11. Acceptance of the 2024 Annual Concurrency Management Report
12. Approval of the 2025 Public Hearing and Development Review Calendar
13. Authorizing City Attorney's Office to Initiate Legal Proceedings Related to Code Enforcement

Motion to approve the consent agenda as presented was made by Councilman Shawn Goepfert and Seconded by Vice Mayor Tracy Grubbs. Motion carried unanimously by roll call vote.

PUBLIC PARTICIPATION (Non-Agenda – 20 minutes)

Matthew Vondrus, resident, expressed his apology to Council Members and staff for his previous reactions and comments on social media. Mr. Vondrus mentioned he had good conversations with Council Members and staff since Hurricane Milton about the City's efforts, and projects moving forward. He understands there are many moving parts, but he also brought up the Citizen’s perception, and requested bi-monthly social media posts on the City’s progress on stormwater projects.

Harold Jim White, resident, expressed his concerns regarding his broken water meter and his utility bill.

COUNCIL COMMENTS

14. Comments/Concerns from Council Members

Councilman Lance Green touched on the sale of the Reed Canal property. He would like the City to purchase another property to assist with the City’s drainage. He also asked about the order of the City Council Agenda.

Mayor Scott Stiltner mentioned this will be an item on the agenda in January.

Councilman Lance Green also discussed Code Enforcement and the need to maintain what we have. He stated there are commercial properties that need some attention, suggested night and weekend shifts, and would like to know what the goal and mission is for Code Enforcement.

Councilman Shawn Goepfert discussed the condition of properties throughout the City and mentioned property owners need to be held accountable. Councilman Shawn Goepfert stated communication is important and he would like for the City to work on having an open line of communication. He would also like an update on the issues concerning master meters in mobile home parks. Councilman Shawn Goepfert also spoke on the order of the Council agenda and asked if there is an opportunity for

Council members to have a rebuttal while the citizens are present to speak about their concerns..

Vice Mayor Tracy Grubbs spoke on communication, the platform for communication, and thanked Mr. Vondrus for his comments at tonight's meeting. He touched on FEMA projects and how we cannot defer those projects to others. Vice Mayor Tracy Grubbs explained what the Aqua Hawk program is and suggested everyone sign up. He thanked staff for everything they did for this past weekend's holiday events. Vice Mayor Tracy Grubbs mentioned the Code Enforcement item on this evening's agenda regarding nuisance houses and mentioned that we now have the legal proceedings to move forward. He suggested citizens come forward and talk to Council about properties where there are similar code issues.

Mayor Scott Stiltner talked about social media and how misinformation comes across it. He talked about the master stormwater project and stated he would like an element on the city's website that indicates what the stormwater projects are and would like a link to past City Council meetings where these items were discussed. This would be in an effort to make it easy to find for citizens and bring transparency. Mayor Scott Stiltner would like to have agenda adjustments. Should someone on council mis-speak, he would like the City Manager or City Attorney to clarify when it's their time to speak. Mayor Scott Stiltner applauded City staff on the events over the weekend. Additionally, he commented on Code Enforcement and would like a discussion specifically on Code but also spoke on legal issues, State mandates and mentioned there needs to be persistence. Lastly, as we come to the end of debris pick up, Mayor Scott Stiltner would like to see the City employees as a whole, bring forward any street lighting and signage that is down, out, broken, etc. to the proper department's attention.

PUBLIC HEARING

15. First Reading - Ordinance No. 2024-25 - Comprehensive Plan Amendment/Annual Capital Improvements Element Update (Case No. CPAM-24-0004)

Matt Jones, City Attorney, read Ordinance No. 2024-25.

ORDINANCE NO. 2024-25

AN ORDINANCE OF THE CITY OF PORT ORANGE, VOLUSIA COUNTY, FLORIDA, AMENDING THE COMPREHENSIVE PLAN CAPITAL IMPROVEMENT ELEMENT; PROVIDING FOR THE FY2025-2030 FIVEYEAR SCHEDULE OF CAPITAL IMPROVEMENTS AND SUPPORTING DATA; PROVIDING FOR REPEAL OF CONFLICTING ORDINANCES AND RESOLUTIONS; PROVIDING FOR SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

Penelope Cruz, Planning Manager, provided an update and explained concurrency.

Motion to adopt Ordinance No. 2024-25 was made by Vice Mayor Tracy Grubbs and Seconded by Councilman Lance Green. Motion carried unanimously by roll call vote.

ADDITIONAL ITEMS

16. City Attorney

There was nothing further.

17. City Manager

Mr. Clark indicated the City has a weekly Newsletter and everyone who has their email address tied to their utility account receives it. Construction projects can move slowly and there may not be weekly updates on the progress. Mr. Clark expressed his appreciation to the citizens who have come forward with their concerns and touched on the previous reorganization of City departments to implement changes to better the City.

Mayor Scott Stiltner spoke about Capital Improvement Projects (CIP) and mentioned how a certain percentage can be approved this year, some next year, and so on. He also touched on Councilman Green's comment about purchasing land and how not all of the land options are suited for what the City needs.

Mr. Clark also discussed funding from FEMA and the sales of properties. The City's intent is to put the money received in some type of stormwater fund. He also mentioned there are a couple properties that could be beneficial for the stormwater plan.

ADJOURNMENT - 7:17 p.m.

CITY COUNCIL AGENDA ITEM

COUNCIL MEETING DATE 1/21/2025

SUBJECT: (B7a) Approval of Amendment No. 1 to the AIA Agreement with Wharton-Smith for Public Utilities Field Operations Facility Construction Project amending Exhibit A - Guaranteed Maximum Price Amendment, establishing the Guaranteed Maximum Price (GMP) for the construction phase of the project.

DEPARTMENT: Engineering

GOAL: 2 - Infrastructure

RECOMMENDED MOTION: Move to approve Amendment No. 1 to the AIA Agreement with Wharton-Smith for the Public Utilities Field Operations Facility Construction Project establishing the Guaranteed Maximum Price (GMP) for the construction phase of the project in an amount not to exceed $21,887,151, subject to approval of Resolution No. 25-02, and authorize the Mayor and City Clerk to execute all contract required documents.

SUMMARY: The Engineering Department is requesting approval of Amendment No. 1 to the AIA Agreement with Wharton-Smith for the Public Utilities Field Operations Facility Construction Project amending Exhibit A - Guaranteed Maximum Price Amendment to establish the Guaranteed Maximum Price (GMP) in an amount not to exceed $21,887,151.00 for the construction of the Public Utilities Field Operations Facility.

On August 21, 2024, Council approved the award to Wharton-Smith, Inc. for Construction Manager at Risk (CMAR) services for the Public Utilities Operations Facility and for the pre-construction phase – CMAR Preconstruction Services. During the pre-construction phase, Wharton-Smith worked with City Engineering staff and Schenkel Schultz Architects to develop preliminary cost estimates, complete a constructability review, conduct bidding and procurement of the different work packages, and have provided a Guaranteed Maximum Price (GMP) Submittal for the project. The full GMP Submittal is attached to this item for further review.

The current Public Utilities Field Operations facility, built in the 1970s and expanded in the early 1990s, is located on Oak Street, just north of the Public Works yard, but it faces significant space constraints. As a result, some Field Operations staff are based at the wastewater treatment plant, while the heavy equipment needed for their work is stored at other locations across the city. Field Operations plays a vital role in the City's emergency response team. During potential emergencies, crews must be relocated to the water treatment plant to avoid flooded roads that surround the current facility. The construction of the new Public Utilities facility will bring all of Public Utilities Field

Operations and Administrative staff to one centralized location, provide covered storage for equipment which will extend the equipment life, and allow a more efficient operation to better serve the residents of Port Orange.

There are sufficient funds available in the current Fiscal Year CIP Budget to cover expenses prior to the issuance of debt to pay for construction of the facility. Once the debt is secured, Resolution No. 25-02 (which is also on this agenda) allows the City to reimburse itself for incurred project expenditures prior to the issuance of the debt with proceeds from bonds, notes or other obligations to be issued in the future.

If approved, Wharton-Smith plans on breaking ground on the facility in early March 2025 and construction is scheduled for completion in July 2026.

ADDITIONS AND DELETIONS:
The author of this document has added information needed for its completion. The author may also have revised the text of the original AIA standard form. An *Additions and Deletions Report* that notes added information as well as revisions to the standard form text is available from the author and should be reviewed. A vertical line in the left margin of this document indicates where the author has added necessary information and where the author has added to or deleted from the original AIA text.

This document has important legal consequences. Consultation with an attorney is encouraged with respect to its completion or modification.

AIA Document A201™–2017, General Conditions of the Contract for Construction, is adopted in this document by reference. Do not use with other general conditions unless this document is modified.

ARTICLE A.1 GUARANTEED MAXIMUM PRICE

§ A.1.1 Guaranteed Maximum Price

Pursuant to Section 3.2.6 of the Agreement, the Owner and Construction Manager hereby amend the Agreement to establish a Guaranteed Maximum Price. As agreed by the Owner and Construction Manager, the Guaranteed Maximum Price is an amount that the Contract Sum shall not exceed. The Contract Sum consists of the Construction Manager's Fee plus the Cost of the Work, as that term is defined in Article 6 of the Agreement.

§ A.1.1.1 The Contract Sum is guaranteed by the Construction Manager not to exceed Twenty-One Million Eight Hundred Eighty-Seven Thousand One Hundred Fifty-One and 00/100 Dollars ($ 21,887,151.00), subject to additions and deductions by Change Order as provided in the Contract Documents.

§ A.1.1.2 Itemized Statement of the Guaranteed Maximum Price. Provided below is an itemized statement of the Guaranteed Maximum Price organized by trade categories,

including allowances; the Construction Manager's contingency; alternates; the Construction Manager's Fee; and other items that comprise the Guaranteed Maximum Price as defined in Section 3.2.1 of the Agreement.

See attachment "City of Port Orange Public Utilities Field Operations Facility Guaranteed Maximum Price (GMP Submittal) dated December 06, 2024 consisting of 985 pages, on file with City Engineer.

§ A.1.1.3 The Construction Manager's Fee is set forth in Section 6.1.2 of the Agreement.

§ A.1.1.4 The method of adjustment of the Construction Manager's Fee for changes in the Work is set forth in Section 6.1.3 of the Agreement.

§ A.1.1.5 Alternates

§ A.1.1.5.1 Alternates, if any, included in the Guaranteed Maximum Price:

Item	Price
*	*

*As provided for, if any, in attachment "City of Port Orange Public Utilities Field Operations Facility Guaranteed Maximum Price (GMP Submittal) dated December 06, 2024 consisting of 985 pages, on file with City Engineer.

§ A.1.1.5.2 Subject to the conditions noted below, the following alternates may be accepted by the Owner following execution of this Exhibit A. Upon acceptance, the Owner shall issue a Modification to the Agreement.

(Paragraph deleted)

Item	Price	Conditions for Acceptance
*	*	*

*As provided for, if any, in attachment "City of Port Orange Public Utilities Field Operations Facility Guaranteed Maximum Price (GMP Submittal) dated December 06, 2024 consisting of 985 pages, on file with City Engineer.

§ A.1.1.6 Unit prices, if any:

(Paragraph deleted)

Item	Units and Limitations	Price per Unit ($0.00)
*	*	*

*As provided for, if any, in attachment "City of Port Orange Public Utilities Field Operations Facility Guaranteed Maximum Price (GMP Submittal) dated December 06, 2024 consisting of 985 pages, on file with City Engineer.

ARTICLE A.2 DATE OF COMMENCEMENT AND SUBSTANTIAL COMPLETION

§ A.2.1 The date of commencement of the Work shall be:

[ ] The date of execution of this Amendment.

[X] Established as follows:

Notice to Proceed will be issued February 24, 2025.

If a date of commencement of the Work is not selected, then the date of commencement shall be the date of execution of this Amendment.

§ A.2.2 Unless otherwise provided, the Contract Time is the period of time, including authorized adjustments, allotted in the Contract Documents for Substantial Completion of the Work. The Contract Time shall be measured from the date of commencement of the Work.

§ A.2.3 Substantial Completion

§ A.2.3.1 Subject to adjustments of the Contract Time as provided in the Contract Documents, the Construction Manager shall achieve Substantial Completion of the entire Work:

(Paragraph deleted)

SECTION 1 – EXECUTIVE SUMMARY

December 6, 2024

Mr. Junos Reed, P.E.
City Engineer
City of Port Orange
1395 Dunlawton Avenue
Port Orange, FL 32129

Re: Public Utilities Field Operations Facility
Guaranteed Maximum Price

Dear Mr. Reed:

Wharton-Smith is pleased to submit the Guaranteed Maximum Price Submittal for the Public Utilities Field Operations Facility project. Our current construction schedule along with a comprehensive breakdown of material, equipment, subcontractor, and labor is provided in the supporting documentation following this letter. Our guaranteed maximum price is **$21,887,151**.

Please note the following clarifications regarding this proposal:

1. We have included all work in accordance with the Schenkel-Shultz 100% Design documents dated September 2024.
2. Please refer to Section 2 for the estimate Cost Summary and pricing breakdowns.

    a. The GMP includes an Owner Contingency. The contingency included is to fund any Owner obligations to the project or to fund Owner elected scope changes to the work.

    b. A Risk Register has been developed jointly with the City and Schenkel-Shultz to establish CMAR allowances and contingencies. Please reference this document with detail on each allowance and contingency.

    c. The GMP, as presented, represents the anticipated construction costs based on the design documents which incorporate the constructability comments that have been addressed with the team during the final design process.
3. Subcontract and Supplier bids used in preparation of this GMP are located in Section 4.
4. The duration of construction is 18 months from Notice to Proceed to Final Completion. We have included project management staff that are appropriate for this project. Please reference Section 3 for the current construction schedule.
5. We have the following clarifications for the team's review and consideration:
    a. Storm water pollution prevention (SWPPP) is included.
    b. We have included a performance and payment bond, and insurances.
    c. ERP, FDEP, FDOT, & ROW permit costs are by others.
    d. We have not included on-site facilities for a full-time inspector.
    e. We have not included any additional Lead or Asbestos Survey for demolition of existing structures, nor cost for any required abatement.

f. Pricing includes no knowledge of buried or concealed conditions beyond what is indicated or shown on documents received to date. Cost has been included to perform GPR of the site ahead of construction.
g. We have not included any cost for Subsurface Foundation Improvements such as Auger Cast Piles or Tension Piles for any of the structures.
h. Davis-Bacon prevailing wage requirements and American Iron and Steel (AIS) are not incorporated in the pricing.
i. All Pricing (Labor, Material, Equipment, Subcontract) is based on current market value.
j. Duration of Material lead times are current market conditions.
k. No off-site material storage is included.
l. We have provided a comprehensive list of allowances. A description of the allowance can be found in Section 2. These allowances have been developed to provide complete transparency on bid items that could not be fully known at the time of bid but are anticipated to be spent. Wharton-Smith will provide backup for all allowance expenditures and unspent funds will be returned to the City.
m. On several of the bid packages Wharton-Smith is carrying a number for a bidder that is not the lowest bid. This is either due to an incomplete bid by the lowest bidder, or bids that require additional scrutiny. In these situations, should the lowest bidder be deemed responsive Wharton-Smith will return the savings to the City's Contingency.
n. The Construction Manager's general conditions and requirements for (16) months are included. Should construction be delayed due to no fault of the Construction Manager, the general conditions and CM Services shall be added to the contract value at actual cost, plus markup, as defined in the Agreement.
o. General Conditions/General Requirements and Contractor's Fee are considered lump sum and will be billed monthly in equal installments through the duration of the project.
p. Threshold Inspectors are not included as they are not required by the project requirements.
q. Materials testing is included per the specifications.
r. Building Commissioning is not included and is assumed to be by others.
s. In the case of major weather events, such as flooding, tornadoes, hurricanes, etc., additional working construction days will be added to the schedule based on an assessment of damage to the site and impacts on construction personnel.
t. The cost associated with temporary water, sewer and electric utilities will be paid by the Construction Manger through the date of Substantial Completion at which time these utilities shall be transferred into the Owner's name and become the responsibility of the Owner.
u. Permit fees, including but not limited to Building, Environmental, etc. have been included. Transportation and Impact fees have not been included.
v. Section 5 contains bidders' exceptions and clarifications, some of which have a cost impact to the project that have been accounted for in this GMP. This GMP assumes all of these will be incorporated into the final construction of this project.

I am available to discuss at your earliest convenience.

Very respectfully,

James De La Rosa
Project Executive
Wharton-Smith, Inc.

SECTION 2 – COST SUMMARY

CITY OF PORT ORANGE - PUBLIC UTILITIES FIELD OPERATIONS FACILITY
GMP
12/6/2024

Allowances carried in this GMP

Div. - Trade	Description	Value
Div 01 - General Requirements	Building Permit Allowance	235,613
Div 01 - General Requirements	Independent Materials Testing Allowance	47,593
Div 01 - General Requirements	Electrical Power Allowance - Cost associated with initial Power Start up Costs	22,500
03 - Concrete	5 tons rebar & concrete washout pits, additional bollard/housekeeping pads	100,000
05 - Structural Steel	Misc. angles, plates, studs & steel support beam for operable partition	100,000
06 - Finish Carpentry	Decorative Wall Panels (DP-1 Interlam, DP-2 Acrylic Logo)	39,550
07 - Firestopping	A typical partition detail on sheet G032 references sprayed fireproofing. Although we do not anticipate sprayed fireproofing on this project we have carried an allowance for this until we receive engineering clarification.	55,000
08 - Windows	Wind and Fire rated glazing & doors at Breezeway. Manufacturer currently can get either wind or fire rated glazing not both. Architectural door type changes may be required	15,000
09 - Drywall	Additional in-wall blocking as required and pressure treated nailers at fascias per fascia details on A552	25,000
09 - Flooring	Typical moisture mitigation re-work	35,000
09 - Painting	Incidental damage and retouch final painting	17,000
10 - Operable Partitions	Steel I-Beam supports and kickers not carried in steel bids	10,000
11 - Equipment/Appliances	Allowance for hard to subcontract equipment items: E3 TV Monitors, E11 Ice Machine, E19 Drill Press, E21 5" bench vise	36,950
12 - Furnishings	Owner requested allowance for all interior administrative furniture	650,000
21 - Fire Suppression	Allowance to cover costs of breezeway and outdoor storage area pre-action sprinkler coverage.	34,500
23 - HVAC	Kitchen Appliance Hood ref. in FFE is best furnished and installed by HVAC subcontractor. No specification or model # - carried a furnish & install allowance	9,605
23 - HVAC	Temporary A/C & Dehumidification to protect finishes before AC delivery and extended equipment warranties	50,000
26 - Electrical	The extent of the Distributed Antenna System will not be know until a test/survey is conducted in the building. An allowance needs to be carried for full system furnish/install scope.	77,000
26 - Electrical	Allowance for temporary power, lighting and security, as well as FPL Tie-ins/conduit/coordination	100,000
26 - Electrical	Permanent Power and FP&L charges for engineering & service entrance power/switchgear.	250,000
	Total Allowances carried in GMP	**1,910,311**

City of Port Orange

Date: 12/02/2024

Project: City of Port Orange Utility Operations Building

Risk Identification			Risk Assessment			Risk Control Measures		Risk Allocation				Risk Impact & Control Measure Calculations
ID No.	Risk Issue	Risk Type	Potential Cost Impact	Potential Schedule Impact (WDs)	Probability (0-100%)	Risk Mitigation Strategy	Control Measures in GMP Scope	Weighted Cost Exposure (Prob x PCI)	Cost Offset By Allowance	Cost Offset By Contingency	Unmitigated Cost Exposure	
1	Weather Delays	Adverse Weather	$100,000	15	100%	Provide for reasonable float in schedule, create emergency response plan.	Provide allowance or contingency as necessary	$100,000	$0	$100,000	$0	
2	Building / Subcontractor Permit Review Delays	Permitting	$30,000	15	50%	Presubmittal meeting with the City of Port Orange Building Department.	Provide allowance or contingency as necessary	$15,000	$0	$15,000	$0	
3	Delineated Engineering Review for Building Permit Issuance	Permitting	$20,000	20	75%	Presubmittal meeting with the City of Port Orange Building Department.	Provide allowance or contingency as necessary	$15,000	$0	$15,000	$0	
4	Design Changes	Design	$75,000	20	50%	Constant communication and coordination with SSA.	Provide allowance or contingency as necessary	$37,500	$0	$37,500	$0	
5	Procurement / Delivery Delays	Procurement	$75,000	20	25%	Early procurement on key equipment and materials. Includes submittal approval delays.	Provide allowance or contingency as necessary	$18,750	$0	$18,750	$0	
6	Construction Delays / Subcontractor Performance	Construction Schedule	$50,000	20	25%	Maintain schedule with good management tools and processes, add additional resources if needed.	Provide allowance or contingency as necessary	$12,500	$0	$12,500	$0	
7	Critical Path Delays - CoPO Evaluation and Decision Making	Construction Schedule	$50,000	20	5%	Timely decision making.	Provide allowance or contingency as necessary	$2,500	$0	$2,500	$0	
8	Critical Path Delays - Contract Amendments	Construction Schedule	$25,000	20	5%	Timely decision making.	Provide allowance or contingency as necessary	$1,250	$0	$1,250	$0	
9	Unavoidable Supply Chain Issues	Resource Constraints	$75,000	30	25%	Offset potential supply chain issues with contingency.	Provide allowance or contingency as necessary	$18,750	$0	$18,750	$0	
10	System Performance Issues	Design	$15,000	10	5%	3rd party review of systems and equipment.	Provide allowance or contingency as necessary	$750	$0	$750	$0	
11	Unanticipated Design Requirements After GMP	Design	$15,000	5	5%	Constant communication and coordination with SSA.	Provide allowance or contingency as necessary	$750	$0	$750	$0	
12	Latent Defects (Mis fabrication) of Materials/Equipment	Quality	$10,000	5	25%	Strong terms and conditions in purchase orders and subcontracts. Inspect fabrications in shop (prior to delivery) where possible.	Provide allowance or contingency as necessary	$2,500	$0	$2,500	$0	
13	Unforeseen Utility Conflicts / Issues	Unknown Site Conditions	$20,000	5	10%	Perform Subsurface Utility Exploration (SUE) where possible. GPR	Provide allowance or contingency as necessary	$2,000	$0	$2,000	$0	
14	Integration into Existing Network	Owner Operational Impacts	$50,000	5	10%	Early coordination with City's IT and technology infrastructure vendors and team members.	Provide allowance or contingency as necessary	$5,000	$0	$5,000	$0	
15	Partial Substantial Acceptance and Owner Operation	Construction Schedule	$25,000	5	15%	Early discussion of owner acceptance terms and conditions.	Provide allowance or contingency as necessary	$3,750	$0	$3,750	$0	
16	Unforeseen Startup Restrictions	Owner Operational Impacts	$10,000	5	5%	Early discussion with mechanical equipment suppliers	Provide allowance or contingency as necessary	$500	$0	$500	$0	
17	Coordination of unidentified owner furnished equipment, furniture, and / or fixtures	Other Project Stakeholders	$15,000	10	10%	Early coordination with CoPO IT department, maintenance team, and end users.	Provide allowance or contingency as necessary	$1,500	$0	$1,500	$0	
18	Access issues due to neighboring apartment complex during construction hours	Site Safety	$7,500	10	75%	Discuss with City of Port Orange to discuss impact, drive route patterns and working hours.	Provide allowance or contingency as necessary	$5,625	$0	$5,625	$0	
19	Unsuitable Soils Encountered	Unknown Site Conditions	$50,000	20	25%	Additional boring samples at the building footprint.	Provide allowance or contingency as necessary	$12,500	$0	$12,500	$0	
20	Unseasonable High Water Table	Unknown Site Conditions	$20,000	10	33%	Additional boring samples at the building footprint prior to the start of construction.	Provide allowance or contingency as necessary	$6,600	$0	$6,600	$0	
21	Endangered Animal Findings and Relocation	Environmental Impacts	$5,000	30	50%	Site investigation prior to the start of construction.	Provide allowance or contingency as necessary	$2,500	$0	$2,500	$0	
22	Tree Preservation and / or Relocation	Environmental Impacts	$5,000	30	150%	Arborist consultation of the existing trees.	Provide allowance or contingency as necessary	$7,500	$0	$7,500	$0	
23	Federal Aviation Administration Review of Crane Requirements (Project within 3 mile radius of airport)	Regulatory Requirements	$15,000	30	100%	Submit FAA notification requirement 45 days prior to the start of construction.	Provide allowance or contingency as necessary	$15,000	$0	$15,000	$0	
24	Delayed ODP Purchase Orders Issuance	Procurement	$120,000	20	10%	Timely issuance of purchase orders from the CoPO	Provide allowance or contingency as necessary	$12,000	$0	$12,000	$0	
25	Critical Material Theft	Site Safety	$10,000	30	10%	Upgrade site security options such as 24/7 camera monitoring, public safety patrol, etc.	Provide allowance or contingency as necessary	$1,000	$0	$1,000	$0	

City of Port Orange

Risk Identification			Risk Assessment			Risk Control Measures		Risk Allocation				Risk Impact & Control Measure Calculations
ID No.	Risk Issue	Risk Type	Potential Cost Impact	Potential Schedule Impact (WDs)	Probability (0-100%)	Risk Mitigation Strategy	Control Measures in GMP Scope	Weighted Cost Exposure (Prob x PCI)	Cost Offset By Allowance	Cost Offset By Contingency	Unmitigated Cost Exposure	
26	Unforeseen Procument Impacts/Material Tariffs	Procurement	$50,000	15	25%	Identify and monitor issues relating to material impacts and or tariff situations	Provide allowance or contingency as necessary	$12,500	$0	$12,500	$0	
27	Construction schedule acceleration	Construction Schedule	$100,000	0	50%	Identification of expedited material availability and options.	Provide allowance or contingency as necessary	$50,000	$0	$50,000	$0	
28	Natural Gas line for Generator if requested by Owner	Construction Schedule	$40,000	20	50%	Identification of natural gas location/availability and options	Provide allowance or contingency as necessary	$20,000	$0	$20,000	$0	
Div 01 - General Requirements	Building Permit Allowance	Allowance	$235,613	30	100%	Allowance for cost associated with permits for the project including but not limited to Building, Site, Fence, etc.	Provide allowance or contingency as necessary	$235,613	$235,613	$0	$0	
Div 01 - General Requirements	Independent Testing Allowance	Allowance	$47,593	0	100%	Allowance for cost associated with materials testing	Provide allowance or contingency as necessary	$47,593	$47,593	$0	$0	
Div 01 - General Requirements	Electrical Power Allowance	Allowance	$22,500	0	100%	Allowance for cost associated with Temp to Permanent Power and initial start up	Provide allowance or contingency as necessary	$22,500	$22,500	$0	$0	
Div 01 - Div 32 / Undetermined	Allowance for unforeseen issues and items not yet identified	Allowance	$187,738	0	100%	Allowance carried to cover issues and items not yet identified in the project	Provide allowance or contingency as necessary	$187,738	$0	$187,738	$0	
Div 03 - Concrete	Allowanace for additional concrete and reinforcing needs	Allowance	$100,000	0	100%	Allowance carried for additional 5 tons rebar and concrete washout pits, additional bollards/housekeeping pads	Provide allowance or contingency as necessary	$100,000	$100,000	$0	$0	
Div 05 - Structural Steel	Allowance for miscellaneous steel	Allowance	$100,000	0	100%	Allowance carried for miscellaneous angles, plates, studs and steel support beam for operable partition	Provide allowance or contingency as necessary	$100,000	$100,000	$0	$0	
Div 06 - Finish Carpentry	Allowance for Decorative Wall Panels	Allowance	$39,550	0	100%	Allowance carried for Decorative Wall Panels: (DP-1 Interlam, DP-2 Acrylic Logo)	Provide allowance or contingency as necessary	$39,550	$39,550	$0	$0	
Div 07 - Firestopping	Allowance for Firestopping	Allowance	$55,000	0	100%	Allowance carried for Firestopping: A typical partition detail on Sheet G032 references Applied Fireproofing. Although we do not anticipate sprayed fireproofing on this project we have carried and allowance for this until we receive engineering clarification	Provide allowance or contingency as necessary	$55,000	$55,000	$0	$0	
Div 08 - Windows	Allowance for rated glazing at doors and breezeway	Allowance	$15,000	0	100%	Allowance carried for Wind and Fire rated glazing at doors and breezeway. Manufacturer currently can get either wind OR fire rated glazing, but not both. Architectural door type changes may be required.	Provide allowance or contingency as necessary	$15,000	$15,000	$0	$0	
Div 09 - Drywall	Allowance for additional in-wall blocking	Allowance	$25,000	0	100%	Allowance carried for additional in-wall blocking as required and pressure treated nailers at fascias per detail on A552	Provide allowance or contingency as necessary	$25,000	$25,000	$0	$0	
Div 09 - Flooring	Allowance for moisture mitigation for floor installation	Allowance	$35,000	0	100%	Allowance carried for moisture mitigation if required for floor installation	Provide allowance or contingency as necessary	$35,000	$35,000	$0	$0	
Div 09 - Painting	Allowance carried incidental damage and touchup painting as required.	Allowance	$17,000	0	100%	Allowance carried incidental damage and touchup painting as required.	Provide allowance or contingency as necessary	$17,000	$17,000	$0	$0	
Div 10 - Operable Partitions	Allowance for Steel I-Beam supports and kickers	Allowance	$10,000	0	100%	Steel I-Beam supports and kickers not carried in steel costs	Provide allowance or contingency as necessary	$10,000	$10,000	$0	$0	
Div 11 - Equipment/Appliances	Allowance for misc. equipment items	Allowance	$39,950	0	100%	Allowance for hard to subcontract equipment items: E3 TV Monitors, E11 Ice Machine, E19 Drill Press, and E21 5: bench vice	Provide allowance or contingency as necessary	$36,950	$36,950	$0	$0	
Div 12 - Furnishings	Allowance for interior administrative furniture - FFE	Allowance	$650,000	0	100%	Allowance carried Owner requested interior administrative furniture - Currently no details/specifics have been provided in the Contract Documents	Provide allowance or contingency as necessary	$650,000	$650,000	$0	$0	
Div 21 - Fire Suppression	Allowance for Fire Suppression at Breezeway	Allowance	$34,500	0	100%	Allowance carried to cover costs of breezeway and outdoor storage area pre-action sprinkler coverage if required.	Provide allowance or contingency as necessary	$34,500	$34,500	$0	$0	
Div 23 - HVAC	Allowance for Kitchen Appliance Hood	Allowance	$9,605	0	100%	Allowance carried for Kitchen Appliance Hood referenced in FFE. This is best furnished and installed by HVAC subcontractor. No specification or Model # was noted. Carried a furnish and install allowance.	Provide allowance or contingency as necessary	$9,605	$9,605	$0	$0	
Div 23 - HVAC	Allowance for Temp A/C and Dehumidification	Allowance	$50,000	0	100%	Allowance for Temporary A/C and Dehumidification to protect finishes before AC delivery and extend equipment warranties	Provide allowance or contingency as necessary	$50,000	$50,000	$0	$0	
Div 26 - Electrical	Allowance for DAS System	Allowance	$77,000	0	100%	Allowance for DAS System. The extent of the Distributed Antenna System will not be known until a test/survey is conducted in the building. An allowance needs to be carried for a full system furnish/install scope.	Provide allowance or contingency as necessary	$77,000	$77,000	$0	$0	
Div 26 - Electrical	Allowance for temporary power	Allowance	$100,000	0	100%	Allowance for temporary power, lighting and security, as well as FPL Tie-ins/conduit/coordination	Provide allowance or contingency as necessary	$100,000	$100,000	$0	$0

ANTICIPATED ODP LISTING - Major Purchases

Div. - Trade	Description
05 - Structural Steel	Bulk Steel Purchase
07-Standing Seem Metal Roof	
12 - Furnishings	Owner Furnishings (Desks, Tables, Chairs, Bookcases, etc.)
13 - Pre-Engineered Metal Building	Complete building , and covered parking structures
22 - Plumbing	Fixture Supplier Bulk Purchase (Sinks, Lavs, Water Heater)
23 - HVAC	HVAC Supplier Equipment (AHUs, Split Systems, VAVs)
23 - HVAC	Insulation, Controls, Ductwork
26 - Electrical	Generator & Associated Transfer Switches
26 - Electrical	Large Panels, Breakers & Switchgear Supplier Purchase
26 - Electrical	Bulk Lighting Package

The following is a proposal to provide monthly aerial construction documentation for your new project.

Project: **PUBLIC UTILITIES FIELD OPERATIONS FACILITY**

Location: 1000 City Center Circle, Port Orange, FL

Flight Date: Photograph once monthly around the 21st, weather permitting.

Pricing:
$75.00 Includes first 3 digital views shot & delivered via email at 150ppi (Approx. 2MBs each).
$10.00 Aviation fuel surcharge. This is taxable item based on county invoice is addressed to.

UAV-Drone (stills, video & editing) & **Ground** (video, interior, exteriors & twilight) services are also available.

State, County and FDOT M/WBE certifications, workers comp, aviation liability, drone insurance and general liability insurance are available upon request. FAA drone licensed. Prices are subject to review after six (6) months from above date.

Construction documentation is an important part of every project. Our pilots are experienced, and our photographers are award winners. Aerial Innovations appreciates the opportunity to provide photography for your project.

Best regards,

Jenny Smith
Vice President
Aerial Innovations, Inc.

(2.2) WSI (Wharton-Smith Supplemental Instructions)

The Bidder acknowledges receipt of the following Wharton-Smith Supplemental Instruction(s):

WSI No.	001	Dated:	10/22/24	WSI No.	005	Dated:	10/31/24
WSI No.	002 003	Dated:	10/24/24	WSI No.	006	Dated:	11/4/24
WSI No.	004	Dated:	10/28/24	WSI No.	007 008	Dated:	11/6/24 11/8/24

(2.3) ASI (Architect's Supplemental Instructions)

The Bidder acknowledges receipt of the following Architect Supplemental Instruction(s):

ASI No.	None	Dated:		ASI No.		Dated:	

(2.4) Addenda

The Bidder acknowledges receipt of the following Addenda:

Addenda No.	None	Dated:		Addenda No.		Dated:	
Addenda No.		Dated:		Addenda No.		Dated:	

(2.5) Additional Acknowledgements

The Bidder acknowledges that Bidder has considered and included the requirements of the Subcontractor Bid Manual, dated October 17, 2024, and all other sections, in preparing this Bid.

The Bidder acknowledges time is of the essence and the Project will begin March 6, 2025, with Substantial Completion that must be achieved no later than June 30, 2026, and has included all costs for any required extended hours, extra shifts, weekend and holiday work which may be necessary to complete the Work on schedule.

This Bid will remain subject to acceptance for ninety **90** calendar days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Construction Manager.

The Bidder understands and agrees that the Construction Manager and/or Owner reserves the right to reject this Bid or any and all bids for the Project, and to waive minor irregularities or informalities in any bid and to award Alternates in any order that in the Construction Manager's judgment will be in the Owner's best interest.

The Bidder hereby acknowledges they are licensed to do business in the capacity represented by this Bid and as required by all governing jurisdictional authorities for all locations of the work and as required by the Contract Documents.

The Bidder hereby acknowledges reviewing and accepting without modification the Wharton-Smith, Inc. Subcontract Agreement and agrees to execute same if awarded the project or portion(s) of the Project.

Attention: **James Manyette**

We are pleased to submit this proposal to perform work at the following location:

Port Orange Public Utilities

Services to be performed:

Final Construction Clean (Rough & Final) **$13,200.00**

- ✓ Includes any applicable sales tax.
- ✓ Includes 1 Rough Clean with 1 mobilization and 1 Final Clean with 2-3 consecutive mobilizations. Touch-up Cleaning is additional.
- ✓ Includes interior & exterior windows and mullions, wipe down millwork inside and out, clean restrooms including walls, porcelain, mirrors, fixtures, & dispensers, clean break room appliances free of construction debris, clean sinks, shine stainless, dust/vac exposed structure ceiling from ground, wipe doors and jams including thresholds, clean roll-up doors, clean lockers inside and out, dust/wipe clean shelving, wipe clean exterior railings, wipe all outlets and fire strobes, clean mech/elec/data rooms free of construction debris, sweep, mop, and machine scrub hard surface flooring, vacuum carpet, wipe clean base, remove minimal paint spots/drips from any and all of the above. Rough Clean $4,400; Final Clean $8,800
- ✓ Exterior windows at slanted roof appear to be accessible from the roof. Should a lift be required, it will be at an additional cost at 2026 rates, TBD.

Pressure Wash Sidewalks & Concrete Pads **$2,100.00**

Additional work per man hour fully burdened is $38.00

EXCLUSIONS:

- Excessive paint, concrete splatter, silicone, or tape residue removal will be billed at an additional time and material rate.
- Due to the liability incurred to acid wash tile, Daisy Fresh cannot perform this service should it be required. Grout haze is the responsibility of the tile installer.
- Should the owner's furnishings, stock, and/or equipment be placed prior to cleaning and require dusting or moving, it will be billed at an additional time & material rate.
- Roof, Exteriors, Parking Areas

Thank you for this opportunity to serve you.

Sincerely,

Melissa Grisson

This proposal is for one (1) final cleaning and one (1) touch up cleaning of an approximately 23,706 sf (11,417 sf admin, 12,289 sf warehouse) / 1-story new construction public works facility. This proposal includes all labor, supplies, equipment and materials (unless otherwise specified below).

Scope of work for final cleaning to include:

1. Clean exterior / interior windows including frames, sills and ledges (separate line item for exterior windows and high interior windows).
2. Sweep and mop hard surface floors, wipe down base.
3. Wipe down doors including frames, kickplates and hardware.
4. Clean electrical outlets, switches, drinking fountains, fire extinguishers and signage.
5. Wipe down walls.
6. Clean restrooms including toilets, plumbing fixtures, sinks, tile surfaces, dividers, showers, mirrors, accessories, lockers (50) inside and outside.
7. Clean casements including wiping down interiors / exteriors including drawers, shelving, hardware and countertops.
8. In admin building, clean breakrooms, conference / training rooms, offices, open work room, janitor's closet, corridors, waiting area, storage rooms, lobby and MEP / IT rooms.
9. Vacuum carpeted floors.
10. In warehouse, clean mud room, cold storage / supply room, workshops, inventory bays and wipe down interior of rollup doors.
11. Machine scrub warehouse floor (separate line item).

Scope of work for touch up cleaning to include:

1. Touch up all glass up to 8'.
2. Touch up restrooms as needed.
3. Touch up all rooms in admin building and warehouse as needed.
4. Vacuum carpeted floors.
5. Vacuum and mop hard surface floors.
6. Wipe down doors and walls as needed.
7. Wipe down surfaces to remove dust as needed.

Area to be cleaned	Square footage	Final cleaning costs	Touch up cleaning costs
Admin Building - interior	11,417 sf	$4,250.00	$3,600.00
Warehouse Building - interior	12,289 sf	$4,300.00	$3,700.00
Walk behind floor scrubber - 1 day rental	-	$900.00	
Exterior & interior high windows	-	$2,400.00	
Total: $19,150.00 – Nineteen Thousand One Hundred Fifty Dollars			
*Add. alt. – OCIP costs (If required)	$575.00		
*Add. alt. – Automated billing / payment system fees (If required)	$45.00		

*This proposal's scope does not include window screen installation, removal of blue max window protection or wiping down of owner's furniture or warehouse shelving. These can be done on Time & Material if requested.

Paint, epoxy, caulking, stucco, concrete, grout haze, adhesive, flooring protective coverings, rust and any other excessive materials, must be removed on Time & Material with prior approval from an onsite superintendent and is not included in Spartan's contractual scope.

If there are any changes of schedule, a notice of 48 hours must be given prior to our schedule date. Failure to give a 48-hour notice to change of schedule and we have come to the job site, will result in a trip charge.

Water and electricity must be available on each level of the immediate area to be cleaned prior to start of cleaning in that area.

All materials and workmanship are guaranteed to be specified, for the above work to be performed and completed in a professional manner for the sum of (Add/Alt pricing not included):

Total: $19,150.00 – Nineteen Thousand One Hundred Fifty Dollars

This proposal is valid for 90 days from the date on proposal.

NET 45 - Invoices not paid within 45 days may be subject to a 1 - 1 1/2 % per month charge.

This proposal serves as binding when accepted, any work performed under the Agreement prior to its execution shall be considered as acceptance of all terms and obligations herein, and shall bind the client to SPARTAN CS, LLC under all provisions of this agreement, as if fully executed by the client. On behalf of SPARTAN CS, LLC, thank you for the opportunity to bid on this project. If you require any documents, or have any questions, please contact us.

Quote#: 56614
Date: 11/08/2024

Description	Estimated Quantity	UOM	Unit Price	Line Total
Print Nam	PO			

*** Extra Charges: $1.25 PLF for any inaccessible, hand carry, hand pound, stand roll, core drill, hard ground, or hillside work ***

TERMS OF RENTAL AGREEMENT

* EXTRA CHARGES: $1.25 PSF for any inaccessible, hand carry, hand pound, stand roll, core drill, hard ground, or hillside work.
* It is understood that in the context of this lease agreement between Customer/Lessee" & Smith Fence/"Lessor", the term "Fence" includes chain link fence, framework, fence panels, stands, sandbags, windscreen, gates, hardware etc.
* Quantities provided in quotation are estimated quantities. Actual footages will be adjusted upon completion of the installation, and billed accordingly, plus applicable sales tax. Early termination of lease will not result in pro-ration of lease amount. Additional services not listed will be billed at current market rate.
* Price is based on a one-time installation, and one-time full removal. Any additional mobilizations will be billed with a $500 mobilization minimum charge.
  - i.e. $500 minimum charge = general repair, replacement, remove and relocation of fence, additions, partial removal etc.

*For installation or removal, SFC requires advance notice of 7 days.
* Once rental duration expires, lessee will be charged a rate of 10% of the original rate, per item, per additional month. Any additional trips for changes or additional fence required during rental will expire on the same date as quoted on the initial quote. The minimum amount of a renewal billing is $100.00 per month. Project minimum is $750.00
* No Retainage to be withheld from any temporary fence contracts. Event projects will be paid in full (100%) prior to starting the installation. In order for any terms other than the aforementioned, those terms must be set forth and approved in writing on SFC letterhead or SFC contract.
* Clearing, grading, surveying, and staking the location of the fence locations by Lessee prior to SFC mobilizing. Lessee agrees to provide and maintain access to site and adequate working conditions for the duration of the rental. Lessee will keep all persons and property 10 feet away from fencing during rental. Temporary fencing is never to be used for anything other than its intended purpose.
* SFC is not responsible for damages incurred to job site, landscaping, silt fence, etc. while accessing the job.
*Lessee agrees to clear sufficient working area of all obstructions, and removable hazards. Lessee also agrees to keep fence clear of all debris, foliage overgrowth, signage, construction materials, etc. for the duration of the rental period. If fence materials are buried, overgrown and/or unremovable by hand, Lessee will be billed for damaged materials at current market rate replacement cost.
*The fence will not withstand any alteration. Any layout changes required, removal, repairs or relocation of fence must be performed by SFC. The Lessee assumes all liability to persons and property damaged as a result of those changes.
*Maintenance and Repair of the fence is not included. Lessee shall repair and maintain the fence and be solely responsible for such costs. If the fence requires maintenance, repair, and/or relocation, Lessor may, but not required to, enter onto any property where the fence is located and appropriately maintain, repair, or relocate the fence and charge the Lessee all costs associated.
*SFC does not recommend installing windscreen on panels with stands, or gates. The fence is at higher risk of falling versus fencing that is driven into the ground. Falling fence can cause serious injury, death, or damage property within the vicinity of the fence. The contractor shall defend, indemnify, and hold harmless Smith Fence Industries Inc. from any all suits, judgements, claims, and demands, including but not limited to cost, counsel fees, litigation expenses and liabilities with respect to injury/death of any person or persons whatsoever or damage to property of any kind by arising out of or caused by windscreen installed on panels and/or gates. Lessee assumes all responsibility.
* Lessee bears all risk of loss, damage or destruction until the fence is returned to Lessor. SFC will charge, and Lessee agrees to pay, additional charges to replace missing or destroyed materials as well as fence unable to be reused or removed from jobsite. All damaged materials will be billed at the current market rate (plus $500 mobilization)
* This quote is based on "normal soil conditions." There will be an additional charge for any asphalt/concrete/clay/lime rock/coral etc. penetration. Any damage to asphalt/concrete resulting from installation or use of the fence, and any/all costs to repair or replace damaged asphalt/concrete will be borne by the lessee.
* Prevailing wage projects subject to different pricing as well as projects with Davis Bacon Act, and/or certified payroll requirements.
* Price does not include fees for drug tests, badging, orientation classes, etc. If any of these items are required by Lessee, price is subject to change.
* If equipment is required for project due to inaccessibility and/or site conditions price is subject to change.
* All fence work to be performed under one mobilization with access to job site without delays. Any downtime due to the result of the Lessee will be billed at $125.00 per hour per 2-man crew. Note that deliveries and installations are scheduled Monday - Friday 7:00am - 3:00pm EST. Additional fees will be applied for weekends and/or after hour work.
* Any construction licenses or permits to be pulled and borne for by the lessee.
* Underground utility locates must be called in or pulled by the Lessee. The cost of any damages to underground construction utilities (telephone, gas, water, sewer, electrical, sprinkler, cable, fiberoptic, etc.) to be borne by the Lessee. SFC also not responsible for property lines, cables, pipeline etc.
* If job requires private locates with GPR (ground penetrating radar), this service and cost is to be borne by the Lessee.
* This fence is not a permanent fence and does not meet state swimming pool inspection codes. Smith Fence assumes no liability for this fence.
* If Maintenance of Traffic (MOT) is required for fence installation at any time during project duration. MOT to be provided by and at the expense of the Lessee.
* SFC is not a design/engineering firm. Standard temporary fence is not wind load rated.
* PAYMENT: Invoice balance to be paid in full upon completion of the initial install. Net 30 due on invoice. After 45 days if total amount is not paid in full, lessee agrees to allow any Smith Industries Inc. employee working on behalf of Lessor, in any capacity, access to ALL (the Lessee's) property for the purpose of removing the Lessor's property, including but not limited to ALL fencing. Such access is agreed to be automatic and shall occur during normal business hours. Lessee & Lessor agree that non-payment of the total amount owed within 45 days as agreed herein, shall be notice to the Lessee that the Lessor may enforce its agreement and/or remove its property. Lessee agrees that no additional prior notice be given by Lessor prior to the removal of its property should the above clauses be enforced by Lessor due to the Lessee's breach of this agreement. The parties agree Lessor is entitled to pursue any and all available claims against Lessee should Lessee prevent the removal of Lessor's property and/or, if the above clauses are breached. All fencing will be removed, and lessee agrees to pay Smith Industries Inc.'s attorney's fees and any other cost incurred to enforce payment of delinquent bill plus interest at the rate of 1.75% per month, or at the maximum rate permitted by applicable law. Continuous neglect for payment of invoices may result in a Mechanic's and Materialman's lien against the property and our unprotected assets. The parties to this contract agree to personal jurisdiction in Pinellas County, Florida. All articles are rented "as-is" and Lessee by signing this agreement accepts these conditions.
* It is understood that SFC retains ownership of the fence materials and reserves the right to remove it at any time, if the Lessee refuses to comply with the conditions of this agreement, as set forth.
*Lessee of described fencing hereby agrees to indemnify and hold harmless, Smith Industries Inc. from any and all liability which may arise out of the rental use of fencing provided. Lessee agrees that it is liable for all injury to third party who may be injured, in any way, by the installation, use or removal of fencing. Lessee warrants that it has selected the right for installation of the fencing, and that any damage to property of the lessee or third parties is not the responsibility of Smith Industries Inc. Lessee agrees to hold Smith Industries Inc. free of all costs, including legal defense cost, court cost, attorney fees, arising out of any injury to lessee or third party. Lessee assumes all responsibility for the fencing placed at the designated job site and agrees to be fully responsible for the care, custody, and control of the fencing. Smith Industries Inc. makes no warranties, expressed or implied, as to the fencing to perform any particular task or function. All fencing, posts, gates, and appurtenant devices are rented "as is" and lessee by signing this agreement accepts these conditions.
*Lessee acknowledges that Lessor has and may exercise all lien rights and hereby waives any objections in defects in such lien documents. If Lessee is not the owner of the property on which the fence is to be installed, Lessee shall obtain the owner's written consent to Lessor's full exercise of all such lien rights. Lessor's exercise or non-exercise of lien rights will not alter or release Lessee's obligations.
* Fence is not to be sublet. Lessee is responsible for any state, local, or federal taxes, including any property taxes that may apply to this fence while it is rented.
* By signing this agreement, the Lessee agrees to the quantities, prices, terms and conditions as set forth.

IF CUSTOMER PROVIDED CONTRACT IS REQUIRED, THE FOLLOWING ITEMS TO BE INCLUDED IN CONTRACT: 1. SFC's original quote with contract verbiage 2. No "not to exceed contract" will be accepted (pricing is based on estimated quantities) 3. NO RETAINAGE to be withheld 4. PSF & unit rates, plus applicable sales tax 5. Remove and relocate charges (same rate as install rates) 6. Additional trip charge minimum ($500) 7. Rental duration.

Chain Link Fence

A post-driven temporary chain link fence from Smith Fence is a reliable and cost-effective solution ensuring your construction site is well protected, limits liability, and improves the overall esthetics of your jobsite. It's the first choice for most in the construction industry.

Benefits and Features

• Secure In-Ground Installation sch 40 posts
• Installs in a Variety of Surfaces

Comes in 4', 6' or 8' Tall

Optional Add-ons:

- Top Rail
- Tension wire(top or bottom)
- 3 strand barbwire
- Variety of swing and roll gates

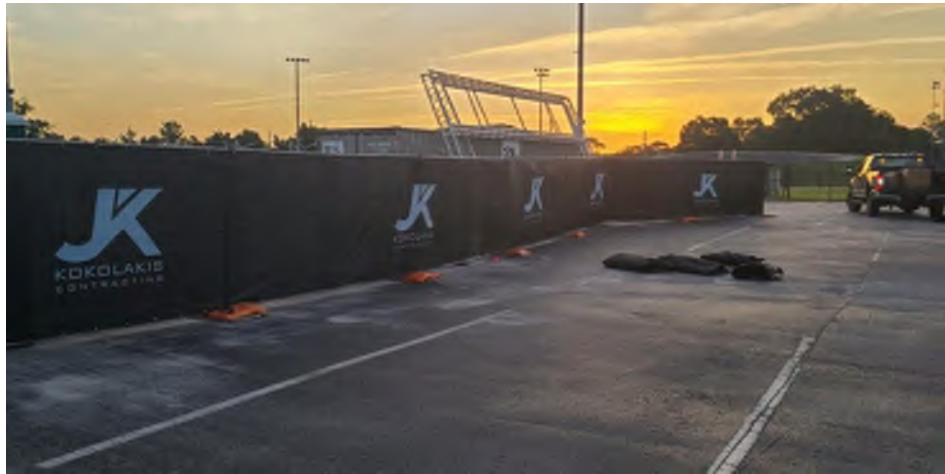
smith fence

TEMPORARY FENCE PANELS

Features & Benefits

- Easy to Install, Maintain & Remove
- Eliminates Digging and Setting Posts
- Installs on a Variety of Surfaces
- Repositions Easily for Extended Use
- Alternative to In-Ground Posts

. 8 gauge Saddle clamps to secure panel



smith fence

WINDSCREEN OPTIONS

Smith fence screen selection keeps debris out while monetizing your worksite or venue. Choose from windscreen rolls and custom-printed fence screens in a variety of fabrics. Contain dust or boost your brand with custom printed screen options or full graphic

WATER BARRIERS

Smith Fence water barrier is the ideal product for traffic and pedestrian channelization in any environment. The special swivel pin and lock design allow users to easily connect and rotate barriers 90 degrees to meet the needs of almost any work zone or path.

smith fence

Bike Barricades

Features & Benefits

- Made of Durable, Lightweight Steel
- Portable & Freestanding
- Easy to Install, Reposition and Remove
- Utilizes Hook & Sleeve Joining System

Temporary wood fence

When you need privacy and durability to keep your site safe.
Use steel posts driven for quick installation and removal

GUARDSAFE 36

- **Protect people and property with highly visible, long lasting polyethylene barrier and barricade systems.**
- Will not crumble or break after multiple deployments like concrete barriers.
- Ideal for crowd, and traffic control, checkpoints, and security
- Create continuous lines or curves angled up to 90 degrees with an easy to use swivel pin design
- Molded-in recessed handles make for easy handling.
- Large, threaded top fill-port and dual bottom drain plugs make it easy to load and unload with sand or water ballast.
- Two molded-in pockets on top of barrier accept standard blinking lights.
- Flat side surfaces easily accept reflective striping.
- Durable polyethylene construction stands up to harsh weather conditions and resists cracks and dents upon impact.
- High resistance to sunlight and ultraviolet radiation means the product stays in service longer.
- Bright colors improve safety and are easier to see than concrete or wood.
- Lightweight design makes handling easy.
- FHWA MASH TL-1 approved as a Longitudinal Channelizing Device (LCD).
- 24" wide base for more stability and option to drive posts for even more support.
- Add panels to top or continuous chain link

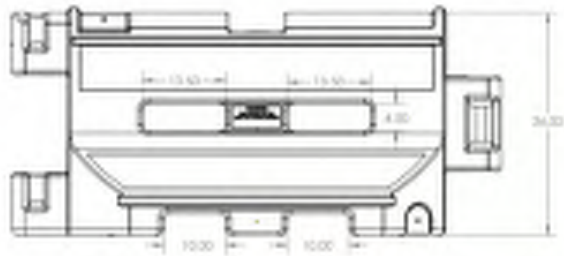
GS36 GUARDSAFE® 36 BARRICADE

Remcon's GUARDSAFE® 36 barricade is a water-filled Longitudinal Channelizing Device (LCD) ideal for traffic and pedestrian channelization in almost any environment. The barricade is manufactured with rotationally-molded polyethylene, which allows it to withstand the harshest weather conditions and resist dents and cracks.



- Each unit includes:
  - Swivel pin to connect and rotate barricades up to 90 degrees
  - Recessed handles, forklift holes, and lightweight design, which allow for easier movement and positioning
  - Threaded top fill-port and bottom drain plugs for easy loading and unloading with sand or water ballast
- Available in three standard high-visibility colors: natural, orange, and yellow. Custom colors available upon request.
- Accepts rolled fence or fence panels to increase visibility and security for any project
- Ideal for temporary work zones, perimeter fencing, checkpoints, security, as well as crowd and traffic control
- MWUTCD MASH TL-3 approved as a Longitudinal Channelizing Device (LCD)

Re: **Construction Materials Testing Proposal for**
City of Port Orange Public Utilities Field Operations Facility
4505 Clyde Morris Blvd
City of Port Orange, FL

Dear Mr. Manyette:
Thank you for the opportunity to submit a proposal to perform material testing services on the above referenced project. Keller, Schleicher and MacWilliam Engineering and Testing, Inc. (referred to as "KSM Engineering and Testing") proposes the following testing services relating to the above-mentioned Project in general accordance with the Industry Standard of Care.

Project Description
It is our understanding the proposed project will consist of the ground up construction of a new 11,417 sq ft administration building and a 12,289 sq ft pre-engineered metal warehouse building with associated sitework and underground utilities at 4505 Clyde Morris Blvd in City of Port Orange, FL. Per our review of the provided Construction Documents, we have estimated the following services will need to be completed for the project. The amount of tests and/or hours listed below are estimated values for this Agreement and the total cost for each service will be based on the **"Actual"** number of requested tests and/or hours required to complete the above project.

	Services	Estimated Amount
1.	**Underground Utilities**	
	Density (Compaction) Tests	298
	Modified Proctors	3
	Soil Classification Testing	3
2.	**Stabilized Subgrades and Under Curbs**	
	Density (Compaction) Tests	32
	Modified Proctors	2
	Limerock Bearing Ratio (LBRs)	2
3.	**Rock Base**	
	Density (Compaction) Tests	20
	Modified Proctors	2
	Limerock Bearing Ratio (LBRs)	2
4.	**Sidewalks, Site Fill, Dumpster Pad etc.**	
	Density (Compaction) Tests	18
5.	**Building Pad**	
	Density (Compaction) Tests	32
	Modified Proctor	1
	Soil Classification Testing	1
6.	**Concrete Testing (Curbs, Sidewalks Building etc.)**	
	4 Cylinders for Compressive Strength (min. 4 per set, includes slump and (1) hr. tech time)	26

7.	**Special Inspections Bolt/Weld/Steel (*Contractor provides lift)***	
	On-site Inspection (3 hours min per trip)	8
8.	**Extraction & Gradation**	
	Each	6
9.	**Technician Standby Time *(If/As Needed)***	
	Per Hour	5

Special Inspections will be billed at the Project Engineer rate. Work performed to furnish the signed and sealed Engineering Report will also be billed at the Professional Service Engineer rates.

Project Rates and Estimated Total

The attached fee schedule is KSM Engineering and Testing rates for services along with estimated costs in order to complete the services indicated above. Please note the provided fees are for KSM Engineering and Testing's normal business hours, which are: Monday through Friday, 7:00am to 5:00pm.

- Any service requested to be completed outside of KSM Engineering & Testing's normal business hours is subject to additional fees, to include, but not limited to, a minimum 4-hour charge of Technician time at 1.5x the indicated rate.
- KSM Technician Stand by Time is invoiced in half hour increments. Stand by Time is defined as any time a KSM Technician is on site and is not actively performing a requested service. General Stand By time is, but not limited to, during concrete pours while waiting on trucks or when the technician is requested to witness material being compacted in lifts.
- A charge of about 18% of the total cost incurred for each separate test, or a minimum fee of $35.00, whichever is greater, will be invoiced for each completed report.
- The project will only be invoiced for the work performed at the unit rates provided with the exception of contract minimums. All testing and inspection services is on a will call basis. We appreciate a minimum of 24 hours to properly schedule services.

Cost estimate breakdown is shown on the attached Fee Schedule.

***Estimated Total:** **$23,560.00**

*We note that the cost is estimated. Final cost will be based on the unit prices and actual number of hours/tests required. The final cost may be higher or lower than the total estimated cost. If a testing service is requested that is not presented on the attached Fee Schedule, a unit rate for the service will be provided prior to performing the work. We look forward to working with you on this project.

Respectfully Submitted,

Edgar S. MacWilliam
Vice President of Operations

Phone: 772-589-0712
C.A. # 5693
KSMengineering.net

Schedule and Additional Services

KSM will work closely with the Client to establish a favorable schedule to complete all field and laboratory work. The above indicated fee is based on the site being open and accessible for our truck-mounted drill rig or for a KSM technician to gain access to the project site to complete the requested geotechnical testing. Open and accessible means that a normal size truck can safely drive into the site and perform the required borings, heavily wooded areas or sites with steep inclines or declines will need to be cleared / altered in order for KSM to access the site safely. **Additional fees will apply if another drill rig is required to be mobilized to complete the required soil boring or if our technicians are unable to perform the requested testing.** Please note that if unsuitable material is encountered, KSM will have to mobilize another drill rig as the truck-mounted drill rig is not designed for deep borings and reserves the right to amend our total fee. If additional locations are requested after the approval of this Agreement, KSM reserves the right to amend as required based upon the request.

Cancellation Terms

KSM's schedule to complete the requested field work varies each day and is unfortunately weather dependent. If KSM is unable to perform the required field work due to unforeseen weather conditions, KSM will automatically move your project onto the next available workday and the client shall be notified. Please note that if you wish to cancel any services to be performed by KSM, the client must do so in writing and prior to the scheduled day of the service. Cancellation via phone is not accepted unless accompanied by an email the same day. Cancellation after field work has begun or completed will be subjected to partial or full payment of the agreed upon fee and the client agrees to pay the fees to cover the work completed.

Limitation of Liability

The client hereby agrees, to the fullest extent permitted by law, that KSM's and its officers and employees total liability to the client and all others for any and all injuries, claims, losses, expenses, damages (including consequential damages), or claim expenses arising out of the agreement or its breach, from any cause shall not exceed $1,000 or the total amount of the Service provided, whichever is greater. Such causes include, but are not limited to, KSM negligence, errors, omissions, strict liability, breach of contract, and breach of warranty. The client agrees to defend, indemnify and hold KSM harmless from all claims for liability in excess of the limits set forth above, for injury or loss sustained or alleged by any person or entity, whether a party to the agreement or not, and allegedly arising out of KSM performance or services.

Client Terms & Conditions

KSM will perform the Services in accordance with the following "Industry Standard of Care: (A) in a prompt, diligent, competent and professional manner; (B) during normal business hours for Client; and (C) in accordance with: (1) that degree of care and skill exercised by engineers providing similar services to other customers and in accordance with the custom and trade of KSM's industry; (2) any practices otherwise specified in writing by Client to KSM; (3) the specific plans, specifications, standards, descriptions, recommendations and drawings that have been provided to KSM including, without limitation, any amendments or alterations to them made by Client from time to time; and (4) in compliance with all applicable laws, including any and all state engineering rules and regulations. In the event KSM shall provide any type of inspection services, it is understood and agreed that KSM neither guarantees such contractors' or subcontractors' performance nor assumes any duty to supervise construction and safety procedures followed by the Client or its contractor(s) and subcontractor(s) nor for any public liability for property damage caused through acts of the Client and its contractor(s) and subcontractor(s).

Client recognizes that KSM is not responsible for or have control over means, methods, techniques, sequences, or procedures, or for safety precautions and programs in connection with the construction of a building or project on the behalf of Client or the Client's customers, nor shall KSM be responsible for Client and its contractor(s) or subcontractor(s) failing to comply with building code or specific recommendations or structural design by KSM. If Client makes any alteration to the provided report or permit drawings without the consent of KSM in connection with any reuse by Client, Client shall defend, indemnify and hold harmless KSM against claims arising solely out of such alteration; provided, however, nothing herein shall be deemed to release KSM from liability for that portion of the Project Documents prepared by KSM.

Any claim arising out of or related in any way to this Completed Service or Agreement (a "Claim") shall be subject to mediation as a condition precedent to binding dispute resolution. Unless the Parties mutually agree otherwise, mediations under this Agreement shall be administered by the American Arbitration Association in accordance with its Construction Industry Mediation Procedures in effect on the date of this Agreement. The Parties shall share the mediator's fee and any filing fees equally. The mediation proceeding shall be held in the city with the largest population in the state in which a project for which Services are provided is located over which the dispute arises. If the Parties do not resolve a dispute through mediation, the method of binding dispute resolution shall be Litigation in a court of competent jurisdiction. DUE TO THE SPECIALIZED NATURE OF CONSTRUCTION LITIGATION, EACH PARTY HEREBY WAIVES ITS RIGHT TO A TRIAL BY JURY.

PURSUANT TO SECTION 558.0035 FLORIDA STATUTES; KELLER, SCHLEICHER and MacWILLIAM IS THE RESPONSIBLE PARTY FOR THE PROFESSIONAL SERVICES IT AGREES TO PROVIDE UNDER THIS AGREEMENT. NO INDIVIDUAL PROFESSIONAL EMPLOYEE, AGENT, DIRECTOR, OFFICER, PRINCIPAL, ETC. MAY BE INDIVIDUALLY LIABLE FOR NEGLIGENCE ARISING OUT OF THIS CONTRACT OR SERVICE.

Subcontractor Bid Form-General

Project: Port Orange Public Utilities Field Operations Facility

To: Wharton-Smith, Inc., 750 Monroe Road, Sanford, FL 32771
(407) 321-8410; comest@whartonsmith.com

Name of Bidder:	Frann Construction
Scope of Work:	Concrete Div. 03 & Masonry Div. 04

The Undersigned, hereinafter called "Bidder", having visited the site of the proposed project and familiarized themselves with the local conditions, nature and extent of the work, and having carefully examined the Subcontractor Bid Manual, Subcontract Form, General Conditions, Supplementary Conditions, Plans and Specifications and other Contract Documents, with the Bond requirements herein, proposes to furnish all labor, materials, equipment and other items, facilities and services for the proper execution and completion of: Port Orange Public Utilities Field Operations Facility in full accordance with the Contract Documents and, if awarded the Contract, to complete the said work within the time limits specified for the following lump sum price.

Concrete bids shall be complete including, but not limited to: Foundations, tie columns, column encasements, slabs on grade, “flatwork” (concrete pavement, sidewalks, equipment pads, etc.), rebar and all work associated with Division 03 specifications and drawings.

PART 1: PRICING

(1.1) Total Base Bid

Concrete “flatwork” (sidewalks, conc. pavement, equipment pads, etc.)	$ 200,647.00
All other concrete foundations, slabs, tie columns, CIP walls, etc.	$ 887,095.00
Total Amount:	**$** 1,087,742.00
Amount in Words:	

(1.2) Alternates (Voluntary)

Masonry - CMU Add	$ 411,555.00
	$
	$

(1.3) Owner Direct Purchase (value of all purchases exceeding **$50,000**)

Material/Equipment Types:	
Amount:	$

(2.2) WSI (Wharton-Smith Supplemental Instructions)

The Bidder acknowledges receipt of the following Wharton-Smith Supplemental Instruction(s):

WSI No.	1	Dated:	10/22/24	WSI No.	4	Dated:	10/28/24
WSI No.	2	Dated:	10/24/24	WSI No.	5	Dated:	10/31/24
WSI No.	3	Dated:	10/24/24	WSI No.	6 Thru 8	Dated:	11/4 - 11/8

(2.3) ASI (Architect's Supplemental Instructions)

The Bidder acknowledges receipt of the following Architect Supplemental Instruction(s):

ASI No.		Dated:		ASI No.		Dated:	

(2.4) Addenda

The Bidder acknowledges receipt of the following Addenda:

Addenda No.		Dated:		Addenda No.		Dated:	
Addenda No.		Dated:		Addenda No.		Dated:	

(2.5) Additional Acknowledgements

The Bidder acknowledges that Bidder has considered and included the requirements of the Subcontractor Bid Manual, dated October 17, 2024, and all other sections, in preparing this Bid.

The Bidder acknowledges time is of the essence and the Project will begin March 6, 2025, with Substantial Completion that must be achieved no later than June 30, 2026, and has included all costs for any required extended hours, extra shifts, weekend and holiday work which may be necessary to complete the Work on schedule.

This Bid will remain subject to acceptance for ninety **90** calendar days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Construction Manager.

The Bidder understands and agrees that the Construction Manager and/or Owner reserves the right to reject this Bid or any and all bids for the Project, and to waive minor irregularities or informalities in any bid and to award Alternates in any order that in the Construction Manager's judgment will be in the Owner's best interest.

The Bidder hereby acknowledges they are licensed to do business in the capacity represented by this Bid and as required by all governing jurisdictional authorities for all locations of the work and as required by the Contract Documents.

The Bidder hereby acknowledges reviewing and accepting without modification the Wharton-Smith, Inc. Subcontract Agreement and agrees to execute same if awarded the project or portion(s) of the Project.

Bid Proposal

$1,499,297.00

Date: 11/12/2024
Project: Port Orange Public Utilities Field Ops. Bldg.
Frann Construction Inc is pleased to provide you a quote for the project named above.

Admin & Warehouse Shell Scope of Work: $581,387.00

- Coordinate all work with project superintendent
- Layout from provided points
- Continuous foundations and Column pads
- Excavations and compaction, Spoils to remain on site
- Column Piers
- Setting of anchor bolts and grouting of base plates (anchor bolts & base plates provided by other)
- 4”thk SOG with 10mil vapor barrier and 6x6,w1.4 wwm for Admin bldg. – Approx. 11,250 sf
- 6”thk SOG with 10mil vapor barrier and #4 rebar at 16” oc ew – Approx. 16,700sf
- Finegrade
- Form & pour diamond blockouts
- Sawcutting of SOG
- Concrete
- Reinforcement
- Formwork
- Pumping and hoisting
- Daily trash cleanup to onsite dumpster provided by others
- Site Supervision
- Work is based on a 40-hour work week

Parking A & B, Granular Storage, Ramp & Washdown Pit Scope of Work: $305,708.00

- Coordinate all work with project superintendent
- Layout from provided points
- Continuous foundations
- Excavations and compaction, Spoils to remain on site
- CIP Concrete Walls at Granular Storage and Ramp/Wash Down Pit
- 6”thk Parking A SOG with 10mil vapor barrier and rebar reinforcing – Approx. 3,615 sf
- 6”thk Parking B SOG with 10mil vapor barrier and rebar reinforcing – Approx. 5,030 sf
- 6”thk Granular Storage SOG with 10mil vapor barrier and rebar reinforcing – Approx. 1,390 sf

- 8”thk Ramp & Wash Down Pit SOG with rebar reinforcing – Approx. 3,270 sf
- Setting of embed angle (angle provided by other)
- Finegrade
- Sawcutting of SOG
- Concrete
- Reinforcement
- Formwork
- Pumping and hoisting
- Daily trash cleanup to onsite dumpster provided by others
- Site Supervision
- Work is based on a 40-hour work week

Sitework Scope of Work: $200,647.00

- Coordinate all work with project superintendent
- Layout from provided points
- Continuous foundations
- Excavations and compaction, Spoils to remain on site
- 6”thk Dumpster Pad and Apron SOG with 6x6,W2.9 wwm (per J1/S201) – Approx. 540 sf
- 4”thk Sidewalk unreinforced – Approx. 5,080 sf
- 6”thk Sidewalk with fibermesh – Approx. 1,670 sf
- 6”thk Paving with fibermesh – Approx. 1,345 sf
- Bollards – Approx. 48ea
- ADA mats where indicated on drawings
- Finegrade
- Sawcutting of sidewalk and paving
- Concrete
- Formwork
- Pumping and hoisting
- Daily trash cleanup to onsite dumpster provided by others
- Site Supervision
- Work is based on a 40-hour work week

Masonry Scope of Work: $411,555.00

- Coordinate all work with project superintendent
- Layout from provided points
- 8” regular block
- 8” split faced block
- 4” split faced block
- Cell fill grout
- Rebar
- scaffolding
- Pumping and hoisting
- Daily trash cleanup to onsite dumpster provided by others
- Site Supervision
- Work is based on a 40-hour work week

All construction material pricing on this proposal is based on the market conditions as of **11/12/2024**
any unforeseen price escalation on construction material has been excluded on this proposal. This Proposal is good for 15 days and is null and void thereafter at the option of Frann Construction,

Exclusions

All/Any Demo, Engineering, Testing, Permits, Dewatering of ground water, Backfill of any MEP trenches, Locate of existing utility, Site Walls, Building & Site Curbs, Gravel, Grading, Bathroom facilities, Removal of spoils off site, Pavers, Embeds or plates, lightweight or Insulated concrete, Colored Concrete, Aggregate subbase, Polishing of concrete, Staining of concrete, Any waterproofing of concrete or masonry, Penetrating sealers, Sign/Light Pole/fence/gate foundations, MEP and Housekeeping pads, .

Subcontractor Bid Form-General

Wharton-Smith, Inc. CONSTRUCTION GROUP

Project: Port Orange Public Utilities Field Operations Facility

To: Wharton-Smith, Inc., 750 Monroe Road, Sanford, FL 32771
(407) 321-8410; comest@whartonsmith.com

Name of Bidder:	BNG Construction, Inc.
Scope of Work:	Div. 3 - Concrete

The Undersigned, hereinafter called "Bidder", having visited the site of the proposed project and familiarized themselves with the local conditions, nature and extent of the work, and having carefully examined the Subcontractor Bid Manual, Subcontract Form, General Conditions, Supplementary Conditions, Plans and Specifications and other Contract Documents, with the Bond requirements herein, proposes to furnish all labor, materials, equipment and other items, facilities and services for the proper execution and completion of: Port Orange Public Utilities Field Operations Facility in full accordance with the Contract Documents and, if awarded the Contract, to complete the said work within the time limits specified for the following lump sum price.

Concrete bids shall be complete including, but not limited to: Foundations, tie columns, column encasements, slabs on grade, "flatwork" (concrete pavement, sidewalks, equipment pads, etc.), rebar and all work associated with Division 03 specifications and drawings.

PART 1: PRICING

(1.1) Total Base Bid

Concrete "flatwork" (sidewalks, conc. pavement, equipment pads, etc.) Site Concrete	$461,500.00
All other concrete foundations, slabs, tie columns, CIP walls, etc. Buildings Concrete:	$537,525.00
Total Amount:	$999,025.00
Amount in Words:	Nine Hundred Nintey Nine Thousand Twenty Five Dollars

(1.2) Alternates (Voluntary)

Alternates #1 and #2 Are Excluded.	$
	$
	$

(1.3) Owner Direct Purchase (value of all purchases exceeding $50,000)

Material/Equipment Types:	Concrete and Rebar Material
Amount:	$ 343,660.00

(2.2) WSI (Wharton-Smith Supplemental Instructions)

The Bidder acknowledges receipt of the following Wharton-Smith Supplemental Instruction(s):

WSI No.	1	Dated:	10/22/24	WSI No.	4	Dated:	10/28/24
WSI No.	2	Dated:	11/24/24	WSI No.	5	Dated:	10/31/24
WSI No.	3	Dated:	10/24/24	WSI No.	6	Dated:	11/4/24

(2.3) ASI (Architect's Supplemental Instructions)

The Bidder acknowledges receipt of the following Architect Supplemental Instruction(s):

ASI No.	7	Dated:	11/6/24	ASI No.	8	Dated:	11/8/24

(2.4) Addenda

The Bidder acknowledges receipt of the following Addenda:

Addenda No.	Dated:	Addenda No.	Dated:
Addenda No.	Dated:	Addenda No.	Dated:

(2.5) Additional Acknowledgements

The Bidder acknowledges that Bidder has considered and included the requirements of the Subcontractor Bid Manual, dated October 17, 2024, and all other sections, in preparing this Bid.

The Bidder acknowledges time is of the essence and the Project will begin March 6, 2025, with Substantial Completion that must be achieved no later than June 30, 2026, and has included all costs for any required extended hours, extra shifts, weekend and holiday work which may be necessary to complete the Work on schedule.

This Bid will remain subject to acceptance for ninety **90** calendar days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Construction Manager.

The Bidder understands and agrees that the Construction Manager and/or Owner reserves the right to reject this Bid or any and all bids for the Project, and to waive minor irregularities or informalities in any bid and to award Alternates in any order that in the Construction Manager's judgment will be in the Owner's best interest.

The Bidder hereby acknowledges they are licensed to do business in the capacity represented by this Bid and as required by all governing jurisdictional authorities for all locations of the work and as required by the Contract Documents.

The Bidder hereby acknowledges reviewing and accepting without modification the Wharton-Smith, Inc. Subcontract Agreement and agrees to execute same if awarded the project or portion(s) of the Project.

Terms and Conditions

Page 5

All materials are guaranteed to be as specified. All work to be completed in a workman like manner according to ASTM standards. Any alterations or deviations from above specifications involving extra cost will be executed only upon a written change order, and will become an extra charge over and above the estimate, All agreement contingent upon strikes, accidents or delays beyond our control. This proposal subject to acceptance within 3 days and is null and void thereafter at the o the option of BNG Construction Inc. With your acceptance of this proposal it becomes part of the contract between your company and BNG Construction Inc. The structural drawings
takes precedence over architectural drawings. We reserve the right to modify or change our price for this job any time before bid opening. Our bid reflects us working off the mason's scaffolding.Tiebeams formed and pour in this order. First floor beam off the ground floor slab. Second floor beam off the second floor slab and so forth type. We will not accept a penalty clause in your contract. We bid the documents as is. If there is additional engineering later that changes the design and adds more labor and or materials. We will submit a extra and require you to pay it.
Due to the volatility of material prices BNG Construction cannot hold pricing for more than 3 days from the date of this proposal without a letter of intent to use BNG to perform the concrete for this project.

All materials are guaranteed to be as specified. All work to be completed in a workman like manner according to ASTM standards. Any alterations or deviations from above specifications involving extra cost will be executed only upon a written change order, and will become an extra charge over and above the estimate. All agreement contingent upon strikes, accidents or delays beyond our control. This proposal subject to acceptance within 3 days and is null and void thereafter at the c the option of BNG Construction Inc. With your acceptance of this proposal it becomes part of the contract between your company and BNG Construction Inc. The structural drawings
takes precedence over architectural drawings. We reserve the right to modify or change our price for this job any time before bid opening. Our bid reflects us working off the mason's scaffolding.Tiebeams formed and pour in this order. First floor beam off the ground floor slab. Second floor beam off the second floor slab and so forth type. We will not accept a penalty clause in your contract. We bid the documents as is. If there is additional engineering later that changes the design and adds more labor and or materials. We will submit a extra and require you to pay it.
Due to the volatility of material prices BNG Construction cannot hold pricing for more than 3 days from the date of this proposal without a letter of intent to use BNG to perform the concrete for this project.

Subject: RE: Port Orange Public Utilities Fiele OPS Building - Our Concrete Proposals

Good morning Manny. The Breakdown you mentioned below is Exactly as I have it broken down on BNG's Proposal.

Please see our Revised Proposals attached. I had taken the Granular Storage Slab off on parts of two different sheets and somehow failed to include 75 lf of ME10 Turned Down Edge Footing.

I have added it in on our Revised Proposals. It resulted in an add of $4,995.00 to our Total Price.

I am working on getting you a price for the Diamond Dowel Plates at the Sawed Joints on the Warehouse. Thanks!

Thank you,

Terry Hollisworth

Subject: RE: Port Orange Public Utilities Fiele OPS Building - Our Concrete Proposals

Terry,

If you can do it by Monday mid-morning, please separate your price breakout so that all that is in your site number is concrete paving, concrete paving at ramp/washdown-pit/dumpster/mech-yard, and concrete sidewalks. Everything on structural drawings in building concrete, and footings for dumpster and mechanical yard in building concrete.

Subject: RE: Port Orange Public Utilities Fiele OPS Building - Our Concrete Proposals

Terry,

I'm seeing a big difference in how bidders split their pricing between building and site. Please highlight sheet AS011 in two colors to correspond to the two prices you gave us.

REVISED

PROPOSAL

BNG Construction Inc.
2995 Stonewall Place
Sanford, FL 32773
Office Ph & Fax (407)688-1747 / 1748

Job name **Port Orange Public Utilities**
Street:
City: Port Orange

		By BNG	By others
	Labor, Equipment & Machinery to complete the Concrete Work Except as Noted Below.		
#1	Prep and Pour Foundations with Reinforcing as Specified.	X	
#2	Supply and Install Termite Treatment Under Slab on Grade.	X	
#3	Supply and Install 10 Mil Stego Wrap Vapor Barrier Under Building Slabs on Grade.	X	
#4	Form, Prep and Pour the Admin. & Warehouse Slabs on Grade with Reinforcing As Specified.	X	
	The Admin. Slab and the Warehouse Slab are Both Figured as being Poured Entirely With Colored Concrete. The Monolithic Design of the Warehouse Requires that the Entire Slab & Foundations be Poured with Colored Concrete. The Admin Slab could be Broken Up but it would not be Cost Effective. **No Color is Specified so an Allowance of $35.00 PCY for Color is Included.**	X	
#5	Provide and Install all Rebar as Specified.	X	
#6	The Trench Drain Concrete Work is Included. Embed Material is NOT included.	X	
#7	The CIP Concrete Beams & Columns are Included as being Installed from the Masons Scaffolding.	X	
#8	Installing Embeds, Supplied by Others, which are contained in our Work is Included.	X	
#9	Grouting under Column Base Plates is Included.	X	
#10	Included in the Site Concrete Bid are the Dumpster Slab/Apron, Mechanical Yard, Granular	X	
	Storage & PEMB Parking Structures, Ramp and Washdown Pit, Building Sidewalks, ADA	X	
	Warning Mats and Installation of Pipe Bollards As Shown on Sheet C6.	X	
#11	Supply or Install Gravel, Sand or Base/Sub Base of any kind is NOT included.		X
#12	Concrete Sealers & Hardeners and Polishing Concrete are Not Included.		X
#13	Welding and Weldable Rebar are NOT included.		X
#14	Light Pole Bases, Flagpole Base, Sign Foundations and Anchor Bolt/Bolt Material are NOT included.		X
#15	A Mockup is NOT included and Surface Mounted Bollards are NOT included.		X
#16	Any Work at the Future Police Impound Lot Pad is NOT included.		X
#17	Removing Any Excess Or Unsuitable Export Materials is NOT included.		X
#18	Diamond Dowels at Saw Cut Joints As Shown in Det. A12/S201are NOT included.		X
#19	Pre-Cast Wall Caps or Any Pre-Cast Concrete is NOT included.		X
#20	Any Work at Oil Seperator Area is NOT included.		X
#21	The Sidewalks Included are Figured as 4" Thick and 3000 Psi Concrete & W1.4 WWF.		X

Buildings Concrete Bid:$537,525.00
Site Concrete Bid:$466,495.00.00
Add Diamond Dowels At Sawn Joints in Warehouse Building - Add $29,200.00

Subcontractor Bid Form-General

Wharton-Smith, Inc. CONSTRUCTION GROUP

Project: Port Orange Public Utilities Field Operations Facility

To: Wharton-Smith, Inc., 750 Monroe Road, Sanford, FL 32771
(407) 321-8410; comest@whartonsmith.com

Name of Bidder:	BNG Construction, Inc.
Scope of Work:	Div. 3 - Concrete

The Undersigned, hereinafter called "Bidder", having visited the site of the proposed project and familiarized themselves with the local conditions, nature and extent of the work, and having carefully examined the Subcontractor Bid Manual, Subcontract Form, General Conditions, Supplementary Conditions, Plans and Specifications and other Contract Documents, with the Bond requirements herein, proposes to furnish all labor, materials, equipment and other items, facilities and services for the proper execution and completion of: Port Orange Public Utilities Field Operations Facility in full accordance with the Contract Documents and, if awarded the Contract, to complete the said work within the time limits specified for the following lump sum price.

Concrete bids shall be complete including, but not limited to: Foundations, tie columns, column encasements, slabs on grade, "flatwork" (concrete pavement, sidewalks, equipment pads, etc.), rebar and all work associated with Division 03 specifications and drawings.

PART 1: PRICING

(1.1) Total Base Bid

Concrete "flatwork" (sidewalks, conc. pavement, equipment pads, etc.) Site Concrete	$ 466,495.00
All other concrete foundations, slabs, tie columns, CIP walls, etc. Buildings Concrete	$ 569,685.00
Total Amount:	$ 1,036,180.00.00
Amount in Words:	One Million Thirty Six Thousand One Hundred Eighty Dollars

(1.2) Alternates (Voluntary)

Alternates #1 and #2 Are Excluded.	$
	$
	$

(1.3) Owner Direct Purchase (value of all purchases exceeding $50,000)

Material/Equipment Types:	Concrete and Rebar Material
Amount:	$ 343,660.00

Continued Next Page

(1.4) Value Engineering (We encourage voluntary VE/cost savings options)

1		$
2		$
3		$

(1.5) MWBE Participation

MWBE	$
LDB	$
VBE	$

(1.6) Bond Rate

In the event a Performance & Payment Bond is required, indicate in the space below the **percentage** to be added to the proposal.

Bond Rate %: 1.421%	

(1.7) Long Lead Durations (indicate durations for any long lead equip. 24 weeks +)

Item	Duration (wks)	Item	Duration (wks)

PART 2: BIDDER ACKNOWLEDGEMENT

(2.1) RFI (Request for Information)

The Bidder acknowledges receipt of the following RFI Response(s):

RFI No.	1	Dated:	11/7/24	RFI No.		Dated:	
RFI No.	2	Dated:	11/11/24	RFI No.		Dated:	
RFI No.	3	Dated:	11/15/24	RFI No.		Dated:	

Continued Next Page

(2.2) WSI (Wharton-Smith Supplemental Instructions)

The Bidder acknowledges receipt of the following Wharton-Smith Supplemental Instruction(s):

WSI No.	1	Dated:	10/22/24	WSI No.	4	Dated:	10/28/24
WSI No.	2	Dated:	11/24/24	WSI No.	5	Dated:	10/31/24
WSI No.	3	Dated:	10/24/24	WSI No.	6	Dated:	11/4/24

(2.3) ASI (Architect's Supplemental Instructions)

The Bidder acknowledges receipt of the following Architect Supplemental Instruction(s):

ASI No.	7	Dated:	11/6/24	ASI No.	8	Dated:	11/8/24

(2.4) Addenda

The Bidder acknowledges receipt of the following Addenda:

Addenda No.		Dated:		Addenda No.		Dated:	
Addenda No.		Dated:		Addenda No.		Dated:	

(2.5) Additional Acknowledgements

The Bidder acknowledges that Bidder has considered and included the requirements of the Subcontractor Bid Manual, dated October 17, 2024, and all other sections, in preparing this Bid.

The Bidder acknowledges time is of the essence and the Project will begin March 6, 2025, with Substantial Completion that must be achieved no later than June 30, 2026, and has included all costs for any required extended hours, extra shifts, weekend and holiday work which may be necessary to complete the Work on schedule.

This Bid will remain subject to acceptance for ninety **90** calendar days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Construction Manager.

The Bidder understands and agrees that the Construction Manager and/or Owner reserves the right to reject this Bid or any and all bids for the Project, and to waive minor irregularities or informalities in any bid and to award Alternates in any order that in the Construction Manager's judgment will be in the Owner's best interest.

The Bidder hereby acknowledges they are licensed to do business in the capacity represented by this Bid and as required by all governing jurisdictional authorities for all locations of the work and as required by the Contract Documents.

The Bidder hereby acknowledges reviewing and accepting without modification the Wharton-Smith, Inc. Subcontract Agreement and agrees to execute same if awarded the project or portion(s) of the Project.

REVISED

PROPOSAL

BNG Construction Inc.
2995 Stonewall Place
Sanford, FL 32773
Office Ph & Fax (407)688-1747 / 1748

Job name **Port Orange Public Utilities**
Street:
City: Port Orange

		By BNG	By others
	Labor, Equipment & Machinery to complete the Concrete Work Except as Noted Below.		
#1	Prep and Pour Foundations with Reinforcing as Specified.	X	
#2	Supply and Install Termite Treatment Under Slab on Grade.	X	
#3	Supply and Install **15 Mil** Stego Wrap Vapor Barrier Under Building Slabs on Grade.	X	
#4	Form, Prep and Pour the Admin. & Warehouse Slabs on Grade with Reinforcing As Specified.	X	
	The Admin. Slab and the Warehouse Slab are Both Figured as being Poured Entirely With Colored Concrete. The Monolithic Design of the Warehouse Requires that the Entire Slab & Foundations be Poured with Colored Concrete. The Admin Slab could be Broken Up but it would not be Cost Effective. **No Color is Specified so an Allowance of $35.00 PCY for Color is Included.**	X	
#5	Provide and Install all Rebar as Specified.	X	
#6	The Trench Drain Concrete Work is Included. Embed Material is NOT included.	X	
#7	The CIP Concrete Beams & Columns are Included as being Installed from the Masons Scaffolding.	X	
#8	Installing Embeds, Supplied by Others, which are contained in our Work is Included.	X	
#9	Grouting under Column Base Plates is Included.	X	
#10	Included in the Site Concrete Bid are the Dumpster Slab/Apron, Mechanical Yard, Granular Storage & PEMB Parking Structures, Ramp and Washdown Pit, Building Sidewalks, ADA Warning Mats and Installation of Pipe Bollards As Shown on Sheet C6.	X X X	
#11	Supply or Install Gravel, Sand or Base/Sub Base of any kind is NOT included.		X
#12	Concrete Sealers & Hardeners and Polishing Concrete are Not Included.		X
#13	Welding and Weldable Rebar are NOT included.		X
#14	Light Pole Bases, Flagpole Base, Sign Foundations and Anchor Bolt/Bolt Material are NOT included.		X
#15	A Mockup is NOT included and Surface Mounted Bollards are NOT included.		X
#16	Any Work at the Future Police Impound Lot Pad is NOT included.		X
#17	Removing Any Excess Or Unsuitable Export Materials is NOT included.		X
#18	**Diamond Dowels at Saw Cut Joints As Shown in Det. A12/S201are Included.**	X	
#19	Pre-Cast Wall Caps or Any Pre-Cast Concrete is NOT included.		X
#20	Any Work at Oil Seperator Area is NOT included.		X
#21	The Sidewalks Included are Figured as 4" Thick and 3000 Psi Concrete & W1.4 WWF.		X

Terms and Conditions

All materials are guaranteed to be as specified. All work to be completed in a workman like manner according to ASTM standards. Any alterations or deviations from above specifications involving extra cost will be executed only upon a written change order, and will become an extra charge over and above the estimate. All agreement contingent upon strikes, accidents or delays beyond our control. This proposal subject to acceptance within 3 days and is null and void thereafter at the c the option of BNG Construction Inc. With your acceptance of this proposal it becomes part of the contract between your company and BNG Construction Inc. The structural drawings
takes precedence over architectural drawings. We reserve the right to modify or change our price for this job any time before bid opening. Our bid reflects us working off the mason's scaffolding.Tiebeams formed and pour in this order. First floor beam off the ground floor slab. Second floor beam off the second floor slab and so forth type. We will not accept a penalty clause in your contract. We bid the documents as is. If there is additional engineering later that changes the design and adds more labor and or materials. We will submit a extra and require you to pay it.
Due to the volatility of material prices BNG Construction cannot hold pricing for more than 3 days from the date of this proposal without a letter of intent to use BNG to perform the concrete for this project.

Subcontractor Bid Form-General

Wharton-Smith, Inc.
CONSTRUCTION GROUP

Project: Port Orange Public Utilities Field Operations Facility

To: Wharton-Smith, Inc., 750 Monroe Road, Sanford, FL 32771
(407) 321-8410; comest@whartonsmith.com

Name of Bidder:	Structural Construction of Orlando, Inc
Scope of Work:	Division 3 Concrete

The Undersigned, hereinafter called "Bidder", having visited the site of the proposed project and familiarized themselves with the local conditions, nature and extent of the work, and having carefully examined the Subcontractor Bid Manual, Subcontract Form, General Conditions, Supplementary Conditions, Plans and Specifications and other Contract Documents, with the Bond requirements herein, proposes to furnish all labor, materials, equipment and other items, facilities and services for the proper execution and completion of: Port Orange Public Utilities Field Operations Facility in full accordance with the Contract Documents and, if awarded the Contract, to complete the said work within the time limits specified for the following lump sum price.

Concrete bids shall be complete including, but not limited to: Foundations, tie columns, column encasements, slabs on grade, "flatwork" (concrete pavement, sidewalks, equipment pads, etc.), rebar and all work associated with Division 03 specifications and drawings.

PART 1: PRICING

(1.1) Total Base Bid

Concrete "flatwork" (sidewalks, conc. pavement, equipment pads, etc.)	$ 285,000.00
All other concrete foundations, slabs, tie columns, CIP walls, etc.	$ 590,000.00
Total Amount:	$ 875,000.00
Amount in Words:	

(1.2) Alternates (Voluntary)

	$
	$
	$

(1.3) Owner Direct Purchase (value of all purchases exceeding $50,000)

Material/Equipment Types:	
Amount:	$ 250,000.00

(2.5) Additional Acknowledgements

The Bidder acknowledges that Bidder has considered and included the requirements of the Subcontractor Bid Manual, dated October 17, 2024, and all other sections, in preparing this Bid.

The Bidder acknowledges time is of the essence and the Project will begin March 6, 2025, with Substantial Completion that must be achieved no later than June 30, 2026, and has included all costs for any required extended hours, extra shifts, weekend and holiday work which may be necessary to complete the Work on schedule.

This Bid will remain subject to acceptance for ninety **90** calendar days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Construction Manager.

The Bidder understands and agrees that the Construction Manager and/or Owner reserves the right to reject this Bid or any and all bids for the Project, and to waive minor irregularities or informalities in any bid and to award Alternates in any order that in the Construction Manager's judgment will be in the Owner's best interest.

The Bidder hereby acknowledges they are licensed to do business in the capacity represented by this Bid and as required by all governing jurisdictional authorities for all locations of the work and as required by the Contract Documents.

The Bidder hereby acknowledges reviewing and accepting without modification the Wharton-Smith, Inc. Subcontract Agreement and agrees to execute same if awarded the project or portion(s) of the Project.

Subcontractor Bid Form-General

Project: Port Orange Public Utilities Field Operations Facility

To: Wharton-Smith, Inc., 750 Monroe Road, Sanford, FL 32771
(407) 321-8410; comest@whartonsmith.com

Name of Bidder:	Truant Construction,LLC
Scope of Work:	03 Concrete

The Undersigned, hereinafter called "Bidder", having visited the site of the proposed project and familiarized themselves with the local conditions, nature and extent of the work, and having carefully examined the Subcontractor Bid Manual, Subcontract Form, General Conditions, Supplementary Conditions, Plans and Specifications and other Contract Documents, with the Bond requirements herein, proposes to furnish all labor, materials, equipment and other items, facilities and services for the proper execution and completion of: Port Orange Public Utilities Field Operations Facility in full accordance with the Contract Documents and, if awarded the Contract, to complete the said work within the time limits specified for the following lump sum price.

Concrete bids shall be complete including, but not limited to: Foundations, tie columns, column encasements, slabs on grade, “flatwork” (concrete pavement, sidewalks, equipment pads, etc.), rebar and all work associated with Division 03 specifications and drawings.

PART 1: PRICING

See Our Proposal for ALL Inclusions and Exclusions

(1.1) Total Base Bid

Concrete “flatwork” (sidewalks, conc. pavement, equipment pads, etc.)	$ 119,500.00
All other concrete foundations, slabs, tie columns, CIP walls, etc.	$ 1,285,700.00
Total Amount:	**$** 1,405,200.00
Amount in Words:	One million four hundred five thousand two hundred dollars

(1.2) Alternates (Voluntary)

	$
	$
	$

(1.3) Owner Direct Purchase (value of all purchases exceeding **$50,000**)

Material/Equipment Types:	Concrete Material/Reinforcement Material
Amount:	$ $ 361,600.00 / $ 68,600.00

Specific Provisions

Building corners and elevations by others.

Power and Water within 100' of working area from start of project.

All schedules based on 40 hour work week. Saturdays to be worked as weather make up days only.

Shop drawings and materials for anchor bolts and embeds to be provided.

If a conflict between structural and architectural drawings, the structural drawings will overrule design.

Rebar Caps Installed one time. Provided by GC

Dumpsters for and haul off of Spoils to be provided by GC

Any and all concrete shown on MEP drawings are excluded.

Any item not specifically included above is excluded from our bid.

We do not acknowledged any FF or FL numbers on elevated decks and or

Slab on Grade less than 7" thick

Qualifications

Buildings

768 cy of Regular Not Integral Colored Concrete Material

870 cy of Integral Colored Concrete Material (Warehouse)

46 tons of Reinforcement Material

11,283 sf of Trowel Finish Admin Building

16,679 sf of Trowel Finish Warehouse Building

8,673 sf of Trowel Finish PEMB A&B

1,386 sf of Trowel Finish Granular Storage

3,321 sf of Trowel Finish Street Sweeper Ramp and Wash Down

Site Work "Flatwork" (Any work not listed below is ECLUDED)

5,482 sf of 6" Sidewalks

24 sf of ADA Detectable Mats

2,616 sf of 8" Concrete Paving w/Fiber

531 sf of Dumpster Pad

49 Bollards Installed (Steel pipe provided by others)

Payment Terms

Truant Payment terms TBD

All Drawings Included for this Proposal

Architectural Set dated : 9/30/2024

Civil Set dated : 9/30/2024

Structural Set dated : 9/30/2024

Price

For the performance of the above stated scope of work, the Contractor agrees to pay Truant Construction the lump sum price of:

$ $1,285,700 Base Bid Buildings
One million two hundred eighty five thousand seven hundred dollars

$ $119,500 Add for Site Flatwork (See Qualifications)
One hundred nineteen thousand five hundred dollars

Above price is subject to revision or withdrawal if not accepted, in writing, within thirty days from date on page 1 of proposal.

Buildings

Concrete foundations, slab on grade, and CIP	$1,022,037.00

Site

Site sidewalks, Site paving, and dumpster	$115,904.00

Bid Documents

Civil drawings dated	9/30/2024
Architectural drawings dated thru	9/30/2024
Structural drawings dated thru	9/30/2024
Specs dated	9/30/2024
Addendums thru (No. / Date):	N/A

Bldg. Tilt Walls –C.I.P.- Slabs Scope of Work:

Scope Items

- State Sales Tax and Local Sur-Tax
- County/city occupational licenses.
- Attendance of weekly job site meetings.
- Daily clean up to onsite dumpster (supplied by others)
- Man power to complete the job according to schedule
- Permit fees are excluded
- Inspection of specialty engineers is excluded
- Material testing is excluded
- Provide job site water for our use is excluded
- Concrete pumps for foundations are included to a point.
- All VMG work will suspend including punch out if money is owed for more than 120 days.
- Pricing based on documents available. If addition quantity is not shown on documents and shown on a BIM a change order will be provided.

Foundations

• Foundation	3,000 PSI
• Surveying layout and elevations for each building from provided points by general contractor.	Included

- Forming of all foundations is excluded
- Earth forming of all foundations
- Excavation and compaction. Mass excavation and compaction greater than 4’ by others
- Tailgating of concrete
- Spoils relocated to area on site dictated by GC
- Installation of bolt pattern templates & bolts (Bolts provided by others)
- Setting of bolt elevation for column bases (One Nut Only)
- Pumping of rainwater only

- Grouting of column bases
- Termite treatment for foundations is excluded.
- 7 Step down pipe penetrations are included. Extra step-down pipe penetration will need a signed change order. Unless quantity of pipe penetration is clearly called out in struct drawings, concrete scope of work, or final scope out.
- Surveying is excluded

Layout of Building. Clarification as follows:

General contractor is responsible for the layout and elevation of each building. We will check and let the general contractor know of any discrepancy.

Pumping of footing concrete. Clarification as follows:

Boom Pump - Pumping of foundation concrete may be required if adequate access to the building pad is not provided by general contractor or if the building pad has been disturbed by other trades and not properly back filled. Any costs associated with this

Digging of pad foundations and continuous foundations. Clarifications as follows:

Excavation of building pad for perimeter footings at loading docks or where top of footing is to be –4' or deeper to be by others and to be within +/- 1" of top of footings. Excess soil to be stockpile on site.

Slab on grade

• Slab on Grade Quantity: Approx.	41,889 sf
• Slab on grade Concrete PSI	3,000 & 4,000 PSI
• Slab on grade Concrete Thickness	4", 6" & 8"
• Slab on grade reinforcing: Supply and installation of	WWF & rebar
• Vapor Barrier: Supply and installation of	Stego - 10-mils thick
• Slab on grade Intregral Concrete Color (Group 4)	Included
• Soil treatment	
• Slab on grade per plans	
• Pour Back Strip	
• Fine grade of building pad +/- 1" *Please clarification below	
• Concrete reinforcement	
• Conveyance of concrete	
• Formwork	
• Column block outs per plans	
• Mechanical pads not showing in structural drawings are excluded.	
• Cleaning of slab after panels are erected is included	

- Concrete infill of demo per Mechanical, Electrical, or Plumbing drawings is excluded. Unless quantity of square footage to be infilled is clearly called out in structural docs or concrete scope of work.

Cracks & Curling in Slabs. Clarification as follows:

VMG Construction is not liable for any cracks & curling in the slab as long as plans and specifications are followed in every phase of work. All concrete slabs crack. VMG will provide crack control joints, but if cracks appear and you would like VMG Construction to fix the cracks additional pricing will be provided if requested.

Fine grade and compaction of Slab on Grade. Clarification as follows:

Clean fill shall be used to build up the slab on grade. If a retention pond that needs to be excavated or other near by soil that is be relocated and to be used for the slab fill. VMG is not responsible for the compaction test and/or any of the slab cracks that may occur due rain or any other conditions that could affect the relocated slab fill. Especially if the fill was once in low lying areas with muck.

Slab on metal deck

	N/A
• Slab on metal deck Quantality	N/A
• Slab on metal deck Concrete PSI	N/A
• Slab on metal deck Concrete AVERAGE thickness	N/A
• Slab on metal deck reinforcing: Supply and Install	N/A
• Pan Stairs	N/A
• Pumping of slab on metal deck	N/A
• Slab on metal deck to be unshored	N/A

	N/A
Top of Slab of metal deck concrete. Clarification as follows:	N/A

Slab on metal deck concrete thickness to be pinned from metal deck and not be lasered. All liability of the elevation of slab on metal deck to be on the steel chamfering calculations. Slab on metal deck to be unshored.

Tilt

• Tilt panel Count:	N/A
• Tilt Panel Sf	N/A
• Tilt Concrete PSI	N/A
• Tilt Concrete Thickness	N/A
• Casting Bed installation and removal	N/A
• Form liner Type (Qty: Sf)	N/A
• Brace rental for	N/A
• Grout under panels	N/A
• Installation of tilt panel embeds. FND to Tilt and Tilt to Tilt. Embeds supplied by others	N/A
• Pumping of Tilt up walls	N/A
• Reveals per plans	N/A
• Bracing of panels to the inside of Slab	N/A
• Mock-up panel	N/A
• Tilt wall panels Erection. One crane mobilization	N/A
• Installation of anchors at panel to footing connections. Anchor Bolts supplied by others.	N/A
• Anchors for panel to footing connections per plan	N/A
• Panel to Panel and Panel to Footing Welds Included (Excludes all other Welding).	N/A
• Patching of panels for medium Text-Coating	N/A
• Installation of Hollow Metal Frames only while forming panels. No post installation.	N/A
• Architectural shop drawings for window and revel layout	N/A

• FAA Permit for crane erection is excluded	N/A
• Assumed to have access to all sides of the building for tilt erection	N/A
• J Bolts and PT Nailer are provided by others	N/A
• Scupper to be formed prior to pouring of tilt panels	N/A
• Engineering of the tilt panels are **excluded** from VMG Scope of work.	N/A

Thin Brick and Precast Lead Items Clarification as follows:

Slab on metal deck concrete thickness to be pinned from metal deck and not be lasered. All liability of the elevation of slab on metal deck to be on the steel chamfering calculations. Slab on metal deck to be unshored.

Cast In Place Concrete

• Cast In Place Labor and Material	
• Concrete	4,000 PSI
• Xypex	N/A
• Conveyance of concrete	
• Formwork	
• Reinforcing	
• Rubbing and patching CIP that will be exposed.	
• Temporary scaffold stairs are excluded.	
• Cast In Place Walls	303 Lf
• Cast In Place Columns	28 Ea
• Cast In Place Conc Beams & Tie Beams	514 Lf
• Cast In Place Tie Columns	2 Ea
• Cast In Place Stairs	N/A

Site Sidewalks

• Sidewalk Concrete PSI	3,000 PSI
• Sidewalk Concrete Thickness	4.00 Inches

• Sidewalk reinforcing: Supply and Install	WWF 6x6 W1.4xW1.4
• Right of way sidewalk is excluded	
• Truncated domes: Supply and Install	7 Ea
Sidewalks 4"	6,426 Sf
• E	

Sidewalks exclusion is as follows:

Right away sidewalk outside the property line and Sidewalks inside the property lines with in 25 ft of an active city, county, or state road is excluded. Any DOT permits for sidewalks are excluded. Sidewalk takeoff can be provided upon request.

Site Concrete

• Site Paving Concrete PSI	0 PSI
• Site Paving Concrete Thickness	5.00 Inches
• Site Paving Reinforcing	WWF 6x6 W1.4xW1.4
• Bollards	6 Ea
Site Paving - Apron 8" W2.9xW2.9	409 Sf
Site Paving - Apron 8" W2.9xW2.9	2,740 Sf

Site Dumpster

· Dumpster foundation	55 Lf
· Dumpster slab	500 Sf
· Dumpster bollards	6 Ea

Site Canopy Footers	N/A
• Layout and elevations for each building from provided points by general contractor.	N/A
• Forming of all foundations is excluded	N/A
• Earth forming of all foundations	N/A
• Excavation and compaction. Mass excavation and compaction greater than 4’ by others	N/A
• Tailgating of concrete	N/A
• Spoils relocated to area on site dictated by GC	N/A
• Pumping of rainwater only	N/A
Canopy FND3'x3'x3'	N/A

- Pumping of rainwater only

CMU

· CMU material standard gray, normal weight, 8x16 inch regular units.	· Excluded
· Mortar type S normal gray in color	· Excluded
· Rebar supply and install	· Excluded
· Horizontal joint reinforcing	· Excluded
· Supply labor, materials, and equipment needed for pumping of concrete into masonry cells	· Excluded
· Supply scaffolding needed for our scope of work	· Excluded
· Supply and install Expansion joint and sash blocks per plans and specifications	· Excluded
· Layout of window and door openings according to approved plans (Changes in opening sizes or locations may require a change order	· Excluded
· Fireproofing of CMU is excluded	· Excluded

All construction material pricing on this proposal is based on the market conditions as of **above date** any unforeseen price escalation on construction material has been excluded on this proposal. **This Proposal is good for 30 days and is null and void thereafter at the option of VMG Construction Inc, Due to volatility of material prices VMG Construction Inc. cannot hold prices for more than 30 days from the date of this proposal without a letter of intent to use VMG Construction Inc to preform the concrete for this project**. Our bid Reflects working out of working regular time hours,

Exclusions:

General Exclusions:

*Any concrete not in proposal or GCs scope of work *Bond *Location or relocation of existing Utilities additives *Structural precast concrete *Precast concrete hollow core supply and install *Permit Fees *Material Testing *Providing job site water *Lightweight insulating concrete *Special concrete *Building pad *Color concrete *Caulking *Waterproofing *Foam/ Insulation *Supply of bollards* Rain leader guard *Toilet facilities *Protection of adjacent work

Foundations:

*Dewatering of ground water *Mass Excavation *Mass Backfill *Removal of any spoils offsite *Foam/ insulation *Geofoam

Slab on Grade:

*Dewatering of ground water *Polished Concrete *Removal of any spoils offsite *Concrete sealer *Color concrete *Caulking *Foam/ insulation *Surface mounted bollards *Sealed concrete or sealed high gloss *Stained concrete *Trench drain installed and set at elevation by others *Geofoam *Load Dowel Baskets

Tilt:

*Post installation of hollow metal door frames *Supply of embeds and expansion clips *Crane access road *Extra rebar per lifting engineering *Engineering of tilt panels *Caulking *Backer rods *Foam/ insulation *FAA Permit *Non shrink grout under panels

Slab on Metal Deck:

*Shoring of metal deck and other shoring *Laser of top of concrete when pouring, top of concrete to be pinned.

Cast in Place:

*Supply of all embeds and clips *CIP concrete benches in courtyard* Crane access road* Temporary scaffold stairs *Caulking*waterproofing*Pavers *sealant*foam/ insulation *FAA Permit * Crane for CIP

Site:

*Site concrete not listed above *Right of way sidewalks*Site Curbs*Color concrete*Type D curbing *Gutter Curbing *Ribbon curb *Caulking *Surface mounted bollards *Trench drain installed and set at elevation by others* Pavers * Paver conc sub slab*Load dowel baskets

CMU:

* Fireproofing of CMU *Brick *Caulking *Stone veneer*Stone banding supply and install architectural precast shapes * Brick modular supply and install *CMU Foam

General Conditions

Upon acceptance of this proposal and contract being executed. The General Contractor agrees to attach this scope of work to the base contract. Upon 50% completion of project, retainage is to be reduced by 50% until substantial completion. Balance of retainage to be paid in full no more than (30) thirty days after substantial completion of our scope of work. Any additional work not contained in this proposal will be considered a Change Order, and as such, will be billed as Cost + 10% Profit with a $3,000 a day Overhead fee.

This scope is being respectfully submitted for your consideration.

_____ Date: _____

Name, Estimator, VMG Construction

This scope is being respectfully submitted for your consideration.

SECTION 5 – BID PROPOSAL EVALUATION

5.1 GENERAL

5.1.1 Bid Proposals will be evaluated based upon review of the following:

A. Cost – The evaluation of this criterion will be based on the Bidder's total base bid, bid alternates, unit prices.

B. Value Engineering – This criterion measures the ability of the Bidder to identify potential areas of cost savings or improvements of the final project.

C. Bidder's ability to meet all other criteria outlined herein.

5.1.2 Reference the Instructions to Bidders section of this Bid Manual and the Bid Form for more information regarding detailed requirements of the Bid Proposals.

5.1.3 In evaluating Bids, Wharton-Smith, Inc. shall consider the submission of the Bidders, and whether or not the Bids comply with the prescribed requirements as outlined in these Instructions, the Bid Form, this Bid Manual, and all associated Owner and Bid Related documents provided with this Bid Package.

5.1.4 Wharton-Smith, Inc. may conduct such investigations and require supplemental information as it deems necessary to assist in the evaluation of any Bid and to establish the responsibility, qualifications and financial ability of the Bidders, proposed Subcontractors, proposed equipment and material suppliers, and other persons and organizations to provide the materials in accordance with the Contract Documents to Wharton-Smith, Inc.'s satisfaction within the prescribed time.

5.1.5 Bidder shall, upon request of Wharton-Smith, Inc., submit documentation evidencing its capability to execute the work properly within the time specified. This information must be received by Wharton-Smith, Inc. within ten (10) calendar days of Bidder receiving written request.

5.2 RECOMMENDATION AND APPROVAL OF RANKING

5.2.1 The CMAR will review all Bid Proposals that are received in conformance of the requirements herein and provide a recommendation to the Owner. The Owner, at its sole discretion, may accept the CMAR's recommendation or re-evaluate the Bid Proposals. The Owner will establish and approve the final recommended of award for the Bid Package. The Owner will be the sole judge of its own interests, the proposals, and the resulting agreements. The Owner's decision will be final.

5.3 AWARD OF CONTRACT

5.3.1 Award shall be based on products, equipment and materials named in the Contract Documents. Consideration of any decisions regarding substitution shall not be made until after Award of Contracts.

5.3.2 If the Contract is to be awarded, Wharton-Smith, Inc. will give the Bidder a Notice of Award after the Owner's agreement of the Bidder to receive Award.

5.3.3 The Awarded Bidder will be required to enter into a Purchase Order Agreement or Subcontract Agreement with Wharton-Smith, Inc. This agreement will contain the same terms and conditions as shown in the sample agreement provided in this Bid Manual. The Purchase Order or Subcontract will also contain the defined work scope as shown in this Bid Manual. Modifications to this Agreement will not be allowed.

SECTION 6 – SCOPE OF WORK

The Bidder shall utilize the information within this section of the Bid Manual to assist in the development of the Bid Proposal. The outlined scopes herein are not intended to detail the complete scope of the Bid Package. The Bidder is responsible for reviewing the Contract Documents to understand the full scope and requirements.

The Subcontractor Is to furnish all labor, equipment, material, subcontracts, and supervision required to complete the Scope of Work generally described as the **CONCRETE PACKAGE**, detailed herein, for the Public Utilities Field Operations Facility. All work shall be complete and in accordance with the Contract Documents. In the event of conflicts between the Scope of Work and other parts of the Contract Documents, this section shall take precedence.

6.1 WORK OVERVIEW

Provide complete, all required **CONCRETE**, for the Project known as **City of Port Orange Public Utilities Field Operations Facility.**

The Work included in this Subcontract is project specific and outlines the general Scope of Work for this Subcontract, all in complete accordance with the Plans and Specifications as defined in Exhibit "C" attached hereto.

Other Specification Sections may form a part of this Subcontract, whether listed or not.

The Scope of this Subcontract includes, but is not necessarily limited to the furnishing and installation of the following Work by this Subcontractor.

1. Visitors - No one shall be admitted to the jobsite by the Subcontractor, except as necessary to perform the Work hereunder, without, in each instance, first obtaining the approval of the Contractor.

2. Replace Guardrails - This Subcontractor shall install, maintain and replace all required guardrails in accordance with OSHA Standards for the purpose of safety at all openings and suspended work at the locations not protected and where Subcontractor is performing work. Subcontractor is also responsible for all construction fencing, temporary walkways, overhead protection, signage, and/or barricades to perform work outside the boundaries of Contractor furnished construction fencing.

3. Ongoing Operations/Residential Environment/Parking - Without limitation of the foregoing, Subcontractor understands that the Work may be constructed near on-going business or facility operations and may be in and around private residences and neighborhoods. Subcontractor shall use its best efforts, in conformity with the applicable standard of care, to perform the services hereunder in a manner which will not interfere with the on-going business operations and residences. All construction employees are to enter and park in the construction parking area designated by Contractor. Subcontractors are responsible for all off-site parking of employees which may be required and busing to jobsite via route identified by Contractor. Busing of employees, jobsite vehicles or deliveries shall not be routed through surrounding neighborhoods.

4. Jobsite Storage - Subcontractor is aware of the existing site conditions and the limited space availability. On-site storage and staging of materials and equipment will be allowed, only as specifically approved by Contractor's Project Superintendent or Project Manager. All deliveries of Subcontractor will be coordinated through Contractor. If scheduled deliveries are not ready at appointed time, Contractor may refuse acceptance and deliveries will be rescheduled. All cost and/or delays associated with the refusal of deliveries will be the responsibility of the Subcontractor. Subcontractor has included in this Subcontract price, all off-site storage as may be required, including, but not limited to transportation of materials from staging area to site.

5. Phased Turnover - This Subcontractor acknowledges that the Project may have phased turnover in accordance with the Project Schedule and that several mobilizations may be required and are included as part of this Subcontract. Additionally, Subcontractor acknowledges that the Project may have multi-buildings and that concurrent work on each building will be required in order to complete some phases ahead of the Project Schedule and all costs for doing same are included.

6. Owner's Facilities - All Project employees are subject to the Owner's rules and regulations while employed within their property limits. Use of the Owner's other parking lots and facilities by this Project's workmen are not permitted.

7. Limitation of Noise/Hours of Work - Subcontractor shall comply with all city, county, state and local jurisdictional authorities' Noise and Hours of Work Regulations.

8. Extra Work Percentages: For the purpose of changes to the Subcontract, the allowable overhead and profit is a combined 10%; but in no event shall these percentages exceed amounts authorized in the Owner-Contractor Agreement.

9. Closeout Documentation: This Subcontractor agrees to furnish all closeout documents, training, attic stock, and any punch work required within sixty (60) calendar days from Substantial Completion. Any Closeout documentation, attic stock, training or punch work deemed incomplete or missing passed the allotted time is subject to Liquidated Damages.

10. Warranties: This Subcontractor shall provide all warranties as required for this Scope of Work per the Contract Documents. This includes any required "Extended" Warranty for any product provided as part of this Scope of Work per the Contract Documents.

11. The word "provide" used herein means to "furnish and install" and is inclusive of all labor, material, equipment, shipping, coordination, tools, planning, shop drawings, field measuring, preparation and all other items required to complete the Work.

12. Subcontractor shall provide seventy-two (72) hour notice to Contractor prior to any material deliveries arriving at the jobsite. A representative of the Subcontractor shall be present on-site at the time of all deliveries. The Subcontractor shall also be responsible for the inventory, unloading, storage, security, and protection of the materials delivered.

13. Protection of existing surfaces and post-construction cleanup is included in this Subcontract Agreement.

14. Any rework or damage to in-place work resulting from the prosecution of this Scope of Work is the sole responsibility of this Subcontractor.

15. Subcontractor shall provide all horizontal and vertical transportation of materials, hoisting, and stabilization of grade required to safely complete their scope of work, including all necessary labor and equipment required to safely relocate materials from storage to the work area.

16. Subcontractor shall provide flagmen and traffic control people as necessary to get trucks in and out of the site in a safe and effective manner.

17. **CARE AND CUSTODY:** The Subcontractor shall provide labor and equipment to receive, unload, inventory, store, and provide for the care and custody of all materials it procures for its own behalf, or is furnished by others for installation by this Subcontractor, until such time as the material is permanently installed and accepted by the Owner and Architect.

18. This Subcontractor has sole responsibility to receive, inventory, and install all material associated with this Scope of Work in strict accordance with the Contract Documents. Wharton Smith will not be responsible for the acceptance of any subcontractor deliveries.

19. This Subcontractor shall participate in the coordination drawing process as required by Construction Manager and the Contract Documents. This Subcontractor shall coordinate the proposed locations of their work with the requirements of all related work to verify non-interference and compliance with ceiling heights, obstructions imposed by recessed lighting fixtures, shift spaces and other limitations. All access door locations shall be indicated. Conflicts will be prioritized and the sequence in which work is to be installed. Installed work of this Subcontractor that blocks or otherwise inhibits the proper work of any other trade shall be removed and relocated by this Subcontractor at no increase in the contract sum. Coordination meetings will be held weekly until all coordination is complete and approved by the Architect.

20. Dimensions shall be field-verified and coordinated prior to procurement or fabrication. Coordinate work with other trades involved. Field modifications such as offsets in piping or ductwork due to obstructions shall be provided at no additional cost. Coordinate work with existing elements such as mechanical equipment and duct,

lighting, pipes, and building structures. If conflict exists, Subcontractor is to request clarification prior to proceeding.

21. **OWNER DIRECT PURCHASE PARTICIPATION:** With respect to Article 22 of this Subcontract Agreement, the Owner will exercise the right to purchase materials directly as part of the Owner Direct Purchase Program. This Subcontractor shall actively participate in the Owner Direct Purchase Program for this Project and shall meet or exceed material purchases as part of this Program. Prior to the Subcontractor's final payment, a final reconciliation of Owner Direct Purchases against this Subcontract will be performed. Should it be determined in such final reconciliation or any other audit that this Subcontractor failed to meet the minimum requirement for Program material purchases, the Contractor shall be entitled to offset against amounts due Subcontractor or, if no amounts are due, recover from Subcontractor the amount of such missed tax savings for Program material purchases below the minimum. As required by the Owner Contract, any material order over $5,000.00 is required to go through the Owner Direct Purchase Program.

22. **FLORIDA PRODUCT APPROVAL**: Furnish Florida Product Approval Installation Instructions for approval. Provide all materials, anchors, consumables and other installation methods in strict accordance with all Florida Product Approval Installation Instructions and Test Procedures.

23. This Subcontractor shall submit an approved Site-Specific Safety Plan to the Wharton Smith Superintendent prior to mobilizing on site. Subcontractor to provide list of onsite Competent Persons responsible for the safe execution of this Scope of Work. List of Competent Persons shall be provided as part of the Site-Specific Safety Manual required for this project. Include any and all applicable Certifications.

24. **FIELD & MANAGEMENT SERVICES:**

    a. Subcontractor shall provide, full time onsite supervision at all times that work is being performed under this Subcontract. In the event, that Subcontractor fails to do so, Contractor will provide supervision and all costs will be back charged to Subcontractor.

    b. Subcontractor Superintendent will be required to attend all requested progress, safety, scheduling, coordination, and quality control meetings. Meetings of other nature may be required as requested by Engineer, Owner, or Contractor.

    c. Subcontractor will coordinate with Contractor and other project subcontractors as necessary to facilitate a proper installation.

    d. Subcontractor must coordinate and obtain approval from Wharton-Smith Superintendent to have and locate a construction trailer onsite, if necessary.

25. **SPECIAL NOTES**:

    a. Subcontractor to provide any storage containers or other temporary facilities required for safe and secure storage of materials provided by this Subcontractor.

    b. Subcontractor is responsible for keeping area orderly and clean.

    c. Contractor and the Owner will make every attempt to provide a secure site, however, Subcontractor is responsible for any financial loss due to theft.

    d. OSHA and Wharton-Smith safety standards are to be followed always. In the event of a conflict between these standards, the more stringent shall apply.

    e. This Subcontractor shall provide adequate OSHA-approved working platforms, walkways, scaffolding, railings, harnesses, and safety rails as required at all times that work is taking place on-site. It is this Subcontractor's responsibility to furnish, erect, brace, and dismantle all scaffolds required to complete this Scope of Work. Inspection and tagging of all scaffolds provided by this Subcontractor are to be completed on a daily basis by their Competent Person prior to work commencing.

    f. Daily clean-up is to be included in this scope package.

    g. All inspection requests are the responsibility of this Subcontractor and must be coordinated with Wharton-Smith Superintendent.

h. The cost of re-inspections of this Scope of Work as a result of failed inspections or testing will be the responsibility of this Subcontractor.

i. Subcontractor shall cooperate and coordinate with the Testing Laboratory to perform field quality control testing during all concrete work as required per the Project Documents. The Testing Laboratory shall make additional tests of in-place concrete when test results indicate concrete does not meet specified characteristics. Subcontractor shall pay for such tests conducted and other additional testing as may be required, when unacceptable concrete is verified. Deficient concrete shall be removed as directed by the Architect and replaced by this Subcontractor without additional cost to the Owner or Wharton-Smith.

