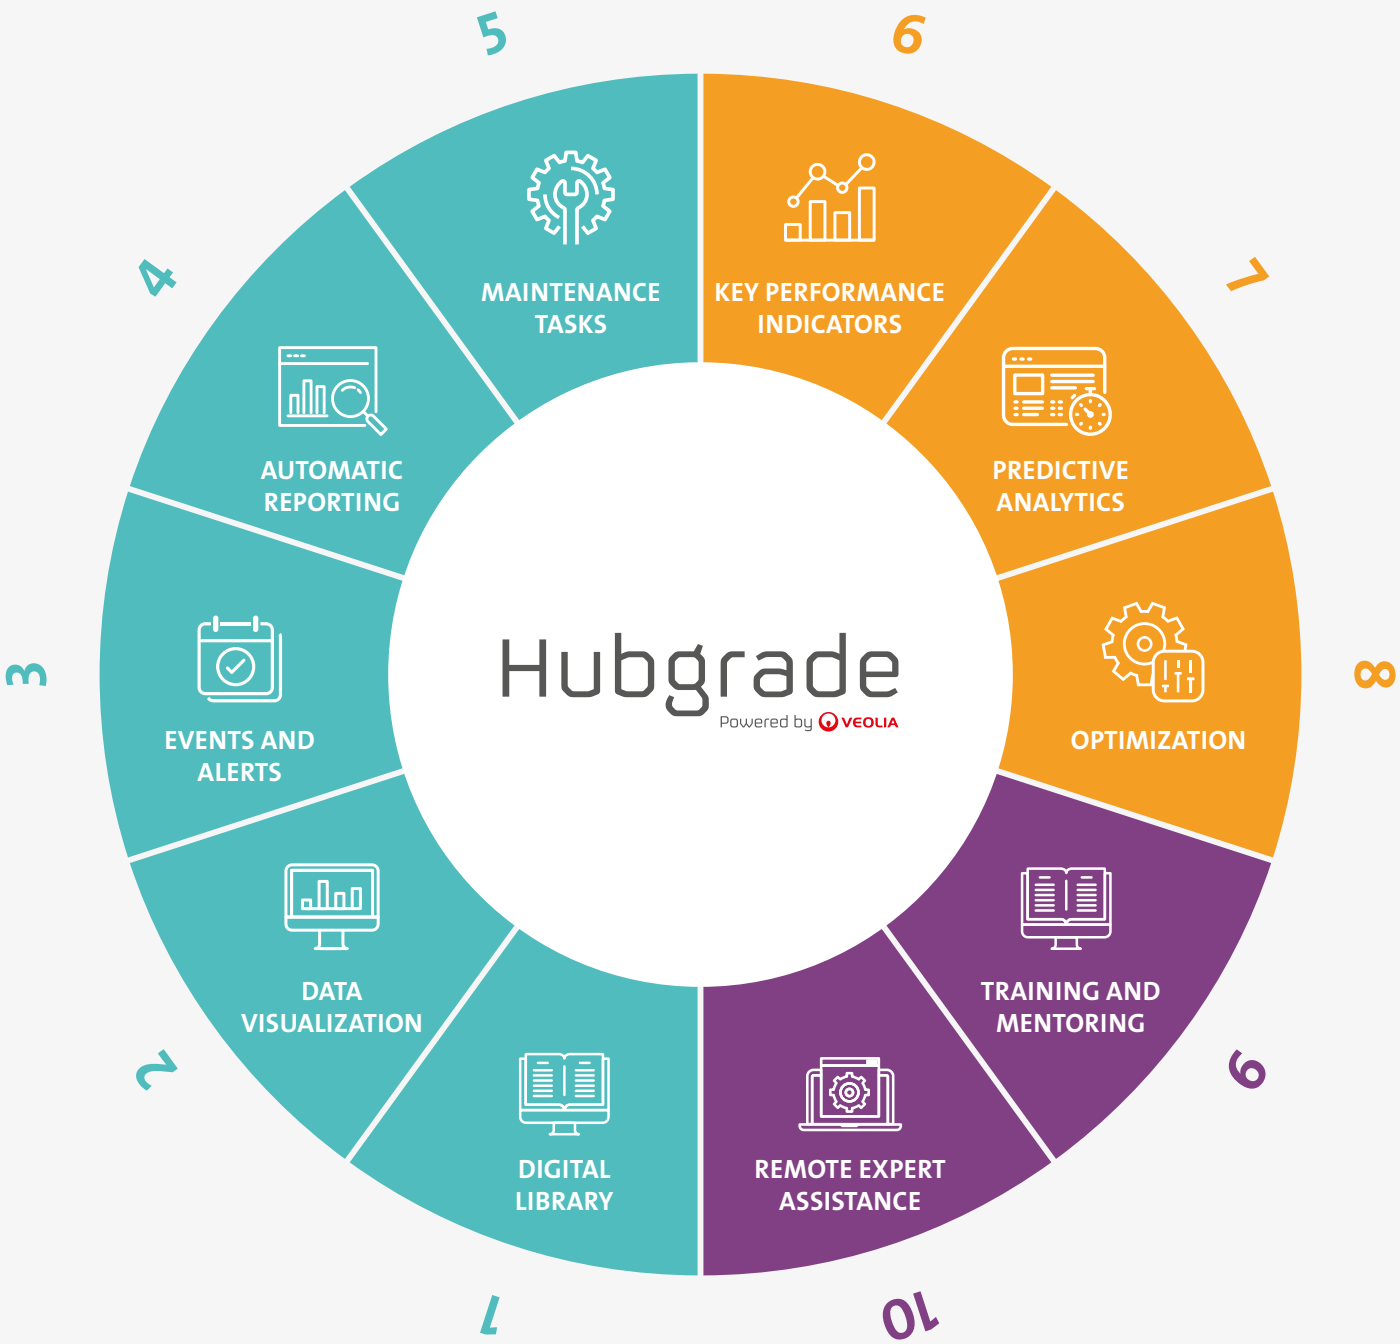
STANDARD PRODUCTS

PACKAGES SOLUTIONS

WATER AND WASTEWATER TREATMENT PLANTS

10 FEATURES

Advanced analytics combined with **human expertise** to **achieve compliance, operational excellence and sustainability** in a convenient, secure and resilient way.



The Hubgrade Digital Trust targets four sections of your digital landscape:

PHYSICAL SECURITY
Data acquisition

NETWORK SECURITY
Data transfer

CLOUD SECURITY
Data aggregation and data analysis

DATA SECURITY
Data protection

HUBGRADE RUNS ON TODAY'S MOST SECURE CLOUD-BASED SYSTEMS

Offering products with first-class digital security and compliance is our number one priority.

We guarantee a high level of cybersecurity, from the connectivity solution to your industrial control systems up to isolation at the application and data layers, with end-to-end encryption.

We constantly ensure that you are protected against cybersecurity threats.

To ensure this, we rely on certified partners and highly-resilient cloud-based systems.

Hubgrade also strictly follows guidelines from leading security standards such as ISO/IEC 27001:2013, ISO/IEC 27017:2015, NIST SP 800-210, and the NIST cybersecurity framework 1.1, in addition to best practices issued by industry 4.0 standards.

RECOVERY
Recovery planning, continuous improvement, advancement of tooling.

RESPONSE AND ACTION
Efficient analysis,rapid issue response', mitigation of risk with proper communication plus improvements.

DETECTION MONITORING
Security event detection, advanced tooling for monitoring, procedures to detect anomalies, automated process.

PROTECTION STRATEGY
Better access management data security, standard processes and practices.

CYBERSECURITY MODEL
Governance, business IT security environment, asset / fleet management, risk assessment strategy.

APPENDIX B: AQUANEREDA DESIGN SUMMARY

AQUA-AEROBIC SYSTEMS, INC.
A Metawater Company

Process Design Report

PORT ORANGE FL

Design# 166265
Option: Retrofit AGS Design (Oxic Basins and Clarifiers)

AquaNereda®

Aerobic Granular Sludge Technology

November 22, 2021
Designed By: Mike Jacobson

6306 N. Alpine Rd Loves Park, IL 61111
(815) 654-2501 www.aqua-aerobic.com

Nereda® is a registered U.S. trademark of Royal HaskoningDHV
© 2021 Aqua-Aerobic Systems, Inc

Upstream Recommendations

- 1/4 inch (6 mm) screening (perforated plate-style preferred) and grit removal (95% removal at 140 mesh) is required (by others) ahead of the AquaNereda system.

- Neutralization is required ahead of the biological system if the pH is expected to fall outside of 6.5-8.5 for significant durations.

- Coarse screening and grit removal is recommended (by others) ahead of the biological system.

- Elevated concentration of hydrogen sulfide can be detrimental to both civil and mechanical structures. If anaerobic conditions exist in the collection system, steps should be taken to eliminate hydrogen sulfide prior to the treatment system.

Flow Considerations

- The maximum flow, as shown on the design, has been assumed as a hydraulic maximum and does not represent an additional organic load.

Aeration

- The aeration system has been designed to provide 1.25 lbs. O2/lb. BOD5 applied and 4.6 lbs. O2/lb. TKN applied at the design average loading conditions, while maintaining a residual DO concentration of 2.0 mg/l.

- Depending on the actual yard piping from the blowers to the diffuser system and the heat losses associated with the yard piping, additional provisions for cooling of the air (i.e. incorporating heat exchangers) and/or modification of in-basin piping and/or diffuser sleeve material may be required. Aqua-Aerobic Systems, Inc. may need to modify the following equipment offering to ensure compatibility of all in-basin components with actual air temperatures.

Process/Site

- The anticipated effluent nitrogen requirement is predicated upon an influent waste temperature of 18 °C or greater. While lower temperatures may be acceptable for a short-term duration, nitrification and (if required) denitrification below 10 °C can be unpredictable, requiring special operator attention.

- Sufficient alkalinity is required for nitrification, as approximately 7.1 mg alkalinity (as CaCO3) is required for every mg of NH3-N nitrified. If the raw water alkalinity cannot support this consumption, while maintaining a residual concentration of 50 mg/l, supplemental alkalinity shall be provided (by others).

- To achieve the effluent monthly average total phosphorus limit, the biological process, chemical feed systems, and Cloth Media Filters need to be designed to facilitate optimum performance.

- A minimum of twelve (12) daily composite samples per month (both influent and effluent) shall be obtained for total phosphorus analysis.

- Influent to the biological system is a typical municipal wastewater application. Influent TP shall be either in a particle associated form or in a reactive soluble phosphate form or in a soluble form that can be converted to reactive phosphorus in the biological system. Soluble hydrolyzable and organic phosphates are not removable by chemical precipitation with metal salts. A water quality analysis is required to determine the phosphorus speciation with respect to soluble and insoluble reactive, acid hydrolyzable and total phosphorus at the system Influent, point(s) of chemical addition, and final effluent.

- Chemical feed lines (i.e. metal salts) shall be furnished to each reactor, aerobic digester and dewatering supernatant streams as necessary. Metal salts shall be added to each reactor during the React phase of the cycle.

- pH monitoring and control of the biological reactor is required when adding metal salts.

- The cloth media filter will only remove TP that is associated with the TSS removed by the filter. Since only insoluble, particle-associated phosphorous is capable of being removed by filtration, phosphorous speciation shall be provided by the owner to substantiate the concentrations of soluble and insoluble phosphorous in the filter influent. If the proportions of soluble (unfilterable) and insoluble phosphorous are such that removal to achieve the desired effluent limit is not practical, the owner will provide for proper conditioning of the wastewater, upstream of the filter system, to allow for the required removal.

- The ability to meet the anticipated effluent nitrogen concentration is contingent upon the system's ability to hydrolyze the influent organic nitrogen to NH3-N. A certain fraction of the organic nitrogen may be refractory and, therefore, will not be biologically converted.

- In order to meet the required nitrogen limit, strict operator attention will be necessary for process and operational control. It is also recommended that provisions be made for supplemental carbon source addition in order to facilitate denitrification (by others).

- The average and maximum design flow and loading conditions, shown within the report, are based on maximum month average and maximum day conditions, respectively.

- The proposed process evaluates splitting flows between the oxic zones and clarifiers onsite. Provisions to correctly modify the headworks and split the flows between these two trains shall be by others.

- 20' of process depth in the oxic zones and 16' of process depth in the clarifiers shall be accommodated for this process with additional freeboard to the existing basins (by others).

Post-Secondary Treatment

-The following processes follow the Biological process:
- Tertiary filtration.

Filtration

- The filter influent should be free of algae and other solids that are not filterable through a nominal 5 micron pore size media. Provisions to treat algae and condition the solids to be filterable are the responsibility of others.

- The cloth media filter recommendation is based upon Florida's Class I Reliability Requirement: With one unit out of service, the remaining filter(s) must be capable of handling 75% of the maximum design flow.

- The cloth media filter will only remove BOD5 that is associated with the TSS removed by the filter.

- The capability to add metal salts (typically alum or ferric) and/or polymer ahead of the Cloth Media Filter is recommended. In addition, adequate mixing and at least 5 minutes retention time at the maximum daily flow must be provided as part of the chemical feed system. The chemical dosage should be flow-paced and controlled to avoid over-dosing. Jar testing with various chemicals is recommended to determine the most effective chemical as well as the optimum dosage.

Equipment

- The influent enters the basin near the reactor floor. Adequate hydraulic capacity shall be made in the headworks to prevent backflow from one reactor to the other during transition of influent.

- The system has been designed to fit within existing, given basin footprint (with freeboard modification required).

- Provisions should be made, by others, for overflows in each of the recommended basins.

- If the cloth media filter will be offline for extended periods of time, protection from sunlight is required.

AquaNereda - Aerobic Granular Sludge Reactor - Oxic Zone Train Design Summary

DESIGN INFLUENT CONDITIONS

Avg. Design Flow = 8.00 MGD = 30,283 m3/day

Max Design Flow = 16.00 MGD = 60,567 m3/day

Water Level Correction Tank - Design Summary

WATER LEVEL CORRECTION TANK DESIGN VALUES (OXIC ZONE TRAIN)

No./Basin Geometry:	= 1 Rectangular Basin(s)	
Minimum Level:	= 0.0 ft	= (0.0 m)
Max. Water Depth:	= 13.4 ft	= (4.1 m)
Max. Basin Volume (Total):	= 68,685 gallons	= (260 m^3)

WATER LEVEL CORRECTION TANK DESIGN VALUES (CLARIFIER TRAIN)

No./Basin Geometry:	= 1 Rectangular Basin(s)	
Minimum Level:	= 0.0 ft	= (0.0 m)
Max. Water Depth:	= 9.4 ft	= (2.9 m)
Max. Basin Volume (Total):	= 47,551 gallons	= (180 m^3)

WATER LEVEL CORRECTION VOLUME DETERMINATION

The water correction tank volume has been determined based on the required level drop in the AquaNereda reactors. The water from this tank will be pumped back to the head of the plant.

Sludge Buffer - Design Summary

SLUDGE BUFFER DESIGN VALUES (OXIC ZONE TRAIN)

No./Basins Geometry:	= 2 Rectangular Basin(s)	
Minimum Level:	= 1.0 ft	= (0.3 m)
Max. Level:	= 14.4 ft	= (4.4 m)
Max. Basin Volume:	= 52,456 gallons	= (199.0 m^3)

SLUDGE BUFFER DESIGN VALUES (CLARIFIER TRAIN)

No./Basins Geometry:	= 2 Rectangular Basin(s)	
Minimum Level:	= 1.0 ft	= (0.3 m)
Max. Level:	= 10.4 ft	= (3.2 m)
Max. Basin Volume:	= 22,756 gallons	= (86.0 m^3)

SLUDGE BUFFER VOLUME DETERMINATION

The sludge buffer volume has been determined based on the sludge production and the concentration of sludge from the AquaNereda reactors. The Sludge from this basin will be pumped to the sludge handling system, and the supernatant back to the head of the plant.

AquaDISK Tertiary Filtration - Design Summary

DESIGN INFLUENT CONDITIONS

Pre-Filter Treatment:	AquaNereda		
Avg. Design Flow	= 12.00 MGD	= 8333.33 gpm	= 45424.94 m³/day
Max Design Flow	= 24.00 MGD	= 16666.67 gpm	= 90849.88 m³/day

AquaDISK FILTER RECOMMENDATION

Qty Of Filter Units Recommended	= 2
Number Of Disks Per Unit	= 18
Total Number Of Disks Recommended	= 36
Total Filter Area Provided	= 3873.6 ft² = (359.87 m²)
Filter Model Recommended	= AquaDisk Concrete: Model ADFSC-108 x 18E-PC
Filter Media Cloth Type	= OptiFiber PES-14

AquaDISK FILTER CALCULATIONS

Filter Type:

Vertically Mounted Cloth Media Disks featuring automatically operated vacuum backwash.

Average Flow Conditions:

Average Hydraulic Loading = Avg. Design Flow (gpm) / Recommended Filter Area (ft²)
= 8333.3 / 3873.6 ft²
= 2.15 gpm/ft² (5.26 m/hr) at Avg. Flow

Maximum Flow Conditions:

Maximum Hydraulic Loading = Max. Design Flow (gpm) / Recommended Filter Area (ft²)
= 16666.7 / 3873.6 ft²
= 4.30 gpm/ft² (10.52 m/hr) at Max. Flow

Solids Loading:

Solids Loading Rate = (lbs TSS/day at max flow and max TSS loading) / Recommended Filter Area (ft²)
= 3002.4 lbs/day / 3873.6 ft²
= 0.78 lbs. TSS /day/ft² (3.78 kg. TSS/day/m²)

The above recommendation is based upon the provision to maintain a satisfactory hydraulic surface loading at 75% of the Maximum Design Flow with (1) unit out of service. The resultant hydraulic loading rate at 75% of the Maximum Design Flow is: 6.5 gpm / ft² = (4.4 L/s / m²)

RE: Headworks Grit Removal System
Port Orange, FL WWTP
File #20_11_0451-B

Dear Mr. Blais:

Thank you for your interest in Hydro International. We are pleased to present our proposal for a HeadCell® Grit Removal, Classification, Washing, and Dewatering System. Hydro International is dedicated to providing innovative, high performance advanced grit management systems grit removal equipment. Supported by over 30 years of research, testing both in our lab and in the field, product development and superior engineering we pride ourselves on providing high-quality products and unmatched customer service. Our extensive experience includes thousands of installations throughout the world.

Grit is continually introduced into collection systems but is not uniformly carried to treatment facilities. As flows increase, the grit load entering the plant elevates. Once in the treatment plant, where velocities are slower, grit will deposit in processes, disrupting systems, decreasing equipment longevity, and increasing maintenance costs. The HeadCell® Grit Removal System offers many benefits over conventional grit removal systems including:

- Complete system designed to process the solids load as well as the hydraulic load through each step of the process, collection, washing/classification, and dewatering and producing a clean, dry product.
- Removing fine and slowly settling grit, protecting equipment and processes from abrasive wear and sedimentation
- All-hydraulic design with no moving parts, minimizing operating and maintenance costs
- Small footprint yet capable of high efficiency solids capture and removal
- Robust design allowing long component life with minimal wear

We sincerely appreciate your interest in our equipment and look forward to working with you on this project. As you progress with the design, we can quickly generate CAD drawings, budget updates, and specifications as well as provide review of equipment layouts and specifications for your particular application. Reference lists are available through your local representative. If you have any questions or concerns, do not hesitate to contact us.

Regards,
Hydro International

Lindsey Schweitzer
Applications Engineering Manager

Performance Objective

Hydro International is pleased to propose the following HeadCell® grit removal, washing, and dewatering system to be installed in an existing plant which has flows of 12 mgd average and 24 mgd peak. Each component of the grit removal systems performance shall be outlined below.

Proposed Equipment Summary

HeadCell® Grit Concentrator Unit

The HeadCell® is an all-hydraulic grit concentrator, which uses vortex flow and a stacked tray design to efficiently capture and settle fine grit via large surface area and short settling distances. The HeadCell® includes a system (Patent Number 62/447,688) for directing floatable material towards the effluent weir. The unit can be installed into the process flow, downstream of screening, in any system where limited head is available. The unit requires no external power source, has no internal moving parts, is self-cleaning, and has a compact modular construction. Wide turndown ratios can be accommodated in the HeadCell® when it is combined with Hydro's high performance washing system.

Hydro has standardized on a new HeadCell® tank design that incorporates a shorter stainless-steel inlet duct. The new design connects to the opening at the inside face of the tank structure to minimize the steel exposed to the corrosive environment at and above the air/water interface.

Therefore, the tapering of the transition upstream of the tank wall will need to be done with the concrete form work during the tank placement. Concrete work from the upstream channel to the tank wall needs to reflect the proper slope (angling downward from the influent channel invert towards the inlet flume opening) and taper (narrowing the influent channel width to match the width of the flume opening), as shown on the drawings.

A second change is the collection sump design. The sump is larger in diameter and formed from concrete/grout below the trays. The larger grit sump will allow for the intermittent grit fluidization in lieu of 24/7. The sump includes a fluidizing ring to resuspend settled grit more aggressively. It does require more water, but as it is run intermittently the resulting water usage is lower. The larger sump does allow for intermittent grit pumping in applications where overnight flows are low or other project drivers make intermittent grit pumping a benefit.

Specifications

Quantity:	2
Size:	9' diameter
Number of Tray/Unit:	12
Surface Area/Unit:	382 ft^2
Loading Rate @ Peak Flow/Unit:	10.9 gpm/ft^2
Performance @ Peak Flow:	95% removal of all grit (SG 2.65) ≥ 106 microns
Performance @ Average Flow:	95% removal of all grit (SG 2.65) ≥ 75 microns
Peak Flow/Unit:	12 mgd with 12" headloss
Average Flow/Unit:	6 mgd with 3" headloss
Discharge:	Weir
Underflow Connection:	4" flanged pipe
NPW Connection:	1.5" NPT
NPW Requirement/Unit:	Intermittent 32 gpm @ 50 psig
Spray Bar Connection:	1.5"
Spray Bar NWP Requirement/Unit:	Intermittent 16 gpm @ 50 psig
Material of Construction:	304 SS Support Structure/Underflow 316 SS Duct Low Density Polyethylene Trays
Weight Dry (approximate):	3600 lbs

©2021 Hydro International

Hydro GritCleanse™ Grit Washing / Dewatering Unit

The Hydro GritCleanse™ is a fully automated, high efficiency unit that effectively removes, washes, and dewaters fine grit, sugar sand, and high-density fixed solids from grit slurries. The large conical clarifier with tangential inlet and internal baffle enhances the settling of fine particles and the fluidized sand bed scrubs off and separates attached organics, resulting in a dry grit with extremely low organic content suitable for landfill disposal.

Specifications

Quantity:	2
Size:	8412
Design Flow/Unit:	250 gpm with 3” headloss
Influent Solids Concentration:	≤1.5%
Influent Connection:	4” flanged pipe
Capacity:	up to 1.5 cy/hr
Screw Diameter:	12”
Clarifier Size:	84””
Min. Free Water Surface Area:	38.5 ft^2
Auger Motor:	2 hp, TENV, 40V/3 phase/ 60 Hz
Agitator Motor:	1 hp, TENV, 460V/3 phase/ 60 Hz
Effluent Connection:	8” flanged pipe
Organics Discharge Connection:	4” flanged pipe
Drain Connection:	3” NPT pipe
NPW Connection:	1” NPT (2 No.)
NPW Requirement Fluidized Bed:	25 gpm @ 50 psig Continuous
NPW Requirement Organics Flush:	25 gpm @ 50 psig (20-30 sec. hourly)
Operation:	Continuous or a minimum of 10-15 minutes
Body Material:	304 SS
Weight Dry/Wet (approximate):	3,600/10,400 lbs. 4
Performance:	95% removal of all grit (specific gravity 2.65) ≥ 75 microns with less than 5% volatile solids and greater than 90% total solids w/ standard intermittent screw operation

Grit Pump

The grit pump shall be designed to convey grit slurry from the HeadCell® grit concentrator unit to the grit dewatering equipment. The grit pump shall be a recessed impeller, vortex-type unit, specifically designed to pump slurries of grit, debris, and organic solids without clogging. The parts exposed to abrasive wear (case, impeller and wearplate) shall have a minimum 650 Brinell hardness for maximum wear resistance.

Specifications

Quantity:	2
Style:	Dry- Pit
Nominal Size:	TBD
Design Flow Rate:	250 gpm
Design TDH:	20’ (TBD by Engineer)
Power Supply:	480V/3-phase
Horsepower:	TBD

Control Panel

The panel shall contain all timers, VFDs, switches, and indicator lights to operate one (1) HeadCell® spray bar, one (1) HeadCell® NPW system, one (1) GritCleanse™ unit, and one (1) grit pump in either fully automated or manual mode.

Specifications

Quantity:	2
Enclosure Material:	304 SS

©2021 Hydro International

Enclosure Type:	NEMA 4X
Power Supply:	480V/3-phase
Control Logic:	AB MicroLogix 1400 PLC w/ Panelview 600 OIU
Grit Pump Control:	Call for Relay/VFD/Controls but no VFD/none
Hydro GritCleanse™ Motor Control:	VFDs (2 No.)

System Hydraulics

System hydraulics is the responsibility of the design engineer. Hydro International can provide information on HeadCell® hydraulics and pumping and piping FAQ's to assist the engineer in determining system hydraulics and pump requirements upon request.

Design Recommendations

- 1/2" or finer screening prior to the grit removal system
- Velocity through bar screen openings/slots/apertures should not exceed 4 ft/s at peak flow as recommended by industry design manuals.
- Estimated grit load at peak flow is 0.45 yd^3/hr.
- Stated output grit quality (total solids/volatile solids) is based on a minimum plant influent grit quantity of 50 pounds FS/million gallon.
- All piping connected to Hydro equipment must be supported by other means than the Hydro equipment
- 2 – 3 ft/s channel velocities at peak flow as recommended by industry design manuals
- 4 – 7 ft/s grit slurry pipe velocities as recommended by industry design manuals
- Incorporate a drain line, piped to a floor drain, in the grit dumpster to allow for further dewatering prior to disposal
- A minimum 18" of access clearance around all equipment and minimum 3' of access clearance above equipment
- Operators find that it is useful to locate a spray hose adjacent to the equipment so that they can spray all equipment down during an inspection
- Incorporate a minimal access platform to facilitate inspection access to the top of the equipment
- Intermittent operation of grit pump may be an option. Contact Hydro for further information.
- Discharge chutes for grit should be at a minimum 45° incline if it is open chute. If it is an enclosed chute/pipe/tube then a minimum angle of 60° is required to ensure plugging does not occur.
- Grit pumps may require NPW for seal flushing. Requirements for flushing are dependent on the make, model, and seal type of the pump specified by the engineer.

Start-up

One (1) factory trained representative, two (2) trips, for start-up and instruction services as required totaling four (4) days.

Quote Validity: 30 days After expiration of validity Hydro International reserves the right to adjust pricing to account for any significant increases in material costs.

Exclusions

Any item(s) not specifically described above are excluded and are not to be supplied by Hydro International including but not limited to the following:

- Field assembly, erection, and installation
- Anchor Bolts
- Interconnecting piping and valving not expressly stated above
  Pipe connections and fittings not expressly stated above
- All pipe supports, hangers and braces
- Controls, switches, control panels and instrumentation of any kind not expressly stated above
- Wiring and conduit
- Grit pump associated piping, valving, gauges
- Covers and access hatches
- Field or touch-up paint, painting, blasting and touch-up of surface finish
- Spare parts not specifically stated above
- Unloading, hauling and storage charge

©2021 Hydro International

- Lubricating oil and greases
- Grit study, field performance testing, laboratory testing and sample collection and analysis
- All concrete and grouting work
- Insulation and heat tracing of any kind
- Structural / Seismic analysis
- Performance, Warranty, Efficacy and/or Supply Bond(s)
- Grit dumpsters
- Translation Services

Options

Quotes will be provided upon request for the following optional features:

- Additional field days for startup or training
- Explosion proof upgrade
- Upgrade 304 to 316 Stainless Steel
- Structural / Seismic Anchorage Certification
- Field performance testing, laboratory testing and sample collection and analysis
- Service & maintenance contract
- Tank Cleaning
- Extended warranty

Warranty

Hydro International's Standard Warranty shall apply per the Terms and Conditions of Sale.

Delivery

Please allow 8-10 weeks after receipt of purchase order for approval drawings. Shipment is typically a maximum of 18-20 weeks after receipt of "Approved" or "Approved as Noted, Resubmittal Not Required" submittal package. Price includes truck freight to jobsite, but does not include any state, or local taxes if required. Timelines are based on typical work-loads and can vary, with current market conditions timing will be longer.

Terms & Conditions

This proposal is made pursuant to Hydro International's standard Terms & Conditions of Sale, attached hereto, and made a part hereof.

North American Grit Gradations

Hydro International is pleased to announce the availability of national and regional grit gradation data. This data, which has been compiled from over 120 tests across North America, contains average physical size data as well as settling velocity (SES) data, making it the most comprehensive information available on grit and its behavior.

Virtually all conventional grit removal processes rely on gravity sedimentation to achieve the separation of grit from wastewater. Most conventional grit removal processes are designed based on the assumption that grit is spherical and has a specific gravity 2.65. However, not all grit maintains a specific gravity of 2.65 and other factors such as shape and encapsulation by fats, oils and grease significantly impact its settling velocity. Therefore, the best means to analyze grit is to determine the settling velocity for given particle size ranges. Settling velocity data can be correlated to the measured settling velocity of a clean sand sphere. The settling velocity is expressed as the Sand Equivalent Size (SES), which is the sand particle size having the same settling velocity as the more buoyant grit particle. The correlated particle size, or Sand Equivalent Size can then be used for design of the grit removal process.

When settling velocity is considered in the design actual removal efficiency of grit particles can be estimated more realistically.

Data is available for the following regions:

Region	States / Provinces Included
Northeast	ME, VT, NH, MA, RI, NY, CT
Mid-Atlantic	PA, NJ, MD, DE, DC, VA, WV
Southeast	NC, SC, GA, AL, FL, MS
North Central	MO, KS, KY, IN, OH, IL, MI, WI, IA, MN, ND, SD, NE
South Central	TN, AR, OK, TX, LA
West	WA, OR, CA, AK, HI, AZ, NV, NM, CO, ID, MT, UT, WY
Western Canada	AB, MB, SK
Ontario Canada	ON

State data is available for individual states where more than 5 data points are available; those states currently include: Georgia, Texas, Florida, California, and Virginia.

Standard Terms and Conditions of Sale

1. **DEFINITIONS.** “Hydro” is Hydro International with an address of 2925 NE Aloclek Drive #140 in Hillsboro, Oregon. "Buyer" is the party purchasing the goods from Hydro.

2. **ENTIRE AGREEMENT**. Hydro’s agreement is based on these terms and conditions of sale. This document, together with any additional writings signed by Hydro, represents a final, complete, and exclusive statement of the agreement between the parties and may not be modified, supplemented, explained, or waived by parol evidence, Buyer’s purchase order, any course of dealing, Buyer’s payment or acceptance, or in any other way except in writing signed by Hydro through its authorized representative. These terms and conditions are intended to cover all activity of Hydro and Buyer hereunder, including sales and use of products, parts, and work, and all related matters (references to products include parts and references to work include construction and installation). Hydro’s obligations hereunder are expressly conditioned on Buyer’s assent to these terms and conditions. Hydro objects to any terms that are different from, or additional to, these terms and conditions. Any applicable detail drawings and specifications are hereby incorporated and made a part of these Terms and Conditions of Sale insofar as they apply to the material supplied hereunder.

3. **SPECIFICATIONS.** Products are supplied in accordance with information received by Hydro, or its duly authorized agent, from Buyer. Hydro shall have no responsibility for products created or sold based upon inaccurate and/or incomplete information supplied to it. Buyer shall ensure that Hydro receives all relevant information in time to enable it to supply the appropriate products.

4. **INSTALLATION AND APPLICATION OF PRODUCTS.** Products supplied hereunder shall be installed and used only in the application for which they were specifically designed. Buyer should not presume that any products supplied by Hydro may be utilized for any applications other than those specified; nor shall Hydro’s obligations, including, without limitation, any warranty obligations, survive Buyer’s transfer of products supplied hereunder to third parties unless the products are transferred with Hydro’s consent. In addition, Buyer shall not use any product supplied hereunder at any location other than at the location for which Hydro has previously received notice from Buyer. Any breach of any of the foregoing restrictions may amount to an infringement of the patent for the products in question and will in any event void all express or implied warranties relating to the products supplied hereunder.

5. **PURCHASE PRICE AND PAYMENT TERMS.** All prices are in U.S. dollars and all payments shall be made in U.S. dollars. Payment terms are as follows:

	Incremental Payment	Cumulative Payment
Upon Approval of Shop Drawings	10%	10%
Upon Delivery of Equipment to Site	80%	90%
Upon Final Acceptance or 45 days following completion of equipment start up	10%	100%

If payments are not made in conformance with the terms stated herein, any unpaid balance shall be subject to interest at a rate 1½% per month, but not to exceed the maximum amount permitted by law. If shipment is delayed by Buyer, the previously agreed date of readiness for shipment shall be deemed to be the date of shipment for payment purposes. If manufacture is delayed by Buyer, a payment shall be made based on purchase price and percentage of completion, with the balance payable in accordance with the terms as stated. If at any time in Hydro's judgment Buyer may be or may become unable or unwilling to meet the terms specified, Hydro may require satisfactory assurance or full or partial payment as a condition to commencing, or continuing manufacture, or in advance of shipment.

Until payment in full has been received by Hydro, this Standard Terms and Conditions of Sale shall constitute a security agreement and Buyer hereby grants Hydro a purchase money security interest in and to the products produced by Hydro hereunder, and any products or proceeds thereof. In particular:

a. Hydro will retain an express purchase money security interest in and to the products and all proceeds thereof.

b. Until full payment for the products is received by Hydro, Hydro reserves the right to retake possession of the products at any time and for this purpose Buyer authorizes Hydro or its duly authorized agent to enter upon land or premises where it believes the product may be.

c. Proceeds of any disposal of the products shall be held in trust for Hydro pursuant to the terms of the Maine Uniform Commercial Code.

d. Buyer grants Hydro a power of attorney for the purpose of filing a UCC-1 financing statement in the name of Buyer to evidence Hydro’s security interest in the products.

©2021 Hydro International

6. **BACKCHARGES.** In the event that Buyer is required to make repairs, corrections or modifications to the goods supplied by Hydro, it shall only do so upon written approval from Hydro. Backcharges shall be limited to the costs directly associated in making the repairs, corrections or modifications to the goods supplied by Hydro. The costs of such backcharges shall be subject to approval by Hydro and shall be limited to: (1) directly related labor and material costs, (2) directly related equipment and tool rental at prevailing rates in the project location and (3) Buyer's overhead & supervision costs to make repairs, corrections or modifications to the goods supplied by Hydro. Buyer shall submit complete documentation to Hydro's satisfaction including but not limited to labor time sheets, material lists, and rental fees detailing the nature of the back charges. Backcharges shall be in the form of an adjustment to the contract price or reduction in retained payments and not a direct payment. No incidental or consequential backcharges shall be allowed.

7. **DELIVERY.** The goods are sold DDP (Incoterms 2010) jobsite, freight prepaid to Buyer at job site. Except as outlined in Paragraph 8 below, the risk of loss passes to Buyer after Hydro delivers the goods to the jobsite. Hydro reserves the right to select the method of shipment and carrier. Delivery dates are approximate only and are not a guarantee of delivery on a particular day. Hydro is not liable for failure or delays in deliveries of any cause whatsoever beyond the control of Hydro.

8. **TITLE & INSURANCE:** Title to the product(s) and risk of loss or damage shall pass to Buyer upon delivery to a carrier as outlined in Paragraph 7 above, or, in the event Buyer delays shipment, by the previously agreed date of readiness for shipment, except that a security interest in the product(s) or any replacement shall remain in Hydro's name, regardless of the mode of attachment to realty or other property, until the full price has been paid in cash. Buyer agrees to protect Hydro's interest by adequately insuring the product(s) against loss or damage from any external cause with Hydro named as insured or co-insured.

9. **ERECTION:** Unless otherwise stated in writing, the goods provided hereunder shall be assembled and erected by and at the expense of Buyer.

10. **CANCELLATION & BREACH:** Orders placed cannot be canceled, nor shipments of goods made up, or in process, be deferred beyond the original shipment dates specified, except with Hydro's written consent and upon terms which shall indemnify Hydro against all loss. In the event of cancellation or the substantial breach of Buyer's obligations, as by failing to make any of the payments when due, the parties agree that Hydro will suffer a serious and substantial damage that will be difficult, if not impossible, to measure, both as of the time of entering into this purchase agreement and as of the time of such cancellation or breach. Therefore, the parties agree that, upon such cancellation or breach, Buyer shall pay to Hydro the sums set forth herein below, which sums the parties do hereby agree shall constitute agreed and liquidated damages in such event:

    a. If cancellation or breach shall occur after the acceptance of the purchase order but prior to mailing of submittal documents by Hydro to Buyer, liquidated damages shall be 10% of the selling price.

    b. If cancellation or breach shall occur within thirty (30) days from the mailing of submittal documents by Hydro to Buyer, the liquidated damages shall be 20% of the selling price.

    c. If the cancellation or breach occurs after thirty (30) days from the mailing of submittal documents by Hydro to Buyer, but prior to notification that the order is ready for shipment, the liquidated damages shall be the total of 30% of the selling price plus the expenses incurred, cost of material, and reasonable value of the work expended to fill the order involved herein by Hydro's engineers and other employees, agents and representatives after the mailing of general arrangement drawings by Hydro to Buyer, said sums to be determined at the sole reasonable discretion of Hydro; provided, however, that the total liquidated damages under this provision shall not exceed the total selling price.

    d. If cancellation or breach shall occur after Hydro has notified Buyer that the order is ready for shipment, then the liquidated damages shall be the total selling price, less costs associated with startup or field testing.

11. **MATERIALS OF CONSTRUCTION, PAINTS AND COATINGS**: Buyer is responsible for determining the suitability of, and for giving final approval of, the materials of construction, paints, coatings, etc. to be used by Hydro.

12. **WARRANTY:** Any product that proves defective in material, workmanship or design within twelve (12) months after delivery (or entry into storage) will be, at the discretion of HYDRO, modified, repaired or replaced, or Buyer's payment for the products will be refunded. This shall be Buyer's sole remedy. HYDRO EXPRESSLY EXCLUDES AND DISCLAIMS ANY WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR OTHER WARRANTIES, EXPRESS OR IMPLIED.

    This warranty does not cover any defects or costs caused by: (1) normal wear and tear of equipment from designed operation. (2) modification, alteration, repair or service of the goods by anyone other than Hydro; (3) physical abuse to, or misuse of, the goods, or operation thereof in a manner contrary to Hydro's instructions; (4) any use of the goods other than that for which they were intended; (5) chemicals or components which were not disclosed to Hydro; (6) storage contrary to Hydro's instructions; or (7) failure to maintain the goods in accordance with Hydro's instructions.

    This warranty does not apply to component parts of the goods that were not both originally designed and manufactured by Hydro, including, but not limited to, valves and controls. These component parts do not carry any warranties by Hydro, and only carry the warranties, if any, of their manufacturers.

©2021 Hydro International

In order for Buyer to make a claim under this warranty, Buyer must promptly, and within the warranty period, notify Hydro in writing of any defect(s) in the goods covered by this warranty. If any defect(s) in the goods covered by this warranty are visible at the time of delivery, Buyer must notify Hydro of the defect(s) in writing within five working days. To make any claim under this warranty, Buyer must also fully comply with written authorization and return instructions from Hydro.

13. **FIELD SERVICE:** Startup/Field Service will only be scheduled upon written request. Buyer shall notify Hydro of schedule requirements at least ten (10) working days in advance, or additional charges may be added to cover late-scheduled travel costs. Additional costs will be limited to those arising out of late-scheduled costs. Should Buyer have outstanding balances due Hydro, no startup / field service will be scheduled until such payments are received by Hydro. Hydro will send documents to Buyer defining the service or startup requirements. Buyer assumes all responsibility for the readiness of the system when it requests startup service. Should Hydro's Field Service Engineer arrive at the jobsite and determine that the system cannot be started up within a reasonable time, Hydro shall have the option to bring the Field Service Engineer home and bill Buyer for time, travel and living expenses. Additional field service is available from Hydro at the prevailing per-diem rate at the time of the request for service plus all travel and living expenses, portal-to-portal. A purchase order or change order will be required prior to scheduling this additional service.

14. **LIMITATION OF HYDRO'S LIABILITY**. Hydro assumes no liability or responsibility for the misuse of its products by Buyer, Buyer's employees, agents or assigns, or other use inconsistent with the use appropriate to the performance specification requirements submitted to Hydro, and Buyer agrees to indemnify and hold harmless Hydro for any loss, costs, expense or liability that it may incur or be put to as a result of misuse or inconsistent use of the products. In addition, Hydro shall have no liability to Buyer for any consequential or incidental damages incurred by Buyer in connection with the contract documents or the products purchased by Buyer. Hydro shall not be liable for any loss which results from delay in delivery caused by any reason beyond its control, including, but not limited to, acts of God, casualty, civil disturbance, labor disputes, strikes, transportation or inability to obtain materials or services, any interruption of its facilities, or act of any governmental authority. The time for delivery shall be extended during the continuance of such conditions. The total liability of Hydro to Buyer in the form of liquidated damages for any loss, indemnity, damage or delay of any kind will not under any circumstances exceed 25% of the Contract Sum.

15. **INTELLECTUAL PROPERTY**. Hydro shall retain sole ownership of all of its intellectual property used or produced in connection with the Project, including but not limited to all drawings, specifications, software, written materials, manuals, marks, business methods, and all other property that is capable of protection by a patent, copyright or trademark (whether or not such protection has actually been sought). Buyer shall not use such intellectual property except for the purpose of confirming the quality of design and/or manufacturing of the products and services set forth in the Proposal. Buyer shall not photocopy, duplicate or in any way copy such intellectual property except for the Buyer's internal purposes only (but not for rendering services or selling products to third persons). Buyer shall not sell, license, assign or transfer the intellectual property protected by this paragraph to anyone. Buyer shall ensure that Owner is in possession of valid licenses for all third-party software (not provided by Hydro) used for the Project, and shall indemnify and hold harmless Hydro against all claims by licensors of such software. Hydro makes no warranty regarding the effect of such third-party software on the performance of the software to be developed by Hydro for the Project and Hydro shall be released from any warranties given to Buyer to the extent that such software causes or contributes to problems. Following acceptance and final payment to Hydro, Hydro will grant to the Owner a non-transferable, non-exclusive license to use the software for the Owner's internal purposes only in the form of the license agreement attached as Exhibit A. Patent: www.hydro-int.com/patents

16. **TAXES.** Prices stated herein do not include any tax, excise, duty or levy now or hereafter enacted or imposed, by any governmental authority on the manufacture, sale, delivery and/or use of any item delivered. An additional charge will be made therefore and paid by Buyer unless Hydro is furnished with a proper exemption certificate relieving Hydro of paying or collecting the tax, excise, duty or levy in question.

17. **INTERPRETATION OF CONTRACT.** This contract shall be construed according to the laws of the State of Maine.

18. **CHOICE OF FORUM**. Buyer and Hydro hereby consent and agree that the United States District Court for the District of Maine or the District Court or Superior Court located in the City of Portland, County of Cumberland, Maine will have exclusive jurisdiction over any legal action or proceeding arising out of or relating to the contract documents, and each party consents to the personal jurisdiction of such Courts for the purpose of any such action or proceeding. Buyer and Hydro further hereby consent and agree that the exclusive venue for any legal action or proceeding arising out of or relating to the contract documents will be in the County of Cumberland, Maine. Each party hereby waives all rights it has or which may hereafter arise to contest such exclusive jurisdiction and venue.

19. **ATTORNEYS' FEES.** If any judicial or non-judicial proceeding is initiated for the purpose of enforcing a provision of this contract, the prevailing party shall be awarded reasonable attorneys' fees in addition to all other costs associated with the proceeding, whether or not the proceeding advances to judgment.

20. **SEVERABILITY.** If any provisions of this contract are held invalid by a court of competent jurisdiction, the remainder of this contract shall not be rendered invalid, and such invalid provisions shall be modified, in keeping with the letter and spirit of this contract, to the extent permitted by applicable law so as to be rendered valid.

©2021 Hydro International

21. **ANTI-BRIBERY.** Hydro International will not engage in any form of bribery or corruption. The offering, giving or receiving of bribes is contrary to Hydro International's values and can play no part in the way in which it carries out its business. Hydro requires you to support our approach and implement provisions consistent with our policy through your own organization and your supply chain. Please find a copy of our Anti-Bribery and Corruption Policy on our website at: https://www.hydro-int.com/sites/default/files/hydro_international_anti-bribery_and_corruption_policy_-_july_2018.pdf

BID PRICING

ITEM	EQUIPMENT	ESTIMATED SHIP DATE*	PRICE
I	Two 80'-0" diameter Clarifiers Replacement components including installation services	*	$1,175,470.00

DELIVERY

*Ovivo will submit drawings for approval within three **(3) weeks** after Purchaser's receipt of Ovivo's written acknowledgement of an approved purchase order. Ovivo intends to ship all Products **twenty (20) weeks** after receipt of approved drawings from Purchaser. Installation services lead time will be 8 to 10 weeks.

GENERAL NOTES

The dates of drawing submission and shipment of the Products represents Ovivo's best estimate, but is not guaranteed, and Ovivo shall not be liable for any damages due to late delivery. The Products shall be delivered to the delivery point or points in accordance with the delivery terms stated in this proposal. If such delivery is prevented or postponed by reason of Force Majeure, as defined in Ovivo's standard terms and conditions of sale, Ovivo shall be entitled at its option to tender delivery to Purchaser at the point or points of manufacture, and in default of Purchaser's acceptance of delivery, to cause the Products to be stored at such a point or points of manufacture at Purchaser's expense. Such tender, if accepted, or such storage, shall constitute delivery for all purposes of this proposal. If shipment is postponed at request of Purchaser, or due to delay in receipt of shipping instructions, payment of the purchase price shall be due on notice from Ovivo that the Products are ready for shipment. Handling, moving, storage, insurance and other charges thereafter incurred by Ovivo with respect to the Products shall be for the account of Purchaser and shall be paid by Purchaser when invoiced.

PROJECT SUMMARY:

Ovivo USA, LLC (formerly EIMCO Water Technologies – EWT) is pleased to offer the following proposal to provide two (2) new 80 ft. diameter Clarifier mechanisms to replace existing south units.

ITEM I – Clarifier components include:

- Complete C40HT drive assembly, with gear motor and drive torque control. Drive unit is completely factory assembled, calibrated and tested.
- Complete motor drive package, including 1 hp gearmotor, sprockets, chain and guard.
- Drive torque control with micro switches and actuating pin.
- Premium Ovivo Drive paint scheme:
    - Prime and intermediate coats with Tnemec Series 66HS epoxy, 4-6 mils dft, each coat.
    - Top coat, Tnemec Series 73-26BL (Clear Sky) Endura Shield urethane, 3-5 mils dft.
        - Top coat is highly resistant to abrasion, wet conditions, corrosive fumes, chemical contact & weathering.
- Cage, 4 ft square box truss design, Carbon Steel.
- Influent column, 30” diameter x 1/4” plate, flanged with influent ports, Carbon Steel.
- Rake arms, two full radius square box truss design including spiral rake blades (3/16” thick plate), Carbon Steel, with stainless steel squeegees. Blades taper from 8” at tank wall to 24” at tank center.
- Rotating sludge collection drum, 8’-0” diameter, Carbon Steel.
- Feedwell, 20’ diameter x 6’ deep x 3/16” plate with supports, Carbon Steel.
- Energy dissipating inlet, 7’ diameter x 3.5’ deep with scoop gates and bottom plate, Carbon Steel.
- Two (2) scum skimmers arms, Carbon Steel with skimming mechanisms and (1) 4’ wide scum collection box with supports and outlet nozzle.
- Effluent weir plates, FRP, 9 inch deep x 1/4” thick with 2 1/2” deep 90 degree V-notches spaced at 6 inch intervals.
- Scum baffle plates, FRP, 12 inch deep x 1/4" thick includes FRP supports.
- Launder system, FRP, 30 inch wide x 21 inch (nom) deep x 1/4” thick including drop out launder and supports fastened to tank wall.
- Clarifier components to be Carbon Steel (unless noted).
- Carbon steel clarifier components to be shop painted.
    - Surface Preparation to be SSPC SP-10.
    - Prime and final coated with Tnemec Series N69F Epoxoline (Black Color).
- Assembly hardware to be 304 Stainless Steel. Existing anchor bolts to be reused – if they are not structurally sound, they will be replaced with adhesive type 304 SStl anchors.
- Two (2) year warranty with Ovivo installation services.
- Engineering, complete arrangement and assembly drawings will be included with O & M manual.

- Operation and maintenance manuals (2) hard copy & (1) PDF.
- Freight, FCA Factory, freight allowed to jobsite.
- Field service;
    - Includes the service of a qualified service engineer for the following:
        - 1 trips / 2 days each trip - includes start up and testing for each machine.

Installation Services:

- Florida State licensed General Contractor.
- (1) One Mobilization and Demobilization.
- Service truck, crane, mats and related equipment.
- 10 hours per day.
- Removal and installation of existing walkway assembly.
- Note: existing wiring and electrical components disconnection and reconnection is not provided by Ovivo.
- Removal of existing rotating mechanism including launder system and installation of new clarifier mechanism as described above.
- Alignment and leveling of drive and rotating clarifier components.
- Disposal of replaced components.

Items NOT Included: (Customer Responsibility)

- Any bonds and/or permits, including but not limited to building permits.
- Draining or cleaning of tank prior to start of installation.
- Dewatering, bypass pumping or temporary sealing of influent, effluent, RAS or other piping.
- Removal and/or disposal of any plant waste.
- Electrical disconnect/installation or alteration of existing electrical supply.
- Electrical controls, VFD controller, etc.
- Lamp and lamp posts.
- Electrical installation or alteration of existing electrical supply.
- Junction boxes, wiring, conduit, circuit breakers, etc.
- Grounding, bonding or lightning protection.
- SCADA integration.
- Existing walkway assembly to be reused - removed during mechanism installation.
- Stairways, access walkways, interconnecting walkways, etc. outside of tank.
- Spray systems
- Any items not expressly identified in this proposal.
- Sod repair/replacement in designated work area.
- Provide a laydown/staging area sufficient for materials offloading and storage for duration of project.
- Tank, platform or feedwell covers of any kind.
- Finish or touch up painting.
- Drive lubricants, installation of new or removal of existing.
- Overtime work hours or removal of old debris

DELIVERY

Ovivo intends to ship all Products as indicated above after receipt of approved purchase order and approved submittal drawings from Purchaser. However, the date of shipment of the Products represent Ovivo's best estimate, but is not guaranteed, and Ovivo shall not be liable for any damages due to late delivery. The Products shall be delivered to the delivery point or points in accordance with the delivery terms stated in this proposal. If such delivery is prevented or postponed by reason of Force Majeure, as defined in Ovivo's standard terms and conditions of sale, Ovivo shall be entitled at its option to tender delivery to Purchaser at the point or points of manufacture, and in default of Purchaser's acceptance of delivery, to cause the Products to be stored at such a point or points of manufacture at Purchaser's expense. Such tender, if accepted, or such storage, shall constitute delivery for all purposes of this proposal. If shipment is postponed at request of Purchaser, or due to delay in receipt of shipping instructions, payment of the purchase price shall be due on notice from Ovivo that the Products are ready for shipment. Handling, moving, storage, insurance and other charges thereafter incurred by Ovivo with respect to the Products shall be for the account of Purchaser and shall be paid by Purchaser when invoiced.

DELAYS IN CONSTRUCTION

Prior to Ovivo construction mobilization, the Owner is to confirm that the construction area is ready for our construction crew mobilization. Tank must be cleaned, free of plant waste and standing water, and must remain in this condition throughout construction. (Pumps, piping, valving, gates, stop blocks, etc. –whether permanent or temporary - are not the responsibility of Ovivo.)

If applicable, the electrical supply must be disconnected. Also, if applicable, arrangements must be made for reconnection of electrical supply within 1 working day of notice by Ovivo.

Owner must notify Ovivo of any confined space requirements prior to mobilization of Ovivo's crew. Unless directly stated otherwise, Ovivo will rely on the Owner for assistance with confined space requirements – this includes Owner supplied personnel for continuous surveillance (aka "hole watch"), emergency rescue personnel, and emergency rescue equipment.

Failure to have the construction area ready prior to our arrival will result in rescheduling of equipment installation and any financial costs incurred due to delays. Please note that our crews are frequently booked weeks in advance, and rescheduling to best meet the Owner's needs may not be possible.

PRICING TERMS

The prices quoted are based upon Purchaser's acceptance of this proposal; through the submission of a purchase order or other written acceptance by **November 6, 2020**. After

expiration of the pricing effectivity period, prices will be subject to review and adjustment. Prices quoted are FCA surface point of shipment, with freight included to an accessible point nearest the jobsite. Federal, state or local sales, use or other taxes are not included in the sales price.

PAYMENT TERMS

Payment terms are:

- Fifteen percent (15%) net cash after submittal.
- Eighty percent (80%) net cash upon shipment of major Product items.
- Ten percent (5%) upon the earlier of (a) Product startup and (b) one hundred eighty (180) days after completion of shipment

Invoice will be billed at % of the work complete in accordance with the schedules above. No more than 5% retention shall be withheld from each invoice. The final 5% (Retention) shall be invoiced at Substantial Completion of Ovivo's Scope, which may be different that Substantial Completion of the overall project, not to exceed 60 days from equipment delivery of the Major Item.

Purchaser shall remit payment for proper invoices received from Ovivo in accordance with the payment terms stated above even if the Purchaser has not been paid by the Purchaser's customer (the "Owner"), if Purchaser is not the end-user of the Products. Payments are due within thirty (30) days after Purchaser's receipt of invoice. Overdue and unpaid invoices are subject to a service charge of 2% per month until paid.

Any postponement of delivery dates requested by the Purchaser; or if Purchaser requests or causes cancellation, suspension or delay of Ovivo's work, for delays of up to 90 days, Purchaser shall pay Ovivo all appropriate charges incurred up to date of such event, per the schedules above, which may include partial completion of milestones. Additionally, all charges related to and risks incidental to storage, disposition and/or resumption of work shall be borne solely by Purchaser. For delays less than 90 days, Ovivo will delay portions of fabrication and delivery, to the extent possible. Delays greater than 90 days are subject to price escalation at 1.5% per month for each month or partial month of delay, further subject to the steel escalation clause; or, if possible, equipment shall be stored at the cost of the Purchaser. For delays greater than 90 days Purchaser shall accept transfer of title and make full payment for all work, due and payable thirty (30) days from the date work is placed into storage.

Credit is subject to acceptance by Ovivo's Credit Department

TAXES

Federal, State or local sales, use or other taxes are not included in the sales price. Such taxes, if applicable, shall be for Purchaser's account.

BACKCHARGES

In no event shall Purchaser/Owner do or cause to be done any work, purchase any services or material or incur any expense for the account of Ovivo, nor shall Ovivo be responsible for such work or expenses, until after Purchaser/Owner has provided Ovivo's PROJECT MANAGER full details (including estimate of material cost and amount and rate of labor required) of the work, services, material or expenses, and Ovivo has approved the same in writing. Ovivo will not accept Products returned by Purchaser/Owner unless Ovivo has previously accepted the return in writing and provided Purchaser/Owner with shipping instructions.

PURCHASE ORDER SUBMISSION

In an effort to ensure all purchase orders are processed timely and efficiently, please submit all purchase order documentation to the following department and address (can be provided electronically):

Attn: Order Entry Administrator
Ovivo USA, LLC
4246 Riverboat Road - Suite 300,
Salt Lake City, Utah 84123-2583
Fax #: 801-931-3080
Tel. #: 801-931-3265
bill.stewart@ovivowater.com

GENERAL ITEMS NOT INCLUDED

Unless specifically and expressly included above, prices quoted by Ovivo do not include unloading, hauling, erection, installation, piping, valves, fittings, stairways, ladders, walkways, grating, wall spools, concrete, grout, sealant, dissimilar metal protection, oakum, mastic, field painting, oil or grease, electrical controls, wiring, mounting hardware, welding, weld rod, shims, leveling plates, protection against corrosion due to unprotected storage, special engineering, or overall plant or system operating instructions or any other products or services.

Performance and payment security, including but not limited to bonds, letters of credit, or bank guarantees, are not included, but can be provided if purchased for an additional cost.

WARRANTY AND CONDITIONS

Ovivo standard Terms and Conditions of Sale is attached and made an essential part of this proposal. These terms and conditions are an integral part of Ovivo's offer of Products and related services and replace and supersede any terms and conditions or warranty included in Purchaser or Owner requests for quotation or specifications and cannot be changed without written approval from an authorized representative of Ovivo.

CONFIDENTIALITY

This document is not to be reproduced or submitted to any third party without the written consent of Ovivo.

This document contains, or Ovivo may have previously disclosed to Purchaser, certain technical and business information of Ovivo and/or Ovivo's affiliated entities, including certain copyrighted material, which is considered to be confidential. Such information, hereinafter referred to individually and collectively as the "Information", may include, without limitation, ideas, concepts, development plans for new or improved products or processes, data, formulae, techniques, flow sheets, designs, sketches, know-how, photographs, plans, drawings (regardless of what name, if any, is stated on the title block), specifications, samples, test specimens, reports, customer lists, price lists, findings, studies, computer programs and technical documentation, trade secrets, diagrams, and inventions, notes, and all information pertaining thereto and/or developed there from. This Information is disclosed in good faith solely for the purposes of our proposal, and in addition on the understanding that its confidentiality will be properly maintained and safeguarded.

Neither this proposal, the Information nor any part thereof may be copied, reproduced or used for any purpose other than that for which it is disclosed by Ovivo. Except as reasonably necessary for the evaluation of this proposal, no part thereof may be disclosed to any other person, without Ovivo's prior consent in writing.

Ovivo will retain the rights to any intellectual property rights ("IPR") related to the Products. Ovivo will grant a non-exclusive royalty free license to use the IPR for the sole purposes of operating and maintaining the equipment supplied by Ovivo.
The duties, obligations, restrictions, and responsibilities described hereinabove shall apply to the Purchaser, their agents, affiliates, and all related parties regardless of whether any transaction occurs between Ovivo and Purchaser, and shall survive termination, cancellation, and expiration of any transaction between Ovivo and Purchaser.

In the event of a breach of the terms herein, Ovivo maintains the right to seek any and all remedies and damages available to it, including but not limited to the amount, including interest, by which Purchaser profited from the breach, any gains made by Purchaser or any third party who received Information from Purchaser, compensation for all Ovivo loss or injury, and the value of Ovivo's expectation created by the promise of Purchaser. The parties agree Ovivo would suffer irreparable harm in the event of any breach of these terms, and therefore Ovivo shall be entitled to any and all injunctive relief available.

Very truly yours,

Ovivo USA, LLC

Attachment:

Ovivo USA, LLC General Terms and Conditions

OVIVO

Worldwide Experts in Water Treatment

TERMS AND CONDITIONS OF SALE

1. ACCEPTANCE. The proposal of **Ovivo USA, LLC** ("SELLER"), as well as these terms and conditions of sale (collectively the "Agreement"), constitutes SELLER's contractual offer of goods and associated services, and PURCHASER's acceptance of this offer is expressly limited to the terms of the Agreement. The scope and terms and conditions of this Agreement represent the entire offer by SELLER and supersede all other solicitations, discussions, agreements, understandings and representations between the parties. Any scope or terms and conditions included in PURCHASER's acceptance/purchase order that are in addition to or different from this Agreement are hereby rejected.

2. DELIVERY. Any statements relating to the date of shipment of the Products (as defined below) represent SELLER's best estimate, but is not guaranteed, and SELLER shall not be liable for any damages due to late delivery. The Products shall be delivered to the delivery point or points in accordance with the delivery terms stated in SELLER's proposal. If such delivery is prevented or postponed by reason of Force Majeure (as defined below), SELLER shall be entitled at its option to tender delivery to PURCHASER at the point or points of manufacture, and in default of PURCHASER's acceptance of delivery to cause the Products to be stored at such a point or points of manufacture at PURCHASER's expense. Such tender, if accepted, or such storage, shall constitute delivery for all purposes of this agreement. If shipment is postponed at request of PURCHASER, or due to delay in receipt of shipping instructions, payment of the purchase price shall be due on notice from SELLER that the Products are ready for shipment. Handling, moving, storage, insurance and other charges thereafter incurred by SELLER with respect to the Products shall be for the account of PURCHASER and shall be paid by PURCHASER when invoiced. Delivery by SELLER of the Products shall constitute acceptance of the Products by PURCHASER, unless written notice of defect or nonconformity is received by SELLER within thirty (30) days of SELLER's delivery of the Products.

3. TITLE AND RISK OF LOSS. SELLER shall retain the fullest right, title, and interest in the Products to the extent permitted by applicable law, including a security interest in the Products, until the full purchase price has been paid to SELLER. The giving and accepting of drafts, notes and/or trade acceptances to evidence the payments due shall not constitute or be construed as payment so as to pass SELLER's interests until said drafts, notes and/or trade acceptances are paid in full. Risk of loss shall pass to PURCHASER at the delivery point.

4. PAYMENT TERMS. SELLER reserves the right to ship the Products and be paid for such on a pro rata basis, as shipped. If payments are not made by the due date, interest at a rate of two percent (2%) per month, calculated daily, shall apply from the due date for payment. PURCHASER is liable to pay SELLER's legal fees and all other expenses in respect of enforcing or attempting to enforce any of SELLER's rights relating to a breach or threatened breach of the payment terms by PURCHASER. In the event of nonpayment SELLER reserves the further right to seek compensation from any third party in possession of the Products.

5. TAXES. Unless otherwise specifically provided in SELLER's quotation/proposal; PURCHASER shall pay and/or reimburse SELLER, in addition to the price, for all sales, use and other taxes, excises and charges which SELLER may pay or be required to pay to any government directly or indirectly in connection with the production, sale, transportation, and/or use by SELLER or PURCHASER, of any of the Products or services dealt with herein (whether the same may be regarded as personal or real property). PURCHASER agrees to pay all property and other taxes which may be levied, assessed or charged against or upon any of the Products on or after the date of actual shipment, or placing into storage for PURCHASER's account.

