Photos were submitted into evidence and accepted by Special Magistrate Fuller with no objections. The violation was to be corrected immediately, as it is a repeat violation, by mowing the entire property to include edging, weed eating, and blowing debris off the roadway and back onto the property.

Ms. Joseph recommended the property owners be found in repeat violation of the above referenced code with the violations to be corrected on or before August 4, 2019 by mowing the entire property to include edging, weed eating, and blowing debris off the roadway and back onto the property. In the event the property is not brought into compliance on or before the compliance date, and/or not maintained in a state of compliance, the City shall have the option to abate the violation as it is a health and safety concern. Accused should be further ordered to contact the Code Enforcement Officer to arrange for a re-inspection of the property to verify compliance with the order. Ms. Joseph requested any future violations under this ordinance be considered repeat. The cost sheet in the amount of \$41.60 was tendered into evidence and accepted by Special Magistrate Fuller with no objections.

Special Magistrate Fuller granted the recommendation as presented and deemed the property a health and safety violation. The property owner has until August 4, 2019 to mow the entire property to include edging, weed eating, and blowing debris off the roadway and back onto the property or the City shall have the option to abate the violation. Costs in the amount of \$41.60 were awarded to the City.

Replacement trees, if necessary, must meet the size criteria of section 14-315, and must be from the same general category, i.e., shade trees, understory trees, palms, etc. In buffering applications, evergreen trees may be replaced only with evergreen species. **(2) Shrubs.** All shrubs shall be maintained as shown on the plans. Required buffer shrubs shall be grown to and maintained at a minimum height of five feet, with regular trimming and pruning to foster dense growth. Shrubs required along parking areas shall be maintained at a minimum height of three feet. Alternative living ground covers may be utilized as desired. Approved mulch materials may be used in designated lawn areas: **a.** To accommodate new or expanded planting areas and their natural growth. **b.** In natural areas or areas of heavy shade where lawn maintenance has been unsuccessful. **c.** In limited areas subject to foot traffic where maintenance has been unsuccessful.

(5) Other planting areas. Other planting areas shown on the plans shall be maintained with similar materials to those originally specified. Annual flower beds may be converted to permanent material with at least a two-month flowering period, or material with berries, colorful flower bracts, or variegated foliage to simulate the original design intent.

(d) Required maintenance and anticipated growth and coverage. The following criteria shall be used to evaluate the maintenance and growth of all landscape plantings: **(1)** Existing trees preserved during development shall be maintained so as to provide the greatest opportunity for survival. Such maintenance shall include, as necessary, the following activities: a. Trimming and pruning to reduce stress. b. Soil aeration. c. Deep root fertilization. **(2)** Landscape plantings shall be maintained based on accepted professional practices to include regular irrigation, fertilization, pest control, weed control, and trimming and pruning. **(3)** Reasonable growth shall be based on accepted industry standards. **(4)** All trees and shrubs shall be trimmed so as not to interfere with pedestrian and vehicle movements. **(5)** Mulched areas shall be maintained so as to provide solid coverage and reasonable weed control. **(6)** Natural areas shall be kept free of garbage, trash and other foreign materials. Dead material shall be removed and replaced as required by this article. Natural area edges and other disturbed areas shall be mulched or sodded with weed growth controlled. **(7)** Irrigation systems must be maintained in proper working order to provide 100 percent coverage of planted landscaped areas.

Section 14-315. - Same—Replacement criteria.

- (a) Landscape plantings.** When the material required to be maintained under this article dies or fails to meet standards for reasonable growth, it shall be replaced with the same or similar material meeting the minimum specification of the zoning code.
- (b) Buffer plantings.** When material required to be maintained as part of a specific buffer shown on an approved plan or mandated by code at the time of development dies or fails to meet standards for reasonable growth, it shall be replaced with material as close in size and fullness as similar adjacent materials planted at the same time. However, the following upper limits shall apply to replacement material: **(1)** Replacement shade trees will be no larger than four-inch caliper, 20 feet in height (except palms). **(2)** Replacement understory trees will be no larger than two-inch caliper, 12 feet in height (except palms). **(3)** Replacement shrubs will be no larger than four feet in height.
- (c) Natural areas.** When material in natural areas required to be maintained by this article dies or is removed, it shall be replaced with the same or similar materials from the city's approved list of native plants and meeting minimum zoning code specifications. However, where natural areas are specifically designed to act as a required buffer, the requirements of subsection **(b)** above shall apply.

Section 14-317. - Parking, sidewalk and driveway areas.

(a) Maintenance criteria. **(1)** Parking lot striping, fire lane and traffic control markings. All striping and markings required by the original site plan, the Manual of Uniform Traffic Control Devices (MUTCD), or other city codes must meet minimum visibility standards and shall conform to the design standards of the MUTCD. **(2)** Traffic and parking control signage. All signage required by the site plan, the MUTCD, and other city codes shall be maintained according to accepted standards. **(3)** Pavement surfaces. Each dumpster location shall be surrounded by an enclosure as depicted in the Standard [Utility] Details. Enclosures should remain open on the service side, except in high visibility locations where gates may be approved. The enclosure shall be constructed using colors, materials, and architectural treatments consistent with the structure it serves. Alternative materials and colors may be approved in those situations where the enclosure is physically or visually separated from the primary structure, or where the primary building materials do not lend themselves to the enclosure application.

- The initial inspection found the dumpster enclosure gates on the South end of the property to be missing. To comply, the missing gates must be replaced on the existing dumpster at the South end of the property.

Failure to comply after this date may result in the commencement of appropriate code enforcement action and/or possible fine of up to \$1,000.00 per day for a first violation, \$5,000.00 per day per violation for a repeat violation, and up to \$15,000.00 per violation if the code enforcement board or special magistrate finds the violation to be irreparable or irreversible in nature.

If the violation is corrected and then recurs, or if the violation is not corrected by the specified time for correction by the Code Compliance Inspector, the case shall be presented to the **Special Magistrate** on the date set forth below, even if the violation has been corrected prior to this scheduled hearing.