26. Provide all **CONCRETE** in strict accordance with the Contract Documents, complete and fully functioning to the designer's intent, specifically including all details sections and notes contained within the Contract Documents, also including but not necessarily limited to the following:

~~a. Substrate examination, testing, and preparation including minor patching as required for a weather tight seal of exterior walls; Fluid applied weather barrier and 3-coat cement plaster system including all casing beads, corner beads, galvanized metal lath, paper backing, vinyl trims, fasteners, spacers, control joints, reveal joints, weep screeds, stucco stops, transitions to adjacent finishes, and miscellaneous accessories for a turn-key plaster and stucco exterior finish.~~

27. This Subcontractor shall provide all mockups required by the Contract Documents, the Contractor, the Designer, and/or the Owner.

28. Subcontractor shall protect adjacent work from splatter and damage.

29. ~~Subcontractor shall provide all fluid applied weather barrier at all CMU receiving stucco in accordance with the Contract Documents.~~

30. This Subcontractor has included all ASTM D4541 testing of substrates for bonding and adhesion

31. This Subcontractor shall inspect, test, and confirm in writing to Wharton-Smith Superintendent that all substrates are acceptable prior to start applying and/or installing any exterior finishes.

Other Items of Note:

A. Wharton-Smith will be utilizing a software called **Team Player** to process monthly pay applications. The fee for this service is $10.00 per Pay Application, regardless on the number of revisions in each month. Please review the Team Player Welcome Letter that has been included in the Bidding Documents which contains embedded links for training documentation and videos. This will be a requirement for all subcontractors on this project.

B. With respect to Article 22 of this Subcontract Agreement, the Owner will exercise the right to purchase materials directly as part of the Owner Direct Purchase Program. This Subcontractor shall actively participate in the Owner Direct Purchase Program for this Project Prior to the Subcontractor's final payment, a final reconciliation of Owner Direct Purchases against this Subcontract will be performed. This does not apply to temporary fence.

C. On-Site Work Hours: Limit work to between 7 a.m. to 5 p.m., Monday through Friday, unless otherwise indicated. Work hours may be modified to meet Project requirements if approved by Owner and authorities having jurisdiction.

D. Employee Screening: Comply with Owner's requirements for drug and background screening of Contractor personnel working on Project site. Subcontractor shall maintain list of approved screened personnel with Owner's representative.

6.2 BID PRICING / ALTERNATES

The bid pricing shall be broken out as follows and as indicated on the bid form. The City of Port Orange has the sole discretion to accept any, all, or none of the work items for this scope of work based on the bid pricing received. Subcontractor to price the work accordingly.

6.2.1 This bid does not include any bid alternates.

6.2.2 Retainage will be held at 5% for the duration of the Contract and will be released upon retainage release by the Owner.

6.3 CLARIFICATIONS

6.3.1 The Subcontractor will be responsible for protecting all new and existing work throughout the site from damage that could be caused by performing the Scope of Work. Any damage caused by Subcontractor is the responsibility of Subcontractor and Subcontractor will bear the costs of said damage.

6.3.2 The Subcontractor will be required to attend all project progress and coordination meetings as requested by Wharton-Smith, Inc. or the owner.

6.3.3 All materials must be submitted upon and approved prior to being sent to the jobsite, all non-approved items may be rejected and returned at the Subcontractor's cost.

6.3.4 Subcontractor is responsible to coordinate with the CMAR and all other Subcontractors as necessary.

6.3.5 Subcontractor will be responsible for all general notes indicated on the drawings that pertain to this scope of work.

6.3.6 Subcontractor will obtain all permits, licenses, certificates, and coordination efforts, or any such approvals of plans or specifications as may be required by federal, state and local laws, ordinances, rules and regulations, for the proper execution and completion of the work specified herein.

6.3.7 Subcontractor will be responsible for offloading all equipment deliveries and proper short-term and long-term storage requirements per the manufacturer's requirements. Provide all equipment necessary to offload and set equipment including cranes.

6.4 GENERAL REQUIREMENTS

6.4.1 The Subcontractor will be bound to the CMAR to the same extent the CMAR is bound to the Owner by the terms of the Contract Documents.

6.4.2 The Scope of Work will be in compliance with all Federal, State and Local Codes.

6.4.3 This is a lump sum agreement, including freight, incidental fees, and all applicable taxes. A schedule of values for submittals, materials, checkout, startup and closeout paperwork will be submitted with the return of the signed agreement for review and approval by the CMAR's Project Manager.

6.4.4 If requested by the CMAR, the Subcontractor will assist in cost loading of the project's master schedule. Schedule of Values will follow the cost loaded actives provided by Subcontractor.

6.4.5 No billing will be accepted without an approved Schedule of Values.

6.4.6 A detailed Schedule of Values must be provided within two (2) weeks of a contract being executed should your bid be accepted.

6.4.7 No escalation costs are permitted, pricing will remain firm through the project duration.

6.4.8 The Subcontractor is required to abide by the Wharton-Smith, Inc. safety program and OSHA standards. Excavation, confined space plans, and MSDS sheets will be required for all applicable work.

6.4.9 Subcontractor is responsible to develop and provide a site-specific safety plan for this scope of work.

A. Safety plan will list all potential hazards and competent persons who will be supervising the work.

6.4.10 Subcontractor will maintain an OSHA Certified competent person on site at all times while the work is conducted.

6.4.11 All Subcontractors will be required to follow security protocol of the City of Port Orange and Wharton-Smith at all times.

6.4.12 OSHA and the CMAR's safety standards will be followed at all times.

6.4.13 Proper PPE will be worn by any personnel on the jobsite, including but not limited to delivery drivers, startup and commissioning representatives, manufacturer's representatives, and other personnel.

6.4.14 Materials are to be released as required to maintain Schedule, but Subcontractor is to inform CMAR of material releases and deliveries. No item will be released for production without approval from the Engineer.

6.4.15 All equipment will be labeled and tagged in accordance with the Contract Documents.

6.4.16 Provide all management necessary to adequately support field activities and maintain the Project Schedule.

6.4.17 Fulltime and onsite supervision is required while any work by Subcontractor is being performed. If Subcontractor fails to do so, the CMAR will provide supervision and all costs will be back charged to Subcontractor. The Subcontractor's superintendent will be required to attend all requested progress, safety, scheduling, coordination, and quality control meetings. Meetings of other natures may be required as requested by Engineer, Owner, or the CMAR.

6.4.18 The Subcontractor will be required to coordinate with all other construction trades as required to complete this Scope of Work.

6.4.19 Anticipated (general) sequencing – Your crews may be interfacing with several other trades including mechanical, concrete, piping, and, testing agencies. Reasonable time provisions need to be made for coordination and time for these trades to complete their work.

6.4.20 All deliveries will be made between 7am-3pm M-F; all deliveries will be escorted onto the site by WSI. A 72-hour notice to WSI's Superintendent will be required prior to any deliveries.

6.4.21 The Subcontractor may not utilize any area of the project site for storage without approval from the CMAR. If the Subcontractor plans to utilize storage space, the Subcontractor will submit, to the CMAR, a site plan detailing the areas being requested for storage.

6.4.22 An emergency contact list will be provided by the Subcontractor. This list will include at least one point of contact that is available 24 hours a day.

6.4.23 Furnish appropriate Material Safety & Data Sheets (MSDS) and warranty documentation with shop drawings for approval.

6.4.24 Subcontractor is required to coordinate with all applicable authorities as required

6.4.25 The Subcontractor utilizing an Employee Leasing Company for Workers Compensation Insurance coverage will not be allowed to use any Subcontractor on the project (i.e. no third-party subs)

6.4.26 It is the sole responsibility of the Subcontractor to secure any and all tools, materials, and equipment stored on the site. Wharton-Smith, nor the Owner, will be responsible for any theft, vandalism, or damage to the Subcontractors property. The Subcontractor is responsible for all security measures required to secure their resources.

6.4.27 Subcontractor will provide temporary generators as needed and fresh drinking water for their employees. Subcontractor is only responsible for their work and personnel.

6.4.28 The Subcontractor is responsible to follow all site plan details and to adhere to all specifications applicable to the Scope of Work items above.

6.4.29 All hazardous material will be properly disposed of at an offsite location.

6.4.30 The Subcontractor will be responsible to utilize available dumpsters for debris and daily clean-up. All areas will be left clean at the end of each day.

6.4.31 A representative of the Subcontractor knowledgeable of the work will be present at weekly coordination meetings with the General Contractor.

6.4.32 Subcontractor is to provide Daily Reports.

6.4.33 A Superintendent (not Foreman) must be present at all times the Subcontractor's crews are onsite.

6.4.34 Pre-Mobilization Jobsite QC/QA Conference - Subcontractor to participate in WSI Quality Control Plan as outlined in the Subcontract Agreement. Subcontractor's Project Superintendent and or Foremen will attend Quality Control Meetings as deemed necessary by WSI including a minimum of one (1) pre-mobilization meeting to be held in advance of Subcontractor's mobilization on site.

6.4.35 Subcontractor must have approval for additional work (not included in this Scope) in writing by an authorized W/S representative prior to proceeding with said work.

6.4.36 No claim for extra services rendered or materials furnished will be valid by either party unless agreed to in writing by both parties.

6.5 PROJECT SCHEDULE

6.5.1 The Subcontractor is to provide a detailed schedule for the Scope of Work with the submission of bid. The Subcontractor will coordinate with the CMAR to ensure the detailed schedule conforms to the overall Project Schedule. The Subcontractor will update this Scope of Work Schedule each month and provide a written update to the CMAR.

6.5.2 The Subcontractor will account for not working on holidays and still plan for the Scope of Work to be completed per the overall Project Schedule. Holidays will include those observed by the Owner, the CMAR, and the Subcontractor. The CMAR or Owner observes the following holidays:

A. New Year's Day
B. Martin Luther King Day
C. President's Day
D. Memorial Day
E. Independence Day
F. Labor Day
G. Thanksgiving
H. Day after Thanksgiving
I. Christmas Eve
J. Christmas Day

6.6 SUBMITTAL REQUIREMENTS

6.6.1 The Subcontractor will provide submittal documentation as required within the Contract Documents. Upon execution of this Agreement the Subcontractor will provide a list of anticipated submittals for the Scope of Work. The Subcontractor will provide any additional submittal documentation requested for any materials or services related to the Scope of Work.

6.6.2 All submittals which have any deviation will be supplied with a letter addressing all deviations.

6.6.3 All submittals will be provided with a cover page listing the following information:

A. Project name

B. Submittal title

C. Relevant specification sections

a. Specification sections, with addendum updates included, are to have each paragraph check-marked to indicate specification compliance. Check marks shall denote full compliance with a paragraph as a whole. Any deviation shall be clearly marked by an “X“ and numbered to indicate a requested deviation. If deviations from the specifications are indicated, and therefore requested, each deviation shall be underlined and denoted by a unique number in the margin to the right of the identified paragraph, referenced to a detailed written explanation of the reasons requesting the deviation. The remaining portions of the paragraph not underlined will signify compliance with the specifications. Failure to include a copy of the marked-up specification sections along with justifications for any requested deviations to the specification requirements shall be cause for return of the entire submittal with no further review.

D. Subcontractor’s contact information

E. Manufacturer’s contact information

6.6.4 All submittals will including the following information for each individual piece of equipment or fabrication:

A. Complete model number

B. The tag number of each per the Contract Documents (if applicable)

C. List of major components

D. Specification section (if varied from the submittal prime specification section)

6.6.5 It is the Subcontractor’s sole responsibility to ensure submittals are complete and accurate for the complete scope of this agreement. Coordination of submittal information from others working under the Subcontractor is the sole responsibility of the Subcontractor. Subcontractor will not provide submittals with any items marked out of scope or by others if such items are part of the scope of this agreement.

6.6.6 Revised submittals will include a comment response document, this document will respond to every comment in writing and reference the location of all corrections within the revised submittal. Revised submittals will be at no additional cost to the Purchaser.

6.6.7 The Subcontractor may be responsible for any costs incurred by the CMAR due to excessive submittal revisions.

6.7 RECORD DOCUMENTS

6.7.1 The Subcontractor will maintain accurate and current as-built documents. These documents will meet the requirements within the Contract Documents. All survey information will be certified by a licensed surveyor.

6.7.2 Prior to approval of the Subcontractor's monthly pay application, the CMAR may elect to review the Subcontractor's as-built documents. If these documents are found to be inaccurate or not current, up to the date of the pay application, the CMAR may reject the pay application until the Subcontractor provides accurate and current as-built documents. Subcontractor will not be entitled for any additional costs, fees, or other compensation due to rejected pay applications and delayed payments as a result of Subcontractor's failure to provide accurate and current as-built documents.

6.7.3 After completion of the Scope of Work, the Subcontractor will provide complete and final as-built documents within two (2) weeks. As-built documents will be provided as detailed in the Contract Documents

6.8 INSURANCE

6.8.1 Subcontractor will provide the minimum insurance limits required to meet the requirements in this purchase order and all the requirements detailed within the Contract Documents. A sample insurance document is included within the Contract Documents for additional reference.

6.8.2 The Subcontractor will maintain a worker's compensation insurance policy for the complete scope of services. The Subcontractor will not utilize a Professional Employer Organization (PEO) to provide workers compensation insurance.

November 11, 2024

Enclosed is our quote for the cast stone on the Port Orange Public Utilities Operations Bldg project in Port Orange, Fla. This quote includes labor and material for production of stone. This quote does not include tax, nor the installation of stone, which our company does not perform. Stone will be shipped 'F.O.B. - jobsite' from Macon, Ga.

(1) Mold @ $400 => $400
45’ of 17” Window Sill Assemblies Mix/Labor => $1800
158’ of 14” Granular Storage Coping Assembly Mix/Labor => $4000
35’ of 14” Dumpster Screen Coping Assembly Mix/Labor => $900
52’ of 14” Mech Yard Screen Coping Assembly Mix/Labor => $1400
(1) Load Shipping => $1400
(sales tax not included) Total => $9900

Please note that we do not collect/file Fla sales tax.

Anchors are excluded.

Please note that we only quoted “window sills” in the CMU areas. We did not quote any window sills in the metal panel areas (no section provided for these windows).

This quote is based on drawings dated 9/30/24 – “Issue Date” (Previous Revisions in Revision block)

No Addenda are acknowledged.

We will utilize a “stock” mold for the above 14” coping. Mold may not be the exact dimensions of the architect designed mold, but will be very close. If a custom mold is required, a $400 mold fee will apply.

Please allow 2 weeks lead time for submittal creation.
Then allow 3 weeks lead time for production after submittal approval.

Thanks
Chad Walters

Hi James,

We have been asked to provide pricing for the precast, on this project.

I will be out of the office on Monday, so I am sending early so that you can review. I will return to the office on Tuesday morning (bid day), if you have any questions.

Attached is our quote for the cast stone on this project. Please review this quote and call me if I can answer any questions.

Please see notes concerning revisions and molds.

Thanks

Chad Walters

The Bidder acknowledges that Bidder has considered and included the requirements of the Subcontractor Bid Manual, dated October 17, 2024, and all other sections, in preparing this Bid.

The Bidder acknowledges time is of the essence and the Project will begin March 6, 2025, with Substantial Completion that must be achieved no later than June 30, 2026, and has included all costs for any required extended hours, extra shifts, weekend and holiday work which may be necessary to complete the Work on schedule.

This Bid will remain subject to acceptance for ninety **90** calendar days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Construction Manager.

The Bidder understands and agrees that the Construction Manager and/or Owner reserves the right to reject this Bid or any and all bids for the Project, and to waive minor irregularities or informalities in any bid and to award Alternates in any order that in the Construction Manager's judgment will be in the Owner's best interest.

The Bidder hereby acknowledges they are licensed to do business in the capacity represented by this Bid and as required by all governing jurisdictional authorities for all locations of the work and as required by the Contract Documents.

The Bidder hereby acknowledges reviewing and accepting without modification the Wharton-Smith, Inc. Subcontract Agreement and agrees to execute same if awarded the project or portion(s) of the Project.

SECTION 6 – SCOPE OF WORK

The Bidder shall utilize the information within this section of the Bid Manual to assist in development of the Bid Proposal. The outlined scopes herein are not intended to detail the complete scope of the Bid Package. The Bidder is responsible for reviewing the Contract Documents to understand the full scope and requirements.

The Subcontractor Is to furnish all labor, equipment, material, subcontracts, and supervision required to complete the Scope of Work generally described as the **STRUCTURAL STEEL PACKAGE**, detailed herein, for the Public Utilities Field Operations Facility. All work shall be complete and in accordance with the Contract Documents. In the event of conflicts between the Scope of Work and other parts of the Contract Documents, this section shall take precedence.

6.1 WORK OVERVIEW

Provide complete, all required **Structural Steel and Miscellaneous Metals**, for the Project known as **City of Port Orange Public Utilities Field Operations Facility.**

The Work included in this Subcontract is project specific and outlines the general Scope of Work for this Subcontract, all in complete accordance with the Plans and Specifications as defined in Exhibit "C" attached hereto.

Other Specification Sections may form a part of this Subcontract, whether listed or not.

The Scope of this Subcontract includes, but is not necessarily limited to, the furnishing and installation of the following Work by this Subcontractor.

1. Visitors - No one shall be admitted to the jobsite by the Subcontractor, except as necessary to perform the Work hereunder, without, in each instance, first obtaining the approval of the Contractor.
2. Replace Guardrails - This Subcontractor shall install, maintain and replace all required guardrails in accordance with OSHA Standards for the purpose of safety at all openings and suspended work at the locations not protected and where Subcontractor is performing work. Subcontractor is also responsible for all construction fencing, temporary walkways, overhead protection, signage, and/or barricades to perform work outside the boundaries of Contractor furnished construction fencing.
3. Ongoing Operations/Residential Environment/Parking - Without limitation of the foregoing, Subcontractor understands that the Work may be constructed near on-going business or facility operations and may be in and around private residences and neighborhoods. Subcontractor shall use its best efforts, in conformity with the applicable standard of care, to perform the services hereunder in a manner which will not interfere with the on-going business operations and residences. All construction employees are to enter and park in the construction parking area designated by Contractor. Subcontractors are responsible for all off-site parking of employees which may be required and busing to jobsite via route identified by Contractor. Busing of employees, jobsite vehicles or deliveries shall not be routed through surrounding neighborhoods.
4. Jobsite Storage - Subcontractor is aware of the existing site conditions and the limited space availability. On-site storage and staging of materials and equipment will be allowed, only as specifically approved by Contractor's Project Superintendent or Project Manager. All deliveries of Subcontractor will be coordinated through Contractor. If scheduled deliveries are not ready at appointed time, Contractor may refuse acceptance and deliveries will be rescheduled. All cost and/or delays associated with the refusal of deliveries will be the responsibility of the Subcontractor. Subcontractor has included in this Subcontract price, all off-site storage as may be required, including, but not limited to transportation of materials from staging area to site.
5. Phased Turnover - This Subcontractor acknowledges that the Project may have phased turnover in accordance with the Project Schedule and that several mobilizations may be required and are included as part of this Subcontract. Additionally, Subcontractor acknowledges that the Project may have multi-buildings and that concurrent work on each building will be required to complete some phases ahead of the Project Schedule and all costs for doing same are included.

6. Owner's Facilities - All Project employees are subject to the Owner's rules and regulations while employed within their property limits. Use of the Owner's other parking lots and facilities by this Project's workmen are not permitted.
7. Limitation of Noise/Hours of Work - Subcontractor shall comply with all city, county, state and local jurisdictional authorities' Noise and Hours of Work Regulations.
8. This Subcontractor shall preserve all benchmark stakes and other survey marks, regardless of location or purpose. In the event these items are removed or destroyed by the Subcontractor's employees or others working on its behalf, the Subcontractor shall bear the full replacement cost.
9. This Subcontractor shall be responsible for all flagmen and traffic control personnel as necessary to get trucks in and out of the Project site in a safe and effective manner.
10. This Subcontractor shall provide and install a complete **package**. This includes, but is not limited to, all structural steel columns, structural steel beams, bar joists, metal deck, steel pan stairs, handrails, wall rails, guardrails, tube steel framing, base plates, shear studs, channels, anchor bolts, embedded weld plates, gusset plates, seats, bridging, clips, bollards, metal roof deck, closure strips, continuous support angles, miscellaneous support angles, roof access ladders, and all miscellaneous items required by this Scope of Work.
11. This Subcontractor shall provide all structural steel and miscellaneous steel with the appropriate finish in strict accordance with the Contract Documents.
12. Provide an allowance to furnish and install the additional 300 LF of L3"x3"x1/4" steel angle. All unused labor and material shall be credited back via deductive change order upon final contract reconciliation.
13. This Subcontractor shall provide and install all angle support frames for framed floor and/or roof openings for all Mechanical floor and roof penetrations. Subcontractor shall coordinate with Mechanical Subcontractor and the Mechanical Drawings. None
14. Steel Subcontractor to provide and install structural supports for operable partition to include structural support for concentrated load when partition is folded. See note 1 on S102. This Subcontractor shall coordinate requirements with operable partition wall vendor. Note states steel to be BY wall Supplier -
15. This Subcontractor shall provide and install **Dumpster gates**. Gates to be provided with finishes in strict accordance with A1/AS501 and the Contract Documents.
16. This Subcontractor shall provide all continuous embedded angle materials at all Overhead Door Opening locations, in strict accordance with the Contract Documents and detail J15/S201. Installation of angle is by others.
17. This Subcontractor shall provide and install all handrails, wall rails, and guardrails shown on the Contract Documents.
18. This Subcontractor shall provide and inventory all bollards, associated anchor bolts and plates required throughout the building and site. Bollards are to be installed and painted by others. This scope of work includes all welded metal top caps per detail A14/AS501. A13
19. This Subcontractor shall provide and install roof access ladders in strict accordance with the Contract Documents. Subcontractor shall supply caged access ladders when required by code. Subcontractor shall coordinate ladder dimensioning and fastening points with Concrete, Masonry and Roofing Contractors. None Shown on Drawing
20. This Subcontractor shall perform all field engineering and layout for this Scope of Work including, but not limited to, line, level, grade, layout, block outs, niches, and openings.
21. This Subcontractor shall provide all engineering required by the Contract Documents by a Structural Engineer licensed to work in the State of Florida. All associated costs for signing and sealing and resubmittals, if required, are included in this Subcontract amount. — NO engineering Required
22. This Subcontractor shall be responsible for all fire and spark protection relating to this Scope of Work.
23. This Subcontractor shall utilize only gas or diesel operated welding machines. All fuel, oil, and maintenance for this equipment is by this Subcontractor. Welding machines are to be properly protected from leaking fluids and/or fuels onto slabs and/or surrounding dirt.

24. This Subcontractor shall provide all cutting, welding and fitting equipment, and materials required for complete erection.

25. This Subcontractor shall provide all shop **and** onsite welder certifications at the time of material fabrication and erection to the Contractor for record purposes.

26. This Subcontractor shall provide a continuous single source on site individual for supervision during execution of your Scope of Work.

27. This Subcontractor shall provide a Project Hoisting Plan for review and approval by Contractor prior to mobilization. All above ground and hoisting work requires competent persons in fall protection, scaffolding, crane operation, and rigging while work is taking place on site.

28. This Subcontractor shall provide manpower for "Composite Cleanup Crew" on a Weekly basis. Subcontractor shall be required to provide one Composite Crew Member for every ten Subcontractor workers onsite. Participation in the Composite Cleanup Crew is only required while this Subcontractor is mobilized onsite, completing this Scope of Work.

29. This Subcontractor shall provide adequate working platforms, walkways, scaffolding, railings, and safety rails as required at all times work is taking place on site.

30. The following items are provided and installed by others:

    a. Metal Building Systems
    b. Flag Poles
    c. Aluminum Canopy Systems
    d. Scuppers, Downspouts, and Coping
    e. Aluminum Storefront Systems
    f. Hollow Metal Door/Window Assemblies
    g. Mechanical Louvers
    h. Overhead Door Systems

31. The Subcontractor shall provide a list of all intended material and equipment to be purchased under the Owner Direct Material/Equipment Purchase Program no later than 10 days after the issuance of a Notice of Intent or execution of this Agreement, whichever comes first.

32. Scope review clarifications:

    a. This Subcontractor will furnish and install all safety net barrier at railing as prescribed in the Contract Documents.
    b. Subcontractor to furnish:
        i. 6" – Bollards at all locations shown on the Contract Documents.
        ii. 6" Bollards 5 additional for locations TBD by the project team during construction of the project.
    c. Subcontractor will facilitate the cutting of metal deck only if the roof curb is onsite to be immediately installed. If the roof curb is not onsite, Subcontractor providing the roof curb will be responsible for the cutting of the roof curb.
    d. Contractor to provide elevation on one anchor bolt within each column anchor bolt clusters.

33. Subcontractor shall comply with the Contract Documents with specific submittal requirements of all applicable specifications.

    a. Subcontractor will be required to submit on all material which is to be furnished and/or installed under this scope.

b. Submittals are required within two (2) weeks of issuance of Subcontract or Letter of Intent. Any resubmittals will be required within 2 weeks from the return of the previous submittal.

34. Complete redline as-built construction drawings as required by the Contract Documents, for all work performed under this scope.

a. As-Built drawings for this scope of work shall be done in accordance with the Contract Documents.

b. As-Built drawings for this scope of work shall be kept current. Drawings will be reviewed regularly by Wharton-Smith, Owner and Design Team. Current as-built drawings may be a prerequisite for progress payments.

c. Subcontractor shall provide certified as-built survey for this scope of work after execution of work. As-Built survey shall contain all information required and in accordance with the Contract Documents.

35. This Subcontractor shall provide all warranties as required for this Scope of Work per the Contract Documents. This includes any required "Extended" Warranty for any product provided as part of this Scope of Work per the Contract Documents.

Other Items of Note:

A. Wharton-Smith will be utilizing a software called **Team Player** to process monthly pay applications. The fee for this service is $10.00 per Pay Application, regardless on the number of revisions in each month. Please review the Team Player Welcome Letter that has been included in the Bidding Documents which contains embedded links for training documentation and videos. This will be a requirement for all subcontractors on this project.

B. With respect to Article 22 of this Subcontract Agreement, the Owner will exercise the right to purchase materials directly as part of the Owner Direct Purchase Program. This Subcontractor shall actively participate in the Owner Direct Purchase Program for this Project Prior to the Subcontractor's final payment, a final reconciliation of Owner Direct Purchases against this Subcontract will be performed.

C. On-Site Work Hours: Limit work to between 7 a.m. to 5 p.m., Monday through Friday, unless otherwise indicated. Work hours may be modified to meet Project requirements if approved by Owner and authorities having jurisdiction.

D. Employee Screening: Comply with Owner's requirements for drug and background screening of Contractor personnel working on Project site. Subcontractor shall maintain list of approved screened personnel with Owner's representative.

6.2 BID PRICING / ALTERNATES

The bid pricing shall be broken out as follows and as indicated on the bid form. The City of Port Orange has the sole discretion to accept any, all, or none of the work items for this scope of work based on the bid pricing received. Subcontractor to price the work accordingly.

6.2.1 This bid does not include any bid alternates.

6.2.2 Retainage will be held at 5% for the duration of the Contract and will be released upon retainage release by the Owner.

6.3 CLARIFICATIONS

6.3.1 The Subcontractor will be responsible for protecting all new and existing work throughout the site from damage that could be caused by performing the Scope of Work. Any damage caused by Subcontractor is the responsibility of Subcontractor and Subcontractor will bear the costs of said damage.

6.3.2 The Subcontractor will be required to attend all project progress and coordination meetings as requested by Wharton-Smith, Inc. or the owner.

6.3.3 All materials must be submitted upon and approved prior to being sent to the jobsite, all non-approved items may be rejected and returned at the Subcontractor's cost.

6.3.4 Subcontractor is responsible to coordinate with the CMAR and all other Subcontractors as necessary.

6.3.5 Subcontractor will be responsible for all general notes indicated on the drawings that pertain to this scope of work.

6.3.6 Subcontractor will obtain all permits, licenses, certificates, and coordination efforts, or any such approvals of plans or specifications as may be required by federal, state and local laws, ordinances, rules and regulations, for the proper execution and completion of the work specified herein.

6.3.7 Subcontractor will be responsible for offloading all equipment deliveries and proper short-term and long-term storage requirements per the manufacturer's requirements. Provide all equipment necessary to offload and set equipment including cranes.

6.4 GENERAL REQUIREMENTS

6.4.1 The Subcontractor will be bound to the CMAR to the same extent the CMAR is bound to the Owner by the terms of the Contract Documents.

6.4.2 The Scope of Work shall comply with all Federal, State and Local Codes.

6.4.3 This is a lump sum agreement, including freight, incidental fees, and all applicable taxes. A schedule of values for submittals, materials, checkout, startup and closeout paperwork will be submitted with the return of the signed agreement for review and approval by the CMAR's Project Manager.

6.4.4 If requested by the CMAR, the Subcontractor will assist in cost loading of the project's master schedule. Schedule of Values will follow the cost loaded actives provided by Subcontractor.

6.4.5 No billing will be accepted without an approved Schedule of Values.

6.4.6 A detailed Schedule of Values must be provided within two (2) weeks of a contract being executed should your bid be accepted.

6.4.7 No escalation costs are permitted, pricing will remain firm through the project duration.

6.4.8 The Subcontractor is required to abide by the Wharton-Smith, Inc. safety program and OSHA standards. Excavation, confined space plans, and MSDS sheets will be required for all applicable work.

6.4.9 Subcontractor is responsible to develop and provide a site-specific safety plan for this scope of work.

A. Safety plan will list all potential hazards and competent persons who will be supervising the work.

6.4.10 Subcontractor will maintain an OSHA Certified competent person on site at all times while the work is conducted.

6.4.11 All Subcontractors will be required to follow security protocol of the City of Port Orange and Wharton-Smith at all times.

6.4.12 OSHA and the CMAR's safety standards will be followed at all times.

6.4.13 Proper PPE will be worn by any personnel on the jobsite, including but not limited to delivery drivers, startup and commissioning representatives, manufacturer's representatives, and other personnel.

6.4.14 Materials are to be released as required to maintain Schedule, but Subcontractor is to inform CMAR of material releases and deliveries. No item will be released for production without approval from the Engineer.

6.4.15 All equipment will be labeled and tagged in accordance with the Contract Documents.

6.4.16 Provide all management necessary to adequately support field activities and maintain the Project Schedule.

6.4.17 Fulltime and onsite supervision is required while any work by Subcontractor is being performed. If Subcontractor fails to do so, the CMAR will provide supervision and all costs will be back charged to Subcontractor. The Subcontractor's superintendent will be required to attend all requested progress, safety, scheduling, coordination, and quality control meetings. Meetings of other natures may be required as requested by Engineer, Owner, or the CMAR.

6.4.18 The Subcontractor will be required to coordinate with all other construction trades as required to complete this Scope of Work.

6.4.19 Anticipated (general) sequencing – Your crews may be interfacing with several other trades including mechanical, concrete, piping, and, testing agencies. Reasonable time provisions need to be made for coordination and time for these trades to complete their work.

6.4.20 All deliveries will be made between 7am-3pm M-F; all deliveries will be escorted onto the site by WSI. A 72-hour notice to WSI's Superintendent will be required prior to any deliveries.

6.4.21 The Subcontractor may not utilize any area of the project site for storage without approval from the CMAR. If the Subcontractor plans to utilize storage space, the Subcontractor will submit, to the CMAR, a site plan detailing the areas being requested for storage.

6.4.22 An emergency contact list will be provided by the Subcontractor. This list will include at least one point of contact that is available 24 hours a day.

6.4.23 Furnish appropriate Material Safety & Data Sheets (MSDS) and warranty documentation with shop drawings for approval.

6.4.24 Subcontractor is required to coordinate with all applicable authorities as required

6.4.25 The Subcontractor utilizing an Employee Leasing Company for Workers Compensation Insurance coverage will not be allowed to use any Subcontractor on the project (i.e. no third-party subs)

6.4.26 It is the sole responsibility of the Subcontractor to secure any and all tools, materials, and equipment stored on the site. Wharton-Smith, nor the Owner, will be responsible for any theft, vandalism, or damage to the Subcontractors property. The Subcontractor is responsible for all security measures required to secure their resources.

6.4.27 Subcontractor will provide temporary generators as needed and fresh drinking water for their employees. Subcontractor is only responsible for their work and personnel.

6.4.28 The Subcontractor is responsible to follow all site plan details and to adhere to all specifications applicable to the Scope of Work items above.

6.4.29 All hazardous material will be properly disposed of at an offsite location.

6.4.30 The Subcontractor will be responsible to utilize available dumpsters for debris and daily clean-up. All areas will be left clean at the end of each day.

6.4.31 A representative of the Subcontractor knowledgeable of the work will be present at weekly coordination meetings with the General Contractor.

6.4.32 Subcontractor is to provide Daily Reports.

6.4.33 A Superintendent (not Foreman) must be present at all times the Subcontractor's crews are onsite.

CGC055143
AISC CATEGORY II CERTIFIED

SCOPE OF ESTIMATE TO FURNISH AND ERECT THE FOLLOWING

11/12/24
PROJECT NAME: Port Orange Public Utilities Field Operations Facility
REF: DRAWINGS: See Attachment "B"
SPECIFICATIONS: 051200, 052100, 053100, 055500
ADDENDUM: None

We propose to furnish material and labor to fabricate and erect the following with freight allowed to the job site. All steel to be shop prime painted, U.N.O.

FURNISH AND ERECT:

- Steel joist w/ bridging per SJI
- Metal deck w/ Hilti pins-
- Steel columns w/ related attached items
- Steel beams w/ related attached items
- 8x8x1/4 & 4x4x3/16 steel tubes S102
- Continuous 5x 3 ½ deck angle A15/S301
- Continuous 6x4x5/16 deck angle w/ epoxy anchors J15/S301
- Continuous 5x 3 ½ deck angle N1/S301
- 3x3x1/4 bridging angle clips w/ epoxy anchors N8/S301
- 4x4x5/16 angle between outriggers N8/S301
- Continuous 3x3x1/4 edge angle N8/S301
- 2x2x3/16 angle braces from beam to joist N12/S301

FURNISH ONLY: UNLOADING BY OTHERS

- Anchor bolts for steel columns J8/S401
- 2x2x3/16 embed angle at OHD J15/S201 (Galv)
- Embeds for steel beams E1/S301
- Embeds for tubes E12/S301
- Embeds for joist N4/S301
- Continuous embed angle N8/S301
- (20) 6" interior bollards w/ typical metal cap A13/AS501
- Channel jambs at (8) OHD locations F9/A510
- (43) 6" exterior bollards (Galv)
- (5) additional 6" bollards (Galv. Ext.) per GC scope

MISCELLANEOUS STEEL - FURNISH AND ERECT:

- 2-line rail AS503- 1 ½ sch. 40 pipe core drilled approx. 175ft. (Galv.)
- Dumpster Gate AS501- ¼ x 2 plates w/ 5/32 round cross bar and Aluminum louvers (powder coated typical color) - excludes Ametco brand gate product.

EXCLUSIONS AND QUALIFICATION:

IN ADDITION TO THE FOLLOWING, SEE ATTACHMENT "A" FOR STANDARD EXCLUSIONS AND QUALIFICATIONS. Grates or Trench Frames, Temporary Shoring and Bracing, Steel items not shown or sized on referenced drawings, Field dimensions, Holes or Attachments for other trades, Cost of test or inspections, Attaching to light-gauge material, Fire Proofing, Stair Nosing, ***Touch Up Painting of Metal Deck or Steel***, Cutting holes in Roof or Floor, Standing Seam Metal Roof, Temporary Safety for Other Trades (We Include Temporary Safety for Our Work As It Relates to OSHA Requirements For Steel Erection), ***Metal Deck Over Light Gage***, Clear access to perform our work is required. Any demolition, relocating of existing items, cutting/patching of holes in floors wall, roof, etc. fireproofing and fireproof repair, ***standing seam metal deck, filling voids of metal deck w/ mineral wool J8/G032, coating of steel w/ Bituminous coating J12&E15/S201, wall mounted TV blocking G1&G7/A901***, ***AMETCO brand gate panels (providing one similar in design), Composite Cleanup.***

Base Bid: $ 266,820.00 (Furnish & Erect)

Allowance for 300ft. of 3x3x1/4 angle installed: $6,500.00

THIS QUOTE IS GOOD FOR 30 DAYS.

If a payment and performance bond is required, please add 1% to the numbers above.

SALES TAX INCLUDED- Insurance Coverage as follows; $2,000,000.00 Auto & General Liability.
If there are additional insurance requirements for this project, these need to be agreed upon prior to signing a contract. Fabco does not share our insurance deductibles, self-insured retentions, or our insurance policies.

Sincerely,

Tracy Thomas

ATTACHMENT "A"

STANDARD EXCLUSIONS & QUALIFICATIONS

STANDARD EXCLUSIONS

We exclude the following items on all quotations, unless otherwise noted to be furnished on our inclusion list. These standard exclusions are in addition to the items specifically excluded.

A. Grout and grouting
B. Touch-up or field paint or cleaning of welds
C. Field dimensions or surveys
D. Cost of testing or inspections
E. Demolition or dismantling of existing items or materials and fire proofing removal
F. Fasteners or supports for other trades, or holes in steel for other trades
G. Light gage metals, metal studs, c-joist or channel track
H. Aluminum, stainless, chrome, bronze, cast-iron or nonferrous materials
I. Remedial work necessitated by contact with rebar, pre-stress cables, embedded metals or hollow block while installing expansion anchors
J. Shims. shoring and temporary bracing or leveling of roof frames to compensate for roof slope
K. Nailer holes in embed items
L. Embed items at pre-cast materials
M. Deck accessories not specifically mentioned to be furnished
N. Architectural metals (Unless noted on scope of work)
O. Metal flashing, gutters, downspouts, gravel stops, etc.
P. Establishing elevations
Q. Stair nosing's
R. Materials not shown or sized on structural plans
S. Any item or material not specifically listed herein
T. Responsibility for the integrity of the structural design or stamping / sealing of drawings by Florida Registered Engineer
U. Onsite job trailer or facilities
V. Traffic control
W. Drilling into existing masonry walls
X. Furnishing of a trash dumpster
Y. Shop Applied Attachments for Perimeter Safety Cables
Z. Rebar and the attaching of rebar.
A.A. Fabco must have clear access to perform our work. Any demolition, relocation of existing items, cutting/patching of floors, walls, roof, etc. is specifically excluded from our scope of work.

STANDARD QUALIFICATIONS

A. In the absence of other instructions in the contract documents, the trade practices defined in the American Institute of Steel Construction Code of Standard Practice, as revised to date, govern the fabrication and erection of structural steel.

B. Any contract award based on this proposal will be contingent on mutual approval of the contract terms and Fabco Metal Products, LLC (FMP) exclusive approval of customer's credit and payment terms.

C. This proposal must be incorporated in its entirety and made part of the contract. This document will preside over any conflicting components of contract vs. proposal.

D. The General Contractor (GC) will furnish all necessary dimensions needed for the fabrication and location of roof opening frames prior to the start of steel fabrication. Should said information not be furnished prior to the start of fabrication, the GC will pay FMP all cost associated with out-of-sequence work including but not limited to shop overtime, extra freight, extra field mobilization, installation, and inefficiencies. If the roof frame information is not provided in a timely manner Fabco can install each frame once the roof deck is installed at a minimum cost of $800 per frame. (An executed change order will be required prior to this work being done.) Or erection may be delayed until roof information is received.

E. All unknown or to be verified dimensions will be addressed and provided by the GC or the drawing approver on the approval drawing submittals. Failure to do so will result in delays which FMP will not be held responsible.

F. Written change orders will be issued prior to the start of extra or out-of-scope work Field Superintendents directing extra work must have authority to commit the GC and must be authorized to verify and sign daily time sheets agreeing with extra reports. Mark up for change order work is 15% (10 % OH, 5% profit)

G. Additional drafting detailing work resulting in extra cost brought about either by the owner's directive, contractor's directive or shop drawing approval shall not be incorporated by FMP until formal price acceptance and notice to proceed is received.

K. Changes received at the job site must be negotiated prior to the start of work if possible. If an emergency exits that requires authorized extra work to start prior to negotiating an amount, the change will be negotiated as Soon as possible thereafter. All changes will be negotiated, incorporated in the contract and paid within 30 days of completion of the change.

I. No adjustments will be made to FMP's pay request without the prior approval and concurrence of FMP.

J. This proposal is based on the fabrication process starting after all detail drawings are complete and Approved.

K. This proposal is based on erection starting only after site has progressed to such a stage as to allow for continuous and uninterrupted erection of the entire job. Multiple mobilizations have not been priced into this estimate and will require a change order, if required.

L. Any problems encountered while installing expansion bolts (for instance hitting embedded materials such as rebar, prestress cables, hollow block, etc.) will be reported to the GC for remedial action by others

M. Painting is done in an ambient air facility and schedules may be extended because of high humidity or cold temperatures. FMP will not be held liable due to weather related delays

N. FMP's production schedules are based on a 1 week return of approval drawings. Late approval of drawings will result in rescheduling of fabrication.
O. GC to furnish anchor bolt survey to FMP prior to start of erection. Any errors discovered in the anchor bolt placement will be reported to the GC for remedial action by others.
P. Embedded items and column footings shall be made ready for use by the GC prior to steel placement. They shall be free of concrete, mortar, etc. and shall be clean, straight, oiled and have threads preserved. Anchor bolt nuts shall be set at proper elevation by GC prior to erection start.
Q. GC will make available and continuously maintain roadways necessary for access to the job site and work area. Access to work shall be provided for tractor-trailers, mobile crane, light trucks, welding equipment, etc. in such a manner that rough terrain equipment is not necessary.
R. Adequate site storage and shake out area will be provided by GC
S. This proposal is based on FMP being paid for stored materials on-site and off-site. Bills-of-sale and insurance certificates will be provided.
T. Final retainage is due 30 days after completion of steel work, not after substantial completion of the entire general construction package.
U. Off-loading of furnish and deliver only items is the sole responsibility of the GC
V. This proposal is based on the following erection sequence and crane size: **one move in;**
W. All items will receive a shop coat of Gray Oxide Paint; unless noted otherwise in scope of estimate. Galvanized items will not receive prime painting.
X. Pricing must be confirmed by FMP prior to acceptance of order and material must ship within 90 days of order or order may become subject to escalation.
Y. The joist company will provide signed and sealed calculations in lieu of signed and sealed shop drawings after approval drawings are received.
Z. Delivery dates are predicated upon mill rolling schedules.

INDUSTRIAL STEEL SOUTH
4080 Pines Industrial Ave.
Rockledge, FL 32955

Phone: 321-636-6511

Date: 11/12/2024 Estimate: #24104

To: Wharton-Smith
Attn: James Manyette

Re: Port Orange Public Utilities Field Ops Building

Industrial Steel South is pleased to offer its quote for material and labor to fabricate, deliver and install steel on the above referenced project per the scopes of work listed below. Our scope and pricing is based on the bid docs.
Drawings Dated: 09/30/2024
Specifications: 051200, 052100, 053100, 055000
All Interior Materials to be Tnemec Series 10, All Exterior Materials to be Tnemec "90-97 Tneme-Zinc" u.no.

Structural Steel Furnish and Install:

- **Structural Steel**
  Columns
  W Beams
  HSS Beams
  Perimeter Angle
  Bottom Chord Bracing
  Deck Bridging (See J15/301)
- **Miscellaneous Steel**
  Qty. 1 Double Swing Dumpster Gate (Exclude Aluminum Louvers)
  ± 180 LF 2-Line Railing at Street Sweeper Ramp
- **Joist**
- **Metal Deck**

Furnish Only Items:

- Anchor Bolts
- Embeds for Structural Steel Only
- 300 LF L3x3x1/4 Allowance
- Angle at Coiling Overhead Doors
- Steel Channel at Overhead Doors
- Qty. 6 6" Sch40 Pipe Bollards at Dumpster Gate
- Qty. 6 6" Sch40 Pipe Bollards at Mechanical Yard Enclosure
- Qty. 20 6" Sch40 Pipe Bollards w/ Base Plate at Overhead Doors (Hilti Kwik Bolt 3 Stainless Steel Expansion Bolts) (Contractor may allow alternative for lower Pricing)
- Qty. 24 6" Pipe Bollards at PEMB Building Exterior
- Qty. 4 6" Pipe Bollards at Street Sweeper Ramp
- Qty. 2 6" Pipe Bollards at Granular Storage

Industrial Steel South is pleased to offer its lump sum price of **$304,950.00**
7 % tax has been included

Specific job exclusions:

- Payment and Performance Bond (Bond Rate ±1% if Required)
- Owner Direct Purchase (ODP ±1% if Required)
- Third Party Testing and/or Inspections
- Design and/or Engineering Calculations
- Surveys and/or Surveying
- Permits and/or Permitting
- Grout and/or Grouting
- Light Gauge Metal Framing, Metal Deck, and/or Attachments
- Any Finish Other Than Standard One Coat Shop Prime – u.n.o.
- Photo Luminescent, Intumescent, Bituminous, and/or Cold Tar Coatings
- Fireproofing
- Holes in Steel for Other Trades
- Anchors and/or Hardware for Materials Supplied by Others
- Tilt Panel Embeds (panel to footer/panel to panel) – u.n.o.
- Safety Cable and/or Temporary Barriers
- Aluminum and/or Stainless Steel – u.n.o.
- Cutting of Deck Openings and/or Deck Closure Strips
- Vierendeel Openings in Beams and/or Joist Webbing
- Trench Drain Grates
- Details and/or Sections Not Shown on Drawings
- Materials Not Shown and/or Sized on Drawings
- Any Item Not Listed

Qualifications:

- The price quoted is valid for (30) calendar days.
- Changes to availability in supply that affect the project schedule are subject to review/approval of additional cost to utilize alternatives to maintain project schedule.
- Joist / Deck: Based on SJI/SDI standards. Upon procurement of joist /deck, delivery will dictate dates to be coordinated with the project schedule. Any changes to the project schedule may result in additional costs, and/or delays for any of the following: additional mobilizations to unload, off-site unloading and reloading, off-site storage, and/or additional freight/delivery fees.
- ISI South lump sum price is based on all work to be accomplished during a normal (40) forty-hour workweek, without the necessity of overtime, shift or weekend work.
- ISI South is not responsible for acts of nature and/or associated delays of such to the schedule.
- ISI South will not work overtime due to weather related delays without written authority prior to start.
- Pricing assumes clear and unobstructed access to work area.
- Quote based on access to perimeter as well as interior of the building footprint as needed for erection.
- Crane paths, roads, and related site work to be by others and maintained during erection.
- Pricing assumes adequate lay-down area and in close proximity throughout entire duration of project.
- Welding per AWS D 1.1
- All connections (u.n.o). Shall be snug tight using A325 bolts.
- Adequate dumpsters and toilet facilities to be provided by the GC.
- Temporary water (as required) to be provided by GC.
- Sufficient control lines and elevation benchmarks to be provided by the GC.

Please contact Billy Pope if you have any questions or comments regarding this correspondence.

Respectfully,

Christian Barbour

(2.2) WSI (Wharton-Smith Supplemental Instructions)

The Bidder acknowledges receipt of the following Wharton-Smith Supplemental Instruction(s):

WSI No.	1	Dated:	10-2-2024	WSI No.	5	Dated:	10-31-2024
WSI No.	2 & 3	Dated:	10-24-2024	WSI No.	6 & 7	Dated:	11-6-2024
WSI No.	4	Dated:	10-28-2024	WSI No.	8	Dated:	11-8-2024

(2.3) ASI (Architect's Supplemental Instructions)

The Bidder acknowledges receipt of the following Architect Supplemental Instruction(s):

ASI No.		Dated:		ASI No.		Dated:	

(2.4) Addenda

The Bidder acknowledges receipt of the following Addenda:

Addenda No.		Dated:		Addenda No.		Dated:	
Addenda No.		Dated:		Addenda No.		Dated:	

(2.5) Additional Acknowledgements

The Bidder acknowledges that Bidder has considered and included the requirements of the Subcontractor Bid Manual, dated October 17, 2024, and all other sections, in preparing this Bid.

The Bidder acknowledges time is of the essence and the Project will begin March 6, 2025, with Substantial Completion that must be achieved no later than June 30, 2026, and has included all costs for any required extended hours, extra shifts, weekend and holiday work which may be necessary to complete the Work on schedule.

This Bid will remain subject to acceptance for ninety **90** calendar days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Construction Manager.

The Bidder understands and agrees that the Construction Manager and/or Owner reserves the right to reject this Bid or any and all bids for the Project, and to waive minor irregularities or informalities in any bid and to award Alternates in any order that in the Construction Manager's judgment will be in the Owner's best interest.

The Bidder hereby acknowledges they are licensed to do business in the capacity represented by this Bid and as required by all governing jurisdictional authorities for all locations of the work and as required by the Contract Documents.

The Bidder hereby acknowledges reviewing and accepting without modification the Wharton-Smith, Inc. Subcontract Agreement and agrees to execute same if awarded the project or portion(s) of the Project.

Jeff,

Are the sills the same Cambria Quartz as the tops? I didn't see any other product listed in the finish schedule for the sills. The plans call for marble, but it says to refer to spec.

- Vertical Installation
- 24g
- Color: Graphite
- Color matching 24g trims at windows and CMU Sill detail
- 16g Hat Channel Furring 1-1/2”

Furnish and install associated flashings, trims, clips, sealants, etc…for a complete metal panel installation.

Lead Times:

1. Shop Drawings 4-5 weeks
2. Submittals 3-4 weeks
3. PAC-CLAD material 5-6 weeks

Job Specific Exclusions:

- Custom colors
- Any waterproofing, vapor barrier, underlayment, etc…
- Exterior sheathing
- Metal framing
- Insulation
- Any flashing required for curtainwall, doors, cement plaster, EIFS, etc..
- Interior finishes
- Canopy Framing
- Wall Panels at PEMB
- Metal Soffit
- Metal Fascia

The following assumptions have been made:

- Standard 7:00 AM – 5:00 PM work hours, 4-day week, 40-hours per week
- Open shop
- Job-site storage for at least one full pallet of panels
- Adequate ground access for lifts to all four sides during construction

BID PROPOSAL $134,850.00

Break-Out

Pac-Clad Flush Panel (300-35)……$67,650.00

Pac-Clad Precision HWP Panel (300-02)…….$67,200.00

PLEASE NOTE:

1) The construction industry is currently experiencing price volatility with steel, concrete and roofing products. Due to market fluctuations, the costs of these products are subject to sudden, significant changes and firm prices cannot be obtained from suppliers. In the event of an increase in the price of these products, subsequent to making this Proposal/Contract, the price set forth in this Proposal/Contract shall be increased to reflect all additional costs.

2) Commercial general liability – defect products/completed operations coverage, including bodily injury and property damage liability, does not apply to work that is included within the products/completed operations hazard; arises out of defective construction of all or any part of a **residential structure** and is reported to us more than 11 months after our work is deemed completed on the project. This limitation of coverage extends to all **habitational buildings**, as well as, common areas and appurtenant structures.

ADDENDUM TO BID PROPOSAL – TERMS & CONDITIONS

i. MEP trades, permitting, bonding, additional testing, liquidated damages, overtime, multiple mobilizations, and all other work, materials and conditions not defined above are specifically excluded from this Proposal/Contract.

ii. Enrollment cost or any additional cost related to participation in the "***Textura Construction Payment Management***" program or any similar construction payment management program is not included in this proposal/contract.

iii. The cost for any Job site specific drug testing is not included in this proposal/contract. This includes all hourly wages and transportation cost for each employee required to test. All cost for testing provided upon request. **Quality Metals, Inc. is a DFWP/EOE.**

iv. Job Specific Safety Orientation is included in this proposal for a period not to exceed one (1) hour of class time on the first day of mobilization. Any additional time required is not included.

v. This Proposal/Contract does **not** include labor for composite clean-up crews.

vi. This Proposal/Contract is based upon manufacturer's recommendations and industry standards.

vii. This Proposal/Contract is based upon the issuance and acceptance of a modified AIA Document A401 – 2007 or similar agreement.

viii. We acknowledge having reviewed **0** addenda associated with this project and scope of work quoted.

ix. Field measurements are required prior to ordering metal roofing and wall systems.

x. No materials will be ordered prior to our receiving approved submittals, shop drawings, color selection and executed contract agreement.

xi. This Proposal/Contract will be void ten (10) days after its original date.

xii. This Proposal/Contract is based upon standard work hours, Monday – Friday, 7:00 am - 3:30 pm with one (1) continuous mobilization. For after hours work, weekend work, or multiple mobilizations please inquire as these costs are not included in this offer.

xiii. All cost associated with an accelerated schedule for any reason other than delays directly related and caused by Quality Metals, Inc. are not included in this proposal. Should your project require an accelerated schedule including but not limited to overtime, weekends, second or third shifts, etc. please inquire.

xiv. General Contractor/Owner to provide the following, unless otherwise noted under scope of work:
   a. Solid, level site for use of standard handling equipment.
   b. Clear access to area of work.
   c. Trash receptacle.
   d. Electrical power.
   e. Permits

xv. Our standard one-year workmanship warranty applies to this Proposal/Contract.

xvi. Acceptance and/or use of this Proposal/Contract includes acceptance of all terms and conditions stated herein. Upon award of this project, this Proposal/Contract along with the Terms & Conditions shall be incorporated into the contract language for the project.

xvii. This Bid Proposal includes all Florida sales and use taxes on materials manufactured and incorporated into this project.

xviii. Our standard insurance coverages apply to this Proposal/Contract. Copy provided upon request.

Jeff,

Please find attached proposal for the Metal Wall Panel Systems.

Couple of notes:

1. The HWP Precision Series (Keynote 300-02) is only available in 24g steel in the “Graphite” color.
2. I’ve included furnish/installation of 16g Hat Channel behind both systems
3. I’ve included matching trims to adjacent finishes

Feel free to contact me with ant questions.

Awesome! Make sure you don't pick up the soffit material that falls under the roofer's scope.

I believe it is labeled M1 and M2 finish.
Panels / locations are called out by keynote 300-35 on the elevations.

Hi Blake,

I see where we solicited this one to you, but I never saw a response and don't see any indication from iSqft.
Any chance you can get me something for the ACM? We turn in our GMP to the owner on Friday, so I'd need it back by Thursday at the latest.

Currently I only have 1 number. Specs are attached as well.

Submitting a proposal for: **City of Port Orange Public Utilities Field Operations Facility - Port Orange, FL**

Foam Insulation

SOUTHERN FOAM INSULATION, INC. proposes to furnish and install FOAM INSULATION at the above referenced jobsite for the following lump sum: **Labor and Material Complete**

8" CMU AP Tag Wall Insulation:

Injected Masonry Foam Insulation (R-4.63 per inch/STC-52) applied to the ungrouted cells of the 8.0 inch exterior CMU walls to the conditioned space from finished floor to truss bearing as detailed in Specs 07 21 20 - 2.1, plan sheet G031 as wall type XA, F in rooms with the AP tag as shown on plan sheet A121A….....$4,180.00

Option/Add Exterior Wall CMU Insulation:

Specification 07 21 20.3.2.A.1 calls for all exterior CMU walls to be filled. Wall types F and XA only state in walls with AP tags. If all exterior walls need to be included in the above application, add….....$4,350.00

NOTE: Pricing is reflective of most recent material pricing from the manufacturer.

NOTE: All lifts and hoisting of material has been factored into the scope of this proposal.

NOTE: Penetrations to be foam sealed by respective trades.

NOTE: Includes protection of adjacent surfaces in sequence.

NOTE: Protection of any pipe, conduit, ducts, etc (any other MEP or framing work, including fire pipe) is not included in the scope of this proposal.

NOTE: A sequencing meeting will be required at time of contract.

NOTE: Permit Set of plans dated 9.30.2024 Reviewed.

NOTE: WSI #1 - #7 Reviewed.

NOTE: Pricing includes up to one (1) mobilization(s) to complete entire scope. Pricing excludes payment and performance bonds and any OCIP/CCIP costs.

Initial: _____

NOTE: Pricing is based on this document becoming an Exhibit, Attachment or being incorporated into the Contract Documents, including but not limited to the attached Terms and Conditions.

NOTE: Clips, supports, hangars, sleeves and other attachments to the substrates to receive spray applied foam, fiber or thermal insulation coatings may be placed by other trades prior to the application of insulating materials, however, the installation of ducts, piping, conduit or other suspended equipment must not take place until the application of the insulating materials is complete in that area. Alterations to this sequencing / scheduling will result in additional charges for reduced production rates of up to $1,000/day.

This price is lump sum for all labor and materials. This price is good for thirty - (30) days from date of quote.

Acceptance authorizes Southern Foam Insulation, Inc. to purchase materials to prepare for work.

PLEASE SIGN AND RETURN A COPY OF ALL PAGES OF THIS PROPOSAL

If you have any questions, please feel free to call.

Respectfully submitted by:

George Helmer

Proposal Accepted by: Date: _____

Signature: _____

Print Name/Title: _____

Company Name: _____

Estimators:
SOUTHERN FOAM INSULATION, INC. proposes to furnish and install INSULATION at the project listed with the scopes bid on page 1 of this proposal as per the following qualifications:

A. Scope of work:
1. SPRAY FOAM INSULATION and/or BATT INSULATION is installed after all FRAMING INSPECTIONS COMPLETED. SPRAY FOAM INSULATION is applied at a nominal thickness.
2. MASONRY FOAMED-IN-PLACE INSULATION is installed after all masonry and structural concrete is in place and any holes that may allow foam to escape are sealed up.
3. RETROFOAM WALL FOAM is installed in existing frame walls when scheduled between SFI and the general contractor.
4. VERMICULITE INSULATION is installed after all structural filled cells are poured including the beams. All wires and pipes that penetrate the block wall should be completed prior to our arrival with their entry holes being sealed to avoid perlite loss.
5. RIGID INSULATION is installed when appropriate to job schedule per plans and specs.

B. Applications:
1. SPRAY FOAM INSULATION/MASONRY FOAMED-IN-PLACE INSULATION/RETROFOAM WALL INSULATION/ RIGID INSULATION are all Thermal / Sound insulations and may be used in interior or exterior walls.
2. BATT INSULATION is a thermal insulation and may be used in interior or exterior walls.
3. PERLITE INSULATION is typically used to increase the fire rating of a wall system., as well as being Thermal Barrier.
4. Some of our applications of foam require us to drill holes in block walls or thru drywall. We will patch our injection sites through the concrete but are not responsible for finish work (painting, sanding drywall, etc) or drywall patch and/or repair (painting, sanding drywall, etc).
5. Our installer will take adequate measures to protect surrounding. Express any special concerns you may have when job scheduled.

C. Jobsite Requirements:
1. The project must have all roof/wall/subfloor areas to be insulated structurally complete.
2. A dumpster must be provided by others for our use. The concrete slab or wood floor with joists must be in place.
3. There must be sufficient space for our rolling scaffolding, scissor lift to be moved along the inside perimeter of the building.
4. The exterior of the building must be graded sufficiently so that our vehicles can drive to within twenty feet (20') of the building.
5. SOUTHERN FOAM INSULATION, INC. is not liable for damage to equipment or building finishes due to wall/roof /subfloor penetrations made by others.
6. During SPRAY FOAM installation, other workers and building/home occupants should vacate the premises. Re-entry should be restricted until the product has finished curing, our manufacturers recommend 24 hours of air exchanges after application for the two-component high pressure professional SPF system for worker re-entry without the use of PPE and for re-occupancy by residents and other building occupants.

D. Conditions
1. All agreements are conditional to access the job during normal business working hours Monday – Friday 7am – 5pm, upon strikes, accidents, and proper working conditions, acts of government, acts of god, availability of specified materials, or other delays or conditions beyond our control. All work to be completes with 1 (one) mobilization unless more are specifically listed on quote.
2. No back charges, extras, pro-rated expenses or deduction charges are to be made against SFI unless specifically agreed to in writing prior to incurring such expense.
3. Any areas that may require a second trip to complete for any reason out of control of SFI may be billed and added to the contract. Owner/ Builder/ Owner Rep. must inspect and notify SFI Inc. Prior to completion of work and while on site to any requested punch-out, return trips will be charged on a time and material bases and added to the original contract.
4. Title to the material shall remain with SFI Inc. whether installed or not until 100% paid.
5. Where applicable purchaser will receive or (permit us to receive) near the site of work and properly protect from damage the material and equipment required to complete contract.
6. Any reference to thermal values or other product data reflects test done by manufacture.
7. SFI Inc. shall not be held responsible for foam installed in cells to have concrete.
8. Owners authorize SFI Inc. to drill walls in from inside or outside (SFI to decide for best access to install wall foam) to complete work.
9. Adding or changing the insulation may require adjusting the AC system such as adding a dehumidifier or a variable speed motor.
10. SFI Inc. has not completed a through inspection of the home or the AC system. Our inspection is to verify proper access and confirm what type of insulation may already be in the building.

Initial: _____

E. Payment:

1. Full payment is due per terms on proposal or invoice or via contract with General Contractor**.** We accept payment by cash, check, credit card (3.5% convenience fee applies), bank wire or ACH.
2. Deposit will be non-refundable unless job is cancelled prior to mobilization. If job isn't cancelled prior to mobilization, a mobilization fee may be assessed.
3. The party owing money hereunder agrees to pay SOUTHERN FOAM INSULATION, INC.'S reasonable attorneys fees and costs incurred to collect amounts due hereunder.
4. Interest at the rate of twelve percent (12%) per annum will be charged on all amounts unpaid after said thirty -(30) day period from the due date until paid.

F. Additional Charges:

1. If specified, an infrared thermograph inspection can be performed at an additional charge.
2. If colored mortar is required, it shall be supplied and mixed by others. SOUTHERN FOAM INSULATION, INC. does not assume responsibility for improperly mixed/matched mortar.
3. Thermal and Ignition coating are not included unless specifically listed.

G. Contracts and Commencement of Work:

1. The terms and conditions of this proposal will become a part of this or any agreement. Any additional costs incurred for special coverage on insurance certificates will be passed along to company/personal requiring such. Cost of Bond is not included unless otherwise noted.
2. Any variations of this proposal must be expressed in writing and agreed upon by mutual parties.
3. This proposal guarantees the quoted price for a period of thirty - (30) days from the above date.
4. Acceptance of all pages of this proposal must be received by SOUTHERN FOAM INSULATION, INC. prior to its commencement of work.
5. SOUTHERN FOAM INSULATION, INC. requires a minimum of five (5) days lead-time prior to its commencement of work.
6. Scheduling adjustments may have to be made due to inclement weather.
7. The above-mentioned requirements are subject to SOUTHERN FOAM INSULATION INC.'S discretion.

H. Personal Guaranty:

By signing this Personal Guaranty, the Property/Project Owner(s) fully, unconditionally, and irrevocably personally guarantees and thereby agrees be absolutely personally responsible for the full and prompt payment of all amounts due or recoverable under the Subcontract Agreement between the General Contractor and Subcontractor including, but not limited to, interest, late fees, attorneys' fees, and costs. A copy of the Subcontract Agreement has been provided to or is otherwise available upon request to the Project/Property Owner. The Property/Project Owner(s)' guarantee herein represents a full recourse personal guaranty by the Guarantor of the General Contractor's payment obligations under the Subcontract Agreement. Property/Project Owner(s) expressly waive notice of nonpayment, protest, and notice of protest with respect to the indebtedness covered by this guaranty. Further, if the General Contractor defaults on the payment of amounts due under the Subcontract Agreement, it shall not be necessary to enforce this Guaranty against and enforce payment by Property/Project Owner(s) for the Subcontractor to first pursue or exhaust any other remedies it may have. I further agree to pay any costs of collection, including attorney's fees incurred by the Subcontractor in connection with the enforcement of this Guaranty.

OFFERING MASONRY AND SPRAY FOAM INSULATIONS

DATE: 11-21-2024

RE: Public Utilities Field Operations Facility - Port Orange, FL
TO: Wharton Smith, Inc.
ATTN: Jeff Bridges

PROPOSAL

****

Tailored Foam is "Florida's *Original* Foam Insulation Contractor" - Since 1986

TAILORED FOAM OF FLORIDA, LLC. (TFOF) proposes to furnish and install the following insulations at the above-mentioned project.

A. GERNAL NOTES:

1. Spray Foam Insulation is installed at a nominal (+/- ½") as required to meet the specified thermal requirements. If SPF is applied in a metal stud cavity, each stud must be attached to the substrate every 2' vertically (with 2lb closed cell SPF), and every 5' vertically (with .5lb open cell SPF). A temporary horizontal brace must be placed every 5' vertically to the face of the metal stud, to keep the studs plumb and square. The temporary bracing & fasteners are not included in TFOF's scope. No prescriptive barriers (ignition or thermal) are included unless noted below.

2. CORE-FILL 500 Masonry Insulation will be installed in all masonry cells as listed per pricing/scope section F after all structural concrete is in place thru a 7/8" hole. **TFOF** will then patch our holes or strike the mortar joints to match existing conditions (not responsible for matching colored mortar). CORE-FILL 500 Masonry Insulation is an acoustical and thermal foam insulation product. It should not be used for increasing the fire resistance rating of concrete masonry units

B. JOBSITE REQUIREMENTS:

A dumpster must be provided by others for our use. **TFOF** will not be held liable for damage to equipment, stock or building finishes due to roof penetrations that are not properly sealed.

C. PAYMENT:

Payment in full is due within thirty (30) days from the invoice date. A processing fee of 3% will be charged for credit card payments.

D. CONTRACTS AND COMMENCEMENT OF WORK:

The items listed in this proposal will become a part of any future agreement. This proposal guarantees the quoted price for fourteen (14) days from the above date. TFOF requires a minimum of fourteen (14) days lead time prior to its commencement of work. *Any insurance requirements in excess of "additional insured" are subject to an extra fee*. Cost of bond or permit is not included unless otherwise noted.

E. Terms and Conditions:

1. The General Contractor is to provide clear access to the work area, and accessibility for our trucks.
2. Unless equipped with proper respiratory protection, no one may enter the work area during and immediately after spraying SPF.
3. Foam repairs due to damage by other trades will be fixed at an additional cost to contractor.
4. Mechanical engineer must properly size equipment when using SPF.
5. **Pricing based on working 7:00am - 5:00pm, Mon - Fri. $500.00 additional per day otherwise.**
6. **Pricing is based on installing from the inside face of the exterior wall unless otherwise noted; it is assumed the work is to be done from a completed concrete floor slab.**
7. **If, during the performance of this contract, the price of material significantly increases prior to commencement of work, through no fault of Tailored Foam of Florida, LLC., the price of material shall be equitably adjusted by an amount reasonably necessary to cover any such significant price increases. As used herein, a significant price increase shall mean any increase in price exceeding 3% experienced by Tailored Foam of Florida, LLC, from the date of the original proposal.**

OFFERING MASONRY AND SPRAY FOAM INSULATIONS

F. PRICING: Port Orange Public Utilities Field Operations Facility

Base Bid			
Area Insulated	**Type of Insulation**	**Nominal (+/-1/2") Thickness**	**Price**
Option 1) All Ext CMU			
Mobilization(s) One (1)			**Included**
Exterior Block Walls	**Core-Fill 500**	**8" CMU**	**$4,677.00**
Option 2) AP Tagged Block Walls			
Mobilization(s) Two (2)			**Included**
AP Tagged Block Walls	**Core-Fill 500**	**8" CMU**	**$8,377.00**
Roof Deck @ PEMB column lines 9-14 & J-M	**Open Cell**	**R-30 8.25"**	**$31,577.00**
Thermal Barrier			**$10,127.00**
Lift Equipment			**Included**
Mobilization – One (1)			**Included**
Base Bid Total			**$54,758.00**

G. **JOB NOTES:**

- *The items listed in this proposal will become a part of any future agreement*. **This proposal guarantees the quoted price for** fourteen (14) **days from the above date**. TFOF requires a minimum of fourteen (14) days lead time prior to its commencement of work. *Any insurance requirements in excess of "additional insured" are subject to an extra fee*. Cost of bond or permit is not included unless otherwise noted. Tailored Foam of Florida, LLC. is not responsible for any third-party testing or inspections. Any tinting of thermal barrier is at an additional cost; any painting to be provided by others.

Above Price is based off drawings dated 9-30-2024.

- Spray Foam must be an integral part of the schedule timeline. It cannot be treated as standard insulation.
- **Additional** mobilizations will be at a cost of **$500.00** for CORE-FILL 500 and **$1,800.00** for Spray Foam Insulation.
- For Spray Foam Insulation - GC is to insure that sprinkler heads are installed with proper clearance based on the thickness of the spray foam insulation to be applied.
  - The interior surface of the spray foam insulation will become the surface for sprinkler head placement and code requirements to be measured from.
- Pricing listed above is budgetary and TFOF must review final drawings before entering a contract.
- Additional protection of PEMB structural components and finishes are not included and are to be provided by GC if required. If a level of protection must be provided this will be at an additional negotiated cost.

Sincerely,

Bob Egbers Commercial Sales

(2.2) WSI (Wharton-Smith Supplemental Instructions)

The Bidder acknowledges receipt of the following Wharton-Smith Supplemental Instruction(s):

WSI No. 1	Dated: 10/22/24	WSI No. 5	Dated: 10/31/24		
WSI No. 2 & 3	Dated: 10/24/24	WSI No. 6	Dated: 11/4/24		
WSI No. 4	Dated: 10/28/24	WSI No. 7	Dated: 11/6/24		
		8	11/8/24		

(2.3) ASI (Architect's Supplemental Instructions)

The Bidder acknowledges receipt of the following Architect Supplemental Instruction(s):

ASI No.	Dated:	ASI No.		Dated:	

(2.4) Addenda

The Bidder acknowledges receipt of the following Addenda:

Addenda No.		Dated:		Addenda No.		Dated:	
Addenda No.		Dated:		Addenda No.		Dated:	

(2.5) Additional Acknowledgements

The Bidder acknowledges that Bidder has considered and included the requirements of the Subcontractor Bid Manual, dated October 17, 2024, and all other sections, in preparing this Bid.

The Bidder acknowledges time is of the essence and the Project will begin March 6, 2025, with Substantial Completion that must be achieved no later than June 30, 2026, and has included all costs for any required extended hours, extra shifts, weekend and holiday work which may be necessary to complete the Work on schedule.

This Bid will remain subject to acceptance for ninety **90** calendar days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Construction Manager.

The Bidder understands and agrees that the Construction Manager and/or Owner reserves the right to reject this Bid or any and all bids for the Project, and to waive minor irregularities or informalities in any bid and to award Alternates in any order that in the Construction Manager's judgment will be in the Owner's best interest.

The Bidder hereby acknowledges they are licensed to do business in the capacity represented by this Bid and as required by all governing jurisdictional authorities for all locations of the work and as required by the Contract Documents.

The Bidder hereby acknowledges reviewing and accepting without modification the Wharton-Smith, Inc. Subcontract Agreement and agrees to execute same if awarded the project or portion(s) of the Project.

PROJECT: Port Orange Public Utilities Field Operations Facility
ARCHITECT: Schenkel-Shultz
DRAWINGS: Architectural Drawings
SPEC SECTIONS: See below
ADDENDA: None

ALL MATERIAL, LABOR, EQUIPMENT & SUPERVISION TO INSTALL THE FOLLOWING:

- **Standing Seam Metal Roof System:** Berridge MFG., Double-Lock Zee-Lock panel system, 24 gauge, Kynar finish – standard color.
- Flashing, trim, gutters, and downspouts to match roof panel material, finish, and color.
- Fasteners, sealants, and continuous clips.
- Soffit panel to match roof panel material, finish, and color.
- Rigid PolyISO insulation per plans.
- 5/8” coverboard per plans.
- Underlayment; 40 mils., self-adhesive, modified Bitumen.
- Finish Warranty twenty (20) years Berridge MFG.
- Weathertightness twenty (20) years Berridge MFG.
- Weathertightness two (2) years Installer/ASM.

NOT INCLUDED: Pre-Engineered metal building structure / framing / assembly / wall panels, roof deck, trusses/joist, wall/siding panels, lightning protection, hatches, heavy gauge framing, Payment & Performance bond (2%), Item(s) not listed above, Davis Bacon Wage Rates unless otherwise noted above.

BASE BID One (1) Unit **$1,131,750.00**
For the sum of: One Million One Hundred Thirty-One Thousand Seven Hundred Fifty and no/100

THIS PROPOSAL WILL REMAIN IN EFFECT FOR A PERIOD OF 30 DAYS. THIS BID PROPOSAL WILL BE SUBJECT TO AND CONDITIONED UPON EITHER USAGE OF THE AIA OR AGC SUBCONTRACT OR A SUBCONTRACT FORM OTHER WISE ACCEPTABLE TO ARCHITECTURAL SHEET METAL, INC. SUBJECT TO TERMS AND CONDITIONS, SEE ATTACHED.

Michael Gulla
Estimator

Architectural Sheet Metal, Inc.
SAFETY.QUALITY.TIMELY

ASM, INC. COMMERCIAL TERMS AND CONDITIONS (REV 10/2021)

1. Entire Agreement: This Proposal and Contract shall be the entire agreement between the OWNER AND/OR GENERAL CONTRACTOR and ARCHITECTURAL SHEET METAL, notwithstanding any previous communications and negotiations, whether oral or written, there being no covenants or agreements, inducements, guarantees, warranties or considerations, other than as set out herein. Each provision of this Agreement shall be construed as if both parties mutually drafted this Agreement. If a provision of this Agreement (or the application of it) is held by a court or arbitrator to be invalid or unenforceable, that provision will be deemed separable from the remaining provisions of the Agreement, will be reformed/enforced to the extent that it is valid and enforceable, and will not affect the validity or interpretation of the other provisions or the application of that provision to a person or circumstance to which it is valid and enforceable. Headings are for convenience only and do not affect interpretation. Acceptance shall be complete and the contract binding when signed by the OWNER AND/OR GENERAL CONTRACTOR or his representative and an authorized representative of ARCHITECTURAL SHEET METAL. Any changes in this Proposal and Contract must be approved in writing by an officer of ARCHITECTURAL SHEET METAL. If OWNER AND/OR GENERAL CONTRACTOR cancels this Agreement prior to the start of work, but not within the timeframe allowed by any/all applicable statutes or laws pertaining to cancellation, OWNER AND/OR GENERAL CONTRACTOR is liable for 15% of the total Agreement price as liquidated damages because ARCHITECTURAL SHEET METAL is unable to accurately measure its damages for the cancellation of this Agreement. By executing this Agreement, OWNER AND/OR GENERAL CONTRACTOR and ARCHITECTURAL SHEET METAL agree that the liquidated damages amount is fair and is not a penalty.

2. Payment: All sums not paid when due shall bear interest at the rate of one and a half percent (1 ½%) per month (or the maximum legal rate permitted by law if less). If OWNER AND/OR GENERAL CONTRACTOR does not make payment when due, OWNER AND/OR GENERAL CONTRACTOR agrees to pay all costs and expenses incurred in the collection of any unpaid sums, including reasonable attorney's fees. Punch items shall not be cause to delay the OWNER AND/OR GENERAL CONTRACTOR's payment to ARCHITECTURAL SHEET METAL. In addition, if a punch list exists, OWNER AND/OR GENERAL CONTRACTOR should pay 95% and withhold 5% until punch work is completed. If at any time OWNER AND/OR GENERAL CONTRACTOR fails to pay ARCHITECTURAL SHEET METAL in accordance with this Agreement, then ARCHITECTURAL SHEET METAL may, at its sole discretion, suspend shipments, performance of work, and/or warranties until full payment is made, and/or terminate this Agreement. If a suspension occurs that is not caused solely by ARCHITECTURAL SHEET METAL, the Agreement sum shall be increased by the amount of ARCHITECTURAL SHEET METAL'S costs of shut-down, delay, and start-up. If there is an increase in the actual cost of the labor, materials, fuel charges, or manufacturer's warranty charged to the ARCHITECTURAL SHEET METAL in excess of 5% subsequent to making this Agreement, the price set forth in this Agreement shall be increased without the need for a written change order or amendment to the contract to reflect the price increase and additional direct cost to the ARCHITECTURAL SHEET METAL. ARCHITECTURAL SHEET METAL will submit written documentation of the increased charges to the OWNER AND/OR GENERAL CONTRACTOR upon request. As an additional remedy, if the actual cost of any line item increases more than 10% subsequent to the making of this Agreement, ARCHITECTURAL SHEET METAL, at its sole discretion, may terminate the contract for convenience.

3. Delays: Neither ARCHITECTURAL SHEET METAL nor OWNER AND/OR GENERAL CONTRACTOR shall be responsible for loss or damage, whether actual or consequential or delays caused by circumstances beyond its control, including, without limitation, weather conditions, labor disputes and unavailability of materials, acts of God, accidents, pandemic, COVID-19 or viruses/illnesses, fire, vandalism, federal, state or local law, regulation or order, civil unrest, strikes, riots, protests, jurisdictional disputes, failure or delay of transportation, shortage of or inability to obtain materials, equipment or labor, changes in the work . However, if OWNER AND/OR GENERAL CONTRACTOR or anyone performing work at their direction interferes with or interrupts ARCHITECTURAL SHEET METAL in the performance of its work during work hours, it is agreed that the OWNER AND/OR GENERAL CONTRACTOR shall pay all extra expenses involved in making up the time lost, including, but not limited to, overtime and/or idle time and/or extra traveling expenses caused thereby.

4. Extra Work: Any work which is performed with OWNER AND/OR GENERAL CONTRACTOR's knowledge or consent and which is not included on the reverse side or attached shall be deemed as extra and shall be paid for accordingly. Unless specifically included any work to repair or replace the structural deck by reason of rotten wood, or other conditions making it unsuitable for supporting the roofing materials, shall be extra work.

5. Pre-Existing Conditions, Mold, Lead Based Paint and Asbestos: ARCHITECTURAL SHEET METAL shall not be responsible or liable for damages resulting from pre-existing conditions; to include mold, lead-based paint, asbestos and other conditions such as deteriorated roofing or rotten wood, which existed prior to ARCHITECTURAL SHEET METAL's commencement of work. While ARCHITECTURAL SHEET METAL shall seek to minimize any such damage, it is understood where such deteriorated conditions exist, the normal performance of work may result in damage. This Proposal and Contract is based upon the assumption by ARCHITECTURAL SHEET METAL that materials to be removed by ARCHITECTURAL SHEET METAL do not include or contain asbestos, lead based paint or other toxic materials and that asbestos-containing, lead containing, or other toxic materials will not be encountered or disturbed during the course of performing the work. If materials containing asbestos are encountered or mold, lead-based paint or other such conditions are present when performing the work, ARCHITECTURAL SHEET METAL shall not be responsible or liable for any claims associated with such lead-based paint, asbestos, mold or other pre-existing conditions whether those claims arise in law, equity, contract, warranty, tort, or federal or state statutory claims and OWNER AND/OR GENERAL CONTRACTOR agrees to hold harmless and indemnify ARCHITECTURAL SHEET METAL against any such claims or losses resulting from lead-based paint, asbestos, mold or other pre-existing conditions found on OWNER AND/OR GENERAL CONTRACTOR's premises or should mold appear at any time after work is completed.

6. Warranty: Unless otherwise provided: **THERE ARE NO EXPRESS OR IMPLIED WARRANTIES WHATSOEVER INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.** ARCHITECTURAL SHEET METAL's work will be warranted by ARCHITECTURAL SHEET METAL in accordance with its standard LIMITED WORKMANSHIP WARRANTY FOR COMMERCIAL ROOFING, which is made a part of this Proposal and Contract and incorporated by reference. A copy of ARCHITECTURAL SHEET METAL's LIMITED WORKMANSHIP WARRANTY FOR COMMERCIAL ROOFING, is attached or, if not, will be furnished upon request. ARCHITECTURAL SHEET METAL SHALL NOT BE LIABLE FOR SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES. The acceptance of the Proposal and Contract by the OWNER AND/OR GENERAL CONTRACTOR signifies his/her agreement that this warranty shall be and is the exclusive remedy against ARCHITECTURAL SHEET METAL. A manufacturer's warranty shall be furnished to OWNER AND/OR GENERAL CONTRACTOR is a manufacturer's warranty is called for on the face of this Proposal and Contract. It is expressly agreed that in the event of any defects in the materials furnished pursuant to this Proposal and Contract, OWNER AND/OR GENERAL CONTRACTOR shall have recourse only against the manufacturer of such material. . If there is a breach in the applicable manufacturer's warranty according to the stated terms and conditions of said warranty, ARCHITECTURAL SHEET METAL'S warranty is simultaneously void and all of ARCHITECTURAL SHEET METAL'S responsibility/liability to correct, supplement, rectify, fix, etc. any/all issue(s) as a result of such breach. All warranties/guarantees provided by ARCHITECTURAL SHEET METAL, if any, shall be deemed null and void if OWNER AND/OR GENERAL CONTRACTOR fails to strictly adhere to the Agreement's payment terms; warranties only issued upon payment in full.

7. Access to Work and Working Hours: OWNER AND/OR GENERAL CONTRACTOR shall grant free and open access to work areas for workmen and vehicles and shall allow areas for storage of materials and debris. OWNER AND/OR GENERAL CONTRACTOR agrees to keep driveways, parking lots, and other work sites, clean and available for movement and parking of trucks during normal work hours. ARCHITECTURAL SHEET METAL shall not be responsible for reasonable wear and movement of trucks, men, equipment, materials, debris, etc. ARCHITECTURAL SHEET METAL disclaims any and all liability for the grading, leveling, slope or construction of the roof deck, the roofing system, structure and/or appurtenances This Proposal and Contract is based upon the performance of all work during ARCHITECTURAL SHEET METAL's regular working hours, and extra charges will be made for all work performed other than during ARCHITECTURAL SHEET METAL's regular working hours, if required by OWNER AND/OR GENERAL CONTRACTOR.

8. Working Conditions: ARCHITECTURAL SHEET METAL shall not be required to install its material either (a) under conditions contrary to manufacturer's instructions; (b) under adverse weather conditions; (c) under conditions which are generally unacceptable in the trade; and (d) where jobsite conditions are not suitable for proper installation of materials. ARCHITECTURAL SHEET METAL shall not be required to provide or be responsible for the installation erection of temporary weather protection facilities.

9. Labor and Materials: ARCHITECTURAL SHEET METAL agrees to furnish labor and materials either directly or through subcontractors retained by ARCHITECTURAL SHEET METAL to complete the work as specified on face of Proposal and Contract attached.

10. Insurance: Worker's Compensation, General Liability and such other insurance as is required by law, will be carried by ARCHITECTURAL SHEET METAL to complete the work as specified, on the Proposal and Contract attached. OWNER AND/OR GENERAL CONTRACTOR shall purchase and maintain builder's risk and property insurance, including the labor and materials furnished by ARCHITECTURAL SHEET METAL, covering fire, wind storm, extended coverage, malicious mischief, vandalism and theft on the premises to protect against loss or damage to material and in-place work until the job is completed and accepted by the OWNER and/or GENERAL CONTRACTOR.

11. Utilities: OWNER AND/OR GENERAL CONTRACTOR shall furnish at no cost to ARCHITECTURAL SHEET METAL all required electric and/or water service.

12. Title to Property: Title of this property is recorded in the name(s) of the OWNER AND/OR GENERAL CONTRACTOR stated on the Proposal and Contract attached unless otherwise noted OWNER AND/OR GENERAL CONTRACTOR agrees inasmuch as the equity in this property is a consideration for ARCHITECTURAL SHEET METAL performing work to improve the property, said property will not be sold or transferred until full payment is made to ARCHITECTURAL SHEET METAL.

13. Variances and Zoning: OWNER AND/OR GENERAL CONTRACTOR shall be responsible for variances and zoning changes required in connection with the work provided for hereunder, to include but not be limited to associations, covenants, local building codes, ordinances and any other restrictions effecting ARCHITECTURAL SHEET METAL's ability to perform its work. In the event that state, county, or municipal codes or regulations require work not expressly set forth in this Agreement or that differs materially from that generally recognized as inherent in work of the character provided for in this Agreement, all extra costs for ARCHITECTURAL SHEET METAL'S labor and materials shall be the sole obligation of the OWNER AND/OR GENERAL CONTRACTOR. ARCHITECTURAL SHEET METAL shall not be responsible for work performed that does not comply with or conform to the property restrictions or covenants and OWNER AND/OR GENERAL CONTRACTOR agrees to indemnify and hold ARCHITECTURAL SHEET METAL harmless for same.

14. Final Acceptance of Work Upon Completion: OWNER AND/OR GENERAL CONTRACTOR shall have the opportunity to inspect ARCHITECTURAL SHEET METAL's work. If OWNER AND/OR GENERAL CONTRACTOR believes that ARCHITECTURAL SHEET METAL's work is incomplete or unsatisfactory, OWNER AND/OR GENERAL CONTRACTOR shall so inform ARCHITECTURAL SHEET METAL in writing at that time, otherwise, ARCHITECTURAL SHEET METAL's work shall be deemed accepted.

15. Disputes: At the discretion and sole election of ARCHITECTURAL SHEET METAL, ARCHITECTURAL SHEET METAL may require that all disputes, claims or demands, of whatever kind, be resolved by arbitration, administered by and in accordance with the Construction Industry Arbitration Rules of the American Arbitration Association (the "AAA"). This Proposal and Contract, and all rights, responsibilities, and liabilities arising therefrom, shall be governed and construed in accordance with the laws of the State of Florida, and any litigation or arbitration with the laws of the State of Florida, and any litigation or arbitration arising out of this proposal and Contract shall be brought, maintained and Administered in Orange County, Florida.. Should either party employ an attorney to institute litigation or arbitration to enforce any of the provisions hereof to protect its interest in any matter arising under, arising out of, or related to this Agreement, the prevailing party shall be entitled to recover from the non-prevailing party, all of its attorney's fees, costs, and expenses incurred through arbitration, litigation, appeals, administrative and/or bankruptcy proceedings.

16. Insurance Claims: In the event work is being paid through an insurance claim, it is understood that all costs not covered and paid by the insurance company remains the responsibility of the OWNER AND/OR GENERAL CONTRACTOR, regardless what the work is for, (i.e.: roof, deck replacement for rotted wood, windows, siding, or any other) and that payment to ARCHITCTURAL SHEET METAL shall not be contingent upon OWNER AND/OR GENERAL CONTRACTOR 'S receipt of payment from any third party, specifically including, but not limited to, payment from OWNER AND/OR GENERAL CONTRACTOR'S insurer.

17. Acceptance of Deck: ARCHITECTURAL SHEET METAL'S commencement of roof installation indicates only that ARCHITCTURAL SHEET METAL has visually inspected the surface of the roof deck for visible defects. ARCHITCTURAL SHEET METAL is not responsible for the structural sufficiency, quality of construction, undulations, fastening, or moisture content of the roof deck or other trades' work or design and their effect on the roof roofing materials. OWNER AND/OR GENERAL CONTRACTOR warrants that structures on which ARCHITCTURAL SHEET METAL is to work are in sound condition and capable of withstanding roof construction, equipment, and operations.

18. Indemnification: To the fullest extent permitted by law, OWNER AND/OR GENERAL CONTRACTOR shall defend, indemnify and hold ARCHITECTURAL SHEET METAL harmless and its officers, directors, employees and agents (collectively, "Indemnitees") harmless from any claims, demands, liabilities, damages, costs, suits by any person or persons, losses, and expenses, including attorney's fees arising out of or resulting from the execution of or in connection with the work including, without limitation: (1) claims or demands of the tenants or individual owners' of the buildings located on the Property, (2) personal injury, (3) wrongful death, or (4) property damages. The OWNER AND/OR GENERAL CONTRACTOR'S obligation to indemnify under this provision shall not include the obligation to indemnify the Indemnitees for their own negligence.

19. Controlling Document: Any issuance of a Notice to Proceed, Work Order, Contract based on this proposal constitutes unequivocal acceptance of these Terms and Conditions. Where any provision in subsequent contract documents pertaining to this proposal is inconsistent with the provisions of these Terms and Conditions the provisions presented here shall govern.

20. Latent Conditions: ARCHITECTURAL SHEET METAL shall not be responsible for additional costs due to the existence of utilities, wet insulation, deteriorated deck or rotten deck, furnace or HVAC lines or other subsurface or latent conditions that are not disclosed in writing to ARCHITECTURAL SHEET METAL prior to the start of the work. The disconnection or reconnection of any mechanical equipment that may be necessary for ARCHITECTURAL SHEET METAL to perform the work shall be performed by others and treated as an additional cost, an extra cost. ARCHITECTURAL SHEET METAL is not responsible for leaks or other damages due to the condition of the existing roof. ARCHITECTURAL SHEET METAL shall notify OWNER AND/OR GENERAL CONTRACTOR if subsurface or latent conditions are discovered requiring additional work and shall not be obligated to proceed with the additional work until authorized by the OWNER AND/OR GENERAL CONTRACTOR and the Agreement amount shall be equitably adjusted. ARCHITECTURAL SHEET METAL disclaims liability for such discovered conditions.

21. Not Design Professionals: ARCHITECTURAL SHEET METAL does not provide engineering, consulting, or architectural services. It is the OWNER AND/OR GENERAL CONTRACTOR's responsibility to retain a licensed architect or engineer to determine the design and code compliance. ARCHITECTURAL SHEET METAL assumes no responsibility for structural integrity, compliance with building codes, or design of OWNER AND/OR GENERAL CONTRACTOR's structure. ARCHITECTURAL SHEET METAL will install roofing per code and manufacturer's specifications. If plans, specifications, or other design documents have been furnished to ARCHITECTURAL SHEET METAL, OWNER AND/OR GENERAL CONTRACTOR warrants all structures to be sound condition capable of withstanding normal roofing construction equipment and operations. ARCHITECTURAL SHEET METAL is not responsible for location of roof drains, adequacy of drainage or ponding on the roof.

22. Credit Information: ARCHITECTURAL SHEET METAL reserves the right to obtain credit information on OWNER AND/OR GENERAL CONTRACTOR. If ARCHITECTURAL SHEET METAL finds in its opinion the OWNER AND/OR GENERAL CONTRACTOR's credit is unsatisfactory, ARCHITECTURAL SHEET METAL shall have the right to terminate this Agreement for its convenience, without penalty upon written notice to OWNER AND/OR GENERAL CONTRACTOR. .

23. Material References: ARCHITECTURAL SHEET METAL is not responsible for the actual verification of technical specifications of product manufacturers; (i.e.: R Value, ASTM or UL compliance), but rather the materials used are represented as such by the material manufacturer. Metal roofing and especially lengthy flat span sheet metal panels will often exhibit waviness, commonly referred to as "oil-canning." ARCHITECTURAL SHEET METAL is not responsible for oil-canning. ARCHITECTURAL SHEET METAL is not responsible for defective products if ARCHITECTURAL SHEET METAL did not know such products were defective prior to the installation of same.

24. Fumes and Emissions: ARCHITECTURAL SHEET METAL and OWNER AND/OR GENERAL CONTRACTOR acknowledge that asphalt will be heated by ARCHITECTURAL SHEET METAL, odors and emissions from roofing products will be released and noise will be generated as part of the roofing operations to be performed by ARCHITECTURAL SHEET METAL. OWNER AND/OR GENERAL CONTRACTOR shall be responsible for interior air quality including controlling mechanical equipment, HVAC units, intake vents, wall vents, windows, doors and other openings to prevent fumes and odors from entering the building. OWNER AND/OR GENERAL CONTRACTOR is aware that roofing products emit fumes, vapors and odors during the application process. OWNER AND/OR GENERAL CONTRACTOR shall hold ARCHITECTURAL SHEET METAL harmless from claims from third parties relating to fumes and odors that are emitted during the normal roofing process.

25. Interior Protection: OWNER AND/OR GENERAL CONTRACTOR acknowledges that re-roofing of an existing structure may cause disturbance, dust, or debris to fall into the interior and possible, if hot asphalt or pitch is used, drippage may occur depending upon deck conditions. OWNER AND/OR GENERAL CONTRACTOR agrees to remove or protect property directly below the roof in order to minimize potential interior damage. ARCHITECTURAL SHEET METAL shall not be responsible for disturbance, damage, clean-up, or loss to interior property that ARCHITECTURAL SHEET METAL did not remove or protect prior to commencement of roofing operations.

26. Leaks: ARCHITECTURAL SHEET METAL and OWNER AND/OR GENERAL CONTRACTOR are committed to acting promptly so that roof leaks are not a source of potential interior mold growth. OWNER AND/OR GENERAL CONTRACTOR will make periodic inspections for signs of water intrusion and will provide written notice to ARCHITECTURAL SHEET METAL within 24 hours of the discovery of such leak if OWNER AND/OR GENERAL CONTRACTOR believes there are roof leaks, to correct the condition. Failure of OWNER AND/OR CONTRACTOR to provide written notice to ARCHITECTURAL SHEET METAL within this time will result in the OWNER AND/OR GENERAL CONTRACTOR waiving all claims that may be brought against ARCHITECTURAL SHEET METAL because of or relating to the roof leak, including claims arising in law, equity, contract, warranty, tort, or federal or state statutory claims. If ARCHITECTURAL SHEET METAL determines there is a roof leak related to its scope of work, ARCHITECTURAL SHEET METAL will make repairs promptly. Notwithstanding anything to the contrary, ARCHITECTURAL SHEET METAL disclaims all liability for all claims pertaining to or related to mildew, algae, fungus, mold, and/or other indoor air allergens ("Mold"), including claims arising out or relating to the detection, removal, disposal, or remediation of Mold, whether those claims arise in law, equity, contract, warranty, tort, or federal or state statutory claims, and whether those claims are based on the acts or omissions of ARCHITECTURAL SHEET METAL or individuals or entities under ARCHITECTURAL SHEET METAL's control. The OWNER AND/OR GENERAL CONTRACTOR is solely liable and responsible for all damages, whether actual or consequential, caused by Mold and incurred by OWNER AND/OR GENERAL CONTRACTOR, ARCHITECTURAL SHEET METAL or third parties, and agrees to indemnify, defend, and hold ARCHITECTURAL SHEET METAL harmless from any and all claims arising out of or relating to Mold.

27. Material Shortage/Substitution: In the event that any specified material or equipment becomes unavailable either temporarily or permanently after the Project Specific Agreement is executed, provided that such availability is a result of factors beyond ARCHITECTURAL SHEET METAL control, then in the event of temporary unavailability, the contract time shall be extended to reflect the duration of time that ARCHITECTURAL SHEET METAL is delayed by the unavailability, and in the case of permanent unavailability, ARCHITECTURAL SHEET METAL shall be excused from providing said material or equipment and allowed to provide an available substitute. To the extent an available substitute is provided by ARCHITECTURAL SHEET METAL under this provision, any increase in the cost between the originally specified material or equipment and its substitute shall be paid by the OWNER AND/OR GENERAL CONTRACTOR to ARCHITECTURAL SHEET METAL. Due to material shortages, OWNER AND/OR GENERAL CONTRACTOR may experience delays related to the inability to timely obtain materials for this project. In the event of such a delay, ARCHITECTURAL SHEET METAL shall notify OWNER AND/OR GENERAL CONTRACTOR and OWNER AND/OR GENERAL CONTRACTOR agrees to provide ARCHITECTURAL SHEET METAL with an extension of time for any delay attributable to the temporary inability to obtain materials.

28. **Damage Limitation.** In no event, whether based on contract, warranty (express or implied), tort, negligence, federal or state statute or otherwise arising from or relating to the work and services performed under the Agreement, shall ARCHITECTURAL SHEET METAL be liable for special, consequential, punitive, or indirect damages, including, without limitation, loss of use or loss of profits. OWNER AND/OR GENERAL CONTRACTOR waive any/all subrogation claims or rights against ARCHITECTURAL SHEET METAL to the extent such claim is covered by insurance. OWNER AND/OR GENERAL CONTRACTOR shall hold harmless, defend, and indemnify ARCHITECTURAL SHEET METAL for/from all claims that relate to or arise out of any responsibility/liability which is expressly disclaimed by ARCHITECTURAL SHEET METAL in these Terms and Conditions.

29. **Unforeseen Decking Lines.** Installation of a new roof to the deck area of the building requires nails and/or screws to be inserted into the deck area. By code, electrical, plumbing, telephone and security wiring, and air conditioning wiring and lines should not be installed directly beneath the roof deck. If Customer is aware of these or any other such lines, Customer must notify Contractor immediately as the Contractor will not be responsible for the puncture of improperly installed lines or lines within three inches of the roof deck. Customer accepts full responsibility for any repair or replacement that may be necessary.

30. **ARCHITECTURAL SHEET METAL'S DEFAULT.** OWNER AND/OR GENERAL CONTRACTOR shall give ARCHITECTURAL SHEET METAL at least **seven (7) days** written notice and the opportunity to cure, or such additional time as is reasonably necessary to cure the alleged breach, before declaring ARCHITECTURAL SHEET METAL in default of this Agreement. It is OWNER AND/OR GENERAL CONTRACTOR'S responsibility to notify ARCHITECTURAL SHEET METAL in writing within **three (3) days** (unless otherwise provided for in the Agreement) of the occurrence of any claim, defect, or deficiency arising out of work performed, services supplied, or materials provided by ARCHITECTURAL SHEET METAL under this Agreement ("Occurrence"). Failure of the OWNER AND/OR GENERAL CONTRACTOR to provide written notice of the Occurrence will result in the OWNER AND/OR GENERAL CONTRACTOR waiving all claims that may be brought against ARCHITECTURAL SHEET METAL because of or relating to the Occurrence, including claims arising in law, equity, contract, warranty, tort, or federal or state statutory claims.

31. **Jury Trial Waiver.** In the event of litigation between the parties to this Agreement, the parties KNOWINGLY, VOLUNTARILY, IRREVOCABLY AND INTENTIONALLY WAIVE THE RIGHT TO A TRIAL BY JURY IN RESPECT TO ANY LITIGATION ARISING OUT OF OR PERTAINING TO THE AGREEMENT, OR ANY COURSE OF CONDUCT, COURSE OF DEALINGS, STATEMENTS (WHETHER VERBAL OR WRITTEN) OR ACTIONS OF ANY PERSON OR PARTY RELATED TO THIS AGREEMENT; THIS IRREVOCABLE WAIVER OF THE RIGHT TO A JURY TRIAL IS A MATERIAL INDUCEMENT FOR THE PARTIES TO ENTER THIS AGREEMENT.

Subcontractor Bid Form-General

Wharton-Smith, Inc.
CONSTRUCTION GROUP

Project: Port Orange Public Utilities Field Operations Facility

To: Wharton-Smith, Inc., 750 Monroe Road, Sanford, FL 32771
(407) 321-8410; comest@whartonsmith.com

Name of Bidder:	Architectural Sheet Metal, Inc
Scope of Work:	Standing Seam Metal Roofing

The Undersigned, hereinafter called "Bidder", having visited the site of the proposed project and familiarized themselves with the local conditions, nature and extent of the work, and having carefully examined the Subcontractor Bid Manual, Subcontract Form, General Conditions, Supplementary Conditions, Plans and Specifications and other Contract Documents, with the Bond requirements herein, proposes to furnish all labor, materials, equipment and other items, facilities and services for the proper execution and completion of: Port Orange Public Utilities Field Operations Facility in full accordance with the Contract Documents and, if awarded the Contract, to complete the said work within the time limits specified for the following lump sum price.

PART 1: PRICING

(1.1) Total Base Bid

Amount in Figures:	**$** $630,150.00
Amount in Words:	Six Hundred Thirty Thousand One Hundred Fifty & 00/100

(1.2) Alternates (Voluntary)

	$
	$
	$

(1.3) Owner Direct Purchase (value of all purchases exceeding **$50,000**)

Material/Equipment Types:	Equipment Rental/Roofing & Trim Material
Amount:	$ 418,892.44

Continued Next Page

(1.4) Value Engineering (We encourage voluntary VE/cost savings options)

1		$
2		$
3		$

(1.5) MWBE Participation

MWBE	$
LDB	$
VBE	$

(1.6) Bond Rate

In the event a Performance & Payment Bond is required, indicate in the space below the **percentage** to be added to the proposal.

Bond Rate %:	2.00%

(1.7) Long Lead Durations (indicate durations for any long lead equip. 24 weeks +)

Item	Duration (wks)	Item	Duration (wks)
Roofing Mat.	8-10 wks		
Trim Mat.	8-10 wks		

PART 2: BIDDER ACKNOWLEDGEMENT

(2.1) RFI (Request for Information)

The Bidder acknowledges receipt of the following RFI Response(s):

RFI No.	001	Dated:	11/07/24	RFI No.		Dated:	
RFI No.	002	Dated:	11/11/24	RFI No.		Dated:	
RFI No.	003	Dated:	11/15/24	RFI No.		Dated:	

Continued Next Page

(2.2) WSI (Wharton-Smith Supplemental Instructions)

The Bidder acknowledges receipt of the following Wharton-Smith Supplemental Instruction(s):

WSI No.	1	Dated:	10/22/24	WSI No.	5	Dated:	10/31/24
WSI No.	2 & 3	Dated:	10/24/24	WSI No.	6	Dated:	11/4/24
WSI No.	4	Dated:	10/28/24	WSI No.	7	Dated:	11/6/24
					8		11/8/24

(2.3) ASI (Architect's Supplemental Instructions)

The Bidder acknowledges receipt of the following Architect Supplemental Instruction(s):

ASI No.		Dated:		ASI No.		Dated:	

(2.4) Addenda

The Bidder acknowledges receipt of the following Addenda:

Addenda No.		Dated:		Addenda No.		Dated:	
Addenda No.		Dated:		Addenda No.		Dated:	

(2.5) Additional Acknowledgements

The Bidder acknowledges that Bidder has considered and included the requirements of the Subcontractor Bid Manual, dated October 17, 2024, and all other sections, in preparing this Bid.

The Bidder acknowledges time is of the essence and the Project will begin March 6, 2025, with Substantial Completion that must be achieved no later than June 30, 2026, and has included all costs for any required extended hours, extra shifts, weekend and holiday work which may be necessary to complete the Work on schedule.

This Bid will remain subject to acceptance for ninety **90** calendar days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Construction Manager.

The Bidder understands and agrees that the Construction Manager and/or Owner reserves the right to reject this Bid or any and all bids for the Project, and to waive minor irregularities or informalities in any bid and to award Alternates in any order that in the Construction Manager's judgment will be in the Owner's best interest.

The Bidder hereby acknowledges they are licensed to do business in the capacity represented by this Bid and as required by all governing jurisdictional authorities for all locations of the work and as required by the Contract Documents.

The Bidder hereby acknowledges reviewing and accepting without modification the Wharton-Smith, Inc. Subcontract Agreement and agrees to execute same if awarded the project or portion(s) of the Project.

REVISED PROPOSAL

November 18, 2024
~~November 12, 2024~~

Wharton-Smith, Inc.
Ph: 407-321-8410
comest@whartonsmith.com

PROJECT: Port Orange Public Utilities Field Operations Facility
ARCHITECT: Schenkel-Shultz
DRAWINGS: Architectural Drawings
SPEC SECTIONS: See below
ADDENDA: None

ALL MATERIAL, LABOR, EQUIPMENT & SUPERVISION TO INSTALL THE FOLLOWING:

- **Standing Seam Metal Roof System:** Berridge MFG., Double-Lock Zee-Lock panel system, 24 gauge, Kynar finish – standard color.
- Flashing, trim, gutters, and downspouts to match roof panel material, finish, and color.
- Fasteners, sealants, and continuous clips.
- Soffit panel to match roof panel material, finish, and color.
- Rigid PolyISO insulation per plans.
- 5/8” coverboard per plans.
- Flush metal panel on Administration Building, PAC-CLAD .040mil aluminum – standard color.
- Underlayment; 40 mils., self-adhesive, modified Bitumen.
- Finish Warranty twenty (20) years Berridge MFG.
- Weathertightness twenty (20) years Berridge MFG.
- Weathertightness two (2) years Installer/ASM.

NOT INCLUDED: Pre-engineered metal building structure/framing/assembly/wall panels, roof deck, trusses/joist, wall/siding panels, aluminum composite metal panels, lightning protection, hatches, heavy gauge framing, Payment & Performance bond (2%), Item(s) not listed above, Davis Bacon Wage Rates unless otherwise noted above.

BASE BID One (1) Unit **$630,150.00**
For the sum of: Six Hundred Thirty Thousand One Hundred Fifty and no/100

THIS PROPOSAL WILL REMAIN IN EFFECT FOR A PERIOD OF 30 DAYS. THIS BID PROPOSAL WILL BE SUBJECT TO AND CONDITIONED UPON EITHER USAGE OF THE AIA OR AGC SUBCONTRACT OR A SUBCONTRACT FORM OTHER WISE ACCEPTABLE TO ARCHITECTURAL SHEET METAL, INC. SUBJECT TO TERMS AND CONDITIONS, SEE ATTACHED.

Michael Gulla

Architectural Sheet Metal, Inc.
SAFETY.QUALITY.TIMELY

ASM, INC. COMMERCIAL TERMS AND CONDITIONS (REV 10/2021)

1. Entire Agreement: This Proposal and Contract shall be the entire agreement between the OWNER AND/OR GENERAL CONTRACTOR and ARCHITECTURAL SHEET METAL, notwithstanding any previous communications and negotiations, whether oral or written, there being no covenants or agreements, inducements, guarantees, warranties or considerations, other than as set out herein. Each provision of this Agreement shall be construed as if both parties mutually drafted this Agreement. If a provision of this Agreement (or the application of it) is held by a court or arbitrator to be invalid or unenforceable, that provision will be deemed separable from the remaining provisions of the Agreement, will be reformed/enforced to the extent that it is valid and enforceable, and will not affect the validity or interpretation of the other provisions or the application of that provision to a person or circumstance to which it is valid and enforceable. Headings are for convenience only and do not affect interpretation. Acceptance shall be complete and the contract binding when signed by the OWNER AND/OR GENERAL CONTRACTOR or his representative and an authorized representative of ARCHITECTURAL SHEET METAL. Any changes in this Proposal and Contract must be approved in writing by an officer of ARCHITECTURAL SHEET METAL. If OWNER AND/OR GENERAL CONTRACTOR cancels this Agreement prior to the start of work, but not within the timeframe allowed by any/all applicable statutes or laws pertaining to cancellation, OWNER AND/OR GENERAL CONTRACTOR is liable for 15% of the total Agreement price as liquidated damages because ARCHITECTURAL SHEET METAL is unable to accurately measure its damages for the cancellation of this Agreement. By executing this Agreement, OWNER AND/OR GENERAL CONTRACTOR and ARCHITECTURAL SHEET METAL agree that the liquidated damages amount is fair and is not a penalty.

2. Payment: All sums not paid when due shall bear interest at the rate of one and a half percent (1 ½%) per month (or the maximum legal rate permitted by law if less). If OWNER AND/OR GENERAL CONTRACTOR does not make payment when due, OWNER AND/OR GENERAL CONTRACTOR agrees to pay all costs and expenses incurred in the collection of any unpaid sums, including reasonable attorney's fees. Punch items shall not be cause to delay the OWNER AND/OR GENERAL CONTRACTOR's payment to ARCHITECTURAL SHEET METAL. In addition, if a punch list exists, OWNER AND/OR GENERAL CONTRACTOR should pay 95% and withhold 5% until punch work is completed. If at any time OWNER AND/OR GENERAL CONTRACTOR fails to pay ARCHITECTURAL SHEET METAL in accordance with this Agreement, then ARCHITECTURAL SHEET METAL may, at its sole discretion, suspend shipments, performance of work, and/or warranties until full payment is made, and/or terminate this Agreement. If a suspension occurs that is not caused solely by ARCHITECTURAL SHEET METAL, the Agreement sum shall be increased by the amount of ARCHITECTURAL SHEET METAL'S costs of shut-down, delay, and start-up. If there is an increase in the actual cost of the labor, materials, fuel charges, or manufacturer's warranty charged to the ARCHITECTURAL SHEET METAL in excess of 5% subsequent to making this Agreement, the price set forth in this Agreement shall be increased without the need for a written change order or amendment to the contract to reflect the price increase and additional direct cost to the ARCHITECTURAL SHEET METAL. ARCHITECTURAL SHEET METAL will submit written documentation of the increased charges to the OWNER AND/OR GENERAL CONTRACTOR upon request. As an additional remedy, if the actual cost of any line item increases more than 10% subsequent to the making of this Agreement, ARCHITECTURAL SHEET METAL, at its sole discretion, may terminate the contract for convenience.

3. Delays: Neither ARCHITECTURAL SHEET METAL nor OWNER AND/OR GENERAL CONTRACTOR shall be responsible for loss or damage, whether actual or consequential or delays caused by circumstances beyond its control, including, without limitation, weather conditions, labor disputes and unavailability of materials, acts of God, accidents, pandemic, COVID-19 or viruses/illnesses, fire, vandalism, federal, state or local law, regulation or order, civil unrest, strikes, riots, protests, jurisdictional disputes, failure or delay of transportation, shortage of or inability to obtain materials, equipment or labor, changes in the work . However, if OWNER AND/OR GENERAL CONTRACTOR or anyone performing work at their direction interferes with or interrupts ARCHITECTURAL SHEET METAL in the performance of its work during work hours, it is agreed that the OWNER AND/OR GENERAL CONTRACTOR shall pay all extra expenses involved in making up the time lost, including, but not limited to, overtime and/or idle time and/or extra traveling expenses caused thereby.

4. Extra Work: Any work which is performed with OWNER AND/OR GENERAL CONTRACTOR's knowledge or consent and which is not included on the reverse side or attached shall be deemed as extra and shall be paid for accordingly. Unless specifically included any work to repair or replace the structural deck by reason of rotten wood, or other conditions making it unsuitable for supporting the roofing materials, shall be extra work.

5. Pre-Existing Conditions, Mold, Lead Based Paint and Asbestos: ARCHITECTURAL SHEET METAL shall not be responsible or liable for damages resulting from pre-existing conditions; to include mold, lead-based paint, asbestos and other conditions such as deteriorated roofing or rotten wood, which existed prior to ARCHITECTURAL SHEET METAL's commencement of work. While ARCHITECTURAL SHEET METAL shall seek to minimize any such damage, it is understood where such deteriorated conditions exist, the normal performance of work may result in damage. This Proposal and Contract is based upon the assumption by ARCHITECTURAL SHEET METAL that materials to be removed by ARCHITECTURAL SHEET METAL do not include or contain asbestos, lead based paint or other toxic materials and that asbestos-containing, lead containing, or other toxic materials will not be encountered or disturbed during the course of performing the work. If materials containing asbestos are encountered or mold, lead-based paint or other such conditions are present when performing the work, ARCHITECTURAL SHEET METAL shall not be responsible or liable for any claims associated with such lead-based paint, asbestos, mold or other pre-existing conditions whether those claims arise in law, equity, contract, warranty, tort, or federal or state statutory claims and OWNER AND/OR GENERAL CONTRACTOR agrees to hold harmless and indemnify ARCHITECTURAL SHEET METAL against any such claims or losses resulting from lead-based paint, asbestos, mold or other pre-existing conditions found on OWNER AND/OR GENERAL CONTRACTOR's premises or should mold appear at any time after work is completed.

6. Warranty: Unless otherwise provided: **THERE ARE NO EXPRESS OR IMPLIED WARRANTIES WHATSOEVER INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.** ARCHITECTURAL SHEET METAL's work will be warranted by ARCHITECTURAL SHEET METAL in accordance with its standard LIMITED WORKMANSHIP WARRANTY FOR COMMERCIAL ROOFING, which is made a part of this Proposal and Contract and incorporated by reference. A copy of ARCHITECTURAL SHEET METAL's LIMITED WORKMANSHIP WARRANTY FOR COMMERCIAL ROOFING, is attached or, if not, will be furnished upon request. ARCHITECTURAL SHEET METAL SHALL NOT BE LIABLE FOR SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES. The acceptance of the Proposal and Contract by the OWNER AND/OR GENERAL CONTRACTOR signifies his/her agreement that this warranty shall be and is the exclusive remedy against ARCHITECTURAL SHEET METAL. A manufacturer's warranty shall be furnished to OWNER AND/OR GENERAL CONTRACTOR is a manufacturer's warranty is called for on the face of this Proposal and Contract. It is expressly agreed that in the event of any defects in the materials furnished pursuant to this Proposal and Contract, OWNER AND/OR GENERAL CONTRACTOR shall have recourse only against the manufacturer of such material. . If there is a breach in the applicable manufacturer's warranty according to the stated terms and conditions of said warranty, ARCHITECTURAL SHEET METAL'S warranty is simultaneously void and all of ARCHITECTURAL SHEET METAL'S responsibility/liability to correct, supplement, rectify, fix, etc. any/all issue(s) as a result of such breach. All warranties/guarantees provided by ARCHITECTURAL SHEET METAL, if any, shall be deemed null and void if OWNER AND/OR GENERAL CONTRACTOR fails to strictly adhere to the Agreement's payment terms; warranties only issued upon payment in full.

7. Access to Work and Working Hours: OWNER AND/OR GENERAL CONTRACTOR shall grant free and open access to work areas for workmen and vehicles and shall allow areas for storage of materials and debris. OWNER AND/OR GENERAL CONTRACTOR agrees to keep driveways, parking lots, and other work sites, clean and available for movement and parking of trucks during normal work hours. ARCHITECTURAL SHEET METAL shall not be responsible for reasonable wear and movement of trucks, men, equipment, materials, debris, etc. ARCHITECTURAL SHEET METAL disclaims any and all liability for the grading, leveling, slope or construction of the roof deck, the roofing system, structure and/or appurtenances This Proposal and Contract is based upon the performance of all work during ARCHITECTURAL SHEET METAL's regular working hours, and extra charges will be made for all work performed other than during ARCHITECTURAL SHEET METAL's regular working hours, if required by OWNER AND/OR GENERAL CONTRACTOR.

8. Working Conditions: ARCHITECTURAL SHEET METAL shall not be required to install its material either (a) under conditions contrary to manufacturer's instructions; (b) under adverse weather conditions; (c) under conditions which are generally unacceptable in the trade; and (d) where jobsite conditions are not suitable for proper installation of materials. ARCHITECTURAL SHEET METAL shall not be required to provide or be responsible for the installation erection of temporary weather protection facilities.

9. Labor and Materials: ARCHITECTURAL SHEET METAL agrees to furnish labor and materials either directly or through subcontractors retained by ARCHITECTURAL SHEET METAL to complete the work as specified on face of Proposal and Contract attached.

10. Insurance: Worker's Compensation, General Liability and such other insurance as is required by law, will be carried by ARCHITECTURAL SHEET METAL to complete the work as specified, on the Proposal and Contract attached. OWNER AND/OR GENERAL CONTRACTOR shall purchase and maintain builder's risk and property insurance, including the labor and materials furnished by ARCHITECTURAL SHEET METAL, covering fire, wind storm, extended coverage, malicious mischief, vandalism and theft on the premises to protect against loss or damage to material and in-place work until the job is completed and accepted by the OWNER and/or GENERAL CONTRACTOR.

11. Utilities: OWNER AND/OR GENERAL CONTRACTOR shall furnish at no cost to ARCHITECTURAL SHEET METAL all required electric and/or water service.

12. Title to Property: Title of this property is recorded in the name(s) of the OWNER AND/OR GENERAL CONTRACTOR stated on the Proposal and Contract attached unless otherwise noted OWNER AND/OR GENERAL CONTRACTOR agrees inasmuch as the equity in this property is a consideration for ARCHITECTURAL SHEET METAL performing work to improve the property, said property will not be sold or transferred until full payment is made to ARCHITECTURAL SHEET METAL.

13. Variances and Zoning: OWNER AND/OR GENERAL CONTRACTOR shall be responsible for variances and zoning changes required in connection with the work provided for hereunder, to include but not be limited to associations, covenants, local building codes, ordinances and any other restrictions effecting ARCHITECTURAL SHEET METAL's ability to perform its work. In the event that state, county, or municipal codes or regulations require work not expressly set forth in this Agreement or that differs materially from that generally recognized as inherent in work of the character provided for in this Agreement, all extra costs for ARCHITECTURAL SHEET METAL'S labor and materials shall be the sole obligation of the OWNER AND/OR GENERAL CONTRACTOR. ARCHITECTURAL SHEET METAL shall not be responsible for work performed that does not comply with or conform to the property restrictions or covenants and OWNER AND/OR GENERAL CONTRACTOR agrees to indemnify and hold ARCHITECTURAL SHEET METAL harmless for same.

14. Final Acceptance of Work Upon Completion: OWNER AND/OR GENERAL CONTRACTOR shall have the opportunity to inspect ARCHITECTURAL SHEET METAL's work. If OWNER AND/OR GENERAL CONTRACTOR believes that ARCHITECTURAL SHEET METAL's work is incomplete or unsatisfactory, OWNER AND/OR GENERAL CONTRACTOR shall so inform ARCHITECTURAL SHEET METAL in writing at that time, otherwise, ARCHITECTURAL SHEET METAL's work shall be deemed accepted.

15. Disputes: At the discretion and sole election of ARCHITECTURAL SHEET METAL, ARCHITECTURAL SHEET METAL may require that all disputes, claims or demands, of whatever kind, be resolved by arbitration, administered by and in accordance with the Construction Industry Arbitration Rules of the American Arbitration Association (the "AAA"). This Proposal and Contract, and all rights, responsibilities, and liabilities arising therefrom, shall be governed and construed in accordance with the laws of the State of Florida, and any litigation or arbitration with the laws of the State of Florida, and any litigation or arbitration arising out of this proposal and Contract shall be brought, maintained and Administered in Orange County, Florida.. Should either party employ an attorney to institute litigation or arbitration to enforce any of the provisions hereof to protect its interest in any matter arising under, arising out of, or related to this Agreement, the prevailing party shall be entitled to recover from the non-prevailing party, all of its attorney's fees, costs, and expenses incurred through arbitration, litigation, appeals, administrative and/or bankruptcy proceedings.

16. Insurance Claims: In the event work is being paid through an insurance claim, it is understood that all costs not covered and paid by the insurance company remains the responsibility of the OWNER AND/OR GENERAL CONTRACTOR, regardless what the work is for, (i.e.: roof, deck replacement for rotted wood, windows, siding, or any other) and that payment to ARCHITCTURAL SHEET METAL shall not be contingent upon OWNER AND/OR GENERAL CONTRACTOR 'S receipt of payment from any third party, specifically including, but not limited to, payment from OWNER AND/OR GENERAL CONTRACTOR'S insurer.

17. Acceptance of Deck: ARCHITECTURAL SHEET METAL'S commencement of roof installation indicates only that ARCHITCTURAL SHEET METAL has visually inspected the surface of the roof deck for visible defects. ARCHITCTURAL SHEET METAL is not responsible for the structural sufficiency, quality of construction, undulations, fastening, or moisture content of the roof deck or other trades' work or design and their effect on the roof roofing materials. OWNER AND/OR GENERAL CONTRACTOR warrants that structures on which ARCHITCTURAL SHEET METAL is to work are in sound condition and capable of withstanding roof construction, equipment, and operations.