6. MECHANICAL WARRANTY. Solely for the benefit of PURCHASER, SELLER warrants that new equipment and parts manufactured by it and provided to PURCHASER (collectively, "Products") shall be free from defects in material and workmanship. The warranty period shall be twelve (12) months from startup of the equipment not to exceed eighteen (18) months from the earliest of the notice of readiness to ship or the actual shipment. If any of SELLER's Products fail to comply with the foregoing warranty, SELLER shall repair or replace free of charge to PURCHASER, EX WORKS SELLER's FACTORIES or other location that SELLER designates, any Product or parts thereof returned to SELLER, which examination shall show to have failed under normal use and service operation by PURCHASER within the Warranty Period; provided, that if it would be impracticable for the Product or part thereof to be returned to SELLER, SELLER will send a representative to PURCHASER's job site to inspect the Product. If it is determined after inspection that SELLER is liable under this warranty to repair or replace the Product or part thereof, SELLER shall bear the transportation costs of (a) returning the Product to SELLER for inspection or sending its representative to the job site and (b) returning the repaired or replaced Products to PURCHASER; however, if it is determined after inspection that SELLER is not liable under this warranty, PURCHASER shall pay those costs. For SELLER to be liable with respect to this warranty, PURCHASER must make its claims to SELLER with respect to this warranty in writing no later than thirty (30) days after the date PURCHASER discovers the basis for its warranty claim and in no event more than thirty (30) days after the expiration of the Warranty Period. In addition to any other limitation or disclaimer with respect to this warranty, SELLER shall have no liability with respect to any of the following: (i) failure of the Products, or damages to them, due to PURCHASER's negligence or willful misconduct, abuse or improper storage, installation, application or maintenance (as specified in any manuals or written instructions that SELLER provides to the PURCHASER); (ii) any Products that have been altered or repaired in any way without SELLER's prior written authorization; (iii) The costs of dismantling and reinstallation of the Products; (iv) any Products damaged while in transit or otherwise by accident; (v) decomposition of Products by chemical action, erosion or corrosion or wear to Products or due to conditions of temperature, moisture and dirt; or (vi) claims with respect to parts that are consumable and normally replaced during maintenance such as filter media, filter drainage belts and the like, except where such parts are not performing to SELLER's estimate of normal service life, in which case, SELLER shall only be liable for the pro rata cost of replacement of those parts based on SELLER's estimate of what the remaining service life of those parts should have been; provided, that failure of those parts did not result from any of the matters listed in clauses (i) through (v) above. With regard to third-party parts, equipment, accessories or components not of SELLER's design, SELLER's liability shall be limited solely to the assignment of available third-party warranties. **THE PARTIES AGREE THAT ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING WARRANTIES OF FITNESS FOR A PARTICULAR PURPOSE AND MERCHANTABILITY, WHETHER WRITTEN, ORAL OR STATUTORY, ARE EXCLUDED TO THE FULLEST EXTENT PERMISSIBLE BY LAW.** All warranties and obligations of SELLER shall terminate if PURCHASER fails to perform its obligations under this Agreement including but not limited to any failure to pay any charges due to SELLER. SELLER's quoted price for the Products is based upon this warranty. Any increase in warranty obligation may be subject to an increase in price.

7. CONFIDENTIAL AND PROPRIETARY INFORMATION. All nonpublic or proprietary information and data furnished to PURCHASER hereunder, including but not limited to price, size, type, design and other technical or business information relating to the Products is the sole property of SELLER and submitted for PURCHASER's own confidential use solely in connection with this Agreement and is not to be made known or available to any third party without SELLER's prior written consent.

8. SURFACE COATING. Any Product coating provided by SELLER shall be in accordance with SELLER's standard practice, unless otherwise agreed in writing.

9. DRAWINGS AND TECHNICAL DOCUMENTATION. When PURCHASER requests to approve drawings before commencement of manufacture, shipment may be delayed if approved drawings are not returned to SELLER within fourteen (14) days of receipt by PURCHASER of such drawings for approval. SELLER will furnish only general arrangement, general assembly, and if required, wiring diagrams, erection drawings, installation and operation-maintenance manuals for SELLER's equipment (in English language). SELLER will supply six (6) complete sets of drawings and operating instructions. Additional sets will be paid for by PURCHASER. Electronic files, if requested from SELLER, will be provided in *pdf, jpg or tif* format only.

10. SET OFF. This Agreement shall be completely independent of all other contracts between the parties and all payments due to SELLER hereunder shall be paid when due and shall not be setoff or applied against any money due or claimed to be due from SELLER to PURCHASER on account of any other transaction or claim.

11. SOFTWARE. PURCHASER shall have a nonexclusive and nontransferable license to use any information processing program supplied by SELLER with the Products. PURCHASER acknowledges that such programs and the information contained therein is Confidential Information and agrees: a) not to copy or duplicate the program except for archival or security purposes; b) not to use the program on any computer other than the computer with which it is supplied; and c) to limit access to the program to those of its employees who are necessary to permit authorized use of the program. PURCHASER agrees to execute and be bound by the terms of any software license applicable to the Products supplied.

12. PATENT INDEMNITY. SELLER will defend at its own expense any suit instituted against PURCHASER based upon claims that SELLER's Product hereunder in and of itself constitutes an infringement of any valid apparatus claims of any United States patent issued and existing as of the date of this Agreement, if notified promptly in writing and given all information, assistance, and sole authority to defend and settle the same, and SELLER shall indemnify the PURCHASER against such claims of infringement. Furthermore, in case the use of the Products is enjoined in such suit or in case SELLER otherwise deems it advisable, SELLER shall, at its own expense and discretion, (a) procure for the PURCHASER the right to continue using the Products, (b) replace the same with non-infringing Products, (c) modify the Product so it becomes non-infringing, or (d) remove the Products and refund the purchase price less freight charges and depreciation. SELLER shall not be liable for, and PURCHASER shall indemnify SELLER for, any claim of infringement related to (a) the use of the Products for any purpose other than that for which it was furnished by SELLER, (b) compliance with equipment designs not furnished by SELLER or (c) use of the Products in combination with any other equipment. The foregoing states the sole liability of SELLER for patent infringement with respect to the Products

13. GENERAL INDEMNITY. Subject to the limitations of liabilities of the parties set forth in this Agreement, each party shall protect and indemnify the other party, its parent and their respective officers, directors, employees and agents, from and against all claims, demands and causes of action asserted by, or in favor of, any entity to the extent of the indemnifying party's negligence or willful misconduct in connection with the performance of this agreement.

14. DEFAULT, TERMINATION. In the event that PURCHASER becomes insolvent, commits an act of bankruptcy or defaults in the performance of any term or condition of this Agreement, the entire unpaid portion of the purchase price shall, without notice or demand, become immediately due and payable. SELLER at its option, without notice or demand, shall be entitled to sue for said balance and for reasonable legal fees, plus out-of-pocket expenses and interest; and/or to enter any place where the Products are located and to take immediate possession of and remove the Products, with or without legal process; and/or retain all payments made as compensation for the use of the Products: and/or resell the Products, without notice or demand, for and on behalf of the PURCHASER, and to apply the net proceeds from such sale (after deduction from the sale price of all expenses of such sale and all expenses of retaking possession, repairs necessary to put the Products in saleable condition, storage charges, taxes, liens, collection and legal fees and all other expenses in connection therewith) to the balance then due to SELLER for the Products and to receive from the PURCHASER the deficiency between such net proceeds of sale and such balance. PURCHASER hereby waives all trespass, damage and claims resulting from any such entry, repossession, removal, retention, repair, alteration and sale. The remedies provided in this paragraph are in addition to and not limitations of any other rights of SELLER.

15. CANCELLATION. PURCHASER may terminate this Agreement for convenience upon giving SELLER thirty (30) days prior written notice of such fact and paying SELLER for all costs and expenses (including overhead) incurred by it in performing its work and closing out the same plus a reasonable profit thereon. All such costs and expenses shall be paid to SELLER within ten (10) days of the termination of the Agreement, or be subject to an additional late payment penalty of five percent (5%) of the total amount of costs and expenses owed.

16. REMEDIES. The rights and remedies of the PURCHASER in connection with the goods and services provided by SELLER hereunder are exclusive and limited to the rights and remedies expressly stated in this Agreement.

17. INSPECTION. PURCHASER is entitled to make reasonable inspection of Products at SELLER's facility. SELLER reserves the right to determine the reasonableness of the request and to select an appropriate time for such inspection. All costs of inspections not expressly included as an itemized part of the quoted price of the Products in this Agreement shall be paid by PURCHASER.

18. WAIVER. Any failure by SELLER to enforce PURCHASER's strict performance of any provision of this Agreement will not constitute a waiver of its right to subsequently enforce such provision or any other provision of this Agreement.

19. COMPLIANCE WITH LAWS. If applicable laws, ordinances, regulations or conditions require anything different from, or in addition to that called for by this Agreement, SELLER will satisfy such requirements at PURCHASER's written request and expense.

20. FORCE MAJEURE. If SELLER is rendered unable, wholly or in material part, directly or indirectly, by reason of Force Majeure, to carry out any of its obligations hereunder, then on SELLER's notice in writing to PURCHASER within a reasonable time after the occurrence of the cause relied upon, such obligations shall be suspended. "Force Majeure" shall include, but not be limited to, acts of God, epidemics and pandemics, acts of or delays caused by governmental authorities, changes in laws and regulations, strikes, civil disobedience or unrest, lightning, fire, flood, washout, storm, communication lines failure, delays of the PURCHASER or PURCHASER's subcontractors, breakage or accident to equipment or machinery, wars, police actions, terrorism, embargos, and any other causes that are not reasonably within the control of the SELLER. If the delay is the result of PURCHASER's action or inaction, then in addition to an adjustment in time, SELLER shall be entitled to reimbursement of costs incurred to maintain its schedule. For the avoidance of doubt, if the cause relied upon has commenced prior to the Parties entered into a contracting relationship, it shall not render the cause void and/or not capable of being included within the definitions of Force Majeure, as listed within this Article 20.

21. INDEPENDENT CONTRACTOR. It is expressly understood that SELLER is an independent contractor, and that neither SELLER nor its principals, partners, parents, subsidiaries, affiliates, employees or subcontractors are servants, agents, partners, joint ventures or employees of PURCHASER in any way whatsoever.

22. SEVERABILITY. Should any portion of this Agreement, be held to be invalid or unenforceable under applicable law then the validity of the remaining portions thereof shall not be affected by such invalidity or unenforceability and shall remain in full force and effect. Furthermore, any invalid or unenforceable provision shall be modified accordingly within the confines of applicable law, giving maximum permissible effect to the parties' intentions expressed herein.

23. CHOICE OF LAW, CHOICE OF VENUE. This Agreement shall be governed and construed in accordance with the laws of the State of Utah, without regard to its rules regarding conflicts or choice of law. The parties submit to the exclusive jurisdiction and venue of the state and federal courts located in Salt Lake City, Utah.

24. ASSIGNMENT. PURCHASER shall not assign or transfer this Agreement without the prior written consent of SELLER. Any attempt to make such an assignment or transfer shall be null and void. SELLER shall have the authority to assign, or otherwise transfer, its rights and obligations in connection with this Agreement, in whole or in part, upon prior written notice to PURCHASER.

25. LIMITATION ON LIABILITY. TO THE EXTENT PERMISSIBLE BY LAW, SELLER SHALL HAVE NO FURTHER LIABILITY IN CONNECTION WITH THIS AGREEMENT IN EXCESS OF THE AMOUNT PAID BY PURCHASER FOR THE PRODUCTS GIVING RISE TO SUCH LIABILITY. NOTWITHSTANDING ANY LIABILITIES OR RESPONSIBILITIES ASSUMED BY SELLER HEREUNDER, SELLER SHALL IN NO EVENT BE RESPONSIBLE TO PURCHASER OR ANY THIRD PARTY, WHETHER ARISING UNDER CONTRACT, TORT (INCLUDING NEGLIGENCE), STRICT LIABILITY, OR OTHERWISE, FOR LOSS OF ANTICIPATED PROFITS, LOSS BY REASON OF PLANT SHUTDOWN, NON-OPERATION OR INCREASED EXPENSE OF OPERATION, LOSS OF DATA, SERVICE INTERRUPTIONS, COST OF PURCHASED OR REPLACEMENT POWER, COST OF MONEY, LOSS OF USE OF CAPITAL OR REVENUE OR ANY OTHER INDIRECT, INCIDENTAL, SPECIAL, PUNITIVE, EXEMPLARY, OR CONSEQUENTIAL LOSS OR DAMAGE, WHETHER ARISING FROM DEFECTS, DELAY, OR FROM ANY OTHER CAUSE WHATSOEVER.

26. PRIVACY AND DATA PROTECTION. Seller has put in place rigorous safeguards and procedures regarding privacy and data protection, notably the Ovivo Privacy Policy (ovivowater.com/privacy-policy), and requires that Purchaser adhere to its data protection principles to the extent applicable to Purchaser.

27. DATA COLLECTION. PURCHASER consents to the collection of the Product's operational data and to the use of such data for the purpose of improving the Products and other purposes stated herein. PURCHASER further agrees that such data collection does not constitute a performance monitoring service or duty by SELLER.

28. INSURANCE. SELLER shall maintain that its current levels of insurance for the duration of the Project, as set forth in its standard certificate of insurance, available upon request.

29. BONDS. If PURCHASER deems it necessary, and within ten (10) days of PURCHASER's request, SELLER shall provide one or more Bonds in favor of PURCHASER, at PURCHASER's expense, by an institution, and in a form, approved in advance by SELLER.

30. PERMITS. PURCHASER shall be solely responsible to obtain and maintain in force all necessary permits with respect to any products to be provided by SELLER hereunder and any intended use by PURCHASER.

Subject: Port Orange WWTP, Port Orange, FL- Clarifier Units w/ Submerged Effluent Launders

Tanner,
We are pleased to provide this budgetary proposal for the Port Orange WWTP facility in Port Orange, FL, with pricing for four (4) 80'-0" Type C4D clarifiers to be installed in the existing basins at this plant including the Submerged Effluent Launder system to replace the existing launders in each tank. We have prepared a budget price for the equipment based on original drawings provided.
Please note that there is currently a high degree of instability in the steel market, especially for certain material types. The prices listed in this document are based on today's costs. This budget expires 30 days from the date listed above. We recommend contacting us for updated pricing if exceeded.

Type C4-FTS Clarifiers:

Number of Units	**4**
Diameter	**80'**
SWD	**12'-0"**
Freeboard	**Approx. 2'-0"**
Material	**Submerged = 304 SS** **Non Submerged = 304SS**

The preliminary budget pricing is as follows:

Equipment	Price
Four (4) 80ft Dia. Type C4D Clarifiers Only (No FRP Components)	**$2,202,000.00**
Four (4) 80ft Dia. Submerged Effluent Launder Systems	**$814,000.00**
Total	**$3,016,000.00**

(Typical lead time is approx. 22-24 weeks from approved submittal drawings)

Please see the following scope of supply for more details.

Sincerely,

Thomas Holt
Sales Engineer / 801-931-3023
Ovivo USA

THIS BUDGETARY PROPOSAL CONSTITUTES A NON-BINDING ESTIMATE OF PRICE(S) FOR CERTAIN GOODS AND/OR SERVICES THAT MAY BE PROVIDED BY OVIVO USA, LLC FROM TIME TO TIME, BUT SHALL NOT BE CONSTRUED AS AN OFFER BY OVIVO USA, LLC TO PROVIDE SUCH GOODS AND/OR SERVICES.

Scope of Supply (per mechanism):

- Ovivo C40HT drive mechanism with gearmotor, torque overload control, and stainless steel chain guard.
- Clarifier Walkway, full across, beam style w/ 2 rail aluminum handrails, toe plate, and ¼" aluminum checker plate.
- Drive platform- 8' x 8' square with ¼" aluminum checker plate, handrail, and toe plate.
- 30" Dia. center column with flanges and influent ports.
- 7'-0" Dia. x 3'-6" SWD Dispersion well w/ tangential scoops
- 5'-10" Dia. sludge collection drum
- 20'-0" x 6'-0" SWD Feedwell.
- 4'-0" Rotating center cage.
- Rake arms w/ spiral blades (24" to 8") and adjustable 304SS squeegees.
- Two skimming blades including 4' skimmer assemblies w/ 4' scum box.
- 304 stainless steel anchor bolts and assembly fasteners.
- Freight to jobsite.
- Startup service and testing.
- O&M manuals
- All fabricated steel components to be supplied from 304 SS material.

Submerged Effluent Launder System (SEL)

- Self-supporting submerged effluent launder, in FRP, comprising of an upper and lower launder section that performs the following five functions:
    1. Weir
    2. Scum Baffle
    3. Launder
    4. Density Current Baffle
    5. Launder Cover
- Drop out box section in FRP.
- Neoprene joint gaskets for FRP to FRP connection.
- 304 stainless steel anchor bolts and assembly fasteners.
- Material quoted Isophathalic Polyester Resin.
- Orifice Rubber Grommets
- Launder Access Hatches
- SEL Sweeper with Spring Stainless and neoprene wipers.
- Effluent Serpentine Weir Box Assembly in 304 SS
- Freight to jobsite.
- Startup service and testing: 2T/2D.

THIS BUDGETARY PROPOSAL CONSTITUTES A NON-BINDING ESTIMATE OF PRICE(S) FOR CERTAIN GOODS AND/OR SERVICES THAT MAY BE PROVIDED BY OVIVO USA, LLC FROM TIME TO TIME, BUT SHALL NOT BE CONSTRUED AS AN OFFER BY OVIVO USA, LLC TO PROVIDE SUCH GOODS AND/OR SERVICES.

Items not included in the budget pricing:

- Control panel, starters, mounting plates or brackets, conduit, wiring, mounting channels, photocells, VFD's, etc.
- Access platforms outside of tank wall
- Weirs, Baffles, & Density Current Baffles
- Demolition or installation.
- Tank or tank modifications.
- Unloading.
- Field welding.
- Lubricants.
- Handrail or stairs approaching, outside of, or around tank.

THIS BUDGETARY PROPOSAL CONSTITUTES A NON-BINDING ESTIMATE OF PRICE(S) FOR CERTAIN GOODS AND/OR SERVICES THAT MAY BE PROVIDED BY OVIVO USA, LLC FROM TIME TO TIME, BUT SHALL NOT BE CONSTRUED AS AN OFFER BY OVIVO USA, LLC TO PROVIDE SUCH GOODS AND/OR SERVICES.

CITY COUNCIL AGENDA ITEM

COUNCIL MEETING DATE 9/5/2023

SUBJECT: (B9) Resolution No. 23-35 - Acceptance of the $20,053.12 grant from the University of North Florida/Institute of Police Technology and Management for Florida's Bicycle Pedestrian Focused Initiative

DEPARTMENT: Police Services

GOAL: 1 - Public Safety

RECOMMENDED MOTION: Move to approve Resolution No. 23-35 - subcontract in the amount of $20,053.12 from University of North Florida Training and Services, Institute Inc., d/b/a Institute of Police Technology and Management for Florida's Bicycle Pedestrian Focused Initiative: Communication and High Visibility and Enforcement Project and authorize the Mayor and City Clerk to execute any agreements or contracts.

SUMMARY: The University of North Florida Training and Services, Institute Inc., d/b/a Institute of Police Technology and Management (IPTM) received a Florida Department of Transportation (FDOT) grant for Florida's Bicycle Pedestrian Focused Initiative: Communication and High Visibility and Enforcement Project. The subcontract between IPTM and the City in the amount of $20,053.12 encompasses a project that will utilize law enforcement staff to reinforce safe pedestrian, bicyclist, and driver behavior in priority counties. The goal of the effort is to reduce traffic crashes resulting in serious and fatal injuries to pedestrians and bicyclists using high visibility education and enforcement details. This reimbursement contract will cover project expenses, including overtime hours for sworn law enforcement officers.

The grant aims to develop and implement effective community-level High Visibility education and enforcement details in areas with the highest representation of traffic crashes resulting in serious and fatal injuries to pedestrians and bicyclists. The goal is to mitigate crashes by increasing awareness of the laws and compliance with traffic laws that protect the safety of pedestrians and bicyclists by providing High Visibility education and enforcement of all road users (pedestrians, bicyclists, and motorists) to change behaviors and improve safety. The Police Department will conduct on-street education and enforcement details at pre-approved locations within pre-approved times and distribute educational materials with each contact.

The police department will use the funds to provide additional high-visibility patrols to focus on pedestrian, bicycle, and crosswalk safety violations through education and enforcement. Personnel assigned to this initiative will be paid overtime and will not affect minimum patrol staffing levels. Staff participating in this program will receive the required training.

The pre-approved locations for this High Visibility education and enforcement are:

- Dunlawton Avenue, from Village Trail to South Nova Road
- US 1/South Ridgewood Avenue, from Niver Street to Sharon Avenue
- Clyde Morris Boulevard, Madeline Avenue to Reed Canal Road
- Dunlawton Avenue, from Yorktowne Boulevard to Victoria Gardens Boulevard
- Dunlawton Avenue, from Spruce Creek Road to S. Ridgewood Avenue
- South Nova Road, from Palm Boulevard to Tree Garden Drive.

This will be a part of the Fiscal Year 2023-24 budget.

PRESENTER: Manuel Marino

RESOLUTION NO. 23-35

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF PORT ORANGE, VOLUSIA COUNTY, FLORIDA; APPROVING THE SUBCONTRACT FROM THE UNIVERSITY OF NORTH FLORIDA TRAINING AND SERVICES INSTITUTE, INC., D/B/A INSTITUTE OF POLICE TECHNOLOGY AND MANAGEMENT, FOR FLORIDA'S BICYCLE PEDESTRIAN FOCUSED INITIATIVE: COMMUNICATION AND HIGH VISIBILITY AND ENFORCEMENT PROJECT GRANT IN THE AMOUNT OF $20,053.12; AUTHORIZING BUDGET AMENDMENTS FOR REVENUES AND EXPENDITURES NECESSARY TO APPROPRIATE SAID GRANT FUNDS; AUTHORIZING THE MAYOR AND CITY CLERK TO EXECUTE ANY AGREEMENTS OR CONTRACTS; AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, the University of North Florida Training and Services Institute Inc., d/b/a Institute of Police Technology and Management (IPTM) received a Florida Department of Transportation (FDOT) grant for Florida's Bicycle Pedestrian Focused Initiative: Communication and High Visibility and Enforcement Project; and

WHEREAS, the University of North Florida Training and Services, Institute Inc., d/b/a Institute of Police Technology and Management (IPTM) approved a grant amount of $20,053.12 for the Port Orange Police Department; and

WHEREAS, Florida Department of Transportation approved the subcontract agreement with the City of Port Orange in the amount of $20,053.12, attached hereto as **Exhibit "A"** and made a part hereof by reference ("Subcontract"); and

WHEREAS, the City Council of the City of Port Orange approves submitting reimbursements for eligible project expenditures; and

WHEREAS, The City Council desires to budget for the reimbursement grant from the University of North Florida Training and Services Institute Inc., d/b/a Institute of Police Technology and Management (IPTM) funded by Florida Department of Transportation (FDOT) for Florida's Bicycle Pedestrian Focused Initiative; Communication and High Visibility and Enforcement Project in the amount of $20,053.12.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF PORT ORANGE, VOLUSIA COUNTY, FLORIDA:

Section 1. The City Council of the City of Port Orange hereby approves the Subcontract with the University of North Florida Training and Services Institute Inc., d/b/a Institute of Police Technology and Management (IPTM), and thereby accepts the grant funding in the amount of $20,053.12.

Section 2. The City Manager is hereby authorized and directed to take such action as may be deemed necessary and appropriate in order to implement the provisions of this Resolution related to the budgeting of said grant for the revenues and expenditures for the above-referenced project. The City Manager may, as deemed appropriate, necessary, and convenient, delegate the powers of implementation as set forth herein to such City employees as deemed effectual and prudent in furtherance thereof.

Section 3. The Mayor and City Clerk are hereby authorized to sign any and all necessary documents to implement the provisions of this Resolution.

Section 4. This resolution shall become effective immediately upon adoption.

EXHIBIT "A"

Letter of Agreement and Contract

In this contract between the City of Port Orange ("Vendor") and University of North Florida Training and Services Institute, Inc., d/b/a Institute of Police Technology and Management ("IPTM"), a direct support organization of the University of North Florida ("University"), the Vendor shall perform the services as outlined in the scope of services (Exhibits A & B). The contract period will begin upon execution and will end on May 10, 2024.

Total contract amount will not exceed $20,053.12

The parties to this contract shall be bound by all applicable state and federal requirements as outlined in Florida Department of Transportation (FDOT) Project # 433144-1-8404, Contract # G2M61. All services must be completed by May 10, 2024. The final invoice must be received by June 7, 2024 or payment will be forfeited.

It is expressly understood that the Vendor is an independent contractor, and not an agent of the FDOT or the University of North Florida. The FDOT and the University's ("State Agencies" or individually "State Agency") respective total liability in negligence or indemnity for acts of its employees or officers shall not exceed the limits of their waiver of sovereign immunity provided under Section 768.28, Florida Statutes. The FDOT, the University, and the Vendor shall each be responsible for its own attorney fees in the event of a dispute.

To the fullest extent permitted by law, the vendor shall indemnify and hold harmless IPTM and the State of Florida, Department of Transportation, including the Department's officers and employees, from liabilities, damages, losses and costs, including, but not limited to, reasonable attorney's fees, to the extent caused by the negligence, recklessness or intentional wrongful misconduct of the contractor/consultant and persons employed or utilized by the contractor/consultant in the performance of this Agreement.

This indemnification shall survive the termination of this Agreement. Nothing contained in this paragraph is intended to nor shall it constitute a waiver of the State of Florida and IPTM's sovereign immunity.

Vendor is a subdivision, as defined in Section 768.28, Florida Statutes, and Vendor agrees to be fully responsible only to the extent provided by Section 768.28, Florida Statutes, for the negligent or wrongful acts or omission of any employee of the Vendor while the employee is acting within the course and scope of the employee's employment, and for any damages proximately caused by said acts or omissions or torts.

Nothing herein shall be construed as consent by a State Agency or political subdivision of the State of Florida to be sued by third parties in any matter arising out of this contract. No State Agency or subdivision indemnifies any other party or person beyond the extent permitted under the law, no matter what the circumstances. Nothing herein shall be construed as a waiver by the FDOT, the University, and the Vendor of any rights or limits to liability existing under Section 768.28, Florida Statutes.

In accordance with the contract, the Vendor is authorized to perform the tasks detailed in the scope of services (Exhibits A & B) and is fully responsible for satisfactory completion of all services. Services performed prior to receiving an executed contract from the University will not be eligible for reimbursement. This contract does not involve the purchase of Tangible Personal Property, as defined in Chapter 273, Florida Statutes.

This is a cost reimbursable contract. To be eligible for reimbursement, all costs must be allowable pursuant to state and federal expenditure laws, rules and regulations and must be essential to the successful completion of the tasks identified in this contract for services.

If a cost benefits more than one project, a determination must be made and documentation provided to support that the cost is distributed in a reasonable and consistent manner across all benefiting projects.

CANCELLATION: This contract may be unilaterally cancelled by FDOT or the University for refusal by the Vendor to allow public access to all documents, papers, letters, or other material made or received by the Vendor in conjunction with this contract, unless Florida law provides that the records are confidential and/or exempt from the disclosure requirements of section 24(1) of Article 1 of the state constitution and section 119.07(1), Florida Statutes.

EXHIBIT "A"

SCOPE OF SERVICES
PEDESTRIAN AND BICYCLE SAFETY
HIGH VISIBILITY EDUCATION AND ENFORCEMENT CAMPAIGN

I. OBJECTIVE:

The Florida Department of Transportation ("FDOT"), through a subgrant with University of North Florida ("University"), will utilize law enforcement support to reinforce safe pedestrian, bicyclist, and driver behaviors in priority counties in Florida. The goal of this effort is to reduce traffic crashes resulting in serious and fatal injuries to pedestrians and bicyclists using high visibility education and enforcement details.

II. PURPOSE:

In 2021, 3,741 people lost their lives in traffic crashes on Florida's roadways. More than 22% of them were pedestrians (835) and more than 5% were bicyclists (197).

The **Purpose** of this funding opportunity is to develop and implement effective community level High Visibility education and enforcement details in areas with the highest representation of traffic crashes resulting in serious and fatal injuries to pedestrians and bicyclists.

The project **Goal** is to mitigate crashes by increasing awareness of and compliance with traffic laws that protect the safety of pedestrians and bicyclists on Florida's roads.

Pedestrians and bicyclists are more vulnerable that all other road users. Traffic crashes involving pedestrians and bicyclists are more likely to result in fatal or serious injuries than any other types of traffic crashes.

Speed, impairment, and distractions contribute to unsafe conditions for pedestrians and bicyclists and may be included in enforcement operations where there is data to support the need for these interventions to improve the safety of pedestrians and bicyclists.

Pedestrian decoys may only be included in enforcement operations to improve driver yield rates at mid-block crossing locations to improve the safety of pedestrians and bicyclists.

This campaign is a component of Florida's Bicycle/Pedestrian Focused Initiative and is implemented by the Institute of Police Technology and Management (IPTM) under the direction of the Florida Department of Transportation (FDOT). This campaign supports the goals established in Florida's Pedestrian and Bicycle Strategic Safety Plan. High Visibility Enforcement activities are being implemented to mitigate crashes by educating pedestrians, bicyclists, and motorists on traffic laws pertaining to pedestrian and bicycle safety and increasing compliance with those laws.

III. IPTM RESPONSIBILITIES:

IPTM will provide the required training/training materials, a copy of Florida's Pedestrian and Bicycle Strategic Safety Plan, and educational materials to the Vendor for distribution during enforcement operations upon contract execution. Additional educational materials, bicycle lights, and electronic media may be requested by the Vendor but are subject to availability. IPTM reserves the right to review and audit the Vendor's compliance with the terms of this Letter of Agreement and Contract. IPTM also reserves the right to reduce the amount of funding allocated under this Letter of Agreement and Contract when it is determined that the Vendor will be unable to properly utilize the full funding amount as outlined herein.

IV. VENDOR SERVICES AND RESPONSIBILITIES:

Vendor will provide high visibility education and enforcement of all road users, including pedestrians, bicyclists, and motorists, to change behaviors and improve the safety of pedestrians and bicyclists. Vendor will conduct on-street education and enforcement details at pre-approved locations within pre-approved times and distribute educational materials with each contact. Education is the preferred method of behavior correction. Warnings and/or citations to pedestrians, bicyclists, and motorists will be guided by

DocuSign Envelope ID: FD90441C-CD35-4769-803F-872E585BBF24

the Vendor's policies and procedures and must comply with Florida law. These operations are designed to reach more than just the individuals who are stopped or contacted, they should also be highly visible to anyone driving, walking, or biking in the area in a way that associates the enforcement activity with the safety awareness campaign. The Vendor shall record all detail activity that documents the education and enforcement outputs for each detail conducted during the contract period using the provided online platform.

To be reimbursable, activities conducted by the Vendor must meet the requirements listed in this Letter of Agreement and Contract to include the following:

- Operations must begin within 30 days of the contract execution date. Exceptions require the approval of IPTM.
- Only overtime hours for sworn law enforcement officers are eligible for reimbursement (non-sworn civilian personnel are not eligible).
- Operations must be highly visible to anyone driving, walking, or biking in the area. It is strongly suggested that operations include a combination of high visibility elements with a coordinated media awareness campaign similar to those used in sobriety checkpoints or other enforcement mobilizations.
- Funds may not to be used to supplant the Vendor's enforcement and educational efforts funded by other local, state, or federal sources. Duplicated efforts are not eligible for reimbursement.
- Vendor will not be reimbursed for education and enforcement details that take place at locations outside of those pre-approved by the FDOT and outlined in Exhibit C of this agreement.
- Vendor will not be reimbursed for education and enforcement details that take place outside of the day(s) and times of day pre-approved by the FDOT and outlined in Exhibit C of this agreement (each detail location may have different pre-approved days and times of day).

Minimum Level of Service

Vendor shall conduct highly visible education and enforcement operations at each of the identified locations outlined in Exhibit C of this agreement, prioritizing efforts towards higher ranked (Tier 1) locations.

☐Only Tier 1 locations shall be worked from contract execution through May 10, 2024

☐Only Tier 2 locations shall be worked from contract execution through May 10, 2024

☒Both Tier 1 and Tier 2 locations: Tier 1 locations shall be worked from contract execution through May 10, 2024. Tier 2 locations can be worked in addition to Tier 1 locations from February 1, 2024 through May 10, 2024

A minimum of two (2) media engagements should be conducted in conjunction with these high visibility enforcement operations during the contract period.

Vendor performance will be evaluated based on their prioritization of enforcement details to areas with the highest representation of traffic crashes resulting in serious and fatal injuries to pedestrians and bicyclists and on the visibility of the mobilization.

- Vendor will not be reimbursed for administrative time, travel time, meal breaks or other hours that are not for participation in the education and enforcement overtime details aimed at reducing traffic crashes resulting in serious or fatal injuries to pedestrians or bicyclists, or attendance at required training outside of the training requirement listed within this contractual service agreement.

DocuSign Envelope ID: FD90441C-CD35-4769-803F-872E585BBF24

- Each officer is limited to a maximum of eight (8) hours of reimbursable overtime in any single day (defined as 12:00 a.m. to 11:59 p.m.), unless there are extenuating circumstances at the end of a shift that causes the hours to exceed this limit. **Extenuating circumstances must be documented in the activity report.** There is no pay period limit.

- Officer training is mandatory. For their overtime hours to be reimbursable, officers working the education and enforcement details must first complete the required four-hour training course titled *"Pedestrian and Bicycle Law Enforcement: Laws, Procedures and Best Practices."* To remain eligible, officer "refresher training" is required for any officer who completed the four-hour training course titled *"Pedestrian and Bicycle Law Enforcement: Laws, Procedures and Best Practices"* **prior to June 30, 2022.** The refresher training class titled "*Pedestrian & Bicycle Safety: A Law Enforcement Review"* is not a substitute for the 4-hour classroom course for initial eligibility into this program.

- Vendor may be reimbursed for a limited number of sworn law enforcement officers to attend the required four-hour training course titled *"Pedestrian and Bicycle Law Enforcement: Laws, Procedures and Best Practices"* or the two (2) hour online refresher training course titled "*Pedestrian & Bicycle Safety: A Law Enforcement Review".* For their overtime hours to be reimbursable, attendance at the training must be within the contract period and must be on overtime status. Although every sworn law enforcement officer may attend the training, overtime reimbursement is limited to those officers who will actually take part in education and enforcement details.

- Public awareness is a key element of the high visibility enforcement model. The Vendor is strongly encouraged to distribute a minimum of two (2) media releases during the contract period. The first media release announcing that operations are beginning should be distributed a minimum of seven (7) days in advance of the first education/enforcement detail. The second media release should include a reminder that details are ongoing. This second media release should be distributed approximately halfway through the contract period. Additional media engagement is also encouraged throughout the contract period. Media releases may include social or digital media but must also be distributed through local media outlets. Proof of media engagement should be provided within 30 days of the press release or news report.

- The Vendor shall distribute the provided safety educational materials during all education and enforcement details. Materials will be provided to Vendor free of charge for this purpose.

- Vendor may elect to participate in bicycle light distribution to improve nighttime visibility and compliance with F.S. 316.2065(7). A Bicycle Light Distribution Assurance Form provided by IPTM is required for each bicycle light set that is distributed. The required documentation must be signed by the officer and submitted to IPTM or through the provided online platform along with the detail report for the period in which the lights were distributed.

- Invoice submissions must document that each officer was on overtime status while working the education and enforcement details in order to be eligible for reimbursement.

HIGH VISIBILITY ENFORCEMENT (HVE)

All law enforcement agencies shall conduct High Visibility Enforcement while conducting enforcement under this contractual service agreement.

High Visibility Enforcement is defined as:

Intense:	Enforcement activities are over and above what normally takes place.
Frequent:	Enforcement occurs often enough to create general deterrence.
Visible:	A majority of the public sees or hears about the enforcement.

DocuSign Envelope ID: FD90441C-CD35-4769-803F-872E585BBF24

Strategic: Enforcement targets high-risk locations during high-risk times.

APPROVED PERSONNEL LIST

Prior to commencing the services outlined under this contract, Vendor must submit a list of personnel authorized to participate in overtime details under this agreement through the provided online platform. The name and fully loaded hourly overtime rates to be used for each officer must be submitted. The overtime rates may include the costs of hourly overtime plus associated fringe benefits paid upon the overtime. Only hours from officers listed shown on the authorized personnel list are eligible for reimbursement under this agreement. The authorized personnel list shall be updated as needed to add officers and update overtime pay rates.

METHOD OF COMPENSATION/PAYMENT SCHEDULE

Invoices must be submitted at least monthly (every 30 days), beginning within 60 days of the contract execution date. Invoices must contain the following:

- **Invoice** to include summary of hours charged and total due.

- **Payroll documentation:** Vendor must submit payroll documentation to accompany each invoice. This payroll documentation should clearly indicate that the detail hours worked under this contract were on overtime status along with the overtime rates that were paid. As this is a cost-reimbursable contract, IPTM can only reimburse the Vendor for an amount up to the total costs incurred for the overtime worked; therefore, Vendor must include either a pay stub or payroll ledger documenting payment to each officer for which reimbursement is requested. It is the responsibility of the Vendor to redact any personally identifiable information such as Social Security numbers prior to submission.

  The overtime pay rate for personnel shall be based on the actual cost per employee in accordance with the agency's payroll policy. Each agency shall comply with Fair Labor Standards Act (FLSA) requirements and thresholds for overtime accrual and payment and its own policies and procedures, insofar as those policies apply uniformly to both federally financed and other activities of the agency, as required by 2 CFR 200.403(c). Additional hours may be called overtime, call-out, off duty, extra, additional, etc.

  As part of the "fully burdened" overtime costs, the agency can be reimbursed for the additional benefit costs paid on the overtime worked. These benefit costs must be additional costs incurred specifically as a result of the overtime being reimbursed. These benefits may include associated portions of FICA (Social Security and Medicare), Worker's Compensation, Retirement benefits, and fixed shift differential costs. Prorated portions of leave accrual, health/life insurance, uniform allowance, vehicle usage, salary incentive, and other standard benefits cannot be reimbursed as they are not additional costs incurred specifically as a result of the overtime worked.

- **Detail Activity:** Vendor shall record detail activity that documents the education and enforcement outputs for each detail conducted through the provided online platform. The activity will document that each detail conducted meets the minimum level of service as outlined in this agreement and show the officers assigned, date, days and/or times, location, contacts made, number of materials distributed, and the numbers of educational contacts, warnings and citations issued to motorists, pedestrians, and bicyclists for each statute. Detail Activity submissions shall be consistent with the corresponding invoices and payroll documentation.

All invoices must be submitted through the provided online platform. In case the provided online platform is unavailable, invoice documentation can be sent electronically to ped.bike.safety@iptm.org.

All requests for reimbursement shall be signed by an Authorized Representative of the Vendor, or their delegate.

DocuSign Envelope ID: FD90441C-CD35-4769-803F-872E585BBF24

The University has 40-days to review and process invoices for services. This process begins on the date the Vendor invoice is received, inspected, and approved. Invoices may be returned if not completed properly. If a payment is not available within 40 days from the University approval, a separate interest penalty at a rate as established pursuant to Section 55.03(1), F.S., will be due and payable, in addition to the invoice amount, to the Vendor. Interest penalties of less than one (1) dollar will not be enforced unless the Vendor requests payment. Invoices that have to be returned to a Vendor because of Vendor preparation errors will result in a delay in the payment and is not subject to the interest penalty. The Vendor payment requirements do not start until a properly completed financial reimbursement request is provided to the University.

FINANCIAL CONSEQUENCES

Payment shall be made only after receipt and approval of services provided. If the University determines that the performance of the Vendor does not comply with the contract requirements, the University shall notify the Vendor of the deficiency to be corrected, and the correction shall be made within a timeframe to be specified by the University. If the deficiency is subsequently resolved, the University agrees to pay the invoice(s) for the unpaid amount(s) during the next billing period. If the Vendor is unable to resolve the deficiency, the funds shall be forfeited at the end of this contractual service agreement.

PRE-APPROVED HVE LOCATIONS

Education and enforcement overtime details are only authorized at locations (specific intersections, corridors, and/or regions) that have been pre-approved by the FDOT. Vendor may not be reimbursed for efforts conducted at locations that have not been pre-approved, that take place prior to the date of the approval of this agreement, or that do not comply with the minimum level of service as outlined in this agreement.

Each pre-approved location will have clearly defined boundaries; day(s) and times of day in which the overtime details can be worked and will be outlined in Exhibit C.

REQUESTS FOR ADDITIONAL FUNDING

The Vendor may request an increase to the total funding amount of this contract during the contract period. If the funding is available, the increased funding request may be considered if the Vendor has:

- satisfied all of the provision listed within this contract
- submitted timely invoices and record of detail activity submissions
- conducted HVE overtime detail efforts in a manner that supports the stated goal
- expended 70% or more of the current contract funding amount
- pedestrian and bicyclist crash circumstances within the Vendor's jurisdiction support the increased funding amount

Increased funding will be based upon availability and must be approved by the FDOT.

Increased funding will be accomplished through an amendment to this contract which must be signed by the FDOT, Vendor, and IPTM.

Requests for increased funding must be submitted to IPTM and received on or before February 29, 2024.

NON-DISCRIMINATION AND ETHICAL STANDARDS

No person shall, on the ground of race, color, religion, sex, handicap, or national origin, be subjected to discrimination under any program or activity supported by this contract. The agency agrees to comply with the Florida Civil Rights Act (F.S. 760)
http://www.leg.state.fl.us/statutes/index.cfm?App_mode=Display_Statute&URL=0700-0799/0760/0760.html

DocuSign Envelope ID: FD90441C-CD35-4769-803F-872E585BBF24

All officers participating in High Visibility Enforcement activities are required to comply with the Law Enforcement Officer Ethical Standards of Conduct as established by the Florida Department of Law Enforcement. https://www.fdle.state.fl.us/Content/CJST/Menu/Officer-Requirements-Main-Page/LE-Ethical-Standards-of-Conduct.aspx

CORE ACTIVITY PERFORMANCE MEASURES / MINIMUM LEVEL OF SERVICE TO BE PERFORMED AND CRITERIA FOR EVALUATING SUCCESSFUL COMPLETION.

Each law enforcement agency is encouraged to complete all of the tasks as outlined within this contract. All agencies are required to complete a minimum of (80%) eighty percent of contracted efforts within the contract period to be eligible for "agency of the year award" consideration. Each successive fiscal year, agencies will be prioritized for funding based on percentage of performance expectations that were met.

CONSEQUENCES FOR NON-PERFORMANCE

If the Vendor is unable to properly utilize the full funding amount as outlined herein, the amount of funding for subsequent periods may be reduced. In the event that the required services are in dispute, the invoice may be pro-rated, reduced, or payment withheld until adequate documentation is provided to support the completion of such services and the dispute is resolved. If requirements are not met, the invoice will be pro-rated and payment will only be made for services that were completed as outlined in this agreement. Failure to submit invoices, detail activity reports, or other deliverables as outlined in this contract may result in termination of the agreement.

EXHIBIT "B"

EFFORT SUMMARY

FLORIDA'S PEDESTRIAN AND BICYCLE FOCUSED INTITIATIVE
HIGH VISIBILITY ENFORCEMENT CAMPAIGN

QUANTIFIABLE, MEASURABLE, AND VERIFIABLE DELIVERABLES

- A minimum of two (2) media engagements should be conducted in conjunction with these high visibility enforcement operations during the contract period.
- Detail Activity Reports shall be submitted for each education and enforcement detail worked.
- Bicycle Light Distribution Assurance Forms shall be submitted for each bicycle light kit distributed.
- Invoices shall be submitted for each month or payroll period in which overtime details were performed beginning the month following contract execution.

PERFORMANCE MEASURES

Proof of performance documentation shall be submitted. This includes, but is not limited to, the following:

- Detail Activity Submissions
- Proof of media engagements
- Proof of overtime hours worked

BUDGET/COST ANALYSIS

- The name and fully loaded hourly overtime rates to be used for each officer must be submitted.
- The overtime rates may include the costs of hourly overtime plus associated fringe benefits paid upon the overtime.
- Only hours from officers listed and shown on the authorized personnel list are eligible for reimbursement under this agreement.
- Only overtime hours for sworn law enforcement officers are eligible for reimbursement (non-sworn civilian personnel are not eligible).
- Each officer is limited to a maximum of eight (8) hours of reimbursable overtime in any single day (defined as 12:00 a.m. to 11:59 p.m.).
- Payroll documentation should clearly indicate that the detail hours worked under this contract were on overtime status along with the overtime rates that were paid.
- ☐Only Tier 1 locations shall be worked from contract execution through May 10, 2024.
  ☐Only Tier 2 locations shall be worked from contract execution through May 10, 2024.
  ☒Both Tier 1 and Tier 2 locations: Tier 1 locations shall be worked from contract execution through May 10, 2024. Tier 2 locations can be worked in addition to Tier 1 locations from February 1, 2024 through May 10, 2024.
- Payment shall be made only after receipt and approval of services provided.

Total contract amount not to exceed: $20,053.12

FY2023 - Subcontract Agreement Required Federal Clauses, Per Part V

i. The parties to this subcontract shall be bound by all applicable sections of Part V: Acceptance and Agreement of Project # 433144-1-8404, Contract # G2M61. A final invoice must be received by June 7, 2024 or payment will be forfeited.

ii. **Buy American Act.** The Buy America Act prohibits the use of Federal highway safety grant funds to purchase any manufactured product or software/information technology systems whose unit purchase price is $5,000 or more, including motor vehicles, that is not produced in the United States. NHTSA may waive those requirements if (1) their application would be inconsistent with the public interest; (2) such materials and products are not produced in the United States in sufficient and reasonably available quantities and of a satisfactory quality; or (3) the inclusion of domestic material will increase the cost of the overall project contract by more than 25 percent.

iii. **Certification Regarding Federal Lobbying.** The subcontractor certifies, to the best of his or her knowledge and belief, that:

1. No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

2. If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.

iv. **Cooperation with the Inspector General.** It is the duty of every subcontractor to cooperate with the inspector general in any investigation, audit, inspection, review, or hearing pursuant to this subgrant agreement. Chapter 20.055(5), F.S.

v. **DBE Assurance**. The subcontractor shall not discriminate on the basis of race, color, national origin, or sex in the performance of this contract. The consultant or contractor shall carry out applicable requirements of 49 CFR, Part 26 in the award and administration of USDOT-assisted contracts. Failure by the consultant or contractor to carry out these requirements is a material breach of this contract, which may result in the termination of this contract or such other remedy, as the Subrecipient or the Department deems appropriate.

vi. **E-Verify**. Any subcontractors performing work or providing services pursuant to the subgrant agreement are required to utilize the U.S. Department of Homeland Security's E-Verify system to verify the employment eligibility of all new employees hired by the subcontractor during the contract term.

DocuSign Envelope ID: FD90441C-CD35-4769-803F-872E585BBF24

vii. **Nondiscrimination**. During the performance of this subcontract, the Subcontractor agrees:

1. To comply with all Federal nondiscrimination laws and regulations, as may be amended from time to time

2. Not to participate directly or indirectly in the discrimination prohibited by any Federal non-discrimination law or regulation, as set forth in appendix B of 49 CFR part 2l and herein

3. To permit access to its books, records, accounts, other sources of information, and its facilities as required by the FDOT State Safety Office, USDOT or NHTSA

4. That, in event a Subcontractor fails to comply with any nondiscrimination provisions in this subgrant, the Subrecipient will have the right to impose such subgrant sanctions as it or NHTSA determine are appropriate, including but not limited to withholding payments to the Subcontractor under the contract/agreement until the Subcontractor complies; and/or cancelling, terminating, or suspending a contract or funding agreement, in whole or in part.

viii. **Clean Air Act and Federal Water Pollution Control Act**. Subcontracts for amounts in excess of $150,000 must comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act (42 U.S.C. 7401-7671q) and the Federal Water Pollution Control Act as amended (33 U.S.C. 1251-1387). Violations must be reported to the Federal awarding agency and the Regional Office of the Environmental Protection Agency (EPA).

ix. **Integrity Certification**. The Subcontractor certifies that neither it nor its contractors are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participating in this Agreement by any federal department or agency. This certification is a material representation of fact upon which the Department is relying in entering this Agreement. If it is later determined that the Subcontractor knowingly rendered an erroneous certification, in addition to other remedies available to the federal government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment. The Subcontractor shall provide to the Department immediate written notice if at any time the Subcontractor learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

x. **Contract Work Hours and Safety Standards Act**. All subcontracts in excess of $100,000 that involve the employment of mechanics or laborers must include a provision for compliance with 40 U.S.C. 3702 and 3704, as supplemented by Department of Labor regulations (29 CFR Part 5). Under 40 U.S.C. 3702 of the Act, each contractor must be required to compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than one and a half times the basic rate of pay for all hours worked in excess of 40 hours in the work week. The requirements of 40 U.S.C. 3704 are applicable to construction work and provide that no laborer or mechanic must be required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

DocuSign Envelope ID: FD90441C-CD35-4769-803F-872E585BBF24

xi. **Indemnification and Insurance**. To the fullest extent permitted by law, the Subcontractor shall indemnify and hold harmless the Subrecipient and the State of Florida, Department of Transportation, including the Department's officers and employees, from liabilities, damages, losses and costs, including, but not limited to, reasonable attorney's fees, to the extent caused by the negligence, recklessness or intentional wrongful misconduct of the contractor/consultant and persons employed or utilized by the contractor/consultant in the performance of this Agreement.

This indemnification shall survive the termination of this Agreement. Nothing contained in this paragraph is intended to nor shall it constitute a waiver of the State of Florida and the Subrecipient's sovereign immunity.

xii. **Policy on Banning Text Messaging While Driving Act**. In accordance with Executive Order 13513, Federal Leadership On Reducing Text Messaging While Driving, and DOT Order 3902.10, Text Messaging While Driving, subrecipients are encouraged to:

Adopt and enforce workplace safety policies to decrease crashes caused by distracted driving, including policies to ban text messaging while driving company-owned or rented vehicles, Government-owned, leased or rented vehicles, or privately-owned vehicles when on official business or when performing any work on behalf of the subrecipient agency and/or the Government.

Conduct workplace safety initiatives in a manner commensurate with the size of the business, such as establishment of new rules and programs or re-evaluation of existing programs to prohibit text messaging while driving, and education, awareness, and other outreach to employees about the safety risks associated with texting and driving.

Insert the substance of this section, including this sentence, in all sub-agreement/subcontracts funded with the subaward provided under this Agreement that are $15,000 or more.

xiii. **Human Trafficking**. The Subcontractor agrees that it and its employees that perform any work on the subcontract shall not, during the term of this Agreement, engage in trafficking in persons, procure a commercial sex act, or use forced labor in the performance of work on the subcontract.

xiv. **Contracting with small and minority businesses, women's business enterprises, and labor surplus area firms.** The Subcontractor agrees to take the following affirmative steps to assure that minority businesses, women's business enterprise, and labor surplus are used when possible:

1. Place qualified small and minority businesses and women's business enterprises on solicitation lists;
2. Assure that small and minority businesses, and women's business enterprises are solicited whenever they are potential sources;
3. Divide total requirements, when economically feasible, into smaller tasks or quantities to permit maximum participation by small and minority businesses, and women's business enterprises;
4. Establish delivery schedules, where the requirement permits, which encourage participation by small and minority businesses, and women's business enterprises;
5. Use the services and assistance, as appropriate, of such organizations as the Small Business Administration and the Minority Business Development Agency of the Department of Commerce; and
6. Requiring the prime contractor, if subcontracts are to be let, to take the affirmative steps listed in paragraphs (b)(1) through (5) of this section.

xv. **Termination for Convenience**. In accordance with Appendix II to 2 CFR Part 200—Contract Provisions for Non-Federal Entity Contracts Under Federal Awards, either Party may terminate this Agreement for convenience upon thirty (30) days' advance written notice to the other Party. Termination of this Agreement, as such, will not affect payment for services satisfactorily furnished prior to the termination.

RE: Pedestrian and Bicycle Safety High Visibility Enforcement and Support Program
Project Number: 433144-1-8404
Contract Number: G2M61

Dear Ms. Andrews,

We are requesting subcontract approval under the aforementioned subgrant agreement. The request is for approval of a contractual services agreement between IPTM and City of Port Orange in the amount of $20,053.12. Under the contract, City of Port Orange will conduct overtime high visibility education and enforcement operations through May 10, 2024.

I appreciate your consideration of this request.

Sincerely,

Angel Williams
Coordinator

Attachment

DocuSign Envelope ID: FD90441C-CD35-4769-803F-872E585BBF24

Letter of Agreement and Contract

In this contract between the City of Port Orange ("Vendor") and University of North Florida Training and Services Institute, Inc., d/b/a Institute of Police Technology and Management ("IPTM"), a direct support organization of the University of North Florida ("University"), the Vendor shall perform the services as outlined in the scope of services (Exhibits A & B). The contract period will begin upon execution and will end on May 10, 2024.

Total contract amount will not exceed $20,053.12

The parties to this contract shall be bound by all applicable state and federal requirements as outlined in Florida Department of Transportation (FDOT) Project # 433144-1-8404, Contract # G2M61. All services must be completed by May 10, 2024. The final invoice must be received by June 7, 2024 or payment will be forfeited.

It is expressly understood that the Vendor is an independent contractor, and not an agent of the FDOT or the University of North Florida. The FDOT and the University's ("State Agencies" or individually "State Agency") respective total liability in negligence or indemnity for acts of its employees or officers shall not exceed the limits of their waiver of sovereign immunity provided under Section 768.28, Florida Statutes. The FDOT, the University, and the Vendor shall each be responsible for its own attorney fees in the event of a dispute.

To the fullest extent permitted by law, the vendor shall indemnify and hold harmless IPTM and the State of Florida, Department of Transportation, including the Department's officers and employees, from liabilities, damages, losses and costs, including, but not limited to, reasonable attorney's fees, to the extent caused by the negligence, recklessness or intentional wrongful misconduct of the contractor/consultant and persons employed or utilized by the contractor/consultant in the performance of this Agreement.

This indemnification shall survive the termination of this Agreement. Nothing contained in this paragraph is intended to nor shall it constitute a waiver of the State of Florida and IPTM's sovereign immunity.

Vendor is a subdivision, as defined in Section 768.28, Florida Statutes, and Vendor agrees to be fully responsible only to the extent provided by Section 768.28, Florida Statutes, for the negligent or wrongful acts or omission of any employee of the Vendor while the employee is acting within the course and scope of the employee's employment, and for any damages proximately caused by said acts or omissions or torts.

Nothing herein shall be construed as consent by a State Agency or political subdivision of the State of Florida to be sued by third parties in any matter arising out of this contract. No State Agency or subdivision indemnifies any other party or person beyond the extent permitted under the law, no matter what the circumstances. Nothing herein shall be construed as a waiver by the FDOT, the University, and the Vendor of any rights or limits to liability existing under Section 768.28, Florida Statutes.

In accordance with the contract, the Vendor is authorized to perform the tasks detailed in the scope of services (Exhibits A & B) and is fully responsible for satisfactory completion of all services. Services performed prior to receiving an executed contract from the University will not be eligible for reimbursement. This contract does not involve the purchase of Tangible Personal Property, as defined in Chapter 273, Florida Statutes.

This is a cost reimbursable contract. To be eligible for reimbursement, all costs must be allowable pursuant to state and federal expenditure laws, rules and regulations and must be essential to the successful completion of the tasks identified in this contract for services.

If a cost benefits more than one project, a determination must be made and documentation provided to support that the cost is distributed in a reasonable and consistent manner across all benefiting projects.

CANCELLATION: This contract may be unilaterally cancelled by FDOT or the University for refusal by the Vendor to allow public access to all documents, papers, letters, or other material made or received by the Vendor in conjunction with this contract, unless Florida law provides that the records are confidential and/or exempt from the disclosure requirements of section 24(1) of Article 1 of the state constitution and section 119.07(1), Florida Statutes.

DocuSign Envelope ID: FD90441C-CD35-4769-803F-872E585BBF24

EXHIBIT "A"

SCOPE OF SERVICES
PEDESTRIAN AND BICYCLE SAFETY
HIGH VISIBILITY EDUCATION AND ENFORCEMENT CAMPAIGN

I. OBJECTIVE:

The Florida Department of Transportation ("FDOT"), through a subgrant with University of North Florida ("University"), will utilize law enforcement support to reinforce safe pedestrian, bicyclist, and driver behaviors in priority counties in Florida. The goal of this effort is to reduce traffic crashes resulting in serious and fatal injuries to pedestrians and bicyclists using high visibility education and enforcement details.

II. PURPOSE:

In 2021, 3,741 people lost their lives in traffic crashes on Florida's roadways. More than 22% of them were pedestrians (835) and more than 5% were bicyclists (197).

The **Purpose** of this funding opportunity is to develop and implement effective community level High Visibility education and enforcement details in areas with the highest representation of traffic crashes resulting in serious and fatal injuries to pedestrians and bicyclists.

The project **Goal** is to mitigate crashes by increasing awareness of and compliance with traffic laws that protect the safety of pedestrians and bicyclists on Florida's roads.

Pedestrians and bicyclists are more vulnerable that all other road users. Traffic crashes involving pedestrians and bicyclists are more likely to result in fatal or serious injuries than any other types of traffic crashes.

Speed, impairment, and distractions contribute to unsafe conditions for pedestrians and bicyclists and may be included in enforcement operations where there is data to support the need for these interventions to improve the safety of pedestrians and bicyclists.

Pedestrian decoys may only be included in enforcement operations to improve driver yield rates at mid-block crossing locations to improve the safety of pedestrians and bicyclists.

This campaign is a component of Florida's Bicycle/Pedestrian Focused Initiative and is implemented by the Institute of Police Technology and Management (IPTM) under the direction of the Florida Department of Transportation (FDOT). This campaign supports the goals established in Florida's Pedestrian and Bicycle Strategic Safety Plan. High Visibility Enforcement activities are being implemented to mitigate crashes by educating pedestrians, bicyclists, and motorists on traffic laws pertaining to pedestrian and bicycle safety and increasing compliance with those laws.

III. IPTM RESPONSIBILITIES:

IPTM will provide the required training/training materials, a copy of Florida's Pedestrian and Bicycle Strategic Safety Plan, and educational materials to the Vendor for distribution during enforcement operations upon contract execution. Additional educational materials, bicycle lights, and electronic media may be requested by the Vendor but are subject to availability. IPTM reserves the right to review and audit the Vendor's compliance with the terms of this Letter of Agreement and Contract. IPTM also reserves the right to reduce the amount of funding allocated under this Letter of Agreement and Contract when it is determined that the Vendor will be unable to properly utilize the full funding amount as outlined herein.

IV. VENDOR SERVICES AND RESPONSIBILITIES:

Vendor will provide high visibility education and enforcement of all road users, including pedestrians, bicyclists, and motorists, to change behaviors and improve the safety of pedestrians and bicyclists. Vendor will conduct on-street education and enforcement details at pre-approved locations within pre-approved times and distribute educational materials with each contact. Education is the preferred method of behavior correction. Warnings and/or citations to pedestrians, bicyclists, and motorists will be guided by

DocuSign Envelope ID: FD90441C-CD35-4769-803F-872E585BBF24

the Vendor's policies and procedures and must comply with Florida law. These operations are designed to reach more than just the individuals who are stopped or contacted, they should also be highly visible to anyone driving, walking, or biking in the area in a way that associates the enforcement activity with the safety awareness campaign. The Vendor shall record all detail activity that documents the education and enforcement outputs for each detail conducted during the contract period using the provided online platform.

To be reimbursable, activities conducted by the Vendor must meet the requirements listed in this Letter of Agreement and Contract to include the following:

- Operations must begin within 30 days of the contract execution date. Exceptions require the approval of IPTM.
- Only overtime hours for sworn law enforcement officers are eligible for reimbursement (non-sworn civilian personnel are not eligible).
- Operations must be highly visible to anyone driving, walking, or biking in the area. It is strongly suggested that operations include a combination of high visibility elements with a coordinated media awareness campaign similar to those used in sobriety checkpoints or other enforcement mobilizations.
- Funds may not to be used to supplant the Vendor's enforcement and educational efforts funded by other local, state, or federal sources. Duplicated efforts are not eligible for reimbursement.
- Vendor will not be reimbursed for education and enforcement details that take place at locations outside of those pre-approved by the FDOT and outlined in Exhibit C of this agreement.
- Vendor will not be reimbursed for education and enforcement details that take place outside of the day(s) and times of day pre-approved by the FDOT and outlined in Exhibit C of this agreement (each detail location may have different pre-approved days and times of day).

Minimum Level of Service

Vendor shall conduct highly visible education and enforcement operations at each of the identified locations outlined in Exhibit C of this agreement, prioritizing efforts towards higher ranked (Tier 1) locations.

☐Only Tier 1 locations shall be worked from contract execution through May 10, 2024

☐Only Tier 2 locations shall be worked from contract execution through May 10, 2024

☒Both Tier 1 and Tier 2 locations: Tier 1 locations shall be worked from contract execution through May 10, 2024. Tier 2 locations can be worked in addition to Tier 1 locations from February 1, 2024 through May 10, 2024

A minimum of two (2) media engagements should be conducted in conjunction with these high visibility enforcement operations during the contract period.

Vendor performance will be evaluated based on their prioritization of enforcement details to areas with the highest representation of traffic crashes resulting in serious and fatal injuries to pedestrians and bicyclists and on the visibility of the mobilization.

- Vendor will not be reimbursed for administrative time, travel time, meal breaks or other hours that are not for participation in the education and enforcement overtime details aimed at reducing traffic crashes resulting in serious or fatal injuries to pedestrians or bicyclists, or attendance at required training outside of the training requirement listed within this contractual service agreement.

DocuSign Envelope ID: FD90441C-CD35-4769-803F-872E585BBF24

- Each officer is limited to a maximum of eight (8) hours of reimbursable overtime in any single day (defined as 12:00 a.m. to 11:59 p.m.), unless there are extenuating circumstances at the end of a shift that causes the hours to exceed this limit. **Extenuating circumstances must be documented in the activity report.** There is no pay period limit.