18. Indemnification: To the fullest extent permitted by law, OWNER AND/OR GENERAL CONTRACTOR shall defend, indemnify and hold ARCHITECTURAL SHEET METAL harmless and its officers, directors, employees and agents (collectively, "Indemnitees") harmless from any claims, demands, liabilities, damages, costs, suits by any person or persons, losses, and expenses, including attorney's fees arising out of or resulting from the execution of or in connection with the work including, without limitation: (1) claims or demands of the tenants or individual owners' of the buildings located on the Property, (2) personal injury, (3) wrongful death, or (4) property damages. The OWNER AND/OR GENERAL CONTRACTOR'S obligation to indemnify under this provision shall not include the obligation to indemnify the Indemnitees for their own negligence.

19. Controlling Document: Any issuance of a Notice to Proceed, Work Order, Contract based on this proposal constitutes unequivocal acceptance of these Terms and Conditions. Where any provision in subsequent contract documents pertaining to this proposal is inconsistent with the provisions of these Terms and Conditions the provisions presented here shall govern.

20. Latent Conditions: ARCHITECTURAL SHEET METAL shall not be responsible for additional costs due to the existence of utilities, wet insulation, deteriorated deck or rotten deck, furnace or HVAC lines or other subsurface or latent conditions that are not disclosed in writing to ARCHITECTURAL SHEET METAL prior to the start of the work. The disconnection or reconnection of any mechanical equipment that may be necessary for ARCHITECTURAL SHEET METAL to perform the work shall be performed by others and treated as an additional cost, an extra cost. ARCHITECTURAL SHEET METAL is not responsible for leaks or other damages due to the condition of the existing roof. ARCHITECTURAL SHEET METAL shall notify OWNER AND/OR GENERAL CONTRACTOR if subsurface or latent conditions are discovered requiring additional work and shall not be obligated to proceed with the additional work until authorized by the OWNER AND/OR GENERAL CONTRACTOR and the Agreement amount shall be equitably adjusted. ARCHITECTURAL SHEET METAL disclaims liability for such discovered conditions.

21. Not Design Professionals: ARCHITECTURAL SHEET METAL does not provide engineering, consulting, or architectural services. It is the OWNER AND/OR GENERAL CONTRACTOR's responsibility to retain a licensed architect or engineer to determine the design and code compliance. ARCHITECTURAL SHEET METAL assumes no responsibility for structural integrity, compliance with building codes, or design of OWNER AND/OR GENERAL CONTRACTOR's structure. ARCHITECTURAL SHEET METAL will install roofing per code and manufacturer's specifications. If plans, specifications, or other design documents have been furnished to ARCHITECTURAL SHEET METAL, OWNER AND/OR GENERAL CONTRACTOR warrants all structures to be sound condition capable of withstanding normal roofing construction equipment and operations. ARCHITECTURAL SHEET METAL is not responsible for location of roof drains, adequacy of drainage or ponding on the roof.

22. Credit Information: ARCHITECTURAL SHEET METAL reserves the right to obtain credit information on OWNER AND/OR GENERAL CONTRACTOR. If ARCHITECTURAL SHEET METAL finds in its opinion the OWNER AND/OR GENERAL CONTRACTOR's credit is unsatisfactory, ARCHITECTURAL SHEET METAL shall have the right to terminate this Agreement for its convenience, without penalty upon written notice to OWNER AND/OR GENERAL CONTRACTOR. .

23. Material References: ARCHITECTURAL SHEET METAL is not responsible for the actual verification of technical specifications of product manufacturers; (i.e.: R Value, ASTM or UL compliance), but rather the materials used are represented as such by the material manufacturer. Metal roofing and especially lengthy flat span sheet metal panels will often exhibit waviness, commonly referred to as "oil-canning." ARCHITECTURAL SHEET METAL is not responsible for oil-canning. ARCHITECTURAL SHEET METAL is not responsible for defective products if ARCHITECTURAL SHEET METAL did not know such products were defective prior to the installation of same.

24. Fumes and Emissions: ARCHITECTURAL SHEET METAL and OWNER AND/OR GENERAL CONTRACTOR acknowledge that asphalt will be heated by ARCHITECTURAL SHEET METAL, odors and emissions from roofing products will be released and noise will be generated as part of the roofing operations to be performed by ARCHITECTURAL SHEET METAL. OWNER AND/OR GENERAL CONTRACTOR shall be responsible for interior air quality including controlling mechanical equipment, HVAC units, intake vents, wall vents, windows, doors and other openings to prevent fumes and odors from entering the building. OWNER AND/OR GENERAL CONTRACTOR is aware that roofing products emit fumes, vapors and odors during the application process. OWNER AND/OR GENERAL CONTRACTOR shall hold ARCHITECTURAL SHEET METAL harmless from claims from third parties relating to fumes and odors that are emitted during the normal roofing process.

25. Interior Protection: OWNER AND/OR GENERAL CONTRACTOR acknowledges that re-roofing of an existing structure may cause disturbance, dust, or debris to fall into the interior and possible, if hot asphalt or pitch is used, drippage may occur depending upon deck conditions. OWNER AND/OR GENERAL CONTRACTOR agrees to remove or protect property directly below the roof in order to minimize potential interior damage. ARCHITECTURAL SHEET METAL shall not be responsible for disturbance, damage, clean-up, or loss to interior property that ARCHITECTURAL SHEET METAL did not remove or protect prior to commencement of roofing operations.

26. Leaks: ARCHITECTURAL SHEET METAL and OWNER AND/OR GENERAL CONTRACTOR are committed to acting promptly so that roof leaks are not a source of potential interior mold growth. OWNER AND/OR GENERAL CONTRACTOR will make periodic inspections for signs of water intrusion and will provide written notice to ARCHITECTURAL SHEET METAL within 24 hours of the discovery of such leak if OWNER AND/OR GENERAL CONTRACTOR believes there are roof leaks, to correct the condition. Failure of OWNER AND/OR CONTRACTOR to provide written notice to ARCHITECTURAL SHEET METAL within this time will result in the OWNER AND/OR GENERAL CONTRACTOR waiving all claims that may be brought against ARCHITECTURAL SHEET METAL because of or relating to the roof leak, including claims arising in law, equity, contract, warranty, tort, or federal or state statutory claims. If ARCHITECTURAL SHEET METAL determines there is a roof leak related to its scope of work, ARCHITECTURAL SHEET METAL will make repairs promptly. Notwithstanding anything to the contrary, ARCHITECTURAL SHEET METAL disclaims all liability for all claims pertaining to or related to mildew, algae, fungus, mold, and/or other indoor air allergens ("Mold"), including claims arising out or relating to the detection, removal, disposal, or remediation of Mold, whether those claims arise in law, equity, contract, warranty, tort, or federal or state statutory claims, and whether those claims are based on the acts or omissions of ARCHITECTURAL SHEET METAL or individuals or entities under ARCHITECTURAL SHEET METAL's control. The OWNER AND/OR GENERAL CONTRACTOR is solely liable and responsible for all damages, whether actual or consequential, caused by Mold and incurred by OWNER AND/OR GENERAL CONTRACTOR, ARCHITECTURAL SHEET METAL or third parties, and agrees to indemnify, defend, and hold ARCHITECTURAL SHEET METAL harmless from any and all claims arising out of or relating to Mold.

27. Material Shortage/Substitution: In the event that any specified material or equipment becomes unavailable either temporarily or permanently after the Project Specific Agreement is executed, provided that such availability is a result of factors beyond ARCHITECTURAL SHEET METAL control, then in the event of temporary unavailability, the contract time shall be extended to reflect the duration of time that ARCHITECTURAL SHEET METAL is delayed by the unavailability, and in the case of permanent unavailability, ARCHITECTURAL SHEET METAL shall be excused from providing said material or equipment and allowed to provide an available substitute. To the extent an available substitute is provided by ARCHITECTURAL SHEET METAL under this provision, any increase in the cost between the originally specified material or equipment and its substitute shall be paid by the OWNER AND/OR GENERAL CONTRACTOR to ARCHITECTURAL SHEET METAL. Due to material shortages, OWNER AND/OR GENERAL CONTRACTOR may experience delays related to the inability to timely obtain materials for this project. In the event of such a delay, ARCHITECTURAL SHEET METAL shall notify OWNER AND/OR GENERAL CONTRACTOR and OWNER AND/OR GENERAL CONTRACTOR agrees to provide ARCHITECTURAL SHEET METAL with an extension of time for any delay attributable to the temporary inability to obtain materials.

28. **Damage Limitation.** In no event, whether based on contract, warranty (express or implied), tort, negligence, federal or state statute or otherwise arising from or relating to the work and services performed under the Agreement, shall ARCHITECTURAL SHEET METAL be liable for special, consequential, punitive, or indirect damages, including, without limitation, loss of use or loss of profits. OWNER AND/OR GENERAL CONTRACTOR waive any/all subrogation claims or rights against ARCHITECTURAL SHEET METAL to the extent such claim is covered by insurance. OWNER AND/OR GENERAL CONTRACTOR shall hold harmless, defend, and indemnify ARCHITECTURAL SHEET METAL for/from all claims that relate to or arise out of any responsibility/liability which is expressly disclaimed by ARCHITECTURAL SHEET METAL in these Terms and Conditions.

29. **Unforeseen Decking Lines.** Installation of a new roof to the deck area of the building requires nails and/or screws to be inserted into the deck area. By code, electrical, plumbing, telephone and security wiring, and air conditioning wiring and lines should not be installed directly beneath the roof deck. If Customer is aware of these or any other such lines, Customer must notify Contractor immediately as the Contractor will not be responsible for the puncture of improperly installed lines or lines within three inches of the roof deck. Customer accepts full responsibility for any repair or replacement that may be necessary.

30. **ARCHITECTURAL SHEET METAL'S DEFAULT.** OWNER AND/OR GENERAL CONTRACTOR shall give ARCHITECTURAL SHEET METAL at least **seven (7) days** written notice and the opportunity to cure, or such additional time as is reasonably necessary to cure the alleged breach, before declaring ARCHITECTURAL SHEET METAL in default of this Agreement. It is OWNER AND/OR GENERAL CONTRACTOR'S responsibility to notify ARCHITECTURAL SHEET METAL in writing within **three (3) days** (unless otherwise provided for in the Agreement) of the occurrence of any claim, defect, or deficiency arising out of work performed, services supplied, or materials provided by ARCHITECTURAL SHEET METAL under this Agreement ("Occurrence"). Failure of the OWNER AND/OR GENERAL CONTRACTOR to provide written notice of the Occurrence will result in the OWNER AND/OR GENERAL CONTRACTOR waiving all claims that may be brought against ARCHITECTURAL SHEET METAL because of or relating to the Occurrence, including claims arising in law, equity, contract, warranty, tort, or federal or state statutory claims.

31. **Jury Trial Waiver.** In the event of litigation between the parties to this Agreement, the parties KNOWINGLY, VOLUNTARILY, IRREVOCABLY AND INTENTIONALLY WAIVE THE RIGHT TO A TRIAL BY JURY IN RESPECT TO ANY LITIGATION ARISING OUT OF OR PERTAINING TO THE AGREEMENT, OR ANY COURSE OF CONDUCT, COURSE OF DEALINGS, STATEMENTS (WHETHER VERBAL OR WRITTEN) OR ACTIONS OF ANY PERSON OR PARTY RELATED TO THIS AGREEMENT; THIS IRREVOCABLE WAIVER OF THE RIGHT TO A JURY TRIAL IS A MATERIAL INDUCEMENT FOR THE PARTIES TO ENTER THIS AGREEMENT.

ROOFING AND SHEET METAL

MIAMI • ORLANDO • TAMPA

Roof Proposal for:

Wharton-Smith, Inc

Attn: James Manyette

Phone: (407)-321-8410

Fax: N/A

Bid Date: November 12, 2024

Project**: Port Orange Public Utilities**

Project Address: 4505 Clyde Morris Blvd

City/State: Port Orange, Florida 32809

We hereby submit this contract for the above-referenced project. Our proposal based on plans dated 01/05/2023, includes the costs to furnish and install a Standing seam roof system, along with the specified roof system components and accessories, as required to provide a watertight roofing system. Our proposed roof system includes a 20-year Weather Tightness Warranty.

SPECIFICATION

We hereby propose and offer contract to perform all work, as follows:

JOB START

- Prior to starting of work owner shall receive a certificate of insurance from P&A Roofing & Sheet Metal
- An inspection of the existing conditions shall be performed, to record and report prior damages and detrimental conditions.
- A pre-roofing conference shall be held with the Owner's representative to coordinate this project.

Twenty Year No Dollar Limit Warranty

STANDING SEAM METAL ROOFING

- Furnish and install Min R-30 polyisocyanurate over structural steel decking per plans and specifications.
- Furnish and install 5/8" gypsum sheathing over installed insulation per plans and specifications.
- Furnish and install High-Temperature self-adhered underlayment per manufacturer's specifications.
- Furnish and install 24 ga Kynar coated 16" wide double folded standing seam roof systems per plans and specifications.
- Fabricate and install 24 ga Kynar coated hips, ridges, eave, and peak metal per the manufacturer's specifications.
- Fabricate and install 24ga Kynar gutter system with downspouts at eaves per drawings and specifications.
- Furnish and install all counter flashings, and terminations required for a watertight roof system.

ROOFING AND SHEET METAL

MIAMI • ORLANDO • TAMPA

WARRANTY

- Owner shall receive a 20-year warranty from the standing seam roof system manufacturer.
- Owner shall receive a 2-year workmanship warranty from P&A Roofing and Sheet Metal.

We hereby propose to furnish labor and materials - complete in accordance with the above roofing specifications, for the sum of:

$389,000.00

(Three Hundred Eighty-Nine Thousand Dollars)

EXCLUSIONS:

- All M.E.P.
- All PEMB
- All liquid waterproofing systems.
- All soffit.
- All pre-engineered canopies and associated trim.
- All composite wall panels.
- All premium color selections.
- All louvers and access doors.
- All Fixed ladders.
- All signage and associated trim.
- All metal flashing not directly related to the roof system.
- All EIFS, stucco, brick or stone and associated trim.
- All Saw cutting of all CMU and tilt walls.
- All caulking at coping face and vertical wall transitions.
- Providing or installation of all roof access ladders.
- All insulation or cover board at the vertical walls.
- All wind rider warranties.
- All Textura Construction Payment Management fees.

NOTES:

- Payment terms are to be negotiated.
- Add 1.5% for payment and performance bond if required.

ROOFING AND SHEET METAL

MIAMI • ORLANDO • TAMPA

ACCEPTANCE OF PROPOSAL

The above prices, specifications and conditions are satisfactory and are hereby accepted. You are authorized to do the work as specified. Payment will be made as outlined above.

Hey Jeff,
I can provide you with the add for the soffit (M2) on A141A & B.

I cannot provide or install ACM panels or any vertical metal panels.

Regards,
Ryan

Hey Ryan,

Still struggling with this scope and prices all over the board.

1. Did you include the fascia and the soffit material shown?
    1. See details on A551 and finish call outs of 300-31 on A201 and A202.
    2. If not, I need you to include it. You can break it out as an add.
2. Can you include the ACM panels?
    1. See details on A551 and finish call outs of 300-35 on A201 and A202.
3. Can you include the metal soffit system shown on the RCP's?
    1. See sheets A141A and A141B with finish call outs of M2.
        i. I believe the M2 may be the same soffit material shown in the details on A551.

Feel free to call me with any questions.

(2.2) WSI (Wharton-Smith Supplemental Instructions)

The Bidder acknowledges receipt of the following Wharton-Smith Supplemental Instruction(s):

WSI No.	001	Dated:	10/22/24	WSI No.	002	Dated:	10/24/24
WSI No.	003	Dated:	10/24/24	WSI No.	004	Dated:	10/28/24
WSI No.	005	Dated:	10/31/24	WSI No.	006	Dated:	11/4/24
WSI No.	007	Dated:	11/6/24	WSI No.	008	Dated:	11/8/24

(2.3) ASI (Architect's Supplemental Instructions)

The Bidder acknowledges receipt of the following Architect Supplemental Instruction(s):

ASI No.	NA	Dated:		ASI No.		Dated:	

(2.4) Addenda

The Bidder acknowledges receipt of the following Addenda:

Addenda No.	NA	Dated:		Addenda No.		Dated:	
Addenda No.		Dated:		Addenda No.		Dated:	

(2.5) Additional Acknowledgements

The Bidder acknowledges that Bidder has considered and included the requirements of the Subcontractor Bid Manual, dated October 17, 2024, and all other sections, in preparing this Bid.

The Bidder acknowledges time is of the essence and the Project will begin March 6, 2025, with Substantial Completion that must be achieved no later than June 30, 2026, and has included all costs for any required extended hours, extra shifts, weekend and holiday work which may be necessary to complete the Work on schedule.

This Bid will remain subject to acceptance for ninety 90 calendar days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Construction Manager.

The Bidder understands and agrees that the Construction Manager and/or Owner reserves the right to reject this Bid or any and all bids for the Project, and to waive minor irregularities or informalities in any bid received and to award the contract to such Bidder as may be in the Owner's best interest.

The Bidder has reviewed the requirements of the Contract Documents and has submitted a Bid based on the materials, equipment and systems required by the Contract Documents without exception and as required by all governing jurisdictional authorities for all locations of the work and as required by the Contract Documents.

The Bidder hereby acknowledges reviewing and accepting without modification the Wharton-Smith, Inc. Subcontract Agreement and agrees to execute same if awarded the project or portion(s) of the Project.

Hey Chris,

I am scoping out this trade package and wanted to make sure you were NOT picking up the Prosoco behind stucco.
Stucco guys have been instructed to include it in their scope of work.

.
Hi Amber,

I am reviewing your proposal and noticed you all included the stucco as well. I don't think that particular scope is correct.

- The stucco is 5/8" thick and will not require any lath due to thickness.
- Make sure you are quoting the Prosoco AVB at the stucco.
- Your stucco number is also very low comparted to the other 2 numbers.
- Need an add alternate for potential stucco at the east elevation shown on detail L1 on sheet A201.

With that being said, I probably back the stucco out of your package or list it separately under the stucco package.

Also, can you confirm that the remainder of your fluid applied AVB is either Prosoco or the Dupont Tyvek Fluid Applied AVB?

Copyright © DH Pace Company, Inc. 2020 • All Rights Reserved

BID CLARIFICATIONS:

1. DH Pace has quoted a maximum of 9 deliveries on this project.
2. Proposal subject to mutually agreeable contract terms.
3. If this project is under consideration for a Direct Purchase By Owner program, DH Pace must receive the following: 1) Owner Purchase Order; 2) Tax Exemption Certificate; 3) Certification of Entitlement form. If DH Pace does not receive the Tax Exemption Certificate and the Certificate of Entitlement form from the owner, then DH Pace invoices will include sales tax to be paid for by the owner.
4. Costs are currently rising at sudden and unpredictable rates. This proposal is based on current pricing from Seller's suppliers and includes all price increases and surcharges levied by those suppliers and known by Seller as of the date of this proposal. This proposal is valid for acceptance for 30 days. After 30 days, the Seller reserves the right to require an approved change order before the order can be released into production to compensate for any supplier price increases or surcharges announced after the date of this Proposal and prior to the release of materials for fabrication. Seller will provide written documentation of the Supplier increase notice upon request.
5. Payment terms-Net 30 Days. No discount terms allowed.
6. All products quoted with manufacturer's standard lead time, after returned approved submittals.

INSTALLATION CLARIFICATIONS AND PRICING OPTIONS:

1. If a lull/forklift is not available onsite for unload of doors, DH Pace will provide a rental lift at $1,800 per delivery.
2. This proposal includes 3 mobilizations to the jobsite. Additional mobilizations – Add $1,500.
3. One 1-hour jobsite meeting per week onsite is included in bid. Additional meetings may be subject to change order.
4. A DH Pace representative will inspect the jobsite 1 week prior to scheduled mobilization to check frame installation and confirm a generally unobstructed path to work area. If DH Pace determines jobsite conditions will have an adverse impact on installation schedule or material safety, inspector will work with contractor to identify a mutually agreeable date to reschedule mobilization.
    a. Readiness is generally defined as a work area have walls and ceilings up, painting of walls and door frames completed, flooring installed, and a clear path for installers to convey and install doors in a timely manner.
    b. If frames are found to be out of plumb/level/square or are otherwise improperly installed, inspector will report the quality issues to contractor for correction and schedule door installation mobilization accordingly.
5. This EXCLUDES in-wall blocking.
6. Undercutting of doors due to flooring conditions is EXCLUDED. ***Pricing available upon request.***
7. Offsite parking costs are EXCLUDED.
8. Composite clean up is EXCLUDED.

BID EXCLUSIONS:

1. Enhanced Hurricane Protection Areas (EHPA) as we do not believe that is required on this project. DH Pace has bid the exterior openings as standard level D impact rating. If level E is required, please contact DH Pace for additional pricing
2. Set-up of key cabinet and any associated training.
3. Borrowed lites, as they are aluminum.
4. Fire rated inspectors.
5. Egress Inspectors.
6. Wiring diagrams.
7. Grout and mineral fiber insulation.
8. In wall blocking.
9. Glass and glazing.
10. BIM modeling.
11. Receiving, unloading, material handling, and installation of all hollow metal frames.
12. Textura.

Acceptance of this offer by the Purchaser shall constitute an order and contract for the purchase of the items described herein. We shall not be liable for the non-performance of this contract, in whole or in part, if such non-performance is the result of any cause or causes beyond the reasonable control of DH Pace, including (but without limitation by reason of enumeration) the following: fires, strikes, differences with employees, casualties, delays in transportation, shortage of cars, government restrictions, or other cause: nor shall these exceptions be limited or waived by any other terms of the contract, whether printed or written. Terms: **Net 30 days**, subject to the approval of DH Pace credit department. Progress billings made to meet project requirements will be invoiced when applicable and subject to the same terms. In the event it shall become necessary for DH Pace to enforce any of the provisions of this agreement, Purchaser agrees to pay all costs and expenses associated with such enforcement, including without limitation, the fee of a collection agency and an attorney. Price above excludes sales tax. Tax exempt certificate must be presented.

The proposal described herein, including all price(s) quoted, is made conditionally upon Buyer's continued credit status and must be accepted by Byer as made by Seller. To accept this Proposal, Buyer must date, sign and return the original copy hereof to Seller within 30 days after the date hereof. Unless expressly disclosed and stated, the amount of any sales and use tax is not included in this proposal.

Buyer acknowledges and agrees that each and all of the terms and conditions on Attachment A (**TERMS AND CONDITIONS**) are a part of this Proposal and that upon Buyer's acceptance of this Proposal shall constitute a valid and binding contract between the parties and all prior proposals, discussions and agreements respecting the subject matter hereof are cancelled. **DEPOSIT ON SPECIAL ORDER ITEMS IS NON-REFUNDABLE.**

Attachment A: TERMS AND CONDITIONS

Terms. The products ("Products") described in this contract and the labor necessary to install the Products ("Labor") are herein collectively referred to as the "Work".

Condition Precedent. Buyer and Seller agree that if, following Buyer's acceptance hereof, a contract is to be executed by them, Seller's performance hereunder shall be subject to the condition precedent that the terms and conditions of such contract are acceptable to Seller.

Scope of Work. Seller agrees to perform for Buyer the Work at the Project. Buyer acknowledges and agrees that: (i) the prices quoted by Seller for the Products are based upon plans, specifications, verbal information or sketches as indicated herein and the addenda hereto; and (ii) that the Work contemplated under this Proposal is fully and correctly described herein.

Unless included in the description of and prices quoted for Products, glass, glazing, painting and electrical wiring is excluded under this Proposal and will be provided only upon receipt of a supplemental order signed by Buyer.

Proposal Price. Conditional upon Seller's prior approval of Buyer's credit, Buyer will pay Seller the unpaid balance for performance of the Work within 30 days of the date of Seller's invoice. If performance of the Work extends over 30 days, Buyer agrees to pay Seller progress payments under Seller's regular billing terms and if Products have been delivered to the Project or stored in a mutually agreed location, Buyer agrees to pay an amount not to exceed 90% of the Proposal Price in payment of the cost of such Products.

If payment of any sum is not made when and as due under this Proposal, Buyer shall pay interest on such delinquent sums at the rate of 1.50% per month or, the highest contract rate allowed under applicable law.

If following Buyer's default Seller refers this account to an attorney for collection, Buyer agrees to pay all attorneys' fees incurred by Seller whether or not a lawsuit for collection is instituted, and all other costs of collection and litigation.

Contract Time. Installation dates are estimates only and Seller cannot guarantee commencement of Work or completion thereof on any given date. Completion dates cannot be given until Seller has been furnished with complete approved drawings and any additional information it may request. Seller shall not be liable for total or partial failure to complete or for any delay in delivering Products or Labor under this Proposal. Seller shall not be liable in any event for any special or consequential damages on account of failure or delay in performance regardless of cause.

Work Performance. Performance of the Work will be made by Seller in a prompt manner but Seller cannot be responsible for damage or delay due to acts of God, accidents, civil disturbances, delays in transportation by common carrier, strikes, war, unavailability of material or other cause beyond the reasonable control of Seller.

If Products are installed before a finished floor is completed, warranty is limited and Seller assumes no responsibility for fitting the Product to the floor. An additional charge may be made to Buyer for returning to the Project for adjustments to the Product.

Seller assumes no responsibilities for failure of installation of the Product due to structural deficiencies in an existing building. Buyer shall prepare the Project for installation in accordance with requirements of Seller.

If special work, requiring additional material and labor is required to meet conditions other than those specifically described in this Proposal, Buyer agrees to pay an additional charge therefore.

Seller shall be allowed uninterrupted and exclusive access to the Project during performance of the Work.

No Product may be returned without Seller's prior written approval. All Product returned is subject to a minimum of 25% restocking fee.

Cancellation. In the event Buyer cancels this Proposal after the Seller has commenced Work, Buyer shall forfeit the amount of the down payment given to Seller at the time of the execution of this Proposal, and in addition, shall pay to the Seller such proportion of the total Proposal Price as the amount of Work bears to the total amount of Work agreed upon to be furnished under this Proposal, plus a sum equal to 25% of the total Proposal Price as liquidated damages, which amount is to be paid within 30 days from the date of such cancellation.

In the event of Buyer's insolvency this Proposal shall be cancelled and Seller shall have no further obligations to Buyer hereunder.

Insurance. Seller shall carry workmen's compensation and public liability insurance to cover the Work. Seller shall not be liable to indemnify, hold harmless or protect in any way the Buyer, or any other party involved in the Work, whether an employee of Seller or Buyer or any third party, except to the extent of the workmen's compensation and public liability insurance maintained by Seller.

Buyer shall keep the Project adequately insured against any loss to Seller by reason of damage to Seller's Product or Work or Seller' vehicles, equipment and tools by vandalism, fire, water, windstorm and any other occurrence during the course of Work.

Alterations. Any alterations or modifications initiated by Buyer must be agreed upon between the parties and the price fixed by them before work on such alteration or modification shall commence. Payment for such alteration or modification shall be made at the time of the completion of the Work.

Permits and Licenses. Buyer shall be responsible for securing the necessary permits and licenses for the Work at Buyer's own cost and expense.

Warranties. Seller warrants the Product sold to be free from defects in material and workmanship under normal and intended use and service. This warranty extends only to the Buyer and expires one year after the date of delivery or installation of the Product by Seller.

Parts and labor for service work are warranted for the following periods: All replacement parts 90 days; labor-service 30 days. Seller's sole obligation is limited to repairing or replacing any parts which shall be determined by Seller to be defective and is conditioned upon Buyer giving notice of any such defect to Seller within the warranty period. If Seller concludes that repair or replacement is necessary, Seller will commence work within a reasonable time after the decision to repair or replace is made.

This warranty does not apply to any Product which has been altered or repaired by any person not authorized by the Seller or which has been subjected to misuse, neglect or accident.

Seller assumes no liability for incidental or consequential damages. Warranties implied by law are limited to duration to one year period described above.

Wood Products will be guaranteed only if properly protected within 10 days of delivery or installation by Seller with a prime and finish coat of manufacturer's recommended paint.

No warranty will be honored unless the Proposal Price has been paid in full, including any applicable service charges.

Modification of Proposal. Any modification of this Proposal or additional obligation assumed by either party in connection with this Proposal shall be binding only if evidenced in writing signed by each party or an authorized representative of each party.

Governing Law. It is agreed that this Proposal shall be governed by, construed and enforced in accordance with the laws of the state in which the Project is located.

SECTION 4 – BID REQUIREMENTS AND CONDITIONS

See Bid Manual

SECTION 5 – BID PROPOSAL EVALUATION

5.1 GENERAL

5.1.1 Bid Proposals will be evaluated based upon review of the following:

A. Cost – The evaluation of this criterion will be based on the Bidder's total base bid, bid alternates, unit prices.

B. Value Engineering – This criterion measures the ability of the Bidder to identify potential areas of cost savings or improvements of the final project.

C. Bidder's ability to meet all other criteria outlined herein.

5.1.2 Reference the Instructions to Bidders section of this Bid Manual and the Bid Form for more information regarding detailed requirements of the Bid Proposals.

5.1.3 In evaluating Bids, Wharton-Smith, Inc. shall consider the submission of the Bidders, and whether or not the Bids comply with the prescribed requirements as outlined in these Instructions, the Bid Form, this Bid Manual, and all associated Owner and Bid Related documents provided with this Bid Package.

5.1.4 Wharton-Smith, Inc. may conduct such investigations and require supplemental information as it deems necessary to assist in the evaluation of any Bid and to establish the responsibility, qualifications and financial ability of the Bidders, proposed Subcontractors, proposed equipment and material suppliers, and other persons and organizations to provide the materials in accordance with the Contract Documents to Wharton-Smith, Inc.'s satisfaction within the prescribed time.

5.1.5 Bidder shall, upon request of Wharton-Smith, Inc., submit documentation evidencing its capability to execute the work properly within the time specified. This information must be received by Wharton-Smith, Inc. within ten (10) calendar days of Bidder receiving written request.

5.2 RECOMMENDATION AND APPROVAL OF RANKING

5.2.1 The CMAR will review all Bid Proposals that are received in conformance of the requirements herein and provide a recommendation to the Owner. The Owner, at its sole discretion, may accept the CMAR's recommendation or re-evaluate the Bid Proposals. The Owner will establish and approve the final recommended of award for the Bid Package. The Owner will be the sole judge of its own interests, the proposals, and the resulting agreements. The Owner's decision will be final.

5.3 AWARD OF CONTRACT

5.3.1 Award shall be based on products, equipment and materials named in the Contract Documents. Consideration of any decisions regarding substitution shall not be made until after Award of Contracts.

5.3.2 If the Contract is to be awarded, Wharton-Smith, Inc. will give the Bidder a Notice of Award after the Owner's agreement of the Bidder to receive Award.

5.3.3 The Awarded Bidder will be required to enter into a Purchase Order Agreement or Subcontract Agreement with Wharton-Smith, Inc. This agreement will contain the same terms and conditions as shown in the sample agreement provided in this Bid Manual. The Purchase Order or Subcontract will also contain the defined work scope as shown in this Bid Manual. Modifications to this Agreement will not be allowed.

SECTION 6 – SCOPE OF WORK

The Bidder shall utilize the information within this section of the Bid Manual to assist in development of the Bid Proposal. The outlined scopes herein are not intended to detail the complete scope of the Bid Package. The Bidder is responsible for reviewing the Contract Documents to understand the full scope and requirements.

The Subcontractor Is to furnish all labor, equipment, material, subcontracts, and supervision required to complete the Scope of Work generally described as the **DOORS/FRAMES/HARDWARE PACKAGE**, detailed herein, for the Public Utilities Field Operations Facility. All work shall be complete and in accordance with the Contract Documents. In the event of conflicts between the Scope of Work and other parts of the Contract Documents, this section shall take precedence.

6.1 WORK OVERVIEW

Provide complete, all required **Doors, Frames, and Hardware Work**, for the Project known as **City of Port Orange Public Utilities Field Operations Facility.**

The Work included in this Subcontract is project specific and outlines the general Scope of Work for this Subcontract, all in complete accordance with the Plans and Specifications as defined in Exhibit "C" attached hereto.

Other Specification Sections may form a part of this Subcontract, whether listed or not.

The Scope of this Subcontract includes, but is not necessarily limited to the furnishing and installation of the following Work by this Subcontractor.

1. Visitors - No one shall be admitted to the jobsite by the Subcontractor, except as necessary to perform the Work hereunder, without, in each instance, first obtaining the approval of the Contractor.

2. Replace Guardrails - This Subcontractor shall install, maintain and replace all required guardrails in accordance with OSHA Standards for the purpose of safety at all openings and suspended work at the locations not protected and where Subcontractor is performing work. Subcontractor is also responsible for all construction fencing, temporary walkways, overhead protection, signage, and/or barricades to perform work outside the boundaries of Contractor furnished construction fencing.

3. Ongoing Operations/Residential Environment/Parking - Without limitation of the foregoing, Subcontractor understands that the Work may be constructed near on-going business or facility operations and may be in and around private residences and neighborhoods. Subcontractor shall use its best efforts, in conformity with the applicable standard of care, to perform the services hereunder in a manner which will not interfere with the on-going business operations and residences. All construction employees are to enter and park in the construction parking area designated by Contractor. Subcontractors are responsible for all off-site parking of employees which may be required and busing to jobsite via route identified by Contractor. Busing of employees, jobsite vehicles or deliveries shall not be routed through surrounding neighborhoods. **Excludes off-site parking.**

4. Jobsite Storage - Subcontractor is aware of the existing site conditions and the limited space availability. On-site storage and staging of materials and equipment will be allowed, only as specifically approved by Contractor's Project Superintendent or Project Manager. All deliveries of Subcontractor will be coordinated through Contractor. If scheduled deliveries are not ready at appointed time, Contractor may refuse acceptance and deliveries will be rescheduled. All cost and/or delays associated with the refusal of deliveries will be the responsibility of the Subcontractor. Subcontractor has included in this Subcontract price, all off-site storage as may be required, including, but not limited to transportation of materials from staging area to site.
9 deliveries included

5. Phased Turnover - This Subcontractor acknowledges that the Project may have phased turnover in accordance with the Project Schedule and that several mobilizations may be required and are included as part of this Subcontract. Additionally, Subcontractor acknowledges that the Project may have multi-buildings and that concurrent work on each building will be required in order to complete some phases ahead of the Project Schedule and all costs for doing same are included. **3 mobilizations included**

6. Owner's Facilities - All Project employees are subject to the Owner's rules and regulations while employed within their property limits. Use of the Owner's other parking lots and facilities by this Project's workmen are not permitted.

7. Limitation of Noise/Hours of Work - Subcontractor shall comply with all city, county, state and local jurisdictional authorities' Noise and Hours of Work Regulations.

8. Care and Custody: This Subcontractor shall provide labor and equipment to receive, unload, inventory, store, and provide for the care and custody of all materials it procures for its own behalf, or is furnished by others for installation by this Subcontractor, until such time as the material is permanently installed and accepted by the Owner and Architect. Storage containers to be provided by Contractor. **Frames tailgate delivery only. All unloading, receiving, staging by others.**

9. Install all ~~**Frames**~~**, Hollow Metal Doors and Finish Hardware Work** in strict accordance with the Contract Documents, complete, turnkey and fully functioning to the designer's intent, specifically including all details, sections and notes contained within the Contract Documents. **All frames installed by others.**

10. Subcontractor certifies that it meets the minimum Contractor Qualification requirements as further detailed in the Specification and elsewhere in the Contract Documents.

11. The installing Subcontractor shall attend and participate in the pre-installation conference to be held at the Project Site and conducted in concert with Owner, the Architect, the installer, and Contractor. **Job site meetings may be attended via conference call or teams.**

12. This Subcontractor shall provide and install Complete Door, Frame, and Hardware package. This includes, but is not limited to, all solid core wood doors, hollow metal doors, hollow metal door frames, hollow metal window frames, fire rated door assemblies, wood and metal lite kits, door hardware and all other incidental items required by this Scope of Work all in strict accordance with the Contract Documents, manufacturer's specifications, governing building codes, and the Authority Having Jurisdiction. **Frames tailgate delivery only. All unloading, receiving, staging by others.**

13. Provide and install all Hollow Metal Doors, Wood Doors, and Finish Hardware Work in strict accordance with the Contract Documents, complete and fully functioning to the designer's intent, specifically including all details, sections and notes contained within the Contract Documents.

14. This Subcontractor shall provide and install doors, frames, and hardware by preapproved manufacturers in strict accordance with the Contract Documents. **Frames tailgate delivery only. All unloading, receiving, staging by others.**

15. This Subcontractor shall **furnish** ~~provide~~ all hollow metal door frames and hollow metal window frames in strict accordance with the Contract Documents. All hollow metal frames are to be delivered to the Project site as directed by Contractor to allow for normal installation in concrete masonry walls, masonry partitions, and drywall partitions. **All frames installed by others.**

16. This Subcontractor shall **furnish** ~~provide~~ all door frames protected and packaged as required in strict accordance with the Contract Documents. **Manufacturers standard packaging of all materials.**

17. This Subcontractor shall provide all miscellaneous anchors, clips, fasteners, ~~flashings, extrusions, shims and~~ spacers necessary for the installation of all door frames.

18. This Subcontractor shall provide and install all doors in strict accordance with the door schedule in the Contract Documents. All doors are to be prepped for appropriate hardware and lites at the factory. Glazing of door light kits, transom panels, side view panels, and other hollow metal windows (normal and fire rated) is not included as it shall be provided by the glass Subcontractor, however the vision trim kits are to be provided as part of this scope of work

19. This Subcontractor shall **furnish** ~~provide~~ door finishes in strict accordance with the Contract Documents.

20. This Subcontractor shall provide all doors delivered to the Project site with nonpermanent labels designated by door opening.

21. This Subcontractor shall provide all doors with fire, smoke ~~and STC~~ rated labels in strict accordance with the Contract Documents. **See attached proposal for clarifications.**

22. This Subcontractor shall provide all door hardware including, but not limited to, all hinges, cylinder cores, keying, panic devices, wiring harnesses, ~~power supplies~~, wall and floor stops, closers, pulls, handles, weather-stripping,

Power supplies by security per hardware sets in 087100.

locks, surface bolts, lock guards, latch sets, exit devices, kick plates, push/pull plates, seals, drip caps, thresholds, silencers, mullions, and door sweeps.

23. This Subcontractor shall provide all required cylinders at all aluminum storefront doors. All hardware required at aluminum storefront doors, minus referenced cylinders, is provided by others.

24. Provide and install all temporary cylinders and cores at all exterior doors, electric room doors, and other locations at the discretion and direction of the Wharton-Smith Superintendent, for locking and securing the premises during the construction phase.

25. Furnish and install all doors, frames, and hardware required of the plans even if not included on the door schedule. As required of the specification, should any particular door or items be omitted in any door or window schedule, or scheduled hardware group, furnish door, or items with hardware same as required for similar purposes.

26. This Subcontractor shall coordinate that all door hardware, door frame prep and associated electrical hardware (hinges, strikes, etc.) will integrate with the electrical contractor's access control equipment for a fully functioning turnkey access control system.

27. This Subcontractor understands and agrees that if discrepancies are noted between the hardware shown on the door schedule and the hardware shown in the specifications, the listed hardware group number detailed in the specifications shall prevail. **Door schedule doesn't have hardware sets defined.**

28. This Subcontractor shall provide and index one (1) key cabinet that allows room for expansion for 150% of quantity of keys required for the project.

29. This Subcontractor shall provide all required submittals for approval prior to release for fabrication. Material is to be on site ready for installation in accordance with the Project schedule.

30. This Subcontractor shall provide the required hardware schedule for approval prior to release for fabrication. Hardware is to be on site ready for installation in accordance with the Project schedule.

31. This Subcontractor shall provide all State of Florida Product Approvals for this Scope of Work as required by the Contract Documents, governing building codes, and the Authority Having Jurisdiction.

32. This Subcontractor understands and agrees that the Project will require multiple deliveries by this Subcontractor. All associated costs for multiple deliveries as directed by the Contractor are included. **9 deliveries included**

33. This Subcontractor includes providing bituminous coating of hollow metal frames in concrete wall/masonry partitions, as necessary. **By frame installer.**

34. This Subcontractor has reviewed the Project Schedule and understands that the Subcontract amount includes all costs associated with material expediting and manpower to meet the Project Schedule.

35. Subcontractor certifies that it meets the minimum Contractor Qualification requirements as further detailed in the Specification and elsewhere in the Contract Documents.

36. The Subcontractor shall attend and participate in the pre-installation conference to be held at the Project Site and conducted in concert with the Owner, the Architect, the Installer, and Wharton-Smith.
Job site meetings may be attended via conference call or teams.

37. Provide all warranty requirements including signing all documents required of the Specifications..

38. Subcontractor shall provide all warranties as called for by the Contract Specifications.

39. Install all temporary cylinders and cores at all exterior doors, electric room doors, and other locations at the discretion and direction of the Contractor's Superintendent, for locking and securing the premises during the construction phase. Remove temporary mechanisms and replace with permanent cylinders or cores upon completion of the project and at the direction of the Wharton-Smith Superintendent.

40. Provide all execution (installation) of the materials furnished as required of the referenced Specifications and elsewhere in the Contract Documents also including in particular compliance with all examination, preparation, environmental conditions, installation, protection during construction, adjusting and cleaning, and demonstration.
Frames tailgate delivery only. All unloading, receiving, staging by others.

41. Install products in accordance with manufacturer's recommendation and requirements.

42. Receive, unload, inventory confirmation, and store at the jobsite all hollow metal doors, and finish hardware in strict accordance with all NWWDA i.s. 1-a requirements.

43. Install all hollow metal doors in strict accordance with the Contract Documents.

44. Install all finish hardware, also including but not limited to, door seals, lock blocks, bumpers, metal stops, holders, thresholds, ~~lock guard~~s, drip edges, door sweeps, rain caps, hinges, locksets, latch sets, exit devices, kick plates, push/pull plates, closers, silencers, ~~and mullion~~s.

45. Check and adjust all hardware items for complete and proper operation and to the satisfaction of Contractor, Architect, and Owner. Adjust door closers to enable door to latch after test and balance has been completed. Subcontractor shall verify all door closers are set and operating properly and in accordance with ADA and Regulatory requirements. Subcontractor must be present for all required door pressure inspections and testing as required per project schedule and must provide proper adjustments to door to meet requirement.

46. Install temporary doors and lockset for all ~~IDF~~, electrical ~~and elevator machine~~ room doors. Remove temporary and install permanent hardware when directed by the Wharton-Smith Superintendent. **One pair electrical room doors only on this project.**

47. Furnish necessary miscellaneous fasteners, specialty tools, equipment, hand tools, carts, and all consumable materials required for the proper and complete performance of the work.

48. Subcontractor shall install all permanent cores to all aluminum storefront entrances noted on the Contract Documents.

49. Install surface bolts in lieu of flush bolts at all EHPA openings to comply with Florida Building Code for windstorm as directed in Contract Documents.

50. Door hardware for the aluminum storefronts and curtain wall system are not included and shall be installed by that specialty contractor.

Other Items of Note:

A. Wharton-Smith will be utilizing a software called **Team Player** to process monthly pay applications. The fee for this service is $10.00 per Pay Application, regardless on the number of revisions in each month. Please review the Team Player Welcome Letter that has been included in the Bidding Documents which contains embedded links for training documentation and videos. This will be a requirement for all subcontractors on this project.

B. With respect to Article 22 of this Subcontract Agreement, the Owner will exercise the right to purchase materials directly as part of the Owner Direct Purchase Program. This Subcontractor shall actively participate in the Owner Direct Purchase Program for this Project Prior to the Subcontractor's final payment, a final reconciliation of Owner Direct Purchases against this Subcontract will be performed. This does not apply to temporary fence.

C. On-Site Work Hours: Limit work to between 7 a.m. to 5 p.m., Monday through Friday, unless otherwise indicated. Work hours may be modified to meet Project requirements if approved by Owner and authorities having jurisdiction.

D. Employee Screening: Comply with Owner's requirements for drug and background screening of Contractor personnel working on Project site. Subcontractor shall maintain list of approved screened personnel with Owner's representative.

6.2 BID PRICING / ALTERNATES

The bid pricing shall be broken out as follows and as indicated on the bid form. The City of Port Orange has the sole discretion to accept any, all, or none of the work items for this scope of work based on the bid pricing received. Subcontractor to price the work accordingly.

6.2.1 This bid does not include any bid alternates.

6.2.2 Retainage will be held at 5% for the duration of the Contract and will be released upon retainage release by the Owner.

6.3 CLARIFICATIONS

6.3.1 The Subcontractor will be responsible for protecting ~~all~~ our new ~~and existing~~ work throughout the site from damage that could be caused by performing the Scope of Work. Any damage caused by Subcontractor is the responsibility of Subcontractor and Subcontractor will bear the costs of said damage. See pricing option on proposal.

6.3.2 The Subcontractor will be required to attend all project progress and coordination meetings as requested by Wharton-Smith, Inc. or the owner. Job site meetings may be attended via conference call or teams.

6.3.3 All materials must be submitted upon and approved prior to being sent to the jobsite, all non-approved items may be rejected and returned at the Subcontractor's cost.

6.3.4 Subcontractor is responsible to coordinate with the CMAR and all other Subcontractors as necessary.

6.3.5 Subcontractor will be responsible for all general notes indicated on the drawings that pertain to this scope of work.

6.3.6 ~~Subcontractor will obtain all permits, licenses, certificates, and coordination efforts, or any such approvals of plans or specifications as may be required by federal, state and local laws, ordinances, rules and regulations, for the proper execution and completion of the work specified herein.~~

6.3.7 Subcontractor will be responsible for offloading all equipment deliveries and proper short-term and long-term storage requirements per the manufacturer's requirements. Provide all equipment necessary to offload and set equipment including cranes. Frames tailgate delivery only. All unloading, receiving, staging of frames by others.

6.4 GENERAL REQUIREMENTS

6.4.1 The Subcontractor will be bound to the CMAR to the same extent the CMAR is bound to the Owner by the terms of the Contract Documents.

6.4.2 The Scope of Work shall comply with all Federal, State and Local Codes.

6.4.3 This is a lump sum agreement, including freight, incidental fees, and all applicable taxes. A schedule of values for submittals, materials, checkout, startup and closeout paperwork will be submitted with the return of the signed agreement for review and approval by the CMAR's Project Manager.

6.4.4 If requested by the CMAR, the Subcontractor will assist in cost loading of the project's master schedule. Schedule of Values will follow the cost loaded actives provided by Subcontractor.

6.4.5 No billing will be accepted without an approved Schedule of Values.

6.4.6 A detailed Schedule of Values must be provided within two (2) weeks of a contract being executed should your bid be accepted.

6.4.7 No escalation costs are permitted, pricing will remain firm through the project duration.

6.4.8 The Subcontractor is required to abide by the Wharton-Smith, Inc. safety program and OSHA standards. Excavation, confined space plans, and MSDS sheets will be required for all applicable work.

6.4.9 Subcontractor is responsible to develop and provide a site-specific safety plan for this scope of work.

A. Safety plan will list all potential hazards and competent persons who will be supervising the work.

6.4.10 Subcontractor will maintain an OSHA Certified competent person on site at all times while the work is conducted.

6.4.11 All Subcontractors will be required to follow security protocol of the City of Port Orange and Wharton-Smith at all times.

6.4.12 OSHA and the CMAR's safety standards will be followed at all times.

6.4.13 Proper PPE will be worn by any personnel on the jobsite, including but not limited to delivery drivers, startup and commissioning representatives, manufacturer's representatives, and other personnel.

6.4.14 Materials are to be released as required to maintain Schedule, but Subcontractor is to inform CMAR of material releases and deliveries. No item will be released for production without approval from the Engineer.

6.4.15 All equipment will be labeled and tagged in accordance with the Contract Documents.

6.4.16 Provide all management necessary to adequately support field activities and maintain the Project Schedule.

6.4.17 ~~Fulltime and~~ onsite supervision is required while any work by Subcontractor is being performed. If Subcontractor fails to do so, the CMAR will provide supervision and all costs will be back charged to Subcontractor. The Subcontractor's superintendent will be required to attend all requested progress, safety, scheduling, coordination, and quality control meetings. Meetings of other natures may be required as requested by Engineer, Owner, or the CMAR. **All on-site supervision will be by a third party installer.**

6.4.18 The Subcontractor will be required to coordinate with all other construction trades as required to complete this Scope of Work.

6.4.19 Anticipated (general) sequencing – Your crews may be interfacing with several other trades including mechanical, concrete, piping, and testing agencies. Reasonable time provisions need to be made for coordination and time for these trades to complete their work.

6.4.20 All deliveries will be made between 7am-3pm M-F; all deliveries will be escorted onto the site by WSI. A 72-hour notice to WSI's Superintendent will be required prior to any deliveries.

6.4.21 The Subcontractor may not utilize any area of the project site for storage without approval from the CMAR. If the Subcontractor plans to utilize storage space, the Subcontractor will submit, to the CMAR, a site plan detailing the areas being requested for storage.

6.4.22 An emergency contact list will be provided by the Subcontractor. This list will include at least one point of contact that is available 24 hours a day.

6.4.23 Furnish appropriate Material Safety & Data Sheets (MSDS) and warranty documentation with shop drawings for approval.

6.4.24 Subcontractor is required to coordinate with all applicable authorities as required

6.4.25 The Subcontractor utilizing an Employee Leasing Company for Workers Compensation Insurance coverage will not be allowed to use any Subcontractor on the project (i.e. no third-party subs)

6.4.26 It is the sole responsibility of the Subcontractor to secure any and all tools, materials, and equipment stored on the site. Wharton-Smith, nor the Owner, will be responsible for any theft, vandalism, or damage to the Subcontractors property. The Subcontractor is responsible for all security measures required to secure their resources.

6.4.27 Subcontractor will provide temporary generators as needed and fresh drinking water for their employees. Subcontractor is only responsible for their work and personnel.

6.4.28 The Subcontractor is responsible to follow all site plan details and to adhere to all specifications applicable to the Scope of Work items above.

6.4.29 All hazardous material will be properly disposed of at an offsite location.

6.4.30 The Subcontractor will be responsible to utilize available dumpsters for debris and daily clean-up. All areas will be left clean at the end of each day.

6.4.31 A representative of the Subcontractor knowledgeable of the work will be present at weekly coordination meetings with the General Contractor.

6.4.32 Subcontractor is to provide Daily Reports.

6.4.33 ~~A Superintendent (not~~ Foreman) must be present at all times the Subcontractor's crews are onsite.

All on-site supervision will be by a third party installer.

6.4.34 Pre-Mobilization Jobsite QC/QA Conference - Subcontractor to participate in WSI Quality Control Plan as outlined in the Subcontract Agreement. Subcontractor's Project Superintendent and or Foremen will attend Quality Control Meetings as deemed necessary by WSI including a minimum of one (1) pre-mobilization meeting to be held in advance of Subcontractor's mobilization on site.

Meetings may be attended via conference call or teams.

6.4.35 Subcontractor must have approval for additional work (not included in this Scope) in writing by an authorized W/S representative prior to proceeding with said work.

6.4.36 No claim for extra services rendered or materials furnished will be valid by either party unless agreed to in writing by both parties.

6.5 PROJECT SCHEDULE

6.5.1 The Subcontractor is to provide a detailed schedule for the Scope of Work with the submission of bid. The Subcontractor will coordinate with the CMAR to ensure the detailed schedule conforms to the overall Project Schedule. The Subcontractor will update this Scope of Work Schedule each month and provide a written update to the CMAR.

6.5.2 The Subcontractor will account for not working on holidays and still plan for the Scope of Work to be completed per the overall Project Schedule. Holidays will include those observed by the Owner, the CMAR, and the Subcontractor. The CMAR or Owner observes the following holidays:

A. New Year's Day
B. Martin Luther King Day
C. President's Day
D. Memorial Day
E. Independence Day
F. Labor Day
G. Thanksgiving
H. Day after Thanksgiving
I. Christmas Eve
J. Christmas Day

6.6 SUBMITTAL REQUIREMENTS

6.6.1 The Subcontractor will provide submittal documentation as required within the Contract Documents. Upon execution of this Agreement the Subcontractor will provide a list of anticipated submittals for the Scope of Work. The Subcontractor will provide any additional submittal documentation requested for any materials or services related to the Scope of Work.

6.6.2 All submittals which have any deviation will be supplied with a letter addressing all deviations.

6.6.3 All submittals will be provided with a cover page listing the following information:

A. Project name

B. Submittal title

C. Relevant specification sections

a. Specification sections, with addendum updates included, are to have each paragraph check-marked to indicate specification compliance. Check marks shall denote full compliance with a paragraph as a whole. Any deviation shall be clearly marked by an "X" and numbered to indicate a requested deviation. If deviations from the specifications are indicated, and therefore requested, each deviation shall be underlined and denoted by a unique number in the margin to the right of the identified paragraph, referenced to a detailed written explanation of the reasons requesting the deviation. The remaining portions of the paragraph not underlined will signify compliance with the specifications. Failure to include a copy of the marked-up specification sections along with justifications for any requested deviations to the specification requirements shall be cause for return of the entire submittal with no further review.

D. Subcontractor's contact information

E. Manufacturer's contact information

6.6.4 All submittals will include the following information for each individual piece of equipment or fabrication:

A. Complete model number

B. The tag number of each per the Contract Documents (if applicable)

C. List of major components

D. Specification section (if varied from the submittal prime specification section)

6.6.5 It is the Subcontractor's sole responsibility to ensure submittals are complete and accurate for the complete scope of this agreement. Coordination of submittal information from others working under the Subcontractor is the sole responsibility of the Subcontractor. Subcontractor will not provide submittals with any items marked out of scope or by others if such items are part of the scope of this agreement.

6.6.6 Revised submittals will include a comment response document, this document will respond to every comment in writing and reference the location of all corrections within the revised submittal. Revised submittals will be at no additional cost to the Purchaser.

6.6.7 The Subcontractor may be responsible for any costs incurred by the CMAR due to excessive submittal revisions.

6.7 RECORD DOCUMENTS

6.7.1 The Subcontractor will maintain accurate and current as-built documents. These documents will meet the requirements within the Contract Documents. All survey information will be certified by a licensed surveyor.

6.7.2 Prior to approval of the Subcontractor's monthly pay application, the CMAR may elect to review the Subcontractor's as-built documents. If these documents are found to be inaccurate or not current, up to the date of the pay application, the CMAR may reject the pay application until the Subcontractor provides accurate and current as-built documents. Subcontractor will not be entitled for any additional costs, fees, or other compensation due to rejected pay applications and delayed payments as a result of Subcontractor's failure to provide accurate and current as-built documents.

6.7.3 After completion of the Scope of Work, the Subcontractor will provide complete and final as-built documents within two (2) weeks. As-built documents will be provided as detailed in the Contract Documents

6.8 INSURANCE

6.8.1 Subcontractor will provide the minimum insurance limits required to meet the requirements in this purchase order and all the requirements detailed within the Contract Documents. A sample insurance document is included within the Contract Documents for additional reference.

6.8.2 The Subcontractor will maintain a worker's compensation insurance policy for the complete scope of services. The Subcontractor will not utilize a Professional Employer Organization (PEO) to provide workers compensation insurance.

Attached DH Pace proposal is to be made part of this scope of work.

Re: **Port Orange Public Utilities Field OPS Bldg. – City of Port Orange**
4505 Clyde Morris Blvd. Port Orange, Volusia County, FL 32129

Taylor, Cotton & Ridley, Inc. is pleased to provide a material supply quotation for the above referenced project as follows:
Div. 8: Doors, Frames & Finish Hardware per Specification Section 08 11 13, 08 14 16, 08 71 00

Base Materials:

Section of Hollow Metal Doors & Frames:

Hollow Metal Frames & Doors are quoted per plans & specifications; manufactured by Ceco (Division of Assa-Abloy)
Frames quoted with 5-3/4" jamb depths, 2" face profile. Frames quoted welded at locations
Exterior Hollow Metal Frames are 16 gauge galvanized (A60); Interior 16 gauge cold rolled steel
Anchors at custom jamb depths are welded. Supplied loose at standard jamb depths.
Electrical back boxes included for all electrical hardware preps in HM frames. CONDUIT EXCLUDED.
No STC ratings quoted at this time *(Note: Quoted STC Ratings are Lab rated – any field testing is by others)*
No Lead Lined frames quoted / Bituminous Paint currently included in our scope of work.
Frame lead time tentative 6-8 weeks; Doors 10-16 weeks from approved current shop drawings
Require current approved hardware schedule to order doors and frames
Exclude all glass and glazing as by glass sub-contractor, furnished, and installed.
Exterior Hollow Metal Doors: 16 gauge galvanized, polystyrene core, seamless edge construction.
Interior Hollow Metal Doors: 16 gauge cold rolled steel, honeycomb core, seamed edge construction.

Quantities: 55 each Hollow Metal Frames / No Hollow Metal Special Assembly Frames
20 each Hollow Metal Doors

Note: All frame installation is excluded / Hollow Metal Frames tailgate delivered

Section of Wood Doors, Specification 08 14 16:

Wood doors per plans & specifications: Wood doors manufactured by Masonite Flush Architectural Doors
LEED material compliant products quoted; does not contain added formaldehyde.
Premium AA grade plain sliced walnut face veneers with matching edges
PC5 particleboard and mineral core construction, Factory pre-fit and pre-machined for finish hardware
Blocking & Intumescent seals as required by manufacturer's labeling service
Lites and / or Louver sizes may have been adjusted to maintain the guarantee and / or label.
No STC rated openings quoted at this time. *(Note: Quoted STC Ratings are Lab rated – any field testing is by others)*
No Lead lined openings quoted / EXCLUDE GLASS & GLAZING
Factory Custom Stain Included, written approval of stain color required prior to door fabrication; poly bagged
Lead time 12-22 weeks after approved shop drawings (copy of approved current hardware schedule
Required prior to ordering doors.

Quantities: 38 each Wood doors

Section of Finish Hardware, Specification 08 71 00:
Hardware estimated per plans and specifications, identical to specified products in the hardware schedule
Locksets included manufactured by Sargent (division of Assa-Abloy)
Hardware lead time tentative 8-12 weeks after receipt of current approved hardware schedule and keying information
Electrified hardware components quoted per hardware schedule listing in preamble.
(Card Reader, Card reader equipment, power supplies, cipher locks are excluded and quoted as furnished and installed by low voltage electrified sub-contractor (by others), these items are excluded from our scope of work)
No Automatic Operators quoted at this time, if required, they are excluded and quoted as furnished and installed by others.
Exclude Aluminum Door hardware / Exclude Overhead Door hardware / Exclude Gate hardware.

Quantities: 1 Lot of Finish Hardware

Installation of Frames, Doors and Finish Hardware:

Door Installation Typical inclusions:

TCR Self performs installation of doors and hardware
Receiving, storage, distribution & installation of Door & Hardware materials listed above.
Storage of Doors & Hardware in Distributors Orlando warehouse if Conex not available on site.
Electrical connection by TCR at door: wiring through frame & above by Electrical Contractor or Integrator.
Junction box at each electrical opening is provided by others.
TCR will make connections to specified hardware as listed in hardware set)
power supply installed and located above the door by others.
Daily clean up. Composite crew allowance available upon request, currently not quoted.
Project staffed with working 30 hour OSHA & First Aid and CPR certified superintendent.

Door Installation Typical Exclusions:

Card reader terminations and door monitoring connections excluded.
Aluminum door hardware installation excluded
Frame installation excluded
Glass installation excluded
Conduit & Wire (from locations over 15'-0" of local electrical opening) excluded.
High Voltage connections excluded
Labor to receive, distribute & install hollow metal frames excluded.
Additional protection of doors and frames (other than manufacturer's packaging) excluded.

PLEASE NOTE: **INSTALLATION OF DOORS AND FINISH HARDWARE IS IN CONJUNCTION WITH MATERIAL SUPPLY.**
INSTALLATION IS NOT AN INDEPENDENT QUOTE.
TCR WILL NOT INSTALL MATERIAL FURNISHED BY A THIRD PARTY.

BASE BID:

Material Supply Price:	**$**	**267,557.00 (Tax Included)**
Installation Price:	**$**	**56,448.00 (Tax Excluded) ****
Bid Package Price:	**$**	**324,005.00 ***

*Payment & performance Bond Value : 1.0% (Not Included in Bid) **Add $ 3,240.00**
*If Textura used for billing **add** 0.22% (max $3,750.00) to total billing (Not Included in Bid) **Add $ 715.00**
*If TCR is to participate in a composite cleanup crew, to total billing (Not Included in Bid) **Add $3,240.00**
*If TCR is to utilize Compass Prequalification Services, to total billing (Not Included in Bid) **Add $3,800.00**

Material Supply Qualifications and Exclusions:

Quotes currently good for thirty (30) days from date of quote.

1. Taylor Cotton & Ridley, Inc. is a distributor of materials manufactured by others. As such we are not quoting "Delegated Design" unless contracted specifically for this purpose. Our quote is based solely on the bid documents as released for pricing by the Owner / Architect.
2. Taylor Cotton & Ridley, Inc. and it's manufacturer's are not Engineers and are not to be considered Engineer of Record. Any engineering calculations provided are to confirm our compliance to the specifications as issued by the Owner / Architect.
3. Taylor Cotton & Ridley, Inc. does not pull or pay for permits or inspection fees. TCR will NOT pay for product tests. We quote products from available tested and approved Florida Building Code Compliant products as specified in the bid documents.
4. Labor to receive and disseminate materials including door hardware is excluded, unless installation included in TCR subcontract
5. Installation of doors and hardware is excluded unless installation included in TCR subcontract.
6. Installation of ALL frames is excluded. Grouting of ALL frames is excluded.
7. All Aluminum Storefront, frames, doors and associated hardware, except cylinders, is excluded from our scope of work.
8. Glass and glazing is excluded as by other trades
9. Per Specification the wood door delivery to the site is only permitted after the project is weatherproofed & having controlled temperature and humidity. Wood door storage will have to be stationed inside the facility. Off-site storage is excluded and would result in a contract add.
10. Additional protection of doors, frame and hardware other than the manufacturer's standard packaging is excluded. *If additional door protection is desired, please call for quote to add material & cost to quote.* Please advise if door or frame or both and door size and quantity or location desired protected.
11. Exclude hollow metal frame, door, wood door and finish hardware field repair resulting from damage by other trades.
12. A copy of the Notice of Commencement or Notice to Proceed or information associated with these forms will be required at point of sale.
13. We acknowledge no addendum.
14. Pricing based on Construction Documents drawings dated 09/30/2024
15. Pricing based on Specifications dated 09/30/2024
16. RFI's acknowledged none .
17. Quote FOB job site.
18. Exclude keying of existing cylinders and locksets not provided by this supplier.
19. Quotes are good for 30 days from date of quote unless a formal letter of intent, purchase order or sub-contract received. Prices subject to change after 30-day deadline.

Additional TCR Bid Qualifications:

When required, shop drawings shall be furnished, and when approved by the purchaser's Architect, they shall be deemed to be correct interpretation, design and dimensions.

No Back Charges will be accepted unless specifically agreed upon in writing.

We will not be responsible for loss or damage arising from delays caused by lack of correct or complete data, by Changes or revisions, by late approval of drawings, or by any other cause beyond our control.

Should the purchaser tend his own purchase order contract, all terms and conditions of the proposal shall be by This reference be incorporated therein.

Materials in this quotation are quoted F.O.B. Factory, with freight included for Tailgate Delivery to your jobsite. Quotation is subject to review if not accepted within 30 days.

We are bondable: However, a bond premium has not been included. Our terms are: No retainage, Net 30 days With approved credit or proof of bonding. Add $250.00 (per name) to our quotation if you are to be named as an additional insured on our insurance policy.

RE: Bid Price & Project Time Completion Terms

We regret that we can only protect our quotation pricing for 30 days. We can only protect our sold or contracted material pricing for 180 days from date of order. This has become necessary due to the unparalleled and unprecedented economic instability the construction industry is experiencing with material shortages, extended manufacturing lead times, shipping delays and lack of qualified available work forces at the manufacturing level.

We must reserve the right to increase pricing and/or jobsite delivery times during the duration of a contract award due to sudden announced material price increases or surcharges on materials and/or delivery costs. In the event either of these increases were to happen, we will provide proof of written confirmation from our vendors and shippers. Again, we regret that we must impose these restrictions, but we cannot remain a valuable partner to you servicing your customers if we cannot pass along delays and announced price increases that greatly affect our stability and yours

Published lead times on our bid proposals are based on manufacturers' recent publications. As a distributor we can only publish the information provided. They are not guaranteed by any manufacturer to ship or deliver by that said date. Lead times are subject to change at any time, and should only be considered a best-case scenario. Materials are sourced from multiple states across the country and the world. Delayed freight/transit times may affect delivery dates for materials to arrive locally. Construction schedules need to carry these lead times, plus a buffer for worst case scenarios that are out of our control.

If you should have any questions, please call me. Thank you for the opportunity to provide you a quotation.

Sincerely,

LynDea Drury AHC FDAI

Proposal: LM24-132

Contractor Name:
Wharton-Smith
750 Monroe Road
Sanford, FL 32771
Attn: James Manyette

Project Name:
City of Port Orange Public Utilities Field Operation Facility
4505 Clyde Morris Blvd.
Port Orange, FL 32129

Thank you for providing the Unified Door and Hardware Group (UDH Group) with this opportunity to present our proposal for the **Port Orange Public Utilities Field Ops Fac.** project.

We propose furnishing and delivering doors, frames, and finish hardware as outlined below. The values presented here are based on our material scope, our qualifications, and our exclusions as outlined within the body of this proposal. Should you feel we have omitted or included items in our scope incorrectly please contact us as soon as possible.

Material Furnished and Delivered

Material Price (Less Tax):	$ 170,000.00
6 % Florida State Sales Tax (Material):	10,200.00
.5% Volusia County Sales Tax (Material):	25.00
Material Total w/Tax (Less Bond):	$ 180,225.00

This proposal is based upon the following bid documents.

Bid Documents	**Dated**	**Document Completion %**
Architectural Plans & Drawings:	09/30/2024	100%
Specification Sections: 081113 081416 087100	 09/30/2024 09/30/2024 09/30/2024	100%
Door Schedule Sheet Number(s):	A500 dated 09/30/2024	100%
Includes Addendum(s):	None	
Includes RFI Responses	1 thru 27	
Includes WSI	001 thru 008	

Please continue reading the remainder of our proposal for standard and project-specific qualifications, exclusions, lead times, deliveries, and other valuable information.

SPECIFICATION SECTION: 081113 HOLLOW METAL DOORS AND FRAMES

Hollow Metal Frames:		
Hollow Metal Frame Construction – ☒ Welded / ☐ Knock Down		
3-Sided, Welded, Hollow Metal Frames, 16 gauge	55	Each
Total Hollow Metal Frame Count	**55**	**Each**
Hollow Metal Doors:		
Openings, 16 gauge, Hollow Metal Doors	20	Each
Total Hollow Metal Door Leaf Count	**20**	**Each**

Hollow Metal Exclusions:

1. Glass for vision kits
2. Temperature-rise rated door construction as this is not required by code in fully-sprinklered buildings.
3. Finish painting hollow metal doors and frames.
4. This proposal does not include frame insulation, grouting, bituminous coating, Tnemec coating, or asphalt emulsion of any kind.
5. Field measuring of existing frames and/or field surveys of walls unless otherwise noted.
6. Cladding over hollow metal doors & frames (wood, stone, etc.). Cladding of hollow metal products may void fire ratings and the manufacturer's warranty.
7. We include a hollow metal frame at opening # 103B per the head detail H1/A511 and not an aluminum frame per jamb detail F1/A512 and sill detail A1/A512.

SPECIFICATION SECTION: 081416 FLUSH ARCHITECTURAL WOOD DOORS

Architectural Wood Doors:		
Grade 'AA', Quarter Sliced, Black Walnut, Book Matched, 5-ply, Particle core, Factory Pre-fit, Pre-machined and Pre-finished, to Match PL-1	38	Each
Total Architectural Wood Door Leaf Count	**38**	**Each**

Furnish (38) Stain Grade Flush Architectural Wood Doors

SPECIES	GRADE	CUT	MATCH	FINISH
Black Walnut	AA	Quarter Sliced	Book Matched	Custom Color Stain

Architectural Wood Door Qualifications:

1. Factory pre-finished, doors will be factory finished with manufacturer's standard finish system. This includes standard sheen and gloss levels.
2. Wood veneer door pricing has been estimated based on the information provided. Pricing is subject to change until physical finish samples are approved.
3. Wood doors will be marked with an opening identification number, wrapped for protection, and secured on pallets for delivery.

Architectural Wood Door Exclusions:

1. Due to technological improvements in the component materials used by contemporary architectural door manufacturers, sealing the top and bottom edges of architectural wood doors is no longer a

warranty requirement. Architectural wood doors constructed with composite materials make wood doors more dimensionally stable than wood door construction practices used by manufacturers in the past.
2. Individual boxing of wood doors.
3. Unless stated otherwise, this proposal excludes top and bottom edge face matching construction.

SPECIFICATION SECTION: 087100 FINISH HARDWARE

Architectural Hardware:		
• Quantity of Sets Assigned to Hollow Metal & Architectural Wood Doors	**55**	Sets
• Quantity of Sets Assigned to Storefront Aluminum Framed Openings ☒Cylinders only ☒ Balance of Hardware for aluminum and glass doors by Others	**2**	Sets

Finish Hardware Qualifications:

1. If specified, interchangeable construction cores are to be returned to UDH Group at the end of the project. Additional charges will be assessed for construction cores that are not returned.
2. Unless noted otherwise, any hardware samples requested and provided are to be turned over and incorporated into the project's bill of materials.

Finish Hardware Exclusions:

1. All items considered to be part of the security and access control package as defined by the security and access control specification(s) including but not limited to power supplies, low voltage wiring, conduits, wire pulls, and all terminations.
2. Setting Up of Key Cabinet & Key Management Software (if specified).

VOLUNTARY ALTERNATES

1.) If we are to furnish openings # 109B and 154 with Steelcraft hollow metal doors with a G2 elevation, and with Von Duprin panic devices in lieu of Curries hollow metal flush doors with Sargent panic devices in order to match the G2 elevations and maintain the FBC Hurricane Code and fire rated labels, to the bid price:

Add Material Price (less Tax):	$ 3,850.00
6% Florida State Sales Tax:	231.00
Total Add Price w/Tax:	$ 4,081.00

VOLUNTARY ALTERNATES CONTINUED

2.)	If we are to furnish all the wood doors with Quarter Sliced, White Maple, Veneers, in lieu of Quarter Sliced, Black Walnut, from the bid price:	
	Deduct Material Price (less Tax):	($ 1,800.00)
	6% Florida State Sales Tax:	108.00
	Total Deductive Price w/Tax:	($ 1,908.00)
3.)	If we are to furnish all the wood doors with Plain Sliced, White Maple, Veneers, in lieu of Quarter Sliced, Black Walnut, from the bid price:	
	Deduct Material Price (less Tax):	($ 2,200.00)
	6% Florida State Sales Tax:	132.00
	Total Deductive Price w/Tax:	($ 2,332.00)
4.)	If we are to furnish all the wood doors with Custom Grade 'A' Veneers, in lieu of specified Premium Grade 'AA' Veneers, from the bid price:	
	Deduct Material Price (less Tax):	($ 500.00)
	6% Florida State Sales Tax:	30.00
	Total Deductive Price w/Tax:	($ 530.00)

STANDARD QUALIFICATIONS

1. LEED Requirements, if applicable and specified in the appropriate specification sections, are included according to the specified manufacturers' capabilities. Therefore, compliance with the specified LEED requirements may be limited by the products specified.
2. The warranty of material shall be limited to the warranty extended to UDH Group by its suppliers. All warranties are the maximum allowed by each manufacturer. No other warranties expressed or implied shall supersede those as set forth by the manufacturers.
3. Door / Frame sizes and elevations may vary from those specified or shown in the bid documents to maintain the specified fire and warranty requirements.
4. We cannot guarantee all the specified door, frame, and hardware manufacturers listed within the bid documents have products that are compatible with one another. We therefore reserve the right to provide alternate material, or items, by a specified manufacturer to obtain the intended function.
5. All undercuts are to be confirmed by the client during the submittal process.
6. Where the manufacturer's product numbers have been specified incorrectly, we have done our best to interpret the architect's intent and cost of the indented item. If we have made an error in our interpretation, we will not be held liable for any additional costs associated with providing the correct item.
7. All fire ratings unless otherwise noted, have been determined and priced as listed on the architect's door schedule.
8. Submittals will not commence until we have received a formal "Notice to Proceed."

9. Should one of the specified manufacturers or vendors, as a normal course of business, require a deposit before processing your order the UDH Group will invoice for said deposit and will not release any material requiring deposits without the deposit invoice being satisfied.

STANDARD EXCLUSIONS

1. Material installation and installation supervision.
2. Glass and glazing unless specifically stated otherwise herein.
3. Aluminum storefront doors, frames, and hardware.
4. Herculite/glass doors, frames, and hardware.
5. Demountable Partitions and all associated hardware.
6. Attic Stock unless specifically stated otherwise herein.

PROJECT EXECUTION AND LOGISTICS

The value(s) represented in this proposal is predicated on the material being shipped by 11/28/2025 It is our understanding that this date is in accordance with the project's construction schedule at the time of this writing. If the project is delayed necessitating shipments after said date, the delayed materials may be subject to a manufacturer's cost increases and may need to be requoted based on market conditions. If required, any adjustments to our contract will be addressed via a change order.

MATERIAL LEAD TIMES:

The anticipated manufacturing lead times for the material listed in this proposal have been outlined below. The times provided should be considered an estimated time and represent industry-standard lead times at the time of this writing. All lead times are after receipt of approved shop drawings and hardware submittals and are subject to change.

Shop drawings:	6 to 8 weeks
Hardware submittals:	12 to 14 weeks
Hollow metal frames:	6 to 8 weeks
Hollow metal doors:	10 to 12 weeks
Wood doors:	12 to 16 weeks
Finish hardware:	8 to 10 weeks

Please allow one additional week for order entry after we receive approved submittals with no unanswered questions. One additional week should also be added for the transportation of materials once manufactured.

UDH Group is not responsible for manufacturing and other delays beyond our control.

1. This proposal's value is predicated on delivering the above quantities listed. If there are truck size limitations or restrictions, please notify us.

2. This proposal is based on full truckload shipments to the project site. Partial, expedited, off-site, or additional deliveries will incur additional costs.
3. All deliveries are tailgate delivery, no liftgate service is provided.
4. Wood doors will ship directly from the manufacturer to the project site.
5. All deliveries will be made during normal working hours (Monday – Friday, 7:30 AM – 3:30 PM). No after-hour or weekend deliveries are provided in the base scope.
6. No flagman or traffic control is provided for deliveries. This is to be provided by others, if necessary.

TERMS OF OFFER

1. **Unless stated otherwise herein, this proposal is good for 30 days from the date of this proposal.**
2. For clients in good standing, payment terms are Net 30 days from delivery.
3. This offer supposes payment terms without retainage or holdback on material billings. All material invoices are to be paid in full.
4. This is a lump-sum proposal; the products in this proposal may not be purchased separately.
5. This proposal reflects current published and custom-configured pricing based on the ship dates outlined in the Project Execution section of this offer. This offer does not include any future unannounced manufacturer's surcharges, tariffs, etc... If any material within our scope of work becomes subject to this type of price increase, we will submit a contract change order(s) as applicable at the time said cost increase is imposed.
6. All "alternate" values presented in this proposal are based on client acceptance before our "notice to proceed". Once UDH Group has proceeded with work all "alternate" values are null and void and will be updated as needed to reflect current costs.
7. Stored material has not been calculated as part of the value of this proposal. If UDH Group is required to store material, project progress payments must be made for any materials stored in a secure off-site location (including a UDH Group warehouse). Progress payments must include additional compensation for storage expenses such as insurance, handling, etc. UDH Group will provide additional documentation as required.
8. Once a project schedule has been agreed upon, it is the responsibility of the purchaser to provide any schedule updates as soon as possible.
9. This is a material-only proposal, if accepted, UDH Group will anticipate receipt of a Purchase Order agreement for the value of this proposal, plus any applicable taxes.
10. As a material supply-only vendor, UDH Group will not accept liquidated or consequential damages.

Thank you for the opportunity to submit this proposal. We will do everything we can to ensure a successful project. If you have any questions, please reach out to me directly.

Sincerely,

Mark Carpenter

SECTION 4 – BID REQUIREMENTS AND CONDITIONS

See Bid Manual

SECTION 5 – BID PROPOSAL EVALUATION

5.1 GENERAL

5.1.1 Bid Proposals will be evaluated based upon review of the following:

A. Cost – The evaluation of this criterion will be based on the Bidder's total base bid, bid alternates, unit prices.

B. Value Engineering – This criterion measures the ability of the Bidder to identify potential areas of cost savings or improvements of the final project.

C. Bidder's ability to meet all other criteria outlined herein.

5.1.2 Reference the Instructions to Bidders section of this Bid Manual and the Bid Form for more information regarding detailed requirements of the Bid Proposals.

5.1.3 In evaluating Bids, Wharton-Smith, Inc. shall consider the submission of the Bidders, and whether or not the Bids comply with the prescribed requirements as outlined in these Instructions, the Bid Form, this Bid Manual, and all associated Owner and Bid Related documents provided with this Bid Package.

5.1.4 Wharton-Smith, Inc. may conduct such investigations and require supplemental information as it deems necessary to assist in the evaluation of any Bid and to establish the responsibility, qualifications and financial ability of the Bidders, proposed Subcontractors, proposed equipment and material suppliers, and other persons and organizations to provide the materials in accordance with the Contract Documents to Wharton-Smith, Inc.'s satisfaction within the prescribed time.

5.1.5 Bidder shall, upon request of Wharton-Smith, Inc., submit documentation evidencing its capability to execute the work properly within the time specified. This information must be received by Wharton-Smith, Inc. within ten (10) calendar days of Bidder receiving written request.

5.2 RECOMMENDATION AND APPROVAL OF RANKING

5.2.1 The CMAR will review all Bid Proposals that are received in conformance of the requirements herein and provide a recommendation to the Owner. The Owner, at its sole discretion, may accept the CMAR's recommendation or re-evaluate the Bid Proposals. The Owner will establish and approve the final recommended of award for the Bid Package. The Owner will be the sole judge of its own interests, the proposals, and the resulting agreements. The Owner's decision will be final.

5.3 AWARD OF CONTRACT

5.3.1 Award shall be based on products, equipment and materials named in the Contract Documents. Consideration of any decisions regarding substitution shall not be made until after Award of Contracts.

5.3.2 If the Contract is to be awarded, Wharton-Smith, Inc. will give the Bidder a Notice of Award after the Owner's agreement of the Bidder to receive Award.

5.3.3 The Awarded Bidder will be required to enter into a Purchase Order Agreement or Subcontract Agreement with Wharton-Smith, Inc. This agreement will contain the same terms and conditions as shown in the sample agreement provided in this Bid Manual. The Purchase Order or Subcontract will also contain the defined work scope as shown in this Bid Manual. Modifications to this Agreement will not be allowed.

SECTION 6 – SCOPE OF WORK

The Bidder shall utilize the information within this section of the Bid Manual to assist in development of the Bid Proposal. The outlined scopes herein are not intended to detail the complete scope of the Bid Package. The Bidder is responsible for reviewing the Contract Documents to understand the full scope and requirements.

The Subcontractor Is to furnish all labor, equipment, material, subcontracts, and supervision required to complete the Scope of Work generally described as the **DOORS/FRAMES/HARDWARE PACKAGE**, detailed herein, for the Public Utilities Field Operations Facility. All work shall be complete and in accordance with the Contract Documents. In the event of conflicts between the Scope of Work and other parts of the Contract Documents, this section shall take precedence.

6.1 WORK OVERVIEW

Provide complete, all required **Doors, Frames, and Hardware Work**, for the Project known as **City of Port Orange Public Utilities Field Operations Facility.**

The Work included in this Subcontract is project specific and outlines the general Scope of Work for this Subcontract, all in complete accordance with the Plans and Specifications as defined in Exhibit "C" attached hereto.

Other Specification Sections may form a part of this Subcontract, whether listed or not.

The Scope of this Subcontract includes, but is not necessarily limited to the furnishing and [illegible] of the following Work by this Subcontractor.

1. Visitors - No one shall be admitted to the jobsite by the Subcontractor, except as necessary to perform the Work hereunder, without, in each instance, first obtaining the approval of the Contractor.
2. Replace Guardrails - This Subcontractor shall install, maintain and replace all required guardrails in accordance with OSHA Standards for the purpose of safety, at all openings and suspended work at the locations not protected and where Subcontractor is performing work. Subcontractor is also responsible for all construction fencing, temporary walkways, overhead protection, signage, and/or barricades to perform work outside the boundaries of Contractor furnished construction fencing.
3. Ongoing Operations/Residential Environment/Parking - Without limitation of the foregoing, Subcontractor understands that the Work may be constructed near on-going business or facility operations and may be in and around private residences and neighborhoods. Subcontractor shall use its best efforts, in conformity with the applicable standard of care, to perform the services hereunder in a manner which will not interfere with the on-going business operations and residences. All construction employees are to enter and park in the construction parking area designated by Contractor. Subcontractors are responsible for all off-site parking of employees which may be required and busing to jobsite via route identified by Contractor. Busing of employees, jobsite vehicles or deliveries shall not be routed through surrounding neighborhoods.
4. Jobsite Storage - Subcontractor is aware of the existing site conditions and the limited space availability. On-site storage and staging of materials and equipment will be allowed only as specifically approved by Contractor's Project Superintendent or Project Manager. All deliveries of Subcontractor will be coordinated through Contractor. If scheduled deliveries are not ready at appointed time, Contractor may refuse acceptance and deliveries will be rescheduled. All cost and/or delays associated with the refusal of deliveries will be the responsibility of the Subcontractor. Subcontractor has included in this Subcontract price, all off-site storage as may be required, including, but not limited to transportation of materials from staging area to site.
5. Phased Turnover - This Subcontractor acknowledges that the Project may have phased turnover in accordance with the Project Schedule and that several mobilizations may be required and are included as part of this Subcontract. Additionally, Subcontractor acknowledges that the Project may have multi-buildings and that concurrent work on each building will be required in order to complete some phases ahead of the Project Schedule and all costs for doing same are included.

6. Owner's Facilities - All Project employees are subject to the Owner's rules and regulations while employed within their property limits. Use of the Owner's other parking lots and facilities by this Project's workmen are not permitted.

7. Limitation of Noise/Hours of Work - Subcontractor shall comply with all city, county, state and local jurisdictional authorities' Noise and Hours of Work Regulations.

8. Care and Custody: This Subcontractor shall provide labor and equipment to receive, unload, inventory, store and provide for the care and custody of all materials it procures for its own behalf, or is furnished by others for installation by this Subcontractor, until such time as the material is permanently installed and accepted by the Owner and Architect. Storage containers to be provided by Contractor.

9. Install all **Frames, Hollow Metal Doors and Finish Hardware Work** in strict accordance with the Contract Documents, complete, turnkey and fully functioning to the designer's intent. Specifically including all details, sections and notes contained within the Contract Documents.

10. Subcontractor certifies that it meets the minimum Contractor Qualification requirements as further detailed in the Specification and elsewhere in the Contract Documents.

11. The Installing Subcontractor shall attend and participate in the pre-installation conference to be held at the Project Site and conducted in concert with Owner, the Architect, the Installer, and Contractor.

12. This Subcontractor shall provide and install Complete Door, Frame, and Hardware package. This includes, but is not limited to, all solid core wood doors, hollow metal doors, hollow metal door frames, hollow metal window frames, fire rated door assemblies, wood and metal lite kits, door hardware and all other incidental items required by this Scope of Work all in strict accordance with the Contract Documents, manufacturer's specifications, governing building codes, and the Authority Having Jurisdiction.

13. Provide and install all Hollow Metal Doors, Wood Doors, and Finish Hardware Work in strict accordance with the Contract Documents, complete and fully functioning to the designer's intent, specifically including all details, sections and notes contained within the Contract Documents.

14. This Subcontractor shall provide and install doors, frames, and hardware by preapproved manufacturers in strict accordance with the Contract Documents.

15. This Subcontractor shall provide all hollow metal door frames and hollow metal window frames in strict accordance with the Contract Documents. All hollow metal frames are to be delivered to the Project site as directed by Contractor to allow for normal installation in concrete masonry walls, masonry partitions, and drywall partitions.

16. This Subcontractor shall provide all door frames protected and packaged as required in strict accordance with the Contract Documents.

17. This Subcontractor shall provide all miscellaneous anchors, clips, fasteners, flashings, extrusions, shims and spacers necessary for the installation of all door frames.

18. This Subcontractor shall provide and install all doors in strict accordance with the door schedule in the Contract Documents. All doors are to be prepped for appropriate hardware and lites at the factory. Glazing of door light kits, transom panels, side view panels, and other hollow metal windows (normal and fire rated) is not included as it shall be provided by the glass Subcontractor, however the vision trim kits are to be provided as part of this scope of work

19. This Subcontractor shall provide door finishes in strict accordance with the Contract Documents.

20. This Subcontractor shall provide all doors delivered to the Project site with nonpermanent labels designated by door opening.

21. This Subcontractor shall provide all doors with fire, smoke and rated labels in strict accordance with the Contract Documents.

22. This Subcontractor shall provide all door hardware including, but not limited to, all hinges, cylinder cores, keying, panic devices, wiring harnesses, power supplies, wall and floor stops, closers, pulls, handles, weather-stripping,

locks, surface bolts, lock guards, latch sets, exit devices, kick plates, push/pull plates, seals, drip caps, thresholds, silencers, mullions, and door sweeps.

23. This Subcontractor shall provide all required cylinders at all aluminum storefront doors. All hardware required at aluminum storefront doors, minus referenced cylinders, is provided by others.

24. Provide and install all temporary cylinders and cores at all exterior doors, electric room doors, and other locations at the discretion and direction of the Wharton-Smith Superintendent, for locking and securing the premises during the construction phase.

25. Furnish and install all doors, frames, and hardware required of the plans even if not included on the door schedule. As required of the specification, should any particular door or items be omitted in any door or window schedule, or scheduled hardware group, furnish door, or items with hardware same as required for similar purposes.

26. This Subcontractor shall coordinate that all door hardware, door frame prep and associated electrical hardware (hinges, strikes, etc.) will integrate with the electrical contractor's access control equipment for a fully functioning turnkey access control system.

27. This Subcontractor understands and agrees that if discrepancies are noted between the hardware shown on the door schedule and the hardware shown in the specifications, the listed hardware group number detailed in the specifications shall prevail.

28. This Subcontractor shall provide and index one (1) key cabinet that allows room for expansion for 150% of quantity of keys required for the project.

29. This Subcontractor shall provide all required submittals for approval prior to release for fabrication. Material is to be on site ready for installation in accordance with the Project schedule.

30. This Subcontractor shall provide the required hardware schedule for approval prior to release for fabrication. Hardware is to be on site ready for installation in accordance with the Project schedule.

31. This Subcontractor shall provide all State of Florida Product Approvals for this Scope of Work as required by the Contract Documents, governing building codes, and the Authority Having Jurisdiction.

32. This Subcontractor understands and agrees that the Project will require multiple deliveries by this Subcontractor. All associated costs for multiple deliveries as directed by the Contractor are included.

33. This Subcontractor includes providing bituminous coating of hollow metal frames in concrete wall/masonry partitions, as necessary.

34. This Subcontractor has reviewed the Project Schedule and understands that the Subcontract amount includes all costs associated with material expediting and manpower to meet the Project Schedule.

35. Subcontractor certifies that it meets the minimum Contractor Qualification requirements as further detailed in the Specification and elsewhere in the Contract Documents.

36. The Subcontractor shall attend and participate in the pre-installation conference to be held at the Project Site and conducted in concert with the Owner, the Architect, the Installer, and Wharton-Smith.

37. Provide all warranty requirements including signing all documents required of the Specifications..

38. Subcontractor shall provide all warranties as called for by the Contract Specifications.

39. Provide and install all temporary cylinders and cores at all exterior doors, electric room doors, and other locations at the discretion and direction of the Contractor's Superintendent, for locking and securing the premises during the construction phase. Remove temporary mechanisms and replace with permanent cylinders or cores upon completion of the project and at the direction of the Wharton-Smith Superintendent.

40. Provide all execution (installation) of the materials furnished as required of the referenced Specifications and elsewhere in the Contract Documents also including in particular compliance with all examination, preparation, environmental conditions, installation, protection during construction, adjusting and cleaning, and demonstration.

41. Provide and install products in accordance with manufacturer's recommendation and requirements.

42. Receive, unload, inventory confirmation, and store at the jobsite all hollow metal doors, and finish hardware in strict accordance with all NAAWDA's & DHI requirements.

43. Provide ~~Install~~ all hollow metal doors in strict accordance with the Contract Documents.

44. Provide ~~Install~~ all finish hardware, also including but not limited to, door seals, lock blocks, bumpers, metal stops, holders, thresholds, lock guards, drip edges, door sweeps, rain caps, hinges, locksets, latch sets, exit devices, kick plates, push/pull plates, closers, silencers, and mullions.

45. Check and adjust all hardware items for completeand proper operation and to the satisfaction of Contractor, Architect, and Owner. Adjust door closers to enable door to latch after test and balance has been completed. Subcontractor shall verify all door closers are set and operating properly and in accordance with ADA and Regulatory requirements. Subcontractor must be present for all required door pressure inspections and testing as required per project schedule and must provide proper adjustments to door to meet requirement.

46. Install temporary doors and lockset for all IDF, electrical and elevator machine room doors. Remove temporary and install permanent hardware when directed by the Wharton-Smith superintendent.

47. Furnish necessary miscellaneous fasteners, specialty tools, equipment, hand tools, carts, and all consumable materials required for the proper and complete performance of the work.

48. Subcontractor shall ~~install~~ provide all permanent cores to all aluminum storefront entrances noted on the Contract Documents.

49. Provide ~~Install~~ surface bolts in lieu of flush bolts at all EHPA openings to comply with Florida Building Code for windstorm as directed in Contract Documents.

50. Door hardware for the aluminum storefronts and curtain wall system are not included and shall be installed by that specialty contractor.

Other Items of Note:

A. Wharton-Smith will be utilizing a software called **Team Player** to process monthly pay applications. The fee for this service is $10.00 per Pay Application, regardless on the number of revisions in each month. Please review the Team Player Welcome Letter that has been included in the Bidding Documents which contains embedded links for training documentation and videos. This will be a requirement for all subcontractors on this project.

B. With respect to Article 22 of this Subcontract Agreement, the Owner will exercise the right to purchase materials directly as part of the Owner Direct Purchase Program. This Subcontractor shall actively participate in the Owner Direct Purchase Program for this Project Prior to the Subcontractor's final payment, a final reconciliation of Owner Direct Purchases against this Subcontract will be performed. This does not apply to temporary fence.

C. On-Site Work Hours: Limit work to between 7 a.m. to 5 p.m., Monday through Friday, unless otherwise indicated. Work hours may be modified to meet Project requirements if approved by Owner and authorities having jurisdiction.

D. Employee Screening: Comply with Owner's requirements for drug and background screening of Contractor personnel working on Project site. Subcontractor shall maintain list of approved screened personnel with Owner's representative.

6.2 BID PRICING / ALTERNATES

The bid pricing shall be broken out as follows and as indicated on the bid form. The City of Port Orange has the sole discretion to accept any, all, or none of the work items for this scope of work based on the bid pricing received. Subcontractor to price the work accordingly.

6.2.1 This bid does not include any bid alternates.

6.2.2 Retainage will be held at 5% for the duration of the contract and will be released upon retainage release by the Owner.

6.3 CLARIFICATIONS

6.3.1 The Subcontractor will be responsible for protecting all new and existing work throughout the site from damage that could be caused by performing the Scope of Work. Any damage caused by Subcontractor is the responsibility of Subcontractor and Subcontractor will bear the costs of said damage.

6.3.2 The Subcontractor will be required to attend all project progress and coordination meetings as requested by Wharton-Smith, Inc. or the owner.

6.3.3 All materials must be submitted upon and approved prior to being sent to the jobsite, all non-approved items may be rejected and returned at the Subcontractor's cost.

6.3.4 Subcontractor is responsible to coordinate with the CMAR and all other Subcontractors as necessary.

6.3.5 Subcontractor will be responsible for all general notes indicated on the drawings that pertain to this scope of work.

6.3.6 Subcontractor will obtain all permits, licenses, certificates, and coordination efforts for any such approvals of plans or specifications as may be required by federal, state and local laws, ordinances, rules and regulations, for the proper execution and completion of the work specified herein.

6.3.7 Subcontractor will be responsible for offloading all equipment deliveries and proper short-term and long-term storage requirements per the manufacturer's requirements. Provide all equipment necessary to offload and set equipment including cranes.

6.4 GENERAL REQUIREMENTS

6.4.1 The Subcontractor will be bound to the CMAR to the same extent the CMAR is bound to the Owner by the terms of the Contract Documents.

6.4.2 The Scope of Work shall comply with all Federal, State and Local Codes.

6.4.3 This is a lump sum agreement, including freight, incidental fees, and all applicable taxes. A schedule of values for submittals, materials, checkout, startup and closeout paperwork will be submitted with the return of the signed agreement for review and approval by the CMAR's Project Manager.

6.4.4 If requested by the CMAR, the Subcontractor will assist in cost loading of the project's master schedule. Schedule of Values will follow the cost loaded actives provided by Subcontractor.

6.4.5 No billing will be accepted without an approved Schedule of Values.

6.4.6 A detailed Schedule of Values must be provided within two (2) weeks of a contract being executed should your bid be accepted.

6.4.7 No escalation costs are permitted, pricing will remain firm through the project duration.

6.4.8 The Subcontractor is required to abide by the Wharton-Smith, Inc. safety program and OSHA standards. Excavation, confined space plans, and MSDS sheets will be required for all applicable work.

6.4.9 Subcontractor is responsible to develop and provide a site-specific safety plan for this scope of work. Safety plan will list all potential hazards and competent persons who will be supervising the work.

6.4.10 Subcontractor will maintain an OSHA Certified competent person on site at all times while the work is conducted.

6.4.11 All Subcontractors will be required to follow security protocol of the City of Port Orange and Wharton-Smith at all times.

6.4.12 OSHA and the CMAR's safety standards will be followed at all times.

6.4.13 Proper PPE will be worn by any personnel on the jobsite, including but not limited to delivery drivers, startup and commissioning representatives, manufacturer's representatives, and other personnel.

6.4.14 Materials are to be released as required to maintain Schedule, but Subcontractor is to inform CMAR of material releases and deliveries. No item will be released for production without approval from the Engineer.

6.4.15 All equipment will be labeled and tagged in accordance with the Contract Documents.

6.4.16 Provide all management necessary to adequately support field activities and maintain the Project Schedule.

6.4.17 Full time and onsite supervision is required while any work by Subcontractor is being performed. If Subcontractor fails to do so, the CMAR will provide supervision and all costs will be back charged to Subcontractor. The Subcontractor's superintendent will be required to attend all requested progress, safety, scheduling, coordination, and quality control meetings. Meetings of other natures may be required as requested by Engineer, Owner, or the CMAR.

6.4.18 The Subcontractor will be required to coordinate with all other construction trades as required to complete this Scope of Work.

6.4.19 Anticipated (general) sequencing – Your crews may be interfacing with several other trades including mechanical, concrete, piping, and testing agencies. Reasonable time provisions need to be made for coordination and time for these trades to complete their work.

6.4.20 All deliveries will be made between 7am-3pm M-F; all deliveries will be escorted onto the site by WSI. A 72-hour notice to WSI's Superintendent will be required prior to any deliveries.

6.4.21 The Subcontractor may not utilize any area of the project site for storage without approval from the CMAR. If the Subcontractor plans to utilize storage space, the Subcontractor will submit, to the CMAR, a site plan detailing the areas being requested for storage.

6.4.22 An emergency contact list will be provided by the Subcontractor. This list will include at least one point of contact that is available 24 hours a day.

6.4.23 Furnish appropriate Material Safety & Data Sheets (MSDS) and warranty documentation with shop drawings for approval.

6.4.24 Subcontractor is required to coordinate with all applicable authorities as required

6.4.25 The Subcontractor utilizing an Employee Leasing Company for Workers Compensation Insurance coverage will not be allowed to use any Subcontractor on the project (i.e. no third-party subs)

6.4.26 It is the sole responsibility of the Subcontractor to secure any and all tools, materials, and equipment stored on the site. Wharton-Smith, nor the Owner, will be responsible for any theft, vandalism, or damage to the Subcontractors property. The Subcontractor is responsible for all security measures required to secure their resources.

6.4.27 Subcontractor will provide temporary generators as needed and fresh drinking water for their employees. Subcontractor is only responsible for their work and personnel.

6.4.28 The Subcontractor is responsible to follow all site plan details and to adhere to all specifications applicable to the Scope of Work items above.

6.4.29 All hazardous material will be properly disposed of at an offsite location.

6.4.30 The Subcontractor will be responsible to utilize available dumpsters for debris and daily clean-up. All areas will be left clean at the end of each day.

6.4.31 A representative of the Subcontractor knowledgeable of the work will be present at weekly coordination meetings with the General Contractor.

6.4.32 Subcontractors to provide Daily Reports.

6.4.33 A Superintendent (not Foreman) must be present at all times the Subcontractor's crews are onsite.

6.4.34 Pre-Mobilization Jobsite QC/QA Conference - Subcontractor to participate in WSI Quality Control Plan as outlined in the Subcontract Agreement. Subcontractor's Project Superintendent and or Foremen will attend Quality Control Meetings as deemed necessary by WSI, including a minimum of one (1) pre-mobilization meeting to be held in advance of Subcontractor's mobilization on site.

6.4.35 Subcontractor must have approval for additional work (not included in this Scope) in writing by an authorized W/S representative prior to proceeding with said work.

6.4.36 No claim for extra services rendered or materials furnished will be valid by either party unless agreed to in writing by both parties.

6.5 PROJECT SCHEDULE

6.5.1 The Subcontractor is to provide a detailed schedule for the Scope of Work with the submission of bid. The Subcontractor will coordinate with the CMAR to ensure the detailed schedule conforms to the overall Project Schedule. The Subcontractor will update this Scope of Work schedule each month and provide a written update to the CMAR.

6.5.2 The Subcontractor will account for not working on holidays and still plan for the Scope of Work to be completed per the overall Project Schedule. Holidays will include those observed by the Owner, the CMAR, and the Subcontractor. The CMAR or Owner observes the following holidays:

A. New Year's Day
B. Martin Luther King Day
C. President's Day
D. Memorial Day
E. Independence Day
F. Labor Day
G. Thanksgiving
H. Day after Thanksgiving
I. Christmas Eve
J. Christmas Day

6.6 SUBMITTAL REQUIREMENTS

6.6.1 The Subcontractor will provide submittal documentation as required within the Contract Documents. Upon execution of this Agreement the Subcontractor will provide a list of anticipated submittals for the Scope of Work. The Subcontractor will provide any additional submittal documentation requested for any materials or services related to the Scope of Work.

6.6.2 All submittals which have any deviation will be supplied with a letter addressing all deviations.

6.6.3 All submittals will be provided with a cover page listing the following information:

A. Project name

B. Submittal title

C. Relevant specification sections

a. Specification sections, with addendum updates included, are to have each paragraph check-marked to indicate specification compliance. Check marks shall denote full compliance with a paragraph as a whole. Any deviation shall be clearly marked by an "X" and numbered to indicate a requested deviation. If deviations from the specifications are indicated, and therefore requested, each deviation shall be underlined and denoted by a unique number in the margin to the right of the identified paragraph, referenced to a detailed written explanation of the reasons requesting the deviation. The remaining portions of the paragraph not underlined will signify compliance with the specifications. Failure to include a copy of the marked-up specification sections along with justifications for any requested deviations to the specification requirements shall be cause for return of the entire submittal with no further review.

D. Subcontractor's contact information

E. Manufacturer's contact information

6.6.4 All submittals will include the following information for each individual piece of equipment or fabrication:

A. Complete model number

B. The tag number of each per the Contract Documents (if applicable)

C. List of major components

D. Specification section (if varied from the submittal prime specification section)

6.6.5 It is the Subcontractor's sole responsibility to ensure submittals are complete and accurate for the complete scope of this agreement. Coordination of submittal information from others working under the Subcontractor is the sole responsibility of the Subcontractor. Subcontractor will not provide submittals with any items marked out of scope or by others if such items are part of the scope of this agreement.

6.6.6 Revised submittals will include a comment response document, this document will respond to every comment in writing and reference the location of all corrections within the revised submittal. Revised submittals will be at no additional cost to the Purchaser.

6.6.7 XXXX

6.8 INSURANCE

6.8.1 Subcontractor will provide the minimum insurance limits required to meet the requirements in this purchase order and all the requirements detailed within the Contract Documents. A sample insurance document is included within the Contract Documents for additional reference.

6.8.2 The Subcontractor will maintain a worker's compensation insurance policy for the complete scope of services. The Subcontractor will not utilize a Professional Employer Organization (PEO) to provide workers compensation insurance.

35H/50H

Impact Resistant and Blast Mitigating Entrance Systems

Our standard pressure entrances are available in 3-1/2" medium and 5" wide stile versions. In addition to a comprehensive array of locking and hinging options, this product is available with monolithic 9/16" or 1" laminated insulating glass units.

YKK AP has also addressed ongoing maintenance in abusive environments, such as schools and military bases. To reduce maintenance costs, choose either rim panic exit devices combined with an impact rated aluminum removable mullion, or single point locks paired with flush bolts on the inactive panel. These institutional grade entrance systems provide maximum security under the most demanding conditions without the need for steel reinforcing.

- 3-1/2" Medium & 5" Wide Stiles
- Single and Paired door options
- YKK AP VersaJamb®: reinforced tubular door frame allows for side-lite glazing without shear clips while maintaining the structural integrity of transom frames.
- Large & Small Missile up to 90 psf
- Florida Product Approval and HVHZ
- Blast Mitigation Tested - ASTM F 1642

A Closer Look at our Impact Doors

Dry Glazed

Wet Glazed

Monolithic or IGU Glazing Pocket - Monolithic and insulating glazing utilize different rail designs.

Thermal Performance - Improved thermal performance can be achieved with Insulating Glass. Entrances have been thermally tested utilizing insulating glass with 0.29 center of glass "U" factor.

Glazing Options - For reduced installation labor, dry glaze solutions (up to 90 PSF) are available. Wet and Dry Glaze options are available for both hurricane impact and blast mitigation.

Integral Muntins - For increased aesthetic possibilities, Insulating Glass Units can be ordered with grids.

ProTek®
YKK AP Hurricane & Blast Solutions

North Charleston Public Works Building - Charleston, SC

YHS 50 TU

Thermally Broken, Impact Resistant and Blast Mitigating Storefront

The **YHS 50 TU** is a high performance storefront system designed for insulating glass 1" to 1-5/16" thick. With varied infill and components, YHS 50 TU can meet the requirements for Impact Resistance and/or Blast Mitigation. This system is thermally broken by ThermaBond Plus® technology and easily integrates with H and HL Series entrances with medium/wide stiles.

- **Hurricane Impact** - Large & Small Missle
  - Wind Zone 3 & FPA/Florida HVHZ
  - Approved for Missile Level E
- **Blast Mitigation** - Static and Dynamic Analysis capability to meet DoD, GSA and VA standards
- A Pre-Glazed option along with Field
- Design Pressures up to 70 psf
- Engineered corners reduce job time
- Sill Flashing with 3pt attachment, no blind seals and taller back leg for better water resistance

Configuration:

Sill Flashing Design

- Taller back leg on sill flashing – enhanced water resistance in the field and in water testing
- Three point attachment of end dam, with a foldable tab and two screws into flashing splines
- No blind seals eliminates secondary penetration of sill and flashing when properly sealed

Pre-Glazed Option

- **Inside Glazed (Dry)** and **Outside Glazed (Wet/Dry)** configurations
- **Saves time** on the job site and **less materials** in the field
- **4'w x 10'h panel spans** to 70 PSF with no mullion reinforcement
- Florida Product Approval for **Missile Level A, D and E**
- **New Intermediate Mullions** eliminates need for panel interlocking
- **Double laminate glass option** for higher acoustical performance (STC: 43 OITC: 35)

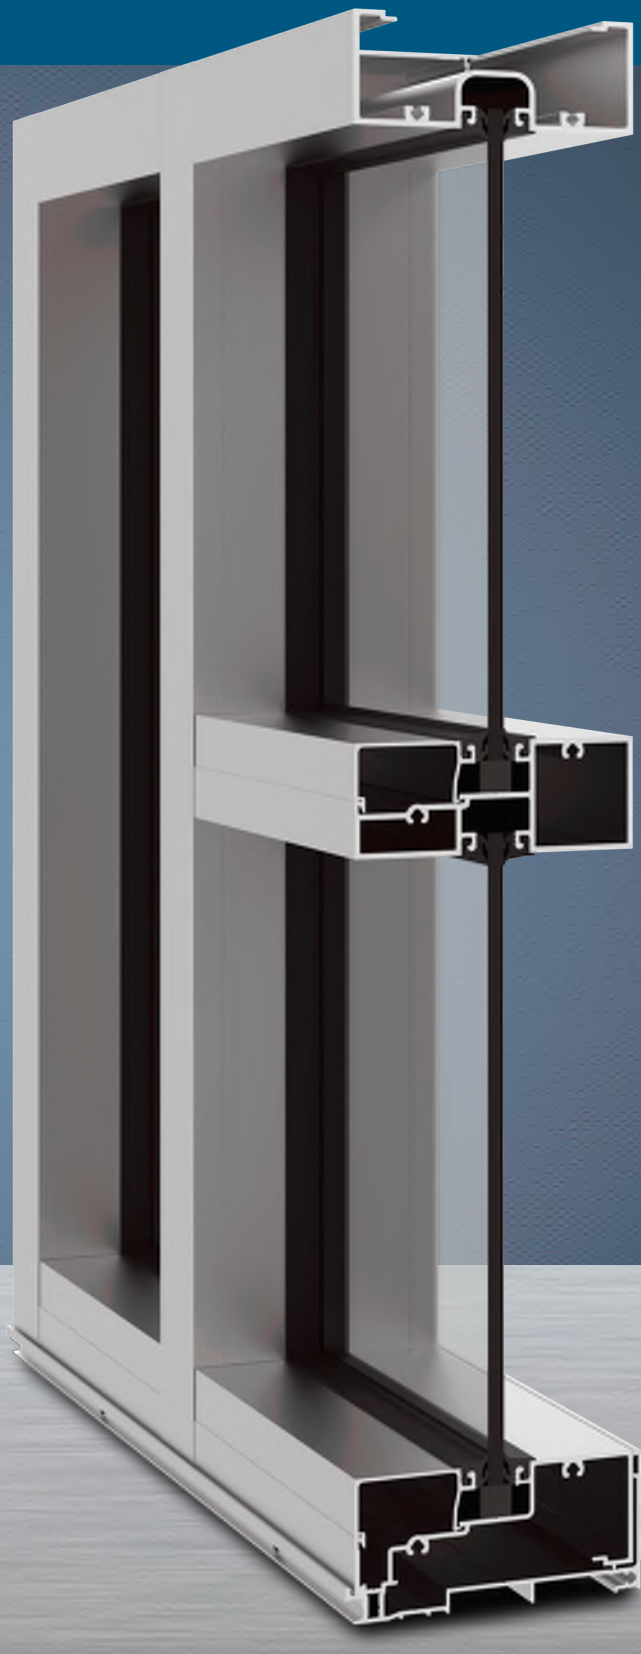
YES 45 FS

YES 45 FS

Center Set Storefront System with Monolithic Glass

STOREFRONT SYSTEM

Product Description



The YES 45 FS (1-3/4"x 4-1/2") is a center set, flush glazed framing system designed primarily for 1/4" glass or infill panels 1/4" to 3/8" thick. The systeme will accommodate YKK AP's hinged mullion, as well as our flexible mullion; these mullions allow more creative freedom where curves and angles become a functional part of the design.

Product Options & Features

- Outside Glazed / Inside Glazed Option
- Glazing of 1/4" up to 3/8"
- Screw Spline or Shear Block Assembly
- Seemless Entrance Door Integration
- Gasket With Stretch-Resistant Cord
- Enhanced Water Infiltration Resistance

YKK AP® Quality inspires®

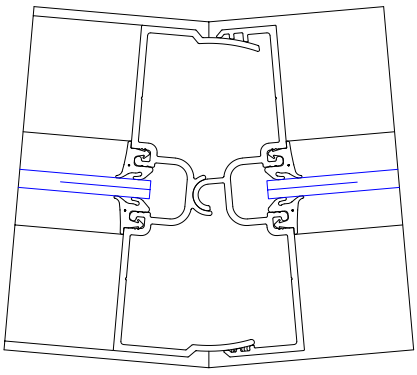
HINGED MULLIONS

With the use of our hinged mullion setup, the YES 45 system direction can be changed to allow angles and curves to create more a aesthetic and functional design with your building project. The 3 mullion options available are: 93-133 degrees, 124-170 degrees and 170-180 degrees. Combined with a 90, 135 or 158 degree static mullion, the design possibilities are endless.



93-133 Degree Hinge Mullion

YHC 300 OG

Impact Resistant and Blast Mitigating Outside Glazed Curtain Wall System

The **YHC 300 OG** is a high performance curtain wall system designed and tested to provide innovative impact and blast solutions for a wide range of applications and design pressures from 45 PSF all the way to 130 PSF. The 3" face dimension ensures recommended glass clearances are maintained. Dry glazing options (for all design pressure ranges) slash installation time for quicker building dry-in.

- Fully tested to ASTM 1886 / ASTM 1996 and TAS 201-203
- Flordia Product Approvals for large and small missile including HVHZ and Level E
- 15/16" glass bite meets GANA guidelines of 1/4" clearance to reduce glass breaks
- Single and multi-span applications
- Accomodates monolithic & insulting glass
- Shallow mullion option is available

Submitted By:	Nikki Cook Commercial NC Sales 407-466-8807 Nikki.Cook@dhpace.com		
Addendums Acknowledged:		**Drawings Dated:** 9/30/2024	**Specifications Dated:** 9/30/2024

Scope of Work & Product Description:

083323: (2) each 8' wide x 8' high and (6) each 14' wide x 12' high- 6" upset included to be mounted above ceiling

Overhead Door Corp Model 625 Coiling Service Doors with RSX Motors

- 22/24 gauge G90 galvanized steel flat slats; 24 gauge G90 galvanized steel hood enclosure; Double steel angle guides and bottom bar; Complete door to be Powdercoated from (188) RAL colors.
- Foamed-in-place insulation, CFC and HCFC-free polyurethane, with R-value 7.7 and STC rating of 21.
- Standard 50,000 cycle springs;
- 2023 FBC windload rated to +/- 50 PSF with impact rated door;
- RSX Hoist motor, 1/2 HP, 115 volts, 1 phase, 60 hertz; Standard NEMA 1 wall mounted push button (open/close/stop); Monitored safety edge with cord connection to motor.
- Includes Air infiltration package: guide cover and cap, dual brush guide seal, lintel seal, bottom astragal;
- 3 years/20,000 cycles limited on Overhead Door™ door and operator system (when purchased together)

Total Due: Material is installed with sales tax included **$ 142,898.00**

Exclusions and Clarifications:

- Factory wired operators, controls, to be furnished and set-in place by DH Pace / Florida Door Solutions. All conduit, raceways, disconnects, electrical boxes, wiring, and connections by Electrical and/or Fire Alarm Contractor.
- Pricing expires in 30 days from proposal date.
- Work to be performed during normal business hours (Monday - Friday, 7:00 AM - 5:00 PM), unless otherwise noted.
- Please allow specified lead time from order acceptance, material production release, and approved credit terms or 50% deposit for installation to begin. Balance due upon completion if applicable.
- Order acceptance includes a signed proposal, executed contract or purchase order.
- Pricing includes material described above, applicable labor, and use tax. Sales Tax applied upon invoicing.
- This quotation is based upon a visual inspection; it does not consider concealed deficiencies in the substrata. Immediately upon discovery of said deficiencies the customer will be notified of additional cost before corrective work is performed.
- This quote is based on our interpretation of customer supplied information. No specifications were provided for review. DH Pace is not responsible for omissions and/or inaccuracies. Price is subject to change if actual conditions differ from the information provided.
- Quoted price contingent upon customer having opening(s) clear of all obstructions and allow for unfettered access for installation team for a minimum of 8 normal work hours on the day of installation. Excessive wait time to clear opening or additional mobilizations will result in hourly charges being added to the work order.
- Quoted assuming that existing opening structure is functional and capable of supporting new door equipment, any material or labor to repair or replace anything not specifically listed above will be quoted separately.
- Standard warranty is (1) year against defects on materials and workmanship. Additional manufacturer's warrantees apply to material cost only.
- Project lead time as defined above: 6 - 8 Weeks

Attachment A: TERMS AND CONDITIONS

Terms. The products ("Products") described in this contract and the labor necessary to install the Products ("Labor") are herein collectively referred to as the "Work".

Condition Precedent. Buyer and Seller agree that if, following Buyer's acceptance hereof, a contract is to be executed by them, Seller's performance hereunder shall be subject to the condition precedent that the terms and conditions of such contract are acceptable to Seller.

Scope of Work. Seller agrees to perform for Buyer the Work at the Project. Buyer acknowledges and agrees that: (i) the prices quoted by Seller for the Products are based upon plans, specifications, verbal information or sketches as indicated herein and the addenda hereto; and (ii) that the Work contemplated under this Proposal is fully and correctly described herein.

Unless included in the description of and prices quoted for Products, glass, glazing, painting and electrical wiring is excluded under this Proposal and will be provided only upon receipt of a supplemental order signed by Buyer.

Proposal Price. Conditional upon Seller's prior approval of Buyer's credit, Buyer will pay Seller the unpaid balance for performance of the Work within 30 days of the date of Seller's invoice. If performance of the Work extends over 30 days, Buyer agrees to pay Seller progress payments under Seller's regular billing terms and if Products have been delivered to the Project or stored in a mutually agreed location, Buyer agrees to pay an amount not to exceed 90% of the Proposal Price in payment of the cost of such Products.

If payment of any sum is not made when and as due under this Proposal, Buyer shall pay interest on such delinquent sums at the rate of 1.50% per month or, the highest contract rate allowed under applicable law.

If following Buyer's default Seller refers this account to an attorney for collection, Buyer agrees to pay all attorneys' fees incurred by Seller whether or not a lawsuit for collection is instituted, and all other costs of collection and litigation.

Contract Time. Installation dates are estimates only and Seller cannot guarantee commencement of Work or completion thereof on any given date. Completion dates cannot be given until Seller has been furnished with complete approved drawings and any additional information it may request. Seller shall not be liable for total or partial failure to complete or for any delay in delivering Products or Labor under this Proposal. Seller shall not be liable in any event for any special or consequential damages on account of failure or delay in performance regardless of cause.

Work Performance. Performance of the Work will be made by Seller in a prompt manner but Seller cannot be responsible for damage or delay due to acts of God, accidents, civil disturbances, delays in transportation by common carrier, strikes, war, unavailability of material or other cause beyond the reasonable control of Seller.

If Products are installed before a finished floor is completed, warranty is limited and Seller assumes no responsibility for fitting the Product to the floor. An additional charge may be made to Buyer for returning to the Project for adjustments to the Product.

Seller assumes no responsibilities for failure of installation of the Product due to structural deficiencies in an existing building. Buyer shall prepare the Project for installation in accordance with requirements of Seller.

If special work, requiring additional material and labor is required to meet conditions other than those specifically described in this Proposal, Buyer agrees to pay an additional charge therefore.

Seller shall be allowed uninterrupted and exclusive access to the Project during performance of the Work.

No Product may be returned without Seller's prior written approval. All Product returned is subject to a minimum of 25% restocking fee.

Cancellation. In the event Buyer cancels this Proposal after the Seller has commenced Work, Buyer shall forfeit the amount of the down payment given to Seller at the time of the execution of this Proposal, and in addition, shall pay to the Seller such proportion of the total Proposal Price as the amount of Work bears to the total amount of Work agreed upon to be furnished under this Proposal, plus a sum equal to 25% of the total Proposal Price as liquidated damages, which amount is to be paid within 30 days from the date of such cancellation.

In the event of Buyer's insolvency this Proposal shall be cancelled and Seller shall have no further obligations to Buyer hereunder.

Insurance. Seller shall carry workmen's compensation and public liability insurance to cover the Work. Seller shall not be liable to indemnify, hold harmless or protect in any way the Buyer, or any other party involved in the Work, whether an employee of Seller or Buyer or any third party, except to the extent of the workmen's compensation and public liability insurance maintained by Seller.

Buyer shall keep the Project adequately insured against any loss to Seller by reason of damage to Seller's Product or Work or Seller' vehicles, equipment and tools by vandalism, fire, water, windstorm and any other occurrence during the course of Work.

Alterations. Any alterations or modifications initiated by Buyer must be agreed upon between the parties and the price fixed by them before work on such alteration or modification shall commence. Payment for such alteration or modification shall be made at the time of the completion of the Work.

Permits and Licenses. Buyer shall be responsible for securing the necessary permits and licenses for the Work at Buyer's own cost and expense.

Warranties. Seller warrants the Product sold to be free from defects in material and workmanship under normal and intended use and service. This warranty extends only to the Buyer and expires one year after the date of delivery or installation of the Product by Seller.

Parts and labor for service work are warranted for the following periods: All replacement parts 90 days; labor-service 30 days. Seller's sole obligation is limited to repairing or replacing any parts which shall be determined by Seller to be defective and is conditioned upon Buyer giving notice of any such defect to Seller within the warranty period. If Seller concludes that repair or replacement is necessary, Seller will commence work within a reasonable time after the decision to repair or replace is made.

This warranty does not apply to any Product which has been altered or repaired by any person not authorized by the Seller or which has been subjected to misuse, neglect or accident.

Seller assumes no liability for incidental or consequential damages. Warranties implied by law are limited to duration to one year period described above.

Wood Products will be guaranteed only if properly protected within 10 days of delivery or installation by Seller with a prime and finish coat of manufacturer's recommended paint.

No warranty will be honored unless the Proposal Price has been paid in full, including any applicable service charges.

Modification of Proposal. Any modification of this Proposal or additional obligation assumed by either party in connection with this Proposal shall be binding only if evidenced in writing signed by each party or an authorized representative of each party.

Governing Law. It is agreed that this Proposal shall be governed by, construed and enforced in accordance with the laws of the state in which the Project is located.

Options

- Air infiltration package that meets requirements of IECC code, which includes: guide cover and cap; dual brush guide seal, lintel seal, bottom astragal
- Electric operator (RHX®, RSX®, RMX®) or crank operation
- Bottom sensing edge; sloping bottom bar
- Galvanized steel bottom bar angles and guides; insulated guides
- Between-jamb mounting
- Stainless steel or aluminum slats
- High-usage package
- High-wind load option (FBC, TDI, Dade)†
- Weatherseal for interior side guide
- Lintel seal
- Cylinder lock; slide bolts
- Exhaust ports
- Vision lites with uniformly spaced openings of 5/8"x 3" (16 mm x 76 mm) or 1" x 10" (25.4 mm x 254 mm)
- PowderGuard® Premium powder coat paint finish in approximately 200 standard colors, or color-matched to specification;
- PowderGuard® Zinc and PowderGuard® Textured finishes
- Special application doors:
  - Oversized doors to 1500 ft^2. (139.4 m^2)
  - Combination doors with grilles and/or with full or partial standard, perforated or fenestrated slats
  - Spark-resistant doors, craneway doors, pass doors

Some options may affect clearance dimensions.

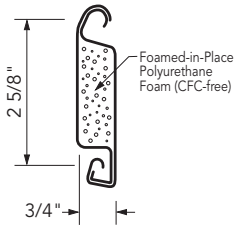
† Wind Load options available to meet:
FBC - Florida Building Code
TDI - Texas Department of Insurance
Dade - Miami-Dade Building Code Compliance Office

* R-value is a measure of thermal efficiency. The higher the R-value the greater the insulating properties of the door. Overhead Door Corporation uses a calculated door section R-value for our insulated doors.

$^{\Delta}$ Maximum height and width are independent of each other and may vary based on slat profile, material and gauge.

Style, function and thermal efficiency.

When overall performance and thermal efficiency are as essential in a rolling service door as are versatile good looks, the Stormtite™ 625 meets specification and exceeds all expectations. This heavy-duty door features insulated slats in a variety of materials – galvanized steel, stainless steel or aluminum – and offers optional wind load protection up to 170 psf. Designed to fit openings up to 30'4" wide and 28'4" high (9246 mm x 8636 mm) and offered with a broad range of product options, the versatility and functionality of the Stormtite™ 625 ensures that your design requirements will be met with ease, functionality and style.



White finish. Installation and service: Overhead Door Company of Concord™

Slat data

F-265i slat

Slat	Opening width	Standard	Optional
F265i	Thru 30'4" (9246 mm)	24 ga.	22, 20, 18 ga. 22, 20 ga. ss .040" alum., 18 ga.

Slats are galvanized and painted, stainless steel (specify finish) or aluminum (specify finish). Gauges reflect front slat; back slat is 24-gauge on steel and stainless steel; 22-gauge on aluminum.

R-value* 7.7 (1.35 W/Msq)
U-value .13
Smoke generation = 10
Flame spread = 5
STC = 21

ICC ES LISTED

The IECC listed air infiltration option meets code requirements for an air infiltration rating lower than than 1.0 cfm/ft² for rolling steel doors.

This superior perimeter sealing system includes:

- Guide cover and cap
- Dual brush guide seal
- Lintel seal
- Bottom astragal

Finish options

Finish details	
Standard polyester base coat	Two-coat system with polyester based top coat.
PowderGuard® Premium powder coat	Weather resistant polyester powder coat available in approximately 200 colors; custom color match and EZ Clean treatment options available.
PowderGuard® Zinc finish	Zinc enriched powder coat provides excellent corrosion protection that outperforms both hot dipped and cold galvanized steel. Color selection from approximately 200 powder coat colors; custom color match also available.
PowderGuard® Textured finish	Industrial textured powder coat provides a thicker, more scratch resistant coat for added product protection.

Colors

White Tan Gray Brown

Actual colors may vary from brochure due to fluctuations in the printing process. Always request a color sample from your Overhead Door™ Distributor for accurate color matching.

Gray finish. Installation and service: Overhead Door Company of Huntsville™

Architect's Corner

A resource for architects, containing comprehensive technical and resource materials to support your project, including drawings and specifications for commercial doors.

www.overheaddoor.com

The original, innovative choice for unequalled quality and service.

Overhead Door Corporation pioneered the upward-acting door industry, inventing the first upward-acting door in 1921 and the first electric door operator in 1926. Today, we continue to be the industry leader through the strength of our product innovation, superior craftsmanship and outstanding customer support, underscoring a legacy of quality, expertise and integrity. That's why design and construction professionals specify Overhead Door™ products more often than any other brand. Our family of over 400 Overhead Door™ Distributors across the U.S. and Canada not only share our name and logo, but also our commitment to excellence.

ACOUSTI ENGINEERING COMPANY OF FLORIDA
CGC 1527149

426 Gus Hip Boulevard Rockledge, FL 32955
(321) 636-4042

CONDITIONS & ACCEPTANCE

(1) So that we may ship material and organize our erection crew, purchaser shall notify us in writing at least four weeks before the building is ready for our work with work progressed to the extent that all our work can be done in one continuous operation.
(2) Purchaser shall make no charge against us for liquidated damages, clean-up, hoisting, watchman telephone, broken glass, light, rubbish removal, or insurance. We will remove only that rubbish caused by us and pay for breakage caused by the negligence of our men.
(3) Purchaser shall furnish no labor or materials for us on our account without our written order, prior to the action.
(4) This proposal is based upon all labor being performed during regular hours of work. You shall pay us all additional costs, including insurance and overhead costs, of any overtime work, that may be requested by purchaser or his agent.
(5) Purchaser shall bear the risk of any loss or damage to materials delivered to the premises or installed by us, whether such loss or damage results from theft, misuse, fire, flood, or any other cause except our own negligence, and the purchaser shall reimburse us for any such loss or damage.
(6) We shall not be liable for any damages or delays caused by strikes, lockouts, embargoes, fires, car shortage, floods, tornadoes, accidents, inability to obtain materials from our regular sources of supply, or other causes beyond our reasonable control, and the time for delivery of materials or doing the work hereunder shall be extended for the time of delay or reason of any said causes.
(7) Purchaser shall furnish to us, without charge, a sufficient quantity and flow of water and sufficient electrical service for our equipment at convenient electrical service for our equipment at convenient locations at working levels, and satisfactory storage space in the building from which we will not be required to remove our material except as required in our work.
(8) Purchaser shall furnish us with a complete set of plans, specifications, and addenda at least ten (10) weeks before building will be ready for our work.
(9) Purchaser shall furnish us with a progress schedule showing the coordination of the various trades at least ten (10) weeks before the schedule time for the commencement of work.
(10) Acousti Engineering Company of Florida assumes all liability for the collection and payment of Social Security and Unemployment Compensation Taxes on its employees.
(11) None of the material furnished under this contract shall be subjected to a temperature of higher than 140 degrees Fahrenheit.
(12) If this is a contract for a complete installation of our materials, we will pay all sales and/or use taxes in effect at the date of the Proposal. Any other or additional taxes will be paid by the Purchaser. If this is a contract for material sales only, purchaser will pay all sales and/or use taxes.
(13) Purchaser shall provide adequate protection for our finished work.

TERMS

(1) Payment of the aforementioned price, together with payment of any extras that may be agreed upon between us, shall be made by purchaser to us as follows: On or before the tenth (10th) day of each month, ninety per cent (90%) of the value of the materials delivered upon the premises and the work performed during the next preceding calendar month. Final payments shall be made within thirty (30) days after the completion of our work embodied in the proposal. If an account of delays by purchaser or other trades or for any cause beyond our reasonable control, we are unable to complete our work, purchaser shall pay us in full on or before the tenth (10th) day of the calendar month following the month in which the work was suspended, for all materials delivered or in transit, and work performed by us up to the time of suspension of the work. If payments are not made in accordance with the terms hereof, it is agreed that interest on will become due for the period of default, and at our election we may suspend work until such payments are made, and all costs or expenses incurred by us in collecting any sum due hereunder, whether by suit or otherwise, including reasonable attorney's fees shall be paid by purchaser. All provisions of this contract shall be construed in accord with the laws of the Florida.
(2) A performance bond or other bond, if desired by the purchaser, shall be provided at your expense.

There are no promises, agreements, or understandings, between purchaser and us, not contained in this agreement.

426 Gus Hip Boulevard Rockledge, FL 32955
(321) 636-4042

ACCEPTANCE

This proposal is subject to final approval by an authorized agent or officer of Acousti Engineering Company following acceptance by purchaser. Only when so accepted and finally approved shall this proposal constitute a contract between us.

SECTION 1 – INVITATION TO BID

Invitations were sent electronically via ConstructConnect platform

See also Bid Manual for additional invitation information

SECTION 2 – LIST OF BID DOCUMENTS

1. Bid Manual
2. Project Specifications – Issued for Bid – Dated September 30, 2024 (Volumes 1 &2)
3. Project Drawings – Issued for Bid – Dated September 30, 2024
4. Wharton-Smith Standard Subcontract with Bond
5. Wharton-Smith Team Player – Instructions for Subcontractor Pay Applications

SECTION 3 – INSTRUCTION TO BIDDERS

See Bid Manual

SECTION 4 – BID REQUIREMENTS AND CONDITIONS

See Bid Manual

SECTION 5 – BID PROPOSAL EVALUATION

5.1 GENERAL

5.1.1 Bid Proposals will be evaluated based upon review of the following:

A. Cost – The evaluation of this criterion will be based on the Bidder's total base bid, bid alternates, unit prices.

B. Value Engineering – This criterion measures the ability of the Bidder to identify potential areas of cost savings or improvements of the final project.

C. Bidder's ability to meet all other criteria outlined herein.

5.1.2 Reference the Instructions to Bidders section of this Bid Manual and the Bid Form for more information regarding detailed requirements of the Bid Proposals.

5.1.3 In evaluating Bids, Wharton-Smith, Inc. shall consider the submission of the Bidders, and whether or not the Bids comply with the prescribed requirements as outlined in these Instructions, the Bid Form, this Bid Manual, and all associated Owner and Bid Related documents provided with this Bid Package.

5.1.4 Wharton-Smith, Inc. may conduct such investigations and require supplemental information as it deems necessary to assist in the evaluation of any Bid and to establish the responsibility, qualifications and financial ability of the Bidders, proposed Subcontractors, proposed equipment and material suppliers, and other persons and organizations to provide the materials in accordance with the Contract Documents to Wharton-Smith, Inc.'s satisfaction within the prescribed time.

5.1.5 Bidder shall, upon request of Wharton-Smith, Inc., submit documentation evidencing its capability to execute the work properly within the time specified. This information must be received by Wharton-Smith, Inc. within ten (10) calendar days of Bidder receiving written request.

5.2 RECOMMENDATION AND APPROVAL OF RANKING

5.2.1 The CMAR will review all Bid Proposals that are received in conformance of the requirements herein and provide a recommendation to the Owner. The Owner, at its sole discretion, may accept the CMAR's recommendation or re-evaluate the Bid Proposals. The Owner will establish and approve the final recommended of award for the Bid Package. The Owner will be the sole judge of its own interests, the proposals, and the resulting agreements. The Owner's decision will be final.

5.3 AWARD OF CONTRACT

5.3.1 Award shall be based on products, equipment and materials named in the Contract Documents. Consideration of any decisions regarding substitution shall not be made until after Award of Contracts.

5.3.2 If the Contract is to be awarded, Wharton-Smith, Inc. will give the Bidder a Notice of Award after the Owner's agreement of the Bidder to receive Award.

5.3.3 The Awarded Bidder will be required to enter into a Purchase Order Agreement or Subcontract Agreement with Wharton-Smith, Inc. This agreement will contain the same terms and conditions as shown in the sample agreement provided in this Bid Manual. The Purchase Order or Subcontract will also contain the defined work scope as shown in this Bid Manual. Modifications to this Agreement will not be allowed.

SECTION 6 – SCOPE OF WORK

The Bidder shall utilize the information within this section of the Bid Manual to assist in development of the Bid Proposal. The outlined scopes herein are not intended to detail the complete scope of the Bid Package. The Bidder is responsible for reviewing the Contract Documents to understand the full scope and requirements.

The Subcontractor Is to furnish all labor, equipment, material, subcontracts, and supervision required to complete the Scope of Work generally described as the **ACOUSTICAL CEILING PACKAGE**, detailed herein, for the Public Utilities Field Operations Facility. All work shall be complete and in accordance with the Contract Documents. In the event of conflicts between the Scope of Work and other parts of the Contract Documents, this section shall take precedence.

6.1 WORK OVERVIEW

Provide complete, all required **Acoustical Ceilings** for the Project known as **City of Port Orange Public Utilities Field Operations Facility.**

The Work included in this Subcontract is project specific and outlines the general Scope of Work for this Subcontract, all in complete accordance with the Plans and Specifications as defined in Exhibit "C" attached hereto.

Other Specification Sections may form a part of this Subcontract, whether listed or not.

The Scope of this Subcontract includes, but is not necessarily limited to the furnishing and installation of the following Work by this Subcontractor.

1. Visitors - No one shall be admitted to the jobsite by the Subcontractor, except as necessary to perform the Work hereunder, without, in each instance, first obtaining the approval of the Contractor.
2. Replace Guardrails - This Subcontractor shall install, maintain and replace all required guardrails in accordance with OSHA Standards for the purpose of safety at all openings and suspended work at the locations not protected and where Subcontractor is performing work. Subcontractor is also responsible for all construction fencing, temporary walkways, overhead protection, signage, and/or barricades to perform work outside the boundaries of Contractor furnished construction fencing.
3. Ongoing Operations/Residential Environment/Parking - Without limitation of the foregoing, Subcontractor understands that the Work may be constructed near on-going business or facility operations and may be in and around private residences and neighborhoods. Subcontractor shall use its best efforts, in conformity with the applicable standard of care, to perform the services hereunder in a manner which will not interfere with the on-going business operations and residences. All construction employees are to enter and park in the construction parking area designated by Contractor. Subcontractors are responsible for all off-site parking of employees which may be required and busing to jobsite via route identified by Contractor. Busing of employees, jobsite vehicles or deliveries shall not be routed through surrounding neighborhoods.
4. Jobsite Storage - Subcontractor is aware of the existing site conditions and the limited space availability. On-site storage and staging of materials and equipment will be allowed, only as specifically approved by Contractor's Project Superintendent or Project Manager. All deliveries of Subcontractor will be coordinated through Contractor. If scheduled deliveries are not ready at appointed time, Contractor may refuse acceptance and deliveries will be rescheduled. All cost and/or delays associated with the refusal of deliveries will be the responsibility of the Subcontractor. Subcontractor has included in this Subcontract price, all off-site storage as may be required, including, but not limited to transportation of materials from staging area to site.
5. Phased Turnover - This Subcontractor acknowledges that the Project may have phased turnover in accordance with the Project Schedule and that several mobilizations may be required and are included as part of this Subcontract. Additionally, Subcontractor acknowledges that the Project may have multi-buildings and that concurrent work on each building will be required in order to complete some phases ahead of the Project Schedule and all costs for doing same are included.

6. Owner's Facilities - All Project employees are subject to the Owner's rules and regulations while employed within their property limits. Use of the Owner's other parking lots and facilities by this Project's workmen are not permitted.

7. Limitation of Noise/Hours of Work - Subcontractor shall comply with all city, county, state and local jurisdictional authorities' Noise and Hours of Work Regulations.

8. This Subcontractor shall preserve all benchmark stakes and other survey marks, regardless of location or purpose. In the event these items are removed or destroyed by the Subcontractor's employees or others working on its behalf, the Subcontractor shall bear the full replacement cost.

9. This Subcontractor shall be responsible for all flagmen and traffic control personnel as necessary to get trucks in and out of the Project site in a safe and effective manner.

10. This Subcontractor shall provide and install complete for a turn-key system, in strict accordance with the Contract Documents, all Acoustical Ceiling Panel Systems and Metal Suspension Systems, but not limited to, acoustical ceiling tile, insulation above lay-in acoustical ceilings, moisture resistant ceiling tile, grid, edge trim, runners, moldings, attachment devices, inserts, anchors, clips, wire hangers, capped grid, channels, lateral bracing and sealants in strict accordance with the contract documents.

11. This Subcontractor shall layout acoustical ceiling panel system in a manner that allows for border tile to be no less than half width tiles.

12. This Subcontractor shall provide all material in strict accordance with the Contract Documents specifically as it relates to product type, location, size and color.

13. This subcontractor shall furnish and install "C2" USG Ensemble Acoustical Ceiling where noted in strict accordance with the contract documents.

14. This Subcontractor shall provide ceiling tile for all Mechanical, Electrical, Plumbing and Fire Protection work in advance of above ceiling inspections at each building. This Subcontractor shall precut all ceiling tile as required for sprinkler heads, recessed lights, speakers, and all other devices being installed within the ceiling tile.

15. This Subcontractor shall install ceiling tile with undamaged edges and fit accurately into suspension system runners and edge moldings. This Subcontractor shall scribe and cut tile at borders and penetrations to provide a neat and precise fit.

16. This Subcontractor shall provide and install a minimum of four (4) wire hangers at each Fluorescent/LED light fixture. This Subcontractor includes coordination of light fixtures with the Electrical Subcontractor.

17. This Subcontractor shall coordinate with other Subcontractors for locations of hangers, sprinklers, lights, electrical boxes, grilles and all other items for proper installation of their work. It is specifically understood and agreed that there are to be no hangers in front of mechanical/electrical access doors.

18. This Subcontractor shall provide and install all required caulking/sealants between ceiling grid and adjacent material in accordance with the Contract Documents.

19. This Subcontractor acknowledges that all acoustical products are to be properly stacked on dunnage and protected so that the product remains free of moisture.

20. This Subcontractor shall coordinate with other subcontractors for locations of hangers, sprinklers, lights, electrical boxes, grilles, and any other item for proper installation of its work.

21. This Subcontractor shall provide acoustical sealant as required for this Scope of Work.

22. This Subcontractor shall be responsible for the correction of any unsightly gaps at acoustical ceiling wall mold. Acceptable corrections may include pulling walls and/or caulking gaps. Final acceptance to be received from the Architect.

23. This subcontractor shall install suspension system runners, so they are square and securely interlocked with one another. Remove and replace dented, bent or kinked members.

24. This subcontractor shall provide a finished installation of ceiling grid system in such a manner as to avoid using less than half width tiles at borders while conforming to layout as shown on RCP and Lighting Plans

25. Subcontractor shall provide cleaning and touch-up of acoustical ceiling panels and suspension system, leaving free of extraneous materials or marks. Clarification – Subcontractor is not responsible for damage from other trades.

26. This Subcontractor understands and acknowledges that all framing shall be supported from the structure and that no framing of any kind is to be supported from the metal roof deck above.

27. ~~This Subcontractor shall independently frame both sides of control and/or expansion joints. Control and/or expansion joints are not to be bridged with steel framing and/or furring members.~~

28. ~~This Subcontractor shall provide and install acoustical sealant at metal framed walls where required by the Contract Documents.~~

29. ~~This Subcontractor shall provide and install proper identification for metal framed rated wall assemblies including stenciling, stickers, tags, signs, and name plates.~~

30. ~~This Subcontractor includes buildouts, metal stud frame and drywall, of all vertical and horizontal piping chases to allow for complete concealment of piping as required by Contract Documents.~~

31. ~~This Subcontractor shall provide framing for and install all fire protection, plumbing, mechanical, and electrical access panels within their work. Panels are to be provided by others. Subcontractor has agreed to frame up to 60 access panels.~~

32. This Subcontractor shall provide and install all required Insulation within their scope of work in strict accordance with the Contract Documents and includes, but is not limited to, un-faced batt insulation, faced batt insulation, mineral wool insulation, and rigid insulation.

33. This Subcontractor understands that general lighting for construction is to be provided by the Contractor. If supplemental lighting is required to provide proper quality during finishing of gypsum board it is to be provided by this Subcontractor.

34. This Subcontractor shall provide multiple mobilizations and/or work force in multiple area as necessary to meet phasing and schedules for project

35. This Subcontractor shall provide adequate working platforms, walkways, scaffolding, railings, and safety rails as required; at all times work is taking place on site. It is this Subcontractor's responsibility to furnish, erect, brace, and dismantle all scaffold required to complete this Scope of Work. Inspection and tagging of all scaffold provided by this Subcontractor is to be completed on a daily basis prior to work commencing.

36. This Subcontractor shall provide all mockups required by the Contract Documents, the Contractor, the Designer and/or the Owner.

37. This subcontractor shall provide all submittals according to the contract documents including but not limited to product data, shop drawings, samples, operation and maintenance data, material certificates, field quality control reports, and warranties.

38. This Subcontractor shall provide all warranties as called for by the Contract Specifications.

39. The Subcontractor shall provide a list of all intended material and equipment to be purchased under the Owner Direct Material/Equipment Purchase Program no later than 10 days after the issuance of a Notice of Intent or execution of this Agreement, whichever comes first.

Other Items of Note:

A. Wharton-Smith will be utilizing a software called **Team Player** to process monthly pay applications. The fee for this service is $10.00 per Pay Application, regardless on the number of revisions in each month. Please review the Team Player Welcome Letter that has been included in the Bidding Documents which contains embedded links for training documentation and videos. This will be a requirement for all subcontractors on this project.

B. With respect to Article 22 of this Subcontract Agreement, the Owner will exercise the right to purchase materials directly as part of the Owner Direct Purchase Program. This Subcontractor shall actively participate in the Owner Direct Purchase Program for this Project Prior to the

Subcontractor's final payment, a final reconciliation of Owner Direct Purchases against this Subcontract will be performed. This does not apply to temporary fence.

C. On-Site Work Hours: Limit work to between 7 a.m. to 5 p.m., Monday through Friday, unless otherwise indicated. Work hours may be modified to meet Project requirements if approved by Owner and authorities having jurisdiction.

D. Employee Screening: Comply with Owner's requirements for drug and background screening of Contractor personnel working on Project site. Subcontractor shall maintain list of approved screened personnel with Owner's representative.

6.2 BID PRICING / ALTERNATES

The bid pricing shall be broken out as follows and as indicated on the bid form. The City of Port Orange has the sole discretion to accept any, all, or none of the work items for this scope of work based on the bid pricing received. Subcontractor to price the work accordingly.

6.2.1 This bid does not include any bid alternates.

6.2.2 Retainage will be held at 5% for the duration of the Contract and will be released upon retainage release by the Owner.

6.3 CLARIFICATIONS

6.3.1 The Subcontractor will be responsible for protecting all new and existing work throughout the site from damage that could be caused by performing the Scope of Work. Any damage caused by Subcontractor is the responsibility of Subcontractor and Subcontractor will bear the costs of said damage.

6.3.2 The Subcontractor will be required to attend all project progress and coordination meetings as requested by Wharton-Smith, Inc. or the owner.

6.3.3 All materials must be submitted upon and approved prior to being sent to the jobsite, all non-approved items may be rejected and returned at the Subcontractor's cost.

6.3.4 Subcontractor is responsible to coordinate with the CMAR and all other Subcontractors as necessary.

6.3.5 Subcontractor will be responsible for all general notes indicated on the drawings that pertain to this scope of work.

6.3.6 Subcontractor will obtain all permits, licenses, certificates, and coordination efforts, or any such approvals of plans or specifications as may be required by federal, state and local laws, ordinances, rules and regulations, for the proper execution and completion of the work specified herein.

6.3.7 Subcontractor will be responsible for offloading all equipment deliveries and proper short-term and long-term storage requirements per the manufacturer's requirements. Provide all equipment necessary to offload and set equipment including cranes.

6.4 GENERAL REQUIREMENTS

6.4.1 The Subcontractor will be bound to the CMAR to the same extent the CMAR is bound to the Owner by the terms of the Contract Documents.

6.4.2 The Scope of Work shall comply with all Federal, State and Local Codes.

6.4.3 This is a lump sum agreement, including freight, incidental fees, and all applicable taxes. A schedule of values for submittals, materials, checkout, startup and closeout paperwork will be submitted with the return of the signed agreement for review and approval by the CMAR's Project Manager.

6.4.4 If requested by the CMAR, the Subcontractor will assist in cost loading of the project's master schedule. Schedule of Values will follow the cost loaded actives provided by Subcontractor.

6.4.5 No billing will be accepted without an approved Schedule of Values.

6.4.6 A detailed Schedule of Values must be provided within two (2) weeks of a contract being executed should your bid be accepted.

6.4.7 No escalation costs are permitted, pricing will remain firm through the project duration.

6.4.8 The Subcontractor is required to abide by the Wharton-Smith, Inc. safety program and OSHA standards. Excavation, confined space plans, and MSDS sheets will be required for all applicable work.

6.4.9 Subcontractor is responsible to develop and provide a site-specific safety plan for this scope of work.

A. Safety plan will list all potential hazards and competent persons who will be supervising the work.

6.4.10 Subcontractor will maintain an OSHA Certified competent person on site at all times while the work is conducted.

6.4.11 All Subcontractors will be required to follow security protocol of the City of Port Orange and Wharton-Smith at all times.

6.4.12 OSHA and the CMAR's safety standards will be followed at all times.

6.4.13 Proper PPE will be worn by any personnel on the jobsite, including but not limited to delivery drivers, startup and commissioning representatives, manufacturer's representatives, and other personnel.

6.4.14 Materials are to be released as required to maintain Schedule, but Subcontractor is to inform CMAR of material releases and deliveries. No item will be released for production without approval from the Engineer.

6.4.15 All equipment will be labeled and tagged in accordance with the Contract Documents.

6.4.16 Provide all management necessary to adequately support field activities and maintain the Project Schedule.

6.4.17 Fulltime and onsite supervision is required while any work by Subcontractor is being performed. If Subcontractor fails to do so, the CMAR will provide supervision and all costs will be back charged to Subcontractor. The Subcontractor's superintendent will be required to attend all requested progress, safety, scheduling, coordination, and quality control meetings. Meetings of other natures may be required as requested by Engineer, Owner, or the CMAR.

6.4.18 The Subcontractor will be required to coordinate with all other construction trades as required to complete this Scope of Work.

6.4.19 Anticipated (general) sequencing – Your crews may be interfacing with several other trades including mechanical, concrete, piping, and testing agencies. Reasonable time provisions need to be made for coordination and time for these trades to complete their work.

6.4.20 All deliveries will be made between 7am-3pm M-F; all deliveries will be escorted onto the site by WSI. A 72-hour notice to WSI's Superintendent will be required prior to any deliveries.

6.4.21 The Subcontractor may not utilize any area of the project site for storage without approval from the CMAR. If the Subcontractor plans to utilize storage space, the Subcontractor will submit, to the CMAR, a site plan detailing the areas being requested for storage.

6.4.22 An emergency contact list will be provided by the Subcontractor. This list will include at least one point of contact that is available 24 hours a day.

6.4.23 Furnish appropriate Material Safety & Data Sheets (MSDS) and warranty documentation with shop drawings for approval.

6.4.24 Subcontractor is required to coordinate with all applicable authorities as required

6.4.25 The Subcontractor utilizing an Employee Leasing Company for Workers Compensation Insurance coverage will not be allowed to use any Subcontractor on the project (i.e. no third-party subs)

6.4.26 It is the sole responsibility of the Subcontractor to secure any and all tools, materials, and equipment stored on the site. Wharton-Smith, nor the Owner, will be responsible for any theft, vandalism, or damage to the Subcontractors property. The Subcontractor is responsible for all security measures required to secure their resources.

6.4.27 Subcontractor will provide temporary generators as needed and fresh drinking water for their employees. Subcontractor is only responsible for their work and personnel.

6.4.28 The Subcontractor is responsible to follow all site plan details and to adhere to all specifications applicable to the Scope of Work items above.

6.4.29 All hazardous material will be properly disposed of at an offsite location.

6.4.30 The Subcontractor will be responsible to utilize available dumpsters for debris and daily clean-up. All areas will be left clean at the end of each day.

6.4.31 A representative of the Subcontractor knowledgeable of the work will be present at weekly coordination meetings with the General Contractor.

6.4.32 Subcontractor is to provide Daily Reports.

6.4.33 A Superintendent (not Foreman) must be present at all times the Subcontractor's crews are onsite.

6.4.34 Pre-Mobilization Jobsite QC/QA Conference - Subcontractor to participate in WSI Quality Control Plan as outlined in the Subcontract Agreement. Subcontractor's Project Superintendent and or Foremen will attend Quality Control Meetings as deemed necessary by WSI including a minimum of one (1) pre-mobilization meeting to be held in advance of Subcontractor's mobilization on site.

6.4.35 Subcontractor must have approval for additional work (not included in this Scope) in writing by an authorized W/S representative prior to proceeding with said work.

6.4.36 No claim for extra services rendered or materials furnished will be valid by either party unless agreed to in writing by both parties.

6.5 PROJECT SCHEDULE

6.5.1 The Subcontractor is to provide a detailed schedule for the Scope of Work with the submission of bid. The Subcontractor will coordinate with the CMAR to ensure the detailed schedule conforms to the overall Project Schedule. The Subcontractor will update this Scope of Work Schedule each month and provide a written update to the CMAR.

6.5.2 The Subcontractor will account for not working on holidays and still plan for the Scope of Work to be completed per the overall Project Schedule. Holidays will include those observed by the Owner, the CMAR, and the Subcontractor. The CMAR or Owner observes the following holidays:

A. New Year's Day

B. Martin Luther King Day

C. President's Day

D. Memorial Day

E. Independence Day

F. Labor Day

G. Thanksgiving

H. Day after Thanksgiving

I. Christmas Eve

J. Christmas Day

6.6 SUBMITTAL REQUIREMENTS

6.6.1 The Subcontractor will provide submittal documentation as required within the Contract Documents. Upon execution of this Agreement the Subcontractor will provide a list of anticipated submittals for the Scope of Work. The Subcontractor will provide any additional submittal documentation requested for any materials or services related to the Scope of Work.

6.6.2 All submittals which have any deviation will be supplied with a letter addressing all deviations.

6.6.3 All submittals will be provided with a cover page listing the following information:

A. Project name

B. Submittal title

C. Relevant specification sections

a. Specification sections, with addendum updates included, are to have each paragraph check-marked to indicate specification compliance. Check marks shall denote full compliance with a paragraph as a whole. Any deviation shall be clearly marked by an "X" and numbered to indicate a requested deviation. If deviations from the specifications are indicated, and therefore requested, each deviation shall be underlined and denoted by a unique number in the margin to the right of the identified paragraph, referenced to a detailed written explanation of the reasons requesting the deviation. The remaining portions of the paragraph not underlined will signify compliance with the specifications. Failure to include a copy of the marked-up specification sections along with justifications for any requested deviations to the specification requirements shall be cause for return of the entire submittal with no further review.

D. Subcontractor's contact information

E. Manufacturer's contact information

6.6.4 All submittals will include the following information for each individual piece of equipment or fabrication:

A. Complete model number

B. The tag number of each per the Contract Documents (if applicable)

C. List of major components

D. Specification section (if varied from the submittal prime specification section)

6.6.5 It is the Subcontractor's sole responsibility to ensure submittals are complete and accurate for the complete scope of this agreement. Coordination of submittal information from others working under the Subcontractor is the sole responsibility of the Subcontractor. Subcontractor will not provide submittals with any items marked out of scope or by others if such items are part of the scope of this agreement.

6.6.6 Revised submittals will include a comment response document, this document will respond to every comment in writing and reference the location of all corrections within the revised submittal. Revised submittals will be at no additional cost to the Purchaser.

6.6.7 The Subcontractor may be responsible for any costs incurred by the CMAR due to excessive submittal revisions.

6.7 RECORD DOCUMENTS

6.7.1 The Subcontractor will maintain accurate and current as-built documents. These documents will meet the requirements within the Contract Documents. All survey information will be certified by a licensed surveyor.

6.7.2 Prior to approval of the Subcontractor's monthly pay application, the CMAR may elect to review the Subcontractor's as-built documents. If these documents are found to be inaccurate or not current, up to the date of the pay application, the CMAR may reject the pay application until the Subcontractor provides accurate and current as-built documents. Subcontractor will not be entitled for any additional costs, fees, or other compensation due to rejected pay applications and delayed payments as a result of Subcontractor's failure to provide accurate and current as-built documents.

6.7.3 After completion of the Scope of Work, the Subcontractor will provide complete and final as-built documents within two (2) weeks. As-built documents will be provided as detailed in the Contract Documents

6.8 INSURANCE

6.8.1 Subcontractor will provide the minimum insurance limits required to meet the requirements in this purchase order and all the requirements detailed within the Contract Documents. A sample insurance document is included within the Contract Documents for additional reference.

6.8.2 The Subcontractor will maintain a worker's compensation insurance policy for the complete scope of services. The Subcontractor will not utilize a Professional Employer Organization (PEO) to provide workers compensation insurance.

(2.4) Addenda

The Bidder acknowledges receipt of the following Addenda:

Addenda No.		Dated:		Addenda No.		Dated:	
Addenda No.		Dated:		Addenda No.		Dated:	

(2.5) Additional Acknowledgements

The Bidder acknowledges that Bidder has considered and included the requirements of the Subcontractor Bid Manual, dated October 17, 2024, and all other sections, in preparing this Bid.

The Bidder acknowledges time is of the essence and the Project will begin March 6, 2025, with Substantial Completion that must be achieved no later than June 30, 2026, and has included all costs for any required extended hours, extra shifts, weekend and holiday work which may be necessary to complete the Work on schedule.

This Bid will remain subject to acceptance for ninety **90** calendar days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Construction Manager.

The Bidder understands and agrees that the Construction Manager and/or Owner reserves the right to reject this Bid or any and all bids for the Project, and to waive minor irregularities or informalities in any bid and to award Alternates in any order that in the Construction Manager's judgment will be in the Owner's best interest.

The Bidder hereby acknowledges they are licensed to do business in the capacity represented by this Bid and as required by all governing jurisdictional authorities for all locations of the work and as required by the Contract Documents.

The Bidder hereby acknowledges reviewing and accepting without modification the Wharton-Smith, Inc. Subcontract Agreement and agrees to execute same if awarded the project or portion(s) of the Project.

SECTION 3 – INSTRUCTION TO BIDDERS

See Bid Manual

SECTION 4 – BID REQUIREMENTS AND CONDITIONS

See Bid Manual

SECTION 5 – BID PROPOSAL EVALUATION

5.1 GENERAL

5.1.1 Bid Proposals will be evaluated based upon review of the following:

A. Cost – The evaluation of this criterion will be based on the Bidder's total base bid, bid alternates, unit prices.

B. Value Engineering – This criterion measures the ability of the Bidder to identify potential areas of cost savings or improvements of the final project.

C. Bidder's ability to meet all other criteria outlined herein.

5.1.2 Reference the Instructions to Bidders section of this Bid Manual and the Bid Form for more information regarding detailed requirements of the Bid Proposals.

5.1.3 In evaluating Bids, Wharton-Smith, Inc. shall consider the submission of the Bidders, and whether or not the Bids comply with the prescribed requirements as outlined in these Instructions, the Bid Form, this Bid Manual, and all associated Owner and Bid Related documents provided with this Bid Package.

5.1.4 Wharton-Smith, Inc. may conduct such investigations and require supplemental information as it deems necessary to assist in the evaluation of any Bid and to establish the responsibility, qualifications and financial ability of the Bidders, proposed Subcontractors, proposed equipment and material suppliers, and other persons and organizations to provide the materials in accordance with the Contract Documents to Wharton-Smith, Inc.'s satisfaction within the prescribed time.

5.1.5 Bidder shall, upon request of Wharton-Smith, Inc., submit documentation evidencing its capability to execute the work properly within the time specified. This information must be received by Wharton-Smith, Inc. within ten (10) calendar days of Bidder receiving written request.

5.2 RECOMMENDATION AND APPROVAL OF RANKING

5.2.1 The CMAR will review all Bid Proposals that are received in conformance of the requirements herein and provide a recommendation to the Owner. The Owner, at its sole discretion, may accept the CMAR's recommendation or re-evaluate the Bid Proposals. The Owner will establish and approve the final recommended of award for the Bid Package. The Owner will be the sole judge of its own interests, the proposals, and the resulting agreements. The Owner's decision will be final.

5.3 AWARD OF CONTRACT

5.3.1 Award shall be based on products, equipment and materials named in the Contract Documents. Consideration of any decisions regarding substitution shall not be made until after Award of Contracts.

5.3.2 If the Contract is to be awarded, Wharton-Smith, Inc. will give the Bidder a Notice of Award after the Owner's agreement of the Bidder to receive Award.

5.3.3 The Awarded Bidder will be required to enter into a Purchase Order Agreement or Subcontract Agreement with Wharton-Smith, Inc. This agreement will contain the same terms and conditions as shown in the sample agreement provided in this Bid Manual. The Purchase Order or Subcontract will also contain the defined work scope as shown in this Bid Manual. Modifications to this Agreement will not be allowed.

SECTION 6 – SCOPE OF WORK

The Bidder shall utilize the information within this section of the Bid Manual to assist in development of the Bid Proposal. The outlined scopes herein are not intended to detail the complete scope of the Bid Package. The Bidder is responsible for reviewing the Contract Documents to understand the full scope and requirements.

The Subcontractor is to furnish all labor, equipment, material, subcontracts, and supervision required to complete the Scope of Work generally described as the **METAL FRAMING, DRYWALL AND INSULATION**, detailed herein, for the Public Utilities Field Operations Facility. All work shall be complete and in accordance with the Contract Documents. In the event of conflicts between the Scope of Work and other parts of the Contract Documents, this section shall take precedence.

6.1 WORK OVERVIEW

Provide complete, all required **Metal Framing, Drywall, and Insulation** for the Project known as **City of Port Orange Public Utilities Field Operations Facility.**

The Work included in this Subcontract is project specific and outlines the general Scope of Work for this Subcontract, all in complete accordance with the Plans and Specifications as defined in Exhibit "C" attached hereto.

Other Specification Sections may form a part of this Subcontract, whether listed or not.

The Scope of this Subcontract includes, but is not necessarily limited to the furnishing and installation of the following Work by this Subcontractor.

1. Visitors - No one shall be admitted to the jobsite by the Subcontractor, except as necessary to perform the Work hereunder, without, in each instance, first obtaining the approval of the Contractor.
2. Replace Guardrails - This Subcontractor shall install, maintain and replace all required guardrails in accordance with OSHA Standards for the purpose of safety at all openings and suspended work at the locations not protected and where Subcontractor is performing work. Subcontractor is also responsible for all construction fencing, temporary walkways, overhead protection, signage, and/or barricades to perform work outside the boundaries of Contractor furnished construction fencing.
3. Ongoing Operations/Residential Environment/Parking - Without limitation of the foregoing, Subcontractor understands that the Work may be constructed near on-going business or facility operations and may be in and around private residences and neighborhoods. Subcontractor shall use its best efforts, in conformity with the applicable standard of care, to perform the services hereunder in a manner which will not interfere with the on-going business operations and residences. All construction employees are to enter and park in the construction parking area designated by Contractor. Subcontractors are responsible for all off-site parking of employees which may be required and busing to jobsite via route identified by Contractor. Busing of employees, jobsite vehicles or deliveries shall not be routed through surrounding neighborhoods.
4. Jobsite Storage - Subcontractor is aware of the existing site conditions and the limited space availability. On-site storage and staging of materials and equipment will be allowed, only as specifically approved by Contractor's Project Superintendent or Project Manager. All deliveries of Subcontractor will be coordinated through Contractor. If scheduled deliveries are not ready at appointed time, Contractor may refuse acceptance and deliveries will be rescheduled. All cost and/or delays associated with the refusal of deliveries will be the responsibility of the Subcontractor. Subcontractor has included in this Subcontract price, all off-site storage as may be required, including, but not limited to transportation of materials from staging area to site.
5. Phased Turnover - This Subcontractor acknowledges that the Project may have phased turnover in accordance with the Project Schedule and that several mobilizations may be required and are included as part of this Subcontract. Additionally, Subcontractor acknowledges that the Project may have multi-buildings and that concurrent work on each building will be required in order to complete some phases ahead of the Project Schedule and all costs for doing same are included.

6. Owner's Facilities - All Project employees are subject to the Owner's rules and regulations while employed within their property limits. Use of the Owner's other parking lots and facilities by this Project's workmen are not permitted.

7. Limitation of Noise/Hours of Work - Subcontractor shall comply with all city, county, state and local jurisdictional authorities' Noise and Hours of Work Regulations.

8. This Subcontractor shall preserve all benchmark stakes and other survey marks, regardless of location or purpose. In the event these items are removed or destroyed by the Subcontractor's employees or others working on its behalf, the Subcontractor shall bear the full replacement cost.

9. This Subcontractor shall be responsible for all flagmen and traffic control personnel as necessary to get trucks in and out of the Project site in a safe and effective manner.

10. This subcontractor shall provide all Gypsum Board, Metal Framing, Plastering, Batt Insulation, and ~~Rough Carpentry~~ in strict accordance with the contract documents, complete and fully functioning to the designer's intent, specifically including all details sections and notes contained within the Contract Documents, also including but not necessarily limited to the following:

11. This Subcontractor shall provide and install all **Gypsum Board Assemblies** complete including, but not limited to, all walls, bulkheads, soffits, ceilings, metal stud framing, track, anchors, furring, shims, metal suspended ceilings, metal suspended soffits, hangers, wires, channels, grid suspension system for gypsum board ceilings, tile backer panels, gypsum board, gypsum sheathing, cementitious tile backing board, trim, joint tape, joint compound, acoustical insulation, acoustical sealants, smoke and/or fire sealants, fasteners, isolation strips, adhesive, and all miscellaneous accessories required in strict accordance with the contract documents.

12. This Subcontractor shall provide finish or gypsum wall board as required by Contract Documents. Finish must be a level 4 finish and meet ASTM C840 standards.

13. This Subcontractor shall coordinate the sequencing of installation of gypsum board products with the required trade inspections within each wall cavity.

14. This Subcontractor shall be responsible for constructing all gypsum assemblies in a manner that meets or exceeds the STC ratings for each partition as defined on the Contract Documents

15. This Subcontractor shall be responsible for constructing all gypsum assemblies in a manner that maintains fire ratings at all top of wall conditions, bottom of wall conditions, and/or components recessed in the assemblies. All penetrations are to be sealed by appropriate trade Subcontractors.

16. This Subcontractor shall be responsible for providing and installing all safing and/or caulking as required to maintain fire/smoke/sound ratings at the top of drywall walls in strict accordance with the top of wall conditions detailed on the Contract Documents.

17. This Subcontractor shall be responsible for constructing all gypsum assemblies in a manner that meets or exceeds the finish level indicated on the Contract Documents.

18. This Subcontractor shall provide all cut, patch, repairs, and point up of all gypsum assemblies as required to accommodate penetrations through their work by other trades

19. This Subcontractor shall provide and install all wallboard at mechanical and electrical rooms using Mold Tough as directed by the Contractor's Superintendent to allow for these rooms to be hung prior to dry in of the roof system.

20. This Subcontractor shall provide a gap of ¼" around all penetrations through their work in all fire walls.

21. This Subcontractor shall install all gypsum board 5/8" above finished floor to prevent wicking.

22. This Subcontractor shall provide touchup of gypsum board partitions both prior to and after priming of the walls as needed to provide required level 4 wall finish. All touchup work after priming is to be completed immediately after priming is complete allowing the Painting Subcontractor to maintain their workflow. If damage is caused by another party subcontractor has carried 24 manhours to repair unforeseen damages.

23. This Subcontractor shall provide all material in strict accordance with the Contract Documents specifically as it relates to product type, location, size and color.

24. This Subcontractor shall coordinate with other Subcontractors for locations of hangers, sprinklers, lights, electrical boxes, grilles and all other items for proper installation of their work.

25. This Subcontractor shall coordinate with other subcontractors for locations of hangers, sprinklers, lights, electrical boxes, grilles, and any other item for proper installation of its work.

26. This Subcontractor shall independently frame both sides of control and/or expansion joints. Control and/or expansion joints are not to be bridged with steel framing and/or furring members.

27. This Subcontractor shall provide and install proper identification for metal framed rated wall assemblies including stenciling, stickers, tags, signs, and name plates.

28. This Subcontractor includes buildouts, metal stud frame and drywall, of all vertical and horizontal piping chases to allow for complete concealment of piping as required by Contract Documents.

29. This Subcontractor shall provide framing for and install all fire protection, plumbing, mechanical, and electrical access panels within their work. Panels are to be provided by others. Subcontractor has agreed to frame up to 60 access panels.

30. This Subcontractor shall provide and install all insulation required within their work including, but not limited to, gypsum walls, gypsum ceilings, metal furred walls, and exterior walls. Insulation is to be installed in strict accordance with the Contract Documents and includes, but is not limited to, un-faced batt insulation, faced batt insulation, mineral wool insulation, and rigid insulation.

31. This Subcontractor includes all framing and drywall work necessary to incorporate items called to be recessed into the metal stud framed walls, including but not limited to, fire extinguisher cabinets, hand dryers, paper towel dispensers, and waste receptacles. It is agreed and understood that 'five siding' of these recessed openings is included in this Scope of Work should it be required to maintain the wall rating specified at that location.

32. This Subcontractor shall provide and install all supplementary wood and metal framing, blocking, flat metal backing, and bracing in metal framed partitions to support hollow metal door frames, aluminum storefronts, fixtures, equipment, casework, trim, toilet partitions, urinal screens, toilet accessories, hardware, grab bars, mechanical and electrical devices, television brackets, marker boards, tackboards, smartboards, and all other items required to be built into or supported on metal framed partitions. All supplementary framing is to be coordinated with other trades confirming type, location, and elevation.

33. This Subcontractor shall receive, assist in inventorying, and install all hollow metal door and hollow metal window frames within metal stud framed walls in strict accordance with the Contract Documents. All hollow metal frames within metal stud framed walls are to be installed plumb, level, and square and are to be oriented and braced as required to ensure that the frames do not move or deflect during the installation of other trades' work.

34. This Subcontractor shall utilize wood spreaders to set door frames in lieu of the hollow metal spreaders provided. All costs associated with wood spreaders are included in this Subcontract.

35. This subcontractor shall Install all door frames in framed walls in accordance with Section 08 11 13.

36. This Subcontractor shall utilize stud framing members at all hollow metal door and hollow metal window frames in strict accordance with the Contract Documents. This Subcontractor shall install hollow metal frames called to be installed behind all sound control doors using mineral wool insulation in strict accordance with the Contract Documents.

37. ~~This Subcontractor shall provide and install all Fiberglass Reinforced Plastic Paneling (FRP) complete including, but not limited to all walls, bulkheads, soffits, trim accessories, adhesive, sealants, corner trim, anchors, furring, shims, smoke and/or fire sealants, fasteners, and all miscellaneous accessories required in strict accordance with the contract documents.~~

38. This Subcontractor understands that general lighting for construction is to be provided by the Contractor. If supplemental lighting is required to provide proper quality during finishing of gypsum board it is to be provided by this Subcontractor.

39. This Subcontractor shall provide multiple mobilizations and/or work force in multiple area as necessary to meet phasing and schedules for project

40. This Subcontractor shall provide adequate working platforms, walkways, scaffolding, railings, and safety rails as required; at all times work is taking place on site. It is this Subcontractor's responsibility to furnish, erect, brace, and dismantle all scaffold required to complete this Scope of Work. Inspection and tagging of all scaffold provided by this Subcontractor is to be completed on a daily basis prior to work commencing.

41. This Subcontractor acknowledges that all gypsum board and hollow metal door and window frames are to be properly stacked on dunnage and protected so that the product remains free of moisture.

42. This Subcontractor shall provide all mockups required by the Contract Documents, the Contractor, the Designer and/or the Owner.

43. This subcontractor shall provide all submittals according to the contract documents including but not limited to product data, shop drawings, samples, operation and maintenance data, material certificates, field quality control reports, and warranties.

44. This Subcontractor shall provide all warranties as called for by the Contract Specifications.

45. The Subcontractor shall provide a list of all intended material and equipment to be purchased under the Owner Direct Material/Equipment Purchase Program no later than 10 days after the issuance of a Notice of Intent or execution of this Agreement, whichever comes first.

Other Items of Note:

A. Wharton-Smith will be utilizing a software called **Team Player** to process monthly pay applications. The fee for this service is $10.00 per Pay Application, regardless on the number of revisions in each month. Please review the Team Player Welcome Letter that has been included in the Bidding Documents which contains embedded links for training documentation and videos. This will be a requirement for all subcontractors on this project.

B. With respect to Article 22 of this Subcontract Agreement, the Owner will exercise the right to purchase materials directly as part of the Owner Direct Purchase Program. This Subcontractor shall actively participate in the Owner Direct Purchase Program for this Project Prior to the Subcontractor's final payment, a final reconciliation of Owner Direct Purchases against this Subcontract will be performed. This does not apply to temporary fence.

C. On-Site Work Hours: Limit work to between 7 a.m. to 5 p.m., Monday through Friday, unless otherwise indicated. Work hours may be modified to meet Project requirements if approved by Owner and authorities having jurisdiction.

D. Employee Screening: Comply with Owner's requirements for drug and background screening of Contractor personnel working on Project site. Subcontractor shall maintain list of approved screened personnel with Owner's representative.

6.2 BID PRICING / ALTERNATES

The bid pricing shall be broken out as follows and as indicated on the bid form. The City of Port Orange has the sole discretion to accept any, all, or none of the work items for this scope of work based on the bid pricing received. Subcontractor to price the work accordingly.

6.2.1 This bid does not include any bid alternates.

6.2.2 Retainage will be held at 5% for the duration of the Contract and will be released upon retainage release by the Owner.

6.3 CLARIFICATIONS

6.3.1 The Subcontractor will be responsible for protecting all new and existing work throughout the site from damage that could be caused by performing the Scope of Work. Any damage caused by Subcontractor is the responsibility of Subcontractor and Subcontractor will bear the costs of said damage.

6.3.2 The Subcontractor will be required to attend all project progress and coordination meetings as requested by Wharton-Smith, Inc. or the owner.

6.3.3 All materials must be submitted upon and approved prior to being sent to the jobsite, all non-approved items may be rejected and returned at the Subcontractor's cost.

6.3.4 Subcontractor is responsible to coordinate with the CMAR and all other Subcontractors as necessary.

6.3.5 Subcontractor will be responsible for all general notes indicated on the drawings that pertain to this scope of work.

6.3.6 Subcontractor will obtain all permits, licenses, certificates, and coordination efforts, or any such approvals of plans or specifications as may be required by federal, state and local laws, ordinances, rules and regulations, for the proper execution and completion of the work specified herein.

6.3.7 Subcontractor will be responsible for offloading all equipment deliveries and proper short-term and long-term storage requirements per the manufacturer's requirements. Provide all equipment necessary to offload and set equipment including cranes.

6.4 GENERAL REQUIREMENTS

6.4.1 The Subcontractor will be bound to the CMAR to the same extent the CMAR is bound to the Owner by the terms of the Contract Documents.

6.4.2 The Scope of Work shall comply with all Federal, State and Local Codes.

6.4.3 This is a lump sum agreement, including freight, incidental fees, and all applicable taxes. A schedule of values for submittals, materials, checkout, startup and closeout paperwork will be submitted with the return of the signed agreement for review and approval by the CMAR's Project Manager.

6.4.4 If requested by the CMAR, the Subcontractor will assist in cost loading of the project's master schedule. Schedule of Values will follow the cost loaded actives provided by Subcontractor.

6.4.5 No billing will be accepted without an approved Schedule of Values.

6.4.6 A detailed Schedule of Values must be provided within two (2) weeks of a contract being executed should your bid be accepted.

6.4.7 No escalation costs are permitted, pricing will remain firm through the project duration.

6.4.8 The Subcontractor is required to abide by the Wharton-Smith, Inc. safety program and OSHA standards. Excavation, confined space plans, and MSDS sheets will be required for all applicable work.

6.4.9 Subcontractor is responsible to develop and provide a site-specific safety plan for this scope of work.

A. Safety plan will list all potential hazards and competent persons who will be supervising the work.

6.4.10 Subcontractor will maintain an OSHA Certified competent person on site at all times while the work is conducted.

6.4.11 All Subcontractors will be required to follow security protocol of the City of Port Orange and Wharton-Smith at all times.

6.4.12 OSHA and the CMAR's safety standards will be followed at all times.

6.4.13 Proper PPE will be worn by any personnel on the jobsite, including but not limited to delivery drivers, startup and commissioning representatives, manufacturer's representatives, and other personnel.

6.4.14 Materials are to be released as required to maintain Schedule, but Subcontractor is to inform CMAR of material releases and deliveries. No item will be released for production without approval from the Engineer.

6.4.15 All equipment will be labeled and tagged in accordance with the Contract Documents.

6.4.16 Provide all management necessary to adequately support field activities and maintain the Project Schedule.

6.4.17 Fulltime and onsite supervision is required while any work by Subcontractor is being performed. If Subcontractor fails to do so, the CMAR will provide supervision and all costs will be back charged to Subcontractor. The Subcontractor's superintendent will be required to attend all requested progress, safety, scheduling, coordination, and quality control meetings. Meetings of other natures may be required as requested by Engineer, Owner, or the CMAR.

6.4.18 The Subcontractor will be required to coordinate with all other construction trades as required to complete this Scope of Work.

6.4.19 Anticipated (general) sequencing – Your crews may be interfacing with several other trades including mechanical, concrete, piping, and testing agencies. Reasonable time provisions need to be made for coordination and time for these trades to complete their work.

6.4.20 All deliveries will be made between 7am-3pm M-F; all deliveries will be escorted onto the site by WSI. A 72-hour notice to WSI's Superintendent will be required prior to any deliveries.

6.4.21 The Subcontractor may not utilize any area of the project site for storage without approval from the CMAR. If the Subcontractor plans to utilize storage space, the Subcontractor will submit, to the CMAR, a site plan detailing the areas being requested for storage.

6.4.22 An emergency contact list will be provided by the Subcontractor. This list will include at least one point of contact that is available 24 hours a day.

6.4.23 Furnish appropriate Material Safety & Data Sheets (MSDS) and warranty documentation with shop drawings for approval.

6.4.24 Subcontractor is required to coordinate with all applicable authorities as required

6.4.25 The Subcontractor utilizing an Employee Leasing Company for Workers Compensation Insurance coverage will not be allowed to use any Subcontractor on the project (i.e. no third-party subs)

6.4.26 It is the sole responsibility of the Subcontractor to secure any and all tools, materials, and equipment stored on the site. Wharton-Smith, nor the Owner, will be responsible for any theft, vandalism, or damage to the Subcontractors property. The Subcontractor is responsible for all security measures required to secure their resources.

6.4.27 Subcontractor will provide temporary generators as needed and fresh drinking water for their employees. Subcontractor is only responsible for their work and personnel.

6.4.28 The Subcontractor is responsible to follow all site plan details and to adhere to all specifications applicable to the Scope of Work items above.

6.4.29 All hazardous material will be properly disposed of at an offsite location.

6.4.30 The Subcontractor will be responsible to utilize available dumpsters for debris and daily clean-up. All areas will be left clean at the end of each day.

6.4.31 A representative of the Subcontractor knowledgeable of the work will be present at weekly coordination meetings with the General Contractor.

6.4.32 Subcontractor is to provide Daily Reports.

6.4.33 A Superintendent (not Foreman) must be present at all times the Subcontractor's crews are onsite.

6.4.34 Pre-Mobilization Jobsite QC/QA Conference - Subcontractor to participate in WSI Quality Control Plan as outlined in the Subcontract Agreement. Subcontractor's Project Superintendent and or Foremen will attend Quality Control Meetings as deemed necessary by WSI including a minimum of one (1) pre-mobilization meeting to be held in advance of Subcontractor's mobilization on site.

6.4.35 Subcontractor must have approval for additional work (not included in this Scope) in writing by an authorized W/S representative prior to proceeding with said work.

6.4.36 No claim for extra services rendered or materials furnished will be valid by either party unless agreed to in writing by both parties.

6.5 PROJECT SCHEDULE

6.5.1 The Subcontractor is to provide a detailed schedule for the Scope of Work with the submission of bid. The Subcontractor will coordinate with the CMAR to ensure the detailed schedule conforms to the overall Project Schedule. The Subcontractor will update this Scope of Work Schedule each month and provide a written update to the CMAR.

6.5.2 The Subcontractor will account for not working on holidays and still plan for the Scope of Work to be completed per the overall Project Schedule. Holidays will include those observed by the Owner, the CMAR, and the Subcontractor. The CMAR or Owner observes the following holidays:

A. New Year's Day
B. Martin Luther King Day
C. President's Day
D. Memorial Day
E. Independence Day
F. Labor Day
G. Thanksgiving
H. Day after Thanksgiving
I. Christmas Eve
J. Christmas Day

6.6 SUBMITTAL REQUIREMENTS

6.6.1 The Subcontractor will provide submittal documentation as required within the Contract Documents. Upon execution of this Agreement the Subcontractor will provide a list of anticipated submittals for the Scope of Work. The Subcontractor will provide any additional submittal documentation requested for any materials or services related to the Scope of Work.

6.6.2 All submittals which have any deviation will be supplied with a letter addressing all deviations.

6.6.3 All submittals will be provided with a cover page listing the following information:

A. Project name
B. Submittal title
C. Relevant specification sections
    a. Specification sections, with addendum updates included, are to have each paragraph check-marked to indicate specification compliance. Check marks shall denote full compliance with a paragraph as a whole. Any deviation shall be clearly marked by an "X" and numbered to indicate

a requested deviation. If deviations from the specifications are indicated, and therefore requested, each deviation shall be underlined and denoted by a unique number in the margin to the right of the identified paragraph, referenced to a detailed written explanation of the reasons requesting the deviation. The remaining portions of the paragraph not underlined will signify compliance with the specifications. Failure to include a copy of the marked-up specification sections along with justifications for any requested deviations to the specification requirements shall be cause for return of the entire submittal with no further review.

D. Subcontractor's contact information

E. Manufacturer's contact information

6.6.4 All submittals will include the following information for each individual piece of equipment or fabrication:

A. Complete model number

B. The tag number of each per the Contract Documents (if applicable)

C. List of major components

D. Specification section (if varied from the submittal prime specification section)

6.6.5 It is the Subcontractor's sole responsibility to ensure submittals are complete and accurate for the complete scope of this agreement. Coordination of submittal information from others working under the Subcontractor is the sole responsibility of the Subcontractor. Subcontractor will not provide submittals with any items marked out of scope or by others if such items are part of the scope of this agreement.

6.6.6 Revised submittals will include a comment response document, this document will respond to every comment in writing and reference the location of all corrections within the revised submittal. Revised submittals will be at no additional cost to the Purchaser.

6.6.7 The Subcontractor may be responsible for any costs incurred by the CMAR due to excessive submittal revisions.

6.7 RECORD DOCUMENTS

6.7.1 The Subcontractor will maintain accurate and current as-built documents. These documents will meet the requirements within the Contract Documents. All survey information will be certified by a licensed surveyor.

6.7.2 Prior to approval of the Subcontractor's monthly pay application, the CMAR may elect to review the Subcontractor's as-built documents. If these documents are found to be inaccurate or not current, up to the date of the pay application, the CMAR may reject the pay application until the Subcontractor provides accurate and current as-built documents. Subcontractor will not be entitled for any additional costs, fees, or other compensation due to rejected pay applications and delayed payments as a result of Subcontractor's failure to provide accurate and current as-built documents.

6.7.3 After completion of the Scope of Work, the Subcontractor will provide complete and final as-built documents within two (2) weeks. As-built documents will be provided as detailed in the Contract Documents

6.8 INSURANCE

6.8.1 Subcontractor will provide the minimum insurance limits required to meet the requirements in this purchase order and all the requirements detailed within the Contract Documents. A sample insurance document is included within the Contract Documents for additional reference.

6.8.2 The Subcontractor will maintain a worker's compensation insurance policy for the complete scope of services. The Subcontractor will not utilize a Professional Employer Organization (PEO) to provide workers compensation insurance.

BID PROPOSAL

DATE: 11/12/24

PROJECT: Port Orange Public Utilities

CONTRACTOR: Wharton Smith

ARCHITECT: Schenkel Shultz

DOCUMENTS DATE: 9/30/2024

Annapurna Construction is pleased to propose furnishing of labor and materials in accordance with the plans and specifications for the following scope of work subject to the qualifications as outlined below:

METAL STUD FRAMING:

- Exterior framing to be 16 ga G60 material of size and spacing as shown on Architectural drawings – any changes per approved shop drawings will be subject to appropriate pricing
- Exclude eave framing/soffit system
- Interior framing to be per manufacturer limiting height tables based on L/240 @ 5 PSF
- Deflection track at head of walls terminating at structure – Exclude fire track
- All interior ceilings to be framed with drywall suspension system
- Installation of hollow metal door frames in metal stud walls included – Material to be supplied by others
- All HMF Openings to have double jamb studs at each side of opening – Size and gauge to match wall framing

GYPSUM DRYWALL:

- Typical gypsum board throughout to be 5/8" type X drywall
- Ceiling Type C2 – USG Ensemble Acoustic drywall ceiling included – Standard Ensemble White color
- Tile backer to be 5/8” glass mat gypsum tile backer board
- Shower locations to have 5/8” cement board
- Exterior sheathing to be 5/8” glass mat gypsum sheathing
- Level 4 finish at exposed gypsum.
- Level 1 finish included at concealed gypsum.

INSULATION:

- Typical Insulation to be unfaced fiberglass batts
- Wall type WA2 to have 3” semi-rigid board insulation per specification

ACOUSTICAL CEILINGS:

- Acoustic Tiles to be equal to Armstrong Fine Fissured #1756
- Grid to be standard 15/16”

INCLUSIONS AND CLARIFICATIONS:

- Applicable taxes and insurance.
- Clean-up and recycling to dumpsters on site (provided by G.C.)
- Scaffold, and lifts for our work except at elevator shaft
- GC to remove window for material stocking to the floor

PROJECT SPECIFIC QUALIFICATIONS :

- Excludes any engineering/shop drawings
- Exclude FRP
- Exclude Unistrut
- Parking to be provided on site
- Wall ratings are based on partition type details.
- STC ratings assumed to be met by construction details – No additional materials for STC requirements included.
- General Conditions figured per provided schedule. Any delays not the fault of Annapurna Construction will result in additional General Conditions costs.
- Proposal is valid for 30 days from the above date.

EXCLUSIONS:

- Building Department Permit Filing Fees
- Temporary power, water, lighting & humidity control. GC to provide
- Building Expansion Joints.
- Mold and/or air pollutant insurance coverage.
- No sealing of penetrations from other trades.
- No finish caulking.
- Texture
- Waterproofing of any kind
- Demo.
- EIFS/Brick/Stone
- Liquidated Damages unless specifically discussed and detailed in this proposal

LUMP SUM BASE BID: $606,543.00

Add for P&P Bond ……..... $ 12,131.00

Thank you for the opportunity to bid on this project. Price is valid for thirty days. Please call if you need additional pricing or to review the scope of work in further detail.

Respectfully,

ANNAPURNA CONSTRUCTION

Certified Finishes, Inc. will furnish, deliver, and install the above material in accordance with all transmitted plans, specifications and general conditions for the listed price. The price includes all applicable freight and taxes, unless otherwise noted. Unless specifically included in this proposal: excludes all demolition, repair or take-up of existing flooring; excludes vacuuming, damp mopping, buffing, waxing or floor protection; excludes floor floating, leveling or repair; excludes sealing of floor, cleaning or removal of oil, grease, solvents, paints, plaster or other foreign substances; excludes asbestos control/abatement; includes no attic stock of material beyond installation coverage; includes work only during regular hours and for a single phase job; excludes any furniture movement; excludes any addenda beyond the base bid; Per CRI-104-96, 6.3 site conditions: The owner or general contractor must submit to the flooring contractor a written report on moisture and surface alkalinity of the slab to determine its suitability as a substrate for the material to be installed. Floor preparation will be billed on a time and material basis at $75.00 per man-hour plus the cost of the materials. Client is subject to payment for stored materials. Certified Finishes, Inc. will not accept charge backs of damage or cleaning without the option to inspect claim(s) to repair or without the option to make arrangements for acceptable repairs at their expense. Certified Finishes, Inc. is not responsible for any claims that might result from product delivery date changes beyond their control. If a manufacturer requires a deposit to manufacture/ship certain items, client will pay that amount. This proposal is valid for forty-five (45) days. Full payment is due ten (10) days from receipt of invoice unless otherwise specified.

WARRANTY DOES NOT INCLUDE ANY MOISTURE RELATED SUBFLOOR FAILURES

Colin,

Todd meant that we did not price the Epoxy or Sealed Concrete.

Also, we have included part-time supervision for the duration of the project in lieu of full-time supervision.

Hey Todd,

Hope you're doing well. We only received 1 flooring proposal on bid day (yesterday) for the Port Orange Public Utilities, and we were hoping you could get us a late proposal for that either later this week or early next week. I just resent the ITB so let me know if you're interested. Here is what we would like you to pick up:

Carpet
CPT-1 - Shaw Transform Tile
Resiliant Flooring
LVT-1 - Patcraft Splitwood
Tile Flooring
PTF-1 - Daltile Enlite 15"x30"
PTF-2 - Daltile Keystones 2"x2"
PTW-1 - Tile Bar Glazed Ceramic 12''x24''
PTW-2 - Tile Bar Glazed Ceramic 12''x24'' & Polished Glass Moisaic Tile 7''x4''
Bases:
WD-1 - Wood Base 6'' H
RB-1 - Tarkett Traditional 4'' H
PTF-1 - Daltile Clarity EL62 Porcelain Floor Tile
PTB-1 - Schluter Cover Base and Trim
Concrete Floor Finishes
SC-1 - Integral Colored Polished Concrete
SC-2 - Seal Concrete
Epoxy Floor
EPX-1 - Sikafloor Pour Epoxy Decodur-Quartz FX
EPX-1 - Sikafloor Pour Epoxy Decodur-Quartz FX Base Paint
Floor Protection
Floor Prep - minor
Waterproofing
Moisture Testing
Transitions

Reference: Port Orange Public Utilities Field Ops Bldg

Dear: John

Please find below our bid on the above referenced project.

This proposal reflects furnishing labor and material to complete the painting work following professional industry standards as set forth by the PCA (Painting Contractors Association) and the AIA (American Institute of Architects), https://www.pcapainted.org/wp-content/uploads/2021/08/2021-Complete-Industry-Standards-Document.pdf

Base Bid: $155,564.00

****All quotes are valid for a period of 30 days from the date the quotation. Unless specifically stated otherwise, all quotations are based on costs of labor, materials, and fuel at the date of the quotation and is subject to price variation ****

Thank you for inviting us to bid on this project, please contact us with any questions.

Sincerely,

Edward J. Dolan Sr

Senior Esimator

Port Orange Public Utilities Field Ops Bldg

SCOPE OF WORK

BASE PROPOSAL

The following scope of work adheres to the project specifications as Qualified below with the stipulations of the Exclusions listed. The base proposal reflects furnishing labor and material to complete the painting work following professional standards as set forth by the PDCA (Painting and Decorating Contractors of America), now known as the PCA (Painting Contractors Association) and the AIA (American Institute of Architects) for this project as follows:

All Sherwin Williams Product Lines

Base Scope

Drywall walls

- One coat Pro Mar 200 zero VOC latex primer
- Two coats SW Scuff Tuff enamel
- Two coats Pro Industrial water based Catalyzed epoxy
- Accent walls

CMU walls

- One coat Pro Industrial heavy duty block filler
- Two coats Pro Mar 200 zero VOC latex
- Two coats Pro Industrial water-based Catalyzed epoxy eggshell

Drywall ceilings and soffits

- One coat Pro Mar 200 primer
- Two coats of Pro Mar 200 flat
- Two coats Pro-Industrial water based Catalyzed epoxy semi-gloss

Exposed ceilings

- Two coats latex Dryfall

Concrete Floors SC-2

- Damp mop & Two coats clarishield water based natural look

Hollow metal doors and frames

- One coat Procryl primer
- Two coats Pro Industrial water based Catalyzed epoxy semi-gloss

Exterior

bollards

- One coat Procryl primer
- Two coats Pro Industrial water based Catalyzed epoxy semi-gloss

Exposed steel columns and support beams

- One coat Macropoxy 646 epoxy primer
- Two coats of Acrolon 218 HS semi gloss

CMU & Cement Plaster

- Pressure wash areas to be painted
- One coat Loxon Block surfacer
- Two coat Sherwin Williams Loxon XP

Interior Painter's Caulking (defined as PDCA P11 and implied requirements)

- Siliconized (paintable) Acrylic Latex Caulk
- Caulk applied to enhance the aesthetic appearance of surfaces
- Gaps caulked are dissimilar "field painted" (or painted) surfaces, limited to voids of 1/8" or less.
- Gaps of certain painted hollow metal members to painted wall surfaces
- Gap at window perimeter in units only. (only gap painted to unpainted or "prefinished" dissimilar surface included)
- Gaps between painted wood and/or wood composite materials and painted wall such as; gypsum drywall, plaster or other similar surface.

Scope of Work Based on Plans/Drawings Dated:

- **09-30-2024**

Additional Scope

Add Alternates:

SPECIFIC EXCLUSIONS:

We understand the following surfaces are to receive no work or specifically exclude from our scope:

- Bondo work (allowance can be carried if specifically directed)
- SC-1
- EPX-1
- PTE
- FRP
- Patching, rubbing, filling of bugholes or chemical cleaning tiltwall
- Scaffolding Costs if Required (see above boom qualification), all Hoisting
- All Site Work including but not limited to: fencing, walls and metal substrates.
- All Roof Metals
- Pipes, Color Coding Pipes, all MEP Stenciling, Striping and Signage

- All touch up of nuts, bolts, weld and corrosion (by steel erector)
- Intumescent and Fire Retardant Coatings
- Caulking for Waterproofing Purposes and all other Waterproofing
- Caulking floor to wall joint condition, caulking requiring backing rod, and to minimize movement of joints or voids, caulking integral color or prefinished building materials.
- Division 7 joint sealants (this section doesn't include painter's caulk, unless it is specifically called out in specification 099000, painting or in the plans)
- Caulking the following areas: tubs to tile, vinyl flooring to baseboard, expansion joints, casework/cabinetry, countertops, prefinished door/window frames, prefinished trim, natural or stained wood, ceramic tile, wallcovering, rigid vinyl wallcovering, seamless floors, floor surfaces, vinyl base, ceiling grid, acoustical tile, electrical or mechanical cover plates, HVAC registers, or grilles, shoe molding etc. All Gaps between painted and unpainted or prefinished dissimilar items, unless explicitly address in scope of work.
- All drywall QC, including but not limited spackling and patching
- Parking Costs

Good afternoon,

We need to adjust our pricing then. We have it priced as lath installed. We did not include AVB, does it have to be R guard or can a similar product be used? I can take a look at the east elevation and separate pricing for that part as it is not decided yet.

Terms and Conditions

* Federal Law provides that the buyer shall give the seller an opportunity to make necessary repairs to merchandise. Customer agrees to accept service in accordance with the terms of the manufacturer's warranty. Replacement will only be allowed under the terms of the manufacturer's warranty and Customer Service department.
* Quoted prices are good for 14 days, unless otherwise stated in the quote or invoice.
* Quoted installation charges are based on a "standard" installation (i.e., not requiring any modifications to complete the installation at initial delivery). Any modifications to appliances, cabinetry, electrical or plumbing will incur additional charges and will be quoted at that time based on time, materials and complexity and may need to be completed at a later date.
* Standard delivery is also based on a first-floor delivery of not more than six steps. Additional charges will apply in excess of that and may require a lull or crane and/or subcontractor to set the appliances in place at your expense.
* If, for any reason, we are unable to complete the delivery and/or installation at the scheduled time, additional fees will be charged for a return trip and mileage.
* Milcarsky's reserves the right to refuse any installation if our employee determines that it is unsafe to attempt the delivery or installation or risks damage to your home and its contents.
* The customer or agent authorized by the customer must sign for all products. Products will not be left without a signature and confirmation that product was received in good condition. All authorized agents must be a minimum of 18 years of age.
* Customer is responsible to ensure that all tradespeople associated with their project have product specifications and are made aware of any changes and that customer has verified that products selected meet customer needs, requirements, size, features, color, electrical, cabinetry, ventilation and local and federal building code requirements.
* All orders must be paid in full at time of order. Payment in full will guarantee pricing but does not imply that Milcarsky's is physically holding product in its warehouse. Less than full payment at order placement does not lock in pricing. Payment in full is required before delivery. A monthly late fee of 1.5% will be applied to ALL overdue invoices.
* A minimum 14-day lead time is required before scheduling delivery.
* Once your order is "complete", you will have 30 days to take delivery or storage fees will apply
* All authorized returns and cancellations are subject to a 35% restocking fee and must be in un-opened, original box.
* Special-order items are to be paid in full when the order is placed and are not returnable.
* Open box and outlet models are sold as-is unless otherwise stated.
* No returns are allowed on trim kits, accessories, duct covers, ventilation or auxiliary items or kits.

By signing below, customer has acknowledged above information and confirms order with no changes.

GE® ENERGY STAR® 23.6 Cu. Ft. French-Door Refrigerator

Approx Dimensions (HxDxW):
69 7/8 in X 37 1/2 in X 32 3/4 in

- Fingerprint Resistant Stainless - Easily wipe away smudges and fingerprints for a look that's always sparkling clean
- 33" width - A compact design fits in smaller spaces, yet still offers the large storage capacity of a French-door refrigerator
- Space-saving icemaker - Located on the door with integrated bins to create more usable storage space
- External controls with child lock and door alarm - Eliminates the guesswork in setting refrigerator temperatures; conveniently displayed on the dispenser
- LED lighting - Find exactly what you've been looking for under crisp, clear lighting
- Two humidity-controlled drawers and full-width drawer - Create the right environment for keeping fruits and vegetables fresh, while easily storing wider items like a party platter or a sheet cake

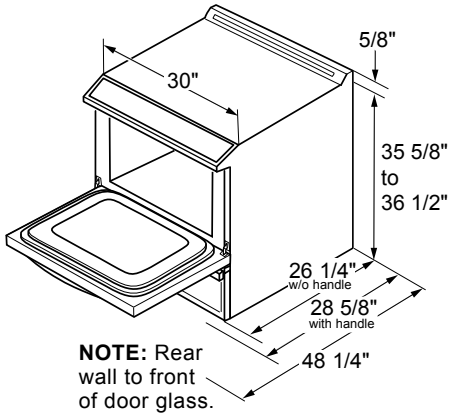
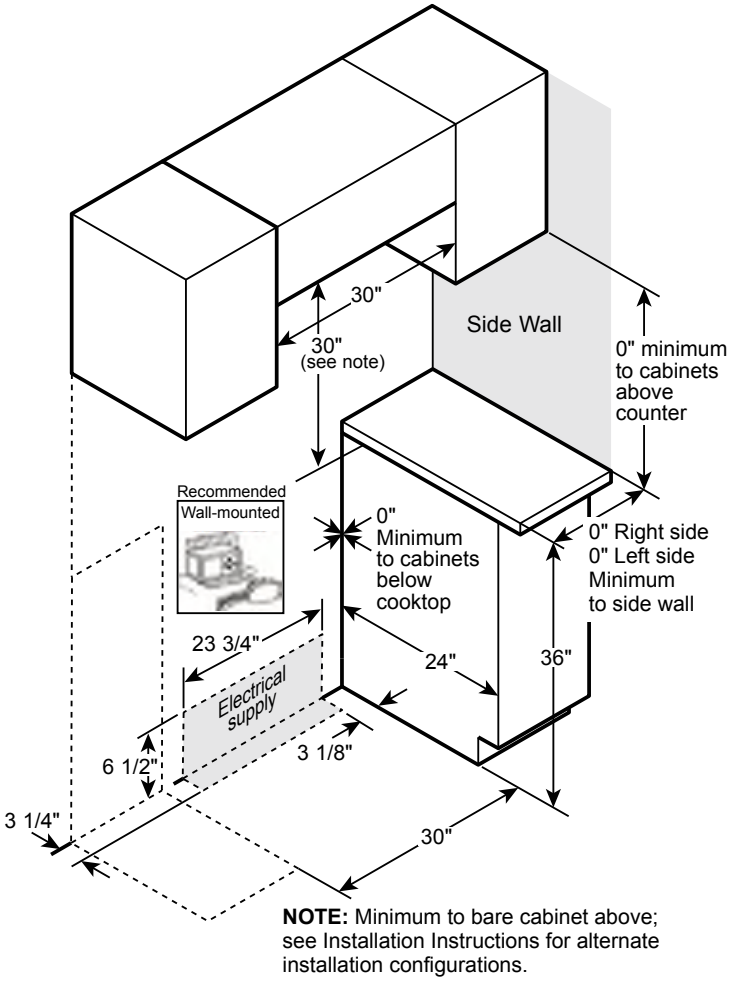
GE® 500 Series 30" Slide-in Electric Range

DIMENSIONS AND INSTALLATION INFORMATION (IN INCHES)



RECEPTACLE LOCATIONS: Locally approved flexible service cord or conduit must be used because terminals are not accessible after range installation. See shaded area in drawing for location of electrical outlet box. Recommended outlet locations allow range to be installed directly against rear wall.



NOTE: This appliance has been approved for 0" spacing to adjacent surfaces above the cooktop. However, a 6" minimum spacing to surfaces less than 15" above the cooktop and adjacent cabinet is recommended to reduce exposure to steam, grease splatter and heat.

INSTALLATION INFORMATION: Before installing, consult installation instructions for current dimensional data and additional requirements.

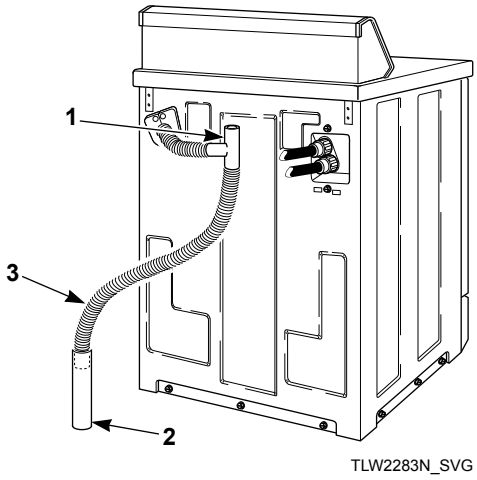
2. Install standpipe adapter onto drain hose only if standpipe diameter is 2 inches [51 mm] or less.
3. Place the drain hose into the standpipe.

   IMPORTANT: To prevent siphoning, do not place any ribbed portion of the drain hose into the standpipe.
4. Remove the beaded strap from accessories bag and place around standpipe and drain hose, approximately 12 inches [300 mm] down from the top of pipe. Refer to *Figure 5* .
   a. Insert the end of the beaded strap into the larger hole found on the end of the strap.
   b. Tighten to desired fit.
   c. Lock strap in place by pulling beaded strap into the tapered smaller opening of the beaded strap end. A distinct snap noise should be heard once the strap is properly seated.
   d. Pull on the strap once locked in place to ensure beaded strap is properly installed. This will prevent the drain hose from dislodging from drain receptacle during use.



1. Ribbed Portion of Drain Hose
2. Beaded Strap
3. Standpipe - 2 in. [51mm] or 1-1/2 in. [40 mm] Diameter
4. 36 in. [914 mm] Recommended Height
5. 12 in. [305 mm]

Figure 5

Low Standpipe Installation

If standpipe is lower than 36 inches [914 mm], you must install No. 562P3 Siphon Break Kit. This kit is available (as optional equipment at extra cost) through an authorized dealer or parts distributor. Installation instructions are supplied with the kit.

1. 562P3 Siphon Break Kit
2. Standpipe
3. Drain Hose

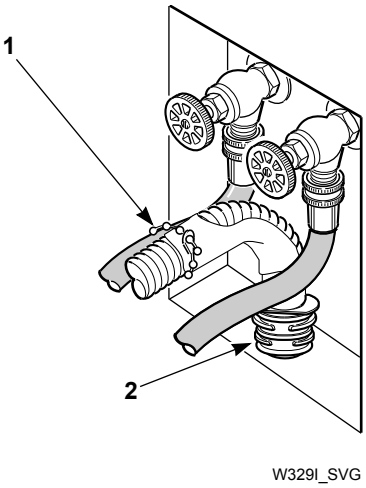


Figure 6

Wall Installation

Check wall drain height. The recommended height for the drain is 36 inches [914 mm].

Install standpipe adapter onto drain hose only if standpipe diameter is 2 inches [51 mm] or less.

For installations of this type, the drain hose MUST be secured to one of the fill hoses using the beaded strap from accessories bag. Refer to *Figure 7* .

1. Beaded Strap (tape if necessary)
2. Standpipe Adapter (select models)

Area	Description	Free Standing/Alcove Installation	Closet Installation
A*	Dryer sides and rear clearance	0 in. [0 mm]	0 in. [0 mm]
B	Dryer top clearance	12.25 in. [305 mm]	12.25 in. [305 mm]
C	Dryer front clearance	Not Applicable	2 in. [51 mm]
D	Exhaust duct clearance to combustible material	2 in. [51 mm]	2 in. [51 mm]
E	Weather hood to ground clearance	12 in. [305 mm]	12 in. [305 mm]
F	Distance from floor or ceiling to air opening edge	Not Applicable	3 in. [76 mm]
G	Area of centered air openings in closet door. Louvered door with equivalent air openings is acceptable. (Minimum clearances are shown.)	Not Applicable	40 sq. in./open [260 sq. cm/open]
H	For new installations, locate top of wall vent 42 inches [1067 mm] above floor to make venting easier to connect.	42 in. [1067 mm]	42 in. [1067 mm]
*	Rear clearance is minimum. 2 inches [51 mm] is recommended for utility connection. 6 inches [152 mm] is recommended when venting through rear of unit.		

Table 1

NOTE: For new installations, it is suggested to locate top of wall vent 42 inches (106.7 cm) above floor to make venting easier to connect.

IMPORTANT: In mobile home installations, gas dryers MUST be permanently attached to the floor at the time of installation. Order No. 526P3 Dryer Installation Kit (available at extra cost) for a manufactured (mobile) home installation. Follow the instructions supplied with the kit.

Connect Dryer Exhaust System

WARNING

To reduce the risk of fire and combustion gas accumulation the dryer MUST be exhausted to the outdoors.

W604

WARNING

To reduce the risk of fire and the accumulation of combustion gases, DO NOT exhaust dryer air into a window well, gas vent, chimney or enclosed, unventilated area, such as an attic, wall, ceiling, crawl space under a building or concealed space of a building.

W045

WARNING

To reduce the risk of fire, DO NOT use plastic or thin foil ducting to exhaust the dryer.

A DIVISION OF SOUTHEASTERN SURFACES & EQUIPMENT

Florida State Certified M/WBE

Notes:

- We accept Visa, Master Card and American Express. Payments made using a Visa or Master Card will require an additional fee of 2%. American Express payments will require an additional fee of 2.5%.
- Sales/Use taxes are INCLUDED in above bid amount.
- 50% Deposit required at time of Order without prior credit approval. Balance due on completion, with prior approved credit.
- Payment and Performance Bonds are NOT INCLUDED in the above price. Add 1% for our standard bond form. If alternate bond forms are required there may be an additional cost and the forms will be subject to approval by our bonding company.
- Removal and disposal of existing equipment or materials is NOT INCLUDED.
- Materials stored at owner or GC's request will incur storage fees and handling charges.
- All electrical service requirements, including conduit, wiring and/or final hook which may be required shall be provided by electrical subcontractor.
- Hoisting for non-ground floor access, unless specifically indicated above is not included.
- 100% Restocking fee on all materials.
- Permits, if required, are not included, and shall be provided by others at others expense.
- **Operable Partitions** – GC to provide pre-punched overhead support beams to support the operable partitions. Sway bracing, sound plenums, blocking at wall and jamb, lock cylinders, pass doors, pocket doors, other accessories (i.e., marker boards), or caulking are not included unless specifically indicated above.
- All pricing based upon work being performed during regular working hours. Weekend, holiday, and after-hours work is extra, unless otherwise noted.
- Proposal based on manufacturer's required minimum clearances for proper and safe operation and warranty.
- This quotation is good for 30 days from date of this proposal and subject to delivery and installation in twelve months from date of purchase order/contract. Beyond twelve months subject to material escalation.

TERMS AND CONDITIONS

- FINANCE CHARGES Purchaser will receive monthly statements; however, payment is due upon receipt of original invoice. If the balance shown on a monthly statement is not paid before the 30th day of the same month, interest will accrue on the unpaid amount at the highest rate allowable by Florida law.
- PERSONAL JURISDICTION Any judicial proceeding by the Purchaser against the Seller or the Seller against the Purchaser involving, directly or indirectly, any matter in any way arising out of related to or connected with this agreement or any other credit document shall be brought in the courts of the State of Florida, County of Volusia, and the parties accept exclusive personal jurisdiction of these courts for the purpose of any suit, action or proceeding. In addition, the parties knowingly, intentionally, and irrevocably waive to the fullest extent permitted by law, any objection which they may now or later have to the laying of venue of any suit, action or proceeding arising out of relating to this agreement, or any judgment entered by any court brought in the State of Florida. Further, both parties intentionally and irrevocably waive any claim that any suit, action or proceeding brought in the State of Florida, County of Volusia, has been brought in an inconvenient forum.
- ATTORNEY'S FEES If Seller employs an attorney to enforce any provision of this Quotation or invoice, or to defend any action brought by Purchaser, its agents or employees against Seller, whether the action sounds in contract, in tort or otherwise, or to collect any payment due to Seller from Purchaser whether or not suit is instituted, Seller will be entitled to recover from Purchaser all costs and expenses incurred including a reasonable attorney's fee.
- VENUE/JURY TRIAL/INTEREST Purchaser will pay interest on all monies due to Seller at the highest lawful contract rate. Purchaser WAIVES ANY RIGHT TO JURY TRIAL in any action brought by or against Purchaser involving Seller regardless of whether the claim sounds in contract, in tort or otherwise, or is in any proceeding related, ancillary or supplementary to this Application. Purchaser waives any right of venue and agrees that any legal action or arbitration proceeding between Purchaser and Seller regardless of whether it sounds in contract, in tort or otherwise, will be brought in a state court of competent jurisdiction located in Volusia County, Florida.
- PERSONAL GUARANTY The person signing this Quotation on behalf of the Purchaser, personally and individually, guarantees the full and prompt performance of the Purchaser and the payment of all sums due to Seller. As used in this PO, The term "Purchaser" will also include the guarantor and any other party to this PO and all waivers are equally applicable to those persons.

I have read and agreed to the terms and conditions of this Quotation.

Please contact ConstructConnect. It's something on their end (likely with their recent server crash or transferring clients from iSqFt to ConstructConnect).

Meanwhile, here are the dwgs specs. for now - and bid based on these. But you have to get up on Construct Connect to be sure to see/review all other bid docs, RFI's etc.

The Bidder acknowledges receipt of the following Architect Supplemental Instruction(s):

ASI No.		Dated:		ASI No.		Dated:	

(2.4) Addenda N/A

The Bidder acknowledges receipt of the following Addenda:

Addenda No.		Dated:		Addenda No.		Dated:	
Addenda No.		Dated:		Addenda No.		Dated:	

(2.5) Additional Acknowledgements

The Bidder acknowledges that Bidder has considered and included the requirements of the Subcontractor Bid Manual, dated October 17, 2024, and all other sections, in preparing this Bid.

The Bidder acknowledges time is of the essence and the Project will begin March 6, 2025, with Substantial Completion that must be achieved no later than June 30, 2026, and has included all costs for any required extended hours, extra shifts, weekend and holiday work which may be necessary to complete the Work on schedule.

This Bid will remain subject to acceptance for ninety **90** calendar days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Construction Manager.

The Bidder understands and agrees that the Construction Manager and/or Owner reserves the right to reject this Bid or any and all bids for the Project, and to waive minor irregularities or informalities in any bid and to award Alternates in any order that in the Construction Manager's judgment will be in the Owner's best interest.

The Bidder hereby acknowledges they are licensed to do business in the capacity represented by this Bid and as required by all governing jurisdictional authorities for all locations of the work and as required by the Contract Documents.

The Bidder hereby acknowledges reviewing and accepting without modification the Wharton-Smith, Inc. Subcontract Agreement and agrees to execute same if awarded the project or portion(s) of the Project.

THANK YOU FOR YOUR BUSINESS!

Patterson Pope Terms and Conditions The following terms and conditions shall apply to any Deliverables (defined herein) provided by Patterson Pope, Inc. ("Company") to Client.

1. **Acceptance and Agreement:** The provisions on the pricing page, the purchase order and these Terms and Conditions (collectively, the "Agreement") constitute the entire agreement between Company and Client and supersede all other communications between the parties, whether written or oral, regarding the products and services described in this Agreement ("Deliverables"). The terms of this Agreement are expressly limited to those provided herein, and no purported modification, addition, or waiver of the provisions hereof shall be binding on Company for any purposes unless contained in writing, signed by an authorized representative of Company. The provisions hereof shall be deemed to have been accepted by Client's acceptance of all or any part of the Deliverables. All orders or any changes to such orders shall be subject to acceptance by Company. Change orders requested after receipt of Client purchase order may also incur additional charges. If, for any reason, Client cancels the order, any cancellation, restocking and handling charges will be invoiced. Future purchase orders (or similar engagement documents) and associated pricing pages may reference these Terms and Conditions, and by such reference, these Terms and Conditions shall be incorporated therein.

2. **Payment and Pricing:** Pricing quoted on the pricing page supersedes all previously quoted prices and is good for 60 days from the date of this Agreement. The pricing page may or may not include applicable sales or other taxes required by law; such taxes will be billed to Client and are Client's sole responsibility. This system has been custom designed and will be specially manufactured for your unique requirements. A non-refundable down payment of 40% is due upon order, 30% is due at the time of shipment and 30% is due at the time of completion. Client shall have no authority to assert any offsets or discounts against any payment due, except as expressly agreed to by Company in the pricing page or other signed writing. Client represents and warrants to Company that it is solvent at the time this Agreement is made. Client hereby grants a security interest in the product Deliverables to secure payment to Company and consents to Company filing a financing statement to perfect such security.

3. **Space Requirements:** This system has been specially designed to meet Client's specific requirements; as such, most of the equipment is manufactured on a "per job" basis. Client shall allow Company's representative(s) reasonable access to Client's facilities to confirm whether the space where the Deliverables will be installed matches Client's representations. In the event that the space cannot be field verified before the Deliverables must be ordered and the actual space does not match what had been previously represented, Client is responsible for any delays and additional costs incurred to reconfigure the Deliverables to fit actual space (i.e. extra material, labor, and freight). Notwithstanding any field verification by Company, it is Client's responsibility to be certain the space is suitable for the installation of this equipment (i.e. adequate fire protection and floor load capacity).

4. **Acceptance:** Client shall accept the Deliverables which conform to the requirements of specifications under this Agreement. All claims for errors, shortages, or damage ("Non-conformance") must be made in writing to the respective Account Representative within ten (10) days of Client's receipt of any Deliverables, and Company shall have a reasonable period of time, based on the severity and complexity of the Non-conformance, to correct the Non-conformance. If Client uses the Deliverables before acceptance or fails to promptly notify Company of any Non-conformance then the Deliverables shall be considered accepted by the Client.

5. **Freight and Shipping:** Freight and shipping terms are detailed on the pricing page. In the event that Client or one of its agents refuses delivery for whatever reason on or after the estimated delivery date, Client will be responsible for the payments in accordance to Section 2 and the pricing page in addition to any supplemental storage charges incurred by Company as a result of the delay *unless* the delay is caused by Company, one of its manufacturers, freight carriers, subcontractors, and/or any other agent acting on Company's behalf.

6. **Storage Fees:** As part of the Sales Agreement, Patterson Pope agrees to provide 30 days of storage at no cost. After 30 days storage fees will accrue and become billable to customers for any customer related delay or site related delay that results in a change in the installation date.

7. **Limited Warranty:** Company warrants its installation services under the Agreement shall be performed with reasonable care in a diligent and competent manner. Company's sole obligation under this warranty shall be to correct any Non-conformance, provided that Client gives Company written notice within ten (10) days after installation is completed. Company does not warrant and is not responsible for any product Deliverables or third party services. Client agrees to look to the third party manufacturer or vendor (and not Company) with respect to all claims regarding such third party products or services as its sole and exclusive remedy. *This section is Company's only warranty concerning the product and service Deliverables, and is made expressly in lieu of, and to disclaim, all other warranties and representations, express or implied, including any implied warranties of merchantability, non-infringement, or fitness for a particular purpose, or otherwise.*

8. **Limitation of Remedy and Liability:** *The maximum liability of Company and Company's principals, directors, officers, agents, employees, personnel, affiliates and their partners shall be the fees Company actually receives under the Agreement for the portion of work giving rise to the liability. In no event shall any of the above be liable to Client or any third party for any indirect, special, incidental, consequential, exemplary or punitive damages of any kind whatsoever in connection with the agreement, including but not limited to lost profits, loss of business opportunity, lost savings, and loss of business information.* Client will bear the risk of loss or damage to, or theft of, any Deliverables once delivery has been made to the Client. Any action against Company must be brought within twelve (12) months after the cause of action arises. Neither party shall be liable for any delays or failures in performance due to circumstances beyond its reasonable control, including but not limited to, strikes, riot, war, fire, flood, storm, explosion, accident, or other acts of God. This contract shall be construed in accordance with the laws of the State of North Carolina (without regard to its choice of law provisions). Claims arising out of or requiring the interpretation of this Agreement shall be brought and litigated exclusively in courts located within Mecklenburg County, North Carolina, or if a federal court, the court whose district includes Mecklenburg County, North Carolina. This Agreement may not be assigned without prior written consent; provided, however, Company may assign this Agreement in whole or in part, without the Client's consent, in connection with a merger, acquisition, corporate reorganization, or sale of substantially all of the Company's assets, and Client agrees that Company shall be released from any further obligations under this Agreement upon such assignment.

I will have for you by end of day. Since I just received some of the clarifications from the RFI on Friday I needed to adjust some items.

I am sorry for the delay, but will have this completed.

Thanks for your patience.

Colin,

My scope is not due to install until 2026 and we cannot guarantee pricing past 90 days and shipping in 2026. However year over year increase pricing has historical been 10% or less. This pricing will need to be updated closer to the ship date.

Just wanted to let you know, but I am sure you will be running into this with other subcontractors.

Thank you.

Good Morning,

We have not received any quotes for the lockers or shelving for the Port Orange Public Utility Building, and the bid date was yesterday. Can you get a proposal to us for these items below by the end of the week?

Phenolic Lockers	0	
Spectrum Hygiene+ Locker - 18" W x 24" L x 71 3/4" H Hallowell as per specification	8	ea

Miscellaneous Equipment - CFCI	0	
E12 - Pallet Rack Shelving - Lyon Products SWD096042096 Yes	73	ea
E16 - Flammable Liquid Safety Storage Cabinet - Eagle 4510 Yes, but through different manufacturer -same product	1	ea
E17 - Storage Cabinet - Equipto 1710 Yes	6	ea
E18 - Storage Shelving - Equipto 763-7S Yes used starters + adders	9	ea
E20 - Bin and Drawer Shelving - Equipto 905S Yes	1	ea
E23 - Pipe Arm Rack - Jarke SC-10J Spec was incorrect per architect they are fine with different manufacturer. This quantity will change as there is no 36"W pipe rack for any manufacturer. I will be quoting (16) single faced & (4) double Faced @56" x 82" x 96" with 36" arms	31	ea

DIVISION 10 - SPECIALTIES	**JOB NAME: PORT ORANGE PUBLIC UTILITIES FIELD OPS BLDG**	

PROJECT SPECIFIC QUALIFIERS: MUST BE INCLUDED IN ALL CONTRACTS PRIOR TO MARDALE SPECIALTIES DIRECT SIGNING SUCH AGREEMENT.

A. PLANS - Quote is based on specifications and plans

B. EXCLUDES UNDER LAV GUARDS AND LARGE/CUSTOM VANITY MIRRORS.
***NO QUOTE FOR PLASTIC LAMINATE LOCKERS AT CORRIDOR (PART OF MILLWORK)**
***NO QUOTE FOR LOCKER BENCHES (BY OWNER)**
***NO 36" SHOWER CURTAIN ROD AVAILABLE IN CURVED MODEL. QUOTED STRAIGHT**

- Mardale SDI standard insurance is included. NO reduction to this quote for any OCIP or CCIP participation.
- **Glass/Ceramic/Porcelain Tile -** Mardale is not responsible for damages to tile. ANY WAINSCOT FILLERS ARE BY OTHERS.
- Quote valid for manufacturers/products as listed on THIS QUOTE.
- **Backing/Support/Electrical Items -** Mardale is not responsible for any structural support, blocking, caulking, backing or cut-outs; this work must be completed by the General Contractor prior to installation. Installation of any electrical items such as hand dryers and electrical mirrors by others.
- **Ceiling mount partition support -** In order to comply with manufacturer's warranty, ceiling support (by others), MUST be structural steel.
- **Cut-Sheets -** Mardale will provide cut-sheets and technical data on all of our material and products to the General Contractor. However, we do not coordinate with other trades for backing and cut-outs; this task is the responsibility of the Contractor overseeing the project.
- **Fire Extinguishers** - Fire extinguishers are tagged at time of purchase, valid for 1 year; retagging IS NOT included.
- **Flagpole quote INCLUDES**: flagpole & accessories, sleeve, shop drawings, erecting flagpole into pre-installed sleeve.
  EXCLUDES ALL FOUNDATION WORK: Install of sleeve, rebar, engineering drawings, permits and concrete
- **Installation Notes -** All work is to be 1st shift- weekdays unless otherwise noted. Installation of our scope (all materials) will be completed in an uninterrupted single visit to site; additional trips will result in additional charges. A change order for additional trip charges will be estimated based on each scenario.
- **Price** - The price on this quotation will not be subject to verbal changes or other agreements unless submitted in an official document and approved by both parties.
- The quoted price is valid for **30 days**, escalation charges may apply thereafter.

(2.2) WSI (Wharton-Smith Supplemental Instructions)

The Bidder acknowledges receipt of the following Wharton-Smith Supplemental Instruction(s):

WSI No.	1-8	Dated:		WSI No.		Dated:	
WSI No.		Dated:		WSI No.		Dated:	
WSI No.		Dated:		WSI No.		Dated:	

(2.3) ASI (Architect's Supplemental Instructions)

The Bidder acknowledges receipt of the following Architect Supplemental Instruction(s):

ASI No.		Dated:		ASI No.		Dated:	

(2.4) Addenda

The Bidder acknowledges receipt of the following Addenda:

Addenda No.		Dated:		Addenda No.		Dated:	
Addenda No.		Dated:		Addenda No.		Dated:	

(2.5) Additional Acknowledgements

The Bidder acknowledges that Bidder has considered and included the requirements of the Subcontractor Bid Manual, dated October 17, 2024, and all other sections, in preparing this Bid.

The Bidder acknowledges time is of the essence and the Project will begin March 6, 2025, with Substantial Completion that must be achieved no later than June 30, 2026, and has included all costs for any required extended hours, extra shifts, weekend and holiday work which may be necessary to complete the Work on schedule.

This Bid will remain subject to acceptance for ninety **90** calendar days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Construction Manager.

The Bidder understands and agrees that the Construction Manager and/or Owner reserves the right to reject this Bid or any and all bids for the Project, and to waive minor irregularities or informalities in any bid and to award Alternates in any order that in the Construction Manager's judgment will be in the Owner's best interest.

The Bidder hereby acknowledges they are licensed to do business in the capacity represented by this Bid and as required by all governing jurisdictional authorities for all locations of the work and as required by the Contract Documents.

The Bidder hereby acknowledges reviewing and accepting without modification the Wharton-Smith, Inc. Subcontract Agreement and agrees to execute same if awarded the project or portion(s) of the Project.

We are pleased to offer the following proposal. All work shall be performed in a workmanlike manner, complying with all prevailing local codes.

Warehouse Building:

- Supply and install one approx. 16,800 sq. ft. Nucor Pre-Engineered Metal Building including the following:
  - ◊ One 103'-3"x 120'-2 ½"x 18'-0" Asymmetrical Gable Building with 2:12 pitch
  - ◊ One 36'-9"x 120'-2 ½"x 18'-0" Covered Lean-to with 2:12 pitch
  - ◊ 22 gage Kynar Standing Seam Roof (Manufacturer's standard 35-year Kynar finish warranty and 20-year weather-tightness warranty included.) (U.L. 90 rated)
  - ◊ 24 gage Kynar Exposed Fastener wall panels. (All walls on main Asymmetrical Gable building are open 8' for self-supporting masonry. No masonry support beams) (Covered Lean-to has all walls open full height to remain open.)
  - ◊ Sidewall bay spacing: 1 @ 30'-11"; 1 @ 27'-9"; 1 @ 30'-0"; and 1 @ 31'-6 ½")
  - ◊ Endwall bay spacing on main building: 1 @ 37'-4 ¼"; 1 @ 36'-4 ½"; and 1 @ 29'- 6 ¼"
  - ◊ Non-expandable endwalls
  - ◊ R-30 vinyl faced reinforced faced insulation long tab banded system in roof of Asymmetrical building and R-19 vinyl faced reinforced faced insulation in metal walls. (None in Covered Lean-to)
  - ◊ Portal frames in sidewalls for bracing
  - ◊ Six 14'x 12' framed openings; two 3'-4"x 3'-6" framed openings; two 4'-4"x 3'-6" framed openings; three 2'x 1'-6" framed openings; and one 6'-8"x 3'-6" framed opening included. (All roll-up doors, louvers, and fans to be supplied and installed by other.)

- ◊ All walls from 8' up around the Asymmetrical Building gets hidden fastener liner panel.
- ◊ Both roofs get full hidden fastener ceiling liner.
- ◊ Building designed per FBC 2023; 148 MPH wind load; Occupancy Classification III; 10 psf collateral load; Exposure "C"; and a 20 PSF roof live load
- ◊ Special deflections are: L/240 deflections for purlins and main frames with a L/240 ceiling live load; L/180 for girts and H/200 for main frame sidesway.
- ◊ Front sidewall of Asymmetrical Building to have a 2'-4 ½" roof extension; and endwalls of both buildings to have a 1' roof extension, all with hidden fastener type soffit.
- ◊ Back sidewall of Asymmetrical Building will have a recessed area for an entrance that is out of masonry by other. We will provide soffit for this area, but framing for this soffit will be by other. And walls above masonry at this area will be by other.
- ◊ We have included a support beam for each of the 3 large fans hanging from structure.
- ◊ All primary steel on base bid to be manufacture's standard prep and one coat red oxide primer.
- ◊ Secondary steel to be G-90 cold rolled galvanized.
- ◊ Kynar gutters and downspouts included
- ◊ No anchor bolts included.
- ◊ Tax, Freight, and erection included (Standard Wage Rates have been figured, not davis bacon.)

Price ---------- $ 882,100.00

Alternates:

1. **Change primary steel to G-90 hot dipped galvanized. Add ---------- $ 36,500.00**
2. **Change roof to a 24 gage. Deduct ----------< $ 28,500.00 >**
3. **Change walls to a 3" Mesa Sandwich panel. Add ---------- $ 140,200.00**

Parking A Canopy

- Supply and install one 21'-6"x 150'-8"x 16'-6" Single Slope Nucor Pre-Engineered Metal Building including the following:
  - ◊ 22 gage kynar standing seam roof (Manufacturer's standard 35-year finish and 20-year weather-tightness warranty included.) (UL-90 rated) (1:12 roof pitch)
  - ◊ All walls are open full height to remain open.
  - ◊ Non expandable endwalls
  - ◊ Building designed per FBC 2023; 148 MPH wind load; Occupancy Classification II; 10 psf collateral load; Exposure "C"; and a 20 PSF roof live load (reducible)
  - ◊ Building is designed as open.
  - ◊ Special deflections: L/180 for purlins and main frames; and H/100 for main frame sidesway.
  - ◊ No insulation

- ◊ Portal frame in one bay on each sidewall for bracing.
- ◊ All primary steel on base bid to be manufacture's standard prep and one coat red oxide primer.
- ◊ Secondary steel to be G-90 cold rolled galvanized.
- ◊ Gutters and downspouts included
- ◊ Sidewall bay spading of 1 @ 38'-4"; 2 @ 37'-0"; and 1 @ 38'-4".
- ◊ Low sidewall to have a 4' projection at eave extension with no soffit.
- ◊ No anchor bolts included
- ◊ Tax, Freight, and erection included (standard wage rates have been figured, not davis bacon)

Price---------- $ 162,500.00

Alternates:

1. **Change primary steel to G-90 hot dipped galvanized. Add ---------- $ 10,600.00**
2. **Change roof to a 24 gage. Deduct ----------< $ 8,100.00 >**

Parking B Canopy

- Supply and install one 27'-6"x 167'-8"x 16'-6" Single Slope Nucor Pre-Engineered Metal Building including the following:
  - ◊ 22 gage kynar standing seam roof (Manufacturer's standard 35-year finish and 20-year weather-tightness warranty included.) (UL-90 rated) (1:12 roof pitch)
  - ◊ All walls are open full height to remain open.
  - ◊ Non expandable endwalls
  - ◊ Building designed per FBC 2023; 148 MPH wind load; Occupancy Classification II; 10 psf collateral load; Exposure "C"; and a 20 PSF roof live load (reducible)
  - ◊ Building is designed as open.
  - ◊ Special deflections: L/180 for purlins and main frames; and H/100 for main frame sidesway.
  - ◊ No insulation
  - ◊ Portal frame in one bay on each sidewall for bracing.
  - ◊ All primary steel on base bid to be manufacture's standard prep and one coat red oxide primer.
  - ◊ Secondary steel to be G-90 cold rolled galvanized.
  - ◊ Gutters and downspouts included
  - ◊ Sidewall bay spading of 1 @ 34'-4"; 3 @ 33'-0"; and 1 @ 34'-4".
  - ◊ Low sidewall to have a 4' projection at eave extension with no soffit.

- ◊ No anchor bolts included
- ◊ Tax, Freight, and erection included (standard wage rates have been figured, not davis bacon)

Price---------- $ 185,100.00

Alternates:

1. **Change primary steel to G-90 hot dipped galvanized. Add ---------- $ 10,600.00**
2. **Change roof to a 24 gage. Deduct ----------< $ 8,900.00 >**

**** With the instability of the steel prices, this price is only good for 25 days. Price is based on today steel market price from the steel mills. We can only lock a price in if we order building as a straight production job with no approval drawings. Once we receive the approval drawings from Nucor, they are reviewed and returned to Nucor as approved or approved as noted, Nucor will then update our price based on the current price module. We will then give you an add or the exact amount of increase with no mark up for change order. (We have not had a price increase since December.)**

Contractor does not include in this proposal any work not mentioned above.

Re: Port Orange Public Utilities

I am pleased to provide you with the following proposal for the automatic fire protection for the above project. Please review the following information carefully and feel free to contact me with any questions or clarifications regarding this proposal.

SUMMARY OF SCOPE

The information contained within this proposal represents our intention to provide a system of fire protection in the form of automatic sprinklers to protect the facilities described by the bid documents listed below. This proposal is based on Cox Fire Protection supplying all required materials, equipment, and labor to provide the following:

Provide and install a complete fire suppression system as indicated: 2 wet pipe sprinkler system shall be installed in the building per Cox Fire layout and engineer of records 61G plans and specifications as dated below.

BID DOCUMENTS

The following items were available to us and have been used for this proposal:

ITEM	TITLE	DATE
DRAWINGS	FIRE PROTECTION	09.30.24

DESIGN CRITERIA

The following design criteria shall be used in accordance with NFPA 13 and will be the basis for the system requirements:

All area's except as listed below – Provide a .10 GPM/ft^2 for the most remote 1500 ft^2 with a hose allowance of 100 GPM for the protection of light hazard occupancy. Head spacing shall not exceed 225 ft^2.

Mechanical, storage and janitors' rooms - Provide a .20 GPM/ft^2 for the most remote 1500 ft^2 with a hose allowance of 250 GPM for the protection of ordinary hazard occupancy. Head spacing shall not exceed 130 ft^2.

CONSTRUCTION DESIGN

Design shall be prepared and provided in 2D CAD documents. See submittals section for additional information.

STANDPIPE SYSTEM

N/A - No standpipes required per plans and specifications.

WATER SUPPLY

The following water flow test information was provided to us on drawing FP 001 and has been used for the basis of hydraulic design. Should the water supply vary in either quantity (GPM) or quality (PSI), it will be the buyer's responsibility to pay for any additional work due to the change in conditions. Cox Fire Protection has no control over municipal water supplies and cannot guarantee their adequacy or reliability for any given time.

Date of Test: 06.28.22
Static Pressure: 75 PSI
Residual Pressure: 55 PSI
Flow Gallons: 2252 GPM

SUBMITTALS

Electronic sets of Cox Fire's drawings in accordance w/ 61G documents, hydraulic calculations, and product data shall be prepared by Cox Fire Protection and submitted to the buyer for approval. No work shall commence until approved submittals and sprinkler permit are returned to our office. Submittals shall be completed and forwarded to the buyer 6 weeks from the date of award and CAD FILES are provided.

PIPE AND FITTINGS

All threaded piping shall be schedule 40 black pipe and joined by 175# threaded ductile iron fittings. All grooved piping shall be schedule 10 black pipe and joined by grooved mechanical fittings. Welded outlets shall be used to join branch piping to the cross main piping.

HANGERS

Cox Fire Protection shall utilize an approved method of hanging all horizontal and vertical pipes. Cox Fire Protection shall not be responsible for any modifications to ensure that the structure is capable of bearing the load of the sprinkler systems.

SPRINKLER HEADS

The following types and application of automatic sprinklers shall be provided:

Application	Head Type
Finished ceiling areas	½" pendent heads with a recessed escutcheon
Breezeway	½" sidewall heads w/ recessed escutcheon
Exposed structure areas	½" brass upright heads

All sprinklers within tiled ceiling areas shall be installed in a uniform manner within the center of the ceiling tiles. Head temperature ratings shall be selected in accordance with the requirements of NFPA 13.

VALVES

All valves shall be installed in an accessible manner and will be listed for their specific service. The following valve types and applications shall be used:

Application	Valve Type
Sprinkler Room	Shotgun type riser check valve
Riser Control Valve	Butterfly valve with internal supervisory switch
Drain Valves	Brass globe valves

Note: The buyer shall be responsible for providing all electrical work to connect supervisory switches.

WATER FLOW ALARM DEVICE

One vane type shall be provided and installed at each riser. One (1) – electric bell shall be provided and installed on the exterior wall at the riser location.

FIRE DEPARTMENT CONNECTION

One (1) 4 x 2 ½" x 2 ½" FDC shall be installed - in the underground line in accordance with NFPA 13 and local requirements (by others).

UNDERGROUND PIPE AND FITTINGS

Florida Statute 633.539FS states " For contracts written after 6-30-05, the contractor who installs the underground piping from the point of service is responsible for completing the installation to the above ground connection flange, which by definition in this chapter is no more than 1 foot above the finished floor."

INSTALLATION

The installation shall be done by skilled tradesmen working normal business hours and days. Overtime hours required due to the buyer accelerating the construction schedule will be charge as extra work to the buyer.

QUALIFICATIONS

Our price is based on our receiving the FP drawings or the reflected ceiling drawings in CAD from the architect and/or engineer.

WARRANTY

Cox fire protection guarantees all work and materials for a period of (12) months from the date the systems are activated into service.

EXCLUSIONS

We are excluding the following items/work and if required will be the responsibility of the buyer:

Any asbestos found on site shall be removed prior to completion of work.
Adequacy of water supply
Any electrical wiring, conduit, devices, and equipment
Alarm system and monitoring service
Pre-action releasing panels and programming
Connection of the water flow devices and supervisory switches to the house alarm system
Painting and preparation for painting of pipe, fittings, and equipment
Fire extinguishers and extinguisher cabinets
Standpipe system, hose stations, and hose cabinets
Clevis type hangers
Davis Bacon
MIC testing
Nitrogen systems
Clean Agent systems
Fire Pump and Accessories
Fire Department Connections
Cutting ceiling tiles
Covered warehouse storage area protection
Underground piping, Excavation, and Backfill
Hood suppression systems
Access panels
Material escalation over 30 days
Any other wet or dry fire protection systems not specifically listed above.
Performance and payment bond (May be provided for additional charges)

PRICE

The following price(s) include all material, equipment, labor, permits, and applicable sales and use taxes to perform the work as specified within this proposal:

ONE HUNDRED FORTY-SEVEN THOUSAND TWO HUNDRED FIFTY-TWO DOLLARS – $147,252.00

ADD ALTERNATE:

- PERFORMANCE AND PAYMENT BOND - $3,486.00
- DRY SYSTEM IN COVERED WAREHOUSE STORAGE - $25,586.00

COMPOSITE CLEANUP CREW: Cox Fire Protection shall provide one (1) composite cleanup crew member to participate in the contractor's composite cleanup crew per ten Cox Fire employees working on site.

- (1) DAY PER WEEK FOR A TOTAL OF EIGHT (8) HOURS PER WEEK - $2,892.00

TERMS OF PAYMENT

Progress payments shall be paid within 30 days for all work in place on a monthly basis. Retainage in the amount equal to 10% of the total progress payment may be withheld until the completion of the work, at which time the retained amount will be paid in full.

Cox Fire Protection reserves the right to withdraw this proposal for any reason if not accepted within 30 days of the date first written.

Credit Card Payment Surcharge: A surcharge applied to bill payments made with a credit card, amounting to 3% of the transaction value. This surcharge covers the additional costs incurred by the biller or service provider for processing credit card payments.

If you have any question or require additional information regarding the information specified above, please contact me at (904)-781-8227.

Sincerely,

Marcus Kinsey

PROPOSAL

To: Wharton Smith

Attn: James Manyette

Re: Port Orange Public Utilities & Field Ops

Gentlemen:

We are pleased to present our fire protection proposal on the above referenced project in accordance with:

DRAWINGS: 100% CD's, dated 9/30/2024

SPECIFICATIONS: **NFPA 13, 21000, notes on FP drawings**

ADDENDUM'S: WSI 001- WSI 008, RFI 1

ALL AS PREPARED BY: Schenkel Shultz.

SCOPE OF WORK

Provide design / layout documents in accordance with Plans and Specs, & NFPA 13, latest edition for this new two-story public utilities & field Ops building This 23,973 square foot building has one wet pipe system per FP drawings. Concealed sprinklers are included located in the center of the ceiling tiles with flex hoses. **All permitting is included.**

Summit Fire & Security to develop a complete set of working drawings based upon Summit design for permitting and installation in accordance with NFPA and local jurisdiction. All 2" and smaller threaded piping to be black schedule 40 with 21/2" pipe and larger to be schedule 10 with grooved fitting and welded outlets. All sprinklers to be quick response type utilizing recessed pendants and extended recessed pendant sprinklers per FP drawings. No work is included outside the buildings. Point of connection is a spigot one- foot AFF inside the building.

WATER SUPPLY

Proposal is based upon adequate water supply to meet the fire sprinkler demand.

WORKING CONDITIONS AND LABOR

This proposal is based upon installation being made from finished, poured concrete floors, during normal working hours and days including on-sight parking. Skilled sprinkler fitters without union affiliation shall do all work. All identifiable debris will be placed in waste containers (furnished by Buyer) at a central location on site, not including composite cleanup participation. Buyer provides adequate light, water electrical services, and toilet facilities during construction, laydown, staging and storage area.

WORK, APPARATUS AND ITEMS DETAILED AS FOLLOWS ARE NOT INCLUDED IN THIS PROPOSAL:

- Underground piping, Fire Hydrant, Backflow Preventers, Remote FDC
- All fireproofing, masonry, carpentry, ceiling work, access panels, painting or redecorating.
- Fire alarm, electrical wiring, FM200 Suppression systems, connections thereto and certification / permits.
- All fire extinguishers and extinguisher cabinets.
- Any heat trace or painting of piping, caulking of non-rated walls or ceilings.
- Any other wet or dry fire protection not specified within this proposal.
- Performance and Payment bond (add 2 % to contract amount).
- Seismic Bracing
- Cutting, patching of ceilings, ceiling tiles, wall penetrations, or floors.
- Light, water electrical services, and toilet facilities during construction.
- Electrical wiring (electric devices - electrical work of any nature).
- Patching of fire- proofing or pre-installation of our hanger assemblies.
- **Cutting of ceiling tiles**
- **Davis Bacon Wages**
- **FM Standards**
- **Sleeves in drywall or unrated walls**

Seller proposes to furnish material and labor in accordance with the above specifications for the unit cost sums of:

PRICE: $109,876.00

One Hundred Nine Thousand Eight Hundred Seventy-SixThree Dollars 00/100

PAYMENT

Payment to be made as follows: Monthly Progress Payments - Invoices submitted by the (25th) due net by the (10th), with (10%) retainage. 100% due upon completion.

This proposal is subject to the General Terms and Conditions as attached. If any of these items are changed, we must re-evaluate our entire proposal.

BY: *Randy Blankenship* Date: 11/12/2024

Randy Blankenship / Sales

FOR: **Summit Fire & Security**

Note: Seller may withdraw this proposal if not accepted within 30 days. As a condition precedent to General Contractor's acceptance of proposal /offering, for this project, Summit Fire & Security has the right of review and rejection of all or part of General Contractor's form contract and attachments.

PROPOSAL

To: Wharton Smith

Attn: James Manyette

Re: Port Orange Public Utilities & Field Ops

Gentlemen:

We are pleased to present our fire protection proposal on the above referenced project in accordance with:

DRAWINGS: 100% CD's, dated 9/30/2024

SPECIFICATIONS: **NFPA 13, 21000, notes on FP drawings**

ADDENDUM'S: WSI 001- WSI 008, RFI 1

ALL AS PREPARED BY: Schenkel Shultz.

SCOPE OF WORK

Provide design / layout documents in accordance with Plans and Specs, & NFPA 13, latest edition for this new two-story public utilities & field Ops building This 23,973 square foot building has one wet pipe system per FP drawings. Concealed sprinklers are included located in the center of the ceiling tiles with flex hoses. **All permitting is included.**

Summit Fire & Security to develop a complete set of working drawings based upon Summit design for permitting and installation in accordance with NFPA and local jurisdiction. All 2" and smaller threaded piping to be black schedule 40 with 21/2" pipe and larger to be schedule 10 with grooved fitting and welded outlets. All sprinklers to be quick response type utilizing recessed pendants and extended recessed pendant sprinklers per FP drawings. No work is included outside the buildings. Point of connection is a spigot one- foot AFF inside the building.

WATER SUPPLY

Proposal is based upon adequate water supply to meet the fire sprinkler demand.

WORKING CONDITIONS AND LABOR

This proposal is based upon installation being made from finished, poured concrete floors, during normal working hours and days including on-sight parking. Skilled sprinkler fitters without union affiliation shall do all work. All identifiable debris will be placed in waste containers (furnished by Buyer) at a central location on site, not including composite cleanup participation. Buyer provides adequate light, water electrical services, and toilet facilities during construction, laydown, staging and storage area.

WORK, APPARATUS AND ITEMS DETAILED AS FOLLOWS ARE NOT INCLUDED IN THIS PROPOSAL:

- Underground piping, Fire Hydrant, Backflow Preventers, Remote FDC
- All fireproofing, masonry, carpentry, ceiling work, access panels, painting or redecorating.
- Fire alarm, electrical wiring, FM200 Suppression systems, connections thereto and certification / permits.
- All fire extinguishers and extinguisher cabinets.
- Any heat trace or painting of piping, caulking of non-rated walls or ceilings.
- Any other wet or dry fire protection not specified within this proposal.
- Performance and Payment bond (add 2 % to contract amount).
- Seismic Bracing
- Cutting, patching of ceilings, ceiling tiles, wall penetrations, or floors.
- Light, water electrical services, and toilet facilities during construction.
- Electrical wiring (electric devices - electrical work of any nature).
- Patching of fire- proofing or pre-installation of our hanger assemblies.
- **Cutting of ceiling tiles**
- **Davis Bacon Wages**
- **FM Standards**
- **Sleeves in drywall or unrated walls**

Seller proposes to furnish material and labor in accordance with the above specifications for the unit cost sums of:

PRICE: $109,876.00

One Hundred Nine Thousand Eight Hundred Seventy-Six Three Dollars 00/100

ALTERNATE: Provide and install a dry pipe system complete with all material and devices, labor. Design and permitting for the covered storage area. ADD TO BASE PRICE $42,192.00

PAYMENT

Payment to be made as follows: Monthly Progress Payments - Invoices submitted by the (25th) due net by the (10th), with (10%) retainage. 100% due upon completion.

This proposal is subject to the General Terms and Conditions as attached. If any of these items are changed, we must re-evaluate our entire proposal.

(2.2) WSI (Wharton-Smith Supplemental Instructions)

The Bidder acknowledges receipt of the following Wharton-Smith Supplemental Instruction(s):

WSI No.	1	Dated:	10/22	WSI No.	4	Dated:	10/28	7	11/6
WSI No.	2	Dated:	10/24	WSI No.	5	Dated:	10/31	8	11/8
WSI No.	3	Dated:	10/24	WSI No.	6	Dated:	11/04		

(2.3) ASI (Architect's Supplemental Instructions)

The Bidder acknowledges receipt of the following Architect Supplemental Instruction(s):

ASI No.		Dated:		ASI No.		Dated:	

(2.4) Addenda

The Bidder acknowledges receipt of the following Addenda:

Addenda No.		Dated:		Addenda No.		Dated:	
Addenda No.		Dated:		Addenda No.		Dated:	

(2.5) Additional Acknowledgements

The Bidder acknowledges that Bidder has considered and included the requirements of the Subcontractor Bid Manual, dated October 17, 2024, and all other sections, in preparing this Bid.