- Officer training is mandatory. For their overtime hours to be reimbursable, officers working the education and enforcement details must first complete the required four-hour training course titled *"Pedestrian and Bicycle Law Enforcement: Laws, Procedures and Best Practices."* To remain eligible, officer "refresher training" is required for any officer who completed the four-hour training course titled *"Pedestrian and Bicycle Law Enforcement: Laws, Procedures and Best Practices"* **prior to June 30, 2022.** The refresher training class titled "*Pedestrian & Bicycle Safety: A Law Enforcement Review"* is not a substitute for the 4-hour classroom course for initial eligibility into this program.

- Vendor may be reimbursed for a limited number of sworn law enforcement officers to attend the required four-hour training course titled *"Pedestrian and Bicycle Law Enforcement: Laws, Procedures and Best Practices"* or the two (2) hour online refresher training course titled "*Pedestrian & Bicycle Safety: A Law Enforcement Review".* For their overtime hours to be reimbursable, attendance at the training must be within the contract period and must be on overtime status. Although every sworn law enforcement officer may attend the training, overtime reimbursement is limited to those officers who will actually take part in education and enforcement details.

- Public awareness is a key element of the high visibility enforcement model. The Vendor is strongly encouraged to distribute a minimum of two (2) media releases during the contract period. The first media release announcing that operations are beginning should be distributed a minimum of seven (7) days in advance of the first education/enforcement detail. The second media release should include a reminder that details are ongoing. This second media release should be distributed approximately halfway through the contract period. Additional media engagement is also encouraged throughout the contract period. Media releases may include social or digital media but must also be distributed through local media outlets. Proof of media engagement should be provided within 30 days of the press release or news report.

- The Vendor shall distribute the provided safety educational materials during all education and enforcement details. Materials will be provided to Vendor free of charge for this purpose.

- Vendor may elect to participate in bicycle light distribution to improve nighttime visibility and compliance with F.S. 316.2065(7). A Bicycle Light Distribution Assurance Form provided by IPTM is required for each bicycle light set that is distributed. The required documentation must be signed by the officer and submitted to IPTM or through the provided online platform along with the detail report for the period in which the lights were distributed.

- Invoice submissions must document that each officer was on overtime status while working the education and enforcement details in order to be eligible for reimbursement.

HIGH VISIBILITY ENFORCEMENT (HVE)

All law enforcement agencies shall conduct High Visibility Enforcement while conducting enforcement under this contractual service agreement.

High Visibility Enforcement is defined as:

Intense:	Enforcement activities are over and above what normally takes place.
Frequent:	Enforcement occurs often enough to create general deterrence.
Visible:	A majority of the public sees or hears about the enforcement.

DocuSign Envelope ID: FD90441C-CD35-4769-803F-872E585BBF24

Strategic: Enforcement targets high-risk locations during high-risk times.

APPROVED PERSONNEL LIST

Prior to commencing the services outlined under this contract, Vendor must submit a list of personnel authorized to participate in overtime details under this agreement through the provided online platform. The name and fully loaded hourly overtime rates to be used for each officer must be submitted. The overtime rates may include the costs of hourly overtime plus associated fringe benefits paid upon the overtime. Only hours from officers listed shown on the authorized personnel list are eligible for reimbursement under this agreement. The authorized personnel list shall be updated as needed to add officers and update overtime pay rates.

METHOD OF COMPENSATION/PAYMENT SCHEDULE

Invoices must be submitted at least monthly (every 30 days), beginning within 60 days of the contract execution date. Invoices must contain the following:

- **Invoice** to include summary of hours charged and total due.

- **Payroll documentation:** Vendor must submit payroll documentation to accompany each invoice. This payroll documentation should clearly indicate that the detail hours worked under this contract were on overtime status along with the overtime rates that were paid. As this is a cost-reimbursable contract, IPTM can only reimburse the Vendor for an amount up to the total costs incurred for the overtime worked; therefore, Vendor must include either a pay stub or payroll ledger documenting payment to each officer for which reimbursement is requested. It is the responsibility of the Vendor to redact any personally identifiable information such as Social Security numbers prior to submission.

  The overtime pay rate for personnel shall be based on the actual cost per employee in accordance with the agency's payroll policy. Each agency shall comply with Fair Labor Standards Act (FLSA) requirements and thresholds for overtime accrual and payment and its own policies and procedures, insofar as those policies apply uniformly to both federally financed and other activities of the agency, as required by 2 CFR 200.403(c). Additional hours may be called overtime, call-out, off duty, extra, additional, etc.

  As part of the "fully burdened" overtime costs, the agency can be reimbursed for the additional benefit costs paid on the overtime worked. These benefit costs must be additional costs incurred specifically as a result of the overtime being reimbursed. These benefits may include associated portions of FICA (Social Security and Medicare), Worker's Compensation, Retirement benefits, and fixed shift differential costs. Prorated portions of leave accrual, health/life insurance, uniform allowance, vehicle usage, salary incentive, and other standard benefits cannot be reimbursed as they are not additional costs incurred specifically as a result of the overtime worked.

- **Detail Activity:** Vendor shall record detail activity that documents the education and enforcement outputs for each detail conducted through the provided online platform. The activity will document that each detail conducted meets the minimum level of service as outlined in this agreement and show the officers assigned, date, days and/or times, location, contacts made, number of materials distributed, and the numbers of educational contacts, warnings and citations issued to motorists, pedestrians, and bicyclists for each statute. Detail Activity submissions shall be consistent with the corresponding invoices and payroll documentation.

All invoices must be submitted through the provided online platform. In case the provided online platform is unavailable, invoice documentation can be sent electronically to ped.bike.safety@iptm.org.

All requests for reimbursement shall be signed by an Authorized Representative of the Vendor, or their delegate.

DocuSign Envelope ID: FD90441C-CD35-4769-803F-872E585BBF24

The University has 40-days to review and process invoices for services. This process begins on the date the Vendor invoice is received, inspected, and approved. Invoices may be returned if not completed properly. If a payment is not available within 40 days from the University approval, a separate interest penalty at a rate as established pursuant to Section 55.03(1), F.S., will be due and payable, in addition to the invoice amount, to the Vendor. Interest penalties of less than one (1) dollar will not be enforced unless the Vendor requests payment. Invoices that have to be returned to a Vendor because of Vendor preparation errors will result in a delay in the payment and is not subject to the interest penalty. The Vendor payment requirements do not start until a properly completed financial reimbursement request is provided to the University.

FINANCIAL CONSEQUENCES

Payment shall be made only after receipt and approval of services provided. If the University determines that the performance of the Vendor does not comply with the contract requirements, the University shall notify the Vendor of the deficiency to be corrected, and the correction shall be made within a timeframe to be specified by the University. If the deficiency is subsequently resolved, the University agrees to pay the invoice(s) for the unpaid amount(s) during the next billing period. If the Vendor is unable to resolve the deficiency, the funds shall be forfeited at the end of this contractual service agreement.

PRE-APPROVED HVE LOCATIONS

Education and enforcement overtime details are only authorized at locations (specific intersections, corridors, and/or regions) that have been pre-approved by the FDOT. Vendor may not be reimbursed for efforts conducted at locations that have not been pre-approved, that take place prior to the date of the approval of this agreement, or that do not comply with the minimum level of service as outlined in this agreement.

Each pre-approved location will have clearly defined boundaries; day(s) and times of day in which the overtime details can be worked and will be outlined in Exhibit C.

REQUESTS FOR ADDITIONAL FUNDING

The Vendor may request an increase to the total funding amount of this contract during the contract period. If the funding is available, the increased funding request may be considered if the Vendor has:

- satisfied all of the provision listed within this contract
- submitted timely invoices and record of detail activity submissions
- conducted HVE overtime detail efforts in a manner that supports the stated goal
- expended 70% or more of the current contract funding amount
- pedestrian and bicyclist crash circumstances within the Vendor's jurisdiction support the increased funding amount

Increased funding will be based upon availability and must be approved by the FDOT.

Increased funding will be accomplished through an amendment to this contract which must be signed by the FDOT, Vendor, and IPTM.

Requests for increased funding must be submitted to IPTM and received on or before February 29, 2024.

NON-DISCRIMINATION AND ETHICAL STANDARDS

No person shall, on the ground of race, color, religion, sex, handicap, or national origin, be subjected to discrimination under any program or activity supported by this contract. The agency agrees to comply with the Florida Civil Rights Act (F.S. 760)
http://www.leg.state.fl.us/statutes/index.cfm?App_mode=Display_Statute&URL=0700-0799/0760/0760.html

DocuSign Envelope ID: FD90441C-CD35-4769-803F-872E585BBF24

All officers participating in High Visibility Enforcement activities are required to comply with the Law Enforcement Officer Ethical Standards of Conduct as established by the Florida Department of Law Enforcement. https://www.fdle.state.fl.us/Content/CJST/Menu/Officer-Requirements-Main-Page/LE-Ethical-Standards-of-Conduct.aspx

CORE ACTIVITY PERFORMANCE MEASURES / MINIMUM LEVEL OF SERVICE TO BE PERFORMED AND CRITERIA FOR EVALUATING SUCCESSFUL COMPLETION.

Each law enforcement agency is encouraged to complete all of the tasks as outlined within this contract. All agencies are required to complete a minimum of (80%) eighty percent of contracted efforts within the contract period to be eligible for "agency of the year award" consideration. Each successive fiscal year, agencies will be prioritized for funding based on percentage of performance expectations that were met.

CONSEQUENCES FOR NON-PERFORMANCE

If the Vendor is unable to properly utilize the full funding amount as outlined herein, the amount of funding for subsequent periods may be reduced. In the event that the required services are in dispute, the invoice may be pro-rated, reduced, or payment withheld until adequate documentation is provided to support the completion of such services and the dispute is resolved. If requirements are not met, the invoice will be pro-rated and payment will only be made for services that were completed as outlined in this agreement. Failure to submit invoices, detail activity reports, or other deliverables as outlined in this contract may result in termination of the agreement.

EXHIBIT "B"

EFFORT SUMMARY

FLORIDA'S PEDESTRIAN AND BICYCLE FOCUSED INTITIATIVE
HIGH VISIBILITY ENFORCEMENT CAMPAIGN

QUANTIFIABLE, MEASURABLE, AND VERIFIABLE DELIVERABLES

- A minimum of two (2) media engagements should be conducted in conjunction with these high visibility enforcement operations during the contract period.
- Detail Activity Reports shall be submitted for each education and enforcement detail worked.
- Bicycle Light Distribution Assurance Forms shall be submitted for each bicycle light kit distributed.
- Invoices shall be submitted for each month or payroll period in which overtime details were performed beginning the month following contract execution.

PERFORMANCE MEASURES

Proof of performance documentation shall be submitted. This includes, but is not limited to, the following:

- Detail Activity Submissions
- Proof of media engagements
- Proof of overtime hours worked

BUDGET/COST ANALYSIS

- The name and fully loaded hourly overtime rates to be used for each officer must be submitted.
- The overtime rates may include the costs of hourly overtime plus associated fringe benefits paid upon the overtime.
- Only hours from officers listed and shown on the authorized personnel list are eligible for reimbursement under this agreement.
- Only overtime hours for sworn law enforcement officers are eligible for reimbursement (non-sworn civilian personnel are not eligible).
- Each officer is limited to a maximum of eight (8) hours of reimbursable overtime in any single day (defined as 12:00 a.m. to 11:59 p.m.).
- Payroll documentation should clearly indicate that the detail hours worked under this contract were on overtime status along with the overtime rates that were paid.
- ☐Only Tier 1 locations shall be worked from contract execution through May 10, 2024.
  ☐Only Tier 2 locations shall be worked from contract execution through May 10, 2024.
  ☒Both Tier 1 and Tier 2 locations: Tier 1 locations shall be worked from contract execution through May 10, 2024. Tier 2 locations can be worked in addition to Tier 1 locations from February 1, 2024 through May 10, 2024.
- Payment shall be made only after receipt and approval of services provided.

Total contract amount not to exceed: $20,053.12

FY2023 - Subcontract Agreement Required Federal Clauses, Per Part V

i. The parties to this subcontract shall be bound by all applicable sections of Part V: Acceptance and Agreement of Project # 433144-1-8404, Contract # G2M61. A final invoice must be received by June 7, 2024 or payment will be forfeited.

ii. **Buy American Act.** The Buy America Act prohibits the use of Federal highway safety grant funds to purchase any manufactured product or software/information technology systems whose unit purchase price is $5,000 or more, including motor vehicles, that is not produced in the United States. NHTSA may waive those requirements if (1) their application would be inconsistent with the public interest; (2) such materials and products are not produced in the United States in sufficient and reasonably available quantities and of a satisfactory quality; or (3) the inclusion of domestic material will increase the cost of the overall project contract by more than 25 percent.

iii. **Certification Regarding Federal Lobbying.** The subcontractor certifies, to the best of his or her knowledge and belief, that:

1. No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

2. If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.

iv. **Cooperation with the Inspector General.** It is the duty of every subcontractor to cooperate with the inspector general in any investigation, audit, inspection, review, or hearing pursuant to this subgrant agreement. Chapter 20.055(5), F.S.

v. **DBE Assurance**. The subcontractor shall not discriminate on the basis of race, color, national origin, or sex in the performance of this contract. The consultant or contractor shall carry out applicable requirements of 49 CFR, Part 26 in the award and administration of USDOT-assisted contracts. Failure by the consultant or contractor to carry out these requirements is a material breach of this contract, which may result in the termination of this contract or such other remedy, as the Subrecipient or the Department deems appropriate.

vi. **E-Verify**. Any subcontractors performing work or providing services pursuant to the subgrant agreement are required to utilize the U.S. Department of Homeland Security's E-Verify system to verify the employment eligibility of all new employees hired by the subcontractor during the contract term.

DocuSign Envelope ID: FD90441C-CD35-4769-803F-872E585BBF24

vii. **Nondiscrimination**. During the performance of this subcontract, the Subcontractor agrees:

1. To comply with all Federal nondiscrimination laws and regulations, as may be amended from time to time

2. Not to participate directly or indirectly in the discrimination prohibited by any Federal non-discrimination law or regulation, as set forth in appendix B of 49 CFR part 2l and herein

3. To permit access to its books, records, accounts, other sources of information, and its facilities as required by the FDOT State Safety Office, USDOT or NHTSA

4. That, in event a Subcontractor fails to comply with any nondiscrimination provisions in this subgrant, the Subrecipient will have the right to impose such subgrant sanctions as it or NHTSA determine are appropriate, including but not limited to withholding payments to the Subcontractor under the contract/agreement until the Subcontractor complies; and/or cancelling, terminating, or suspending a contract or funding agreement, in whole or in part.

viii. **Clean Air Act and Federal Water Pollution Control Act**. Subcontracts for amounts in excess of $150,000 must comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act (42 U.S.C. 7401-7671q) and the Federal Water Pollution Control Act as amended (33 U.S.C. 1251-1387). Violations must be reported to the Federal awarding agency and the Regional Office of the Environmental Protection Agency (EPA).

ix. **Integrity Certification**. The Subcontractor certifies that neither it nor its contractors are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participating in this Agreement by any federal department or agency. This certification is a material representation of fact upon which the Department is relying in entering this Agreement. If it is later determined that the Subcontractor knowingly rendered an erroneous certification, in addition to other remedies available to the federal government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment. The Subcontractor shall provide to the Department immediate written notice if at any time the Subcontractor learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.

x. **Contract Work Hours and Safety Standards Act**. All subcontracts in excess of $100,000 that involve the employment of mechanics or laborers must include a provision for compliance with 40 U.S.C. 3702 and 3704, as supplemented by Department of Labor regulations (29 CFR Part 5). Under 40 U.S.C. 3702 of the Act, each contractor must be required to compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than one and a half times the basic rate of pay for all hours worked in excess of 40 hours in the work week. The requirements of 40 U.S.C. 3704 are applicable to construction work and provide that no laborer or mechanic must be required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

DocuSign Envelope ID: FD90441C-CD35-4769-803F-872E585BBF24

xi. **Indemnification and Insurance**. To the fullest extent permitted by law, the Subcontractor shall indemnify and hold harmless the Subrecipient and the State of Florida, Department of Transportation, including the Department's officers and employees, from liabilities, damages, losses and costs, including, but not limited to, reasonable attorney's fees, to the extent caused by the negligence, recklessness or intentional wrongful misconduct of the contractor/consultant and persons employed or utilized by the contractor/consultant in the performance of this Agreement.

This indemnification shall survive the termination of this Agreement. Nothing contained in this paragraph is intended to nor shall it constitute a waiver of the State of Florida and the Subrecipient's sovereign immunity.

xii. **Policy on Banning Text Messaging While Driving Act**. In accordance with Executive Order 13513, Federal Leadership On Reducing Text Messaging While Driving, and DOT Order 3902.10, Text Messaging While Driving, subrecipients are encouraged to:

Adopt and enforce workplace safety policies to decrease crashes caused by distracted driving, including policies to ban text messaging while driving company-owned or rented vehicles, Government-owned, leased or rented vehicles, or privately-owned vehicles when on official business or when performing any work on behalf of the subrecipient agency and/or the Government.

Conduct workplace safety initiatives in a manner commensurate with the size of the business, such as establishment of new rules and programs or re-evaluation of existing programs to prohibit text messaging while driving, and education, awareness, and other outreach to employees about the safety risks associated with texting and driving.

Insert the substance of this section, including this sentence, in all sub-agreement/subcontracts funded with the subaward provided under this Agreement that are $15,000 or more.

xiii. **Human Trafficking**. The Subcontractor agrees that it and its employees that perform any work on the subcontract shall not, during the term of this Agreement, engage in trafficking in persons, procure a commercial sex act, or use forced labor in the performance of work on the subcontract.

xiv. **Contracting with small and minority businesses, women's business enterprises, and labor surplus area firms.** The Subcontractor agrees to take the following affirmative steps to assure that minority businesses, women's business enterprise, and labor surplus are used when possible:

1. Place qualified small and minority businesses and women's business enterprises on solicitation lists;
2. Assure that small and minority businesses, and women's business enterprises are solicited whenever they are potential sources;
3. Divide total requirements, when economically feasible, into smaller tasks or quantities to permit maximum participation by small and minority businesses, and women's business enterprises;
4. Establish delivery schedules, where the requirement permits, which encourage participation by small and minority businesses, and women's business enterprises;
5. Use the services and assistance, as appropriate, of such organizations as the Small Business Administration and the Minority Business Development Agency of the Department of Commerce; and
6. Requiring the prime contractor, if subcontracts are to be let, to take the affirmative steps listed in paragraphs (b)(1) through (5) of this section.

xv. **Termination for Convenience**. In accordance with Appendix II to 2 CFR Part 200—Contract Provisions for Non-Federal Entity Contracts Under Federal Awards, either Party may terminate this Agreement for convenience upon thirty (30) days' advance written notice to the other Party. Termination of this Agreement, as such, will not affect payment for services satisfactorily furnished prior to the termination.

CITY COUNCIL AGENDA ITEM

COUNCIL MEETING DATE 9/5/2023

SUBJECT: (B10) Resolution No. 23-36 - Ratifying the Results of the 2023 City Council Special Election for District 2

DEPARTMENT: City Clerk

GOAL: 6 - Organizational Excellence

RECOMMENDED MOTION: Move to approve Resolution No. 23-36.

SUMMARY: On February 21, 2023, Council adopted Resolution No. 23-11 - Calling for a Special Primary and Special Election to elect a Council Member for District 2 and providing for qualifying dates. The resolution set Tuesday, August 22, 2023 as the Special Primary Election date and June 12 through June 16, 2023 as the qualifying period.

Council also adopted Resolution No. 23-14 appointing Robin Fenwick, Assistant City Manager/City Clerk; Tracee Cody, Deputy City Clerk; and Amanda Bonin, Code Enforcement Manager, to serve on the canvassing board.

Two candidates successfully qualified: Tracy Grubbs and Sarah Jones, and the Special Primary Election was held accordingly on August 22, 2023.

The purpose of this resolution is to ratify the results of the special election for Port Orange City Council Member for District 2. The official results from the Port Orange Canvassing Board are attached and have been certified by the Volusia County Supervisor of Elections Office.

RESOLUTION NO. 23-36

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF PORT ORANGE, VOLUSIA COUNTY, FLORIDA, RATIFYING THE RESULTS OF THE SPECIAL ELECTION FOR CITY COUNCIL DISTRICT 2 HELD ON AUGUST 22, 2023; DECLARING THE COUNCIL MEMBER ELECTED FOR DISTRICT 2; AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, an election for City Council District 2 was held in the City of Port Orange, Volusia County, Florida, on August 22, 2023, pursuant to the provisions of the City Charter, as amended; and

WHEREAS, said election has been duly and properly held in accordance with the Charter of the City of Port Orange and applicable state law, and that the votes cast thereat have been returned, delivered, and canvassed by the Port Orange Canvassing Board, which has certified the results thereof.

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, FOUND, DECLARED AND HEREBY RATIFIED BY THE CITY COUNCIL OF THE CITY OF PORT ORANGE, VOLUSIA COUNTY, FLORIDA, at a public meeting of said City Council, duly held, at which the official returns of the election have been duly accepted and ratified according to the Charter of the City of Port Orange, Florida and applicable state law:

Section 1. The legal votes cast for each candidate and totals are as follows:

CANDIDATE	VOTES
DISTRICT 2	
Tracy Grubbs	3,186
Sarah Jones	3,000
Under/overvotes	0
TOTAL	**6,186**

Section 2. The City Council hereby declares the council member as follows:

District 2 Tracy Grubbs

Section 3. The election is found to have been in all respects conducted in accordance with law, and all steps in connection with and preceding such election have been duly, regularly, and lawfully taken.

Section 4. This resolution shall be deemed effective immediately upon adoption.

CITY COUNCIL AGENDA ITEM

COUNCIL MEETING DATE 9/5/2023

SUBJECT: (B11) Approval of the Mitigation Bank Purchase Agreement between the City of Port Orange and County of Volusia

DEPARTMENT: Public Utilities

GOAL: 3 - Quality of Life
4 - Economic Development
5 - Fiscal Sustainability
6 - Organizational Excellence

RECOMMENDED MOTION: Motion to approve the sale of 10.32 Federal WRAP wetland mitigation credits under U.S. Army Corps of Engineers (ACOE) Permit No. SAJ-2003-7849 and Florida Department of Environmental Protection (FDEP) Permit No. ST404_161100-010-SFI-31 in the amount of $516,000.00 from the City of Port Orange Wetland Mitigation Bank to the County of Volusia.

SUMMARY: The County of Volusia has requested to purchase 10.32 Federal Wetland Rapid Assessment Procedure (WRAP) wetland mitigation credits under U.S. Army Corps of Engineers (ACOE) Permit No. SAJ-2003-7849 and Florida Department of Environmental Protection (FDEP) Permit No. ST404_161100-010-SFI-31 in the amount of $516,000.00 from the City of Port Orange Wetland Mitigation Bank.

On January 13, 2004, the St. Johns River Water Management District (SJRWMD) issued Permit No.4-127-64024-1 to the City of Port Orange for the operation of a freshwater forested wetland mitigation bank on a portion of the city-owned wellfield properties on Shunz Road. To date, SJRWMD has authorized and released to the Port Orange Wetland Mitigation Bank a total of 323.80 RATIO credits, of which there are currently 180.32 available for sale. On July 16, 2009 Department of Army Corps of Engineers (USACOE) issued Permit No. SAJ-2003-7849 to the City of Port Orange for the operation of a Federal wetland mitigation bank within a portion of the city-owned wellfield properties on Shunz Road. To date, USACOE has authorized and released to the Port Orange Wetland Mitigation Bank a total of 217.52 FEDERAL WRAP credits, of which there are currently 209.59 available for sale.

WETLAND MITIGATION CREDIT RESERVATION, OPTION AND SALES AGREEMENT

This Wetland Mitigation Credit Reservation, Option and Sales Agreement (the "Agreement") is entered into this _____ day of _____, 20___ (the "Effective Date") by and between City of Port Orange, Florida, a Florida municipal corporation, whose address is: 1000 City Center Circle, Port Orange, Florida 32129 (hereinafter referred to as "City") and County of Volusia, Florida, a political subdivision of the State of Florida, whose address is: 123 W. Indiana Ave., Deland, FL 32720 ("County").

RECITALS:

A City is the owner of Port Orange Wetland Mitigation Bank, a regionally significant wetland mitigation bank with Federal WRAP wetland mitigation credits under U.S. Army Corps of Engineers (ACOE) Permit No: SAJ-2003-7849 ("Port Orange Credits");

B. County is in the process of permitting a project known as the TFRL Southeast Area Landfill Expansion located in Basin #17 within Volusia County, Florida (the "Project"), and has applied for Florida Department of Environmental Protection (FDEP) Permit No. ST404_161100-010-SFI-31 (the "Permit");

C. The County requested, and the City reserved, 10.32 Federal WRAP credits in Basin #17 in support of the County's Project with a twelve (12) month reservation term per the City's letter to the County dated February 7, 2023;

D. It is anticipated that, as a condition to issuing the Permit, FDEP will require County to purchase wetland mitigation credits;

E. County has determined that Port Orange Credits will satisfy FDEP's requirement and County therefore desires to obtain an option to acquire Port Orange Credits from City;

F. County expects to commence construction of the Project within one year from the issuance of the Permit; and

G. City is willing to sell Port Orange Credits to County on the terms and conditions hereinafter set forth.

NOW, THEREFORE, in consideration of the mutual covenants and undertakings herein set forth, the sufficiency of which is hereby acknowledged, City and County agree as follows:

1. Recitals. The Recitals set forth above are material parts of this Agreement and are incorporated herein by reference.

2. Reservation. City hereby reserves 10.32 Port Orange Credits for County under the terms and conditions set forth herein (the "Reservation").

3. Term. The Reservation shall commence upon the execution of this Agreement (the

"Effective Date") and expire sixty days from the Effective Date (the "Expiration Date").

4. Purchase Price. The total purchase price of the 10.32 Port Orange Credits subject to the Reservation is Five Hundred Sixteen Thousand and 00/100 dollars ($516,000.00) (the "Purchase Price"). County shall pay the Purchase Price to City within 45 days from the Effective Date.

5. Transfer of Port Orange Credits. Upon the City's timely receipt of payment in full of the Purchase Price, City shall assign to County the Port Orange Credits that County purchased using an instrument captioned "Assignment of Wetland Mitigation Credits," a copy of which is attached as Exhibit "A" hereto. If County fails to timely pay the Purchase Price by the Expiration Date, then this Agreement shall terminate and the parties shall be released and relieved of any further obligations under this Agreement.

6. Notices. Any notice required hereunder shall be given in writing and shall be sent by any of the following means: (i) hand delivery; (ii) facsimile transmission; (iii) electronic mail; (iv) registered or certified mail, return receipt requested or (v) deposited into a recognized overnight courier service to the parties hereto:

CITY: City of Port Orange
ATTN: City Manager
1000 City Center Circle
Port Orange, Florida 32129
E-Mail: wclark@port-orange.org

COUNTY: County of Volusia
ATTN: County Manager
123 W. Indiana Ave.
DeLand, Florida 32724
E-Mail: bbarlet@volusia.org

Notices shall be deemed received when delivered if hand delivered; when sent via facsimile transmission; when sent via electronic mail; when sent via a recognized overnight courier service; or 3 days after deposit in the U.S. Mail if sent via registered or certified mail.

If the time period or date by which or on which any right or election provided under this Agreement must be exercised, or by which or on which any act required hereunder must be performed, or by which or on which any notice or demand must be given or received, expires or occurs on a Saturday, Sunday or holiday observed by local, state or federal governments or state chartered or national banks in the State of Florida, then such time period or date shall be automatically extended through the end of the next day which is not a Saturday, Sunday or such a holiday.

7. Severability. If any provisions of this Agreement are held to be illegal or invalid, the other provisions shall remain in full force and effect.

8. Binding Effect. The obligations and covenants of this Agreement shall bind and

benefit the successors, personal representatives, heirs and permitted assigns of the parties hereto.

9. Captions. The captions for each section of this Agreement are for convenience and reference only and in no way define, describe, extend or limit the scope or intent of this Agreement, or the intent of any provision hereof.

10. Counterparts. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which shall constitute one and the same Agreement.

11. Facsimile or Email Signatures. Facsimile or email signatures of this Agreement shall be deemed binding on all parties.

12. Governing Law: Venue. This Agreement shall be governed by the laws of the State of Florida, exclusive of choice of law rules. Venue for any action arising out of this Agreement shall lie exclusively in the County or Circuit Court in Volusia County, Florida, regardless of the amount in controversy or any diversity of citizenship.

13. Entire Agreement/Amendments. This Agreement constitutes the sole and entire agreement between the parties hereto with respect to the Port Orange Credits and supersedes all letters-of-intent, term sheets, letters-of-interest, understandings, promises, covenants, representations, statements, agreements and undertakings (whether written or oral), if any, with respect thereto, which may have been given, distributed, furnished or made prior to or contemporaneously with the execution and delivery of this Agreement. This Agreement may not be amended except by written agreement signed by all of the parties.

14. Assignment. County shall not have the right to assign this Agreement without the prior written consent of City.

15. Waiver. No waiver of any provision or condition of this Agreement by any party shall be valid unless in writing signed by such party. No such waiver shall be taken as a waiver of any other or similar provision or of any future event, act, or default.

16. Time of the Essence. Time is of the essence of this Agreement and each and every provision hereof.

Re: Port Orange Mitigation Bank, ACOE Permit No: SAJ-2003-7849
Credit Reservation for: TFRL Southeast Area Landfill Expansion,
FDEP Permit No. ST404_161100-010-SFI-31

Dear Mr. Recktenwald:

This letter shall serve as confirmation of the **reservation** of wetland mitigation credits as follows:

- Project using the credit(s) is identified as **TFRL Southeast Area Landfill Expansion,**
  FDEP Permit No. ST404_161100-010-SFI-31
- Number of credits reserved: **10.32** Federal WRAP Credits; **Basin #17**
- Type of credits reserved are **Federal WRAP Credits**
- Term of this reservation is 12 months from the date of this letter. The construction permit must be issued within that timeframe and work must commence within 12 months.
- The official final transfer of credits is contingent upon final execution of an agreement outlining the terms and conditions of the sale and the completion of work associated with the ACOE permit for the project.

If you have any questions, please contact me at (386) 506-5761.

RESOLUTION NO. 20-27

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF PORT ORANGE, VOLUSIA COUNTY, FLORIDA, AMENDING AND RESTATING POLICIES AND FEES FOR THE SALE OF CREDITS FROM THE CITY OF PORT ORANGE WETLAND MITIGATION BANK; PROVIDING FOR CONFLICTING RESOLUTIONS AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, on January 13, 2004, St. Johns River Water Management District (SJRWMD) issued Permit No.4-127-64024-1 to the City of Port Orange for the operation of a freshwater forested wetland mitigation bank on a portion of the city-owned central wellfield properties; and

WHEREAS, to date, SJRWMD authorized and released to the Port Orange Wetland Mitigation Bank a total of 323.80 RATIO credits, of which there are currently 193.66 available for sale; and

WHEREAS, on July 16, 2009 Department of Army Corps of Engineers (USACOE) issued Permit No. SAJ-2003-7849 to the City of Port Orange for the operation of a Federal wetland mitigation bank within a portion of the city-owned central wellfield properties; and

WHEREAS, to date, USACOE has authorized and released to the Port Orange Wetland Mitigation Bank a total of 158.120 Federal WRAP credits, of which there are currently 157.220 available for sale; and

WHEREAS, by Resolution No. 12-47, the City Council previously established policies and fees for the sale of credits from the Port Orange Wetland Mitigation Bank; and

WHEREAS, St. Johns River Water Management District has recently approved a permit modification to convert the former RATIO credits to the uniform mitigation assessment method (UMAM), adopted by the each of the state water management districts on February 4, 2004. UMAM is now the sole means for all state entities, water management districts, local governments and other governmental entities to determine the amount of mitigation needed to offset adverse impacts to wetlands and other surface waters and to determine mitigation bank credits awarded and debited; and

WHEREAS, the mitigation bank currently has the maximum potential for 228.20 State UMAM credits and 734.62 Federal WRAP credits to be generated and released. Of those potential credits, the mitigation bank has currently available 141.00 State UMAM credits and 216.62 Federal Wrap credits; and

WHEREAS, in the course of the credit conversion process, St. Johns River Water Management District has specifically allocated credits to be made available for impacts to Regional Watersheds as follows: 133.81 in the Halifax River Basin #17; and 7.19 in the St. Johns River: Canaveral Marshes to Wekiva Basin #18; and

WHEREAS, the City Council desires to amend the policies and fees for the sale of State UMAM and Federal WRAP mitigation credits.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF PORT ORANGE, FLORIDA, THAT:

SECTION 1. This Resolution is adopted pursuant to the provisions of Chapter 166, Florida Statutes; and other applicable provisions of law.

SECTION 2. The City Council hereby authorizes the sale of issued State and Federal wetland mitigation credits; subject to compliance with all policies and conditions set forth in this Resolution.

SECTION 3. The wetland mitigation credits shall be offered for sale at the median price per credit as follows:

(a) St. Johns River Water Mgmt. District (State-UMAM) credits: $120,000.00

(b) U.S. Army Corps of Engineers (Federal-WRAP) credits: $50,000.00

SECTION 4. The City Council hereby authorizes the City Manager, or his designee, to negotiate the sale or transfer of State and Federal wetland mitigation credits; subject to compliance with regulatory permitting and all policies and conditions set forth in this Resolution for the specific purposes as follows:

(a) City projects shall be given priority status for reservations and transfer of credits, or fractional shares of credits, at no cost and on an as-needed basis; it being the intent of Council that the mitigation bank was established and continues to be maintained for the benefit of capital improvement projects.

(b) Economic development projects under active development and demonstrating a direct benefit to the City of Port Orange shall be entitled to a negotiated discount as deemed appropriate by the City Manager;

(c) Developments of regional impact as defined in Chapter 380, Florida Statutes shall be entitled to a ten percent (10%) discount at the discretion of the City Manager;

(d) Other governmental and public agency projects within the mitigation bank regional watersheds #17 and #18 which will benefit the public good; and

(e) Private projects under active development located within the regional watersheds #17 (Halifax River), and #18 (St. Johns River: Canaveral Marshes to Wekiva).

(f) For any project requiring both State and Federal credit(s), the Federal credit price stated in Section 3(b) may be discounted up to one-half of the price per credit.

For purposes of this Resolution, the term "under active development' shall mean that the project has an application scheduled for review and a hearing date for SJRWMD or ACOE, as applicable, within sixty (60) days and that the project is expected to commence construction within one (1) year.

SECTION 5. *Invitations to Bid.* The City Council hereby authorizes the City Manager and the Mitigation Bank Manager or their designees to respond to invitations to submit competitive sealed bids for the sale of State and Federal wetland mitigation credits. The amount of the bid shall be determined at the discretion of the City Manager while considering the provisions set forth in Section 3 above and considering the benefits to the City and the public at large to be derived from the project which is the subject of the invitation to bid. The City Manager is authorized to execute bid documents on behalf of the City of Port Orange as the owner of the Port Orange Mitigation Bank. Any successful bid award to the Port Orange Mitigation Bank will be presented to City Council for ratification of the sale.

SECTION 6. *Transaction Documents.* The Mitigation Bank Manager shall issue reservation letters acceptable by the State and Federal permitting authorities, and credit sales agreements as approved by the City Manager and the City Attorney. The Mitigation Bank Manager shall maintain a ledger for all wetland mitigation credit reservations, transactions reflecting each sale, future releases of credits for sale, and any other uses by the City of Port Orange Mitigation Bank.

SECTION 7. The City Council hereby acknowledges the financial assurance fund established and maintained for the perpetual operation and maintenance of the mitigation bank; and the right of the regulatory agencies (SJRWMD and ACOE) to mandate the addition of funds based on perpetual management cost estimates as determined from time to time. The City Council hereby authorizes the use of net revenue funds derived from the sale of wetland mitigation credits as follows:

(a) The designated credit sales account shall maintain a minimum reserve balance of One Million Dollars;
(b) Such amount(s) as are reported to SJRWMD from time to time as estimated costs associated with the perpetual management of the mitigation bank at two-year intervals;
(c) Acquisition of real properties for environmental, parks, and stormwater drainage purposes;
(d) Capital Improvement Projects and public park improvements benefiting the residents of the City of Port Orange; and
(e) Such other purposes as may be deemed appropriate by majority vote of the City Council.

SECTION 8. The Mitigation Bank Manager shall review the fees and policies set forth in this resolution annually during the anniversary month of Permit #64024-3 and shall make recommendations regarding adjustments in the market price of the wetland mitigation credit. The Mitigation Bank Manager shall recommend to the City Manager any adjustments deemed appropriate for the value of each credit and the City Manager shall bring recommendations forward to the City Council for approval.

SECTION 9. Resolution 12-47 is hereby superseded and all other resolutions or parts of resolutions in conflict with the provisions of this Resolution are hereby repealed to the extent of such conflict.

SECTION 10. This Resolution amending the written policy regarding policies and fees for the administration of the Port Orange Mitigation Bank shall take effect immediately upon its final passage and adoption.

CITY COUNCIL AGENDA ITEM

COUNCIL MEETING DATE 9/5/2023

SUBJECT: (B12) Approval of BeStrong USA, Inc. Economic Incentive Agreement – Ch. 20 Targeted Business Program

DEPARTMENT: Community Development

GOAL: 4 - Economic Development

RECOMMENDED MOTION: Move to approve the Economic Incentive Agreement - Chapter 20 Targeted Business Program with BeStrong USA, Inc., authorizing the Mayor and City Clerk to sign all necessary documents.

SUMMARY: BeStrong USA, Inc. has requested financial assistance from the City in the form of a refund/waiver of development fees through the City's Targeted Business Program related to the development of the new BeStrong USA, Inc. facility. The new facility will be located at 4440 Eastport Parkway in the Eastport Business and Technology Park and the Eastport Business Center Community Redevelopment Area (CRA). The BeStrong USA, Inc. site plan is currently under review and is anticipated to receive a Development Order soon for a Site Plan to construct a ±10,000 square-foot building, with a possible ±3,500 - 4,000 square-foot expansion area, and associated site improvements.

According to Chapter 20 of the Land Development Code (LDC), the City's Targeted Business Program is to promote positive forms of new development and redevelopment; reward the creation and retention of value-added jobs; attract targeted businesses; revitalize the Port Orange Town Center and Eastport Business Center redevelopment areas; increase the nonresidential tax-base; and foster a diverse employment base within the city.

Targeted businesses may be extended incentives to aid in retaining their operations within the city; to aid in enhancing/expanding their operations in the city; or aid in relocating their operations to viable property within the city.

According to the applicant's letters of request, BeStrong USA, Inc. is making a $3,200,000 investment in the city including the construction of a ±10,000 square foot facility that will employ up to 32 individuals, with approximately 25 of these employees being highly skilled technicians with salaries ranging between $19 to $28 per hour. The request letter states that BeStrong USA, Inc. is headquartered in Hungary and selected this site to expand its manufacturing, distribution, and service operations in the United States.

The applicant has requested a refund or waiver of $45,000 in site development and building permit review fees. The refund/waiver may not be applied to impact fees and utility connection fees. The amount of assistance is based on actual fees paid to date and estimates of final development fees that must be paid before a Certificate of Occupancy can be issued.

ECONOMIC DEVELOPMENT AGREEMENT

This Economic Development Agreement (the "Agreement") is made and entered into this____ day of _____, 2023 ("Effective Date"), by and between the **CITY OF PORT ORANGE**, Florida, a chartered municipal corporation (the "City" or "Grantor"), whose address is 1000 City Center Circle, Port Orange, Florida 32129 and **BESTRONG USA, INC., A FLORIDA CORPORATION WHOSE POST OFFICE ADDRESS IS 601 INNOVATION WAY, DAYTONA BEACH, FL 32114**, and collectively referred to as the Parties.

PROVISIONS:

WHEREAS, pursuant to the Land Development Code, Chapter 20, the City has established a Targeted Business Program ("TBP") to provide financial assistance to businesses; and

WHEREAS, the Grantee has applied for a grant to City of Port Orange, Port Orange, Florida; and

WHEREAS, Grantee is in the process of constructing a new facility the Eastport Industrial Park, Port Orange, Florida on a parcel of land more particularly described in **Exhibit "A"**, attached hereto and made a part hereof by reference ("Improved Site"); and

WHEREAS, Grantee site plan is currently under review and is anticipated to receive a Development Order for a Site Plan to construct a ±10,000 square-foot building at the Improved Site; and

WHEREAS, the City Council has considered the following factors; the number of jobs, the number of value-added jobs, average wage, type of business venture, how the business venture addresses the critical needs within the city, location of business venture, the value of construction, the significance of improvement, anticipated tax revenue, multiplier implications on the local economic health of the economy, availability of city funds and other factors related to the grant of financial assistance; and

WHEREAS, when fully operational, Grantee intends to employ 32 individuals with salaries ranging from $19 per hour to $28 per hour; and

WHEREAS, the capital investment for this new facility at the Improved Site is estimated at Three million Town Hundred and NO/100 Dollars ($3,200,000.00) through equipment and construction improvements, increasing the taxable valuation as a result of said property improvements; and

WHEREAS, the City Council has determined that the Grantee qualifies for the grant; and

WHEREAS, the City Council has recently examined the current financial factors relating to the City's budget preparation and indicating the health of the local economy; and

WHEREAS, the Targeted Business Program grant is expected to foster a diverse employment base within the City; and

WHEREAS, funding is available in the form of refunding current building permit fees already incurred by the Grantee and future building permit fees for future expansion and improvements to the current location; and

WHEREAS, the Parties desire to enter into this Agreement as more particularly set forth hereinafter.

NOW, THEREFORE, for good and valuable consideration, receipt hereof is hereby acknowledged, the Parties agree as follows:

1. Above Provisions: The foregoing premises are true and correct and are incorporated herein by reference.

2. Grant: Subject to the terms and conditions contained herein, the City hereby awards Grantee a Targeted Business Program grant in the form of a refund of development permit fees in the amount of **Four Thousand and NO/100 Dollars ($4,000.00)** previously incurred by the Grantee, upon issuance of a Development Order, and waiver or refund of future development permit fees**,** not to exceed **Forty-One Thousand and NO/100 Dollars ($41,000.00),** subject to the terms of this Agreement. Said grant shall not exceed a total amount of **Forty-Five Thousand and NO/100 Dollars ($45,000.00).**

3. Conditions: Dispersal of the grant shall be made for the development permit fees in the amount of **Four Thousand and NO/100 Dollars ($4,000.00)** previously incurred by the Grantee upon issuance of the Development Order. The waiver or refund of any subsequent development permit fees, not to exceed **Forty-One Thousand and NO/100 Dollars ($41,000.00),** shall be contingent upon issuance of the building permit or site construction permit, whichever occurs first. The Grantee agrees to provide the City with receipts of the actual costs incurred. **IMPORTANT: This grant shall not be**

considered a waiver of impact fees nor shall it be applied to impact fees due and owing by the Grantee.

4. Expiration: The city shall not distribute and is not required to distribute the grant if, within 18 months of the Effective Date of this Agreement, the Grantee has not secured the Development Order for purposes of refund of the previously incurred costs of $4,000.00, and for the remaining balance of the grant awarded, issuance of the building permit or site construction permit. The City shall not be responsible for any costs associated with the Project or this Agreement or any other costs if the grant expires. The City shall not be held responsible for the inability of the Grantee to obtain a development order, building permit, or site construction permit.

5. Audit: The City reserves the right to review, audit and account for any and all financial records pertaining to the creation of jobs as set forth in this Agreement and as required by the Targeted Business Program.

6. Public Records Compliance: Contractor shall comply with public records laws as set forth in Chapter 119, Florida Statutes, and shall specifically:

(a) Keep and maintain public records that ordinarily and necessarily would be required by the City in order to perform the service.

(b) Provide the public with access to public records on the same terms and conditions that the City would provide the records and at a cost that does not exceed the cost provided in Section 119, Florida Statutes, or as otherwise provided by law.

(c) Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law.

(d) Meet all requirements for retaining public records and transfer to the City, at no cost, all public records in possession of the Contractor upon termination of the Contract and destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. All records stored electronically must be provided to the City in a format that is compatible with the information technology systems of the City.

If Contractor does not comply with a public records request, the City shall enforce this contract provision.

7. Notice of Termination: Upon the City's determination that Grantee has breached any term of this Agreement, the City shall provide the Grantee written notice by certified mail of said breach, and provide, in the written notice, the corrective action that Grantee must take. If Grantee does not take the above-described corrective

action within fifteen (15) days of Grantee's receipt of the written notice, this Agreement shall terminate without further notice. The corrective action must be acceptable to the City in order to avoid termination. The City shall provide Grantee a certified letter confirming termination of this Agreement. Within thirty (30) days of receipt of the termination letter, the City Manager may require the Grantee to submit a cashier's check to the City for the total amount of funds disbursed from the City's match under this Agreement.

8. Applicable Laws: The Grantee must comply with all applicable laws, ordinances and codes and Grantee shall, except where provided herein, secure and pay for all permits and be responsible for all other fees or charges associated with the performance of the Project or any other activities under this Agreement.

9. Notice: For purposes of this agreement, notices shall be sent as follows:

City: City of Port Orange
Attention: City Manager
1000 City Center Circle
Port Orange, Florida 32129
(386) 506-5501

Grantee: Zoltan Katona, Owner & President
BeStrong USA, Inc.
182 S. Yonge Street
Ormond Beach, FL 32174

Any notice or other communication given under the Contract will be in writing and delivered by hand, sent by facsimile (provided acknowledgement of receipt thereof is delivered to the sender), sent by certified, registered mail, or sent by any nationally recognized overnight courier service to the addresses provided herein. The parties may, from time to time and at any time, change their respective addresses and each will have the right to specify as its address any other address by at least 10 days written notice to the other party.

10. Entire Agreement: This Agreement incorporates the entire Agreement, including any attached Exhibits or Amendments, between the parties hereto and no statements, representations, or terms, not included within the written terms of this Agreement, can be considered a part of this Agreement.

11. No Waiver: This Agreement does not constitute a waiver of any applicable codes or regulations nor does it constitute approval of the Project for development. All applicable Codes and regulations remain in force.

12. Governing Law: This Agreement shall be governed by and construed in accordance with the laws of the State of Florida. Venue of any actions arising out of this Agreement shall be in Volusia County, Florida.

[*Remainder of this page left blank intentionally]*

IN WITNESS WHEREOF, the City and Grantee have executed this Agreement on the day and year first above written.

Port Orange, FL 32129

RE: Financial Assistance Request

Dear Mr. Burman,

In line with the regulations outlined in the Port Orange Land Development Code, specifically Chapter 20 which pertains to Economic Development Incentives, Mr. Zoltan Katona, the proprietor of Bestrong USA, Inc. (located at 4440 Eastport Parkway, Port Orange, FL 32127), is making a courteous appeal for financial aid to facilitate the establishment of a new manufacturing and warehousing facility on Lot 4 within the premises of the Eastport Industrial Park.

To be more precise, we are seeking financial backing to cover all municipal charges valued at approximately $45.000, associated with the construction of this novel facility. These charges encompass permitting fees, application charges, as well as reimbursement for any previously settled fees.

Bestrong USA Inc. is a global manufacturing enterprise headquartered in Hungary, a constituent nation of the European Union. The company commenced its expansion into the United States in 2020. Following a two-year quest for a suitable location within the Miami/Fort Lauderdale and Tampa/Sarasota regions, Bestrong, in collaboration with Team Volusia and Volusia County Economic Development, ultimately opted to procure and develop a parcel of land in Port Orange, situated in Volusia County, during the year 2022. The proposed site layout for the development of Lot 4 is presently under submission to the municipal authorities for endorsement. This layout envisions the construction of a manufacturing facility spanning 14,000 square feet. The development strategy entails an initial phase focused on the completion of 10,000 square feet, followed by an additional expansion of 4,000 square feet within 12-18 months after the completion of phase one. Upon culmination, the enterprise will provide employment to a total of 32 individuals. Approximately 25 of these team members will be highly skilled technicians employed on the shop floor, with their compensation ranging between $19 and $28 per hour. The projected overall capital investment exceeds $3,200,000.

We greatly value your contemplation of our request for financial support, as its approval would mark a momentous stride towards advancing this project.

Sincerelly yours,

Zoltan Katona
Owner and President, Bestrong USA, Inc.

August 21, 2023

Dear Mr. Burman,

Our mission at Team Volusia EDC focuses on business recruitment and marketing for Volusia County. Our goal is to help fuel an environment where our local economy can diversify and flourish.

As President and CEO of Team Volusia EDC, I am pleased to provide this letter of support for BeStrong, with their more than 14 years of experience in engineering, designing and manufacturing sport and fitness equipment, and a European headquarters in Debrecen, Hungary.

Working with BeStrong throughout their site location process in Florida, which culminated in their locating their first U.S. manufacturing site in Port Orange in 2022, we have been impressed by their professionalism and their commitment to expanding their business worldwide.

Team Volusia has seen a dedicated effort to raise the profile of Volusia County with Hungarians and Hungarian-Americans, through the efforts of Piros Pazaurek, Honorary Consul of Hungary in Central Florida, and the launch of the Hungarian Summit. The Summit was held in Daytona Beach in 2022, followed by Budapest, Hungary this year, at which a local contingent attended, including myself, City of Daytona Beach Mayor Derrick L. Henry, and representatives from NASCAR, the University of Central Florida, and Stetson University. And we will be happy to welcome the Hungarian Summit back to our community in 2024.

I believe BeStrong establishing here in Volusia County will be beneficial for their business, our local community, and the health of Florida's economy at large.

Sincerely,

Keith Norden

DEPARTMENT: Finance

GOAL: 4 - Economic Development

RECOMMENDED MOTION: Move to approve the Cooperative Economic Development Agreement with Team Volusia Economic Development Corporation in the amount of $38,538 for fiscal year 2023-2024 and authorize the Mayor and City Clerk to execute all applicable documents.

SUMMARY: Team Volusia Economic Development Council (TVEDC) serves as a countywide public-private economic development agency. TVEDC coordinates economic development activities and prospects with city staff as well as the Volusia County Department of Economic Development. The annual contract amount of $38,538 ensures the City of Port Orange has a seat on the TVEDC Executive Committee.

TVEDC's primary purpose is to support business growth and recruit new businesses to the area. The contract requires them to report no less than quarterly to the city regarding TVEDC activities. Funding for public agencies is based at a rate of $0.60 per capita. The 2023 Bureau of Economic and Business Research (BEBR) Estimates of Population report was used to determine the estimated population. The estimated population of Port Orange in this most recent updated report was 64,230. Based on this information, the contract amount for FY 2024 is $38,538. The FY 2024 contract amount is $6,900.50 more than the FY 2023 contract amount. This is due to the City's population increasing from 63,275 (FY 2023) to 64,230 (FY 2024), according to BEBR and an increase in the per capita rate from $0.50 (FY 2023) to $0.60 (FY 2024).

COOPERATIVE ECONOMIC DEVELOPMENT AGREEMENT

THIS AGREEMENT is made and entered into this___day of_____, 2023 by and between the City of Port Orange, a Florida municipal corporation, hereinafter referred to as "City", and the "Team Volusia Economic Development Corporation" a Florida non-profit corporation, hereinafter TVEDC.

WHEREAS, the TVEDC intends to engage in a cooperative venture between the public and private sectors for the purpose of recruiting new businesses to Volusia County and, when requested by the City, fostering expansion of existing businesses within Volusia County; and

WHEREAS, to avoid a fragmentation of efforts and jurisdictional competition, various municipalities of Volusia County and the business community have come together to support a unified business development effort through the TVEDC; and

WHEREAS, the City Council of the City of Port Orange agrees to appropriate the amount of ***Thirty-Eight Thousand Five Hundred Thirty-Eight Dollars and .00 cents ($38,538.00)*** at .60 cents per capita (Port Orange population 64,230 as indicated at www.bebr.ufl.edu/population), in the budget for the fiscal year 2023–2024 to support economic development activities, and such sum qualifies the City for a seat on the TVEDC Executive Committee; and

WHEREAS, the City desires to contract with the TVEDC to perform such economic development activities and to insure accountability for use of public funds.

NOW, THEREFORE, in consideration of the covenants hereinafter set forth, the City and the TVEDC hereby agree as follows:

1. **Purpose of Agreement**. The purpose of this Agreement is to support and implement a program of economic and business development and expansion throughout Volusia County in order to enhance the economic well being of the citizens of the City. To this end, the City desires to contract with the TVEDC in order to provide for implementation of the economic development program and to ensure accountability for the use of public funds.

2. **Program Funding.** The City shall pay to the TVEDC the sum *of Thirty-Eight Thousand Five Hundred Thirty-Eight Dollars and .00 cents ($38,538.00)* at .60 cents per capita ("City Funding"), such sum being the total compensation to be paid by the City for the work performed under this Agreement, unless this amount is reduced or rescinded as provided herein. The City will make one (1) annual payment equal to the City Funding on or about October 15, 2023. The TVEDC shall use the City Funding for expenditures generally recognized as appropriate for economic development purposes. The TVEDC shall separately account for use of public funds provided under this Agreement through generally accepted accounting methods. The City will receive quarterly reports which detail the activities of the TVEDC including the most recent monthly financial statement. The City shall contact the TVEDC in writing when future funding for the TVEDC is discussed at a public meeting.

3. **Program Requirements.**
   a. TVEDC shall plan, implement and evaluate a program to recruit new businesses to the City; to foster expansion of existing businesses within the City upon the City's request; and in a manner provided herein to forestall the relocation of businesses located in the City to a location outside of Volusia County. TVEDC will not assist the City or any existing business with the City's and/or existing business' attempt to relocate such existing business from any other city or Volusia County who is a member of TVEDC ("Other Governmental Entity"), unless either the City or such business provides TVEDC with written consent for such assistance from the Other Governmental Entity. TVEDC will not assist any Other Governmental Entity or any existing business with such Other Governmental Entity's and/or existing business' attempt to relocate such existing business from the City to any Other Governmental Entity, unless the Other Governmental Entity or such existing business provides TVEDC with written consent for such assistance from the City, which the City may refuse to provide in the City's sole discretion.
   b. It is the desire of the parties that businesses within Volusia County provide stable and rewarding employment for local citizens and that businesses respect the environment, appearance, and well-being of the City. TVEDC shall engage in good faith efforts to foster the goals of diversity and equitable minority participation in its economic development outreach, planning and programming actions. TVEDC shall pursue the goal of full economic participation in actions supportive of the ethnic and racial diversity of the City's community. Except as provided in Section 3.a. above, TVEDC shall disregard boundaries within Volusia County in its program and shall make all reasonable efforts to work with all sectors of local government and the Chamber Alliance, who shall be composed of the executives of several area Chambers of Commerce, in the implementation of its program. TVEDC shall use the funds herein provided for expenditures generally recognized as appropriate for economic and business development purposes. TVEDC shall separately account for use of public funds provided under this Agreement through generally accepted accounting methods. TVEDC shall also provide promotional materials and statistical studies to the City related to economic development.

4. **Promotional Efforts** TVEDC also agrees to create and maintain a landing page for the City on TVEDC's website providing factual redevelopment/economic development information requested by TVEDC and supplied by the City. The City will timely provide TVEDC with information regarding the City as requested from time to time by TVEDC for inclusion by TVEDC on the City's landing page. In addition, it is hereby agreed that TVEDC in its promotional materials will specifically include positive aspects of the City and, upon request, will provide (a) prospective businesses and industry outside Volusia County's jurisdictional limits and only as contemplated in Section 3.a. above, in Other Governmental Entity jurisdictional limits, and (b) existing businesses and industry inside the City's jurisdictional limits with the latest statistics on the City's growth and desirable features as a place to locate and expand. The City agrees to provide TVEDC with access to whatever

information it has available to accomplish this task. Consistent with the purposes set forth in Paragraph 1 above, TVEDC will promote the City's special districts and all other industrial/commercial sites located in the City.

5. **Fiscal Impact Analysis**. TVEDC will provide professional advice on proposed industrial/commercial sites located in the City and any other future areas deemed important by the City. As part of its scope of services, TVEDC shall perform, at the City's request, a fiscal impact analysis of its recommendation; such analysis shall include but not be limited to:

   - Present cost of direct out-of-pocket City and County incentives, if any
   - Cost of tax revenues forgone, if any, plus interest
   - The amount of other tax revenue streams to be collected by the City
   - An estimate of any economic multipliers to be derived based upon a company's local purchases, etc.
   - An estimate of the break-even year

6. **Economic Development Intent** TVEDC's primary focus its effort on job creation and economic development. TVEDC shall actively work with and coordinate its efforts with the City and the Chamber Alliance. The City shall assign a staff member to serve on any of TVEDC Committees as needed and required. TVEDC shall provide the City with an annual report outlining the creation of all jobs within Volusia County and the City.

7. **Report of Operations.** Upon request, TVEDC shall provide the City with a copy of its annual audit performed by an independent certified public accounting firm.

8. **Future Funding**. Nothing in this Agreement shall obligate or commit the City to appropriate any funds in any subsequent fiscal year.

9. **Term of Agreement.** This Agreement shall commence on October 1, 2023 and shall continue in force for a one-year period ending September 30, 2024. In addition, this Agreement may be terminated upon any of the following events;

   a. Written notice by TVEDC to the City terminating the Agreement with or without cause.
   b. Written notice by the City to TVEDC of termination of the Agreement for failure or breach of TVEDC to perform its obligations hereunder.
   c. Approval of a resolution by the City Commission amending the City budget to reduce or rescind the funds provided under this Agreement in accordance with Paragraph 2 above.

Because TVEDC is reasonably likely to have made financial commitments based upon the City Funding received, the effective date of any termination of this Agreement contemplated herein shall be effective thirty (30) calendar days after receipt by the non-terminating party ("Termination Effective Date"). Unless otherwise agreed by the City and TVEDC, upon termination of this Agreement by the City or by TVEDC prior to the end of the Term, TVEDC will reimburse to the City one quarter ($1/4^{th}$) of the City Funding for each full calendar quarter of the Term remaining from the Termination Effective Date through the end of the Term, with payment being made within ten (10) business days after the Termination Effective Date.

10. **Notices.** Notices required under this Agreement shall be sent by email, first class, certified return receipt requested, or nationally recognized express document service to the following persons representing the parties:

City: Wayne Clark, City Manager
City of Port Orange
1000 City Center Circle
Port Orange, FL 32129

TVEDC: Keith A. Norden, CEcD
President & CEO
Team Volusia EDC
One Daytona Blvd, Suite 240
Daytona Beach, FL 32114

11. **Indemnification.** The TVEDC shall indemnify and hold harmless the City from and against all claims, damages, losses and expenses, including attorneys' fees and costs, arising out of or resulting from the negligent or malicious performance of its operations under this Agreement.

12. **Amendments.** This Agreement may be amended or modified only by an instrument of equal formality signed by the respective parties.

13. **Entire Agreement.** This Agreement constitutes the entire agreement between the parties. There are no further or other agreements or understandings, written or oral in effect between the parties relating to the subject matter of this Agreement.

14. **Public Records Compliance.** Contractor shall comply with public records laws as set forth in Chapter 119, Florida Statutes, and shall specifically:

a. Keep and maintain public records that ordinarily and necessarily would be required by the City in order to perform the service.

b. Provide the public with access to public records on the same terms and conditions that the City would provide the records and at a cost that does not exceed the cost provided in Section 119, Florida Statutes, or as otherwise provided by law.

c. Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the Contract term.

d. Upon completion of the Contract, Contractor shall transfer to the City, at no cost, all public records in possession of the Contractor and destroy any duplicate public records that are exempt or confidential and exempt from public records disclosure requirements. All records stored electronically must be provided to the City in a format that is compatible with the information technology systems of the City. If Contractor does not comply with a public records request, the City shall enforce the Contract provisions in accordance with the Contract.

CONTRACTOR QUESTIONS RELATING TO CONTRACTOR'S DUTIES TO PROVIDE PUBLIC RECORDS RELATING TO THIS CONTRACT MUST BE FORWARDED TO THE OFFICE OF THE CITY CLERK, CITY HALL, 1000 CITY CENTER CIRCLE, PORT ORANGE, FLORIDA 32129 TELEPHONE: (386) 506-5563 E-MAIL: CITYCLERK@PORTORANGE.ORG.

CITY COUNCIL AGENDA ITEM

COUNCIL MEETING DATE 9/5/2023

SUBJECT: (B14) Approval of Contract to Purchase 5797 Devon Street

DEPARTMENT: Public Utilities

GOAL: 1 - Public Safety
2 - Infrastructure

RECOMMENDED MOTION: Move to approve the purchase of real property located at 5797 Devon Street for an amount of $420,000 and authorize costs for closing not to exceed $5,000; and authorize the Mayor and City Clerk to execute all necessary documents.

SUMMARY: The Public Utilities Department is requesting City Council approval to purchase the property located at 5797 Devon Street for $420,000 plus authorize an additional $5,000 for estimated closing costs. City staff contracted with a local appraisal company to provide a report on the fair market value of the property. The seller is offering the property at $420,000, 5% above the appraised value. The existing home sustained damage due to flooding from Hurricane Ian. The existing home will be demolished and the property will remain open green space until the current lift station can be relocated.

The current lift station on Devon Street is located in the median of the roadway and needs to be relocated. The lift station has flooded three times since 2016 (Hurricanes Matthew, Ian, Irma). Outcomes achieved from relocating the current lift station to 5797 Devon Street are the following: Mitigation of lift station flooding during a tropical storm or hurricane, Mitigation of 5797 Devon Street residence flooding again during a tropical storm or hurricane, improved traffic safety on Devon Street by removing the lift station from its current location, thereby enhancing visibility for oncoming traffic. The replacement lift station will be designed to be resilient to flooding, which is an issue with the current station. By elevating the lift station wet well and the control panel one foot above the 100-year floodplain level, any flooding problems will be alleviated for the lift station. Staff is planning to relocate the existing lift station on Devon Street to the property in a future Capital Improvement Project.

The acquisition cost will be budgeted as part of the Fiscal Year 2023-24 budget. Sewer Impact Fee funds will be utilized as this is an enhancement to the sanitary sewer system.