The Bidder acknowledges time is of the essence and the Project will begin March 6, 2025, with Substantial Completion that must be achieved no later than June 30, 2026, and has included all costs for any required extended hours, extra shifts, weekend and holiday work which may be necessary to complete the Work on schedule.

This Bid will remain subject to acceptance for ninety **90** calendar days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Construction Manager.

The Bidder understands and agrees that the Construction Manager and/or Owner reserves the right to reject this Bid or any and all bids for the Project, and to waive minor irregularities or informalities in any bid and to award Alternates in any order that in the Construction Manager's judgment will be in the Owner's best interest.

The Bidder hereby acknowledges they are licensed to do business in the capacity represented by this Bid and as required by all governing jurisdictional authorities for all locations of the work and as required by the Contract Documents.

The Bidder hereby acknowledges reviewing and accepting without modification the Wharton-Smith, Inc. Subcontract Agreement and agrees to execute same if awarded the project or portion(s) of the Project.

Attn: Estimating Department

Re: Port Orange Public Utilities Field Operations Facility
Port Orange, FL

Titan Fire Protection Inc., referred to herein as the "Seller", is pleased to furnish this proposal for your company**,** referred to herein as the "Buyer".

1. The Seller agrees to furnish and install in the property described as the **Port Orange Public Utilities Field Operations Facility** located in Port Orange, FL, a Wet Pipe Automatic Fire Sprinkler System, and auxiliary equipment in accordance with the following terms, conditions, and specifications, all of which are made a part hereof.

2. The installation will be subject to inspection by the local building if fire department, whose acceptance shall be conclusive proof of the proper performance and completion of the Seller"' obligations hereunder.

3. The price for the work specified herein is**: Ninety-Two Thousand Nine Hundred Twenty-Five Dollars. ($92,925.00)**
Admin $54,425.00 Warehouse $38,500.00

4. The above price is based on the installation of the number and type of sprinklers required to conform to NFPA 13.

5. Payment shall be made on the Tenth (10th) day of each month in the sum of ninety percent (90%) of the work installed and of the materials delivered and stored at the jobsite, in the month immediately preceding, and the balance thirty (30) days after completion of the work.

6. The proposal Price is based upon material prices as of the date of this proposal. Any significant price increases in steel pipe, sprinkler heads, fire pump, and/or other material that occurs during the period of time between date of this proposal and substantial completion of the Project, shall cause the contract price to be equitably adjusted by an amount reasonably necessary to cover any increase. As used herein, a significant price increase shall mean any increase in price exceeding seven percent (7%) experienced by this contractor from the date of this proposal. This proposal is subject to acceptance by Buyer for (30) thirty days, after which time, at the option of the Seller, it becomes null and void.

13517 65th Street
Largo, FL 33771

SCOPE OF WORK
Seller to furnish equipment, services, labor, tools, design, freight and handling, except where specified herein, necessary for the installation of a wet pipe Sprinkler System piping in the **Port Orange Public Utilities Field Operations Facility** as referenced above.

DESIGN CRITERIA
This Proposal is based on plans by Schenkel dated, 06/22/23.

The Sprinkler System will be designed and installed in accordance with the requirements of NFPA-13 and the project documents.

Work to begin at a properly installed, test and inspected fire main by others. If a remote FDC is being installed, Titan Fire Protection shall make connection at existing 6" main. Unless specifically included below, backflow devices are excluded and shall be provided by others.

MATERIAL, EQUIPMENT AND SERVICES:
The Fire Sprinkler Systems will consist of the following equipment and services:

Shop Drawings, Permit, and Inspections.

2 Wet pipe risers complete with control valve, tamper switch, main drain/inspectors test connection, spare headbox and flow switch.

100 Upright fire sprinklers on exposed piping in areas with no finished ceilings.

117 Pendent Fire sprinklers on concealed piping in areas with finished ceilings.

8 Dry Sidewall Sprinklers

1-year Warranty

Pipe Fittings and Hangers in accordance with NFPA-13.
Threaded piping to be schedule 40, grooved piping 1 ¼" and larger to be schedule 10
Loading, unloading, and handling of materials.

WORK NOT INCLUDED:
THE FOLLOWING ITEMS ARE **NOT** INCLUDED IN THIS PROPOSAL:
Power, control or alarm wiring.
Premium time work
Adequate water supply
Fire Pump
Painting
Freeze protection
Fire Extinguishers
Backflow device

(321) 403-5702 Direct
nathan@titanfire.us

395 South Range Road, Suite B
Cocoa FL, 32929

13517 65th Street
Largo, FL 33771

Underground fire main
Underground FDC line

SPECIAL CONDITIONS

Except where specified herein, all material and equipment will be of the Seller's manufacture or of a manufacturer selected by the Seller.

All main drains, low point drains and inspector's test lines will be piped through the building walls and discharged into the atmosphere. If necessary to discharge piping to sewers because of elevations or Buyer's requirements, Buyer will provide sewer connections and receptacles conforming to local codes, at points of system drains and discharge lines.

This proposal is based upon there being no interference by other trades, (ducts, wiring, piping, etc.), with the locations of concealed piping. Installation is restricted by the building and fire codes, and working plans showing locations and measurements of concealed piping are prepared accordingly. These working plans are furnished to the General Contractor or Architect/Engineer and will be furnished on request to other trades. Seller will not be responsible for any changes in the location of the Sprinkler piping due to the interference of the other trades' equipment, when the locations of that equipment have not been coordinated with Seller prior to the ordering of Seller's materials.

Ceilings are not to be erected and lathing of the inside of the building is not to be done until all piping has been installed and tested.

Drop nipples for pendent sprinklers are aligned at the time of installation. Seller will not be responsible for any damage and/or movement of the drop nipples by other trades and will only do the alignment and/or replacement work as an Extra to the contract. Ceiling plates will be of the adjustable type, unless specified otherwise by this proposal.

The price for this proposal is based upon our work being performed during regular working hours, Monday through Friday. If Buyer should require overtime labor, Buyer agrees to pay Seller its Additional costs plus overhead and profit as an Extra to the contract.

This proposal is based upon work being performed from finished, unobstructed floors using lifts.

Final payment of the balance due of the Contract Price shall be made to Seller within a reasonable time of his fulfillment of the contract requirements and no later than seven (7) after receipt by the Buyer of final payment from the Owner for the Sellers work.

If the Owner or his designated agent does not issue a Certificate of Payment or the Buyer does not receive payment for any cause that is not the fault of the Seller, the Buyer shall pay the Seller, on demand, a progress payment or the final payment.

Adequate water supply and freeze protection shall be by provided by others unless noted otherwise in this proposal.

This Bid Proposal shall be referenced or listed in the contract

This price is based upon a mutually agreeable contract or an AIA 401 contract.

HVAC & PLUMBING PROPOSAL

Port Orange Public Utilities

Drawings Dated: **September 30, 2024, Cover Sheet.**

Specifications Dated: **September 30, 2024, Mechanical & Plumbing.**

Addendums Acknowledged: **WSI 001 - 008**

We are pleased to offer our cost proposal for the HVAC and plumbing portion of the above referenced project. Our experience, reputation, trained team, safety program and exceptional financial standing make us the top choice for completing the HVAC and plumbing scope. Please find listed below our proposed scope of work along with qualifications.

KEY QUALIFICATIONS AND COMPETITIVE ADVANTAGES

- Employee owned
- Approximately $160 million in annual revenue
- $150 million bonding capacity
- Experience with projects in all major market segments
- Ability to self-perform the entire HVAC and plumbing scope
- In-house fabrication facility
- Trained field team with in-house F.A.C.T. training programs
- In-house CADD / BIM team

"Energy Air's team put forth a quality management effort while maintaining the utmost attention to field workmanship. Energy Air's commitment to relationship, reliability and craftsmanship is greatly appreciated by our team and evident throughout the project. Thank you."

ENERGY AIR, INC.
100% Employee Owned

HVAC SCOPE OF WORK

- Furnish and install (2) DX split system with capacities as scheduled or equal.
- Furnish and install (1) ductless DX mini split system with capacities as scheduled or equal
- Furnish and install (11) variable air volume terminal units with capacities as scheduled or equal.
- Furnish and install (2) inline exhaust fans with capacities as scheduled or equal.
- Furnish and install (3) propeller exhaust fans with capacities as scheduled or equal.
- Furnish and install (6) HVLS fans with capacities as scheduled or equal.
- Furnish and install (2) electric heaters with capacities as scheduled or equal.
- Furnish and install air distribution as scheduled on mechanical documents.
- Furnish and install fire dampers in strict accordance with quantities shown on mechanical documents.
- Furnish and install mechanical louvers with quantities shown on mechanical documents.
- Furnish and install motorized dampers with quantities shown on mechanical documents.
- Furnish and install externally insulated galvanized sheet metal ductwork for new supply and return air systems as indicated on mechanical documents, installed per our shop drawings and meeting engineer's criteria of design.
- Furnish and install externally insulated galvanized sheet metal ductwork for all new outside air systems installed per our shop drawings and meeting engineer's criteria of design.
- Furnish and install un-insulated galvanized sheet metal ductwork for all new general exhaust air systems installed per our shop drawings and meeting engineer's criteria of design.
- Furnish and install externally insulated type ACR copper pipe or tubing for all new HVAC refrigerant systems installed per our shop drawings and meeting engineer's criteria of design.
- Furnish and install externally insulated schedule 40 PVC pipe p-traps for all new HVAC condensate drain systems installed per our shop drawings and meeting engineer's criteria of design.
- Install smoke detectors per mechanical documents.
- Furnish and install DDC controls per mechanical documents.
- Provide test and balance.
- Permit, tax, and warranty.

PLUMBING SCOPE OF WORK

- Furnish and install plumbing equipment and fixtures with capacities as scheduled or equal.
- Furnish and install externally insulated type L copper pipe for all domestic hot water systems installed per our shop drawings and meeting engineer's criteria of design.
- Furnish and install externally insulated type L copper pipe for all domestic cold-water systems installed per our shop drawings and meeting engineer's criteria of design.
- Furnish and install externally insulated type L copper pipe for all compressed air systems installed per our shop drawings and meeting engineer's criteria of design.
- Furnish and install un-insulated type K copper pipe for all underground domestic water systems installed per our shop drawings and meeting engineer's criteria of design.
- Furnish and install un-insulated schedule 40 PVC DWV pipe for all underground sanitary/vent systems installed per our shop drawings and meeting engineer's criteria of design.
- Furnish and install un-insulated schedule 40 PVC DWV pipe for all aboveground sanitary/vent systems installed per our shop drawings and meeting engineer's criteria of design.

- Furnish and install un-insulated schedule 40 PVC DWV pipe for all underground storm drainage systems installed per our shop drawings and meeting engineer's criteria of design.
- Permit, tax, and warranty.

GENERAL QUALIFICATIONS

- Electrical, line voltage, interlocks by others.
- Roof opening and flashing by others.
- Concrete hole cutting, patching, repairing by others.
- Concrete housekeeping pads by others.
- After hours labor excluded.
- Alarm interlock, wiring, and relays by others.
- Structural steel for roof mounted equipment by others.
- Painting of HVAC and/or plumbing system and associated components by others.
- Weather proofing of exterior penetrations by others.
- Cleaning of all new and existing HVAC and plumbing systems is excluded.
- Gap warranties are excluded. Pricing will be adjusted if required.
- Commissioning by others. Per FBC 2023 Energy Conservation chapter 4 section C408.2, mechanical systems 40 tons or greater shall provide evidence of mechanical systems commissioning by approved 3rd party professional. Energy Air has included assistance only.

PROJECT SPECIFIC QUALIFICATIONS

- Excavation 5-ft beyond the building perimeter is excluded.
- Offsite removal of excess dirt is excluded.
- Furnish rubberized boot flashing at plumbing vents only for installation by others
- No specification for compressed air piping (Assumed Type L copper)
- Balancing and ball valves are not shown in the drawings. Quantities and locations are assumed.
- Water hammer arrestors are not shown in the drawings. Quantities and locations are assumed.
- Backwater valves and valve boxes are included. Not shown in the drawings.
- Downspout connections to civil storms are included.
- Klassikdrain Trench Drain with Heel-proof grate Drawing C-7 is excluded.
- The trench drain and grate shown on drawings AS503 and C15 is excluded.
- Domestic water on C15 is to the washdown area included
- Garbage disposal on sink S1 only.
- Metal Bellows Type water hammer arrestors as specified in specifications section 221119 are included.
- There was no specification for the compressed air piping. We assumed type L copper.
- Miscellaneous compressed air items were not specified but are included in our price. Pricing may change upon architects' approval and further details.
- Energy Air Inc. has included a $2,500.00 allowance for the temporary domestic water connection to GCs single wide trailer. Sanitary hook-up is excluded. Temporary septic tank provided and maintained by others.

- Architectural access doors are excluded. If required shall be priced accordingly.
- Architectural louvers are excluded. If required shall be priced accordingly.
- Smoke detectors furnished and wired by others.
- Motor starters and disconnects to be provided by others.
- Dumpsters by others.
- Composite cleanup is excluded.
- Painting and or epoxy coating by others.
- Davis Beacon Wages are excluded, if required shall be priced according to the most current General Decision provided by GC.
- Overtime or afterhours are excluded.
- It is assumed that there is employee parking within a reasonable walking distance. If offsite parking and bussing is required, shall be priced accordingly.
- Offsite removal of excess dirt.

Oil Water Separator

- Furnish and install one (1) Oldcastle 5,000-gallon precast concrete oil interceptor, three (3) baffles to meet FL code limit of 1250G limit chambers. Constructed to H20 load specifications and adhering to specifications for grease traps other than noted below in the "not included" section. Final design of trap to be determined.
- Supply & Install – one (1) sample station – 36" x 36" constructed to H20 load specification: - ordered and installed at the same time as the oil interceptor
- One day of 160 ton crane truck mobilization. Installation site must be accessible for crane.
- Trench shoring system for installation of trap.
- Includes CS-55 interior and exterior coating
- Two (2) standard non-coated USF 230-AA Heavy-duty H20 cast iron rings and covers for oil interceptor
- Up to 5" of grade ring extensions per tank manway given invert shown on C9 Utility Plan dated 9/30/24 – Final elevations are determined by engineer of record or general contractor and must be provided to SOS for installation of rings and covers.
- Backfilled and compacted to grade as per density requirements. We are assuming soils excavated at installation site will be adequate for use as backfill – additional costs will incur if existing soils cannot be used and must be replaced by new sand and/or rock.
- Density testing by others
- **Due to the volatility of material cost and availability, Energy Air, Inc. can only hold pricing for 15 days. Any material increases will be priced accordingly.**

Material Escalation Clause – to be added to subcontract language:

Where and when the delivery of materials is delayed or quantities are limited as a result of shortages, rationing, supply chain delays or unavailability, subcontractor shall not be liable or responsible for any delays or damages caused thereby, provided that subcontractor finalizes purchases within fourteen (14) days of the executed contract, orders materials within three (3) days of approved submittals, and adheres to the material tracking requirements of the contract. When this occurs, subcontractor may propose substitute materials or suppliers or alternate means of acquiring said materials and contractor and subcontractor shall negotiate an equitable price and time adjustment to this agreement. Additionally, when the costs of any or all labor or materials exceeds 5% more than the price originally quoted to subcontractor, then subcontractor shall notice contractor in writing of such change and the parties shall come to a mutual agreement on a new price, provided that the subcontractor provides proof of their material and labor costs at the time of contract.

- Furnish and install (2) electric heaters with capacities as scheduled or equal.
- Furnish and install air distribution as scheduled on mechanical documents.
- Furnish and install fire dampers in strict accordance with quantities shown on mechanical documents.
- Furnish and install mechanical louvers with quantities shown on mechanical documents.
- Furnish and install motorized dampers with quantities shown on mechanical documents.
- Furnish and install externally insulated galvanized sheet metal ductwork for new supply and return air systems as indicated on mechanical documents, installed per our shop drawings and meeting engineer's criteria of design.
- Furnish and install externally insulated galvanized sheet metal ductwork for all new outside air systems installed per our shop drawings and meeting engineer's criteria of design.
- Furnish and install un-insulated galvanized sheet metal ductwork for all new general exhaust air systems installed per our shop drawings and meeting engineer's criteria of design.
- Furnish and install externally insulated type ACR copper pipe or tubing for all new HVAC refrigerant systems installed per our shop drawings and meeting engineer's criteria of design.
- Furnish and install externally insulated schedule 40 PVC pipe p-traps for all new HVAC condensate drain systems installed per our shop drawings and meeting engineer's criteria of design.
- Install smoke detectors per mechanical documents.
- Furnish and install DDC controls per mechanical documents.
- Provide test and balance.
- Permit, tax, and warranty.

PLUMBING SCOPE OF WORK

- Furnish and install plumbing equipment and fixtures with capacities as scheduled or equal.
- Furnish and install externally insulated type L copper pipe for all domestic hot water systems installed per our shop drawings and meeting engineer's criteria of design.
- Furnish and install externally insulated type L copper pipe for all domestic cold-water systems installed per our shop drawings and meeting engineer's criteria of design.
- Furnish and install externally insulated type L copper pipe for all compressed air systems installed per our shop drawings and meeting engineer's criteria of design.
- Furnish and install un-insulated type K copper pipe for all underground domestic water systems installed per our shop drawings and meeting engineer's criteria of design.
- Furnish and install un-insulated schedule 40 PVC DWV pipe for all underground sanitary/vent systems installed per our shop drawings and meeting engineer's criteria of design.
- Furnish and install un-insulated schedule 40 PVC DWV pipe for all aboveground sanitary/vent systems installed per our shop drawings and meeting engineer's criteria of design.

- Furnish and install un-insulated schedule 40 PVC DWV pipe for all underground storm drainage systems installed per our shop drawings and meeting engineer's criteria of design.
- Permit, tax, and warranty.

GENERAL QUALIFICATIONS

- Electrical, line voltage, interlocks by others.
- Roof opening and flashing by others.
- Concrete hole cutting, patching, repairing by others.
- Concrete housekeeping pads by others.
- After hours labor excluded.
- Alarm interlock, wiring, and relays by others.
- Structural steel for roof mounted equipment by others.
- Painting of HVAC and/or plumbing system and associated components by others.
- Weather proofing of exterior penetrations by others.
- Cleaning of all new and existing HVAC and plumbing systems is excluded.
- Gap warranties are excluded. Pricing will be adjusted if required.
- Commissioning by others. Per FBC 2023 Energy Conservation chapter 4 section C408.2, mechanical systems 40 tons or greater shall provide evidence of mechanical systems commissioning by approved 3rd party professional. Energy Air has included assistance only.

PROJECT SPECIFIC QUALIFICATIONS

- Excavation 5-ft beyond the building perimeter is excluded.
- Offsite removal of excess dirt is excluded.
- Furnish rubberized boot flashing at plumbing vents only for installation by others
- Balancing and ball valves are not shown in the drawings. Quantities and locations are assumed.
- Water hammer arrestors are not shown in the drawings. Quantities and locations are assumed.
- Backwater valves and valve boxes are included. Not shown in the drawings.
- Garbage disposal on sink S1 only.
- Metal Bellows Type water hammer arrestors as specified in specifications section 221119 are included.
- There was no specification for the compressed air piping. We assumed type L copper.
- Miscellaneous compressed air items were not specified but are included in our price. Pricing may change upon architects' approval and further details.
- Energy Air Inc. has included a $2,500.00 allowance for the temporary domestic water connection to GCs single wide trailer. Sanitary hook-up is excluded. Temporary septic tank provided and maintained by others.
- Architectural access doors are excluded. If required shall be priced accordingly.
- Architectural louvers are excluded. If required shall be priced accordingly.
- Smoke detectors furnished and wired by others.
- Motor starters and disconnects to be provided by others.
- Dumpsters by others.

ENERGY AIR, INC.
100% Employee Owned

- Composite cleanup is excluded.
- Painting and or epoxy coating by others.
- Davis Beacon Wages are excluded, if required shall be priced according to the most current General Decision provided by GC.
- Overtime or afterhours are excluded.
- It is assumed that there is employee parking within a reasonable walking distance. If offsite parking and bussing is required, shall be priced accordingly.
- Offsite removal of excess dirt.
- **Due to the volatility of material cost and availability, Energy Air, Inc. can only hold pricing for 15 days. Any material increases will be priced accordingly.**

Material Escalation Clause – to be added to subcontract language:

Where and when the delivery of materials is delayed or quantities are limited as a result of shortages, rationing, supply chain delays or unavailability, subcontractor shall not be liable or responsible for any delays or damages caused thereby, provided that subcontractor finalizes purchases within fourteen (14) days of the executed contract, orders materials within three (3) days of approved submittals, and adheres to the material tracking requirements of the contract. When this occurs, subcontractor may propose substitute materials or suppliers or alternate means of acquiring said materials and contractor and subcontractor shall negotiate an equitable price and time adjustment to this agreement. Additionally, when the costs of any or all labor or materials exceeds 5% more than the price originally quoted to subcontractor, then subcontractor shall notice contractor in writing of such change and the parties shall come to a mutual agreement on a new price, provided that the subcontractor provides proof of their material and labor costs at the time of contract.

HVAC BASE BID: **$646,000.00**

PLUMBING BASE BID: **$421,700.00**

Add 1% of contract for bond.

Re: **Port Orange Public Utilities Administration & Warehouse**
Sub: **Plumbing System, Scope of Work**

Price INCLUDES the following:

1. GC's site modular waste & water connections, (Excludes meter or holding tanks).
2. PVC sch 40 DWV sanitary waste & vent piping connected at 5 feet out of bldgs.
3. Copper type L compressed air piping to (1) 80 gallons air compressor.
4. Copper type L hot & cold domestic water piping, cold K connected at 5' out of bldg.
5. Insulate domestic water piping w/ 1" fiberglass.
6. Fire stopping plumbing penetrations.
7. Applicable taxes & plumbing permit requirements.
8. Plumbing fixtures as follows: **Admin**-(7)WC1, (7)L1, (1)JS1, (4)SH1, (2)EWC1, (5)WH1, (2)S1, (1)S2, (1)TMV1, (1)RCP1, (2)GD1, (2)WB1, (2)IMB1, (8)FD1, (1)FD2, (1)HD1, (9)TP1, (1)FCO, (3)ECO, (1)EWH1. **Warehouse**-(1)SH1, (3)WH1, (3)HB1, (2)S2, (7)FD1, (7)TP1, (2)EWH1/2, (10)TD1, (1)Air Compressor, (4)Air Reels, (3)Hose Reels, (4)FCO, (2)WCO, (1)ECO, (2)AAV.

Price EXCLUDES the following:

1. Concrete scanning, cutting, hauling, forming, pouring or soil compaction testing.
2. HVAC condensate piping, chases, insulating or drywells (by HVAC Contractor).
3. Removal of trash from job site (dispose of in GC's dumpster).
4. Grab bars, exhaust fans, soap / towel dispensers or accessories for restrooms.
5. Irrigation meters, water meters or site RPZ backflow preventers (by Site Contractor).
6. Dewatering or well pointing for installation of underground plumbing systems.
7. Air filtration, security, mold remediation, dust partitions, landscaping.
8. Scuppers, down spouts, gutters or roof flashings for vents through roofs (by Others).
9. Low voltage or electrical wiring of any kind or sealing of floors.
10. Oil water separators, grease traps, lint traps or sand / sediment traps.
11. Air compressor pad, dryer, compressed air tools.

Base Price: $425,995.00

SECTION 5 – BID PROPOSAL EVALUATION

5.1 GENERAL

5.1.1 Bid Proposals will be evaluated based upon review of the following:

A. Cost – The evaluation of this criterion will be based on the Bidder's total base bid, bid alternates, unit prices.

B. Value Engineering – This criterion measures the ability of the Bidder to identify potential areas of cost savings or improvements of the final project.

C. Bidder's ability to meet all other criteria outlined herein.

5.1.2 Reference the Instructions to Bidders section of this Bid Manual and the Bid Form for more information regarding detailed requirements of the Bid Proposals.

5.1.3 In evaluating Bids, Wharton-Smith, Inc. shall consider the submission of the Bidders, and whether or not the Bids comply with the prescribed requirements as outlined in these Instructions, the Bid Form, this Bid Manual, and all associated Owner and Bid Related documents provided with this Bid Package.

5.1.4 Wharton-Smith, Inc. may conduct such investigations and require supplemental information as it deems necessary to assist in the evaluation of any Bid and to establish the responsibility, qualifications and financial ability of the Bidders, proposed Subcontractors, proposed equipment and material suppliers, and other persons and organizations to provide the materials in accordance with the Contract Documents to Wharton-Smith, Inc.'s satisfaction within the prescribed time.

5.1.5 Bidder shall, upon request of Wharton-Smith, Inc., submit documentation evidencing its capability to execute the work properly within the time specified. This information must be received by Wharton-Smith, Inc. within ten (10) calendar days of Bidder receiving written request.

5.2 RECOMMENDATION AND APPROVAL OF RANKING

5.2.1 The CMAR will review all Bid Proposals that are received in conformance of the requirements herein and provide a recommendation to the Owner. The Owner, at its sole discretion, may accept the CMAR's recommendation or re-evaluate the Bid Proposals. The Owner will establish and approve the final recommended of award for the Bid Package. The Owner will be the sole judge of its own interests, the proposals, and the resulting agreements. The Owner's decision will be final.

5.3 AWARD OF CONTRACT

5.3.1 Award shall be based on products, equipment and materials named in the Contract Documents. Consideration of any decisions regarding substitution shall not be made until after Award of Contracts.

5.3.2 If the Contract is to be awarded, Wharton-Smith, Inc. will give the Bidder a Notice of Award after the Owner's agreement of the Bidder to receive Award.

5.3.3 The Awarded Bidder will be required to enter into a Purchase Order Agreement or Subcontract Agreement with Wharton-Smith, Inc. This agreement will contain the same terms and conditions as shown in the sample agreement provided in this Bid Manual. The Purchase Order or Subcontract will also contain the defined work scope as shown in this Bid Manual. Modifications to this Agreement will not be allowed.

SECTION 6 – SCOPE OF WORK

The Bidder shall utilize the information within this section of the Bid Manual to assist in development of the Bid Proposal. The outlined scopes herein are not intended to detail the complete scope of the Bid Package. The Bidder is responsible for reviewing the Contract Documents to understand the full scope and requirements.

The Subcontractor is to furnish all labor, equipment, material, subcontracts, and supervision required to complete the Scope of Work generally described as the **PLUMBING PACKAGE**, detailed herein, for the Public Utilities Field Operations Facility. All work shall be complete and in accordance with the Contract Documents. In the event of conflicts between the Scope of Work and other parts of the Contract Documents, this section shall take precedence.

6.1 WORK OVERVIEW

Provide complete, all required **Plumbing Work**, for the Project known as **City of Port Orange Public Works Facility.**

The Work included in this Subcontract is project specific and outlines the general Scope of Work for this Subcontract, all in complete accordance with the Plans and Specifications as defined in Exhibit "C" attached hereto.

Other Specification Sections may form a part of this Subcontract, whether listed or not.

The Scope of this Subcontract includes, but is not necessarily limited to the furnishing and installation of the following Work by this Subcontractor.

1. Visitors - No one shall be admitted to the jobsite by the Subcontractor, except as necessary to perform the Work hereunder, without, in each instance, first obtaining the approval of the Contractor.
2. Replace Guardrails - This Subcontractor shall install, maintain and replace all required guardrails in accordance with OSHA Standards for the purpose of safety at all openings and suspended work at the locations not protected and where Subcontractor is performing work. Subcontractor is also responsible for all construction fencing, temporary walkways, overhead protection, signage, and/or barricades to perform work outside the boundaries of Contractor furnished construction fencing.
3. Ongoing Operations/Residential Environment/Parking - Without limitation of the foregoing, Subcontractor understands that the Work may be constructed near on-going business or facility operations and may be in and around private residences and neighborhoods. Subcontractor shall use its best efforts, in conformity with the applicable standard of care, to perform the services hereunder in a manner which will not interfere with the on-going business operations and residences. All construction employees are to enter and park in the construction parking area designated by Contractor. Subcontractors are responsible for all off-site parking of employees which may be required and busing to jobsite via route identified by Contractor. Busing of employees, jobsite vehicles or deliveries shall not be routed through surrounding neighborhoods.
4. Jobsite Storage - Subcontractor is aware of the existing site conditions and the limited space availability. On-site storage and staging of materials and equipment will be allowed, only as specifically approved by Contractor's Project Superintendent or Project Manager. All deliveries of Subcontractor will be coordinated through Contractor. If scheduled deliveries are not ready at appointed time, Contractor may refuse acceptance and deliveries will be rescheduled. All cost and/or delays associated with the refusal of deliveries will be the responsibility of the Subcontractor. Subcontractor has included in this Subcontract price, all off-site storage as may be required, including, but not limited to transportation of materials from staging area to site.
5. Phased Turnover - This Subcontractor acknowledges that the Project may have phased turnover in accordance with the Project Schedule and that several mobilizations may be required and are included as part of this Subcontract. Additionally, Subcontractor acknowledges that the Project may have multi-buildings and that concurrent work on each building will be required in order to complete some phases ahead of the Project Schedule and all costs for doing same are included.
6. Owner's Facilities - All Project employees are subject to the Owner's rules and regulations while employed within their property limits. Use of the Owner's other parking lots and facilities by this Project's workmen are not permitted.

7. Limitation of Noise/Hours of Work - Subcontractor shall comply with all city, county, state and local jurisdictional authorities' Noise and Hours of Work Regulations.

8. This Subcontractor shall preserve all benchmark stakes and other survey marks, regardless of location or purpose. In the event these items are removed or destroyed by the Subcontractor's employees or others working on its behalf, the Subcontractor shall bear the full replacement cost.

9. This Subcontractor shall be responsible for all flagmen and traffic control personnel as necessary to get trucks in and out of the Project site in a safe and effective manner.

10. This Subcontractor shall provide all excavation, trenching, backfill, compaction, casual dewatering, pumping, shoring, personnel protection, traffic control, filter materials, bedding materials, grading, and all other earthwork which may be required to complete this scope of work. This Subcontractor shall provide a competent person at all times trenching is taking place.

11. This Subcontractor shall be responsible for all re-inspection fees required for this scope of work and the work of all others working on its behalf.

12. This Subcontractor shall provide and install all plumbing services necessary to provide temporary water for construction purposes, and for the Contractor's office facility. Temporary meters and consumption costs are to be provided by the Contractor.

13. This Subcontractor understands and agrees that all temporary excavations must have sides sloped at 1-1/2 to 1 ratio or utilize a trench box. If conditions do not allow for this sloping a trench box must be utilized. This Subcontractor has specifically reviewed the Geotechnical Report and understands that earth forming of trenches for the installation of underground pipe may not be possible on site.

14. This Subcontractor shall provide and install plumbing equipment, pipe, valves, mixing valves, valve boxes, fixtures, drains, water distribution system, in slab condensate piping and associated drain bodies, air handling unit condensate drains, vent systems, sanitary piping, lint traps, clean outs, thermal insulation, including at horizontal roof drains, and all miscellaneous accessories required for a complete and turnkey installation in strict accordance with the Contract Documents, governing buildings codes and the Authority Having Jurisdiction.

15. This Subcontractor shall provide and install all plumbing fixtures and equipment including, but not limited to, air admittance valves, backwater valves, carriers, electric water coolers, bottle fillers, pedestal drinking fountains, lavatories, water closets, urinals, lay in sinks, floor sinks, mop sinks, laundry sinks, bath tubs, electric water heaters, gas water heaters, water recirculating pumps, hub drains, floor drains, area drains, roof drains, overflow drains, trench drains, washing machine box, ice-maker/refrigerator box, hose bibs, wall hydrants (freeze proof), emergency eyewash stations, cleanouts, acid neutralizing bottle traps, faucets, and trim.

16. This Subcontractor shall provide and install all required grouting of equipment for plumbing fixtures and equipment.

17. This Subcontractor understands that the trench drains will need to be ordered early in order to be procured and installed in accordance with the Contractor's project schedule and prior to pouring the SOG for the building(s).

18. This Subcontractor shall hook-up all plumbing related fixtures and equipment that is provided and set by others. All miscellaneous materials required are included in this scope of work.

19. This Subcontractor shall provide and install hammer arrestors in strict accordance with the Contract Documents, properly sized for the number of fixtures served. Also included are access doors at each location of hammer arrestor.

20. This Subcontractor shall provide and install all beauty caulking around their installations.

21. This Subcontractor shall provide and install a complete interior sanitary sewer system to 5' outside of each building including, but not limited to, final hook up, piping, fittings, equipment, valves, labeling, and accessories.

22. This Subcontractor shall provide, through a Second Tier Subcontractor, all videoing required at all under slab sanitary piping. Videos are to be turned over to the Contractor as part of the closeout documents. Re-videoing of the piping is included, if required, in this Subcontract.

23. This Subcontractor shall provide and install a complete interior domestic water system to 5' outside of each building including, but not limited to, final hook up, piping, fittings, equipment, valves, pumps, labeling, and accessories.

24. This Subcontractor shall provide all flushing, disinfecting, and sampling of domestic water piping by a certified laboratory prior to the system being placed into service. All satisfactory laboratory reports are to be provided to Contractor prior to any supply valves being opened.

25. This Subcontractor shall provide and install a complete compressed air system in accordance with the Contract Documents, including but not limited to air compressors, reels, specialties and receivers in both the Administration and Fleet Maintenance Building.

26. This Subcontractor shall provide and install all identification required for this scope of work including, but not limited to, stenciling, tags, labels, flow stickers, signage, name plates, etc. of all piping and equipment in strict accordance with the Contract Documents.

27. This Subcontractor shall be responsible for all wall, floor, and roof penetrations required to complete this scope of work and provide and install all sleeves and block outs required. All core drilling and cutting of metal deck required, if necessary, is included in this scope of work.

28. The Subcontractor shall prepare detailed shop drawings and layout of all openings or embedded items in CMU walls required for this scope of work. The Subcontractor shall provide and install all plates, inserts, standoffs, rough in materials, and accessories required for a complete installation.

29. This Subcontractor shall submit coordination drawings to coordinate their installation with all above ceiling fire protection, mechanical, and electrical work. This Subcontractor has included attendance at multiple overhead coordination meetings as deemed necessary by the Contractor.

30. This Subcontractor shall provide all templates for lavatories and/or sinks that are scheduled to be mounted in another trades' work.

31. This Subcontractor shall take special care to meet all quality control measures required for exposed piping including, but not limited to, material selection and neat installation. All exposed piping shall be installed in a manner that allows it to be left ready for paint. Painting is by others.

32. This Subcontractor shall provide and install all required fire caulking and/or fire safing at all through wall, through floor, and through ceiling penetrations for this scope of work requiring a fire rating in strict accordance with the Contract Documents. All fire caulking and/or fire safing is to be equal to or greater than the rated assembly penetrated.

33. This Subcontractor shall provide and install all required caulking for smoke and/or sound rated walls at all through wall, through floor, and through ceiling penetrations for this scope of work requiring a smoke and/or sound rating in strict accordance with the Contract Documents. All caulking is to be equal to or greater than the rated assembly penetrated. Direction will be provided by Wharton-Smith, Inc. Superintendent where only one (1) side of a wall is required to be caulked.

34. This Subcontractor shall provide and install all required caulking and/or safing at all through wall roof drain penetrations in strict accordance with the Contract Documents.

35. This Subcontractor shall provide all access panels required for this scope of work. Layout for access panels is included in this scope of work. Panels are to be turned over to the Contractor and installed by others.

36. This Subcontractor shall coordinate with other Subcontractors for locations of hangers, fire sprinkler heads, diffusers, grilles, ductwork, VAVs, light fixtures, piping, and all other items for proper installation of their work. It is understood and agreed that material installed as part of this scope of work cannot negatively impact the required working clearances of any mechanical or electrical equipment.

37. This Subcontractor shall provide and install all required supports and anchors for this scope of work including, but not limited to, carriers, hangers, isolators, channels, angles, embeds, stands, unistrut, rods, straps, etc. This Subcontractor shall be responsible to reasonably distribute the applied loads to the structure so to not overload any element. Should additional supports be needed, they are included in this Subcontractor's scope of work. This

Subcontractor understands and acknowledges that all support framing and/or hangers shall be supported off of the structure and that no framing and/or hangers of any kind are to be supported off of the metal deck above.

38. This Subcontractor shall install all required beam clamps for hangers prior to the spray applied fire proofing being installed. It is understood and agreed that if spray applied fire proofing work in place is damaged because of hangers for this scope of work being added after spray on fire proofing installation, this Subcontractor shall bear all remediation costs.

39. This Subcontractor shall be responsible for fire sprinkler drain tie-in to storm drain in strict accordance with the Contract Documents.

40. This Subcontractor shall layout all concrete housekeeping pads required for this scope of work. Concrete pads to be formed and placed by others.

41. This Subcontractor shall be responsible for all tie-ins of sanitary sewer and domestic water within 5' of the building including, but not limited to, sanitary piping, domestic piping, fittings, excavation, and backfill. This includes storm stub-outs to 5' from the buildings. Final tie-in to storm stub-outs and canopy downspouts are by this Subcontractor.

42. This Subcontractor shall layout all concrete housekeeping pads required for this scope of work. Concrete pads to be formed and placed by others.

43. This Subcontractor shall provide all system startup/commissioning along with Owner training for all equipment provided by this Subcontractor. Owner training must be videotaped, and videos provided with closeout documentation.

44. This Subcontractor shall provide continuous supervision during all concrete placements. Supervision for inspections for others working on this Subcontractor's behalf are also included.

45. This Subcontractor shall provide continuous supervision during all plumbing inspections. Supervision for inspections for others working on this Subcontractor's behalf are also included.

46. This Subcontractor shall provide all labor, material, and equipment in strict accordance with final plumbing testing procedures as required by the Contract Documents, governing building codes, and the Authority Having Jurisdiction. This Subcontractor shall bear all costs associated with retesting required because this Subcontractor failed to meet performance data outlined in the Contract Documents.

47. This Subcontractor shall provide and install all compressed air, hydraulic oil, Engine Coolant, Engine Oil, and all associated lubrication lines and accessories in the Fleet Maintenance Building for a full and complete installation of the hose line and reel systems in accordance with the Contract Documents.

48. This Subcontractor shall be responsible for all rough-in associated with the automotive lubrication lines and appurtenances in strict accordance with the Contract Documents.

49. This Subcontractor shall provide in writing a delivery schedule for all plumbing equipment and fixtures required at the project and broken out by building number.

50. This Subcontractor shall provide all required coordination with Contractor and Roofing Subcontractor specifically regarding plumbing roof penetrations and roof drain installations. Roofing boots and flashings will be provided and installed by others.

51. This Subcontractor shall provide all rough-in and final hook up of all items requiring plumbing service no matter if it is Owner provided, Contractor provided, or provided by another Subcontractor, including, but not limited to, all kitchen equipment. This scope of work includes all piping, tubing, and miscellaneous fittings required.

52. This Subcontractor shall provide adequate working platforms, walkways, scaffolding, railings, and safety rails as required at all times work is taking place on site. It is this Subcontractor's responsibility to furnish, erect, brace, and dismantle all scaffold required to complete this scope of work. Inspection and tagging of all scaffold provided by this Subcontractor is to be completed on a daily basis prior to work commencing.

53. This Subcontractor shall receive, handle, distribute, and properly store all materials in strict accordance with the manufacturer's written instructions. At the discretion of the Authority Having Jurisdiction and/or the Contractor, this Subcontractor shall replace all damaged and/or weathered material at no additional costs.

54. This Subcontractor shall clean all equipment and fixtures supplied by this scope of work from all shipping labels and other temporary labels and debris.

55. This Subcontractor shall provide and install all oil/water separator. This includes, but is not limited to, coordination with the Site Contractor to establish inverts and all miscellaneous materials required by this Scope of Work all in strict accordance with the Contract Documents and manufacturer's specifications.

56. The Subcontractor shall provide a list of all intended material and equipment to be purchased under the Owner Direct Material/Equipment Purchase Program no later than 10 days after the issuance of a Notice of Intent or execution of this Agreement, whichever comes first.

Other Items of Note:

A. Wharton-Smith will be utilizing a software called **Team Player** to process monthly pay applications. The fee for this service is $10.00 per Pay Application, regardless on the number of revisions in each month. Please review the Team Player Welcome Letter that has been included in the Bidding Documents which contains embedded links for training documentation and videos. This will be a requirement for all subcontractors on this project.

B. With respect to Article 22 of this Subcontract Agreement, the Owner will exercise the right to purchase materials directly as part of the Owner Direct Purchase Program. This Subcontractor shall actively participate in the Owner Direct Purchase Program for this Project Prior to the Subcontractor's final payment, a final reconciliation of Owner Direct Purchases against this Subcontract will be performed. This does not apply to temporary fence.

C. On-Site Work Hours: Limit work to between 7 a.m. to 5 p.m., Monday through Friday, unless otherwise indicated. Work hours may be modified to meet Project requirements if approved by Owner and authorities having jurisdiction.

D. Employee Screening: Comply with Owner's requirements for drug and background screening of Contractor personnel working on Project site. Subcontractor shall maintain list of approved screened personnel with Owner's representative.

6.2 BID PRICING / ALTERNATES

The bid pricing shall be broken out as follows and as indicated on the bid form. The City of Port Orange has the sole discretion to accept any, all, or none of the work items for this scope of work based on the bid pricing received. Subcontractor to price the work accordingly.

6.2.1 This bid does not include any bid alternates.

6.2.2 Retainage will be held at 5% for the duration of the Contract and will be released upon retainage release by the Owner.

6.3 CLARIFICATIONS

6.3.1 The Subcontractor will be responsible for protecting all new and existing work throughout the site from damage that could be caused by performing the Scope of Work. Any damage caused by Subcontractor is the responsibility of Subcontractor and Subcontractor will bear the costs of said damage.

6.3.2 The Subcontractor will be required to attend all project progress and coordination meetings as requested by Wharton-Smith, Inc. or the owner.

6.3.3 All materials must be submitted upon and approved prior to being sent to the jobsite, all non-approved items may be rejected and returned at the Subcontractor's cost.

6.3.4 Subcontractor is responsible to coordinate with the CMAR and all other Subcontractors as necessary.

6.3.5 Subcontractor will be responsible for all general notes indicated on the drawings that pertain to this scope of work.

6.3.6 Subcontractor will obtain all permits, licenses, certificates, and coordination efforts, or any such approvals of plans or specifications as may be required by federal, state and local laws, ordinances, rules and regulations, for the proper execution and completion of the work specified herein.

6.3.7 Subcontractor will be responsible for offloading all equipment deliveries and proper short-term and long-term storage requirements per the manufacturer's requirements. Provide all equipment necessary to offload and set equipment including cranes.

6.4 GENERAL REQUIREMENTS

6.4.1 The Subcontractor will be bound to the CMAR to the same extent the CMAR is bound to the Owner by the terms of the Contract Documents.

6.4.2 The Scope of Work will be in compliance with all Federal, State and Local Codes.

6.4.3 This is a lump sum agreement, including freight, incidental fees, and all applicable taxes. A schedule of values for submittals, materials, checkout, startup and closeout paperwork will be submitted with the return of the signed agreement for review and approval by the CMAR's Project Manager.

6.4.4 If requested by the CMAR, the Subcontractor will assist in cost loading of the project's master schedule. Schedule of Values will follow the cost loaded actives provided by Subcontractor.

6.4.5 No billing will be accepted without an approved Schedule of Values.

6.4.6 A detailed Schedule of Values must be provided within two (2) weeks of a contract being executed should your bid be accepted.

6.4.7 No escalation costs are permitted, pricing will remain firm through the project duration.

6.4.8 The Subcontractor is required to abide by the Wharton-Smith, Inc. safety program and OSHA standards. Excavation, confined space plans, and MSDS sheets will be required for all applicable work.

6.4.9 Subcontractor is responsible to develop and provide a site-specific safety plan for this scope of work.

A. Safety plan will list all potential hazards and competent persons who will be supervising the work.

6.4.10 Subcontractor will maintain an OSHA Certified competent person on site at all times while the work is conducted.

6.4.11 All Subcontractors will be required to follow security protocol of the City of Port Orange and Wharton-Smith at all times.

6.4.12 OSHA and the CMAR's safety standards will be followed at all times.

6.4.13 Proper PPE will be worn by any personnel on the jobsite, including but not limited to delivery drivers, startup and commissioning representatives, manufacturer's representatives, and other personnel.

6.4.14 Materials are to be released as required to maintain Schedule, but Subcontractor is to inform CMAR of material releases and deliveries. No item will be released for production without approval from the Engineer.

6.4.15 All equipment will be labeled and tagged in accordance with the Contract Documents.

6.4.16 Provide all management necessary to adequately support field activities and maintain the Project Schedule.

6.4.17 Fulltime and onsite supervision is required while any work by Subcontractor is being performed. If Subcontractor fails to do so, the CMAR will provide supervision and all costs will be back charged to Subcontractor. The Subcontractor's superintendent will be required to attend all requested progress, safety, scheduling, coordination, and quality control meetings. Meetings of other natures may be required as requested by Engineer, Owner, or the CMAR.

6.4.18 The Subcontractor will be required to coordinate with all other construction trades as required to complete this Scope of Work.

6.4.19 Anticipated (general) sequencing – Your crews may be interfacing with several other trades including mechanical, concrete, piping, and, testing agencies. Reasonable time provisions need to be made for coordination and time for these trades to complete their work.

6.4.20 All deliveries will be made between 7am-3pm M-F; all deliveries will be escorted onto the site by WSI. A 72-hour notice to WSI's Superintendent will be required prior to any deliveries.

6.4.21 The Subcontractor may not utilize any area of the project site for storage without approval from the CMAR. If the Subcontractor plans to utilize storage space, the Subcontractor will submit, to the CMAR, a site plan detailing the areas being requested for storage.

6.4.22 An emergency contact list will be provided by the Subcontractor. This list will include at least one point of contact that is available 24 hours a day.

6.4.23 Furnish appropriate Material Safety & Data Sheets (MSDS) and warranty documentation with shop drawings for approval.

6.4.24 Subcontractor is required to coordinate with all applicable authorities as required

6.4.25 The Subcontractor utilizing an Employee Leasing Company for Workers Compensation Insurance coverage will not be allowed to use any Subcontractor on the project (i.e. no third-party subs)

6.4.26 It is the sole responsibility of the Subcontractor to secure any and all tools, materials, and equipment stored on the site. Wharton-Smith, nor the Owner, will be responsible for any theft, vandalism, or damage to the Subcontractors property. The Subcontractor is responsible for all security measures required to secure their resources.

6.4.27 Subcontractor will provide temporary generators as needed and fresh drinking water for their employees. Subcontractor is only responsible for their work and personnel.

6.4.28 The Subcontractor is responsible to follow all site plan details and to adhere to all specifications applicable to the Scope of Work items above.

6.4.29 All hazardous material will be properly disposed of at an offsite location.

6.4.30 The Subcontractor will be responsible to utilize available dumpsters for debris and daily clean-up. All areas will be left clean at the end of each day.

6.4.31 A representative of the Subcontractor knowledgeable of the work will be present at weekly coordination meetings with the General Contractor.

6.4.32 Subcontractor is to provide Daily Reports.

6.4.33 A Superintendent (not Foreman) must be present at all times the Subcontractor's crews are onsite.

6.4.34 Pre-Mobilization Jobsite QC/QA Conference - Subcontractor to participate in WSI Quality Control Plan as outlined in the Subcontract Agreement. Subcontractor's Project Superintendent and or Foremen will attend Quality Control Meetings as deemed necessary by WSI including a minimum of one (1) pre-mobilization meeting to be held in advance of Subcontractor's mobilization on site.

6.4.35 Subcontractor must have approval for additional work (not included in this Scope) in writing by an authorized W/S representative prior to proceeding with said work.

6.4.36 No claim for extra services rendered or materials furnished will be valid by either party unless agreed to in writing by both parties.

6.5 PROJECT SCHEDULE

6.5.1 The Subcontractor is to provide a detailed schedule for the Scope of Work with the submission of bid. The Subcontractor will coordinate with the CMAR to ensure the detailed schedule conforms to the overall Project Schedule. The Subcontractor will update this Scope of Work Schedule each month and provide a written update to the CMAR.

6.5.2 The Subcontractor will account for not working on holidays and still plan for the Scope of Work to be completed per the overall Project Schedule. Holidays will include those observed by the Owner, the CMAR, and the Subcontractor. The CMAR or Owner observes the following holidays:

A. New Year's Day
B. Martin Luther King Day
C. President's Day
D. Memorial Day
E. Independence Day
F. Labor Day
G. Thanksgiving
H. Day after Thanksgiving
I. Christmas Eve
J. Christmas Day

6.6 SUBMITTAL REQUIREMENTS

6.6.1 The Subcontractor will provide submittal documentation as required within the Contract Documents. Upon execution of this Agreement the Subcontractor will provide a list of anticipated submittals for the Scope of Work. The Subcontractor will provide any additional submittal documentation requested for any materials or services related to the Scope of Work.

6.6.2 All submittals which have any deviation will be supplied with a letter addressing all deviations.

6.6.3 All submittals will be provided with a cover page listing the following information:

A. Project name
B. Submittal title
C. Relevant specification sections
    a. Specification sections, with addendum updates included, are to have each paragraph check-marked to indicate specification compliance. Check marks shall denote full compliance with a paragraph as a whole. Any deviation shall be clearly marked by an "X" and numbered to indicate a requested deviation. If deviations from the specifications are indicated, and therefore requested, each deviation shall be underlined and denoted by a unique number in the margin to the right of the identified paragraph, referenced to a detailed written explanation of the reasons requesting the deviation. The remaining portions of the paragraph not underlined will signify

compliance with the specifications. Failure to include a copy of the marked-up specification sections along with justifications for any requested deviations to the specification requirements shall be cause for return of the entire submittal with no further review.

D. Subcontractor's contact information

E. Manufacturer's contact information

6.6.4 All submittals will including the following information for each individual piece of equipment or fabrication:

A. Complete model number

B. The tag number of each per the Contract Documents (if applicable)

C. List of major components

D. Specification section (if varied from the submittal prime specification section)

6.6.5 It is the Subcontractor's sole responsibility to ensure submittals are complete and accurate for the complete scope of this agreement. Coordination of submittal information from others working under the Subcontractor is the sole responsibility of the Subcontractor. Subcontractor will not provide submittals with any items marked out of scope or by others if such items are part of the scope of this agreement.

6.6.6 Revised submittals will include a comment response document, this document will respond to every comment in writing and reference the location of all corrections within the revised submittal. Revised submittals will be at no additional cost to the Purchaser.

6.6.7 The Subcontractor may be responsible for any costs incurred by the CMAR due to excessive submittal revisions.

6.7 RECORD DOCUMENTS

6.7.1 The Subcontractor will maintain accurate and current as-built documents. These documents will meet the requirements within the Contract Documents. All survey information will be certified by a licensed surveyor.

6.7.2 Prior to approval of the Subcontractor's monthly pay application, the CMAR may elect to review the Subcontractor's as-built documents. If these documents are found to be inaccurate or not current, up to the date of the pay application, the CMAR may reject the pay application until the Subcontractor provides accurate and current as-built documents. Subcontractor will not be entitled for any additional costs, fees, or other compensation due to rejected pay applications and delayed payments as a result of Subcontractor's failure to provide accurate and current as-built documents.

6.7.3 After completion of the Scope of Work, the Subcontractor will provide complete and final as-built documents within two (2) weeks. As-built documents will be provided as detailed in the Contract Documents

6.8 INSURANCE

6.8.1 Subcontractor will provide the minimum insurance limits required to meet the requirements in this purchase order and all the requirements detailed within the Contract Documents. A sample insurance document is included within the Contract Documents for additional reference.

6.8.2 The Subcontractor will maintain a worker's compensation insurance policy for the complete scope of services. The Subcontractor will not utilize a Professional Employer Organization (PEO) to provide workers compensation insurance.

CONTRACTORS EXTENDED COVERAGE ENDORSEMENT - BUSINESS AUTO PLUS

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

This endorsement modifies insurance provided under the following:

BUSINESS AUTO COVERAGE FORM

I. LIABILITY COVERAGE

A. Who Is An Insured

The following is added to **Section II, Paragraph A.1., Who Is An Insured**:

1. **a.** Any incorporated entity of which the Named Insured owns a majority of the voting stock on the date of inception of this Coverage Form; provided that,

   b. The insurance afforded by this provision **A.1.** does not apply to any such entity that is an **insured** under any other liability "policy" providing **auto** coverage.

2. Any organization you newly acquire or form, other than a limited liability company, partnership or joint venture, and over which you maintain majority ownership interest.

   The insurance afforded by this provision **A.2.**:

   a. Is effective on the acquisition or formation date, and is afforded only until the end of the policy period of this Coverage Form, or the next anniversary of its inception date, whichever is earlier.

   b. Does not apply to:

   (1) **Bodily injury** or **property damage** caused by an **accident** that occurred before you acquired or formed the organization; or

   (2) Any such organization that is an **insured** under any other liability "policy" providing **auto** coverage.

3. Any person or organization that you are required by a written contract to name as an additional insured is an **insured** but only with respect to their legal liability for acts or omissions of a person, who qualifies as an **insured** under **SECTION II – WHO IS AN INSURED** and for whom Liability Coverage is afforded under this policy. If required by written contract, this insurance will be primary and non-contributory to insurance on which the additional insured is a Named Insured.

4. An **employee** of yours is an **insured** while operating an **auto** hired or rented under a contract or agreement in that **employee's** name, with your permission, while performing duties related to the conduct of your business.

"Policy", as used in this provision **A. Who Is An Insured,** includes those policies that were in force on the inception date of this Coverage Form but:

1. Which are no longer in force; or

2. Whose limits have been exhausted.

B. Bail Bonds and Loss of Earnings

Section II, Paragraphs A.2. (2) and A.2. (4) are revised as follows:

1. In **a.(2),** the limit for the cost of bail bonds is changed from $2,000 to $5,000; and

2. In **a.(4),** the limit for the loss of earnings is changed from $250 to $500 a day.

© Copyright CNA All Rights Reserved. Includes copyrighted material of the Insurance Services Office, Inc., used with its permission.

C. Fellow Employee

Section II, Paragraph B.5 does not apply.

Such coverage as is afforded by this provision C. is excess over any other collectible insurance.

II. PHYSICAL DAMAGE COVERAGE

A. Glass Breakage – Hitting A Bird Or Animal – Falling Objects Or Missiles

The following is added to **Section III, Paragraph A.3.**:

With respect to any covered **auto**, any deductible shown in the Declarations will not apply to glass breakage if such glass is repaired, in a manner acceptable to us, rather than replaced.

B. Transportation Expenses

Section III, Paragraph A.4.a. is revised, with respect to transportation expense incurred by you, to provide:

a. $60 per day, in lieu of $20; subject to

b. $1,800 maximum, in lieu of $600.

C. Loss of Use Expenses

Section III, Paragraph A.4.b. is revised, with respect to loss of use expenses incurred by you, to provide:

a. $1,000 maximum, in lieu of $600.

D. Hired "Autos"

The following is added to **Section III. Paragraph A.**:

5. Hired "Autos"

If Physical Damage coverage is provided under this policy, and such coverage does not extend to Hired Autos, then Physical Damage coverage is extended to:

a. Any covered **auto** you lease, hire, rent or borrow without a driver; and

b. Any covered **auto** hired or rented by your **employee** without a driver, under a contract in that individual **employee's** name, with your permission, while performing duties related to the conduct of your business.

c. The most we will pay for any one **accident** or **loss** is the actual cash value, cost of repair, cost of replacement or $75,000, whichever is less, minus a $500 deductible for each covered auto. No deductible applies to **loss** caused by fire or lightning.

d. The physical damage coverage as is provided by this provision is equal to the physical damage coverage(s) provided on your owned **autos**.

e. Such physical damage coverage for hired **autos** will:

(1) Include loss of use, provided it is the consequence of an **accident** for which the Named Insured is legally liable, and as a result of which a monetary loss is sustained by the leasing or rental concern.

(2) Such coverage as is provided by this provision will be subject to a limit of $750 per **accident**.

E. Airbag Coverage

The following is added to **Section III, Paragraph B.3.**:

The accidental discharge of an airbag shall not be considered mechanical breakdown.

© Copyright CNA All Rights Reserved. Includes copyrighted material of the Insurance Services Office, Inc., used with its permission.

F. Electronic Equipment

Section III, Paragraphs B.4.c and B.4.d. are deleted and replaced by the following:

c. Physical Damage Coverage on a covered **auto** also applies to **loss** to any permanently installed electronic equipment including its antennas and other accessories

d. A $100 per occurrence deductible applies to the coverage provided by this provision.

G. Diminution In Value

The following is added to **Section III, Paragraph B.6.**:

Subject to the following, the **diminution in value** exclusion does not apply to:

a. Any covered **auto** of the private passenger type you lease, hire, rent or borrow, without a driver for a period of 30 days or less, while performing duties related to the conduct of your business; and

b. Any covered **auto** of the private passenger type hired or rented by your **employee** without a driver for a period of 30 days or less, under a contract in that individual **employee's** name, with your permission, while performing duties related to the conduct of your business.

c. Such coverage as is provided by this provision is limited to a **diminution in value** loss arising directly out of accidental damage and not as a result of the failure to make repairs; faulty or incomplete maintenance or repairs; or the installation of substandard parts.

d. The most we will pay for **loss** to a covered **auto** in any one accident is the lesser of:

(1) $5,000; or

(2) 20% of the **auto's** actual cash value (ACV).

III. Drive Other Car Coverage – Executive Officers

The following is added to **Sections II and III**:

1. Any **auto** you don't own, hire or borrow is a covered **auto** for Liability Coverage while being used by, and for Physical Damage Coverage while in the care, custody or control of, any of your "executive officers", except:

a. An **auto** owned by that "executive officer" or a member of that person's household; or

b. An **auto** used by that "executive officer" while working in a business of selling, servicing, repairing or parking **autos**.

Such Liability and/or Physical Damage Coverage as is afforded by this provision.

(1) Equal to the greatest of those coverages afforded any covered **auto**; and

(2) Excess over any other collectible insurance.

2. For purposes of this provision, "executive officer" means a person holding any of the officer positions created by your charter, constitution, by-laws or any other similar governing document, and, while a resident of the same household, includes that person's spouse.

Such "executive officers" are **insureds** while using a covered **auto** described in this provision.

IV. BUSINESS AUTO CONDITIONS

A. Duties In The Event Of Accident, Claim, Suit Or Loss

The following is added to **Section IV, Paragraph A.2.a.**:

© Copyright CNA All Rights Reserved. Includes copyrighted material of the Insurance Services Office, Inc., used with its permission.

(4) Your **employees** may know of an **accident** or **loss**. This will not mean that you have such knowledge, unless such **accident** or **loss** is known to you or if you are not an individual, to any of your executive officers or partners or your insurance manager.

The following is added to **Section IV, Paragraph A.2.b.**:

(6) Your **employees** may know of documents received concerning a claim or **suit**. This will not mean that you have such knowledge, unless receipt of such documents is known to you or if you are not an individual, to any of your executive officers or partners or your insurance manager.

B. Transfer Of Rights Of Recovery Against Others To Us

The following is added to **Section IV, Paragraph A.5. Transfer Of Rights Of Recovery Against Others To Us**:

We waive any right of recovery we may have, because of payments we make for injury or damage, against any person or organization for whom or which you are required by written contract or agreement to obtain this waiver from us.

This injury or damage must arise out of your activities under a contract with that person or organization.

You must agree to that requirement prior to an **accident** or **loss**.

C. Concealment, Misrepresentation or Fraud

The following is added to **Section IV, Paragraph B.2.**:

Your failure to disclose all hazards existing on the date of inception of this Coverage Form shall not prejudice you with respect to the coverage afforded provided such failure or omission is not intentional.

D. Other Insurance

The following is added to **Section IV, Paragraph B.5.**:

Regardless of the provisions of Paragraphs **5.a.** and **5.d.** above, the coverage provided by this policy shall be on a primary non-contributory basis. This provision is applicable only when required by a written contract.

That written contract must have been entered into prior to **Accident** or **Loss**.

E. Policy Period, Coverage Territory

Section IV, Paragraph B. 7.(5).(a). is revised to provide:

a. 45 days of coverage in lieu of 30 days.

V. DEFINITIONS

Section V. paragraph C. is deleted and replaced by the following:

Bodily injury means bodily injury, sickness or disease sustained by a person, including mental anguish, mental injury or death resulting from any of these.

Contractors' General Liability Extension Endorsement

1. ADDITIONAL INSUREDS

a. **WHO IS AN INSURED** is amended to include as an **Insured** any person or organization described in paragraphs **A.** through **H.** below whom a **Named Insured** is required to add as an additional insured on this **Coverage Part** under a written contract or written agreement, provided such contract or agreement:

(1) is currently in effect or becomes effective during the term of this **Coverage Part**; and

(2) was executed prior to:

(a) the **bodily injury** or **property damage**; or

(b) the offense that caused the **personal and advertising injury**,

for which such additional insured seeks coverage.

b. However, subject always to the terms and conditions of this policy, including the limits of insurance, the Insurer will not provide such additional insured with:

(1) a higher limit of insurance than required by such contract or agreement; or

(2) coverage broader than required by such contract or agreement, and in no event broader than that described by the applicable paragraph **A.** through **H.** below.

Any coverage granted by this endorsement shall apply only to the extent permissible by law.

A. Controlling Interest

Any person or organization with a controlling interest in a **Named Insured**, but only with respect to such person or organization's liability for **bodily injury**, **property damage** or **personal and advertising injury** arising out of:

1. such person or organization's financial control of a **Named Insured**; or

2. premises such person or organization owns, maintains or controls while a **Named Insured** leases or occupies such premises;

provided that the coverage granted by this paragraph does not apply to structural alterations, new construction or demolition operations performed by, on behalf of, or for such additional insured.

B. Co-owner of Insured Premises

A co-owner of a premises co-owned by a **Named Insured** and covered under this insurance but only with respect to such co-owner's liability for **bodily injury**, **property damage** or **personal and advertising injury** as co-owner of such premises.

C. Lessor of Equipment

Any person or organization from whom a **Named Insured** leases equipment, but only with respect to liability for **bodily injury**, **property damage** or **personal and advertising injury** caused, in whole or in part, by the **Named Insured's** maintenance, operation or use of such equipment, provided that the **occurrence** giving rise to such **bodily injury**, **property damage** or the offense giving rise to such **personal and advertising injury** takes place prior to the termination of such lease.

D. Lessor of Land

Any person or organization from whom a **Named Insured** leases land but only with respect to liability for **bodily injury**, **property damage** or **personal and advertising injury** arising out of the ownership, maintenance or use of such land, provided that the **occurrence** giving rise to such **bodily injury**, **property damage** or the offense giving rise to such **personal and advertising injury** takes place prior to the termination of such lease. The

Copyright CNA All Rights Reserved. Includes copyrighted material of Insurance Services Office, Inc., with its permission.

coverage granted by this paragraph does not apply to structural alterations, new construction or demolition operations performed by, on behalf of, or for such additional insured.

E. Lessor of Premises

An owner or lessor of premises leased to the **Named Insured**, or such owner or lessor's real estate manager, but only with respect to liability for **bodily injury**, **property damage** or **personal and advertising injury** arising out of the ownership, maintenance or use of such part of the premises leased to the **Named Insured**, and provided that the **occurrence** giving rise to such **bodily injury** or **property damage**, or the offense giving rise to such **personal and advertising injury**, takes place prior to the termination of such lease. The coverage granted by this paragraph does not apply to structural alterations, new construction or demolition operations performed by, on behalf of, or for such additional insured.

F. Mortgagee, Assignee or Receiver

A mortgagee, assignee or receiver of premises but only with respect to such mortgagee, assignee or receiver's liability for **bodily injury**, **property damage** or **personal and advertising injury** arising out of the **Named Insured's** ownership, maintenance, or use of a premises by a **Named Insured**.

The coverage granted by this paragraph does not apply to structural alterations, new construction or demolition operations performed by, on behalf of, or for such additional insured.

G. State or Governmental Agency or Subdivision or Political Subdivisions – Permits

A state or governmental agency or subdivision or political subdivision that has issued a permit or authorization but only with respect to such state or governmental agency or subdivision or political subdivision's liability for **bodily injury**, **property damage** or **personal and advertising injury** arising out of:

1. the following hazards in connection with premises a **Named Insured** owns, rents, or controls and to which this insurance applies:

a. the existence, maintenance, repair, construction, erection, or removal of advertising signs, awnings, canopies, cellar entrances, coal holes, driveways, manholes, marquees, hoistaway openings, sidewalk vaults, street banners, or decorations and similar exposures; or

b. the construction, erection, or removal of elevators; or

c. the ownership, maintenance or use of any elevators covered by this insurance; or

2. the permitted or authorized operations performed by a **Named Insured** or on a **Named Insured's** behalf.

The coverage granted by this paragraph does not apply to:

a. **Bodily injury**, **property damage** or **personal and advertising injury** arising out of operations performed for the state or governmental agency or subdivision or political subdivision; or

b. **Bodily injury** or **property damage** included within the **products-completed operations hazard**.

With respect to this provision's requirement that additional insured status must be requested under a written contract or agreement, the Insurer will treat as a written contract any governmental permit that requires the **Named Insured** to add the governmental entity as an additional insured.

H. Trade Show Event Lessor

1. With respect to a **Named Insured's** participation in a trade show event as an exhibitor, presenter or displayer, any person or organization whom the **Named Insured** is required to include as an additional insured, but only with respect to such person or organization's liability for **bodily injury**, **property damage** or **personal and advertising injury** caused by:

1002000817036225481235 6

Copyright CNA All Rights Reserved. Includes copyrighted material of Insurance Services Office, Inc., with its permission.

a. the **Named Insured's** acts or omissions; or

b. the acts or omissions of those acting on the **Named Insured's** behalf,

in the performance of the **Named Insured's** ongoing operations at the trade show event premises during the trade show event.

2. The coverage granted by this paragraph does not apply to **bodily injury** or **property damage** included within the **products-completed operations hazard**.

2. ADDITIONAL INSURED - PRIMARY AND NON-CONTRIBUTORY TO ADDITIONAL INSURED'S INSURANCE

The **Other Insurance** Condition in the **COMMERCIAL GENERAL LIABILITY CONDITIONS** Section is amended to add the following paragraph:

If the **Named Insured** has agreed in writing in a contract or agreement that this insurance is primary and non-contributory relative to an additional insured's own insurance, then this insurance is primary, and the Insurer will not seek contribution from that other insurance. For the purpose of this Provision **2.**, the additional insured's own insurance means insurance on which the additional insured is a named insured. Otherwise, and notwithstanding anything to the contrary elsewhere in this Condition, the insurance provided to such person or organization is excess of any other insurance available to such person or organization.

3. BODILY INJURY – EXPANDED DEFINITION

Under **DEFINITIONS**, the definition of **bodily injury** is deleted and replaced by the following:

Bodily injury means physical injury, sickness or disease sustained by a person, including death, humiliation, shock, mental anguish or mental injury sustained by that person at any time which results as a consequence of the physical injury, sickness or disease.

4. BROAD KNOWLEDGE OF OCCURRENCE/ NOTICE OF OCCURRENCE

Under **CONDITIONS**, the condition entitled **Duties in The Event of Occurrence, Offense, Claim or Suit** is amended to add the following provisions:

A. BROAD KNOWLEDGE OF OCCURRENCE

The **Named Insured** must give the Insurer or the Insurer's authorized representative notice of an **occurrence**, offense or **claim** only when the **occurrence**, offense or **claim** is known to a natural person **Named Insured**, to a partner, executive officer, manager or member of a **Named Insured**, or an **employee** designated by any of the above to give such notice.

B. NOTICE OF OCCURRENCE

The **Named Insured's** rights under this **Coverage Part** will not be prejudiced if the **Named Insured** fails to give the Insurer notice of an **occurrence**, offense or **claim** and that failure is solely due to the **Named Insured's** reasonable belief that the **bodily injury** or **property damage** is not covered under this **Coverage Part**. However, the **Named Insured** shall give written notice of such **occurrence**, offense or **claim** to the Insurer as soon as the **Named Insured** is aware that this insurance may apply to such **occurrence**, offense or **claim**.

5. BROAD NAMED INSURED

WHO IS AN INSURED is amended to delete its Paragraph **3.** in its entirety and replace it with the following:

3. Pursuant to the limitations described in Paragraph **4.** below, any organization in which a **Named Insured** has management control:

a. on the effective date of this **Coverage Part**; or

Copyright CNA All Rights Reserved. Includes copyrighted material of Insurance Services Office, Inc., with its permission.

b. by reason of a **Named Insured** creating or acquiring the organization during the **policy period**,

qualifies as a **Named Insured**, provided that there is no other similar liability insurance, whether primary, contributory, excess, contingent or otherwise, which provides coverage to such organization, or which would have provided coverage but for the exhaustion of its limit, and without regard to whether its coverage is broader or narrower than that provided by this insurance.

But this **BROAD NAMED INSURED** provision does not apply to:

(a) any partnership, limited liability company or joint venture; or

(b) any organization for which coverage is excluded by another endorsement attached to this **Coverage Part**.

For the purpose of this provision, management control means:

A. owning interests representing more than 50% of the voting, appointment or designation power for the selection of a majority of the Board of Directors of a corporation; or

B. having the right, pursuant to a written trust agreement, to protect, control the use of, encumber or transfer or sell property held by a trust.

4. With respect to organizations which qualify as **Named Insureds** by virtue of Paragraph **3.** above, this insurance does not apply to:

a. bodily injury or **property damage** that first occurred prior to the date of management control, or that first occurs after management control ceases; nor

b. personal or advertising injury caused by an offense that first occurred prior to the date of management control or that first occurs after management control ceases.

5. The insurance provided by this **Coverage Part** applies to **Named Insureds** when trading under their own names or under such other trading names or doing-business-as names (dba) as any **Named Insured** should choose to employ.

6. BROADENED LIABILITY COVERAGE FOR DAMAGE TO YOUR PRODUCT AND YOUR WORK

A. Under **COVERAGES**, **Coverage A – Bodily Injury and Property Damage Liability**, the paragraph entitled **Exclusions** is amended to delete exclusions **k.** and **l.** and replace them with the following:

This insurance does not apply to:

k. Damage to Your Product

Property damage to **your product** arising out of it, or any part of it except when caused by or resulting from:

(1) fire;

(2) smoke;

(3) collapse; or

(4) explosion.

l. Damage to Your Work

Property damage to **your work** arising out of it, or any part of it and included in the **products-completed operations hazard**.

This exclusion does not apply:

(1) If the damaged work, or the work out of which the damage arises, was performed on the **Named Insured's** behalf by a subcontractor; or

10020008170362254812357

Copyright CNA All Rights Reserved. Includes copyrighted material of Insurance Services Office, Inc., with its permission.

(2) If the cause of loss to the damaged work arises as a result of:

(a) fire;

(b) smoke;

(c) collapse; or

(d) explosion.

B. The following paragraph is added to **LIMITS OF INSURANCE**:

Subject to **5.** above, $100,000 is the most the Insurer will pay under **Coverage A** for the sum of **damages** arising out of any one **occurrence** because of **property damage** to **your product** and **your work** that is caused by fire, smoke, collapse or explosion and is included within the **product-completed operations hazard**. This sublimit does not apply to **property damage** to **your work** if the damaged work, or the work out of which the damage arises, was performed on the **Named Insured's** behalf by a subcontractor.

C. This **Broadened Liability Coverage For Damage To Your Product And Your Work** Provision does not apply if an endorsement of the same name is attached to this policy.

7. CONTRACTUAL LIABILITY – RAILROADS

With respect to operations performed within 50 feet of railroad property, the definition of **insured contract** is replaced by the following:

Insured Contract means:

a. A contract for a lease of premises. However, that portion of the contract for a lease of premises that indemnifies any person or organization for damage by fire to premises while rented to a **Named Insured** or temporarily occupied by a **Named Insured** with permission of the owner is not an **insured contract**;

b. A sidetrack agreement;

c. Any easement or license agreement;

d. An obligation, as required by ordinance, to indemnify a municipality, except in connection with work for a municipality;

e. An elevator maintenance agreement;

f. That part of any other contract or agreement pertaining to the **Named Insured's** business (including an indemnification of a municipality in connection with work performed for a municipality) under which the **Named Insured** assumes the tort liability of another party to pay for **bodily injury** or **property damage** to a third person or organization. Tort liability means a liability that would be imposed by law in the absence of any contract or agreement.

Paragraph **f.** does not include that part of any contract or agreement:

(1) That indemnifies an architect, engineer or surveyor for injury or damage arising out of:

(a) Preparing, approving or failing to prepare or approve maps, shop drawings, opinions, reports, surveys, field orders, change orders or drawings and specifications; or

(b) Giving directions or instructions, or failing to give them, if that is the primary cause of the injury or damage;

(2) Under which the **Insured**, if an architect, engineer or surveyor, assumes liability for an injury or damage arising out of the insured's rendering or failure to render professional services, including those listed in **(1)** above and supervisory, inspection, architectural or engineering activities.

8. ELECTRONIC DATA LIABILITY

Copyright CNA All Rights Reserved. Includes copyrighted material of Insurance Services Office, Inc., with its permission.

A. Under **COVERAGES**, **Coverage A – Bodily Injury and Property Damage Liability**, the paragraph entitled **Exclusions** is amended to delete exclusion **p. Electronic Data** and replace it with the following:

This insurance does not apply to:

p. Access Or Disclosure Of Confidential Or Personal Information And Data-related Liability

Damages arising out of:

(1) any access to or disclosure of any person's or organization's confidential or personal information, including patents, trade secrets, processing methods, customer lists, financial information, credit card information, health information or any other type of nonpublic information; or

(2) the loss of, loss of use of, damage to, corruption of, inability to access, or inability to manipulate **electronic data** that does not result from physical injury to tangible property.

However, unless Paragraph **(1)** above applies, this exclusion does not apply to **damages** because of **bodily injury**.

This exclusion applies even if damages are claimed for notification costs, credit monitoring expenses, forensic expenses, public relation expenses or any other loss, cost or expense incurred by the **Named Insured** or others arising out of that which is described in Paragraph **(1)** or **(2)** above.

B. The following paragraph is added to **LIMITS OF INSURANCE**:

Subject to **5.** above, $100,000 is the most the Insurer will pay under **Coverage A** for all **damages** arising out of any one **occurrence** because of **property damage** that results from physical injury to tangible property and arises out of **electronic data**.

C. The following definition is added to **DEFINITIONS**:

Electronic data means information, facts or programs stored as or on, created or used on, or transmitted to or from computer software (including systems and applications software), hard or floppy disks, CD-ROMS, tapes, drives, cells, data processing devices or any other media which are used with electronically controlled equipment.

D. For the purpose of the coverage provided by this **ELECTRONIC DATA LIABILITY** Provision, the definition of **property damage** in **DEFINITIONS** is replaced by the following:

Property damage means:

a. Physical injury to tangible property, including all resulting loss of use of that property. All such loss of use shall be deemed to occur at the time of the physical injury that caused it;

b. Loss of use of tangible property that is not physically injured. All such loss of use shall be deemed to occur at the time of the **occurrence** that caused it; or

c. Loss of, loss of use of, damage to, corruption of, inability to access, or inability to properly manipulate **electronic data**, resulting from physical injury to tangible property. All such loss of **electronic data** shall be deemed to occur at the time of the **occurrence** that caused it.

For the purposes of this insurance, **electronic data** is not tangible property.

E. If Electronic Data Liability is provided at a higher limit by another endorsement attached to this policy, then the $100,000 limit provided by this **ELECTRONIC DATA LIABILITY** Provision is part of, and not in addition to, that higher limit.

9. ESTATES, LEGAL REPRESENTATIVES, AND SPOUSES

The estates, heirs, legal representatives and **spouses** of any natural person **Insured** shall also be insured under this policy; provided, however, coverage is afforded to such estates, heirs, legal representatives, and **spouses** only for

10020008170362254812358

Copyright CNA All Rights Reserved. Includes copyrighted material of Insurance Services Office, Inc., with its permission.

claims arising solely out of their capacity or status as such and, in the case of a **spouse**, where such **claim** seeks **damages** from marital community property, jointly held property or property transferred from such natural person **Insured** to such **spouse**. No coverage is provided for any act, error or omission of an estate, heir, legal representative, or **spouse** outside the scope of such person's capacity or status as such, provided however that the **spouse** of a natural person **Named Insured** and the **spouses** of members or partners of joint venture or partnership **Named Insureds** are **Insureds** with respect to such **spouses'** acts, errors or omissions in the conduct of the **Named Insured's** business.

10. EXPECTED OR INTENDED INJURY – EXCEPTION FOR REASONABLE FORCE

Under **COVERAGES**, **Coverage A – Bodily Injury and Property Damage Liability**, the paragraph entitled **Exclusions** is amended to delete the exclusion entitled **Expected or Intended Injury** and replace it with the following:

This insurance does not apply to:

Expected or Intended Injury

Bodily injury or **property damage** expected or intended from the standpoint of the **Insured**. This exclusion does not apply to **bodily injury** or **property damage** resulting from the use of reasonable force to protect persons or property.

11. GENERAL AGGREGATE LIMITS OF INSURANCE - PER PROJECT

A. For each construction project away from premises the **Named Insured** owns or rents, a separate Construction Project General Aggregate Limit, equal to the amount of the General Aggregate Limit shown in the Declarations, is the most the Insurer will pay for the sum of:

1. All **damages** under **Coverage A**, except **damages** because of **bodily injury** or **property damage** included in the **products-completed operations hazard**; and
2. All medical expenses under **Coverage C**,

that arise from **occurrences** or accidents which can be attributed solely to ongoing operations at that construction project. Such payments shall not reduce the General Aggregate Limit shown in the Declarations, nor the Construction Project General Aggregate Limit of any other construction project.

B. All:

1. **Damages** under **Coverage B**, regardless of the number of locations or construction projects involved;
2. **Damages** under **Coverage A**, caused by **occurrences** which cannot be attributed solely to ongoing operations at a single construction project, except **damages** because of **bodily injury** or **property damage** included in the **products-completed operations hazard**; and
3. Medical expenses under **Coverage C** caused by accidents which cannot be attributed solely to ongoing operations at a single construction project,

will reduce the General Aggregate Limit shown in the Declarations.

C. The limits shown in the Declarations for Each Occurrence, for Damage To Premises Rented To You and for Medical Expense continue to apply, but will be subject to either the Construction Project General Aggregate Limit or the General Aggregate Limit shown in the Declarations, depending on whether the **occurrence** can be attributed solely to ongoing operations at a particular construction project.

D. When coverage for liability arising out of the **products-completed operations hazard** is provided, any payments for **damages** because of **bodily injury** or **property damage** included in the **products-completed operations hazard** will reduce the Products-Completed Operations Aggregate Limit shown in the Declarations, regardless of the number of projects involved.

Copyright CNA All Rights Reserved. Includes copyrighted material of Insurance Services Office, Inc., with its permission.

E. If a single construction project away from premises owned by or rented to the **Insured** has been abandoned and then restarted, or if the authorized contracting parties deviate from plans, blueprints, designs, specifications or timetables, the project will still be deemed to be the same construction project.

F. The provisions of **LIMITS OF INSURANCE** not otherwise modified by this endorsement shall continue to apply as stipulated.

12. IN REM ACTIONS

A quasi in rem action against any vessel owned or operated by or for the **Named Insured**, or chartered by or for the **Named Insured**, will be treated in the same manner as though the action were in personam against the **Named Insured**.

13. INCIDENTAL HEALTH CARE MALPRACTICE COVERAGE

Solely with respect to **bodily injury** that arises out of a **health care incident**:

A. Under **COVERAGES**, **Coverage A – Bodily Injury and Property Damage Liability**, the paragraph entitled **Insuring Agreement** is amended to replace Paragraphs **1.b.(1)** and **1.b.(2)** with the following:

b. This insurance applies to **bodily injury** provided that the professional health care services are incidental to the **Named Insured's** primary business purpose, and only if:

(1) such **bodily injury** is caused by an **occurrence** that takes place in the **coverage territory**.

(2) the **bodily injury** first occurs during the **policy period**. All **bodily injury** arising from an **occurrence** will be deemed to have occurred at the time of the first act, error, or omission that is part of the **occurrence**; and

B. Under **COVERAGES**, **Coverage A – Bodily Injury and Property Damage Liability**, the paragraph entitled **Exclusions** is amended to:

i. add the following to the **Employers Liability** exclusion:

This exclusion applies only if the **bodily injury** arising from a **health care incident** is covered by other liability insurance available to the **Insured** (or which would have been available but for exhaustion of its limits).

ii. delete the exclusion entitled **Contractual Liability** and replace it with the following:

This insurance does not apply to:

Contractual Liability

the **Insured's** actual or alleged liability under any oral or written contract or agreement, including but not limited to express warranties or guarantees.

iii. add the following additional exclusions:

This insurance does not apply to:

Discrimination

any actual or alleged discrimination, humiliation or harassment, including but not limited to **claims** based on an individual's race, creed, color, age, gender, national origin, religion, disability, marital status or sexual orientation.

Dishonesty or Crime

Any actual or alleged dishonest, criminal or malicious act, error or omission.

Medicare/Medicaid Fraud

1002000817036225481235 9

Copyright CNA All Rights Reserved. Includes copyrighted material of Insurance Services Office, Inc., with its permission.

any actual or alleged violation of law with respect to Medicare, Medicaid, Tricare or any similar federal, state or local governmental program.

Services Excluded by Endorsement

Any **health care incident** for which coverage is excluded by endorsement.

C. DEFINITIONS is amended to:

i. add the following definitions:

Health care incident means an act, error or omission by the **Named Insured's employees** or **volunteer workers** in the rendering of:

a. **professional health care services** on behalf of the **Named Insured** or

b. Good Samaritan services rendered in an emergency and for which no payment is demanded or received.

Professional health care services means any health care services or the related furnishing of food, beverages, medical supplies or appliances by the following providers in their capacity as such but solely to the extent they are duly licensed as required:

a. Physician;

b. Nurse;

c. Nurse practitioner;

d. Emergency medical technician;

e. Paramedic;

f. Dentist;

g. Physical therapist;

h. Psychologist;

i. Speech therapist;

j. Other allied health professional; or

Professional health care services does not include any services rendered in connection with human clinical trials or product testing.

ii. delete the definition of **occurrence** and replace it with the following:

Occurrence means a **health care incident**. All acts, errors or omissions that are logically connected by any common fact, circumstance, situation, transaction, event, advice or decision will be considered to constitute a single **occurrence**;

iii. amend the definition of **Insured** to:

a. add the following:

the **Named Insured's employees** are **Insureds** with respect to:

(1) **bodily injury** to a co-**employee** while in the course of the co-**employee's** employment by the **Named Insured** or while performing duties related to the conduct of the **Named Insured's** business; and

Copyright CNA All Rights Reserved. Includes copyrighted material of Insurance Services Office, Inc., with its permission.

(2) **bodily injury** to a **volunteer worker** while performing duties related to the conduct of the **Named Insured's** business;

when such **bodily injury** arises out of a **health care incident**.

the **Named Insured's volunteer workers** are **Insureds** with respect to:

(1) **bodily injury** to a co-**volunteer worker** while performing duties related to the conduct of the **Named Insured's** business; and

(2) **bodily injury** to an **employee** while in the course of the **employee's** employment by the **Named Insured** or while performing duties related to the conduct of the **Named Insured's** business;

when such **bodily injury** arises out of a **health care incident**.

b. delete Subparagraphs **(a)**, **(b)**, **(c) and (d)** of Paragraph **2.a.(1)** of **WHO IS AN INSURED**.

D. The **Other Insurance** condition is amended to delete Paragraph **b.(1)** in its entirety and replace it with the following:

Other Insurance

b. Excess Insurance

(1) To the extent this insurance applies, it is excess over any other insurance, self insurance or risk transfer instrument, whether primary, excess, contingent or on any other basis, except for insurance purchased specifically by the **Named Insured** to be excess of this coverage.

14. JOINT VENTURES / PARTNERSHIP / LIMITED LIABILITY COMPANIES

WHO IS AN INSURED is amended to delete its last paragraph and replace it with the following:

No person or organization is an **Insured** with respect to the conduct of any current or past partnership, joint venture or limited liability company that is not shown as a **Named Insured** in the Declarations, except that if the **Named Insured** was a joint venturer, partner, or member of a limited liability company and such joint venture, partnership or limited liability company terminated prior to or during the **policy period**, such **Named Insured** is an **Insured** with respect to its interest in such joint venture, partnership or limited liability company but only to the extent that:

a. any offense giving rise to **personal and advertising injury** occurred prior to such termination date, and the **personal and advertising injury** arising out of such offense first occurred after such termination date;

b. the **bodily injury** or **property damage** first occurred after such termination date; and

c. there is no other valid and collectible insurance purchased specifically to insure the partnership, joint venture or limited liability company; and

If the joint venture, partnership or limited liability company is or was insured under a **consolidated (wrap-up) insurance program**, then such insurance will always be considered valid and collectible for the purpose of paragraph **c.** above. But this provision will not serve to exclude **bodily injury**, **property damage** or **personal and advertising injury** that would otherwise be covered under the **Contractors General Liability Extension Endorsement** provision entitled **WRAP-UP EXTENSION: OCIP, CCIP, OR CONSOLIDATED (WRAP-UP) INSURANCE PROGRAMS**. Please see that provision for the definition of **consolidated (wrap-up) insurance program**.

15. LEGAL LIABILITY – DAMAGE TO PREMISES / ALIENATED PREMISES / PROPERTY IN THE NAMED INSURED'S CARE, CUSTODY OR CONTROL

A. Under **COVERAGES, Coverage A – Bodily Injury and Property Damage Liability**, the paragraph entitled **Exclusions** is amended to delete exclusion **j. Damage to Property** in its entirety and replace it with the following:

This insurance does not apply to:

1002000817036225481236O

Copyright CNA All Rights Reserved. Includes copyrighted material of Insurance Services Office, Inc., with its permission.

j. Damage to Property

Property damage to:

(1) Property the **Named Insured** owns, rents, or occupies, including any costs or expenses incurred by you, or any other person, organization or entity, for repair, replacement, enhancement, restoration or maintenance of such property for any reason, including prevention of injury to a person or damage to another's property;

(2) Premises the **Named Insured** sells, gives away or abandons, if the **property damage** arises out of any part of those premises;

(3) Property loaned to the **Named Insured**;

(4) Personal property in the care, custody or control of the **Insured**;

(5) That particular part of real property on which the **Named Insured** or any contractors or subcontractors working directly or indirectly on the **Named Insured's** behalf are performing operations, if the **property damage** arises out of those operations; or

(6) That particular part of any property that must be restored, repaired or replaced because **your work** was incorrectly performed on it.

Paragraphs **(1), (3)** and **(4)** of this exclusion do not apply to **property damage** (other than damage by fire) to premises rented to the **Named Insured** or temporarily occupied by the **Named Insured** with the permission of the owner, nor to the contents of premises rented to the **Named Insured** for a period of 7 or fewer consecutive days. A separate limit of insurance applies to Damage To Premises Rented To You as described in **LIMITS OF INSURANCE**.

Paragraph **(2)** of this exclusion does not apply if the premises are **your work**.

Paragraphs **(3), (4), (5)** and **(6)** of this exclusion do not apply to liability assumed under a sidetrack agreement.

Paragraph **(6)** of this exclusion does not apply to **property damage** included in the **products-completed operations hazard**.

Paragraphs **(3)** and **(4)** of this exclusion do not apply to **property damage** to:

i. tools, or equipment the **Named Insured** borrows from others, nor

ii. other personal property of others in the **Named Insured's** care, custody or control while being used in the **Named Insured's** operations away from any **Named Insured's** premises.

However, the coverage granted by this exception to Paragraphs **(3)** and **(4)** does not apply to:

a. property at a job site awaiting or during such property's installation, fabrication, or erection;

b. property that is **mobile equipment** leased by an **Insured**;

c. property that is an **auto**, aircraft or watercraft;

d. property in transit; or

e. any portion of **property damage** for which the **Insured** has available other valid and collectible insurance, or would have such insurance but for exhaustion of its limits, or but for application of one of its exclusions.

A separate limit of insurance and deductible apply to such property of others. See **LIMITS OF INSURANCE** as amended below.

Copyright CNA All Rights Reserved. Includes copyrighted material of Insurance Services Office, Inc., with its permission.

B. Under **COVERAGES**, **Coverage A – Bodily Injury and Property Damage Liability**, the paragraph entitled **Exclusions** is amended to delete its last paragraph and replace it with the following:

Exclusions **c.** through **n.** do not apply to damage by fire to premises while rented to a **Named Insured** or temporarily occupied by a **Named Insured** with permission of the owner, nor to damage to the contents of premises rented to a **Named Insured** for a period of 7 or fewer consecutive days.

A separate limit of insurance applies to this coverage as described in **LIMITS OF INSURANCE**.

C. The following paragraph is added to **LIMITS OF INSURANCE**:

Subject to **5.** above, $25,000 is the most the Insurer will pay under **Coverage A** for **damages** arising out of any one **occurrence** because of the sum of all **property damage** to borrowed tools or equipment, and to other personal property of others in the **Named Insured's** care, custody or control, while being used in the **Named Insured's** operations away from any **Named Insured's** premises. The Insurer's obligation to pay such **property damage** does not apply until the amount of such **property damage** exceeds $1,000. The Insurer has the right but not the duty to pay any portion of this $1,000 in order to effect settlement. If the Insurer exercises that right, the **Named Insured** will promptly reimburse the Insurer for any such amount.

D. Paragraph **6.**, Damage To Premises Rented To You Limit, of **LIMITS OF INSURANCE** is deleted and replaced by the following:

6. Subject to Paragraph **5.** above, (the Each Occurrence Limit), the Damage To Premises Rented To You Limit is the most the Insurer will pay under **Coverage A** for **damages** because of **property damage** to any one premises while rented to the **Named Insured** or temporarily occupied by the **Named Insured** with the permission of the owner, including contents of such premises rented to the **Named Insured** for a period of 7 or fewer consecutive days. The Damage To Premises Rented To You Limit is the greater of:

a. $500,000; or

b. The Damage To Premises Rented To You Limit shown in the Declarations.

E. Paragraph **4.b.(1)(a)(ii)** of the **Other Insurance** Condition is deleted and replaced by the following:

(ii) That is property insurance for premises rented to the **Named Insured**, for premises temporarily occupied by the **Named Insured** with the permission of the owner; or for personal property of others in the **Named Insured's** care, custody or control;

16. LIQUOR LIABILITY

Under **COVERAGES**, **Coverage A – Bodily Injury and Property Damage Liability**, the paragraph entitled **Exclusions** is amended to delete the exclusion entitled **Liquor Liability**.

This **LIQUOR LIABILITY** provision does not apply to any person or organization who otherwise qualifies as an additional insured on this **Coverage Part**.

17. MEDICAL PAYMENTS

A. **LIMITS OF INSURANCE** is amended to delete Paragraph **7.** (the Medical Expense Limit) and replace it with the following:

7. Subject to Paragraph **5.** above (the Each Occurrence Limit), the Medical Expense Limit is the most the Insurer will pay under **Coverage C – Medical Payments** for all medical expenses because of **bodily injury** sustained by any one person. The Medical Expense Limit is the greater of:

(1) $15,000 unless a different amount is shown here: $N,NNN,NNN,NNN; or

(2) the amount shown in the Declarations for Medical Expense Limit.

10020008170362254812361

Copyright CNA All Rights Reserved. Includes copyrighted material of Insurance Services Office, Inc., with its permission.

B. Under **COVERAGES**, the **Insuring Agreement** of **Coverage C – Medical Payments** is amended to replace Paragraph **1.a.(3)(b)** with the following:

(b) The expenses are incurred and reported to the Insurer within three years of the date of the accident; and

18. NON-OWNED AIRCRAFT

Under **COVERAGES, Coverage A – Bodily Injury and Property Damage Liability**, the paragraph entitled **Exclusions** is amended as follows:

The exclusion entitled **Aircraft, Auto or Watercraft** is amended to add the following:

This exclusion does not apply to an aircraft not owned by any **Named Insured**, provided that:

1. the pilot in command holds a currently effective certificate issued by the duly constituted authority of the United States of America or Canada, designating that person as a commercial or airline transport pilot;

2. the aircraft is rented with a trained, paid crew to the **Named Insured**; and

3. the aircraft is not being used to carry persons or property for a charge.

19. NON-OWNED WATERCRAFT

Under **COVERAGES, Coverage A – Bodily Injury and Property Damage Liability**, the paragraph entitled **Exclusions** is amended to delete subparagraph **(2)** of the exclusion entitled **Aircraft, Auto or Watercraft**, and replace it with the following.

This exclusion does not apply to:

(2) a watercraft that is not owned by any **Named Insured**, provided the watercraft is:

(a) less than 75 feet long; and

(b) not being used to carry persons or property for a charge.

20. PERSONAL AND ADVERTISING INJURY –DISCRIMINATION OR HUMILIATION

A. Under **DEFINITIONS**, the definition of **personal and advertising injury** is amended to add the following tort:

Discrimination or humiliation that results in injury to the feelings or reputation of a natural person.

B. Under **COVERAGES**, **Coverage B – Personal and Advertising Injury Liability**, the paragraph entitled **Exclusions** is amended to:

1. delete the Exclusion entitled **Knowing Violation Of Rights Of Another** and replace it with the following:

This insurance does not apply to:

Knowing Violation of Rights of Another

Personal and advertising injury caused by or at the direction of the **Insured** with the knowledge that the act would violate the rights of another and would inflict **personal and advertising injury**. This exclusion shall not apply to discrimination or humiliation that results in injury to the feelings or reputation of a natural person, but only if such discrimination or humiliation is not done intentionally by or at the direction of:

(a) the **Named Insured**; or

(b) any **executive officer**, director, stockholder, partner, member or manager (if the **Named Insured** is a limited liability company) of the **Named Insured**.

2. add the following exclusions:

Copyright CNA All Rights Reserved. Includes copyrighted material of Insurance Services Office, Inc., with its permission.

This insurance does not apply to:

Employment Related Discrimination

Discrimination or humiliation directly or indirectly related to the employment, prospective employment, past employment or termination of employment of any person by any **Insured**.

Premises Related Discrimination

discrimination or humiliation arising out of the sale, rental, lease or sub-lease or prospective sale, rental, lease or sub-lease of any room, dwelling or premises by or at the direction of any **Insured**.

Notwithstanding the above, there is no coverage for fines or penalties levied or imposed by a governmental entity because of discrimination.

The coverage provided by this **PERSONAL AND ADVERTISING INJURY –DISCRIMINATION OR HUMILIATION** Provision does not apply to any person or organization whose status as an **Insured** derives solely from

Provision **1. ADDITIONAL INSURED** of this endorsement; or

attachment of an additional insured endorsement to this **Coverage Part**.

This **PERSONAL AND ADVERTISING INJURY –DISCRIMINATION OR HUMILIATION** Provision does not apply to any person or organization who otherwise qualifies as an additional insured on this **Coverage Part**.

21. PERSONAL AND ADVERTISING INJURY - CONTRACTUAL LIABILITY

A. Under **COVERAGES**, **Coverage B –Personal and Advertising Injury Liability**, the paragraph entitled **Exclusions** is amended to delete the exclusion entitled **Contractual Liability**.

B. Solely for the purpose of the coverage provided by this **PERSONAL AND ADVERTISING INJURY - CONTRACTUAL LIABILITY** provision, the following changes are made to the section entitled **SUPPLEMENTARY PAYMENTS – COVERAGES A AND B**:

1. Paragraph **2.d.** is replaced by the following:

d. The allegations in the **suit** and the information the Insurer knows about the offense alleged in such **suit** are such that no conflict appears to exist between the interests of the **Insured** and the interests of the indemnitee;

2. The first unnumbered paragraph beneath Paragraph **2.f.(2)(b)** is deleted and replaced by the following:

So long as the above conditions are met, attorneys fees incurred by the Insurer in the defense of that indemnitee, necessary litigation expenses incurred by the Insurer, and necessary litigation expenses incurred by the indemnitee at the Insurer's request will be paid as **defense costs**. Such payments will not be deemed to be **damages** for **personal and advertising injury** and will not reduce the limits of insurance.

C. This **PERSONAL AND ADVERTISING INJURY - CONTRACTUAL LIABILITY** Provision does not apply if **Coverage B –Personal and Advertising Injury Liability** is excluded by another endorsement attached to this **Coverage Part**.

This **PERSONAL AND ADVERTISING INJURY - CONTRACTUAL LIABILITY** Provision does not apply to any person or organization who otherwise qualifies as an additional insured on this **Coverage Part**.

22. PROPERTY DAMAGE – ELEVATORS

A. Under **COVERAGES**, **Coverage A – Bodily Injury and Property Damage Liability**, the paragraph entitled **Exclusions** is amended such that the **Damage to Your Product** Exclusion and subparagraphs **(3)**, **(4)** and **(6)** of the **Damage to Property** Exclusion do not apply to **property damage** that results from the use of elevators.

1002000817036225481236 2

Copyright CNA All Rights Reserved. Includes copyrighted material of Insurance Services Office, Inc., with its permission.

B. Solely for the purpose of the coverage provided by this **PROPERTY DAMAGE – ELEVATORS** Provision, the **Other Insurance** conditions is amended to add the following paragraph:

This insurance is excess over any of the other insurance, whether primary, excess, contingent or on any other basis that is Property insurance covering property of others damaged from the use of elevators.

23. SUPPLEMENTARY PAYMENTS

The section entitled **SUPPLEMENTARY PAYMENTS – COVERAGES A AND B** is amended as follows:

A. Paragraph **1.b.** is amended to delete the $250 limit shown for the cost of bail bonds and replace it with a $5,000. limit; and

B. Paragraph **1.d.** is amended to delete the limit of $250 shown for daily loss of earnings and replace it with a $1,000. limit.

24. UNINTENTIONAL FAILURE TO DISCLOSE HAZARDS

If the **Named Insured** unintentionally fails to disclose all existing hazards at the inception date of the **Named Insured's Coverage Part**, the Insurer will not deny coverage under this **Coverage Part** because of such failure.

25. WAIVER OF SUBROGATION - BLANKET

Under **CONDITIONS**, the condition entitled **Transfer Of Rights Of Recovery Against Others To Us** is amended to add the following:

The Insurer waives any right of recovery the Insurer may have against any person or organization because of payments the Insurer makes for injury or damage arising out of:

1. the **Named Insured's** ongoing operations; or

2. **your work** included in the **products-completed operations hazard**.

However, this waiver applies only when the **Named Insured** has agreed in writing to waive such rights of recovery in a written contract or written agreement, and only if such contract or agreement:

1. is in effect or becomes effective during the term of this **Coverage Part**; and

2. was executed prior to the **bodily injury**, **property damage** or **personal and advertising injury** giving rise to the **claim**.

26. WRAP-UP EXTENSION: OCIP, CCIP, OR CONSOLIDATED (WRAP-UP) INSURANCE PROGRAMS

Note: The following provision does not apply to any public construction project in the state of Oklahoma, nor to any construction project in the state of Alaska, that is not permitted to be insured under a **consolidated (wrap-up) insurance program** by applicable state statute or regulation.

If the endorsement **EXCLUSION – CONSTRUCTION WRAP-UP** is attached to this policy, or another exclusionary endorsement pertaining to Owner Controlled Insurance Programs (O.C.I.P.) or Contractor Controlled Insurance Programs (C.C.I.P.) is attached, then the following changes apply:

A. The following wording is added to the above-referenced endorsement:

With respect to a **consolidated (wrap-up) insurance program** project in which the **Named Insured** is or was involved, this exclusion does not apply to those sums the **Named Insured** become legally obligated to pay as **damages** because of:

1. **Bodily injury**, **property damage**, or **personal or advertising injury** that occurs during the **Named Insured's** ongoing operations at the project, or during such operations of anyone acting on the **Named Insured's** behalf; nor

Copyright CNA All Rights Reserved. Includes copyrighted material of Insurance Services Office, Inc., with its permission.

2. **Bodily injury** or **property damage** included within the **products-completed operations hazard** that arises out of those portions of the project that are not **residential structures**.

B. Condition **4. Other Insurance** is amended to add the following subparagraph **4.b.(1)(c)**:

This insurance is excess over:

(c) Any of the other insurance whether primary, excess, contingent or any other basis that is insurance available to the **Named Insured** as a result of the **Named Insured** being a participant in a **consolidated (wrap-up) insurance program**, but only as respects the **Named Insured's** involvement in that **consolidated (wrap-up) insurance program**.

C. **DEFINITIONS** is amended to add the following definitions:

Consolidated (wrap-up) insurance program means a construction, erection or demolition project for which the prime contractor/project manager or owner of the construction project has secured general liability insurance covering some or all of the contractors or subcontractors involved in the project, such as an Owner Controlled Insurance Program (O.C.I.P.) or Contractor Controlled Insurance Program (C.C.I.P.).

Residential structure means any structure where 30% or more of the square foot area is used or is intended to be used for human residency, including but not limited to:

1. single or multifamily housing, apartments, condominiums, townhouses, co-operatives or planned unit developments; and

2. the common areas and structures appurtenant to the structures in paragraph **1.** (including pools, hot tubs, detached garages, guest houses or any similar structures).

However, when there is no individual ownership of units, **residential structure** does not include military housing, college/university housing or dormitories, long term care facilities, hotels or motels. **Residential structure** also does not include hospitals or prisons.

This **WRAP-UP EXTENSION: OCIP, CCIP, OR CONSOLIDATED (WRAP-UP) INSURANCE PROGRAMS** Provision does not apply to any person or organization who otherwise qualifies as an additional insured on this **Coverage Part**.

All other terms and conditions of the Policy remain unchanged.

This endorsement, which forms a part of and is for attachment to the Policy issued by the designated Insurers, takes effect on the effective date of said Policy at the hour stated in said Policy, unless another effective date is shown below, and expires concurrently with said Policy.

CNA PARAMOUNT

Blanket Additional Insured - Owners, Lessees or Contractors - with Products-Completed Operations Coverage Endorsement

This endorsement modifies insurance provided under the following:

COMMERCIAL GENERAL LIABILITY COVERAGE PART

It is understood and agreed as follows:

I. **WHO IS AN INSURED** is amended to include as an **Insured** any person or organization whom you are required by **written contract** to add as an additional insured on this **Coverage Part**, but only with respect to liability for **bodily injury**, **property damage** or **personal and advertising injury** caused in whole or in part by your acts or omissions, or the acts or omissions of those acting on your behalf:

A. In the performance of your ongoing operations subject to such **written contract**; or

B. In the performance of **your work** subject to such **written contract**, but only with respect to **bodily injury** or **property damage** included in the **products-completed operations hazard**, and only if:

1. The **written contract** requires you to provide the additional insured such coverage; and

2. This **Coverage Part** provides such coverage; and

C. Subject always to the terms and conditions of this policy, including the limits of insurance, the Insurer will not provide such additional insured with:

1. Coverage broader than what you are required to provide by the **written contract**; or

2. A higher limit of insurance than what you are required to provide by the **written contract**.

Any coverage granted by this Paragraph **I.** shall apply solely to the extent permissible by law.

II. If the written contract requires additional insured coverage under the 07-04 edition of CG2010 or CG2037, then paragraph **I.** above is deleted in its entirety and replaced by the following:

WHO IS AN INSURED is amended to include as an **Insured** any person or organization whom you are required by **written contract** to add as an additional insured on this **Coverage Part**, but only with respect to liability for **bodily injury**, **property damage** or **personal and advertising injury** caused in whole or in part by your acts or omissions, or the acts or omissions of those acting on your behalf:

A. In the performance of your ongoing operations subject to such **written contract**; or

B. In the performance of **your work** subject to such **written contract**, but only with respect to **bodily injury** or **property damage** included in the **products-completed operations hazard**, and only if:

1. The **written contract** requires you to provide the additional insured such coverage; and

2. This **Coverage Part** provides such coverage.

III. But if the **written contract** requires:

A. Additional insured coverage under the 11-85 edition, 10-93 edition, or 10-01 edition of CG2010, or under the 10-01 edition of CG2037; or

B. Additional insured coverage with "arising out of" language;

then paragraph **I.** above is deleted in its entirety and replaced by the following:

WHO IS AN INSURED is amended to include as an **Insured** any person or organization whom you are required by **written contract** to add as an additional insured on this **Coverage Part**, but only with respect to liability for **bodily injury**, **property damage** or **personal and advertising injury** arising out of **your work** that is subject to such **written contract**.

10020008170362254812364

Copyright CNA All Rights Reserved.

IV. But if the **written contract** requires additional insured coverage to the greatest extent permissible by law, then paragraph **I.** above is deleted in its entirety and replaced by the following:

WHO IS AN INSURED is amended to include as an **Insured** any person or organization whom you are required by **written contract** to add as an additional insured on this **Coverage Part**, but only with respect to liability for **bodily injury**, **property damage** or **personal and advertising injury** arising out of **your work** that is subject to such **written contract**.

V. The insurance granted by this endorsement to the additional insured does not apply to **bodily injury**, **property damage**, or **personal and advertising injury** arising out of:

A. The rendering of, or the failure to render, any professional architectural, engineering, or surveying services, including:

1. The preparing, approving, or failing to prepare or approve maps, shop drawings, opinions, reports, surveys, field orders, change orders or drawings and specifications; and

2. Supervisory, inspection, architectural or engineering activities; or

B. Any premises or work for which the additional insured is specifically listed as an additional insured on another endorsement attached to this **Coverage Part**.

VI. Under **COMMERCIAL GENERAL LIABILITY CONDITIONS,** the Condition entitled **Other Insurance** is amended to add the following, which supersedes any provision to the contrary in this Condition or elsewhere in this **Coverage Part**:

Primary and Noncontributory Insurance

With respect to other insurance available to the additional insured under which the additional insured is a named insured, this insurance is primary to and will not seek contribution from such other insurance, provided that a **written contract** requires the insurance provided by this policy to be:

1. Primary and non-contributing with other insurance available to the additional insured; or

2. Primary and to not seek contribution from any other insurance available to the additional insured.

But except as specified above, this insurance will be excess of all other insurance available to the additional insured.

VII. Solely with respect to the insurance granted by this endorsement, the section entitled **COMMERCIAL GENERAL LIABILITY CONDITIONS** is amended as follows:

The Condition entitled **Duties In The Event of Occurrence, Offense, Claim or Suit** is amended with the addition of the following:

Any additional insured pursuant to this endorsement will as soon as practicable:

1. Give the Insurer written notice of any **claim**, or any **occurrence** or offense which may result in a **claim**;

2. Send the Insurer copies of all legal papers received, and otherwise cooperate with the Insurer in the investigation, defense, or settlement of the **claim**; and

3. Make available any other insurance, and endeavor to tender the defense and indemnity of any **claim** to any other insurer or self-insurer, whose policy or program applies to a loss that the Insurer covers under this **coverage part**. However, if the **written contract** requires this insurance to be primary and non-contributory, this paragraph **3.** does not apply to other insurance under which the additional insured is a named insured.

The Insurer has no duty to defend or indemnify an additional insured under this endorsement until the Insurer receives written notice of a **claim** from the additional insured.

Copyright CNA All Rights Reserved.

Blanket Additional Insured - Owners, Lessees or Contractors - with Products-Completed Operations Coverage Endorsement

VIII. Solely with respect to the insurance granted by this endorsement, the section entitled **DEFINITIONS** is amended to add the following definition:

Written contract means a written contract or written agreement that requires you to make a person or organization an additional insured on this **Coverage Part**, provided the contract or agreement:

A. Was executed prior to:

1. The **bodily injury** or **property damage**; or

2. The offense that caused the **personal and advertising injury**;

for which the additional insured seeks coverage; and

B. Is still in effect at the time of the **bodily injury** or **property damage occurrence** or **personal and advertising injury** offense.

All other terms and conditions of the Policy remain unchanged.

This endorsement, which forms a part of and is for attachment to the Policy issued by the designated Insurers, takes effect on the effective date of said Policy at the hour stated in said Policy, unless another effective date is shown below, and expires concurrently with said Policy.

10020008170362254812365

Copyright CNA All Rights Reserved.

WAIVER OF OUR RIGHT TO RECOVER FROM OTHERS ENDORSEMENT

We have the right to recover our payments from anyone liable for an injury covered by this policy. We will not enforce our right against the person or organization named in the Schedule. (This agreement applies only to the extent that you perform work under a written contract that requires you to obtain this agreement from us.)

This agreement shall not operate directly or indirectly to benefit anyone not named in the Schedule.

This Agreement, between Ferran Services & Contracting, Inc. hereinafter called Seller and Wharton-Smith inc., the Purchaser, we respectfully offer a Mechanical proposal per plans & specifications (*Dated 9/30/2024)*, AIA or equal contract for work at

Port Orange Public Utilities Field Ops Bldg.

for the cost of $698,984

*Additive alternate #1: For Mechanical BIM please add $5,950
*Additive alternate #2: For Duct Leak Testing please add $2,162
*Additive alternate #3: For bond rate please use 2% or $13,290

WORK DESCRIPTION:

- Furnish and Installation of the following:
  - **(3)** DX systems (25-ton, 2.5-ton & 1-ton)
  - **(11)** Variable Air Volume Terminal Units
  - **(108)** Diffusers
  - **(7)** Fire dampers with access doors
  - **(2)** Gravity backdraft dampers
  - **(2)** Inline exhaust fans
  - **(3)** Propellor exhaust fans
  - **(6)** HVLS exhaust fans
  - **(10)** Hurricane rated louvers
  - **(80)** Round Manual volume dampers
  - **(2)** Unit heaters
  - Metal rectangular duct **(9,259 lbs.)**
    - All ducts to be G-90 GALVANIZED SHEETMETAL and constructed to SMACNA duct construction- ASTM Standards.
    - Ducts constructed to 2”, 3” and 4” WATER GAUGE built to Min. 26GA.
    - Single wall medium pressure spiral seam duct and. Elbows 12” and smaller are stamped, larger are gored, duct 16”ID and larger are flanged, smaller are slip fit connections, and taps installed.
    - Turning vanes included in all 90-degree elbows. Double wall type.
    - All seams to be Pittsburg Locke.

- Galvanized Spiral Duct (**404 lbs**)
- Snaplock and flex duct for low pressure duct
- Duct and pipe insulation
  - EA (Between isolation damper and penetration of building exterior), SA, RA & OA duct will receive 2" 1.5lb Fiberglass Blanket insulation with Fab & Mastic; Exposed duct in Mech room will receive 2" 3lb Fiberglass Board insulation finished with 0.032 Aluminum Jacketing.
  - Refrigerant suction line will receive 1" Flexible Elastomeric insulation finished with 0.032 Aluminum Jacketing.
  - CD piping will receive ¾" Flexible Elastomeric insulation finished with 0.032 Aluminum Jacketing.
- **(30)** Plastic equipment labels
- Refrigerant piping
- **Controls:**
  - Furnish and install one (1) JACE 8000 Series with Niagara4 HTML Supervisory Controller to host the entire systems Graphics, Scheduling, Monitoring, Setpoint changes and Night setback features; this supervisor controller comes with BACnet MS/TP protocol, a web user interface, programming software and Embedded Configuration Tools
  - Included is an operator workstation as specified
  - Furnish and install system router and materials for a local area BACnet communication network and connect to the owner's LAN to allow secure access to the system
  - Furnish and install KMC BACnet DDC Controllers for (2) Air Handling Units (AHU 1 & 2) and include all temperature, humidity, static pressure sensors and control points as shown in mechanical controls print M500
  - Furnish and control (1) Outside Air Flow Monitor Station (AFS Installation by MC)
  - Furnish and control (2) Outside Air and (1) return damper with actuators.
  - Furnish and install wall mounted Net-Sensors with temperature, humidity, setpoint and data port for each AHU as shown on M500
  - Furnish and Install (11) KMC BACnet VAV controllers for each VAV box
  - Furnish and install (11) NetSensors with temperature adjustment LCD Display and data port in locations as shown on drawings M101A and M101B

GENERAL CONDITIONS & WARRANTY

1. It is understood that the Seller may have to remove certain old, existing equipment and materials in order to perform the work described. At the Seller's option, this material will be deemed the property of the Seller and will be promptly removed from the premises.
2. Purchaser agrees to provide Seller free access to the premises so that he may accomplish his work without undue hindrance or delay.
3. Purchaser shall notify the Seller in writing within thirty (30) days of installation of any defects in either the installation or in the equipment itself. Failure to notify Seller within this period of time shall constitute an acceptance of the equipment and work as in compliance with the Contract and a waiver of any and all claims for defect or deficiency.
4. In the event the Purchaser is not the owner of the premises, he is obligated to so state this before signing and provide evidence, including a copy of the lease and/or written permission from the building's owner, acceptable to the Seller, of his authority to proceed. Purchaser agrees to hold the Seller harmless from any claims or damages sought by the building owner, for work done under the authority of this contract.
5. Seller will, if not in privity with the owner and accordance with Chapter 713 of the Florida Statutes, serve "Notice to Owner" and, if account not paid, will file a Claim of Lien on the property.
6. It is understood and agreed that the Seller is liable only for its own work, and not adjacent existing work or services supplied by the purchaser. Should government or insurance authorities require other existing work to be upgraded to current code requirements it will be done only upon the Purchaser's authorization and at Purchaser's sole expense.
7. All equipment sold under this agreement, whether affixed to realty so as to become part thereof, or not, shall be deemed personal property and severable without injury to the freehold, and the title thereto shall remain in Seller until the entire purchase price is paid to the Seller in Cash and Purchaser agrees to perform all acts necessary to perfect and maintain the above title.
8. On default of any payment, all equipment and materials may at the option of the Seller, be removed and held or sold by Seller at public or private sale; Seller being permitted to purchase at any sale. If unpaid balance is not satisfied by the net proceeds of any such sale, then the sum of the deficiency shall become due and payable by Purchaser to Seller as damages for breach of the contract: this provision shall not be construed as an addition to and not in limitation of any other right of Seller.
9. It is understood and agreed that the Seller is not to be held liable for any consequential damages or losses resulting from the installation, operation, or use of the products and materials furnished or installed by the Seller. It is further understood that the Seller is not responsible or liable for any loss or damage which is incurred as a result of any delay, in provision or availability of labor, material or equipment due to strikes, storms, fires, floods, or any other act of God, or any other cause, whatsoever, beyond the control of the Seller.
10. Should a project condition pose a safety or health hazard to an employee of Seller, Seller reserves the right to discontinue work until the safety or health hazard has been eliminated or to terminate work, either option at Seller's non-reviewable discretion. In the event Seller elects to discontinue work, Seller shall be entitled to reasonable demobilization and re-mobilization expenses in addition to regular contract compensation. Should Seller elect to terminate its work, Seller shall be entitled to Contract compensation to date of termination.
11. This constitutes the entire contract affecting this purchase, and no other understanding exists. The masculine includes the feminine, the singular includes the plural.
12. In the event a balance is unpaid, Purchaser agrees to pay Seller all costs and expenses of collection, suit or other legal action, including actual attorney's fee, and shall also pay cost, expenses and actual attorney's fees incurred on appeal or in any administrative or arbitration proceedings brought as a result of the commercial relationship between them.
13. The service charge is computed by a periodic rate of 1.5% per month which is an ANNUAL PERCENTAGE RATE OF 18% applied to the previous Unpaid Balance, less any previously billed Service Charge which has not been paid and less any current credits in excess of the previously billed Service Charge which has not been paid.
14. Purchaser waives any and all privileges and rights which it may have under Chapter 47, Florida Statutes, relating to venue, as it now exists or may hereafter be amended or construed and under any other applicable statue. Purchaser and Seller agree that any legal action brought by either to ensure

FERRAN

payment or compliance with terms and conditions of sale shall be brought and tried without jury in the appropriate court in the County of Seller's choice: Orange, Volusia or Brevard County, Florida.

15. Orders placed as a result of quotations made by Seller are subject to the Terms and Conditions herein, which shall prevail over any inconsistent terms of Purchaser's purchase order.

16. Price extensions, when made, are for Purchaser's convenience only, and they, as well as any mathematical, stenographic or clerical errors are subject to correction. Prices shown include any sales; excise, or other governmental charge paid by Seller to Federal, State, or local authority. Sales tax is not charged to the PURCHASER when work is done on real property; the SELLER has paid all applicable state and local sales tax on any material used. Sales tax must be collected from the PURCHASER on the full selling price, including installation charges, for work done or tangible personal property.

17. WARRANTY WORK WILL BE PERFORMED MONDAY-FRIDAY - 8AM TO 5PM. Regular service calls carry a 1-year parts and labor warranty. Labor warranty on installation of systems or equipment vary according to the type of installation. Materials are warranted and guaranteed only the extent and in the manner warranted and guaranteed by the original manufacturer of such materials and then only to the extent that is reasonable and that the Purchaser is able to enforce such warranty or guarantee against the manufacturer of such materials. Seller's warranty is limited to the replacement or repair of such parts as may be warranted by manufacturer, which parts are unable to perform their assigned functions. Expendable items such as filters and fuses are not included. Plumbing drain stoppages are not defects. DEFECTS CAUSED BY IMPROPER MAINTENANCE OR DAMAGE CAUSED BY PURCHASER OR ITS EMPLOYEES OR AGENTS IS NOT WARRANTED. Where equipment is being provided with longer than (1) year manufacturer's warranty, the Seller extends to the Purchaser the additional warranty provided by the manufacturer.

ALL WARRANTIES ARE EXCLUDED, WHETHER EXPRESSED OR IMPLIED BY OPERATION OF LAW OR OTHERWISE, INCLUDING ALL IMPLIED WARRANTIES OR MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. SELLER SHALL NOT BE LIABLE (DIRECTLY OR INDIRECTLY) UNDER ANY CIRCUMSTANCES FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES ARISIING OR RESULTING FROM A BREACH OF WARRANTY UNDER THE SALE, HANDLING OR USE OF THE MATERIALS SOLD. SELLER'S LIABILITY HEREUNDER AND PURCHASER'S EXCLUSIVE REMEDIES HEREUNDER, EITHER FOR BREACH OF WARRANTY OR FOR NEGLIGENCE, ARE EXPRESSLY LIMITED TO THE GIVING OF CREDIT OR REPLACEMENT OR REPAIR. SELLER'S RESPONSIBILITY TO GIVE CREDIT OR REPLACEMENT IS LIMITED TO THE EXTENT THAT SELLER IS ABLE TO OBTAIN EQUIVALENT CREDIT OR REPLACEMENT FROM THE ORIGINAL MANUFACTURER OF SUCH MATERIALS. NO CREDIT FOR MATERIALS RETURNED BY PURCHASER SHALL BE GIVEN WITHOUT SELLER'S WRITTEN AUTHORIZATION

6. MECHANICAL PERMIT OBTAIN BY GA-TER AIR, INC SHALL ONLY APPLY TO DIVISION 23 -HVAC SCOPE OF WORK.
7. EQUIPMENT USE TO CONDITION SPACE DURING THE CONSTRUCTION PROCESS IS NOT RECOMMENDED.

TERMS & CONDITIONS

In the event payment is not made promptly in accordance with agreed terms it shall be the seller's option to charge a service charge not exceeding two (2%) percent per month. The first service charge becomes due 15 days from the date of the billing of our amount due on the job. In the event of collection by the attorney, all attorneys, court costs and other legal fees shall be borne by the buyer in nonpayment, purchaser agrees to allow seller on premises to remove equipment installed. The sales agreement shall be binding upon the heirs, successor, or assigns of the parties hereto.

It is understood that the title to all products and equipment covered by the contract remains solely in the seller until the entire purchase price has been paid in full and the manner of installation and/or attachment to any equipment and/or any portion of the building structure in which the installation is made shall not in any manner jeopardize the seller's title.