OPTION TO PURCHASE CONTRACT AND CONTRACT FOR SALE AND PURCHASE OF REAL PROPERTY

THIS OPTION TO PURCHASE CONTRACT AND CONTRACT FOR SALE AND PURCHASE OF REAL PROPERTY, hereinafter, the "Contract" is made and entered into this _____ day of _____, 2023, between Ronald L. Wilson and Laurie R. Wilson, whose mailing address is 5797 Devon Street, Port Orange, Florida 32127, hereinafter referred to as "Seller"; and CITY OF PORT ORANGE, FLORIDA, a municipal corporation, mailing address: c/o City Manager, 1000 City Center Circle, Port Orange FL 32129-4144 , hereinafter referred to as "Purchaser." All references in this Contract to the singular shall include the plural where applicable.

For good and valuable consideration in the amount of One Hundred and NO/100 Dollars ($100.00) receipt whereof is hereby acknowledged by the Seller upon execution of the Option to Purchase Contract by Seller and City Manager, the parties agree as follows:

1. Subject to the exercise of the Option to Purchase Contract, hereinafter "Option", evinced by City Council approval as set forth in Section 16, Seller agrees to sell and Purchaser agrees to purchase the following described real estate, with its appurtenances, located at 5797 Devon Street, Port Orange, County of Volusia, State of Florida:

Lot 1, Foxboro Subdivision, as per map recorded in Map Book 34, Page 117, of the Public Records of Volusia County, Florida.

Also being identified as Parcel Number 6316-02-00-0010; the subject real estate being hereinafter referred to as the "Property".

General Description and Vicinity of Property: residential property located at the northeast corner of Devon Street and Taylor Road, Port Orange, Volusia County, Florida.

Tangible Personal Property and Fixtures: Prior to the expiration of the Port-Closing Occupancy Agreement, said date being Ninety (90) days from date of closing, Seller shall remove all personal property, furnishings, appliances, fixtures, shrubs and queen palm trees around the pool deck area, at their discretion, and miscellaneous debris; and shall secure all exterior openings of the structure. Upon the expiration of the Post-Closing Occupancy Agreement, any Tangible Personal Property and Fixtures, as defined herein, remaining on the Property shall be the property of the Purchaser and Seller shall have no further right of removal.

Conveyance by the Seller and Purchase by the Purchaser of the above-described Property is subject to the *Standards for Real Estate Transactions* set forth on the form contract approved by The Florida Bar and The Florida Association of Realtors, Inc., attached hereto as **Exhibit "A."** In the event of a conflict between the terms of the Contract and the terms contained in **Exhibit "A"**, this Contract shall control.

2. Purchase Price and Method of Payment. The purchase price payable to Seller is as follows:

(a) The Purchase Price for the Property is: **Four Hundred Twenty Thousand and NO/100 Dollars ($420,000.00)**; and

(b) Upon approval by City Council and execution of the Contract for Purchase by the Mayor and the City Clerk, a good faith deposit of Two Hundred Fifty and No/100 Dollars ($250.00), shall be paid to and held in trust by Columbia Title Research Corporation Trust Account, 200 Forest Lake Boulevard, Daytona Beach, FL 32119; referred to as "Escrow Agent," and upon the closing of this transaction, to be delivered to Seller at the time of closing; and

(c) The total Purchase Price, which includes the Purchaser's good faith deposit of Two Hundred Fifty and No/100 Dollars ($250.00), and less expenses and prorations as provided in Standard K and Standard L, and as otherwise agreed herein, delivered by wire transfer payable to the order of Seller, to be delivered at the time of closing, subject to the provisions set forth in Section 17, herein.

3. Title and Survey.

(a) Marketable Title. Seller shall convey to Purchaser marketable title to the Property, determined in accordance with the Title Standards in **Exhibit "A".**

(b) Title Insurance and Commitment. Not later than Ten (10) days after approval by City Council, Seller shall cause to be delivered to and receipted by the City Attorney's Office, on behalf of the Purchaser and at Purchaser's expense, a title insurance commitment, in accordance with Standard "A" of **Exhibit "A"**, covering the Property, together with legible copies of all recorded documents referenced therein, along with a special assessment and real property tax search (the "Commitment").An Owner's ALTA policy, insuring Purchaser for the full amount of the purchase price against loss or damage by reason of defect in the title of Seller in the Property. Such policy shall be delivered to Purchaser at the time of closing.

(c) Survey. Purchaser, at Purchaser's expense, may have the Property surveyed and certified by a registered Florida Surveyor in accordance with Standard "C" of **Exhibit "A".**

4. Taxes and assessments. Seller agrees to pay before delinquency all taxes, assessments and utility charges, if any, which may be due currently or may hereafter become due on the premises until and including the day of closing.

5. Risk of loss. Risk of loss or damage to the Property by fire or other casualty between the date of this Contract and Closing shall be and is assumed by Seller.

6. Rental Agreements. Seller warrants that no other persons have any right to possession of the Property and the Seller shall not enter into any Lease or other instrument granting possessory rights subsequent to the execution of this Contract, other than the Post Closing Occupancy Agreement made available to Seller as provided in Section 17, herein.

7. Deed. Seller agrees, on full payment of the purchase price in the manner herein specified, to make, execute and deliver to Purchaser a good and sufficient warranty deed to the Property.

8. Closing. Closing shall take place in Volusia County, Florida at the office of the Escrow Agent on or before **Ninety (90) days** following the approval of this Contract by the Port Orange City Council. The date of closing may be extended upon mutual agreement of the parties. At the closing, Seller shall provide Purchaser with the deed to the Property and other documents in accordance with Standard J of **Exhibit "A"**. Following the closing, Purchaser shall have the right to exclusive possession of the Property.

9. Closing Costs. Seller shall pay all closing costs, including but not limited to, Florida documentary tax stamps, document preparation, and recording instruments to cure title defects. Costs of title insurance premium, environmental audits, surveys, and other inspections shall be paid by the Purchaser.

10. Fees. For the purpose of brokerage fees, Purchaser has not utilized the services of a Florida Real Estate Broker. Both parties acknowledge that the Seller shall be responsible for the payment of any brokerage fee incurred for the transfer of the Property. Purchaser shall be responsible for the appraisal report prepared at its request, and Seller shall be responsible for fees incurred of Seller's independent review of this Contract by attorneys, engineers, and other professionals, if any.

11. Appraisal Contingency. This Contract is contingent upon Purchaser obtaining one or more appraisals, in accordance with the City of Port Orange Code of Ordinances and acceptable to Purchaser, (the "Appraisals"). If Purchaser has been unable to obtain such Appraisals, and Purchaser serves written notice of such circumstance to Seller prior to City Council consideration of this Contract, Purchaser shall have the right to unilaterally terminate this Contract by serving written notice to Seller within the Inspection Period. In case of termination of the Contract pursuant to this Section 12, the Earnest Money shall be returned to Purchaser and

neither party shall have any further obligation or liability under this Contract. Seller shall provide copies of any appraisals of the Property prepared in the last 12 months.

12. Purchaser's Intended Use of the Property. The restrictions, easements, leases, if any, and limitations of record shall not prevent the Purchaser from exercising its rights for its intended use of the Property including all lawful purposes consistent with the local zoning regulations and the elimination and prevention of the development or spread of slums and urban blight. In the event that Purchaser determines that the Property cannot be used for its intended purposes, then the Purchaser shall be entitled to terminate this Contract prior to the expiration of the Inspection Period.

13. Default by Seller. If Seller is unable to convey marketable title to the Property in accordance with the terms of this Contract, or otherwise fails to perform this Contract within the time specified for closing or any extension thereof, the costs of examining the title, surveying the Property, and inspecting and auditing the Property shall, at the option of Purchaser, be paid by Seller to Purchaser on demand. Service of such demand shall be made by certified mail, return receipt requested to Seller as identified and at their respective mailing address shown above, with a copy to Seller's agent or other authorized representative as Seller may indicate in writing to Purchaser. Purchaser shall have the right of specific performance and all other remedies at law or equity. Election of any options by Purchaser or failure of Purchaser to exercise any rights granted by this Contract shall not be construed as a waiver of any action for damages resulting from Seller's default.

14. Other Offers to Purchase. Seller acknowledges there are no existing contracts or options to purchase on said Property as of execution of this Option to Purchase Contract and Contract to Sale and Purchase of Real Property.

15. Access to Property. Seller agrees to allow Purchaser and Purchaser's employees, consultants, agents and representatives access to the Property upon execution of this Contract by Seller and extending to the time of closing for the purpose of conducting surveys, environmental audits and inspections of the premises.

16. **Option to Purchase and Approval of Contract for Sale and Purchase of Real Property. Upon execution of this Option by the Seller and the City Manager, the City of Port Orange shall have the option for sixty (60) days to exercise the option to purchase the property described herein and in accordance with the terms described herein. The City Manager's signature on this Option shall not bind the City of Port Orange for the purchase of the Property until approved by the City Council. The City Council of the City of Port Orange may exercise the Option in a public meeting after 30 days' public notice, by casting a majority vote of the City Council in favor of exercising the option and by the Mayor and City Clerk duly executing this Contract. If this Contract is not approved by the City Council on or before the 60th day after execution of the Option by the City Manager, then the City shall provide written notice to Seller and the Escrow Agent and thereafter**

the City shall not be responsible for any other cost, expense, damage or liability and the parties shall both be discharged and released from any further responsibility under this Contract.

17. Post-Closing Occupancy. Seller shall have the option to remain in possession of the Property for a period of Ninety (90) days from the date of closing, subject to the terms and conditions agreed upon in the Post Closing Occupancy Agreement substantially in the form attached hereto as **Exhibit "B"** and made a part hereof by reference. During Seller's period of post-closing occupancy, it is agreed that the Escrow Agent shall hold back in escrow **Ten Thousand and NO/100 Dollars ($10,000.00)** of the Purchase Price, subject to the terms and conditions agreed upon in the Escrow Agreement in the form attached hereto as **Exhibit "C"** and made hereof by reference. The terms set forth in this Section 17 shall survive this Contract.

18. Effective Date. The Effective Date of the Option to Purchase Contract shall be the date of the Option to Purchase Contract executed by the Seller and the City Manager, based on the date of the last signature received. The Effective Date for the Purchase Contract shall be the date of approval by the City Council for the City of Port Orange, Florida; such approval shall be evidenced by the signing of the Mayor and the City Clerk.

19. Counterparts. This Contract may be executed in one or more counterparts, each of which shall be deemed to be an original but all of which together shall constitute one and the same instrument. The electronic transmittal of an executed copy of this Contract shall be deemed valid as if an original signature was delivered.

This Option to Purchase Contract and Contract for Sale and Purchase of Real Property is executed by the parties as of the respective dates shown below.

IV. FINANCING:

❑ (a) This is a cash transaction with no contingencies for financing;

❑ (b) This Contract is contingent on Buyer obtaining written loan commitment which confirms underwriting loan approval for a loan to purchase the Property ("Loan Approval") within _____ days (if blank, then 30 days) after Effective Date ("Loan Approval Date") for (CHECK ONLY ONE): ❑ a fixed; ❑ an adjustable; or ❑ a fixed or adjustable rate loan, in the Loan Amount (See Paragraph II.(c)) at an initial interest rate not to exceed _____%, and for a term of _____ years. Buyer will make application within _____ days (if blank, then 5 days) after Effective Date.

BUYER: Buyer shall use reasonable diligence to: obtain Loan Approval; **notify Seller in writing of receipt of Loan Approval by Loan Approval Date**; satisfy terms of the Loan Approval; and close the loan. Loan Approval which requires a condition related to the sale of other property shall not be deemed Loan Approval for purposes of this subparagraph. Buyer shall pay all loan expenses. Buyer authorizes the mortgage broker(s) and lender(s) to disclose information regarding the conditions, status, and progress of loan application and Loan Approval to Seller, Seller's attorney, real estate licensee(s), and Closing Agent.

SELLER: If Buyer does not deliver to Seller written notice of Loan Approval by Loan Approval Date, Seller may thereafter cancel this Contract by delivering written notice ("Seller's Cancellation Notice") to Buyer, but not later than seven (7) days prior to Closing. Seller's Cancellation Notice shall notify Buyer that Buyer has three (3) days to deliver to Seller written notice waiving this Financing contingency, or the Contract shall be cancelled.

DEPOSIT(S) (for purposes of this Financing Paragraph IV(b) only): If Buyer has used reasonable diligence but does not obtain Loan Approval by Loan Approval Date, and thereafter either party elects to cancel this Contract, the deposit(s) shall be returned to Buyer. If Buyer obtains Loan Approval or waives this Financing contingency, and thereafter the Contract does not close, then the deposit(s) shall be paid to Seller; provided however, if the failure to close is due to: (i) Seller's failure or refusal to close or Seller otherwise fails to meet the terms of the Contract, or (ii) Buyer's lender fails to receive and approve an appraisal of the Property in an amount sufficient to meet the terms of the Loan Approval, then the deposit(s) shall be returned to Buyer.

❑ (c) Assumption of existing mortgage (see rider for terms); or

❑ (d) Purchase money note and mortgage to Seller (see Standards B and K and riders; addenda; or special clauses for terms).

V. TITLE EVIDENCE: At least ____ days (if blank, then 5 days) before Closing a title insurance commitment with legible copies of instruments listed as exceptions attached thereto ("Title Commitment") and, after Closing, an owner's policy of title insurance (see Standard A for terms) shall be obtained by:

(CHECK ONLY ONE): ❑ (1) Seller, at Seller's expense and delivered to Buyer or Buyer's attorney; or

❑ (2) Buyer at Buyer's expense.

(CHECK HERE): ❑ If an abstract of title is to be furnished instead of title insurance, and attach rider for terms.

VI. CLOSING DATE: This transaction shall be closed and the closing documents delivered on _____ ("Closing"), unless modified by other provisions of this Contract. In the event of extreme weather or other conditions or events constituting "force majeure", Closing will be extended a reasonable time until: (i) restoration of utilities and other services essential to Closing, and (ii) availability of Hazard, Wind, Flood, or Homeowners' insurance. If such conditions continue more than _____ days (if blank, then 14 days) beyond Closing Date, then either party may cancel this Contract.

VII. RESTRICTIONS; EASEMENTS; LIMITATIONS: Seller shall convey marketable title subject to: comprehensive land use plans, zoning, restrictions, prohibitions and other requirements imposed by governmental authority; restrictions and matters appearing on the plat or otherwise common to the subdivision; outstanding oil, gas and mineral rights of record without right of entry; unplatted public utility easements of record (located contiguous to real property lines and not more than 10 feet in width as to the rear or front lines and 7 1/2 feet in width as to the side lines); taxes for year of Closing and subsequent years; and assumed mortgages and purchase money mortgages, if any (if additional items, see addendum); provided, that there exists at Closing no violation of the foregoing and none prevent use of the Property for _____ purpose(s).

VIII. OCCUPANCY: Seller shall deliver occupancy of Property to Buyer at time of Closing unless otherwise stated herein. If Property is intended to be rented or occupied beyond Closing, the fact and terms thereof and the tenant(s) or occupants shall be disclosed pursuant to Standard F. If occupancy is to be delivered before Closing, Buyer assumes all risks of loss to Property from date of occupancy, shall be responsible and liable for maintenance from that date, and shall be deemed to have accepted Property in its existing condition as of time of taking occupancy.

IX. TYPEWRITTEN OR HANDWRITTEN PROVISIONS: Typewritten or handwritten provisions, riders and addenda shall control all printed provisions of this Contract in conflict with them.

X. ASSIGNABILITY: (CHECK ONLY ONE): Buyer ☐ may assign and thereby be released from any further liability under this Contract; ☐ may assign but not be released from liability under this Contract; or ☐ may not assign this Contract.

XI. DISCLOSURES:

(a) The Property may be subject to unpaid special assessment lien(s) imposed by a public body ("public body" does not include a Condominium or Homeowners' Association). Such lien(s), if any, whether certified, confirmed and ratified, pending, or payable in installments, as of Closing, shall be paid as follows: ☐ **by Seller at closing** ☐ **by Buyer (if left blank, then Seller at Closing).** If the amount of any assessment to be paid by Seller has not been finally determined as of Closing, Seller shall be charged at Closing an amount equal to the last estimate or assessment for the improvement by the public body.

(b) Radon is a naturally occurring radioactive gas that when accumulated in a building in sufficient quantities may present health risks to persons who are exposed to it over time. Levels of radon that exceed federal and state guidelines have been found in buildings in Florida. Additional information regarding radon or radon testing may be obtained from your County Public Health unit.

(c) Mold is naturally occurring and may cause health risks or damage to property. If Buyer is concerned or desires additional information regarding mold, Buyer should contact an appropriate professional.

(d) Buyer acknowledges receipt of the Florida Energy-Efficiency Rating Information Brochure required by Section 553.996, F.S.

(e) If the Real Property includes pre-1978 residential housing then a lead-based paint rider is mandatory.

(f) If Seller is a "foreign person" as defined by the Foreign Investment in Real Property Tax Act, the parties shall comply with that Act.

(g) **BUYER SHOULD NOT EXECUTE THIS CONTRACT UNTIL BUYER HAS RECEIVED AND READ THE HOMEOWNERS' ASSOCIATION/COMMUNITY DISCLOSURE.**

(h) PROPERTY TAX DISCLOSURE SUMMARY: BUYER SHOULD NOT RELY ON THE SELLER'S CURRENT PROPERTY TAXES AS THE AMOUNT OF PROPERTY TAXES THAT THE BUYER MAY BE OBLIGATED TO PAY IN THE YEAR SUBSEQUENT TO PURCHASE. A CHANGE OF OWNERSHIP OR PROPERTY IMPROVEMENTS TRIGGERS REASSESSMENTS OF THE PROPERTY THAT COULD RESULT IN HIGHER PROPERTY TAXES. IF YOU HAVE ANY QUESTIONS CONCERNING VALUATION, CONTACT THE COUNTY PROPERTY APPRAISER'S OFFICE FOR INFORMATION.

XII. MAXIMUM REPAIR COSTS: Seller shall not be responsible for payments in excess of:

(a) $_____ for treatment and repair under Standard D (if blank, then 1.5% of the Purchase Price).

(b) $_____ for repair and replacement under Standard N not caused by Wood Destroying Organisms (if blank, then 1.5% of the Purchase Price).

XIII. HOME WARRANTY: ☐ Seller ☐ Buyer ☐ N/A will pay for a home warranty plan issued by _____ at a cost not to exceed $_____.

XIV. RIDERS; ADDENDA; SPECIAL CLAUSES: CHECK those riders which are applicable AND are attached to and made part of this Contract:

☐ CONDOMINIUM ☐ VA/FHA ☐ HOMEOWNERS' ASSN. ☐ LEAD-BASED PAINT ☐ COASTAL CONSTRUCTION CONTROL LINE
☐ INSULATION ☐ "AS IS" ☐ EVIDENCE OF TITLE (SOUTH FLORIDA CONTRACTS) ☐ Other Comprehensive Rider Provisions ☐ Addenda

Special Clause(s): _____

_____

_____

_____

XV. STANDARDS FOR REAL ESTATE TRANSACTIONS ("Standards"): Buyer and Seller acknowledge receipt of a copy of Standards A through Y on the reverse side or attached, which are incorporated as part of this Contract.

THIS IS INTENDED TO BE A LEGALLY BINDING CONTRACT. IF NOT FULLY UNDERSTOOD, SEEK THE ADVICE OF AN ATTORNEY PRIOR TO SIGNING.

THIS FORM HAS BEEN APPROVED BY THE FLORIDA ASSOCIATION OF REALTORS® AND THE FLORIDA BAR.

Approval does not constitute an opinion that any of the terms and conditions in this Contract should be accepted by the parties in a particular transaction. Terms and conditions should be negotiated based upon the respective interests, objectives and bargaining positions of all interested persons.

BROKERS: The brokers (including cooperating brokers, if any) named below are the only brokers entitled to compensation in connection with this Contract:

Name: _____ _____

Cooperating Brokers, if any **Listing Broker**

STANDARDS FOR REAL ESTATE TRANSACTIONS

A. TITLE INSURANCE: The Title Commitment shall be issued by a Florida licensed title insurer agreeing to issue Buyer, upon recording of the deed to Buyer, an owner's policy of title insurance in the amount of the purchase price, insuring Buyer's marketable title to the Real Property, subject only to matters contained in Paragraph VII and those to be discharged by Seller at or before Closing. Marketable title shall be determined according to applicable Title Standards adopted by authority of The Florida Bar and in accordance with law. Buyer shall have 5 days from date of receiving the Title Commitment to examine it, and if title is found defective, notify Seller in writing specifying defect(s) which render title unmarketable. Seller shall have 30 days from receipt of notice to remove the defects, failing which Buyer shall, within 5 days after expiration of the 30 day period, deliver written notice to Seller either: (1) extending the time for a reasonable period not to exceed 120 days within which Seller shall use diligent effort to remove the defects; or (2) requesting a refund of deposit(s) paid which shall be returned to Buyer. If Buyer fails to so notify Seller, Buyer shall be deemed to have accepted the title as it then is. Seller shall, if title is found unmarketable, use diligent effort to correct defect(s) within the time provided. If, after diligent effort, Seller is unable to timely correct the defects, Buyer shall either waive the defects, or receive a refund of deposit(s), thereby releasing Buyer and Seller from all further obligations under this Contract. If Seller is to provide the Title Commitment and it is delivered to Buyer less than 5 days prior to Closing, Buyer may extend Closing so that Buyer shall have up to 5 days from date of receipt to examine same in accordance with this Standard.

B. PURCHASE MONEY MORTGAGE; SECURITY AGREEMENT TO SELLER: A purchase money mortgage and mortgage note to Seller shall provide for a 30 day grace period in the event of default if a first mortgage and a 15 day grace period if a second or lesser mortgage; shall provide for right of prepayment in whole or in part without penalty; shall permit acceleration in event of transfer of the Real Property; shall require all prior liens and encumbrances to be kept in good standing; shall forbid modifications of, or future advances under, prior mortgage(s); shall require Buyer to maintain policies of insurance containing a standard mortgagee clause covering all improvements located on the Real Property against fire and all perils included within the term "extended coverage endorsements" and such other risks and perils as Seller may reasonably require, in an amount equal to their highest insurable value; and the mortgage, note and security agreement shall be otherwise in form and content required by Seller, but Seller may only require clauses and coverage customarily found in mortgages, mortgage notes and security agreements generally utilized by savings and loan institutions or state or national banks located in the county wherein the Real Property is located. All Personal Property and leases being conveyed or assigned will, at Seller's option, be subject to the lien of a security agreement evidenced by recorded or filed financing statements or certificates of title. If a balloon mortgage, the final payment will exceed the periodic payments thereon.

C. SURVEY: Buyer, at Buyer's expense, within time allowed to deliver evidence of title and to examine same, may have the Real Property surveyed and certified by a registered Florida surveyor. If the survey discloses encroachments on the Real Property or that improvements located thereon encroach on setback lines, easements, lands of others or violate any restrictions, Contract covenants or applicable governmental regulations, the same shall constitute a title defect.

D. WOOD DESTROYING ORGANISMS: "Wood Destroying Organisms" (WDO) shall be deemed to include all wood destroying organisms required to be reported under the Florida Structural Pest Control Act, as amended. Buyer, at Buyer's expense, may have the Property inspected by a Florida Certified Pest Control Operator ("Operator") within 20 days after the Effective Date to determine if there is any visible active WDO infestation or visible damage from WDO infestation, excluding fences. If either or both are found, Buyer may within said 20 days (1) have cost of treatment of active infestation estimated by the Operator; (2) have all damage inspected and cost of repair estimated by an appropriately licensed contractor; and (3) report such cost(s) to Seller in writing. Seller shall cause the treatment and repair of all WDO damage to be made and pay the costs thereof up to the amount provided in Paragraph XII(a). If estimated costs exceed that amount, Buyer shall have the option of canceling this Contract by giving written notice to Seller within 20 days after the Effective Date, or Buyer may elect to proceed with the transaction and receive a credit at Closing equal to the amount provided in Paragraph XII(a). If Buyer's lender requires an updated WDO report, then Buyer shall, at Buyer's expense, have the opportunity to have the Property re-inspected for WDO infestation and have the cost of active infestation or new damage estimated and reported to Seller in writing at least 10 days prior to Closing, and thereafter, Seller shall cause such treatment and repair to be made and pay the cost thereof; provided, Seller's total obligation for treatment and repair costs required under both the first and second inspection shall not exceed the amount provided in Paragraph XII (a).

E. INGRESS AND EGRESS: Seller warrants and represents that there is ingress and egress to the Real Property sufficient for its intended use as described in Paragraph VII hereof and title to the Real Property is insurable in accordance with Standard A without exception for lack of legal right of access.

F. LEASES: Seller shall, at least 10 days before Closing, furnish to Buyer copies of all written leases and estoppel letters from each tenant specifying the nature and duration of the tenant's occupancy, rental rates, advanced rent and security deposits paid by tenant. If Seller is unable to obtain such letter from each tenant, the same information shall be furnished by Seller to Buyer within that time period in the form of a Seller's affidavit, and Buyer may thereafter contact tenant to confirm such information. If the terms of the leases differ materially from Seller's representations, Buyer may terminate this Contract by delivering written notice to Seller at least 5 days prior to Closing. Seller shall, at Closing, deliver and assign all original leases to Buyer.

G. LIENS: Seller shall furnish to Buyer at time of Closing an affidavit attesting to the absence, unless otherwise provided for herein, of any financing statement, claims of lien or potential lienors known to Seller and further attesting that there have been no improvements or repairs to the Real Property for 90 days immediately preceding date of Closing. If the Real Property has been improved or repaired within that time, Seller shall deliver releases or waivers of construction liens executed by all general contractors, subcontractors, suppliers and materialmen in addition to Seller's lien affidavit setting forth the names of all such general contractors, subcontractors, suppliers and materialmen, further affirming that all charges for improvements or repairs which could serve as a basis for a construction lien or a claim for damages have been paid or will be paid at the Closing of this Contract.

H. PLACE OF CLOSING: Closing shall be held in the county wherein the Real Property is located at the office of the attorney or other closing agent ("Closing Agent") designated by the party paying for title insurance, or, if no title insurance, designated by Seller.

I. TIME: Calendar days shall be used in computing time periods except periods of less than six (6) days, in which event Saturdays, Sundays and state or national legal holidays shall be excluded. Any time periods provided for herein which shall end on a Saturday, Sunday, or a legal holiday shall extend to 5:00 p.m. of the next business day. **Time is of the essence in this Contract.**

J. CLOSING DOCUMENTS: Seller shall furnish the deed, bill of sale, certificate of title, construction lien affidavit, owner's possession affidavit, assignments of leases, tenant and mortgagee estoppel letters and corrective instruments. Buyer shall furnish mortgage, mortgage note, security agreement and financing statements.

K. EXPENSES: Documentary stamps on the deed and recording of corrective instruments shall be paid by Seller. All costs of Buyer's loan (whether obtained from Seller or third party), including, but not limited to, documentary stamps and intangible tax on the purchase money mortgage and any mortgage assumed, mortgagee title insurance commitment with related fees, and recording of purchase money mortgage to Seller, deed and financing statements shall be paid by Buyer. Unless otherwise provided by law or rider to this Contract, charges for related closing services, title search, and closing fees (including preparation of closing statement), shall be paid by the party responsible for furnishing the title evidence in accordance with Paragraph V.

L. PRORATIONS; CREDITS: Taxes, assessments, rent, interest, insurance and other expenses of the Property shall be prorated through the day before Closing. Buyer shall have the option of taking over existing policies of insurance, if assumable, in which event premiums shall be prorated. Cash at Closing shall be increased or decreased as may be required by prorations to be made through day prior to Closing, or occupancy, if occupancy occurs before Closing. Advance rent and security deposits will be credited to Buyer. Escrow deposits held by mortgagee will be credited to Seller. Taxes shall be prorated based on the current year's tax with due allowance made for maximum allowable discount, homestead and other exemptions. If Closing occurs at a date when the current year's millage is not fixed and current year's assessment is available, taxes will be prorated based upon such assessment and prior year's millage. If current year's assessment is not available, then taxes will be prorated on prior year's tax. If there are completed improvements on the Real Property by January 1st of year of Closing, which improvements were not in existence on January 1st of prior year, then taxes shall be prorated based upon prior year's millage and at an equitable assessment to be agreed upon between the parties; failing which, request shall be made to the County Property Appraiser for an informal assessment taking into account available exemptions. A tax proration based on an estimate shall, at request of either party, be readjusted upon receipt of current year's tax bill.

M. (RESERVED - purposely left blank)

N. INSPECTION AND REPAIR: Seller warrants that the ceiling, roof (including the fascia and soffits), and exterior and interior walls, and foundation of the Property do not have any visible evidence of leaks, water damage, or structural damage and that dockage, seawalls, septic tank, pool, all appliances, mechanical items,

heating, cooling, electrical, plumbing systems, and machinery are in Working Condition. The foregoing warranty shall be limited to the items specified unless otherwise provided in an addendum. Buyer may inspect, or, at Buyer's expense, have a firm or individual specializing in home inspections and holding an occupational license for such purpose (if required), or by an appropriately licensed Florida contractor, make inspections of, those items within 20 days after the Effective Date. Buyer shall, prior to Buyer's occupancy but not more than 20 days after Effective Date, report in writing to Seller such items that do not meet the above standards as to defects. Unless Buyer timely reports such defects, Buyer shall be deemed to have waived Seller's warranties as to defects not reported. If repairs or replacements are required to comply with this Standard, Seller shall cause them to be made and shall pay up to the amount provided in Paragraph XII (b). Seller is not required to make repairs or replacements of a Cosmetic Condition unless caused by a defect Seller is responsible to repair or replace. If the cost for such repair or replacement exceeds the amount provided in Paragraph XII (b), Buyer or Seller may elect to pay such excess, failing which either party may cancel this Contract. If Seller is unable to correct the defects prior to Closing, the cost thereof shall be paid into escrow at Closing. For purposes of this Contract: (1) "Working Condition" means operating in the manner in which the item was designed to operate; (2) "Cosmetic Condition" means aesthetic imperfections that do not affect the Working Condition of the item, including, but not limited to: pitted marcite or other pool finishes; missing or torn screens; fogged windows; tears, worn spots, or discoloration of floor coverings, wallpaper, or window treatments; nail holes, scratches, dents, scrapes, chips or caulking in ceilings, walls, flooring, fixtures, or mirrors; and minor cracks in floors, tiles, windows, driveways, sidewalks, or pool decks; and (3) cracked roof tiles, curling or worn shingles, or limited roof life shall not be considered defects Seller must repair or replace, so long as there is no evidence of actual leaks or leakage or structural damage, but missing tiles will be Seller's responsibility to replace or repair.

O. RISK OF LOSS: If, after the Effective Date, the Property is damaged by fire or other casualty ("Casualty Loss") before Closing and cost of restoration (which shall include the cost of pruning or removing damaged trees) does not exceed 1.5% of the Purchase Price, cost of restoration shall be an obligation of Seller and Closing shall proceed pursuant to the terms of this Contract and if restoration is not completed as of Closing, restoration costs will be escrowed at Closing. If the cost of restoration exceeds 1.5% of the Purchase Price, Buyer shall either take the Property as is, together with the 1.5% or receive a refund of deposit(s) thereby releasing Buyer and Seller from all further obligations under this Contract. Seller's sole obligation with respect to tree damage by casualty or other natural occurrence shall be the cost of pruning or removal.

P. CLOSING PROCEDURE: The deed shall be recorded upon clearance of funds. If the title agent insures adverse matters pursuant to Section 627.7841, F.S., as amended, the escrow and closing procedure required by this Standard shall be waived. Unless waived as set forth above the following closing procedures shall apply: (1) all closing proceeds shall be held in escrow by the Closing Agent for a period of not more than 5 days after Closing; (2) if Seller's title is rendered unmarketable, through no fault of Buyer, Buyer shall, within the 5 day period, notify Seller in writing of the defect and Seller shall have 30 days from date of receipt of such notification to cure the defect; (3) if Seller fails to timely cure the defect, all deposits and closing funds shall, upon written demand by Buyer and within 5 days after demand, be returned to Buyer and, simultaneously with such repayment, Buyer shall return the Personal Property, vacate the Real Property and reconvey the Property to Seller by special warranty deed and bill of sale; and (4) if Buyer fails to make timely demand for refund, Buyer shall take title as is, waiving all rights against Seller as to any intervening defect except as may be available to Buyer by virtue of warranties contained in the deed or bill of sale.

Q. ESCROW: Any Closing Agent or escrow agent (collectively "Agent") receiving funds or equivalent is authorized and agrees by acceptance of them to deposit them promptly, hold same in escrow and, subject to clearance, disburse them in accordance with terms and conditions of this Contract. Failure of funds to clear shall not excuse Buyer's performance. If in doubt as to Agent's duties or liabilities under the provisions of this Contract, Agent may, at Agent's option, continue to hold the subject matter of the escrow until the parties hereto agree to its disbursement or until a judgment of a court of competent jurisdiction shall determine the rights of the parties, or Agent may deposit same with the clerk of the circuit court having jurisdiction of the dispute. An attorney who represents a party and also acts as Agent may represent such party in such action. Upon notifying all parties concerned of such action, all liability on the part of Agent shall fully terminate, except to the extent of accounting for any items previously delivered out of escrow. If a licensed real estate broker, Agent will comply with provisions of Chapter 475, F.S., as amended. Any suit between Buyer and Seller wherein Agent is made a party because of acting as Agent hereunder, or in any suit wherein Agent interpleads the subject matter of the escrow, Agent shall recover reasonable attorney's fees and costs incurred with these amounts to be paid from and out of the escrowed funds or equivalent and charged and awarded as court costs in favor of the prevailing party. The Agent shall not be liable to any party or person for misdelivery to Buyer or Seller of items subject to the escrow, unless such misdelivery is due to willful breach of the provisions of this Contract or gross negligence of Agent.

R. ATTORNEY'S FEES; COSTS: In any litigation, including breach, enforcement or interpretation, arising out of this Contract, the prevailing party in such litigation, which, for purposes of this Standard, shall include Seller, Buyer and any brokers acting in agency or nonagency relationships authorized by Chapter 475, F.S., as amended, shall be entitled to recover from the non-prevailing party reasonable attorney's fees, costs and expenses.

S. FAILURE OF PERFORMANCE: If Buyer fails to perform this Contract within the time specified, including payment of all deposits, the deposit(s) paid by Buyer and deposit(s) agreed to be paid, may be recovered and retained by and for the account of Seller as agreed upon liquidated damages, consideration for the execution of this Contract and in full settlement of any claims; whereupon, Buyer and Seller shall be relieved of all obligations under this Contract; or Seller, at Seller's option, may proceed in equity to enforce Seller's rights under this Contract. If for any reason other than failure of Seller to make Seller's title marketable after diligent effort, Seller fails, neglects or refuses to perform this Contract, Buyer may seek specific performance or elect to receive the return of Buyer's deposit(s) without thereby waiving any action for damages resulting from Seller's breach.

T. CONTRACT NOT RECORDABLE; PERSONS BOUND; NOTICE; COPIES: Neither this Contract nor any notice of it shall be recorded in any public records. This Contract shall bind and inure to the benefit of the parties and their successors in interest. Whenever the context permits, singular shall include plural and one gender shall include all. Notice and delivery given by or to the attorney or broker representing any party shall be as effective as if given by or to that party. All notices must be in writing and may be made by mail, personal delivery or electronic media. A legible facsimile or electronic (including "pdf") copy of this Contract and any signatures hereon shall be considered for all purposes as an original.

U. CONVEYANCE: Seller shall convey marketable title to the Real Property by statutory warranty, trustee's, personal representative's, or guardian's deed, as appropriate to the status of Seller, subject only to matters contained in Paragraph VII and those otherwise accepted by Buyer. Personal Property shall, at the request of Buyer, be transferred by an absolute bill of sale with warranty of title, subject only to such matters as may be otherwise provided for herein.

V. OTHER AGREEMENTS: No prior or present agreements or representations shall be binding upon Buyer or Seller unless included in this Contract. No modification to or change in this Contract shall be valid or binding upon the parties unless in writing and executed by the parties intended to be bound by it.

W. SELLER DISCLOSURE: There are no facts known to Seller materially affecting the value of the Property which are not readily observable by Buyer or which have not been disclosed to Buyer.

X. PROPERTY MAINTENANCE; PROPERTY ACCESS; REPAIR STANDARDS; ASSIGNMENT OF CONTRACTS AND WARRANTIES: Seller shall maintain the Property, including, but not limited to lawn, shrubbery, and pool in the condition existing as of Effective Date, ordinary wear and tear and Casualty Loss excepted. Seller shall, upon reasonable notice, provide utilities service and access to the Property for appraisal and inspections, including a walk-through prior to Closing, to confirm that all items of Personal Property are on the Real Property and, subject to the foregoing, that all required repairs and replacements have been made, and that the Property has been maintained as required by this Standard. All repairs and replacements shall be completed in a good and workmanlike manner, in accordance with all requirements of law, and shall consist of materials or items of quality, value, capacity and performance comparable to, or better than, that existing as of the Effective Date. Seller will assign all assignable repair and treatment contracts and warranties to Buyer at Closing.

Y. 1031 EXCHANGE: If either Seller or Buyer wish to enter into a like-kind exchange (either simultaneous with Closing or deferred) with respect to the Property under Section 1031 of the Internal Revenue Code ("Exchange"), the other party shall cooperate in all reasonable respects to effectuate the Exchange, including the execution of documents; provided (1) the cooperating party shall incur no liability or expense related to the Exchange and (2) the Closing shall not be contingent upon, nor extended or delayed by, such Exchange.

EXHIBIT "B"

POST CLOSING OCCUPANCY AGREEMENT

THIS POST CLOSING OCCUPANCY AGREEMENT ("Agreement") is made as of the _____ day of _____, 2023 by and between CITY OF PORT ORANGE, FLORIDA, a municipal corporation, mailing address: c/o City Manager, 1000 City Center Circle, Port Orange FL 32129-4144, hereinafter referred to as_("PURCHASER") and Ronald L. Wilson and Laurie R. Wilson, whose mailing address is 5797 Devon Street, Port Orange, Florida 32127 hereinafter referred to as "SELLER",

WHEREAS, PURCHASER and SELLER have entered into a contract for the purchase and sale of property at 5797 Devon Street, Port Orange, County of Volusia, State of Florida, more particularly described as:

Lot 1, Foxboro Subdivision, as per map recorded in Map Book 34, Page 117, of the Public Records of Volusia County, Florida.

Also being identified by Parcel Number **6316-02-00-0010**; the subject real estate being hereinafter referred to as the "Property", which contract is dated _____ and

WHEREAS, SELLER desires to occupy the Property after closing and disbursement, and PURCHASER is willing to allow SELLER occupancy in accordance with and subject to the terms and conditions set forth herein.

NOW THEREFORE, the Parties for and in consideration of the premises and mutual covenants contained herein, the Parties agree as follows:

1. Occupancy. This Agreement shall be restricted to occupancy of the Property by the SELLER only and shall be used for residential purposes. Occupancy shall terminate on or before Ninety (90) days from date of closing on or before 5:00 P.M., said date being _____ ("Termination Date"), by which time SELLER shall vacate the Property. This right of occupancy is exclusive to the SELLER.

2. Payments. Rents due and owing under this Agreement will be at the rate of **One Thousand Five Hundred and NO/100 Dollars ($1,500.00) per month ("Rent").** Rent due and owing under this Agreement **is** hereby suspended pending vacation of the Property on or before Ninety (90) days from the date of closing, as agreed herein. If SELLER fails to vacate the Property as agreed, then SELLER shall be in default of their obligations hereunder and shall forfeit all right, title, and interest to the monies held in escrow pursuant to the Contract for Purchase of the Property, referenced hereinabove. If SELLER vacates as agreed, then SELLER shall be entitled to a return of all monies held in escrow pursuant to the Option to Purchase Contract and Escrow Agreement entered into between the parties and without any deduction for rents.

3. Utilities and Insurance. SELLER shall be responsible for payment of all utilities and for insurance on contents until the date SELLER vacates the Property. The PURCHASER agrees to maintain liability insurance on the Property.

4. Indemnification. It is understood and agreed that the SELLER will indemnify and hold the PURCHASER harmless in the event of any damage, injury or loss of life in connection with SELLER's occupancy and use of said Property and all facilities offered for SELLER's enjoyment of the Property.

5. Use. SELLER further covenants and agrees not to use nor permit the Property to be used for any illegal, immoral or improper purposes; not to make nor permit any disturbance, noise or annoyance whatsoever detrimental to the Property or to the comfort and peace of any of the inhabitants of said building or its neighbors and particularly SELLER shall not assign this Occupancy Agreement or sublet any portion of the Property. SELLER shall not use said Property for any other purpose than as a residence.

6. Repairs. SELLER shall maintain the Property, including carpet, appliances, equipment and furnishings, if any, and including but not limited to air conditioning, plumbing, electrical and structural in good working order and repair during said occupancy. Any damage, breakage or loss to any portion of the Property, including air conditioning, plumbing, electrical and structural, occurring during the occupancy, will be paid for by SELLER.

7. Surrender. At the end of the term, SELLER shall vacate and surrender the Property in broom clean condition. SELLER shall remove all personal property, furnishings, appliances, fixtures, shrubs and queen palm trees around the pool deck area, at their discretion ("Tangible Personal Property and Fixtures"), and miscellaneous debris; and shall secure all exterior openings of the structure. Upon the expiration of the Post-Closing Occupancy Agreement, any Tangible Personal Property and Fixtures, as defined herein, remaining on the Property shall be the property of the PURCHASER and SELLER shall have no further right of removal.

8. Right of Entry. PURCHASER's right to enter the Property shall be governed by the provisions of Florida Statutes, it being understood that hurricanes or severe weather warnings shall constitute an emergency under such Statutes.

9. No Waiver. The failure of PURCHASER to take any action against SELLER for violation of any of the terms of this Agreement shall not be a waiver of that act or a subsequent act of SELLER of a similar nature from being a violation of this Agreement.

10. Action. If the PURCHASER is compelled to maintain an action for the possession of the Property, or damages, the SELLER agrees to pay all expenses incurred by the PURCHASER in connection with said action, including but not limited to reasonable attorneys' fees and costs at all trial and appellate levels.

11. Miscellaneous. This Agreement may be executed in counterparts, all counterparts taken together being one Agreement. Facsimile or electronic (including pdf) signatures shall be treated as originals. The provisions contained in this Agreement and the Contract set forth the entire understanding of the parties and shall be binding upon their respective heirs, successors, assigns

and legal representatives of the parties hereto and shall not be changed or terminated orally. The law governing this Agreement shall be that of the State of Florida. Venue shall lie in Volusia County. Time is of the essence.

12. Governing Law. This Occupancy Agreement shall be governed by Chapter 83 Florida Statutes as a Residential Tenancy. The rights and remedies under this Occupancy Agreement are cumulative and not exclusive. Upon default, the non-defaulting Party shall additionally have such other and further rights as may be provided at law or in equity.

13. Captions. The captions used herein are for convenience purposes only and have no effect on the interpretation of the terms contained herein.

ESCROW AGREEMENT

THIS ESCROW AGREEMENT is made and entered into as of this ____day of _____, 2023, by and among **CITY OF PORT ORANGE, FLORIDA**, a Florida municipal corporation with a mailing address of 1000 City Center Circle, Port Orange, Florida 32129, hereinafter referred to as "**Port Orange**" or "**City**" and the **RONALD L. WILSON AND LAURIE R. WILSON,** whose mailing address is 5797 Devon Street, Port Orange, Florida 32127 hereinafter referred to as **"Seller"** and **COLUMBIA TITLE RESEARCH CORPORATION**, with a mailing address of 200 Forest Lake Blvd., Suite 2, Daytona Beach, FL 32119 hereinafter referred to as **"Escrow Agent"**.

W I T N E S S E T H :

WHEREAS, Seller and Port Orange entered into the Post Closing Occupancy Agreement dated on or about _____, (hereinafter the "Post-Closing Agreement") detailing the terms and conditions of Seller remaining in possession of the property located at 5797 Devon Street, Port Orange, County of Volusia, State of Florida, more particularly described as:

Lot 1, Foxboro Subdivision, as per map recorded in Map Book 34, Page 117, of the Public Records of Volusia County, Florida.

Also being identified by Parcel Number **6316-02-00-0010**; the subject real estate being hereinafter referred to as the "Property"; and

WHEREAS, the Parties desire to use this Escrow Agreement to effectuate that certain Post-Closing Agreement for the Property.

NOW, THEREFORE, for and in consideration of the foregoing premises and of the respective agreements and covenants contained herein, and other valuable consideration, the receipt and sufficiency of which is hereby acknowledged, and intending to be legally bound hereby, the parties hereto agree as follows:

ARTICLE 1
ACCEPTANCE OF APPOINTMENT AND DEPOSIT INTO ESCROW

Section 1.1 Acceptance of Appointment as Escrow Agent. The Escrow Agent hereby accepts the appointment as Escrow Agent and agrees to hold and distribute all Escrow Deposits, in accordance with the terms and conditions of this Agreement.

Section 1.2 Receipt of Deposits for Escrow. Upon the full execution of this Agreement, the Seller authorizes Escrow Agent to hold from disbursement, a portion of the funds paid by Port Orange for the purchase of the Property in the amount of **Ten Thousand and NO/100 Dollars ($10,000.00)** (the "Escrowed Deposits") with Escrow Agent.

ARTICLE 2
RELEASE FROM ESCROW

Section 2.1 Delivery and Release of Escrow Deposits. Upon Escrow Agent's receipt of the Port Orange's written confirmation to Escrow Agent (pursuant to Section 3.1 of this Agreement) of Seller's performance of the obligations set forth in the Post-Closing Occupancy Agreement to the satisfaction of Port Orange, the Escrow Agent shall act as set forth in Section 2.2. Upon Port Orange's written confirmation to Escrow Agent (pursuant to Section 3.2 of this Agreement) of Seller's breach as defined in Section 3.2, the Escrow Agent shall act as set forth in Section 2.3.

Section 2.2 Completion and Expiration. In the event that Port Orange confirms the Seller's performance of the obligations set forth in the Post-Closing Occupancy Agreement to the satisfaction of Port Orange, then the Escrow Agent shall deliver via wire transfer to Seller the Escrow Deposits. Upon Escrow Agent's completion of the requirements of Section 2.2 this Escrow Agreement shall expire.

Section 2.3 Breach and Expiration. In the event that Port Orange confirms Seller's breach as set forth in Section 3.2 of this Agreement, then Escrow Agent shall transfer the Escrow Deposit to City of Port Orange; Escrow Agent shall obtain a receipt for all deliveries. Upon Escrow Agent's completion of the requirements of Section 2.3 this Escrow Agreement shall expire.

Section 2.4 Disbursement into Court. Notwithstanding anything in this Agreement to the contrary, if at any time there shall exist any dispute between the parties with respect to the holding or disposition of any portion of the Escrow Deposits or any other obligation of the Escrow Agent hereunder, or if at any time the Escrow Agent is unable to determine, to the Escrow Agent's reasonable satisfaction the proper disposition of the Escrow Deposits or the Escrow Agent's proper actions with respect to the obligations hereunder, then the Escrow Agent may, in its reasonable discretion, take either or both of the following actions: (i) suspend the performance of any of its obligations under this Agreement until such dispute or uncertainty shall be resolved to the reasonable satisfaction of the Escrow Agent; and/or (ii) petition (by means of interpleader action or any other appropriate method) any court of competent jurisdiction in Volusia County, Florida for instruction with respect to such dispute or uncertainty, and pay into and/or deposit with such court all Escrow Deposits held by Escrow Agent, and deliver the Escrow Deposits for holding and disposition in accordance with the instructions of such court. In the event of an interpleader action, the Escrow Agent shall have the right to deduct from the Escrowed Deposits the filing fees and court costs associated with the filing of the interpleader lawsuit. In the event of a petition, Port Orange shall have full right, title and possession and may fully utilize the real property.

ARTICLE 3
DEFAULT BY SELLER

Section 3.1 Completion of the obligations of the Post Closing Agreement. If on or before the Termination Date set forth in the Post Closing Agreement, Seller has vacated the

Property in accordance with the terms and conditions of the Post Closing Agreement, the City shall provide the Escrow Agent (copying Seller) with written notice of the same.

Section 3.2 Default by Seller. The City shall notify the Escrow Agent in writing (with copy to Seller) in the event the Seller is in breach of the Post-Closing Agreement. The term "breach" shall be defined as the Seller or its successors and assigns failure to fulfill the obligations set forth in the Post Closing Agreement. Seller shall only be deemed to be in breach if they fail to fulfill the obligations set forth in the Post Closing Agreement. In the event of a breach by Sellers, the City shall have all the rights and remedies as set forth in the Post Closing Agreement, this Escrow Agreement and as otherwise prescribed by law.

ARTICLE 4
RIGHTS/RESPONSIBILITIES OF ESCROW AGENT AND RELEASE OF ESCROW AGENT

Section 4.1 Rights and Responsibilities of the Escrow Agent. The duties and responsibilities of the Escrow Agent shall be limited to those expressly set forth in this Agreement and it shall not be subject to, nor obligated to recognize any other agreement between, or direction or instruction of, any or all of the parties to this Agreement except as expressly provided herein.

Section 4.2 Release of Escrow Agent and Termination of this Agreement. Upon receipt by Escrow Agent of the notice from the City pursuant to Sections 3.1 or 3.2, hereinabove, Seller and City shall (within 3 business days thereafter) execute and deliver to Escrow Agent a release of the Escrow Agent from its obligations under this Agreement. Upon the Escrow Agent's receipt of said releases, this Agreement shall expire and be of no further force and effect.

ARTICLE 5
MISCELLANEOUS

Section 5.1 Notices. All notices, requests, consents, or other communications required or permitted under this Escrow Agreement shall be in writing and shall be deemed to have been duly given or delivered by any party: (a) when received by such party if delivered by hand, (b) upon confirmation when delivered by fax or email, (c) within one day after being sent by recognized overnight delivery service, or (d) within ten business days after being mailed by certified U.S. mail, postage prepaid, and in each case addressed as provided for in this Agreement. Any party by written notice to the other parties pursuant to this section may change the address or the persons to whom notices or copies thereof shall be directed. Upon the execution of this Escrow Agreement the Parties' addresses are set forth as follows:

Section 5.2 Amendment. This Agreement may be amended or modified only be an instrument in writing duly executed by the parties to this Agreement.

Section 5.3 Attorneys' Fees and Costs. In connection with any litigation arising out of the enforcement or interpretation of this Agreement, the prevailing party shall be entitled to recover from the other, all costs incurred, including reasonable attorneys' fees, including without limitation trial and appellate proceedings and in bankruptcy.

Section 5.4 Counterparts, Faxes and Emails. This Agreement may be executed in counterparts, and signatures on copies of this Agreement which are transmitted by facsimile or email shall be deemed originals for all purposes.

PUBLIC NOTICE

NOTICE IS HEREBY GIVEN of the commencement of a 30-day review period pursuant to Section 166.045, Florida Statutes prior to a public hearing to be held by the Port Orange City Council on September 5 , 2023 at 6:30 p.m., or as soon thereafter as possible, in the Council Chambers, City Hall, 1000 City Center Circle, Port Orange, Florida at which time the City Council will consider final acceptance of an option contract for the purchase of the following described real property:

5797 Devon Street, Port Orange, County of Volusia, State of Florida, more particularly described as:

Lot 1, Foxboro Subdivision, as per map recorded in Map Book 34, Page 117, of the Public Records of Volusia County, Florida.

A copy of this notice and the proposed contract are available for public inspection during regular business hours Monday through Friday from 8:00 a.m. to 5:00 p.m. in the City Clerk's office, first floor, City Hall, 1000 City Center Circle, Port Orange, Florida. All interested parties are invited to attend this meeting and voice comments regarding the transaction.
If a person decides to appeal any decision made by the City Council with respect to any matter considered at the above referenced meeting or hearing, he/she will need a record of the proceedings. For such purposes, it may be necessary to ensure that a verbatim record of the proceedings is made, which record includes the testimony and evidence upon which the appeal is to be based.
Note: If you are a person with a disability who needs any accommodation in order to participate in these proceedings, you are entitled, at no cost to you, to the provision of certain assistance. Please contact the City Clerk for the City of Port Orange, Florida, 32129, telephone number (386) 506-5563, within two working days after your receipt of this notice or five days prior to the meeting date. If you are hearing or voice impaired, contact the relay operator at 1-800-955-8771.
For further information about this transaction, please call (386) 506-5761, or contact Steve Parnell, Interim Public Utility Director, Dorothy L Hukill Annex, 1395 Duntawton Avenue, Port Orange, Florida. Office hours are Monday through Friday, 8:00 a.m. to 4:30 p.m.

CITY COUNCIL AGENDA ITEM

COUNCIL MEETING DATE 9/5/2023

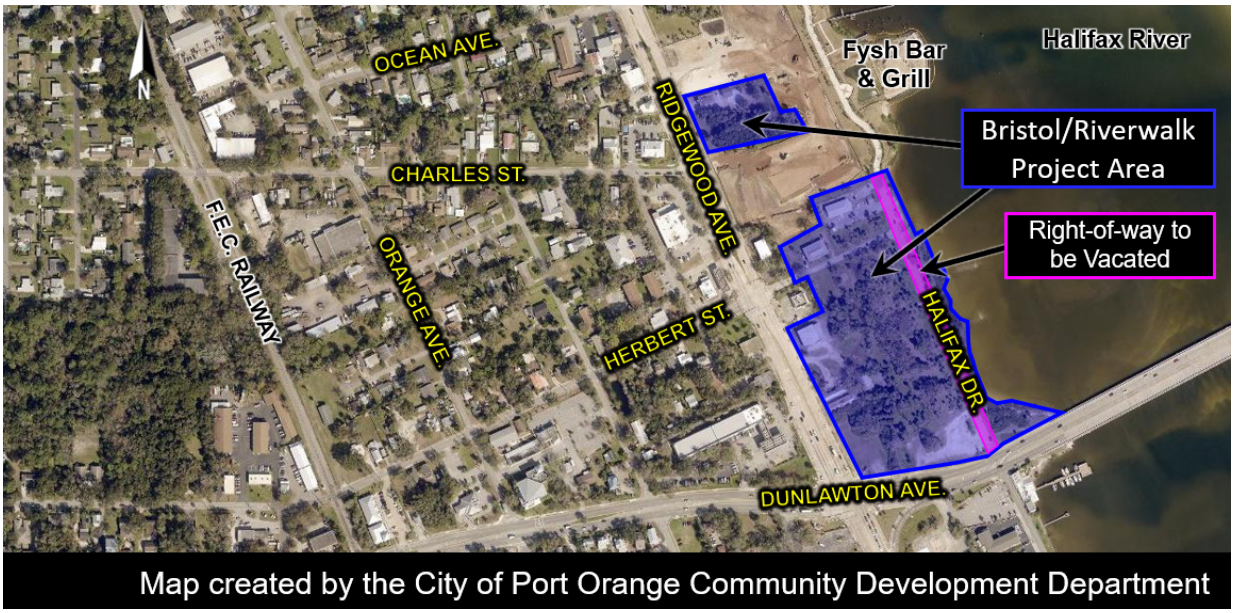
SUBJECT: (B15a) Resolution No. 23-32 - Vacation of a portion of the Halifax Drive right-of-way; subject to approval of the Riveryard Master Development Agreement

DEPARTMENT: Community Development

GOAL: 3 - Quality of Life; 4 - Economic Development

RECOMMENDED MOTION: Move to approve Resolution No. 23-32 - Vacation of a portion of the Halifax Drive right-of-way; subject to approval of Ordinance No. 2023-10, Riveryard Master Development Agreement; authorizing the Mayor and City Clerk to execute all necessary documents associated with the completion of this resolution.

SUMMARY: This request to vacate a portion of Halifax Drive from its current northern terminus to Dunlawton Avenue is associated with the proposed Bristol Development Group mixed-use project. The right-of-way is being vacated and the land will be part of the property being sold to the Bristol Development Group (Bristol) according to the Purchase Agreement between the City and Bristol. As part of their project, Halifax Drive will be rebuilt and remain a privately maintained road. As required by the Master Development Agreement (MDA) and Conceptual Development Plan (CDP) for the Bristol Development Group mixed-use project, an Access, and Utility Easement will be provided over the portions of Halifax Drive located in the project to allow the public to use the road and for the City to have access to public underground utilities. The vacation of the right-of-way will be effective at the time of Bristol closing on the rest of the property (+/- 10 acres at the northeast corner of Dunlawton Avenue and Ridgewood Avenue, the Daves Pest Control property, and the Arthaus property).



PRESENTER: Tim Burman

RESOLUTION NO. 23-32

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF PORT ORANGE, VOLUSIA COUNTY, FLORIDA VACATING A PORTION OF THE HALIFAX DRIVE RIGHT OF WAY SUBJECT TO CONDITIONS CONTAINED HEREIN, AUTHORIZING THE MAYOR AND CITY CLERK TO EXECUTE A QUIT-CLAIM DEED FOR THE VACATED PORTION OF HALIFAX DRIVE; PROVIDING FOR SEVERABILITY; PROVIDING FOR CONFLICTING RESOLUTIONS; AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, Community Redevelopment Agency for Port Orange Town Center ("CRA"), a public body corporate and politic established pursuant to Section 163.356 Florida Statutes, LLC and the City of Port Orange, a Florida Municipal Corporation ("City") are the record owners (collectively "Applicants") of lands adjacent to the portion of Halifax Drive proposed for the right-of-way vacation (the "Property"); the Applicants have applied for the vacation of the portion of Halifax Drive extending approximately +/- 1,000 feet, from its current northern terminus to Dunlawton Avenue.

WHEREAS, the Applicants have complied with the requirements of Section 177.101(4), Florida Statutes; and

WHEREAS, the City Council of the City of Port Orange has the power and authority to vacate a portion of a right of way under constitutional home rule powers, Chapter 166 and Chapter 177, Florida Statutes; and

WHEREAS, the City Council of the City of Port Orange has determined that the portion of the public right of way to be vacated is not required for vehicular use, and that adjoining and neighboring owners of property will not be adversely affected by the vacation of a portion of the public right of way; and it is in the best interest and welfare of the City of Port Orange and the citizens thereof to vacate and abandon this portion of the public right of way as set forth herein.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF PORT ORANGE, VOLUSIA COUNTY, FLORIDA;

SECTION 1. The above Recitals are incorporated by reference as if fully set forth into the body of this Resolution.

SECTION 2. The City Council of the City of Port Orange, Volusia County, Florida hereby declares that its public right-of-way interests in the portion of the right of way described herein is vacated and abandoned and the public right, title, and interest of the City of Port Orange and any public rights in and to the public right of way hereby vacated are renounced and disclaimed; the portion of the dedicated public right of way to be vacated is more particularly described on **"Exhibit A – Halifax Drive"** attached hereto and made a part hereof by reference ("Subject Right-of-Way").

SECTION 3. Upon the compliance with the conditions set forth in Section 6 of this Resolution No. 23-32, the Mayor and City Clerk are hereby authorized and directed to execute this Resolution No. 23-32 and quit-claim deeds for the afore-described property to effectuate the intent of this Resolution.

SECTION 4. If any section, subsection, sentence, clause, phrase or portion of this Resolution is for any reason held invalid or unconstitutional by any court, such portion or application shall be deemed a separate, distinct, and independent provision and such holding shall not affect the validity of the remaining portions or application thereof.

SECTION 5. That all resolutions made in conflict with this Resolution are hereby repealed.

SECTION 6. This Resolution shall be executed only in final preparation for recording and shall become effective immediately upon simultaneous recording of a certified copy of this Resolution No. 23-32 and the Quit Claim Deeds for the release of the Subject Right-of-Way, coincident with the occurrence of the closing on the property described in the *CONTRACT FOR SALE AND PURCHASE OF REAL PROPERTY* between the City, CRA, and Bristol Development Group, LLC, dated March 22, 2022, as amended.

CITY COUNCIL AGENDA ITEM

COUNCIL MEETING DATE 9/5/2023

SUBJECT: (B15b) Resolution No. 23-37 - Vacation of a portion of the Herbert Street right-of-way; subject to approval of the Riveryard Master Development Agreement

DEPARTMENT: Community Development

GOAL: 3 - Quality of Life; 4 - Economic Development

RECOMMENDED MOTION: Move to approve Resolution No. 23-37 - Vacation of a portion of the Herbert Street right-of-way; subject to approval of Ordinance No. 2023-10, Riveryard Master Development Agreement; authorizing the Mayor and City Clerk to execute all necessary documents associated with the completion of this resolution.

SUMMARY: This request to vacate a portion of Herbert Street from Halifax Drive to the east boundary of 113 Herbert Street is associated with the proposed Bristol Development Group mixed-use project. The right-of-way is being vacated and the land will be part of the property being sold to the Bristol Development Group (Bristol) according to the Purchase Agreement between the City and Bristol. As part of their project, Herbert Street will be rebuilt and remain a privately maintained road. As required by the Master Development Agreement (MDA) and Conceptual Development Plan (CDP) for the project, an Access, and Utility Easement will be provided over the portion of Herbert Street located in the project to allow the public to use the road and for the City to have access to public underground utilities. The vacation of the right-of-way will be effective at the time of Bristol closing on the rest of the property (+/- 10 acres at the northeast corner of Dunlawton Avenue and Ridgewood Avenue, the Daves Pest Control property, and the Arthaus property).

RESOLUTION NO. 23-37

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF PORT ORANGE, VOLUSIA COUNTY, FLORIDA VACATING A PORTION OF THE HERBERT STREET RIGHT OF WAY SUBJECT TO CONDITIONS CONTAINED HEREIN, AUTHORIZING THE MAYOR AND CITY CLERK TO EXECUTE A QUIT-CLAIM DEED FOR THE VACATED PORTION OF HERBERT STREET; PROVIDING FOR SEVERABILITY; PROVIDING FOR CONFLICTING RESOLUTIONS; AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, the City of Port Orange, a Florida Municipal Corporation ("City") is the record owner ("Applicant") of the lands adjacent to the portion of Herbert Street proposed for the right-of-way vacation (the "Property"); the Applicant has applied for the vacation of the portion of Herbert Street extending approximately +/- 185 feet, from the current terminus at the intersection with Halifax Drive to the eastern boundary of the property described as 113 Herbert Street (Parcel No. 6303-11-03-0050).