If compliance with any building ordinance, rule, regulation, or permit in any state, county or city requires changes or additions to be made in premises or buildings, where installation is to be made, such changes or additions shall be made by buyer at his own expense. All purchase orders, contracts, and directives from the buyer are hereby made subject to the provisions of this sales agreement.

The seller's failure to object to any provisions contained in buyers purchase orders, contracts, and directives shall not be deemed a waiver of the terms and conditions of this sales agreement. No written or verbal statements, agreement or guarantees other than those contained herein shall be binding upon the seller. We agree that any claim or dispute between the parties herein shall be resolved by arbitration in the state of Florida, in Volusia County, City of Deland.

Extended delay: In the event the project is delayed for a period exceeding 45 calendar days the buyer assumes all additional charges included but not limited to storage, interest cost, tool rentals, & additional labor. An administration fee of 0.005% of the contract balance shall be collected monthly.

Warranty:

All electrical apparatus, controls, motors, fans, thermostats, gas burners and oil burners are guaranteed only by their respective manufacturer's limited warranty against defects in materials or workmanship by the equipment manufacturer as so stated in their warranty certificate, if applicable. The seller is not to be held responsible for normal wear and tear or any damage arising out of neglect, misuse, abuse, failure to use proper supplies and materials in the operation of equipment, any unit that has been tampered with, altered in any way, or which has the serial numbers altered, defaced or removed. It is further understood and agreed that the seller is not to be held responsible for any failure in operation of performance which may result from the connection to or operation of installed equipment in conjunction with any other equipment furnished by the buyer at the time of original installation or added subsequently. Buyer or customer assumes all freight charges on warranty parts. There is no warranty or guarantee on used equipment, units and parts sold by the seller. Seller has no temperature or humidity guarantee beyond (ARI) American Refrigeration institute Standards nor from conditions arising from conditions created by current user out of the scope of design. Seller shall not be held liable for any issues involving replacement warranty parts that are not available from Manufacturer.

Service:

The seller agrees to provide free advice on the operations of the specified equipment installed by them. This agreement does not cover service necessitated when no part of the equipment is at fault, for example, power surges, the failure on the part of the owner or user to maintain, failure on the part of the owner or user to set thermostat at a temperature calling for heat or cool, malfunction of equipment due to erratic voltage, dirty filters, lightning damage or similar causes. In such cases a charge will be made by the seller for services rendered. All warranty services shall be during normal working hours, during normal working days. After hours and holiday service will be charged at the regular fee for such service. The seller is not responsible for service resulting from water or condensation getting into oil tank. Normal out of warranty service work carries a 30-day labor guarantee, but only on the exact work performed. The dollar amount of guaranteed labor during the first 30 days shall not exceed the original amount paid by the customer.

Insurance: No claims shall be filed with our insurance company without first reporting the incident to the seller.

PAYMENTS: A initial draw of 25% is due at contract signing with remaining three draws (3) on a progress bill format. An invoice and/or application for payment shall be submitted every 21 days during the progression of the project and payment shall be received by the seller within 10 days.

NO CREDIT CARD PAYMENTS ARE ACCEPTED. The seller agrees to issue all forms of payment with a paper check for a U.S bank in U.S dollar currency.

GRAND TOTAL:

SEVEN HUNDRED TENTY-EIGHT THOUSAND SEVEN HUNDRED DOLLARS----------$ 728, 700.00

NOTES:

PROVIDE WITH THE FOLLOWING:
1. BACKDRAFT DAMPER
2. SPEED CONTROLLER
3. VIBRATION ISOLATOR
4. DISCONNECT SWITCH

AIR DUCTS AND DEVICES:

1028 LF- Sheetmetal Duct Work Assorted Sizes.
108 Piece- Metal-Aire (or equivalent) white finish, mounting hardware, assorted sizes.

CONTROLS: ABC Control Package or equivalent.

EXCLUSIONS:

A. Concrete cutting, core drilling, envelope penetrations.
B. Protective masking/ covering.
C. Plans, drawings, private inspections.
D. Third party inspections.
E. Waterproofing.
F. Drywall repairs or Painting.
G. Engineering, testing, or designs.

CLARIFICATIONS:

1. HVAC DIVISION 23 SHALL BE GIVEN PRIORITY ACCESS TO ALL SPACES OVER OTHER TRADES.
2. WORK TO BE PERFORMED USING MULTIPLE ELECTRIC SCISSORLIFTS DURING PROJECT, NO SCAFFOLD WORK SHALL BE PERFORMED.
3. MECHANICAL CONTRACTOR IS NOT RESPONSIBLE FOR DELAYS DUE TO SUPPLY CHAIN ISSUES.
4. MATERIAL & EQUIPMENT STORAGE PERMITTED ONSITE.
5. MATERIALS LISTED ARE SUBJECT TO “EQUIVALENT” MATERIAL PROVIDED DEPENDING ON AVAILABILITY.
6. MECHANICAL PERMIT OBTAIN BY GA-TER AIR, INC SHALL ONLY APPLY TO DIVISION 23 -HVAC SCOPE OF WORK.
7. EQUIPMENT USE TO CONDITION SPACE DURING THE CONSTRUCTION PROCESS IS NOT RECOMMENDED.

TERMS & CONDITIONS

In the event payment is not made promptly in accordance with agreed terms it shall be the seller's option to charge a service charge not exceeding two (2%) percent per month. The first service charge becomes due 15 days from the date of the billing of our amount due on the job. In the event of collection by the attorney, all attorneys, court costs and other legal fees shall be borne by the buyer in nonpayment, purchaser agrees to allow seller on premises to remove equipment installed. The sales agreement shall be binding upon the heirs, successor, or assigns of the parties hereto.

It is understood that the title to all products and equipment covered by the contract remains solely in the seller until the entire purchase price has been paid in full and the manner of installation and/or attachment to any equipment and/or any portion of the building structure in which the installation is made shall not in any manner jeopardize the seller's title.

If compliance with any building ordinance, rule, regulation, or permit in any state, county or city requires changes or additions to be made in premises or buildings, where installation is to be made, such changes or additions shall be made by buyer at his own expense. All purchase orders, contracts, and directives from the buyer are hereby made subject to the provisions of this sales agreement.

The seller's failure to object to any provisions contained in buyers purchase orders, contracts, and directives shall not be deemed a waiver of the terms and conditions of this sales agreement. No written or verbal statements, agreement or guarantees other than those contained herein shall be binding upon the seller. We agree that any claim or dispute between the parties herein shall be resolved by arbitration in the state of Florida, in Volusia County, City of Deland.

Extended delay: In the event the project is delayed for a period exceeding 45 calendar days the buyer assumes all additional charges included but not limited to storage, interest cost, tool rentals, & additional labor. An administration fee of 0.005% of the contract balance shall be collected monthly.

Warranty:

All electrical apparatus, controls, motors, fans, thermostats, gas burners and oil burners are guaranteed only by their respective manufacturer's limited warranty against defects in materials or workmanship by the equipment manufacturer as so stated in their warranty certificate, if applicable. The seller is not to be held responsible for normal wear and tear or any damage arising out of neglect, misuse, abuse, failure to use proper supplies and materials in the operation of equipment, any unit that has been tampered with, altered in any way, or which has the serial numbers altered, defaced or removed. It is further understood and agreed that the seller is not to be held responsible for any failure in operation of performance which may result from the connection to or operation of installed equipment in conjunction with any other equipment furnished by the buyer at the time of original installation or added subsequently. Buyer or customer assumes all freight charges on warranty parts. There is no warranty or guarantee on used equipment, units and parts sold by the seller. Seller has no temperature or humidity guarantee beyond (ARI) American Refrigeration institute Standards nor from conditions arising from conditions created by current user out of the scope of design. Seller shall not be held liable for any issues involving replacement warranty parts that are not available from Manufacturer.

Service:

The seller agrees to provide free advice on the operations of the specified equipment installed by them. This agreement does not cover service necessitated when no part of the equipment is at fault, for example, power surges, the failure on the part of the owner or user to maintain, failure on the part of the owner or user to set thermostat at a temperature calling for heat or cool, malfunction of equipment due to erratic voltage, dirty filters, lightning damage or similar causes. In such cases a charge will be made by the seller for services rendered. All warranty services shall be during normal working hours, during normal working days. After hours and holiday service will be charged at the regular fee for such service. The seller is not responsible for service resulting from water or condensation getting into oil tank. Normal out of warranty service work carries a 30-day labor guarantee, but only on the exact work performed. The dollar amount of guaranteed labor during the first 30 days shall not exceed the original amount paid by the customer.

Insurance: No claims shall be filed with our insurance company without first reporting the incident to the seller.

PAYMENTS: A initial draw of 25% is due at contract signing with remaining three draws (3) on a progress bill format. An invoice and/or application for payment shall be submitted every 21 days during the progression of the project and payment shall be received by the seller within 10 days.

NO CREDIT CARD PAYMENTS ARE ACCEPTED. The seller agrees to issue all forms of payment with a paper check for a U.S bank in U.S dollar currency.

GRAND TOTAL:

SEVEN HUNDRED TENTY-EIGHT THOUSAND SEVEN HUNDRED DOLLARS----------$ 728, 700.00

Subcontractor Bid Form-Electrical

Project: Port Orange Public Utilities Field Operations Facility

To: Wharton-Smith, Inc., 750 Monroe Road, Sanford, FL 32771
(407) 321-8410; comest@whartonsmith.com

Name of Bidder:	Carter Electric Company INC
Scope of Work:	Electrical, Low Voltage & Fire Alarm

The Undersigned, hereinafter called "Bidder", having visited the site of the proposed project and familiarized themselves with the local conditions, nature and extent of the work, and having carefully examined the Subcontractor Bid Manual, Subcontract Form, General Conditions, Supplementary Conditions, Plans and Specifications and other Contract Documents, with the Bond requirements herein, proposes to furnish all labor, materials, equipment and other items, facilities and services for the proper execution and completion of: Port Orange Public Utilities Field Operations Facility in full accordance with the Contract Documents and, if awarded the Contract, to complete the said work within the time limits specified for the following lump sum price.

Electrical subcontractors are to provide a **complete turnkey proposal** including, but not be limited to: Low voltage/technology systems for complete and operable Access Control, CCTV, Security, DAS/BDA, Lightning Protection, Fire Alarm, Emergency Generator, etc., for complete and operable systems.

PART 1: PRICING

(1.1) Total Electrical Base Bid

Amount in Figures:	$ 1,679,495.00
Amount in Words:	$ One Million Six Hundred & Seventy Nine Thousand Four Hundred and Ninety Five

Provide accounting breakout prices as follows (to be included in the above base bid):

Electrical (incl. fire alarm)	$ 1,225,949.00
Technology Voice/Data (premises distr., cabling, tray, devices, terminations)	$166,350.00
Access Control System	$ 114,426.00
CCTV System	$ 39,085.00
DAS/BDA Systems	$ 77,000.00
A/V Systems	$ n/a
Emergency Generator	$ 133,685.00
TOTAL	$ 1,679,495.00

Continued Next Page

(1.2) Alternates (Voluntary)

N/A	$
	$
	$

(1.3) Owner Direct Purchase (value of all purchases exceeding **$50,000**)

Material/Equipment Types:	GEAR, LIGHTING, GENERATOR
Amount:	$ 310,954.00

(1.4) Value Engineering (We encourage voluntary VE/cost savings options)

1	N/A AT THIS TIME	$
2		$
3		$

(1.5) MWBE Participation

MWBE	$ N/A
LDB	$ N/A
VBE	$ N/A

(1.6) Bond Rate

In the event a Performance & Payment Bond is required, indicate in the space below the **percentage** to be added to the proposal.

Bond Rate %:	1.4

(1.7) Long Lead Durations (indicate durations for any long lead equip. 24 weeks +)

Item	Duration (wks)	Item	Duration (wks)
MDP	15-20		
GENERATOR	22-28		
FIXTURES	4-8

PART 2: BIDDER ACKNOWLEDGEMENT

(2.1) RFI (Request for Information)

The Bidder acknowledges receipt of the following RFI Response(s):

RFI No.	1	Dated:	11/8/24	RFI No.		Dated:	
RFI No.	2	Dated:	11/11/24	RFI No.		Dated:	
RFI No.		Dated:		RFI No.		Dated:	

(2.2) WSI (Wharton-Smith Supplemental Instructions)

The Bidder acknowledges receipt of the following Wharton-Smith Supplemental Instruction(s):

WSI No.	1	Dated:		WSI No.	4	Dated:	10/28/24
WSI No.	2	Dated:	10/24/24	WSI No.	5	Dated:	10/31/24
WSI No.	3	Dated:	10/25/24	WSI No.	6	Dated:	11/6/24

(2.3) ASI (Architect's Supplemental Instructions)

The Bidder acknowledges receipt of the following Architect Supplemental Instruction(s):

ASI No.		Dated:		ASI No.		Dated:	

(2.4) Addenda

The Bidder acknowledges receipt of the following Addenda:

Addenda No.		Dated:		Addenda No.		Dated:	
Addenda No.		Dated:		Addenda No.		Dated:	

(2.5) Additional Acknowledgements

The Bidder acknowledges that Bidder has considered and included the requirements of the Subcontractor Bid Manual, dated October 17, 2024, and all other sections, in preparing this Bid.

The Bidder acknowledges time is of the essence and the Project will begin March 6, 2025, with Substantial Completion that must be achieved no later than June 30, 2026, and has included all costs for any required extended hours, extra shifts, weekend and holiday work which may be necessary to complete the Work on schedule.

This Bid will remain subject to acceptance for ninety **90** calendar days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Construction Manager.

The Bidder understands and agrees that the Construction Manager and/or Owner reserves the right to reject this Bid or any and all bids for the Project, and to waive minor irregularities or informalities in any bid and to award Alternates in any order that in the Construction Manager's judgment will be in the Owner's best interest.

Continued Next Page

The Bidder hereby acknowledges they are licensed to do business in the capacity represented by this Bid and as required by all governing jurisdictional authorities for all locations of the work and as required by the Contract Documents.

The Bidder hereby acknowledges reviewing and accepting without modification the Wharton-Smith, Inc. Subcontract Agreement and agrees to execute same if awarded the project or portion(s) of the Project.

Wharton-Smith INC

Re: Port Orange Public Utilities Field Ops Bldg.

Dear James

At this time, we propose to furnish the necessary materials, tools, equipment, labor, and PPE to provide a price for the installation in accordance with electrical drawings E001 – ES102 & FA001-FA201 & T001-T601 dated 9/30/2024

This electrical proposal includes revisions, as prepared by TLC Engineering Solutions, our interpretation of the intended electrical design and per the following scope of work.

Price Includes:

- **We acknowledge thru WS008 as of this proposal date**
- Material sales tax and insurance certificates.
- One (1) year warranty for all items provided and installed by Carter Electric Co. Inc.
  - Labor warranty ONLY for items not furnished by Carter Electric Co. Inc.
- Provide a complete electrical installation in accordance with NEC as shown on the electrical drawings.
- Installation shall be done in accordance with the control lines established by the general contractor or surveyor.
- Raceways will be in accordance with NEC for PVC, GRC (though slab and elbows) and EMT conduit systems.
- Complete lighting fixture and controls package per plans and specs.
- Distribution package:
  - Switchgear: MDP
  - Panels: A, B, C, D, E, F
  - Disconnects: Per plans and specs
  - Misc: (7) SPD
- Wiring devices to be commercial grade and hospital grade type where applicable
  - Receptacles to be protected by GFI type where required by code.
  - Device plates shall be Nylon unless specified otherwise.
- Grounding per NEC
- Emergency Power
  - MTU (a Rolls-Royce Solution) Engine-Generator Set (“Genset”)
  - 1 250KW 208V Diesel Stationary Emergency Standby
  - Standard Accessories Included:
    - Std Controller, Mounted Radiator, Lead-Acid Engine Batteries, Battery Charger, Engine Block Heater, Flexible Fuel Line; Exhaust Flex Connector, Critical Muffler, Pad Vibration Isolators ,One (1) O&M Manual, Standard Factory Test
  - Genset Circuit Breaker: 1000 amps, 100% Rated LSI with Shunt Trip
  - Weather Protective Enclosure: Steel 195 MPH Wind Rated Sound Attenuated AC/DC Lights Convenience Receptacle
  - UL-142 Subbase Fuel Tank: 72 Hour/1676 Gallons (useable 1,590 Gallons)
  - MTU Manufacturer’s Limited Warranty: 2 Year/3000 Hour Basic Limited

- Remote Annunciator Panel
- Remote Break Glass E-Stop Station
- 1 Set of Oil, Air & Fuel Filters
- 12 Month Maintenance Service

- BDA Testing after building completion.
- Fire alarm
  - This proposal is based on providing a Notifier Fire Alarm System with Horn Evacuation.
  - This proposal is based on Class "B" SLC and NAC Circuits.
  - This proposal includes connecting the Fire Sprinkler Flow and Tamper Switches provided by others.
  - This proposal includes duct smoke detectors as shown on drawings. DynaFire to furnish the duct smoke detector housings and sampling tubes to the Mechanical Contractor for installation into their duct system by them.
  - furnish, install, and program the smoke detector head, as well as the shutdown relay. Please note the Mechanical Contractor to make the terminal on their equipment for the shutdown operation, to ensure proper connection and operation.
  - This proposal includes shutdown relays for HVLS Fans as shown on drawings. DynaFire to Furnish, install, and program the shutdown relay. Please note the HVLS Fan Contractor to make the terminal on their equipment for the shutdown operation, to ensure proper connection and operation.
  - This proposal includes monitor module for Kitchen Hood System provided by others. DynaFire to furnish, install, and program the monitor module. Please note the Kitchen Hood System Contractor to make the terminal on their equipment for the shutdown operation, to ensure proper connection and operation.
  - This proposal includes monitor modules for generator status monitoring provided by others. DynaFire to furnish, install, and program the monitor module. Please note the Generator Contractor to make the terminal on their equipment for the shutdown operation, to ensure proper connection and operation.
  - This proposal includes one (1) General Alarm Relay for interface to Access Control System provided by others at the FACP. DynaFire to furnish, install, and program the Control relay. Please note the Access Control Contractor to provide wire to FACP and make the terminal on their equipment to ensure proper connection and operation.
  - This proposal does not include any lock boxes.
  - Fire Alarm System Monitoring pricing is not included but can be provided on separate proposal if requested.
  - Permit Fees are included in this price.
- Structured Cabling
  - Furnish and install non-continuous cable support, where required for installed cabling.
  - Furnish and install 2" x 6" cable basket tray as indicated.
  - Furnish and install 2" fire rated sleeves in locations and quantities indicated.
  - Furnish and install Category 6 patch cords in the specified quantities and lengths.
  - Furnish and install horizontal Category 6 cable for voice, data, TV, WAP outlets located throughout the Administrative and Warehouse buildings, utilizing IT Telecom Room 141 as the MDF for the Administrative and Warehouse buildings.
  - Includes terminations, trim-out, testing, labeling, cable certification.
  - Furnish and install 12" cable tray located in IT Telecom Room 141.
  - Furnish and install (2) 19" 4-post data racks with (8) vertical wire managements.
  - Furnish and install Isolation kit and vertical rack bus bar for each rack.
  - Furnish and install Category 6 patch panels with horizontal wire management above and below each patch panel.
- Access control
  - Provide & install plenum-rated composite access control cabling to (26) door locations and (3) gate locations.
  - Provide & install (2) Intelligent System Controllers.
  - Provide & install (2) LSP Power Supplies.
  - Provide & install (16) Reader Input Modules.
  - Provide & install (34) HID Card Readers along with Door Contacts, and wired connections to

locking hardware.
    - Provide & install Access Control Workstation & Software.
    - Provide (50) Access Cards.
    - Commission and test the system.
    - Provide all close out documents and as-built drawings.
- CCTV
    - Provide and install Cat6 cabling from MDF to (10) camera locations, midspan PoE extenders as necessary.
    - Provide & install (6) 180 Dome Cameras w/ mounting accessories.
    - Provide & install (4) 360 Dome Cameras w/ mounting accessories.
    - Provide and install (1) 6TB 12-Channel Video Server with VMS Software, Camera Licenses and
    - PoE Switch.
    - Provide (1) 27" Security Monitor.
    - Commission and test the system.
    - Provide all close out documents and as-built drawings.
- Lightning Protection
    - Furnish and install a class I Aluminum Lightning Protection System with copper down leads connecting to 3/4" x 10' Ground Rods and interconnected with a 2/0 ground loop per roof plans E121
- Electrical Testing
    - 260519 Low-Voltage Electrical Power Conductors and Cables – Quantity 24 Sets
    - 260526 Grounding and Bonding for Electrical Systems
    - 262416 Panelboards – Quantity 11
        - 2021 NETA ATS 7.6 Circuit Breakers (100A and larger) – Quantity 11
        - 2021 NETA ATS 7.19 Surge Arrestors – Quantity 7
    - 262816 Enclosed Switches and Circuit Breakers – Quantity 0 Switches & 2 Circuit Breakers
    - Thermographic Survey – Panelboards (new work only)
        - Perform initial scan upon completion, and follow up scan at 11 months
    - Test records will be prepared and submitted following services.
- Fireproofing
    - Installation of firestop systems adhering to AFI's submitted manufacture and UL specifications to meet required fire ratings and AHJ requirements
    - AFI representative present for inspections with a 48-hour notice
    - Includes Sleeves
- Single point electrical connection to any equipment provided and installed by others.
- Clean up for electrical only.
    - Debris generated by Carter Electric Co. Inc. shall be placed in an onsite dumpster.
- Work is based on five (5) days Monday – Friday, forty (40) hours per week, from 7:00am – 3:30pm If no schedule has been provided then this proposal is based on standard manpower graphs for similar projects.

Price Does Not Include:

- Bond (add 1.4%).
- Electrical Permit
- Camera Poles
- LV transformers for plumbing hardware
- LV plumbing connections
- Any A/V equipment (provide, install & configure)
- BIM Coordination
- Security gate equipment, installation and configuration
- Any Utility provider primary conduit, cabling, transformer, or other equipment and or materials.
- Any Utility, television, or telephone provider charges, conduit and equipment.
- Electrical power to tower crane or buck hoist for construction.
- HVAC conduit, control wiring, interlocking equipment and devices.
- **Any type of starters or variable frequency drive or equipment.**
- Fire pump and jockey pump controllers, control devices or control wiring.
- Domestic water system controls, control devices or wiring.
    - Furnish or install unit bath exhaust fans.
- Roof pitch pockets, if needed.

- BDA system if required.
- Configuration of any owner supplied equipment
- Dumpster (to be provided by general contractor).
    - We will collect the trash and construction debris generated by Carter Electric Co. Inc. and deposit in an onsite dumpster provided by the general contractor.
- Irrigation control power, control wiring or connections.
- Compaction and or dewatering of trench excavation.
- Concrete or equipment pads, i.e., transformer, equipment rack, housekeeping pads and generator
    - Including parking bollards, if required.
- Layout / surveying of the site lighting shall be performed by the general contractor.
- Any existing concealed or unforeseen circumstances that impact the electrical installation.
- We specifically exclude the use of any third-party billing computer software which may cause us to alter the price below.
- We specifically exclude any specific client contract issues that may cause us to adjust the bid price below such as.
- Duct detectors are to be mounted by the mechanical contractor.
- Indemnification costs, however in no event are we able to identify our clients or owners from their own negligence.
- Any delays caused due to material delays that are out of our control. We are experiencing impacts daily from our Vendors and Manufactures due supply chain disruption related delays.
- Lien releases shall conform to Florida Statue 713; any diversions from the verbiage contained within the approved releases may cause us to adjust the price below.
    - Prepayment to any of our subcontractors and vendors. our partner agreements with our subcontractors and vendors rely on the owner's payment for them to receive their payment; therefore, we do NOT provide any prepayments. Any requirements that differ from this agreement may be cause for us to adjust the price below.
- Professional electric design, which is the responsibility of the electrical engineer. All changes necessary to bring the installation into code compliance are excluded.
- This proposal is limited to extent of the work reflected on the electrical drawings noted above, relative to the quantity of the electrical devices, light fixtures, equipment wiring, and the systems shown on the plans and shall be contingent upon acceptance of an AIA or other mutually agreeable subcontract agreement.

Base Bid:	**$1,679,495.00**
Adder for BDA system if required	**$77,000.00**

Due to changes in market conditions and material pricing and availability, our proposal shall be good if accepted within thirty (30) days of the date of this proposal. We reserve the right to adjust this proposal based on the volatility of material and the market conditions at the time of award.

We appreciate the opportunity to provide you with this proposal. Please feel free to contact me if you have any questions or comments.

Sincerely,

Todd Matarazzo

Re: Port Orange Public Utilities Field Ops Bldg.

Dear James

At this time, we propose to furnish the necessary materials, tools, equipment, labor, and PPE to provide a price for the installation in accordance with electrical drawings E001 – ES102 & FA001-FA201 & T001-T601 dated 9/30/2024

This electrical proposal includes revisions, as prepared by TLC Engineering Solutions, our interpretation of the intended electrical design and per the following scope of work.

Price Includes:

- **We acknowledge thru WS008 as of this proposal date**
- Material sales tax and insurance certificates.
- One (1) year warranty for all items provided and installed by Carter Electric Co. Inc.
    - Labor warranty ONLY for items not furnished by Carter Electric Co. Inc.
- Provide a complete electrical installation in accordance with NEC as shown on the electrical drawings.
- Installation shall be done in accordance with the control lines established by the general contractor or surveyor.
    - Includes final power circuiting and connection to all gate controllers, exhaust fans and irrigation controller as shown E sheets
- Raceways will be in accordance with NEC for PVC, GRC (though slab and elbows) and EMT conduit systems.
- Electrical Permit
- Complete lighting fixture and controls package per plans and specs.
- Distribution package:
    - Switchgear: MDP
    - Panels: A, B, C, D, E, F
    - Disconnects: Per plans and specs
    - Misc: (7) SPD
- Wiring devices to be commercial grade and hospital grade type where applicable
    - Receptacles to be protected by GFI type where required by code.
    - Device plates shall be Nylon unless specified otherwise.
- Grounding per NEC
- Emergency Power
    - MTU (a Rolls-Royce Solution) Engine-Generator Set (“Genset”)
    - 1 250KW 208V Diesel Stationary Emergency Standby
    - Standard Accessories Included:
        - Std Controller, Mounted Radiator, Lead-Acid Engine Batteries, Battery Charger, Engine Block Heater, Flexible Fuel Line; Exhaust Flex Connector, Critical Muffler, Pad Vibration Isolators ,One (1) O&M Manual, Standard Factory Test
    - Genset Circuit Breaker: 1000 amps, 100% Rated LSI with Shunt Trip

- Weather Protective Enclosure: Steel 195 MPH Wind Rated Sound Attenuated AC/DC Lights Convenience Receptacle
- UL-142 Subbase Fuel Tank: 72 Hour/1676 Gallons (useable 1,590 Gallons)
- MTU Manufacturer's Limited Warranty: 2 Year/3000 Hour Basic Limited
- Remote Annunciator Panel
- Remote Break Glass E-Stop Station
- 1 Set of Oil, Air & Fuel Filters
- 12 Month Maintenance Service

- BDA Testing after building completion.
- Fire alarm
  - This proposal is based on providing a Notifier Fire Alarm System with Horn Evacuation.
  - This proposal is based on Class "B" SLC and NAC Circuits.
  - This proposal includes connecting the Fire Sprinkler Flow and Tamper Switches provided by others.
  - This proposal includes duct smoke detectors as shown on drawings. DynaFire to furnish the duct smoke detector housings and sampling tubes to the Mechanical Contractor for installation into their duct system by them.
  - furnish, install, and program the smoke detector head, as well as the shutdown relay. Please note the Mechanical Contractor to make the terminal on their equipment for the shutdown operation, to ensure proper connection and operation.
  - This proposal includes shutdown relays for HVLS Fans as shown on drawings. DynaFire to Furnish, install, and program the shutdown relay. Please note the HVLS Fan Contractor to make the terminal on their equipment for the shutdown operation, to ensure proper connection and operation.
  - This proposal includes monitor module for Kitchen Hood System provided by others. DynaFire to furnish, install, and program the monitor module. Please note the Kitchen Hood System Contractor to make the terminal on their equipment for the shutdown operation, to ensure proper connection and operation.
  - This proposal includes monitor modules for generator status monitoring provided by others. DynaFire to furnish, install, and program the monitor module. Please note the Generator Contractor to make the terminal on their equipment for the shutdown operation, to ensure proper connection and operation.
  - This proposal includes one (1) General Alarm Relay for interface to Access Control System provided by others at the FACP. DynaFire to furnish, install, and program the Control relay. Please note the Access Control Contractor to provide wire to FACP and make the terminal on their equipment to ensure proper connection and operation.
  - This proposal does not include any lock boxes.
  - Fire Alarm System Monitoring pricing is not included but can be provided on separate proposal if requested.
  - Permit Fees are included in this price.
- Structured Cabling
  - Furnish and install non-continuous cable support, where required for installed cabling.
  - Furnish and install 2" x 6" cable basket tray as indicated.
  - Furnish and install 2" fire rated sleeves in locations and quantities indicated.
  - Furnish and install Category 6 patch cords in the specified quantities and lengths.
  - Furnish and install horizontal Category 6 cable for voice, data, TV, WAP outlets located throughout the Administrative and Warehouse buildings, utilizing IT Telecom Room 141 as the MDF for the Administrative and Warehouse buildings.
  - Includes terminations, trim-out, testing, labeling, cable certification.
  - Furnish and install 12" cable tray located in IT Telecom Room 141.
  - Furnish and install (2) 19" 4-post data racks with (8) vertical wire managements.
  - Furnish and install Isolation kit and vertical rack bus bar for each rack.
  - Furnish and install Category 6 patch panels with horizontal wire management above and below each patch panel.
- Access control
  - Provide & install plenum-rated composite access control cabling to (26) door locations and (3) gate locations.

- Provide & install (2) Intelligent System Controllers.
- Provide & install (2) LSP Power Supplies.
- Provide & install (16) Reader Input Modules.
- Provide & install (34) HID Card Readers along with Door Contacts, and wired connections to locking hardware.
- Provide & install Access Control Workstation & Software.
- Provide (50) Access Cards.
- Commission and test the system.
- Provide all close out documents and as-built drawings.

- CCTV
  - Provide and install Cat6 cabling from MDF to (10) camera locations, midspan PoE extenders as necessary.
  - Provide & install (6) 180 Dome Cameras w/ mounting accessories.
  - Provide & install (4) 360 Dome Cameras w/ mounting accessories.
  - Provide and install (1) 6TB 12-Channel Video Server with VMS Software, Camera Licenses and
  - PoE Switch.
  - Provide (1) 27" Security Monitor.
  - Commission and test the system.
  - Provide all close out documents and as-built drawings.
- Lightning Protection
  - Furnish and install a class I Aluminum Lightning Protection System with copper down leads connecting to 3/4" x 10' Ground Rods and interconnected with a 2/0 ground loop per roof plans E121
- Electrical Testing
  - 260519 Low-Voltage Electrical Power Conductors and Cables – Quantity 24 Sets
  - 260526 Grounding and Bonding for Electrical Systems
  - 262416 Panelboards – Quantity 11
    - 2021 NETA ATS 7.6 Circuit Breakers (100A and larger) – Quantity 11
    - 2021 NETA ATS 7.19 Surge Arrestors – Quantity 7
  - 262816 Enclosed Switches and Circuit Breakers – Quantity 0 Switches & 2 Circuit Breakers
  - Thermographic Survey – Panelboards (new work only)
    - Perform initial scan upon completion, and follow up scan at 11 months
  - Test records will be prepared and submitted following services.
- Fireproofing
  - Installation of firestop systems adhering to AFI's submitted manufacture and UL specifications to meet required fire ratings and AHJ requirements
  - AFI representative present for inspections with a 48-hour notice
  - Includes Sleeves
- Single point electrical connection to any equipment provided and installed by others.
- Clean up for electrical only.
  - Debris generated by Carter Electric Co. Inc. shall be placed in an onsite dumpster.
- Work is based on five (5) days Monday – Friday, forty (40) hours per week, from 7:00am – 3:30pm If no schedule has been provided then this proposal is based on standard manpower graphs for similar projects.

Price Does Not Include:

- Bond (add 1.4%).
- Camera Poles
- LV transformers for plumbing hardware
- LV plumbing connections
- Any A/V equipment (provide, install & configure)
- BIM Coordination
- Security gate equipment, installation and configuration
- Any Utility provider primary conduit, cabling, transformer, or other equipment and or materials.
- Any Utility, television, or telephone provider charges, conduit and equipment.
- Electrical power to tower crane or buck hoist for construction.
- HVAC conduit, control wiring, interlocking equipment and devices.
- **Any type of starters or variable frequency drive or equipment.**
- Fire pump and jockey pump controllers, control devices or control wiring.

- Domestic water system controls, control devices or wiring.
    - Furnish or install unit bath exhaust fans.
- Roof pitch pockets, if needed.
- BDA system if required.
- Configuration of any owner supplied equipment
- Dumpster (to be provided by general contractor).
    - We will collect the trash and construction debris generated by Carter Electric Co. Inc. and deposit in an onsite dumpster provided by the general contractor.
- Irrigation control power, control wiring or connections.
- Dewatering of trench excavation.
- Concrete or equipment pads, i.e., transformer, equipment rack, housekeeping pads and generator
    - Including parking bollards, if required.
- Layout / surveying of the site lighting shall be performed by the general contractor.
- Any existing concealed or unforeseen circumstances that impact the electrical installation.
- We specifically exclude the use of any third-party billing computer software which may cause us to alter the price below.
- We specifically exclude any specific client contract issues that may cause us to adjust the bid price below such as.
- Duct detectors are to be mounted by the mechanical contractor.
- Indemnification costs, however in no event are we able to identify our clients or owners from their own negligence.
- Any delays caused due to material delays that are out of our control. We are experiencing impacts daily from our Vendors and Manufactures due supply chain disruption related delays.
- Lien releases shall conform to Florida Statue 713; any diversions from the verbiage contained within the approved releases may cause us to adjust the price below.
    - Prepayment to any of our subcontractors and vendors. our partner agreements with our subcontractors and vendors rely on the owner's payment for them to receive their payment; therefore, we do NOT provide any prepayments. Any requirements that differ from this agreement may be cause for us to adjust the price below.
- Professional electric design, which is the responsibility of the electrical engineer. All changes necessary to bring the installation into code compliance are excluded.
- This proposal is limited to extent of the work reflected on the electrical drawings noted above, relative to the quantity of the electrical devices, light fixtures, equipment wiring, and the systems shown on the plans and shall be contingent upon acceptance of an AIA or other mutually agreeable subcontract agreement.

Base Bid:	**$1,698,848.00**
Adder for BDA system if required	**$77,000.00**

Due to changes in market conditions and material pricing and availability, our proposal shall be good if accepted within thirty (30) days of the date of this proposal. We reserve the right to adjust this proposal based on the volatility of material and the market conditions at the time of award.

We appreciate the opportunity to provide you with this proposal. Please feel free to contact me if you have any questions or comments.

Sincerely,

Todd Matarazzo

Re: Port Orange Public Utilities Field Ops Bldg.

Dear James

At this time, we propose to furnish the necessary materials, tools, equipment, labor, and PPE to provide a price for the installation in accordance with electrical drawings E001 – ES102 & FA001-FA201 & T001-T601 dated 9/30/2024

This electrical proposal includes revisions, as prepared by TLC Engineering Solutions, our interpretation of the intended electrical design and per the following scope of work.

Price Includes:

- **We acknowledge thru WS008 / RFI #3 as of this proposal date**
- Material sales tax and insurance certificates.
- One (1) year warranty for all items provided and installed by Carter Electric Co. Inc.
  - Labor warranty ONLY for items not furnished by Carter Electric Co. Inc.
- Provide a complete electrical installation in accordance with NEC as shown on the electrical drawings.
- Installation shall be done in accordance with the control lines established by the general contractor or surveyor.
  - **Includes final power circuiting and connection to all gate controllers, exhaust fans and irrigation controller as shown E sheets**
- Raceways will be in accordance with NEC for PVC, GRC (though slab and elbows) and EMT conduit systems.
- **Electrical Permit**
- **Temporary power and lighting per OSHA standard**
  - **Includes 1 trailer connection to temp power**
- Complete lighting fixture and controls package per plans and specs.
- Distribution package:
  - Switchgear: MDP
  - Panels: A, B, C, D, E, F
  - Disconnects: Per plans and specs
  - Misc: (7) SPD
- Wiring devices to be commercial grade and hospital grade type where applicable
  - Receptacles to be protected by GFI type where required by code.
  - Device plates shall be Nylon unless specified otherwise.
- Grounding per NEC
- Emergency Power
  - MTU (a Rolls-Royce Solution) Engine-Generator Set (“Genset”)
  - 1 250KW 208V Diesel Stationary Emergency Standby
  - Standard Accessories Included:
    - Std Controller, Mounted Radiator, Lead-Acid Engine Batteries, Battery Charger, Engine Block Heater, Flexible Fuel Line; Exhaust Flex Connector, Critical Muffler, Pad Vibration Isolators ,One (1) O&M Manual, Standard Factory Test

- Genset Circuit Breaker: 1000 amps, 100% Rated LSI with Shunt Trip
- Weather Protective Enclosure: Steel 195 MPH Wind Rated Sound Attenuated AC/DC Lights Convenience Receptacle
- UL-142 Subbase Fuel Tank: 72 Hour/1676 Gallons (useable 1,590 Gallons)
- MTU Manufacturer's Limited Warranty: 2 Year/3000 Hour Basic Limited
- Remote Annunciator Panel
- Remote Break Glass E-Stop Station
- 1 Set of Oil, Air & Fuel Filters
- 12 Month Maintenance Service

- BDA Testing after building completion.
- Fire alarm
  - This proposal is based on providing a Notifier Fire Alarm System with Horn Evacuation.
  - This proposal is based on Class "B" SLC and NAC Circuits.
  - This proposal includes connecting the Fire Sprinkler Flow and Tamper Switches provided by others.
  - This proposal includes duct smoke detectors as shown on drawings. DynaFire to furnish the duct smoke detector housings and sampling tubes to the Mechanical Contractor for installation into their duct system by them.
  - furnish, install, and program the smoke detector head, as well as the shutdown relay. Please note the Mechanical Contractor to make the terminal on their equipment for the shutdown operation, to ensure proper connection and operation.
  - This proposal includes shutdown relays for HVLS Fans as shown on drawings. DynaFire to Furnish, install, and program the shutdown relay. Please note the HVLS Fan Contractor to make the terminal on their equipment for the shutdown operation, to ensure proper connection and operation.
  - This proposal includes monitor module for Kitchen Hood System provided by others. DynaFire to furnish, install, and program the monitor module. Please note the Kitchen Hood System Contractor to make the terminal on their equipment for the shutdown operation, to ensure proper connection and operation.
  - This proposal includes monitor modules for generator status monitoring provided by others. DynaFire to furnish, install, and program the monitor module. Please note the Generator Contractor to make the terminal on their equipment for the shutdown operation, to ensure proper connection and operation.
  - This proposal includes one (1) General Alarm Relay for interface to Access Control System provided by others at the FACP. DynaFire to furnish, install, and program the Control relay. Please note the Access Control Contractor to provide wire to FACP and make the terminal on their equipment to ensure proper connection and operation.
  - This proposal does not include any lock boxes.
  - Fire Alarm System Monitoring pricing is not included but can be provided on separate proposal if requested.
  - Permit Fees are included in this price.
- Structured Cabling
  - Furnish and install non-continuous cable support, where required for installed cabling.
  - Furnish and install 2" x 6" cable basket tray as indicated.
  - Furnish and install 2" fire rated sleeves in locations and quantities indicated.
  - Furnish and install Category 6 patch cords in the specified quantities and lengths.
  - Furnish and install horizontal Category 6 cable for voice, data, TV, WAP outlets located throughout the Administrative and Warehouse buildings, utilizing IT Telecom Room 141 as the MDF for the Administrative and Warehouse buildings.
  - Includes terminations, trim-out, testing, labeling, cable certification.
  - Furnish and install 12" cable tray located in IT Telecom Room 141.
  - Furnish and install (2) 19" 4-post data racks with (8) vertical wire managements.
  - Furnish and install Isolation kit and vertical rack bus bar for each rack.
  - Furnish and install Category 6 patch panels with horizontal wire management above and below each patch panel.
- Access control
  - Provide & install plenum-rated composite access control cabling to (26) door locations and (3)

gate locations.
    - Provide & install (2) Intelligent System Controllers.
    - Provide & install (2) LSP Power Supplies.
    - Provide & install (16) Reader Input Modules.
    - Provide & install (34) HID Card Readers along with Door Contacts, and wired connections to locking hardware.
    - Provide & install Access Control Workstation & Software.
    - Provide (50) Access Cards.
    - Commission and test the system.
    - Provide all close out documents and as-built drawings.
- CCTV
    - Provide and install Cat6 cabling from MDF to (10) camera locations, midspan PoE extenders as necessary.
    - Provide & install (6) 180 Dome Cameras w/ mounting accessories.
    - Provide & install (4) 360 Dome Cameras w/ mounting accessories.
    - Provide and install (1) 6TB 12-Channel Video Server with VMS Software, Camera Licenses and
    - PoE Switch.
    - Provide (1) 27" Security Monitor.
    - Commission and test the system.
    - Provide all close out documents and as-built drawings.
- Lightning Protection
    - Furnish and install a class I Aluminum Lightning Protection System with copper down leads connecting to 3/4" x 10' Ground Rods and interconnected with a 2/0 ground loop per roof plans E121
- A/v System
    - Full installation per tech drawings dated 9/30/24
    - Full Rack Width, 1U AAP Mounting Frame - Black
    - 8x2 Seamless 4K Scaling Presentation Matrix Switcher with AV LAN - 100 Watt 70 Volt Mono Power Amplifier, LinkLicense for User Interfaces Upgrade
    - HDMI Twisted Pair Transmitter with Input Loop-Through - 230 feet (70 m)
    - HDMI Twisted Pair Receiver - 230 feet (70 m)
    - eBUS Partition Sensor
    - XTP Power Injector
    - Recessed Wall Mount Kit for TLP Pro 1025M, TLP Pro 725M, TLS 1025M, and TLS 725M
    - 7" Wall Mount TouchLink Pro Touchpanel
    - Extron 3.5" Wall Mount TouchLink Pro Touchpanel
    - DTP Transmitter for HDMI - Decorator-Style Wallplate, Black - 230 feet (70 m
    - Mono 70 V Amplifier - 60 Watts
    - SoundField XD 6.5" Two-Way Ceiling Speaker with 8" Composite Back Can and 70/100 V Transformer
    - "Middle Atlantic Reference 16RU Furniture Rack - 28.3in Depth - 27.3in Width - 350 lbs Weight Capacity - For Monitor - 16U Rack Height x 19"" Rack Width x
    - 23.31"" Rack Depth - Floor Standing - Black Cascade - Wood, Steel, Tempered Glass - 350 lb Maximum Weig"
    - Rfr Cabinet Cooler,50 CFM Cooling,9.63 in. Dp,Upper Panel on Rear Mount
    - Samsung 98" 4K UHD LCD Commercial Display
    - Chief Fusion X-Large Tilt Adjustable TV Mount - For Displays 55-100" - Black - Height Adjustable - 1 Display(s) Supported - 55" to 100" Screen Support - 250 lb Load Capacity
    - Surge Protector
    - Surge Protector, 120V/20A, 12 Outlets, 15ft Power Cord, 1U Rackmount
    - CAT6 550MHz, HDBT, UTP, 8C CMR Blue Jacket, AWG23,, Pull Box, 1000'
    - 18/2 Shielded Riser
    - 2-Pack 1-Port HDMI Wall Plate in White (4K UHD, ARC, and Ethernet Pass-Thru Support)
    - 4K HDMI Cable 30FT (4K 30Hz, HDR10, HDCP2.3, High Speed 18Gbps, in-Wall CL3 Rated
    - Connectors, Mounting Hardware, Conduit etc.
    - Permitting Fees
- Electrical Testing

- 260519 Low-Voltage Electrical Power Conductors and Cables – Quantity 24 Sets
- 260526 Grounding and Bonding for Electrical Systems
- 262416 Panelboards – Quantity 11
  - 2021 NETA ATS 7.6 Circuit Breakers (100A and larger) – Quantity 11
  - 2021 NETA ATS 7.19 Surge Arrestors – Quantity 7
- 262816 Enclosed Switches and Circuit Breakers – Quantity 0 Switches & 2 Circuit Breakers
- Thermographic Survey – Panelboards (new work only)
  - Perform initial scan upon completion, and follow up scan at 11 months
- Test records will be prepared and submitted following services.

- Fireproofing
  - Installation of firestop systems adhering to AFI's submitted manufacture and UL specifications to meet required fire ratings and AHJ requirements
  - AFI representative present for inspections with a 48-hour notice
  - Includes Sleeves
- Single point electrical connection to any equipment provided and installed by others.
- Clean up for electrical only.
  - Debris generated by Carter Electric Co. Inc. shall be placed in an onsite dumpster.
- Work is based on five (5) days Monday – Friday, forty (40) hours per week, from 7:00am – 3:30pm If no schedule has been provided then this proposal is based on standard manpower graphs for similar projects.

Price Does Not Include:

- Bond (add 1.4%).

Subject: CARTER ELECTRIC - Port Orange Public Utilities -Field Ops Final Scoping

Todd – Thanks for meeting with us yesterday for the scoping process on this project. Based on those discussions, please update your proposal as follows. You can update the proposal/bid form, then follow-up with other data/past performance.

1. Update the Bid Form to ref. RFI #3

Re-write your exclusions to show you have included:

2. Temp Power, FPL site conduit and coordination
3. Power to gate operators
4. Low voltage to card readers (included by your LV sub)
5. Irrigation system power hook-up
6. Permits
7. Updated price to include full Carter Electric Budget for A/V per the spec. spec. 274100 AV Systems. The only things I see as Owner Furnished are 1 computer and 2 flat panel displays. However there are a few items that will be part of this AV System (i.e. speakers, AV Cabinet, microprocessor based touch screen controller/AV Switcher, wall mounted Room scheduling display, etc.) and they name manufacturer certifications for installer as either Crestron or Extron.

We know Carter to be a reputable firm but need to be prepared to show this our Risk Dept.

8. Let us know what backlog (other projects you currently have) starting in 2025 (Name, value, start, project duration).
9. Send us a list of your **completed** Wharton Smith Jobs (even if they are a few years old). It helps us to show our risk department that there is Carter Electric experience.

Respectfully,

James R. Manyette | Senior Preconstruction Services Manager

Subcontractor Bid Form-Electrical

Project: Port Orange Public Utilities Field Operations Facility

To: Wharton-Smith, Inc., 750 Monroe Road, Sanford, FL 32771
(407) 321-8410; comest@whartonsmith.com

Name of Bidder:	Giles Electric Company
Scope of Work:	Electrical

The Undersigned, hereinafter called "Bidder", having visited the site of the proposed project and familiarized themselves with the local conditions, nature and extent of the work, and having carefully examined the Subcontractor Bid Manual, Subcontract Form, General Conditions, Supplementary Conditions, Plans and Specifications and other Contract Documents, with the Bond requirements herein, proposes to furnish all labor, materials, equipment and other items, facilities and services for the proper execution and completion of: Port Orange Public Utilities Field Operations Facility in full accordance with the Contract Documents and, if awarded the Contract, to complete the said work within the time limits specified for the following lump sum price.

Electrical subcontractors are to provide a **complete turnkey proposal** including, but not be limited to: Low voltage/technology systems for complete and operable Access Control, CCTV, Security, DAS/BDA, Lightning Protection, Fire Alarm, Emergency Generator, etc., for complete and operable systems.

PART 1: PRICING

(1.1) Total Electrical Base Bid

Amount in Figures:	$ 1,978,000.00
Amount in Words:	$ One million nine hundred seventy eight thousand.

Provide accounting breakout prices as follows (to be included in the above base bid):

Electrical (incl. fire alarm)	$ 1,415,114.00
Technology Voice/Data (premises distr., cabling, tray, devices, terminations)	$ 137,000.00
Access Control System	$ 114,426.00
CCTV System	$ 39,085.00
DAS/BDA Systems Budget & Survey.	$ 72,000.00
A/V Systems	$ 57,175.00
Emergency Generator	$ 143,200.00
	$ 1,978,000.00

Continued Next Page

(1.2) Alternates (Voluntary)

	$
	$
	$

(1.3) Owner Direct Purchase (value of all purchases exceeding $5,000)

Material/Equipment Types:	Fixtures, Switchgear, Generator
Amount:	$322,200.00

(1.4) Value Engineering (We encourage voluntary VE/cost savings options)

1		$
2		$
3		$

(1.5) MWBE Participation

MWBE	$
LDB	$
VBE	$

(1.6) Bond Rate

In the event a Performance & Payment Bond is required, indicate in the space below the **percentage** to be added to the proposal.

Bond Rate %: 1.2%	

(1.7) Long Lead Durations (indicate durations for any long lead equip. 24 weeks +)

Item	Duration (wks)	Item	Duration (wks)
Generator	20 weeks

				WSI NO.	7	Dated	11-6-24
				WSI No.	8	Dated	11-8-24

(2.3) ASI (Architect's Supplemental Instructions)

The Bidder acknowledges receipt of the following Architect Supplemental Instruction(s):

ASI No.		Dated:		ASI No.		Dated:	

(2.4) Addenda

The Bidder acknowledges receipt of the following Addenda:

Addenda No.		Dated:		Addenda No.		Dated:	
Addenda No.		Dated:		Addenda No.		Dated:	

(2.5) Additional Acknowledgements

The Bidder acknowledges that Bidder has considered and included the requirements of the Subcontractor Bid Manual, dated October 17, 2024, and all other sections, in preparing this Bid.

The Bidder acknowledges time is of the essence and the Project will begin March 6, 2025, with Substantial Completion that must be achieved no later than June 30, 2026, and has included all costs for any required extended hours, extra shifts, weekend and holiday work which may be necessary to complete the Work on schedule.

This Bid will remain subject to acceptance for ninety **90** calendar days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Construction Manager.

The Bidder understands and agrees that the Construction Manager and/or Owner reserves the right to reject this Bid or any and all bids for the Project, and to waive minor irregularities or informalities in any bid and to award Alternates in any order that in the Construction Manager's judgment will be in the Owner's best interest.

Continued Next Page

The Bidder hereby acknowledges they are licensed to do business in the capacity represented by this Bid and as required by all governing jurisdictional authorities for all locations of the work and as required by the Contract Documents.

The Bidder hereby acknowledges reviewing and accepting without modification the Wharton-Smith, Inc. Subcontract Agreement and agrees to execute same if awarded the project or portion(s) of the Project.

PROPOSAL

Date:11-12-24
Project: Port Orange Public Utilities Field Op's Bldg.
To: Wharton Smith
Attn: James Manyette

From: Jason Morgan
Title: Project Manager/Estimator
Email: Jason.morgan@gileselectriccompany.com
Phone: 386-767-5895

We propose to furnish all labor and materials necessary to provide the electrical installation for the above referenced project. Unless specifically stated otherwise in this scope of work, the installation is limited to our interpretation of the electrical design and work specifically covered by the electrical drawings and specifications.

PRICING

Drawings Used: Sheet E001 ThruE701 and T001 thru T601
Drawings By: Schenkel & Shultz
Specifications: Division 26,27,28
Amendment Received: NA

BASE BID: $1,978,000.00

The following is **included**:

- Sales tax.
- Rental Equipment.
- Temp. Power and lighting included.
- Lighting as specified.
- Lighting controls as specified.
- Switchgear, Panels and disconnects as specified.
- Devices as specified.
- Grounding as specified.
- Site manholes, handholes per drawings included.
- Lightning protection included. Includes master label. Lightning protection on light poles and covered parking area not included.
- Generator and transfer switches as specified.
- All plywood backboards for comm. rooms included.
- Fire alarm system as specified.
- Premise Distribution System. Includes racks, cabling, jacks, cable tray in comm. room
- Access control as specified.
- AV system as specified. The system will have two 98" monitors (4K not 8K as stated on the plan) as well as two touch screens for control and 6 total speakers in the dividable space. The last 65" monitor will be installed in the break room. All the offices that show monitors shall have a back box supplied and installed by Giles the monitors will be supplied and installed by others.

952 Big Tree Road
South Daytona, FL 32119
Phone 386-767-5895
Fax 386-767-6260
EC00001538
www.GilesElectricCompany.com

- CCTV as specified. Includes (1) 6TB 12-channel video server with VMS software, Camera licenses and POE switch. Includes a 27" security monitor.
- Includes BDA budget & survey.
- Includes box and conduit stub up for all systems.

The following is specifically **excluded**:

.

- FPL transformer and fees by others.
- P&P bond and bid bond not included.
- Housekeeping pad & generator pad by others.
- All site lighting surveyed by others.
- Cutting and patching of concrete & asphalt.
- Painting and patching of walls and ceilings.
- HVAC controls pipes, wire and devices by others.
- Electric locks, electric strikes, electrified panic trims, electrified hinges, magnetic locks, automatic operators with push buttons by others.
- AP's and network electronics by others.
- Spare lighting fixtures and controls not included.
- Gate and gate controllers furnished and installed by others.
- All access panels are furnished and installed by others.

STATEMENT

This installation proposal takes precedence over and supersedes any prior proposals, correspondence, and oral agreements or representations relating to the work set forth in the scope of work. This installation proposal commences on the start date as specified by the contract and/or the attached scope of work and represents the agreement between Giles and Customer.

This proposal is contingent on an acceptable project schedule being made a part of the contract. If the schedule is not available, then the proposal is based on a 40-hour workweek in conformance with NECA industry average manpower consumption graphs for this type of project. This proposal is based on the issuance of an AGC, AIA, or some other mutually acceptable contract and acceptable credit.

It is a pleasure to submit this scope of work. We look forward to the opportunity of working with you.

Sincerely,

Jason Morgan
Estimator

MAXWELL LIGHTNING
PROTECTION OF FLORIDA COMPANY
P.O. BOX 22683 • LAKE BUENA VISTA, FLORIDA 32830
(407) 827-6328 FAX (407) 827-6091 (800) 819-2012

November 11, 2024

Project: **Port Orange Public Utilities Field Operations Building**

Subject: **Lightning Protection and Grounding Quote**
Valid 60 days

We are pleased to submit our quote for the lightning protection and 2/0 grounding system on the above referenced project. Breakdown:

1.	Administration and Warehouse Building	90 ft. PVC & 9 PVC Sleeves	$33,100.00
2.	Covered Parking A	6 PVC Sleeves	$14,550.00
3.	Covered Parking B	7 PVC Sleeves	$15,980.00
4.	Mechanical Yard	60 ft. PVC	$8,400.00
			$72,030.00 Total

Design notes:

a) 2/0 Perimeter Counterpoise as specified
b) Exposed aluminum roof system
c) Each structure to be certified
d) Based on utilizing a trencher or excavation/trenching being performed by others

We will need your firm to provide and install **1"** PVC sleeves and raceway with a pull string, from each Thru-Roof assembly to each ground location.

NOTES:

a. No addenda were reviewed.
b. Third-party inspections and certifications are included, LPI-IP Certifications to NFPA 780, UL96A & LPI 175 lightning protection codes.
c. We cannot guarantee any specified ohm readings. Additional material or labor is not included should the completed system exceed specified ohm readings.
d. Safety tie-off locations or any unspecified accommodations, if required, must be provided by others.
e. Roof access must be provided by others, if applicable. Excludes scaffolding, crane, or lift equipment.
f. Proposal based on all roof mounted LP equipment being adhered/fastened directly to roof, parapet, and equipment surfaces. Excludes pads, seam clamps, custom clips, or parapet/coping brackets if required. Any variance or special provisions may be in addition to this quotation.
g. Design by LPI Master Designer 1015.
h. UL listed manufacturer number E165726. UL listed installer number E190711.
i. Maxwell installers are LPI certified and complete a VA approved, three-year training program.

Rebar is required to be bonded at each down lead location. Maxwell will furnish mechanical clamps and cable for a ground tail to be installed by your firm. Maxwell will terminate these pigtails to our thru roof assemblies and ground rod locations.

Exclusion: (General Contractor or Roofing Contractor must be notified) The Lightning Protection System will be adhered directly to the roof surface, by our firm, with the proper adhesive only. Thru-roof assemblies must be sealed and flashed in by the roofing contractor. Roofing Contractor must supply and install all wear pads, stripping, battens, heat welded strips or pavers, or any Special Coping Brackets whichever may or may not occur due to their choice of roofing manufacturer. No Materials or labor for these items have been included in our scope.

Excludes pitch pans, roof pads, vegetation and concrete / asphalt cutting, removal, patching, and dewatering.

Our quotes include all material and labor.

The system will be installed in accordance with UL 96A, NFPA 780, LPI 175 Lightning Protection Standards.

We carry Workers compensation insurance, $1 mil vehicle insurance, and $5 mil excess liability. Waivers of subrogation and additional insured descriptions can be supplied. Any additional endorsements or coverage that may be required that will cost an additional premium will be subject to an additional charge. Payment and performance bonds are not included in this quote but can be provided at an additional charge.

Thank you for this opportunity to quote this project. Please feel free to contact our office if you have any further questions concerning this or any future projects.

Sincerely,
MAXWELL LIGHTNING PROTECTION OF FLORIDA COMPANY

Subcontractor Bid Form-Electrical

Wharton-Smith, Inc. CONSTRUCTION GROUP

Project: Port Orange Public Utilities Field Operations Facility

To: Wharton-Smith, Inc., 750 Monroe Road, Sanford, FL 32771
(407) 321-8410; comest@whartonsmith.com

Name of Bidder: Network Cabling Services, Inc. (NCS)

Scope of Work: Div. #27 & Div. #28

The Undersigned, hereinafter called "Bidder", having visited the site of the proposed project and familiarized themselves with the local conditions, nature and extent of the work, and having carefully examined the Subcontractor Bid Manual, Subcontract Form, General Conditions, Supplementary Conditions, Plans and Specifications and other Contract Documents, with the Bond requirements herein, proposes to furnish all labor, materials, equipment and other items, facilities and services for the proper execution and completion of: Port Orange Public Utilities Field Operations Facility in full accordance with the Contract Documents and, if awarded the Contract, to complete the said work within the time limits specified for the following lump sum price.

Electrical subcontractors are to provide a **complete turnkey proposal** including, but not be limited to: Low voltage/technology systems for complete and operable Access Control, CCTV, Security, DAS/BDA, Lightning Protection, Fire Alarm, Emergency Generator, etc., for complete and operable systems.

PART 1: PRICING

(1.1) Total Electrical Base Bid

Amount in Figures: $ 359,199.00

Amount in Words: $ Three Hundred Fifty Nine Thousand One Hundred Ninety Nine and 00 Cents

Provide accounting breakout prices as follows (to be included in the above base bid):

Electrical (incl. fire alarm)	$ 38,900.00
Technology Voice/Data (premises distr., cabling, tray, devices, terminations)	$ 101,500.00
Access Control System	$ 133,900.00
CCTV System	$ 45,800.00
DAS/BDA Systems	$ 39,099.00
A/V Systems	$
Emergency Generator	$
	$

PART 2: BIDDER ACKNOWLEDGEMENT

(2.1) RFI (Request for Information)

The Bidder acknowledges receipt of the following RFI Response(s):

RFI No.	#1	Dated: 11/01/24	RFI No.		Dated:
RFI No.		Dated:	RFI No.		Dated:
RFI No.		Dated:	RFI No.		Dated:

(2.2) WSI (Wharton-Smith Supplemental Instructions)

The Bidder acknowledges receipt of the following Wharton-Smith Supplemental Instruction(s):

WSI No.	#1	Dated:	10/22/24	WSI No.	#5	Dated:	10/31/24
WSI No.	#2, #3	Dated:	10/24/24	WSI No.	#6	Dated:	11/04/24
WSI No.	#4	Dated:	10/28/24	WSI No.	#7	Dated:	11/06/24
				WSI	#08	Dated:	11/08/24

(2.3) ASI (Architect's Supplemental Instructions)

The Bidder acknowledges receipt of the following Architect Supplemental Instruction(s):

ASI No.	N/A	Dated:	ASI No.	Dated:

(2.4) Addenda

The Bidder acknowledges receipt of the following Addenda:

Addenda No.	N/A	Dated:	Addenda No.	Dated:
Addenda No.		Dated:	Addenda No.	Dated:

(2.5) Additional Acknowledgements

The Bidder acknowledges that Bidder has considered and included the requirements of the Subcontractor Bid Manual, dated October 17, 2024, and all other sections, in preparing this Bid.

The Bidder acknowledges time is of the essence and the Project will begin March 6, 2025, with Substantial Completion that must be achieved no later than June 30, 2026, and has included all costs for any required extended hours, extra shifts, weekend and holiday work which may be necessary to complete the Work on schedule.

This Bid will remain subject to acceptance for ninety **90** calendar days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Construction Manager.

The Bidder understands and agrees that the Construction Manager and/or Owner reserves the right to reject this Bid or any and all bids for the Project, and to waive minor irregularities or informalities in any bid and to award Alternates in any order that in the Construction Manager's judgment will be in the Owner's best interest.

Continued Next Page

The Bidder hereby acknowledges they are licensed to do business in the capacity represented by this Bid and as required by all governing jurisdictional authorities for all locations of the work and as required by the Contract Documents.

The Bidder hereby acknowledges reviewing and accepting without modification the Wharton-Smith, Inc. Subcontract Agreement and agrees to execute same if awarded the project or portion(s) of the Project.

EMERGENCY RESPONDER RADIO COVERAGE (ERRC) TEST

November 12, 2024

SCOPE OF WORK:

Perform an Emergency Responder Radio Coverage (ERRC) test to measure 700-800 MHz RF transmission levels to meet the requirements of the Authority Having Jurisdiction (AHJ).

This test and survey requires an FCC GROL holder and/or a PC Tel factory certified technician physically performing on-site tasks to identify and document where frequencies and transmission levels for emergency first-responder radio networks pass or fail.

EMERGENCY RESPONDER RADIO COVERAGE TEST (ERRC) PROCEDURE:

Network Cabling Services, Inc. will review the documents and verify the requirements with the AHJ including information on frequencies, radio site locations, and any other jurisdiction-specific requirements such as FCC GROL and test equipment technician certification.

NCS will tailor the ERRC test to the specific frequencies used by the local first responders. Some municipalities have first responders on separate systems meaning multiple frequency bands need to be identified. NCS will provide the pre-design research needed to flush out these requirements. Per NFPA 1225, 2022 edition the AHJ and the FCC frequency license holder are tasked with providing technical information specific to their requirements for testing purposes.

Per NFPA guidelines, NCS will prepare a compliant testing grid based on client provided floor plans. Testing will be completed using a grid pattern with a minimum of 20 test grids for each floor tested (or more depending on building size and local code requirements) to a maximum of 80 ft. (24.4 M) to encompass the entire floor area of each building.

Following the established floor grid pattern for each floor, the PC Tel Factory certified technician and / or the FCC GROL holder will conduct a physical walk test using the PC Tel tester to sample signal strength measurements and other AHJ specific criteria. Readings will be collected and noted during the walk test in all accessible grids within the defined grid area boundary.

The testing device will be the 08902-E IBFLEX PLATFORM AGILENT E4438C.

Two signal failures per floor are typically permitted (90% passing grids required), though this can vary by building type and local enforcement of fire codes. Critical areas require a 99% pass rate.

TEST REPORT:

Emergency Responder Radio Coverage results are prepared on a per building and per floor basis, in a summary format indicating building location, numerical grid RSSI value, SINR, FBER, and any additional criteria required by the AHJ.

NCS provides a visual grid map of all test results with passing and failing grids noted for each floor of each building tested based on parameters established by the AHJ.

Additional site-specific information is provided as required and may include a technician synopsis. Typically, weather conditions at the time of the test and any disclaimers are listed in this section of the report.

AUTHORITY HAVING JURISDICTION (AHJ):

The final evaluation regarding building enhancement requiring a public safety two-way radio system (BDA) is determined by the AHJ.

All NCS ERRC testing includes submission of the documentation to the AHJ, if desired. Supporting documentation includes calibration details of the testing device, a copy of the FCC GROL, and individual certifications for each technician performing the test and survey. A copy of the report is also submitted to the client.

ASSUMPTIONS:

- Test grid accuracy is based upon Owner or General contractor provided up-to-date dimensional floor plans for each floor of each building to be tested.
- Owner, Manager, or General Contractor to provide access to each area to perform testing to include private offices and restricted areas throughout the building.
- An escort will be provided, at no charge to NCS, to provide direction and unlock doors as required during the entire testing and surveying process.
- Escort to remain with the test technician(s) throughout the entire testing process.
- All test and survey procedures are to be performed during regular business hours weekdays.

Total ERRC & DAQ Cost: ***$1,094.00****

All work to be completed in a workmanlike manner according to standard practices. Any alteration or deviation from the above specifications involving extra costs will be executed only upon written orders and will become an extra charge over and above the estimate. No contingencies have been made for strikes, accidents, or delays beyond our control. Owner is to carry fire, tornado, theft, and other necessary insurance. NCS employees are fully covered by Workmen's Compensation Insurance.

BUDGETARY
EMERGENCY RESPONDER RADIO ENHANCEMENT SYSTEM
(ERRES)

November 12, 2024

BUDGETARY SCOPE OF WORK:

Provide and install a complete Public Safety Two Way Radio Enhancement Signal Booster System to provide enhanced two-way radio reception utilizing an amplified booster system, Yagi outdoor directional antenna, and an array of interior antennas to meet the requirements of the Authority Having Jurisdiction (AHJ) regarding Two Way Radio Enhancement Systems. Final system design is to be based on an ERRC report as evaluated by the AHJ.

BOOSTER LOCATION:

Provide and install one (1) (700-800 MHz) digitized public safety booster in a location to be determined. Provide and install LMR400 coaxial riser rated cable in conduit from the building exterior to the booster location to meet installation guidelines. Install one (1) J-bar antenna mast and one (1) Yagi exterior antenna and weatherproof enclosure. Antenna to be configured to receive maximum signal. Install one (1) in-line lightning protector in a NEMA rated enclosure to meet the engineered specification.

Provide and install one (1) 100 AH battery backup system and one (1) annunciator panel to meet engineered specifications and AHJ code requirements.

ANTENNAS:

Provide and install 1/2" Aluminum Plenum Rated Low-loss Air Dielectric Armored Coaxial Cable (must be preapproved by the AHJ as an alternative to conduit) from the booster location to each designated interior antenna location. Terminate coaxial cable on splitters and couplers in NEMA rated enclosures. Antennas engineered as required to achieve maximum antenna coverage. Verify antenna isolation and perform an RF spectrum analysis to confirm compliant operation. Register the booster as required with the FCC.

GENERAL SPECIFICATIONS:

- Donor antenna cable to be LMR400 low loss coaxial riser rated cable run in conduit to meet specification.
- Coaxial Cable will terminate on the Public Safety Booster located in the designated room.
- Interior antenna cable to be 1/2" Aluminum Plenum Rated Low-loss Air Dielectric Armored Coax (must be preapproved by the AHJ) installed to meet installation guidelines.
- All coaxial cable will terminate in a NEMA rated enclosure at each splitter, coupler, antenna, and protector.
- Coaxial Cable to be tested.
- NCS will warranty all labor and materials for a period of 1 year from the date of acceptance of the system.

- Only the work identified in this proposal is included, any other work or changes can be addressed in a revised proposal when changes are received.
- Pricing is based upon standard working hours and adequate access to install cable.
- AHJ submittal package provided.

EXEMPTIONS / ASSUMPTIONS:

- Donor antenna conduit to be provided and installed by others.
- All floor and wall penetrations to be provided and fire caulked by others.
- Roof penetration, if required, to be by others.
- Dry contact alarm relays in the designated room, integration, and connectivity to the fire alarm communications panel to be provided by others.
- One (1) dedicated 20-amp circuit with lockout required for the booster and battery backup to be provided by others at the booster location.
- Electrician to provide ground bars and grounding of equipment at the booster headend and donor antenna locations.
- 2-hour fire rated BDA location and risers to be hardened by others if required.
- Additional filters that may be required due to interference issues caused by an onsite transmitter are not included.
- Non-union labor.
- Patching and / or painting of drywall, ceilings, walls, etc.
- No Liquidated or consequential damages.

Total BUDGETARY ERRES Cost: *$38,005.00

**Should Network Cabling Services, Inc. be required to obtain the services of an attorney to collect any sums which may be due under this contract, and which are not paid, the Network Cabling Services, Inc. shall be entitled to all reasonable attorney's fees on behalf of their counsel in bringing or enforcing any of their rights under this agreement, said fees to include Court costs and interest, and shall include cost and attorney's fees for appellate work.*

All pricing is good for 30-day period, if change order is not accepted in writing within this period all wire, PVC products and all steel/metal products will have to be repriced at invoice plus mark-up for profit and overhead. This is a result of the continuously rising cost of these materials. Due to the volatile market, to save all parties involved (Owner, General Contractor, Electrical Contractor and NCS/Network Cabling Services, Inc.) an added cost associated with the continuous rising cost of all copper wire, Network Cabling Services, Inc. reserves the right (if approved by Owner/General Contractor) to purchase the wire and store on site in a storage container provided by NCS. NCS would then ask to be paid within the first 30 days of the contract for this wire purchase. If not accepted by (Owner/General Contractor) NCS would then have the right to re-price all wire at invoice cost plus mark up of profit and overhead at time of wire purchase. We at NCS feel that this is the best solution for all parties involved (General Contractor, Electrical Contractor and NCS) but mainly the Owner. Network Cabling Services, Inc. shall be entitled to a finance charge of 1 ½% per month on the unpaid balance of any amounts which are not paid within 30 days after the due date herein.

All material is guaranteed to be as specified. All work to be completed in a workmanlike manner according to standard practices. Any alteration or deviation from the above specifications involving extra costs will be executed only upon written orders and will become an extra charge over and above the estimate. No contingencies have been made for strikes, accidents, or delays beyond our control. The owner is to carry fire, tornado, theft and other necessary insurance. Our workers are fully covered by Workmen's Compensation Insurance.

Estimate #50-24347

City of Port Orange
Public Utilities
Field Operations
Building

11/12/2024

SCOPE OF WORK

PDS: Brief Description

INCLUSIONS:

- Install J-Hooks attached to Building Structure, for proper cabling support.
  - Coming off Cable Tray (Installed by E,.C)

- I.T Room #141 (MDF):
  - Administration Section:
    - Install Cat 6 CMP Cables from MDF to locations.
      - (16) D1 Cat 6 Blue Cables @ TV Locations
        - HDMI to be installed from TV to Wall Jacks
      - (45) D2 Cat 6 Cables @ Office Locations
      - (08) D6 Cat 6 Blue Cables @ Floor Box Locations
        - OSP to be installed in slab to nearest accessible ceiling
        - UTP from accessible ceiling to MDF
      - (05) D2 Cat 6 Green Cables @ Wireless Access Point (WAPs)
      - (02) D1 Cat 6 Yellow Cables @ CCTV Locations

  - Warehouse Section:
    - Install Cat 6 CMP Cables from MDF to locations.
      - (02) D1 Cat 6 Blue Cables @ Wall Phone Locations
      - (08) D2 Cat 6 Blue Cables @ Warehouse Locations
      - (02) D2 Cat 6 Green Cables @ Wireless Access Point (WAPs)
      - (06) D1 Cat 6 Yellow Cables @ CCTV Locations

- Cables will be terminated at Locations using Cat 6 Jacks and installed in:
  - 2-6 Port Flush Mounted Faceplates (Office)
  - 2 Port Surface Box (WAPs)
  - 1 Port Surface Box (CCTV)
  - 2 Port Flush Mounted Faceplates (CATV)
    - HDMI Insert to be installed for Cable down to lower faceplate

- MDF:
  - Provide & Install:
    - (02) 4 Post CPI Floor Rack #50120-B03
    - (06) 6” Vertical Panduit Wire Managers #PR2VDS06
    - (01) 12” Ladder Rack CPI #10250-712
    - (01) Isolation Pad CPI #10605-019
    - (01) 6” Elevation Kit CPI #10508-706
    - (02) 48 Port Cat 6 Commscope Patch Panels #760180059
    - (02) Horizontal CPI Power Strips #12850-705
    - (11) 4x8x3/4 AC Graded Plywood w/ 2 Coats of Fire-Retardant Paint

- Fiber-Optic Backbone:
  - Install (1) 12 Strand Outdoor Rated Single Mode Fiber Optic Cable from MDF to each Gate NEMA Box
  - Fiber will get terminated using SM "ST" Splice Cassettes
  - Provide and install (01) Fiber LIU w/ ST Fiber Bulkhead on MDF I.T Rack.
  - Provide and install (01) Fiber LIU w/ ST Fiber Bulkhead in each Gate NEMA Box
- Grounding:
  - #6 THHN Wire to be used to Ground n Bond 2 Post Rack and 12" Ladder Rack in MDF, with 2 Hole Compression Lugs
    - Bus Bar and Grounding Source to be provided by E.C
- Labeling:
  - Cat 6 Cable to have wrap around labels at each termination point
    - TR/Room/Patch Panel/Port
  - Face plates to signify TR/Room/Patch Panel/Port
  - Patch Panel to signify Patch Panel/ Port
  - Fiber cable to have wrap around labels at each termination point
    - Strand Count/Type/Room From/Room To
  - Fiber LIU
    - Strand Count/Type/Room From/Room To
- Testing:
  - Cat 6 to be Certified with a Level 5 Fluke DSX
  - Fiber to be Certified with a Level 5 Fluke DSX with fiber modules.

- Warranty:
  - NCS will warranty all labor and materials for a period of 1 year from the date of acceptance of the system.
  - NCS to provide a 25 Year Manufacture Warranty

EXCLUSIONS:

- Installation of WAPs is NOT included in this proposal.
  - As per responsibility matrix
- Excludes all active Switch, Camera, and any other equipment & not specifically covered in this quote.
  - As per responsibility matrix
- Patch Cords are included with this proposal, to be installed by Owners Representative
- Excludes any TV Brackets and/or TV
  - Owner Provided and Installed, as per responsibility matrix
- Permit and Fees are included with this proposal
- Fire Caulking is to be performed by E.C or G.C
- Scissor Lift is included with this proposal
- Proposal is based drawings dated 9/30/2024
- FINAL Scope Review to be performed prior to contract signing
- Cables Tray in Hallways, Conduit, Sleeves and Back Boxes to be installed by E.C

Total PDS Project Sum: *$101,500.00*

ACCESS CONTROL: Brief Description

Access Control system per drawings as listed above. The quantities are based strictly on project drawings. Additional devices that may be required are not included within this proposal. The project is also bid for electrical contractor to provide all wall penetrations with sleeves and any necessary conduit raceways or boxes with minimum ¾ inch conduit stub ups. All cabling above ceiling will be run free wire.

INCLUSIONS:

- Provide & install plenum-rated composite access control cabling to (26) door locations and (3) gate locations.
- Provide & install (2) Intelligent System Controllers.
- Provide & install (2) LSP Power Supplies.
- Provide & install (16) Reader Input Modules.
- Provide & install (34) HID Card Readers along with Door Contacts, and wired connections to locking hardware.
- Provide & install Access Control Workstation & Software.
- Provide (50) Access Cards.
- Commission and test the system.
- Provide all close out documents and as-built drawings.

EXCLUSIONS:

- Any 120Vac for control panels.
- All Door Hardware to be provided by others.
- Any raceway or boxes required for cabling/equipment.
- All fire caulking of penetrations shall be done by others.

Total ACCESS CONTROL Project "Budgetary" Sum: *$133,900.00*

FIRE ALARM : Brief Description

Fire Alarm system per drawings and specifications as listed above. The quantities are based strictly on project drawings. Additional devices may be required for a code compliant system and are not included within this proposal. The project is also bid for electrical contractor to provide all wall penetrations with sleeves and any necessary conduit raceways or boxes with minimum ¾ inch conduit stub ups. All cabling above ceiling will be run free wire.

INCLUSIONS***:***

- All fire alarm equipment depicted on contract drawings.
- Shop drawings for submittal to engineer and county for permitting.
- Commission and test the system.
- Provide all close out documents and as-built drawings.
- Surge protection for any cabling leaving building.

EXCLUSIONS***:***

- Any 120 Vac for control panels.
- Duct Detectors are to be mounted by Mechanical Contractor.
- Lockbox is to be provided by others.
- Any raceway or boxes required for fire alarm cabling/equipment.
- All fire caulking of penetrations shall be done by others.
- Monitoring of the fire alarm system is not included in the base proposal.

Total FIRE ALARM Project "Budgetary" Sum: *$38,900.00*

CCTV SYSTEM : Brief Description

CCTV system per drawings as listed above. The quantities are based strictly on project drawings. Additional devices that may be required are not included within this proposal. The project is also bid for electrical contractor to provide all wall penetrations with sleeves and any necessary conduit raceways or boxes with minimum ¾ inch conduit stub ups. All cabling above ceiling will be run free wire.

INCLUSIONS*:*

- Provide and install Cat6 cabling from MDF to (10) camera locations, midspan PoE extenders as necessary.
- Provide & install (6) 180 Dome Cameras w/ mounting accessories.
- Provide & install (4) 360 Dome Cameras w/ mounting accessories.
- Provide and install (1) 6TB 12-Channel Video Server with VMS Software, Camera Licenses and PoE Switch.
- Provide (1) 27" Security Monitor.
- Commission and test the system.
- Provide all close out documents and as-built drawings.

EXCLUSIONS*:*

- Racks, rack power & fiber backbone by others.
- No provisions have been made to provide & install strong poles.
- Any raceway or boxes required for cabling/equipment.
- All fire caulking penetrations shall be done by others.

Total CCTV SYSTEM Project "Budgetary" Sum: *$45,800.00*

**Should Network Cabling Services, Inc. be required to obtain the services of an attorney to collect any sums which may be due under this contract and which are not paid, the Network Cabling Services, Inc. shall be entitled to all reasonable attorney's fees on behalf of their counsel in bringing or enforcing any of their rights under this agreement, said fees to include Court costs and interest, and shall include cost and attorney's fees for appellate work.*

All pricing good for 30 day period, if change order is not accepted in writing within this period of time all wire ,PVC products and all steel/metal products will have to be reprised at invoice plus mark-up for profit and overhead. This is a result of continuous rising cost of these materials.

Due to the volatile market, in an effort to save all parties involved (Owner, General Contractor, Electrical Contractor and NCS/Network Cabling Services, Inc.) and added cost associated with the continuous rising cost of all copper wire. Network Cabling Services, Inc. reserves the right (if approved by Owner/General Contractor) to purchase the wire and store on site in a storage container provided by NCS. NCS would then ask to be paid with-in the first 30 days of contract for this wire purchase. If not accepted by (Owner/General Contractor) NCS would then have the right to re-price all wire at invoice cost pus mark up of profit and overhead at time of wire purchase. We at NCS feel that this is the best solution for all parties involved (General Contractor, Electrical Contractor and NCS) but mainly the Owner.

Network Cabling Services, Inc. shall be entitled to a finance charge of 1 ½% per month on the unpaid balance of any amounts which are not paid within 30 days after the due date herein.

All material is guaranteed to be as specified. All work to be completed in a workmanlike manner according to standard practices. Any alteration or deviation from above specifications involving extra costs will be executed only upon written orders, and will become an extra charge over and above the estimate. No contingencies have been made for strikes, accidents or delays beyond our control. Owner is to carry fire, tornado, theft and other necessary insurance. Our workers are fully covered by Workmen's Compensation Insurance.

EMERGENCY RESPONDER RADIO COVERAGE (ERRC) TEST

November 12, 2024

SCOPE OF WORK:

Perform an Emergency Responder Radio Coverage (ERRC) test to measure 700-800 MHz RF transmission levels to meet the requirements of the Authority Having Jurisdiction (AHJ).

This test and survey requires an FCC GROL holder and/or a PC Tel factory certified technician physically performing on-site tasks to identify and document where frequencies and transmission levels for emergency first-responder radio networks pass or fail.

EMERGENCY RESPONDER RADIO COVERAGE TEST (ERRC) PROCEDURE:

Network Cabling Services, Inc. will review the documents and verify the requirements with the AHJ including information on frequencies, radio site locations, and any other jurisdiction-specific requirements such as FCC GROL and test equipment technician certification.

NCS will tailor the ERRC test to the specific frequencies used by the local first responders. Some municipalities have first responders on separate systems meaning multiple frequency bands need to be identified. NCS will provide the pre-design research needed to flush out these requirements. Per NFPA 1225, 2022 edition the AHJ and the FCC frequency license holder are tasked with providing technical information specific to their requirements for testing purposes.

Per NFPA guidelines, NCS will prepare a compliant testing grid based on client provided floor plans. Testing will be completed using a grid pattern with a minimum of 20 test grids for each floor tested (or more depending on building size and local code requirements) to a maximum of 80 ft. (24.4 M) to encompass the entire floor area of each building.

Following the established floor grid pattern for each floor, the PC Tel Factory certified technician and / or the FCC GROL holder will conduct a physical walk test using the PC Tel tester to sample signal strength measurements and other AHJ specific criteria. Readings will be collected and noted during the walk test in all accessible grids within the defined grid area boundary.

The testing device will be the 08902-E IBFLEX PLATFORM AGILENT E4438C.

Two signal failures per floor are typically permitted (90% passing grids required), though this can vary by building type and local enforcement of fire codes. Critical areas require a 99% pass rate.

TEST REPORT:

Emergency Responder Radio Coverage results are prepared on a per building and per floor basis, in a summary format indicating building location, numerical grid RSSI value, SINR, FBER, and any additional criteria required by the AHJ.

NCS provides a visual grid map of all test results with passing and failing grids noted for each floor of each building tested based on parameters established by the AHJ.

Additional site-specific information is provided as required and may include a technician synopsis. Typically, weather conditions at the time of the test and any disclaimers are listed in this section of the report.

AUTHORITY HAVING JURISDICTION (AHJ):

The final evaluation regarding building enhancement requiring a public safety two-way radio system (BDA) is determined by the AHJ.

All NCS ERRC testing includes submission of the documentation to the AHJ, if desired. Supporting documentation includes calibration details of the testing device, a copy of the FCC GROL, and individual certifications for each technician performing the test and survey. A copy of the report is also submitted to the client.

ASSUMPTIONS:

- Test grid accuracy is based upon Owner or General contractor provided up-to-date dimensional floor plans for each floor of each building to be tested.
- Owner, Manager, or General Contractor to provide access to each area to perform testing to include private offices and restricted areas throughout the building.
- An escort will be provided, at no charge to NCS, to provide direction and unlock doors as required during the entire testing and surveying process.
- Escort to remain with the test technician(s) throughout the entire testing process.
- All test and survey procedures are to be performed during regular business hours weekdays.

Total ERRC & DAQ Cost: ***$1,094.00****

All work to be completed in a workmanlike manner according to standard practices. Any alteration or deviation from the above specifications involving extra costs will be executed only upon written orders and will become an extra charge over and above the estimate. No contingencies have been made for strikes, accidents, or delays beyond our control. Owner is to carry fire, tornado, theft, and other necessary insurance. NCS employees are fully covered by Workmen's Compensation Insurance.

PORT ORANGE, FLORIDA 32129

BUDGETARY
EMERGENCY RESPONDER RADIO ENHANCEMENT SYSTEM
(ERRES)

November 12, 2024

BUDGETARY SCOPE OF WORK:

Provide and install a complete Public Safety Two Way Radio Enhancement Signal Booster System to provide enhanced two-way radio reception utilizing an amplified booster system, Yagi outdoor directional antenna, and an array of interior antennas to meet the requirements of the Authority Having Jurisdiction (AHJ) regarding Two Way Radio Enhancement Systems. Final system design is to be based on an ERRC report as evaluated by the AHJ.

BOOSTER LOCATION:

Provide and install one (1) (700-800 MHz) digitized public safety booster in a location to be determined. Provide and install LMR400 coaxial riser rated cable in conduit from the building exterior to the booster location to meet installation guidelines. Install one (1) J-bar antenna mast and one (1) Yagi exterior antenna and weatherproof enclosure. Antenna to be configured to receive maximum signal. Install one (1) in-line lightning protector in a NEMA rated enclosure to meet the engineered specification.

Provide and install one (1) 100 AH battery backup system and one (1) annunciator panel to meet engineered specifications and AHJ code requirements.

ANTENNAS:

Provide and install 1/2" Aluminum Plenum Rated Low-loss Air Dielectric Armored Coaxial Cable (must be preapproved by the AHJ as an alternative to conduit) from the booster location to each designated interior antenna location. Terminate coaxial cable on splitters and couplers in NEMA rated enclosures. Antennas engineered as required to achieve maximum antenna coverage. Verify antenna isolation and perform an RF spectrum analysis to confirm compliant operation. Register the booster as required with the FCC.

GENERAL SPECIFICATIONS:

- Donor antenna cable to be LMR400 low loss coaxial riser rated cable run in conduit to meet specification.
- Coaxial Cable will terminate on the Public Safety Booster located in the designated room.
- Interior antenna cable to be 1/2" Aluminum Plenum Rated Low-loss Air Dielectric Armored Coax (must be preapproved by the AHJ) installed to meet installation guidelines.
- All coaxial cable will terminate in a NEMA rated enclosure at each splitter, coupler, antenna, and protector.
- Coaxial Cable to be tested.
- NCS will warranty all labor and materials for a period of 1 year from the date of acceptance of the system.

- Only the work identified in this proposal is included, any other work or changes can be addressed in a revised proposal when changes are received.
- Pricing is based upon standard working hours and adequate access to install cable.
- AHJ submittal package provided.

EXEMPTIONS / ASSUMPTIONS:

- Donor antenna conduit to be provided and installed by others.
- All floor and wall penetrations to be provided and fire caulked by others.
- Roof penetration, if required, to be by others.
- Dry contact alarm relays in the designated room, integration, and connectivity to the fire alarm communications panel to be provided by others.
- One (1) dedicated 20-amp circuit with lockout required for the booster and battery backup to be provided by others at the booster location.
- Electrician to provide ground bars and grounding of equipment at the booster headend and donor antenna locations.
- 2-hour fire rated BDA location and risers to be hardened by others if required.
- Additional filters that may be required due to interference issues caused by an onsite transmitter are not included.
- Non-union labor.
- Patching and / or painting of drywall, ceilings, walls, etc.
- No Liquidated or consequential damages.

Total BUDGETARY ERRES Cost: *$38,005.00

**Should Network Cabling Services, Inc. be required to obtain the services of an attorney to collect any sums which may be due under this contract, and which are not paid, the Network Cabling Services, Inc. shall be entitled to all reasonable attorney's fees on behalf of their counsel in bringing or enforcing any of their rights under this agreement, said fees to include Court costs and interest, and shall include cost and attorney's fees for appellate work.*

Subject: Emergency Responder Radio coverage test Port Orang Public Works Facility
Attachments: PORT ORANGE ERRC PROPOSAL 11-24.pdf; TESTING CERTS rev4.1.pdf; BUDGETARY ERRES Quote 10-24.pdf

Importance: High

Good morning~

Thank you for the opportunity to reply to your ITB for The PORT ORANGE PUBLIC UTILITIES FIELD OPERATIONS BUILDING.

Our proposal to provide an Emergency Responder Radio Coverage test is attached for your review.

AHJs now require NFPA / IFC compliant Emergency Responder Radio Coverage tests and / or Delivered Audio Quality (DAQ) surveys to obtain a CERTIFICATE OF OCCUPANCY.

NCS RF tests are performed by an FCC Licensed GROL & factory certified PC Tel test technician. We assist with Testing compliance including researching local jurisdiction coverage testing protocols and providing easy to understand AHJ compliant test results.

Your purchase order or our signed scope of work will allow us to schedule an Emergency Responder Radio Coverage test and / or Delivered Audio Quality (DAQ) survey to meet your construction schedule and code compliance requirements.

I have also attached a Budgetary Emergency Responder Radio Enhancement System (ERRES) quotation. This budgetary quote is based upon the assumption of total building failure. If required, the final BDA system design would be dependent on the results of the ERRC test and DAQ survey as evaluated by the AHJ.

If you have questions or need clarification on any item please contact me. I would appreciate your feedback.

Best,
Steve

Re: Port Orange Public Utilities Field Ops Bldg. – Systems Proposal

JSC Systems, Inc. is pleased to furnish pricing for the following scope of work on the above referenced project. Pricing is based only on drawings sheets dated 9/30/2024, any changes/additions will be an added cost. We acknowledge 0 addendums at this time. Drawings are not stamped by an Engineer of Record as required by codes. Third party electrical engineer stamp is not included in proposal.

Fire Alarm System – No Specification Section – JSC Systems proposes to provide and install an addressable fire alarm system based on the specification listed above and as shown on the project drawings.

- Providing EST Fire Alarm System
- Horn Strobe Evacuation
- Class B Circuits in conduit
- Conduit by others
- No 2 hour rated fire walls - 2 hour rated cabling or raceways not required

Voice/Data/CATV Structured Wiring Distribution System – Specification Section 27 00 00 - JSC Systems proposes to provide and install a new structured wiring system as shown on the project drawings.

- All active network equipment (WAPs, network switches, routers, computers, etc.) by provided/installed by others
- All pathways including conduit (with pull string), Microduct, Cable tray (hallways) provided/installed by others (excluding J-hooks)
- All backboards, paint, sleeves, firestop provided/installed by others
- All Grounding Conductors, TGBM and TGBs provided/installed by Electrical Contractor
- Conduit Grounding provided/installed by Electrical Contractor
- Temporary voice/data for construction offices, trailers etc. are excluded
- All Access Hatches provided/installed by others
- All cable in/below slab will require a wet rating. These cables will require a transition to indoor type cable within 50' of leaving the PVC conduit

This proposal is based on JSC Systems, Inc

1. Furnishing material, wire, and labor for installation of the above listed system(s) in the quantities as shown on the drawings. We shall provide wire, system devices and complete final control panel terminations, with the exception of conduit, standard electrical boxes, terminal cabinets, plywood backboards, Main 120VAC power wiring, which are to be supplied and installed by your firm
2. Furnishing City / County / State permit fees, if applicable.
3. Furnishing submittals, shop drawings, as-built drawings, owner, and maintenance manuals as required.
4. Providing termination of central equipment, programming, and one man for final testing, inspection, certification, and owner instruction for the above referenced system(s).
5. Providing our standard insurance coverage for this project. If additional insurance is required including "additional insured's," we reserve the right to amend our proposal to include the additional insurance and pricing will be adjusted accordingly. The "additional insured" fee is established at $575.00 per "additional insured".

Your firm to:

1. Furnish and install all conduit, standard boxes, all terminal cabinets, 120VAC power and 120VAC power wiring. All conduit shall be furnished with nylon pull string. Special boxes such as Fire Alarm System control panel cabinets, special back boxes, etc. to be furnished by JSC Systems, Inc. and installed by your firm.
2. Work with JSC Systems, Inc. to establish a project schedule with appropriate updates for our use in order to schedule manpower, long lead time equipment items, etc.
3. Work with JSC Systems, Inc. to establish inspection dates, completion dates, change in work, and other contractor coordination, etc. in a timely manner.
4. Furnish fire stop material for all wall and floor penetrations.
5. Furnish Auto Cad 2000 or newer backgrounds for our use in developing submittal and permit drawings. If electronic background drawings are not available, an additional fee of $75.00 per hour will be charged to develop electronic background drawings from which we will develop our shop drawings.
6. Furnish all patching and painting, etc. as necessary.

Pricing is as follows:

Fire Alarm System – Price: $32.542.00

Voice/Data/CATV System – Price: $92,247.00

Terms and Exclusions:

- System price is based of acceptance within 30 (Thirty) days of the proposal date.
- Proposal is based on project specifications and project electrical system sheets, any alterations to quantities and/or functions by the Owner, Architect, Engineer, Local and/or State Fire Marshal's office shall incur a change in the proposed system price.
- This proposal is based upon all wire being in conduit. If free wire is used, or Plenum rated cable is required, we reserve the right to revise our proposal for Plenum rated cable and cable management.
- Surge suppression is included for our systems (if specified).
- A bond is currently not included in our proposal pricing.
- JSC Systems, Inc. shall provide a 1 (one) year warranty covering material furnished by our company, excluding Acts of God, fire, theft, vandalism or tampering by unauthorized personnel. All warranty work shall be completed during normal working hours, Monday through Friday. If warranty work is requested after business hours or on holidays, it will be billed at our after hours and holiday service rates.

- Monthly billing is rendered based on work in place on the 25th of the month. Payment of completed work during the month shall be due on the 10th of the following month. JSC Systems, Inc. shall have the right to stop work without penalty for non- payment within terms upon 10 (ten) days of written notification. JSC Systems, Inc. shall have title to and the right to possession of the equipment as outlined above until receipt of total payment.
- JSC Systems, Inc. reserves the right to deny any contract which may result from this proposal should it not be in full compliance with standard AIA contracts and documents.
- **Man lift equipment is not provided in this proposal price.**

We appreciate the opportunity to work with your firm on this project.
Please contact us if there any questions.

Sincerely,

Cliff T. Long II
Pre-Construction Manager

PROPOSAL

11/13/2024

Project: City of Port Orange Public Utilities Field Operations Facility

TO: Wharton-Smith, Inc

Bob McClelland
(407) 321-8410
bmcclelland@whartonsmith.com

Scope of Work

SITEWORK

	Quantity	Unit Cost	Total Cost
Mobilization	1 ea	$9,800.00	$9,800.00
Install Silt Fence	4,800 ft	$3.00	$14,400.00
Install Orange Tree Barricade	2,300 ft	$4.00	$9,200.00
Turbidity Barrier	700 ft	$8.00	$5,600.00
Install Construction Entrance	1,400 sq ft	$7.00	$9,800.00
Clear & Grub -	12 ea	$18,900.00	$226,800.00
Demuck pond bottom	1 ea	$29,500.00	$29,500.00
Excavate	62,500 cu yd	$3.50	$218,750.00
Backfill existing pond	18,900 cu yd	$4.50	$85,050.00
Dewatering	1 ea	$31,500.00	$31,500.00
Grading to within 1/10th Ft (SY)	59,254 sq yd	$1.45	$85,918.30
Final Grading to within 1/10th Ft (SY)	59,254 sq yd	$0.65	$38,522.00
construction and site acess roads (8" crushed concrete)	2,950 sq yd	$17.00	$50,150.00
subcontractor parking (6" crushed concrete)	1,600 sq yd	$15.00	$24,000.00
WSI trailer and office parking (6" crushed concrete)	650 sq yd	$15.00	$9,750.00
	--	--	$848,740.30

PAVING

	Quantity	Unit Cost	Total Cost
Mobilization	1 ea	$1,200.00	$1,200.00
Install 1.5" SP 9.5 Asphalt	12,989 sq yd	$14.90	$193,536.10
Install 6" Crushed Concrete Base	13,286.15 sq yd	$18.99	$252,304.05
Install 12" Stabilized SubBase	13,684.74 sq yd	$8.25	$112,899.09
	--	--	$559,939.23

CONCRETE (FLATWORK)

	Quantity	Unit Cost	Total Cost
Install 6" Concrete sidewalk	**7,360 sq ft**	**$6.25**	**$46,000.00**
	--	--	**$46,000.00**

CONCRETE (CURB)

	Quantity	Unit Cost	Total Cost
Install F-Curb	**1,710.3 ft**	**$17.65**	**$30,186.80**
Install D-Curb	**1,146.4 ft**	**$15.90**	**$18,227.76**
Install Valley Gutter	**86 ft**	**$28.00**	**$2,408.00**
Install Environmental Curb	**198 ft**	**$22.00**	**$4,356.00**
	--	--	**$55,178.56**

UNDERGROUND (STORM)

	Quantity	Unit Cost	Total Cost
Remove Existing 36" Pipe	**1 ea**	**$1,052.63**	**$1,052.63**
Remove Existing Inlets	**2 ea**	**$526.32**	**$1,052.63**
36" HP Storm	**40 ft**	**$144.53**	**$5,781.05**
30" HDPE Storm	**380 ft**	**$93.39**	**$35,488.00**
24" HDPE Storm	**300 ft**	**$71.26**	**$21,378.95**
18" HDPE Storm	**160 ft**	**$46.45**	**$7,432.42**
8" HDPE Storm	**20 ft**	**$19.37**	**$387.37**
Fittings	**1 ea**	**$27,167.37**	**$27,167.37**
Dewatering	**1 ea**	**$24,210.53**	**$24,210.53**
12" PVC	**364 ft**	**$39.55**	**$14,395.24**
10" PVC	**994 ft**	**$30.28**	**$30,102.51**
8" PVC	**14 ft**	**$27.07**	**$379.03**
Cleanouts	**16 ea**	**$810.93**	**$12,974.82**
Trench Drain (ACO)	**101 ft**	**$222.02**	**$22,424.13**
Type "D" Inlets	**8 ea**	**$6,689.74**	**$53,517.89**
Storm Manhole	**1 ea**	**$5,818.95**	**$5,818.95**
36" MES	**1 ea**	**$2,052.63**	**$2,052.63**
30" MES	**1 ea**	**$1,578.95**	**$1,578.95**
24" MES	**3 ea**	**$947.37**	**$2,842.11**
Roof Drain Turn-Ups	**28 ea**	**$918.65**	**$25,722.27**
	--	--	**$295,759.47**

UNDERGOUND (SANITARY)

	Quantity	Unit Cost	Total Cost
Grease Trap (5,000 Gallon)	**1 ea**	**$35,157.89**	**$35,157.89**
48" Sanitary Manholes	**3 ea**	**$7,592.99**	**$22,778.97**
48" Sanitary Manhole w/ Outside Drop	**1 ea**	**$10,685.26**	**$10,685.26**
Dewatering	**1 ea**	**$5,789.47**	**$5,789.47**
8" DR26 PVC	**392 ft**	**$30.67**	**$12,024.08**

	Quantity	Unit Cost	Total Cost
6" DR26 PVC	84 ft	$100.75	$8,462.78
8" DR18 PVC	140 ft	$40.15	$5,620.63
6" DR18 PVC	180 ft	$24.63	$4,433.68
Fittings	1 ea	$5,128.42	$5,128.42
Trench Box for Drop Manhole	1 ea	$3,157.89	$3,157.89
Video Inspection	1 ea	$3,157.89	$3,157.89
Cleanouts (3ea C900/ 3ea DR26)	6 ea	$957.37	$5,744.21
Grease Trap Cleanouts (2-way)	2 ea	$916.84	$1,833.68
Loading Dock Trench Drain	1 ea	$8,326.32	$8,326.32
	--	--	$132,301.20

UNDERGROUND (WATER)

	Quantity	Unit Cost	Total Cost
12"x8" Wet Tap with Valve	1 ea	$7,434.74	$7,434.74
Temporary Jumper (Owner to Pay All Fees & Usage)	1 ea	$2,631.58	$2,631.58
8" DR18 PVC	640 ft	$38.05	$24,349.64
4" DR18 PVC	20 ft	$17.79	$355.79
Fittings	1 ea	$6,885.26	$6,885.26
8" Gate Valves	3 ea	$2,450.88	$7,352.65
4" Gate Valves	2 ea	$1,421.05	$2,842.11
2" Blue Poly Service (Meters + Box by City)	1 ea	$11,805.26	$11,805.26
2" Backflow (Meters + Box by City) (Certified)	1 ea	$4,086.32	$4,086.32
2" Flush Line w/ Backflow	1 ea	$4,398.95	$4,398.95
2" Blow off	1 ea	$1,800.00	$1,800.00
Fire Hydrant Assembly (Flow Tested)	1 ea	$7,148.42	$7,148.42
Hydrostatic and Bacterial Testing	1 ea	$4,800.00	$4,800.00
	--	--	$85,890.72

UNDERGROUND (FIRE)

	Quantity	Unit Cost	Total Cost
4" Detector Check w/ FDC	1 ea	$8,187.37	$8,187.37
8" DR18 PVC Restrained	520 ft	$38.04	$19,781.89
4" DR18 PVC Restrained	280 ft	$19.92	$5,576.42
Fittings	1 ea	$12,195.79	$12,195.79
Fire Hydrant Assembly	1 ea	$6,980.00	$6,980.00
4" In Building Risers	2 ea	$2,457.89	$4,915.79
8" Gate Valve	1 ea	$2,451.58	$2,451.58
Hydrostatic and Bacterial Testing + Flushing	1 ea	$5,526.32	$5,526.32
Permit (Owner to Pay All Fees)	1 ea	$789.47	$789.47
	--	--	$66,404.63

MISCELLANEOUS

	Quantity	Unit Cost	Total Cost

	Quantity	Unit Cost	Total Cost
Survey & As-Built for DSD Work	**1 ea**	**$31,411.76**	**$31,411.76**
Testing for DSD Work	**1 ea**	**$14,705.88**	**$14,705.88**

PROPOSAL APPENDIX

General Notes & Exclusions:

- Provided costs are based on (1) one mobilization, unless otherwise noted in Proposal.
- No tree barricades, landscaping, sod, seed, or mulch provided unless otherwise noted in Proposal.
- Removal and replacement of any rock or unsuitable material is not included, unless otherwise noted in Proposal.
- Not responsible for removal of any hazardous materials unless otherwise noted in Proposal.
- Price does not include septic tank abandonment of any or tank pumping unless otherwise noted in Proposal.
- SWPPP By Others unless otherwise noted in Proposal.
- All permits, impact fees, bonds, and inspection fees are to be handled by others unless otherwise noted in Proposal.
- Control staked by others.
- Not responsible for drainage in areas with less the ¼" per foot of fall.
- Not responsible for damage caused by others to our work or items we install; repairs will be at extra cost.
- Not responsible for damage to any unmarked utilities.
- Grade to plus or minus -.1' (one-tenth of one foot).
- Decrease in quantities often results in an increase in per-unit pricing.

Demolition Notes:

- Drewry Site Development retains all salvage rights, if Demolition occurs.
- Price does not include Rodent Abatement unless otherwise noted in Proposal.
- Price does not include removal or haul-off of any hazardous materials or fuel oils, unless otherwise noted in Proposal.

Asphalt Notes:

- If the original base was designed and previously installed by others, Drewry Site Development cannot guarantee this asphalt surfacing against possible future cracking, settlement, drainage problems, minor birdbaths or root heave by adjacent plant material. We do, however, guarantee our own work against all defects in materials and workmanship for a period of one year.
- New (fresh) asphalt pavement is subject to scuffing, marking and tire tracks. Drewry Site Development is not responsible for these issues.
- Drewry Site Development assumes when contacted by contractor that base/subbase are within specification tolerance, design elevation & cross slope. Drewry Site Development will be compensated per unit rate for any overruns due to elevation/cross slope corrections through no fault of Drewry Site Development.
- 1" Asphalt does not repair existing pooling issues.
- Any additional Asphalt tonnage will be billed at $200 per Ton.

Concrete Notes:

- All concrete is 3,000 psi unless otherwise stated.
- Normal access for concrete trucks is assumed. No pumping is included unless otherwise listed above.
- 1" Concrete does not repair existing pooling issues.
- Costs for concrete work is based on unit pricing.

Provisions:

- Proposal becomes a legal binding contract upon acceptance. Authorization to begin work described in this Proposal shall be deemed acceptance of the Proposal. In the event a subsequent or supplemental contract or agreement is executed hereafter with additional terms, the terms of this Proposal shall control in the event of a conflict unless otherwise agreed to in writing. In the event Owner/Prime Contractor terminates this Proposal or directs work to be started, Owner/Prime Contractor shall be liable to pay Drewry Site Development for any actual work authorized and performed up to the time of such termination billable at market rates which shall be due Net 30.
- Drewry Site Development's Proposal including all notes, terms and conditions mentioned herein must be signed where stated. Should the Owner or Contractor require a form other than Drewry Site Development's Contract Agreement, Drewry Site Development's full Proposal must be referenced as an attachment in the contract and must be signed by an authorized representative of both companies.
- Unless otherwise noted, Proposal is based on the Civil Plans. If Civil Plans conflict with any others, Civil Plans take precedence.
- Owner/Prime Contractor agrees to pay all attorney's fees & costs associated with collection of amounts due or other dispute or enforcement actions arising from this Proposal.
- Disputes arising from this Proposal shall be subject to venue and forum in the courts in and for Volusia County, Florida.
- Proposal based upon all quoted items being awarded as a package.
- Liquidated Damages are excluded unless otherwise noted in Proposal.
- Flow Down clauses are excluded unless otherwise noted in Proposal.
- Certified Payroll is not included unless otherwise noted in Proposal.
- If this project requires special or prevailing wages, unit price may be affected, and this Proposal shall be subject to revision.
- If quantities provided by Client vary by more than 10% from plan, Drewry Site Development reserves the right to adjust its unit prices.
- Drewry Site Development shall be provided with suitable access to the work area. If Drewry Site Development's work is dependent upon or must be undertaken in conjunction with the work of others, such work shall be performed and completed so as to permit Drewry Site Development to perform its work in an uninterrupted single shift operation.
- The project schedule must permit sufficient time for Drewry Site Development to complete our work. Drewry Site Development recognizes that time is of the essence and will begin performance and diligently perform the work in such a manner so as not to delay the project.

Drewry Site Development LLC
400 Venture Drive, Suite F
South Daytona, FL 32119
(386) 313-3220

- Drewry Site Development payment is not subject to a "condition precedent" of payment(s) from, to, or by Owner, Prime Contractor, or Financial Institution. In Privity Contracts, Payment in full will be made upon completion. In the event that the amount herein shown is not paid when due, interest at the highest legal rate per annum shall accumulate on total due. All costs of collection shall be paid by the customer including reasonable attorney fees. Florida Statutes 218 & 713 will be followed and applied in strict accordance, in their entirety. Notice To Owner/ Notice of Commencement information due with executed Proposal or prior to Drewry Site Development mobilization to the project.
- If the Proposal is for Unit/Qty vs Contract Sum (AIA), final billing and payment will be based on final measurements.
- All retainages withheld must be paid within (30) thirty days from the last day of work done by Drewry Site Development.
- In the event that the amount herein shown is not paid when due, interest at the prime rate plus 10% per annum shall accumulate on the total due.

Unless otherwise indicated in writing, this quotation expires (30) thirty days from date of Proposal and market increases may apply thereafter. This Proposal may be extended for additional periods of time, at the sole discretion of Drewry Site Development.

Should the project fail to be completed by the scheduled end date, Drewry Site Development reserves the right to renegotiate an adjustment to the prices quoted.

No later than seven (7) Days after receipt of an application for payment, Customer shall give written notice to Drewry Site Development disapproving or nullifying it or a portion of it, specifying the reasons for the disapproval or nullification. When the above reasons for disapproving or nullifying an application for payment are removed, payment shall be made for the amounts previously withheld.

Acceptance of Proposal:

The prices, specifications, and conditions above are satisfactory and are hereby accepted. You are authorized to do work as specified. Payment will be made as outlined.

Dear Wharton Smith Team,

Attached, please find our proposal for the City of Port Orange Public Utilities Field Operations Facility. We believe our approach aligns well with the project's needs, and we would be glad to discuss any questions you may have.

We look forward to the opportunity to collaborate with you again on this project.

Best regards,

Hope Drewry

Total Bid Price: $2,986,431.00

Notes:

- Proposal according to Zev Cohen CIVIL plans dated 09/24/2024.
- Upon execution of this proposal, this document shall become part of any binding contract.
- All work other than the items explicitly listed as part of this proposal above are excluded.
- All permits, permit fees, impact fees, inspection fees, and municipal fees by others.
- Any water tapping fees or meter fees that may be charged by the city are to be paid by others.
- Roof Drains ran to within 5 ft of building and stopped. Final 5 ft and connection to be made by others.
- All landscaping, irrigation, sodding, hydroseeding, and seed & mulch to be by others.
- Drainage piping will be tested by lamping only, if any other inspection is required, it will be at an additional cost.
- Bollards, bicycle racks, benches, trash cans, lighting and all other miscellaneous site furnishings to be by others.
- All fencing work, removal and installation, both temporary and permanent, to be by others.
- This is a lump sum proposal, unit prices are for informational purposes only.
- Electrical service and/or tamper switches are excluded, and shall be by others.
- This proposal is valid for Thirty (30) days, after which time it may be withdrawn due to market escalations.
- Electrical demo by others.
- Bollards by others.
- Dumpster pad, apron, & enclosure by others.
- Oil / water separator by others.
- Street sweeper ramp and Vehicle washdown completely by others. We will bring utilities to the footprint. All further work by others.
- Granular storage and concrete apron by others.
- GPS Civil shall take ownership of all excess soil materials. Should the owner decide to keep the excess material, we can provide an additional cost at a later time.
- It is our interpretation that none of the ponds on site are "bermed ponds" and therefore our proposal does not include any impervious materials as shown in detail ST-9. If it is deteremined that this impervious barrier is required, we will need it further detailed in the plans, and it will be at an additional cost.
- Geotechnical testing by others.
- Unsuitable removal bid according to results in geotech report provided at bid time. Should the site require unsuitable removal beyond what is depicted in the geotech, it will be at an additional cost.

ACCEPTED:

The above prices, specifications and conditions are satisfactory and are hereby accepted.

g) inlet apron	6	EA	935.00	$5,610.00
			subtotal. . .	$102,470.00
XIV. STRIPING ON SITE				
a) striping & signage	1	LS	16,300.00	$16,300.00
			subtotal. . .	$16,300.00
XV. SOD / SEED & MULCH				
a) sod, bahia	127,000	SF	0.67	$85,090.00
			subtotal. . .	$85,090.00

XVI. TEMPORARY ACCESS ITEMS

a) temporary water lines (includes up to 1,210 LF of 2" poly and 3 hose bibs)	1	LS	15,400.00	$15,400.00
b) 6" crushed concrete temporary parking lot (remove at end of project, restoration by others)	2,000	SY	33.00	$66,000.00
c) 8" crushed concrete crane access road (remove at end of project, restoration by others)	2,830	SY	43.00	$121,690.00
			subtotal. . .	$203,090.00
		BID TOTAL. . .		**$3,770,335.00**

ADDITIONAL ITEMS

1) export suitable material to offsite location within 7 miles of project	9,095	CY	11.40	$103,683.00
2) load suitable material into trucks for haul off (trucks provided by others)	9,095	CY	3.40	$30,923.00

**** * * -NOTES- * * ****

I. SITEWORK

1) bid based on accuracy of provided topo & soil report
2) overexcavation/recompaction of building pads not included
3) building pad calculated 6" below finished floor
4) removal/disposal of hazardous or contaminated material not included
5) excavation and removal of unsuitables quantity shown for budgetary purposes only; actual quantitities removed and replaced will be billed at the rates above
6) unsuitable quantitiy determined from borings AP-1, AP-2, AP-3, and AP-5 (Bechtol Report dated June 23, 2022 sheet 24)
7) demo & removal of existing structure not included
8) soil treatment by others (termite, fertilizer, etc)
9) strippings to be used as fill in landscape areas
10) backfilling of footers by others
11) stabilized sod area bid as 12" of LBR40 (no detail shown)

II. UTILITIES/STORM SEWER

1) relocation of conflicting utilities by others, if required (poles, conduits, etc.)
2) water meters by others
3) irrigation and landscaping, including removal/replacement of existing by others
4) roof drains not included
5) sanitary laterals, roof drains and water services terminated within 5' of building line, connections by others
6) video recording of sanitary is included
7) all pressure mains assumed to be no more than 5' deep at proposed connection locations
8) tamper switch for DDCV by others
9) we have provided an alternate for the 4" ACO trench drain

III. PAVING

1) if leveling course required, add $310.00 per ton (to be determined by county inspector)
2) all concrete flatwork within building footprint by others
3) dumpster pad & enclosure by others
4) fencing and walls by others
5) handicap ramps are included only in conjunction with itemized sidewalk as shown in proposal

IV. ADMINISTRATION

1) NOI, SWPPP, & NPDES inspections included for 12 months
2) permits or fees excluded
3) if performance bond is required, add 1.5% of contract
4) construction staking inclusive of contract items only
5) geotechnical testing by others
6) there will be an additional 5% charge for all credit card payments
7) this proposal is valid for 30 days from bid date
8) prices are subject to change on material, fuel, aggregate etc. due to the volatility of the market

All material is guaranteed to be as specified. All work to be completed in a workmanlike manner according to standard practices and in accordance with applicable building codes except as specifically modified above. Any alterations or deviation from the above specifications will be executed only upon written orders and may become an extra charge over and above the estimate. All agreements contingent upon strikes, accidents, or delays beyond our control. Owner to carry fire, tornado and other necessary insurance. Our workers are fully covered by Worker's Compensation Insurance.

SECTION 6 – SCOPE OF WORK

The Bidder shall utilize the information within this section of the Bid Manual to assist in the development of the Bid Proposal. The outlined scopes herein are not intended to detail the complete scope of the Bid Package. The Bidder is responsible for reviewing the Contract Documents to understand the full scope and requirements.

The Subcontractor Is to furnish all labor, equipment, material, subcontracts, and supervision required to complete the Scope of Work generally described as the **SITEWORK PACKAGE**, detailed herein, for the Public Utilities Field Operations Facility. All work shall be complete and in accordance with the Contract Documents. In the event of conflicts between the Scope of Work and other parts of the Contract Documents, this section shall take precedence.

1.1 WORK OVERVIEW

Provide complete, all required **Site Work, Utilities, Pavement and Misc. Demo**, for the Project known as **City of Port Orange Public Utilities Field Operations Facility**.

The Work included in this Subcontract is project specific and outlines the general Scope of Work for this Subcontract, all in complete accordance with the Plans and Specifications as defined in Exhibit "C" attached hereto.

Other Specification Sections may form a part of this Subcontract, whether listed or not.

The Scope of this Subcontract includes, but is not necessarily limited to, the furnishing and installation of the following Work by this Subcontractor.

1. Visitors - No one shall be admitted to the jobsite by the Subcontractor, except as necessary to perform the Work hereunder, without, in each instance, first obtaining the approval of the Contractor.

2. Replace Guardrails - This Subcontractor shall install, maintain and replace all required guardrails in accordance with OSHA Standards for the purpose of safety at all openings and suspended work at the locations not protected and where Subcontractor is performing work. Subcontractor is also responsible for all construction fencing, temporary walkways, overhead protection, signage, and/or barricades to perform work outside the boundaries of Contractor furnished construction fencing.

3. Ongoing Operations/Residential Environment/Parking - Without limitation of the foregoing, Subcontractor understands that the Work may be constructed near on-going business or facility operations and may be in and around private residences and neighborhoods. Subcontractor shall use its best efforts, in conformity with the applicable standard of care, to perform the services hereunder in a manner which will not interfere with the on-going business operations and residences. All construction employees are to enter and park in the construction parking area designated by Contractor. Subcontractors are responsible for all off-site parking of employees which may be required and busing to jobsite via route identified by Contractor. Busing of employees, jobsite vehicles or deliveries shall not be routed through surrounding neighborhoods.

4. Jobsite Storage - Subcontractor is aware of the existing site conditions and the limited space availability. On-site storage and staging of materials and equipment will be allowed, only as specifically approved by Contractor's Project Superintendent or Project Manager. All deliveries of Subcontractor will be coordinated through Contractor. If scheduled deliveries are not ready at appointed time, Contractor may refuse acceptance and deliveries will be rescheduled. All cost and/or delays associated with the refusal of deliveries will be the responsibility of the Subcontractor. Subcontractor has included in this Subcontract price, all off-site storage as may be required, including, but not limited to transportation of materials from staging area to site.

5. Phased Turnover - This Subcontractor acknowledges that the Project may have phased turnover in accordance with the Project Schedule ~~and that several mobilizations may be required and are included as part of this Subcontract~~. Additionally, Subcontractor acknowledges that the Project may have multi-buildings and that concurrent work on each building will be required in order to complete some phases ahead of the Project Schedule and all costs for doing same are included. **– one mobilization is included for each activity (earthwork, utilities, and base / paving)**

6. Owner's Facilities - All Project employees are subject to the Owner's rules and regulations while employed within their property limits. Use of the Owner's other parking lots and facilities by this Project's workmen are not permitted.

7. Limitation of Noise/Hours of Work - Subcontractor shall comply with all city, county, state and local jurisdictional authorities' Noise and Hours of Work Regulations.

8. This Subcontractor shall be responsible for all construction layout and staking required for Subcontractor's Scope of Work. Property and reference points will be provided by the Contractor.

9. This Subcontractor shall preserve all benchmark stakes and other survey marks, regardless of location or purpose. In the event these items are removed or destroyed by the Subcontractor's employees or others working on its behalf, the Subcontractor shall bear the full replacement cost.

10. This Subcontractor shall be responsible for all flagmen and traffic control personnel as necessary to get trucks for this Scope of Work in and out of the Project site in a safe and effective manner.

11. This Subcontractor shall provide all labor, equipment and materials for all excavation, trenching, backfill, compaction, dewatering, pumping, shoring, personnel protection, traffic control, filter materials, bedding materials, grading, and all other earthwork which may be required in strict accordance with the contract documents. This Subcontractor shall always provide a competent person trenching is taking place.

12. This Subcontractor shall be responsible for all re-inspection fees required for this Scope of Work and the work of all others working on its behalf.

13. This Subcontractor shall be responsible for preparing and submitting a dewatering application for ALL dewatering scheduled to take place on the project site. If it is determined that an earthen berm holding cell is required to hold water on site, it is the sole responsibility of this Subcontractor to install and remove this holding cell. All costs associated with permitting, pump, maintenance, and fuel are included.

14. This Subcontract specifically includes all site and utilities work, except for Charter Spectrum and Florida Power and Light.

15. Perform excavation of all retention ponds, swales, slopes and ditches in strict accordance with the Contract Documents inclusive of sodding of all banks and berm tops with Bahia grass. Watering of sod during the 60 day grow in period is included in this Subcontract. Mowing of all sodded areas is to be by others.

16. This Subcontractor understands that time is of the essence and shall expeditiously prepare shop drawings for all concrete storm structures and piping. All costs associated with expediting shop drawings and fabrication are included in this Scope of Work.

17. This Subcontractor understands that time is of the essence and shall expeditiously prepare shop drawings for all sanitary storm structures and piping. All costs associated with expediting shop drawings and fabrication are included in this Scope of Work.

18. This Subcontractor shall be wholly responsible for all signed and sealed Record Documents pertaining to your Scope of Work including, but not limited to, earthwork, storm, sanitary, water, and fire systems. Record Documents are to be signed and sealed by a State of Florida Professional Land Surveyor.

19. This Subcontractor shall provide all required engineering, testing, test reports, start-up, and quality control requirements within this Scope of Work in strict accordance with the Contract Documents.

20. This Subcontractor shall provide a complete Storm Water Pollution Protection Plan (SWPPP) in strict accordance with the Contract Documents, project location requirements, construction activities, and all Authorities Having Jurisdiction including, but not limited to, the installation of and removal of silt fence, erosion control, hay bales, inlet protection, tree protection, dust control, construction entrances and soil tracking prevention devices. This Subcontract specifically includes the installation of two (2) construction entrances as directed by Contractor's Superintendent. The proposed SWPPP is to be formally submitted by this Subcontractor and approved by Contractor in writing. After the initial installation, weekly inspections of the SWPPP and associated maintenance are to be by this Subcontractor. **– maintenance included while we are on site**

21. This subcontractor shall prepare an approved Storm Water Pollution Prevention Plan and submit to FDEP the NPDES permit documents including the "Notice of Intent" and "Notice of Termination." Provide all requirements

of the SWPPP including initial installation, weekly inspections, after-rain event inspections and continuous maintenance throughout the life of the project. **– 12 months of inspections included; maintenance included while we are on site**

22. This Subcontractor includes all required street sweeping as directed by the Contractor's Superintendent while all site balancing (import and export fill) activities are taking place. ~~Once site balancing activities are completed, street sweeping is to be by this Subcontractor.~~

23. This Subcontractor understands and agrees that the Project site will have ongoing operations, and that dust control is critical to the success of the project. This Subcontract includes all costs associated with having a functioning water truck on site for the duration of the project. Should water not be available at the project site it is this Subcontractor's sole responsibility to provide water via use of a hydrant meter, with all metering costs being included in this Subcontract. **– dust control included while we are on site**

24. All demolition included and/or implied in the Contract Documents is the responsibility of this Subcontractor including, but not limited to,

    a. Water, Sanitary, Storm, Electrical Utilities.
    b. existing piping systems,
    c. light poles and power poles (after being de-energized)
    d. sidewalks,
    e. concrete,
    f. pavement,
    g. curbing,
    h. signage,
    i. trees,
    j. shrubs,
    k. inlets,
    l. chain link fencing,
    ~~m. Existing Building Structure(s),~~
    n. vinyl fencing,

25. Demolition of existing storm structure(s) and utility lines are included in this scope of work. **– as shown on drawings**

26. Subcontractor is responsible for all saw cutting, core drilling, asphalt cutting, resurfacing, and patching as required by this scope of work in accordance with the Contract Documents.