WHEREAS, the Applicant has complied with the requirements of Section 177.101(4), Florida Statutes; and

WHEREAS, the City Council of the City of Port Orange has the power and authority to vacate a portion of a right of way under constitutional home rule powers, Chapter 166 and Chapter 177, Florida Statutes; and

WHEREAS, the City Council of the City of Port Orange has determined that the portion of the public right of way to be vacated is not required for vehicular use, and that adjoining and neighboring owners of property will not be adversely affected by the vacation of a portion of the public right of way; and it is in the best interest and welfare of the City of Port Orange and the citizens thereof to vacate and abandon this portion of the public right of way as set forth herein.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF PORT ORANGE, VOLUSIA COUNTY, FLORIDA;

SECTION 1. The above Recitals are incorporated by reference as if fully set forth into the body of this Resolution.

SECTION 2. The City Council of the City of Port Orange, Volusia County, Florida hereby declares that its public right-of-way interests in the portion of the right of way described herein is vacated and abandoned and the public right, title, and interest of the City of Port Orange and any public rights in and to the public right of way hereby vacated are renounced and disclaimed; the portion of the dedicated public right of way to be vacated is more particularly described on **"Exhibit A – Herbert Street"** attached hereto and made a part hereof by reference ("Subject Right-of-Way").

SECTION 3. Upon the compliance with the conditions set forth in Section 6 of this Resolution No. 23-37, the Mayor and City Clerk are hereby authorized and directed to execute this Resolution No. 23-37 and quit-claim deeds for the afore-described property to effectuate the intent of this Resolution.

SECTION 4. If any section, subsection, sentence, clause, phrase or portion of this Resolution is for any reason held invalid or unconstitutional by any court, such portion or application shall be deemed a separate, distinct, and independent provision and such holding shall not affect the validity of the remaining portions or application thereof.

SECTION 5. That all resolutions made in conflict with this Resolution are hereby repealed.

SECTION 6. This Resolution shall be executed only in final preparation for recording and shall become effective immediately upon simultaneous recording of a certified copy of this Resolution No. 23-37 and the Quit Claim Deeds for the release of the Subject Right-of-Way, coincident with the occurrence of the closing on the property described in the *CONTRACT FOR SALE AND PURCHASE OF REAL PROPERTY,* between the City, CRA, and Bristol Development Group, LLC, dated March 22, 2022, as amended.

CITY COUNCIL AGENDA ITEM

COUNCIL MEETING DATE 9/5/2023

SUBJECT: (B15c) Temporary Construction Easement for property generally located at the Northeast Corner of Ridgewood Avenue and Dunlawton Avenue and 3641 Ridgewood Avenue (Dave's Pest Control Property); subject to approval of the Riveryard Master Development Agreement

DEPARTMENT: Community Development

GOAL: 4 - Economic Development

RECOMMENDED MOTION: Move to approve the temporary construction easement for parcels owned by the City and jointly owned with the Port Orange Town Center CRA, subject to the approval of Ordinance No. 2023-10; and authorize the Mayor and City Clerk to execute all necessary documents.

SUMMARY: The attached Temporary Construction Easements provide Bristol Development Group (Bristol) the right to access Port Orange Town Center CRA and City-owned property located at the northeast corner of Ridgewood Avenue and Dunlawton Avenue and at 3641 Ridgewood Avenue (Dave's Pest Control). The Temporary Construction Easement would give Bristol the ability to begin site development activities (install erosion control measures, begin site clearing and grading, and tree trimming and removal) associated with the development of their mixed-use project, in accordance with their approved Master Development Agreement and Conceptual Development Plan and site plan. The use of the Temporary Construction Easements by Bristol to begin site development activities is not anticipated to be needed until early 2024 at the earliest.

TEMPORARY CONSTRUCTION EASEMENT AGREEMENT

This Temporary Construction Easement Agreement ("Easement Agreement") is granted this _____ day of _____, 2023, by **CITY OF PORT ORANGE, FLORIDA**, a chartered municipal corporation ("Grantor"), whose address is 1000 City Center Circle, Port Orange, Florida 32129, to **Bristol Port Orange Partners, LLC,** a Florida limited liability company with a mailing address of 381 Mallory Station Road, Suite 204, Franklin, TN 37067 ("Grantee").

W I T N E S S E T H

That for and in consideration of the sum of One Dollar ($1.00) and other good and valuable consideration, receipt of which is hereby acknowledged, the Grantor hereby grants a TEMPORARY CONSTRUCTION EASEMENT ("Easement") over, across and upon real property owned by the Grantor located in Volusia County, Florida, and being more particularly described on **Exhibit A,** attached hereto, ("Easement Premises") for the purpose of demolition of existing site improvements and the construction of new site improvements pursuant to an approved site plan as evidenced by issuance of a Development Order (“Site Plan”).

The purpose of this Easement shall include the right of access to enter upon the premises hereinabove described and the adjoining lands of the Grantor, for the Grantee's demolition of existing improvements, environmental cleanup, and construction of required site improvements associated with the Site Plan.

TO HAVE AND TO HOLD the same unto said Grantee and its successors and assigns, together with the right to enter upon the said land, with all such other incidents which said Grantee may deem necessary or convenient in connection therewith.

Grantee covenants and agrees that upon completion of the construction of required site improvements, the Grantee shall:

a. Repair all damage within the Easement Premises caused by the ingress and egress of construction equipment; and

b. Level and re-sod any unpaved portions of the Easement Premises disturbed during the construction process; and

c. Indemnify and hold harmless the Grantor for and from any loss, liability, cost or expense incurred by Grantor as a result of Grantee's exercise of its right hereunder, including, without limitation, any personal injury claims brought against Grantor in connection with Grantee's utilization of the rights granted pursuant to this Easement.

It is expressly understood and agreed that the terms, covenants and conditions of this Easement Agreement shall be and constitute covenants running with and binding upon the Easement Premises and shall constitute an obligation on the Easement Premises regardless of title or ownership thereof and regardless of any future change which may take place therein.

Unless otherwise extended by written agreement of the Parties, this Easement Agreement shall automatically terminate upon the earlier of (1) the closing on the property subject of the *Contract for Sale and Purchase of Real Property, dated March 22, 2022*, as amended, (2) eighteen (18) months from the date of the official Pre-Construction Meeting, or (3) twenty-four (24) months from the date of issuance of the Development Order, this Easement Agreement shall be of no further force or effect and the parties shall have no further obligation or liability to each other hereunder.

TEMPORARY CONSTRUCTION EASEMENT AGREEMENT

This Temporary Construction Easement Agreement ("Easement Agreement") is granted this _____ day of _____, 2023, by the **CITY OF PORT ORANGE, FLORIDA**, a Florida municipal corporation whose address is 1000 City Center Circle, Port Orange, Florida 32129, and **COMMUNITY REDEVELOPMENT AGENCY FOR PORT ORANGE TOWN CENTER,** (CRA), a public body corporate and politic established pursuant to 163.356, Florida Statutes, of the County of Volusia in the State of Florida, whose address is 1000 City Center Circle, Port Orange, Florida 32129, ("Grantor") to **Bristol Port Orange Partners, LLC,** a Florida limited liability company with a mailing address of 381 Mallory Station Road, Suite 204, Franklin, TN 37067 ("Grantee").

W I T N E S S E T H

That for and in consideration of the sum of One Dollar ($1.00) and other good and valuable consideration, receipt of which is hereby acknowledged, the Grantor hereby grants a TEMPORARY CONSTRUCTION EASEMENT ("Easement") over, across and upon real property owned by the Grantor located in Volusia County, Florida, and being more particularly described on **Exhibit A,** attached hereto, ("Easement Premises") for the purpose of demolition of existing site improvements and the construction of new site improvements pursuant to an approved site plan as evidenced by issuance of a Development Order (“Site Plan”).

The purpose of this Easement shall include the right of access to enter upon the premises hereinabove described and the adjoining lands of the Grantor, for the Grantee's demolition of existing improvements, environmental cleanup, and construction of required site improvements associated with the Site Plan.

TO HAVE AND TO HOLD the same unto said Grantee and its successors and assigns, together with the right to enter upon the said land, with all such other incidents which said Grantee may deem necessary or convenient in connection therewith.

Grantee covenants and agrees that upon completion of the construction of required site improvements, the Grantee shall:

a. Repair all damage within the Easement Premises caused by the ingress and egress of construction equipment; and

b. Level and re-sod any unpaved portions of the Easement Premises disturbed during the construction process; and

c. Indemnify and hold harmless the Grantor for and from any loss, liability, cost or expense incurred by Grantor as a result of Grantee's exercise of its right

hereunder, including, without limitation, any personal injury claims brought against Grantor in connection with Grantee's utilization of the rights granted pursuant to this Easement.

It is expressly understood and agreed that the terms, covenants and conditions of this Easement Agreement shall be and constitute covenants running with and binding upon the Easement Premises and shall constitute an obligation on the Easement Premises regardless of title or ownership thereof and regardless of any future change which may take place therein.

Unless otherwise extended by written agreement of the Parties, this Easement Agreement shall automatically terminate upon the earlier of (1) the closing on the property subject of the *Contract for Sale and Purchase of Real Property, dated March 22, 2022*, as amended, (2) eighteen (18) months from the date of the official Pre-Construction Meeting, or (3) twenty-four (24) months from the date of issuance of the Development Order, this Easement Agreement shall be of no further force or effect and the parties shall have no further obligation or liability to each other hereunder.

EXHIBIT A

(Parcel Nos. refer to Legal Description in Title Commitment with date of issue being July 15, 2022)

PARCEL 2:

Lots 2 through 4, ASSESSOR'S PLAT OF NORTH 415 FEET OF LOT 2, SECTION 3, TOWNSHIP 16 SOUTH, RANGE 33 EAST, OR MRS. DANIEL'S ADDITION TO PORT ORANGE, according to plat thereof recorded in Map Book 3, Page 29, Public Records of Volusia County, Florida, together with any and all riparian rights appertaining thereto, and being previously described as follows:

Commencing at a point 275 feet from the Southwest corner of Lot 9, Block 1, of William Cannon's Subdivision of a part of United States Lot 2 in Section 3, Township 16 South, Range 33 East, per map recorded in the Office of the Clerk of the Circuit Court of Volusia County, Florida, aforesaid, running thence Northerly on a line parallel with the street on the West side of aforesaid Lot 9, a distance of 66 feet, thence Easterly on a line parallel with Herbert Street and also parallel with the Southern boundary of the aforesaid Lot, to the bank of the Halifax River, thence Southerly following the meandering of the West bank of said river a distance of 66 feet, more or less, to the North side of said Herbert Street, thence Westerly along the North side of Herbert Street a distance of 225 feet more or less, to the Point of Beginning; LESS AND EXCEPT road right-of-way.

AND

Tract I:
Commencing at low water mark on the West bank of the Halifax River on Lot 2 of Cannon's Survey of Section 3, Township 16 South, Range 33 East, 81 feet from the center of Herbert Street North, running on a line Westerly to a stake in the Savanna, the Northwest comer of lands formerly deeded to W.N. Voorhies and wife, 200 feet, more or less; thence running Northerly parallel 60 feet to a stake; thence Easterly on the line of lot sold by Harriett E. Seely to Carpenter to low water mark on the bank of said Halifax River 200 feet, more or less thence 60 feet to the point of beginning; this being intended to cover same description as contained in deed from Harriet E. Seely to Morris T. Stockman, recorded in Deed Book 70, Page 174 and being the same land as conveyed by C.L. Burgess and Mattie H. Burgess, his wife to Edmund Kent by Warranty Deed recorded in Deed Book 115, Page 76, Public Records of Volusia County, Florida.

Tract 2:
Commencing at a point marked by a stake 286 feet from the North line of Herbert Street, Port Orange, on extended lines oflots owned by R.D. Meedham and M.J. Stockman, thence running Easterly from the state, parallel with Herbert Street, 220 feet, more or less, to lower water mark of the Halifax River; thence South at right angles with aforesaid Easterly line 60 feet and including the shore of the Halifax River at low water mark; thence West and parallel with Herbert Street aforesaid 220 feet, more or less, and intersecting the line from Herbe1t Street; thence Northerly 60 feet to the place of beginning; containing one-third acre, more or less, being further described as known as a part of and situate near the Southeast corner of U.S. Lot 2, Section 3, Township 16 South, Range 33 East. The property intended to be conveyed being the same property

heretofore conveyed by Frances E. DuBois to N. Dwight Harris and Jane G. Harris, his wife, by warranty deed dated May 12, 1924 and recorded in the office of the Clerk of Circuit Court in and for Volusia County, Florida in Deed Book 130, Page 60.

PARCEL 7:

Lot 5 and the East 1/2 of Lot 4, Block "B", WILSON'S MAP OF PORT ORANGE, according to the plat thereof recorded in Map Book 1, Page 154, Public Records of Volusia County, Florida, together with any and all riparian rights appertaining thereto, and being previously described as:

The East 1/2 of Lot 5, Block "B", WILSON'S MAP OF PORT ORANGE, according to the plat thereof recorded in Map Book 1, Page 154, Public Records of Volusia County, Florida.

And

The West 1/2 of Lot 5, Block "B", excepting the Westerly 15 feet thereof which was used for the widening of Ridgewood A venue, WILSON'S MAP OF PORT ORANGE, according to the plat thereof recorded in Map Book 1, Page 154, Public Records of Volusia County, Florida.

And

The East 1/2 of Lot 4, Block "B", WILSON'S MAP OF PORT ORANGE, according to the plat thereof recorded in Map Book I, Page 154, Public Records of Volusia County, Florida.

CITY COUNCIL AND COMMUNITY REDEVELOPMENT AGENCY FOR PORT ORANGE TOWN CENTER

AGENCY MEETING DATE: 8/15/2023

SUBJECT: (C3) First Reading - Ordinance No. 2023-10 - Riveryard Master Development Agreement and Conceptual Development Plan

DEPARTMENT: Community Development

RECOMMENDED MOTION: CRA Motion: Move to recommend approval of the proposed Riveryard Master Development Agreement and Conceptual Development Plan, as set forth in Ordinance No. 2023-10, consistent with the Port Orange Town Center Plan, as approved by the CRA and adopted by the City Council, inclusive of all amendments to date; subject to City Council approval of the right-of-way vacation of portions of Halifax Drive and Herbert Street on their September 5, 2023 agenda; and authorize CRA Chair and Agency Clerk to execute all necessary documents.

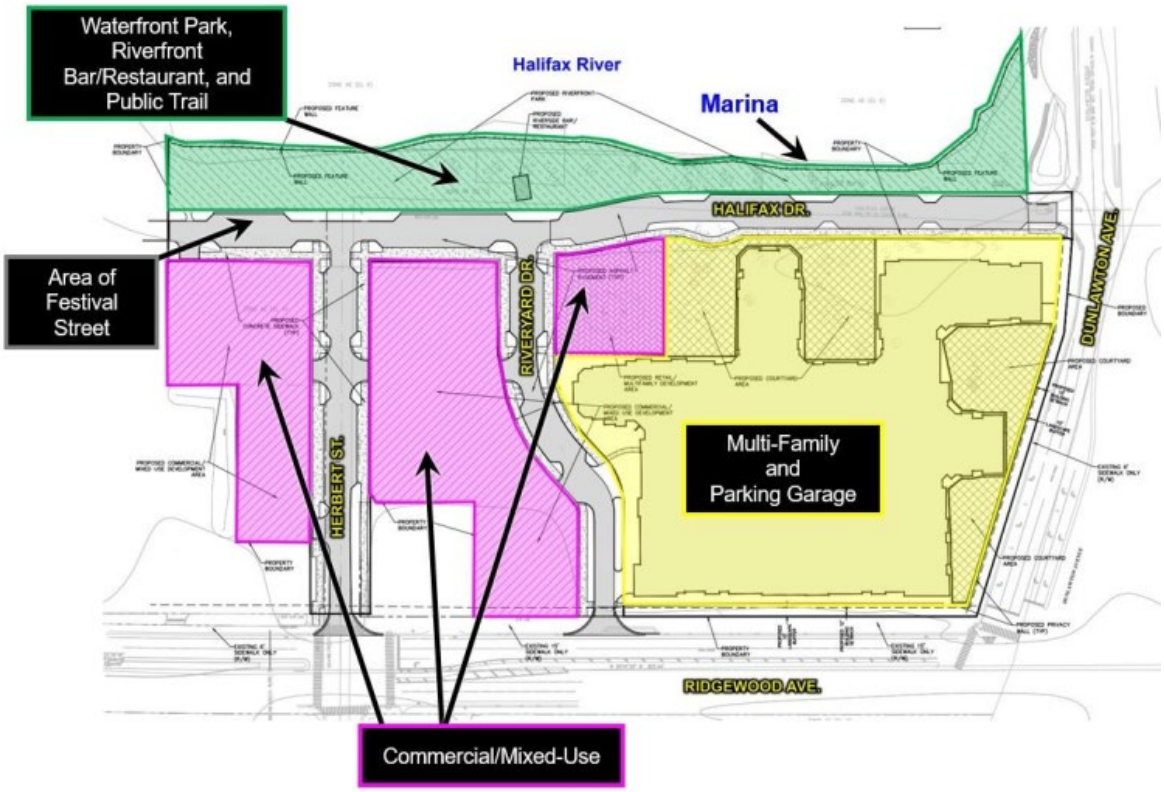
City Council Motion: Move to approve Ordinance No. 2023-10 approving the Riveryard Master Development Agreement and Conceptual Development Plan, subject to the approval of the right-of-way vacation of a portion of Halifax Drive and Herbert Street on their September 5, 2023 agenda; and authorize Mayor and City Clerk to execute all necessary documents.

SUMMARY: PLANNING COMMISSION ACTION (7/27/23): Recommended Approval (6-0)

The Bristol Development Group is requesting approval of the Riveryard Master Development Agreement (MDA) and Conceptual Development Plan (CDP) for their transformative mixed-use project along the Halifax River that includes a mixture of commercial, residential, and entertainment uses. The property that is part of the MDA and CDP includes the ±11 acres located at the northeast corner of Dunlawton Avenue and Ridgewood Avenue, including a portion of the Halifax Drive right-of-way and a portion of the Herbert Street right-of-way and the ±1.4-acre former Dave's Pest Control property located in front of the Fysh Bar and Grill restaurant.

Conceptual Rendering of the Proposed Mixed-Use Building and Waterfront Park

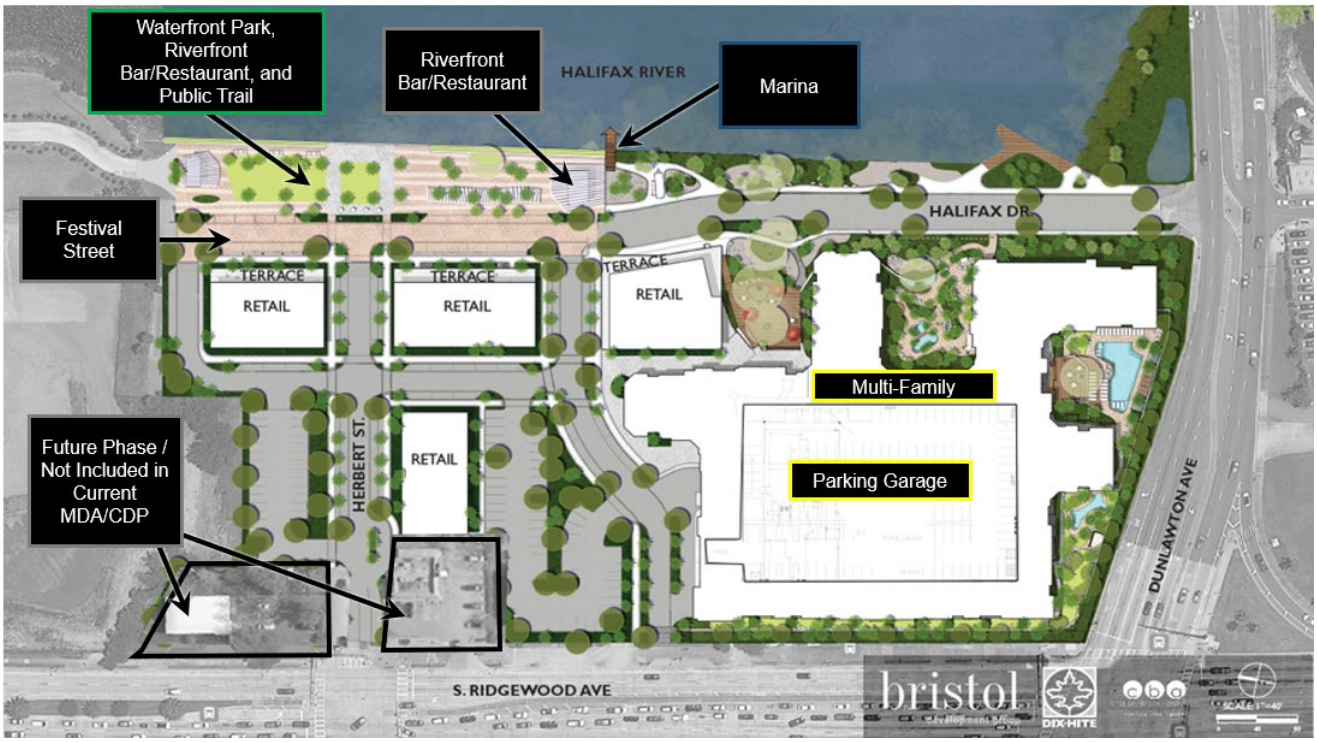
The proposed MDA and CDP create the framework for the development of the transformative mixed-use project that will include a waterfront park (performance pavilion, trails, swings/benches, etc.), riverfront bar/restaurant, ±30,000 square feet of commercial space, hotel (optional), multi-family building wrapped around a parking garage, festival street, public parking, private streets with on-street parking, associated infrastructure (water, sewer, and drainage) improvements, and an overflow temporary grass parking on the former Dave's Pest Control property.



Riveryard Conceptual Development Plan

The Riveryard MDA and CDP is a zoning document that establishes permitted uses and certain development requirements. The MDA and CDP provide a flexible approach for unique and innovative development projects which would otherwise not be permitted by the Land Development Code (LDC). The flexibility from the standard development requirements in the LDC is offered to create a better-quality project with greater benefits for the public and the developer. The current standard development requirements in the LDC were designed so individual commercial or multi-family projects, located on large lots along major roadways, are built to the standards of Port Orange and include large right-of-way buffers, surface parking lots, foundation and parking lot landscaping, building separation/setbacks, limited height, etc. The Riveryard mixed-use project is intended to be a compact, pedestrian-friendly project that combines commercial, residential, recreation, and entertainment uses. In order to develop the Riveryard project as proposed, flexibility from the current standard development requirements in the LDC is needed to allow the development of the Bristol mixed-use project that includes a compact building layout, mixture of uses, open space, recreation and entertainment opportunities, rights-of-way that include landscape, travel lanes, parking,

outdoor space, and sidewalks to encourage pedestrian movement throughout the project, and alternative parking space design and management. If approved, the MDA and CDP will provide the regulatory framework and standard development requirements for the development of the Riveryard mixed-use project. The MDA and CDP do not approve any specific development itself but rather establish parameters for how the property can be developed.



Project Layout Rendering

Specific site development requirements listed in the MDA and LDC, such as the stormwater infrastructure, type and location of trees and shrubs in the landscape buffers, location and size of the water and sewer lines, roadway and sidewalk surfaces, and other development requirements are finalized with the site plan. The site plan is typically a 30 to 60-page set of technical documents that are signed and sealed by a licensed engineer and contain extensive engineering and construction details. The site plan for the Riveryard project is required to be designed to meet the requirements of the LDC and the proposed MDA and CDP.

According to the MDA, two public access easements will be provided for the City over the Waterfront Park and the Park Walkway that will allow the public right of access to the Waterfront Park and Park Walkway. The easement over the Waterfront Park will include conditions to restrict access during the construction of the park, allowing for the construction of improvements, and the ability to adopt reasonable regulations to assure that activities by the public do not interfere with normal business operations. These easements will be recorded before the issuance of the first Certificate of Completion or Certificate of Occupancy for the project.

The proposed MDA and CDP have been reviewed by the Staff Development Review Committee (SDRC) and have been determined to be consistent with the City's Comprehensive Plan, the Port Orange Town Center (POTC) CRA Plan, and the LDC about

density and intensity, permitted uses, and overall design.

The next items scheduled to be completed for this project include:

1. Economic Incentive Agreement (EIA) with the City of Port Orange - Per the current Purchase and Sales Agreement, the EIA with the City is to be completed by December 2023.
2. Economic Incentive Agreement (EIA) with Volusia County - Per the current Purchase and Sales Agreement, the EIA with Volusia County is to be completed by December 2023.
3. Discretionary Review of the Site Plan for Phase 1 by City Council - Per the current Purchase and Sales Agreement is to occur by December 2023 with the ability to extend to March 2023. The discretionary review is for the City council to review the layout for the project to ensure the location of the buildings, roadway network, and waterfront park is consistent with their vision for the project.
4. Approval of the Site Plan for Phase 1 by the Staff Development Review Committee (SDRC) - Per the current Purchase and Sales Agreement is to occur by December 2023 with the ability to extend to March 2023.
5. Sale of the Riverwalk Property - Per the current Purchase and Sales Agreement, closing is to occur no later than March 31, 2024 with the ability to extend closing to no later than May 30, 2024.

The Staff Report, Master Development Agreement, and Conceptual Development Plan are attached for additional information.

ORDINANCE NO. 2023-10

AN ORDINANCE OF THE CITY OF PORT ORANGE, VOLUSIA COUNTY, FLORIDA, APPROVING THE RIVERYARD MASTER DEVELOPMENT AGREEMENT AND CONCEPTUAL DEVELOPMENT PLAN; FOR APPROXIMATELY 12.4 ACRES LOCATED WITHIN THE PLANNED COMMUNITY-PORT ORANGE RIVERWALK (PC-R) DISTRICT; PROVIDING FOR REPEAL OF CONFLICTING ORDINANCES; PROVIDING FOR SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, the City and Developer desire to enter into the Riveryard Master Development Agreement ("MDA") and Conceptual Development Plan ("CDP"); and

WHEREAS, the Developer submitted a request to the Planning Commission to approve the Riveryard Master Development Agreement ("MDA") and Conceptual Development Plan ("CDP"); and

WHEREAS, a public hearing was held following public notice as prescribed by ordinance; and

WHEREAS, the Planning Commission has by majority vote recommended approval of the proposed Riveryard Master Development Agreement ("MDA") and Conceptual Development Plan ("CDP"); and

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF PORT ORANGE, VOLUSIA COUNTY, FLORIDA:

Section 1. The City Council of the City of Port Orange does hereby approve the Riveryard Master Development Agreement ("MDA") and Conceptual Development Plan ("CDP"), attached hereto as **Exhibit "1"**.

Section 2. The Mayor and City Clerk are hereby authorized to execute said MDA.

Section 3. All ordinances or parts of ordinances in conflict with the provisions of this ordinance are hereby repealed to the extent of such conflict.

Section 4. If any provision of this ordinance or the application thereof to any person or circumstance is held invalid, the invalidity shall not affect other provisions or applications of this ordinance which can be given effect without the invalid provision or application, and to this end the provisions of this ordinance are declared severable.

Section 5. This ordinance shall become effective immediately upon adoption.

RIVERYARD
MASTER DEVELOPMENT AGREEMENT

The **CITY OF PORT ORANGE, FLORIDA**, a Florida municipal corporation and Port Orange Town Center Community Redevelopment Agency, a special purpose district unit of government organized under Chapter 163, Part III, the Law of Florida both located in Volusia County, Florida (collectively "City"), Joan L. Sheridan, Trustee of the Joan L. Sheridan Revocable Trust, JLS888, Inc., Ralph & Tammy Heotzler and Bristol Port Orange Partners, LLC, a Florida limited liability company (collectively "Owners") and Bristol Port Orange Partners, LLC, a Florida limited liability company in its capacity as the developer of the Property ("Developer"), hereby agree and covenant, and bind their heirs, successors, and assigns, as follows:

1. PROPERTY DESCRIPTION AND OWNERSHIP.

A. The property subject to this Agreement consists of approximately 12.43 +/- acres of real property ("Property") and is described in Exhibit "A", attached hereto and by reference made a part hereof.

B. The Property is under the sole ownership of City and Owners and under contract (the "Riverwalk Purchase & Sale Agreement") for purchase by Developer. All references herein to "Developer" shall be deemed to refer to Bristol Port Orange Partners, LLC or their respective successors in ownership interest of the Property.

2. EXHIBITS.

The Exhibits listed below are by reference made a part hereof, and copies or reduced size copies are attached hereto. Full-sized copies of the Exhibits shall be retained by the City Clerk and shall be controlling in case of any ambiguity in the Exhibits. In the event of a conflict between the graphic illustrations of any Exhibit and the textual provisions of this Agreement, the textual provisions shall control.

Exhibit A: Property Legal Description and Survey, date certified _____, prepared by _____.

Exhibit B: Conceptual Development Master Plan, rev. date _____, prepared by _____.

Exhibit C: Streetscape Guidelines Exhibit

Exhibit D: Riverwalk Architectural Styles Exhibit

Exhibit E: Form Extension of Time Approval Letter

3. DEVELOPMENT PLAN.

A. Owner has designated the Property as the "**Riveryard Master Development**".

B. The Property will be developed under the **Planned Community – Port Orange Riverwalk (PC-R)** zoning district pursuant to the City's Land Development Code (LDC). Development shall be controlled by the LDC and the terms and provisions of this Agreement. In the event of a conflict between this Agreement and the LDC or other ordinances, this Agreement shall control.

C. Exhibit B (Conceptual Development Plan) generally depicts the proposed layout of land uses, parking areas, streets, driveways, access points, stormwater management features, and other potential features or improvements to the Property.

D. LOT DEVELOPMENT CRITERIA. The following lot development criteria shall apply to the Property.

(1) The following modified lot development criteria shall apply to commercial and multifamily development throughout the Property:

(a) Maximum overall residential density: a maximum density of 460 units (37 units/acre).
(b) Maximum building height: 105 feet, excluding architectural embellishments or design elements.
(c) Minimum lot area: 3,000 sq. ft.
(d) Minimum lot width: N/A
(e) Minimum lot depth: N/A
(f) Minimum Building Setbacks:
  (i) Dunlawton: 12'
  (ii) Ridgewood: 12'
  (iii) External to boundary of the Property: 5'
  (iv) Internal to boundary of the Property: Seawall 5', Halifax Drive 5', Herbert Street 5', and All other internal boundaries 0'
(g) Minimum living area/dwelling unit: 500 sq. ft.
(h) The base flood elevation (BFE) for the Property will be determined by the FEMA Flood Insurance Rate Map. The finished floor elevation (FFE) shall be a minimum elevation of 7.

4. CONFORMANCE WITH COMPREHENSIVE PLAN.

A. The City has determined that the Property is suitable in size, location, and character for the uses proposed, and that the uses proposed are consistent with the City's Comprehensive Plan.

5. PERMITTED USES.

All uses permitted within the PC-R Mixed Use district shall be permitted, along with the following additional uses within the Property:

Bike, kayak & other recreational equipment rentals
Banks
Office (permitted on any floor)
Animal grooming or wellness, pet day care (no overnight stays)
Game/recreation facilities
Health/exercise clubs
Brewery
Amphitheater
Multifamily dwellings and Townhomes
Food Truck Court/Parking – allowed in the area designated on the CDP as commercial, private roadway, and waterfront park.

Accessory and temporary uses are permitted within the site that are incidental to the principal uses outlined herein and are part of the scale or scope of everyday operations. Temporary uses, such a social programming, art displays, exercise classes, and similar activities targeted towards activation of the Property shall be permitted without the need for formal Special Event review by the City, so long as the event does not contemplate any of the following: (1) Affects the public roadway network and area(s) beyond the City of Port Orange; (2) Requires one or more public roadway closures; (3) Has hours of operation extending beyond 11:00 p.m.; or (4) Extends for a period over twenty-four hours.

In the areas illustrated on the CDP, temporary staging and parking shall be permitted as an interim use until redevelopment of the portion of the property used for such use.

6. INFRASTRUCTURE.

A. ROADS. Roadways may be comprised of asphalt, concrete (stamped or colored permitted), or paver. Sidewalks at least 4' wide shall be constructed on private streets, and may be comprised of concrete, paver, wood composite materials, or other similar materials, with a minimum sidewalk width of 12' along Ridgewood Avenue with the approved white walklights for the Riverwalk District every 100' and a minimum width of 6' along Dunlawton Avenue. Sidewalks shall provide pedestrian connectivity to major thoroughfares. Internal roadways providing interconnectivity between parcels shall be developed at a minimum width of 20' for two-way traffic (excluding curb). On-street parking facilities supporting the development may be constructed as a part of the private roadways within the development. Roadways may be located within standalone tracts, at the determination of the

Developer and approved under the City's permitting process. Alternate standard, decorative, and lighted bollards deviating from City standards shall be permitted. Lighting for roadways and parking areas shall permit alternative decorative and standard street lights and walkway lights deviating from City standards, except that street lights on Ridgewood Avenue will match City standards for the adjacent section of Ridgewood Avenue. Final fixture selections for bollards and lighting shall be submitted to City for review and approval during the site plan review.

B. WASTE MANAGEMENT. Waste Management within the project may be managed with a central trash facility with trash compactors sized sufficiently to accommodate the entire project. Trash from all buildings within the site will be collected in trash receptacles located within buildings or in screened areas adjacent to buildings. These trash receptacles will be collected by a valet trash service during evening hours and taken to the central trash facility. The central trash facility will be served by a private waste management service, with pickup frequency sufficient to service the level of waste being created within the project.

C. WATERFRONT PARK/COMMUNITY GREEN.

(1) The project shall include a community waterfront park with a minimum size of 55,000 square feet along the waterfront boundary of the Property that is subject to an easement to the City allowing reasonable use and enjoyment – this area is intended to create a centralized social interaction space for residents and visitors that serves as an organizing element and focal point for the heart of the project, including a continuous path from the northern to southern boundaries of the park (the "Waterfront Park"). The space is intended to be activated by various events for residents and visitors, including programming by the Developer. The Waterfront Park shall contain a continuous walkway with a minimum of 8-feet in width from the northern to the southern boundaries of the Property (the "Park Walkway"), which shall be subject to a public access easement as set forth herein. The Waterfront Park may include a commercial bar or food service area and may also include a dedicated parking spaces for one or more food truck.

(2) In furtherance of the public access to the riverfront, the Developer will provide two public access easements over the portions of the Property described herein as the Waterfront Park and the Park Walkway. More specifically, the Developer will provide a fully executed and recordable easement for the public's permanent right of access to, over and across the portion of the Property described herein as the Park Walkway in a form agreed to by the Parties, to be recorded immediately upon closing on the portion of the Property owned by the City. In addition, the Developer will provide a fully executed and recordable easement for the public's permanent right of access to, over, and across the portion of Property described herein as the Waterfront Park along the western boundary of the Property from the southern boundary to the northern boundary of the Property, subject to the following conditions and restrictions reserved to the Grantor as set forth in the easement document, (a) the right to block public access to the easement lands during the construction of the improvements or other forms of permitted construction activity over said property; (b) the right to adopt reasonable regulations to assure that activities exercised by the public do not interfere with normal business operations including the Grantor's right to request trespass, and request enforcement of all other local, state and federal laws; (c) the right to use the easement lands for Grantor's use and construction of improvements thereon

so long as such use and improvements do not unreasonably interfere with the non-exclusive easement rights granted herein; and (d) the right to run utilities and irrigation piping under the easement lands, in a form agreed to by the Parties, to be recorded immediately upon closing on the portion of the Property owned by the City. The easement document shall be accompanied by consent and joinder from all entities that encumber the lands subject to this easement instrument. The easement shall include the City's right of self-help if Grantor and its successors and assigns fail to maintain said access as granted and prescribed in the easement document; and

D. PARKING. Parking shall be developed consistent with the LDC, except as modified herein.

(1) Multifamily development may include multi-level garages, one-car garages, two-car garages and surface parking and shall be developed at a minimum ratio of 1.3 parking spaces per dwelling unit. Parking for multifamily residential uses may be provided through the use of tandem garage/parking spaces so long as the tandem spaces are assigned for the exclusive use of one residential unit.

(2) Commercial uses within the Property may be permitted at a ratio of 5 spaces per 1,000 square feet.

(3) No additional parking shall be required for Food Truck or Marina uses, as this use is intended to be supportive of other proposed uses and transitory in nature.

(4) Of the required parking provided for the Property, a minimum of 100 surface spaces and 200 garage spaces will be set aside for use by the public, although such spaces shall count towards the minimum required parking standards for individual use types. The Property shall be subject to the following modified standards for parking details:

(5) Surface Parking dimensions. The minimum parking dimensions on site shall be as follows: 90 Degree Spaces measuring 9' x 18', Parallel Spaces measuring 8' x 20'. Parking areas shall have a minimum drive aisle width of 22'. Compact spaces are allowed up to 10% of total required spaces and shall be a minimum of 8'-0" x 16'-0". Angled parking spaces are allowed except on Halifax Drive and Herbert Street and shall be 45 degree angle, 9'0" min. width from side to side, 19'1" min. depth from curb to back of space, and 12'9" min. width as measured along the curb from space to space.

(6) Garage Parking dimensions shall be as follows:

Parking Space: 9'-0" wide x 18'-0" deep
Drive Aisles: 24'-0" wide minimum

E. LANDSCAPING. Except as otherwise provided herein, landscaping shall be developed consistent with the LDC. The Property shall not be required to provide perimeter buffers between different use categories within the Master Development boundary, so long as perimeter landscaping requirements along the boundary of the MDA have been met. Clustering of typical landscape requirements shall be permitted so long as the net total landscape material as required herein is still met,

including requirements related to interior parking lot and parking lot islands. The Property shall be subject to the following modified standards:

(1) Tree Preservation standards set forth in Chapter 9, Article II of the City's LDC shall be modified for the property so that the following alternative requirements are met: Effort shall be made to preserve trees in naturalized area such as along the Halifax River. Effort to preserve trees across the site shall not inhibit the desired site plan. Due to the urban development character, a total of 1 tree for every 5,000 SF of site area shall be required. Specimen tree and buffer tree preservation requirements in the LDC shall not apply within the Property.

(2) Landscape materials shall be designed to display variety and color by utilizing primarily native species that provide variation in color, texture, habit, and flowering.

(3) Landscape beds shall not be required to be organic, curvilinear, or clustered to simulate a natural rather than man-made appearance.

(4) Visual screening of the multi-family building at street level along Ridgewood Avenue and Dunlawton Avenue shall consist of either opaque decorative fencing, wall, living wall (vegetation), or a combination of the three (i.e., a 4' fence and hedge on top of a 2' retaining wall). So long as the overall height is a minimum of 6' and a maximum of 8' of combined elements measured from the bottom of the wall, the requirements of the visual screening shall be met. Fencing or walls shall be coordinated with landscaping to limit the impact of higher fence heights on the visual view of the site.

(5) Maximum fence height: 8' (such height shall not include the portions of a retaining wall that is located sub-grade)

(6) In parking area terminal islands, one shade tree or two understory trees shall be required in each terminal island, regardless of size.

(7) In parking area interior islands, one shade tree or two understory trees shall be required for every 400 square feet of interior landscaped area located in interior islands, or fraction thereof.

(8) In the transfer of interior parking landscape areas to the perimeter of the property, a minimum of one shade tree or two understory trees shall be required for every 400 square feet of interior landscape area, or fraction thereof.

(9) Foundation plantings are required around all buildings but may be located further than 25' from the foundation of the building or may be exempt according to the following:

(a) No foundation planting shall be required for non-residential use buildings within the development, although Streetscape planting requirements shall be applicable to buildings non-residential use adjacent to a private right-of-way, as illustrated on Exhibit C - Streetscape Guidelines Exhibit.

(b) No foundation planting shall be required for any building or sign in the Waterfront Park.

(c) No foundation plantings shall be required for a multi-family building adjacent to hardscape elements (outdoor dining, entry plazas, pool decks, amenity spaces, private yards, etc.).

(10) No understory or shade trees shall be required at the perimeter of outdoor activity areas, such as community pools and other recreational features, except shrubs, screen wall or fence between any outdoor activity areas and a right-of-way to provide sufficient screening of the outdoor activity areas from a right-of-way.

(11) For landscaping adjacent to fences, walls, or dumpster enclosures, the shade tree requirement shall be waived, although understory tree requirement shall still apply, unless prohibited by the terms of any public utility easements.

(12) Irrigation shall not be required to have 100% coverage. Areas of drought-tolerant native planting may have temporary irrigation systems with tubing laid out on the ground surface to irrigate during an establishment period of a minimum of 3 months, after which point the temporary irrigation may be removed. Application of this provision shall require signed approval by the project landscape architect in each specific case.

(13) Coordination of landscaping shall be addressed at Site Plan; however, the following perimeter landscaping strips shall be required for the Property's overall periphery, and may include improvements such as retaining walls, easements, utilities, driveway access points, and sidewalks and shall include two (2) shade trees, two (2) understory trees, and 20 shrubs per 100 linear feet:

(a) Dunlawton Avenue: 10'
(b) Ridgewood Avenue: 10'
(c) All other External Perimeters of Property: 5'

7. MARINAS. Development of marina facilities shall be permitted within the Property in accordance with the City of Port Orange, Florida Land Development Code, any applicable county, state, and federal law and subject to the following standards:

A. The marina use may include public recreational facilities and uses, such as recreation areas, kayak launches, water taxi service and drop-off, and similar areas of public activation for the space.

B. Overnight stays, not exceeding a maximum term of seven (7) days per stay, shall be permitted within the marina area.

C. The marina shall not be required to provide pump out facilities.

D. Finger pier width may range from 4'-8'.

E. Any wetland or mangrove impacts will be subject to applicable state and/or federal permitting, whose determination on permitted activities and impacts shall control.

8. ARCHITECTURAL AND DESIGN STANDARDS.

A. All buildings and accessory structures constructed within the Property shall be developed in compliance with the requirements of this section, and with the applicable provisions of the LDC relating to architectural standards, where they do not conflict with the provisions of this section.

B. All of the following requirements shall be met within the Property:

(1) All buildings and accessory structures shall be consistent with a limited set of architectural themes, as described as Florida vernacular architectural style, including Key West, Marina/Coastal, and Mediterranean with nautical themes, and those styles shown in the attached Exhibit D, Riverwalk Architectural Styles. The theme shall be established by harmoniously coordinating the general appearance of all buildings and accessory structures, including but not limited to: exterior wall finishes or materials; roof styles, slopes, and materials; colors; and architectural details and ornamentation.

(2) All structures shall complement one another and shall convey a sense of quality and permanence.

(3) False or real windows shall be provided on all elevations visible from the public or private right of way in sufficient size and number to complement the proportions of the building.

(4) The physical appearance of all parking lot lighting fixtures shall be complementary within each phase of development of the Property.

(5) The maximum area for murals shall be 100% of an eligible building façade or accessory structure.

9. ENVIRONMENTAL CONSIDERATIONS.

Compliance with the environmental preservation code provisions set forth in the LDC may necessitate modification of the conceptual plan.

10. SIGNAGE.

A. Signage for commercial uses on the Property shall conform to signage standards set forth in the LDC for Mixed Use development, except as modified in a comprehensive sign package approved as an amendment to this Agreement. The Property shall be subject to the following modified standards:

(1) Decorative construction fencing and signage shall be allowed during construction (i.e. printed murals on construction fence, etc.).

(2) Site signs, limited to a maximum of 3 site signs within the site, may be a maximum of 64SF and V-shaped.

11. TRANSPORTATION CONCURRENCY.

The Project Area Property is located within the Transportation Concurrency Exception Area (TCEA) established for the Port Orange Town Center Redevelopment Area and is thus exempt from the transportation concurrency review procedures of Chapter 4 of the LDC. The Developer shall submit a traffic impact analysis (TIA) to the City. The Developer shall be exempt from participating in the transportation system management and transportation demand management programs under the LDC Chapter 17, Section 30(b)(5). The Developer shall pay customary City transportation impact fees but shall be exempt from paying the additional 5% transportation impact fee associated with the Port Orange Riverwalk PC-R District.

12. EFFECTIVE DATE; COMPLETION SCHEDULE.

A. This Agreement shall be effective upon execution by all parties. The restrictions on use and development imposed by this Agreement shall be binding upon all successors in interest in the Property, unless and until the City alters or eliminates such restrictions in the course of its actions as zoning authority.

B. The initial phase of development shall, at a minimum, include the Waterfront Park, Park Walkway, Halifax Drive, Herbert Street, Riveryard Drive, a riverfront bar/restaurant, and issuance of a Certificate of Completion on a minimum of 20,000 square feet of shell building for the purpose of retail and/or restaurant space and a minimum of 100 parking spaces dedicated to public use ("Initial Phase"), provided that if additional square footage is provided within this phase, the minimum parking standards set forth in the LDC and this Agreement shall be met, as described herein and depicted on the CDP, attached hereto as Exhibit "B".

C. Construction of the Initial Phase of development shall be substantially complete within 48 months from the date of closing, unless otherwise extended by mutual agreement of the Parties, or tolled pursuant to Florida Statutes. As applied herein, a project is defined as substantially complete when the project (or specific part thereof) can be utilized for the purposes for which it is intended ("Substantial Completion" or "Substantially Complete").

D. Failure to comply with the schedule set out above shall cause the development rights granted pursuant to this Agreement to lapse, unless it is extended as provided herein. Any vested development rights shall be permitted to remain in place pursuant to the terms hereof. The City Manager may extend such deadlines for up to one year for good cause shown, upon request of the Developer, without need for formal amendment to this Agreement. Said request shall include good cause for the extension and the provision of supporting documentation demonstrating the continued commercially reasonable steps in the diligent pursuit to complete the obligations and meet the deadlines set forth herein. Any extension granted by the City Manager in accordance with this Subsection12.D., will be evidenced by use of the *City Manager Extension to the Riveryard Master Development Agreement* substantially in the form attached hereto as **Exhibit "E"**, and made a part hereof by this reference. If Developer requests an extension of any schedule within this Section 12, such approval will not be unreasonably withheld or delayed.

13. MINOR MODIFICATIONS.

A. The following may be administratively authorized as minor modifications to this Agreement:

(1) Modifications to an Exhibit that are necessary for compliance with the text provisions of this Agreement, or extra-jurisdictional permitting requirements that address technical considerations that could not reasonably be anticipated during the approval process;

(2) Modifications having no material effect on the character of the basic concept and terms of the Agreement. These may include, but are not limited to, the following:

(a) Structural alterations that do not significantly affect the basic size, form, style, and appearance of principal structures;

(b) Shifting in the location and configuration of access points, streets and driveways that do not adversely affect vehicular access and circulation on or off the site;

(c) Shifting in the location or configuration of buildings, parking areas, landscaping, or other site features;

(d) Shifting in the location and configuration of public infrastructure facilities that do not have a significant impact on the City's utility and stormwater management systems; and

(e) Decreases of 5% or less in the total number of parking spaces, except for the minimum number of public spaces set forth in Section 6.D.(5) herein.

(f) Modifications of up to 20% to any of the dimensional or landscaping requirements set forth in the MDA and associated Exhibits, where such modifications are necessary to address minor Exhibit errors or unanticipated conditions that reasonably need to be addressed to ensure the development plan can be implemented.

B. Requests for minor modifications shall be submitted in writing on forms provided by the City. Requests shall be reviewed pursuant to the general technical review process described in the LDC.

C. Denial of a requested minor modification shall be issued in writing to the applicant. Upon denial, or if more than 60 days elapses after the submittal of a completed application without a decision by the City, the applicant may apply for an amendment to the agreement.

D. Approved modifications shall be noted on the official plan documents.

14. AMENDMENTS.

A. Any revision to this Agreement other than a minor modification as described above shall require an amendment approved by the City Council after review and recommendation by the Planning Commission.

B. In recognition of the City's general police power authority to rezone and legislate land uses and zoning requirements, all signatories to this Agreement and all individual lot owners, fee titleholders, mortgagees, or lien holders who now or hereafter own property subject to this Agreement, agree as follows:

(1) Proposed amendments will be subject to the review procedures and standards set forth in the LDC.

(2) The City, and the owner of the Property or portion thereof that is directly impacted by the amendment, are necessary parties to the amendment.

(3) The owners of all other lots within the Planned Community that are not directly impacted by the amendment are not necessary parties to the amendment.

(4) If this Agreement requires the creation of a property owners' association for purposes of owning and operating common areas and common facilities, and the association is in existence at the time of submission of an application to amend this Agreement, the association will be deemed to be an affected party with respect to the amendment.

(5) A lot is "directly impacted" for purposes of the provisions above, only when the amendment would revise the listed uses, dimensional requirements, architectural requirements, sign

requirements, or other development or use requirements for that lot.

C. No property owner other than one who actually executes an amendment shall be deemed to have waived his or her right to challenge a proposed or executed amendment in the same manner that an affected property owner may challenge zoning or related lot specific changes for property which is not subject to a Master Development Agreement. Such challenges include: (i) objections to a proposed amendment before the City Planning Commission or City Council, (ii) seeking certiorari review or injunctive action in relation to the adoption of such amendment as provided by law, or (iii) consistency challenges as provided for in Section 163.3215, Fla. Stat., or any successor provision.

15. POLICE POWER AND SOVEREIGN IMMUNITY NOT WAIVED.

Nothing contained in this Agreement shall be construed as a waiver of or contract with respect to the regulatory and permitting authority of the City as it now or hereafter exists under applicable laws, rules, and regulations. Further, nothing contained in this Agreement shall be construed as a waiver of or attempted waiver by the City of its sovereign immunity under the constitution and laws of the State of Florida.

16. COMPLETE AGREEMENT; AGREEMENT TO BE RECORDED.

A. This Agreement represents the complete understanding by and between the parties with respect to the development and use of the Property. Any and all prior agreements between the parties with respect to any subject comprehended by this Agreement is hereby voided and superseded by this Agreement, except for that certain Purchase and Sale Agreement between the parties, dated March 22, 2022, which shall survive this clause.

B. This Agreement shall be recorded in the Public Records of Volusia County, Florida, at Developer's expense. The restrictions on use and development imposed by this Agreement shall be binding upon all successors in interest in the Property.

17. VENUE AND SEVERABILITY.

A. In the event of any claim, action, litigation, or proceeding under this Agreement, venue shall be in Volusia County, Florida.

B. If any provision of this Agreement is held by a court of competent jurisdiction to be invalid or otherwise unenforceable, such holding shall not affect the validity or enforceability of any other provision of this Agreement unless the holding so states.

DESCRIPTION:

LOTS 1 THRU 9, EXCEPTING THE STREETS (HALIFAX DRIVE AND HERBERT STREET), AND INCLUDING RIPARIAN RIGHTS, BLOCK B, WILSON'S PORT ORANGE, AS RECORDED IN MAP BOOK 1, PAGE 154, OF THE PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA LYING IN SECTION 3, TOWNSHIP 16 SOUTH, RANGE 33 EAST.

LESS AND EXCEPT

THE SOUTHERLY 60 FEET OF THE WESTERLY 140 FEET OF LOT 7, BLOCK B, WILSON'S PORT ORANGE, AS PER MAP IN MAP BOOK 1, PAGE 154, PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA, LESS THAT PORTION DEEDED FOR STREET, AND THE WEST 140 FEET OF THE NORTH 13 FEET OF LOT 7 AND THE WEST 140 FEET OF LOT 8, ALL IN BLOCK B, WILSON'S SUBDIVISION OF PORT ORANGE, AS PER MAP IN MAP BOOK 1, PAGE 154, PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA, EXCEPT THAT PORTION THEREOF DEEDED TO THE STATE OF FLORIDA FOR WIDENING OF THE PUBLIC HIGHWAY LOCATED THEREON.

LESS AND EXCEPT

THE WEST 190 FEET OF LOT 6, BLOCK B, WILSON'S PORT ORANGE, ACCORDING TO THE MAP OR PLAT THEREOF RECORDED IN MAP BOOK 1, PAGE 154, PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA, EXCEPT THAT PORTION THEREOF DEEDED TO THE STATE OF FLORIDA FOR HIGHWAY PURPOSES IN DEED BOOK 218, PAGE 156, PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA.

LESS AND EXCEPT

AS A POINT OF REFERENCE, COMMENCE AT THE INTERSECTION OF THE SOUTHERLY RIGHT-OF-WAY LINE OF HERBERT ST (A 40 FOOT RIGHT-OF-WAY AS OCCUPIED) WITH THE EASTERLY RIGHT-OF-WAY LINE OF RIDGEWOOD AVENUE (A 100 FOOT RIGHT-OF-WAY AS OCCUPIED); THENCE S23°18'30"E ALONG SAID EASTERLY RIGHT-OF-WAY LINE OF RIDGEWOOD AVENUE A DISTANCE OF 300 FEET TO THE POINT OF BEGINNING OF THE FOLLOWING DESCRIBED PARCEL; THENCE N66°30'30"E ALONG THE NORTH LINE OF LOT FOUR (4) OF BLOCK "B" WILSON'S PORT ORANGE, AS RECORDED IN MAP BOOK 1, PAGE 154, PUBLIC RECORDS OF VOLUSIA COUNTY FLORIDA, A DISTANCE OF 123 FEET TO A POINT; THENCE S23°18'30"E, A DISTANCE OF 20.00 FEET TO A POINT; THENCE S66°30'30"W AND PARALLEL WITH SAID NORTH LINE OF SAID LOT FOUR (4) A DISTANCE OF 123 FEET TO A POINT IN THE EASTERLY RIGHT-OF-WAY LINE OF SAID RIDGEWOOD AVENUE; THENCE N23°18'30"W ALONG SAID EASTERLY RIGHT-OF-WAY LINE OF RIDGEWOOD AVENUE A DISTANCE OF 20.00 FEET TO THE POINT OF BEGINNING, RESERVING A ROAD EASEMENT OVER THE SOUTHERLY 5 FEET THEREOF AND GRANTING A ROAD EASEMENT OVER THE NORTHERLY 5 FEET OF THE WESTERLY 130 FEET OF THE LOT, TRACT AND PARCEL OF LAND IMMEDIATELY NEXT ADJOINING THE SAID EASEMENT HEREIN RESERVED.

LESS AND EXCEPT

A PORTION OF LOT 4, BLOCK "B" WILSON'S PORT ORANGE, ACCORDING TO THE MAP THEREOF RECORDED IN MAP BOOK 1, PAGE 154, OF THE PUBLIC RECORDS OF VOLUSIA COUNTY FLORIDA, AND BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:
AS A POINT OF REFERENCE, COMMENCE AT THE INTERSECTION OF THE SOUTHERLY RIGHT-OF-WAY LINE OF HERBERT ST (A 40 FOOT RIGHT-OF-WAY AS OCCUPIED) WITH THE EASTERLY RIGHT-OF-WAY LINE OF RIDGEWOOD AVENUE (A 100 FOOT RIGHT-OF-WAY AS OCCUPIED); THENCE S23°18'30"E ALONG SAID EASTERLY RIGHT-OF-WAY LINE OF RIDGEWOOD AVENUE A DISTANCE OF 413.80 FEET TO THE POINT OF BEGINNING OF THE FOLLOWING DESCRIBED PARCEL; THENCE N66°30'30"E, AND PARALLEL WITH THE NORTH LINE OF LOT FOUR (4) OF BLOCK "B" WILSON'S PORT ORANGE, AS RECORDED IN MAP BOOK 1, PAGE 154, PUBLIC RECORDS OF VOLUSIA COUNTY FLORIDA, A DISTANCE OF 123 FEET TO A POINT; THENCE S23°18'30"E, A DISTANCE OF 20.00 FEET TO A POINT; THENCE S66°30'30"W AND PARALLEL WITH SAID NORTH LINE OF LOT FOUR (4), BLOCK "B" WILSON'S PORT ORANGE A DISTANCE OF 93.83 FEET TO A POINT; THENCE S24°42'33"E, A DISTANCE OF 23.90 FEET TO A POINT IN THE SOUTH LINE OF SAID LOT FOUR (4), BLOCK "B" WILSON'S PORT ORANGE; THENCE S65°30'30"W ALONG THE SOUTH LINE OF SAID LOT FOUR (4), BLOCK "B" WILSON'S PORT ORANGE, A DISTANCE OF 234.14 FEET TO A POINT IN THE EASTERLY RIGHT-OF-WAY OF SAID RIDGEWOOD AVENUE; THENCE N23°18'30"W ALONG SAID EASTERLY RIGHT-OF-WAY LINE OF RIDGEWOOD AVENUE A DISTANCE OF 41.40 FEET TO THE POINT OF BEGINNING, RESERVING A ROAD EASEMENT OVER THE NORTHERLY 5 FEET OF THE WESTERLY 130 FEET THEREOF.

LESS AND EXCEPT

AS A POINT OF REFERENCE, COMMENCE AT THE INTERSECTION OF THE SOUTHERLY RIGHT-OF-WAY LINE OF HERBERT ST (A 40 FOOT RIGHT-OF-WAY AS OCCUPIED) WITH THE EASTERLY RIGHT-OF-WAY LINE OF RIDGEWOOD AVENUE (A 100 FOOT RIGHT-OF-WAY AS OCCUPIED); THENCE S23°18'30"E ALONG SAID EASTERLY RIGHT-OF-WAY LINE OF RIDGEWOOD AVENUE A DISTANCE OF 300 FEET TO A POINT IN THE NORTH LINE OF LOT FOUR (4), BLOCK "B" WILSON'S PORT ORANGE, AS RECORDED IN MAP BOOK 1, PAGE 154, PUBLIC RECORDS OF VOLUSIA COUNTY FLORIDA; THENCE N66°30'30"E ALONG THE NORTH LINE OF LOT FOUR (4) OF BLOCK "B" WILSON'S PORT ORANGE, A DISTANCE OF 123 FEET TO THE POINT OF BEGINNING OF THE FOLLOWING DESCRIBED PARCEL; THENCE CONTINUE N66°30'30"E ALONG SAID NORTH LINE OF LOT FOUR (4), BLOCK "B" WILSON'S PORT ORANGE A DISTANCE OF 111.89' FEET TO A POINT; THENCE S24°42'33"E, A DISTANCE OF 31.10 FEET TO A POINT; THENCE S65°30'30"W AND PARALLEL WITH SAID NORTH LINE OF LOT FOUR (4) OF BLOCK "B" WILSON'S PORT ORANGE, A DISTANCE OF 33.83 FEET TO A POINT; THENCE N70°34'27"W A DISTANCE OF 24.81 FEET TO A POINT; THENCE N23°18'30"W AND PARALLEL WITH SAID RIDGEWOOD AVENUE RIGHT-OF-WAY A DISTANCE OF 33.80 FEET TO THE POINT OF BEGINNING.

TOGETHER WITH

LOTS 2 THRU 4, INCLUSIVE, EXCEPTING THE STREETS (HALIFAX DRIVE AND HERBERT STREET), AND INCLUDING RIPARIAN RIGHTS, DANIELS PORT ORANGE, AS RECORDED IN MAP BOOK 3, PAGE 29, OF THE PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA.

TOGETHER WITH

THE EAST 33 FEET OF THE WEST 133 FEET OF THE SOUTHERLY 100 FEET, EXCLUDING PART IN STREET, BLOCK "C" WILSON'S PORT ORANGE, ACCORDING TO THE PLAT OR MAP THEREOF AS RECORDED IN MAP BOOK 1, PAGE 154, OF THE PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA.

TOGETHER WITH

PARCEL 1

LOTS 9 AND 8, EXCEPT THE EAST 218 FEET AND EXCEPT THE STREET (US HIGHWAY #1), BLOCK 2, PORT ORANGE HARD TRACT, THE SAID EAST 218 FEET BEING MEASURED ON THE NORTH LINE OF LOT 9, ACCORDING TO THE PLAT THEREOF AS RECORDED IN MAP BOOK 2, PAGE 185, PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA.

PARCEL 2

REFER TO A POINT IN THE ORIGINAL EAST LINE OF RIDGEWOOD AVENUE, (US HIGHWAY #1, STATE ROAD NO. 5, A 66 FOOT RIGHT-OF-WAY), SAID POINT BEING THE INTERSECTION OF THE NORTH LINE OF U.S. GOVERNMENT LOT TWO (2), OF SECTION 3, TOWNSHIP 16 SOUTH, RANGE 33 EAST, VOLUSIA COUNTY, FLORIDA, ALSO BEING THE NORTH LINE OF LOT ONE (1), MRS DANIELS' ADDITION TO PORT ORANGE, ACCORDING TO THE PLAT THEREOF AS RECORDED IN MAP BOOK 3, PAGE 29, PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA, WITH SAID ORIGINAL EAST RIGHT-OF-WAY; THENCE N89°14'45"E, FOR A DISTANCE OF 3.83 FEET TO THE POINT OF BEGINNING; SAID POINT ALSO BEING ON THE EAST RIGHT-OF-WAY LINE OF U.S. HIGHWAY # 1 (STATE ROAD 5), NOW A 100 FOOT RIGHT-OF-WAY; THENCE S24°53'30"E ALONG THE EAST RIGHT-OF-WAY LINE NOW IN USE, FOR A DISTANCE OF 150.42 FEET; THENCE DEPARTING AFORESAID RIGHT-OF-WAY N77°17'08"E, FOR A DISTANCE OF 338.08 FEET; THENCE N23°55'41"W FOR A DISTANCE OF 75.00 FEET TO THE NORTH LINE OF SAID U.S. GOVERNMENT LOT 2; THENCE S89°14'45"W ALONG SAID SOUTH LINE FOR A DISTANCE OF 306.83 FEET TO THE POINT OF BEGINNING.

TOGETHER WITH

LOT 1 & 2, AND THE NORTHERLY 21.25 FEET OF THE EASTERLY 136.8 FEET OF LOT 3, BLOCK F, EXCLUDING RIGHT-OF-WAY, WILSON'S PORT ORANGE, AS PER MAP IN MAP BOOK 1, PAGE 154, OF THE PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA.

SURVEYORS NOTES:

1. THIS SURVEY HAS BEEN PREPARED WITH BENEFIT OF A COMMITMENT FOR TITLE INSURANCE ISSUED BY: FIRST AMERICAN TITLE INSURANCE COMPANY; AGENTS FILE NO.: 22-01818, COMMITMENT DATED: MARCH 31, 2023 AT 5:00 P.M.
2. DIMENSIONS ARE SHOWN IN FEET AND DECIMALS THEREOF.
3. BEARING STRUCTURE BASED ON NAD 83, FLORIDA STATE PLANE, EAST ZONE, U.S. SURVEY FOOT WITH THE BEARING ON THE EAST LINE OF HALIFAX DRIVE BEING S23°18'32"E.
4. UNLESS OTHERWISE SHOWN, RECORD DISTANCES AND DIRECTIONS AND FIELD MEASURED DISTANCES AND DIRECTIONS ARE THE SAME.
5. UNDERGROUND FOUNDATIONS, IF ANY, NOT LOCATED.
6. ELEVATIONS REFER TO N.A.V.D. OF 1988, PER NGS BENCHMARK 7223 HAVING A PUBLISHED ELEVATION OF 11.91 FEET.
7. THIS PROPERTY IS LOCATED IN FLOOD INSURANCE RATE MAP (F.I.R.M.) ZONE AE WITH A BASE FLOOD ELEVATION OF 9 FEET. THIS LOCATION IS DETERMINED BY SCALING FROM F.I.R.M. MAP NO. 12127C0335J , MAP EFFECTIVE DATED: SEPTEMBER 29, 2017. APPROXIMATE SCALE: 1"= 500'.
8. THE MEAN HIGH WATER ELEVATION 0.02 FEET, N.A.V.D. 1988 SHOWN BASED UPON EXTENSION OF EXISTING DATUM TO THE SUBJECT PROPERTY.
9. THIS MEAN HIGH WATER LINE SURVEY COMPLIES WITH CHAPTER 177, PART II, FLORIDA STATUTES
10. THE MEAN HIGH WATER ELEVATION AS SHOWN HEREON WAS ESTABLISHED BY EXTENDING THE ELEVATION SHOWN AT MEAN HIGH WATER POINT IDENTIFICATION NUMBER: 3841
11. "NOT VALID WITHOUT THE SIGNATURE AND THE ORIGINAL RAISED SEAL OR DIGITAL SIGNATURE OF A FLORIDA LICENSED SURVEYOR AND MAPPER."

ALTA / NSPS BOUNDARY SURVEY
AND TIDAL WATER SURVEY
FOR
BRISTOL DEVELOPMENT GROUP

Schedule B-II

1. Defects, liens, encumbrances, adverse claims or other matters, if any, created, first appearing in the public record or attaching subsequent to the effective date hereof but prior to the date the proposed insured acquires for value of record the estate or interest or mortgage thereon covered by this Commitment.

2. Rights or claim of parties in possession not shown by the public records.

3. Easements, or claim of easements, not shown by the public records.

4. Encroachments, overlaps, boundary line disputes, or other matters which would be disclosed by an accurate survey and inspection of the premises.

5. Any liens, or right to a lien, for services, labor or material hereto or hereafter furnished, imposed by law and not shown by the public records.

6. Any dispute as to the boundaries caused by a change in the location of any water body within or adjacent to the land prior to Date of Policy, and any adverse claim to all or part of the land that is, at Date of Policy, or was previously, under water.

7. Any titles or rights asserted by anyone including but not limited to persons, corporations, governments or other entities, to tide lands, or lands comprising the shores or bottoms of navigable rivers, lakes, bays, ocean or gulf, or lands beyond the line of the harbor or bulkhead lines as established or changed by the United States Government or water rights, if any.

8. Taxes or special assessment not shown as liens in the public records or in the records of the local tax collecting authority, at Date of Policy. Rights of dower, homestead or other marital rights of the spouses, if any, of any individual insured.

9. Any minerals or mineral rights leased, granted or retained by current or prior owner.

Special Exceptions:

11. Taxes for the year 2022, which are not yet due and payable.

18. Reservation with street right of way filed September 7, 1935 and recorded in Deed Book 280, page 335, Public Records of Volusia County, Florida. (as to Parcel 2)
10' ALLY EASMENT SHOWN HEREON. OTHER EASEMENT WITHIN EXISTING RIGHT OF WAY.

19. Easement as reflected in instruments recorded in Deed Book 458, page 10, and Deed Book 451, pages 428 and 430, all of the Public Records of Volusia County, Florida. (as to Parcel 2)
AFFECTS SUBJECT PROPERTY. SHOWN HEREON.
D.B. 458, PGS. 428 & 430, DOES NOT AFFECT SUBJECT PROPERTY.

20. Rights of others in and to the use of the easement described in Deed Book 458, page 10, and alley described in Deed Book 280, page 353, both of the Public Records of Volusia County, Florida. (as to Parcel 2)
AFFECTS SUJECT PROPERTY. SHOWN HEREON.

21. Easement granted to the City of Port Orange recorded in Official Records Book 1034, PageZl. 38, of the Public Records of Volusia County, Florida. (as to Parcel 2)
DOES NOT AFFECT SUBJECT PROPERTY.

22. Grant Award Agreement recorded in Official Records Book 5325, Page 1309, Public Records of Volusia County, Florida. (as to Parcel 9)
AFFECTS SUBJECT PROPERTY. NOT GRAPHICALLY DEPICTED.

23. Easement in favor of The City of Port Orange as recorded in Official Records Book 602, Page 80, Public Records of Volusia County, Florida. (as to Parcel 7)
AFFECTS SUBJECT PROPERTY. SHOWN HEREON.

24. Easement Deed to the City of Port Orange recorded in Official Records Book 602, Page 88, Public Records of Volusia County, Florida. (as to Parcel 8)
AFFECTS SUBJECT PROPERTY. SHOWN HEREON.

25. Easement Deed to the City of Port Orange recorded in Official Records Book 602, Page 76, Public Records of Volusia County, Florida. (as to Parcel 8)
AFFECTS SUBJECT PROPERTY. SHOWN HEREON.

26. Warranty Deeds to the State Road Department of Florida recorded in Deed Book 218, pages 98 and 296, Public Records of Volusia County, Florida. (as to Parcel 8)
DOES NOT AFFECT SUBJECT PROPERTY.

27. The Westerly 15 feet of the subject property lying in state road right-of-way is not insured hereunder and is specifically excepted from coverage under the Commitment and Policy. (as to Parcel 8)

28. The fee interest shall be subject to the right-of-way interests, if any, for any portion lying within the right-of-way of Halifax Drive as now established and in use. (as to Parcel 10)

29. The right of the public to use the right-of-way of Halifax Drive is neither guaranteed nor insured. (as to Parcel 10)

30. Exception is made to any part of the lands described in Schedule "A" hereof lying within the right-of-way of Ridgewood Avenue. (as to Parcel 11)

Schedule B-II

31. Easement to the City of Port Orange for widening, straightening and improvement of Halifax Drive recorded in Deed Book 541, Page 428, Public Records of Volusia County, Florida. (as to Parcels 12 and 18)
AFFECTS SUBJECT PROPERTY. SHOWN HEREON.

32. Exception is made to any part of the lands described in Schedule "A" hereof lying within the right-of-way of Ridgewood Avenue. (as to Parcel 13)

33. License Agreement recorded in Official Records Book 7310, Page 244, Public Records of Volusia County, Florida. (as to Parcel 14)
DOES NOT AFFECT SUBJECT PROPERTY. LICENSE AGREEMENT EXPIRED 09/2021.

34. Exception is made to any part of the lands described in Schedule "A" hereof lying within the right-of-way of Dunlawton Avenue. (as to Parcel 15)

35. Easement in favor of The City of Port Orange as recorded in Official Records Book 804, Page 682, Public Records of Volusia County, Florida. (as to Parcel 19)
SHOWN HEREON.

36. Utility and Sidewalk Easement recorded in Official Records Book 6828, Page 4638, Public Records of Volusia County, Florida. (as to Parcel 19)
SHOWN HEREON.

37. Right-of-way recorded in Official Records Book 6828, Page 4644, Public Records of Volusia County, Florida. (as to Parcel 19)
SHOWN HEREON.

38. Lease Agreement recorded in Official Records Book 7859, Page 4187, Public Records of Volusia County, Florida. (as to Parcel 19)
AFFECTS SUBJECT PROPERTY. NOT GRAPHICALLY DEPICTED.

39. Terms and conditions of Perpetual Nonexclusive Drainage and Utility Easement recorded in Official Records Book 7722, Page 1814, of the Public Records of Volusia County, Florida. (as to Parcel 20)
SHOWN HEREON.

40. Easement Deed to the City of Port Orange recorded in Official Records Book 547, Page 87, of the Public Records of Volusia County, Florida. (as to Parcel 21)
SHOWN HEREON.

41. Easement Deed to the City of Port Orange recorded in Official Records Book 650, Page 821, of the Public Records of Volusia County, Florida. (as to Parcel 21)
SHOWN HEREON.

42. Terms and conditions of Nonexclusive Drainage, Access, Sidewalk, Maintenance and Utilities Easement recorded in Official Records Book 6861, Page 1722, of the Public Records of Volusia County, Florida. (as to Parcel 21)
DOES NOT AFFECT SUBJECT PROPERTY.

43. Riparian and/or littoral rights are not insured, (as to Parcels 2, 5, 6, 7, 10, 12, 18)

44. The right, title or interest, if any, of the public to use as a public beach or recreation area any part of the Land lying between the water abutting the Land and the most inland of any of the following: (a) the natural line of vegetation; (b) the most extreme high water mark; (c) the bulkhead line, or (d) any other line which has been or which hereafter may be legally established as relating to such public use. (as to Parcels 2, 5, 6, 7, 10, 12, 18)

45. Rights of the United States Government to that part of the Land, if any, being artificially filled in land in what was formerly navigable waters arising by reason of the United States Government control over navigable waters in the interest of navigation and commerce, (as to Parcels 2, 5, 6, 7, 10, 12, 18)

46. Any adverse ownership claim by the State of Florida by right of sovereignty to any part of the Land that is, as of the Date of Policy or was at any time previously, under water (submerged), (as to Parcels 2, 5, 6, 7, 10, 12, 18)

PROJECT DESCRIPTION:

THIS PROJECT INCLUDES THE DEVELOPMENT OF A MIXED USE TOWN CENTER AND PARK.

COMPLIANCE WITH THE LAND DEVELOPMENT CODE MAY NECCESSITATE MODIFICATION OF THE CONCEPTUAL PLAN.

SITE INFORMATION:

SITE ADDRESS:	SOUTH RIDGEWOOD AVE., PORT ORANGE, FL
PROJECT AREA:	12.43 AC
AREA OWNED/CONTROLLED BY BRISTOL	11.12 AC
R/W OWNED BY THE CITY OF PORT ORANGE	1.37 AC
EXISTING ZONING:	PC-R
PROPOSED ZONING:	PC-R
PROPOSED OPEN SPACE:	1.45 AC
MAXIMUM OVERALL RESIDENTIAL DENSITY:	A MAXIMUM DENSITY OF 460 UNITS (37 UNITS/ACRE).
MINIMUM BUILDING SETBACKS:	
DUNLAWTON AVE.:	12 FT
RIDGEWOOD AVE.:	12 FT
EXTERNAL TO MASTER DEVELOPMENT:	5 FT
INTERNAL:	SEAWALL 5 FT, HALIFAX DRIVE 5 FT, HERBERT S", 5 FT, ALL OTHERS 0 FT
REQUIRED LANDSCAPE BUFFER(S):	10 FT – ALONG DUNLAWTON AVE.
	10 FT – ALONG RIDGEWOOD AVE.
	5 FT – ALL OTHER PERIMETERS
MINIMUM LIVING AREA/DWELLING UNIT:	500 SF
MINIMUM BUILDING LOT COVERAGE:	3,000 SF
MAXIMUM BUILDING HEIGHT:	105 FT, EXCLUDING ARCHITECTURAL EMBELLISHMENTS OR DESIGN ELEMENTS
MAXIMUM FENCE HEIGHT:	8 FT, (SUCH HEIGHT SHALL NOT INCLUDE THE PORTIONS OF A RETAINING WALL THAT IS LOCATED SUB-GRADE).
MINIMUM LOT WIDTH:	N/A
MINIMUM LOT DEPTH:	N/A
THE STRUCTURES WITHIN THE PD WILL BE DETERMINED BY THE ENGINEER OF RECORD. THE FINISHED FLOOR ELEVATION(FFE) SHALL BE MINIMUM ELEVATION OF 7.	
UTILITIES:	PROVIDED BY CITY OF PORT ORANGE

PARKING:

1. MULTIFAMILY DEVELOPMENT: MINIMUM RATIO OF 1.25 PARKING SPACES PER DWELLING UNIT. PARKING FOR MULTIFAMILY RESIDENTIAL USES MAY BE PROVIDED THROUGH THE USE OF TANDEM GARAGE/PARKING SPACES SO LONG AS THE TANDEM SPACES ARE ASSIGNED FOR THE EXCLUSIVE USE OF ONE RESIDENTIAL UNIT.
2. COMMERCIAL SUARE FEET: A RATIO OF 5 SPACES PER 1,000 SQUARE FEET.
3. HOTEL USES: A RATIO OF 1 SPACE PER GUEST ROOM AND 0.10 PER EMPLOYEE.
4. NO ADDITIONAL PARKING SHALL BE REQUIRED FOR FOOD TRUCK OR MARINA USES.
5. A MINIMUM OF 100 SURFACE SPACES AND 200 GARAGE SPACES MUST BE SET ASIDE FOR USE BY THE PUBLIC, ALTHOUGH SUCH SPACES SHALL COUNT TOWARDS THE MINIMUM REQUIRED PARKING STANDARDS FOR INDIVIDUAL USE TYPES.
6. SURFACE PARKING DIMENSIONS: THE MINIMUM PARKING DIMENSIONS ON SITE SHALL BE AS FOLLOWS: 90 DEGREE SPACES MEASURING 9' X 18', PARALLEL SPACES MEASURING 8' X 20'. PARKING AREAS SHALL HAVE A MINIMUM DRIVE AISLE WIDTH OF 22'. COMPACT SPACES ARE ALLOWED UP TO 10% OF TOTAL REQUIRED SPACES AND SHALL BE A MINIMUM OF 8'-0" X 16'-0". ANGLED PARKING SPACES ARE ALLOWED EXCEPT ON HALIFAX DRIVE AND HERBERT STREET AND SHALL BE 45 DEGREE ANGLE, 9'0" MIN. WIDTH FROM SIDE TO SIDE, 19'1" MIN. DEPTH FROM CURB TO BACK OF SPACE, AND 12'9" MIN. WIDTH AS MEASURED ALONG THE CURB FROM SPACE TO SPACE.
7. GARAGE PARKING DIMENSIONS SHALL BE AS FOLLOWS:
   PARKING SPACE: 9'-0" WIDE X 18'-0" DEEP
   DRIVE AISLES: 24'-0" WIDE MINIMUM

NOTE: THE SCALE OF THESE PLANS MAY HAVE CHANGED DUE TO REPRODUCTION.

LEGAL DESCRIPTION:

A PORTION OF LOTS 1 THRU 9, INCLUDING RIPARIAN RIGHTS, BLOCK B, WILSON'S PORT ORANGE, AS RECORDED IN MAP BOOK 1, PAGE 154, OF THE PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA, LYING IN SECTION 3, TOWNSHIP 16 SOUTH, RANGE 33 EAST.
TOGETHER WITH
LOTS 2 THRU 4, INCLUSIVE, AND INCLUDING RIPARIAN RIGHTS, DANIELS PORT ORANGE, AS RECORDED IN MAP BOOK 3, PAGE 28, OF THE PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA;
TOGETHER WITH
THE EAST 55 FEET OF THE WEST 55 FEET OF THE SOUTHERLY 100 FEET, EXCLUDING PART IN STREET, BLOCK "C" WILSON'S PORT ORANGE, ACCORDING TO THE PLAT OR MAP THEREOF AS RECORDED IN MAP BOOK 1, PAGE 154, OF THE PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA.
TOGETHER WITH
THE EAST 105 FEET OF THE WEST 260 FEET OF THE SOUTH 100 FEET, BLOCK "C", WILSON'S MAP OF PORT ORANGE, AS RECORDED IN MAP BOOK 1, PAGE 154 OF THE PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA.
TOGETHER WITH
A PORTION OF HERBERT STREET AND A PORTION OF HALIFAX DRIVE.
LESS AND EXCEPT
THE SOUTHERLY 60 FEET OF THE WESTERLY 140 FEET OF LOT 7, BLOCK B, WILSON'S PORT ORANGE, AS PER MAP IN MAP BOOK 1, PAGE 154, PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA, LESS THAY PORTION DEEDED FOR STREET, AND THE WEST 140 FEET OF THE NORTH 15 FEET OF LOT 7 AND THE WEST 140 FEET OF LOT 8, ALL IN BLOCK B, WILSON'S SUBDIVISION OF PORT ORANGE, AS PER MAP IN MAP BOOK 1, PAGE 154, PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA, EXCEPT THAT PORTION THEREOF DEEDED TO THE STATE OF FLORIDA FOR WIDENING OF THE PUBLIC HIGHWAY LOCATED THEREIN.
ALL BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS

BEGIN AT THE INTERSECTION OF THE NORTHERLY RIGHT OF WAY LINE OF DUNLAWTON AVENUE(PER FLORIDA DEPARTMENT OF TRANSPORTATION RIGHT-OF-WAY MAP, SECTION 79180-2240(S/W VARIES))AND THE EASTERLY RIGHT OF WAY LINE OF RIDGEWOOD AVENUE(U.S. HIGHWAY 1)(PER FLORIDA DEPARTMENT OF TRANSPORTATION RIGHT-OF-WAY MAP, SECTION 7001-2780(R/W VARIES)); THENCE ALONG THE SAID EASTERLY RIGHT OF WAY LINE N00°34'40"E, A DISTANCE OF 571.83 FEET TO THE SOUTH LINE OF LOT 7, WILSON'S PORT ORANGE, AS RECORDED IN MAP BOOK 1, PAGE 154, OF THE PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA; THENCE ALONG SAID SOUTH LINE N89°41'50"E, A DISTANCE OF 139.99 FEET TO THE EASTERLY LINE OF THE WESTERLY 140 FEET OF LOTS 7 AND 8, BLOCK B, SAID WILSON'S PORT ORANGE; THENCE ALONG SAID EASTERLY LINE N00°35'47"W, A DISTANCE OF 135.84 FEET TO THE SOUTHERLY RIGHT OF WAY LINE OF HERBERT STREET (40' R/W); THENCE ALONG SAID SOUTHERLY RIGHT OF WAY LINE; S89°41'07"W, A DISTANCE OF 127.33 FEET; THENCE DEPART SAID SOUTHERLY RIGHT OF WAY LINE N32°05'47"W, A DISTANCE OF 40.63 FEET TO THE INTERSECTION OF THE NORTHERLY RIGHT OF WAY LINE OF HERBERT STREET AND THE EASTERLY RIGHT OF WAY OF RIDGEWOOD AVENUE; THENCE ALONG SAID NORTHERLY RIGHT OF WAY LINE N89°53'11"E, A DISTANCE OF 81.31 FEET TO THE EASTERLY LINE OF THE LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 7286, PAGE 4214; THENCE ALONG SAID EASTERLY LINE N25°13'27"W, A DISTANCE OF 183.31 FEET TO THE SOUTHERLY LINE OF THE LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 5560, PAGE 428; THENCE ALONG SAID SOUTHERLY LINE N64°49'07"E, A DISTANCE OF 178.01 FEET; THENCE CONTINUE ALONG SAID SOUTHERLY LINE N25°25'47"W, A DISTANCE OF 76.78 FEET; THENCE CONTINUE ALONG SAID SOUTHERLY LINE N64°52'13"E, A DISTANCE OF 230.63 FEET TO THE MEAN HIGH WATER LINE OF THE HALIFAX RIVER; THENCE ALONG SAID MEAN HIGH WATER LINE THE FOLLOWING 22 COURSES S10°35'59"E, A DISTANCE OF 19.09 FEET; THENCE S20°04'17"E, A DISTANCE OF 33.84 FEET; THENCE S22°12'30"E, A DISTANCE OF 49.64 FEET; THENCE S32°46'14"E, A DISTANCE OF 35.10 FEET; THENCE S23°27'39"E, A DISTANCE OF 81.72 FEET; THENCE S39°57'05"E, A DISTANCE OF 58.57 FEET; THENCE S29°44'47"E, A DISTANCE OF 60.46 FEET; THENCE S22°37'09"E, A DISTANCE OF 107.61 FEET; THENCE S26°47'58"E, A DISTANCE OF 6.36 FEET; THENCE S28°04'08"E, A DISTANCE OF 28.81 FEET; THENCE S16°07'08"E, A DISTANCE OF 57.62 FEET; THENCE S04°56'19"E, A DISTANCE OF 18.59 FEET; THENCE S22°59'31"E, A DISTANCE OF 20.17 FEET; THENCE S25°07'12"E, A DISTANCE OF 50.08 FEET; THENCE S16°59'21"E, A DISTANCE OF 58.62 FEET; THENCE S24°36'09"E, A DISTANCE OF 48.65 FEET; THENCE S25°57'28"E, A DISTANCE OF 91.05 FEET; THENCE S29°49'21"E, A DISTANCE OF 24.10 FEET; THENCE S84°28'24"E, A DISTANCE OF 62.07 FEET; THENCE N09°45'17"E, A DISTANCE OF 20.50 FEET; THENCE S58°53'35"E, A DISTANCE OF 19.68 FEET; THENCE N49°52'44"E, A DISTANCE OF 49.96 FEET; THENCE S57°25'37"E, A DISTANCE OF 25.23 FEET TO THE NORTHERLY RIGHT OF WAY LINE OF AFORESAID DUNLAWTON AVENUE; THENCE ALONG SAID NORTHERLY RIGHT OF WAY LINE S51°36'57"W, A DISTANCE OF 224.19 FEET TO THE WESTERLY RIGHT OF WAY LINE OF HALIFAX DRIVE; THENCE ALONG SAID WESTERLY RIGHT OF WAY LINE S28°07'43"E, A DISTANCE OF 3.57 FEET TO THE NORTHERLY RIGHT OF WAY LINE OF AFORESAID DUNLAWTON AVENUE; THENCE ALONG SAID NORTHERLY RIGHT OF WAY LINE S02°22'39"W, A DISTANCE OF 16.76 FEET; THENCE CONTINUE ALONG SAID LINE S69°26'17"W, A DISTANCE OF 107.40 FEET; THENCE CONTINUE ALONG SAID LINE S51°41'19"W, A DISTANCE OF 209.17 FEET TO THE POINT OF BEGINNING.

CONTAINING 493,471 SQUARE FEET, OR 11.330 ACRES MORE OF LESS.

PARCEL 1

LOTS 5 AND 6, EXCEPT THE EAST 216 FEET AND EXCEPT THE STREET (US HIGHWAY #1), BLOCK 2, PORT ORANGE HAND TRACT, THE SAID EAST 216 FEET BEING MEASURED ON THE NORTH LINE OF LOT 5, ACCORDING TO THE PLAT THEREOF AS RECORDED IN MAP BOOK 2, PAGE 185, PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA.

PARCEL 2

REFER TO A POINT IN THE ORIGINAL EAST LINE OF RIDGEWOOD AVENUE, (US HIGHWAY #1, STATE ROAD NO. 1, A 66 FOOT RIGHT-OF-WAY), SAID POINT BEING THE INTERSECTION OF THE NORTH LINE OF U.S. GOVERNMENT LOT TWO (2), OF SECTION 3, TOWNSHIP 16 SOUTH, RANGE 33 EAST, VOLUSIA COUNTY, FLORIDA, ALSO BEING THE NORTH LINE OF LOT ONE (1), MRS DANIELS ADDITION TO PORT ORANGE, ACCORDING TO THE PLAT THEREOF AS RECORDED IN MAP BOOK 3, PAGE 28, PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA, WITH SAID ORIGINAL EAST RIGHT-OF-WAY; THENCE N89°41'40"E, FOR A DISTANCE OF 3.83 FEET TO THE POINT OF BEGINNING, SAID POINT ALSO BEING ON THE EAST RIGHT-OF-WAY LINE OF U.S. HIGHWAY # 1 (STATE ROAD 5), NOW A 100 FOOT RIGHT-OF-WAY; THENCE S29°57'30"E, ALONG THE EAST RIGHT-OF-WAY LINE NOW IN USE FOR A DISTANCE OF 1554.62 FEET; THENCE DEPARTING AFORESAID RIGHT-OF-WAY N77°17'08"E, FOR A DISTANCE OF 338.08 FEET; THENCE N25°25'47"W FOR A DISTANCE OF 75.00 FEET TO THE NORTH LINE OF SAID U.S. GOVERNMENT LOT 2; THENCE S89°41'40"W ALONG SAID SOUTH LINE FOR A DISTANCE OF 356.63 FEET TO THE POINT OF BEGINNING.

ALL BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS

COMMENCE AT THE INTERSECTION OF THE NORTH LINE OF GOVERNMENT LOT 2, SECTION 3, TOWNSHIP 16 SOUTH, RANGE 33 EAST AND THE ORIGINAL EASTERLY RIGHT OF WAY LINE OF RIDGEWOOD AVENUE, THENCE N89°07'07"E, A DISTANCE OF 3.31 FEET TO THE POINT OF BEGINNING, SAID POINT ALSO BEING ON THE EAST RIGHT-OF-WAY LINE OF U.S. HIGHWAY # 1(STATE ROAD 5) (PER FLORIDA DEPARTMENT OF TRANSPORTATION RIGHT-OF-WAY MAP, SECTION 7001-2210 R/W VARIES); THENCE ALONG SAID EASTERLY RIGHT OF WAY LINE N02°53'30"W, A DISTANCE OF 16.18 FEET TO THE NORTHERLY LINE OF LOT 3, H.P. HAND TRACT, AS RECORDED IN MAP BOOK 2, PAGE 185 OF THE PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA, ALSO BEING THE SOUTHERLY LINE OF LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 5560, PAGE 428; THENCE ALONG SAID NORTHERLY LINE N77°17'08"E, A DISTANCE OF 337.00 FEET TO THE BOUNDARY LINE OF LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 5560, PAGE 428; THENCE ALONG SAID BOUNDARY LINE S25°25'47"E, A DISTANCE OF 123.07 FEET TO THE SAID NORTHERLY LINE OF GOVERNMENT LOT 2, ALSO BEING THE NORTHERLY LINE OF LOT 1, DANIELS' ADDITION TO PORT ORANGE, AS RECORDED IN MAP BOOK 3, PAGE 28; THENCE ALONG SAID NORTHERLY LINE N89°27'20"E, A DISTANCE OF 49.60 FEET TO THE BOUNDARY LINE OF LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 5560, PAGE 428; THENCE ALONG SAID BOUNDARY LINE S25°25'47"E, A DISTANCE OF 74.27 FEET TO THE BOUNDARY LINE OF LANDS DESCRIBED IN OFFICIAL RECORDS BOOK 5560, PAGE 428; THENCE ALONG SAID BOUNDARY LINE S77°25'07"W, A DISTANCE OF 340.76 FEET THE SAID EASTERLY RIGHT OF WAY LINE OF RIDGEWOOD AVENUE; THENCE ALONG THE SAID EASTERLY RIGHT OF WAY LINE N02°53'30"W, A DISTANCE OF 147.08 FEET TO THE POINT OF BEGINNING.

CONTAINING 60796 SQUARE FEET, OR 1.396 ACRES MORE OR LESS.

The Concept.

The Port Orange area has grown through many different developments over the years and has seen its architectural style evolve along with it. The concept is to tie three of these styles together to visually celebrate the cities architectural language. The building will evolve along the facade from classical beach architecture to modern beach architecture allowing residents and the public to experience three different styles.

CITY MANAGER APPROVAL OF THE EXTENSION TO THE RIVERYARD MASTER DEVELOPMENT AGREEMENT

WHEREAS, on the __ day of _____ 202__, the **CITY OF PORT ORANGE, FLORIDA**, a Florida municipal corporation (the "City"), and **BRISTOL PORT ORANGE PARTNERS, LLC**, a Florida limited liability corporation ("Developer") entered into the Riveryard Master Development Agreement, recorded in Official Records Book _____, Page _____, Public Records, Volusia County, Florida ("MDA"); and

WHEREAS, pursuant to Subsection 12.D. of the MDA, the Developer may request an extension for good cause shown; and

WHEREAS, in accordance with Subsection 12.D. of the MDA, the Developer has submitted a request to the City Manager to extend the MDA for an additional, _____ ("Extension"); and

WHEREAS, as required for consideration of this Extension, the Developer has provided the supporting documentation demonstrating good cause for said request along with documentation of the continued commercially reasonable steps in the diligent pursuit to complete the obligations and meet the deadlines set forth in the MDA; and

WHEREAS, the Port Orange City Manager has determined that the execution of this Extension to the MDA is beneficial to the citizens of the City of Port Orange.

NOW, THEREFORE, the Parties, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, agree as follows:

The above Recitals are incorporated by reference into the body of this Extension Approval.

1. The City by and through the undersigned hereby approves the Developer's extension request to extend the deadline for _____as set forth in Section _____ for an additional _____, said date being_____("Extension Approval").

2. All other terms and conditions of the MDA shall remain in full force and effect.

3. This Extension Approval shall become effective immediately upon signature of the City.

STAFF REPORT
Riveryard Master Development Agreement
Case No. PRZA-23-0004

REQUEST:	Approval of the Riveryard Master Development Agreement and Conceptual Development Plan
LOCATION:	Northeast corner of Dunlawton Avenue and Ridgewood Avenue (Figure 1)
APPLICANT:	Bristol Port Orange Partners, LLC
PROPERTY OWNERS:	City of Port Orange; Port Orange Town Center Community Redevelopment Agency; Bristol Port Orange Partners, LLC; Joan L. Sheridan, Trustee of the Joan L. Sheridan Revocable Trust; JLS888, Inc.; Ralph and Tammy Heotzler
STAFF CONTACT:	Tim Burman, Community Development Director (386) 506-5675
STAFF RECOMMENDATION:	Approval
PLANNING COMMISSION:	Recommended Approval (6-0) July 27, 2023
PORT ORANGE TOWN CENTER COMMUNITY REDEVELOPMENT AGENCY (POTC CRA):	August 15, 2023
CITY COUNCIL:	August 15, 2023

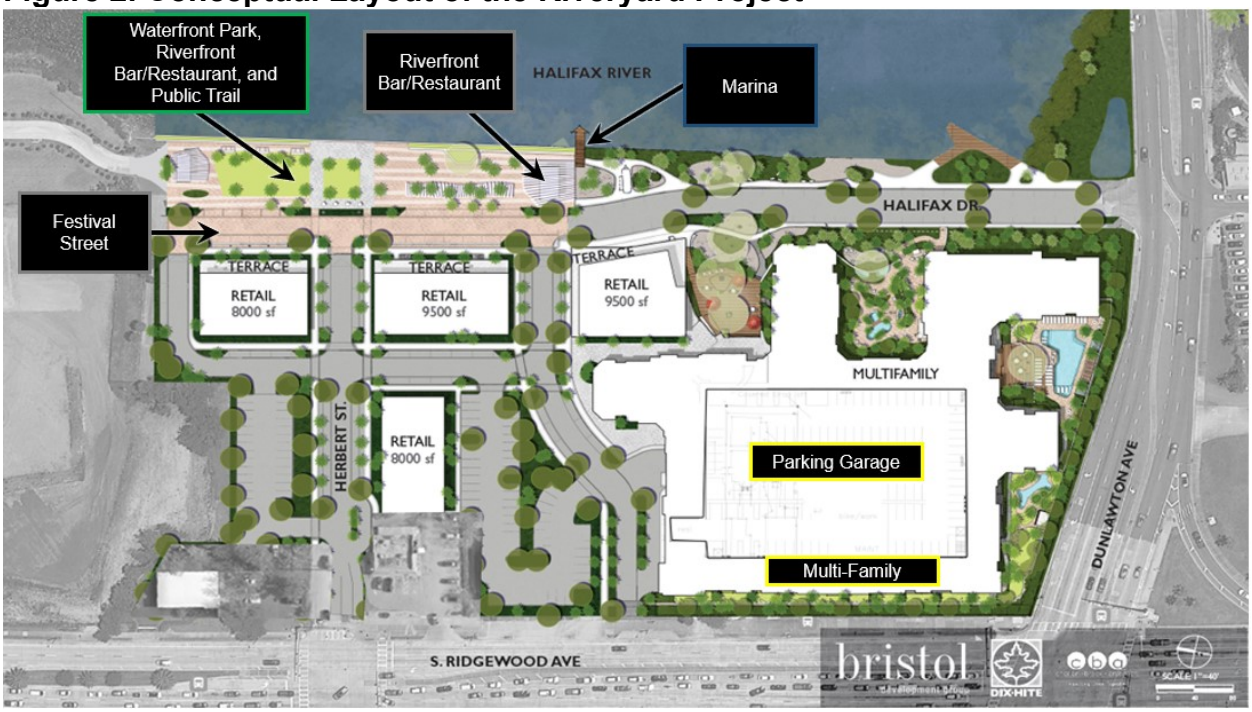
BACKGROUND
In December 2021, the City Council, and the Port Orange Town Center Community Redevelopment Agency (POCT CRA) selected the Bristol Development Group (Bristol) as the development group the city would begin to work with on a purchase agreement for the development of the Riverwalk area generally located south of Herbert Street. In March 2023, the City Council and the POTC CRA approved the First Amendment to the Contract for Sale and Purchase between the City (and POTC CRA) and Bristol Development Group. Over the last year and a half, Bristol has made considerable progress in key areas, including site assessments (surveys, environmental studies, soil borings, etc.), additional property acquisition, and refinement of the concept plan and construction estimates. The acquisition of additional land adjacent to the land being sold by the city has allowed Bristol to improve the layout of their project from their initial December 2021 layout.

DISCUSSION
Bristol is requesting approval of the Riveryard Master Development Agreement (MDA) and Conceptual Development Plan (CDP) for their transformative mixed-use project along the Halifax River. The areas included in the MDA and CDP include the ±11.03 acres of property located at the northeast corner of Dunlawton Avenue and Ridgewood Avenue and the ±1.4-acre former Dave's Pest Control property located in front of the Fysh Bar and Grill restaurant (Figure 1).

Figure 1. Location Map

The proposed MDA and CDP are for the development of a waterfront park (performance pavilion, trails, swings/benches, etc.), a riverfront bar/restaurant, ±30,000 square feet of commercial space, a hotel (optional), a multi-family building wrapped around a parking garage, a festival street, public parking spaces, private streets with on-street parking, associated infrastructure (water, sewer, and drainage) improvements, and an overflow temporary grass parking on the former Dave's Pest Control property.

Figure 2. Conceptual Layout of the Riveryard Project



The *Planned Community – Riverwalk* Future Land Use designation and Planned Commercial-Riverwalk (PC-R) zoning district were developed to create a walkable community with new-urbanism characteristics along the Halifax River that includes commercial, office, residential, civic, and entertainment uses. The PC-R zoning district applies to ±35 acres of land lying east of Ridgewood Avenue, and north of Dunlawton Avenue to the northern border of the city. This area is generally referred to as Riverwalk.

The PC-R zoning district is divided into five project types: Hi-rise residential, Mixed-use, Recreation/conservation, Marina, and Streetscapes (see Exhibit 1). There are district-wide regulations that apply to the five project types as well as specific regulations for each individual project type. The Riveryard MDA property is in the area of the PC-R designated as Mixed-use.

The MDA and CDP constitute a zoning document for a specific area within the PC-R zoning district, establishing permitted uses and certain development requirements. It does not grant approval of any specific development itself but rather establishes parameters for how the property can be developed. The flexibility from the standard code requirements is offered with the goal of creating a better-quality project with greater benefits for the public and the developer. The purpose of the MDA and CDP is to provide a flexible approach for unique and innovative land development proposals, which would otherwise not be permitted by the Land Development Code (LDC).

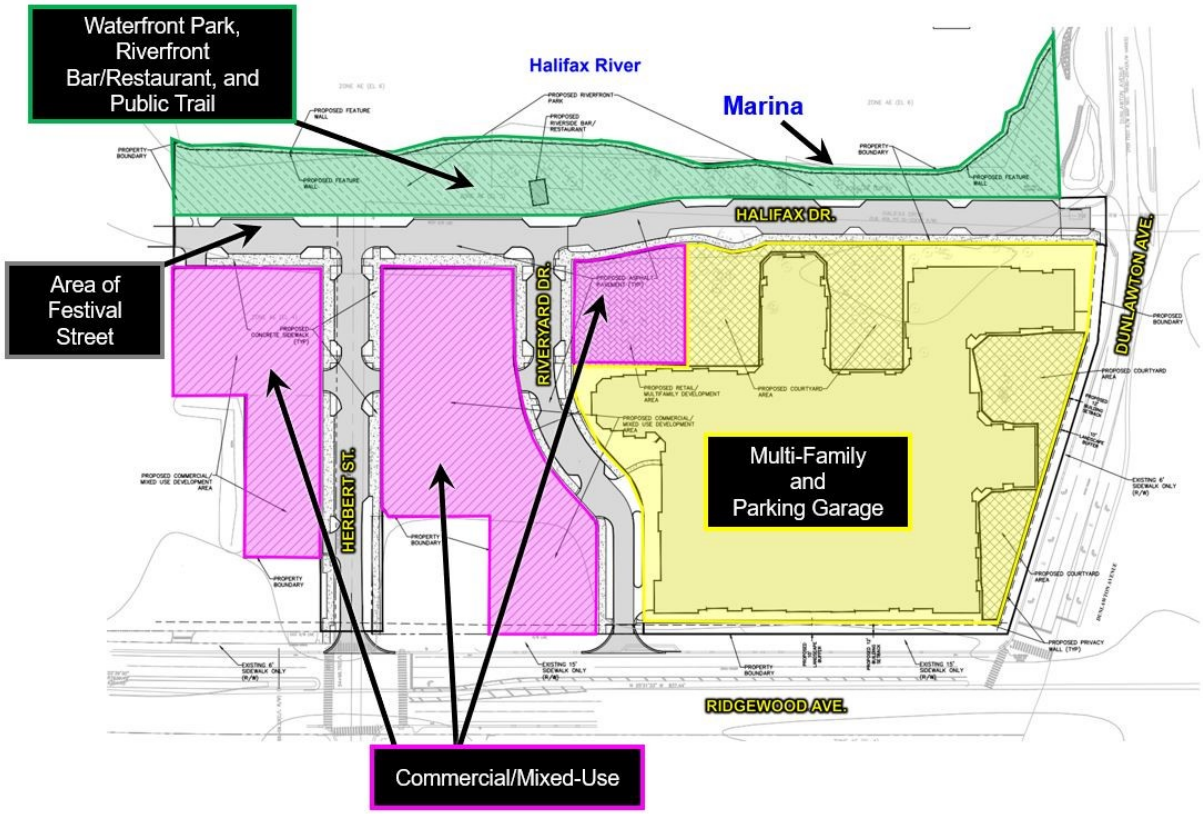
DEVELOPMENT PROPOSAL

If approved, the MDA and the CDP (Exhibits 2 and 3) will provide the regulatory framework for the development of the Riveryard project. The following discussion will focus on the significant aspects of the MDA and CDP such as the use, size, and development impacts.

General Site Layout

The proposed development will be located within the area defined in the MDA as the Riveryard project. The proposed development will be accessed from Dunlawton Avenue and Ridgewood Avenue via three private internal streets (Herbert Street, Halifax Drive, and Riveryard Drive). The proposed MDA and CDP are for the development of a waterfront park (performance pavilion, trails, swings/benches, etc.), a riverfront bar/restaurant, ±30,000 square feet of commercial space, a hotel (optional), a multi-family building wrapped around a parking garage, a festival street, public parking spaces, private streets with on-street parking, associated infrastructure (water, sewer, and drainage) improvements, and an overflow temporary grass parking on the former Dave's Pest Control property.

Figure 3. Riveryard Conceptual Development Plan



Phasing

The Riveryard project area is expected to be completed in phases and each phase will be required to have adequate access and infrastructure to support development. Most of the site infrastructure [utilities, stormwater, landscape buffers, and the Park Walkway (trail)], 20,000 square feet of retail and/or restaurant space, a riverfront bar/restaurant, on-site parking lots, parking garage, private roads (Riveryard Drive and Herbert Street), festival street (Halifax Drive), and waterfront park will be developed in Phase 1. The remaining building square footage, marina, multi-family building, parking garage, and day dock will be constructed in later phases. Past MDA's approved by the City Council allow projects to be developed in phases as long as necessary infrastructure has been inspected and approved by the city to allow a portion of the project to be open to the public.

According to the MDA, construction of Phase 1 shall be substantially complete within 48 months from the date of closing unless the closing date in the First Amendment to the Purchase & Sale Agreement is extended by mutual agreement of the Parties or tolled pursuant to Florida Statutes. Based on the current closing date, substantial completion of Phase 1 would need to be done by March 2028. There is no timeframe for the completion of the other proposed development beyond Phase 1.

The MDA allows for the City Manager to extend the deadline for substantial completion of Phase 1 for up to one year for good cause shown, upon request of the Developer, without the need for a formal MDA amendment. Any extension granted by the City

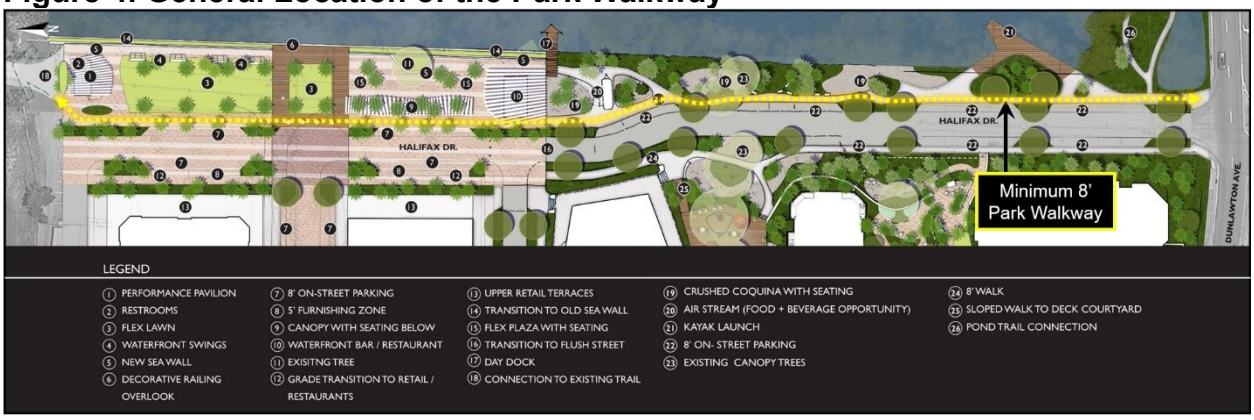
Manager must be processed pursuant to Exhibit E of the MDA – Form Extension of Time Approval Letter.

Parking
The parking areas for the proposed development are shown on the CDP. The parking for the multi-family units will be in a multi-level parking garage. Parking for commercial uses and townhomes will be provided in surface parking lots, on-street parking spaces, and lower levels of the parking garage. According to the MDA, a minimum of 100 surface spaces and 200 garage spaces will be set aside for the public accessing the commercial uses, waterfront park, and events on the festival street.

Permitted Uses
The following uses are proposed within the Riveryard project area: marina which allows for overnight stay for up to seven (7) days, multi-family, waterfront park, restaurants, retail sales, offices, banks, pet grooming/daycare, game/recreation facilities, health/exercise clubs, breweries, public/civic facilities, food truck court/parking, and uses currently allowed in the LDC for the Mixed-Use project type (Exhibit 4). The proposed uses are consistent with the *Planned Community-Riverwalk* Future Land Use designation, which states, "the area shall be a mixed-use entertainment location", "promote river-based activities and events to attract citizens", and "develop a unique riverfront location based on a healthy mix of entertainment, retail, office, and housing uses". The proposed uses provide entertainment and a usable riverfront for residents of Port Orange and tourists.

Infrastructure
The MDA provides for the development of a Waterfront Park (park) along the Halifax River from the northern to the southern boundary of the MDA Property which will include a performance pavilion, trails, swings/benches, restaurant/bar, docks into the Halifax River, green space, etc. and the continuous Park Walkway and portions of the park will be subject to public access easement.

Figure 4. General Location of the Park Walkway



According to the applicant, the purpose of this is to provide flexibility for a variety of walkway experiences along the waterfront, utilizing a curving, nonlinear walkway layout. According to the applicant the activation of the Waterfront Park is to provide a variety of pedestrian trails and mobility options, such as diverting pathways to wrap around different park features and enhances and promotes both views and access of the Halifax River.

The trails will be designed to be extension of existing trails within the Riverwalk area and create one unified pedestrian network.

Policy Considerations

Policy Consideration Related to the Applicants' Development Proposal: The applicant is requesting eight (8) deviations from the following LDC requirements that the applicant believes are necessary to create a development along the Halifax River that includes a mixture of commercial, residential, and entertainment uses.

1. Dimensional Criteria:
   The proposed development will adhere to the dimensional criteria in the LDC for the Mixed-Use project type in the PC-R zoning district, with the MDA allowing for the following deviations.

   a. *Maximum Building Height of 105 feet*: The current maximum building height for the subject property is 65 feet. According to the applicant, the requested height of 105 feet is to permit the necessary units to support the project and densification of the residential development in one area of the property to allow more of the site to be developed with commercial uses and public spaces, such as the Waterfront Park, Park Walkway, and activated streets. The additional height will also allow for the modern design and construction of the multi-family building, including taller ceilings for the ground floor spaces such as amenities, retail, and restaurant opportunities. The applicant also states that the exterior of the multi-family building wraps around the parking garage, so the garage is screened, and the additional height for the multi-family building is needed to enclose the parking garage.

   Figure 5: Architecture Rendering of the Multi-Tenant Building with Commercial Component

   b. *Minimum Lot Area*: Lot dimensional criteria will be provided as required by the Land Development Code (LDC), except for the lot area. The applicant is

requesting a 3,000 square feet lot area requirement in lieu of the 1-acre requirement in the LDC. According to the applicant, the proposed lot area is intended to allow for the potential development of commercial outparcels or smaller footprint lots that would accommodate a single user within the development footprint and allow parking areas and streets to remain common areas under the control of a property owners association. The requested flexibility in lot size is to provide for the potential development of unique use types and ensure that there is the ability to bring in desired uses. The applicant has stated that in past projects, certain retail and restaurant tenants want to own the real property on which the business is located outright instead of leasing a building footprint. The applicant states that the overall property will still be developed and designed as an aesthetically cohesive site with shared parking, stormwater, and utilities.

When the minimum lot width and area were established for the Mixed-use project type, it was anticipated that the entire Riverwalk project would be developed by a master developer, and the lot dimensional requirements were created to limit smaller-scale development that was not part of the master-planned project. The original development concept for Riverwalk has now changed to utilizing smaller-scale plans to create the mixed-use waterfront project.

c. *Minimum Building Setback - External to the MDA Area*: The applicant is requesting a 5-foot building setback in lieu of the 10-foot setback where the subject property is adjacent to a property not in the MDA or the Halifax River. According to the applicant, the requested 5-foot setback is intended to provide flexibility in the design of the project and allow for flexibility to shift buildings to save trees, provide more parking, or create more active outdoor spaces. The applicant is not requesting to reduce the building setback for Ridgewood Avenue or Dunlawton Avenue or visual clearance requirements in the LDC.

d. *Minimum Finished Floor Elevation (FFE)*: The applicant is requesting to use the current requirement in the LDC to determine the finished floor elevation FFE for the structures in this development. When the PC-R zoning district was adopted in 2007, a minimum FFE of 9 feet was established for any structure in the PC-R zoning district. Over the last 15 years, there have been updates to the flood area mapping that show an FFE of 7 feet is sufficient. The PC-R zoning district is the only zoning district in the City that establishes an FFE, the other 29 zoning districts defer to the City's Floodplain Management Ordinance in Chapter 8 of the LDC. According to the Floodplain Management Ordinance in Chapter 8 of the LDC, the FFE for this area would need to be a minimum of 7 feet.

   According to the applicant, the request to use a 7-foot FFE is based on updated flood area mapping completed since 2007 that shows that an FFE of 7 feet will be a minimum of 2-foot above the 100-year floodplain.

e. *Finger Pier Width*: The applicant has requested the width for a finger pier range between 4 feet to 8 feet in lieu of the maximum 3-foot width required by the

LDC. A finger pier is defined by the LDC as a narrow walkway extending over water to provide access between docked boats and the main access pier connection to the land. According to the applicant, the primary purpose of the extra finger pier width is safety. The applicant states that the requested width provides additional room for boaters to board and exit their vessels in a safer manner.

2. Parking: Parking will be provided as required by the Land Development Code (LDC), except for the multi-family use. According to the applicant, this parking ratio being requested is based on a parking study prepared by Walker Consultants, one of the leading parking consultants in the U.S. for mixed-use projects, specifically for the mix of uses proposed for the Riveryard project and the applicant's prior experience in the development of successful mixed-use projects. The parking demand used in the study was based on “peak demand” which is the point of highest demand throughout the year. The study looked at the full 24-hour cycle for both weekdays and weekends for all 365 days of the year to calculate what the anticipated peak parking demand would be for the proposed development. The analysis shows that the proposed ±1,000 parking spaces would be sufficient based on the parking standard developed for this project along with other project examples and analysis, including efficiencies in parking created by the mixture of uses within the site and the opportunity for internal capture and ride sharing options.

   a. *Residential Multi-Family*: The applicant has proposed a parking ratio of 1.3 spaces per residential unit instead of the LDC parking ratio of 1.5 spaces per residential unit with 1 bedroom and 2 spaces per residential unit with 2 or more bedrooms plus 0.25 visitor parking spaces per residential unit.

      The existing LDC parking requirements for residential uses were last updated in 1996. The applicant has stated that the proposed parking ratio will provide sufficient parking for multi-family complex based on the traffic typically generated by a multi-family development within a mixed-use project. The Institute of Transportation Engineers (ITE) Parking Generation Manual, 4th edition, indicates that the average parking ratio for a hi-rise apartment over a 24-hour period is between 1.15 to 1.52 spaces per residential unit. The proposed 1.3 parking spaces per residential unit is in the middle of the ITE suggested range. According to the applicant, the proposed parking ratio has been used in other mixed-use projects they have developed and provides sufficient parking for the multi-family complex. While the number of 1-bedroom units has not been finalized, the applicant has indicated that it will be slightly more than half of the total units, and typically 1-bedroom units are rented to one vehicle occupants. As for the 2 and 3 bedrooms, the applicant states that in their past projects, these units have ranged from the occupants having 1 to 3 vehicles and that by having more than half of the units as 1-bedroom allows for there to be more than 1 space available to the occupants of the 2- and 3-bedroom units.

   b. *Food Truck and Marina*: The applicant states that no additional parking spaces are required for food trucks since they are intended to serve patrons that live in

the multi-family complex or already visiting the site for special events or commercial uses. According to the applicant, the docks at the marina will only to be available to residents of the multi-family complex that have a boat or patrons of the commercial uses that visit the site by boat; therefore, parking is not needed for this use.

3. Parking Lot Design: The general location of the parking lots and parking garage are shown on the Conceptual Development Plan and will be developed in compliance with the requirements of the LDC, with the exception of the dimensions for the parking spaces. The LDC requires the width of a parking space to be a minimum of 10 feet and the depth to be 20 feet. The requested parking space dimensions for parking spaces in a surface lot, parking garage, and on-street, and the dimensions currently in the LDC are provided in Table 1.

Table 1

	Parking Space Dimensions Proposed in the MDA	Parking Space Dimensions in the LDC
Standard spaces and parking garage spaces	9’ x 18’	10’ x 20’
Parallel spaces	8’ x 20’	10’ x 22’
Compact spaces	8’ x 16’	8.5’ x 17’
45-degree spaces	9’ x 19.1’	10’ x 21.2’

The drive aisles width for the parking lots will be 24 feet wide as required by the LDC. According to the project engineer and applicant, the proposed parking space dimensions are common in similar mixed-used developments and will allow for adequate area to park and still provide for maneuvering for individuals to enter and exit their vehicles. The proposed 9’ width and 18’ depth requirements are consistent with other cities in the area and with many of the Master Development Agreements approved by the city for commercial developments within Port Orange (Pavilion, Altamira, Port Orange Gateway, and Riverwalk).

4. Tree and Landscape Requirements: The proposed development will comply with the landscape and screening requirements of the City's LDC, with the exceptions of the following:

   a. *Specimen Tree Preservation*: According to the LDC, a certain percent of of the specimen trees on a property are required to be preserved based on the number of specimen trees per acre on site. The applicant anticipates having to remove a majority of the specimen trees required to remain due to the amount of fill required to meet the code. The project engineer and landscape architect do not anticipate the trees surviving with an additional 2 to 3 feet of fill on the tree’s root systems.

      According to the project engineer, if the minimum finished floor elevation for all structures is 7-feet (see page 6), a substantial amount of fill (approximately 2 to 3 feet) will be needed to raise the site. The existing site topography and adjacent rights-of-way (Halifax Drive, Herbert Street, and Ridgewood Avenue) range from elevation 4.0 to 5.0. The proposed structures are expected to be

designed with a first-floor elevation of 7 feet, and the surface parking areas and private roads that support the development range from elevation 5 to 6.5.

In addition, the central location of a majority of the specimen trees on the project area and the finish floor elevation requirement did not allow for many options to accommodate buildings, associated parking, stormwater, and preservation of specimen trees. The project engineer considered and analyzed other site layouts but was unable to preserve the existing trees and allow for the proposed use of the property.

The applicant is proposing to save certain specimen trees along the Halifax River and Dunlawton Avenue but does not believe that the number that will remain will comply with the code and therefore has requested to waive the specimen tree requirement.

b. *15% Tree Preservation*: The LDC requires that fifteen percent of the project area be designated for the protection of existing trees. The size of the project area is 12.4 acres. The required tree preservation area for the project is 1.86 acres. The applicant is requesting approval to not be required to preserve 1.86 acres of the existing trees on the site.

According to the project engineer, if the minimum finished floor elevation for all structures is 7 feet , a substantial amount of fill (2 to 3 feet) will be needed to raise the site above the 100-year floodplain. The existing site topography and adjacent rights-of-way (Halifax Drive, Herbert Street, and Ridgewood Avenue) range from elevation 4.0 to 5.0. The proposed structures are expected to be designed with a first-floor elevation of 7 feet, and the surface parking areas and private roads that support the development range from elevation 5 to 6.5.

In addition, the central location of a majority of the specimen trees on the project area and the finish floor elevation requirement did not allow for many options to accommodate buildings, associated parking, stormwater, and preservation of specimen trees. The project engineer considered and analyzed other site layouts but was unable to preserve the existing trees and allow for the proposed use of the property.

The applicant is proposing to save certain trees along the Halifax River and Dunlawton Avenue but does not anticipate that the number that will remain will comply with the code and therefore has requested to waive the 15% tree preservation requirement. In addition, the tree preservation requirements in the LDC are designed for new “greenfield” development where developers can set aside areas for tree preservation and do not need a significant amount of fill. The proposed project requires fill and is to function as a dense, walkable mixed-use project, and areas for tree preservation are limited.

c. *Tree Per Square-Foot Requirement:* The LDC requires on new construction projects there be 1 tree per 2,500 square feet. The applicant is requesting the ratio be modified to be 1 tree per 5,000 square feet. As discussed above, due to filling needed on the site a majority of the existing trees will be removed and

due to the urban design of the project with activated streets, building closer to the street, and outdoor dining areas, there will be less room to replant trees and in areas that they will thrive. According to the applicant, they plan to save as many of the trees as they can and will create aesthetically landscaped streetscapes, surface parking lots, and courtyards but do not anticipate being able to provide the estimated 216 trees on the site once the project is completed as required by the LDC. Therefore, the applicant is requesting a ratio of 1 tree per 5,000 square feet.

According to the applicant, there is a conflict with the PC-R Zoning district and the tree preservation requirements in Chapter 9 of the LDC. According to the PC-R zoning district, the maximum impervious area for the Mixed-Use district is 100% of the site, and if the site can be designed with 100% impervious area there would be no room for tree preservation. The applicant does not intend to develop the site as 100% impervious but does need adjustments to the tree preservation requirements due to how this project will be designed as a dense, walkable mixed-use project.

d. *Foundation Plants and Landscape Islands*: The LDC requires foundation plants and understory trees adjacent to all sides of a building visible from an adjacent property or street. Due to the urban design of this project, the applicant is requesting to establish a streetscape design requirement for buildings located along the internal private roads within the project instead of having to install shrubs and understory trees adjacent to commercial storefronts. As shown in Figure 6, the intent is to activate the space adjacent to the commercial buildings with outdoor dining, seating, and walkways and create tree-lined private streets to separate the street from the active area adjacent to the roadway.

Figure 6: Example Streetscape Guideline

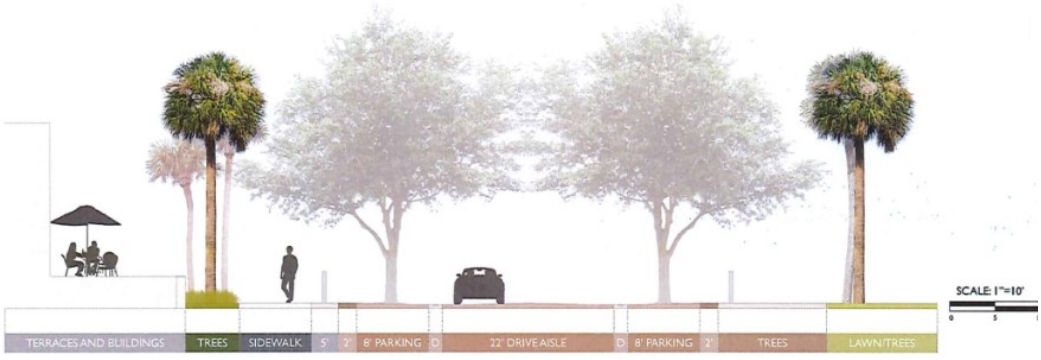


EXHIBIT C: RIVERYARD SOUTH STREETSCAPE GUIDELINES | Halifax Drive Flush Street Condition
Bristol Development Group

The MDA also includes planting requirements for landscape islands that states plantings are not required to be designed to look organic/curvilinear due to the urban design character of the project. According to the applicant, these modifications are intended to provide flexibility to provide a more urban and activated environment for the development, which allows for intentional landscaping design that provides necessary green infrastructure such as shade, beautification, and greenery within the development while ensuring the

type, quantity, and maintenance of the landscaping is appropriate for the use of the site along the Halifax River and to create an interconnected streetscape system that is favorable to pedestrian movement and view of the space. Landscaping is proposed to be placed in an intentional layout to promote separation between roadways and pedestrian areas, support coverage of walkways and drive aisles through shade tree placement in parking islands and along sidewalk areas.

5. Transportation Concurrency Exception Area (TCEA) Mobility Enhancements: The PC-R zoning requires all properties in Riverwalk to pay an assessment fee (5% of the total transportation impact fee for the proposed development in addition to required transportation impact fee) and to participate in transportation improvements and strategies for the entire PC-R. At this time, project-wide transportation improvements and a process to implement them have not been identified or created. The MDA states that Bristol Development Group shall pay customary City transportation impact fees but shall be exempt from paying the additional 5% transportation impact fee associated with the Port Orange Riverwalk PC-R District.

6. Signage: The proposed development will comply with the signage requirements (sign area, sign height, appearance, etc.) of the City's LDC, with the exceptions described below:

   a. *Murals*: The LDC allows a mural to occupy up to 75% of a building façade or structure. According to the applicant, in their past developments where murals have been painted, the murals have been closer to occupying 100% of a façade. While the applicant has not indicated a location for a mural on the CDP, the applicant is requesting to increase the permitted area to ensure there is sufficient area for murals if they decide to have murals in this project.

   b. *Construction Fencing*: The MDA allows for signage on construction fencing. This is very common for large-scale projects to not only advertise the contractor but also market the project. The fencing would still be required to meet the city's standard for height and setback.

Figure 7. Example of Construction Fencing Signage

c. *Square-Footage for a Site Sign and Number of Site Signs*: The MDA allows any site sign installed to be a maximum of 64 square feet in lieu of 32 square feet in the LDC, and a maximum of three (3) large site signs. According to the applicant, typically, the signs are used to identify the project, design team, lenders, future tenants, and marketing for the project. Due to the size of this project, the applicant is requesting to allow for additional square footage to be able to identify all the disciplines involved in the project, tenants, and market the project.

7. Temporary Overnight Docking: The applicant is proposing a marina in a future phase to allow for docking of rental boats and transitory boats. The applicant is requesting approval to allow overnight docking of boats at the marina. The temporary overnight docking would allow boat owners to sleep overnight in their boat docked at the marina for a period not to exceed seven (7) consecutive days. According to the MDA, the developer will be required to provide water and electric to any boat using a dock overnight.

   The applicant is requesting to be exempt from the LDC requirement that prohibits a watercraft from being used for a dwelling for a period of more than 24 hours after such watercraft have been brought into the city.

8. Minor Modifications: The LDC currently allows for administrative adjustments of dimensional requirements when the adjustment is less than 10% for dimensional requirements or unique dimensional circumstances that impact the installation of landscape materials, access drives, sidewalks, new construction materials or methods similar to those required by the city's standard construction details, etc. Many of the administrative adjustment provisions currently allowed by the LDC are not typically captured in an MDA, which can lead to several amendments over minor adjustments that are discovered once final engineering is done and more detailed design data is available, especially for a large and unique development.

   The minor modification language in the Riveryard MDA attempts to capture the flexibility already allowed in the LDC for staff to allow minor adjustments that typically come up from unforeseen circumstances in the final design review or in the field but do not change or alter the overall concept of the project. For major adjustments that would change or alter the project, these would still be required to go through the formal MDA and CDP amendment process that requires review by Planning Commission and City Council.

CONSISTENCY WITH COMPREHENSIVE PLAN & PORT ORANGE TOWN CENTER CRA PLAN

The subject property is designated *Planned Community-Riverwalk* on the City's Future Land Use (FLU) Map. The *Planned Community-Riverwalk* land use standards, as well as the policies within the Port Orange Town Center (POTC) CRA Plan are to guide the development of a walkable development along the Halifax River that includes commercial, office, residential, civic, and entertainment uses. The proposed development has components of new urbanism (housing, entertainment, and public space) and will be integrated with the Riverwalk Park to continue the improved public trail along Halifax Drive

and development north of Herbert Street to achieve the overall walkability goals for the entire Riverwalk area.

The proposed MDA has been determined to be consistent with the City's Comprehensive Plan and the POTC CRA Plan with regard to density and intensity, permitted uses, and overall design.

PUBLIC NOTICE

The property was posted by Staff on June 9, 2023, notifying the adjacent properties of the proposed MDA. As of the time this agenda item was prepared, there have been no phone calls on the proposed MDA.