27. This Subcontractor shall provide and install two construction entrances and the construction access road for site in strict accordance with the Contract Documents. Subcontractor shall be responsible for maintenance of the construction entrances for the duration as well as the removal as part of this scope of work. **– maintenance included while we are on site**

28. This Subcontract includes asphalt paving in strict accordance with the contract documents. This subcontractor understands that the first asphalt lift install may take place earlier in the project, but this shall be installed as directed by the Wharton-Smith Superintendent. Touch up of the first lift prior to the pavement of the second/final lift at the end of the project is included in this scope of work.

29. This Subcontractor shall provide, install, and remove one (1) temporary construction parking lot at the Contractor's trailer location. Parking lot to be 2,000 SY and include grading, filter fabric, and 6" of graded and compacted crushed concrete.

30. This Subcontractor shall provide and install all required Maintenance of Traffic (MOT) work required for the completion of this Scope. All costs associated with MOT plan development and execution are included.

31. This Subcontractor shall provide and install complete all civil piping requirements in strict accordance with the contract documents including, but not limited to storm sewer system, sanitary sewer system, domestic water system, and fire water system to 1' above finished floor, including all structures, spreader swales, geosynthetic mat, rip rap, outfalls, slot channels, grates, grate chains, mitered end sections, manholes, concrete collars, pipe, valves, fittings, cleanouts, drains, trench drains, warning and tracer wire or tape, fire hydrants, fire department connections, post indicator valves, back flow preventers, tamper switches (wiring to be completed by others), bedding material and testing.

32. This Subcontractor understands and agrees that the installation of the 2-1/2" temporary water line through the site is included in this scope of work, including but not limited to the installation of a poly line from the main service point of connection and three (3) stub ups as indicated by the Wharton-Smith Superintendent. **– up to 1,210 LF included**

33. This Subcontractor understands and agrees that all temporary excavations must have sides sloped at 1-1/2 to 1 ratio or utilize a trench box. If conditions do not allow for this sloping a trench box must be utilized and all equipment and production loss costs are included in this Subcontract.

34. This Subcontractor shall provide all testing, hydrostatic testing, bacteriological testing, and disinfection of underground utility systems in strict accordance with the Contract Documents, Building Code requirements, and all authorities having jurisdiction. All retesting that may be required is included in this scope and is the responsibility of this subcontractor.

35. This Subcontractor shall provide all required camera and video documentation of installed sanitary sewer lines in strict accordance with the Contract Documents. This Subcontractor also includes low-pressure air testing or vacuum testing of the sanitary sewer lines.

36. This Subcontractor shall provide all required camera and video documentation of installed storm sewer lines in strict accordance with the Contract Documents. This Subcontractor also includes laser profiling and water exfiltration testing of the storm sewer lines.

37. This Subcontractor shall be responsible for all tie-ins of sanitary sewer and storm sewer piping within 5' of the building and/or canopy including, but not limited to, sanitary piping, building downspouts, canopy downspouts, fittings, excavation, and backfill. ~~This scope includes all ferneo and square-to-round adapters required to make final connections to the downspouts. Additional mobilizations might be required to tie-in these once the downspouts have been installed (by others).~~ **– downspout adapters by others. One mobilization included; if final tie-ins are to be done at a later date, additional costs will be incurred**

38. This Subcontractor shall provide and install the oil water separator indicated on sheet C9 at the wash down area in strict accordance with the contractor documents including but limited to all accessories and associated materials for this scope of work.

39. This Subcontractor understands and agrees that this Scope of Work includes working around existing wetland and pond areas. All costs associated with protection of existing wetlands ~~and all water quality testing that may be required~~ is included in this Scope of Work. **– protection of existing wetlands included as shown on plans; water quality testing not included**

40. This Subcontractor shall provide and install all earthwork in strict accordance with the contract documents including, but not limited to, soil screening, exporting of unsuitable soils (as required), importing of fill as required, pond and drainage area excavation, trucking, spreading, grading, compaction, and proof rolling all while complying with final elevations and grade requirements. **– unsuitable quantities shown for budgetary purposes only; actual quantities removed & replaced will be billed at rates shown on proposal**

41. This Subcontractor understands and agrees that use of a vibratory roller might not be acceptable to the owner and will provide alternate compaction methods if any issues are determined during the work activities as directed by Wharton Smith.

42. In accordance with the Instructions to Bidders, this Subcontractor shall provide, install, maintain and remove a stabilized access road through the jobsite for the duration indicated by the Wharton-Smith, Inc. Superintendent. This Subcontract specifically includes 8" compacted base stabilized access road as depicted in Site Logistics Plan Sheet No. If additional stabilized crane access road is required, it will be provided, installed, maintained and removed at the unit price of $TBD/SY. **– maintenance included while we are on site**

43. This Subcontractor shall provide fine grading as needed in strict accordance with the contract documents and/or as directed by Wharton Smith superintendent This Subcontractor understands that all fine grading will require separate mobilizations with box blading to adjust from rough to fine grade. **– one mobilization included for rough grading, and one mobilization included for fine grading**

44. This Subcontractor shall rough grade landscape and sod area. It is the responsibility of this Subcontractor to coordinate the elevation with Contractor's Superintendent and the Landscape/Irrigation Subcontractor. Sod is to be installed by others except for the pond/retention and impound locations noted above in line item #15.

45. This Subcontractor shall coordinate with the Concrete Subcontractor for elevations of subgrade under all concrete foot traffic areas and all concrete paving areas.

46. This Subcontractor shall provide, install, layout and compact all building pads, pads for site amenities and drive lanes. It is understood and agree that all pads throughout the site are to be graded to within +/- 0.10 foot as directed by Contractor's Superintendent.

47. This Subcontractor shall provide and install all concrete curbs in strict accordance with the Contract Documents including, but not limited to, ribbon curb, drop curb, type D curb, type E curb and gutter, type F curb and gutter.

48. This Subcontract specifically includes all required base material for concrete pavement.

49. This Subcontractor shall provide and install all asphalt paving work in strict accordance with the contract documents including, but not limited to, parking spaces, drives, right of way tie-ins, entrances, approaches, service area, washdown area, covered parking area and approach to the NE. This Scope of Work includes all standard duty pavement and heavy-duty pavement in accordance with contract documents and it is understood and agreed that each lift will require a separate mobilization for each Phase.

50. This subcontractor shall provide and install concrete sidewalks in strict accordance with the Contract Documents. These shall be installed in sequence with the Contractor's project schedule. **– sidewalks outside of building footprint included; all other concrete flatwork by others**

51. This Subcontract includes all pavement markings including stop bars, standard parking spaces, accessible parking spaces, crosswalks, directional arrows, special pavement markings, colored and non-colored wheel stops and traffic signage all in strict accordance with the Contract Documents.

52. This Subcontractor and all those working on its behalf, including the Asphalt Supplier, are required to attend and actively participate in the Contractor required pre activity quality control meetings.

53. This Subcontractor is required to attend and actively participate in all meetings related to the project planning system, including end of shift and weekly update meetings.

54. This subcontractor shall provide all requirements of the general and system notes indicated on the civil plans including site clearing, grading, erosion control, tree protection, drainage, NPDES permit, dewatering, traffic control, as-built drawings, and City of Port Orange / Utility Company requirements.

55. The Subcontractor shall provide a list of all intended material and equipment to be purchased under the Owner Direct Material/Equipment Purchase Program no later than 10 days after the issuance of a Notice of Intent or execution of this Agreement, whichever comes first.

Subcontractor Bid Form-Sitework

Wharton-Smith, Inc.
CONSTRUCTION GROUP

Project: Port Orange Public Utilities Field Operations Facility

To: Wharton-Smith, Inc., 750 Monroe Road, Sanford, FL 32771
(407) 321-8410; comest@whartonsmith.com

Name of Bidder:	Hazen Construction
Scope of Work:	Sitework

The Undersigned, hereinafter called "Bidder", having visited the site of the proposed project and familiarized themselves with the local conditions, nature and extent of the work, and having carefully examined the Subcontractor Bid Manual, Subcontract Form, General Conditions, Supplementary Conditions, Plans and Specifications and other Contract Documents, with the Bond requirements herein, proposes to furnish all labor, materials, equipment and other items, facilities and services for the proper execution and completion of: Port Orange Public Utilities Field Operations Facility in full accordance with the Contract Documents and, if awarded the Contract, to complete the said work within the time limits specified for the following lump sum price.

PART 1: PRICING

(1.1) Total Base Bid

General Conditions / Other	$
Erosion Control, Site Prep & Grading	$ 671,277
Stabilized Subgrade/base, Asphalt Paving and Curbing	$ 852,116
Concrete Paving / Flatwork	$ 26,709
Storm Drainage	$ 255,382
Sanitary Sewer	$ 82,915
Water	$ 185,021
Total Amount:	$ 2,073,420
Amount in Words:	

(1.2) Alternates (Voluntary)

	$
	$
	$

(2.2) WSI (Wharton-Smith Supplemental Instructions)

Eight total

The Bidder acknowledges receipt of the following Wharton-Smith Supplemental Instruction(s):

WSI No.		Dated:		WSI No.		Dated:	
WSI No.		Dated:		WSI No.		Dated:	
WSI No.		Dated:		WSI No.		Dated:	

(2.3) ASI (Architect's Supplemental Instructions)

The Bidder acknowledges receipt of the following Architect Supplemental Instruction(s):

ASI No.		Dated:		ASI No.		Dated:	

(2.4) Addenda

The Bidder acknowledges receipt of the following Addenda:

Addenda No.		Dated:		Addenda No.		Dated:	
Addenda No.		Dated:		Addenda No.		Dated:	

(2.5) Additional Acknowledgements

The Bidder acknowledges that Bidder has considered and included the requirements of the Subcontractor Bid Manual, dated October 17, 2024, and all other sections, in preparing this Bid.

The Bidder acknowledges time is of the essence and the Project will begin March 6, 2025, with Substantial Completion that must be achieved no later than June 30, 2026, and has included all costs for any required extended hours, extra shifts, weekend and holiday work which may be necessary to complete the Work on schedule.

This Bid will remain subject to acceptance for ninety 90 calendar days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Construction Manager.

The Bidder understands and agrees that the Construction Manager and/or Owner reserves the right to reject this Bid or any and all bids for the Project, and to waive minor irregularities or informalities in any bid and to award Alternates in any order that in the Construction Manager's judgment will be in the Owner's best interest.

The Bidder hereby acknowledges they are licensed to do business in the capacity represented by this Bid and as required by all governing jurisdictional authorities for all locations of the work and as required by the Contract Documents.

The Bidder hereby acknowledges reviewing and accepting without modification the Wharton-Smith, Inc. Subcontract Agreement and agrees to execute same if awarded the project or portion(s) of the Project.

Total Alternate 2			**$ 80,875.00**

HAZEN CONSTRUCTION, LLC

Exclusions / Qualifications:

1. This proposal may be withdrawn by us if not accepted within thirty (30) days
2. Our price is based on quantities and units as stated above
3. Rock excavation is not included
4. Select backfill / removal and/or disposal of any unsuitable material is not included
5. Permits or inspection fees are not included
6. Bonds are not included
7. Meters or connection fees are not included
8. Layout for our work is included
9. Bacteriological testing for our work is included
10. Density testing for our work is not included
11. Dewatering for our work is included
12. Video of sanitary lines is included; video of storm lines is not included
13. Roof drain leaders terminate within 5' of building, connection to downspout not included
14. Sanitary sewer service terminates within 5' of building or grease trap
15. Grease traps or oil water separators are not included. Our price includes a stub up to grease trap. Plumbing contractor to connect to stub, set grease trap and continue line into building.
16. Tamper switches are not included
17. Fire line is priced to 1' above finished floor elevation with an in-building riser. Fire sprinkler contractor to connect to riser and complete system.
18. Proposal includes an additional 8" DDCVA for fire main coming off water. Nothing is shown as a POS for this fire main.
19. Strippings to be utilized onsite in greens areas. If required to haul offsite, pricing will need to be adjusted.
20. Clearing based on grind and haul.
21. Street sweeper ramp and vehicle wash down concrete pavement are not included.
22. Grading price assumes on site material is suitable for lot fill.
23. All items of work quoted in this proposal will be completed during normal Monday through Friday daytime hours. Any nighttime, weekend or holiday work is not included
24. Removal of overhead utility lines and utility poles not included.
25. The building pads will be graded one time plus or minus one tenth of a foot prior to plumbing and electrical installation
26. Any temporary construction fencing or permanent fencing is not included
27. Any dumpster pad screen walls, gates, bollards or retaining walls are not included
28. Any dewatering of footers or foundations are not included
29. We have not included any site amenities - decorative signage and/or signage posts, lighting, benches, fountains, mailboxes, gates, etc.
30. We have quoted the onsite paving assuming the cross-section as 12" of subgrade; 6" limerock base & (2) 1" lifts of SP-9.5 Asphalt
31. We have not included any above ground or below ground utility relocation for any of the work.
32. We have included a industry standard amount of stripping the organics, after clearing, based on visiting the site and reviewing the existing site conditions. We have not included any muck or rock removal or replacement of unsuitable soil with structural fill suitable for embankment.
33. This proposal is based on the accuracy of the provided geotechnical report (Report No. G22121. Dated 06/23/2022).
34. Our pricing is subject to the availability of materials, at the time of construction, of any items of work in this proposal.

Sincerely,
Hazen Construction

Chad S. Hazen
Owner

(2.2) WSI (Wharton-Smith Supplemental Instructions)

Eight total

The Bidder acknowledges receipt of the following Wharton-Smith Supplemental Instruction(s):

WSI No.		Dated:		WSI No.		Dated:	
WSI No.		Dated:		WSI No.		Dated:	
WSI No.		Dated:		WSI No.		Dated:	

(2.3) ASI (Architect's Supplemental Instructions)

The Bidder acknowledges receipt of the following Architect Supplemental Instruction(s):

ASI No.		Dated:		ASI No.		Dated:	

(2.4) Addenda

The Bidder acknowledges receipt of the following Addenda:

Addenda No.		Dated:		Addenda No.		Dated:	
Addenda No.		Dated:		Addenda No.		Dated:	

(2.5) Additional Acknowledgements

The Bidder acknowledges that Bidder has considered and included the requirements of the Subcontractor Bid Manual, dated October 17, 2024, and all other sections, in preparing this Bid.

The Bidder acknowledges time is of the essence and the Project will begin March 6, 2025, with Substantial Completion that must be achieved no later than June 30, 2026, and has included all costs for any required extended hours, extra shifts, weekend and holiday work which may be necessary to complete the Work on schedule.

This Bid will remain subject to acceptance for ninety 90 calendar days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Construction Manager.

The Bidder understands and agrees that the Construction Manager and/or Owner reserves the right to reject this Bid or any and all bids for the Project, and to waive minor irregularities or informalities in any bid and to award Alternates in any order that in the Construction Manager's judgment will be in the Owner's best interest.

The Bidder hereby acknowledges they are licensed to do business in the capacity represented by this Bid and as required by all governing jurisdictional authorities for all locations of the work and as required by the Contract Documents.

The Bidder hereby acknowledges reviewing and accepting without modification the Wharton-Smith, Inc. Subcontract Agreement and agrees to execute same if awarded the project or portion(s) of the Project.

HAZEN CONSTRUCTION, LLC

Exclusions / Qualifications:

1. This proposal may be withdrawn by us if not accepted within thirty (30) days
2. Our price is based on quantities and units as stated above
3. Rock excavation is not included
4. Select backfill / removal and/or disposal of any unsuitable material is not included
5. Permits or inspection fees are not included
6. Bonds are not included
7. Meters or connection fees are not included
8. Layout for our work is included
9. Bacteriological testing for our work is included
10. Density testing for our work is not included
11. Dewatering for our work is included
12. Video of sanitary lines is included; video of storm lines is not included
13. Roof drain leaders terminate within 5' of building, connection to downspout not included
14. Sanitary sewer service terminates within 5' of building or grease trap
15. Grease traps or oil water separators are not included. Our price includes a stub up to grease trap. Plumbing contractor to connect to stub, set grease trap and continue line into building.
16. Tamper switches are not included
17. Fire line is priced to 1' above finished floor elevation with an in-building riser. Fire sprinkler contractor to connect to riser and complete system.
18. Proposal includes an additional 8" DDCVA for fire main coming off water. Nothing is shown as a POS for this fire main.
19. Strippings to be utilized onsite in greens areas. If required to haul offsite, pricing will need to be adjusted.
20. Clearing based on grind and haul.
21. Street sweeper ramp and vehicle wash down concrete pavement are not included.
22. Grading price assumes on site material is suitable for lot fill.
23. All items of work quoted in this proposal will be completed during normal Monday through Friday daytime hours. Any nighttime, weekend or holiday work is not included
24. Removal of overhead utility lines and utility poles not included.
25. The building pads will be graded one time plus or minus one tenth of a foot prior to plumbing and electrical installation
26. Any temporary construction fencing or permanent fencing is not included
27. Any dumpster pad screen walls, gates, bollards or retaining walls are not included
28. Any dewatering of footers or foundations are not included
29. We have not included any site amenities - decorative signage and/or signage posts, lighting, benches, fountains, mailboxes, gates, etc.
30. We have quoted the onsite paving assuming the cross-section as 12" of subgrade; 6" limerock base & (2) 1" lifts of SP-9.5 Asphalt
31. We have not included any above ground or below ground utility relocation for any of the work.
32. We have included a industry standard amount of stripping the organics, after clearing, based on visiting the site and reviewing the existing site conditions. We have not included any muck or rock removal or replacement of unsuitable soil with structural fill suitable for embankment.
33. This proposal is based on the accuracy of the provided geotechnical report (Report No. G22121. Dated 06/23/2022).
34. Our pricing is subject to the availability of materials, at the time of construction, of any items of work in this proposal.

Sincerely,
Hazen Construction

Chad S. Hazen
Owner

HAZEN CONSTRUCTION, LLC

Exclusions / Qualifications:

1. This proposal may be withdrawn by us if not accepted within thirty (30) days
2. Our price is based on quantities and units as stated above
3. Rock excavation is not included
4. Select backfill / removal and/or disposal of any unsuitable material is not included
5. Permits or inspection fees are not included
6. Bonds are not included
7. Meters or connection fees are not included
8. Layout for our work is included
9. Bacteriological testing for our work is included
10. Density testing for our work is not included
11. Dewatering for our work is included
12. Video of sanitary lines is included; video of storm lines is not included
13. Roof drain leaders terminate within 5' of building, connection to downspout not included
14. Sanitary sewer service terminates within 5' of building or grease trap
15. Tamper switches are not included
16. Fire line is priced to 1' above finished floor elevation with an in-building riser. Fire sprinkler contractor to connect to riser and complete system.
17. Proposal includes an additional 8" DDCVA for fire main coming off water. Nothing is shown as a POS for this fire main.
18. Strippings to be utilized onsite in greens areas. If required to haul offsite, pricing will need to be adjusted.
19. Clearing based on grind and haul.
20. Street sweeper ramp and vehicle wash down concrete pavement are not included. 24" trench drain w/ grate is included
21. Grading price assumes on site material is suitable for lot fill.
22. All items of work quoted in this proposal will be completed during normal Monday through Friday daytime hours. Any nighttime, weekend or holiday work is not included
23. Removal of overhead utility lines and utility poles not included.
24. The building pads will be graded one time plus or minus one tenth of a foot prior to plumbing and electrical installation
25. Any temporary construction fencing or permanent fencing is not included
26. Any dumpster pad screen walls, gates, bollards or retaining walls are not included
27. Any dewatering of footers or foundations are not included
28. We have not included any site amenities - decorative signage and/or signage posts, lighting, benches, fountains, mailboxes, gates, etc.
29. We have quoted the onsite paving assuming the cross-section as 12" of subgrade; 6" limerock base & (2) 1.5" lifts of SP-9.5 Asphalt as requested by Wharton-Smith
30. We have not included any above ground or below ground utility relocation for any of the work.
31. We have included a industry standard amount of stripping the organics, after clearing, based on visiting the site and reviewing the existing site conditions. We have not included any muck or rock removal or replacement of unsuitable soil with structural fill suitable for embankment.
32. This proposal is based on the accuracy of the provided geotechnical report (Report No. G22121. Dated 06/23/2022).
33. Our pricing is subject to the availability of materials, at the time of construction, of any items of work in this proposal.
34. MOT is included

Sincerely,
Hazen Construction

Chad S. Hazen

To: James Manyette
Cc: Keri Strawder; Josh Blubaugh; Greg Keresi; Manuel Gonzalez
Subject: RE: Port Orange Public Utilities Field Ops Fac.
Attachments: 2in Temp water exhibit.pdf; Asphalt (new).pdf; Port Orange Public Utilities Field Operations Facility - HC Proposal 2024-11-22.pdf

Good morning – thanks for your patience as we worked through the questions and proposal comments. Attached is our updated bid form and proposal. See below answers in RED and updates to the proposal comments.

1. You stated (2) 1" lifts for the asphalt. Please provide 2 lifts @ 1.5" min each lift.
   Modified to (2) 1.5" lifts
2. Please confirm you have the sodding of pond slopes DA-1 & DA-2 with Bahia.
   Confirmed. 7,801 SY sod for DA-1 and 3,462 SY sod for DA-2 is Bahia
3. Your proposal does not show the Oil Water Separator. This is only shown on Civil drawings and not in Plumbing drawings or specs. Please furnish and install this item (see C13 cut sheet below).
   Included in bid and added piping & C/O's from trap to bldg. Separator is not by Oldcastle, we have priced an alternate 5000 gal separator.
4. Sheet C9 shows trench drains and ties ins at outdoor ramp (not tied into building). Trench drain cutsheets are shown on C13. Please confirm you have the drains and piping.
   Sheet C-7 shows the 4" ACO Klassik drain with heel proof grate between buildings that is shown on detail sheet C13. No information is given for 20" trench drain shown at wash down pit, we have price as 24" Wilkins trench drain w/ 6" outlet
5. Please confirm ($26,709) can be removed from your scope/contract value if we are to get this from our concrete sub (specifically for 4" and 6" concrete sidewalks).
   Confirmed – removed from proposal
6. Confirm you have included MOT
   Confirmed

   Additional clarifications based on scoping markups PDF provided:
   SEWER
7. No 6" pipe s/b 260 LF
   We have included 264 LF of 6" service lateral pipe in the 6" services off of C900 and SDR26

   WATER
8. Is this poly line, we have 630 LF
   Yes. Per answer to RFI 11 and revised logistics plan sheet AS011 provided in WSI No. 8 showing locations of jobsite trailer and laydown yard, we ran line North from tap location on Bruner to North side of staff exit drive , then over East and South to washdown area. Polytube was calculated and confirmed scale on plan sheet. Quantity was confirmed to be to 1049 LF (please see exhibit to confirm we have picked up correct scope). Per the sitework bid package item #32, temp service is called to be 2.5" poly line. Polytube is not made in this size, but 2 ½" is made in CL200 PVC bell/spigot pipe that is expensive. We priced as 2" polytube service to save on cost, if service needs to be 2 ½" B/E PVC we can absolutely price it that way.

   STORM
9. We have 910 LF

Re-counted PVC for roof drains and have 785LF of 10" PVC (modified on proposal from 742LF) and 364LF of 12" PVC. If we count the 136' run of 12" along North side of warehouse as 10", then we have 921LF, could this be the error? Option 2 is if we count all the roof drain leader pipe to all 28 roof drains, we come up with 912LF. Roof drain leader size is not called for on plans. Due to the quantity of drains shown, we priced these as industry standard 6" drains and the 6" PVC from the 10" main is included in the 6" rood drain price. If roof drains need to be 10" (23EA) and 12" (5EA), we can absolutely price them that way.

SITEWORK AND PAVING

10. 1 ½" lifts X2
    Proposal has been modified

11. We have 14,228 SY
    We have re-counted asphalt qty and confirmed the scale on plan sheet. Quantity was confirmed to be 13,041 SY (please see exhibit to confirm we have picked up correct scope). This also affected the 12" sub-grade qty to 13,756 SY. Proposal has been modified. The sub-grade qty is higher than the limerock and asphalt quantity (see detail R-15 on C-12) because subgrade extends under curb to 1' beyond BOC. We calculate this based on width of each type of curb used +1'

12. We have 1,333 LF
    You have the correct quantity. We missed two runs of "D" curb at back of asphalt off SE corner of Administration Bldg. Proposal has been modified

Separately, you had asked if HC has worked on Wharton-Smith projects. Yes, we have completed as the prime site contractor and as the underground utility subcontractor to different site prime contractors. After your review, let me know if you have any additional questions. Thanks.

Subject: RE: Port Orange Public Utilities Field Ops Fac.

Good morning – thank you for following up. I also received your voicemail but was tied up in meetings yesterday afternoon. I spoke with our estimators, and they mentioned we are still waiting for responses from two vendors. We expect to receive them later today, which will allow us to finalize our response. Thanks again.

Subject: Port Orange Public Utilities Field Ops Fac.

Chad – Thanks again for your Site/Civil bid on the above project. I had a couple scoping items I wanted to ensure you picked up. Please review below and revised your proposal as needed to incorporate these items:

1. You stated (2) 1” lifts for the asphalt. Please provide 2 lifts @ 1.5” min each lift.
2. Please confirm you have the sodding of pond slopes DA-1 & DA-2 with Bahia.
3. Your proposal does not show the Oil Water Separator. This is only shown on Civil drawings and not in Plumbing drawings or specs. Please furnish and install this item (see C13 cut sheet below).
4. Sheet C9 shows trench drains and ties ins at outdoor ramp (not tied into building). Trench drain cutsheets are shown on C13. Please confirm you have the drains and piping.
5. Please confirm ($26,709) can be removed from your scope/contract value if we are to get this from our concrete sub (specifically for 4” and 6” concrete sidewalks).
6. Confirm you have included MOT

From Civil Sheet C13

Subcontractor Bid Form-Sitework

Wharton-Smith, Inc.
CONSTRUCTION GROUP

Project: Port Orange Public Utilities Field Operations Facility

To: Wharton-Smith, Inc., 750 Monroe Road, Sanford, FL 32771
(407) 321-8410; comest@whartonsmith.com

Name of Bidder:	Tomoka Construction Services, Inc.
Scope of Work:	Sitework

The Undersigned, hereinafter called "Bidder", having visited the site of the proposed project and familiarized themselves with the local conditions, nature and extent of the work, and having carefully examined the Subcontractor Bid Manual, Subcontract Form, General Conditions, Supplementary Conditions, Plans and Specifications and other Contract Documents, with the Bond requirements herein, proposes to furnish all labor, materials, equipment and other items, facilities and services for the proper execution and completion of: Port Orange Public Utilities Field Operations Facility in full accordance with the Contract Documents and, if awarded the Contract, to complete the said work within the time limits specified for the following lump sum price.

PART 1: PRICING

(1.1) Total Base Bid

General Conditions / Other	$ 490,962.60
Erosion Control, Site Prep & Grading	$ 709,747.94
Stabilized Subgrade/base, Asphalt Paving and Curbing	$ 873,826.32
Concrete Paving / Flatwork	$ 0
Storm Drainage	$ 319,246.98
Sanitary Sewer	$ 185,058.35
Water	$ 232,386.35
Total Amount:	$ 2,811,226.54
Amount in Words:	two million, eight hundred eleven thousand, two hundred twenty eight - 54/100

(1.2) Alternates (Voluntary)

Alt #1 - suitable fill to owner location < 7miles	$ (70,851.45)
Alt #2 - suitable fill loaded into trucks (by others)	$ (151,347.60)
Stabilized crane access road - 8" CC	$ 26.84 / sy

7 11-04-24
8 11-08-24

(2.3) ASI (Architect's Supplemental Instructions) NA

The Bidder acknowledges receipt of the following Architect Supplemental Instruction(s):

ASI No.		Dated:		ASI No.		Dated:	

(2.4) Addenda NA

The Bidder acknowledges receipt of the following Addenda:

Addenda No.		Dated:		Addenda No.		Dated:	
Addenda No.		Dated:		Addenda No.		Dated:	

(2.5) Additional Acknowledgements

The Bidder acknowledges that Bidder has considered and included the requirements of the Subcontractor Bid Manual, dated October 17, 2024, and all other sections, in preparing this Bid.

The Bidder acknowledges time is of the essence and the Project will begin March 6, 2025, with Substantial Completion that must be achieved no later than June 30, 2026, and has included all costs for any required extended hours, extra shifts, weekend and holiday work which may be necessary to complete the Work on schedule.

This Bid will remain subject to acceptance for ninety **90** calendar days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Construction Manager.

The Bidder understands and agrees that the Construction Manager and/or Owner reserves the right to reject this Bid or any and all bids for the Project, and to waive minor irregularities or informalities in any bid and to award Alternates in any order that in the Construction Manager's judgment will be in the Owner's best interest.

The Bidder hereby acknowledges they are licensed to do business in the capacity represented by this Bid and as required by all governing jurisdictional authorities for all locations of the work and as required by the Contract Documents.

The Bidder hereby acknowledges reviewing and accepting without modification the Wharton-Smith, Inc. Subcontract Agreement and agrees to execute same if awarded the project or portion(s) of the Project.

Alternates

1. Export Fill to Owner Site	37,095	CY	$	(1.91)	$	(70,851.45)
2. Load Export Fill Into Others	37,095	CY	$	(4.08)	$	(151,347.60)

Qualifications & Exclusions:

1. Permits or permits fees are excluded, unless otherwise noted.
2. Unsuitable material, hazardous material, coquina or cemented stone removal or replacement is excluded.
3. NPDES notice of intent, certified inspections and notice of termination are included. Inspections included through substantial stabilization of project.
4. Storm drainage system dewatering is included, as needed. Testing per AHJ is included. Bar grating of MES are excluded. Roof drainage collector systems are included, as shown.
5. Sanitary sewer system dewatering is included, as needed. Testing per AHJ is included.
6. Oil/Water interceptor dewatering is included, as needed. Testing per AHJ is included. Venting of Oil/Water separator, if required, is excluded and is by others.
7. Domestic water sytem dewatering is included, as needed. Testing per AHJ is included. Meters are excluded and will be by local water purveyor.
8. Fire water system dewatering is included, as needed. Testing per AHJ is included. FDC locking caps or Knox Boxes are excluded.
9. Conduits or sleevings are excluded.
10. Electrical or site lighting is excluded.
11. Flatwork is excluded. Sitework bid packages notes are conflicting on responsible party.
12. Bollards or bike racks are excluded.
13. Bahia sodding proposed for pond banks and berm tops.
14. Temporary parking, construction access & stabilized access are included, per site logistics plan sheet.
15. Bonds are not included within base bid. If required, additional costs would be warranted.
16. Density testing is excluded.
17. Removal, relocation or replacement of existing utilities are excluded, unless otherwise depicted within referenced civil plan drawings.
18. Striping & signage proposed as shown, nothing assumed or implied. Concrete wheelstops are included.

Subject: Port Orange Public Utilities Field Ops Facility SITE WORK BID PACKAGE
Attachments: Tomoka Construction Bid POPW.pdf; PO Public Utilities Bid Form SITEWORK.pdf

Good afternoon,

Please find attached, our subcontractor bid form, Sitework, for the Port Orange Public Utilities Field Ops Facility project. I have also included our internal bid proposal as well, for reference.

Please review the attached and let me know if you have any questions or if anything further is needed.

We do appreciate the opportunity to bid with you on this project

Sincerely,

Kyle Hall

Subcontractor Bid Form-Sitework

Wharton-Smith, Inc.
CONSTRUCTION GROUP

Project: Port Orange Public Utilities Field Operations Facility

To: Wharton-Smith, Inc., 750 Monroe Road, Sanford, FL 32771
(407) 321-8410; comest@whartonsmith.com

Name of Bidder:	Wayne Automatic Fire Sprinklers, Inc
Scope of Work:	Site work

The Undersigned, hereinafter called "Bidder", having visited the site of the proposed project and familiarized themselves with the local conditions, nature and extent of the work, and having carefully examined the Subcontractor Bid Manual, Subcontract Form, General Conditions, Supplementary Conditions, Plans and Specifications and other Contract Documents, with the Bond requirements herein, proposes to furnish all labor, materials, equipment and other items, facilities and services for the proper execution and completion of: Port Orange Public Utilities Field Operations Facility in full accordance with the Contract Documents and, if awarded the Contract, to complete the said work within the time limits specified for the following lump sum price.

PART 1: PRICING

(1.1) Total Base Bid

General Conditions / Other	$ 1,275,070
Erosion Control, Site Prep & Grading	$ 1,147,870
Stabilized Subgrade/base, Asphalt Paving and Curbing	$ 850,650
Concrete Paving / Flatwork	$ 131,680
Storm Drainage	$ 501,570
Sanitary Sewer	$ 268,830
Water	$ 118,330
Total Amount:	$ 4,294,000
Amount in Words:	Four million, Two hundred ninety four thousand dollars

(1.2) Alternates (Voluntary)

NA	$	NA
NA	$	NA
NA	$	NA

Continued Next Page

(1.3) Owner Direct Purchase (value of all purchases exceeding **$50,000**)

Material/Equipment Types:	Pipe, Fittings & Structures
Amount:	$ 200,000

(1.4) Value Engineering (We encourage voluntary VE/cost savings options)

1	NA	$ NA
2	NA	$ NA
3	NA	$ NA

(1.5) MWBE Participation

MWBE	$ NA
LDB	$ NA
VBE	$ NA

(1.6) Bond Rate

In the event a Performance & Payment Bond is required, indicate in the space below the **percentage** to be added to the proposal.

Bond Rate %:	1

(1.7) Long Lead Durations (indicate durations for any long lead equip. 24 weeks +)

Item	Duration (wks)	Item	Duration (wks)
Structures	12-14	NA	NA
NA	NA	NA	NA
NA	NA	NA	NA

PART 2: BIDDER ACKNOWLEDGEMENT

(2.1) RFI (Request for Information)

The Bidder acknowledges receipt of the following RFI Response(s):

RFI No.	1	Dated:	11/7/24	RFI No.	NA	Dated:	NA
RFI No.	2	Dated:	11/11/24	RFI No.	NA	Dated:	NA
RFI No.	NA	Dated:	NA	RFI No.	NA	Dated:	NA

(2.2) WSI (Wharton-Smith Supplemental Instructions)

The Bidder acknowledges receipt of the following Wharton-Smith Supplemental Instruction(s):

WSI No.	1	Dated:	10/22/24	WSI No.	4	Dated:	10/28/24
WSI No.	2	Dated:	10/24/24	WSI No.	5	Dated:	10/31/24
WSI No.	3	Dated:	10/24/24	WSI No.	6	Dated:	11/4/24
					7		11/6/24

(2.3) ASI (Architect's Supplemental Instructions)

The Bidder acknowledges receipt of the following Architect Supplemental Instruction(s):

ASI No.	NA	Dated:	NA	ASI No.	NA	Dated:	NA

(2.4) Addenda

The Bidder acknowledges receipt of the following Addenda:

Addenda No.	NA	Dated:	NA	Addenda No.	NA	Dated:	NA
Addenda No.	NA	Dated:	NA	Addenda No.	NA	Dated:	NA

(2.5) Additional Acknowledgements

The Bidder acknowledges that Bidder has considered and included the requirements of the Subcontractor Bid Manual, dated October 17, 2024, and all other sections, in preparing this Bid.

The Bidder acknowledges time is of the essence and the Project will begin March 6, 2025, with Substantial Completion that must be achieved no later than June 30, 2026, and has included all costs for any required extended hours, extra shifts, weekend and holiday work which may be necessary to complete the Work on schedule.

This Bid will remain subject to acceptance for ninety **90** calendar days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Construction Manager.

The Bidder understands and agrees that the Construction Manager and/or Owner reserves the right to reject this Bid or any and all bids for the Project, and to waive minor irregularities or informalities in any bid and to award Alternates in any order that in the Construction Manager's judgment will be in the Owner's best interest.

The Bidder hereby acknowledges they are licensed to do business in the capacity represented by this Bid and as required by all governing jurisdictional authorities for all locations of the work and as required by the Contract Documents.

The Bidder hereby acknowledges reviewing and accepting without modification the Wharton-Smith, Inc. Subcontract Agreement and agrees to execute same if awarded the project or portion(s) of the Project.

Proposal To:

Wharton-Smith Construction

Job Location:

Port Orange Public Utilities / Ops Bldg

AAA Fence Company does hereby propose to provide materials, labor, equipment, tools and all items necessary to install fencing for this project as per the plans and specifications provided. All work shall be performed in a professional and workmanlike manner, in accordance with standard practices.

Scope of Work:

Decorative PVC Fence

1,090' of 6' high White PVC Fence Classic Rail – Color not called out ……..…$30,710.00

- **Meets or exceeds the detail on page C15**
- **Bottom rail insert is included**
- **All posts are set in concrete**

Optional to Add Aluminum Inserts to End & Line Posts ……Add ……...8,400.00

Galvanized Chain Link Fence w/ 3 Strands of Barb Wire

1,700' of 6' + 1' Chain Link Fence w/ Barb Wire ……..48,450.00

- **All posts are set in concrete**
- **Some connections to existing fence's are required**
- **1 – 12' Double Gate included**
- **As per detail included on page C15**

3 – 30' x 6' + 1' Aluminum Dual Track Cantilever Gates …….67,920.00

1 – 35' x 6' + 1' Aluminum Dual Track Cantilever Gates

- **Hardware for Aluminum Cant Gates Dual Track & 4" round posts**
- **2 – 30' Gates to meet in center – in lieu of one 60' Gate**
- **A 30' opening for a Alum Cant Gate requires approx. 45' of space to open gate**

Gate Operators

4 – All O Matic SL 100 DC Pro Slide Gate Operators w/ Foot pedals …….24,960.00

- **Includes the following: 4 Pedestal Mounts for Operators, surge protection, AOM chain Bracket kits, #40 Armor coated chain & master links, 3 Gooseneck pedestals, 3 KPW 250 wireless key pads, 3 universal receivers, loop wire, loop sealant, loop detectors, 3 siren operated sensors, 3 Knox boxes. As specified in Note #2 on C6.**

Dumpster Gates – Alternate to plan in Site Details shown in section K12

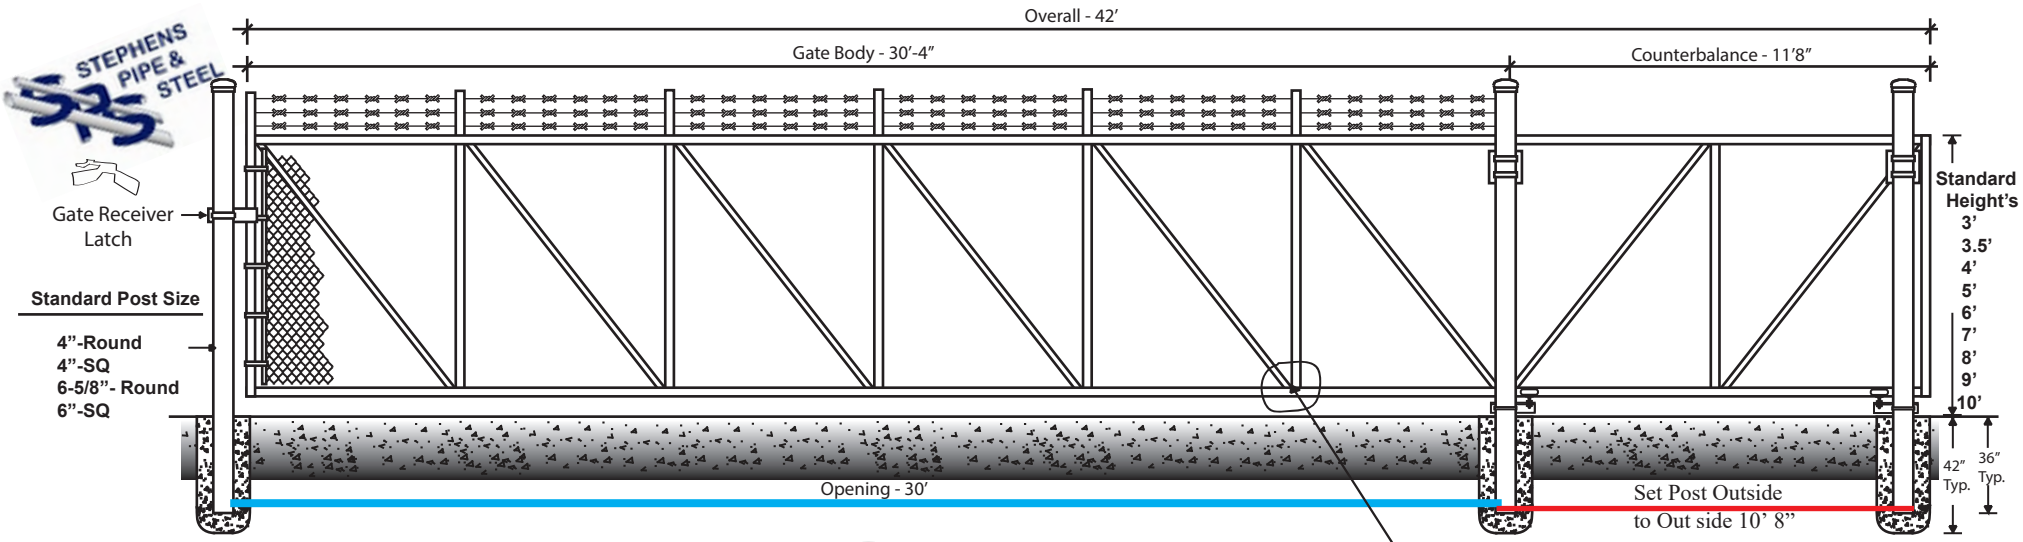
1 – Approx 22’ x 8’ Tall Double Gate Aluminum Louver (Alternate) …….32,260.00

- **Site details are similar**
- **6 5/8” Round sch 40 posts set in concrete – holes blocked out by others**
- **Any painting of posts is by others**
- **Color of Gates to be determined**
- **Steel to Aluminum Barrel hinges included**

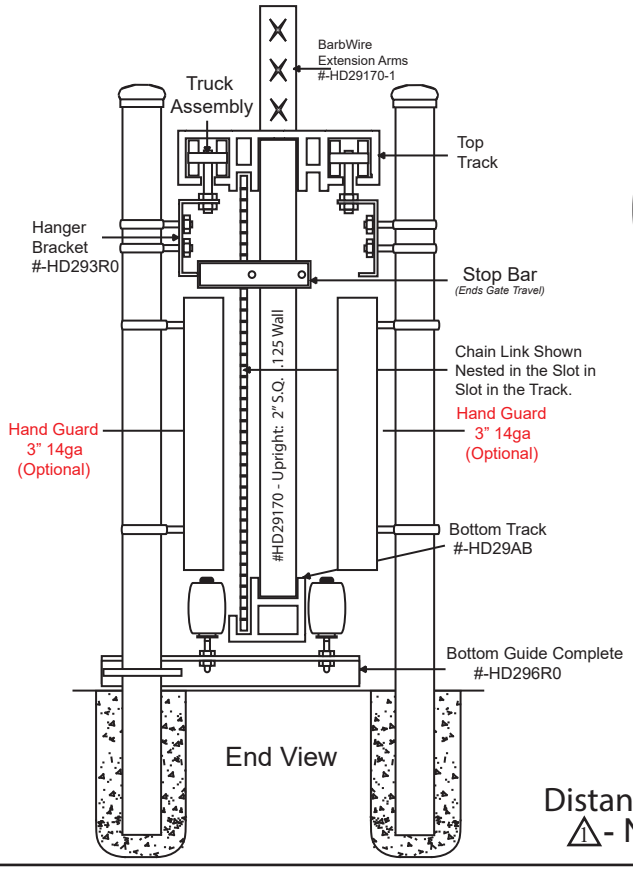
Option for Dumpster Gate

1 – 22’ Double Gate x 8’ Tall Whiter PVC mounted to 2” Galv Frames ……7,500.00

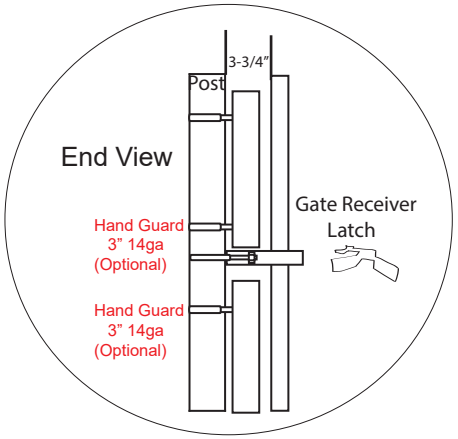
- **Gate frames are welded construction, braced & trussed as necessary**
- **2 – 6 5/8” sch 40 gate posts are set in concrete – holes blocked out for setting by others**
- **Gates include two drop bar assemblies – holes for open & closed positions with pipe sleeves in concrete**
- **As per standard Dumpster Detail included with plans (reference M-17)**



Note:



1) **All site work, grading, surveying, is all by others.**
2) **Fence lines are required to be marked for location by others, with a stake every 150’ – 200’ on long lines.**
3) **Any permitting costs are to be added, if necessary.**
4) **Any bonding costs, if req’d, are not included**



This proposal is subject to standard AAA Fence Company contract terms and conditions.

PROPOSAL

November 18, 2024

Re: Port Orange Public Works – Fencing and Gates

Thank you for the opportunity to provide the following proposal. Supply labor and materials to install the following:

- 690LF of 6'H Galv Chain Link Fence with 3-strands of barbed wire and the following:
  - 2" SCH 40 Line Posts
  - 2-1/2" SCH 40 Term Posts
  - 1-5/8" Top Rail
  - Bottom Tension Wire
- 2063LF of 6'H White PVC Fence around perimeter with the following:
  - 5" square posts
  - 2-EA 30'W Pipe Frame White PVC picket infill with gate automation including operator, loops and photo eyes
  - 1-EA 60'W Bi-Parting Pipe Frame White PVC picket infill with gate automation including operator, loops and photo eyes

Total: $165,743

Exclusions:

- All staking for fence, end, corner, and gates.
- Permitting.
- Surveying.
- Bond costs.
- Engineering, inspections, or testing.
- Workforce training or badging.
- Root damage repair.
- Coring, sawing, or cutting of pavement.
- Tree removal, root raking, and clearing of fence line.
- Fence Demo.
- Privacy Slats/ Privacy Screen/ Wind Baffle.
- Electrical work and running of conduit.
- Fence grounding.
- Underground and overhead utility locates.
- Maintenance of traffic.
- Dewatering.
- Painting.
- Retaining walls, drains, slabs, and concrete curbs.
- Access Control.
- OCIP.
- Door hardware on gates.
- Material Price Escalation.

Our proposal is based on the following conditions:

- All work to be performed under one mobilization with access to all areas, high and dry, with heavy equipment and dump trucks.
- Job is done in sequence w/o interruption during normal working hours and days using one crew.
- Due to volatility of pricing in the current supply chain, pricing is valid for 5 days.
- All labor is Open Shop labor rates.

Please do not hesitate to call if you have any questions regarding this proposal. We look forward to working with you in the near future.

Sincerely,

Valerie Hamil

Good afternoon, So you want me to sod all the retention slopes and flat areas. See attached. Let me know if this is what you are asking about. I did not include it since the site contractor usually is there before me and carries the sod for the stabilization for the pond slopes.
Let me know and I can get you a updated number or put it as a alternate on the bid sheet.

Subject: Wharton Smith Port Orange Landscaping Job

Hi Jason,
I was hoping you could provide some clarification if your bid contains the following:

1. 12-month warranty for all landscaping items including ground covers; per spec. 32 93 00, 1.72 Yes
2. 90-day maintenance for all landscaping items including ground covers; per spec. 32 93 00, 3.8 I will get you a number for the maintenance for the 90 days

Also, our sod quantities are way off from each other, so I was hoping you could send a revised number on that. I appreciate you attaching your takeoff as it makes it easy to understand where we are off; see attached for our internal takeoff.

If you are unable to sod the sloped areas, please let us know so we can coordinate accordingly.

Thank you and have a good day,

Subject: Port Orange Public Utilities Field Ops Fac.

Alice – Thanks for your bid on the above project. I'd like to get some scoping items clarified/changed as follows:

1. Please confirm (or provide add) to warrant plantings (per specifications) Tress, shrubs, vines, ornamental grass, groundcovers and other plants for 12 mos from substantial completion date.
2. Please confirm (or provide add) to include plant maintenance (per Spec 329300, 3.7) immediately after planting for a period of 90 days.
3. Looks like you carried the irrigation. What was the qualification #21 about? I assume you are self-performing irrigation and included it as required per drawings/specs right?

Respectfully,

James R. Manyette | Senior Preconstruction Services Manager

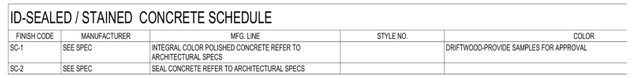
SECTION 5 – BID CLARIFICATIONS, EXCEPTIONS, EXCLUSIONS



Package #	Scope Issues/Clarifications/Exceptions	Comments
3 - Concrete	Color admixture specification was not given for the integrally colored concrete slab, therefore our recommended subcontractor carried an allowance of $35/CY for the color admixture.	We are confindent our Concrete Scope Adjustment Allowance will cover added costs for this item should the future specification impact it. Full Allowance shown.
4 - Masonry	CMU screen wall thickness for the Dumpster and Mechanical yard enclosures is 8 inch and 12 inch respectively, per Dumpster Wall Reinforcing Schedule on S201.	
5 - Steel Fabrication	In lieu of the Ametco brand premanufactured dumpster gate listed in section 05500, page 6; 2.9-B. we have included a shop fabricated dumpster gate that is similar. Powder coated and with aluminum louvers	Ametco brand is expensive, hence not carried by sub who performs shop fabrication. Submittals from subcontractor are anticipated to be approved
5 - Steel Fabrication	Tube steel supports for TV mounting per G1 and G7 on sheet A901. Instead we include fire retardant treated wood blocking between the studs and vertically in the stud cavity.	Full Steel Scope Adjustment Allowance shown
5 - Structural Steel	Support assembly for the operable partition is not given in the structural drawings,is required per manufacturer's details. Therefore we include an Allowance (ref. Roof framing plan key note 1 on S102).	
21 - Fire Protection	No fire protection or sprinklers have been called out nor provided for the covered warehouse outdoor storage area.	Exclusion
23 - HVAC	No Spec or Model provided for Fire Ready Residential Type Hood for Break Area We have included a 30" front recirculating model with the following features: 1. Electric Shut-Off Assembly Box 2. LCD User Interface 3. Self Contained Fire Suppression System 4. Electronic Detection 5. Plug & Play Design

7	11/1/2024	1-007	CD/GMP	T502	Technology - Cabling	Drawings list part #'s for cable that references cable characterized to 350 MHz, but Specs list cable with 600MHz characteristics. Please clarify if 350MHz (enhanced) or 600MHz (Premium) cable is desire, as there is a large price difference for Premium cable.	**350 MHz is acceptable**	11/6/2024	
8	11/1/2024	1-008	CD/GMP	23 09 00	HVAC - Controls	The Specifications show Trane, Automated Logic, JCI and Siemens as acceptable controls contractors. The Port Orange Police station right next to this project is utilizing Automated Building Controls (ABC) as their controls contractor. Will ABC be an acceptable alternate?	**ABC is acceptable**	11/6/2024	
9	11/1/2024	1-009	CD/GMP	S101 / J8 S201	Concrete - foundations	At the walkway between the Admin and Warehouse buildings are 5 each F40 column footings. There is a section cut J8/S201 calling for a Pedestal. What is the length and width of the pedistal? Is the Pedestal the same size as in detail A15/S401?	**See information in J8/S201 and the Column & A.B. Schedule on J8/S401. That section A15/S401 that they are referring to is for the other exterior column at the bottom left corner of the building, not for the freezeway columns.**	11/6/2024	
10	11/1/2024	1-010	CD/GMP	C9 & C13	Civil - Site	The Utility Plan (C9) shows that there is a “previously installed sleeve” for the water main to cross under the driveway. Has the size of the sleeve been verified?	**Zev Cohen - The tap of the existing 12" water main has already been made and an 8" pvc water main has been installed under the driveway. The line has been stubbed out just north of the driveway with a valve and a 2" blowoff. See image below for approximate valve and blowoff location. Proposed 8" water main is to connect to and continue from this location.**	11/6/2024	
11	11/1/2024	1-011	CD/GMP	WSI Sitework Bid Package	Civil - Site	Please verify where 2 1/2” temporary water line will be hooked up at to verify amount of pipe needed. Also verify location of the 3 stub outs requested in the bid package.	**WSI to answer**		**Tap location will be at the permament point mentioned in RFI #1 - 010 above. The stub out will be at WSI jobsite trailer, oil separator location and at the laydown yard.**
12	11/1/2024	1-012	CD/GMP	n/a	Civil - Site	When will there be clarification as to where the excess fill dirt will be stored? At the onsite meeting there was discussion of 3 possible options.	**see WSI Response**	11/6/2024	**These alternates were provided with WSI # 007 uploaded to ConstructConnect 11/6/2024**
13	11/6/2024	1-013	CD/GMP	M500	HVAC Controls	Please confirm that the control schematic for Multizone - mixed air- VAV AHU shown in M500 is to be provided by the BAS contractor for AHU-1 and AHU-2. If the units are to be provided with a factory mounted controller, and the BAS contractor is to only integrate.	The control schematic for Multizone - mixed air- VAV AHU shown in M500 is to be provided by the BAS contractor for AHU-1. ***(11/11/2024) AHU-2 is a constant volume unit and not applicable to the “Multizone - Mixed Air- VAV AHU Control Schematic”. AHU-2 is to be controlled by a wall mounted thermostat that needs to be integrated into the BAS.***	Updated on: 11/11/2024	
14	11/6/2024	1-014	CD/GMP	C-10 and WSI Site Layout Plan	Civil	RFI from Virtual Pre-Bid Meeting: Please provide details/info. on what Wharton-Smith desires for temporary access/delivery roads.	**see WSI Response**	11/6/2024	**Please see revised Site Layout Plan dated 11/6/2024. All temporary entrances shall be constructed per drawing C10 detailM-21. Include (1) temporary access road (shown brown) at southside of the property and a 20' x 300' stabilized access road (black w/red outline) constructed of with 8" crushed concrete along the north and east of the new Admin/Warehouse Bldgs.**

Line	Submitted Date	RFI No.	Design Stage	Drawing/Spec. No.	Trade/Discipline	RFI Question: include drawing keynote/detail numbers, contradictions, etc.	Architect/Engineer Response	Response Date	CM (Wharton-Smith) Response
15	11/7/2024	1-015	CD/GMP	A160, A161A & A161B	Concrete Finish	The Finish Plan shows several areas to receive the floor finish of SC-1. SC-1 under the "The Sealed/Stained Concrete Schedule" tells us this is an integral color polished concrete refer to architectural specs. Spec Section 03 39 35 Integrally Colored Concrete confirms this is integral color concrete. Please clarify if SC-1 is to be integral colored concrete and not stained concrete as the schedule is titled.	**Schenkel Shultz-Correct, the schedule header is a misleading Revit template title.** **SC-1 is integral colored polished concrete.** **SC-2 is sealed concrete (intended for the support spaces like mech./elect. and storage room. If it is easier to coordinate the slab pour those few spaces can also be integral color, but they do not have to be polished.**	11/7/2024	
16	11/7/2024	2-016	CD/GMP	A522 & Spec. 09 24 00	Stucco	Please confirm that per A522, lath will be attached over all substrates receiving stucco treated with fluid applied air and moisture barrier per details A6, A13, H1 and not direct applied (no lath) per detail N1. Also confrim that vinyl stucco trim accessories, including 1" wide reveals are acceptable per specification 09 24 00	**If the Air & Water barrier as specified in 07 25 00.2.2.2 is used then you can direct bond with no lath. If another product is proposed then refer to requirements in 2.2.B.** **The note highlighted in detail A13 should be edited to match the other referenced details.** **1" vinyl reveals are acceptable.**	11/8/2024	
17	11/11/2024	2-017	CD/GMP	FP Series Drawings	Fire Protection	The FP documents do not call for protection in the covered warehouse storage area. Does this area need fire sprinkler protection (Reference 9.2.3 of NFPA 13 2019). If protection is required will it need to be a dry system?			**(11/11/2024) Until receipt of the engineer's response please bid base bid as shown and provide an Add option to protect this area with dry system.**
18	11/11/2024	2-018	CD/GMP	FP Series Drawings	Fire Protection	The FP documents call for sidewall fire sprinklers to protect the breezeway. Do these sprinkler heads need to be dry type sprinklers?			**(11/11/2024) Until receipt of the engineer's response please bid base bid as shown and provide an Add option to protect this area with dry system.**
19	11/11/2024	2-019	CD/GMP	A160 & Spec 081416	Doors, Frames & Hardware	We need to know what the wood door species and cut is for the wood doors on this project. The documents (spec section 081416) refer us to the interior finish schedule which is on sheet A160 for this information, however this information is not defined for us (i.e. WD-2).	**The wood doors shall match PL-1 (Wilsonart Walnut Heights). Recommend quarter sawn walnut unless maple can be stained to match PL-1.**	11/11/2024	
20	11/8/2024	2-020	CD/GMP	S201 & Detail A2	Concrete - SOG	The Warehouse slab on grade is to be reinforced with #4 @16" oc ew. On sheet S201 Detail A12 calls for sawcuts to receive plate dowel baskets. With the scheduled reinforcing in the SOG is the dowel basket still required?			**(11/11/2024) Until receipt of the engineer's response please bid base bid as shown with dowel baskets and provide option to should these not be required.**
21	11/8/2024	2-021	CD/GMP	P101B	Plumbing	There are (3) water hose reels on the plumbing plans in the Warehouse Bldg.; however, there is no pecification or other make/model info. for them. Please advise.			
22	11/11/2024	2-022	CD/GMP	A171A, A901 & 10 51 29	Div 10, Lockers,	A171A E9: Phenolic Lockers As per specifications acceptable manufactures are List & Spectrum. When referencing A901 A5 /A9 requests (2) adjustable PLAM shelves which neither manufacturer offers. A1 tates PLAM doors not Phenolic. Specifications 10.51.29 requests sloped tops, but these are recessed lockers. Please advise/clarify	**The phenolic lockers are to be in the shower rooms without shelves with sloped tops. The lockers in the corridor are recessed millwork.**	11/11/2024	
23	11/11/2024	2-023	CD/GMP	A171B	Div 10, Pipe Arm Rack	A171B E23 Pipe Arm Rack Jarke SC-10J per manufacturer dimensions are 81-1/2"W x 49"D x 10"H. However, description states HD 46"W x 32"D x 120"H which is not a manufacturer's option. See chart and advise as we have 19'2.5" of useable space, so what size?			
24	11/11/2024	2-024	CD/GMP	A171B	Div. 10, Pallet and Pipe racking systems	Will they accept any other manufacturers on the pallet racking or the pipe racks?			
25	11/12/2024	2-025	CD/GMP		Door Frame, Glazing and rating	Doors 109B and 154 (located at the breezeway) are Glass-over glass fire rated and impact rated. However the manufacturer's cannot support this glazing anymore (discontinued). We can get either impact rated with assemblies as shown or UL Labeled Fire Rated Flush Doors. A solution to maintain G2 elevation could be to switch the door, frame and hardware manufactures at these 2 door 109B and 154.	**The fire rating should take precedence. Change doors 109B and 154 to Type N from G2.....**		
26	11/13/2024	2-026	CD/GMP	A201 - L1 East Admin Elevation	Arch- Wall Type/Finish	The type of wall material (ie., stucco, metal panel, etc.) is not identified on the A201-L1 Elevation (nor elsewhere) for the east facing white wall apearing to have control joints. It is not shaded with the dotted pattern like other Stucco walls and has no call out keynote.			
27	11/14/2024	2-027	CD/GMP	C6, Note 2	Fencing - Powered Gates	The documents reference a 60' slideing Powered Fence Gate. Subcontractors are stating that manufacturers do not recommend such a long gate be sliding (maintenance/motor issues, etc.). Please advise if a 60' cantilevere "swing" gate and/or (2) 30' swing gates would be acceptable. We have both alterates bid.

AIA® Document A133® – 2019

Standard Form of Agreement Between Owner and Construction Manager as Constructor where the basis of payment is the Cost of the Work Plus a Fee with a Guaranteed Maximum Price

AGREEMENT made as of the 6th day of November in the year 2024. *(In words, indicate day, month, and year.)*

BETWEEN the Owner:
(Name, legal status, address, and other information)

City of Port Orange
1000 City Center Circle
Port Orange, FL 32129

and the Construction Manager:
(Name, legal status, address, and other information)

Wharton-Smith, Inc.
750 Monroe Road
Sanford, FL 32771

for the following Project:
(Name, location, and detailed description)

Public Utilities Field Operations Facility
City of Port Orange

The Architect:
(Name, legal status, address, and other information)

Schenkel Schultz, Inc.
200 East Robinson Street, Suite 300
Orlando, FL 32801

The Owner and Construction Manager agree as follows.

ADDITIONS AND DELETIONS:
The author of this document has added information needed for its completion. The author may also have revised the text of the original AIA standard form. An *Additions and Deletions Report* that notes added information as well as revisions to the standard form text is available from the author and should be reviewed. A vertical line in the left margin of this document indicates where the author has added necessary information and where the author has added to or deleted from the original AIA text.

This document has important legal consequences. Consultation with an attorney is encouraged with respect to its completion or modification.

AIA Document A201™–2017, General Conditions of the Contract for Construction, is adopted in this document by reference. Do not use with other general conditions unless this document is modified.

ARTICLE 1 INITIAL INFORMATION

§ 1.1 This Agreement is based on the Initial Information set forth in this Section 1.1.
(For each item in this section, insert the information or a statement such as "not applicable" or "unknown at time of execution.")

§ 1.1.1 The Owner's program for the Project, as described in Section 4.1.1:
(Insert the Owner's program, identify documentation that establishes the Owner's program, or state the manner in which the program will be developed.)

Provide services described in the Preconstruction Phase Scope of Services attached hereto as Exhibit "D" related to the construction of the City of Port Orange Public Utilities Field Operations Facility that will consist of a 11,500 SF Administration Building, a 12,300 SF Warehouse, and all associated site improvements.

§ 1.1.2 The Project's physical characteristics:
(Identify or describe pertinent information about the Project's physical characteristics, such as size; location; dimensions; geotechnical reports; site boundaries; topographic surveys; traffic and utility studies; availability of public and private utilities and services; legal description of the site, etc.)

See § 1.1 above.

§ 1.1.3 The Owner's budget for the Guaranteed Maximum Price, as defined in Article 6:
(Provide total and, if known, a line item breakdown.)

To be determined.

§ 1.1.4 The Owner's anticipated design and construction milestone dates:

.1 Design phase milestone dates, if any:

Pre-Construction Services Start Date: The Date of this Agreement

Construction Drawings shall be completed by: Four (4) months from the date hereof

Pre-Construction Services End Date: Four (4) months from the date hereof

.2 Construction commencement date: The date of execution of the Guaranteed Maximum Price Amendment by both Parties (attached hereto as Exhibit "A").

.3 Substantial Completion date or dates: To be provided and agreed upon by both Parties in the Guaranteed Maximum Price Amendment (attached hereto as Exhibit "A").

(Paragraph deleted)

.4 Other milestone dates: To be provided and agreed upon by both Parties in the Guaranteed Maximum Price Amendment (attached hereto as Exhibit "A").

§ 1.1.5 The Owner's requirements for accelerated or fast-track scheduling, or phased construction, are set forth below:
(Identify any requirements for fast-track scheduling or phased construction.)

NOT APPLICABLE

§ 1.1.6 The Owner's anticipated Sustainable Objective for the Project:
(Identify and describe the Owner's Sustainable Objective for the Project, if any.)

NOT APPLICABLE

§ 1.1.6.1 (Intentionally omitted.)

§ 1.1.7 Other Project information:
(Identify special characteristics or needs of the Project not provided elsewhere.)

NOT APPLICABLE

§ 1.1.8 The Owner identifies the following representative in accordance with Section 4.2:
(List name, address, and other contact information.)

Junos Reed, City Engineer
City of Port Orange
1000 City Center Circle
Port Orange, FL 32129
Phone: 386-506-5757
Email: jureed@port-orange.org

§ 1.1.9 The persons or entities, in addition to the Owner's representative, who are required to review the Construction Manager's submittals to the Owner are as follows:
(List name, address and other contact information.)

NOT APPLICABLE

§ 1.1.10 The Owner may retain consultants and contractors for each Project.
(List name, legal status, address, and other contact information.)

.1 Geotechnical Engineer:

NOT APPLICABLE

.2 Civil Engineer:

NOT APPLICABLE

.3 Other, if any:
(List any other consultants retained by the Owner, such as a Project or Program Manager.)

NOT APPLICABLE

§ 1.1.11 The Architect's representative:
(List name, address, and other contact information.)

Gay Geiger
Schenkel Schultz, Inc.
200 East Robinson Street, Suite 300
Orlando, FL 32801
Phone: 407-872-3322
Email: ggeiger@schenkelshultz.com

§ 1.1.12 The Construction Manager identifies the following representative in accordance with Article 3:
(List name, address, and other contact information.)

James De LaRosa, Project Executive
Wharton-Smith, Inc.
750 Monroe Road
Sanford, FL 32771
Phone: 689-267-8629

§ 1.1.13 The Owner's requirements for the Construction Manager's staffing plan for Preconstruction Services, as required under Section 3.1.9:
(List any Owner-specific requirements to be included in the staffing plan.)

NOT APPLICABLE

§ 1.1.14 The Owner's requirements for subcontractor procurement for the performance of the Work:
(List any Owner-specific requirements for subcontractor procurement.)

The Construction Manager shall seek to develop subcontractor interest in the Project and shall furnish to the Owner and Architect for their information a list of possible subcontractors, including suppliers who are to furnish materials or equipment fabricated to a special design, from whom proposals will be requested for each principal portion of the Work. The Architect will promptly reply in writing to the Construction Manager if the Architect or Owner know of any objection to such subcontractor or supplier. The receipt of such list shall not require the Owner or Architect to investigate the qualifications of proposed subcontractors or suppliers, nor shall it waive the right of the Owner or Architect to object to or reject any proposed subcontractor or supplier within (5) business days of receipt of Construction Manager's list of possible subcontractors. Provided, however, if Owner or Architect object to a subcontractor or supplier, Owner shall be responsible to compensate Construction Manager should there be additional cost associated with utilizing Owner or Architect's preferred subcontractor or supplier. Further, Owner or Architect shall not object to a subcontractor or supplier due to the price of the work.

§ 1.1.15 Other Initial Information on which this Agreement is based:

See Preconstruction Phase – Scope of Services attached hereto as Exhibit "D".

§ 1.2 The Owner and Construction Manager may rely on the Initial Information. Both parties, however, recognize that such information may materially change and, in that event, the Owner and the Construction Manager shall appropriately adjust the Project schedule, the Construction Manager's services, and the Construction Manager's compensation. The Owner shall adjust the Owner's budget for the Guaranteed Maximum Price and the Owner's anticipated design and construction milestones, as necessary, to accommodate material changes in the Initial Information.

§ 1.3 Neither the Owner's nor the Construction Manager's representative shall be changed without ten days' prior notice to the other party.

ARTICLE 2 GENERAL PROVISIONS

§ 2.1 The Contract Documents

The Contract Documents consist of this Agreement, the Guaranteed Maximum Price Amendment(s) (attached hereto as Exhibit "A"), the Insurance and Bonds (attached hereto as Exhibit "B" and Exhibit "B-1"), AIA Document A201-2017 General Conditions (as modified by Owner and attached hereto as Exhibit "C") Conditions of the Contract (General Conditions), Drawings, Specifications, Addenda issued prior to execution of this Agreement, other documents listed in § 15.2 of this Agreement, and Modifications issued after execution of this Agreement, all of which form the Contract and are as fully a part of the Contract as if attached to this Agreement or repeated herein. Upon the Owner's acceptance of the Construction Manager's Guaranteed Maximum Price proposal, the Contract Documents will also include the documents described in Section 3.2.3 and identified in the Guaranteed Maximum Price Amendment and revisions prepared by the Architect and furnished by the Owner as described in Section 3.2.8. The Contract represents the entire and integrated agreement between the parties hereto and supersedes prior negotiations, representations or agreements, either written or oral. If anything in the other Contract Documents, other than a Modification, is inconsistent with this Agreement, this Agreement shall govern. An enumeration of the Contract Documents, other than a Modification, appears in Article 15.

§ 2.2 Relationship of the Parties

The Construction Manager accepts the relationship of trust and confidence established by this Agreement and covenants with the Owner to cooperate with the Architect and exercise the Construction Manager's skill and judgment in furthering the interests of the Owner to furnish efficient construction administration, management services, and supervision; to furnish at all times an adequate supply of workers and materials; and to perform the Work in an expeditious and economical manner consistent with the Owner's interests. The Owner agrees to furnish or approve, in a timely manner,

information required by the Construction Manager and to make payments to the Construction Manager in accordance with the requirements of the Contract Documents.

§ 2.3 General Conditions

§ 2.3.1 For the Preconstruction Phase, AIA Document A201™–2017, General Conditions of the Contract for Construction as modified by Owner (hereinafter "A201-2017"), shall apply as follows: Section 1.5, Ownership and Use of Documents; Section 1.7, Digital Data Use and Transmission; Section 1.8, Building Information Model Use and Reliance; Section 2.2.4, Confidential Information; Section 3.12.10, Professional Services; Section 10.3, Hazardous Materials; Section 13.1, Governing Law. The term "Contractor" as used in A201–2017 shall mean the Construction Manager.

§ 2.3.2 For the Construction Phase, the general conditions of the contract shall be as set forth in A201–2017, which document is incorporated herein by reference. The term "Contractor" as used in A201–2017 shall mean the Construction Manager.

ARTICLE 3 CONSTRUCTION MANAGER'S RESPONSIBILITIES

The Construction Manager's Preconstruction Phase responsibilities are set forth in Sections 3.1 and 3.2, and in the applicable provisions of A201-2017 referenced in Section 2.3.1. The Construction Manager's Construction Phase responsibilities are set forth in Section 3.3. The Owner and Construction Manager may agree, in consultation with the Architect, for the Construction Phase to commence prior to completion of the Preconstruction Phase, in which case, both phases will proceed concurrently. The Construction Manager shall identify a representative authorized to act on behalf of the Construction Manager with respect to the Project. The standard of care for the professional services performed by the Construction Manager and its Sub-Consultants pursuant to this Agreement shall be the care and skill ordinarily used by members of the same profession practicing under similar conditions at the same time and locality of the Project.

§ 3.1 Preconstruction Phase

§ 3.1.1 Extent of Responsibility

The Construction Manager shall exercise reasonable care in performing its Preconstruction Services. The Owner and Architect shall be entitled to rely on, and shall not be responsible for, the accuracy, completeness, and timeliness of services and information furnished by the Construction Manager. The Construction Manager, however, does not warrant or guarantee estimates and schedules except as may be included as part of the Guaranteed Maximum Price. The recommendations and advice of the Construction Manager concerning design alternatives shall be subject to the review and approval of the Owner. The Construction Manager is not required to ascertain that the Drawings and Specifications are in accordance with applicable laws, statutes, ordinances, codes, rules and regulations, or lawful orders of public authorities, but the Construction Manager shall promptly report to the Architect and Owner any nonconformity discovered by or made known to the Construction Manager as a request for information in such form as the Architect may require.

§ 3.1.2 The Construction Manager shall provide a preliminary evaluation of the Owner's program, schedule and construction budget requirements, each in terms of the other.

§ 3.1.3 Consultation

§ 3.1.3.1 The Construction Manager shall schedule and conduct meetings with the Architect and Owner to discuss such matters as procedures, progress, coordination, and scheduling of the Work.

§ 3.1.3.2 The Construction Manager shall advise the Owner and Architect on proposed site use and improvements, selection of materials, building systems, and equipment. The Construction Manager shall also provide recommendations to the Owner and Architect, consistent with the Project requirements, on constructability; availability of materials and labor; time requirements for procurement, installation and construction; prefabrication; and factors related to construction cost including, but not limited to, costs of alternative designs or materials, preliminary budgets, life-cycle data, and possible cost reductions. The Construction Manager shall consult with the Architect regarding professional services to be provided by the Construction Manager during the Construction Phase.

§ 3.1.3.3 (Intentionally omitted.)

§ 3.1.4 Project Schedule

When Project requirements in Section 4.1.1 have been sufficiently identified, the Construction Manager shall prepare and periodically update a Project schedule for the Architect's review and the Owner's acceptance. The Construction Manager

User Notes: School Board of Volusia County Florida - Continuing Services - DRAFT 2020-Nov-02. (1298293849)

shall obtain the Architect's approval for the portion of the Project schedule relating to the performance of the Architect's services. The Project schedule shall coordinate and integrate the Construction Manager's services, the Architect's services, other Owner consultants' services, and the Owner's responsibilities; and identify items that affect the Project's timely completion. The updated Project schedule shall include the following: submission of the Guaranteed Maximum Price proposal; components of the Work; times of commencement and completion required of each Subcontractor; ordering and delivery of products, including those that must be ordered in advance of construction; and the occupancy requirements of the Owner.

§ 3.1.5 Phased Construction

The Construction Manager shall make recommendations to the Owner and Architect regarding the phased construction of the Work, if such phased construction is appropriate for the Project. The Construction Manager shall take into consideration cost reductions, cost information, constructability, provisions for temporary facilities, and procurement and construction scheduling issues.

§ 3.1.6 Cost Estimates

§ 3.1.6.1 Based on the preliminary design and other design criteria prepared by the Architect, the Construction Manager shall prepare, for the Architect's review and the Owner's approval, preliminary estimates of the Cost of the Work or the cost of program requirements using area, volume, or similar conceptual estimating techniques. If the Architect or Construction Manager suggests alternative materials and systems, the Construction Manager shall provide cost evaluations of those alternative materials and systems.

§ 3.1.6.2 As the Architect progresses with the preparation of the Schematic Design, Design Development and Construction Documents, the Construction Manager shall prepare and updateat appropriate intervals agreed to by the Owner, Construction Manager and Architect, an estimate of the Cost of the Work with increasing detail and refinement. The Construction Manager shall include in the estimate those costs to allow for the further development of the design, price escalation, and market conditions, until such time as the Owner and Construction Manager agree on a Guaranteed Maximum Price for the Work. The estimate shall be provided for the Architect's review and the Owner's approval. The Construction Manager shall inform the Owner and Architect in the event that the estimate of the Cost of the Work exceeds the latest approved Project budget, and make recommendations for corrective action.

§ 3.1.6.3 If the Architect is providing cost estimating services and a discrepancy exists between the Construction Manager's cost estimates and the Architect's cost estimates, the Construction Manager and the Architect shall work together to reconcile the cost estimates.

§ 3.1.7 As the Architect progresses with the preparation of the Schematic Design, Design Development and Construction Documents, the Construction Manager shall consult with the Owner and Architect and make recommendations regarding constructability and schedules, for the Architect's review and the Owner's approval.

§ 3.1.8 The Construction Manager shall provide recommendations and information to the Owner and Architect regarding equipment, materials, services, and temporary Project facilities.

§ 3.1.9 The Construction Manager shall provide a staffing plan for Preconstruction Phase services at the Owner's request for the Owner's review and approval.

§ 3.1.10

§ 3.1.11 Subcontractors and Suppliers

§ 3.1.11.1 If the Owner has provided requirements for subcontractor procurement in section 1.1.14, the Construction Manager shall provide a subcontracting plan, addressing the Owner's requirements, for the Owner's review and approval.

§ 3.1.11.2 The Construction Manager shall develop bidders' interest in the Project.

§ 3.1.11.3 The processes described in Article 9 shall apply if bid packages will be issued during the Preconstruction Phase.

§ 3.1.12 Procurement

The Construction Manager shall prepare, for the Architect's review and the Owner's acceptance, a procurement schedule for items that must be ordered in advance of construction. The Construction Manager shall expedite and coordinate the

User Notes: School Board of Volusia County Florida - Continuing Services - DRAFT 2020-Nov-02. (1298293849)

ordering and delivery of materials that must be ordered in advance of construction. If the Owner agrees to procure any items prior to the establishment of the Guaranteed Maximum Price, the Owner shall procure the items on terms and conditions as set forth in Section 3.4.5 of the A201-2017 General Conditions.

§ 3.1.13 Compliance with Laws

The Construction Manager shall comply with applicable laws, statutes, ordinances, codes, rules and regulations, and lawful orders of public authorities applicable to its performance under this Contract, and with equal employment opportunity programs, and other programs as may be required by governmental and quasi-governmental authorities.

§ 3.1.14 Other Preconstruction Services

Insert a description of any other Preconstruction Phase services to be provided by the Construction Manager, or reference an exhibit attached to this document

(Describe any other Preconstruction Phase services, such as providing cash flow projections, development of a project information management system, early selection or procurement of subcontractors, etc.)

NOT APPLICABLE

§ 3.2 Guaranteed Maximum Price Proposal

§ 3.2.1 At a time to be mutually agreed upon by the Owner and the Construction Manager, the Construction Manager shall prepare a Guaranteed Maximum Price proposal for the Owner's and Architect's review, and the Owner's acceptance. The Guaranteed Maximum Price in the proposal shall be the sum of the Construction Manager's estimate of the Cost of the Work, the Construction Manager's contingency described in Section 3.2.4, and the Construction Manager's Fee described in Section 6.1.2. If the Owner does not accept the Construction Manager's Guaranteed Maximum Price proposal (Exhibit "A") then the Construction Manager shall have no obligation or right to proceed with construction. Owner retains the right to proceed with construction with another construction manager or contractor.

§ 3.2.2 To the extent that the Contract Documents are anticipated to require further development, the Guaranteed Maximum Price includes the costs attributable to such further development consistent with the Contract Documents and reasonably inferable therefrom. Such further development does not include changes in scope, systems, kinds and quality of materials, finishes, or equipment, all of which, if required, shall be incorporated by Change Order.

§ 3.2.3 The Construction Manager shall include with the Guaranteed Maximum Price proposal a written statement of its basis, which shall include the following:

.1 A list of the Drawings and Specifications, including all Addenda thereto, and the Conditions of the Contract;

.2 A list of allowances and a statement of their basis;

.3 A list of the clarifications and assumptions made by the Construction Manager in the preparation of the Guaranteed Maximum Price proposal, including assumptions under Section 3.2.2;

.4 A statement of the proposed Guaranteed Maximum Price, including a statement of the estimated Cost of the Work organized by trade categories or systems, including allowances; the Construction Manager's contingency set forth in Section 3.2.4; and the Construction Manager's Fee; and

.5 The anticipated date of Substantial Completion upon which the proposed Guaranteed Maximum Price is based

.5 A date by which the Owner must accept the Guaranteed Maximum Price.

§ 3.2.4 Contingency

§ 3.2.4.1 Construction Manager's Contingency

The estimated Cost of Work shall include the Construction Manager's Contingency, an amount mutually agreeable between the Construction Manager and Owner, to cover costs arising under Subparagraph 3.2.2, and other costs which are properly reimbursable as Costs of Work, but not the basis for a Change Order. The Construction Manager's Contingency is for the exclusive use of the Construction Manager while executing the construction Work to address unexpected circumstances, force majeure impacts, and to correct unanticipated circumstances which are not otherwise reimbursable and do not constitute a change in the Work, as defined in this Agreement. The Construction Manager's Contingency shall only be adjusted by a written Change Order; and it shall be clearly noted on the Change Order that costs are allocated against the Construction Manager's Contingency. The Construction Manager shall maintain a Contingency tracking log updated each time Construction Manager's contingency funds are used.

User Notes: School Board of Volusia County Florida - Continuing Services - DRAFT 2020-Nov-02. (1298293849)

§ 3.2.4.2 Buyout Contingency

It is expected that some cost savings between the Construction Manager's Guaranteed Maximum Price (GMP) and the actual Cost of Work may be generated as a result of the final bidding and negotiations of subcontracts. Any cost savings generated as a result of the final bidding or negotiation of subcontracts, and actual expenses by the Construction Manager, which are less than was estimated in establishing the GMP shall be retained by the Owner as the Buyout Contingency. The negotiated fee and general conditions will not be adjusted as result of these savings. The Buyout Contingency shall only be adjusted by means of the Owner issuing a written Change Order and it shall be clearly noted on the Change Order that costs are allocated against the Buyout Contingency. The Construction Manager shall maintain a Buyout Contingency tracking log updated each time Buyout contingency funds are used. The Buyout Contingency remains in the Project until final completion where remaining funds shall be returned to the Owner.

§ 3.2.5 The Construction Manager shall meet with the Owner and Architect to review the Guaranteed Maximum Price proposal. In the event that the Owner or Architect discover any inconsistencies or inaccuracies in the information presented, they shall promptly notify the Construction Manager, who shall make appropriate adjustments to the Guaranteed Maximum Price proposal, its basis, or both.

§ 3.2.6 Following acceptance of a Guaranteed Maximum Price, the Owner and Construction Manager shall execute the Guaranteed Maximum Price Amendment(s) amending this Agreement, a copy of which the Owner shall provide to the Architect. The Guaranteed Maximum Price Amendment(s) shall set forth the agreed upon Guaranteed Maximum Price with the information and assumptions upon which it is based. The Guaranteed Maximum Price shall be subject to additions and deductions by a change in the Work as provided in the Contract Documents, and the Date of Substantial Completion shall be subject to adjustment as provided in the Contract Documents.

§ 3.2.7 The Construction Manager shall not incur any cost to be reimbursed as part of the Cost of the Work prior to the execution of the Guaranteed Maximum Price Amendment(s), unless the Owner provides prior written authorization for such costs.

§ 3.2.8 The Owner shall authorize written revisions to the Contract Documents that incorporate the agreed-upon assumptions and clarifications contained in the Guaranteed Maximum Price Amendment(s). The Owner shall furnish such revised Contract Documents to the Construction Manager. The Construction Manager shall notify the Owner and Architect of any inconsistencies between the agreed-upon assumptions and clarifications contained in the Guaranteed Maximum Price Amendment(s) and the revised Contract Documents and any increase in the Guaranteed Maximum Price, if any.

§ 3.2.9 The Construction Manager shall include in the Guaranteed Maximum Price all sales, consumer, use and similar taxes for the Work provided by the Construction Manager that are legally enacted, whether or not yet effective, at the time the Guaranteed Maximum Price Amendment is executed.

§ 3.3 Construction Phase

§ 3.3.1 General

§ 3.3.1.1 For purposes of Section 8.1.2 of A201–2017, the date of commencement of the Work shall mean the date of commencement of the Construction Phase.

§ 3.3.1.2 The Construction Phase shall commence as mutually agreed to by the Owner and Construction Manager . The written agreement shall set forth a description of the Work to be performed by the Construction Manager, and any insurance and bond requirements for Work performed prior to execution of the Guaranteed Maximum Price Amendment(s).

§ 3.3.2 Administration

§ 3.3.2.1 The Construction Manager shall schedule and conduct meetings to discuss such matters as procedures, progress, coordination, scheduling, and status of the Work. The Construction Manager shall prepare and promptly distribute minutes of the meetings to the Owner and Architect.

§ 3.3.2.2 Upon the execution of the Guaranteed Maximum Price Amendment, the Construction Manager shall prepare and submit to the Owner and Architect a construction schedule for the Work and a submittal schedule in accordance with Section 3.10 of A201–2017.

§ 3.3.2.3 Monthly Report

The Construction Manager shall record the progress of the Project. On a monthly basis, or otherwise as agreed to by the Owner, the Construction Manager shall submit written progress reports to the Owner and Architect, showing percentages of completion and other information required by the Owner.

§ 3.3.2.4 Daily Logs

The Construction Manager shall keep, and make available to the Owner and Architect, a daily log containing a record for each day of weather, portions of the Work in progress, number of workers on site, identification of equipment on site, problems that might affect progress of the work, accidents, injuries, and other information required by the Owner.

§ 3.3.2.5 Cost Control

The Construction Manager shall develop a system of cost control for the Work, including regular monitoring of actual costs for activities in progress and estimates for uncompleted tasks and proposed changes. The Construction Manager shall identify variances between actual and estimated costs and report the variances to the Owner and Architect, and shall provide this information in its monthly reports, and payment applications to the Owner and Architect and make access available via Procore, in accordance with Section 3.3.2.3 above.

§ 3.4 CONSTRUCTION MANAGER'S KEY PERSONNEL

The Construction Manager shall provide accounting of Construction Manager's Consultants, Design Professionals, and Suppliers as set forth in Article A.5 Construction Manager's Key Personnel, of the Guaranteed Maximum Price Amendment(s), Exhibit "A" via the Certificates of Payment Application.

ARTICLE 4 OWNER'S RESPONSIBILITIES

§ 4.1 Information and Services Required of the Owner

§ 4.1.1 The Owner shall provide information with reasonable promptness, regarding requirements for and limitations on the Project, including a written program which shall set forth the Owner's objectives, constraints, and criteria, including schedule, space requirements and relationships, flexibility and expandability, special equipment, systems, sustainability and site requirements.

§ 4.1.2 (Intentionally omitted.)

§ 4.1.3 The Owner shall establish and may periodically update the Owner's budget for the Project, including (1) the budget for the Cost of the Work as defined in Article 7, (2) the Owner's other costs, and (3) reasonable contingencies related to all of these costs. If the Owner significantly increases or decreases the Owner's budget for the Cost of the Work, the Owner shall notify the Construction Manager and Architect. The Owner and the Architect, in consultation with the Construction Manager, shall thereafter agree to a corresponding change in the Project's scope and quality.

§ 4.1.4 **Structural and Environmental Tests, Surveys and Reports.** During the Preconstruction Phase, the Owner shall furnish the following information or services with reasonable promptness. The Owner shall also furnish any other information or services under the Owner's control and relevant to the Construction Manager's performance of the Work with reasonable promptness after receiving the Construction Manager's written request for such information or services. The Construction Manager shall be entitled to rely on the accuracy of information and services furnished by the Owner but shall exercise proper precautions relating to the safe performance of the Work.

§ 4.1.4.1 The Owner shall furnish tests, inspections, and reports, required by law and as otherwise agreed to by the parties, such as structural, mechanical, and chemical tests, tests for air and water pollution, and tests for hazardous materials with reasonable promptness.

§ 4.1.4.2 The Owner shall furnish surveys with reasonable promptness describing physical characteristics, legal limitations and utility locations for the site of the Project, and a written legal description of the site. The surveys and legal information shall include, as applicable, grades and lines of streets, alleys, pavements and adjoining property and structures; designated wetlands; adjacent drainage; rights-of-way, restrictions, easements, encroachments, zoning, deed restrictions, boundaries and contours of the site; locations, dimensions and other necessary data with respect to existing buildings, other improvements and trees; and information concerning available utility services and lines, both public and private, above and below grade, including inverts and depths. All the information on the survey shall be referenced to a Project benchmark.

User Notes: School Board of Volusia County Florida - Continuing Services - DRAFT 2020-Nov-02. (1298293849)

§ 4.1.4.3 The Owner may furnish services of geotechnical engineers, which may include test borings, test pits, determinations of soil bearing values, percolation tests, evaluations of hazardous materials, seismic evaluation, ground corrosion tests and resistivity tests, including necessary operations for anticipating subsoil conditions, with written reports and appropriate recommendations.

§ 4.1.5 During the Construction Phase, the Owner shall furnish information or services required of the Owner by the Contract Documents with reasonable promptness. The Owner shall also furnish any other information or services under the Owner's control and relevant to the Construction Manager's performance of the Work with reasonable promptness after receiving the Construction Manager's written request for such information or services.

§ 4.1.6

§ 4.2 Owner's Designated Representative
The Owner's Representative is named in § 1.1.8 or designee. The Owner's Representative is authorized to act on Owner's behalf as provided herein and in applicable law, regulation, or ordinance. The Owner's Representative has the authority to reject unsatisfactory work and to stop the work, if necessary, to insure its proper execution. Failure of the Owner's Representative, in any one or more instances, to insist on strict performance of any of the terms of this Contract or to exercise any option herein conferred shall not be construed as a waiver or relinquishment for the future insistence of any such terms or options.

§ 4.2.1 Legal Requirements. The Owner shall furnish all legal, insurance and accounting services, including auditing services, that may be reasonably necessary at any time for the Project to meet the Owner's needs and interests.

§ 4.3 Architect
The Owner shall retain an Architect to provide services, duties and responsibilities as described in AIA Standard Form of Agreement Between Owner and Architect.

ARTICLE 5 COMPENSATION AND PAYMENTS FOR PRECONSTRUCTION PHASE SERVICES
§ 5.1 Compensation
§ 5.1.1 For the Construction Manager's Preconstruction Phase services described in Sections 3.1 and 3.2, the Owner shall compensate the Construction Manager as follows:
(Insert amount of, or basis for, compensation and include a list of reimbursable cost items, as applicable.)

Preconstruction Services will be set at a stipulated sum of One Hundred Sixteen Thousand Nine Hundred Thirty-Two Dollars and Zero Cents ($116,932.00).

§ 5.1.2 The hourly billing rates for Preconstruction Phase services of the Construction Manager and the Construction Manager's Consultants and Subcontractors, if any, are set forth below.
(If applicable, attach an exhibit of hourly billing rates or insert them below.)

WSI Wage Rate - 2024

Position	Name of Person Filing Role	Total Rate
Project Director	To Be Determined	$161.00
CMAR Manager	To Be Determined	$169.00
Executive Management	James De La Rosa	$169.00
Senior Project Manager	Keri Strawder	$151.00
Project Manager	To Be Determined	$130.00
Assistant Project Manager	To Be Determined	$112.00
Project Engineer	To Be Determined	$84.00
Project Engineer – Intern	To Be Determined	$51.00
General Superintendent	Tim Moore	$163.00
Senior Superintendent	To Be Determined	$152.00
Superintendent	To Be Determined	$131.00
Assistant Superintendent	To Be Determined	$118.00
Field Engineer	To Be Determined	$89.00

User Notes: School Board of Volusia County Florida - Continuing Services - DRAFT 2020-Nov-02. (1298293849)

Administrative Assistant	Jennifer Butcher	$83.00
Safety Manager	Travis Chaput	$118.00
Project Accountant	To Be Determined	$105.00

§ 5.1.2.1 Hourly billing rates for Preconstruction Phase services include all costs to be paid or incurred by the Construction Manager, as required by law or collective bargaining agreements, for taxes, insurance, contributions, assessments and benefits and, for personnel not covered by collective bargaining agreements, customary benefits such as sick leave, medical and health benefits, holidays, vacations and pensions, and shall remain unchanged unless the parties execute a Modification.

§ 5.1.3 Compensation for Preconstruction Phase Services shall be equitably adjusted if such services extend beyond one hundred twenty (120) calendar days from the date of this Agreement or if the originally contemplated scope of services is significantly modified.

§ 5.2 Payments

§ 5.2.1 Unless otherwise agreed, payments for services shall be made monthly in proportion to services performed.

§ 5.2.2 Payments are due and payable thirty (30) days upon presentation of the Construction Manager's invoice.

- Proposed Start Date: Pre-Construction Services: August 7, 2024
- Proposed End Date : Pre-Construction Services: October 2024 (estimated)

ARTICLE 6 COMPENSATION FOR CONSTRUCTION PHASE SERVICES

§ 6.1 Contract Sum

§ 6.1.1 If the Owner accepts the Construction Manager's Contract Sum for construction and executes Exhibit "A", then the Owner shall pay the Construction Manager the Contract Sum in current funds for the Construction Manager's performance of the Contract after execution of the Guaranteed Maximum Price Amendment(s). The Contract Sum is the Cost of the Work as defined in Article 7 plus the Construction Manager's Fee.

§ 6.1.2 The Construction Manager's Fee:
(State a lump sum, percentage of Cost of the Work or other provision for determining the Construction Manager's Fee.)

Eight and a half percent (8.5%) of the Cost of the Work.

§ 6.1.3 The method of adjustment of the Construction Manager's Fee for changes in the Work:

In the event of Owner directed changes, the Construction Manager's Fee shall be eight and a half percent (8.5%) of the increase in the Cost of Work for the changes.

§ 6.1.4 Limitations, if any, on a Subcontractor's overhead and profit for increases in the cost of its portion of the Work:

Subcontractors increased costs of work for Owner directed changes shall include five percent (5%) overhead and five percent (5%) profit.

§ 6.1.5 Rental rates for Construction Manager-owned equipment shall not exceed the standard rental rate paid at the place of the Project.

§ 6.1.6 Liquidated damages, if any:
(Insert terms and conditions for liquidated damages, if any.)

The Owner and Construction Manager acknowledge and agree that it would be difficult to determine, with any reasonable degree of certainty, the amount of damages which the Owner would sustain in the event that the Construction Manager fails to attain Substantial Completion of the Work on or before the date established. The Construction Manager acknowledges and understands that failure to fully complete the Work within the aforesaid time periods will result in substantial loss and damages suffered by the Owner. Therefore, if the Construction Manager shall neglect, fail, or refuse to complete the Work within the Contract Time, or any proper extension thereof granted by the Owner in a properly

User Notes: School Board of Volusia County Florida - Continuing Services - DRAFT 2020-Nov-02. (1298293849)

executed Change Order, the Construction Manager agrees to pay the Owner liquidated damages in the amount(s) of $500 for each and every calendar day that the Construction Manager shall be in default for untimely completion after expiration of the Contract Time for Substantial Completion. However, liquidated damages shall be limited to and not exceed the fee earned by the Construction Manager in order for the liquidated damages to not be deemed a penalty. Such payments shall constitute liquidated damages, not a penalty, and shall be cumulative, it being understood and agreed by the Construction Manager that the Owner's actual damages in the event of a delay in Substantial Completion would be difficult, if not impossible, to determine. Time is of the essence of this Agreement. Any such liquidated damages may, at the option of the Owner, be withheld and deducted from any unpaid portion of the Guaranteed Maximum Price. Liquidated damages shall be the sole and exclusive remedy for delay.

§ 6.1.7 Other:
(Insert provisions for bonus, cost savings or other incentives, if any, that might result in a change to the Contract Sum.)

NOT APPLICABLE

§ 6.2 Guaranteed Maximum Price
The Construction Manager guarantees that the Contract Sum shall not exceed the Guaranteed Maximum Price set forth in the Guaranteed Maximum Price Amendment(s), subject to additions and deductions by Change Order as provided in the Contract Documents. Costs which would cause the Guaranteed Maximum Price to be exceeded shall be paid by the Construction Manager without reimbursement by the Owner.

§ 6.3 Changes in the Work
§ 6.3.1 The Owner may, without invalidating the Contract, order changes in the Work within the general scope of the Contract consisting of additions, deletions or other revisions. The Owner shall issue such changes in writing. The Construction Manager may be entitled to an equitable adjustment in the Contract Time and/or Guaranteed Maximum Price as a result of changes in the Work.

§ 6.3.1.1 The Architect may order minor changes in the Work as provided in Article 7 of AIA Document A201–2017, General Conditions of the Contract for Construction.

§ 6.3.2 Adjustments to the Guaranteed Maximum Price on account of changes in the Work subsequent to the execution of the Guaranteed Maximum Price Amendment may be determined by any of the methods listed in Article 7 of AIA Document A201–2017, General Conditions of the Contract for Construction.

§ 6.3.3 Adjustments to subcontracts awarded on the basis of a stipulated sum shall be determined in accordance with Article 7 of A201–2017, as they refer to "cost" and "fee," and not by Articles 6 and 7 of this Agreement. Adjustments to subcontracts awarded with the Owner's prior written consent on the basis of cost plus a fee shall be calculated in accordance with the terms of those subcontracts.

§ 6.3.4 In calculating adjustments to the Guaranteed Maximum Price, the terms "cost" and "costs" as used in Article 7 of AIA Document A201–2017 shall mean the Cost of the Work as defined in Article 7 of this Agreement and the term "fee" shall mean the Construction Manager's Fee as defined in Section 6.1.2 of this Agreement.

§ 6.3.5 If no specific provision is made in Section 6.1.3 for adjustment of the Construction Manager's Fee in the case of changes in the Work, or if the extent of such changes is such, in the aggregate, that application of the adjustment provisions of Section 6.1.3 will cause substantial inequity to the Owner or Construction Manager, the Construction Manager's Fee shall be equitably adjusted on the same basis that was used to establish the Fee for the original Work, and the Guaranteed Maximum Price shall be adjusted accordingly.

ARTICLE 7 COST OF THE WORK FOR CONSTRUCTION PHASE

§ 7.1 Costs to Be Reimbursed
§ 7.1.1 The term Cost of the Work shall mean costs necessarily incurred by the Construction Manager in the proper performance of the Work. The Cost of the Work shall include only the items set forth in Sections 7.1 through 7.7.

§ 7.1.2 Where, pursuant to the Contract Documents, any cost is subject to the Owner's prior approval, the Construction Manager shall obtain such approval in writing prior to incurring the cost.

§ 7.1.3 Costs shall be at rates not higher than the standard rates paid at the place of the Project, except with prior approval of the Owner.

§ 7.2 Labor Costs

§ 7.2.1 Wages or salaries of construction workers directly employed by the Construction Manager to perform the construction of the Work at the site or, with the Owner's prior approval, at off-site workshops.

§ 7.2.2 (Intentionally omitted.)

§ 7.2.2.1
(Paragraphs deleted)
(Intentionally Omitted.)

§ 7.2.3 Wages and salaries of the Construction Manager's supervisory or administrative personnel engaged at factories, workshops or while traveling, in expediting the production or transportation of materials or equipment required for the Work, but only for that portion of their time required for the Work.

§ 7.2.4 Costs paid or incurred by the Construction Manager, as required by law or collective bargaining agreements, for taxes, insurance, contributions, assessments and benefits and, for personnel not covered by collective bargaining agreements, customary benefits such as sick leave, medical and health benefits, holidays, vacations and pensions, provided such costs are based on wages and salaries included in the Cost of the Work under Sections 7.2.1 through 7.2.3.

§ 7.2.5 If agreed rates for labor costs, in lieu of actual costs, are provided in this Agreement, the rates shall remain unchanged throughout the duration of this Agreement, unless the parties execute a Modification.

§ 7.3 Subcontract Costs

Payments made by the Construction Manager to Subcontractors in accordance with the requirements of the subcontracts and this Agreement.

§ 7.4 Costs of Materials and Equipment Incorporated in the Completed Construction

§ 7.4.1 Costs, including transportation and storage at the site, of materials and equipment incorporated, or to be incorporated, in the completed construction.

§ 7.4.2 Costs of materials described in the preceding Section 7.4.1 in excess of those actually installed to allow for reasonable waste and spoilage. Unused excess materials, if any, shall become the Owner's property at the completion of the Work or, at the Owner's option, shall be sold by the Construction Manager. Any amounts realized from such sales shall be credited to the Owner as a deduction from the Cost of the Work.

§ 7.5 Costs of Other Materials and Equipment, Temporary Facilities and Related Items

§ 7.5.1 Costs of transportation, storage, installation, dismantling, maintenance, and removal of materials, supplies, temporary facilities, machinery, equipment and hand tools not customarily owned by construction workers that are provided by the Construction Manager at the site and fully consumed in the performance of the Work. Costs of materials, supplies, temporary facilities, machinery, equipment, and tools, that are not fully consumed, shall be based on the cost or value of the item at the time it is first used on the Project site less the value of the item when it is no longer used at the Project site. Costs for items not fully consumed by the Construction Manager shall mean fair market value.

§ 7.5.2 Rental charges for temporary facilities, machinery, equipment, and hand tools not customarily owned by construction workers that are provided by the Construction Manager at the site, and the costs of transportation, installation, dismantling, minor repairs, and removal of such temporary facilities, machinery, equipment, and hand tools. Rates and quantities of equipment owned by the Construction Manager, or a related party as defined in Section 7.8, shall be subject to the Owner's prior approval. The total rental cost of any such equipment may not exceed the purchase price of any comparable item.

§ 7.5.3 Costs of removal of debris from the site of the Work and its proper and legal disposal.

User Notes: School Board of Volusia County Florida - Continuing Services - DRAFT 2020-Nov-02. (1298293849)

§ 7.5.4 Costs of the Construction Manager's site office, including general office equipment and supplies.

§ 7.5.5 Costs of materials and equipment suitably stored off the site at a mutually acceptable location, subject to the Owner's prior approval. Off-site storage shall be in a bonded and insured facility approved by the Owner.

§ 7.6 Miscellaneous Costs

§ 7.6.1 Premiums for that portion of insurance and bonds required by the Contract Documents that can be directly attributed to this Contract.

§ 7.6.1.1 Costs for self-insurance, for either full or partial amounts of the coverages required by the Contract Documents, with the Owner's prior approval. Coverages and costs must be disclosed in the Guaranteed Maximum Price Proposal and accepted by the Owner in the Guaranteed Maximum Price Amendment(s).

§ 7.6.1.2 Costs for insurance through a captive insurer owned or controlled by the Construction Manager, with the Owner's prior approval.

§ 7.6.2 Sales, use, or similar taxes, imposed by a governmental authority, that are related to the Work and for which the Construction Manager is liable.

§ 7.6.3 Fees and assessments for the building permit, and for other permits, licenses, and inspections, for which the Construction Manager is required by the Contract Documents to pay.

§ 7.6.4 Fees of laboratories for tests required by the Contract Documents; except those related to defective or nonconforming Work for which reimbursement is excluded under Article 13 of AIA Document A201–2017 or by other provisions of the Contract Documents, and which do not fall within the scope of Section 7.7.3.

§ 7.6.5 Royalties and license fees paid for the use of a particular design, process, or product, required by the Contract Documents.

§ 7.6.5.1 The cost of defending suits or claims for infringement of patent rights arising from requirements of the Contract Documents, payments made in accordance with legal judgments against the Construction Manager resulting from such suits or claims, and payments of settlements made with the Owner's consent. The costs of legal defenses, judgments, and settlements shall not be included in the Cost of the Work used to calculate the Construction Manager's Fee or subject to the Guaranteed Maximum Price.

§ 7.6.6 Costs for communications services, electronic equipment, and software, directly related to the Work and located at the site, with the Owner's prior approval.

§ 7.6.7 Costs of document reproductions and delivery charges.

§ 7.6.8 (Intentionally omitted.)

§ 7.6.9 (Intentionally omitted.)

§ 7.6.10 (Intentionally omitted.)

§ 7.6.11 That portion of the reasonable expenses of the Construction Manager's supervisory or administrative personnel incurred while traveling outside the Sanford area in discharge of duties connected with the Work.

§ 7.7 Other Costs and Emergencies

§ 7.7.1 Other costs incurred in the performance of the Work, with the Owner's prior approval.

§ 7.7.2 Costs incurred in taking action to prevent threatened damage, injury, or loss, in case of an emergency affecting the safety of persons and property, as provided in Article 10 of AIA Document A201–2017.

User Notes: School Board of Volusia County Florida - Continuing Services - DRAFT 2020-Nov-02. (1298293849)

§ 7.7.3 Notwithstanding anything herein to the contrary, no costs shall be paid by the Owner to the Construction Manager for any expenses made necessary to correct defective workmanship or to correct any Work not in conformance with the Contract Documents or to correct any deficiency or damage caused by negligent acts by the Construction Manager as determined by the Architect.

§ 7.7.4 The costs described in Sections 7.1 through 7.7 shall be included in the Cost of the Work, notwithstanding any provision of AIA Document A201–2017 or other Conditions of the Contract which may require the Construction Manager to pay such costs, unless such costs are excluded by the provisions of Section 7.9.

§ 7.8 Related Party Transactions

§ 7.8.1 For purposes of this Section 7.8, the term "related party" shall mean (1) a parent, subsidiary, affiliate, or other entity having common ownership of, or sharing common management with, the Construction Manager; (2) any entity in which any stockholder in, or management employee of, the Construction Manager holds an equity interest in excess of ten percent in the aggregate; (3) any entity which has the right to control the business or affairs of the Construction Manager; or (4) any person, or any member of the immediate family of any person, who has the right to control the business or affairs of the Construction Manager.

§ 7.8.2 If any of the costs to be reimbursed arise from a transaction between the Construction Manager and a related party, the Construction Manager shall notify the Owner of the specific nature of the contemplated transaction, including the identity of the related party and the anticipated cost to be incurred, before any such transaction is consummated or cost incurred. If the Owner, after such notification, authorizes the proposed transaction in writing, then the cost incurred shall be included as a cost to be reimbursed, and the Construction Manager shall procure the Work, equipment, goods, or service, from the related party, as a Subcontractor, according to the terms of Article 9. If the Owner fails to authorize the transaction in writing, the Construction Manager shall procure the Work, equipment, goods, or service from some person or entity other than a related party according to the terms of Article 9.

§ 7.9 Costs Not To Be Reimbursed

§ 7.9.1 The Cost of the Work shall not include the items listed below:

.1 Salaries and other compensation of the Construction Manager's personnel stationed at the Construction Manager's principal office or offices other than the site office, except as specifically provided in Section 7.2, or as may be provided in Article 14;

.2 Bonuses, profit sharing, incentive compensation, and any other discretionary payments, paid to anyone hired by the Construction Manager or paid to any Subcontractor or vendor, unless the Owner has provided prior approval;

.3 Expenses of the Construction Manager's principal office and offices other than the site office;

.4 Overhead and general expenses, except as may be expressly included in Sections 7.1 to 7.7;

.5 The Construction Manager's capital expenses, including interest on the Construction Manager's capital employed for the Work;

.6 Except as provided in Section 7.7.3 of this Agreement, costs due to the negligence of, or failure to fulfill a specific responsibility of the Contract by, the Construction Manager, Subcontractors, and suppliers, or anyone directly or indirectly employed by any of them or for whose acts any of them may be liable;

.7 Any cost not specifically and expressly described in Sections 7.1 to 7.7;

.8 Costs, other than costs included in Change Orders approved by the Owner, that would cause the Guaranteed Maximum Price to be exceeded;

.9 Costs for services incurred during the Preconstruction Phase;

.10 Rental costs of machinery and equipment, except as specifically provided in Section 7.5.2.; and

.11 Legal costs of whatever nature.

ARTICLE 8 DISCOUNTS, REBATES, AND REFUNDS

§ 8.1 Cash discounts obtained on payments made by the Construction Manager shall accrue to the Owner if (1) before making the payment, the Construction Manager included the amount to be paid, less such discount, in an Application for Payment and received payment from the Owner, or (2) the Owner has deposited funds with the Construction Manager with which to make payments; otherwise, cash discounts shall accrue to the Construction Manager. Trade discounts, rebates, refunds, and amounts received from sales of surplus materials and equipment shall accrue to the Owner, and the Construction Manager shall make provisions so that they can be obtained.

§ 8.2 Amounts that accrue to the Owner in accordance with the provisions of Section 8.1 shall be credited to the Owner as a deduction from the Cost of the Work.

ARTICLE 9 SUBCONTRACTS AND OTHER AGREEMENTS

§ 9.1 The Construction Manager shall obtain bids on all of the Work, including obtaining third party bids on any work the Construction Manager desires to self-perform. Those portions of the Work that the Construction Manager does not customarily perform with the Construction Manager's own personnel shall be performed under subcontracts or other appropriate agreements with the Construction Manager. The Owner may designate specific persons from whom, or entities from which, the Construction Manager shall obtain bids. The Construction Manager shall obtain bids from Subcontractors, and from suppliers of materials or equipment fabricated especially for the Work, who are qualified to perform that portion of the Work in accordance with the requirements of the Contract Documents. Upon request by Owner, Construction Manager shall deliver such bids and bid tabulations to the Architect and Owner within a reasonable period of time. The Owner then has the right to review the Construction Manager's list of proposed subcontractors and suppliers in consultation with the Architect and, subject to Section 9.1.1, to object to any subcontractor or supplier within (5) five business days. Any advice of the Architect, or approval or objection by the Owner, shall not relieve the Construction Manager of its responsibility to perform the Work in accordance with the Contract Documents. The Construction Manager shall not be required to contract with anyone to whom the Construction Manager has reasonable objection. Copies of executed contracts, subcontracts and supplier contracts shall be provided by the Construction Manager to the Owner within a reasonable time period.

§ 9.1.1 When a specific subcontractor or supplier (1) is recommended to the Owner by the Construction Manager; (2) is qualified to perform that portion of the Work; and (3) has submitted a bid that conforms to the requirements of the Contract Documents without reservations or exceptions, but the Owner requires that another bid be accepted, then the Construction Manager may require that a Change Order be issued to adjust the Guaranteed Maximum Price by the difference between the bid of the person or entity recommended to the Owner by the Construction Manager and the amount of the subcontract or other agreement actually signed with the person or entity designated by the Owner.

§ 9.2 Subcontracts or other agreements shall conform to the applicable payment provisions of this Agreement, and shall not be awarded on the basis of cost plus a fee without the Owner's prior written approval. If a subcontract is awarded on the basis of cost plus a fee, the Construction Manager shall provide in the subcontract for the Owner to receive the same audit rights with regard to the Subcontractor as the Owner receives with regard to the Construction Manager in Article 10.

ARTICLE 10 ACCOUNTING RECORDS

The Construction Manager shall keep full and detailed records and accounts related to the Cost of the Work, and exercise such controls, as may be necessary for proper financial management under this Contract and to substantiate all costs incurred. The accounting and control systems shall be satisfactory to the Owner. The Owner and the Owner's auditors shall, during regular business hours and upon reasonable notice, be afforded access to, and shall be permitted to audit and copy, the Construction Manager's records and accounts, including complete documentation supporting accounting entries, books, job cost reports, correspondence, instructions, drawings, receipts, subcontracts, Subcontractor's proposals, Subcontractor's invoices, purchase orders, vouchers, memoranda, and other data relating to this Contract. The Construction Manager shall preserve these records for a period of three years after final payment, or for such longer period as may be required by law.

ARTICLE 11 PAYMENTS FOR CONSTRUCTION PHASE SERVICES

§ 11.1 Progress Payments

§ 11.1.1 Based upon Applications for Payment submitted to the Architect by the Construction Manager, and Certificates for Payment issued by the Architect, the Owner shall make progress payments on account of the Contract Sum, to the Construction Manager, as provided below and elsewhere in the Contract Documents, and in conformance with Florida's Prompt Payment Statutes.

§ 11.1.2 (Intentionally omitted.)

§ 11.1.3 Provided that an Application for Payment is received by the Architect not later than the 25th day of a month, the Owner shall make payment of the amount certified to the Construction Manager not later than the 25th day of the following month. If an Application for Payment is received by the Architect after the application date fixed above, payment of the amount certified shall be made by the Owner not later than thirty (30) days after the Architect receives the Application for Payment.

User Notes: School Board of Volusia County Florida - Continuing Services - DRAFT 2020-Nov-02. (1298293849)

(Federal, state or local laws may require payment within a certain period of time.)

§ 11.1.4 With each Application for Payment, the Construction Manager shall submit receipted invoices or invoices with check vouchers attached, each subcontractor's application for payment and or invoice, affidavits, lien waivers and such other documents required by Article 9 of A201-2017 and any other evidence required by the Owner or Architect to demonstrate that payments already made by the Construction Manager on account of the Cost of the Work equal or exceed progress payments already received by the Construction Manager less that portion of the progress payments attributable to the Construction Manager's Fee.

§ 11.1.5 Each Application for Payment shall be based on the most recent schedule of values submitted by the Construction Manager in accordance with the Contract Documents. The schedule of values shall allocate the entire Guaranteed Maximum Price among: (1) the various portions of the Work; (2) any contingency for costs that are included in the Guaranteed Maximum Price but not otherwise allocated to another line item or included in a Change Order; and (3) the Construction Manager's Fee.

§ 11.1.5.1 The schedule of values shall be prepared in such form and supported by such data to substantiate its accuracy as the Architect and the Owner may require. Submission of the schedule of values shall be a representation by the Construction Manager that the values scheduled therein are accurate and for subcontracted work, match the applicable subcontract amounts. Any inaccuracies shall be corrected immediately by the Construction Manager so as to maintain the accuracy of the schedule of values. The schedule of values shall be used as a basis for reviewing and processing the Construction Manager's Applications for Payment.

§ 11.1.5.2 The allocation of the Guaranteed Maximum Price under this Section 11.1.5 shall not constitute a separate guaranteed maximum price for the Cost of the Work of each individual line item in the schedule of values.

§ 11.1.5.3 When the Construction Manager allocates costs from a contingency to another line item in the schedule of values, the Construction Manager shall submit supporting documentation to the Architect.

§ 11.1.6 Applications for Payment shall show the percentage of completion of each portion of the Work as of the end of the period covered by the Application for Payment. The percentage of completion shall be the lesser of (1) the percentage of that portion of the Work which has actually been completed, or (2) the percentage obtained by dividing (a) the expense that has actually been incurred by the Construction Manager on account of that portion of the Work and for which the Construction Manager has made payment or intends to make payment prior to the next Application for Payment, by (b) the share of the Guaranteed Maximum Price allocated to that portion of the Work in the schedule of values.

§ 11.1.7 In accordance with AIA Document A201–2017 and subject to other provisions of the Contract Documents, the amount of each progress payment shall be computed as follows:

§ 11.1.7.1 The amount of each progress payment shall first include:

.1 That portion of the Guaranteed Maximum Price properly allocable to completed Work as determined by multiplying the percentage of completion of each portion of the Work by the share of the Guaranteed Maximum Price allocated to that portion of the Work in the most recent schedule of values;

.2 That portion of the Guaranteed Maximum Price properly allocable to materials and equipment delivered and suitably stored at the site for subsequent incorporation in the completed construction or, if approved in writing in advance by the Owner, suitably stored off the site at a location agreed upon in writing; and

.3 The Construction Manager's Fee, computed upon the Cost of the Work described in the preceding Sections 11.1.7.1.1 and 11.1.7.1.2 at the rate stated in Section 6.1.2 or, if the Construction Manager's Fee is stated as a fixed sum in that Section, an amount that bears the same ratio to that fixed-sum fee as the Cost of the Work included in Sections 11.1.7.1.1 and 11.1.7.1.2 bears to a reasonable estimate of the probable Cost of the Work upon its completion.

§ 11.1.7.2 The amount of each progress payment shall then be reduced by:

.1 The aggregate of any amounts previously paid by the Owner;

.2 The amount, if any, for Work that remains uncorrected and for which the Architect has previously withheld a Certificate for Payment as provided in Article 9 of AIA Document A201–2017;

AIA Document A133 – 2019. Copyright © 1991, 2003, 2009, and 2019. All rights reserved. User Notes: School Board of Volusia County Florida - Continuing Services - DRAFT 2020-Nov-02. (1298293849)

.3 Any amount for which the Construction Manager does not intend to pay a Subcontractor or material supplier, unless the Work has been performed by others the Construction Manager intends to pay;

.4 For Work performed or defects discovered since the last payment application, any amount for which the Architect may withhold payment, or nullify a Certificate of Payment in whole or in part, as provided in Article 9 of AIA Document A201–2017;

.5 The shortfall, if any, indicated by the Construction Manager in the documentation required by Section 11.1.4 to substantiate prior Applications for Payment, or resulting from errors subsequently discovered by the Owner's auditors in such documentation; and

.6 Retainage withheld pursuant to Section 11.1.8.

§ 11.1.8 Retainage

§ 11.1.8.1 For each progress payment made prior to Substantial Completion of the Work, the Owner may withhold the following amount, as retainage, from the payment otherwise due:
(Insert a percentage or amount to be withheld as retainage from each Application for Payment. The amount of retainage may be limited by governing law.)

Five percent (5%)

§ 11.1.8.1.1 The following items are not subject to retainage:
(Insert any items not subject to the withholding of retainage, such as general conditions, insurance, etc.)

Insurance, bonds, and general conditions.

§ 11.1.8.2 Reduction or limitation of retainage, if any, shall be as follows:
(If the retainage established in Section 11.1.8.1 is to be modified prior to Substantial Completion of the entire Work, insert provisions for such modification.)

See § 11.1.8.1 above.

§ 11.1.8.3 Except as set forth in this Section 11.1.8.3, upon Substantial Completion of the Work, the Construction Manager may submit an Application for Payment that includes the retainage withheld from prior Applications for Payment pursuant to this Section 11.1.8. The Application for Payment submitted at Substantial Completion shall not include retainage as follows:
(Insert any other conditions for release of retainage, such as upon completion of the Owner's audit and reconciliation, upon Substantial Completion.)

§ 11.1.9 If final completion of the Work is materially delayed through no fault of the Construction Manager, the Owner shall pay the Construction Manager any additional amounts in accordance with Article 9 of AIA Document A201–2017.

§ 11.1.10 Except with the Owner's prior written approval, the Construction Manager shall not make advance payments to suppliers for materials or equipment which have not been delivered and suitably stored at the site.

§ 11.1.11 The Owner and the Construction Manager shall agree upon a mutually acceptable procedure for review and approval of payments to Subcontractors.

§ 11.1.12 In taking action on the Construction Manager's Applications for Payment the Architect shall be entitled to rely on the accuracy and completeness of the information furnished by the Construction Manager, and such action shall not be deemed to be a representation that (1) the Architect has made a detailed examination, audit, or arithmetic verification, of the documentation submitted in accordance with Section 11.1.4 or other supporting data; (2) that the Architect has made exhaustive or continuous on-site inspections; or (3) that the Architect has made examinations to ascertain how or for what purposes the Construction Manager has used amounts previously paid on account of the Contract. Such examinations, audits, and verifications, if required by the Owner, will be performed by the Owner's auditors acting in the sole interest of the Owner.

User Notes: School Board of Volusia County Florida - Continuing Services - DRAFT 2020-Nov-02. (1298293849)

§ 11.2 Final Payment

§ 11.2.1 Final payment, constituting the entire unpaid balance of the Contract Sum, shall be made by the Owner to the Construction Manager when

.1 the Construction Manager has fully performed the Contract, except for the Construction Manager's responsibility to correct Work reported on the Owner provided Certificate of Substantial Completion, and as provided in Article 12 of AIA Document A201–2017, and to satisfy other requirements, if any, which extend beyond final payment;

.2 the Construction Manager has submitted a final accounting for the Cost of the Work and a final Application for Payment;

.3 the Construction Manager's application for Final Payment has been certified by the Architect and submitted to the Owner with all warranties, guarantees, close out documents including Consent of Surety to Final Payment (, and receipt by Owner of Contractor's Final Payment Affidavit, Conditional Final Release of Lien upon receipt of final payment Construction Manager shall submit Unconditional Final Release of Lien, manufacturers' manuals of operation and any other items required under the Contract Documents. Complete as-built drawings in paper document and digital PDF format (scan document file acceptable) submitted to and accepted by the Architect for production of the final Project record documents; and

.4 a final Certificate for Payment has been issued by the Architect in accordance with Section 11.2.2.2; and

.5 in accordance with applicable Florida Prompt Payment Statutes

§ 11.2.2 Within 30 days of the Owner's receipt of the Construction Manager's final accounting for the Cost of the Work, the Owner shall conduct an audit of the Cost of the Work or notify the Architect that it will not conduct an audit.