RECOMMENDATION

Staff recommends approval of the Riveryard Master Development Agreement and Conceptual Development Plan, subject to approval of the policy issues discussed in the staff report as requested by the applicant and the City Attorney's review of legal form and content.

RIVERYARD
MASTER DEVELOPMENT AGREEMENT

The **CITY OF PORT ORANGE, FLORIDA**, a Florida municipal corporation and Port Orange Town Center Community Redevelopment Agency, a special purpose district unit of government organized under Chapter 163, Part III, the Law of Florida both located in Volusia County, Florida (collectively "City"), Joan L. Sheridan, Trustee of the Joan L. Sheridan Revocable Trust, JLS888, Inc., Ralph & Tammy Heotzler and Bristol Port Orange Partners, LLC, a Florida limited liability company (collectively "Owners") and Bristol Port Orange Partners, LLC, a Florida limited liability company in its capacity as the developer of the Property ("Developer"), hereby agree and covenant, and bind their heirs, successors, and assigns, as follows:

1. PROPERTY DESCRIPTION AND OWNERSHIP.

A. The property subject to this Agreement consists of approximately 12.43 +/- acres of real property ("Property") and is described in Exhibit "A", attached hereto and by reference made a part hereof.

B. The Property is under the sole ownership of City and Owners and under contract (the "Riverwalk Purchase & Sale Agreement") for purchase by Developer. All references herein to "Developer" shall be deemed to refer to Bristol Port Orange Partners, LLC or their respective successors in ownership interest of the Property.

2. EXHIBITS.

The Exhibits listed below are by reference made a part hereof, and copies or reduced size copies are attached hereto. Full-sized copies of the Exhibits shall be retained by the City Clerk and shall be controlling in case of any ambiguity in the Exhibits. In the event of a conflict between the graphic illustrations of any Exhibit and the textual provisions of this Agreement, the textual provisions shall control.

Exhibit A: Property Legal Description and Survey, date certified _____, prepared by _____.

Exhibit B: Conceptual Development Master Plan, rev. date _____, prepared by _____.

Exhibit C: Streetscape Guidelines Exhibit

Exhibit D: Riverwalk Architectural Styles Exhibit

Exhibit E: Form Extension of Time Approval Letter

3. DEVELOPMENT PLAN.

A. Owner has designated the Property as the "**Riveryard Master Development**".

B. The Property will be developed under the **Planned Community – Port Orange Riverwalk (PC-R)** zoning district pursuant to the City's Land Development Code (LDC). Development shall be controlled by the LDC and the terms and provisions of this Agreement. In the event of a conflict between this Agreement and the LDC or other ordinances, this Agreement shall control.

C. Exhibit B (Conceptual Development Plan) generally depicts the proposed layout of land uses, parking areas, streets, driveways, access points, stormwater management features, and other potential features or improvements to the Property.

D. LOT DEVELOPMENT CRITERIA. The following lot development criteria shall apply to the Property.

(1) The following modified lot development criteria shall apply to commercial and multifamily development throughout the Property:

(a) Maximum overall residential density: a maximum density of 460 units (37 units/acre).
(b) Maximum building height: 105 feet, excluding architectural embellishments or design elements.
(c) Minimum lot area: 3,000 sq. ft.
(d) Minimum lot width: N/A
(e) Minimum lot depth: N/A
(f) Minimum Building Setbacks:
  (i) Dunlawton: 12'
  (ii) Ridgewood: 12'
  (iii) External to boundary of the Property: 5'
  (iv) Internal to boundary of the Property: Seawall 5', Halifax Drive 5', Herbert Street 5', and All other internal boundaries 0'
(g) Minimum living area/dwelling unit: 500 sq. ft.
(h) The base flood elevation (BFE) for the Property will be determined by the FEMA Flood Insurance Rate Map. The finished floor elevation (FFE) shall be a minimum elevation of 7.

4. CONFORMANCE WITH COMPREHENSIVE PLAN.

A. The City has determined that the Property is suitable in size, location, and character for the uses proposed, and that the uses proposed are consistent with the City's Comprehensive Plan.

5. PERMITTED USES.

All uses permitted within the PC-R Mixed Use district shall be permitted, along with the following additional uses within the Property:

Bike, kayak & other recreational equipment rentals
Banks
Office (permitted on any floor)
Animal grooming or wellness, pet day care (no overnight stays)
Game/recreation facilities
Health/exercise clubs
Brewery
Amphitheater
Multifamily dwellings and Townhomes
Food Truck Court/Parking – allowed in the area designated on the CDP as commercial, private roadway, and waterfront park.

Accessory and temporary uses are permitted within the site that are incidental to the principal uses outlined herein and are part of the scale or scope of everyday operations. Temporary uses, such a social programming, art displays, exercise classes, and similar activities targeted towards activation of the Property shall be permitted without the need for formal Special Event review by the City, so long as the event does not contemplate any of the following: (1) Affects the public roadway network and area(s) beyond the City of Port Orange; (2) Requires one or more public roadway closures; (3) Has hours of operation extending beyond 11:00 p.m.; or (4) Extends for a period over twenty-four hours.

In the areas illustrated on the CDP, temporary staging and parking shall be permitted as an interim use until redevelopment of the portion of the property used for such use.

6. INFRASTRUCTURE.

A. ROADS. Roadways may be comprised of asphalt, concrete (stamped or colored permitted), or paver. Sidewalks at least 4' wide shall be constructed on private streets, and may be comprised of concrete, paver, wood composite materials, or other similar materials, with a minimum sidewalk width of 12' along Ridgewood Avenue with the approved white walklights for the Riverwalk District every 100' and a minimum width of 6' along Dunlawton Avenue. Sidewalks shall provide pedestrian connectivity to major thoroughfares. Internal roadways providing interconnectivity between parcels shall be developed at a minimum width of 20' for two-way traffic (excluding curb). On-street parking facilities supporting the development may be constructed as a part of the private roadways within the development. Roadways may be located within standalone tracts, at the determination of the

Developer and approved under the City's permitting process. Alternate standard, decorative, and lighted bollards deviating from City standards shall be permitted. Lighting for roadways and parking areas shall permit alternative decorative and standard street lights and walkway lights deviating from City standards, except that street lights on Ridgewood Avenue will match City standards for the adjacent section of Ridgewood Avenue. Final fixture selections for bollards and lighting shall be submitted to City for review and approval during the site plan review.

B. WASTE MANAGEMENT. Waste Management within the project may be managed with a central trash facility with trash compactors sized sufficiently to accommodate the entire project. Trash from all buildings within the site will be collected in trash receptacles located within buildings or in screened areas adjacent to buildings. These trash receptacles will be collected by a valet trash service during evening hours and taken to the central trash facility. The central trash facility will be served by a private waste management service, with pickup frequency sufficient to service the level of waste being created within the project.

C. WATERFRONT PARK/COMMUNITY GREEN.

(1) The project shall include a community waterfront park with a minimum size of 55,000 square feet along the waterfront boundary of the Property that is subject to an easement to the City allowing reasonable use and enjoyment – this area is intended to create a centralized social interaction space for residents and visitors that serves as an organizing element and focal point for the heart of the project, including a continuous path from the northern to southern boundaries of the park (the "Waterfront Park"). The space is intended to be activated by various events for residents and visitors, including programming by the Developer. The Waterfront Park shall contain a continuous walkway with a minimum of 8-feet in width from the northern to the southern boundaries of the Property (the "Park Walkway"), which shall be subject to a public access easement as set forth herein. The Waterfront Park may include a commercial bar or food service area and may also include a dedicated parking spaces for one or more food truck.

(2) In furtherance of the public access to the riverfront, the Developer will provide two public access easements over the portions of the Property described herein as the Waterfront Park and the Park Walkway. More specifically, the Developer will provide a fully executed and recordable easement for the public's permanent right of access to, over and across the portion of the Property described herein as the Park Walkway in a form agreed to by the Parties, to be recorded immediately upon closing on the portion of the Property owned by the City. In addition, the Developer will provide a fully executed and recordable easement for the public's permanent right of access to, over, and across the portion of Property described herein as the Waterfront Park along the western boundary of the Property from the southern boundary to the northern boundary of the Property, subject to the following conditions and restrictions reserved to the Grantor as set forth in the easement document, (a) the right to block public access to the easement lands during the construction of the improvements or other forms of permitted construction activity over said property; (b) the right to adopt reasonable regulations to assure that activities exercised by the public do not interfere with normal business operations including the Grantor's right to request trespass, and request enforcement of all other local, state and federal laws; (c) the right to use the easement lands for Grantor's use and construction of improvements thereon

so long as such use and improvements do not unreasonably interfere with the non-exclusive easement rights granted herein; and (d) the right to run utilities and irrigation piping under the easement lands, in a form agreed to by the Parties, to be recorded immediately upon closing on the portion of the Property owned by the City. The easement document shall be accompanied by consent and joinder from all entities that encumber the lands subject to this easement instrument. The easement shall include the City's right of self-help if Grantor and its successors and assigns fail to maintain said access as granted and prescribed in the easement document; and

D. PARKING. Parking shall be developed consistent with the LDC, except as modified herein.

(1) Multifamily development may include multi-level garages, one-car garages, two-car garages and surface parking and shall be developed at a minimum ratio of 1.3 parking spaces per dwelling unit. Parking for multifamily residential uses may be provided through the use of tandem garage/parking spaces so long as the tandem spaces are assigned for the exclusive use of one residential unit.

(2) Commercial uses within the Property may be permitted at a ratio of 5 spaces per 1,000 square feet.

(3) No additional parking shall be required for Food Truck or Marina uses, as this use is intended to be supportive of other proposed uses and transitory in nature.

(4) Of the required parking provided for the Property, a minimum of 100 surface spaces and 200 garage spaces will be set aside for use by the public, although such spaces shall count towards the minimum required parking standards for individual use types. The Property shall be subject to the following modified standards for parking details:

(5) Surface Parking dimensions. The minimum parking dimensions on site shall be as follows: 90 Degree Spaces measuring 9' x 18', Parallel Spaces measuring 8' x 20'. Parking areas shall have a minimum drive aisle width of 22'. Compact spaces are allowed up to 10% of total required spaces and shall be a minimum of 8'-0" x 16'-0". Angled parking spaces are allowed except on Halifax Drive and Herbert Street and shall be 45 degree angle, 9'0" min. width from side to side, 19'1" min. depth from curb to back of space, and 12'9" min. width as measured along the curb from space to space.

(6) Garage Parking dimensions shall be as follows:

Parking Space: 9'-0" wide x 18'-0" deep
Drive Aisles: 24'-0" wide minimum

E. LANDSCAPING. Except as otherwise provided herein, landscaping shall be developed consistent with the LDC. The Property shall not be required to provide perimeter buffers between different use categories within the Master Development boundary, so long as perimeter landscaping requirements along the boundary of the MDA have been met. Clustering of typical landscape requirements shall be permitted so long as the net total landscape material as required herein is still met,

including requirements related to interior parking lot and parking lot islands. The Property shall be subject to the following modified standards:

(1) Tree Preservation standards set forth in Chapter 9, Article II of the City's LDC shall be modified for the property so that the following alternative requirements are met: Effort shall be made to preserve trees in naturalized area such as along the Halifax River. Effort to preserve trees across the site shall not inhibit the desired site plan. Due to the urban development character, a total of 1 tree for every 5,000 SF of site area shall be required. Specimen tree and buffer tree preservation requirements in the LDC shall not apply within the Property.

(2) Landscape materials shall be designed to display variety and color by utilizing primarily native species that provide variation in color, texture, habit, and flowering.

(3) Landscape beds shall not be required to be organic, curvilinear, or clustered to simulate a natural rather than man-made appearance.

(4) Visual screening of the multi-family building at street level along Ridgewood Avenue and Dunlawton Avenue shall consist of either opaque decorative fencing, wall, living wall (vegetation), or a combination of the three (i.e., a 4' fence and hedge on top of a 2' retaining wall). So long as the overall height is a minimum of 6' and a maximum of 8' of combined elements measured from the bottom of the wall, the requirements of the visual screening shall be met. Fencing or walls shall be coordinated with landscaping to limit the impact of higher fence heights on the visual view of the site.

(5) Maximum fence height: 8' (such height shall not include the portions of a retaining wall that is located sub-grade)

(6) In parking area terminal islands, one shade tree or two understory trees shall be required in each terminal island, regardless of size.

(7) In parking area interior islands, one shade tree or two understory trees shall be required for every 400 square feet of interior landscaped area located in interior islands, or fraction thereof.

(8) In the transfer of interior parking landscape areas to the perimeter of the property, a minimum of one shade tree or two understory trees shall be required for every 400 square feet of interior landscape area, or fraction thereof.

(9) Foundation plantings are required around all buildings but may be located further than 25' from the foundation of the building or may be exempt according to the following:

(a) No foundation planting shall be required for non-residential use buildings within the development, although Streetscape planting requirements shall be applicable to buildings non-residential use adjacent to a private right-of-way, as illustrated on Exhibit C - Streetscape Guidelines Exhibit.

(b) No foundation planting shall be required for any building or sign in the Waterfront Park.

(c) No foundation plantings shall be required for a multi-family building adjacent to hardscape elements (outdoor dining, entry plazas, pool decks, amenity spaces, private yards, etc.).

(10) No understory or shade trees shall be required at the perimeter of outdoor activity areas, such as community pools and other recreational features, except shrubs, screen wall or fence between any outdoor activity areas and a right-of-way to provide sufficient screening of the outdoor activity areas from a right-of-way.

(11) For landscaping adjacent to fences, walls, or dumpster enclosures, the shade tree requirement shall be waived, although understory tree requirement shall still apply, unless prohibited by the terms of any public utility easements.

(12) Irrigation shall not be required to have 100% coverage. Areas of drought-tolerant native planting may have temporary irrigation systems with tubing laid out on the ground surface to irrigate during an establishment period of a minimum of 3 months, after which point the temporary irrigation may be removed. Application of this provision shall require signed approval by the project landscape architect in each specific case.

(13) Coordination of landscaping shall be addressed at Site Plan; however, the following perimeter landscaping strips shall be required for the Property's overall periphery, and may include improvements such as retaining walls, easements, utilities, driveway access points, and sidewalks and shall include two (2) shade trees, two (2) understory trees, and 20 shrubs per 100 linear feet:

(a) Dunlawton Avenue: 10'
(b) Ridgewood Avenue: 10'
(c) All other External Perimeters of Property: 5'

7. MARINAS. Development of marina facilities shall be permitted within the Property in accordance with the City of Port Orange, Florida Land Development Code, any applicable county, state, and federal law and subject to the following standards:

A. The marina use may include public recreational facilities and uses, such as recreation areas, kayak launches, water taxi service and drop-off, and similar areas of public activation for the space.

B. Overnight stays, not exceeding a maximum term of seven (7) days per stay, shall be permitted within the marina area.

C. The marina shall not be required to provide pump out facilities.

D. Finger pier width may range from 4'-8'.

E. Any wetland or mangrove impacts will be subject to applicable state and/or federal permitting, whose determination on permitted activities and impacts shall control.

8. ARCHITECTURAL AND DESIGN STANDARDS.

A. All buildings and accessory structures constructed within the Property shall be developed in compliance with the requirements of this section, and with the applicable provisions of the LDC relating to architectural standards, where they do not conflict with the provisions of this section.

B. All of the following requirements shall be met within the Property:

(1) All buildings and accessory structures shall be consistent with a limited set of architectural themes, as described as Florida vernacular architectural style, including Key West, Marina/Coastal, and Mediterranean with nautical themes, and those styles shown in the attached Exhibit D, Riverwalk Architectural Styles. The theme shall be established by harmoniously coordinating the general appearance of all buildings and accessory structures, including but not limited to: exterior wall finishes or materials; roof styles, slopes, and materials; colors; and architectural details and ornamentation.

(2) All structures shall complement one another and shall convey a sense of quality and permanence.

(3) False or real windows shall be provided on all elevations visible from the public or private right of way in sufficient size and number to complement the proportions of the building.

(4) The physical appearance of all parking lot lighting fixtures shall be complementary within each phase of development of the Property.

(5) The maximum area for murals shall be 100% of an eligible building façade or accessory structure.

9. ENVIRONMENTAL CONSIDERATIONS.

Compliance with the environmental preservation code provisions set forth in the LDC may necessitate modification of the conceptual plan.

10. SIGNAGE.

A. Signage for commercial uses on the Property shall conform to signage standards set forth in the LDC for Mixed Use development, except as modified in a comprehensive sign package approved as an amendment to this Agreement. The Property shall be subject to the following modified standards:

(1) Decorative construction fencing and signage shall be allowed during construction (i.e. printed murals on construction fence, etc.).

(2) Site signs, limited to a maximum of 3 site signs within the site, may be a maximum of 64SF and V-shaped.

11. TRANSPORTATION CONCURRENCY.

The Project Area Property is located within the Transportation Concurrency Exception Area (TCEA) established for the Port Orange Town Center Redevelopment Area and is thus exempt from the transportation concurrency review procedures of Chapter 4 of the LDC. The Developer shall submit a traffic impact analysis (TIA) to the City. The Developer shall be exempt from participating in the transportation system management and transportation demand management programs under the LDC Chapter 17, Section 30(b)(5). The Developer shall pay customary City transportation impact fees but shall be exempt from paying the additional 5% transportation impact fee associated with the Port Orange Riverwalk PC-R District.

12. EFFECTIVE DATE; COMPLETION SCHEDULE.

A. This Agreement shall be effective upon execution by all parties. The restrictions on use and development imposed by this Agreement shall be binding upon all successors in interest in the Property, unless and until the City alters or eliminates such restrictions in the course of its actions as zoning authority.

B. The initial phase of development shall, at a minimum, include the Waterfront Park, Park Walkway, Halifax Drive, Herbert Street, Riveryard Drive, a riverfront bar/restaurant, and issuance of a Certificate of Completion on a minimum of 20,000 square feet of shell building for the purpose of retail and/or restaurant space and a minimum of 100 parking spaces dedicated to public use ("Initial Phase"), provided that if additional square footage is provided within this phase, the minimum parking standards set forth in the LDC and this Agreement shall be met, as described herein and depicted on the CDP, attached hereto as Exhibit "B".

C. Construction of the Initial Phase of development shall be substantially complete within 48 months from the date of closing, unless otherwise extended by mutual agreement of the Parties, or tolled pursuant to Florida Statutes. As applied herein, a project is defined as substantially complete when the project (or specific part thereof) can be utilized for the purposes for which it is intended ("Substantial Completion" or "Substantially Complete").

D. Failure to comply with the schedule set out above shall cause the development rights granted pursuant to this Agreement to lapse, unless it is extended as provided herein. Any vested development rights shall be permitted to remain in place pursuant to the terms hereof. The City Manager may extend such deadlines for up to one year for good cause shown, upon request of the Developer, without need for formal amendment to this Agreement. Said request shall include good cause for the extension and the provision of supporting documentation demonstrating the continued commercially reasonable steps in the diligent pursuit to complete the obligations and meet the deadlines set forth herein. Any extension granted by the City Manager in accordance with this Subsection12.D., will be evidenced by use of the *City Manager Extension to the Riveryard Master Development Agreement* substantially in the form attached hereto as **Exhibit "E"**, and made a part hereof by this reference. If Developer requests an extension of any schedule within this Section 12, such approval will not be unreasonably withheld or delayed.

13. MINOR MODIFICATIONS.

A. The following may be administratively authorized as minor modifications to this Agreement:

(1) Modifications to an Exhibit that are necessary for compliance with the text provisions of this Agreement, or extra-jurisdictional permitting requirements that address technical considerations that could not reasonably be anticipated during the approval process;

(2) Modifications having no material effect on the character of the basic concept and terms of the Agreement. These may include, but are not limited to, the following:

(a) Structural alterations that do not significantly affect the basic size, form, style, and appearance of principal structures;

(b) Shifting in the location and configuration of access points, streets and driveways that do not adversely affect vehicular access and circulation on or off the site;

(c) Shifting in the location or configuration of buildings, parking areas, landscaping, or other site features;

(d) Shifting in the location and configuration of public infrastructure facilities that do not have a significant impact on the City's utility and stormwater management systems; and

(e) Decreases of 5% or less in the total number of parking spaces, except for the minimum number of public spaces set forth in Section 6.D.(5) herein.

(f) Modifications of up to 20% to any of the dimensional or landscaping requirements set forth in the MDA and associated Exhibits, where such modifications are necessary to address minor Exhibit errors or unanticipated conditions that reasonably need to be addressed to ensure the development plan can be implemented.

B. Requests for minor modifications shall be submitted in writing on forms provided by the City. Requests shall be reviewed pursuant to the general technical review process described in the LDC.

C. Denial of a requested minor modification shall be issued in writing to the applicant. Upon denial, or if more than 60 days elapses after the submittal of a completed application without a decision by the City, the applicant may apply for an amendment to the agreement.

D. Approved modifications shall be noted on the official plan documents.

14. AMENDMENTS.

A. Any revision to this Agreement other than a minor modification as described above shall require an amendment approved by the City Council after review and recommendation by the Planning Commission.

B. In recognition of the City's general police power authority to rezone and legislate land uses and zoning requirements, all signatories to this Agreement and all individual lot owners, fee titleholders, mortgagees, or lien holders who now or hereafter own property subject to this Agreement, agree as follows:

(1) Proposed amendments will be subject to the review procedures and standards set forth in the LDC.

(2) The City, and the owner of the Property or portion thereof that is directly impacted by the amendment, are necessary parties to the amendment.

(3) The owners of all other lots within the Planned Community that are not directly impacted by the amendment are not necessary parties to the amendment.

(4) If this Agreement requires the creation of a property owners' association for purposes of owning and operating common areas and common facilities, and the association is in existence at the time of submission of an application to amend this Agreement, the association will be deemed to be an affected party with respect to the amendment.

(5) A lot is "directly impacted" for purposes of the provisions above, only when the amendment would revise the listed uses, dimensional requirements, architectural requirements, sign

requirements, or other development or use requirements for that lot.

C. No property owner other than one who actually executes an amendment shall be deemed to have waived his or her right to challenge a proposed or executed amendment in the same manner that an affected property owner may challenge zoning or related lot specific changes for property which is not subject to a Master Development Agreement. Such challenges include: (i) objections to a proposed amendment before the City Planning Commission or City Council, (ii) seeking certiorari review or injunctive action in relation to the adoption of such amendment as provided by law, or (iii) consistency challenges as provided for in Section 163.3215, Fla. Stat., or any successor provision.

15. POLICE POWER AND SOVEREIGN IMMUNITY NOT WAIVED.

Nothing contained in this Agreement shall be construed as a waiver of or contract with respect to the regulatory and permitting authority of the City as it now or hereafter exists under applicable laws, rules, and regulations. Further, nothing contained in this Agreement shall be construed as a waiver of or attempted waiver by the City of its sovereign immunity under the constitution and laws of the State of Florida.

16. COMPLETE AGREEMENT; AGREEMENT TO BE RECORDED.

A. This Agreement represents the complete understanding by and between the parties with respect to the development and use of the Property. Any and all prior agreements between the parties with respect to any subject comprehended by this Agreement is hereby voided and superseded by this Agreement, except for that certain Purchase and Sale Agreement between the parties, dated March 22, 2022, which shall survive this clause.

B. This Agreement shall be recorded in the Public Records of Volusia County, Florida, at Developer's expense. The restrictions on use and development imposed by this Agreement shall be binding upon all successors in interest in the Property.

17. VENUE AND SEVERABILITY.

A. In the event of any claim, action, litigation, or proceeding under this Agreement, venue shall be in Volusia County, Florida.

B. If any provision of this Agreement is held by a court of competent jurisdiction to be invalid or otherwise unenforceable, such holding shall not affect the validity or enforceability of any other provision of this Agreement unless the holding so states.

EXHIBIT "A"

DESCRIPTION:

LOTS 1 THRU 9, EXCEPTING THE STREETS (HALIFAX DRIVE AND HERBERT STREET), AND INCLUDING RIPARIAN RIGHTS, BLOCK B, WILSON'S PORT ORANGE, AS RECORDED IN MAP BOOK 1, PAGE 154, OF THE PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA LYING IN SECTION 3, TOWNSHIP 16 SOUTH, RANGE 33 EAST.

LESS AND EXCEPT

THE SOUTHERLY 60 FEET OF THE WESTERLY 140 FEET OF LOT 7, BLOCK B, WILSON'S PORT ORANGE, AS PER MAP IN MAP BOOK 1, PAGE 154, PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA, LESS THAT PORTION DEEDED FOR STREET, AND THE WEST 140 FEET OF THE NORTH 13 FEET OF LOT 7 AND THE WEST 140 FEET OF LOT 8, ALL IN BLOCK B, WILSON'S SUBDIVISION OF PORT ORANGE, AS PER MAP IN MAP BOOK 1, PAGE 154, PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA, EXCEPT THAT PORTION THEREOF DEEDED TO THE STATE OF FLORIDA FOR WIDENING OF THE PUBLIC HIGHWAY LOCATED THEREON.

LESS AND EXCEPT

THE WEST 190 FEET OF LOT 6, BLOCK B, WILSON'S PORT ORANGE, ACCORDING TO THE MAP OR PLAT THEREOF RECORDED IN MAP BOOK 1, PAGE 154, PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA, EXCEPT THAT PORTION THEREOF DEEDED TO THE STATE OF FLORIDA FOR HIGHWAY PURPOSES IN DEED BOOK 218, PAGE 156, PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA.

LESS AND EXCEPT

AS A POINT OF REFERENCE, COMMENCE AT THE INTERSECTION OF THE SOUTHERLY RIGHT-OF-WAY LINE OF HERBERT ST (A 40 FOOT RIGHT-OF-WAY AS OCCUPIED) WITH THE EASTERLY RIGHT-OF-WAY LINE OF RIDGEWOOD AVENUE (A 100 FOOT RIGHT-OF-WAY AS OCCUPIED); THENCE S23°18'30"E ALONG SAID EASTERLY RIGHT-OF-WAY LINE OF RIDGEWOOD AVENUE A DISTANCE OF 300 FEET TO THE POINT OF BEGINNING OF THE FOLLOWING DESCRIBED PARCEL; THENCE N66°30'30"E ALONG THE NORTH LINE OF LOT FOUR (4) OF BLOCK "B" WILSON'S PORT ORANGE, AS RECORDED IN MAP BOOK 1, PAGE 154, PUBLIC RECORDS OF VOLUSIA COUNTY FLORIDA, A DISTANCE OF 123 FEET TO A POINT; THENCE S23°18'30"E, A DISTANCE OF 20.00 FEET TO A POINT; THENCE S66°30'30"W AND PARALLEL WITH SAID NORTH LINE OF SAID LOT FOUR (4) A DISTANCE OF 123 FEET TO A POINT IN THE EASTERLY RIGHT-OF-WAY LINE OF SAID RIDGEWOOD AVENUE; THENCE N23°18'30"W ALONG SAID EASTERLY RIGHT-OF-WAY LINE OF RIDGEWOOD AVENUE A DISTANCE OF 20.00 FEET TO THE POINT OF BEGINNING, RESERVING A ROAD EASEMENT OVER THE SOUTHERLY 5 FEET THEREOF AND GRANTING A ROAD EASEMENT OVER THE NORTHERLY 5 FEET OF THE WESTERLY 130 FEET OF THE LOT, TRACT AND PARCEL OF LAND IMMEDIATELY NEXT ADJOINING THE SAID EASEMENT HEREIN RESERVED.

LESS AND EXCEPT

A PORTION OF LOT 4, BLOCK "B" WILSON'S PORT ORANGE, ACCORDING TO THE MAP THEREOF RECORDED IN MAP BOOK 1, PAGE 154, OF THE PUBLIC RECORDS OF VOLUSIA COUNTY FLORIDA, AND BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:
AS A POINT OF REFERENCE, COMMENCE AT THE INTERSECTION OF THE SOUTHERLY RIGHT-OF-WAY LINE OF HERBERT ST (A 40 FOOT RIGHT-OF-WAY AS OCCUPIED) WITH THE EASTERLY RIGHT-OF-WAY LINE OF RIDGEWOOD AVENUE (A 100 FOOT RIGHT-OF-WAY AS OCCUPIED); THENCE S23°18'30"E ALONG SAID EASTERLY RIGHT-OF-WAY LINE OF RIDGEWOOD AVENUE A DISTANCE OF 413.80 FEET TO THE POINT OF BEGINNING OF THE FOLLOWING DESCRIBED PARCEL; THENCE N66°30'30"E, AND PARALLEL WITH THE NORTH LINE OF LOT FOUR (4) OF BLOCK "B" WILSON'S PORT ORANGE, AS RECORDED IN MAP BOOK 1, PAGE 154, PUBLIC RECORDS OF VOLUSIA COUNTY FLORIDA, A DISTANCE OF 123 FEET TO A POINT; THENCE S23°18'30"E, A DISTANCE OF 20.00 FEET TO A POINT; THENCE S66°30'30"W AND PARALLEL WITH SAID NORTH LINE OF LOT FOUR (4), BLOCK "B" WILSON'S PORT ORANGE A DISTANCE OF 93.83 FEET TO A POINT; THENCE S24°42'33"E, A DISTANCE OF 23.90 FEET TO A POINT IN THE SOUTH LINE OF SAID LOT FOUR (4), BLOCK "B" WILSON'S PORT ORANGE; THENCE S65°30'30"W ALONG THE SOUTH LINE OF SAID LOT FOUR (4), BLOCK "B" WILSON'S PORT ORANGE, A DISTANCE OF 234.14 FEET TO A POINT IN THE EASTERLY RIGHT-OF-WAY OF SAID RIDGEWOOD AVENUE; THENCE N23°18'30"W ALONG SAID EASTERLY RIGHT-OF-WAY LINE OF RIDGEWOOD AVENUE A DISTANCE OF 41.40 FEET TO THE POINT OF BEGINNING, RESERVING A ROAD EASEMENT OVER THE NORTHERLY 5 FEET OF THE WESTERLY 130 FEET THEREOF.

LESS AND EXCEPT

AS A POINT OF REFERENCE, COMMENCE AT THE INTERSECTION OF THE SOUTHERLY RIGHT-OF-WAY LINE OF HERBERT ST (A 40 FOOT RIGHT-OF-WAY AS OCCUPIED) WITH THE EASTERLY RIGHT-OF-WAY LINE OF RIDGEWOOD AVENUE (A 100 FOOT RIGHT-OF-WAY AS OCCUPIED); THENCE S23°18'30"E ALONG SAID EASTERLY RIGHT-OF-WAY LINE OF RIDGEWOOD AVENUE A DISTANCE OF 300 FEET TO A POINT IN THE NORTH LINE OF LOT FOUR (4), BLOCK "B" WILSON'S PORT ORANGE, AS RECORDED IN MAP BOOK 1, PAGE 154, PUBLIC RECORDS OF VOLUSIA COUNTY FLORIDA; THENCE N66°30'30"E ALONG THE NORTH LINE OF LOT FOUR (4) OF BLOCK "B" WILSON'S PORT ORANGE, A DISTANCE OF 123 FEET TO THE POINT OF BEGINNING OF THE FOLLOWING DESCRIBED PARCEL; THENCE CONTINUE N66°30'30"E ALONG SAID NORTH LINE OF LOT FOUR (4), BLOCK "B" WILSON'S PORT ORANGE A DISTANCE OF 111.89' FEET TO A POINT; THENCE S24°42'33"E, A DISTANCE OF 31.10 FEET TO A POINT; THENCE S65°30'30"W AND PARALLEL WITH SAID NORTH LINE OF LOT FOUR (4) OF BLOCK "B" WILSON'S PORT ORANGE, A DISTANCE OF 33.83 FEET TO A POINT; THENCE N70°34'27"W A DISTANCE OF 24.81 FEET TO A POINT; THENCE N23°18'30"W AND PARALLEL WITH SAID RIDGEWOOD AVENUE RIGHT-OF-WAY A DISTANCE OF 33.80 FEET TO THE POINT OF BEGINNING.

TOGETHER WITH

LOTS 2 THRU 4, INCLUSIVE, EXCEPTING THE STREETS (HALIFAX DRIVE AND HERBERT STREET), AND INCLUDING RIPARIAN RIGHTS, DANIELS PORT ORANGE, AS RECORDED IN MAP BOOK 3, PAGE 29, OF THE PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA.

TOGETHER WITH

THE EAST 33 FEET OF THE WEST 133 FEET OF THE SOUTHERLY 100 FEET, EXCLUDING PART IN STREET, BLOCK "C" WILSON'S PORT ORANGE, ACCORDING TO THE PLAT OR MAP THEREOF AS RECORDED IN MAP BOOK 1, PAGE 154, OF THE PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA.

TOGETHER WITH

PARCEL 1

LOTS 9 AND 8, EXCEPT THE EAST 218 FEET AND EXCEPT THE STREET (US HIGHWAY #1), BLOCK 2, PORT ORANGE HARD TRACT, THE SAID EAST 218 FEET BEING MEASURED ON THE NORTH LINE OF LOT 9, ACCORDING TO THE PLAT THEREOF AS RECORDED IN MAP BOOK 2, PAGE 185, PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA.

PARCEL 2

REFER TO A POINT IN THE ORIGINAL EAST LINE OF RIDGEWOOD AVENUE, (US HIGHWAY #1, STATE ROAD NO. 5, A 66 FOOT RIGHT-OF-WAY), SAID POINT BEING THE INTERSECTION OF THE NORTH LINE OF U.S. GOVERNMENT LOT TWO (2), OF SECTION 3, TOWNSHIP 16 SOUTH, RANGE 33 EAST, VOLUSIA COUNTY, FLORIDA, ALSO BEING THE NORTH LINE OF LOT ONE (1), MRS DANIELS' ADDITION TO PORT ORANGE, ACCORDING TO THE PLAT THEREOF AS RECORDED IN MAP BOOK 3, PAGE 29, PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA, WITH SAID ORIGINAL EAST RIGHT-OF-WAY; THENCE N89°14'45"E, FOR A DISTANCE OF 3.83 FEET TO THE POINT OF BEGINNING; SAID POINT ALSO BEING ON THE EAST RIGHT-OF-WAY LINE OF U.S. HIGHWAY # 1 (STATE ROAD 5), NOW A 100 FOOT RIGHT-OF-WAY; THENCE S24°53'30"E ALONG THE EAST RIGHT-OF-WAY LINE NOW IN USE, FOR A DISTANCE OF 150.42 FEET; THENCE DEPARTING AFORESAID RIGHT-OF-WAY N77°17'08"E, FOR A DISTANCE OF 338.08 FEET; THENCE N23°55'41"W FOR A DISTANCE OF 75.00 FEET TO THE NORTH LINE OF SAID U.S. GOVERNMENT LOT 2; THENCE S89°14'45"W ALONG SAID SOUTH LINE FOR A DISTANCE OF 306.83 FEET TO THE POINT OF BEGINNING.

TOGETHER WITH

LOT 1 & 2, AND THE NORTHERLY 21.25 FEET OF THE EASTERLY 136.8 FEET OF LOT 3, BLOCK F, EXCLUDING RIGHT-OF-WAY, WILSON'S PORT ORANGE, AS PER MAP IN MAP BOOK 1, PAGE 154, OF THE PUBLIC RECORDS OF VOLUSIA COUNTY, FLORIDA.

SURVEYORS NOTES:

1. THIS SURVEY HAS BEEN PREPARED WITH BENEFIT OF A COMMITMENT FOR TITLE INSURANCE ISSUED BY: FIRST AMERICAN TITLE INSURANCE COMPANY; AGENTS FILE NO.: 22-01818, COMMITMENT DATED: MARCH 31, 2023 AT 5:00 P.M.
2. DIMENSIONS ARE SHOWN IN FEET AND DECIMALS THEREOF.
3. BEARING STRUCTURE BASED ON NAD 83, FLORIDA STATE PLANE, EAST ZONE, U.S. SURVEY FOOT WITH THE BEARING ON THE EAST LINE OF HALIFAX DRIVE BEING S23°18'32"E.
4. UNLESS OTHERWISE SHOWN, RECORD DISTANCES AND DIRECTIONS AND FIELD MEASURED DISTANCES AND DIRECTIONS ARE THE SAME.
5. UNDERGROUND FOUNDATIONS, IF ANY, NOT LOCATED.
6. ELEVATIONS REFER TO N.A.V.D. OF 1988, PER NGS BENCHMARK 7223 HAVING A PUBLISHED ELEVATION OF 11.91 FEET.
7. THIS PROPERTY IS LOCATED IN FLOOD INSURANCE RATE MAP (F.I.R.M.) ZONE AE WITH A BASE FLOOD ELEVATION OF 9 FEET. THIS LOCATION IS DETERMINED BY SCALING FROM F.I.R.M. MAP NO. 12127C0335J , MAP EFFECTIVE DATED: SEPTEMBER 29, 2017. APPROXIMATE SCALE: 1"= 500'.
8. THE MEAN HIGH WATER ELEVATION 0.02 FEET, N.A.V.D. 1988 SHOWN BASED UPON EXTENSION OF EXISTING DATUM TO THE SUBJECT PROPERTY.
9. THIS MEAN HIGH WATER LINE SURVEY COMPLIES WITH CHAPTER 177, PART II, FLORIDA STATUTES
10. THE MEAN HIGH WATER ELEVATION AS SHOWN HEREON WAS ESTABLISHED BY EXTENDING THE ELEVATION SHOWN AT MEAN HIGH WATER POINT IDENTIFICATION NUMBER: 3841
11. "NOT VALID WITHOUT THE SIGNATURE AND THE ORIGINAL RAISED SEAL OR DIGITAL SIGNATURE OF A FLORIDA LICENSED SURVEYOR AND MAPPER."

AND TIDAL WATER SURVEY
FOR
BRISTOL DEVELOPMENT GROUP

Schedule B-II

1. Defects, liens, encumbrances, adverse claims or other matters, if any, created, first appearing in the public record or attaching subsequent to the effective date hereof but prior to the date the proposed insured acquires for value of record the estate or interest or mortgage thereon covered by this Commitment.

2. Rights or claim of parties in possession not shown by the public records.

3. Easements, or claim of easements, not shown by the public records.

4. Encroachments, overlaps, boundary line disputes, or other matters which would be disclosed by an accurate survey and inspection of the premises.

5. Any liens, or right to a lien, for services, labor or material hereto or hereafter furnished, imposed by law and not shown by the public records.

6. Any dispute as to the boundaries caused by a change in the location of any water body within or adjacent to the land prior to Date of Policy, and any adverse claim to all or part of the land that is, at Date of Policy, or was previously, under water.

7. Any titles or rights asserted by anyone including but not limited to persons, corporations, governments or other entities, to tide lands, or lands comprising the shores or bottoms of navigable rivers, lakes, bays, ocean or gulf, or lands beyond the line of the harbor or bulkhead lines as established or changed by the United States Government or water rights, if any.

8. Taxes or special assessment not shown as liens in the public records or in the records of the local tax collecting authority, at Date of Policy. Rights of dower, homestead or other marital rights of the spouses, if any, of any individual insured.

9. Any minerals or mineral rights leased, granted or retained by current or prior owner.

Special Exceptions:

11. Taxes for the year 2022, which are not yet due and payable.

10' ALLY EASMENT SHOWN HEREON. OTHER EASEMENT WITHIN EXISTING RIGHT OF WAY.

19. Easement as reflected in instruments recorded in Deed Book 458, page 10, and Deed Book 451, pages 428 and 430, all of the Public Records of Volusia County, Florida. (as to Parcel 2)
AFFECTS SUBJECT PROPERTY. SHOWN HEREON.
D.B. 458, PGS. 428 & 430, DOES NOT AFFECT SUBJECT PROPERTY.

20. Rights of others in and to the use of the easement described in Deed Book 458, page 10, and alley described in Deed Book 280, page 353, both of the Public Records of Volusia County, Florida. (as to Parcel 2)
AFFECTS SUJECT PROPERTY. SHOWN HEREON.

21. Easement granted to the City of Port Orange recorded in Official Records Book 1034, PageZl. 38, of the Public Records of Volusia County, Florida. (as to Parcel 2)
DOES NOT AFFECT SUBJECT PROPERTY.

22. Grant Award Agreement recorded in Official Records Book 5325, Page 1309, Public Records of Volusia County, Florida. (as to Parcel 9)
AFFECTS SUBJECT PROPERTY. NOT GRAPHICALLY DEPICTED.

23. Easement in favor of The City of Port Orange as recorded in Official Records Book 602, Page 80, Public Records of Volusia County, Florida. (as to Parcel 7)
AFFECTS SUBJECT PROPERTY. SHOWN HEREON.

24. Easement Deed to the City of Port Orange recorded in Official Records Book 602, Page 88, Public Records of Volusia County, Florida. (as to Parcel 8)
AFFECTS SUBJECT PROPERTY. SHOWN HEREON.

25. Easement Deed to the City of Port Orange recorded in Official Records Book 602, Page 76, Public Records of Volusia County, Florida. (as to Parcel 8)
AFFECTS SUBJECT PROPERTY. SHOWN HEREON.

26. Warranty Deeds to the State Road Department of Florida recorded in Deed Book 218, pages 98 and 296, Public Records of Volusia County, Florida. (as to Parcel 8)
DOES NOT AFFECT SUBJECT PROPERTY.

27. The Westerly 15 feet of the subject property lying in state road right-of-way is not insured hereunder and is specifically excepted from coverage under the Commitment and Policy. (as to Parcel 8)

28. The fee interest shall be subject to the right-of-way interests, if any, for any portion lying within the right-of-way of Halifax Drive as now established and in use. (as to Parcel 10)

29. The right of the public to use the right-of-way of Halifax Drive is neither guaranteed nor insured. (as to Parcel 10)

30. Exception is made to any part of the lands described in Schedule "A" hereof lying within the right-of-way of Ridgewood Avenue. (as to Parcel 11)

Schedule B-II

31. Easement to the City of Port Orange for widening, straightening and improvement of Halifax Drive recorded in Deed Book 541, Page 428, Public Records of Volusia County, Florida. (as to Parcels 12 and 18)
AFFECTS SUBJECT PROPERTY. SHOWN HEREON.

32. Exception is made to any part of the lands described in Schedule "A" hereof lying within the right-of-way of Ridgewood Avenue. (as to Parcel 13)

33. License Agreement recorded in Official Records Book 7310, Page 244, Public Records of Volusia County, Florida. (as to Parcel 14)
DOES NOT AFFECT SUBJECT PROPERTY. LICENSE AGREEMENT EXPIRED 09/2021.

34. Exception is made to any part of the lands described in Schedule "A" hereof lying within the right-of-way of Dunlawton Avenue. (as to Parcel 15)

35. Easement in favor of The City of Port Orange as recorded in Official Records Book 804, Page 682, Public Records of Volusia County, Florida. (as to Parcel 19)
SHOWN HEREON.

36. Utility and Sidewalk Easement recorded in Official Records Book 6828, Page 4638, Public Records of Volusia County, Florida. (as to Parcel 19)
SHOWN HEREON.

37. Right-of-way recorded in Official Records Book 6828, Page 4644, Public Records of Volusia County, Florida. (as to Parcel 19)
SHOWN HEREON.

38. Lease Agreement recorded in Official Records Book 7859, Page 4187, Public Records of Volusia County, Florida. (as to Parcel 19)
AFFECTS SUBJECT PROPERTY. NOT GRAPHICALLY DEPICTED.

39. Terms and conditions of Perpetual Nonexclusive Drainage and Utility Easement recorded in Official Records Book 7722, Page 1814, of the Public Records of Volusia County, Florida. (as to Parcel 20)
SHOWN HEREON.

40. Easement Deed to the City of Port Orange recorded in Official Records Book 547, Page 87, of the Public Records of Volusia County, Florida. (as to Parcel 21)
SHOWN HEREON.

41. Easement Deed to the City of Port Orange recorded in Official Records Book 650, Page 821, of the Public Records of Volusia County, Florida. (as to Parcel 21)
SHOWN HEREON.

42. Terms and conditions of Nonexclusive Drainage, Access, Sidewalk, Maintenance and Utilities Easement recorded in Official Records Book 6861, Page 1722, of the Public Records of Volusia County, Florida. (as to Parcel 21)
DOES NOT AFFECT SUBJECT PROPERTY.

43. Riparian and/or littoral rights are not insured, (as to Parcels 2, 5, 6, 7, 10, 12, 18)

44. The right, title or interest, if any, of the public to use as a public beach or recreation area any part of the Land lying between the water abutting the Land and the most inland of any of the following: (a) the natural line of vegetation; (b) the most extreme high water mark; (c) the bulkhead line, or (d) any other line which has been or which hereafter may be legally established as relating to such public use. (as to Parcels 2, 5, 6, 7, 10, 12, 18)

45. Rights of the United States Government to that part of the Land, if any, being artificially filled in land in what was formerly navigable waters arising by reason of the United States Government control over navigable waters in the interest of navigation and commerce, (as to Parcels 2, 5, 6, 7, 10, 12, 18)

46. Any adverse ownership claim by the State of Florida by right of sovereignty to any part of the Land that is, as of the Date of Policy or was at any time previously, under water (submerged), (as to Parcels 2, 5, 6, 7, 10, 12, 18)

PROJECT DESCRIPTION:

THIS PROJECT INCLUDES THE DEVELOPMENT OF A MIXED USE TOWN CENTER AND PARK.

COMPLIANCE WITH THE LAND DEVELOPMENT CODE MAY NECCESSITATE MODIFICATION OF THE CONCEPTUAL PLAN.

SITE INFORMATION:

SITE ADDRESS:	SOUTH RIDGEWOOD AVE., PORT ORANGE, FL
PROJECT AREA:	12.43 AC
AREA OWNED/CONTROLLED BY BRISTOL	11.12 AC
R/W OWNED BY THE CITY OF PORT ORANGE	1.37 AC
EXISTING ZONING:	PC-R
PROPOSED ZONING:	PC-R
PROPOSED OPEN SPACE:	1.45 AC
MAXIMUM OVERALL RESIDENTIAL DENSITY:	A MAXIMUM DENSITY OF 460 UNITS (37 UNITS/ACRE).
MINIMUM BUILDING SETBACKS:	
DUNLAWTON AVE.:	12 FT
RIDGEWOOD AVE.:	12 FT
EXTERNAL TO MASTER DEVELOPMENT:	5 FT
INTERNAL:	SEAWALL 5 FT, HALIFAX DRIVE 5 FT, HERBERT S", 5 FT, ALL OTHERS 0 FT
REQUIRED LANDSCAPE BUFFER(S):	10 FT – ALONG DUNLAWTON AVE.
	10 FT – ALONG RIDGEWOOD AVE.
	5 FT – ALL OTHER PERIMETERS
MINIMUM LIVING AREA/DWELLING UNIT:	500 SF
MINIMUM BUILDING LOT COVERAGE:	3,000 SF
MAXIMUM BUILDING HEIGHT:	105 FT, EXCLUDING ARCHITECTURAL EMBELLISHMENTS OR DESIGN ELEMENTS
MAXIMUM FENCE HEIGHT:	8 FT, (SUCH HEIGHT SHALL NOT INCLUDE THE PORTIONS OF A RETAINING WALL THAT IS LOCATED SUB-GRADE).
MINIMUM LOT WIDTH:	N/A
MINIMUM LOT DEPTH:	N/A
THE STRUCTURES WITHIN THE PD WILL BE DETERMINED BY THE ENGINEER OF RECORD. THE FINISHED FLOOR ELEVATION(FFE) SHALL BE MINIMUM ELEVATION OF 7.	
UTILITIES:	PROVIDED BY CITY OF PORT ORANGE

PARKING:

1. MULTIFAMILY DEVELOPMENT: MINIMUM RATIO OF 1.25 PARKING SPACES PER DWELLING UNIT. PARKING FOR MULTIFAMILY RESIDENTIAL USES MAY BE PROVIDED THROUGH THE USE OF TANDEM GARAGE/PARKING SPACES SO LONG AS THE TANDEM SPACES ARE ASSIGNED FOR THE EXCLUSIVE USE OF ONE RESIDENTIAL UNIT.
2. COMMERCIAL SUARE FEET: A RATIO OF 5 SPACES PER 1,000 SQUARE FEET.
3. HOTEL USES: A RATIO OF 1 SPACE PER GUEST ROOM AND 0.10 PER EMPLOYEE.
4. NO ADDITIONAL PARKING SHALL BE REQUIRED FOR FOOD TRUCK OR MARINA USES.
5. A MINIMUM OF 100 SURFACE SPACES AND 200 GARAGE SPACES MUST BE SET ASIDE FOR USE BY THE PUBLIC, ALTHOUGH SUCH SPACES SHALL COUNT TOWARDS THE MINIMUM REQUIRED PARKING STANDARDS FOR INDIVIDUAL USE TYPES.
6. SURFACE PARKING DIMENSIONS: THE MINIMUM PARKING DIMENSIONS ON SITE SHALL BE AS FOLLOWS: 90 DEGREE SPACES MEASURING 9' X 18', PARALLEL SPACES MEASURING 8' X 20'. PARKING AREAS SHALL HAVE A MINIMUM DRIVE AISLE WIDTH OF 22'. COMPACT SPACES ARE ALLOWED UP TO 10% OF TOTAL REQUIRED SPACES AND SHALL BE A MINIMUM OF 8'-0" X 16'-0". ANGLED PARKING SPACES ARE ALLOWED EXCEPT ON HALIFAX DRIVE AND HERBERT STREET AND SHALL BE 45 DEGREE ANGLE, 9'0" MIN. WIDTH FROM SIDE TO SIDE, 19'1" MIN. DEPTH FROM CURB TO BACK OF SPACE, AND 12'9" MIN. WIDTH AS MEASURED ALONG THE CURB FROM SPACE TO SPACE.
7. GARAGE PARKING DIMENSIONS SHALL BE AS FOLLOWS:
   PARKING SPACE: 9'-0" WIDE X 18'-0" DEEP
   DRIVE AISLES: 24'-0" WIDE MINIMUM

NOTE: THE SCALE OF THESE PLANS MAY HAVE CHANGED DUE TO REPRODUCTION.

The Concept.

The Port Orange area has grown through many different developments over the years and has seen its architectural style evolve along with it. The concept is to tie three of these styles together to visually celebrate the cities architectural language. The building will evolve along the facade from classical beach architecture to modern beach architecture allowing residents and the public to experience three different styles.

EXHIBIT "E"
CITY MANAGER APPROVAL OF THE EXTENSION TO THE RIVERYARD MASTER DEVELOPMENT AGREEMENT

WHEREAS, on the __ day of _____ 202__, the **CITY OF PORT ORANGE, FLORIDA**, a Florida municipal corporation (the "City"), and **BRISTOL PORT ORANGE PARTNERS, LLC**, a Florida limited liability corporation ("Developer") entered into the Riveryard Master Development Agreement, recorded in Official Records Book _____, Page _____, Public Records, Volusia County, Florida ("MDA"); and

WHEREAS, pursuant to Subsection 12.D. of the MDA, the Developer may request an extension for good cause shown; and

WHEREAS, in accordance with Subsection 12.D. of the MDA, the Developer has submitted a request to the City Manager to extend the MDA for an additional, _____ ("Extension"); and

WHEREAS, as required for consideration of this Extension, the Developer has provided the supporting documentation demonstrating good cause for said request along with documentation of the continued commercially reasonable steps in the diligent pursuit to complete the obligations and meet the deadlines set forth in the MDA; and

WHEREAS, the Port Orange City Manager has determined that the execution of this Extension to the MDA is beneficial to the citizens of the City of Port Orange.

NOW, THEREFORE, the Parties, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, agree as follows:

The above Recitals are incorporated by reference into the body of this Extension Approval.

1. The City by and through the undersigned hereby approves the Developer's extension request to extend the deadline for _____as set forth in Section _____ for an additional _____, said date being_____("Extension Approval").

2. All other terms and conditions of the MDA shall remain in full force and effect.

3. This Extension Approval shall become effective immediately upon signature of the City.

PROJECT DESCRIPTION:

THIS PROJECT INCLUDES THE DEVELOPMENT OF A MIXED USE TOWN CENTER AND PARK.

COMPLIANCE WITH THE LAND DEVELOPMENT CODE MAY NECCESSITATE MODIFICATION OF THE CONCEPTUAL PLAN.

SITE INFORMATION:

SITE ADDRESS:	SOUTH RIDGEWOOD AVE., PORT ORANGE, FL
PROJECT AREA:	12.43 AC
AREA OWNED/CONTROLLED BY BRISTOL	11.12 AC
R/W OWNED BY THE CITY OF PORT ORANGE	1.37 AC
EXISTING ZONING:	PC-R
PROPOSED ZONING:	PC-R
PROPOSED OPEN SPACE:	1.45 AC
MAXIMUM OVERALL RESIDENTIAL DENSITY:	A MAXIMUM DENSITY OF 460 UNITS (37 UNITS/ACRE).
MINIMUM BUILDING SETBACKS:	
DUNLAWTON AVE.:	12 FT
RIDGEWOOD AVE.:	12 FT
EXTERNAL TO MASTER DEVELOPMENT:	5 FT
INTERNAL:	SEAWALL 5 FT, HALIFAX DRIVE 5 FT, HERBERT ST, 5 FT, ALL OTHERS 0 FT
REQUIRED LANDSCAPE BUFFER(S):	10 FT – ALONG DUNLAWTON AVE.
	10 FT – ALONG RIDGEWOOD AVE.
	5 FT – ALL OTHER PERIMETERS
MINIMUM LIVING AREA/DWELLING UNIT:	500 SF
MINIMUM BUILDING LOT COVERAGE:	3,000 SF
MAXIMUM BUILDING HEIGHT:	105 FT, EXCLUDING ARCHITECTURAL EMBELLISHMENTS OR DESIGN ELEMENTS
MAXIMUM FENCE HEIGHT:	8 FT, (SUCH HEIGHT SHALL NOT INCLUDE THE PORTIONS OF A RETAINING WALL THAT IS LOCATED SUB-GRADE).
MINIMUM LOT WIDTH:	N/A
MINIMUM LOT DEPTH:	N/A
THE STRUCTURES WITHIN THE PD WILL BE DETERMINED BY THE ENGINEER OF RECORD. THE FINISHED FLOOR ELEVATION)(FFE) SHALL BE MINIMUM ELEVATION OF 7.	
UTILITIES:	PROVIDED BY CITY OF PORT ORANGE

PARKING:

1. MULTIFAMILY DEVELOPMENT: MINIMUM RATIO OF 1.25 PARKING SPACES PER DWELLING UNIT. PARKING FOR MULTIFAMILY RESIDENTIAL USES MAY BE PROVIDED THROUGH THE USE OF TANDEM GARAGE/PARKING SPACES SO LONG AS THE TANDEM SPACES ARE ASSIGNED FOR THE EXCLUSIVE USE OF ONE RESIDENTIAL UNIT.
2. COMMERCIAL USES: A RATIO OF 5 SPACES PER 1,000 SQUARE FEET.
3. HOTEL USES: A RATIO OF 1 SPACE PER GUEST ROOM AND 0.10 PER EMPLOYEE.
4. NO ADDITIONAL PARKING SHALL BE REQUIRED FOR FOOD TRUCK OR MARINA USES.
5. A MINIMUM OF 100 SURFACE SPACES AND 200 GARAGE SPACES WILL BE SET ASIDE FOR USE BY THE PUBLIC, ALTHOUGH SUCH SPACES SHALL COUNT TOWARDS THE MINIMUM REQUIRED PARKING STANDARDS FOR INDIVIDUAL USE TYPES.
6. SURFACE PARKING DIMENSIONS. THE MINIMUM PARKING DIMENSIONS ON SITE SHALL BE AS FOLLOWS: 90 DEGREE SPACES MEASURING 9' X 18', PARALLEL SPACES MEASURING 8' X 20'. PARKING AREAS SHALL HAVE A MINIMUM DRIVE AISLE WIDTH OF 22'. COMPACT SPACES ARE ALLOWED UP TO 10% OF TOTAL REQUIRED SPACES AND SHALL BE A MINIMUM OF 8'-0" X 16'-0". ANGLED PARKING SPACES ARE ALLOWED EXCEPT ON HALIFAX DRIVE AND HERBERT STREET AND SHALL BE 45 DEGREE ANGLE, 9'0" MIN. WIDTH FROM SIDE TO SIDE, 19'1" MIN. DEPTH FROM CURB TO BACK OF SPACE, AND 12'9" MIN. WIDTH AS MEASURED ALONG THE CURB FROM SPACE TO SPACE.
7. GARAGE PARKING DIMENSIONS SHALL BE AS FOLLOWS:
   PARKING SPACE: 9'-0" WIDE X 18'-0" DEEP
   DRIVE AISLES: 24'-0" WIDE MINIMUM

NOTE: THE SCALE OF THESE PLANS MAY HAVE CHANGED DUE TO REPRODUCTION.

CITY COUNCIL AGENDA ITEM

COUNCIL MEETING DATE 9/5/2023

SUBJECT: (G20) Resolution No. 23-31 - Stormwater Drainage Utility Annual Stormwater Fee Rate Increase

DEPARTMENT: Finance

GOAL: 2 - Infrastructure
3 - Quality of Life
5 - Fiscal Sustainability

RECOMMENDED MOTION: Move to approve Resolution No. 23-31 - Stormwater Drainage Utility Annual Stormwater Fee.

SUMMARY: Continuous improvement of the City of Port Orange's stormwater system is a top priority. This includes the environmental impacts of stormwater runoff, the need to reduce flooding throughout the city, and the requirement to comply with federal regulations. The City has identified a need for greater resources to address these ongoing issues. Raftelis Financial Consultants, Inc. was contracted to provide utility rate and other municipal fee reviews to include the Stormwater Drainage Utility annual Stormwater Fees. Raftelis presented its analysis and fee recommendations to Council at the April 25 workshop and provided for a modest fee increase of $15 per year from the current $115 to $160 phased in over three years.

The U.S. Environmental Protection Agency's National Pollution Discharge Elimination System (NPDES) stormwater permitting program, as implemented by the Florida Department of Environmental Protection (FDEP), required the City to enhance its stormwater management services. To finance these improvements and meet the necessary requirements, the City implemented a dedicated funding source in the form of a Stormwater Drainage Utility Fee ("Stormwater Fee") in 1986. The Stormwater Fee is designed to generate revenues that will be used to fund various stormwater management projects and initiatives. These projects may include constructing or upgrading stormwater infrastructure, implementing erosion control measures, creating new retention ponds, improving drainage systems, and conducting public education and outreach campaigns on stormwater best management practices.

The City currently maintains 136 stormwater ponds, 86,000 linear feet of canals and ditches along with 518,000 linear feet of stormwater pipes. In addition, the City maintains more than 4,000 inlets into our stormwater conveyance system with 14 State designated outfalls or discharges into the Halifax River. The City has on the horizon approximately $60 million in new stormwater infrastructure projects to continue ongoing efforts to improve and strengthen the drainage system to over 23,000 properties.

Chapter 74, Article V of the Code of Ordinances, City of Port Orange, Florida (the "Stormwater Utility Ordinance") establishes the City's stormwater drainage utility and authorizes imposition of the annual Stormwater Fee to fund the costs incurred by the City in providing stormwater services, facilities, equipment, and improvements each year. The Stormwater Utility Ordinance describes how the fee is calculated and authorizes collection of the fee pursuant to the uniform collection method set forth in section 197.3632, Florida Statutes (the "Uniform Collection Act"), pursuant to which non-ad valorem assessments such as the Stormwater Fee may be collected on the annual ad valorem tax bill mailed each November. The City has imposed the Stormwater Fee and collected the fee pursuant to the uniform collection method each year since 2005.

Staff sent a letter to all property owners on August 16 to inform them that the City Council of Port Orange would hold a public hearing to consider approving the maximum annual Stormwater Fee for the fiscal year beginning October 1, 2023 ("Fiscal Year 2023-24"). The proposed maximum rate of the Stormwater Fee for Fiscal Year 2023-24 is $160.00 per Single Family Unit (SFU) which is also the maximum rate that can be imposed without further mailed notice for future fiscal years. The City intends to increase the fee from the current $115.00 per SFU by $15 each year over the next three years to reach the maximum $160.00 per SFU in Fiscal Year 2025-26. It is estimated that the City will collect $5,165,538.22 from the Stormwater Fee for Fiscal Year 2023-24.

The Stormwater Fee for each property is based upon the estimated amount of stormwater runoff generated by impervious surface on the property. Impervious surfaces include the rooftop, patios, driveways, parking lots and similar areas. The City has determined that the average single-family residence in the City includes 3,050 square feet of impervious surface, which is the value of one equivalent “single family unit" ("SFU"), the unit of measurement to be applied against each parcel to determine the fee. Single-family residential parcels, mobile home units and residential condominium units are each assigned one SFU. For non-residential property such as commercial parcels, the number of SFUs has been calculated individually for each parcel of property by dividing the impervious surface area by 3,050 square feet. Vacant unimproved land in its natural state is not subject to the Stormwater Fee.

The Stormwater Fee, if approved by the Council, will be collected by the Tax Collector of Volusia County on the ad valorem tax bill mailed out in November.

It is the staff's recommendation that a **fee increase from the current $115 to $130 per SFU for Fiscal Year 2023-24** be approved.