§ 11.2.2.1 If the Owner conducts an audit of the Cost of the Work, the Owner shall, within 10 days after completion of the audit, submit a written report based upon the auditors' findings to the Architect.

§ 11.2.2.2 Within seven days after receipt of the written report described in Section 11.2.2.1, or receipt of notice that the Owner will not conduct an audit, and provided that the other conditions of Section 11.2.1 have been met, the Architect will either issue to the Owner a final Certificate for Payment with a copy to the Construction Manager, or notify the Construction Manager and Owner in writing of the Architect's reasons for withholding a certificate as provided in Article 9 of AIA Document A201–2017. The time periods stated in this Section 11.2.2 supersede those stated in Article 9 of AIA Document A201–2017. The Architect is not responsible for verifying the accuracy of the Construction Manager's final accounting.

§ 11.2.2.3 If the Owner's auditors' report concludes that the Cost of the Work, as substantiated by the Construction Manager's final accounting, is less than claimed by the Construction Manager, the Construction Manager shall be entitled to request mediation of the disputed amount without seeking an initial decision pursuant to Article 15 of AIA Document A201–2017. A request for mediation shall be made by the Construction Manager within 30 days after the Construction Manager's receipt of a copy of the Architect's final Certificate for Payment. Failure to request mediation within this 30-day period shall result in the substantiated amount reported by the Owner's auditors becoming binding on the Construction Manager. Pending a final resolution of the disputed amount, the Owner shall pay the Construction Manager the amount certified in the Architect's final Certificate for Payment.

§ 11.2.2.4 The amount of the final payment shall be calculated as follows:

.1 Take the sum of the Cost of the Work substantiated by the Construction Manager's final accounting and the Construction Manager's Fee, but not more than the Guaranteed Maximum Price.

.2 Subtract amounts, if any, for which the Architect withholds, in whole or in part, a final Certificate for Payment as provided in Section 9.5.1 of A201-2017 or other provisions of the Contract Documents.

.3 Subtract the aggregate of previous payments made by the Owner.

.4 If the aggregate of previous payments made by the Owner exceeds the amount due the Construction Manager, the Construction Manager shall reimburse the difference to the Owner.

§ 11.2.3 The Owner's final payment to the Construction Manager shall be made no later than 30 days after the issuance of the Architect's final Certificate for Payment, or as follows:

§ 11.2.4 If, subsequent to final payment, and at the Owner's request, the Construction Manager incurs costs, described in Sections 7.1 through 7.7, and not excluded by Section 7.9, the Owner shall reimburse the Construction Manager for such costs applicable thereto, on the same basis as if such costs had been incurred prior to final payment, but not in excess of the Guaranteed Maximum Price.

§ 11.3 Interest

Payments due and unpaid under the Contract shall bear interest from the date payment is due at the rate stated below, or in the absence thereof, at the legal rate prevailing from time to time at the place where the Project is located.
(Insert rate of interest agreed upon, if any.)

4.5% annually

ARTICLE 12 DISPUTE RESOLUTION

The parties expressly agree to opt out of the provisions of Section 558.05, Florida Statutes. The provisions of Chapter 558, Florida Statutes shall not apply to this Agreement.

§ 12.1 Initial Decision Maker

§ 12.1.1 Any Claim between the Owner and Construction Manager shall be resolved in accordance with the provisions set forth in this Article 12 and Article 15 of A201–2017. However, for Claims arising from or relating to the Construction Manager's Preconstruction Phase services, no decision by the Initial Decision Maker shall be required as a condition precedent to mediation or binding dispute resolution, and Section 12.1.2 of this Agreement shall not apply.

§ 12.1.2 The Architect will serve as the Initial Decision Maker pursuant to Article 15 of AIA Document A201–2017 for Claims arising from or relating to the Construction Manager's Construction Phase services.
(If the parties mutually agree, insert the name, address and other contact information of the Initial Decision Maker, if other than the Architect.)

§ 12.2 Binding Dispute Resolution

For any Claim subject to, but not resolved by mediation pursuant to and set forth in Article 15 of AIA Document A201–2017, the method of binding dispute resolution shall be as follows:
(Check the appropriate box.)

(Paragraph deleted)

[X] Litigation in a court of competent jurisdiction

(Paragraphs deleted)

If the Owner and Construction Manager do not select a method of binding dispute resolution, or do not subsequently agree in writing to a binding dispute resolution method other than litigation, Claims will be resolved by litigation in a court of competent jurisdiction.

§ 12.2.1 The Parties expressly waive any and all right to trial by jury in any action filed by either Party or parties.

ARTICLE 13 TERMINATION OR SUSPENSION

§ 13.1 Termination Prior to Execution of the Guaranteed Maximum Price Amendment

§ 13.1.1 If the Owner and the Construction Manager do not reach an agreement on the Guaranteed Maximum Price, the Owner may terminate this Agreement upon not less than seven days' written notice to the Construction Manager, and the Construction Manager may terminate this Agreement, upon not less than seven days' written notice to the Owner.

§ 13.1.2 In the event of termination of this Agreement pursuant to Section 13.1.1, the Construction Manager shall be compensated for Preconstruction Phase services and Work performed prior to receipt of a notice of termination, in

This document was produced at 16:54:05 ET on 10/31/2024 under Order No.2114446244 which expires on 12/19/2024, is not for resale, is licensed for one-time use only, and may only be used in accordance with the AIA Contract Documents® Terms of Service. To report copyright violations, e-mail docinfo@aiacontracts.com.
User Notes: School Board of Volusia County Florida - Continuing Services - DRAFT 2020-Nov-02. (1298293849)

accordance with the terms of this Agreement. In no event shall the Construction Manager's compensation under this Section exceed the compensation set forth in Section 5.1.

§ 13.1.3 Prior to the execution of the Guaranteed Maximum Price Amendment, the Owner may terminate this Agreement upon not less than seven days' written notice to the Construction Manager for the Owner's convenience and without cause, and the Construction Manager may terminate this Agreement, upon not less than seven days' written notice to the Owner, for the reasons set forth in Article 14 of A201–2017.

§ 13.1.4 In the event of termination of this Agreement pursuant to Section 13.1.3, the Construction Manager shall be equitably compensated for Preconstruction Phase services and Work performed prior to receipt of a notice of termination. In no event shall the Construction Manager's compensation under this Section exceed the compensation set forth in Section 5.1.

§ 13.1.5 If the Owner terminates the Contract pursuant to Section 13.1.3 after the commencement of the Construction Phase but prior to the execution of the Guaranteed Maximum Price Amendment, the Owner shall pay to the Construction Manager an amount calculated as follows, which amount shall be in addition to any compensation paid to the Construction Manager under Section 13.1.4:

.1 Take the Cost of the Work incurred by the Construction Manager to the date of termination;

.2 Add the Construction Manager's Fee computed upon the Cost of the Work to the date of termination at the rate stated in Section 6.1 or, if the Construction Manager's Fee is stated as a fixed sum in that Section, an amount that bears the same ratio to that fixed-sum Fee as the Cost of the Work at the time of termination bears to a reasonable estimate of the probable Cost of the Work upon its completion; and

.3 Subtract the aggregate of previous payments made by the Owner for Construction Phase services.

§ 13.1.6 The Owner shall also pay the Construction Manager fair compensation, either by purchase or rental at the election of the Owner, for any equipment owned by the Construction Manager that the Owner elects to retain and that is not otherwise included in the Cost of the Work under Section 13.1.5.1. To the extent that the Owner elects to take legal assignment of subcontracts and purchase orders (including rental agreements), the Construction Manager shall, as a condition of receiving the payments referred to in this Article 13, execute and deliver all such papers and take all such steps, including the legal assignment of such subcontracts and other contractual rights of the Construction Manager, as the Owner may require for the purpose of fully vesting in the Owner the rights and benefits of the Construction Manager under such subcontracts or purchase orders. All Subcontracts, purchase orders and rental agreements entered into by the Construction Manager will contain provisions allowing for assignment to the Owner as described above.

§ 13.1.6.1 If the Owner accepts assignment of subcontracts, purchase orders or rental agreements as described above, the Owner will reimburse or indemnify the Construction Manager for all costs arising under the subcontract, purchase order or rental agreement, if those costs would have been reimbursable as Cost of the Work if the contract had not been terminated. If the Owner chooses not to accept assignment of any subcontract, purchase order or rental agreement that would have constituted a Cost of the Work had this agreement not been terminated, the Construction Manager will terminate the subcontract, purchase order or rental agreement and the Owner will pay the Construction Manager the costs necessarily incurred by the Construction Manager because of such termination not including attorneys' fees.

§ 13.1.6.2 In no event shall the Owner be liable to Construction Manager for anticipated fee or profit for Work not performed.

§ 13.2 Termination or Suspension Following Execution of the Guaranteed Maximum Price Amendment

§ 13.2.1 Termination

The Contract may be terminated by the Owner or the Construction Manager as provided in Article 14 of AIA Document A201–2017.

§ 13.2.2 Termination by the Owner for Cause

§ 13.2.2.1 If the Owner terminates the Contract for cause as provided in Article 14 of AIA Document A201–2017, the amount, if any, to be paid to the Construction Manager under Article 14 of AIA Document A201–2017 shall not cause the Guaranteed Maximum Price to be exceeded, nor shall it exceed an amount calculated as follows:

.1 Take the Cost of the Work incurred by the Construction Manager to the date of termination;

.2 Add the Construction Manager's Fee, computed upon the Cost of the Work to the date of termination at the rate stated in Section 6.1 or, if the Construction Manager' Fee is stated as a fixed sum in that Section, an

User Notes: School Board of Volusia County Florida - Continuing Services - DRAFT 2020-Nov-02. (1298293849)

amount that bears the same ratio to that fixed-sum Fee as the Cost of the Work at the time of termination bears to a reasonable estimate of the probable Cost of the Work upon its completion;

.3 Subtract the aggregate of previous payments made by the Owner; and

.4 Subtract the costs and damages incurred, or to be incurred, by the Owner under Article 14 of AIA Document A201–2017.

§ 13.2.2.2 The Owner shall also pay the Construction Manager fair compensation, either by purchase or rental at the election of the Owner, for any equipment owned by the Construction Manager that the Owner elects to retain and that is not otherwise included in the Cost of the Work under Section 13.2.2.1.1. To the extent that the Owner elects to take legal assignment of subcontracts and purchase orders (including rental agreements), the Construction Manager shall, as a condition of receiving the payments referred to in this Article 13, execute and deliver all such papers and take all such steps, including the legal assignment of such subcontracts and other contractual rights of the Construction Manager, as the Owner may require for the purpose of fully vesting in the Owner the rights and benefits of the Construction Manager under such subcontracts or purchase orders.

§ 13.2.3 Termination by the Owner for Convenience

If the Owner terminates the Contract for convenience in accordance with Article 14 of AIA Document A201–2017, then the Owner shall pay the Construction Manager a termination fee as follows:

(Insert the amount of or method for determining the fee, if any, payable to the Construction Manager following a termination for the Owner's convenience.)

The amount of Construction Manager's fee earned as of the date of termination, the cost of the Work completed up to date of completion, and reasonable termination expenses but not overhead or profit on uncompleted work.

§ 13.3 Suspension

The Work may be suspended by the Owner as provided in Article 14 of AIA Document A201–2017; in such case, the Guaranteed Maximum Price and Contract Time, if established, shall be increased as provided in Article 14 of AIA Document A201–2017, except that the term "profit" shall be understood to mean the Construction Manager's Fee as described in Sections 6.1 and 6.3.5 of this Agreement.

ARTICLE 14 MISCELLANEOUS PROVISIONS

§ 14.1 Terms in this Agreement shall have the same meaning as those in A201–2017. Where reference is made in this Agreement to a provision of AIA Document A201–2017 or another Contract Document, the reference refers to that provision as amended or supplemented by other provisions of the Contract Documents.

§ 14.2 Successors and Assigns

§ 14.2.1 The Owner and Construction Manager, respectively, bind themselves, their partners, successors, assigns and legal representatives to covenants, agreements, and obligations contained in the Contract Documents. Except as provided in Section 14.2.2 of this Agreement, and in Section 13.2.2 of A201–2017, neither party to the Contract shall assign the Contract as a whole or in part without written consent of the other. If either party attempts to make an assignment without such consent, that party shall nevertheless remain legally responsible for all obligations under the Contract.

§ 14.2.2 The Owner may, without consent of the Construction Manager, assign the Contract to a lender providing construction financing for the Project, if the lender assumes the Owner's rights and obligations under the Contract Documents. The Construction Manager shall execute all consents reasonably required to facilitate the assignment.

§ 14.3 Insurance and Bonds

§ 14.3.1 Preconstruction Phase

The Construction Manager shall maintain the following insurance for the duration of the Preconstruction Services performed under this Agreement. If any of the requirements set forth below exceed the types and limits the Construction Manager normally maintains, the Owner shall reimburse the Construction Manager for any additional cost.

§ 14.3.1.1 Commercial General Liability with policy limits of not less than three million dollars and zero cents ($ 3,000,000.00) for each occurrence and five million dollars and zero cents ($ 5,000,000.00) in the aggregate for bodily injury and property damage.

User Notes: School Board of Volusia County Florida - Continuing Services - DRAFT 2020-Nov-02. (1298293849)

§ 14.3.1.2 Automobile Liability covering vehicles owned, and non-owned vehicles used, by the Construction Manager with policy limits of not less than three million dollars and zero cents ($ 3,000,000.00) per accident for bodily injury, death of any person, and property damage arising out of the ownership, maintenance and use of those motor vehicles, along with any other statutorily required automobile coverage.

§ 14.3.1.3 The Construction Manager may achieve the required limits and coverage for Commercial General Liability and Automobile Liability through a combination of primary and excess or umbrella liability insurance, provided that such primary and excess or umbrella liability insurance policies result in the same or greater coverage as the coverages required under Sections 14.3.1.1 and 14.3.1.2, and in no event shall any excess or umbrella liability insurance provide narrower coverage than the primary policy. The excess policy shall not require the exhaustion of the underlying limits only through the actual payment by the underlying insurers.

§ 14.3.1.4 Workers' Compensation at statutory limits as required by Chapter 440 F.S., and Employers Liability with policy limits not less than one million dollars and zero cents ($ 1,000,000.00) each accident, one million dollars and zero cents ($ 1,000,000.00) each employee, and one million dollars and zero cents ($ 1,000,000.00) policy limit.

§ 14.3.1.5 Professional Liability covering negligent acts, errors and omissions in the performance of professional services, with policy limits of not less than three million dollars and zero cents ($ 3,000,000.00) per claim and three million dollars and zero cents ($ 3,000,000.00) in the aggregate.

§ 14.3.1.6 Other Insurance
(List below any other insurance coverage to be provided by the Construction Manager and any applicable limits.)

Coverage	Limits
See Exhibits "B" and "B-1".	

§ 14.3.1.7 Additional Insured Obligations. To the fullest extent permitted by law, the Construction Manager shall cause the primary and excess or umbrella polices for Commercial General Liability and Automobile Liability to include the Owner as an additional insured for claims caused in whole or in part by the Construction Manager's negligent acts or omissions. The additional insured coverage shall be primary and non-contributory to any of the Owner's insurance policies and shall apply to both ongoing and completed operations.

§ 14.3.1.8 The Construction Manager shall provide certificates of insurance to the Owner that evidence compliance with the requirements in this Section 14.3.1.

§ 14.3.2 Construction Phase
After execution of the Guaranteed Maximum Price Amendment, the Owner and the Construction Manager shall purchase and maintain insurance as set forth in Exhibit "B", Insurance and Bonds, and elsewhere in the Contract Documents.

(Paragraph deleted)
§ 14.4
(Paragraphs deleted)
During the Construction Phase, Construction Manager shall provide insurance as required in Exhibit "B" and Exhibit "B-1".

§ 14.5 Other provisions:

CHAPTER 558 NOTICE OF CLAIM

CHAPTER 558, FLORIDA STATUTES, CONTAINS IMPORTANT REQUIREMENTS YOU MUST FOLLOW BEFORE YOU MAY BRING ANY LEGAL ACTION FOR AN ALLEGED CONSTRUCTION DEFECT. SIXTY DAYS BEFORE YOU BRING ANY LEGAL ACTION, YOU MUST DELIVER TO THE OTHER PARTY TO THIS CONTRACT A WRITTEN NOTICE, REFERRING TO CHAPTER 558, OF ANY CONSTRUCTION CONDITIONS YOU ALLEGE ARE DEFECTIVE AND PROVIDE SUCH PERSON THE OPPORTUNITY TO INSPECT THE ALLEGED CONSTRUCTION DEFECTS AND TO CONSIDER MAKING AN OFFER TO REPAIR OR PAY FOR THE ALLEGED CONSTRUCTION DEFECTS. YOU ARE NOT OBLIGATED TO ACCEPT ANY OFFER WHICH MAY BE MADE. THERE ARE STRICT DEADLINES AND PROCEDURES

UNDER THIS FLORIDA LAW WHICH MUST BE MET AND FOLLOWED TO PROTECT YOUR INTERESTS.

No person or entity shall be deemed to be a third party beneficiary of any provisions of the Contract, nor shall any provisions thereof be interpreted to create a right of action or otherwise permit anyone not a signatory party to the Contract to maintain an action for personal injury or property damage.

ARTICLE 15 SCOPE OF THE AGREEMENT

§ 15.1 This Agreement represents the entire and integrated agreement between the Owner and the Construction Manager and supersedes all prior negotiations, representations or agreements, either written or oral. This Agreement may be amended only by written instrument signed by both Owner and Construction Manager.

§ 15.2 The following documents comprise the Agreement:

.1 AIA Document A133™–2019 (as modified by Owner), Standard Form of Agreement Between Owner and Construction Manager as Constructor where the basis of payment is the Cost of the Work Plus a Fee with a Guaranteed Maximum Price

.2 AIA Document A133™-2019, Exhibit A, Guaranteed Maximum Price Amendment, if executed

.3 AIA Document A133™–2019, Exhibit B, Insurance and Bonds

.4 AIA Document A201™–2017, General Conditions of the Contract for Construction (as modified by Owner), Exhibit "C"

.5

(Paragraphs deleted)

Other documents, if any, listed below:

(List here any additional documents that are intended to form part of the Contract Documents. AIA Document A201–2017 provides that the advertisement or invitation to bid, Instructions to Bidders, sample forms, the Construction Manager's bid or proposal, portions of Addenda relating to bidding or proposal requirements, and other information furnished by the Owner in anticipation of receiving bids or proposals, are not part of the Contract Documents unless enumerated in this Agreement. Any such documents should be listed here only if intended to be part of the Contract Documents.)

Exhibit "A"	AIA Document A133™-2019, Exhibit A, Guaranteed Maximum Price Amendment, if executed by the Parties
Exhibit "B"	AIA Document A133™–2019, Exhibit B, Insurance and Bonds

SIGNATURES

This Agreement may be executed in counterparts, each of which shall constitute an original and all of which shall constitute one and the same instrument. In the event the Parties hereto execute and deliver this Agreement by signing and delivery using facsimile or e-mail transmission, such signing and delivery of facsimile signatures shall be effective and shall have the same effect as if original signatures were delivered. The Parties each stipulate and agree that for the purposes of validity, enforceability, and admissibility, this Agreement may be signed electronically and that a photocopy, facsimile, scanned Portable Document Format ("PDF") image or image generated through the electronic DocuSign© program shall have the same force and effect as an original signature. If both Parties are unable to sign electronically, each Party shall execute at least two (2) originals in blue ink, of which one is to be delivered to the Architect and the remainder to the Owner.

This Agreement is entered into as of the day and year first written above.

User Notes: School Board of Volusia County Florida - Project Specific - DRAFT 2020-Nov-02. (894856531)

ARTICLE A.1 GUARANTEED MAXIMUM PRICE

§ A.1.1 Guaranteed Maximum Price

Pursuant to Section 3.2.6 of the Agreement, the Owner and Construction Manager, for the Project referenced above, hereby amend the Agreement to establish a Guaranteed Maximum Price. As agreed by the Owner and Construction Manager, the Guaranteed Maximum Price is an amount that the Contract Sum shall not exceed. The Contract Sum consists of the Construction Manager's Fee plus the Cost of the Work, as that term is defined in Article 6 of the Agreement.

§ A.1.1.1 The Contract Sum is guaranteed by the Construction Manager not to exceed ($), subject to additions and deductions by Change Order as provided in the Contract Documents, and subject to Article A.6 below.

§ A.1.1.2 Itemized Statement of the Guaranteed Maximum Price. Provided below is an itemized statement of the Guaranteed Maximum Price organized by trade categories, including allowances; the Construction Manager's contingency; alternates; the Construction Manager's Fee; and other items that comprise the Guaranteed Maximum Price as defined in Section 3.2.1 of the Agreement.
(Provide itemized statement below or reference an attachment.)

§ A.1.1.3 The Construction Manager's Fee is set forth in Section 6.1.2 of the Agreement.

§ A.1.1.4 The method of adjustment of the Construction Manager's Fee for changes in the Work is set forth in Section 6.1.3 of the Agreement.

§ A.1.1.5 Alternates

§ A.1.1.5.1 Alternates, if any, included in the Guaranteed Maximum Price:

Item	Price

§ A.1.1.5.2 Subject to the conditions noted below, the following alternates may be accepted by the Owner following execution of this **Exhibit "A"**. Upon acceptance, the Owner shall issue a Modification to the Agreement.
(Insert below each alternate and the conditions that must be met for the Owner to accept the alternate.)

Item	Price	Conditions for Acceptance

§ A.1.1.6 Unit prices, if any:
(Identify the item and state the unit price and quantity limitations, if any, to which the unit price will be applicable.)

Item	Units and Limitations	Price per Unit ($0.00)

ARTICLE A.2 DATE OF COMMENCEMENT AND SUBSTANTIAL COMPLETION

§ A.2.1 The date of commencement of the Work shall be:
(Check one of the following boxes.)

[ ] The date of execution of this Amendment.

[X] Established as follows:
(Insert a date or a means to determine the date of commencement of the Work.)

The Construction Manager shall commence construction of the Project within ten (10) days of the written Notice to Proceed from the Architect. All Work shall be properly completed in accordance with the terms of the A133 - 2019 Standard Form of Agreement as modified by Owner, A201 – 2017 General

User Notes: School Board of Volusia County Florida - Project Specific - DRAFT 2020-Nov-02. (894856531)

Conditions as modified by Owner, and this Guaranteed Maximum Price Amendment and shall be completed within the Contract Time. Except as modified herein, the A133 - 2019 Standard Form of Agreement and A201 – 2017 General Conditions as modified by Owner shall remain in full force and effect.

If a date of commencement of the Work is not selected, then the date of commencement shall be the date of execution of this Amendment.

§ A.2.2 Unless otherwise provided, the Contract Time is the period of time, including authorized adjustments, allotted in the Contract Documents for Substantial Completion of the Work. The Contract Time shall be measured from the date of commencement of the Work.

§ A.2.3 Substantial Completion

§ A.2.3.1 Subject to adjustments of the Contract Time as provided in the Contract Documents, the Construction Manager shall achieve Substantial Completion of the entire Work:
(Check the following boxes and complete the necessary information.)

[ ] Not later than ( ) calendar days from the date of commencement of the Work.

[X] By the following date:

§ A.2.3.2 Subject to adjustments of the Contract Time as provided in the Contract Documents, if portions of the Work are to be completed prior to Substantial Completion of the entire Work, the Construction Manager shall achieve Substantial Completion of such portions by the following dates:

Portion of Work	Substantial Completion Date

§ A.2.3.3 If the Construction Manager fails to achieve Substantial Completion as provided in this Section A.2.3, liquidated damages, if any, shall be assessed as set forth in Section 6.1.6 of the Agreement.

§ A.2.3.4 The Owner and Construction Manager acknowledge and agree that it would be difficult to determine, with any reasonable degree of certainty, the amount of damages which the Owner would sustain in the event that the Construction Manager fails to attain Substantial Completion of the Work on or before the date established. The Construction Manager acknowledges and understands that failure to fully complete the Work within the aforesaid time periods will result in substantial loss and damages suffered by the Owner. Therefore, if the Construction Manager shall neglect, fail, or refuse to complete the Work within the Contract Time, or any proper extension thereof granted by the Owner in a properly executed Change Order, the Construction Manager agrees to pay the Owner liquidated damages in the amount of $500 for each and every calendar day that the Construction Manager shall be in default for untimely completion after expiration of the Contract Time for Substantial Completion. Such payments shall constitute liquidated damages, not a penalty, and shall be cumulative, it being understood and agreed by the Construction Manager that the Owner's actual damages in the event of a delay in Substantial Completion would be difficult, if not impossible, to determine. Time is of the essence of this Agreement. Any such liquidated damages may, at the option of the Owner, be withheld and deducted from any unpaid portion of the Guaranteed Maximum Price.

ARTICLE A.3 INFORMATION UPON WHICH AMENDMENT IS BASED

§ A.3.1 The Guaranteed Maximum Price and Contract Time set forth in this Amendment are based on the Contract Documents and the following:

§ A.3.1.1 The following Supplementary and other Conditions of the Contract:

Document	Title	Date	Pages

§ A.3.1.2 The following Specifications:

ARTICLE A.6 POTENTIALLY TIME AND PRICE IMPACTED MATERIAL

As of the date of this Agreement, certain markets providing essential materials to the Project are experiencing or are expected to experience significant, industry-wide economic fluctuation during the performance of this Agreement that may impact price, availability and delivery time frames ("Potentially Time Impacted Material").

§ A.6.1 DIRECT COST PRICE AND TIME: Owner and Construction Manager shall agree upon a method for establishing the market price as of the date of this Agreement ("Direct Cost Price") and the method for calculating an adjustment in the pricing for Potentially Time and Price Impacted Materials.

§ A.6.2 ADJUSTMENT IN DIRECT COST PRICE: If during the course of the Project a Potentially Time and Price Impacted Material item experiences an increase or decrease in its Direct Cost Price, not to exceed nine percent (9%) of the Direct Cost Price, either Party may notify the other in writing for an equitable adjustment to the Contract Price, not to exceed nine percent (9%) of the Direct Cost Price, arises and shall provide appropriate documentation substantiating such adjustment. An adjustment in the pricing for a Potentially Time and Price Impacted Material shall not include any amount for overhead and profit.

§ A.6.2.1 In the event of a decrease in a Direct Cost Price, the Contract Price shall be equitably adjusted to reflect such decrease, but only for those Potentially Time and Price Impacted Materials delivered on or after the date on which written notice of the adjusted Direct Cost Price is given.

§ A.6.2.2 In the event of an increase in a Direct Cost Price, the Contract Price shall be equitably adjusted to reflect such increase, but only for those Potentially Time and Price Impacted Materials delivered on or after the date on which written notice of the adjustment in Direct Cost Price. Such increase in the Guaranteed Maximum Price shall not exceed none percent (9%). Potentially Time and Price Impacted Materials shall not be delivered to the site prior to written acceptance of increase.

§ A.6.2.3 No adjustment shall be made for any quantities of Potentially Time and Price Impacted Materials scheduled for delivery under the terms of this Agreement prior to the date on which written notice of the adjustment in the Direct Cost Price is given, unless the failure to deliver such quantities before that date is beyond the control of and without the fault of the Contractor, its Subcontractors and Material Suppliers.

§ A.6.2.4 Payment, if any, for an adjustment shall be made in accordance with the change order terms of the Agreement.

§ A.6.3 TIME IMPACT AND AVAILABILITY: If the Construction Manager is delayed at any time in the commencement or progress of the Work due to delay in the delivery of, or unavailability of, a Potentially Time and Price Impacted Material, beyond the control of and without fault of the Construction Manager, its Subcontractors and Material Suppliers, the Construction Manager shall be entitled to an equitable extension of the Contract Time and an equitable adjustment to the Contract Price, not to exceed nine (9%) of the Guaranteed Maximum Price. Owner and Construction Manager shall undertake reasonable steps to mitigate the effects of such delays.

SIGNATURES

This Agreement may be executed in counterparts, each of which shall constitute an original and all of which shall constitute one and the same instrument. In the event the Parties hereto execute and deliver this Agreement by signing and delivery using facsimile or e-mail transmission, such signing and delivery of facsimile signatures shall be effective and shall have the same effect as if original signatures were delivered. The Parties each stipulate and agree that for the purposes of validity, enforceability, and admissibility, this Agreement may be signed electronically and that a photocopy, facsimile, scanned Portable Document Format ("PDF") image or image generated through the electronic DocuSign© program shall have the same force and effect as an original signature. If both Parties are unable to sign electronically, each Party shall execute at least two (2) originals in blue ink, of which one is to be delivered to the Architect and the remainder to the Owner.

This Amendment to the Agreement entered into as of the day and year first written above.

CITY OF PORT ORANGE **WHARTON-SMITH, INC.**

ARTICLE B.1 GENERAL

The Owner and Construction Manager shall purchase and maintain insurance, and provide bonds, as set forth in this Exhibit "B" and "B-1". In the event of all conflict between this Exhibit "B" and Exhibit "B-1", the provisions of Exhibit "B" shall control.. As used in this Exhibit, the term General Conditions refers to AIA Document A201™–2017, General Conditions of the Contract for Construction.

(Paragraphs deleted)

ARTICLE B.2 (INTENTIONALLY OMITTED.)

(Paragraphs deleted)
(Table deleted)
(Paragraphs deleted)
(Table deleted)

ARTICLE B.3 CONSTRUCTION MANAGER'S INSURANCE AND BONDS

§ B.3.1 General

§ B.3.1.1 Certificates of Insurance. The Construction Manager shall provide certificates of insurance acceptable to the Owner evidencing compliance with the requirements in this Article B.3 and Exhibit "B-1" at the following times: (1) prior to commencement of the Work; (2) upon renewal or replacement of each required policy of insurance; and (3) upon the Owner's written request. An additional certificate evidencing continuation of commercial liability coverage, including coverage for completed operations, shall be submitted with the final Application for Payment and thereafter upon renewal or replacement of such coverage until the expiration of the periods required by Section B.3.2.1 and Section B.3.3.1. The certificates will show the Owner as an additional insured on the Construction Manager's Commercial General Liability and excess or umbrella liability policy or policies.

§ B.3.1.2 Deductibles and Self-Insured Retentions. The Construction Manager shall disclose to the Owner any deductible or self- insured retentions applicable to any insurance required to be provided by the Construction Manager.

§ B.3.1.3 Additional Insured Obligations. To the fullest extent permitted by law, the Construction Manager shall cause the commercial general liability coverage to include (1) the Owner, the Architect, and the Architect's consultants as additional insureds for claims caused in whole or in part by the Construction Manager's negligent acts or omissions during the Construction Manager's operations; and (2) the Owner as an additional insured for claims caused in whole or in part by the Construction Manager's negligent acts or omissions for which loss occurs during completed operations. The additional insured coverage shall be primary and non-contributory to any of the Owner's general liability insurance policies and shall apply to both ongoing and completed operations. To the extent commercially available, the additional insured coverage shall be no less than that provided by the most current Insurance Services Office, Inc. (ISO) forms CG 20 10 07 04, CG 20 37 07 04, and, with respect to the Architect and the Architect's consultants, CG 20 32 07 04.

§ B.3.2 Construction Manager's Required Insurance Coverage

§ B.3.2.1 The Construction Manager shall purchase and maintain the following types and limits of insurance from an insurance company or insurance companies lawfully authorized to issue insurance in the jurisdiction where the Project is located. The Construction Manager shall maintain the required insurance until the expiration of the period for correction of Work as set forth in Section 12.2.2 of the General Conditions, unless a different duration is stated below:
(If the Construction Manager is required to maintain insurance for a duration other than the expiration of the period for correction of Work, state the duration.)

§ B.3.2.2 Commercial General Liability

§ B.3.2.2.1 Commercial General Liability insurance for the Project as required by Exhibit "B-1" written on an occurrence form with policy limits of not less than the amount stated in Exhibit "B-1" for each occurrence, general aggregate, and aggregate for products-completed operations hazard, providing coverage for claims including

User Notes: (1282898517)

.1 damages because of bodily injury, sickness or disease, including occupational sickness or disease, and death of any person;
.2 personal injury and advertising injury;
.3 damages because of physical damage to or destruction of tangible property, including the loss of use of such property;
.4 bodily injury or property damage arising out of completed operations; and
.5 the Construction Manager's indemnity obligations under Section 3.18 of the General Conditions.

§ B.3.2.2.2 The Construction Manager's Commercial General Liability policy under this Section B.3.2.2 shall not contain an exclusion or restriction of coverage for the following:

.1 Claims by one insured against another insured, if the exclusion or restriction is based solely on the fact that the claimant is an insured, and there would otherwise be coverage for the claim.
.2 Claims for property damage to the Construction Manager's Work arising out of the products-completed operations hazard where the damaged Work or the Work out of which the damage arises was performed by a Subcontractor.
.3 Claims for bodily injury other than to employees of the insured.
.4 Claims for indemnity under Section 3.18 of the General Conditions arising out of injury to employees of the insured.
.5 Claims or loss excluded under a prior work endorsement or other similar exclusionary language.
.6 Claims or loss due to physical damage under a prior injury endorsement or similar exclusionary language.
.7 Claims related to residential, multi-family, or other habitational projects, if the Work is to be performed on such a project.
.8 Claims related to roofing, if the Work involves roofing.
.9 Claims related to exterior insulation finish systems (EIFS), synthetic stucco or similar exterior coatings or surfaces, if the Work involves such coatings or surfaces.
.10 Claims related to earth subsidence or movement, where the Work involves such hazards.
.11 Claims related to explosion, collapse and underground hazards, where the Work involves such hazards.

§ B.3.2.3 Automobile Liability covering vehicles owned, and non-owned vehicles used, by the Construction Manager, with policy limits of not less than the amount stated in Exhibit "B-1" per accident, for bodily injury, death of any person, and property damage arising out of the ownership, maintenance and use of those motor vehicles along with any other statutorily required automobile coverage.

§ B.3.2.4 The Construction Manager may achieve the required limits and coverage for Commercial General Liability and Automobile Liability through a combination of primary and excess or umbrella liability insurance, provided such primary and excess or umbrella insurance policies result in the same or greater coverage as the coverages required under Section B.3.2.2 and B.3.2.3, and in no event shall any excess or umbrella liability insurance provide narrower coverage than the primary policy. The excess policy shall not require the exhaustion of the underlying limits only through the actual payment by the underlying insurers.

§ B.3.2.5 Workers' Compensation as stated in Exhibit "B-1".

§ B.3.2.6 Employers' Liability with policy limits not less than the amount stated in Exhibit "B-1" for each accident, each employee, and policy limit.

§ B.3.2.7 Jones Act, and the Longshore & Harbor Workers' Compensation Act, as required, if the Work involves hazards arising from work on or near navigable waterways, including vessels and docks

§ B.3.2.8 If the Construction Manager is required to furnish professional services as part of the Work, the Construction Manager shall procure Professional Liability insurance covering performance of the professional services, with policy limits of not less than the amount stated in Exhibit "B-1" per claim and in the aggregate.

§ B.3.2.9 If the Work involves the transport, dissemination, use, or release of pollutants, the Construction Manager shall procure Pollution Liability insurance, with policy limits of not less than the amount stated in Exhibit "B-1" per claim and in the aggregate.

AIA DOCUMENT A133-2019, EXHIBIT B-1
Owner's Insurance and Bond Requirements of Construction Manager

1. **Insurance and Bond Coverage To Be Provided By Construction Manager.** This Exhibit (the "Insurance and Bond Requirements") is attached as an Exhibit as part of the Contract Documents. In the event of conflict between any of the following Insurance and Bond Requirements and any provision in the Contract Documents, these requirements control, amend and supplement the conflicting provision. Subject to review and revision in writing by Owner from time to time, in Owner's good faith judgment, the following insurance shall be maintained by Construction Manager ("CM") at CM's expense (unless provisions below state "at Owner's expense") with coverage and limits of not less than those set forth below at all times during the term of the Agreement and thereafter as required.

No.	Specifications	Coverages, Limits and Other Requirements
A.	**LIABILITY**	
1.	**Commercial General Liability**. CM shall maintain commercial general liability ("CGL") insurance and, if necessary, commercial excess insurance, issued on an Occurrence Basis meeting at least the following specifications:	
1.1	**Minimum Limits**	The limits of coverage shall not be less than the following amounts. The policy limits required herein may be provided by a combination of primary and excess policies, but in no event shall the total limits of liability available for any one occurrence or accident be less than the amount required herein. $3,000,000 Per Occurrence $35,000,000 Products and Completed Operations Aggregate $3,000,000 Personal and Advertising Injury
1.2	**General Aggregate**	A Designated Construction Project(s) General Aggregate Limit shall be provided on the most recent ISO form.
1.3	**Post-Completion Coverage**	CM agrees to maintain Products-Completed Operations coverage with respect to the Work performed under the Agreement in identical coverage, form and amount, including required endorsements, for the full term of the Statute of Repose following Date of Substantial Completion of the Work by CM. CM shall provide written representation to Owner stating Work completion date.
1.4	**Form**	This insurance is to be issued on the most recent ISO form and shall cover liability arising from premises, ongoing and completed operations.

1.5	**Insured Contracts**	Coverage shall include but not be limited to liability assumed by CM under the Agreement, including the tort liability of another assumed in a business contract, and shall include unmodified Separation of Insureds coverage.
1.6	**Additional Insureds**	Insureds and additional insureds shall include: Owner, Owner's parent corporation, and its subsidiaries and respective members, officers and directors, Contractor, and all Loss Payees and Mortgagees as Named Insureds. Additional Insured status shall be provided in favor of Owner on the most recent ISO form to the extent permitted by law.
1.7	**Electronic Data**	This insurance is to include an Electronic Data Liability endorsement on the most recent ISO form with coverage to the full limits of the policy(ies).
1.8	**Personal Injury Contractual Liability**	The personal injury contractual liability exclusion shall be deleted.
1.9	**Primary and Noncontributory**	This insurance shall be endorsed to provide primary and noncontributing liability coverage on the most recent ISO form. It is the specific intent of the parties to the Agreement that all insurance required herein shall be primary to and shall seek no contribution from any other insurance (primary, umbrella, contingent or excess) maintained by Owner, with Owner's insurance being excess, secondary and noncontributing.
1.10	**Waiver of Right of Recovery and Subrogation**	CM agrees to waive its rights of recovery and shall cause this insurance to be endorsed to waive all rights of subrogation in favor of Owner on the most recent ISO form.
1.11	**Notice of Cancellation**	This insurance shall be endorsed to provide a 30 day notice of cancellation to Owner.

1.12	**Prohibitions**	Prohibited exclusions/limitations or their equivalents include but are not limited to: a. Amendment of Insured Contract Definition on the most recent ISO form; b. Any endorsement modifying the Employer's Liability exclusion; c. Classification or Business Description; d. Construction Defect Completed Operations; e. Contractual Liability Limitation on the most recent ISO form; f. Damage to Work Performed by Subcontractors on Your Behalf on the most recent ISO form; g. Explosion, Collapse and Underground Property Damage Hazard, on the most recent ISO form; h. Habitational or Residential; i. "Insured vs. Insured" except Named Insured vs. Named Insured; j. Known, Continuous or Progressive Injury or Damage; k. Limitation of Coverage to Designated Premises, Project or Operation on the most recent ISO form; l. Noncumulation; m. Overspray; n. Prior Injury or Prior Damage or Prior Work; o. Punitive, Exemplary or Multiplied Damages (Where Permitted by Law is acceptable); p. Roofing Warranties, Exclusions or Limitations, including Open Roof or Torch Work; q. Subsidence exclusion; r. Work Height exclusion; s. Any other exclusion or limitation reasonably unacceptable to Owner.

2.0	**Business Auto Liability.** CM is to maintain business auto insurance and, if necessary, commercial excess insurance, meeting at least the following specifications:	
2.1	**Minimum Limits**	The limits of liability shall be no less than $3,000,000 per accident. The policy limits required herein may be provided by a combination of primary and excess policies, but in no event shall the total limits of liability available for any one occurrence or accident be less than the amount required herein.
2.2	**Form**	This insurance is to be issued on the current edition of the most recent ISO form.
2.3	**Scope**	This insurance is to cover damages because of bodily injury or property damages caused by an accident and resulting from the ownership, maintenance or use (1) of any auto, including owned, hired and non-owned autos, and (2) of any mobile equipment subject to compulsory insurance or financial responsibility laws or other motor vehicle insurance laws.
2.4	**Additional Insureds**	Insureds and additional insureds shall include: Owner, Owner's parent corporation, and its subsidiaries and respective members, officers and directors, Contractor, and all Loss Payees and Mortgagees as Named Insureds. Additional Insured status shall be provided in favor of Owner on the most recent ISO form.
2.5	**Primary and Noncontributory**	This insurance shall be endorsed to provide primary and noncontributory liability coverage on the most recent ISO form.
2.6	**Waiver of Right of Recovery and Subrogation**	CM agrees to waive its rights of recovery and shall cause this insurance to be endorsed to waive all rights of subrogation in favor of Owner on the most recent ISO form.
2.7	**Notice of Cancellation**	This insurance shall be endorsed to provide a 30 day notice of cancellation to Owner.

3.0	**Workers' Compensation and Employer's Liability.** CM is to maintain workers' compensation and employer's liability insurance and, if necessary, commercial excess insurance, meeting at least the following specifications:	
3.1	**Workers' Compensation Limits**	The minimum limits of this insurance shall be no less than the statutory limits or $~~$~~1,000,000, whichever is greater.
3.2	**Employer's Liability Limits**	The minimum limits of this insurance shall be no less than $~~$~~1,000,000 each accident and disease. The policy limits required herein may be provided by a combination of primary and excess policies, but in no event shall the total limits of liability available for any one occurrence or accident be less than the amount required herein.
3.3	**Territory**	The state in which the Work is to be performed must be listed under Item 3.A. on the Information Page of the policy.
3.4	**Scope**	This insurance is to cover liability arising out the CM's employment of workers and anyone for whom the CM may be liable for workers' compensation claims. Worker's compensation insurance is required and no "alternative" form of insurance is permitted.
3.5	**Prohibitions**	Employees leased through a Professional Employment Organization ("PEO") are not permitted.
3.6	**Stop Gap**	Stop Gap coverage must be provided if Work is to be performed in a monopolistic state, listing the state(s) in which Work is to be performed.
3.7	**United States Longshoremen and Harbor Workers ("USL&H")**	USL&H coverage must be provided where such exposure exists listing the state(s) in which Work is to be performed.
3.8	**Waiver of Right of Recovery and Subrogation**	To the extent permitted by law, CM agrees to waive its rights of recovery and shall cause this insurance to be endorsed to waive all rights of subrogation in favor of Owner on form WC 42 03 04 B.
3.9	**Notice of Cancellation**	This insurance shall be endorsed to provide a 30 day notice of cancellation to Owner.

4.0	**Excess Liability.** If any of the required coverages are to be maintained by and through excess liability insurance, CM is to maintain excess liability insurance meeting at least the following specifications:	
4.1	**Minimum Limits**	The minimum limits provided by a combination of primary and excess policies shall be no less than: $5,000,000 Each Occurrence $5,000,000 Annual Aggregate
4.2	**Scope**	This insurance shall follow form of the underlying coverages. It shall be excess over and be no less broad than all coverages and conditions described above, including but not limited to the required additional insured status, designated construction project(s) and/or location(s) general aggregate, waiver of subrogation, notice of cancellation, and prohibited exclusions or limitations, and will be primary to and not seek contribution from any other insurance (primary, umbrella, contingent or excess) maintained by Owner.
4.3	**Concurrency**	Such coverage shall have the same inception date as the commercial general liability and employer's liability coverages.
4.4	**Drop Down Coverage**	Drop-down coverage shall be provided for reduction and/or exhaustion of underlying aggregate limits.
4.5	**Defense Costs**	This insurance is to include a duty to defend any insured.

5.0	**Professional Liability.** CM shall maintain Professional Liability insurance meeting at least the following specifications:	
5.1	**Minimum Limits**	Limits of liability for CM, Architect, Structural Engineer, Mechanical/Electrical/Plumbing and Civil Engineer Consultant's Professional Liability shall be no less than $3,000,000 each claim If a combined Pollution Liability and Professional Liability policy is utilized, CM's limits shall be no less than $3,000,000 Each Loss and Aggregate. Professional Liability of other Specialty Consultants, unless otherwise required or specified by Owner at the time the subcontract with a Specialty Consultant is entered into by the CM, shall be no less than: $3,000,000 each loss
5.2	**Scope**	Such insurance shall cover all professional services rendered by the CM and its vicarious liability arising out of engagement of subconsultants and subcontractors under the Agreement, including but not limited to design or design/build services.
5.3	**Waiver of Right of Recovery and Subrogation**	CM agrees to waive its rights of recovery and shall cause this insurance to be endorsed to waive all rights of subrogation in favor of Owner.
5.4	**Notice of Cancellation**	This insurance shall be endorsed to provide a 30 day notice of cancellation to Owner.
5.5	**Retroactive Date**	Any retroactive date must be effective prior to beginning of services for the Owner.

5.6	**Prohibitions**	This insurance is not permitted to include any type of exclusion or limitation of coverage applicable to claims arising from: a. Bodily Injury or Property Damage Where Coverage Is Provided on Behalf of Design Professionals or Construction Managers; b. Habitational or Residential Operations; c. Mold and/or Microbial Matter and/or Fungus and/or Biological Substance; and d. Punitive, Exemplary or Multiplied Damages (Where Permitted By Law is acceptable). A professional liability endorsement to a general liability policy is not acceptable.
5.7	**Term**	Policies written on a Claims-Made basis shall be maintained for at least two years beyond termination of the Agreement. The purchase of an extended discovery period or an extended reporting period on a Claims-Made policy will not be sufficient to meet the terms of this provision.

6.0	**Pollution Liability.** CM shall maintain Pollution Liability insurance meeting at least the following specifications:	
6.1	**Minimum Limits**	Limits of coverage shall be no less than: $3,000,000 each claim If a combined Pollution Liability and Professional Liability policy is utilized, the limits shall be $3,000,000 Each Loss and Aggregate.
6.2	**Scope**	The policy must provide coverage for: a. the full scope of the named insured's Work (on-going and completed) as described within the scope of Work for the Agreement; b. loss arising from pollutants including but not limited to fungus, bacteria, biological substances, mold, microbial matter, asbestos, lead, silica and contaminated drywall; c. third party liability for bodily injury, property damage, clean up expenses, and defense arising from the operations; d. diminution of value and Natural Resources damages; e. contractual liability, and f. claims arising from owned and non-owned disposal sites utilized in the performance of the Agreement. Coverage extensions to the General Liability insurance policy without a separate insurance agreement for Contractors Pollution Liability insurance will not fulfill this requirement
6.3	**Additional Insured**	Insureds and additional insureds shall include: Owner, Owner's parent corporation, and its subsidiaries and respective members, officers and directors, Contractor, and all Loss Payees and Mortgagees as Named Insureds.
6.4	**Insured Contracts**	Coverage shall include but not be limited to liability assumed by Contractor under the Agreement, including the tort liability of another assumed in a business contract.
6.5	**Primary and Noncontributory Coverage**	This insurance shall be endorsed to provide primary and noncontributing liability coverage. It is the specific intent of the parties to the Agreement that all insurance required herein shall be primary to and shall seek no contribution from all insurance held by Owner, with Owner's insurance being excess, secondary and noncontributing.

6.6	**Waiver of Right of Recovery and Subrogation**	CM agrees to waive its rights of recovery and shall cause this insurance to be endorsed to waive all rights of subrogation in favor of Owner.
6.7	**Notice of Cancellation**	This insurance shall be endorsed to provide a 30 day notice of cancellation to Owner.
6.8	**Retroactive Date**	If coverage is provided on a Claims Made basis, coverage will at least be retroactive to the earlier of the date of the Agreement or the commencement of CM services relation to the Work.
6.9	**Prohibitions**	This insurance is not permitted to include any type of exclusion or limitation of coverage applicable to claims arising from: a. Insured vs. Insured actions. However, exclusion for claims made between insured within the same economic family are acceptable; b. Impaired Property That Has Not Been Physically Injured; c. Materials Supplied or Handled by The Named Insured. However, exclusions for the sale and manufacture of products are allowed. Exclusionary language pertaining to materials supplied by the insured shall be reviewed by the certificate holder for approval; d. Property Damage to The Work Performed by the CM; e. Faulty Workmanship as it relates to clean up costs; f. Punitive, Exemplary or Multiplied Damages (Where Permitted by law is acceptable); g. Work Performed by Subcontractors, and h. Contractual Liability incurred as a result of an injury to an employee of the insured.
6.10	**Term**	Completed operations coverage shall be maintained for a minimum of seven (7) years after the completion of work. The extended reporting period on a claims made based policy does not fulfill this requirement. Pollution Liability insurance policies insuring a specific job shall have completed operations coverage for at least the duration of the work plus seven (7) years.

B.	**PROPERTY**	
1.0	**BUILDER'S RISK.** CM is to maintain "all risk" builder's risk at all times prior to acceptance of the Work by Owner.	
1.1	**Insureds**	Insureds shall include: Owner, Owner's parent corporation, and its subsidiaries and respective members, officers and directors, Contractor, Subcontractors, Sub-Subcontractors, and all Loss Payees and Mortgagees as Named Insureds.
1.2	**Amount**	Limits of coverage are to be the initial contract sum as increased by amount of subsequent modification of the contract sum. Coverage shall be provided in amount equal at all times to the full replacement value and cost of debris removal for any single occurrence.
1.3	**Form**	Coverage shall be at least as broad as an unmodified ISO Special Causes of Loss form and shall include coverage for theft, collapse, flood and earthquake. All exclusions must be pre-approved by Owner. This insurance is to be written on a Completed Value, non-reporting form basis and shall be primary to any other insurance coverage available to the named insureds, with that other insurance being excess, secondary and noncontributing. No coinsurance is permitted.
1.4	**Covered Property**	Such insurance shall cover: a. All structure(s) under construction, including retaining walls, paved surfaces and roadways, bridges, glass, foundation(s), footings, underground pipes and wiring, excavations, grading, backfilling or filling. b. All temporary structures (e.g., fencing, scaffolding, cribbing, false work, forms, site lighting, temporary utilities and buildings) located at the site. c. All property including materials and supplies on site for installation. d. All property including materials and supplies at other locations but intended for use at the site. e. All property including materials and supplies in transit to the site for installation by all means of transportation other than ocean transit. f. Other property for which an insured is liable in connection with the project.

1.5	**Prohibition**	No protective safeguard warranty is permitted.	
1.6	**Coverage and Minimum Sub-limits**	Coverage	Minimum Sublimit
		a. Additional expenses due to delay in completion of project (where applicable)	TBD
		b. Damage resulting from error, omission or deficiency in construction methods, design, specifications, workmanship or materials, including collapse and ensuing loss	Included without sublimit
		c. Debris removal additional limit	Included without sublimit
		d. Earthquake and Earthquake Sprinkler Leakage	$1,000,000
		e. Flood	$1,000,000
		f. Freezing	Included without sublimit
		g. Mechanical breakdown including hot & cold testing (where applicable)	Included without sublimit
		h. Occupancy pre-completion	Included without sublimit
		i. Ordinance or law	Included without sublimit
		j. Pollutant clean-up and removal	$1,000,000
		k. Preservation of property	Included without sublimit
		l. Replacement cost	Included without sublimit
		m. Theft	Included without sublimit

1.7	**Deductible(s)**	Deductibles shall not exceed:	
		All Risks of Direct Damage, Per Occurrence, except	$10,000
		a. Delayed Opening Waiting Period	5 days
		b. Earthquake and Earthquake Sprinkler Leakage, Per Occurrence	$50,000
		c. Flood, Per Occurrence, excess of maximum available through National Flood Insurance Program.	$50,000
1.8	**Occupancy**	The termination of coverage provision shall be endorsed to permit occupancy of the coverage property being constructed.	
1.9	**Term and Termination**	This insurance shall be maintained in effect, unless otherwise provided for in the Contract Documents, until the earliest of the following dates: a. The date on which all persons and organizations who are insureds under the policy agree that it shall be terminated; b. The date of final payment, as provided for in the Contract Documents; or c. The date on which the insurable interests in the Covered Property of all insureds other than CM have ceased.	
1.10	**Waiver of Right of Recovery and Subrogation**	CM waives all rights against (1) the Owner, (2) the Project, (3) any lender whose loan is secured by a lien against the Work, (4) Subcontractors of any tier, and (5) any other person or entity performing Work by, through or under CM, each of the other.	
1.11	**Notice of Cancellation**	This insurance shall be endorsed to provide a 30-day notice of cancellation to Owner.	

C.	BONDS
1.0	CM shall arrange and furnish, at CM's sole cost and expense, separate performance and payment bonds, with the Penal Sum to be in the full amount of Contract Sum of the Agreement, guaranteeing the faithful performance of all of the provision of this Agreement as well as payment to all persons for labor and material used in the performance of this Agreement. The bonds shall be executed by a surety company acceptable to Owner, on the form attached as **Exhibit "H"** , and shall become a part of this Agreement. Owner may withhold payments on account until such time as said bonds have been furnished and accepted. No change, alteration or modification in the terms and conditions of the Agreement, or in the terms or manner of payment shall in any way exonerate or release, in whole or in part, any surety on any bond furnished on behalf of CM. The cost of the bonds is included in the Contract Sum of the Agreement. Any additions to this Agreement occasioned by Change Orders will include at Owner's expense any additional bond premiums.

2. **General Insurance Requirements.**

.1 **Definitions. For purposes of the Agreement:**

a. "Agreement" means the Agreement to which this Exhibit is attached.

b. "ISO" means Insurance Services Office.

c. "Construction Manager" ("CM") shall include subconsultants and subcontractors of any tier and any other person or entity performing Work by, through or under Construction Manager.

d. "Owner" means (a) the entity defined in the Agreement as Owner ("Owner"), (b) the Project, (c) any lender whose loan is secured by a lien against the Work, (d) their parent corporations, subsidiaries, respective shareholders, members, partners, joint venturers, affiliates, subsidiaries, successors and assigns, (e) any directors, officers, employees, or agents of such persons or entities, and (f) others as required by the Construction Documents.

.2 **Limits.** "Limits" set out in these specifications are the minimum dollar amount of insured coverage for the risk, cause of loss or peril specified. If CM maintains greater limits, then these specifications shall not limit the amount of recovery available to Owner and the limits specified above as the minimum limits are increased to the greater limits.

.3 **Policies**. All policies held by CM and required herein must be written through insurance companies authorized to do business in the State in which the work is to be performed and rated no less than A-: VII in the most current edition of A. M. Best's Key Rating Guide at all times Work is to be performed.

.4 **Waiver.** A waiver of subrogation shall be effective as to a person or entity even though that person or entity would otherwise have a duty of indemnification, Contractual or otherwise, did not pay the insurance premium directly or indirectly, and whether or not the person or entity had an insurable interest in the property damaged.

.5 **Deductibles and Retentions.** If CM elects to self-insure or to maintain insurance required herein subject to deductible and/or retentions exceeding $25,000, Owner and CM shall maintain all rights and obligations between themselves as if CM fully maintained the insurance required herein with a commercial insurer including but not limited to Additional Insured status, Primary and Non-Contributory Liability, Waivers of Rights of Recovery, Other Insurance Clauses and any other extensions of coverage required herein. CM shall pay from is assets the costs, damages, claims, losses and liabilities, including attorney's fees and necessary litigation expenses at least to the extent that an insurance company would have been obligated to pay those amounts if CM had maintained the insurance pursuant to this Exhibit without said deductible or self-insured retention. All deductibles and retentions shall be paid by, assumed by, for the account of, and at the sole risk of the CM. The CM shall not be reimbursed for same by Owner or other additional insureds.

.6 **Forms.** If the forms of policies, endorsements, certificates or evidence of insurance required by this Exhibit are superseded or discontinued, Owner will have the right to require other equivalent forms. Any policy or endorsement form other than a form specified in this Exhibit must be approved in advance by Owner.

.7 **Evidence of Insurance.** CM is to provide Owner with evidence of insurance prior to entry by CM on the property and thereafter is to provide Owner refreshed evidence of continued insurance after the expiration of the current policies prior to the expiration of the current policies. Insurance must be evidenced as follows:

a. ACORD Form 28 Evidence of Commercial Property Insurance for property coverages.

b. ACORD Form 25 Certificate of Liability Insurance for liability coverages which shall specify:

1) Owner as certificate holder at Owner's mailing address;
2) Insured's name, which must match that on the Agreement;
3) Insurance companies producing each coverage and the policy number and policy date of each coverage;
4) Producer of the certificate with correct address and phone number and have the signature of the authorized representative of the producer;
5) Additional Insured status in favor of Owner on forms required herein on General Liability, Auto Liability, Excess Liability and, when required herein, Pollution Liability;
6) Designated Construction Project(s) General Aggregate Limit on General Liability and Excess Liability;
7) Electronic Data Liability on General Liability and Excess Liability;
8) Personal Injury Contractual Liability on General Liability and Excess Liability;
9) Primary and non-contributory status on General Liability, Auto Liability and Excess Liability;
10) Pollution Liability when required herein;
11) Professional Liability when required herein;
12) Waivers of subrogation on all coverages;
13) Amount of any deductible or self-insured retention in excess of $25,000;
14) 30 Day Notice of Cancellation on all coverages, and
15) All exclusions and limitations added by endorsement to the General Liability coverage. This can be achieved by attachment of the Schedule of Forms and Endorsements page.

c. Copies of the following shall also be provided:

1) General Liability Additional Insured endorsement(s);
2) General Liability and Excess Liability Schedule of Forms and Endorsements pages; and
3) 30 Day Notice of Cancellation endorsement applicable to all required policies.

If requested in writing by Owner, CM will provide to Owner a certified copy of any or all insurance policies required herein including endorsements within ten (10) days of any such request.

Commencement of Work without provision of the required certificate of insurance, evidence of insurance and/or required endorsements, or without compliance with any other provision of the Agreement or this Exhibit, shall not constitute a waiver by any

Owner of any rights. The Owner shall have the right, but not the obligation, of prohibiting the CM or any subconsultant or subcontractor from performing any Work until such certificate of insurance, evidence of insurance and/or required endorsements are received and approved by the Owner.

.8 Insurance Requirements of CM's Subconsultants and Subcontractors

a. Insurance similar to that required of the CM shall be provided by all subconsultants and subcontractors (or provided by the CM on behalf of subconsultants and subcontractors) to cover operations performed under any subcontract agreement. The CM shall be held responsible for any modification in these insurance requirements as they apply to subconsultants and subcontractors. The CM shall maintain certificates of insurance from all subconsultants and subcontractors containing provisions similar to those listed herein (modified to recognize that the certificate is from subconsultants or subcontractor) enumerating, among other things, the waivers of subrogation, additional insured status, and primary liability as required herein, and make them available to the Owner upon request.

b. The CM is fully responsible for loss and damage to its property on the site, including tools and equipment, and shall take necessary precautions to prevent damage to or vandalism, theft, burglary, pilferage and unexplained disappearance of property. Any insurance covering the CM's or its subconsultant's or subcontractor's property shall be the CM's and its subconsultant's and subcontractor's sole and complete means or recovery for any such loss. To the extent any loss is not covered by said insurance or subject to any deductible or co-insurance, the CM and its subconsultants and subcontractors shall not be reimbursed for same. Should the CM or its subconsultants or subcontractors choose to self insure this risk, it is expressly agreed that the CM hereby waives, and shall cause its subconsultants and subcontractors to waive, any claim for damage or loss to said property in favor of the Owner.

3. **Miscellaneous**

.1 **Release and Waiver.** The CM hereby waives all rights of recovery and releases, and shall cause its subconsultants and subcontractors to release, the Owner from any and all claims or causes of action whatsoever which the CM and/or its subconsultants and subcontractors might otherwise now or hereafter possess resulting in or from or in any way connected with any loss covered by insurance, whether required herein or not, or which should have been covered by insurance required herein, including the deductible and/or uninsured portion thereof, maintained and/or required to be maintained by the CM and/or its subconsultants and subcontractors pursuant to the Agreement. **THE FOREGOING RELEASE AND WAIVER APPLY EVEN IF THE LOSS OR DAMAGE IS CAUSED IN WHOLE OR IN PART BY THE FAULT OR NEGLIGENCE OR STRICT LIABILITY OF THE OWNER.**

.2 **No Waiver.** Failure of any Owner to demand such certificate or other evidence of full compliance with these insurance requirements or failure of any Owner to identify a deficiency from evidence that is provided shall not be construed as a waiver of the CM's obligation to maintain such insurance.

.3 **Suspension.** Owner shall have the right, but not the obligation, of suspending CM's authority to perform Work, without an increase in the sum payable by Owner to CM due to such suspension, until such certificates or other evidence that the required insurance has been placed in compliance with these requirements is received and approved by Owner.

.4 **Post Completion Coverage.** With respect to the insurance to be maintained after final payment to CM, an additional certificate(s) evidencing such coverage shall be provided to Owner with final application for payment if prior certificate has expired, and thereafter upon renewal or replacement of such insurance until the expiration of the time period for which such insurance must be maintained.

.5 **Compliance With Laws.** If any insurance requirements are deemed to violate any law, statute or ordinance, the insurance requirements shall be reformed to provide the maximum amount of protection to Owner as allowed under the law.

.6 **Use of the Owners Equipment.** The CM, its agents, employees, subconsultants, subcontractors or suppliers shall use the Owners equipment only with express written permission of the Owners designated representative and in accordance with the Owners terms and condition for such use. If the CM or any of its agents, employees, subconsultants, subcontractors or suppliers utilize any of the Owners equipment for any purpose, including machinery, tools, scaffolding, hoists, lifts or similar items owned, leased or under the control of the Owner, the CM shall defend, indemnify and be liable to the Owner for any and all loss or damage which may arise from such use. **THE FOREGOING INDEMNITY APPLIES EVEN IF THE LOSS OR DAMAGE IS CAUSED IN WHOLE OR IN PART BY THE FAULT OR NEGLIGENCE OR STRICT LIABILITY OF THE OWNER.**

.7 **CM Insurance Representations to Owner.**

a. It is expressly understood and agreed that the insurance coverages required herein (a) represent Owner's minimum requirements and are not to be construed to void or limit the CM's indemnity obligations as contained in the Agreement nor represent in any manner a determination of the insurance coverages the CM should or should not maintain for its own protection; and (b) are being, or have been, obtained by the CM in support of the CM's liability and indemnity obligations under the Agreement. Irrespective of the requirements as to insurance to be carried as provided for herein, the insolvency, bankruptcy or failure of any insurance company carrying insurance of the CM, or the failure of any insurance company to pay claims accruing, shall not be held to affect, negate or waive any of the provisions of the Agreement.

b. Failure to obtain and maintain the required insurance shall constitute a material breach of, and default under, the Agreement. If the CM shall fail to remedy such breach within five (5) business days after notice by the Owner, the CM will be liable for any and all costs, liabilities, damages and penalties resulting to the Owner from such breach, unless a written waiver of the specific insurance requirement(s) is provided to the CM by the Owner. In the event of any failure by the CM to comply with the provisions of the Agreement, the Owner may, without in any way compromising or waiving any right or remedy at law or in equity, on notice to the CM, purchase such insurance, at the CM's expense, provided that the Owner shall have no obligation to do so and if the Owner shall do so, the CM shall not be relieved of or excused from the obligation to obtain and maintain such insurance amounts and coverages.

.8 **Survival.** This Exhibit is an independent contract provision and shall survive the completion of the Work or termination or expiration of the Construction Agreement.

ARTICLE 1 GENERAL PROVISIONS

§ 1.1 Basic Definitions

§ 1.1.1 The Contract Documents

All references to "Contractor" shall mean "Construction Manager in lieu thereof. The Contract Documents are enumerated in the Agreement between the Owner and Contractor (hereinafter the Agreement) and consist of the Agreement, Conditions of the Contract (General, Supplementary and other Conditions), Drawings, Specifications, Addenda issued prior to execution of the Contract, other documents listed in the Agreement, and Modifications issued after execution of the Contract. A Modification is (1) a written amendment to the Contract signed by both parties, (2) a Change Order, (3) a Construction Change Directive, or (4) a written order for a minor change in the Work issued by the Architect. Unless specifically enumerated in the Agreement, the Contract Documents do not include the advertisement or invitation to bid, Instructions to Bidders, sample forms, other information furnished by the Owner in anticipation of receiving bids or proposals, the Contractor's bid or proposal, or portions of Addenda relating to bidding or proposal requirements.

§ 1.1.2 The Contract

The Contract Documents form the Contract for Construction. The Contract represents the entire and integrated agreement between the parties hereto and supersedes prior negotiations, representations, or agreements, either written or oral. The Contract may be amended or modified only by a Modification. The Contract Documents shall not be construed to create a contractual relationship of any kind (1) between the Contractor and the Architect or the Architect's consultants, (2) between the Owner and a Subcontractor or a Sub-subcontractor, (3) between the Owner and the Architect or the Architect's consultants, or (4) between any persons or entities other than the Owner and the Contractor. The Architect shall, however, be entitled to performance and enforcement of obligations under the Contract intended to facilitate performance of the Architect's duties.

§ 1.1.3 The Work

The term "Work" means the construction and services required by the Contract Documents, whether completed or partially completed, and includes all other labor, materials, equipment, and services provided or to be provided by the Contractor to fulfill the Contractor's obligations. The Work may constitute the whole or a part of the Project.

§ 1.1.4 The Project

The Project is the total construction of which the Work performed under the Contract Documents may be the whole or a part and which may include construction by the Owner and by Separate Contractors.

§ 1.1.5 The Drawings

The Drawings are the graphic and pictorial portions of the Contract Documents showing the design, location and dimensions of the Work, generally including plans, elevations, sections, details, schedules, and diagrams.

§ 1.1.6 The Specifications

The Specifications are that portion of the Contract Documents consisting of the written requirements for materials, equipment, systems, standards and workmanship for the Work, and performance of related services.

§ 1.1.7 Instruments of Service

Instruments of Service are representations, in any medium of expression now known or later developed, of the tangible and intangible creative work performed by the Architect and the Architect's consultants under their respective professional services agreements. Instruments of Service may include, without limitation, studies, surveys, models, sketches, drawings, specifications, and other similar materials.

§ 1.1.8 Initial Decision Maker

The Initial Decision Maker is the person identified in the Agreement to render initial decisions on Claims in accordance with Section 15.2. The Initial Decision Maker shall not show partiality to the Owner or Contractor and shall not be liable for results of interpretations or decisions rendered in good faith.

§ 1.2 Correlation and Intent of the Contract Documents

§ 1.2.1 The intent of the Contract Documents is to include all items necessary for the proper execution and completion of the Work by the Contractor. The Contract Documents are complementary, and what is required by one shall be as binding as if

User Notes: (1299270998)

required by all; performance by the Contractor shall be required only to the extent consistent with the Contract Documents and reasonably inferable from them as being necessary to produce the indicated results.

§ 1.2.1.1 The invalidity of any provision of the Contract Documents shall not invalidate the Contract or its remaining provisions. If it is determined that any provision of the Contract Documents violates any law, or is otherwise invalid or unenforceable, then that provision shall be revised to the extent necessary to make that provision legal and enforceable. In such case the Contract Documents shall be construed, to the fullest extent permitted by law, to give effect to the parties' intentions and purposes in executing the Contract.

§ 1.2.2 Organization of the Specifications into divisions, sections and articles, and arrangement of Drawings shall not control the Contractor in dividing the Work among Subcontractors or in establishing the extent of Work to be performed by any trade.

§ 1.2.3 Unless otherwise stated in the Contract Documents, words that have well-known technical or construction industry meanings are used in the Contract Documents in accordance with such recognized meanings.

§ 1.3 Capitalization

Terms capitalized in these General Conditions include those that are (1) specifically defined, (2) the titles of numbered articles, or (3) the titles of other documents published by the American Institute of Architects.

§ 1.4 Interpretation

In the interest of brevity the Contract Documents frequently omit modifying words such as "all" and "any" and articles such as "the" and "an," but the fact that a modifier or an article is absent from one statement and appears in another is not intended to affect the interpretation of either statement.

§ 1.5 Ownership and Use of Drawings, Specifications, and Other Instruments of Service

§ 1.5.1 The Architect and the Architect's consultants shall be deemed the authors and owners of their respective Instruments of Service, including the Drawings and Specifications, and retain all common law, statutory, and other reserved rights in their Instruments of Service, including copyrights. The Contractor, Subcontractors, Sub-subcontractors, and suppliers shall not own or claim a copyright in the Instruments of Service. Submittal or distribution to meet official regulatory requirements or for other purposes in connection with the Project is not to be construed as publication in derogation of the Architect's or Architect's consultants' reserved rights.

§ 1.5.2 The Contractor, Subcontractors, Sub-subcontractors, and suppliers are authorized to use and reproduce the Instruments of Service provided to them, subject to any protocols established pursuant to Sections 1.7 and 1.8, solely and exclusively for execution of the Work. All copies made under this authorization shall bear the copyright notice, if any, shown on the Instruments of Service. The Contractor, Subcontractors, Sub-subcontractors, and suppliers may not use the Instruments of Service on other projects or for additions to the Project outside the scope of the Work without the specific written consent of the Owner, Architect, and the Architect's consultants.

§ 1.6 Notice

§ 1.6.1 Except as otherwise provided in Section 1.6.2, where the Contract Documents require one party to notify or give notice to the other party, such notice shall be provided in writing to the designated representative of the party to whom the notice is addressed and shall be deemed to have been duly served if delivered in person, by mail, by courier, or by electronic transmission if a method for electronic transmission is set forth in the Agreement.

§ 1.6.2 Notice of Claims as provided in Section 15.1.3 shall be provided in writing and shall be deemed to have been duly served only if delivered to the designated representative of the party to whom the notice is addressed by certified or registered mail, or by courier providing proof of delivery.

§ 1.7 Digital Data Use and Transmission

The parties shall agree upon protocols governing the transmission and use of Instruments of Service or any other information or documentation in digital form. The parties will use AIA Document E203™–2013, Building Information Modeling and Digital Data Exhibit, to establish the protocols for the development, use, transmission, and exchange of digital data.

§ 1.8 Building Information Models Use and Reliance

Any use of, or reliance on, all or a portion of a building information model without agreement to protocols governing the use of, and reliance on, the information contained in the model and without having those protocols set forth in AIA Document E203™–2013, Building Information Modeling and Digital Data Exhibit, and the requisite AIA Document G202™–2013, Project Building Information Modeling Protocol Form, shall be at the using or relying party's sole risk and without liability to the other party and its contractors or consultants, the authors of, or contributors to, the building information model, and each of their agents and employees.

ARTICLE 2 OWNER

§ 2.1 General

§ 2.1.1 The Owner is the person or entity identified as such in the Agreement and is referred to throughout the Contract Documents as if singular in number. The Owner shall designate in writing a representative who shall have express authority to bind the Owner with respect to all matters requiring the Owner's approval or authorization. Except as otherwise provided in Section 4.2.1, the Architect does not have such authority. The term "Owner" means the Owner or the Owner's authorized representative.

§ 2.1.2 The Owner shall furnish to the Contractor, within fifteen days after receipt of a written request, information necessary and relevant for the Contractor to evaluate, give notice of, or enforce mechanic's lien rights. Such information shall include a correct statement of the record legal title to the property on which the Project is located, usually referred to as the site, and the Owner's interest therein.

§ 2.2 Evidence of the Owner's Financial Arrangements

§ 2.2.1 Prior to commencement of the Work and upon written request by the Contractor, the Owner shall furnish to the Contractor reasonable evidence that the Owner has made financial arrangements to fulfill the Owner's obligations under the Contract. The Contractor shall have no obligation to commence the Work until the Owner provides such evidence. If commencement of the Work is delayed under this Section 2.2.1, the Contract Time shall be extended appropriately.

§ 2.2.2 Following commencement of the Work and upon written request by the Contractor, the Owner shall furnish to the Contractor reasonable evidence that the Owner has made financial arrangements to fulfill the Owner's obligations under the Contract only if (1) the Owner fails to make payments to the Contractor as the Contract Documents require; (2) the Contractor identifies in writing a reasonable concern regarding the Owner's ability to make payment when due; or (3) a change in the Work materially changes the Contract Sum. If the Owner fails to provide such evidence, as required, within fourteen days of the Contractor's request, the Contractor may immediately stop the Work and, in that event, shall notify the Owner that the Work has stopped. However, if the request is made because a change in the Work materially changes the Contract Sum under (3) above, the Contractor may immediately stop only that portion of the Work affected by the change until reasonable evidence is provided. If the Work is stopped under this Section 2.2.2, the Contract Time shall be extended appropriately and the Contract Sum shall be increased by the amount of the Contractor's reasonable costs of shutdown, delay and start-up, plus interest as provided in the Contract Documents.

§ 2.2.3 After the Owner furnishes evidence of financial arrangements under this Section 2.2, the Owner shall not materially vary such financial arrangements without prior notice to the Contractor.

§ 2.2.4 Where the Owner has designated information furnished under this Section 2.2 as "confidential," the Contractor shall keep the information confidential and shall not disclose it to any other person. However, the Contractor may disclose "confidential" information, after seven (7) days' notice to the Owner, where disclosure is required by law, including a subpoena or other form of compulsory legal process issued by a court or governmental entity, or by court or arbitrator(s) order. The Contractor may also disclose "confidential" information to its employees, consultants, sureties, Subcontractors and their employees, Sub-subcontractors, and others who need to know the content of such information solely and exclusively for the Project and who agree to maintain the confidentiality of such information.

§ 2.3 Information and Services Required of the Owner

§ 2.3.1 Except for permits and fees that are the responsibility of the Contractor under the Contract Documents, including those required under Section 3.7.1, the Owner shall secure and pay for necessary approvals, easements, assessments and charges required for construction, use or occupancy of permanent structures or for permanent changes in existing facilities.

User Notes: (1299270998)

§ 2.3.2 The Owner shall retain an architect lawfully licensed to practice architecture, or an entity lawfully practicing architecture, in the jurisdiction where the Project is located. That person or entity is identified as the Architect in the Agreement and is referred to throughout the Contract Documents as if singular in number.

§ 2.3.3 (Intentionally omitted).

§ 2.3.4 The Owner shall furnish surveys to the extent available to the Owner describing physical characteristics, legal limitations and utility locations for the site of the Project, and a legal description of the site. The Contractor shall be entitled to rely on the accuracy of information furnished by the Owner but shall exercise proper precautions relating to the safe performance of the Work.

§ 2.3.5 The Owner shall furnish information or services required of the Owner by the Contract Documents with reasonable promptness. The Owner shall also furnish any other information or services under the Owner's control and relevant to the Contractor's performance of the Work with reasonable promptness after receiving the Contractor's written request for such information or services.

§ 2.3.6 Unless otherwise provided in the Contract Documents, the Owner shall furnish to the Contractor one copy of the Contract Documents for purposes of making reproductions pursuant to Section 1.5.2.

§ 2.4 Owner's Right to Stop the Work

§ 2.4.1 If the Contractor fails to correct Work that is not in accordance with the requirements of the Contract Documents as required by Section 12.2 or repeatedly fails to carry out Work in accordance with the Contract Documents, the Owner may issue a written order to the Contractor to stop the Work, or any portion thereof, until the cause for such order has been eliminated; however, the right of the Owner to stop the Work shall not give rise to a duty on the part of the Owner to exercise this right for the benefit of the Contractor or any other person or entity, except to the extent required by Section 6.1.3. The Owner shall incur no liability for delays occasioned by any stop-work order issued in accordance with this paragraph.

§ 2.4.2 If, after consultation with the Architect, suspension of the Work is warranted by reason of unforeseen conditions which may adversely affect the quality of the Work if such Work were continued, the Owner may suspend the Work by written notice to the Contractor. In such event, the Contract Time shall be adjusted accordingly, and the Contract Sum shall be adjusted to the extent, if any, that additional costs are incurred by reason of such suspension. If the Contractor, in its reasonable judgment, believes that a suspension is warranted by reason of unforeseen circumstances which may adversely affect the quality of the Work if the Work were continued, the Contractor shall immediately notify the Owner and the Architect of such belief and describe with particularity the reasons therefor.

§ 2.5 Owner's Right to Carry Out the Work

If the Contractor defaults or neglects to carry out the Work in accordance with the Contract Documents and fails within a ten-day period after receipt of notice from the Owner to commence and continue correction of such default or neglect with diligence and promptness, the Owner may, without prejudice to other remedies the Owner may have, commence and continue to carry out the Work. The Architect may, pursuant to Section 9.5.1, withhold or nullify a Certificate for Payment in whole or in part, to the extent reasonably necessary to reimburse the Owner for the reasonable cost of correcting such deficiencies, including Owner's expenses and compensation for the Architect's additional services made necessary by such default, neglect, or failure. If current and future payments are not sufficient to cover such amounts, the Contractor shall pay the difference to the Owner. If the Contractor disagrees with the actions of the Owner or the Architect, or the amounts claimed as costs to the Owner, the Contractor may file a Claim pursuant to Article 15. The right of Owner to stop the Work pursuant to this Section 2.5 shall not give rise to any duty on the part of the Owner to exercise this right for the benefit of the Contractor or any other person or entity.

ARTICLE 3 CONTRACTOR

§ 3.1 General

§ 3.1.1 The Contractor is the person or entity identified as such in the Agreement and is referred to throughout the Contract Documents as if singular in number. The Contractor shall be lawfully licensed, if required in the jurisdiction where the Project is located. The Contractor shall designate in writing a representative who shall have express authority to bind the Contractor with respect to all matters under this Contract. The term "Contractor" means the Contractor or the Contractor's authorized representative.

User Notes: (1299270998)

§ 3.1.2 The Contractor shall perform the Work in accordance with the Contract Documents.

§ 3.1.3 The Contractor shall not be relieved of its obligations to perform the Work in accordance with the Contract Documents either by activities or duties of the Architect in the Architect's administration of the Contract, or by tests, inspections or approvals required or performed by persons or entities other than the Contractor.

§ 3.2 Review of Contract Documents and Field Conditions by Contractor

§ 3.2.1 Execution of the Contract by the Contractor is a representation that the Contractor has visited the site, become generally familiar with local conditions under which the Work is to be performed, and correlated personal observations with requirements of the Contract Documents.

§ 3.2.2 Because the Contract Documents are complementary, the Contractor shall, before starting each portion of the Work, carefully study and compare the various Contract Documents relative to that portion of the Work, as well as the information furnished by the Owner pursuant to Section 2.3.4, shall take field measurements of any existing conditions related to that portion of the Work, and shall observe any conditions at the site affecting it. These obligations are for the purpose of facilitating coordination and construction by the Contractor and are not for the purpose of discovering errors, omissions, or inconsistencies in the Contract Documents; however, the Contractor shall promptly report to the Architect any errors, inconsistencies or omissions discovered by or made known to the Contractor as a request for information in such form as the Architect may require. It is recognized that the Contractor's review is made in the Contractor's capacity as a contractor and not as a licensed design professional, unless otherwise specifically provided in the Contract Documents.

§ 3.2.3 The Contractor is not required to ascertain that the Contract Documents are in accordance with applicable laws, statutes, ordinances, codes, rules and regulations, or lawful orders of public authorities, but the Contractor shall promptly report to the Architect any nonconformity discovered by or made known to the Contractor as a request for information in such form as the Architect may require.

§ 3.2.4 If the Contractor believes that additional cost or time is involved because of clarifications or instructions the Architect issues in response to the Contractor's notices or requests for information pursuant to Sections 3.2.2 or 3.2.3, the Contractor shall submit Claims as provided in Article 15. If the Contractor fails to perform the obligations of Sections 3.2.2 or 3.2.3, the Contractor shall pay such costs and damages to the Owner, subject to Section 15.1.7, as would have been avoided if the Contractor had performed such obligations. If the Contractor performs those obligations, the Contractor shall not be liable to the Owner or Architect for damages resulting from errors, inconsistencies or omissions in the Contract Documents, for differences between field measurements or conditions and the Contract Documents, or for nonconformities of the Contract Documents to applicable laws, statutes, ordinances, codes, rules and regulations, and lawful orders of public authorities.

§ 3.3 Supervision and Construction Procedures

§ 3.3.1 The Contractor shall supervise and direct the Work, using the Contractor's best skill and attention and in accordance with all local and Florida licensing requirements and Florida Building Code. The Contractor shall be solely responsible for, and have control over, construction means, methods, techniques, sequences, and procedures, and for coordinating all portions of the Work under the Contract. If the Contract Documents give specific instructions concerning construction means, methods, techniques, sequences, or procedures, the Contractor shall evaluate the jobsite safety thereof and shall be solely responsible for the jobsite safety of such means, methods, techniques, sequences, or procedures. If the Contractor determines that such means, methods, techniques, sequences or procedures may not be safe, the Contractor shall give timely notice to the Owner and Architect, and shall propose alternative means, methods, techniques, sequences, or procedures. The Architect shall evaluate the proposed alternative solely for conformance with the design intent for the completed construction. Unless the Architect objects to the Contractor's proposed alternative, the Contractor shall perform the Work using its alternative means, methods, techniques, sequences, or procedures.

§ 3.3.2 The Contractor shall be responsible to the Owner for acts and omissions of the Contractor's employees, Subcontractors and their agents and employees, and other persons or entities performing portions of the Work for, or on behalf of, the Contractor or any of its Subcontractors. The Contractor agrees to remove from the Project any employee, Subcontractor, or Subcontractor employee that commits any breach of the Contract Documents or any breach of the Owner's written rules and regulations regarding jobsite conduct.

User Notes: (1299270998)

§ 3.3.3 The Contractor shall enforce strict discipline and good order among the Contractor's employees and other persons carrying out the Work. Contractor shall not permit employment of unfit persons or persons not properly skilled in tasks assigned to them. The Contractor shall require all construction personnel to maintain a neat general appearance at all times. Shirts, trousers and proper shoes are required apparel. The display of vulgar words, signs or figures is prohibited. Sandals and flip-flops are prohibited on the Project site. The use of radios, tape players, CD players, boom boxes, sound producing devices and the like are prohibited on the Project site. The Contractor shall not be permitted to use restrooms or other sanitary facilities within the Owner's existing buildings or on-site facilities.

§ 3.3.4 The Contractor shall be responsible for inspection of portions of Work already performed to determine that such portions are in proper condition to receive subsequent Work. Neither the presence or absence of the Owner or Architect shall relieve the Contractor from any requirements of the Contract Documents.

§ 3.3.5 The Contractor will be responsible for all building grades, lines, levels, etc., required for layout of the Work.

§ 3.3.6 If required by Owner on a project where applicable, at the earliest possible time after the commencement of the Work on the Project site, the Contractor shall have all property corners and benchmarks verified or established by a state-licensed

land surveyor, shall locate the Project on the Project site, establishing necessary reference marks and axes from which the work accurately can progress, shall furnish Architect evidence of such verification and shall report at once any errors discovered during the process of such verification.

§ The Contractor will be responsible for all building grades, lines, levels, etc., required for layout of the Work **3.3.7** If any of the Work is required to be inspected or approved by any public authority, the Contractor shall cause such inspection or approval to be performed. No inspection performed or failed to be performed by the Owner hereunder shall be a waiver of any of the Contractor's obligations hereunder or be construed as an approval or acceptance of the Work or any part thereof.

§ 3.3.8 The Contractor acknowledges that it is the Contractor's responsibility to hire all personnel for the proper and diligent prosecution of the Work and the Contractor shall use its best efforts to maintain labor peace for the duration of the Project. In the event of a labor dispute of the Contractor, its subcontractors or suppliers, the Contractor shall not be entitled to any increase in the Contract Sum.

§ 3.4 Labor and Materials

§ 3.4.1 Unless otherwise provided in the Contract Documents, the Contractor shall provide and pay for labor, materials, equipment, tools, construction equipment and machinery, water, heat, utilities, transportation, and other facilities and services necessary for proper execution and completion of the Work, whether temporary or permanent and whether or not incorporated or to be incorporated in the Work.

§ 3.4.2 Equal Opportunity

§ 3.4.2.1 The Contractor shall maintain policies of employment as follows: (1) the Contractor and the Contractors Subcontractors shall not discriminate against any employer or applicant for employment because of race, gender, religion, national origin, ethnicity, sexual orientation, age, or disability (2) the Contractor and the Contractors Subcontractors shall, in all solicitations or advertisements for employers placed by them or on their behalf, state that all qualified applicants will receive consideration for employment without regard to race, gender, religion, national origin, ethnicity, sexual orientation, age, or disability.

§ 3.4.3 The Contractor may make substitutions only with the consent of the Owner, after evaluation by the Architect and in accordance with a Change Order of other appropriate written directive by the Owner.

§ 3.4.4 Value Engineering Incentive

§ 3.4.4.1 Any proposal initiated and developed by the Contractor for variation from contractual requirements, which to be acceptable under the Contract would necessitate issuance of a contractual change and which reduces the cost of performing the Contract, without degrading operational functions: e.g., performance, reliability or maintainability of the item. Such proposals would be submitted by the Contractor to the Architect in the same form as prescribed for any

User Notes: (1299270998)

other proposal, which would likewise necessitate a change in the contractual requirements but would include a statement that they are a proposed Value Engineering Change subject to the operation of this clause.

§ 3.4.4.2 The Architect will be the sole judge of acceptability, and no substitute will be ordered, installed, used or initiated without the Architect's prior written acceptance which will be evidenced by Change Order. However, any Value Engineering Change accepted by the Architect shall not result in any increase in the Contract Price or Contract Time.

§ 3.4.5 Owner Direct Purchase

§ 3.4.5.1 The Owner is tax exempt and may wish to exercise its right to purchase directly various construction materials, supplies and equipment that may be part of the Contract. The Owner will, via its purchase orders, purchase that material and the Contractor shall assist the Owner in the preparation of purchase orders. The Owner may direct the Contractor to prepare the purchase order on the Owner's form and make ready for verification and execution by the Owner. The materials shall be purchased from the vendors and or suppliers originally selected by the Contractor, for the price originally negotiated by the Contractor. Within thirty (30) days of the Notice to Proceed (NTP) the Contractor shall prepare a complete list of materials, supplies and equipment, including the cost of each item, for the Project and the Owner will advise the Contractor in writing which items from the list the Owner wishes to purchase directly.

§ 3.4.5.2 At a time deemed acceptable to the Owner, the Contract amount shall be reduced by the net, undiscounted amount of the purchase order, plus all sales taxes and surtax as levied. Issuance of the purchase orders by the Owner does not change any of the Contractor's responsibilities regarding material purchases, or installations, with the exception of the payments for the materials purchased. The Contractor remains responsible for coordination, correct quantities ordered, submittals, protection, storage, scheduling, shipping, security, expedition, receiving and unloading, certifying the accuracy of shipping tickets and invoices, installation, cleaning, all applicable warranties and that all materials purchased meet the requirements of the Contract Documents. The Contractor shall certify all invoices as accurate and acceptable and forward to the Owner the certified invoices for payment by the Owner.

§ 3.4.5.3 In the event that materials, supplies or equipment purchased under this option are defective or rejected for any reason whatsoever, and it becomes necessary in the opinion of the Contractor to initiate legal action against the responsible party, the Owner agrees to assign and subordinate to the Contractor any claims the Owner has against the responsible party resulting from the purchase order and to execute any legal documents necessary to accomplish the assignment, subordination or subrogation of such claims, and to cooperate with the Contractor in such legal action.

§ 3.4.5.4 The Contractor agrees to execute the Owner's document "Contractor's Direct Material Purchase Affidavit" and to submit the affidavit to the Owner along with the above described list of materials, supplies and equipment, as agreed to between the Owner and Contractor. Tax savings will be returned to the Owner via Change Order.

§ 3.5 Warranty

§ 3.5.1 The Contractor warrants to the Owner and Architect that materials and equipment furnished under the Contract will be of good quality and new unless the Contract Documents require or permit otherwise. The Contractor further warrants that the Work will conform to the requirements of the Contract Documents and will be free from defects, except for those inherent in the quality of the Work the Contract Documents require or permit. Work, materials, or equipment not conforming to these requirements may be considered defective. The Contractor's warranty excludes remedy for damage or defect caused by abuse, alterations to the Work not executed by the Contractor, improper or insufficient maintenance, improper operation, or normal wear and tear and normal usage. If required by the Architect, the Contractor shall furnish satisfactory evidence as to the kind and quality of materials and equipment.

§ 3.5.2 All material, equipment, or other special warranties required by the Contract Documents shall be issued in the name of the Owner, or shall be transferable to the Owner, and shall commence in accordance with Section 9.8.4.

§ 3.6 Taxes

The Contractor shall pay sales, consumer, use and similar taxes for the Work provided by the Contractor that are legally enacted when bids are received or negotiations concluded, whether or not yet effective or merely scheduled to go into effect.

§ 3.7 Permits, Fees, Notices and Compliance with Laws

§ 3.7.1 Unless otherwise provided in the Contract Documents, the Contractor shall secure and pay for the building permit as well as for other permits, fees, licenses, and inspections by government agencies necessary for proper execution and completion of the Work that are customarily secured after execution of the Contract and legally required at the time bids are received or negotiations concluded.

§ 3.7.2 The Contractor shall comply with and give notices required by applicable laws, statutes, ordinances, codes, rules and regulations, and lawful orders of public authorities applicable to performance of the Work. Contractor shall comply with all applicable federal, state, and city statutes, safety regulations, codes, ordinances and orders, including the Occupational Safety and Health Administration Act of 1970 (OSHA), as amended from time to time.

§ 3.7.3 If the Contractor performs Work knowing it to be contrary to applicable laws, statutes, ordinances, codes, rules and regulations, or lawful orders of public authorities, the Contractor shall assume appropriate responsibility for such Work and shall bear the costs attributable to correction.

§ 3.7.4 Concealed or Unknown Conditions (Excluding Claims for Unsuitable Soils)

If the Contractor encounters conditions at the site that are (1) subsurface or otherwise concealed physical conditions that differ materially from those indicated in the Contract Documents or (2) unknown physical conditions of an unusual nature that differ materially from those ordinarily found to exist and generally recognized as inherent in construction activities of the character provided for in the Contract Documents, the Contractor shall promptly provide notice to the Owner and the Architect before conditions are disturbed and in no event later than 14 days after first observance of the conditions. The Architect will promptly investigate such conditions and, if the Architect determines that they differ materially and cause an increase or decrease in the Contractor's cost of, or time required for, performance of any part of the Work, will recommend that an equitable adjustment be made in the Contract Sum or Contract Time, or both. If the Architect determines that the conditions at the site are not materially different from those indicated in the Contract Documents and that no change in the terms of the Contract is justified, the Architect shall promptly notify the Owner and Contractor, stating the reasons if either party disputes the Architect's determination or recommendation, that party may submit a Claim as provided in Article 15.

§ 3.7.5 If, in the course of the Work, the Contractor encounters human remains or recognizes the existence of burial markers, archaeological sites or wetlands not indicated in the Contract Documents, the Contractor shall immediately suspend any operations that would affect them and shall notify the Owner and Architect. Upon receipt of such notice, the Owner shall promptly take any action necessary to obtain governmental authorization required to resume the operations. The Contractor shall continue to suspend such operations until otherwise instructed by the Owner but shall continue with all other operations that do not affect those remains or features. Requests for adjustments in the Contract Sum and Contract Time arising from the existence of such remains or features may be made as provided in Article 15. At any event the contractor will only proceed with the approval of the third party inspector, the Engineer of Record, Architect and the Owner. Once approved by all parties, only then the contractor will proceed with the said work and will track the changes to provide to the owner for any contract adjustment.

§ 3.7.6 **Claims for Unsuitable Soils** "Unsuitable soil" does not include soil with high or low moisture content or soil adversely affected by weather conditions and no claim for additional cost will be accepted based solely on the moisture content of excavated material. If the excavated material is unsatisfactoly for the specified use on the project solely because of either high or low moisture content or the soil is adversely affected by weather conditions, the Contractor may, in its discretion, either (1) process the material to adjust the moisture content to the specified condition or an acceptable condition if not specified, or (2) remove the material and replace it with satisfactory material. Contractor's election of either option will be at Contractor's expense with no additional cost to the Owner.

§ 3.8 Allowances

§ 3.8.1 The Contractor shall include in the Contract Sum all allowances stated in the Contract Documents. Items covered by allowances shall be supplied for such amounts and by such persons or entities as the Owner may direct, but the Contractor shall not be required to employ persons or entities to whom the Contractor has reasonable objection.

§ 3.8.2 Unless otherwise provided in the Contract Documents,

AIA Document A201 – 2017. Copyright © 1911, 1915, 1918, 1925, 1937, 1951, 1958, 1961, 1963, 1966, 1970, 1976, 1987, 1997, 2007 and 2017. All rights reserved. User Notes: (1299270998)

.1 allowances shall cover the cost to the Contractor of materials and equipment delivered at the site and all required taxes, less applicable trade discounts;

.2 Contractor's costs for unloading and handling at the site, labor, installation costs, overhead, profit, and other expenses contemplated for stated allowance amounts shall be included in the Contract Sum but not in the allowances; and

.3 whenever costs are more than or less than allowances, the Contract Sum shall be adjusted accordingly by Change Order. The amount of the Change Order shall reflect (1) the difference between actual costs and the allowances under Section 3.8.2.1 and (2) changes in Contractor's costs under Section 3.8.2.2.

§ 3.8.3 Materials and equipment under an allowance shall be selected by the Owner with reasonable promptness.

§ 3.9 Superintendent

§ 3.9.1 The Contractor shall employ a competent superintendent and necessary assistants who shall be in attendance at the Project site during all performance of the Work. The superintendent shall represent the Contractor, and communications given to the superintendent shall be as binding as if given to the Contractor. Important communications shall be confirmed in writing. Other communication shall be similarly confirmed on written request in each case. The superintendent shall be satisfactory to the Owner in all respects, and Owner shall have the right with reasonable evidence to require Contractor to dismiss from the Project any superintendent whose performance is not satisfactory to Owner, and to replace such superintendent with a superintendent satisfactory to the Owner. The Contractor shall not replace the superintendent without the written consent of the Owner, which shall not be unreasonably withheld. The Owner shall respond in a timely manner to approve the request and avoid any delay to the project.

§ 3.9.2 The Contractor, as soon as practicable after award of the Contract, shall notify the Owner and Architect of the name and qualifications of a proposed superintendent. Within 14 days of receipt of the information, the Architect may notify the Contractor, stating whether the Owner or the Architect (1) has reasonable objection to the proposed superintendent or (2) requires additional time for review. Failure of the Architect to provide notice within the 14-day period shall constitute notice of no reasonable objection.

§ 3.9.3 The Contractor shall not employ a proposed superintendent to whom the Owner or Architect has made reasonable and timely objection. The Contractor shall not change the superintendent without the Owner's consent, which shall not unreasonably be withheld or delayed.

§ 3.9.4 The list of all supervisory personnel, including the project manager and superintendent, that the Contractor intends to use on the Project and a chain-of-command organizational chart shall be submitted to the Owner for approval. The Contractor shall not engage supervisory personnel or utilize an organization and chain-of-command other than as approved by Owner in writing, and shall not change such personnel or form of organization without the written approval of the Owner.

§ 3.10 Contractor's Construction and Submittal Schedules

§ 3.10.1 The Contractor, promptly after being awarded the Contract, shall submit for the Owner's and Architect's information a Contractor's construction schedule for the Work. The schedule shall contain detail appropriate for the Project, including (1) the date of commencement of the Work, interim schedule milestone dates, and the date of Substantial Completion; (2) an apportionment of the Work by construction activity; and (3) the time required for completion of each portion of the Work. The schedule shall provide for the orderly progression of the Work to completion and shall not exceed time limits current under the Contract Documents. The schedule shall be revised at appropriate intervals as required by the conditions of the Work and Project.

§ 3.10.2 Within thirty (30) days of Notice to Proceed (NTP), the Contractor shall prepare, for the Architect's approval and thereafter keep current, a schedule of submittals which is coordinated with the Contractor's construction schedule and allows the Architect reasonable time to review submittals. No payment shall be due until this schedule is submitted and approved.

§ 3.10.3 The Contractor shall perform the Work in general accordance with the most recent schedules submitted to the Owner and Architect.

User Notes: (1299270998)

§ 3.10.4 If the Contractor submits a schedule indicating an intention to achieve completion of the Work prior to contractually required dates, including milestones, no liability of the Owner to the Contractor for any failure of the Contractor to complete early shall be created, whether or not the Owner approve such schedule.

§ 3.10.5 At the Owner's option, the Contractor shall provide a schedule utilizing critical path techniques to measure the progress of the Work. Such schedules shall be subject to the Owner's and Architect's written approval.

§ 3.10.6 Float or slack is not for the exclusive use or benefit of either the Owner or the Contractor. Extensions of time for performance will be granted only to the extent that the equitable time adjustments for the activity or activities affected exceed the total float along the activity chain involved at the time the change was ordered or the delay occurred. Notwithstanding the above, the Contractor shall only be entitled to an extension of the time for an excusable delay to the critical path of the Work that delays completion of the Project beyond the completion date stated in the Agreement.

§ 3.10.7 The Contractor acknowledges that the Owner may retain the services of a scheduling consultant at the Owner's expense. The Contractor shall cooperate with any such scheduling consultant at the Owner's direction, including, without limitation, with regard to the preparation of the Project schedule.

§ 3.11 As Built Drawings and Documents and Samples at the Site

§ 3.11.1 As Built drawings shall be updated monthly, which shall be a condition precedent to all Progress Payments, and shall provide as much accuracy as possible. Complete as-built drawings shall be submitted to and accepted by the Architect and are a condition precedent to Final Payment. Completed as-built drawings shall be submitted as paper documents and in PDF format (scan document file acceptable) for approval by the Owner.

§ 3.11.2 The Contractor shall make available, at the Project site, the Contract Documents, including Change Orders, Construction Change Directives, and other Modifications, in good order and marked currently to indicate field changes and selections made during construction, and the approved Shop Drawings, Product Data, Samples, and similar required submittals. These shall be in electronic form or paper copy, available to the Architect and Owner, and delivered to the Architect for submittal to the Owner upon completion of the Work as a record of the Work as constructed.

§ 3.11.3 The Contractor shall maintain all approved permit drawings in a manner so as to make them accessible to governmental inspectors and other authorized agencies. All approved drawings shall be wrapped, marked with appropriate identification and delivered to the Owner within sixty (60) days of final completion of the Work.

§ 3.12 Shop Drawings, Product Data and Samples

§ 3.12.1 Shop Drawings are drawings, diagrams, schedules, and other data specially prepared for the Work by the Contractor or a Subcontractor, Sub-subcontractor, manufacturer, supplier, or distributor to illustrate some portion of the Work.

§ 3.12.2 Product Data are illustrations, standard schedules, performance charts, instructions, brochures, diagrams, and other information furnished by the Contractor to illustrate materials or equipment for some portion of the Work.

§ 3.12.3 Samples are physical examples that illustrate materials, equipment, or workmanship, and establish standards by which the Work will be judged.

§ 3.12.4 Shop Drawings, Product Data, Samples, and similar submittals are not Contract Documents. Their purpose is to demonstrate how the Contractor proposes to conform to the information given and the design concept expressed in the Contract Documents for those portions of the Work for which the Contract Documents require submittals. Review by the Architect is subject to the limitations of Section 4.2.7. Informational submittals upon which the Architect is not expected to take responsive action may be so identified in the Contract Documents. Submittals that are not required by the Contract Documents may be returned by the Architect without action.

§ 3.12.5 The Contractor shall review for compliance with the Contract Documents, approve, and submit to the Architect, Shop Drawings, Product Data, Samples, and similar submittals required by the Contract Documents, in

accordance with the submittal schedule approved by the Architect or, in the absence of an approved submittal schedule, with reasonable promptness and in such sequence as to cause no delay in the Work or in the activities of the Owner or of Separate Contractors.

§ 3.12.6 By submitting Shop Drawings, Product Data, Samples, and similar submittals, the Contractor represents to the Owner and Architect that the Contractor has (1) reviewed and approved them, (2) determined and verified materials, field measurements and field construction criteria related thereto, or will do so, and (3) checked and coordinated the information contained within such submittals with the requirements of the Work and of the Contract Documents.

§ 3.12.7 The Contractor shall perform no portion of the Work for which the Contract Documents require submittal and review of Shop Drawings, Product Data, Samples, or similar submittals, until the respective submittal has been approved by the Architect.

§ 3.12.8 The Work shall be in accordance with approved submittals except that the Contractor shall not be relieved of responsibility for deviations from the requirements of the Contract Documents by the Architect's approval of Shop Drawings, Product Data, Samples, or similar submittals, unless the Contractor has specifically notified the Architect of such deviation at the time of submittal and (1) the Architect has given written approval to the specific deviation as a minor change in the Work, or (2) a Change Order or Construction Change Directive has been issued authorizing the deviation. The Contractor shall not be relieved of responsibility for errors or omissions in Shop Drawings, Product Data, Samples, or similar submittals, by the Architect's approval thereof.

§ 3.12.9 The Contractor shall direct specific attention, in writing or on resubmitted Shop Drawings, Product Data, Samples, or similar submittals, to revisions other than those requested by the Architect on previous submittals. In the absence of such notice, the Architect's approval of a resubmission shall not apply to such revisions.

§ 3.12.10 The Contractor shall not be required to provide professional services that constitute the practice of architecture or engineering unless such services are specifically required by the Contract Documents for a portion of the Work or unless the Contractor needs to provide such services in order to carry out the Contractor's responsibilities for construction means, methods, techniques, sequences, and procedures. The Contractor shall not be required to provide professional services in violation of applicable law.

§ 3.12.10.1 If professional design services or certifications by a design professional related to systems, materials, or equipment are specifically required of the Contractor by the Contract Documents, the Owner and the Architect will specify all performance and design criteria that such services must satisfy. The Contractor shall be entitled to rely upon the adequacy and accuracy of the performance and design criteria provided in the Contract Documents. The Contractor shall cause such services or certifications to be provided by an appropriately licensed design professional, whose signature and seal shall appear on all drawings, calculations, specifications, certifications, Shop Drawings, and other submittals prepared by such professional. Shop Drawings, and other submittals related to the Work, designed or certified by such professional, if prepared by others, shall bear such professional's written approval when submitted to the Architect. The Owner and the Architect shall be entitled to rely upon the adequacy and accuracy of the services, certifications, and approvals performed or provided by such design professionals, provided the Owner and Architect have specified to the Contractor the performance and design criteria that such services must satisfy. Pursuant to this Section 3.12.10, the Architect will review and approve or take other appropriate action on submittals only for the limited purpose of checking for conformance with information given and the design concept expressed in the Contract Documents.

§ 3.12.10.2 If the Contract Documents require the Contractor's design professional to certify that the Work has been performed in accordance with the design criteria, the Contractor shall furnish such certifications to the Architect at the time and in the form specified by the Architect.

§ 3.13 Use of Site

The Contractor shall confine operations at the site to areas permitted by applicable laws, statutes, ordinances, codes, rules and regulations, lawful orders of public authorities, and the Contract Documents and shall not unreasonably encumber the site with materials or equipment. The Contractor shall be responsible for the permitting, erection. maintaining and removal of all construction signage. The Contractor must submit all sign copy for approval prior to erecting or displaying. The Contractor and Owner shall meet promptly after execution of the Agreement to determine

User Notes: (1299270998)

reasonable requirements for ingress and egress from the site. Reasonable locations for staging, parking and a single construction entrance shall be designated by the Contractor, subject to the Owner's approval.

§ 3.14 Cutting and Patching

§ 3.14.1 The Contractor shall be responsible for cutting, fitting, or patching required to complete the Work or to make its parts fit together properly. All areas requiring cutting, fitting, or patching shall be restored to the condition existing prior to the cutting, fitting, or patching, unless otherwise required by the Contract Documents.

§ 3.14.2 The Contractor shall not damage or endanger a portion of the Work or fully or partially completed construction of the Owner or Separate Contractors by cutting, patching, or otherwise altering such construction, or by excavation. The Contractor shall not cut or otherwise alter construction by the Owner or a Separate Contractor except with written consent of the Owner and of the Separate Contractor. Consent shall not be unreasonably withheld. The Contractor shall not unreasonably withhold, from the Owner or a Separate Contractor, its consent to cutting or otherwise altering the Work.

§ 3.15 Cleaning Up

§ 3.15.1 The Contractor shall keep the premises and surrounding area free from accumulation of waste materials and rubbish caused by operations under the Contract. The Contractor shall prevent paint, mortar and concrete splatter on concrete sidewalks and stair tower floors. Any such splatter shall be immediately removed so no evidence of splatter remains. All construction debris shall be removed in a timely manner. Surrounding graded and grassed areas shall be regularly magnetically scanned to collect miscellaneous nails and other sharp objects; the Contractor shall remove such objects from the construction site. At completion of the Work, the Contractor shall remove waste materials, rubbish, the Contractor's tools, construction equipment, machinery, and surplus materials from and about the Project.

§ 3.15.2 If the Contractor fails to clean up as provided in the Contract Documents, the Owner may do so and the Owner shall be entitled to reimbursement from the Contractor.

§ 3.15.3 Immediately prior to the Architect's inspection for Substantial Completion, the Contractor shall completely clean the premises utilizing a licensed cleaning service. Concrete and ceramic surfaces shall be cleaned and washed. Woodwork and resilient shall be dusted and cleaned. Sash, fixtures and equipment shall be thoroughly cleaned. Stains, spots, dust, marks and smears shall be removed from all surfaces. Hardware and metal surfaces shall be cleaned and polished. Glass and plastic surfaces shall be thoroughly cleaned by professional window cleaners. All damaged, broken or scratched glass or plastic shall be replaced by the Contractor at the Contractor's expense.

§ 3.16 Access to Work

The Contractor shall provide the Owner and Architect with access to the Work in preparation and progress wherever located.

§ 3.17 Royalties, Patents and Copyrights

The Contractor shall pay all royalties and license fees. The Contractor shall defend suits or claims for infringement of copyrights and patent rights and shall hold the Owner and Architect harmless from loss on account thereof, but shall not be responsible for defense or loss when a particular design, process, or product of a particular manufacturer or manufacturers is required by the Contract Documents, or where the copyright violations are contained in Drawings, Specifications, or other documents prepared by the Owner or Architect. However, if an infringement of a copyright or patent is discovered by, or made known to, the Contractor, the Contractor shall be responsible for the loss unless the information is promptly furnished to the Architect.

§ 3.18 Indemnification

(Paragraph deleted)

§ 3.18.1 For one hundred dollars ($100.00), which is included in the contract price, the other good and valuable considerations, receipt of which is hereby acknowledged by the Contractor as consideration for the indemnity herein; said Contractor hereby agrees to indemnify the Owner, their officers and their employees, from and against all claims, damages, losses and expenses, including but not limited to reasonable attorney's fees, to the extent caused by the performance of Work, provided that any such claim, damage, loss or expense is (1) attributed to bodily injury, sickness, disease or death, or to injury to, or destruction of tangible property, other than the Work itself, including the loss of use resulting therefrom, and (2) caused in whole or in part by any act or omission of the Contractor, any Subcontractor, anyone directly or indirectly employed by any of them or anyone for whose acts any of them may be liable, regardless or not it is caused

in part by a party indemnified hereunder. Such obligation shall not be construed to negate, abridge or otherwise reduce any other right or obligation of indemnity which otherwise exist as to any part or person described in this Article.

§ 3.18.2 In claims against any person or entity indemnified under this Section 3.18 by an employee of the Contractor, a Subcontractor, anyone directly or indirectly employed by them, or anyone for whose acts they may be liable, the indemnification obligation under Section 3.18.1 shall not be limited by a limitation on amount or type of damages, compensation, or benefits payable by or for the Contractor or a Subcontractor under workers' compensation acts, disability benefit acts, or other employee benefit acts.

§ 3.18.3 (Intentionally omitted).

§ 3.18.4 Notwithstanding the above and without monetary limitation, the Contractor hereby indemnifies and holds harmless the Owner, their officers and employees, from liabilities, damages, losses and costs, including, but not limited to, reasonable attorney's fees, to the extent caused by the negligence, recklessness, or intentional wrongful misconduct of the Contractor and persons employed or utilized by the Contractor in the performance of the construction Contract.

ARTICLE 4 ARCHITECT

§ 4.1 General

§ 4.1.1 The Architect is the person or entity retained by the Owner pursuant to Section 2.3.2 and identified as such in the Agreement.

§ 4.1.2 Duties, responsibilities, and limitations of authority of the Architect as set forth in the Contract Documents shall not be restricted, modified, or extended without written consent of the Owner, Contractor, and Architect. Consent shall not be unreasonably withheld.

§ 4.2 Administration of the Contract

§ 4.2.1 The Architect will provide administration of the Contract as described in the Contract Documents and will be an Owner's representative during construction until final payment is due and with the Owner's authorization, from time to time during the one-year period for correction of Work described in Section 12.2. The Architect will have authority to act on behalf of the Owner only to the extent provided in the Contract Documents, unless otherwise modified in writing in accordance with other provisions of the Contract.

§ 4.2.2 The Architect will visit the site at intervals appropriate to the stage of construction, or as otherwise agreed with the Owner, to become generally familiar with the progress and quality of the portion of the Work completed, and to determine in general if the Work observed is being performed in a manner indicating that the Work, when fully completed, will be in accordance with the Contract Documents. However, the Architect will not be required to make exhaustive or continuous on-site inspections to check the quality or quantity of the Work. The Architect will not have control over, charge of, or responsibility for the construction means, methods, techniques, sequences or procedures, or for the safety precautions and programs in connection with the Work, since these are solely the Contractor's rights and responsibilities under the Contract Documents.

§ 4.2.3 On the basis of the site visits, the Architect will keep the Owner reasonably informed about the progress and quality of the portion of the Work completed, and promptly report to the Owner (1) known deviations from the Contract Documents, (2) known deviations from the most recent construction schedule submitted by the Contractor, and (3) defects and deficiencies observed in the Work. The Architect will not be responsible for the Contractor's failure to perform the Work in accordance with the requirements of the Contract Documents. The Architect will not have control over or charge of, and will not be responsible for acts or omissions of, the Contractor, Subcontractors, or their agents or employees, or any other persons or entities performing portions of the Work.

§ 4.2.4 Communications

The Owner and Contractor shall include the Architect in all communications that relate to or affect the Architect's services or professional responsibilities. The Owner shall promptly notify the Architect of the substance of any direct communications between the Owner and the Contractor otherwise relating to the Project. Communications by and with the Architect's consultants shall be through the Architect. Communications by and with Subcontractors and suppliers shall be through the Contractor. Communications by and with Separate Contractors shall be through the Owner. The Contract Documents may specify other communication protocols.

§ 4.2.5 Based on the Architect's evaluations of the Contractor's Applications for Payment, the Architect will review and certify the amounts due the Contractor and will issue Certificates for Payment in such amounts.

§ 4.2.6 The Architect has authority to reject Work that does not conform to the Contract Documents. Whenever the Architect considers it necessary or advisable, the Architect will have authority to require inspection or testing of the Work in accordance with Sections 13.4.2 and 13.4.3, whether or not the Work is fabricated, installed or completed. However, neither this authority of the Architect nor a decision made in good faith either to exercise or not to exercise such authority shall give rise to a duty or responsibility of the Architect to the Contractor, Subcontractors, suppliers, their agents or employees, or other persons or entities performing portions of the Work.

§ 4.2.7 The Architect will review and approve, or take other appropriate action upon, the Contractor's submittals such as Shop Drawings, Product Data, and Samples, but only for the limited purpose of checking for conformance with information given and the design concept expressed in the Contract Documents. The Architect's action will be taken in accordance with the submittal schedule approved by the Architect or, in the absence of an approved submittal schedule, with reasonable promptness while allowing sufficient time in the Architect's professional judgment to permit adequate review. Review of such submittals is not conducted for the purpose of determining the accuracy and completeness of other details such as dimensions and quantities, or for substantiating instructions for installation or performance of equipment or systems, all of which remain the responsibility of the Contractor as required by the Contract Documents. The Architect's review of the Contractor's submittals shall not relieve the Contractor of the obligations under Sections 3.3, 3.5, and 3.12. The Architect's review shall not constitute approval of safety precautions or of any construction means, methods, techniques, sequences, or procedures. The Architect's approval of a specific item shall not indicate approval of an assembly of which the item is a component.

§ 4.2.8 The Architect will prepare Change Orders and Construction Change Directives, and may order minor changes in the Work as provided in Section 7.4. The Architect will investigate and make determinations and recommendations regarding concealed and unknown conditions as provided in Section 3.7.4.

§ 4.2.9 The Architect will conduct inspections to determine the date or dates of Substantial Completion and the date of final completion; issue Certificates of Substantial Completion pursuant to Section 9.8; receive and forward to the Owner, for the Owner's review and records, written warranties and related documents required by the Contract and assembled by the Contractor pursuant to Section 9.10; and issue a final Certificate for Payment pursuant to Section 9.10.

§ 4.2.10 If the Owner and Architect agree, the Architect will provide one or more Project representatives to assist in carrying out the Architect's responsibilities at the site. The Owner shall notify the Contractor of any change in the duties, responsibilities and limitations of authority of the Project representatives.

§ 4.2.11 The Architect will interpret and decide matters concerning performance under, and requirements of, the Contract Documents on written request of either the Owner or Contractor. The Architect's response to such requests will be made in writing within any time limits agreed upon or otherwise with reasonable promptness.

§ 4.2.12 Interpretations and decisions of the Architect will be consistent with the intent of, and reasonably inferable from, the Contract Documents and will be in writing or in the form of drawings. When making such interpretations and decisions, the Architect will endeavor to secure faithful performance by both Owner and Contractor, will not show partiality to either, and will not be liable for results of interpretations or decisions rendered in good faith.

§ 4.2.13 The Architect's decisions on matters relating to aesthetic effect will be final if consistent with the intent expressed in the Contract Documents.

§ 4.2.14 The Architect will review and respond to requests for information about the Contract Documents. The Architect's response to such requests will be made in writing within any time limits agreed upon or otherwise with reasonable promptness. If appropriate, the Architect will prepare and issue supplemental Drawings and Specifications in response to the requests for information.

ARTICLE 5 SUBCONTRACTORS

§ 5.1 Definitions

§ 5.1.1 A Subcontractor is a person or entity who has a direct contract with the Contractor to perform a portion of the Work at the site. The term "Subcontractor" is referred to throughout the Contract Documents as if singular in number and means a Subcontractor or an authorized representative of the Subcontractor. The term "Subcontractor" does not include a Separate Contractor or the subcontractors of a Separate Contractor.

§ 5.1.2 A Sub-subcontractor is a person or entity who has a direct or indirect contract with a Subcontractor to perform a portion of the Work at the site. The term "Sub-subcontractor" is referred to throughout the Contract Documents as if singular in number and means a Sub-subcontractor or an authorized representative of the Sub-subcontractor.

§ 5.2 Award of Subcontracts and Other Contracts for Portions of the Work

§ 5.2.1 Unless otherwise stated in the Contract Documents, the Contractor, as soon as practicable after award of the Contract, shall notify the Owner and Architect of the persons or entities proposed for each principal portion of the Work, including those who are to furnish materials or equipment fabricated to a special design. Within 14 days of receipt of the information, the Architect may notify the Contractor whether the Owner or the Architect (1) has reasonable objection to any such proposed person or entity or (2) requires additional time for review. Failure of the Architect to provide notice within the 14-day period shall constitute notice of no reasonable objection.

§ 5.2.2 The Contractor shall not contract with a proposed person or entity to whom the Owner or Architect has made reasonable and timely objection. The Contractor shall not be required to contract with anyone to whom the Contractor has made reasonable objection.

§ 5.2.3 If the Owner or Architect has reasonable objection to a person or entity proposed by the Contractor, the Contractor shall propose another to whom the Owner or Architect has no reasonable objection. If the proposed but rejected Subcontractor was reasonably capable of performing the Work, the Contract Sum and Contract Time shall be increased or decreased by the difference, if any, occasioned by such change, and an appropriate Change Order shall be issued before commencement of the substitute Subcontractor's Work. However, no increase in the Contract Sum or Contract Time shall be allowed for such change unless the Contractor has acted promptly and responsively in submitting names as required.

§ 5.2.4 The Contractor shall not substitute a Subcontractor, person, or entity for one previously selected if the Owner or Architect makes reasonable objection to such substitution.

§ 5.2.5 The Contractor shall disclose the existence and extent of any financial interest, whether direct or indirect, it has in any subcontractors or material suppliers which it proposes for the Project.

§ 5.3 Subcontractual Relations

By appropriate written agreement, the Contractor shall require each Subcontractor, to the extent of the Work to be performed by the Subcontractor, to be bound to the Contractor by terms of the Contract Documents, and to assume toward the Contractor all the obligations and responsibilities, including the responsibility for safety of the Subcontractor's Work that the Contractor, by these Contract Documents, assumes toward the Owner and Architect. Each subcontract agreement shall preserve and protect the rights of the Owner and Architect under the Contract Documents with respect to the Work to be performed by the Subcontractor so that subcontracting thereof will not prejudice such rights, and shall allow to the Subcontractor, unless specifically provided otherwise in the subcontract agreement, the benefit of all rights, remedies, and redress against the Contractor that the Contractor, by the Contract Documents, has against the Owner. Where appropriate, the Contractor shall require each Subcontractor to enter into similar agreements with Sub-subcontractors. The Contractor shall make available to each proposed Subcontractor, prior to the execution of the subcontract agreement, copies of the Contract Documents to which the Subcontractor will be bound, and, upon written request of the Subcontractor, identify to the Subcontractor terms and conditions of the proposed subcontract agreement that may be at variance with the Contract Documents. Subcontractors will similarly make copies of applicable portions of such documents available to their respective proposed Sub-subcontractors.

§ 5.4 Contingent Assignment of Subcontracts

§ 5.4.1 Each subcontract agreement for a portion of the Work is assigned by the Contractor to the Owner, provided that

.1 assignment is effective only after termination of the Contract by the Owner for cause pursuant to Section 14.2 or Termination for Convenience by the Owner pursuant to Paragraph 14.4 and only for

those subcontract agreements that the Owner accepts by notifying the Subcontractor and Contractor; and

.2 assignment is subject to the prior rights of the surety, if any, obligated under bond relating to the Contract.

When the Owner accepts the assignment of a subcontract agreement, the Owner assumes the Contractor's rights and obligations under the subcontract subsequent to the date of acceptance of the assignment; however, in no event shall the Owner's acceptance of such an assignment release the Contractor from its obligations under the subcontract agreement or this Agreement. Subcontracts between the Contractor and its Subcontractors shall provide for the assignment of those subcontracts from the Contractor to the Owner at election of the Owner upon termination of the Contractor.

§ 5.4.2 Upon such assignment, if the Work has been suspended for more than 30 days, the Subcontractor's compensation shall be equitably adjusted for increases in direct cost resulting from the suspension beyond the thirty (30) days.

(Paragraph deleted)

ARTICLE 6 CONSTRUCTION BY OWNER OR BY SEPARATE CONTRACTORS

§ 6.1 Owner's Right to Perform Construction and to Award Separate Contracts

§ 6.1.1 The term "Separate Contractor(s)" shall mean other contractors retained by the Owner under separate agreements. The Owner reserves the right to perform construction or operations related to the Project with the Owner's own forces, and with Separate Contractors retained under Conditions of the Contract substantially similar to those of this Contract, including those provisions of the Conditions of the Contract related to insurance and waiver of subrogation.

§ 6.1.2 When separate contracts are awarded for different portions of the Project or other construction or operations on the site, the term "Contractor" in the Contract Documents in each case shall mean the Contractor who executes each separate Owner-Contractor Agreement.

§ 6.1.3 The Owner shall provide for coordination of the activities of the Owner's own forces and of each Separate Contractor with the Work of the Contractor, who shall cooperate with them. The Contractor shall participate with any Separate Contractors and the Owner in reviewing their construction schedules. The Contractor shall make any revisions to its construction schedule deemed necessary after a joint review and mutual agreement. The construction schedules shall then constitute the schedules to be used by the Contractor, Separate Contractors, and the Owner until subsequently revised.