RESOLUTION NO. 23-31

A RESOLUTION OF THE CITY OF PORT ORANGE, VOLUSIA COUNTY, FLORIDA ADOPTING A RATE SCHEDULE FOR THE ANNUAL STORMWATER UTILITY FEES IMPOSED BY THE CITY IN ACCORDANCE WITH CHAPTER 74, SECTIONS 156-164 OF THE CITY CODE OF ORDINANCES; DESCRIBING THE UNIT OF MEASUREMENT FOR THE STORMWATER FEES; PROVIDING FOR COLLECTION OF THE STORMWATER FEES AS NON-AD VALOREM ASSESSMENTS PURSUANT TO THE TAX BILL COLLECTION METHOD AUTHORIZED BY SECTION 197.3632, FLORIDA STATUTES; APPROVING THE NON-AD VALOREM ASSESSMENT ROLL FOR SUCH FEES FOR THE FISCAL YEAR ENDING SEPTEMBER 30, 2024; DIRECTING CERTIFICATION OF SUCH ROLL TO THE VOLUSIA COUNTY TAX COLLECTOR; AND PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the City of Port Orange (the "City") is authorized by Article VIII, Section 2(b) of the Florida Constitution and Sections 166.021, 197.3632 and 403.0893, Florida Statutes to establish a stormwater drainage utility, to impose annual stormwater utility fees sufficient to plan, construct, operate and maintain stormwater management systems, and to provide for the collection of such fees pursuant to the uniform method by which the fees are included on the annual property tax bill mailed by the Volusia County Tax Collector each November; and

WHEREAS, in accordance therewith, the City Council adopted Sections 74-156 through 74-164 of the City of Port Orange Code of Ordinances (the "Stormwater Ordinance") which established a stormwater drainage utility (the "Stormwater Utility System") and provided for the calculation, imposition and collection of stormwater drainage utility fees (the "Stormwater Fees"); and

WHERES, the City imposes the Stormwater Fee each year to fund the annual provision of stormwater management services and facilities, and collects the fee as a non-ad valorem assessment included on the annual property tax bill, as authorized by Section 197.3632, Florida Statutes (the "Uniform Collection Act") and Section 403.0893, Florida Statutes; and

WHEREAS, the City of Port Orange must ensure that the Stormwater Utility System is properly designated, constructed and maintained within the City in an efficient manner to promote the general health, safety and welfare of the citizens; and

WHEREAS, pursuant to the Uniform Collection Act, the City must certify a non-ad valorem assessment roll to the Volusia County Tax Collector by September 15th of each year in order to collect the Stormwater Fees on the annual property tax bill; and

WHEREAS, the non-ad valorem assessment roll includes a list of the parcels from which the Stormwater Fees will be collected on the annual property tax bill, and the amount of the fee to be imposed against each parcel; and

WHEREAS, the City has collected the Stormwater Fees pursuant to the Uniform Collection Act each year since 2005 and is now considering an increase in the rate of the fees for the fiscal year beginning October 1, 2023 ("Fiscal Year 2024") and fiscal years thereafter; and

WHEREAS, the City Council has received and considered the Stormwater Utility Rate Study prepared by Raftelis Financial Consultants, Inc., a copy of which is attached hereto as Appendix A (the "Rate Study"), which summarizes the Stormwater Utility System's projected revenue requirements for Fiscal Year 2024 and beyond, and which recognizes the fair and reasonable nature of calculating Stormwater Fees based on the impervious area method contemplated by the Stormwater Ordinance; and

WHEREAS, the Rate Study encompassed a financial evaluation of the Stormwater Utility system for the five fiscal year period of October 1, 2022 through September 30, 2027 and identified the need for Stormwater Fee rate adjustments due to anticipated changes in operating costs, increases to annual debt services payments for debt obligations incurred by the City to finance stormwater-related capital improvements, and the amount and timing of additional capital improvements; and

WHEREAS, the rate increases identified in the Rate Study and adopted herein will allow the City to maintain a sustainable financial position for the Stormwater Utility System that is consistent with performance criteria established by the City and based on utility industry standards; and

WHEREAS, such rate increases will provide for the recovery of the total costs anticipated for the Stormwater Utility system, thereby ensuring the utility system remains a self-supporting enterprise; and

WHEREAS, notice of a public hearing to consider the rate increase has been published and mailed to each affected property owner notifying such property owner of the opportunity to be heard, as required by the Uniform Collection Act, and the proof of publication and affidavit of mailing are attached as Appendices B and C respectively; and

WHEREAS, comments and objections of all interested persons have been heard and considered as required by law; and

WHEREAS, the City's Stormwater Utility System and the services and facilities associated therewith provide for the proper and safe collection, storage, control,

management, treatment and conveyance of the stormwater burden generated by the real property subject to the Stormwater Fees approved hereunder; and

WHEREAS, the benefits derived from the stormwater management services and facilities provided by the City exceed the amount of the Stormwater Fees imposed hereunder, and the Stormwater Fees imposed against any tax parcel subject thereto does not exceed the proportional benefits that such tax parcel will receive compared to any other tax parcel; and

WHEREAS, the City Council hereby finds and determines that the Stormwater Fees imposed in accordance with this Resolution provide an equitable method of funding the City's stormwater management services and facilities by fairly and reasonably apportioning the costs thereof among the real property specially benefited thereby.

NOW THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF PORT ORANGE, VOLUSIA COUNTY, FLORIDA:

Section 1. The Recitals set forth above are hereby incorporated as legislative findings of the City Council.

Section 2. The Mayor and City Council of the City of Port Orange, Florida hereby approve the imposition of Stormwater Fees pursuant to the schedule of rate increases set forth in Section 4 hereof. The Stormwater Fees for Fiscal Year 2024 and each year thereafter shall be collected pursuant to the Uniform Collection Act. Upon adoption hereof, the Finance Director shall cause the certification and delivery of the Non-Ad Valorem Assessment Roll for such fees to the Volusia County Tax Collector by September 15, 2023 and by September 15 of each successive year, in the manner prescribed by the Uniform Collection Act. The roll as delivered to the Tax Collector shall be accompanied by a Certificate to Non-Ad Valorem Assessment Roll in substantially the form attached hereto as Appendix D. The Non-Ad Valorem Assessment Roll, a copy of which is available in the Port Orange City Clerk’s Office located at 1000 City Center Circle, Port Orange, Florida 32129, is hereby approved and incorporated herein by reference.

The Stormwater Fees for certain tax parcels shall be collected by direct billing instead of pursuant to the Uniform Collection Act. A list of such tax parcels is available in the office of the City Clerk.

Section 3. The unit of measurement to be applied against each parcel to determine the amount of the Stormwater Fee shall be one Single-Family Unit (SFU) for each residential unit as defined and described in the Stormwater Ordinance. The SFU is an equivalency unit for purposes of calculating the amount of the Stormwater Fee for each parcel, and is equal to the "equivalent dwelling unit" or "EDU" referenced in the Rate Study. Parcels that contain more than one SFU are charged an amount equal to the total number of SFU’s multiplied by the rate specified in Section 4, below. All developed property, except dwelling units, shall be charged based upon the amount of impervious surface on the parcel; and each 3,050 square feet or portion thereof of impervious surface

not used as a dwelling unit on said property shall equal one SFU, and the minimum service charge shall be that established for one SFU. The use of impervious surface area is hereby approved, ratified and confirmed as a fair and reasonable method of apportioning the benefits conveyed by the City's stormwater drainage utility among the real property specially benefitted thereby.

Section 4. The estimated maximum rate of the Stormwater Fee for Fiscal Year 2024 and fiscal years thereafter shall be as follows:

Fiscal Year 2024 (ending September 30, 2024)	**Fiscal Year 2025 (ending September 30, 2025)**	**Fiscal Year 2026 (ending September 30, 2026) and each fiscal year thereafter**
$130 per SFU	$145 per SFU	$160 per SFU

Such maximum rates for fiscal years after Fiscal Year 2024 were included in the mailed notices to affected property owners, and such rates may be adopted without further notice to affected property owners unless notice is required by the Uniform Collection Act. The Stormwater Fee is an annual charge that will continue year after year unless or until amended by resolution of City Council. The Stormwater Fee rates approved herein are hereby determined to be reasonable and necessary to pay for the operation, maintenance, administration and capital improvements of the Stormwater Utility System.

Section 5. A portion of the Stormwater Fee represents a capital facilities charge to pay for capital improvements to the Stormwater Utility System. The capital facilities charge is equal to 36% of the Stormwater Fee imposed against each parcel; provided, however, that nothing herein shall prohibit expenditure of more 36% to pay for capital improvements to the Stormwater Utility System. Such capital facilities charge is included within the Stormwater Fee and rate schedule adopted herein, and is not in addition to such fee and rate schedule.

Section 6. All resolutions or parts thereof in conflict herewith or contrary hereto are hereby repealed to the extent of such conflict.

Section 7. If any section, subsection, clause, phrase, or portion of this resolution, or application hereof, is for any reason, held invalid or unconstitutional by any court of competent jurisdiction, such portion or provision and such holding shall not affect the validity of the remaining portions or applications hereof.

Section 8. This resolution shall supersede Resolution 17-43 and become effective immediately upon adoption.

APPENDIX A

RATE STUDY

CITY OF
PORT ORANGE

Stormwater Utility Rate Study

Final Report | July 21, 2023

RAFTELIS

RAFTELIS

July 21, 2023

Honorable Mayor and Members of the City Council
City of Port Orange
1000 City Center Circle
Port Orange, FL 32129

Subject: **Stormwater Utility Rate Study**

Gentlemen:

Raftelis Financial Consultants, Inc. (Raftelis) has completed our Stormwater Utility Rate Study for the City of Port Orange, Florida (City) and has summarized the results of our analyses, assumptions, recommendations, and conclusions in this report, which is submitted for your consideration. The analysis encompassed a financial evaluation for the five- (5) fiscal year period of October 1, 2022 through September 30, 2027 (Forecast Period). Based on the assumptions relied upon in the development of the projected utility system revenues and expenditure needs, Raftelis has identified the need for stormwater rate adjustments as shown below for Fiscal Years 2024 through 2027.

Summary of Previously Adopted and Proposed Rate Adjustments

	Fiscal Year Ending September 30,				
Description	2023	2024	2025	2026	2027
Proposed Rate Adjustments:					
Annual Percentage Increase	0.00%	13.04%	11.54%	10.34%	0.00%
Annual Increase in Fee	$0.00	$15.00	$15.00	$15.00	$0.00
Annual Stormwater Fee	$115.00	$130.00	$145.00	$160.00	$160.00

The proposed rate increases for the stormwater system shown above are primarily due to changes in operating costs, increases to annual debt service payments, and the amount and timing of certain capital projects. The proposed utility rates are designed to meet several goals and objectives. The main objective of our analysis was to develop a proposed rate plan that will produce revenues sufficient to meet the projected expenditure requirements of the stormwater utility system over the forecast window.

Other goals and objectives considered in the study include:

- The proposed rates should allow the utility to maintain a financial position that is both sustainable and consistent with performance criteria established by the City and based on utility industry standards;
- The proposed rates should comply with rate covenant requirements associated with existing debt or future borrowings;

- The proposed rates should be based on full cost recovery principles; and
- The proposed rates, to the extent practical, should be comparable with those of neighboring utility systems.

The proposed rates for stormwater service are designed to meet the goals and objectives outlined above and should be sufficient to provide for the recovery of the total costs anticipated for the stormwater utility system.

Following this letter, we have provided a summary report, which briefly summarizes the results of our study and outlines our recommendations and conclusions.

We appreciate the opportunity to be of service to the City and would like to thank the City staff for their valuable assistance and cooperation during this study.

Respectfully submitted,

RAFTELIS FINANCIAL CONSULTANTS, INC.

STORMWATER SYSTEM

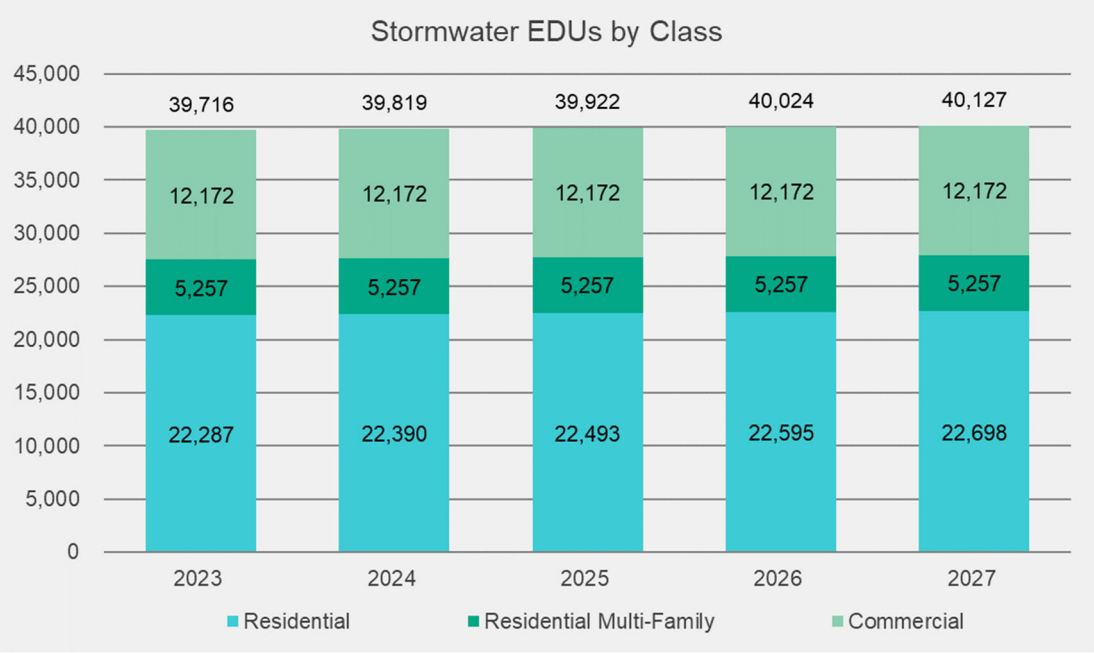
Utility System Financial Plan

The basis for the utility rate recommendations associated with stormwater service is a five- (5) year financial plan developed to establish projected revenue requirements and the financial position of the stormwater utility system.

The financial plan compares the projected utility system revenues anticipated under existing rates with the projected operating and capital funding requirements to evaluate the adequacy of rates and the financial position related to cash reserves and compliance with debt service covenants. The results of the financial plan are the basis for the proposed rate increases developed in this study. This section of the report outlines the assumptions and considerations made in developing the projected rate needs.

Customer Growth and Revenues

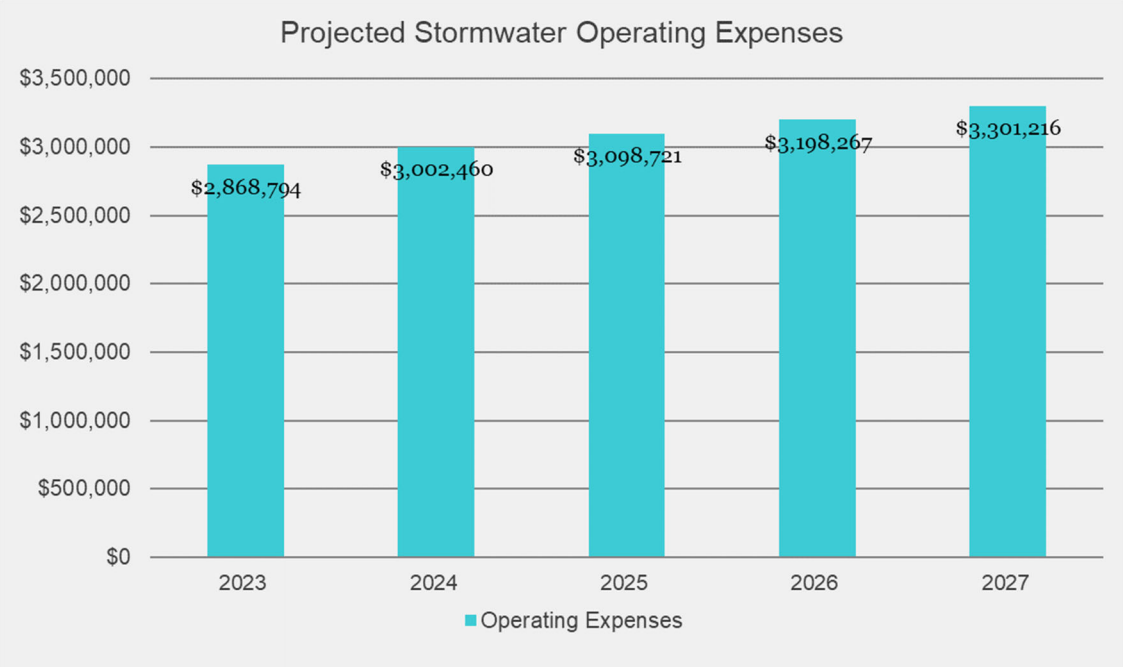
During Fiscal Year 2022, it is estimated that the City provided service to approximately 23,500 stormwater accounts or about 39,800 Equivalent Dwelling Units (EDUs). The City measures a property's demand on the stormwater system based on each property's impervious area. For residential properties, the average impervious area is 3,050 square feet per dwelling unit or 1.0 EDU. Projected revenues from rates for the stormwater system were based on the existing rates effective October 1, 2022. The City collects the stormwater utility rates and charges through an annual non-ad valorem special assessment. To calculate projected revenues from rates for the Forecast Period, the existing Fiscal Year 2023 rates were applied to projected billing statistics. Based on discussions with City Staff, the growth projections included in this analysis recognize an average annual growth in EDUs of approximately one-quarter of a percent (0.26%), beginning with approximately 100 additional accounts / units per year through the end of the Forecast Period, as shown in Table 1 and in the chart below.



Based on these assumptions, system revenues at existing rates are estimated to increase modestly from approximately $4.6 million to $4.7 million per year over the Forecast Period as shown on Table 2. Other miscellaneous operating revenues, shown on Table 3, were not considered as they are very minimal, and interest earnings on unrestricted fund balances, located on Table 10, are estimated to average approximately $9,000 per year.

Operating and Maintenance Expenses

The Fiscal Year 2023 operating budget served as the basis for the operating expense projections for the Forecast Period. Adjustments were made to the Fiscal Year 2023 operating budgets to exclude depreciation, principal and interest payments on debt, capital expenditures, and additions to reserves, which were accounted for separately in our analysis; or in the case of depreciation, excluded as a non-cash expense. These adjustments resulted in the Fiscal Year 2023 operating budget of $8.5 million being adjusted down to approximately $2.9 million in recurring operating expenses, as shown in Table 4. A contingency allowance of two percent (2.0%) of operation and maintenance expenses was recognized for unanticipated expenditures in each fiscal year. Additionally, a bad debt allowance of 0.25% of rate revenues was recognized in each fiscal year. These allowances represent averages of approximately $32,500 and $11,600 annually, respectively. Operation and maintenance expenses are projected to increase by an annual average of approximately 3.57% per year from Fiscal Year 2023 operating budget levels (from $2.9 million to $3.3 million) and are shown in detail on Table 5 and in summary in the chart below.



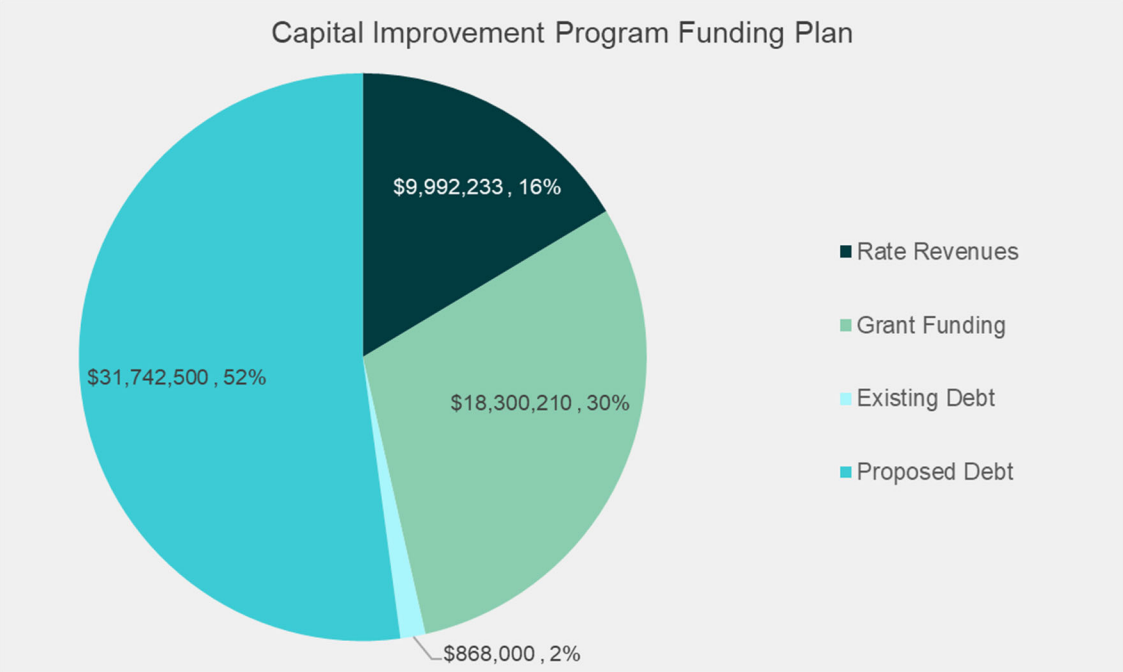
(Remainder of page intentionally left blank)

The overall increase over the Forecast Period in projected operating expenses was based upon assumptions corresponding to several escalation factors and the nature of the expense as shown on Table 6. A few of the major factors are shown below:

1. Labor – 5.0% in Fiscal Year 2024, and 3.50% per Year for the remainder of the Forecast Period
2. Health Insurance – 7.0% per Year
3. Consumer Price Index (CPI) – 5.00% in Fiscal Year 2024, and 2.30% per Year for the remainder of the Forecast Period
4. Electricity – 7.00% in Fiscal Year 2024, 6.00% in Fiscal Year 2025, and 5.00% per Year for the remainder of the Forecast Period
5. General Insurance – 5.0% per Year
6. Fuel – 5.0% per Year

Capital Improvement Plan

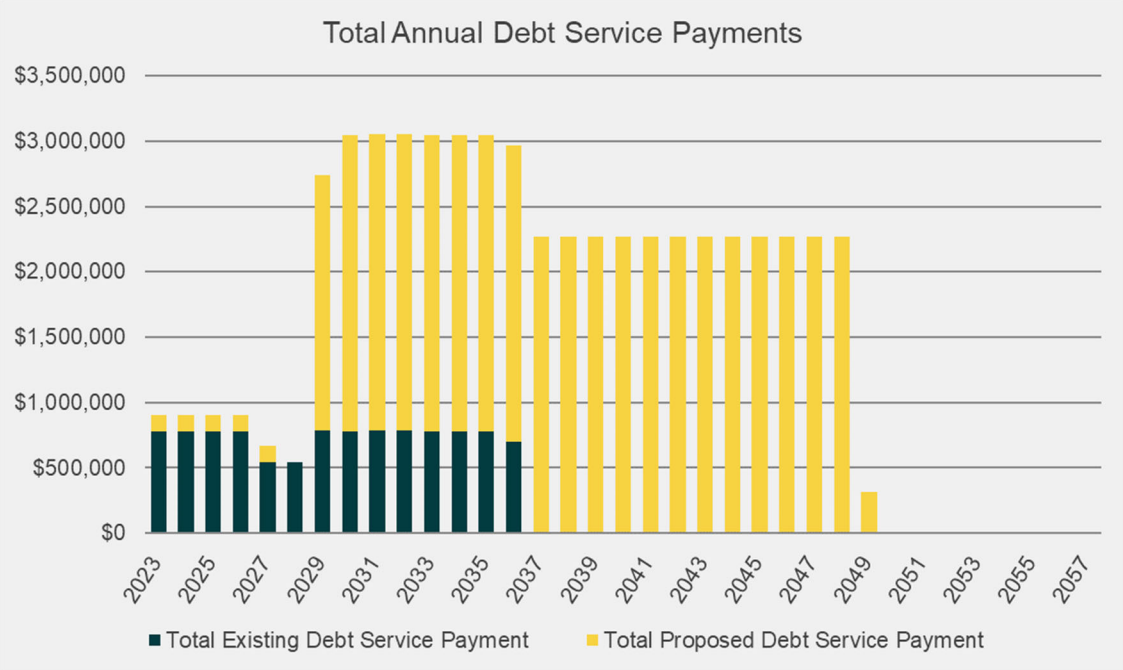
The Capital Improvement Plan (CIP) utilized in this analysis was based on the Fiscal Years 2023 - 2027 CIP, as provided by City. The City's project cost estimates were based on current year dollars and therefore these amounts were escalated to account for cost inflation over the Forecast Period. The current plan includes approximately $60.9 million capital projects, as shown on Table 7. The CIP is anticipated to be funded from rate revenues, grants, and existing and proposed debt as shown below.



As can be seen in the chart above, approximately 54% of the capital plan is anticipated to be funded through existing and proposed debt, 30% is anticipated to be grant funded and the remaining 16% is to be funded from rates revenues.

Existing and Proposed Debt

The stormwater system currently has two debts outstanding that are pledged from its net revenues. The Stormwater Utility Revenue Bonds, Series 2005 are the first debt and second is the State Revolving Fund (SRF) Loan No. 5150. The stormwater system also received a 6.75% allocation of the General Fund's Capital Improvement Refunding Revenue Bonds, Series 2014. Based on the debt service schedules for the two outstanding revenue bonds and state revolving fund loan the annual debt service payments to be funded from rates total at approximately $777,000 per year through 2026 and decrease to approximately $540,000 by 2027. The projected lease payments associated with funding the CIP are projected to be approximately $127,000 and start in 2023. Projected SRF loans are also anticipated as a part of the proposed funding of the CIP, but the payments associated with those loans are projected to start outside the Forecast Period in 2029. Existing and the proposed debt service payments are summarized on Table 8 found at the end of this report and in summary on the chart below.



It should also be noted that the projected debt service payments associated with the proposed future SRF loans will likely have a material impact on the system's revenue requirements just outside the Forecast Period and will therefore require an evaluation as to their impacts to rates before or at that time.

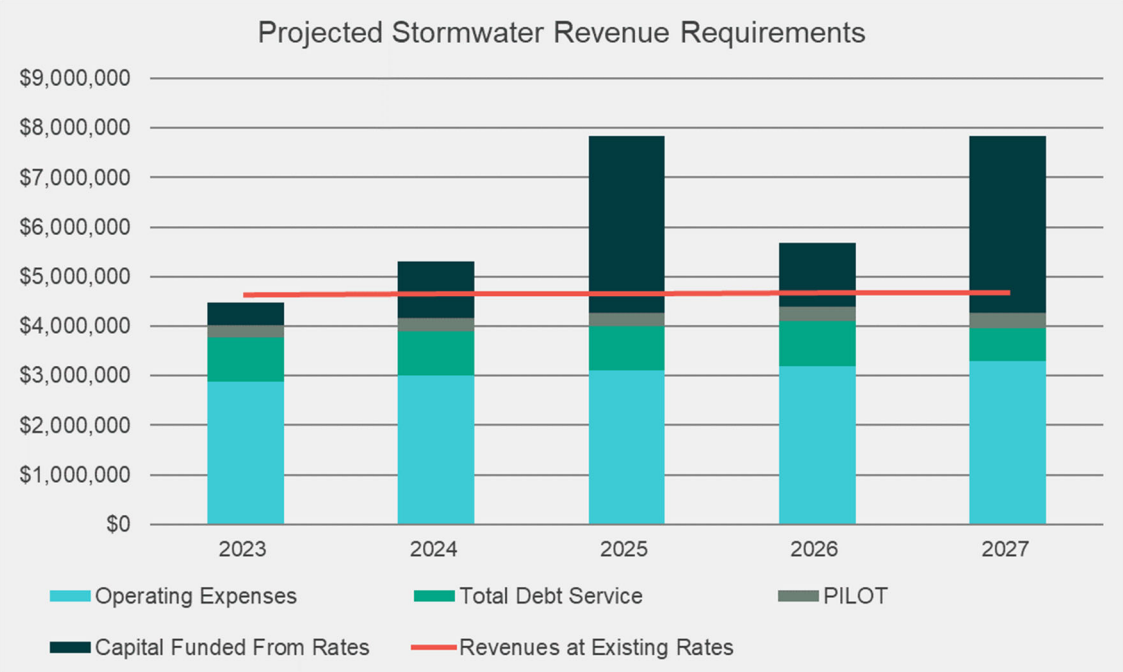
Intergovernmental Transfers

The City transfers a portion of the prior year's stormwater gross revenues to the General Fund in the form of a Payment-in-lieu-of-taxes (PILOT). This amount is funded each year of the Forecast Period and averages

approximately $277,000 annually (starting at $250,000 in 2023 and increasing to $305,000 by 2027), as shown in Table 9.

Projected Adequacy of Existing Stormwater Rates

Table 11 provides a summary of the projected net cash flows of the System for the Forecast Period. Based upon the assumptions used to prepare the financial forecast regarding revenues, operating expenses, debt service payments, capital requirements, and other transfers, the projected net revenue requirements of the System. When compared to the revenues under existing rates are summarized as follows:



As can be seen above, revenue at existing rates is not projected to be sufficient to meet the revenue requirements over the Forecast Period through 2027.

Conclusions and Recommendations

Based on the projected operating expenditure needs of the stormwater system and the projected funding plan for the CIP, it is estimated that existing rates will be insufficient to meet the projected expenditures of the system, as shown on Table 11. The projected operating results set forth herein assume the adoption of the newly proposed rate adjustments. Below is a summary of the proposed rate adjustments, along with certain projected financial operating results.

(Remainder of page intentionally left blank)

	Fiscal Year Ending September 30,				
Description	2023	2024	2025	2026	2027
Proposed Annual Stormwater Rate	$115.00	$130.00	$145.00	$160.00	$160.00
System Revenue Surplus / (Deficiency)	$156,611	($52,506)	($1,957,178)	$821,549	($1,321,600)
Operating Fund (Ending Balance)	$4,286,042	$4,233,536	$2,276,358	$3,097,907	$1,776,307
Days of Cash (Target of 90 Days of Rate Revenue)	338	295	142	174	100
Senior Lien Debt Service Coverage (Test 1.15)	7.94	10.11	12.45	14.79	14.40
Subordinate Lien Debt Service Coverage (Test 1.15)	3.18	4.20	5.30	6.40	12.43
All-In Debt Service Coverage (Target 1.50)	2.53	3.23	3.97	4.72	6.97

As shown below and on Table 13, bills under the proposed Fiscal Year 2024 stormwater rates are comparable with the average of the surveyed neighboring utilities.

62	**Total Stormwater Expenses**	$8,512,718	($5,643,924)	$2,868,794

Footnotes:

[1] Budgeted amounts are based on Fiscal Year 2023 Adopted Operating Budget as provided by the City.

[2] Amounts are adjusted from budget as shown herein since such capital outlay expenses and debt service payments are reflected in the Capital Improvements Plan or the Revenue Requirements part of the rate model.

[3] Budgeted amounts include transfers to Fund 413 for Capital Improvement Funding, Fund 414 and 220 for debt payments, and the P.I.L.O.T. transfer.

[4] An allowance for bad debt expense of 0.25% of rate was recognized to account for uncollectible revenues.

[5] A contingency of 2.00% of O&M was added to allow for unforeseen contingencies.

Footnotes:

[1] Amounts shown based on Table 5.
[2] Payment amounts shown were based on debt service schedules provided by City Staff.
[3] Amounts shown represent payments on proposed capital lease utilized in the funding of the CIP.
[4] Amount shown is a transfer to the City's General Fund and detailed on Table 9.
[5] Amounts based on the proposed capital funding plan.
[6] Amounts based on projection of other operating revenues as shown on Table 2.
[7] Interest income is estimated on earnings on projected fund balances from unrestricted reserves.
[8] The forecast assumes that any deficiencies will be funded from available operating reserves.

Table 12
City of Port Orange, Florida
Stormwater Utility Rate Study

Projection of Debt Service Coverage Compliance

Footnotes:

[1] Projected revenue from rates reflects existing rates effective October 1, 2022.

[2] Revenue from rate adjustments reflect the following projected rate increases effective October 1st of each year.

Fiscal Year	2023	2024	2025	2026	2027
Rate Adjustment	0.00%	13.04%	11.54%	10.34%	0.00%

[3] Amounts shown only reflect earnings from funds and accounts established by the City that are considered unrestricted (earnings not required to be retained in such funds and accounts and are available as a component of Net Revenues).

[4] Amounts shown represent payments for the Stormwater Utility Revenue Bond, Series 2005.

[5] While no payments are anticipated during the Forecast Period it should be noted that significant payments on these loans are anticipated to begin around 2029.

[6] Amounts shown represent a transfer to the City's General fund for Payment in Lieu Of Taxes (PILOT), which is a transfer made based on projected asset values and the millage rate.

[7] Capital funded from rates as shown on Table 7.

[8] Amounts shown represent a transfer to the City's General fund for the System's allocation (6.75%) of the Capital Improvement Refunding Revenue Note, Series 2014.

[9] Lease payment shown associated with funding of fleet replacements in CIP on Table 7.

NOTICE OF HEARING TO IMPOSE AND PROVIDE FOR COLLECTION OF NON-AD VALOREM ASSESSMENTS TO FUND STORMWATER SERVICES AND FACILITIES IN THE CITY OF PORT ORANGE, FLORIDA

Continuous improvement of the City of Port Orange's stormwater system is a top priority. This includes the environmental impacts of stormwater runoff, the need to reduce flooding throughout the City, and the requirement to comply with federal regulations. The City has identified a need for greater resources to address these ongoing issues, and will consider a modest increase of Stormwater Fees to be phased in over three years.

The U.S. Environmental Protection Agency's National Pollution Discharge Elimination System (NPDES) stormwater permitting program, as implemented by the Florida Department of Environmental Protection (FDEP), required the City to enhance its stormwater management services. To finance these improvements and meet the necessary requirements, the City implemented a dedicated funding source in the form of a Stormwater Drainage Utility Fee ("Stormwater Fee") in 1986. The Stormwater Fee is designed to generate revenues that will be used to fund various stormwater management projects and initiatives. These projects may include constructing or upgrading stormwater infrastructure, implementing erosion control measures, creating new retention ponds, improving drainage systems, and conducting public education and outreach campaigns on stormwater best management practices.

The City currently maintains 136 stormwater ponds, 86,000 linear feet of canals and ditches along with 518,000 linear feet of stormwater pipes. In addition, the City maintains more than 4,000 inlets into our stormwater conveyance system with 14 State designated outfalls or discharges into the Halifax River. The City has on the horizon $55.9 million in new stormwater infrastructure projects to continue ongoing efforts to improve and strengthen the drainage system to over 23,000 property owners..

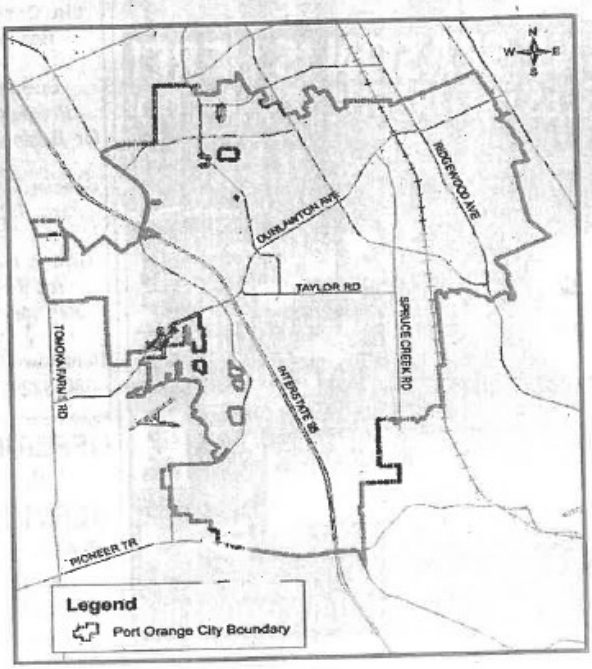
Chapter 74, Article V of the Code of Ordinances, City of Port Orange, Florida (the "Stormwater Utility Ordinance") establishes the City's stormwater drainage utility and authorizes imposition of the annual Stormwater Fee to fund the costs incurred by the City in providing stormwater services, facilities, equipment, and improvements each year. The Stormwater Utility Ordinance describes how the fee is calculated and authorizes collection of the fee pursuant to the uniform collection method set forth in section 197.3632, Florida Statutes (the "Uniform Collection Act"), pursuant to which non-ad valorem assessments such as the Stormwater Fee may be collected on the annual ad valorem tax bill mailed each November. The City has imposed the Stormwater Fee and collected the fee pursuant to the uniform collection method each year since 2005.

Notice is hereby given that the City Council of Port Orange will hold a public hearing at 6:30 p.m., or soon thereafter, on September 5, 2023 in the City Council Chambers on the First Floor of City Hall, 1000 City Center Circle, Port Orange, Florida 32129, to consider approving the Stormwater Fee for the fiscal year beginning October 1, 2023 ("Fiscal Year 2023-24"). During the public hearing, the City Council will receive comments on the proposed Stormwater Fee including collection on the ad valorem tax bill. All affected property owners have a right to appear at the hearing and to file written objections with the City Council within twenty (20) days of this notice.

If approved by City Council at the public hearing, the Stormwater Fee will be imposed at a rate not to exceed $160 per Single Family Unit ("SFU") for Fiscal Year 2023-24 and each fiscal year thereafter. The City intends to increase this fee from the current $115.00 per SFU over the next three years to reach the maximum $160.00 per SFU in Fiscal Year 2025-26. The Stormwater Fee based upon such rate is an annual charge that will continue from year to year and will be collected by the Tax Collector of Volusia County on the ad valorem tax bill mailed each November, including November 2023. The fee for each property is calculated according to the number of Single-Family Units ("SFUs") attributable to each tax parcel as of the date the fee is imposed. One (1) SFU equals 3,050 square feet of impervious area. A more specific description of the stormwater drainage utility and the method of computing the fee for each parcel of property are set forth in the Stormwater Utility Ordinance, copies of which are available for review at the office of the City Clerk, located at City Hall, 1000 City Center Circle, Port Orange, Florida 32129 or www.port-orange.org. If you have any questions, please contact the City Clerk's Office at (386) 506-5563.

For those property owners who do not receive an annual ad valorem tax bill (i.e., churches and government entities), the annual Stormwater Fee will be collected in monthly installments on the utility bill beginning with the October 2023 billing cycle.

ANY PERSON WISHING TO ENSURE THAT AN ADEQUATE RECORD OF THE PROCEEDINGS IS MAINTAINED FOR APPELLATE PURPOSES IS ADVISED TO MAKE THE NECESSARY ARRANGEMENTS FOR RECORDING AT HIS OR HER OWN EXPENSE. PERSONS WITH DISABILITIES NEEDING ASSISTANCE TO PARTICIPATE IN ANY OF THESE PROCEEDINGS SHOULD CONTACT THE CITY CLERK AT LEAST FIVE DAYS IN ADVANCE OF THE MEETING AT (386) 506-5563.



APPENDIX C

AFFIDAVIT OF MAILING

BEFORE ME, personally appeared the undersigned affiant, who after being duly sworn depose and say:

(1) I am the Assistant City Manager and Finance Director of the City of Port Orange, Florida (the "City").

(2) On or before August 16, 2023, I directed the mailing of notices by first class mail to the owners of certain real property regarding a public hearing to be conducted by the City on September 5, 2023, for purposes of considering the collection of stormwater utility fees as non-ad valorem assessments, at the addresses shown on the real property assessment tax roll database maintained by the Volusia County Property Appraiser for the purpose of the levy and collection of ad valorem taxes.

(3) The mailing vendor utilized for the mailed notices, infosend, provided confirmation of such mailing and an electronic archive of all such notices mailed on the City's behalf.

FURTHER AFFIANT SAYETH NAUGHT.

Jonathan McKinney, affiant

STATE OF FLORIDA
COUNTY OF VOLUSIA

The foregoing Affidavit of Mailing was sworn to and subscribed before me by means of ☑ physical presence or ☐ online notarization this 24 day of August, 2023, by Jonathan McKinney. He is personally known to me or has produced _____ as identification and did take an oath.

APPENDIX D

FORM OF CERTIFICATE OF NON-AD VALOREM ASSESSMENT ROLL

I HEREBY CERTIFY that I am the Finance Director and authorized agent of the City of Port Orange (the "City"), located in Volusia County, Florida; as such I have satisfied myself that all property included or includable on the City's non-ad valorem assessment roll for stormwater utility drainage fees (the "Non-Ad Valorem Assessment Roll") is properly assessed so far as I have been able to ascertain; and that all required extensions on the above described roll to show the non-ad valorem assessments attributable to the property listed therein have been made pursuant to law.

I FURTHER CERTIFY that, in accordance with the Uniform Assessment Collection Act, this certificate and the herein described Non-Ad Valorem Assessment Roll will be delivered to the Volusia County Tax Collector by September 15, 2023.

IN WITNESS WHEREOF, I have subscribed this certificate and directed the same to be delivered to the Volusia County Tax Collector and made part of the above described Non-Ad Valorem Assessment Roll this 5th day of September, 2023.

CITY COUNCIL AGENDA ITEM

COUNCIL MEETING DATE 9/5/2023

SUBJECT: (H21) First Reading - Ordinance No. 2023-09 - Amendment to Chapter 54, Article V, Police Pension Fund of the Code of Ordinances (Line of Duty Death)

DEPARTMENT: Finance

GOAL: 1 - Public Safety

RECOMMENDED MOTION: Move to approve Ordinance No. 2023-09, amending Chapter 54, Article V, Police Pension Fund of the Code of Ordinances (LODD).

SUMMARY: On April 4, 2023, City Council approved the Memorandum of Understanding (MOU) with the International Union of Police Associations (IUPA), as a product of negotiations, agreeing to amend the Police Pension Ordinance to include a Line of Duty Death Benefit. The proposed ordinance was also sent to the Coastal Florida Police Benevolent Association Lieutenants (PBA LT) collective bargaining unit for ratification. The Board of Trustees of the Police Pension Fund has also had an opportunity to review the proposed ordinance. Freiman Little Actuaries, LLS, the actuary, has completed the required actuarial impact statement for the proposed changes.

The proposed changes were patterned after the State FRS Line of Duty Death Benefit with a few deviations. The changes are summarized as follows:

1. Section 54-122 - Definitions. This section defines the term "domestic partner" as used in the new Line of Duty Death Benefit section of the Pension Ordinance. A domestic partner means any person, other than a spouse or child, who resides with the participant in a dwelling unit as if a family at the time of the participant's death; or who is the mother or father of a child in common with the participant.

2. Section 54-132.5 - Benefits Payable in the Event of a Participant Killed in the Line of Duty - This section has been created to grant a designation of potential beneficiaries of the Line of Duty Death benefit for the spouse, domestic partner, and surviving children. This amendment provides for monthly payments that will be payable to a surviving spouse or domestic partner in the event of a line of duty death. If a surviving spouse or domestic partner passes, it is explained how the benefit is to be divided amongst the participant's children who are under 18 years of age until each child's 25th birthday and paid for the use and benefit of each eligible child.

Staff have received and reviewed the actuarial impact statement related to this change to the Police Pension Fund. Due to the anticipated effective date being the end of the

fiscal year, there is minimal cost impact on the current fiscal year. However, for fiscal 2023 - 2024, the city's required contribution as a percentage will go from 45.02% of payroll to 46.0% or an increase of 0.98%. Preliminary estimates for fiscal year 2023 - 2024 show that this amendment will cost the city $50,346 in additional required contributions to the police pension fund.

PRESENTER: John McKinney

ORDINANCE NO. 2023-09

AN ORDINANCE OF THE CITY OF PORT ORANGE, VOLUSIA COUNTY, FLORIDA, AMENDING CHAPTER 54, ARTICLE V, POLICE PENSION FUND, AMENDING SECTION 54-122, DEFINITIONS, ADDING A NEW DEFINITION FOR "DOMESTIC PARTNER" AND ADDING "PARTICIPANT" TO THE DEFINITION OF POLICE OFFICER; CREATING A NEW SECTION 54-132.5, BENEFITS PAYABLE IN THE EVENT OF A PARTICIPANT KILLED IN THE LINE OF DUTY; PROVIDING FOR CODIFICATION; PROVIDING FOR REPEAL OF CONFLICTING ORDINANCES; PROVIDING FOR SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, the City of Port Orange (the "City") currently sponsors a Police Pension Fund ("Pension Fund"); and

WHEREAS, Section 54-132 of the City Code currently provides for pre-retirement survivor benefits; and

WHEREAS, the police pension board has requested that a line of duty death benefit be provided for a participant who is killed in the line of duty, similar to the benefit provided for special risk members of the Florida Retirement System who are killed in the line of duty; and

WHEREAS, the City and the Port Orange Police Association, I.U.P.A. Local 6051, have agreed that the Port Orange Police Pension Fund should be amended to provide a line of duty death benefit for a participant who is killed in the line of duty, similar to the benefit provided for special risk members of the Florida Retirement System who are killed in the line of duty; and

WHEREAS, the City Council has received and reviewed an actuarial impact statement related to this change; and

WHEREAS, the City Council deems it to be in the public interest to make this change to the Pension Fund.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF PORT ORANGE, VOLUSIA COUNTY, FLORIDA AS FOLLOWS:

SECTION 1: Section 54-122, Definitions, of the Port Orange Police Pension Fund is hereby amended as follows:

Sec. 54-122. - Definitions.

The following words, terms and phrases, when used in this article, shall have the meanings ascribed to them in this section, except where the context clearly indicates a different meaning:

[…]

Domestic partner means any person, other than a spouse or child, who resides with the participant in a dwelling unit as if a family at the time of the participant's death; or who is the mother or father of a child in common with the participant.

[…]

Police officer or *participant* means any person employed full-time by the city who satisfies the definition of police officer in F.S. §185.02(1~~4~~6).

[…]

SECTION 2. A new Section 54-132.5, Benefits Payable in the Event of a Participant Killed in the Line of Duty, is hereby created to read as follows:

Sec. 54-132.5 – Benefits Payable in the Event of a Participant Killed in the Line of Duty.

(a) The surviving spouse of any participant killed in the line of duty may, in lieu of the benefits provided in Section 54-132, elect to receive a monthly pension equal to 100% of the monthly salary being received by the participant at the time of death for the rest of the surviving spouse's lifetime. For the purpose of this Section, killed in the line of duty means a death that arises out of and in the actual

performance of duty required by the participant's employment as a city police officer and occurs during regularly scheduled working hours or irregular working hours, as required by the city. The city will require sufficient documentation to determine whether a death meets these criteria. For the purpose of this section, monthly salary means the total salary received by the participant during the most recent 12 months of full-time employment as a police officer divided by 12, excluding any overtime or lump sum payments, preceding the date the participant is killed in the line of duty.

(b) If the surviving spouse of a participant killed in the line of duty dies, the monthly payments that would have been payable to such surviving spouse had such surviving spouse lived shall be divided equally among all of the participant's children who are under 18 years of age until each child's 25th birthday and paid for the use and benefit of each eligible child.

(c) If a participant is unmarried, the participant may elect to designate a domestic partner to receive a survivor benefit. The designated domestic partner of any participant killed in the line of duty may, in lieu of the benefits provided in Section 54-132, elect to receive a monthly pension equal to 100% of the monthly salary being received by the participant at the time of death for a period of ten (10) years from the date the participant is killed in the line of duty. The designation of a domestic partner shall be made in writing and shall be submitted to the board of trustees. After the ten (10) year period, the monthly payments that would have been payable to such designated domestic partner had the ten (10) year period not expired shall be divided equally among all of the participant's children who are under 18 years of age until each child's 25th birthday and paid for the use and benefit of each eligible child.

(d) If a participant killed in the line of duty leaves no surviving spouse and has not designated a domestic partner but is survived by a child or children under 18 years of age, the benefit provided by subsection (a) normally payable to a surviving spouse, shall be divided equally among all of the participant's children who are under 18 years of age until each child's 25th birthday and paid for the use and benefit of each eligible child.

(e) The election by a surviving spouse, designated domestic partner, surviving child or children to receive any of the benefits set forth in this section shall prevent any designated beneficiary from receiving those benefits otherwise available in Section 54-132.

SECTION 3. Specific authority is hereby granted to codify and incorporate this ordinance in the existing Code of Ordinances of the City of Port Orange.

SECTION 4. All ordinances or parts of ordinances in conflict with this ordinance are hereby repealed to the extent of such conflict.

SECTION 5. If any provision of this ordinance or the application thereof to any person or circumstance is held invalid, such invalidity shall not affect other provision or applications of this ordinance which can be given effect without the invalid provision or application, and to this and the provisions of this ordinance are declared severable.

SECTION 6. This ordinance amendment shall take effect upon adoption.

CITY OF PORT ORANGE AND THE
INTERNATIONAL UNION OF POLICE
ASSOCIATIONS
PERC CERTIFICATION #1983

RATIFIED BY THE COASTAL
FLORIDA POLICE BENEVOLENT
ASSOCIATION LIEUTENANTS, PERC
CERTIFICATION #5561

This Memorandum of Understanding ("MOU") is entered into, as a result of contract negotiations between the International Union of Police Associations - PERC Certification #1983 ("Association") and the City of Port Orange ("City"), herein collectively referred to as (the "parties"), and provides for a new line-of-duty death pension benefit by amendment to the City of Port Orange Ordinance Chapter 54, Article V, Police Pension Fund ("Pension Ordinance"). The Coastal Florida Police Benevolent Association Lieutenants, PERC Certification #5561 ("PBALT"), has reviewed and ratified the proposed amendment to the Pension Ordinance.

1. The parties agree that the Pension Ordinance should be amended to create a line-of-duty death pension benefit, which will become effective upon adoption of the attached ordinance amendment (Ex. A) by City Council.

2. The PBALT has reviewed and ratified the attached proposed amendment to the Pension Ordinance.

3. All terms and conditions set forth in the collective bargaining agreement shall remain in full force and effect.

This MOU shall become effective upon ratification by the Union members, upon ratification of the PBALT, approval by the City, and execution by both parties.

Re: Impact of Proposed Ordinance Regarding Line of Duty Death Benefits

Dear Karan:

This letter is being written to provide an impact statement regarding the attached proposed ordinance which modifies the City of Port Orange (the City) Police Officers' Pension Fund (the Plan).

Summary of Changes

Section 54-122 Definitions. Definitions of Domestic Partner and Participant were added as none previously existed.

Section 54-132.5 Benefits Payable in the Event of a Participant Killed in the Line of Duty. Currently, under Section 54-132, vested members who die prior to the commencement of benefits shall have a survivor benefit payable on their behalf. The amount of the monthly income payable is the (i) Accrued Benefit at the date of death payable at the Normal Retirement Date, or (2) the actuarial equivalent of this Accrued Benefit payable on the first day of the month following death, as elected by the designated beneficiary.

With the proposed change, Section 132.5 is added. Under this new section, the surviving spouse of any participant killed in the line of duty may elect to receive (in lieu of the benefits provided in Section 54-132) a monthly benefit equal to 100% of the monthly salary being received by the participant at the time of death for the rest of the surviving spouse's life. The surviving spouse may elect to forgo this benefit and elect the benefits available in the previous paragraph. In the event the surviving spouse dies, the benefit is paid for the use and benefit of the participant's children under age 18 and continues until their 25th birthday.

If the participant is unmarried, the participant may elect to designate a domestic partner to receive a survivor benefit. The designated domestic partner of any participant killed in the line of duty may elect to receive (in lieu of the benefits provided in Section 54-132) a monthly benefit equal to 100% of the monthly salary being received by the participant at the time of death for a period of ten years from the date the participant is killed in the line of duty. After the ten year period, the monthly payments that would have been made to the designated domestic partner had the ten years not expired shall be paid for the use and benefit of the participant's children under age 18 and continues until their 25th birthday.

If the participant leaves no surviving spouse and has not designated a domestic partner, the benefit that would have been paid to a surviving spouse shall be paid for the use and benefit of the participant's children under age 18 and continues until their 25th birthday.

We understand no cost of living adjustment is applied to this benefit.

Actuarial Impact

The estimated impact has been determined based on the data, assumptions and methods shown in the October 1, 2022 actuarial valuation of the Plan with the addition of an assumption that deaths while in

active service are explicitly assumed to be line-of-duty. Additionally, we have assumed that the current assumption for Percentage Married at Retirement will not be modified and there are no Domestic Partner designations. Should this proposed ordinance be enacted on or before September 30, 2023, the change in Minimum Required Contributions as shown in the attached Exhibit D will become effective October 1, 2023. Should this proposed ordinance be enacted after September 30, 2023, the impact would be determined by a valuation performed after the ordinance has been adopted.

The impact of a benefit change can be looked at from several different perspectives. We can look at the change in the present value of projected benefits, the change in the normal cost, the change in the accrued liability, the change in the funded percentage, or the change in annual contributions.

- The Present Value of Benefits (PVB) is the present value, as of the valuation date, of all benefits that will become payable by the Plan for the current group of members in the census. The change in the PVB due to the proposed provisions is shown in Exhibit A.
- The Accrued Liability (AL) is the portion of the PVB attributable to the past at the valuation date. For active members, AL is the annual Normal Cost (NC) accumulated from date of entry to the valuation date for each Member. For retired and terminated members, the PVB and the AL are equal. The AL is the estimated liability at the valuation date. The Unfunded Accrued Liability (UAL) represents any excess of the Accrued Liability over the fund assets. A negative UAL indicates fund assets are greater than the Accrued Liability, otherwise known as a surplus. The Funded Percentage is a ratio of the fund assets divided by the Accrued Liability. The change in the UAL and Funded Percentage due to the proposed provisions is shown in Exhibit B.
- Normal Cost is the value of the portion of the total benefit for active members which accrues in the year following the valuation date. Under the Entry Age Normal (Level Percent of Salary) funding method, the NC is a constant fraction of salary from the member's date of entry into the Plan to the member's assumed date of termination, retirement, disability or death. The change in the NC due to the proposed provisions is shown in Exhibit C.
- The Minimum Required Contribution shown in Exhibit D determines the impact of the proposed provisions on the minimum contribution for the fiscal year ending September 30, 2024. The actual contribution payable for the fiscal year ending September 30, 2024 is as shown in the October 1, 2022 actuarial valuation and is unchanged by this impact statement unless the proposed ordinance is enacted on or before September 30, 2023.

Note: The impact provided is an estimate for the funding of the Plan. Accounting impacts will be different as plan changes are fully recognized in a single year's expense for accounting purposes.

Required Disclosures

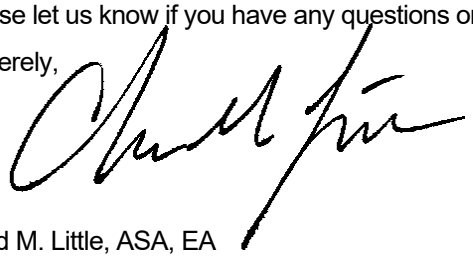
- The purpose of this study is to estimate the value of benefits for the proposed changes. No third-party recipient of this work product should rely upon this work for any purpose other than as stated. Such recipients should engage qualified professionals for advice appropriate to their own specific needs. The consultants who worked on this assignment are pension actuaries. Our advice is not intended to be a substitute for qualified legal, tax or accounting counsel.
- Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law.
- In preparing our report we relied, without audit, on information (some oral and some written) supplied by the City and the Administrator. This information includes, but is not limited to, statutory provisions, employee census, and financial information. In our examination of these data, we have found them to be reasonably consistent and comparable with data used for other

purposes. Since the valuation results are dependent on the integrity of the data supplied, the results can be expected to differ if the underlying data is incomplete or missing. It should be noted that if any data or other information is inaccurate or incomplete, our calculations may need to be revised.

- We understand that the ASOP 51 disclosures in the actuarial valuation report provide sufficient risk assessment and are not being modified as part of this study.
- In producing our work product, we rely on various models, internal and external, which were used for their intended purposes. Underlying data, assumptions, methodologies, model inputs and resulting outputs have been reviewed. The 7.05% assumed net return is a prescribed assumption as defined by Actuarial Standard of Practice No. 27 (ASOP 27), as it is set by the Board. While we find all other inputs and outputs to be reasonable, the prescribed assumption significantly conflicts with our judgment regarding what would constitute a reasonable assumption for the purpose of the measurement as discussed in ASOP 27. We continue to recommend lowering the net assumed return.
- The signing actuaries are independent of the plan sponsor. We are not aware of any relationship that would impair the objectivity of our work.
- On the basis of the foregoing, we hereby certify that, to the best of our knowledge and belief, this report is complete and accurate and has been prepared in accordance with generally recognized and accepted actuarial principles and practices which are consistent with Actuarial Standards of Practice, the Code of Professional Conduct and Qualification Standards for Public Statements of Actuarial Opinion of the American Academy of Actuaries. We meet the Qualification Standards under the American Academy of Actuaries to render the actuarial opinion contained.

Please let us know if you have any questions or need additional information.

Sincerely,



Chad M. Little, ASA, EA
Partner, Consulting Actuary

MEMORANDUM OF
UNDERSTANDING BETWEEN THE
CITY OF PORT ORANGE AND THE
INTERNATIONAL UNION OF POLICE
ASSOCIATIONS
PERC CERTIFICATION #1983

RATIFIED BY THE COASTAL
FLORIDA POLICE BENEVOLENT
ASSOCIATION LIEUTENANTS, PERC
CERTIFICATION #5561

This Memorandum of Understanding ("MOU") is entered into, as a result of contract negotiations between the International Union of Police Associations - PERC Certification #1983 ("Association") and the City of Port Orange ("City"), herein collectively referred to as (the "parties"), and provides for a new line-of-duty death pension benefit by amendment to the City of Port Orange Ordinance Chapter 54, Article V, Police Pension Fund ("Pension Ordinance"). The Coastal Florida Police Benevolent Association Lieutenants, PERC Certification #5561 ("PBALT"), has reviewed and ratified the proposed amendment to the Pension Ordinance.

1. The parties agree that the Pension Ordinance should be amended to create a line-of-duty death pension benefit, which will become effective upon adoption of the attached ordinance amendment (Ex. A) by City Council.

2. The PBALT has reviewed and ratified the attached proposed amendment to the Pension Ordinance.

3. All terms and conditions set forth in the collective bargaining agreement shall remain in full force and effect.

This MOU shall become effective upon ratification by the Union members, upon ratification of the PBALT, approval by the City, and execution by both parties.

EXHIBIT "A"

ORDINANCE NO. 2023-____

AN ORDINANCE OF THE CITY OF PORT ORANGE, VOLUSIA COUNTY, FLORIDA, AMENDING CHAPTER 54, ARTICLE V, POLICE PENSION FUND, AMENDING SECTION 54-122, DEFINITIONS, ADDING A NEW DEFINITION FOR "DOMESTIC PARTNER" AND ADDING "PARTICIPANT" TO THE DEFINITION OF POLICE OFFICER; CREATING A NEW SECTION 54-132.5, BENEFITS PAYABLE IN THE EVENT OF A PARTICIPANT KILLED IN THE LINE OF DUTY; PROVIDING FOR CODIFICATION; PROVIDING FOR REPEAL OF CONFLICTING ORDINANCES; PROVIDING FOR SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, the City of Port Orange (the "City") currently sponsors a Police Pension Fund ("Pension Fund"); and

WHEREAS, Section 54-132 of the City Code currently provides for pre-retirement survivor benefits; and

WHEREAS, the police pension board has requested that a line of duty death benefit be provided for a participant who is killed in the line of duty, similar to the benefit provided for special risk members of the Florida Retirement System who are killed in the line of duty; and

WHEREAS, the City and the Port Orange Police Association, I.U.P.A. Local 6051 have agreed that the Port Orange Police Pension Fund should be amended to provide a line of duty death benefit for a participant who is killed in the line of duty, similar to the benefit provided for special risk members of the Florida Retirement System who are killed in the line of duty; and

WHEREAS, the City Council has received and reviewed an actuarial impact statement related to this change; and

WHEREAS, the City Council deems it to be in the public interest to make this change to the Pension Fund.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF PORT ORANGE, VOLUSIA COUNTY, FLORIDA AS FOLLOWS:

SECTION 1: Section 54-122, Definitions, of the Port Orange Police Pension Fund is hereby amended as follows:

Sec. 54-122. - Definitions.

The following words, terms and phrases, when used in this article, shall have the meanings ascribed to them in this section, except where the context clearly indicates a different meaning:

[...]

Domestic partner means any person, other than a spouse or child, who resides with the participant in a dwelling unit as if a family at the time of the participant's death; or who is the mother or father of a child in common with the participant.

[...]

Police officer or *participant* means any person employed full-time by the city who satisfies the definition of police officer in F.S. §185.02(14~~6~~).

[...]

SECTION 2. A new Section 54-132.5, Benefits Payable in the Event of a Participant Killed in the Line of Duty, is hereby created to read as follows:

Sec. 54-132.5 – Benefits Payable in the Event of a Participant Killed in the Line of Duty.

(a) The surviving spouse of any participant killed in the line of duty may, in lieu of the benefits provided in Section 54-132, elect to receive a monthly pension equal to 100% of the monthly salary being received by the participant at the time of death for the rest of the surviving spouse's lifetime. For the purpose of this Section, killed in the line of duty means a death that arises out of and in the actual

performance of duty required by the participant's employment as a city police officer and occurs during regularly scheduled working hours or irregular working hours, as required by the city. The city will require sufficient documentation to determine whether a death meets these criteria. For the purpose of this section, monthly salary means the total salary received by the participant during the most recent 12 months of full-time employment as a police officer divided by 12, excluding any overtime or lump sum payments, preceding the date the participant is killed in the line of duty.

(b) If the surviving spouse of a participant killed in the line of duty dies, the monthly payments that would have been payable to such surviving spouse had such surviving spouse lived shall be divided equally among all of the participant's children who are under 18 years of age until each child's 25th birthday and paid for the use and benefit of each eligible child.

(c) If a participant is unmarried, the participant may elect to designate a domestic partner to receive a survivor benefit. The designated domestic partner of any participant killed in the line of duty may, in lieu of the benefits provided in Section 54-132, elect to receive a monthly pension equal to 100% of the monthly salary being received by the participant at the time of death for a period of ten (10) years from the date the participant is killed in the line of duty. The designation of a domestic partner shall be made in writing and shall be submitted to the board of trustees. After the ten (10) year period, the monthly payments that would have been payable to such designated domestic partner had the ten (10) year period not expired shall be divided equally among all of the participant's children who are under 18 years of age until each child's 25th birthday and paid for the use and benefit of each eligible child.

(d) If a participant killed in the line of duty leaves no surviving spouse and has not designated a domestic partner but is survived by a child or children under 18 years of age, the benefit provided by subsection (a) normally payable to a surviving spouse, shall be divided equally among all of the participant's children who are under 18 years of age until each child's 25th birthday and paid for the use and benefit of each eligible child.

(e) The election by a surviving spouse, designated domestic partner, surviving child or children to receive any of the benefits set forth in this section shall prevent any designated beneficiary from receiving those benefits otherwise available in Section 54-132.

SECTION 3. Specific authority is hereby granted to codify and incorporate this ordinance in the existing Code of Ordinances of the City of Port Orange.

SECTION 4. All ordinances or parts of ordinances in conflict with this ordinance are hereby repealed to the extent of such conflict.

SECTION 5. If any provision of this ordinance or the application thereof to any person or circumstance is held invalid, such invalidity shall not affect other provision or applications of this ordinance which can be given effect without the invalid provision or application, and to this and the provisions of this ordinance are declared severable.

SECTION 6. This ordinance amendment shall take effect upon adoption.
